# GEOGRAPHICAL CODE FOR MANUFACTURING STATISTICS

## I n t r o d u c t i o n

This is a companion volume to the "Standard Industrial Classification Manual", which is the official guide to those interested in industry classification. This volume is intended to serve as the official guide in coding industries geographically, and is based on the county and census divisions adopted in publishing the results obtained through the Decennial Census of Canada. Through a uniform system of geographical codes, it is possible to present geographical statistics from other sources that are comparable to the area information on population, etc. made available by the Decennial Census.

The basic area is the province which is further broken down into counties in the Eastern Provinces and census divisions in the Western Provinces. Each county and census division within a province is assigned a code number which prefaces the codes for urban and rural areas within its boundaries. To differentiate incorporated areas according to size, the following stratification has been incorporated in the coding system:

01 - 09	indicates	cities
10 - 29	"	towns
30 - 69	"	villages
00	"	rural areas (including unincorporated villages)
99	"	rural areas adjacent to metropolitan centres for which separate figures are published

A map is appended indicating the location of counties or census divisions in each province.

The geographic code for manufacturing statistics when used in conjunction with the industrial code indicates both the type and location of an establishment. The code for Dominion Manufacturing Company Limited at Cornwall, Ontario, for example, would be 3651 - 5 - 4601 - 029. The interpretation of this code is as follows:

3651 indicates that this establishment is  
classified in the Glass Industry  
5 shows that it is located in Ontario  
46 " " " " " " Stormont County  
01 " " " " " " Cornwall  
029 is the number of the establishment in the  
above-named industry

The composition of the metropolitan areas of cities which have well-defined satellite communities in close economic relationship to them is given in Part IV.

As the size of communities is continually changing through annexations or the incorporation of new localities, periodic revisions of the geographic code are necessary. The loose-leaf system of binding used for the present manual facilitates the incorporations of such revisions by allowing the insertion of additional pages as required.

The code numbers for Newfoundland will be assigned when mapping in connection with the Population Census is completed. The additional pages can then be inserted.

Inquiries regarding the composition and application of this coding system should be directed to the General Manufactures Section, Dominion Bureau of Statistics, Ottawa.

## PART IV

### "GREATER" CITIES AND SATELLITE COMMUNITIES WITH GEOGRAPHICAL CODE

For Census purposes, the "greater" cities, (or metropolitan areas), indicate those cities having well-defined satellite communities which are outside the boundaries of the cities proper, but are in close economic or geographical relationship to them. Not all of the larger cities of Canada, (e.g., Calgary and Edmonton), are of this character. Those in the above category, however, include Halifax, Hamilton, London, Montreal, Ottawa, Quebec, Saint John, Toronto, Vancouver, Victoria, Windsor and Winnipeg.
