INTRODUCTION

Purposes and Data Sources

Hospital statistics constitute part of the essential requirements of several federal departments as well as the various provincial departments of health and welfare. Hospital expenditures represent a significant component of the Gross Domestic Product figures. The data are further used for the administration, evaluation and planning of major provincial and federal programs as well as satisfying many of the needs of hospital administrators, researchers and large special interest groups in the community.

The target universe is all public, private and federal hospitals operating in the ten provinces and two territories.

Data collected are on beds and patient movement, ambulatory care, diagnostic and therapeutic services, administrative and support services, personnel, expenditures and income. Tables are available in summary (Annual Hospital Statistics) or indicator (Annual Return of Hospitals - Hospital Indicators) format by province, type and size of hospital.

METHODOLOGY

Data Collection

The survey of Health Care Facilities - Hospitals is a mandatory annual survey, included under the jurisdiction of the Statistics Act in 1918, encompassing all facilities in Canada licensed to operate as a hospital. These facilities are licensed by provincial ministries of health and federal government departments. The survey was made annual in 1932 and periodically reviewed at the request of Health and Welfare Canada and the provinces to meet new requirements for administration, analysis, policy planning and decisions on new programs. Statistics Canada has been responsible for the design of the forms and for the processing and dissemination of the data and the update and maintenance of the program.

Quebec, Alberta, British Columbia and Ontario use their own reporting form. Hospitals in other provinces complete a 28 page document which is returned to Statistics Canada via the provincial Ministry of Health. Forms are mailed to the provinces who in turn send them to the hospitals. This takes place in mid-March. By the end of June the first complete reports are returned to Statistics Canada. It can take up to 18 months to receive all the documents. Provinces have the option of returning the reporting forms to Statistics Canada or sending the data on magnetic tape. At the present time, Quebec, Ontario, Alberta and British Columbia choose to report on tape.

But et sources de données

La statistique hospitalière constitue un élément d'information essentiel à plusieurs ministères fédéraux et aux ministères provinciaux de la santé et du bien-être. Les dépenses des hôpitaux sont une importante composante du produit intérieur brut. Les données servent également à l'administration, à l'évaluation et à la planification des principaux programmes provinciaux et fédéraux et répondent à un bon nombre de besoins des directeurs des hôpitaux, des chercheurs et des grands groupes d'intérêts spéciaux de la collectivité.

L'univers visé est l'ensemble des hôpitaux publics, privés et fédéraux en activité dans les dix provinces et les deux territoires.

On réunit des données sur les lits et le mouvement des malades, les soins ambulatoires, les services diagnostiques et thérapeutiques, les services d'administration et de soutien, le personnel, les dépenses et les revenus. Les tableaux sont présentés sous forme de sommaires (statistique hospitalière annuelle) ou d'indicateurs (Rapport annuel des hôpitaux - indicateurs des hôpitaux) selon la province et selon le genre et la taille de l'hôpital.

MÉTHODOLOGIE

Collecte des données

L'enquête sur les établissements de santé et les hôpitaux est une enquête annuelle obligatoire en vertu de la Loi sur la statistique de 1918 et elle englobe tous les établissements au Canada qui possèdent une licence pour exploiter un hôpital. La licence est accordée par les ministères provinciaux de la santé et les ministères fédéraux. L'enquête est devenue annuelle en 1932. Elle est revue périodiquement à la demande de Santé et Bien-être social Canada et des provinces afin de répondre aux nouvelles exigences relatives aux nouveaux programmes, soit leur administration et leur analyse ainsi que l'élaboration des politiques et la prise de décisions les concernant. Statistique Canada est responsable de la conception des formulaires, du traitement et de la diffusion des données et, enfin, de la mise à jour et du maintien du programme.

Le Québec, l'Alberta, la Colombie-Britannique et l'Ontario utilisent leur propre formulaire de déclaration. Les hôpitaux des autres provinces remplissent un document de 28 pages qu'ils retournent à Statistique Canada par l'intermédiaire du ministère de la santé de leur province. À la mi-mars, les formulaires sont envoyés par la poste aux ministères provinciaux qui les transmettent à leur tour aux hôpitaux. À la fin de juin, Statistique Canada reçoit les premiers rapports remplis. Il peut s'écouler jusqu'à 18 mois avant que Statistique Canada n'ait reçu tous les documents. Les provinces ont le choix entre remplir les formulaires de déclaration ou envoyer les données sur ruban magnétique. À l'heure actuelle, le Québec, l'Ontario, l'Alberta et la Colombie-Britannique fournissent les données sur ruban magnétique.

At the end of November of the reporting year a follow-up letter is sent to the provinces listing the outstanding facilities and requesting a time for their receipt. Subsequent follow-ups are done by phone.

Data Definition

The statistical data collected adheres to the Instructions and Definitions Parts I and II developed for the reporting of hospitals to Statistics Canada. Uniform accounting information is available from hospitals as a result of the acceptance of the Canadian Hospital Accounting Manual (CHAM) for reporting under the federal provincial hospital insurance program.

The definitions of terms for the hospital database are as follows:

Hospital

Is defined as an institution where patients are accommodated on the basis of medical need and are provided with continuing medical care and supporting diagnostic and therapeutic services, and which is licensed or approved as a hospital by a provincial government, or is operated by the Government of Canada. This definition includes mental institutions.

Type of Hospital

Public (including voluntary, provincial and municipal). Applies to a hospital recognized by the province as a "public hospital". Such a hospital generally is not operated for profit.

Proprietary. Applies to a hospital owned by an individual or by a private organization, operated for a profit and recognized by the province as a "proprietary hospital".

Federal. Applies to a hospital owned by a department or agency of the Government of Canada and operated on a non-profit basis.

Type of Unit

Short-term units - Adults and children. Are those inpatient units provided for patients who, at the time of admission, require diagnostic and therapeutic services and/or skilled nursing care and medical attention.

Long-term units - Adults and children. Are those inpatient units provided for patients who, at the time of admission, require regular services and continuing nursing care.

À la fin de novembre de l'année de déclaration, une lettre de suivi est envoyée aux provinces où se trouvent des établissements n'ayant pas fourni de déclaration et on leur demande de préciser la date à laquelle les données seront transmises. Les suivis subséquents sont faits par téléphone.

Définition des données

Les données statistiques réunies sont conformes aux Directives et définitions, 1^e et 2^e parties, élaborées en vue de la déclaration que fournissent les hôpitaux à Statistique Canada. Les renseignements comptables sont uniformes car les hôpitaux se servent du Manuel de comptabilité des hôpitaux du Canada (MCHC) pour leur déclaration, conformément aux programmes d'assurance-hospitalisation fédéral et provinciaux.

Les définitions utilisées pour la base de données sur les hôpitaux sont les suivantes:

Hôpital

Par définition, un hôpital est un établissement qui reçoit des personnes requérant des soins médicaux et leur dispense de façon continue ces soins ainsi que des services diagnostiques et thérapeutiques d'appoint, et qui est enregistré ou reconnu comme hôpital par une province ou est administré par le gouvernement du Canada. Cette définition englobe les établissements psychiatriques.

Genre d'hôpital

Hôpital public (s'applique aux hôpitaux sans but lucratif, aux hôpitaux provinciaux et aux hôpitaux municipaux). Hôpital reconnu par la province comme "public". Un tel hôpital ne vise ordinairement pas à réaliser des bénéfices.

Hôpital privé à but lucratif. Cette définition s'applique aux hôpitaux reconnus comme "privés à but lucratif"; il s'agit des hôpitaux que des particuliers ou des organismes privés possèdent et exploitent en vue de réaliser des bénéfices.

Hôpital fédéral. Hôpital appartenant à un ministère ou un organisme du gouvernement du Canada et ne visant pas à réaliser des bénéfices.

Genre d'unité

Unités de soins de courte durée - Adultes et enfants. Il s'agit des unités d'hospitalisation où sont traités les malades dont l'état, au moment de leur admission, requiert des services diagnostiques et thérapeutiques et (ou) des soins infirmiers spécialisés et une surveillance médicale.

Unités de soins de longue durée - Adultes et enfants. S'applique aux unités d'hospitalisation où sont traités les malades dont l'état, au moment de leur admission, requiert des traitements suivis et des soins infirmiers constants.

Sortie. Départ officiel de l'hôpital, ou d'une unité reconnue par la province, d'un malade vivant.

Décès. Mort d'un hospitalisé après son admission et avant sa sortie.

Radiation. Sortie ou décès d'un hospitalisé.

Journée d'hospitalisation. Période de soins fournis à un hospitalisé entre les heures du recensement quotidien sur deux jours consécutifs; le jour de l'admission compte comme journée d'hospitalisation, mais non le jour de la radiation.

Malade externe. Malade inscrit au registre de l'hôpital, à des fins diagnostiques ou thérapeutiques, sans être hospitalisé. Cette catégorie comprend les malades qui se présentent à une unité de soins de jour ou de nuit.

Unité de laboratoire. Mesure du travail fait en laboratoire : une unité équivaut à une minute de travail technique, de travail de bureau ou de travail auxiliaire consacré à la production des résultats de tests subis par les malades.

Radiologie. Un examen radiologique est défini comme étant une seule opération diagnostique, effectuée pendant une visite du malade, à l'aide d'un des procédés suivants:

- (a) examen fluoroscopique ou examen par amplificateur de brillance;
- (b) production d'un ou de plusieurs clichés radiographiques;
- (c) une combinaison de (a) et (b);
- (d) examens faits à l'aide d'autres appareils (l'ECG par exemple) par le personnel du service de radiologie.

Bloc opératoire et unité de soins thérapeutiques aux malades ambulatoires. Une visite est définie comme étant une présence d'un malade pour une durée continue, pendant laquelle une (des) intervention(s), un (des) traitement(s) ou un (des) examen(s) sont effectués.

Physiotherapy and occupational therapy attendances. An attendance day is only recorded when the patient receives direct patient care on that day. Where a patient was provided only indirect care on a given day, no attendance day is recorded for that patient that day. (Indirect patient care are those activities which support or supplement diagnosis, evaluation or treatment for which the presence of the patient is not required.) Each patient is assigned only one attendance day for each 24 hour treatment day, even though the patient:

- may have attended the department more than once during the day;
- may have been treated on the inpatient unit more than once during the day;
- may have been treated both in the department and on an inpatient unit during the one day;
- may have been treated during the day in several areas of the department by several staff members, eg., pool, gymnasium, electrotherapy area, etc.;

Personnel

Full-time. Refers to persons employed on a full-time basis, i.e. regularly employed throughout the department's full workweek.

Part-time. Refers to persons employed on a part-time basis, i.e. regularly employed on selected days or partial days in the department's workweek.

Paid hours. Include those for all full-time, part-time and casual employees excluding the medical staff of the hospital who, during the year, have had salaries or wages payable to them by the hospital. Hours covering paid holiday time and other paid leave are to be included for all categories of personnel.

Operating Expense

The cost, on an **accrual basis** of operating and maintaining the hospital during the year.

Gross salaries and wages including all medical staff remuneration. These are distributed to two sub-categories:

Medical staff. Includes all types of hospital remuneration earned during the year by paid medical staff, i.e. salaries, wages, fees, contract rates, honorarium, etc.

Other gross salaries and wages. Includes gross salaries and wages earned during the year by all other staff including non-medical teaching staff and regular employees involved in extramural or on-the-job training.

Visites au service de physiothérapie et d'ergothérapie. Un jour de visite est inscrit seulement lorsque le malade reçoit des soins directs pendant ce jour-là. Lorsqu'un malade n'a reçu que des soins indirects un jour donné, on n'inscrit pas de jour de visite pour ce malade. (Les soins indirects aux malades sont les activités venant soutenir ou compléter le diagnostic, l'évaluation ou le traitement pour lesquels la présence du malade n'est pas nécessaire). La visite d'un malade n'est comptée qu'une seule fois pour chaque 24 heures de traitement, même si le malade:

- s'est rendu au service plus d'une fois durant la journée;
- est traité à l'unité d'hospitalisation plus d'une fois durant la journée;
- est traité au service de même qu'à l'unité d'hospitalisation durant la journée;
- est traité durant la journée dans plusieurs secteurs (piscine, gymnase, électrothérapie, etc.) du service par différents employés du service.

Personnel

À temps plein. Personnes employées à temps plein, c'est-à-dire employées régulièrement pendant toute la semaine de travail du service.

À temps partiel. Personnes employées à temps partiel, c'est-à-dire employées régulièrement certains jours ou certaines plages de la journée durant la semaine de travail du service.

Heures rémunérées. Comprend les heures des employés à temps plein ou partiel et des employés occasionnels dont les traitements et les salaires, durant l'année, ont été rémunérés par l'hôpital, à l'exclusion du personnel médical de l'hôpital. Les heures pour les vacances et les autres congés rémunérés de toutes les catégories d'employés sont comprises.

Dépenses d'exploitation

Les dépenses d'exploitation et d'entretien de l'hôpital au cours de l'année, établies d'après la comptabilité d'exercice.

Rémunération brute, y compris la rémunération du personnel médical. Est divisée en deux sous-catégories :

Rémunération du personnel médical. Comprend tous les genres de rémunération versée par l'hôpital et gagnée au cours de l'année par le personnel médical, c.-à-d. traitements, salaires, honoraires, gains provenant d'un contrat, etc.

Autre rémunération brute. Comprend la rémunération brute gagnée durant l'année par tous les autres membres du personnel, y compris le personnel enseignant non médical et les employés permanents recevant une formation à l'extérieur ou une formation en cours d'emploi.

Employee benefits. The facility's contribution to the cost of various fringe benefits provided to its employees. These do not include perquisites such as room and board provided for employees, which are a part of salaries and wages.

Supplies and other expenses. These are distributed to three sub-categories:

Supplies and other expenses (excluding medical and surgical supplies and drugs). Includes all of the hospital's operating expenses other than gross salaries and wages and excluding the cost of medical and surgical supplies, drugs and employee benefits.

Medical and surgical supplies. Items used in the treatment and examination of patients such as sutures, dressings, clinical thermometers, sterile supplies, catheters, needles and syringes, etc.

Drugs. All drugs, as well as medicines, anesthetic gases, oxygen and other medical gases, intravenous solutions, etc.

Operating Income

Operating income is the revenue that accrues during the year for the purpose of operation and maintenance of the hospital.

Gross income. This includes the amounts earned by the hospital for the rendering of services to patients. These amounts are represented by the regular income earned by the hospital for such services, regardless of the terms of any special contract, agreement, or understanding as to the basis of rates to be paid.

Net income. Net income comprises the difference between gross income and deductions such as courtesy, rebates and free service, and bad debts, less recoveries.

Quality Assessment of the File

The Annual Hospital reporting form was the document accepted by the federal and provincial governments for hospital insurance purposes and thus ensured completeness of response. Response to this survey has always been very high, approximately 95% for most years usually representing 97% of the beds.

The data collection, data capture, editing of the information and finally the release of the data, cover a two year period.

Private and Federal hospitals, which together make up only 14% of all hospitals, are not required to report financial information on this survey. The only data available for these hospitals are on beds and hospital utilization. Consequently, tables referring to revenues and expenditures represent data from public hospitals only. For this report, no attempt was made to adjust the data to account for hospitals not responding to the survey or for item non-response for those facilities which did report. In order to indicate more precisely what the data represent, the number

Avantages sociaux. Contribution de l'hôpital aux avantages sociaux dont bénéficient les employés. Ne comprennent pas les avantages indirects, tels le logement et la nourriture, qui sont intégrés aux traitements et salaires.

Fournitures et autres dépenses. Sont divisées en trois sous-catégories:

Fournitures et autres dépenses (sauf les fournitures médicales et chirurgicales, et les médicaments). Comprend toutes les dépenses d'exploitation de l'hôpital autres que la rémunération brute, le coût des fournitures médicales et chirurgicales, les médicaments et les avantages sociaux.

Fournitures médicales et chirurgicales. Articles utilisés pour le traitement et l'examen des malades, comme les fils de suture, les pansements, les thermomètres médicaux, les articles stériles, les cathéters, les aiguilles et les seringues.

Médicaments. Tous les médicaments ainsi que les remèdes, les gaz anesthésiques, l'oxygène et autres gaz médicaux, les solutions intraveineuses, etc.

Revenu d'exploitation

Les revenus d'exploitation sont les revenus qui s'accumulent durant l'année aux fins de l'exploitation et de l'entretien de l'hôpital.

Revenu brut. Comprend les sommes provenant des services fournis aux malades. Il s'agit des sommes que l'hôpital reçoit ordinairement pour ces services, sans tenir compte des conditions applicables en vertu d'un contrat, d'une convention ou d'une entente sur le taux à payer.

Revenu net. Est égal à la différence entre le revenu brut et les déductions comme les faveurs, les rabais, les soins gratuits et les mauvaises créances, moins les recouvrements.

Évaluation de la qualité du fichier

Le formulaire de déclaration annuelle des hôpitaux est le document accepté par les administrations fédérale et provinciales aux fins de l'assurance-hospitalisation, ce qui garantit l'exhaustivité de la réponse. Le taux de réponse à l'enquête a toujours été très élevé, environ 95% la plupart des années, ce qui représente normalement 97% des lits.

Les activités de collecte, de saisie, de vérification et de diffusion des données durent deux ans.

Les hôpitaux privés et fédéraux, qui ensemble représentent seulement 14% de tous les hôpitaux, n'ont pas à déclarer les renseignements financiers. Les seules données fournies par ces hôpitaux sont celles relatives aux lits et à l'utilisation des hôpitaux. En conséquence, les tableaux sur les recettes et dépenses comprennent uniquement les données des hôpitaux publics. Pour le rapport, on n'a pas rajusté les données pour tenir compte des hôpitaux ne répondant pas à l'enquête ou des postes sans données pour les établissements ayant fourni une déclaration. Le nombre d'hôpitaux ayant fourni une déclaration pour les diverses

of hospitals reporting the particular variables being tabulated are incorporated into the tables.

All financial data reported by public hospitals have undergone a professional audit.

Hospital data are used by other Statistics Canada divisions and government departments such as Input-Output division, Labour division and Health and Welfare Canada. Many of these departments will use their own calculations to adjust for non-response so care should be taken if comparing their final output to reported data.

The reporting form was last revised in 1976 with the introduction of a supplement to the Canadian Hospital Accounting Manual and the identification of new user requirements. The only major change in reporting procedures was in 1977 when the survey switched from a calendar year to a fiscal year (April-March). For the transition period, data was collected for the 15 months January 1977 to March 1978 and for the 12 months April 1977 to March 1978.

Catalogue publications (Annual Hospital Statistics and Hospital Indicators) were produced until 1985-86. Thereafter formal publications were discontinued and replaced by tables on a request only basis.

variables est intégré aux tableaux afin de mieux préciser la portée des données.

Toutes les données financières déclarées par les hôpitaux publics ont été vérifiées par des professionnels.

Les données sur les hôpitaux servent à d'autres divisions de Statistique Canada, comme la Division des entrées-sorties et la Division du travail, et aux ministères, entre autres Santé et Bien-être social Canada. Bon nombre de ministères se serviront de leurs propres calculs de rajustement des données pour tenir compte de la non-réponse: il faut donc faire preuve de prudence lorsque l'on compare leur produit final aux données déclarées.

Le formulaire de déclaration a été révisé pour la dernière fois en 1976 afin d'y inclure un supplément au Manuel de comptabilité des hôpitaux du Canada et de répondre aux nouvelles exigences des utilisateurs. La seule modification importante apportée aux procédures de déclaration remonte à 1977, année où l'enquête a commencé à porter sur l'exercice financier (avril à mars) plutôt que sur l'année civile. Durant la période de transition, les données ont été réunies pour quinze mois (janvier 1977 à mars 1978) et pour douze mois (avril 1977 à mars 1978).

Les publications au catalogue (Statistique annuelle des hôpitaux et Indicateurs des hôpitaux) sont parues jusqu'en 1985-1986. Après, les publications ont été interrompues et remplacées par des tableaux disponibles sur demande uniquement.

Your Reliable Journal of Health-related Information

In today's world, being informed about Canadians' health and Canadian healthcare is less of an option and more like an obligation. How accurate and up-to-date your information is, however, remains at your discretion

Follow the lead of hundreds of professionals in health care, research, insurance and policymaking who look to **Health Reports** for reliable facts and figures. Issued four times a year, this periodical combines Statistics Canada's stringent standards of data accuracy and timeliness with practical features. Each volume contains:

- highlights of newly released data
- news of recent publications and updates
- crisp and incisive articles
- information on specialized tabulations and custom data

Concise text, instructive charts and easy-to-read tables make for a balanced blend of essential data and straightforward analysis. Each issue of **Health Reports** is written by the analysts of the Canadian Centre for Health Information with original contributions from outside specialists. This imparts a particularly candid flavour and results in a stimulating approach to a wide range of topics like:

- women and cardiovascular disease
- health care for seniors
- recent findings on cancer, heart disease and tuberculosis
- mortality by occupation
- health risks and social status
