#### **CHANGES IN COMMODITY CODES**

Users of this supplement are asked to note that the categories of goods covered by the descriptions listed below have been assigned new commodity codes, which come into force at once. These code changes, which have been held to a minimum, are necessary to provide separate coding identification for the goods concerned.

These changes will be incorporated into the second edition of the complete Commodity Index, which will appear in 1973, and will be repeated in the Department of National Revenue, Customs and Excise Memorandum D44-10. Users may wish also to make a hand addition in their present copies of the Commodity Index.

<b>COMMODITY DESCRIPTION</b>	<b>NEW CODE</b>	<b>PAGE IN INDEX</b>
Dental (X-ray) equipment .....	709 - 09 - 51	15
Adhesive bandages and dressings .....	881 - 13 - 36	16
Suture materials, bulk, n.e.s. .....	881 - 20 - 30	16
Contact lenses .....	883 - 99 - 61	19

## INTRODUCTION

### SPECIALISED SUPPLEMENT

This supplement to the Canadian International Trade Classification (CITC) Commodity Index is one of a number prepared as an aid to those who import significant amounts of the goods which it covers. The complete CITC Commodity Index remains the master index, in that it seeks to cover all goods which constitute the foreign trade of Canada. As such it will remain the primary reference manual for traders who handle many kinds of goods. For more specialised importers, however, and for Customs brokers who have clients who import the kinds of goods covered by the supplements, it is hoped that the information contained herein will simplify the task of preparing entry documents. Every supplement has been prepared by one or more officers who are specialists in the particular commodity area, frequently after discussion with people directly involved with the area covered by the supplement.

### FORMAT

Although the commodity areas covered by the supplements differ, the format is similar in all cases. Firstly, there is a Class Order Listing of the 3-digit groups and 5-digit classes of Statistics Canada Import Commodity Classification, from which the 7-digit CITC classes were derived. This material is in numeric order, so that users may follow the logic of the construction of the CITC, in particular that part of it covered by this supplement. Next, there is a Section of Commodity Definitions, which detail the structure of the CITC by means of the 7-digit commodity code headings, and also contain a number of paragraphs of explanatory material of a technical nature. Finally, there is a complete listing, in alphabetic order, of all the commodity descriptions and codes, together with the appropriate units of measure and their codes, of all the goods which fall into the subject matter of the supplement. This listing is a selection of the suitable items from the master CITC Reference Manual. Users will note that, unlike the master reference manual, the supplements do not list the "Tariff Items Commonly Applied" against the commodity description. If any help is needed in determining the correct tariff status of goods imported, please contact your local Collector of Customs and Excise.

### HOW TO FIND THE CORRECT COMMODITY CODE

The 7-digit code for any commodity in the area covered by this supplement may be located by consulting the alphabetic listing at the end. If this procedure is not successful, the Class Order listing on page 11 should be consulted next to find the first five digits of the commodity

code. When the first five digits are found, go to the page indicated in the Commodity Definitions section, where the 7-digit commodity code headings are listed. If it is impossible to find the proper 7-digit commodity code, select the appropriate 5-digit from the Class Order Listing and enter it on the B3 form together with the *two-digit suffix 99*. *This procedure should only be used as a last resort.*

In a number of places in the Commodity Definitions part of this Supplement a commodity code will appear in the following form:

Steel, plastic and other orthopaedic implants  
(881-81-xx)  
Disposable syringes (881-94-xx)  
Disposable instruments (881-97-xx)

The above examples are from page 13. The two characters *xx* are used to indicate that the final two digits of the commodity code will depend on the particular commodity being cleared, thus, in the example above, upon the kind of surgical implant, disposable syringe or instrument. For determination of the sixth and seventh digits, see elsewhere in this Supplement, or else consult the master CITC reference manual.

### PACKAGING

Special procedures should be followed in applying the 7-digit commodity code to import packaging. There are two different categories of packaging in use, and the procedure to be followed will depend on the nature of the packaging. They are:

- (i) Import packaging which is *reusable*. All such packaging is included separately at the end of the introduction on page 9, together with the appropriate 7-digit code to be used. In all cases the first three digits for reusable packaging will be in the 950 series.
- (ii) Import packaging which is *not reusable*. There are some packing charges which are included in the costs of the goods, but shown separately on the Form B3. For these, select the appropriate commodity code for the goods in question, and inscribe on the B3 the first five digits only of the commodity code selected, with the final two digits in all cases of this kind to be 01.

### GOODS RETURNING AFTER EXPORT

All goods such as contractor's equipment and tools, survey equipment, construction and logging machinery, which are returned to Canada within five years of export, and entered under tariff items 7090501 and 7091001, should be assigned the applicable commodity code.

## UNITS OF MEASURE

The commodity descriptions are followed in many cases by a unit of measure (pounds, bushels, cubic feet, etc.) and its accompanying 2-digit code. Where this occurs, then the appropriate 2-digit code should be entered in the proper field of Form B3 and the quantity field completed accordingly. When the Customs Tariff requires a conflicting unit of measure, always use the unit of measure specified in the Tariff.

In those places in the listing where the unit of measure column contains only a dash (-) and the code column is blank, there is no requirement on the part of either DNR Customs or Statistics Canada for any unit of measure information in conjunction with those particular commodity codes. In such cases, both the unit of measure and the quantity fields on Form B3 are to be left blank.

## ABBREVIATIONS

In order to accommodate the commodity descriptions in the alphabetic listing at the end it

was necessary, in some cases, to use some abbreviations because of space limitations. One abbreviation commonly employed is n.e.s. which means "not elsewhere specified". The meaning of this phrase is the same as "not otherwise provided for" (n.o.p.) used extensively in Customs manuals.

Further information on specific problems may be obtained from:

Commodity Officer, Scientific and Medical,  
External Trade Division,  
Statistics Canada,  
Ottawa, Ontario.

Phone: (613) 996-4509

Please note that any written enquiry for assistance in allotting seven-digit commodity numbers to a specific commodity not listed in this supplement should be accompanied by a full technical description.

## COMMODITY DEFINITIONS

### Group

706	<b>Medical (and Hospital) and Related Instruments and Equipment, (except X-ray 709-09 and Laboratory 705-90)</b>
-----	--

Instruments and equipment in this group are mainly used in professional practice (doctors, surgeons, dentists, veterinary surgeons, nurses, etc.) to make diagnosis, to prevent or treat an illness or to operate. Instruments and appliances for anatomical or autopic work, dissection, dental laboratories, etc. are also included.

The instruments and appliances may be equipped with optical devices (tracheoscopes, endoscopes, cystoscopes, etc. 706-39). They may also make use of electricity as a power source, for illumination, or as a preventative, curative or diagnostic agent.

Class Number	Description	Commodity Code	Measure Unit	Code
706-09	<b>Physiological Monitoring and Recording Systems Accessories and Parts</b>			
	Instruments included under this heading are used to record or display information on the function of the heart, brain, muscle and arteries. Related equipment such as defibrillators and pacemakers will also be included.			
	Electro-cardiographs, E.C.G.....	706-09-11	--	--
	Electro-encephalographs, E.E.G.....	706-09-11	--	--
	Defibrillators, cardiac.....	706-09-21	--	--
	Pacemakers, all types.....	706-09-31	--	--
	Catheters for pacemakers .....	706-09-37	--	--
	Physiological recording equipment, parts .....	706-09-88	--	--
	Physiological monitoring/recording equipment, n.e.s.....	706-09-89	--	--
706-19	<b>Electro-medical and Electro-surgical Equipment, Apparatus and Parts, n.e.s.</b>			
	This heading covers electro-medical apparatus for preventative, curative and diagnostic purposes. Electro-therapy and diathermy apparatus used for diagnosis and to treat such diseases as neuritis, neuralgia, phlebitis, etc. These operate by the use of high frequency (short wave, ultrasonic, ultra short wave, etc.) currents and employ electrodes in a variety of forms. Some special electrodes are used for electro-cutting and electro-coagulation (cauterizing) purposes. Actino-therapy apparatus using radiation for diagnosis and treatment of skin diseases. Audiometers for hearing tests based on frequency variations.			
	Pulmonary function analysis equipment .....	706-19-11	--	--
	Parts for pulmonary function apparatus .....	706-19-18	--	--
	Diathermy and electrothermy equipment .....	706-19-21	--	--
	Diathermy pads.....	706-19-28	--	--
	Audiometers .....	706-19-31	--	--
	Audiometer parts .....	706-19-38	--	--
	Cautery instruments and medical lasers.....	706-19-41	--	--
	Electro-medical equipment parts, n.e.s.....	706-19-88	--	--
	Electro-medical/surgical equipment, n.e.s.....	706-19-89	--	--
706-31	<b>Surgical Instruments of Steel, Accessories and Parts</b>			
	This heading will include instruments and appliances for anatomical or autopic work, dissection, surgical procedures, etc. Some of these instruments are actually tools, e.g., hammers, mallets, saws, chisels, forceps, etc., or articles of surgical cutlery, e.g., scissors, knives, shears, etc.			
	<b>Include:</b> Reusable glass syringes.			
	<b>Exclude:</b> Steel, plastic and other orthopaedic implants (881-81-xx), Disposable syringes (881-94-xx), Disposable instruments (881-97-xx).			
	Surgical instruments, reusable, n.e.s.....	706-31-10	--	--

COMMODITY DEFINITIONS

Class Number	Description	Commodity Code	Measure Unit	Measure Code
706 - 39	<b>Medical Diagnostic Instruments, n.e.s.</b>  The instruments included in this class are usually hand held by the examining physician or medical practitioner and used to diagnose a disease or illness. Some instruments may use batteries or electricity for illumination.  <b>Exclude:</b> Electronic diagnostic instruments (706 - 09 - xx), Electrical diagnostic instruments (706 - 19 - xx). ### COMMODITY DEFINITIONS

Class Number	Description	Commodity Code	Measure Unit	Measure Code
706 - 81	<b>Sterilizers, Autoclaves and Parts, (except Industrial)</b>  These consist essentially of chambers or receptacles, heated usually by steam or boiling water (or sometimes by hot air) in which the articles or materials to be sterilized are maintained for a period at a sufficiently high temperature to kill bacteria, etc., without alteration of the composition or physical condition of the articles or materials themselves.  <b>Include:</b> Gas sterilizers  <b>Exclude:</b> Industrial sterilizers (509 - 81 - 50)  Sterilizers, autoclaves ..... 706 - 81 - 20 -- -- Parts for sterilizers and autoclaves ..... 706 - 81 - 88 -- --			
706 - 83	<b>Anaesthetic and Oxygen Administering Equipment, Accessories and Parts</b>  This heading will include anaesthesia equipment and machines, respirators, resuscitators, controlled environment tents and canopies, etc. with their accessories.  <b>Exclude:</b> Gas cylinders (bottles) reusable (950 - 24 - 30) Disposable masks, breathing tubes, oral airway, endotracheal tubes (881 - 99 - xx) Respirators, safety equipment (720 - 39 - xx).  Anaesthetic and oxygen equipment ..... 706 - 83 - 10 -- -- Anaesthetic and oxygen equipment parts ..... 706 - 83 - 88 -- --			
706 - 89	<b>Hospital and Medical Equipment and Parts, n.e.s.</b>  This class includes equipment of a very specialized nature for use in hospitals. Operating room equipment, infant incubators, dialysis apparatus, bed rails, walkers, artificial organs, etc.  <b>Exclude:</b> Hospital furniture (740 - 35 - xx), Hospital sanitary ware, bedpans, etc. (671 - 99 - xx), Operating room lighting (681 - 99 - 55), Dialysis supplies (881 - 99 - 11).  Artificial kidney machines ..... 706 - 89 - 11 -- -- Parts for kidney machines ..... 706 - 89 - 18 -- -- Operating, fracture and autopsy tables ..... 706 - 89 - 21 -- -- Heart-lung machine, modules and parts ..... 706 - 89 - 28 -- -- Parts for hospital, medical equipment, n.e.s. ..... 706 - 89 - 88 -- -- Hospital, medical equipment, n.e.s. ..... 706 - 89 - 89 -- --			
709 - 09	<b>X-ray and Related Equipment and Parts</b>  This heading covers apparatus based on the use of X-rays or the radiations from radioactive substances (including radiography and radiotherapy apparatus); X-ray generators; X-ray tubes; X-ray screens; X-ray high tension generators; X-ray control panels; X-ray apparatus for industrial use; therapy apparatus in which the radioactive source is a charge of radium, radio-cobalt or some other radioactive isotope; apparatus for radiological examinations used mainly in industry for checking metal parts, etc.  <b>Exclude:</b> X-ray film (915 - 23 - xx, 918 - 39 - xx), X-ray plates (915 - 28 - xx and 918 - 39 - xx).  Medical X-ray equipment ..... 709 - 09 - 11 -- -- Parts for medical X-ray equipment ..... 709 - 09 - 18 -- -- Non-medical X-ray equipment ..... 709 - 09 - 21 -- -- Teletherapy units using radioactive material ..... 709 - 09 - 31 -- -- Parts of teletherapy units above ..... 709 - 09 - 38 -- -- Dosimeters (X-ray) ..... 709 - 09 - 41 -- -- Dental X-ray equipment ..... 709 - 09 - 51 -- -- X-ray parts and accessories, n.e.s. ..... 709 - 09 - 88 -- -- X-ray equipment, n.e.s. ..... 709 - 09 - 89 -- --			

### COMMODITY DEFINITIONS

#### Group

##### 881 Surgical and Medical Supplies (including Veterinary and Hospital)

This group is comprised of a variety of supplies and consumable items used in hospitals, institutions and private homes. They form part of a rapidly changing group of commodities to which new and more sophisticated ones are being continually added.

Test kits (pregnancy, blood groupings and typings, etc.), disposable instruments, "ostomy" and urinary equipment and supplies, disposable hypodermic syringes, orthopaedic implants, bandages and dressings, sutures, etc. are examples.

Most reusable equipment for medical and hospital use will be included in Group 706.

Class Number	Description	Commodity Code	Measure Unit	Measure Code
881-13	<b>Bandages, Surgical Gauze, Absorbent Cotton and Dressings</b>			
	This heading covers all types of bandages and dressings, whether used by the medical practitioner, by a hospital or in the home.			
	Adhesive bandages and dressings include all wound dressings made of a pressure sensitive adhesive with a pad of gauze or other material.			
	Adhesive and surgical tapes in rolls .....	881-13-11	--	--
	Elastic bandages .....	881-13-21	--	--
	Traction bandages .....	881-13-31	--	--

COMMODITY DEFINITIONS

Class Number	Description	Commodity Code	Measure Unit	Measure Code
881-99	<b>Medical, Surgical and Hospital Supplies, n.e.s.</b>			
	Miscellaneous supplies which are not included in previously listed classes. All first aid kits, personal or industrial will be included.			
	Dialysis supplies (consumable) .....	881-99-11	--	--
	Sanitary pads, napkins and tampons .....	881-99-31	--	--
	Identification bracelets, beads, etc. ....	881-99-41	--	--
	First aid kits .....	881-99-61	--	--
	Disposable face masks .....	881-99-71	--	--
	E.C.G., E.E.G., paper .....	881-99-81	--	--
	Sanitary table paper, disposable .....	881-99-82	--	--
	Medical, surgical and hospital supplies, n.e.s. ....	881-99-89	--	--

Group

882 **Dental Supplies (Dental Equipment 706 - 51)**

This group will include only materials and supplies used by a dentist, orthodontist or dental laboratory.

**Exclude:** Tooth paste and powder (toilet preparation) (800-49-36),  
Tooth brushes, (except electric) (865-04-10),  
Tooth brushes, electric (697-99-21)

Class Number	Description

Group

883 **Ophthalmic Goods**

Class Number	Description
-----------------	-------------

883-12 **Spectacle and Eyeglass Frames**

**Include:** Frames for sunglasses.

All spectacle and eyeglass frames .....

883-12-10 No. 10

883-14 **Sunglasses, Complete with Lenses**

All sunglasses .....

883-14-10 No. 10

883-16 **Spectacles and Eyeglasses Complete with Frames**

**Exclude:** Hearing aid glasses (884-99-21),  
Sports goggles (832-xx-xx),  
Safety goggles and glasses (720-39-32).

All spectacles with frames .....

883-16-10 No. 10

883-19 **Parts for Spectacle and Eyeglass Frames**

All parts for spectacle and eyeglass frames .....

883-19-10 -- --

### COMMODITY DEFINITIONS

Class Number	Description	Commodity Code	Measure Unit	Measure Code
883-99	<b>Ophthalmic Goods, n.e.s.</b>			
	<b>Include:</b> Wetting solution for contact lenses and finished or semi-finished lenses for spectacles and eyeglasses.			
	<b>Exclude:</b> Lens blanks (glass 473-77-10) (plastic 425-99-70).			
	Spectacle and eyeglass cases .....	883-99-11	--	--
	Artificial eyes for human use .....	883-99-21	--	--

#### Group

##### 885 Orthopaedic Appliances

Class Number	Description			
885-52	<b>Artificial Limbs (Prosthetic) and Parts</b>			
	These wholly or partially replace defective parts of the body and usually resemble them in appearance.			
	<b>Exclude:</b> Implantable prosthetic devices (881-81-xx).			
	All artificial limbs, complete .....	885-52-10	--	--
	All parts for artificial limbs .....	885-52-88	--	--
885-54	<b>Elastic Hosiery</b>			
	<b>Include:</b> Stockings for varicose veins.			
	<b>Exclude:</b> Women's and girl's Supp (support) hose (785-35-80), Pantie hose, support type (785-37-20).			
	All elastic hosiery .....	885-54-10	No.	10
885-71	<b>Wheel Chairs, Invalid Chairs and Parts</b>			
	All wheel chairs and parts .....	885-71-10	--	--

**COMMODITY DEFINITIONS**

<b>Class Number</b>	<b>Description</b>	<b>Commodity Code</b>	<b>Measure Unit</b>	<b>Measure Code</b>
<b>885 - 99 Orthopaedic Appliances and Parts, n.e.s.</b>				
Canes under commodity code 885 - 99 - 12 will be made of metal and usually adjustable. Tripod and quad (quadruped walker) canes will be included.				
Wooden canes, usually considered as dress canes will be included with apparel accessories under commodity code 789 - 99 - 26.				
<b>Exclude:</b> Orthopaedic footwear (798 - 99 - 20), Steel and other orthopaedic implants (881 - 81 - xx), Wooden canes (789 - 99 - 26).				
Abdominal supports .....	885 - 99 - 11	--	--	
Crutches and canes .....	885 - 99 - 21	--	--	
Parts for orthopaedic appliances, n.e.s. ....	885 - 99 - 88	--	--	
Orthopaedic appliances, n.e.s. ....	885 - 99 - 89	--	--	

**915 - 23 X-ray Film Unexposed**

**Exclude:** X-ray plates, unexposed (915 - 28 - 20)

X-ray film, medical, unexposed .....	915 - 23 - 20	--	--
X-ray film, dental, unexposed .....	915 - 23 - 30	--	--
X-ray film, other than medical or dental, unexposed .....	915 - 23 - 90	--	--
