INTRODUCTION

The Canadian Centre for Health Information, formerly the Health Division of Statistics Canada, began an inventory of residential care facilities in 1974 using an address list from Health and Welfare Canada based on facilities receiving benefits from the Canada Assistance Plan (CAP). Statistics Canada has expanded this inventory. It now includes as the target universe, all residential care facilities in Canada. Annually, provinces and territories are requested to update the inventory of residential care facilities held at Statistics Canada.

The term "residential care facilities" refers to facilities which are approved, funded or licensed by provincial/territorial departments of health and/or social services. Among the facilities included are homes for the aged (including nursing homes), physically handicapped, mentally handicapped, developmentally delayed, psychiatrically disabled, facilities for clients with alcohol and drug problems, for emotionally disturbed children, transients, delinquents and others.

Some of these facilities (homes for the aged, most facilities for the physically handicapped, developmentally delayed and psychiatrically disabled) generally are maintained for people chronically ill or disabled who reside there more or less permanently, in contrast to, for example, a hospital where patients are accommodated on the basis of medical need and are provided with continuing medical care and supporting diagnostic and therapeutic services. Generally residential care facilities provide a level of care that is below hospitals, although there is some overlap. Some psychiatric institutions are included in the inventory of residential care facilities. The

Le Centre canadien d'information sur la santé de Statistique Canada, anciennement appelé Division de la santé, a commencé un répertoire sur les établissements de soins pour bénéficiaires internes en 1974 à l'aide d'une liste d'adresses établie par Santé et Bien-être social Canada, sur laquelle figuraient les coordonnées des établissements recevant des indemnités du Régime d'assistance publique du Canada (RAPC). Statistique Canada a élargi ce répertoire dont l'univers cible comprend maintenant tous les établissements de soins pour bénéficiaires internes du Canada. Chaque année, les provinces et les territoires sont invités à mettre à jour le répertoire des établissements de soins pour bénéficiaires internes dont Statistique Canada assure la tenue.

On entend par «établissements de soins pour bénéficiaires internes» les établissements agréés, subventionnés ou titulaires d'un permis délivré par les ministères provinciaux ou territoriaux de la Santé ou des Services sociaux. Ces établissements regroupent les résidences (maisons de repos comprises) pour les personnes âgées, les personnes souffrant d'un handicap physique ou mental, les handicapés développementaux, les personnes souffrant de troubles psychiques, les alcooliques et les toxicomanes, les enfants souffrant de troubles émotifs, les personnes itinérantes, les délinquants, ainsi que d'autres bénéficiaires.

Certains établissements (les foyers pour les personnes âgées et la plupart des établissements pour les personnes souffrant d'un handicap physique, les handicapés développementaux et les personnes atteintes de troubles psychiques) s'adressent en général à des malades chroniques ou à des personnes handicapées qui y résident plus ou moins en permanence, par opposition par exemple aux hôpitaux où les patients sont accueillis pour des raisons de santé et reçoivent en permanence des soins médicaux et des services diagnostiques et thérapeutiques à l'appui. En général, les soins dispensés par les établissements pour bénéficiaires internes se situent à

un niveau inférieur à celui des services offerts par les hôpitaux, bien qu'il y ait un certain chevauchement. Certains établissements psychiatriques figurent dans le répertoire des établissements de soins pour bénéficiaires internes. Les autres établissements sont inscrits dans le répertoire des hôpitaux et ils remplissent le Rapport annuel des établissements de santé - hôpitaux.

Quant aux autres établissements de soins pour bénéficiaires internes (enfants souffrant de troubles émotifs, alcooliques et toxicomanes, délinquants, personnes itinérantes et autres), ils accueillent les bénéficiaires pendant une période plus courte et dispensent souvent un programme de services.

PURPOSES AND DATA SOURCES

Purposes

Institutional statistics are an essential requirement of several federal departments as well as the various provincial and territorial departments of health and social services. The data are used for the administrative evaluation and planning of provincial and federal programs as well as satisfying many of the needs of administrators, researchers and large special interest groups in the community.

Within Statistics Canada financial data from the survey are provided for economic analysis to Input-Output Division and the System of National Accounts, Labour Division and Public Institutions.

Data Sources

About 80% of the data are received through annual returns completed by individual facilities. The provinces of Quebec and Alberta send data directly to Operation Integration Division, Statistics Canada. This data from Alberta is from nursing homes only (which make up about one third of residential care facilities in Alberta on the Statistics Canada inventory), the remainder of the residential care facilities in the province are surveyed directly.

OBJECTIFS ET PROVENANCE DES DONNÉES

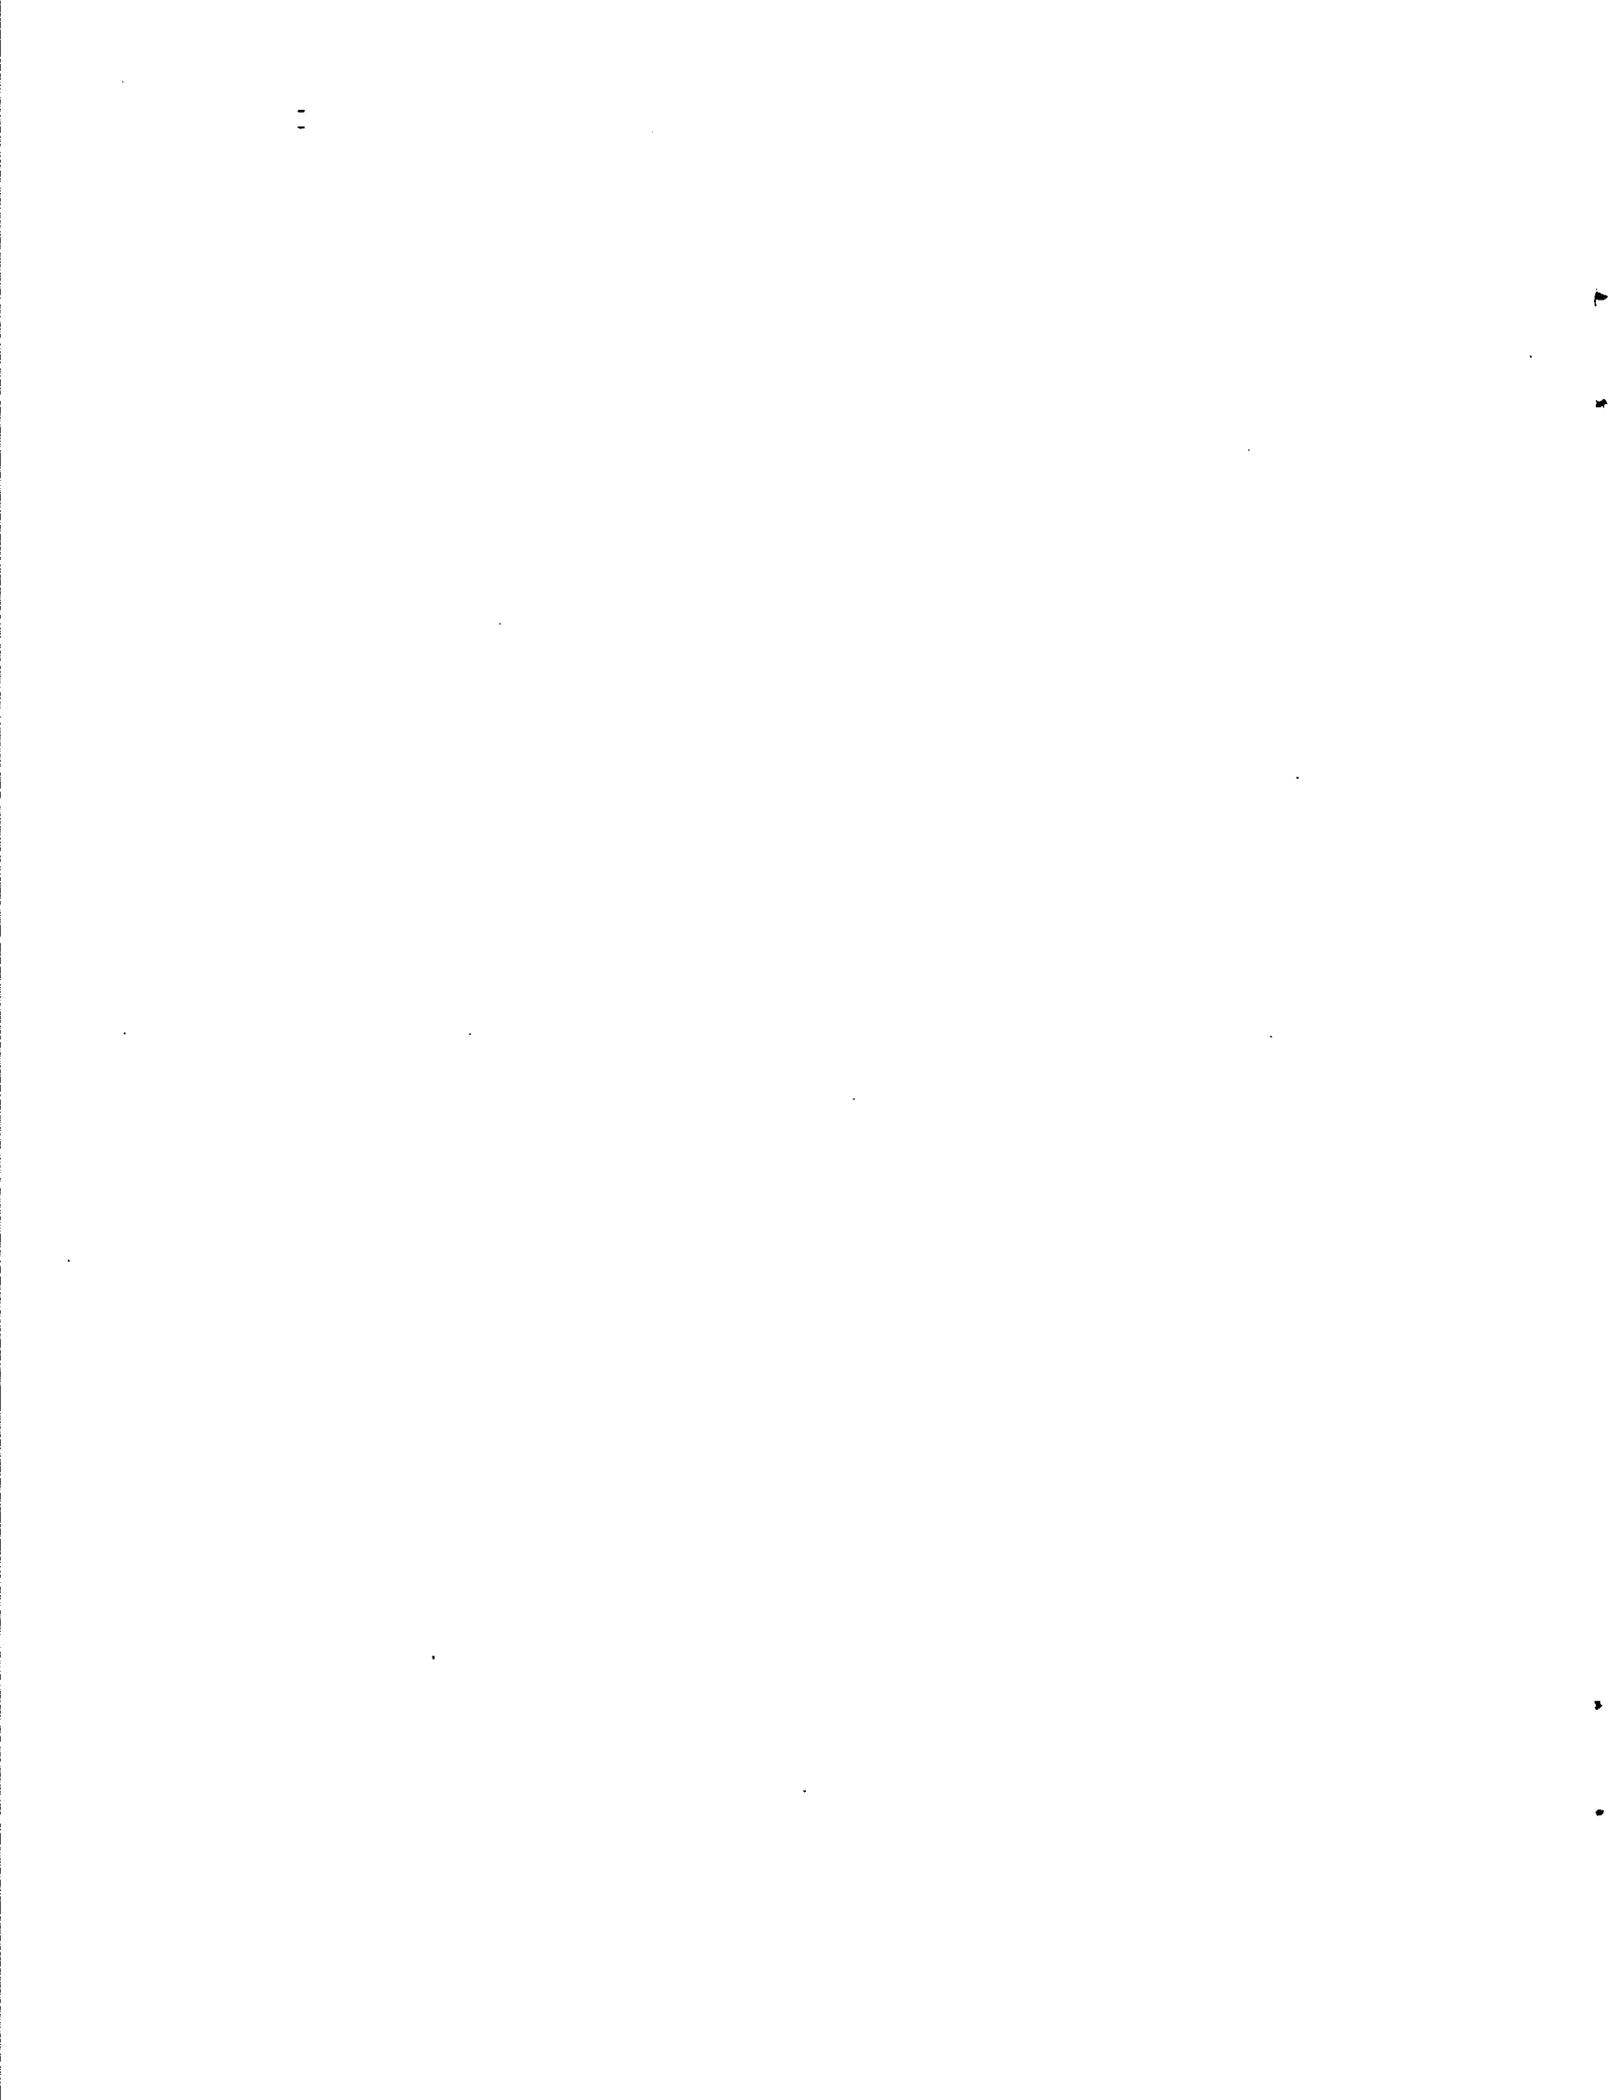

Objectifs

La statistique des établissements est indispensable à plusieurs ministères fédéraux ainsi qu'à divers ministères provinciaux et territoriaux de la Santé et des Services sociaux. Les données servent en outre à évaluer et planifier les programmes provinciaux et fédéraux, et à répondre à bon nombre des besoins des administrateurs, des chercheurs et de grands groupes d'intérêts particuliers de la collectivité.

À Statistique Canada, les données financières tirées de cette enquête permettent à la Division des entrées-sorties et à la Direction du système des comptes nationaux, à la Division du travail et à la Division des Institutions publiques d'effectuer des analyses économiques.

Provenance des données

Environ 80% des données proviennent des déclarations annuelles produites par chacun des établissements. Le Québec et l'Alberta transmettent directement leurs données à la Division de l'intégration des opérations de Statistique Canada. En Alberta, les données sont recueillies exclusivement auprès des maisons de soins infirmiers (soit environ le tiers des établissements albertains de soins pour bénéficiaires inscrits au répertoire de Statistique Canada). Quant aux autres établissements de cette province, ils participent directement à l'enquête.

METHODOLOGY

Data Definitions

There are two survey forms: long and short. The short form is a subset of the long form. These definitions cover the data collected on the long survey form. The description of the long and short form is included under Data Collection which follows this section. "Instructions and Definitions for the Annual Return of Residential Care Facilities" describe the data definitions and are mailed out annually to facilities with the survey forms.

A. Ownership refers to the person, group of persons, agency or corporate body who is the registered owner according to the deed.

1. **Proprietary** applies to a facility owned by an individual. It also applies to private organizations and/or corporations operating for a profit.
2. **Religious** applies to a facility owned and operated by a religious organization on a non-profit basis.
3. **Lay** applies to a facility owned and operated by a voluntary lay body on a non-profit basis. This category excludes facilities maintained by industrial or commercial corporations (see proprietary).
4. **Municipal** applies to a facility owned and operated by a city, county, municipality or other municipal government, or by another body which is empowered to levy taxes or to otherwise operate after the fashion of a municipality.
5. **Provincial or territorial** applies to a facility owned by a branch, division, agency or department of a provincial or territorial government.

MÉTHODOLOGIE

Définitions

Il y a deux questionnaires d'enquête le long et le court. Le questionnaire court est un sous-ensemble du questionnaire long. Les présentes définitions s'appliquent aux données recueillies à l'aide du questionnaire long. La description des questionnaires long et court se retrouve à la section consacrée à la collecte des données qui suit la présente section. Le «Rapport annuel des établissements de soins pour bénéficiaires internes - Directives et définitions» comprend les définitions des données et est envoyé chaque année par la poste aux établissements avec les questionnaires d'enquête.

A. Propriété - il s'agit de la personne ou du groupe de personnes, de l'organisme ou de la personne morale qui sont les propriétaires autorisés de l'établissement en vertu du contrat.

1. **À but lucratif** - s'applique à un établissement appartenant à un particulier, un organisme du secteur privé ou une société qui l'exploite en vue de réaliser des bénéfices.
2. **Religieux** - désigne un établissement détenu et exploité par une congrégation religieuse à des fins non lucratives.
3. **Laique** - s'applique à un établissement détenu et exploité par un organisme bénévole laïque à des fins non lucratives. Cette catégorie exclut les établissements administrés par des sociétés industrielles ou commerciales (voir établissement à but lucratif).
4. **Municipal** - désigne un établissement détenu et exploité par une ville, un comté, une municipalité ou toute autre administration municipale, ou par une autre personne morale habilitée à percevoir des impôts ou à exercer une activité au même titre qu'une municipalité.
5. **Provincial (territorial)** - s'applique à un établissement détenu et exploité par une direction, une division, un organisme ou un ministère provincial ou territorial.

6. **Federal** applies to a facility operated by a department or agency of the Government of Canada, e.g. Veterans' Affairs, Health and Welfare Canada or National Defence.

7. **Other** applies to a facility which does not fit into any of the categories described above.

B. Beds

Approved complement is the number of beds licensed or approved by provincial or municipal authorities.

Staffed and in operation are those beds available for use. They include those occupied and any vacant beds to which residents could be admitted immediately. This amount does not have to agree with the approved complement.

C. Total days of care during reporting period by responsibility for payment

A day of care is the period of service to a resident between the census taking hours on two successive days. The total days of care are the number of days of care in the reporting period or year. A facility of four beds and 100 percent occupancy would report total days of care as (4×365) 1,460. A facility of four beds in which one bed was not occupied for 31 days during the year would report total days of care as 1,429. This could be calculated as $(4 \times 365) - 31$ or counting each day that each bed was occupied $(1 \times 365) + (1 \times 365) + (1 \times 365) + (1 \times 334)$. If unable to provide a breakdown, facilities report days under major funding agency.

6. **Fédéral** - désigne un établissement exploité par un ministère ou un organisme du gouvernement du Canada, p. ex. les Anciens combattants, Santé et Bien-être social Canada ou la Défense nationale.

7. **Autre** - s'applique à un établissement qui ne se classe dans aucune des catégories susmentionnées.

B. Nombre de lits

Complément approuvé - nombre de lits autorisés ou approuvés par les autorités provinciales ou municipales.

Dotés de personnel et en activité - désigne le nombre de lits disponibles. Cela comprend les lits occupés et les lits vacants qui pourraient être immédiatement attribués à des bénéficiaires. Ce chiffre ne coïncide pas nécessairement avec le complément approuvé.

C. Nombre de journées de soins dispensés pendant la période de déclaration selon le mode de prise en charge

Une journée de soins correspond à la période pendant laquelle des services sont fournis à un bénéficiaire entre les heures de recensement, deux jours consécutifs. Le nombre total de jours de soins est le nombre de journées pendant lesquelles des soins ont été dispensés au cours de la période de déclaration ou de l'année. Pour un établissement comptant quatre lits occupés à 100%, le nombre total de journées de soins s'établirait à 1,460 (4×365) . Un établissement doté de quatre lits dont l'un aurait été inoccupé pendant 31 jours au cours de l'année déclarerait au total 1,429 journées de soins, soit $(4 \times 365) - 31$ ou, si l'on compte chacun des jours pendant lesquels chaque lit était occupé $(1 \times 365) + (1 \times 365) + (1 \times 365) + (1 \times 334)$. S'il est impossible de faire une ventilation, les établissements indiquent le nombre de jours correspondant au principal mode de prise en charge.

D. Movement of residents

In facility as at 1 April, 1991 - the count of all the residents who were assigned a bed as at 00:01 hours, 1 April. Included are any resident who was temporarily absent from the facility on this date, e.g. visiting relatives or residents transferred to other institutions such as a hospital, but not formally discharged from facility.

Admission - the official acceptance into the facility of a resident. Reception involves the allocation of a bed to a resident. An admission is registered each time a person is formally admitted.

Total under care - the total of those on the books April 1 plus all admissions during the year.

Discharge - the official departure from the facility of a live resident.

Death - the cessation of life of a resident after admission and before discharge.

Total separations - the total of discharges and deaths.

In facility as at 31 March, 1992 - the count of all residents registered in the facility at 24:00 hours, 31 March and includes residents temporarily out of the facility but not formally discharged.

E. Age and sex of residents - each resident is to be counted only once and assigned to the appropriate age and sex grouping.

F. Types of care

Room and board - for those residents paying only for the use of a room. No services or type of care are received.

Room and board with guidance/counselling - minimum amount of care possible in a facility. Usually basic counselling and assistance with

D. Mouvement des bénéficiaires

Dans l'établissement au 1^{er} avril 1991, le nombre total de bénéficiaires auxquels un lit a été attribué à 1 heure, le 1^{er} avril. Compter tous les bénéficiaires temporairement absents de l'établissement à cette date, c.-à-d. en visite chez des parents ou transférés dans un autre établissement tel un hôpital, mais qui n'ont pas officiellement quitté l'établissement.

Admission - inscription officielle d'un bénéficiaire dans un établissement. L'admission suppose l'attribution d'un lit à un bénéficiaire. Une admission est enregistrée chaque fois qu'une personne est officiellement admise.

Nombre total des bénéficiaires soignés - nombre total de bénéficiaires inscrits en date du 1^{er} avril, plus toutes les admissions enregistrées dans l'année.

Sorties - nombre de bénéficiaires vivants ayant officiellement quitté l'établissement.

Décès - décès d'un bénéficiaire après son admission à l'établissement et avant sa sortie.

Total des radiations - nombre total de sorties et de décès.

Dans l'établissement au 31 mars 1992, nombre total de bénéficiaires inscrits dans l'établissement à 24 heures, le 31 mars; comprend les bénéficiaires temporairement absents de l'établissement, mais qui n'ont pas reçu officiellement leur congé.

E. Âge et sexe des bénéficiaires - compter chaque bénéficiaire une seule fois et le classer dans le groupe d'âge et sexe approprié.

F. Types de soins

Chambre et pension seulement - bénéficiaires ne payant que pour l'utilisation d'une chambre et qui ne reçoivent aucun service ou type de soins.

Chambre et pension avec conseils - bénéficiaires qui reçoivent un minimum de soins dans un établissement. Il s'agit habituellement de conseils

social problems. Most children's and alcohol and drug facilities will be in this category.

Room and board with custodial care - minor supervision required.

Type I Care - is that required by a person who is ambulant and/or independently mobile, who has decreased physical and/or mental faculties, and who requires primarily supervision and/or assistance with activities of daily living and provision for meeting psycho-social needs through social and recreational services. The period of time during which care is required is indeterminate and related to the individual condition but is less than 90 minutes in a 24 hour day.

Type II Care - is that required by a person with a relatively stabilized (physical or mental) chronic disease or functional disability, who, having reached the apparent limit of his recovery, is not likely to change in the near future, who has relatively little need for the diagnostic and therapeutic services of a hospital but who requires availability of personal care for a total of 1 1/2 - 2 1/2 hours in a 24 hour day, with medical and professional nursing supervision and provision for meeting psycho-social needs.

Type III Care - is that required by a person who is chronically ill and/or has a functional disability (physical or mental), whose acute phase of illness is over, whose vital processes may or may not be stable, whose potential for rehabilitation may be limited, and who requires a range of therapeutic services, medical management and skilled nursing care plus provision for meeting psycho-social needs. Soins de type III - soins que nécessite une personne atteinte d'une maladie (physique ou mentale) chronique ou d'une invalidité fonctionnelle, dont la maladie a dépassé la phase aiguë, dont les fonctions vitales peuvent être stables ou non, dont les possibilités de réadaptation peuvent être limitées, et qui requiert une gamme de services thérapeutiques, de gestion médicale et de soins infirmiers de la part d'un personnel expérimenté, de même que des services répondant à ses besoins psychosociaux. Une liste d'équivalences en ce qui concerne les types de soins est présentée à l'Annexe 1 du formulaire.

Data Collection

Generally, only facilities which are four beds and larger are surveyed. The exception is some composite reporting, where a head office reports on all of its residential care facilities, some of which may be under four beds more. Variables collected through annual returns include: income and expenditures, utilization, resident characteristics, type of facility and ownership, personnel and level of care.

Facilities providing self sufficient, minimal or Type I care with ten beds or less receive an abbreviated form (form number 8-2320-8.1 English or 8-2320-8.2 French). These facilities represent 50% of the universe. These facilities report totals for personnel (direct care services and general services) and expenses (direct care services, general services and other expenses).

The remainder of facilities, that is those providing Type II care or higher and ten beds or more receive the standard form (form number 8-2320-10.1 English and 8-2320.10.2 French). These facilities report totals and detailed breakdown for personnel (direct care services, and general services) and expenses (direct care services, general services and other expenses).

The forms are mailed out annually in April. At the end of May, thank-you/reminder cards are sent to facilities from which a survey form has not

Gains divers - inscrire tous les autres revenus ne provenant pas des frais d'hébergement. Compter (s'il y a lieu) la physiothérapie, les services infirmiers spéciaux, les services de coiffure pour hommes ou pour dames, le blanchissage, le nettoyage à sec, les repas servis aux employés ou aux invités, les distributeurs automatiques, le téléphone, les services de garderie, la vente d'articles d'artisanat, etc.

Collecte des données

En général, seuls les établissements comptant quatre lits et plus prennent part à l'enquête. La seule exception concerne les établissements présentant une déclaration mixte: le siège social rend alors compte des activités de l'ensemble de ses établissements de soins pour bénéficiaires internes, dont certains peuvent compter moins de quatre lits. Les variables recueillies à l'aide des déclarations annuelles sont les recettes et les dépenses, l'utilisation, les caractéristiques des bénéficiaires, le type d'établissement et de propriété, le personnel et le niveau des soins.

Les établissements qui dispensent des soins aux bénéficiaires autonomes, des soins minimaux ou des soins de type I et ceux qui comptent au plus dix lits reçoivent un questionnaire abrégé (formulaires 8-2320-8.2 en version française et 8-2320-8.1 en version anglaise). Ces établissements représentent 50% de l'univers. Ils déclarent des totaux pour le personnel (services de soins directs et services généraux) et les dépenses (services de soins directs, services généraux et autres dépenses).

Quant aux autres établissements, c'est-à-dire ceux qui dispensent des soins de type II ou de niveau supérieur et qui sont dotés de dix lits ou plus, ils reçoivent le questionnaire normalisé (formulaires 8-2320.10.2 en version française et 8-2320-10.1 en version anglaise). Ces établissements déclarent des totaux et une ventilation détaillée des données sur le personnel (services de soins directs et services généraux) et les dépenses (services de soins directs, services généraux et autres dépenses).

Les formulaires sont envoyés par la poste une fois par an en avril. À la fin de mai, des cartes de remerciement ou de rappel sont adressées aux

been received. During July and August students are hired to phone the outstanding facilities and remind them to complete and return the form. There are written instructions outlining the procedures for telephone reminders. Again in the fall, telephone calls are made to those facilities who have not returned a form. At this point, an attempt is made to complete the form over the telephone. There are written instructions outlining the procedures for telephone reminder and form completion.

Two provinces, Alberta and Quebec collect data from facilities for their own information and provide Statistics Canada with the data on tape. The tapes are reformatted and loaded so that the data appears in the same format as the survey forms. The data is then subjected to the same manual and on-line editing as the survey forms received directly from facilities. Starting in 1990-91, the auxiliary hospitals in Alberta, previously in Alberta reporting in the Annual Hospital Survey, are included in the Residential Care Facilities survey.

établissements qui n'ont pas encore renvoyé leur questionnaire. En juillet et août, des étudiants sont embauchés pour appeler les établissements retardataires et leur demander de remplir et renvoyer le formulaire. Des instructions écrites leur indiquent les modalités à suivre pour les rappels téléphoniques. De nouveau à l'automne, les établissements qui n'ont toujours pas renvoyé leur questionnaire reçoivent un appel téléphonique. On essaie alors de remplir le questionnaire par téléphone. Des instructions écrites indiquent les modalités à suivre pour effectuer le rappel téléphonique et remplir le formulaire.

Deux provinces, soit l'Alberta et le Québec, recueillent des données auprès des établissements pour répondre à leurs propres besoins en information et fournissent ces données à Statistique Canada sur bande magnétique. Les bandes sont reformatées et chargées pour que les données soient présentées selon la structure des questionnaires d'enquête. Les données font ensuite l'objet des mêmes travaux de vérification manuels et en direct que les questionnaires d'enquête obtenus directement auprès des établissements. Les hôpitaux auxiliaires de l'Alberta, qui auparavant étaient visés par le Rapport annuel sur les hôpitaux, sont à partir de 1990-91 intégrés à l'Enquête sur les établissements de soins pour bénéficiaires internes.

DATA PROCESSING

Manual Editing

Survey forms are edited in groups by province, principal characteristic and bed size of facility to ensure consistency in reporting. Each form is compared section by section to previous years' reports from the facility. Significant changes such as an increase or decrease of 20% with no change in bed size are referred to the supervisor. If there is no indication that there has been a change in funding in the province, the supervisor arranges for a follow-up call to the facility. If a financial statement or audited statements are included with the survey return, an effort is made to use the information in the editing.

Alberta and Quebec send in data on tape. This is reformatted into individual files which are then submitted to the same manual editing procedures as the survey forms. There are written instructions for manual editing which outline acceptable range of values and what action should be taken if there are discrepancies and describe the provincial programs in which facilities belong.

Interactive Data Entry/On-line Editing

There are a number of on-line edits, most relating to an acceptable range for the cell and or its relationship to data in another cell. Columns are automatically summed so that they can be compared to the total provided by the facility. Consistency checks are also built in to the process.

Queries

A query is produced when a value falls outside the range specified in the edits. Queries are handled by the supervisor by: telephoning the facility if the query relates directly to the data provided, contacting the provincial contact if the query is more general i.e. classification of facility within the provincial system, referring the problem

TRAITEMENT DES DONNÉES

Vérification manuelle

Les questionnaires d'enquête sont vérifiés en groupes selon la province, la principale caractéristique et le nombre de lits pour assurer l'uniformité des données déclarées. Chaque questionnaire est comparé, section par section, aux déclarations des années précédentes. Les variations importantes de plus ou moins 20% qui ne sont accompagnées d'aucun changement en ce qui concerne le nombre de lits sont signalées au superviseur. Si rien n'indique qu'il y a eu des modifications dans le financement à l'échelle provinciale, le superviseur prend des dispositions pour effectuer un suivi auprès de l'établissement. Si des états financiers ou des états vérifiés sont joints à la déclaration, on s'efforcera d'utiliser ces données pour fins de vérification.

L'Alberta et le Québec envoient leurs données sur bande magnétique. Celles-ci sont reformatées sous forme de fichiers distincts qui font ensuite l'objet des mêmes procédures de vérification manuelles que les questionnaires d'enquête. Des instructions écrites concernant la vérification manuelle indiquent, cellule par cellule, les écarts acceptables et les mesures à prendre en cas de discordances.

Introduction des données en mode interactif/vérification en direct

Un certain nombre de vérifications en direct sont effectuées. Elles visent pour la plupart à vérifier si les écarts au niveau des cellules sont acceptables ou à établir des liens avec les données d'une autre cellule. Les colonnes sont automatiquement additionnées de manière à pouvoir être comparées au total déclaré par l'établissement. Des vérifications de conformité sont également intégrées dans le processus.

Demandes de renseignements

Les demandes de renseignements sont traitées par le superviseur. Celui-ci téléphone à l'établissement si la demande porte directement sur les données fournies; il communique avec la personne ressource de la province si la demande est plus générale (classement de l'établissement dans le système provincial), ou signale le

to the senior analyst, Canadian Centre for Health Information, i.e. sometimes returns include letters asking for further information or use of the data.

Validity Checks

Once the editing is completed the data is produced in 32 standard tables by principal characteristic and type of care. These tables are compared manually to the previous year's tables.

Data Quality

Although the target universe is considered to be all residential care facilities, Personal Care Homes in Manitoba do not participate in the survey.

The survey is considered voluntary and response to the survey is about 73% of the facilities, containing 76% of the beds in the universe. Since no weighting of the data is done to account for non-response, caution must be used in interpreting the data.

Changes in Concepts and Methodology over Time

The survey was conducted on a calendar year basis in 1976. It was then changed to a fiscal year basis in 1977/78. There was no survey conducted for the year 1978/79. Both survey forms were called "Return of Special Care Facilities" until 1980/81 when the short form was called "1980/81 Return of Care Facilities - Residential". In 1981/82 the survey form was called "1981-1982 Return of Residential Care Facilities" and the long form was sent to all facilities.

A long form (form SCF 1) and a short form (form SCF 1A) were used. The long form was sent to all type II facilities until 1982/83 when the long form was sent to all facilities.

problème à l'analyste principal du Centre canadien de l'information sur la santé dans les cas où les déclarations sont accompagnées de lettres demandant de plus amples renseignements ou l'autorisation d'utiliser les données.

Validation

Une fois la vérification terminée, les données sont produites sous forme de 32 tableaux ordinaires, selon la caractéristique principale et le type de soins. Ces tableaux sont comparés manuellement à ceux de l'année précédente.

Qualité des données

Bien que l'on considère que l'univers cible se compose de tous les établissements de soins pour bénéficiaires internes, les maisons de soins personnels du Manitoba ne participent pas à l'enquête.

La réponse à l'enquête est considérée comme étant volontaire. Elle représente quelque 73% des établissements, et 76% des lits de l'univers. Comme aucune pondération n'est effectuée pour tenir compte de la non-réponse, il faut interpréter les données avec prudence.

Changements relatifs aux concepts et à la méthodologie

En 1976, l'enquête a porté sur l'année civile, après quoi la période de référence a été remplacée par l'exercice financier (1977-1978). Aucune enquête n'a été effectuée au cours de l'exercice 1978-1979. Les deux questionnaires ont eu pour titre «Rapport d'activité des établissements de soins spéciaux» jusqu'en 1980-1981, puis le questionnaire abrégé a été désigné sous le nom de «Rapport des établissements de soins - Soins en internat» en 1980-1981. En 1981-1982, le questionnaire d'enquête a été intitulé «Rapport des établissements de soins pour bénéficiaires internes» et le questionnaire complet a été acheminé à tous les établissements.

Un questionnaire complet (formulaire ESS 1) et un questionnaire abrégé (imprimé ESS 1A) ont été utilisés. Le formulaire complet a été envoyé à tous les établissements de type II jusqu'en 1982-1983, année à partir de laquelle tous les établissements l'ont reçu.
