## VITAL STATISTICS TERMS AND DEFINITIONS

A summary of symbols, definitions, populations, and the method of computing rates used in this report are given below.

### SYMBOLS

- .. figures not available.
- .. figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- \* or 0.0 a rate less than 0.1.
- <sup>r</sup> figures revised since previous report.
- <sup>p</sup> provisional.

### DEFINITIONS

#### Population:

*De jure* (resident) population as enumerated in Census years or estimated for inter-censal years.

1967-1972 - June 1 estimates.

1921-1971 - Census or revised estimates.

#### Births:

Unless otherwise indicated, infants born alive, i.e., excluding stillbirths.

#### Stillbirths:

Unless otherwise indicated, foetal deaths of 28 or more weeks' gestation.

#### Deaths:

Unless otherwise indicated, exclude stillbirths.

Infant -deaths under 1 year of age.

Neonatal -deaths under 28 days (4 weeks) of age.

Post-neonatal -deaths between 4 weeks and one year of age.

Maternal -deaths due to delivery and complications of pregnancy, childbirth and the puerperium (Categories 630-678 International List).

Perinatal -foetal deaths of 28 or more weeks' gestation plus infant deaths under 7 days (1 week) of age.

#### Natural increase:

Excess of births over deaths.

#### Rates:

Crude - birth, marriage, death and natural increase rates per 1,000 population.

Age-specific fertility - birth rate per 1,000 women in the respective age period.

Age-specific legitimate fertility - number of legitimate births per 1,000 married women in the respective age period.

Total fertility - sum of female age-specific fertility rates.

General fertility - birth rate per 1,000 women 15-49 years.

Legitimate fertility - number of legitimate births per 1,000 married women 15-49 years.

Gross reproduction - average number of live daughters that would be born to a hypothetical female birth cohort if subjected to current age-specific fertility rates, and assuming that mortality before age 50 is zero.

#### Total births:

Live births and stillbirths.

#### Age:

Completed ages in years, months, etc.

Average - arithmetic mean.

Median - age above and below which half of the total events occur.

### RATES OR RATIOS

(Unless otherwise indicated, computed as follows)

Live births: per 1,000 population.

Stillbirths: " 1,000 live births.

Deaths: " 1,000 population.

Infant: " 1,000 live births.

Neonatal: " 1,000 " "

Post-neonatal: " 1,000 " "

Maternal: " 10,000 " "

Perinatal: " 1,000 total births.

#### Causes of death:

All causes: per 100,000 population.

Infant: " 100,000 live births.

Neonatal: " 100,000 " "

Maternal: " 100,000 " "

Marriages: " 1,000 population.

Divorces: " 100,000 "

Natural increase: " 1,000 "

## TERMES DÉMOGRAPHIQUES ET DÉFINITIONS

Un sommaire des signes conventionnels, définitions et populations et de la méthode utilisée pour calculer les taux du présent rapport paraît ci-dessous.

### SIGNES CONVENTIONNELS

- .. non disponible.
- .. n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.
- \* ou 0.0 taux inférieur à 0.1.
- <sup>r</sup> rectifiés depuis le rapport précédent.
- <sup>p</sup> provisoire.

### DÉFINITIONS

#### Population:

Population résidente dénombrée aux années de recensement ou estimée aux années intercensales.

1967-1972 - Estimations du 1er juin.

1921-1971 - Estimations du recensement ou rectifiées.

#### Natalité:

Sauf indication contraire, il s'agit d'enfants nés vivants (sans la mortalité).

#### Mortalité:

Sauf indication contraire, décès du fœtus de 28 semaines ou plus.

#### Mortalité générale:

Sauf indication contraire, ce terme exclut la mortalité.

Infantile - décès des moins d'un an.

Neonatale - décès des moins de 28 jours (4 semaines).

Post-néonatale - décès d'enfants de 4 semaines à un an.

Maternelle - décès dus à l'accouchement et aux complications de la grossesse, de l'accouchement et des suites de couches (rubriques 630-678 de la liste internationale).

Périnatale - décès des fœtus de 28 semaines ou plus, plus les décès d'enfants âgés de moins de 7 jours (1 semaine).

#### Accroissement naturel:

Excédent des naissances sur les décès.

#### Taux (de):

Bruts - taux de natalité, de nuptialité, de mortalité et d'accroissement naturel pour 1,000 habitants.

Fécondité par âge - taux de natalité pour 1,000 femmes du groupe d'âges concerné.

Fécondité légitime par âge - nombre de naissances légitimes pour 1,000 femmes mariées du groupe d'âges concerné.

Fécondité totale - somme des taux de fécondité féminine par âge.

Global de fécondité - taux de natalité pour 1,000 femmes âgées de 15 à 49 ans.

Global de fécondité légitime - nombre de naissances légitimes pour 1,000 femmes mariées âgées de 15 à 49 ans.

Reproduction brute - moyenne de filles vivantes qui seraient nées d'une cohorte de naissances féminines hypothétiques si elles étaient sujettes aux taux courants de fécondité suivant l'âge et en supposant que la mortalité avant l'âge 50 ans soit zéro.

#### Naissances:

Naissances vivantes et mortinassances.

#### Âge:

Âge en années, mois revolus.

Moyen - moyenne arithmétique.

Médian - âge au-dessus et au-dessous duquel surviennent la moitié des événements.

### TAUX OU RAPPORTS

(sauf indication contraire, ils sont calculés ainsi)

Naissances vivantes: pour 1,000 habitants.

Mortalité: " 1,000 naissances vivantes.

Mortalité: " 1,000 habitants.

Infantile: " 1,000 naissances vivantes.

Néonatale: " 1,000 " "

Post-néonatale: " 1,000 " "

Maternelle: " 10,000 " "

Périnatale: " 1,000 naissances.

#### Causes de mortalité:

Toutes causes: pour 100,000 habitants.

Infantile: " 100,000 naissances vivantes.

Néonatale: " 100,000 " "

Maternelle: " 100,000 " "

Nuptialité: " 1,000 habitants.

Divortialité: " 100,000 "

Accroissement naturel: " 1,000 "

## INTRODUCTION

The present report follows the pattern of its predecessor (1971). All of the tables which appeared in the expanded 1965 to 1971 editions — notably those dealing with births by birth-order and legitimacy, age-specific fertility rates, marriages and divorces and the expanded cause-of-death data — have been repeated in the present edition in response to increasing demands for more detailed data, particularly that relating to fertility in the light of changing fertility patterns. The only change is that Table 18 now lists the deaths by cause, sex and five-year age groups. Since 1969, causes of death are published in accordance with the new (8th Revision) of the International Classification of Diseases (American Adaptation — ICDA). Adoption of the new revision does therefore affect comparability, for some causes of death, of 1972 data with that for 1968 and previous years.

Current figures in this report are subject to minor revision but at this stage may be regarded as virtually final. The final detailed statistics for 1972 will be given in three separate reports, at a later date. Vital Statistics of Canada, Vol. 1, Births, Catalogue 84-204, Vol. 2, Marriages and Divorces, Catalogue 84-205, Vol. 3, Deaths, Catalogue 84-206. As in the past, unpublished data may be obtained on request, in the meantime, from the Vital Statistics Section, Health and Welfare Division, subject only to reasonable limitations on the amount of data and detail required.

The data are compiled from microfilm copies of official registrations of vital events filed under the vital statistics legislation of the Provinces and Territories. The microfilm copies are supplied to Statistics Canada for statistical purposes under Dominion-Provincial agreements. Since 1944 births, stillbirths, and deaths have been classified by area of reported residence — births and stillbirths according to the residence of the mother — and marriages by the place in which the event was solemnized; prior to 1944 all events were classified by place of occurrence. Except for marriages and divorces they include events occurring in the United States to Canadian residents and exclude events occurring in Canada to United States residents. Rates shown in this report are computed on census counts or on official intercensal estimates of population.

Over the past few years most of the provinces have amended their legislation to provide for the compulsory registration of stillbirths of at least 20 weeks' gestation; formerly, only those of at least 28 weeks' gestation were required to be registered. Data for stillbirths of at least 20 weeks' gestation are shown in this report separate from those of at least 28 weeks' gestation for such provinces. (See Table 2.)

Selected publications on demographic and health statistics and analytical reports on certain aspects of vital statistics issued by Statistics Canada are listed on the back cover.

Le présent rapport est semblable à celui de 1971. Tous les tableaux parus dans les éditions augmentées de 1965 à 1971, notamment ceux qui portaient sur les naissances suivant le rang et la légitimité, les taux de fécondité par âge, les mariages et les divorces, ainsi que les données plus nombreuses sur les causes de décès, sont présentés de nouveau dans la présente édition, en réponse à la demande croissante de renseignements plus détaillés, surtout au sujet de la fécondité, vu l'état de transformation des tendances de la fécondité. Il y a un changement. Ce rapport présente les décès selon la cause, le sexe et le groupe d'âges de cinq ans. (Voir tableau 18). Depuis 1969, les causes de décès sont publiées selon la 8e Révision de la Classification Internationale des Maladies (Adaptation Américaine — CIMA). L'adoption de cette nouvelle révision affecte par conséquent la comparaison de certaines causes de décès de 1972 avec celles de 1968 et des années antérieures.

Les données du présent rapport sont sujettes à de légères modifications, mais, à toutes fins pratiques, elles peuvent être considérées comme définitives. Les statistiques détaillées et définitives pour 1972 paraîtront plus tard, dans trois rapports séparés. La statistique canadienne de l'état civil. Vol. 1, Natalité, catalogue 84-204, Vol. 2, Nuptialité et Divortialité, catalogue 84-205, Vol. 3, Mortalité, catalogue 84-206. Comme par le passé, les données non publiées peuvent être obtenues, sur demande, de la Section de l'état civil, Division de la santé et du bien-être, à condition toutefois que les requêtes soient raisonnables sur le plan quantitatif et l'aspect détaillé.

Ces données sont tirées de microfilms (fournis à Statistique Canada en vertu d'ententes fédérales-provinciales) des actes de l'état civil enregistrés en vertu de lois des provinces ou territoires. Depuis 1944, les naissances, mortinairesses et décès sont classés suivant le lieu de résidence déclaré (celui de la mère, dans le cas des naissances et mortinairesses) et les mariages, suivant l'endroit où ils ont été célébrés; avant 1944, ces actes étaient classés suivant le lieu de l'événement. Sauf quand il s'agit de mariages et de divorces, ces actes concernent aussi des événements survenus aux États-Unis touchant des ressortissants canadiens, mais non ces mêmes événements survenus au Canada touchant des ressortissants américains. Les taux du présent rapport sont calculés, selon le cas, d'après les chiffres du recensement ou suivant les estimations intercensales officielles de la population.

Ces dernières années, la plupart des provinces ont modifié leur législation pour rendre obligatoire l'enregistrement des mortinairesses à partir de 20 semaines de durée de gestation; autrefois, la durée de gestation requise était de 28 semaines. Toutefois les données sur les mortinairesses sont publiées selon les deux définitions de la durée de gestation. (Voir tableau 2.)

La couverture arrière du présent rapport donne une liste de certaines publications sur la statistique démographique et sanitaire ainsi que des rapports analytiques spéciaux sur certains aspects de la statistique de l'état civil et publiés par Statistique Canada.

<sup>2</sup> Illegitimacy in this report does not refer to births conceived out of wedlock but those in which parents reported themselves as not having been married to each other at the time of birth or registration and, in the case of Ontario, since 1949, those in which the marital status of the mother was reported as 'single'. — L'illegitimité se définit par une naissance où la mère a déclaré n'être pas liée au père de l'enfant par les liens du mariage au moment de la naissance ou de l'enregistrement de la naissance et depuis 1949 en Ontario, par une naissance où la mère a déclaré être célibataire.

<sup>1</sup> Illegitimacy in this report does not refer to births *conceived* out of wedlock but those in which parents reported themselves as not having been married to each other at the time of birth or registration and, in the case of Ontario, since 1949, those in which the marital status of the mother was reported as 'single'. — Dans le présent rapport, l'illegitimité ne s'applique pas aux nouveau-nés *concubins* hors mariage, mais à ceux dont les parents eux-mêmes ont déclaré n'être pas liés l'un à l'autre par le mariage au temps de la naissance ou de l'enregistrement et depuis 1949, en Ontario, aux naissances issues de femmes d'état matrimonial 'célibataire'.

<sup>1</sup> Granted by Parliament of Canada. Figures for these provinces do not necessarily refer to divorces granted during each calendar year but to bills of divorce passed by the House of Commons at the session(s) of Parliament opening in the year in question. — Accordées par le Parlement fédéral. Le nombre annuel de divorces ne coïncide pas nécessairement avec les années de calendrier, mais comprend le nombre de bills de divorces approuvés par le Parlement à la (les) session(s) commençant l'année en question.

<sup>2</sup> A Divorce Court was established in Prince Edward Island in 1945. Prior to that year divorces were granted by Parliament. — Une cour de divorce a été instituée en île-du-Prince-Édouard en 1945. Antérieurement à cette année les divorces étaient accordés par le Parlement fédéral.

<sup>3</sup> No fall term of court held in 1944. Petitions held over until January 1945. — La cour n'ayant pas siégé à l'automne 1944, les demandes ont été renvoyées à janvier 1945.

<sup>4</sup> A new rule was adopted in August 1948 by the Divorce Court granting a Decree Nisi to become absolute at the end of three months. As a result a number of divorces were not effective until 1949. — En vertu d'un nouveau règlement adopté en août 1948, un décret provisoire devient absolu au bout de trois mois. Il en résulte qu'un certain nombre de divorces ne sont devenus effectifs que l'année suivante.

<sup>5</sup> No bills of divorce were passed by the House of Commons during the 1962 sessions of Parliament. — Durant les sessions de 1962, le Parlement n'a adopté aucun bill de divorce.

<sup>6</sup> Provisional. — Provisoire.
