1/ The estimates of acreage and production for Ontario and British Columbia are in most cases compiled and published by the Provincial Departments of Agriculture. The exceptions are the acreage and production of peas, beans, and corn in Ontario for all years and the acreage of peas and beans in British Columbia for 1940 and 1941. These data and estimates of acreage and production for the other provinces, except census data for 1940 and 1941, are based on surveys conducted by the Special Crops Unit of the Agriculture Division.

2/ As reported in 1941 Census volumes.
