

DOMINION BUREAU OF STATISTICS

DAILY BULLETIN SUPPLEMENT

Advance Statement No. 2Summary Statistics of Manufacturing Industries, by Census Division or County, 1964

The statistics in the accompanying table are a selection of those which will be published later in the 1962, 1963 and 1964 issues of the DBS report, "Manufacturing Industries of Canada, Section G, Geographical Distribution" (Catalogue No. 31-009); the table also includes corresponding figures for 1961.

These data are the first published for 1963 and 1964 for census divisions or counties, but represent revisions to previously published 1961 and 1962 data for these sub-provincial areas and to provincial and Canadian totals originally published for 1961-1963.

All data in this advance release are final figures. They thus reflect completion of the revision programme associated with the revised Standard Industrial Classification and new establishment concept, together with various editing and other revisions to 1961-1963 data.

Census division or county data first published for 1961 in Catalogue No. 31-209 were revised when preliminary 1962 data were issued in a supplement to the "Daily Bulletin" of August 26, 1965, entitled "Advance Statement, Summary Statistics of Manufacturing Industries, by County or Census Division, 1962". That initial revision for 1961 presented the first "total activity" statistics of the manufacturing industries for census divisions or counties; the statistics in this present release reflect further adjustments to 1961 data which were not feasible at that time, as well as effecting revisions of 1962 census division and county data.

Provincial and Canadian totals for 1961, 1962 and 1963 presented here are revised from those published in the general reports of the 1963 annual Census of Manufactures. They agree, however, with revised data for 1961-1963 in the supplement to the "Daily Bulletin" of January 4, 1967, entitled "Advance Statement, Summary Statistics of Manufacturing Industries, 1964". These same data will be published in the general reports of the 1964 annual Census of Manufactures.

Figures for all four years reflect a substantial change in the method of valuing shipments in the smelting and refining industry, introduced with publication of 1964 results and incorporated in revisions to the

BUREAU FÉDÉRAL DE LA STATISTIQUE

SUPPLÉMENT AU BULLETIN QUOTIDIEN

Communiqué provisoire N°. 2Statistique récapitulative des industries manufacturières, par division ou comté de recensement, 1964

La statistique du tableau suivant a été choisie parmi les données qui seront publiées plus tard dans les livraisons de 1962, 1963 et 1964 du rapport du B.F.S. intitulé Industries manufacturières du Canada, Section G, Répartition géographique (n° de catalogue 31-009). Le tableau comprend également les données correspondantes de 1961.

Ces données de 1963 et de 1964 sont les premières qu'on publie par division ou comté de recensement. Elles constituent cependant des révisions aux données déjà parues de 1961 et 1962 pour ces mêmes secteurs, et aux totaux du Canada et des provinces d'abord publiées pour la période 1961-1963.

Tous les chiffres du présent communiqué sont définitifs. On peut donc en conclure que l'exécution du programme de révision découlant de la Classification type revisée des industries, du nouveau concept de l'établissement, ainsi que de divers contrôles et autres révisions apportés aux données de 1961-1963, est terminée.

Les données par division ou comté de recensement, d'abord publiées (n° de catalogue 31-209) pour l'année 1961, ont été rectifiées lors de la parution de données provisoires pour 1962 dans un supplément au Bulletin quotidien du 26 août 1965, sous le titre de Communiqué provisoire, statistique récapitulative des industries manufacturières, par division ou comté de recensement, 1962. Cette première rectification des données de 1961 présentait pour la première fois la statistique de "l'activité totale" des industries manufacturières par division ou comté de recensement. La statistique de la présente publication découle d'autres ajustements des données de 1961, lesquels étaient impossibles à effectuer à ce moment-là, de même que de certaines révisions aux données de 1962.

Les totaux des provinces et du Canada, que l'on présente ici pour les années 1961, 1962 et 1963, ont été rectifiés à partir des données publiées dans les rapports généraux du Recensement annuel des manufactures de 1963. Ils concordent, cependant, avec les données rectifiées de 1961-1963 du supplément au Bulletin quotidien du 4 janvier 1967 intitulé Communiqué provisoire, statistique récapitulative des industries manufacturières, 1964. Ces mêmes données figureront dans les rapports généraux du Recensement annuel des manufactures de 1964.

Les chiffres de ces quatre années reflètent un changement important dans la méthode d'évaluation des expéditions de l'industrie de la fonte et de l'affinage. La nouvelle méthode a été mise en vigueur lors de la publication des résultats de

1961-1963 data. This change will be explained fully in the industry report, "Smelting and Refining, 1964" (Catalogue No. 41-214), and briefly in "Manufacturing Industries of Canada, Section A, Summary for Canada, 1964" (Catalogue No. 31-203).

It should be noted that data for head offices, sales offices and auxiliary units are shown separately for the various provinces. These generally consist of separately-located administrative offices, sales offices, warehouses, laboratories, etc. of companies classified to the manufacturing industries but which are not considered establishments as they do not normally generate operational revenues. In the case of single-establishment firms whose executive personnel, salesmen, etc., are located at the site of the manufacturing plant, statistics on head-office operations are normally included with those of the establishment. On the other hand, head offices of single-establishment firms that are located outside the plant area and all head offices of multi-establishment firms are asked to submit separate reports, the data from which are shown in the item "Head offices, sales offices and auxiliary units". The separate recording of such units helps prevent distortion of inter-area comparisons as head offices of large multi-unit firms tend to be located in large metropolitan areas where their inclusion would overload expenses relative to operational revenue. Prior to 1961, there was incomplete coverage of separately-located head offices, and those surveyed were included in county and municipal totals.

An advance statement of selected principal statistics for the manufacturing industries of selected cities and census metropolitan areas, to be issued shortly as a supplement to the "Daily Bulletin", will also contain certain final figures for the entire 1961-1964 period.

Publication of 1963 and 1964 sub-provincial data has been delayed by special problems of a non-recurring nature arising from re-organization of the data system incident to computerization of processing and compiling of the annual Census of Manufactures. More timely schedules of publication for sub-provincial data are anticipated for future years.

1964 et appliquée aux révisions des chiffres de 1961-1963. Le changement sera expliqué en détail dans le rapport intitulé Smelting and Refining, 1964 (n° de catalogue 41-214) et plus sommairement dans Industries manufacturières du Canada, Section A, Sommaire, 1964 (n° de catalogue 31-203).

On doit noter que les chiffres concernant les sièges sociaux, les bureaux de vente et unités auxiliaires sont donnés séparément pour les diverses provinces. Il s'agit habituellement des bureaux d'administration situés dans des locaux distincts des bureaux de vente, des entrepôts, des laboratoires, etc., de sociétés classées parmi les industries manufacturières, mais qu'on ne désigne pas comme "établissement", car, d'ordinaire, ils ne produisent pas de recettes d'exploitation. Dans le cas de sociétés à établissement unique dont le personnel exécutif, les vendeurs, etc., travaillent dans l'usine manufacturière même, les chiffres visant l'activité du siège social sont habituellement inclus dans ceux de l'établissement. D'autre part, les sièges sociaux des maisons à établissement unique situés à l'extérieur de l'usine, et tous les sièges sociaux des sociétés à établissements multiples doivent soumettre des rapports distincts, dont les données paraissent sous le poste "sièges sociaux, bureaux de vente et unités auxiliaires". L'enregistrement distinct de ces unités aide à prévenir la déformation des comparaisons inter-régionales, étant donné que les compagnies à établissements multiples sont d'ordinaire situées dans les grands centres métropolitains et leur inclusion dans ces zones surchargerait les dépenses relativement aux recettes d'exploitation. Avant 1961, le recensement des sièges sociaux non intégrés géographiquement aux usines proprement dites n'était pas complet. De plus, les sièges sociaux recensés étaient inclus dans les totaux des comtés et des municipalités.

Les communiqués anticipés de certaines statistiques principales afférentes aux industries manufacturières de certaines villes et zones métropolitaines de recensement, à paraître prochainement comme suppléments au Bulletin quotidien, comprendront également certains résultats définitifs pour toute la période 1961-1964.

La publication des données infra-provinciales de 1963 et 1964 a été retardée en raison de difficultés particulières qui ne sont pas susceptibles de se répéter et qui ont résulté d'une réorganisation du traitement des données inhérent à la mécanisation du dépouillement et de la compilation du Recensement annuel des manufactures. On prévoit pouvoir publier ce genre de données en temps plus utile à l'avenir.

PRINCIPAL STATISTICS OF THE MANUFACTURING INDUSTRIES IN CANADA, BY PROVINCE AND COUNTY OR CENSUS DIVISION, 1961-1964

STATISTIQUES PRINCIPALES DES INDUSTRIES MANUFACTURIÈRES DU CANADA, PAR PROVINCE ET COMITÉ OU DIVISION DE RECENSEMENT, 1961-1964
