GUIDE TO STATISTICS PUBLISHED ON A REGIONAL BASIS

BY THE INDUSTRY AND MERCHANDISING DIVISION

July, 1957

R.J. Loosmore,
Industry and Merchandising Division,
Dominion Bureau of Statistics.

GUIDE TO STATISTICS PUBLISHED ON A REGIONAL BASIS

BY THE INDUSTRY AND MERCHANDISING DIVISION

This guide was designed to facilitate work on statistics for areas less than Canada as a whole. It deals only with published material, and covers the activities of the Industry and Merchandising Division.

The layout of the material follows, in general, the pattern used for the Division's publications. The primary industries of mining, forestry and fisheries are covered first, then manufacturing, followed by wholesale trade, retail trade, and the service trades.

The information is presented analytically by columns. The left-hand column gives a summary of the statistical data concerned. The next seven columns are used for the insertion of check marks against the series described, when data are available for that particular type of area. Columns 2 to 7 list the types of area most commonly used for Canadian statistics, and column 8 handles all other types of area.

Column 9 contains any special remarks which may be appropriate to the series. When column 8, "other area", is checked, the type of area is explicitly stated in column 9. In other cases, qualifications may be made about the specific areas checked, such as a note on the size of incorporated places for which data are available.

Column 10 gives the periods for which statistics are available. Column 11 gives the title of the publication concerned. Column 12 gives its serial number as listed in Current Publications 1956, in order to assist the potential buyer.

Other guides to the statistics of the Division are Guide to the Commodity Statistics of the Industry and Merchandising Division (other than Census of Industry), and Guide to Publications of the Industry and Merchandising Division which Delimit Sub-Groups of the Standard Industrial Classification.

R. J. Loosmore,
Assistant to the Director,
Industry and Merchandising Division.

MINING

1.

Statistics	Area							Remarks	Periodi- city	Title of publication	Serial number of publication
	Province	County or census division	Census sub- division	Metro- politan area	Incorp- orated place	Census tract	Other area				
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
Principal statistics of the mineral industry, comprising establishments, employees, earnings, cost of fuel and electricity, cost of process supplies, ores and containers, net value added by processing.	X							Composite totals for a broad industrial group, which includes five industries classified to manufacturing (smelting and refining, salt, clay products, cement and lime)	Annual	<u>General Review of the Mining Industry</u>	417
Cost of fuel and of electricity separately, quantity of electricity generated and purchased.	X							As above	Annual	As above	
Employees and their earnings by four major groups of mineral industries; wage-earners on surface, underground and at mill by three major groups; administration and office employees other than at mine or plant.	X								Annual	<u>General Review of the Mining Industry</u>	417
Cost of prospecting by metal mining companies, by industries.	X								Annual	<u>General Review of the Mining Industry</u>	417
Production of individual minerals, by quantity and value.	X								Annual	<u>General Review of the Mining Industry</u> <u>Preliminary Report on Mineral Production</u> See also individual Census of Industry reports.	417 414
