PREFACE

Faced with space constraints and an array of publications with similar titles, varying frequencies and seemingly overlapping subjects, library managers find it difficult to know which Statistics Canada publications to retain. This document provides some guidelines for such decisions.

These guidelines will allow libraries to build collections of statistical information which span approximately ten years and contain the most recently revised data. The most specific recommendations concern current serials and monographs. Included as well are notes about the history of publications and more general suggestions for discontinued publications. The notes provide sufficient background information to allow managers the latitude of making retention decisions based on their subject requirements.

Guidelines presented here are suggestions only. If space is not an important consideration or if a particular data series relates closely to a library's subject area, managers should be guided by their own needs. Full depository libraries, with their more exhaustive collections, can serve as back-up for the libraries using these guidelines. In addition, the Statistics Canada Library maintains a complete collection of Statistics Canada publications and makes it available to all libraries through inter-library loans.

Separate official guidelines for depository libraries are provided by the Canada Communications Group - Publications (formerly the Canadian Government Publishing Centre). Managers of depository library collections should refer to these before discarding publications.

If further information or advice is required when decisions about collection rationalization are being made, users of this guide are welcome to contact Fred Baker, Bibliographic Products Unit, Statistics Canada Library, Ottawa, Ontario, K1A 0T6. Tel: (613) 951-0953, FAX: (613) 951- 0939.

This document revises the uncatalogued publication entitled *Retention Guidelines for Statistics Canada Publications in Library*. The uncatalogued publication will no longer be revised nor updated and should be discarded.

ACKNOWLEDGEMENTS

Many individuals in the Statistics Canada Library have contributed directly or indirectly, to the completion of this rather large undertaking.

The special contributions made by the following individuals must however be recognized:

Fay Hjartarson whose keen eye and high speed red pen provided the edited manuscript;

Virginie Grandjean-Joyeux whose considerable translation and word processing skills produced the manuscript;

Gilles Beaulieu who kept the uncatalogued version updated on Micom.

Special thanks are also expressed to those individuals in the Publications Division who in spite of their heavy workload always smiled and demonstrated great patience throughout the process.

Finally, the very special role of Mrs. Georgia Ellis must be recognized. She understood the need for such a document, committed the necessary resources for its completion and offered much advice and encouragement along the way.

The project was completed under the direction of Mrs. Mary Jane Maffini, the Director of Library Services Division, whose support and encouragement brought the guide to completion.

Introduction

Statistics Canada has a long publishing history. The mechanism for releasing publications was standardized in 1959 when the five-digit classification system was introduced. The system remains basically unchanged today. A complete description of this system can be found in the introduction to the *Statistics Canada Catalogue* (publication no. 11-204E).

This guide is arranged in Statistics Canada publication number order with numbers which contain "X" or "D" appearing at the end of each series. Publications which are identified by a number containing a "D" were discontinued publications in stock at the time the catalogue numbers were assigned in 1959. Publications identified by a number containing an "X" were publications termed non-catalogued external publications. These were published for a short period of time in the late 1970's. The "X" triggered a special billing and accounting procedure. Currently all catalogued publications conform to the five digit classification.

Census publications have generally been released so that each individual bulletin can be compiled with other publications from the same series and eventually bound in a few large volumes. For this reason, census publications in this guide are treated as a set of documents for each census year with a single recommendation for each set.

Building a "Core" Collection of Current Statistical Data

Over 5,000 distinct publications have been issued since 1917. Of this number approximately 700 are included in the current publication program. Some publications continue titles which were released prior to the formation of the Dominion Bureau of Statistics.

For this document a "core" collection consists of publications which supply a time series of approximately ten years of the most recently revised information from specific subject areas ending with the most current year available.

The five-digit catalogue number is the key to building and managing a useful collection of Statistics Canada material. The third digit of the five-digit code provides essential information on the frequency of publications. Statistics Canada publishes a daily release, plus weeklies, monthlies, quarterlies, annuals, biennials and occasional publications. The daily and weekly releases allow for rapid preliminary publishing of data. Monthlies and quarterlies contain more comprehensive and revised data. Annuals and biennials present cumulative and further revisions to information. Occasional publications often present collections of revised historical data or other special or analytical studies.

Frequency of publication must be considered not only when consulting publications but also when deciding what to retain. Since the data are continually revised, it is important to retain the most recent information. In some cases, earlier releases can be discarded.

In cases where publications merge to form new titles or split to form multiple titles, access to a time series of data can be maintained by adjusting the holdings of the various component publications. For example, see the entry for publication 35-251.

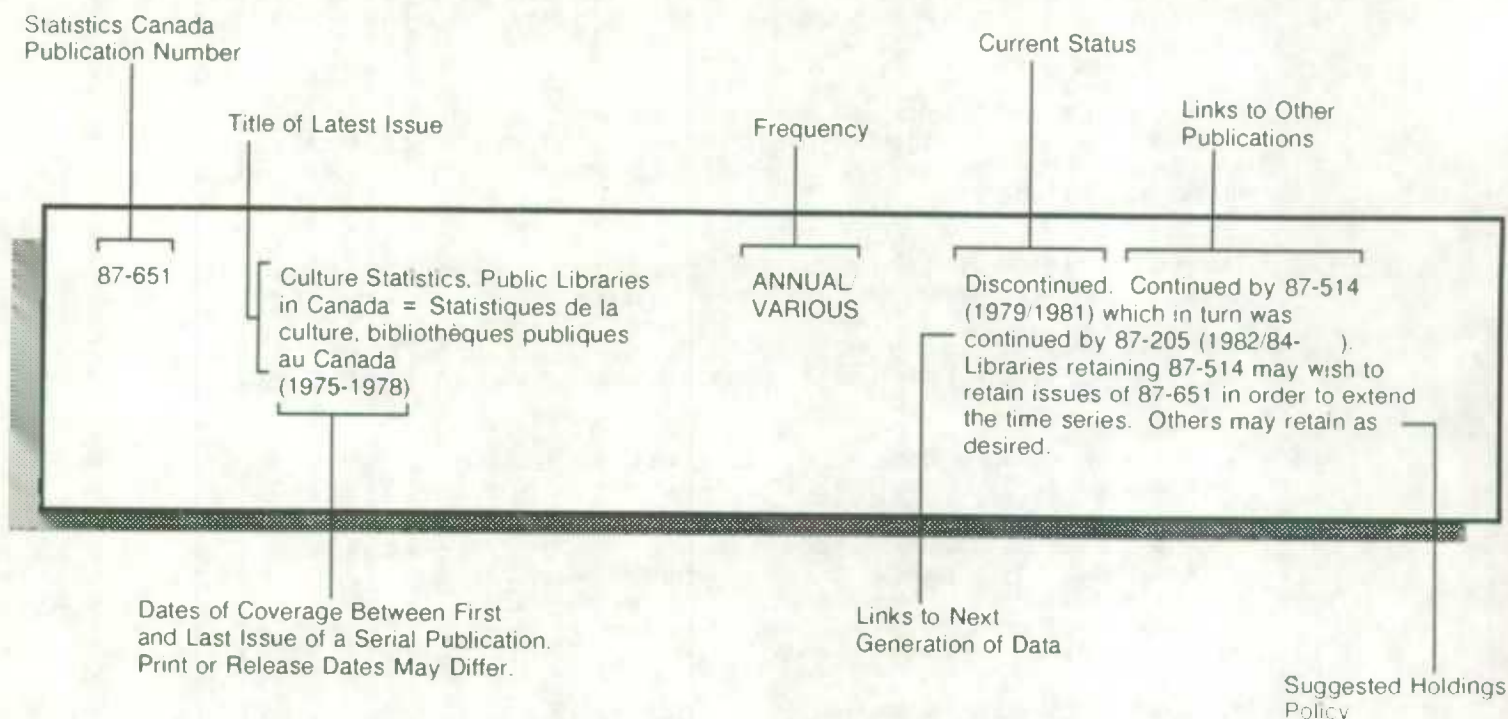

As well as being a collection management tool, this manual is a useful reference tool which provides links between current and discontinued publications and current and noncatalogued publications. There are also additional notes which, for example, explain the peculiarities in the publishing sequence or point out publications which have appeared previously with different numbers.

The dates which follow the title indicate the years for which coverage is provided by that Statistics Canada publication. This may differ from the release dates which appear on title pages. The following table describes the types of formats used to describe release and coverage dates:

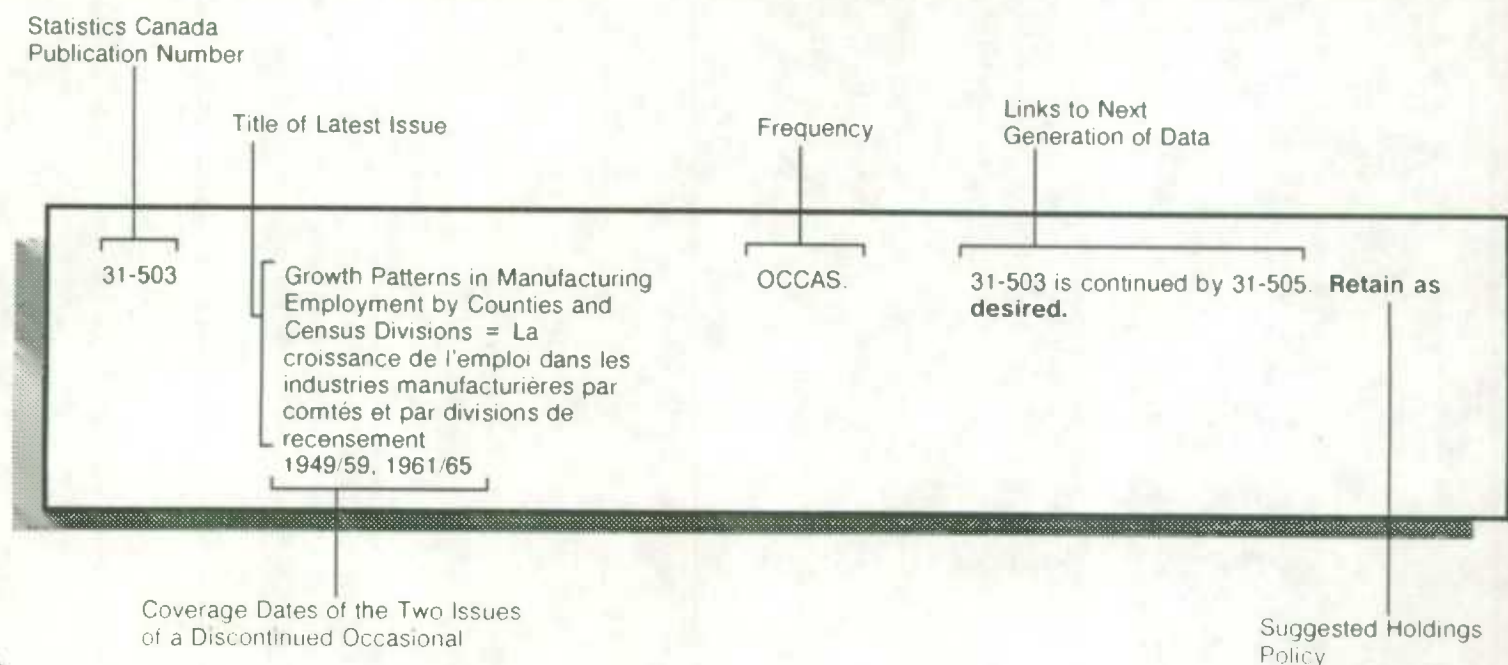

DATE FORMAT	EXPLANATION
(1932 -)	- indicates a current serial with coverage beginning in 1932.
(1952 - 1985)	- indicates a discontinued serial with continuous coverage between 1952 and 1985.
1962/1982	- indicates coverage dates in one volume. This usually appears with occasionals which feature an historical revision of data.
1955/1960, 1965/1970	- indicates coverage dates included in each of two separate volumes or editions. In some cases the coverage may overlap as in 1955/1960, 1955/1970. In this case, the later edition probably contains revised information.
1955/1960 - 1979/1981	- indicates that the first and last issues of a serial provide combined coverage, in one issue, of the years indicated. In between, were additional issues which covered single years.
1955/60 - 1968, 1970, 1981	- indicates that the first issue provided combined coverage in one volume for the years indicated with coverage for single years extending until 1968. Subsequent coverage is available for the years indicated (1970 and 1981) with gaps in coverage in between.
1981	- indicates the coverage date of a monograph.
1980 (1990 print date)	- indicates the coverage date and release date of an analytical study. If it was recently released, and therefore is current, the holdings decisions in libraries may be affected.

Managing the Collection of Discontinued Publications

Statistics Canada is continually adjusting its publishing program in response to changing demands for statistical information. This often results in the cancellation of series, the release of special studies or changes in the format of data as publications merge, are absorbed or change frequency.

Some discontinued publications still form part of the core collection since they provide data which is included in the suggested coverage period. Other discontinued publications remain valuable in certain collections as historical background to modern data series, but are unnecessary in others.

Many of the discontinued publications were issued prior to the introduction of the five-digit classification system. The publication programme at that time consisted of:

- (a) *regular periodical reports* similar in format to the monthly, quarterly and annual series being released today (some modern series continue titles established prior to 1959);
- (b) *memoranda reports* produced in limited quantities for special distribution to interest groups;
- (c) *reference papers*, usually containing analysis and data reporting the results of special studies, these publications varied in length and were not regular, preplanned publications. They were usually monographs although variations of the same report were released covering different years and tailored for different audiences; and
- (d) *special statements and special tabulations* not part of the publishing programme and deserving special attention when decisions to retain or to discard are being made.

The notes and suggestions provided in this manual should enable libraries to assess the value of the discontinued publications in their collections.

13-001	National Income and Expenditure Accounts: System of National Accounts = Comptes nationaux des revenus et des dépenses: système de comptabilité nationale (1953 -)	QTRLY	13-001 presents national income and expenditure accounts on a quarterly basis for approximately six years at a time. The most recent issue contains the most recent revisions. The data will eventually be revised and cumulated in annual terms and published in 13-201 under the same title. Statistics on farm income, receipts, expenses, production, capital value, and debt are presented in such a way that updating is accomplished three times a year. Preliminary estimates, net farm income, farm cash receipts, operating expenses, depreciation and value of farm capital for the previous calendar year are released in June. The index of farm production is updated in September while farm debt outstanding and final revisions to the preliminary June updates are released in December. Many of the series presented are historical and cover many years, in some cases from the mid 1920's. This makes this document a one stop source for agricultural data and allows the weeding of many of the older occasionals. This document should be carefully updated and retained indefinitely.

31-001	Inventories, Shipments and Orders in Manufacturing Industries = Stocks, livraisons et commandes des industries manufacturières (1947 -)	MONTHLY	Retention of this publication is based on the number of years covered in each publication and the bench mark year to which the data is adjusted. Beginning with the January 1985 issue, the tables are based on the 1980 Standard Industrial Classification (SIC) instead of the revised 1970 SIC. By retaining the December issue for each year plus the current month for the current year, coverage will be complete through changes in the time series and revisions due to bench mark changes. Coverage should span ten years.

43-003	Specified Domestic Electrical Appliances = Certains appareils électriques ménagers (1958 -)	MONTHLY	43-003 publishes data which is generated from a monthly survey as opposed to those data which are produced from the annual Census of Manufactures as in 43-212. The publication releases production and shipment data on a current month and year-to-date basis for about two years before the release of data with the same time coverage in the annual Census of Manufactures (43-250). Libraries should retain all issues at least until the industry analysis and shipment data is released in 43-250. Usually this will require approximately two years of monthly issues. Much of the data except for aggregate totals and values is suppressed to meet requirements for confidentiality. It is therefore of limited use as a source for production data for individual appliances. If production data is a requirement, libraries may consider keeping the December issues for previous years as well.

Libraries should retain publications for the current year plus December issues for ten previous years until coverage of data is available in 43-250.

51-001	Transcontinental and Regional Air Carrier Operations = Opérations des transporteurs aériens transcontinentaux et régionaux (1940 - 1980)	MONTHLY	51-001 is continued by 51-002. Significant changes in the reporting levels of 51-002 make it impossible to accurately compare data released in 51-001 with that released in 51-002. Libraries should therefore discard 51-001.
51-002	Air Carrier Operations in Canada = Opérations des transporteurs aériens au Canada (1970 -)	QRTLY	Significant changes in the reporting structure of the industry following an intensive review during 1980, make comparison of pre-1980 and post-1981 data difficult. The shifts in the reporting levels are such that libraries should not retain publications released later than 1981. The data are presently in a current quarter and year-to-date basis. Libraries should retain the quarterly publications for five years and retain the fourth quarter issues for the preceding five years, thereby giving ten years of coverage. If the recommendation of not keeping issues pre-first quarter 1981 is followed, full ten year coverage will not be complete until 1991.
51-003	International Air Charter Statistics = Statistique des affrètements aériens internationaux (1970 - 1983)	QRTLY	This publication is discontinued. Retain as desired.
51-004	Service Bulletin: Aviation Statistics Centre = Bulletin de service: Centre des statistiques de l'aviation (1968 -)	MONTHLY	This service bulletin is a means of releasing preliminary data in a timely manner. The content is relatively constant with the highlights on page one, acting as an index to each issue. The final data are covered in other publications from the Aviation Statistics Centre released later in the year. Libraries should retain current year only.
51-005	Air Carrier Traffic at Canadian Airports = Trafic des transporteurs aériens aux aéroports canadiens (1976 -)	QRTLY	Beginning with the 1984 coverage year, annual data is included in the fourth quarter of 51-005. Previously the annual data appeared in 51-203. Libraries should retain ten years of data. The ten year coverage should contain five years of quarterly data for comparison plus five previous years of annual data. This will require keeping the following combination of publications: 51-005 keep all issues after 1984 for a maximum of five years. Keep the fourth quarter only for the previous five years. Keep 51-203 from 1974 to 1984. Holdings of 51-203 can be reduced one year at a time as subsequent fourth quarter issues are released.

51-203	Air Carrier Traffic at Canadian Airports = Trafic des transporteurs aériens aux aéroports canadiens (1968 - 1983)	ANNUAL	Until 1984, publication 51-203 presented annual cumulations of quarterly data which had been published in 51-005. It ceased publication with the 1983 issue and the annual data was published in the fourth quarter of 51-005. Libraries should keep 51-203 from 1974 to 1984 and reduce their holdings one year at a time as subsequent fourth quarter issues of 51-005 are released. This will provide ten years of data coverage.
51-204	Air Passenger Origin and Destination: Domestic Report = Origine et destination des passagers aériens: rapport sur le trafic intérieur (1968 -)	ANNUAL	Retain the current issue plus issues for the previous nine years.
51-205	Air Passenger Origin and Destination: Canada-United States Report = Origine et destination des passagers aériens: rapport Canada-États-Unis (1968 -)	ANNUAL	Retain the current issue plus issues for the previous nine years.
51-206	Canadian Civil Aviation = Aviation civile canadienne (1970 -)	ANNUAL	Following an intensive review during 1980, 51-206 changed format. Beginning with the 1982 issue, it includes operational as well as financial data. Libraries should retain sufficient issues to provide ten years of coverage but they must be aware that, before the 1982 issue, only financial data will be included.
51-207	Air Charter Statistics = Statistique des affrètements aériens (1974 -)	ANNUAL	This annual publication presents revised and final figures for data which originally appeared in 51-003 which bears the same title. Libraries should retain the current year plus issues for the previous nine years.

52-001	Railway Carloadings = Chargements ferroviaires (1924 -)	MONTHLY	Publication 52-001 presents data on sixty-nine various freight commodities on a current month and year-to-date basis. As well as Canada totals, the data is subdivided into that which is carried on western and eastern lines. This data is more detailed than the weekly carloadings (51-005), which is just a total of tons of traffic loaded during a reference week. The data from 52-001 is aggregated and published in greater detail (320 commodities as opposed to 69) on an annual basis in 52-211. Libraries should therefore, retain issues of 52-001 only until the data is available in the annual publication 52-211. Currently, the time lag is about two years.
52-002	Railway Freight Traffic = Trafic marchandises ferroviaire (1921 - 1978)	MONTHLY	Retain as desired.
52-003	Railway Operating Statistics = Statistiques de l'exploitation ferroviaire (1921 -)	MONTHLY	The intent of this publication is to provide a timely release mechanism for seven railway carriers, which represent about 90% of the industry in Canada. Detailed and comprehensive data is subsequently released in the annual 52-215. Libraries should retain 52-003 until the data is available in the annual 52-215. Currently, there is about a two year lag in the production of the annual 52-215.

52-005	Railway Carloadings = Chargements ferroviaires (1985 - 1987)	WEEKLY	Although the publication has been cancelled effective vol. 3 #20, 1987, the data continues to be available via special release from the division and in an aggregate format in <i>The Daily</i> (11-001). Discard 52-005 as tonnage of freight carried is available in other publications.

52-211	Railway Transport in Canada: Commodity Statistics = Transport ferroviaire du Canada: statistiques sur les marchandises (1875 - 1987)	ANNUAL	This publication was already an established serial when the Dominion Bureau of Statistics took over its publication from the Department of Railways and Canals in 1918. It presents very detailed freight statistics by commodity and by class of railway. Following the release of the 1987 issue, 52-211 merged with 52-214 and 52-215 to form 52-216. Libraries should retain ten years of data. This will require keeping a combination of 52-216 and 52-211. Because the format has remained relatively constant over the years, the data are easily compared. If space is not a major factor in the retention policy decision, libraries may wish to retain 52-211 longer than suggested above.
52-212	Railway Transport, Part VI, Employment Statistics = Transport ferroviaire, partie VI, statistiques de l'emploi (1875 - 1981)	ANNUAL	52-212 was discontinued with the 1981 issue. Retain 52-212 as desired.

52-214	Railway Transport: Railway Commodity Origin and Destination Statistics = Transport ferroviaire: statistiques sur l'origine et la destination des marchandises transportées par chemin de fer (1976/79 - 1981/84)	ANNUAL	Each edition contains four years of data which is not really comparable to the data from 52-211 because the reporting structure is different. The data do not undergo significant revision with each issue. 52-214 merged to form 52-216 following the release of the 1981/84 issue. Libraries should retain ten years of data by keeping a combination of 52-216 and 52-214. Holdings of 52-214 can be reduced one year at a time as subsequent issues of 52-216 are released.

Retain the current issue plus issues for the previous nine years.
53-216	Urban Transit = Transport urbain (1956 - 1970)	ANNUAL	53-216 and 53-215 were suspended from 1971 to 1973 due to the cancellation of the survey from which the data was derived. With the reinstatement of the survey in 1974, 53-215 absorbed 53-216. Retain 53-216 as desired.

53-218	Road Motor Vehicles, Fuel Sales = Véhicules automobiles, ventes de carburants (1960 -)	ANNUAL	Each issue provides about five years of data on net sales of gasoline by month and by province. The data is subjected to a very limited revision. Libraries therefore need not be concerned about unrevised data in older issues. Retain current issue only for five years coverage or retain current issue plus issues for the previous nine years for longer coverage. The latter will cause much overlapping coverage.

53-222	Trucking in Canada = Le camionnage au Canada (1961 -)	ANNUAL	Publication 53-222 changed format with the 1984 issue which consolidated data from three surveys under one cover for the first time. Data previously released in 53-224 was also absorbed. Libraries should retain ten years of data. This will require keeping 53-224 from 1974 to 1983 and keeping the current issue plus issues for previous nine years of 53-222. Holdings of 53-224 can be reduced one year at a time as subsequent issues of 53-222 are released.
53-223	Motor Carriers - Freight (Common and Contract): part II (1961 - 1969)	ANNUAL	53-223 continues part of 53-205 which split into 53-222 and 53-223 following the release of 1960 data. 53-223 was then absorbed by 53-222 following the reinstatement of the survey and the resumption of the publishing of data in 1974. Retain 53-223 as desired.
53-224	For-hire Trucking Survey = L'enquête sur le transport routier de marchandises pour compte d'autrui (1970 - 1983)	ANNUAL	Publication 53-224 was absorbed by 53-222 with the 1984 issue. In order to maintain ten years of statistics, libraries should retain issues of 53-224 from 1974 to 1983. Holdings can be reduced as subsequent issues of 53-222 extend the coverage of data.
53-225	Fuel Consumption Survey: Light Trucks and Vans = Enquête sur la consommation de carburant: camionnettes et fourgonnettes (1981/82 - 1983/84)	ANNUAL	The Fuel Consumption Survey which was begun for passenger cars in July 1979 was expanded to include light trucks and vans in 1981. The result was the release of the annual 53-225 which survived as an annual until it was absorbed by the quarterly 53-007 with the January/March 1985 issue. Retain 53-225 until ten years of coverage is provided in 53-007 at which time 53-225 can be discarded.
53-226	Fuel Consumption Survey: Annual Report = Enquête sur la consommation de carburant: rapport annuel (Oct. 1979/Sept. 1980 -)	ANNUAL	The first issue of this title to appear with catalogue number 53-226 was the Oct. 1981/Sept. 1982 and Oct. 82/Sept. 83 issue published in September 1987. However, two issues were previously published under the same title covering Oct. 1979/Sept. 1980 and Oct.1980/Sept. 1981. These were previously numbered as supplementary documents K-049B and W-055B. These should be relabelled and consolidated in library collections. Although the title suggests that it is a cumulation of the quarterly, 53-007, the publishing division has advised that duplication does not occur. Libraries should retain the current issue of 53-226 plus issues for the previous nine years. Where possible begin the collection with the 1979/85 issue.

The figures are value figures and, in addition, the province of clearance (i.e. port of entry) is provided. 65-006 is the early release vehicle for data which appears with greater detail and with number of units, etc. in publication 65-203. Libraries should retain the current issue plus the fourth quarter issue from the previous year until coverage is provided by 65-203.
65-007	Imports by Commodity = Importations par marchandises (1944 -)	MONTHLY	Beginning with 1988, access to imports by commodity data is provided by 12-578, the alphabetical index to the Harmonized Classification System. Previous to 1988 access was provided by 65-502. Libraries should retain all issues until coverage is provided in 65-203 if monthly data is required. If this is not a consideration, libraries could retain current issue plus the previous December issue which would provide interim data coverage until the succeeding issue of 65-203 is released. The time lag is currently about one year.

In order to maintain a collection which spans ten years, libraries will need to retain current issues plus the fourth quarter issue from the previous ten years. This will produce significant overlap since each issue contains three years of data. Because of this, users are cautioned to always use the most recently published data.

71-601	Labour Force Survey: Research Papers = Documents de recherche de l'enquête sur la population active Papers #1 - 45	IRREG.	<p>This series of research papers has been the source of much confusion. Originally, the first of the series were released as unnumbered internal working papers. Eventually, as more were released and as researchers began to request copies, individual issues were selected for inclusion in 11-207, the <i>Listing of Supplementary documents</i>. With the advent of the departmental papers programme (the -X- numbers), individual papers in the series were given consecutive numbers such as 71-X-501, 71-X-502, etc. For ease of filing and access the <i>Labour Force Survey Research Papers</i> were finally given the number 71-X-512 and all issues previously issued (numbers 1 to 41) were gathered to that number. When the department papers or -X- numbers were discontinued, the series was labelled 71-601 but not before some were issued with other numbers such as 71-582 and 71-530. Currently, all <i>Labour Force Survey Research Papers</i>, numbers 1 through 45, should be labelled and shelved as 71-601, # 1 to 45. All future issues will be released with that number. The Statistics Canada Library has one of the few complete sets since the early numbers in the series were not for sale nor subject to requirements for legal deposit. These are available for interlibrary loan as needed. A complete list of all titles is available from the Statistics Canada Library. The research papers themselves are significant in terms of their research value as the source for information about labour force data which is not available in the regular publications. Libraries should retain the complete series where space and collection policies allow.</p>

72-001	Advance Statement on Employment and Average Weekly Wages and Salaries = L'emploi et la rémunération hebdomadaire moyenne, chiffres provisoires (1948 - 1971)	MONTHLY	Discard.
72-002	Employment, Earnings and Hours = Emploi, gains et durée du travail (1922 -)	MONTHLY	The survey and the methodology used in the processing of the data from which 72-002 is produced has changed frequently and radically. Data published in 1986 for example is not exactly comparable to data released in 1983. Caution is required when users of the data are trying to compare data from different years. Because of the complexity involved in providing comparable data, libraries should retain issues for the most current plus the previous year and use either CANSIM, the publishing division, the nearest regional office or the Statistics Canada Library for earlier data.
72-003	Man-hours and Hourly Earnings (1944 - 1971)	MONTHLY	Discard.
72-004	Federal Government Employment = L'emploi dans l'administration fédérale (April 1952 -)	QRTLY	72-004 was issued as a monthly between April 1952 and June 1967 when it became a quarterly. The data presented in each issue on a quarterly basis is not cumulated on a annual basis. Publication number 72-205, entitled <i>Federal Government Employment in Metropolitan Areas</i> does provide some duplicate coverage although in less detail. Libraries should be guided by their needs in retaining this publication. If libraries wish to have the suggested ten years of data coverage, they will need to keep all issues for the past ten years. The data is available on CANSIM in the same format as the publication. As well, the complete collection will remain intact at the Statistics Canada Library for those who wish to keep less than ten years and depend on interlibrary loans as the need arises.
72-005	Estimates of Labour Income = Estimations du revenu du travail (1946 -)	QRTLY	Each issue contains five years of revised data organized by month. It would be difficult to keep the suggested ten years of data without having a confusing series of overlapping data. Libraries should keep the current issue only, which would provide at least five current years of data and use either CANSIM or the Statistics Canada Library for data beyond the current five years and previous four years.
72-006	Hiring and Separation Rates in Certain Industries (1947 - 1966)	SEMI ANNUAL	The survey was cancelled following the release of 1966 data. Discard 72-006.

STC Pub. No.	Title	Frequency	Suggested Retention
72-007 E & F	Provincial and Territorial Government Employment (1959 -) L'emploi dans les administrations provinciales et territoriales (1959 -)	QRTLY	Libraries should base their retention decision for this publication on need. In order to have the suggested ten years of data, libraries would need to retain all issues for the past ten years. The data is available via CANSIM, and back issues of 72-007 are available for interlibrary loan from the Statistics Canada Library.
72-008	Estimates of Employees by Province and Industry = Estimations du nombre de salariés par province et par industrie (1964 - 1983)	MONTHLY	72-008 was absorbed by 72-002 with the April 1983 issue. Changes in coding and methodology make the data difficult to compare. The data is available on CANSIM or from the division. Using these sources would allow the discarding of 72-008.
72-009	Local Government Employment = L'emploi dans les administrations locales (Jan/March 1967 -)	MONTHLY	Libraries should be guided by their needs in deciding the retention policy of 72-009. If the suggested ten current years of data is to be observed, all issues of 72-009 for the past ten years will be required. The data exists on CANSIM and the hard copies are available on interlibrary loan from Statistics Canada Library.

72-207	Notes on Labour Statistics (1971 - 1973)	ANNUAL	Discard.
72-208	Work Injuries = Accidents du travail (1983/85 -)	ANNUAL	A previous edition of the same title covering 1982 to 1984 was released as an internal paper. It is now labelled and filed as the first issue of 72-208. If the present practice of covering more than one year per issue continues, there will be overlapping coverage. The most recently published data should always be used. Retain sufficient issues to provide ten years of coverage.

87-205 and 87-205S	Public Libraries in Canada = Bibliothèques publiques au Canada (1982/1984 -)	ANNUAL	87-205 continues 87-514. The first issue of 87-205 (1985/86) was published with an historical supplement (87-205S) entitled <i>Public Libraries in Canada: a Three Year Digest</i> . The supplement provides coverage from 1982. Some confusion in the manuscripts resulted in a misleading bibliographic note being placed in the supplement suggesting that the supplement (87-205S) continues 87-514. In chronologic sequence of years covered, this may appear to be the case, however 87-205S should be viewed as the historical supplement to 87-205 and therefore 87-205 continues 87-514. Libraries should begin their collection of 87-205 with the 1982/84 issue and retain sufficient future issues to provide ten years of coverage.
