## PREFACE

This publication introduces a new system of monthly wholesale price indexes covering the period 1956 to 1959. Also included is an explanatory text concerning concepts and methods which is intended to assist in the interpretation and appropriate use of the indexes.

It is believed that these indexes will meet the majority of the needs of users who have found series available at present inadequate for their purposes. In addition, it is hoped that the indexes will stimulate more widespread use of wholesale price indexes as instruments of economic analysis. In this connection, criticisms and suggestions for improvement are welcomed.

The material for this publication was prepared in the Wholesale Prices Section of the Prices Division.

WALTER E. DUFFET,  
*Dominion Statistician.*

## I - INTRODUCTION

This publication presents a new system of wholesale price indexes entitled Industry Selling Price Indexes. For each of nearly one hundred manufacturing industries, these indexes express the current composite price of shipments of commodities of Canadian manufacture as a per cent of the base year (1956) price equivalent which is taken as 100.0 per cent.

The Industry Selling Price Indexes are compiled and presented according to the Standard Industrial Classification.<sup>1</sup> This is the fundamental distinction between them and previously published wholesale indexes, which are classified by commodity. However, the adoption of this system of classification does not signify that the new industrially classified series are intended to displace the commodity classified indexes. On the contrary, neither the one nor the other form of classification alone appears capable of serving all the purposes required of wholesale indexes. Accordingly, present plans call for refining and broadening existing commodity series in the belief that they have their place, and that indexes based on both systems of classification should be regarded as complementary. However, it will be some time before the revision of the present commodity indexes will be completed, therefore, the General Wholesale Index and its components will continue to be published along with current Industry Selling Price Indexes in the monthly publication "Prices and Price Indexes" (Catalogue No. 52-002).

The Industry Selling Price Indexes presented here refer exclusively to the manufacturing industries and accordingly include only prices of domestically manufactured products. Also, in the price collection operations, commodity definitions and terms of sale are specified in sufficient detail to give distinctive emphasis to price conditions and practices characteristic of each manufacturing industry. For these reasons the indexes are not intended to measure price movements in channels of distribution subsequent to manufacturers' sales nor, obviously, do they include prices of imported products except, of course, to the extent that imported materials are ingredients of domestically manufactured products. Although they are confined to the Manufacturing Division, these indexes are based on a much larger

number of firms and prices than is the case with the General Wholesale Index. The Industry Selling Price Indexes include approximately 3000 quotations reported by some 1600 respondents.

In the calculation of these indexes, primary emphasis is placed on critical examination and informed evaluation of prices. This has resulted in some progress in detecting commodity discontinuities in price series and has given rise to improved techniques for evaluating their effects on price. Also, as a result of increasing the number of price quotations collected, the number and variety of commodity price statistics available to serve the diverse needs of users have been enlarged. A selection of these commodity indexes is contained in this publication. It should be understood that a commodity index under the industry classification system measures price movement of that commodity with respect to sales made by a particular designated industry, and is not a consolidation of price movements of the commodity based on prices from all industries where it is sold.

The matter of revising wholesale price indexes has been under consideration for some time. Both the conceptual basis and prewar weights of the General Wholesale Index have been of concern over recent years to users of the indexes as well as to the Dominion Bureau of Statistics. With the growing number of users and increasing diversity of purposes to be served, demand for broadening and clarifying the conceptual basis of wholesale indexes has intensified. Current interest is high in statistics which relate to enterprises and classifications of enterprises primarily, and secondly to commodities. Users have indicated that they want more precisely based indexes which relate to industries, particularly manufacturing industries, augmented by commodity series for more manufactured goods. Thus it is clear that the present commodity classified General Wholesale Index and its component series, based on a "chief component material" criterion, are unsatisfactory for many current economic purposes. Industry Selling Price Indexes, which relate to the Standard Industrial Classification and which refer to a single and precise level of distribution, are intended to meet these needs.

## II - RATIONALE OF INDUSTRIALLY CLASSIFIED INDEXES

In recent years the range and depth of analytical uses of a variety of statistics classified according to industrial divisions have been increasing, and it is fundamental to this development that the Standard Industrial Classification be generally and uniformly applied. This common approach to classification is essential to the historically uniform and systematic assembly of complex statistical series such as input-output tables, indexes of industrial production and the national accounts. These series incorporate various primary statistics into a general analytical framework to which indexes of manufacturers' prices are now added.

<sup>1</sup> A brief outline of this classification system is given in Part IV of this text.

The statistical system of the Dominion Bureau of Statistics in turn provides a useful framework for prices analysis. Through general application of the Standard Industrial Classification, statistics of industries are organized on a uniform basis. Thus information on relationships between a variety of series and industries can be useful in assessing price tendencies, not only with reference to their immediate effects on other elements of the economy but also in regard to the probable direction and extent of their repercussions. For example, input-output statistics may help cast some light on the subsequent course and impact of price changes which occur at the primary industrial level. Conversely, this framework of statistics makes it feasible to relate other economic factors to price.

The Manufacturing Division has been chosen for inaugurating the new system, principally because price indexes appear to be most needed in this area. Manufacturing accounts for about one quarter of Gross Domestic Product, and by this standard it is the largest single industrial division. In addition, manufacturers are informed and frequent users of statistics. Their complex business operations require them to keep detailed records, from which meaning-

ful statistical data can be extracted without undue difficulty; and availability of data is of particular concern with a new project. Finally, the structure of the Manufacturing Division makes possible the use of small samples of establishments, since more than 80 per cent on average of total value of Factory Shipments is accounted for by less than 15 per cent of the number of establishments in the division.

### III - OUTLINE OF INDUSTRY SELLING PRICE INDEXES

Indexes introduced in this publication are weighted according to the value of shipments in 1953 as reported to the Industry and Merchandising Division of the Dominion Bureau of Statistics.

The year 1953 was chosen as the base weighting period of the index because it was the most recent year for which data were available at the time and because it met the usual requisites for a base year. Among the industries of the Manufacturing Division, there were no significant imbalances in the usual relationship of their respective shipments values. Supplies of materials and manpower in manufacturing seemed to be adequate; the inflationary effects of the Korean conflict had largely subsided; in fact some levelling off in production occurred in the latter part of the year. Finally, the level of activity in 1953 gave promise of a satisfactory perspective for a number of years.

Though it is more usual to fix only one year for both weighting and reference periods, practical considerations occasionally do not permit it. In this case 1956 was selected as the base reference period equalling 100. This decision was taken on grounds that with initial price collection concentrated in the period 1957-59 it would be most difficult to collect accurate prices prior to January 1956. Even when prices are collected on a current basis it requires considerable time and careful scrutiny to detect and correct for discontinuities and other inconsistencies. It was felt that such difficulties, compounded by insufficient data on historical prices and obsolete

models, would outweigh the benefits to be derived from indexes for earlier years. Furthermore it was thought that it would impose too large a burden on respondents to pursue price histories prior to 1956.

Original plans called for an index for every industry in the Manufacturing Division. Technical difficulties limited the number now being published to approximately one hundred, but eventually virtually all industries will be covered. In addition to the industry indexes, some one hundred and seventy commodity indexes are presented in this publication. Additional commodity indexes may be obtained on request, either free or for a nominal charge depending on the amount of work required. These commodity indexes will meet needs calling for individual series discussed above, and will also serve users who wish to compile aggregate indexes consisting of ingredients of their own choice. No aggregate index for the Manufacturing Division will be published for reasons discussed below. Nor are there any plans at present to publish average prices (as opposed to price relatives). In choosing price indicators, emphasis was placed on achieving representativeness of change in price. Accordingly, respondents were requested to provide specifications and terms of sale peculiar to the bulk of their own operations. As a result, prices reported differ from firm to firm depending on differences in commodity descriptions and terms of sale. Consequently there are many cases where a meaningful average price cannot be calculated from available price data.

### IV - NATURE OF STATISTICS OF MANUFACTURING DIVISION

Some familiarity with the organization of the statistics on which the Industry Selling Price Indexes weighting system is based, is a prerequisite to an adequate understanding of these indexes.

The Standard Industrial Classification is a system for classifying "establishments", a term which in general is used to refer to the smallest and therefore the most homogeneous unit capable of providing data on the basic elements of input and output required for industrial statistics. The simplest grouping made of statistical reports submitted by establishments is the "industry" classification such as the Cotton Thread Industry. A consolidation of a small number of closely related industries is called a "sub-group"; for example, the Cotton Goods sub-group which includes the industry mentioned above plus two others. A "major group" such as Textile Mills is a broader and consequently less homogeneous classification. Finally, the most comprehensive aggregation used in the organization

of industry statistics is called the "division". The Manufacturing Division is one of eleven divisional classifications which together cover all divisions of economic activity.

The Manufacturing Division as provided for in the 1948 Standard Industrial Classification manual<sup>2</sup> is composed of 17 major groups, 18 sub-groups, and 132 industries.<sup>3</sup> That is the framework for classifying some 38,000 establishments counted in a recent annual census of manufacturing establishments.

Whether an establishment is classified to one industry or another depends upon the type of commodities it manufactures and the relative importance of each commodity in the total output of that establishment. There are about 3,500 commodities or

<sup>2</sup> A revised Standard Industrial Classification manual has been compiled recently.

<sup>3</sup> In practice some of these classifications have been sub-divided further.

commodity groups for which the annual Census of Industry shows separate values. Few establishments manufacture only one commodity and consequently virtually every industry classification contains establishments which produce a subsidiary range of commodities not primarily identified with that classification. For example, meat is a distinguishing product of the Slaughtering and Meat Packing Industry, but soap is also produced in that industry as a secondary activity. Establishments primarily producing soap have their own distinctive industry.

Output of the Manufacturing Division results from the integrated activities of industries engaged in three classes of manufacturing process:

- (a) Primary goods producing industries
- (b) Intermediate goods producing industries
- (c) Final goods producing industries

As the names suggest, these classes are dependent on, or complementary to, each other, because of the technological principles commonly applied throughout the Manufacturing Division, which usually result in a limited number of processes being carried out in any one particular plant or establishment. The result of such specialization on the output of the division, which is largely composed of complex goods requiring a number and variety of processes, is that most products pass through two or more industries before being shipped out of the division. Such inter-relationship of industries has an important bearing on the concept of "aggregate" as it relates

to the value of factory shipments. This consideration is in turn fundamental to the nature of price index numbers associated with factory shipments values.

For each of the Standard Industrial Classification industries, the Census of Industry produces an annual "value of factory shipments" total which includes the full value of output of each industry regardless of the destination of output. In this concept of value it is irrelevant that part of the total of one industry is counted again as output of another to which the first industry supplies raw material. For example, castings counted as outputs of the Iron Castings Industry may show up again as components of machines which are outputs of the Industrial Machinery Industry. However, both the castings and machines cannot have value independent of each other at the same time, though to add the output of one to the other assumes that they have. Thus the sum of these industry totals overstates the final value of shipments flowing out of the Manufacturing Division. Logically, at finer levels of aggregation this double reckoning is correspondingly less, because the simpler the classification the less likelihood of inter-shipments between component establishments. For example, two establishments producing the same product will not use each other's output as their own inputs. Accordingly, there is less duplication in sub-groups than in related major groups, and for most practical purposes the user may assume that the duplication which occurs in the shipments of an individual industry is insignificant.

## V — PROPERTIES OF INDUSTRY SELLING PRICE INDEXES

It is clear that the characteristics of factory shipments described above will influence indexes weighted by such values. The weights employed in the Industry Selling Price Indexes are based on shipments of manufacturing establishments, without deductions of shipments made to establishments also classified to the Manufacturing Division, and hence contain an element of duplication of the type described above. Though duplication is not believed to be of consequence for the industry indexes published, users who are interested in combining the published series to produce indexes at higher levels of aggregation should be aware of the possibility of such duplication. The seriousness of duplication depends on the degree of intershipments between the industries for which an aggregation is proposed. In some cases the effect can be insignificant, or even non-existent as would be the case if two unrelated industries were aggregated, for example, the Slaughtering and Meat Packing Industry, and the Carbonated Beverages Industry. On the other hand, duplication would be of some consequence in a total including the Carbonated Beverages Industry and the Sugar Refining Industry, a case where one industry obtains a substantial part of its inputs from the output of the other. The same qualifications apply to the

addition of certain commodity indexes based on published weights. A total of flour and bread indexes would involve substantial duplication but the sum of the indexes of men's suits and women's dresses would be free of such effects. However, the problem is not as relevant to commodities because they are generally used as individual relatives and weighting of the kind under discussion is not involved.

Before deciding on a basis of weights for the Industry Selling Price Indexes, careful consideration was given to other alternatives, principally that system which deletes inter-industry shipments from total shipments to obtain "final" shipments. Obviously, it is a long and expensive undertaking to construct a system of final output weights. Furthermore, when the job is completed many of the primary and intermediate commodities and industries will have been excluded from the framework, thus ignoring important and sensitive aspects of price behaviour in Canada. For these and other such reasons weights used in the calculation of indexes released in this publication are based on the total values of shipments of firms classified to an industry.

## VI - NATURE OF THE DATA

Industry Selling Price Indexes are calculated in the base-weighted form (Laspeyres formula). The comprehensive expression of the calculations is:

$$\frac{\sum \frac{P_1}{P_0} (P_0 Q_0)}{\sum P_0 Q_0} \times 100 = \text{Index}$$

In the above formula the P's denote prices and Q's quantities. The subscripts "1" and "0" refer to current and base periods respectively. Thus the weights are fixed for an extended period of time during which indexes at all points in time are comparable with one another. No adjustment is made for monthly variations in quantity of factory shipments.

To appreciate the nature of the price ingredients of the Industry Selling Price Indexes it is useful to distinguish between "seller's price" and "purchaser's price". In a transaction involving one purchaser there are frequently two or more sellers; for example, the producer of the commodity involved and the common carrier who delivers the goods. Industry Selling Price Indexes are measures of prices received by manufacturers for goods they sell and consequently elements of purchaser's price which accrue to other industries do not belong in price quotations entering into the indexes. Thus, freight, insurance and taxes are excluded from price quotations on conceptual grounds and price collection routines emphasize this fact. However, respondents in certain industries and commodities in their day-to-day business activities price their goods on a "delivered" basis. In other words the price they quote is on the basis of delivery of the goods at the purchaser's plant. In these cases, editing processes have taken this situation into account and estimates of f.o.b. plant prices are made. Thus the resultant indexes are calculated to reflect sellers' prices and accordingly the component series will be more comparable than if they contained freight, insurance and taxes, which vary both from industry to industry and from time to time.

Prices for the Industry Selling Price Indexes are collected by mail on a monthly basis. The price collection form (reproduced in appendix c) calls for the price which applies on the fifteenth of the month in question. When the fifteenth is not a business day or when no sales have taken place on that day, the respondent is asked to quote the price which applies to the last preceding sale.

The price reporting form in use specifies that quotations reflect actual transaction prices, or, in other words, the prices actually paid. However, despite considerable effort to prevent it, some list or nominal prices find their way into the indexes. Though this problem continues it is diminishing, thanks to the conscientious efforts on the part of many respondents. The effect of such prices on indexes will vary from series to series, and although such prices probably do not seriously affect trend they may conceal timing of turning points in transaction prices.

The price reporting form does not, however, indicate any preference between prices quoted for new orders taken on the fifteenth and prices which apply to goods shipped on that day. Here it is assumed that the respondent will report a price that relates to new orders. An assessment of the validity of this assumption is now under way and early returns appear to justify it. In any case, the difference between the two can only be important in industries where time lag between taking orders and filling them is significant. In such cases quotations based on new orders will be more sensitive to current market conditions and therefore more appropriate for a wide range of price analyses. On the other hand the price associated with filled orders is more consistent with Census of Industry shipments values which, of course, are records of orders filled. This aspect of the prices used has some relevance when the indexes are used for deflation purposes.

Industry Selling Price Indexes are intended to measure change in prices of commodities undistorted by anomalies arising out of changes in the commodity itself or the terms of sale under which it is sold. Thus, if a producer changes his product or terms of sale in any way, the price equivalent of such change should be taken into account in assessing the price relationship of the two price quotations bridging the change. Essential to this evaluation is a knowledge of the particulars of the inconsistency in the physical specifications and terms of sale to which the two consecutive and otherwise comparable price quotations apply. This information becomes available when respondents report prices according to adequately specific definitions or specifications. Consequently, manufacturers are requested to provide the particulars of any change they make in their basis of reporting and otherwise to adhere strictly to the specifications and other instructions written on the reporting schedule.

Nor are these indexes intended to show average price change due to variations in volume of sales as opposed to changes in individual actual prices. From time to time price data of this kind are uncovered during editing. For example, a respondent may report average unit prices for a range of terms of sale under which a certain commodity is sold. Such an average will be affected by change from one month to the next in the proportional representation of the various terms of sale included in the range from which the average unit prices are calculated. Accordingly these averages can show small month-to-month changes even though constituent prices remain unchanged and for this reason are objectionable and are not used except as a stop-gap measure.

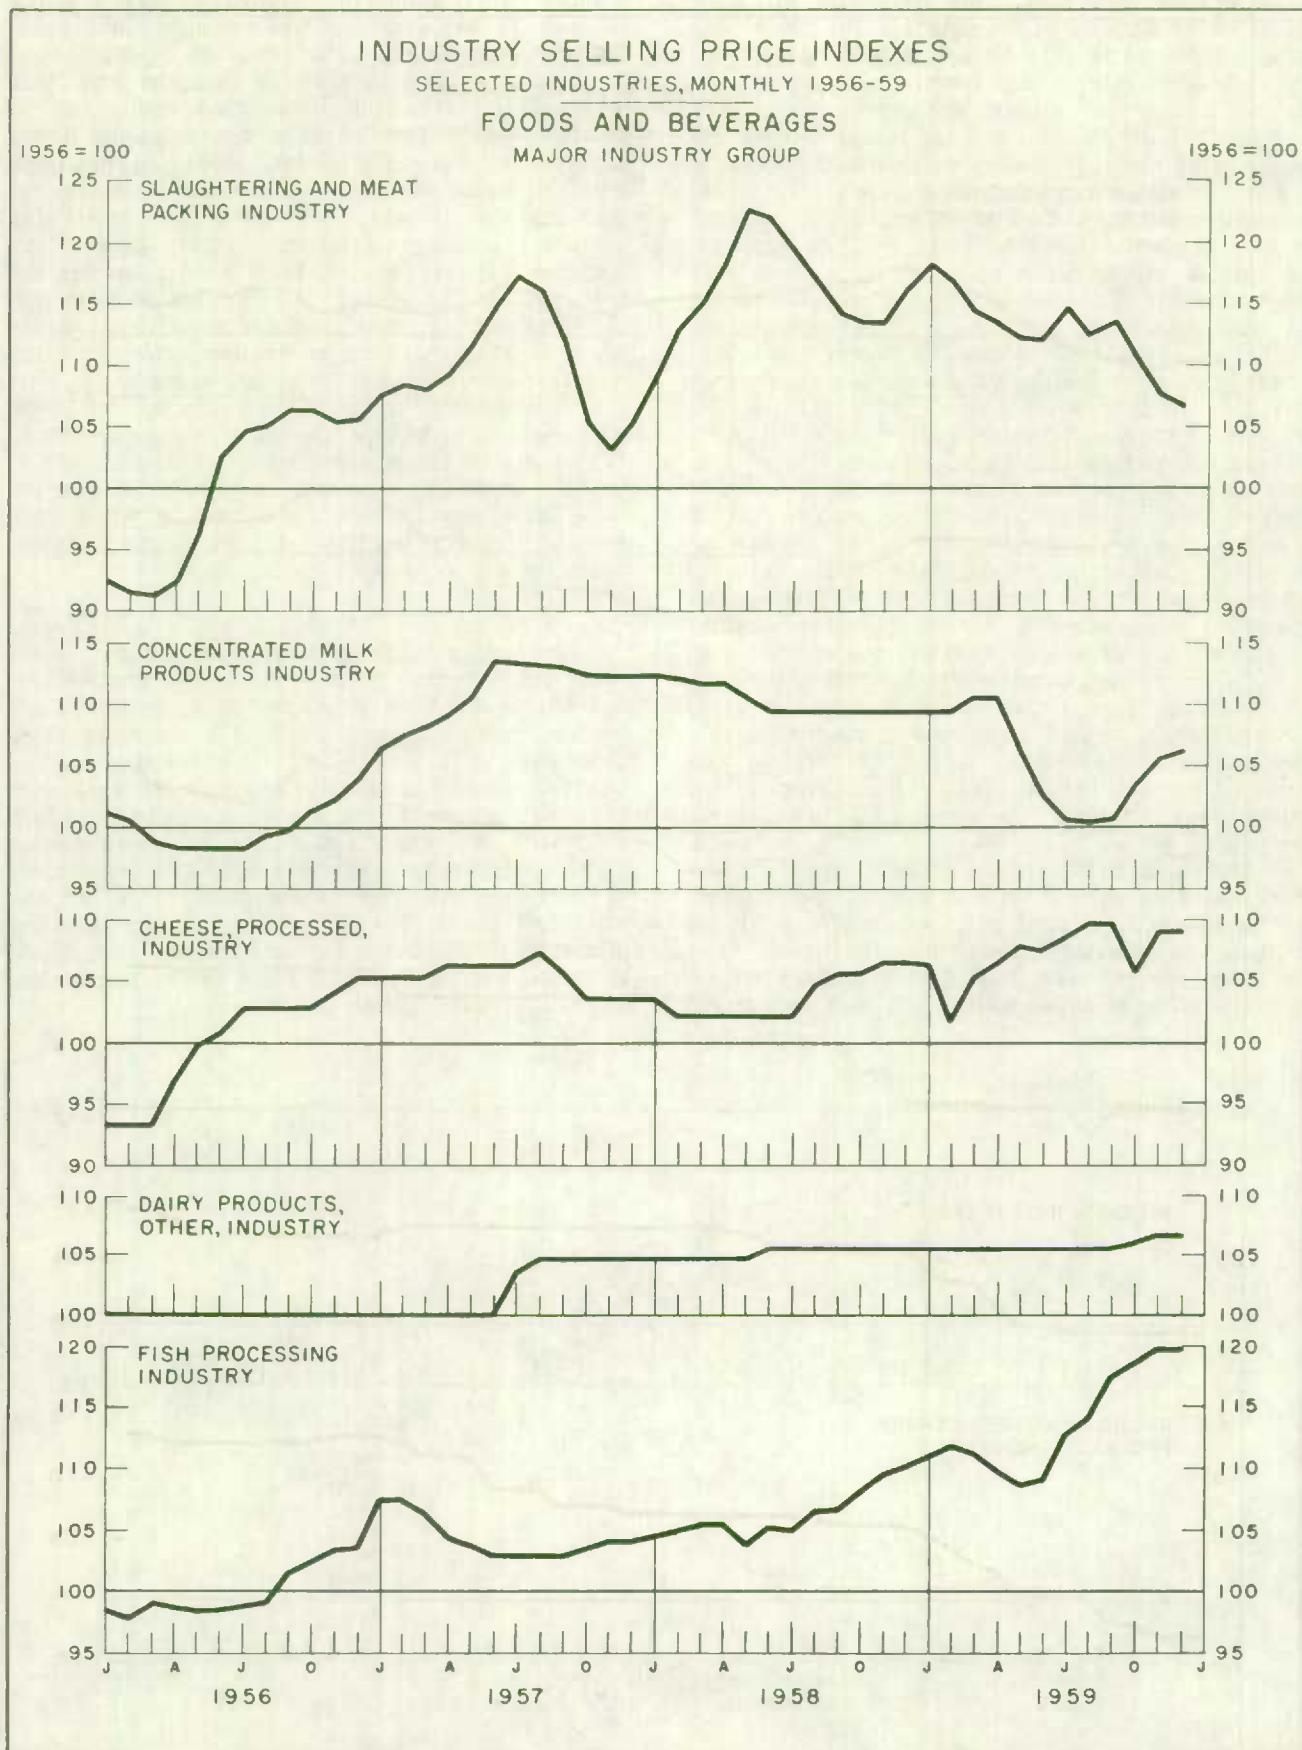

Obviously, the representativeness of price indicators has an important bearing on the validity of these indexes. The selection of commodities whose prices are included in the indexes was accomplished in two stages. Initially, those commodities and groups of commodities which in total accounted for 75 per cent of the shipments of their respective industries in the base year were picked to form the

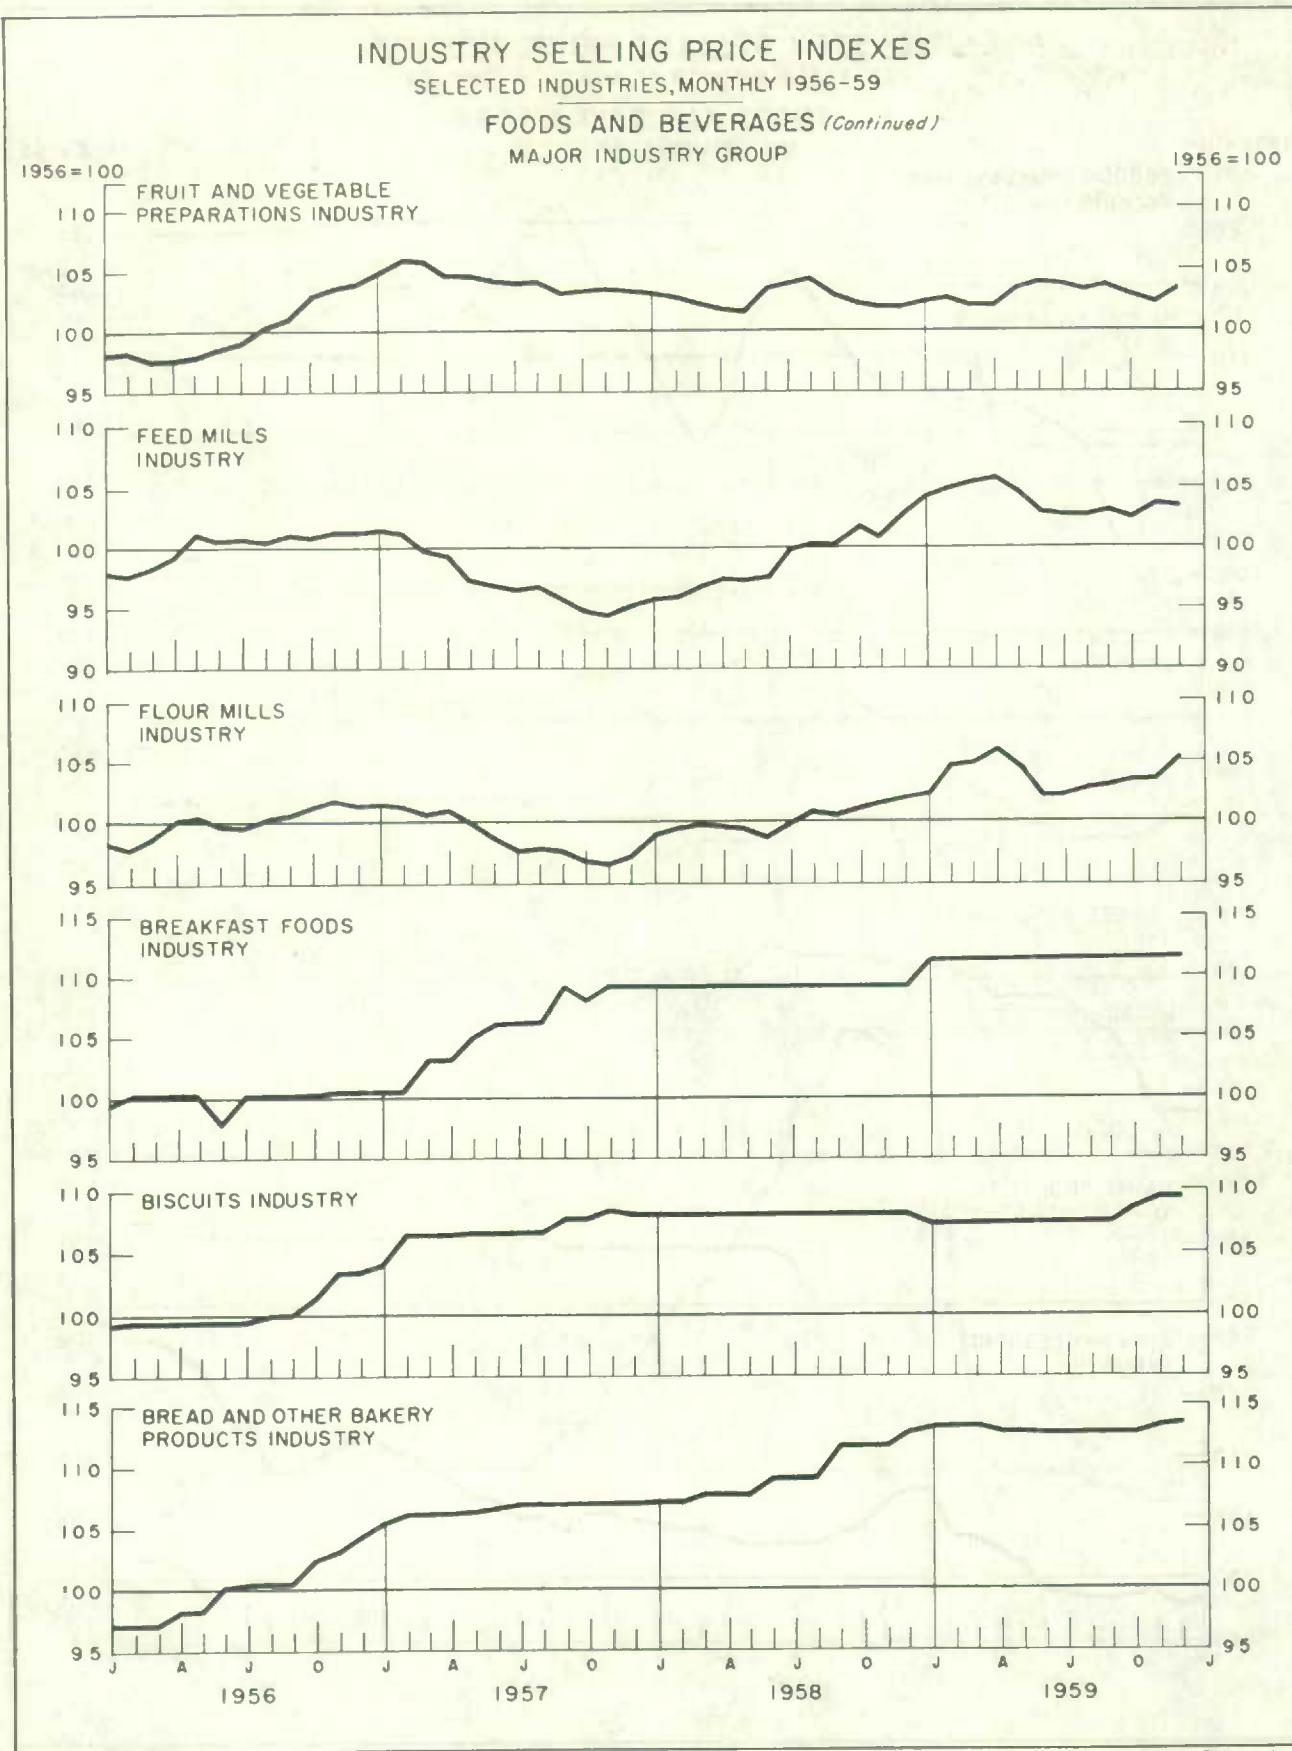

basic pricing framework. This framework will stay fixed for the duration of the indexes. The commodity groups included in this framework were taken from schedules on which manufacturers reported their annual shipments values and consequently are general classifications for the range of related products of which they are composed. Therefore, a further selection process was necessary to determine the identities of the specific products included in such classifications. Accordingly, firms selected to provide prices were consulted and gave their advice in this connection, choosing products to act as price indicators according to suggested criteria of their importance at the time. Year-to-year developments since have brought about a number of changes; products originally suggested have disappeared from the market and others have replaced them in the pricing programme. Thus, whether a new indicator is as representative as was the one it replaces warrants consideration. There is also a further question concerning the stability of the representativeness of the indicators originally chosen in cases where manufacturers introduce new products which compete with existing indicators. Consequently it has become necessary to contact respondents to investigate these developments so that conditions of inadequate representativeness may be corrected. In this regard, present plans call for continuing this investigation, staggering it in a manner that will ensure that each indicator will not go several years without verification.

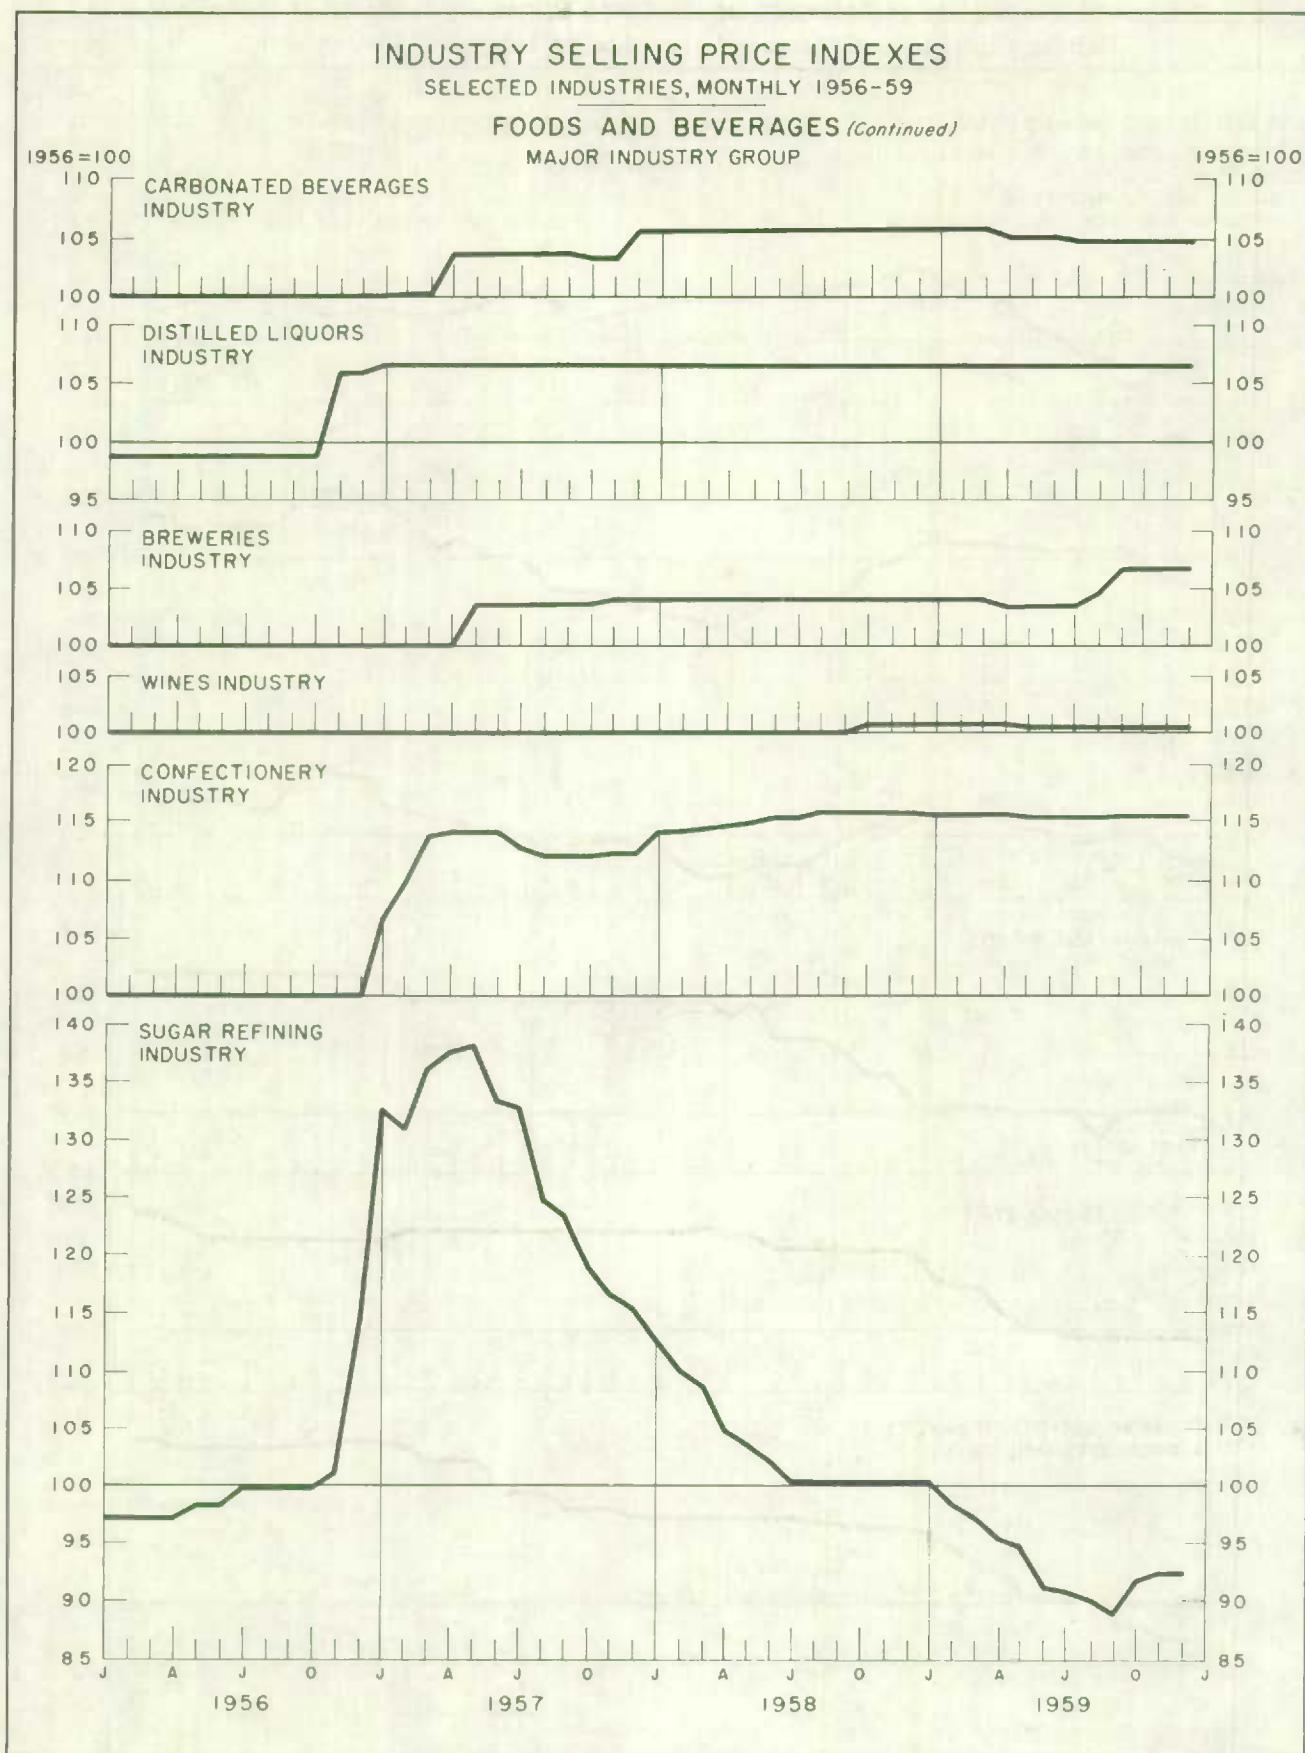

Switching from a price indicator matching one description to another with a different description, as models and varieties of products change in the market, necessitates comparing the price of a different product with that of its predecessor. A reconciliation of these differences may be pursued

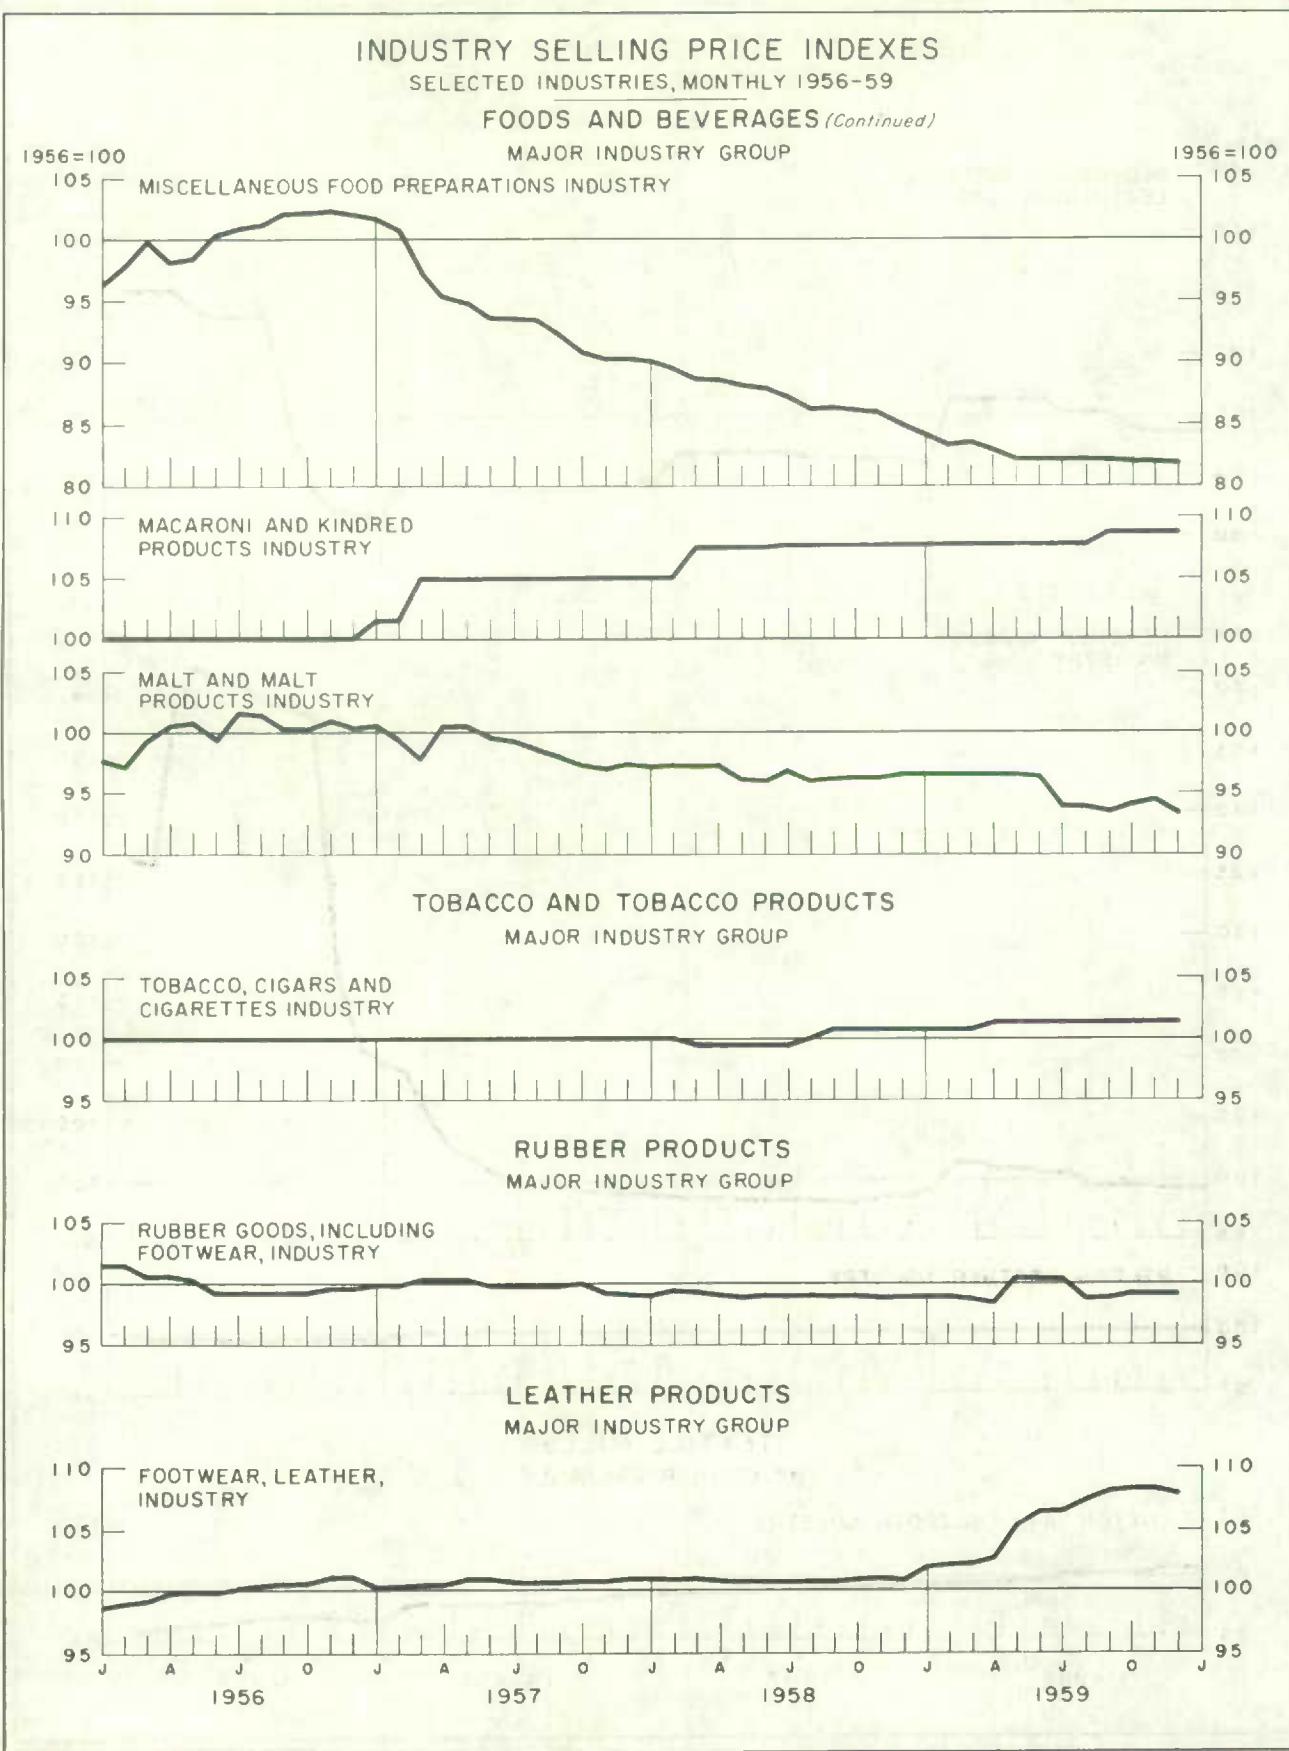

through a relationship between characteristics common to the two products through which their prices may be equated. The problem is approached by assessing the inputs of the two, and from their relationship estimating their price equivalent. In detail, this is accomplished by comparing direct costs of labour and materials valued at the same level of price and technological development for both products. In other words the relative quantities of direct labour and material inputs provide the standard of assessing a price equivalent for the new product. The analogy is restricted to quantities of labour and materials inputs rather than all inputs because of the number of circumstances in which manufacturers do not record other costs on an individual commodity basis. This technique has been applied in many but not all cases of substitution in 1958 and with increasing frequency thereafter. Prior to 1958 there were several methods applied which were largely subjective. The form on which data are collected for applying this technique is reproduced in Appendix C.

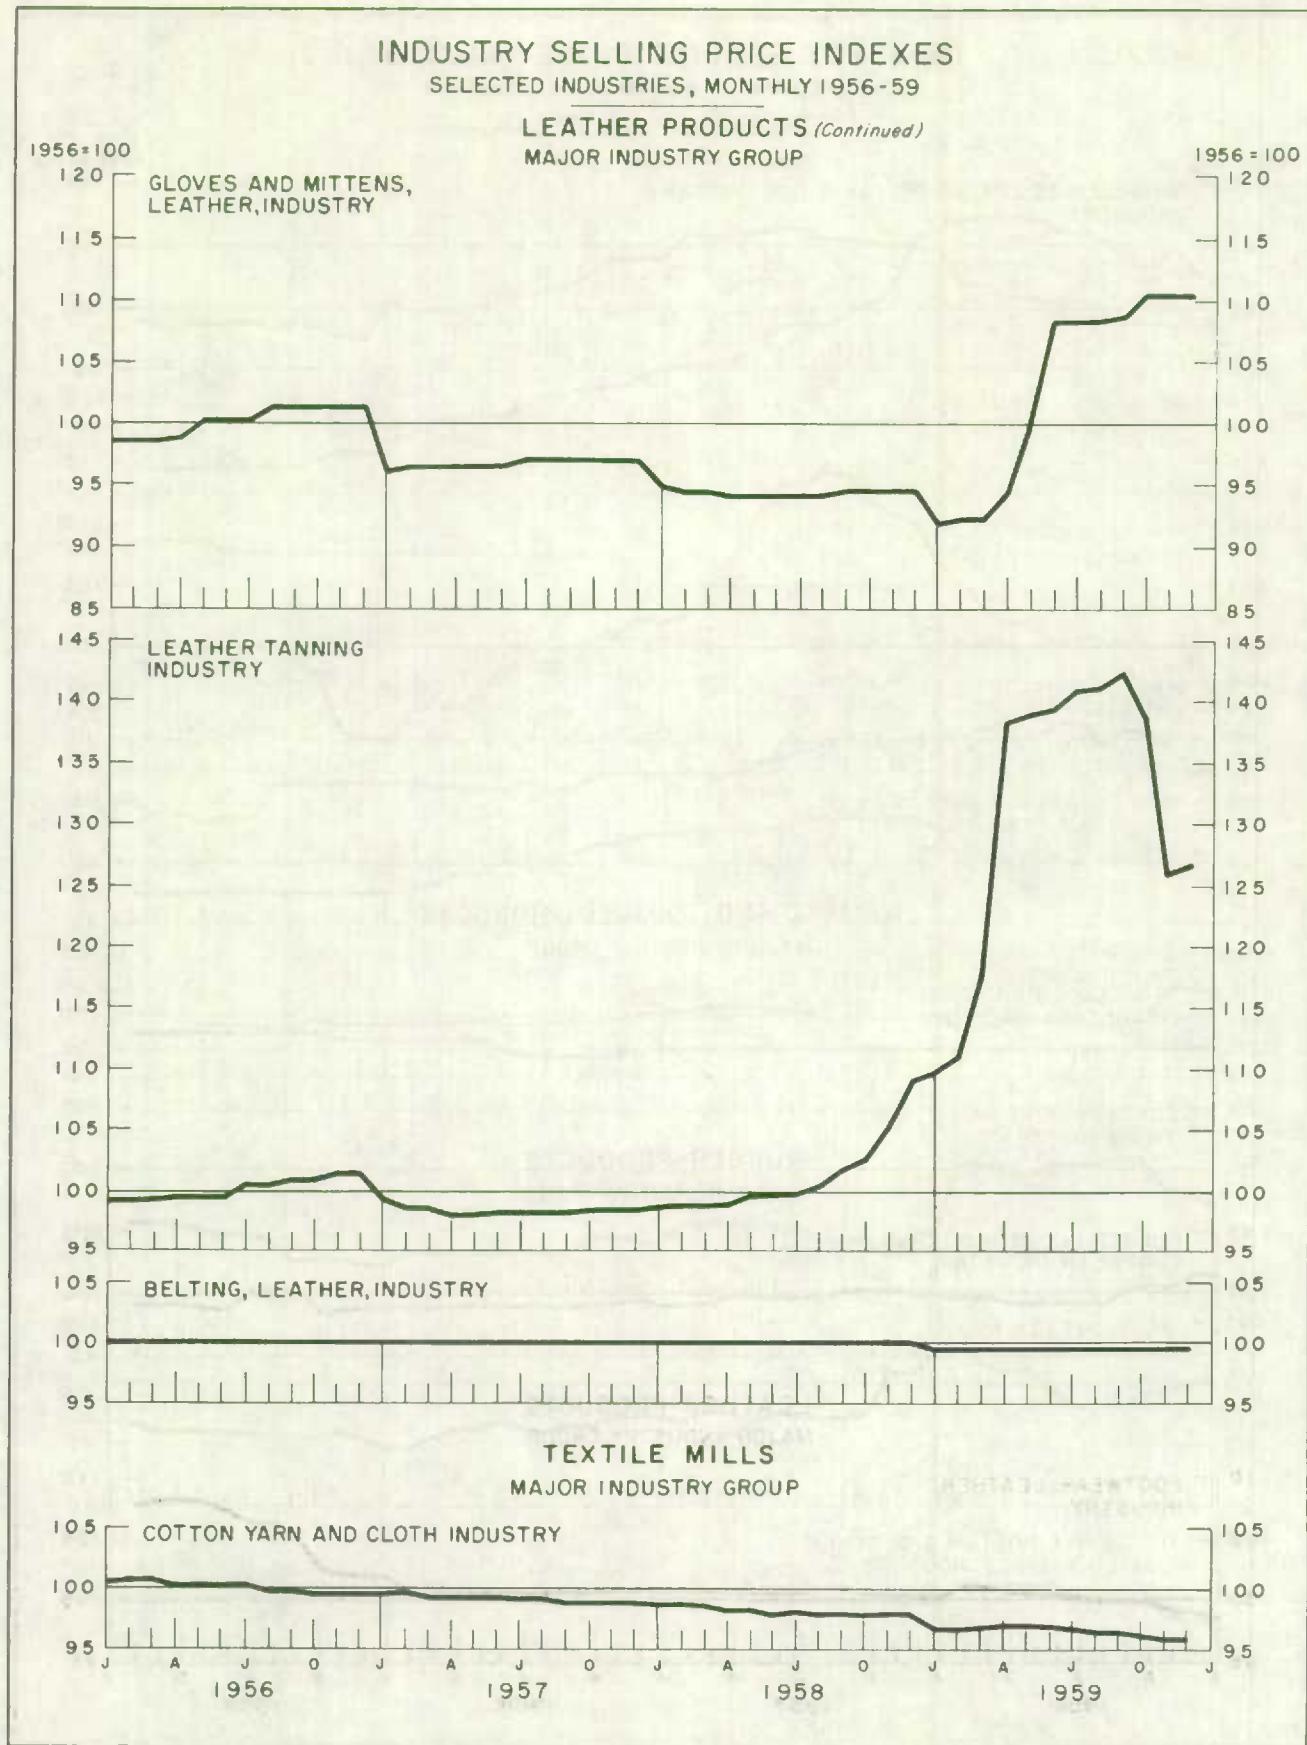

Ordinary methods of compilation are not practicable for "unique" goods. Classes of products for which repeat orders rarely, if ever, occur do not provide sufficient continuity of comparable price quotations. As a substitute for constructing indexes from price quotations "unique" goods are sometimes assumed to move with some other related priceable commodity. In other instances a model is set up which includes approximately the same proportions of materials and labour and other inputs as the "unique" goods. The respondent then supplies the prices he would charge for such a model from month to month and the resultant price series is ascribed to the "unique" goods concerned.

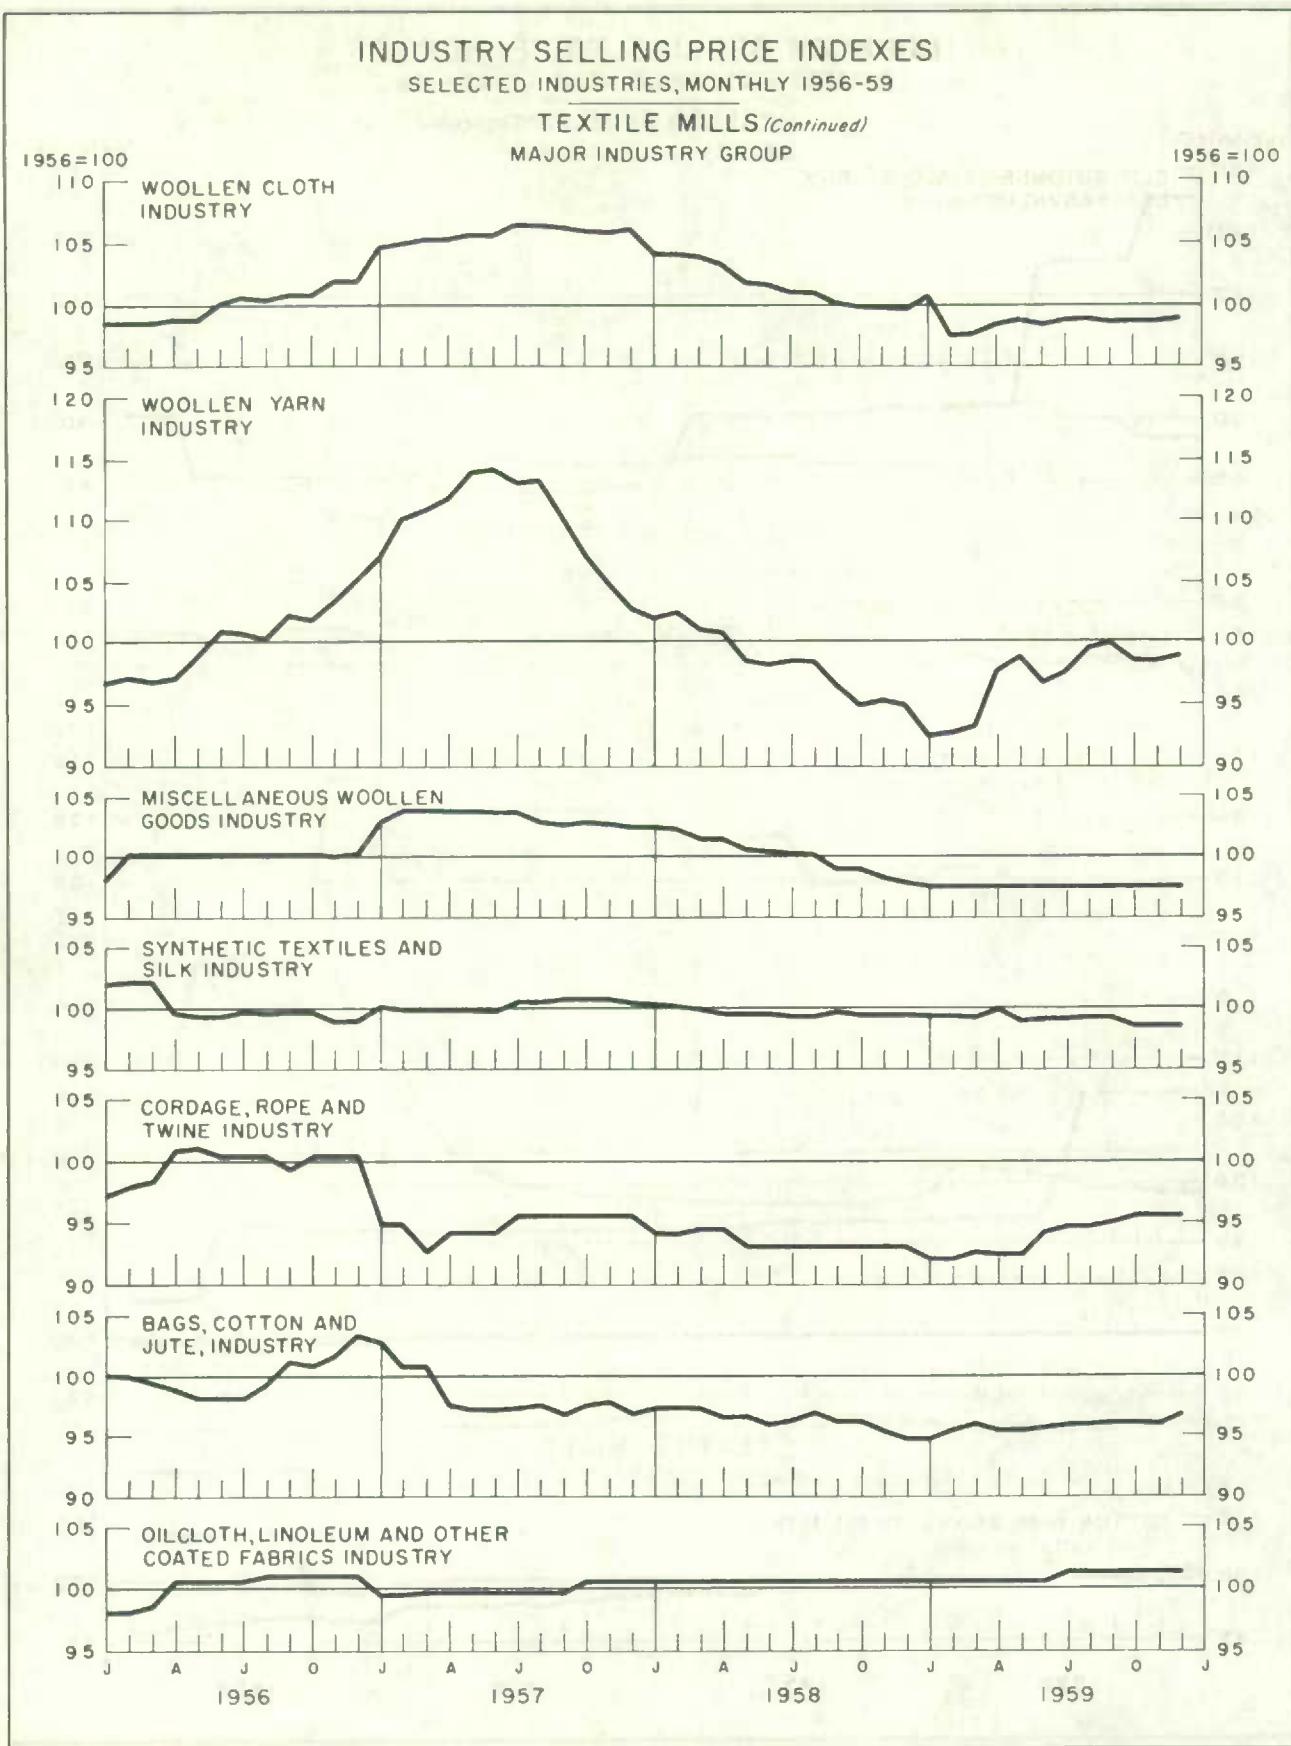

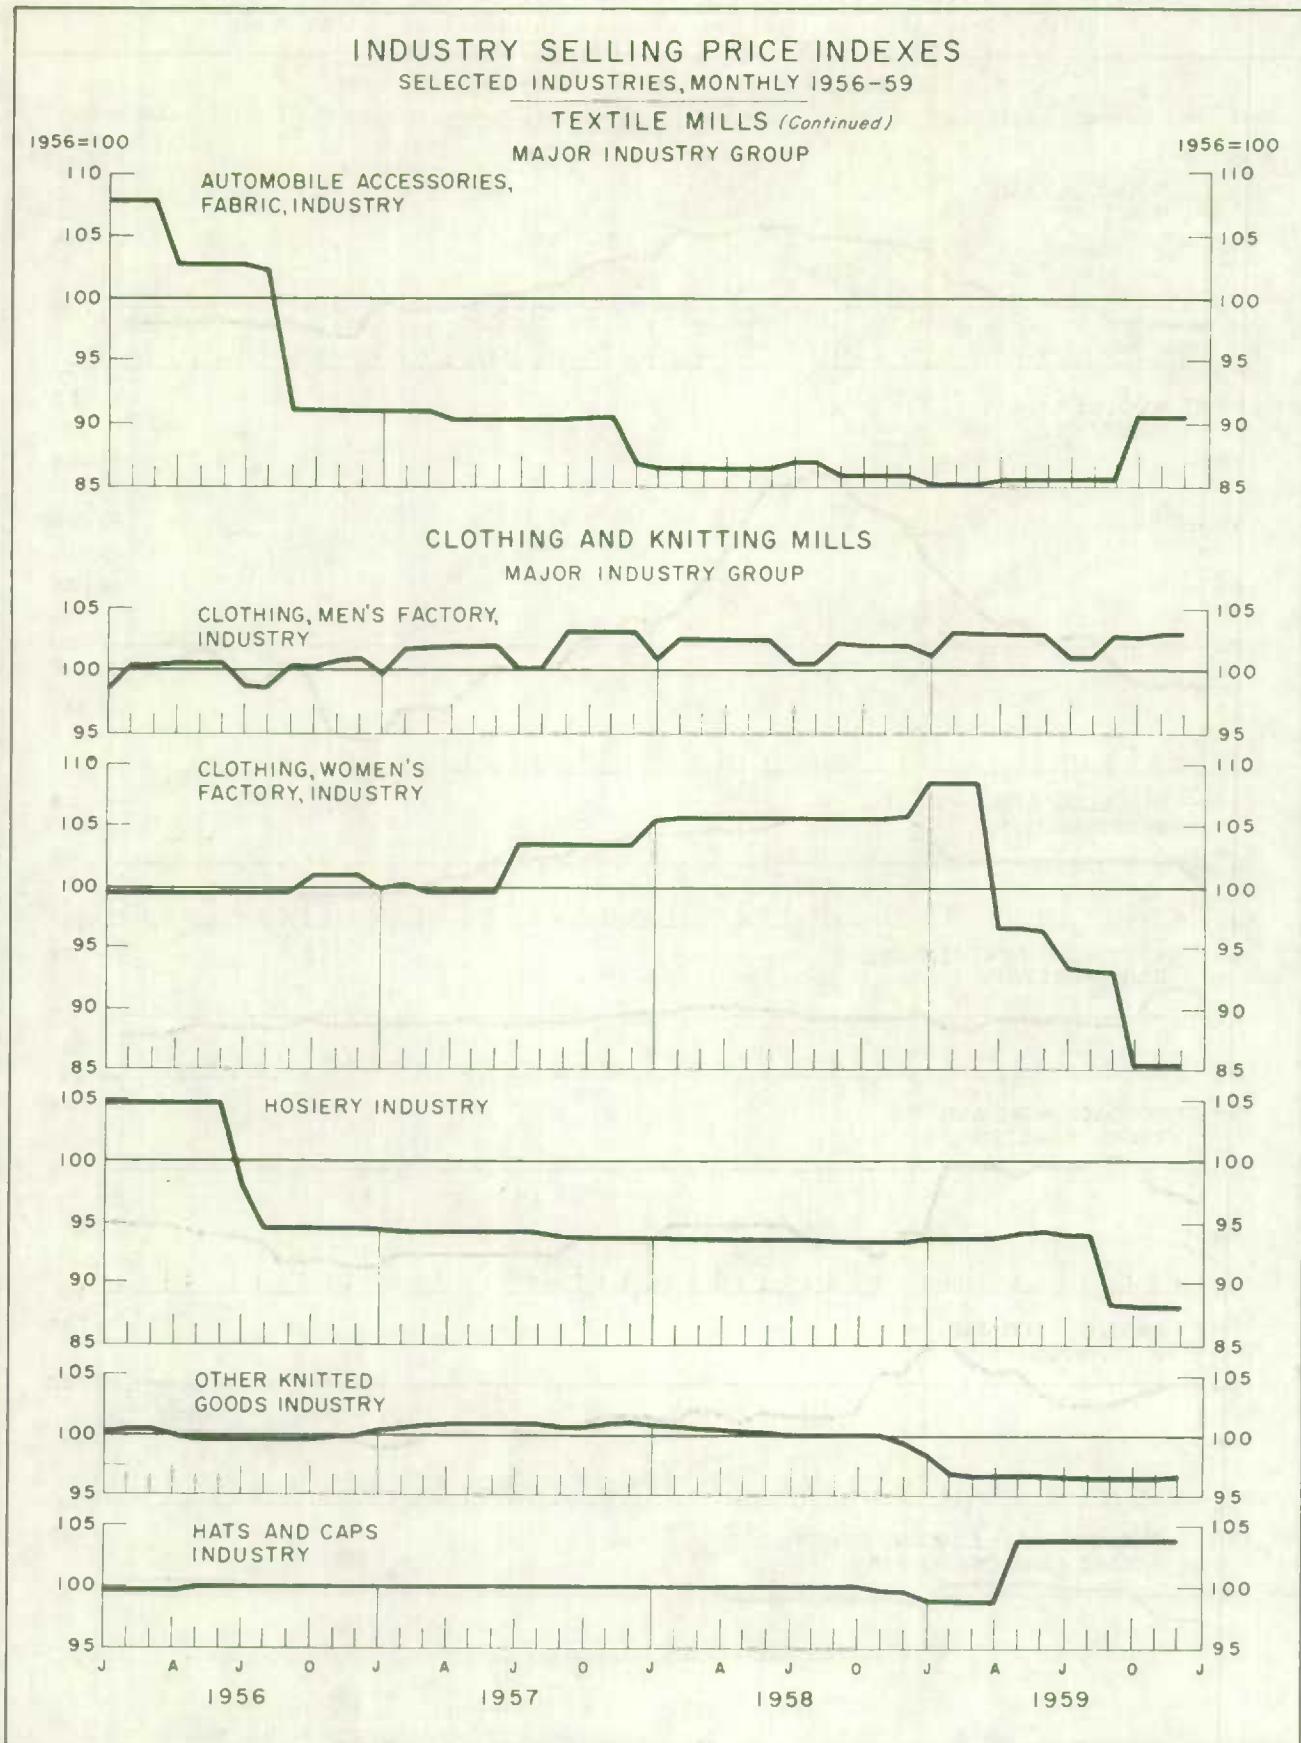

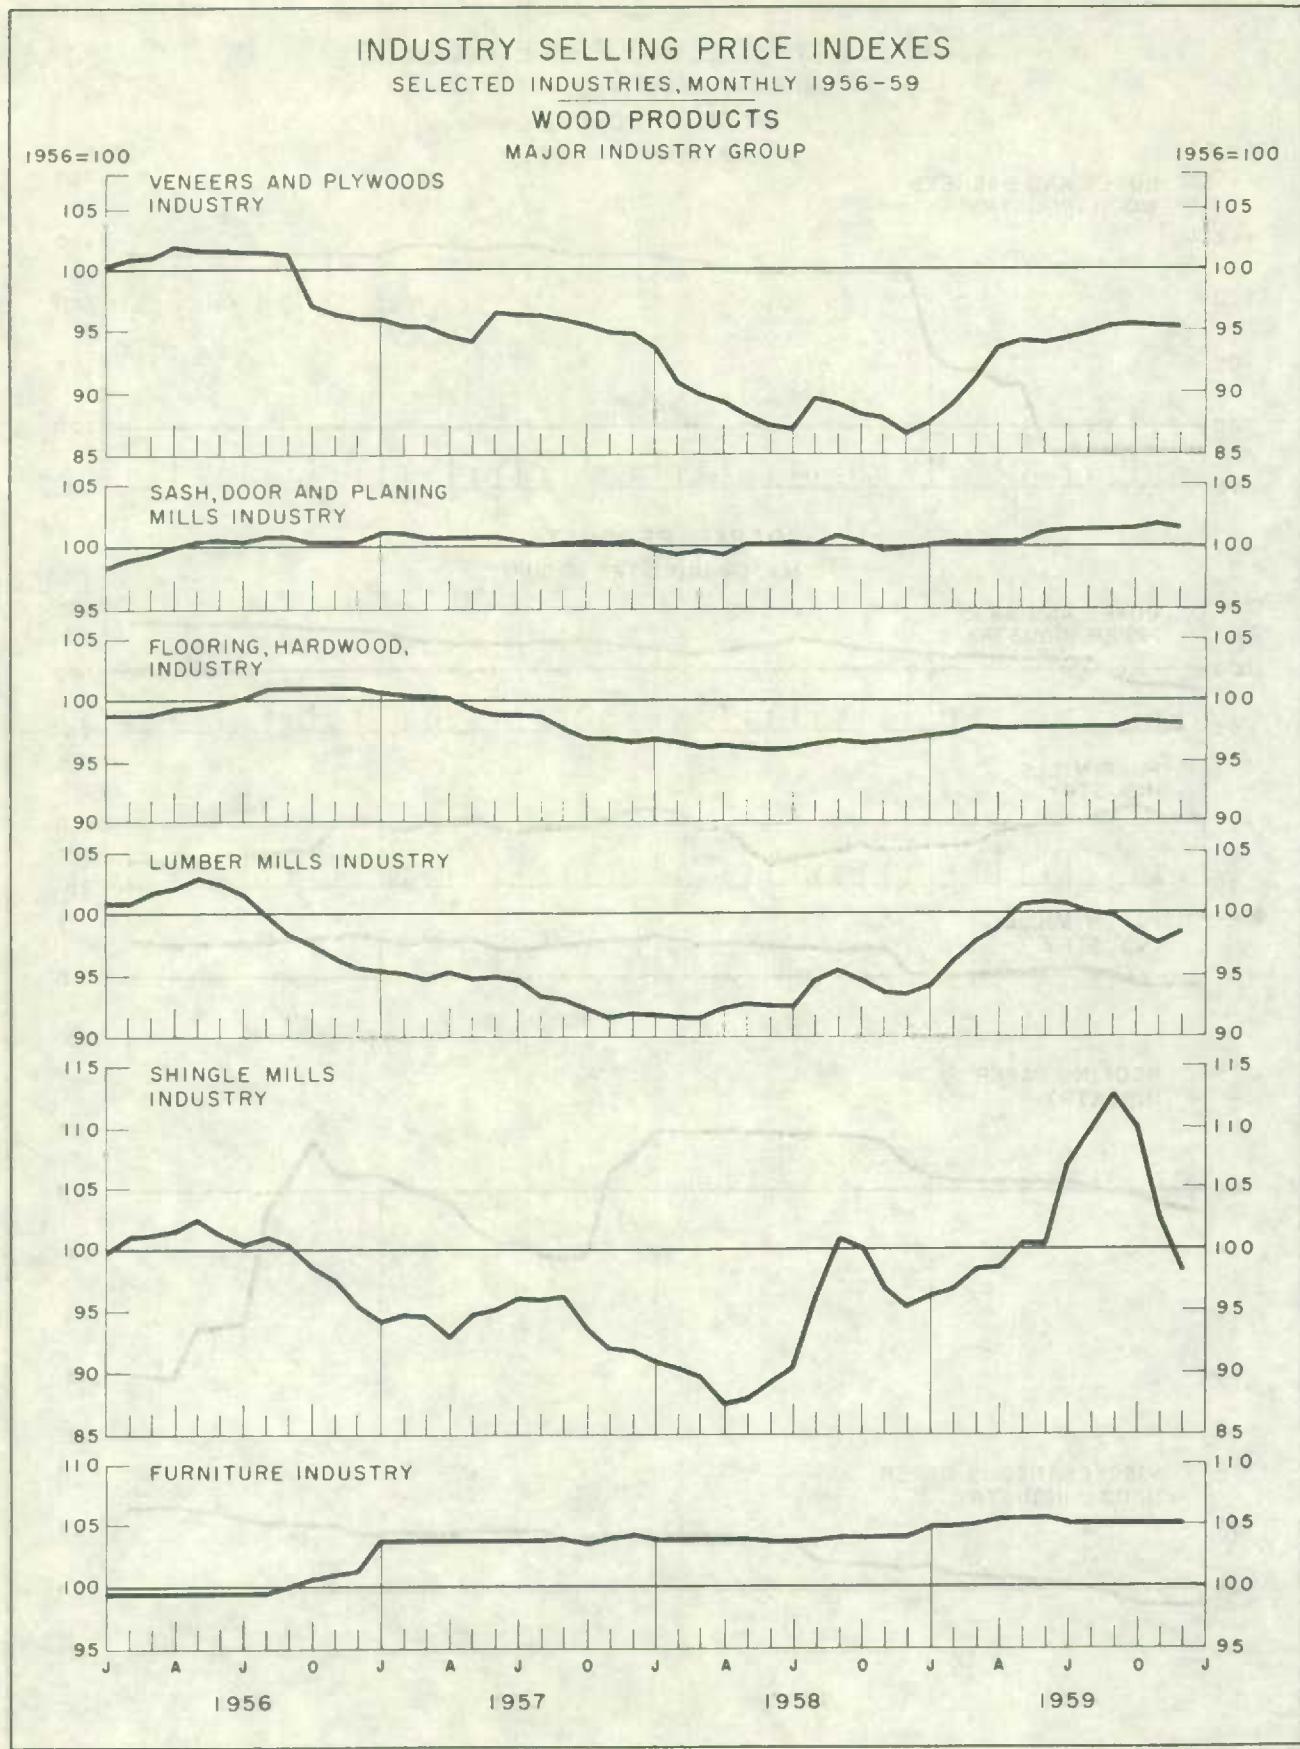

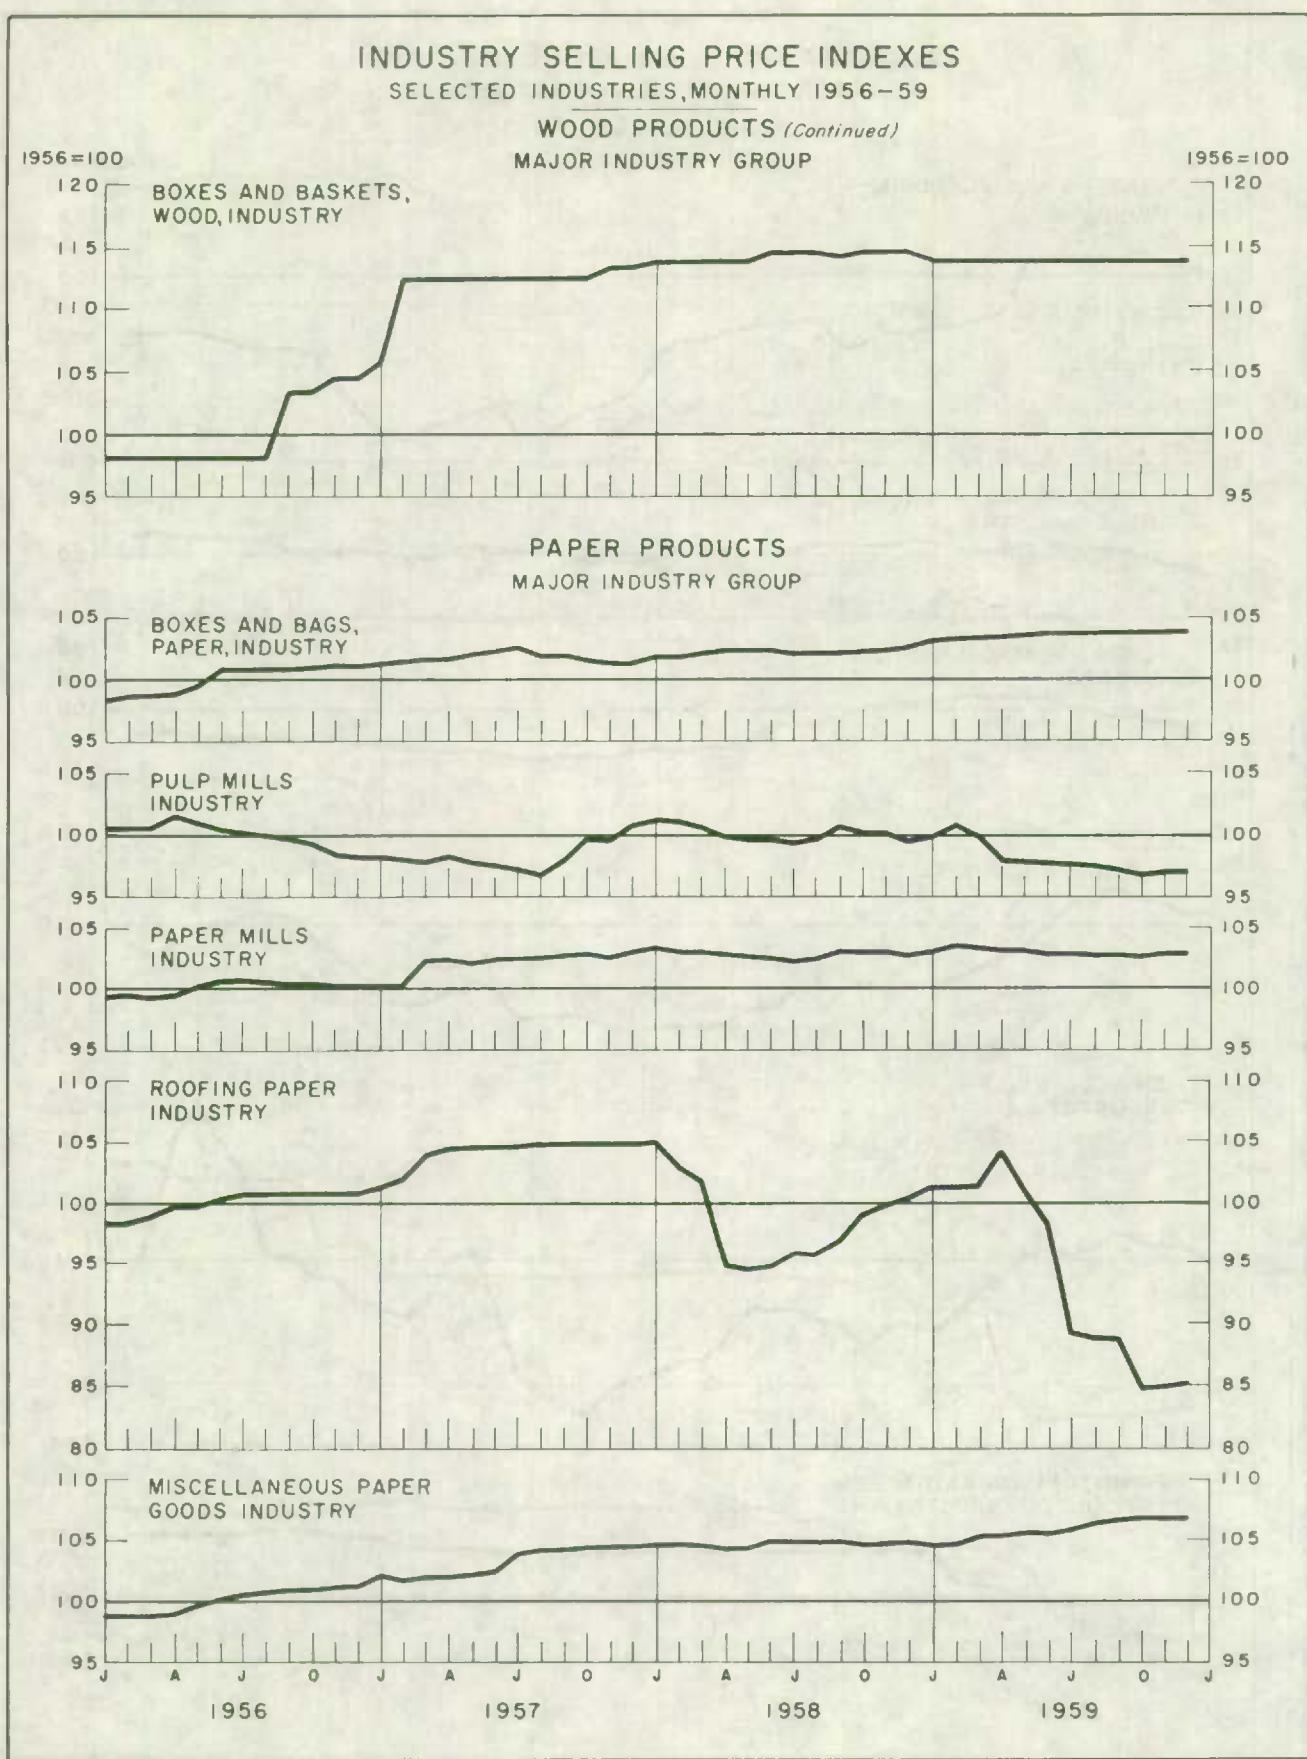

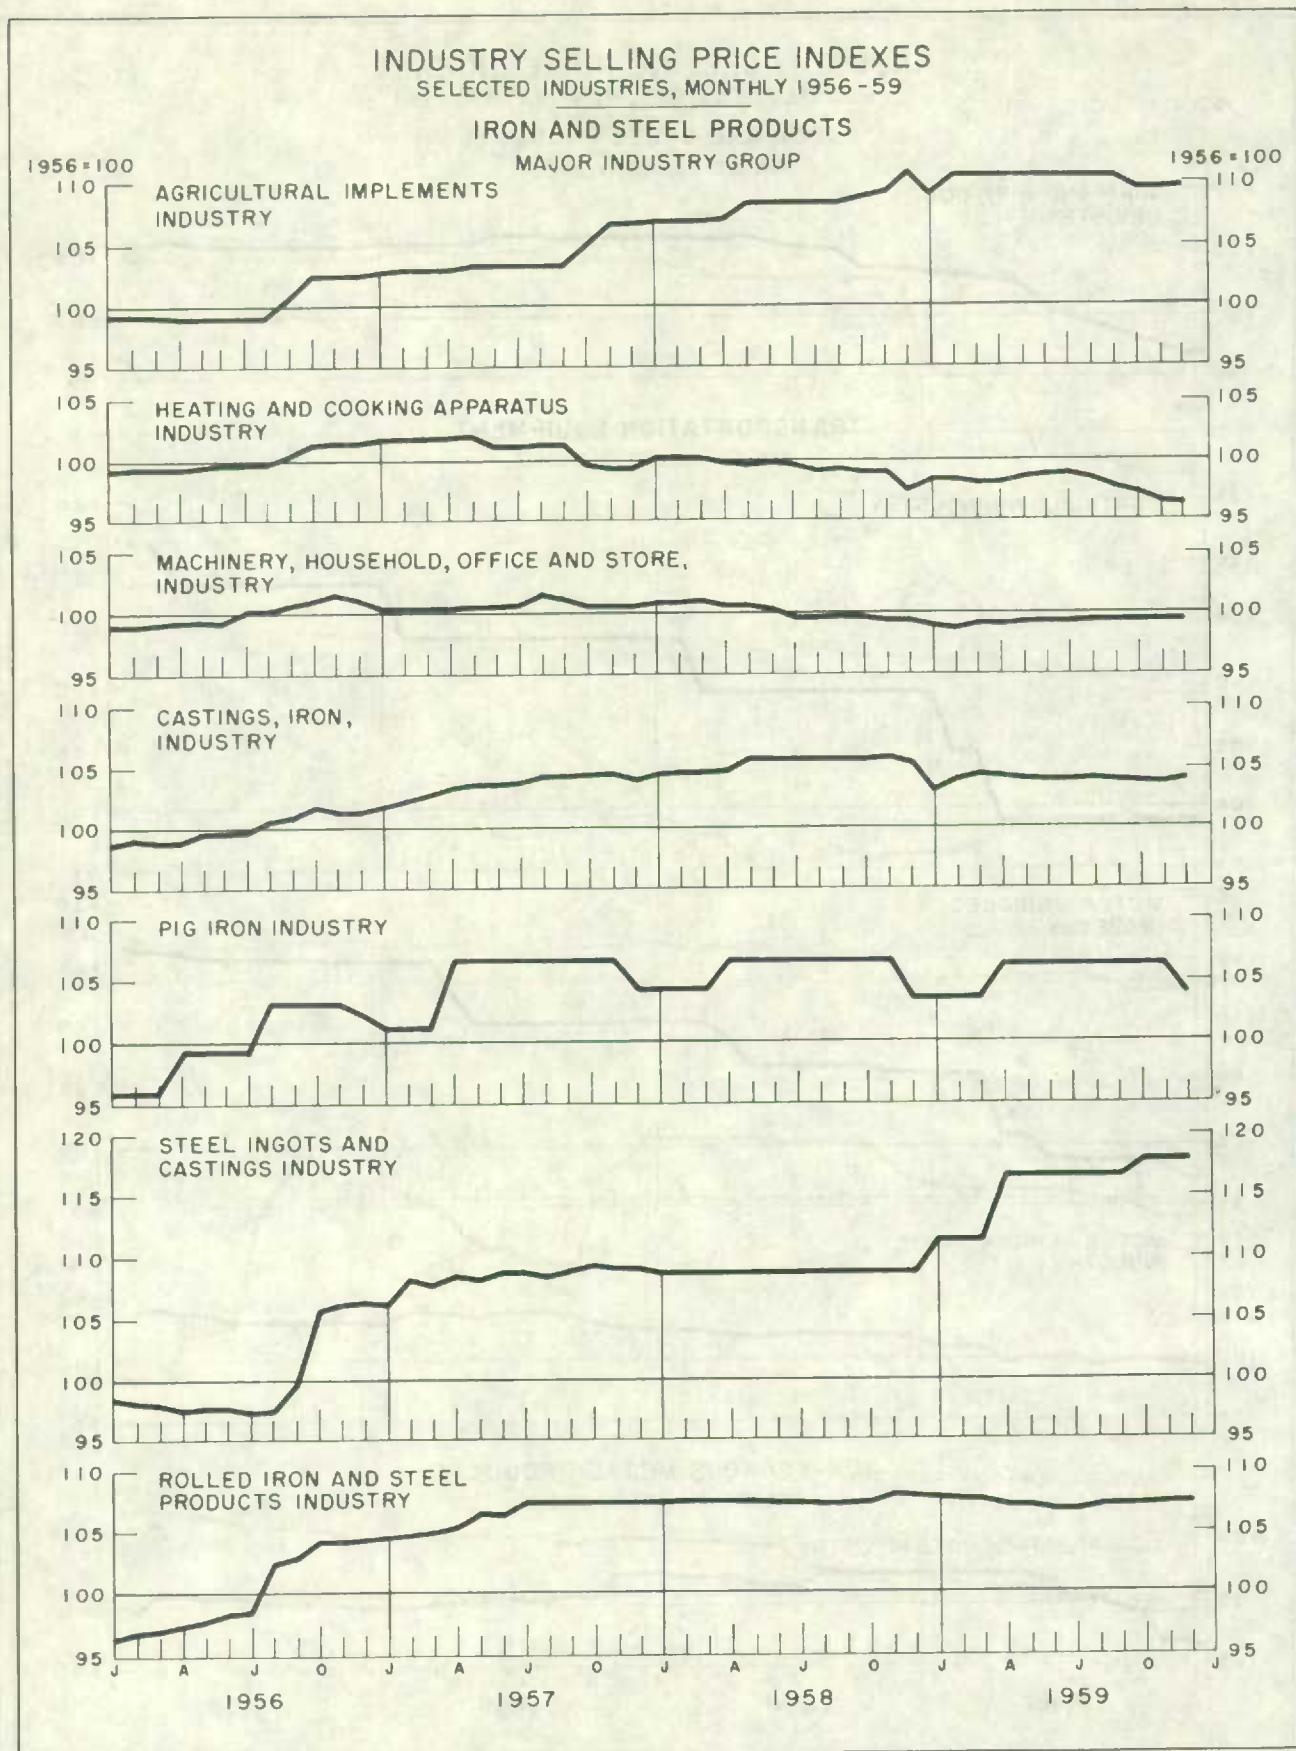

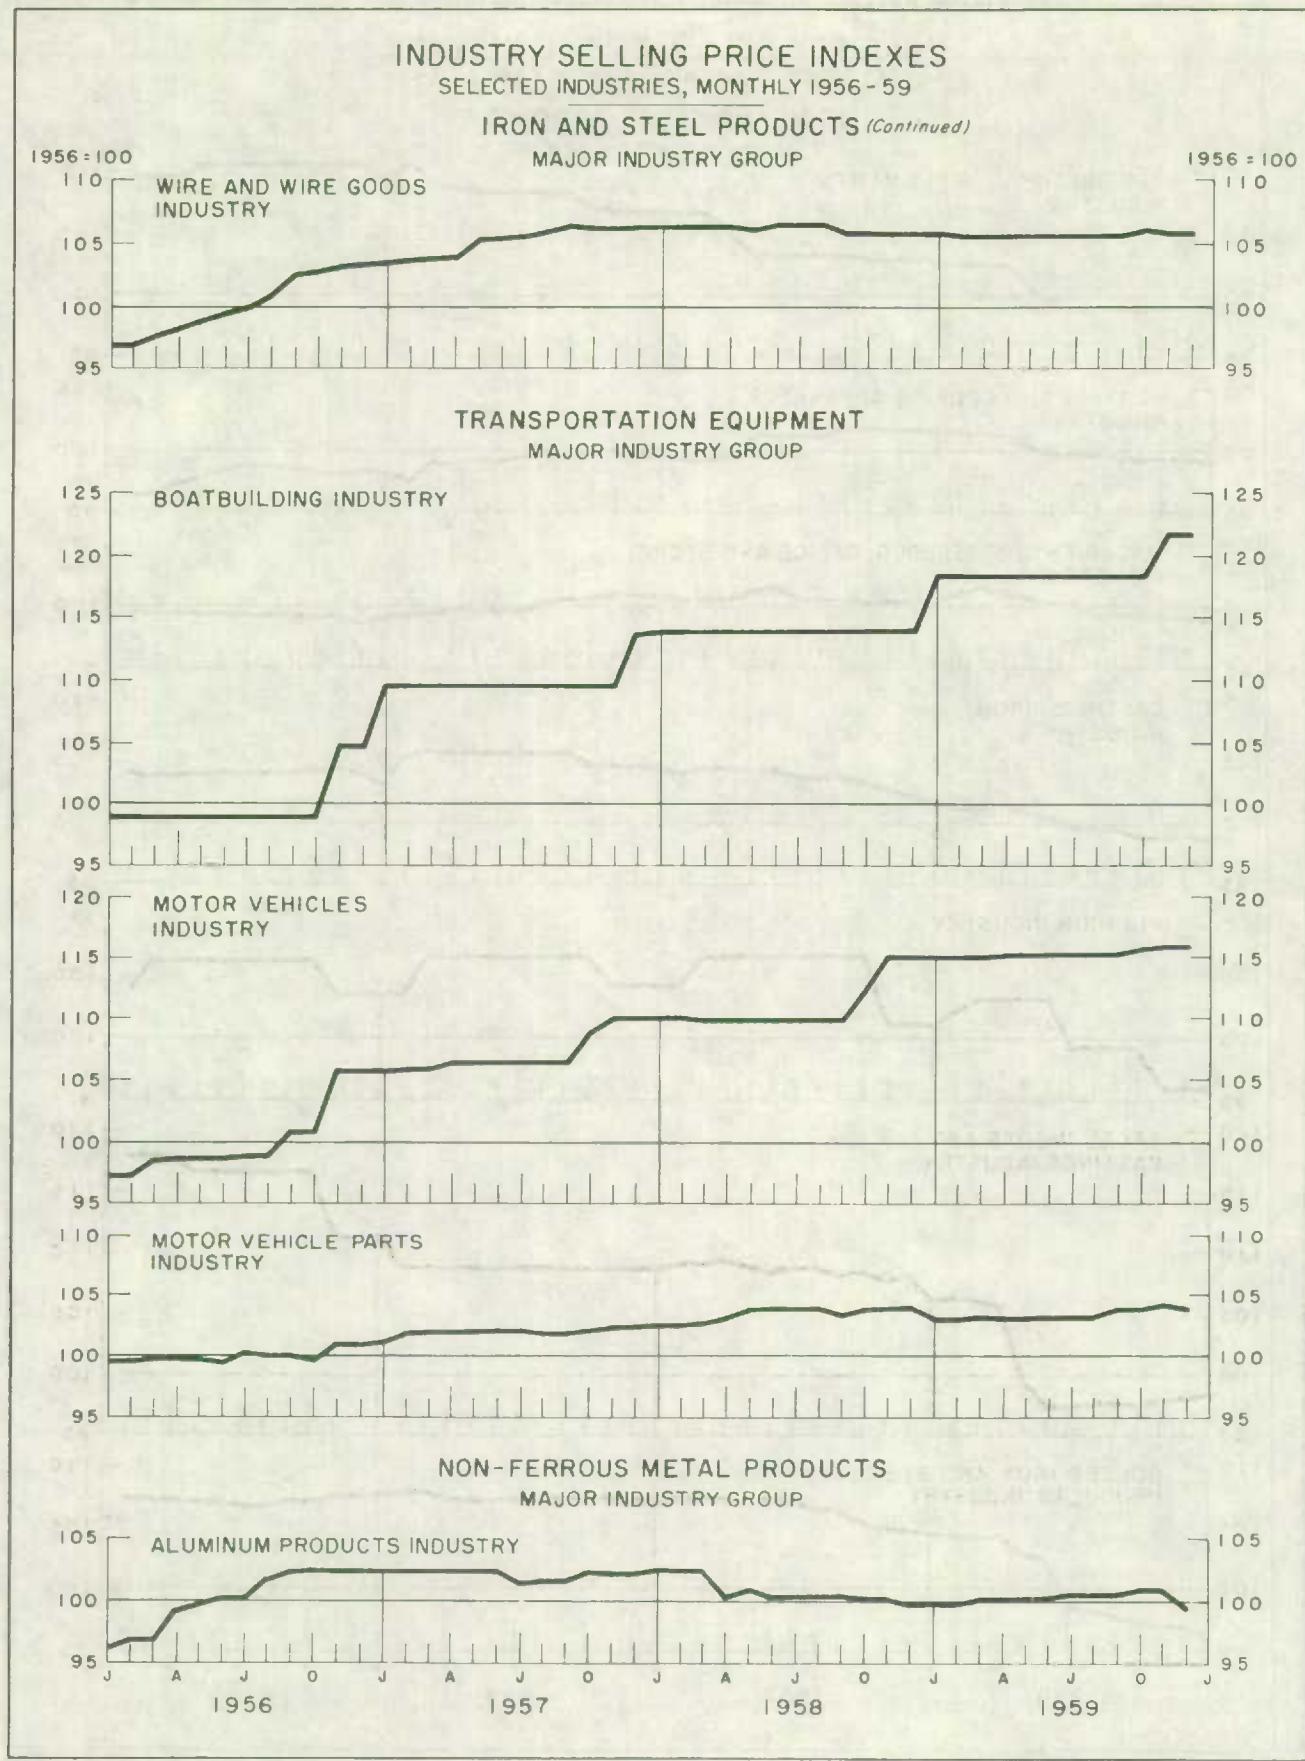

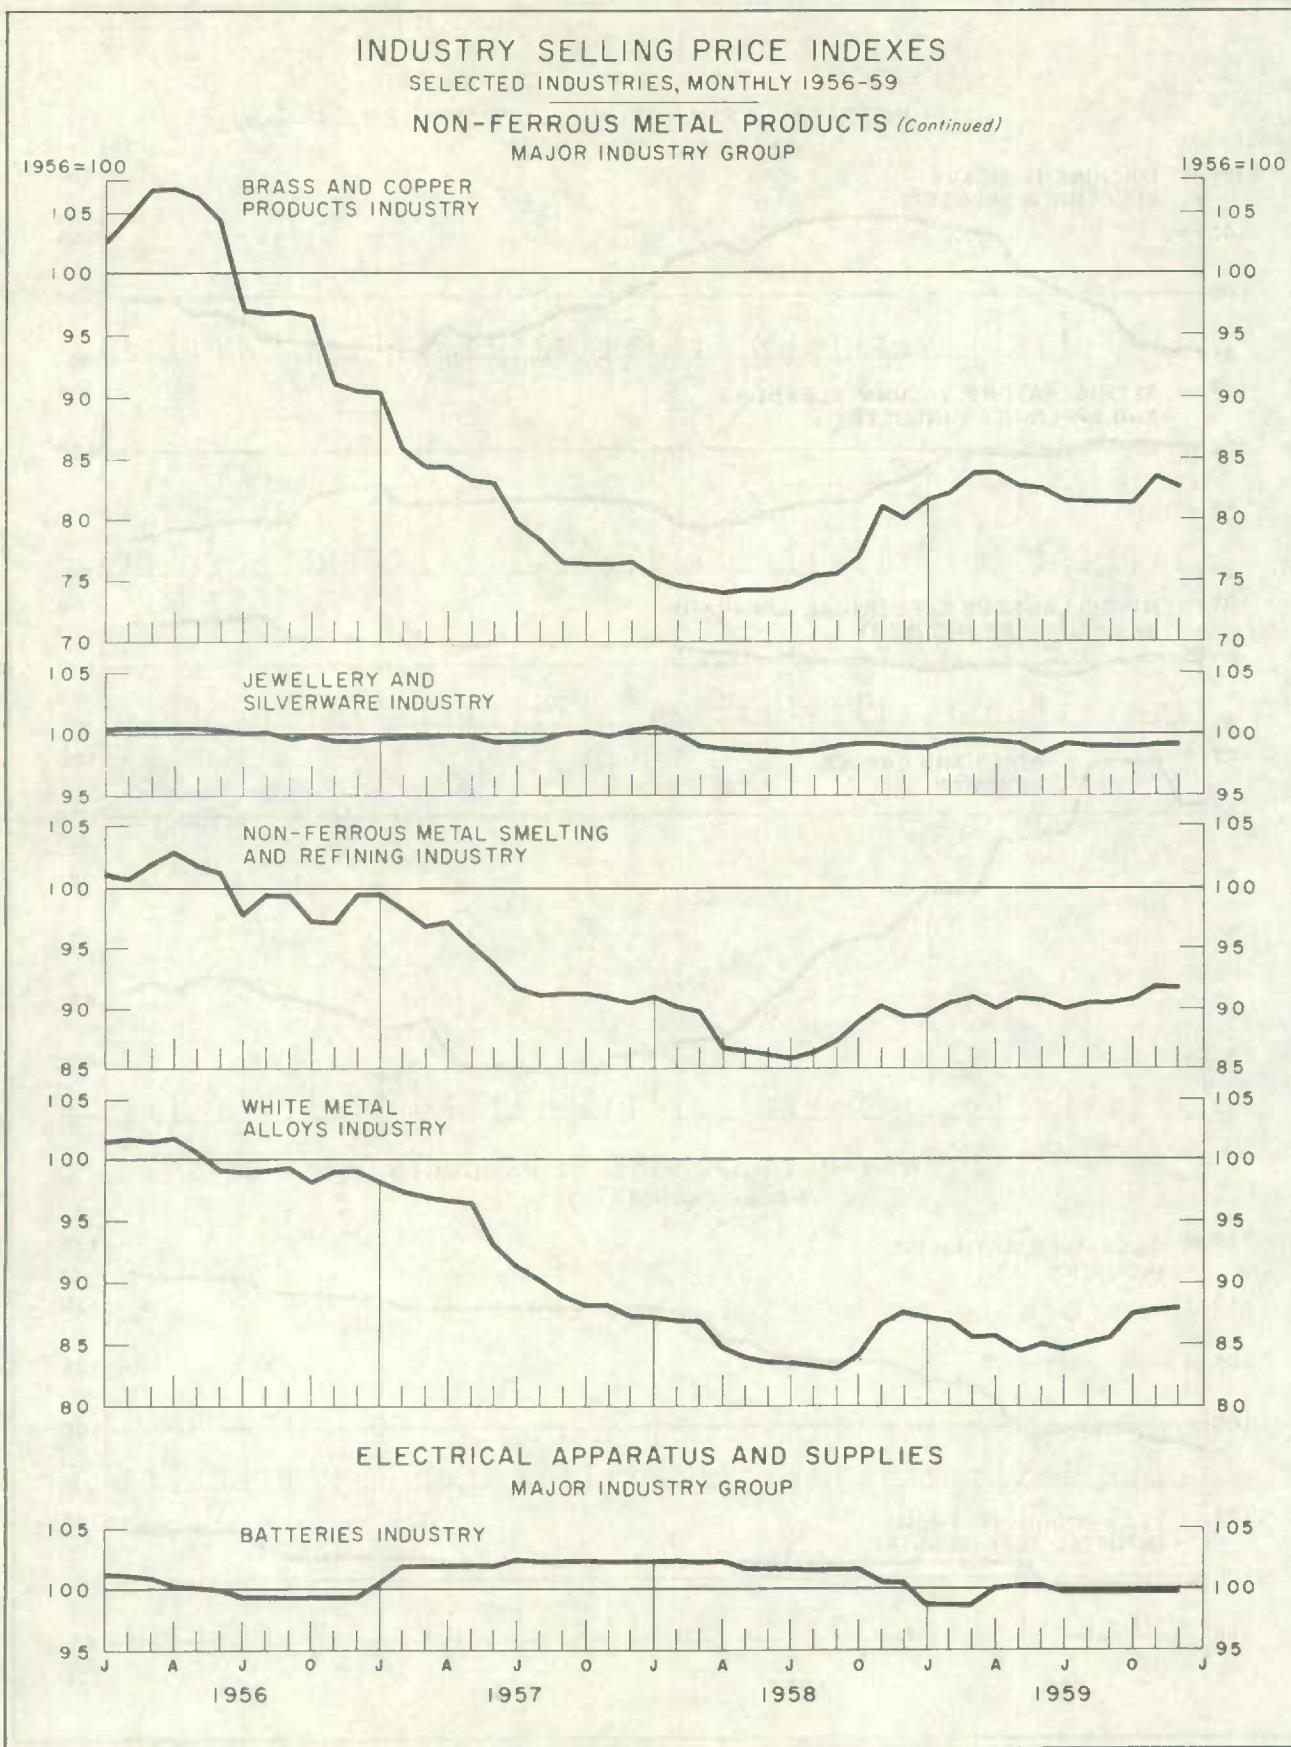

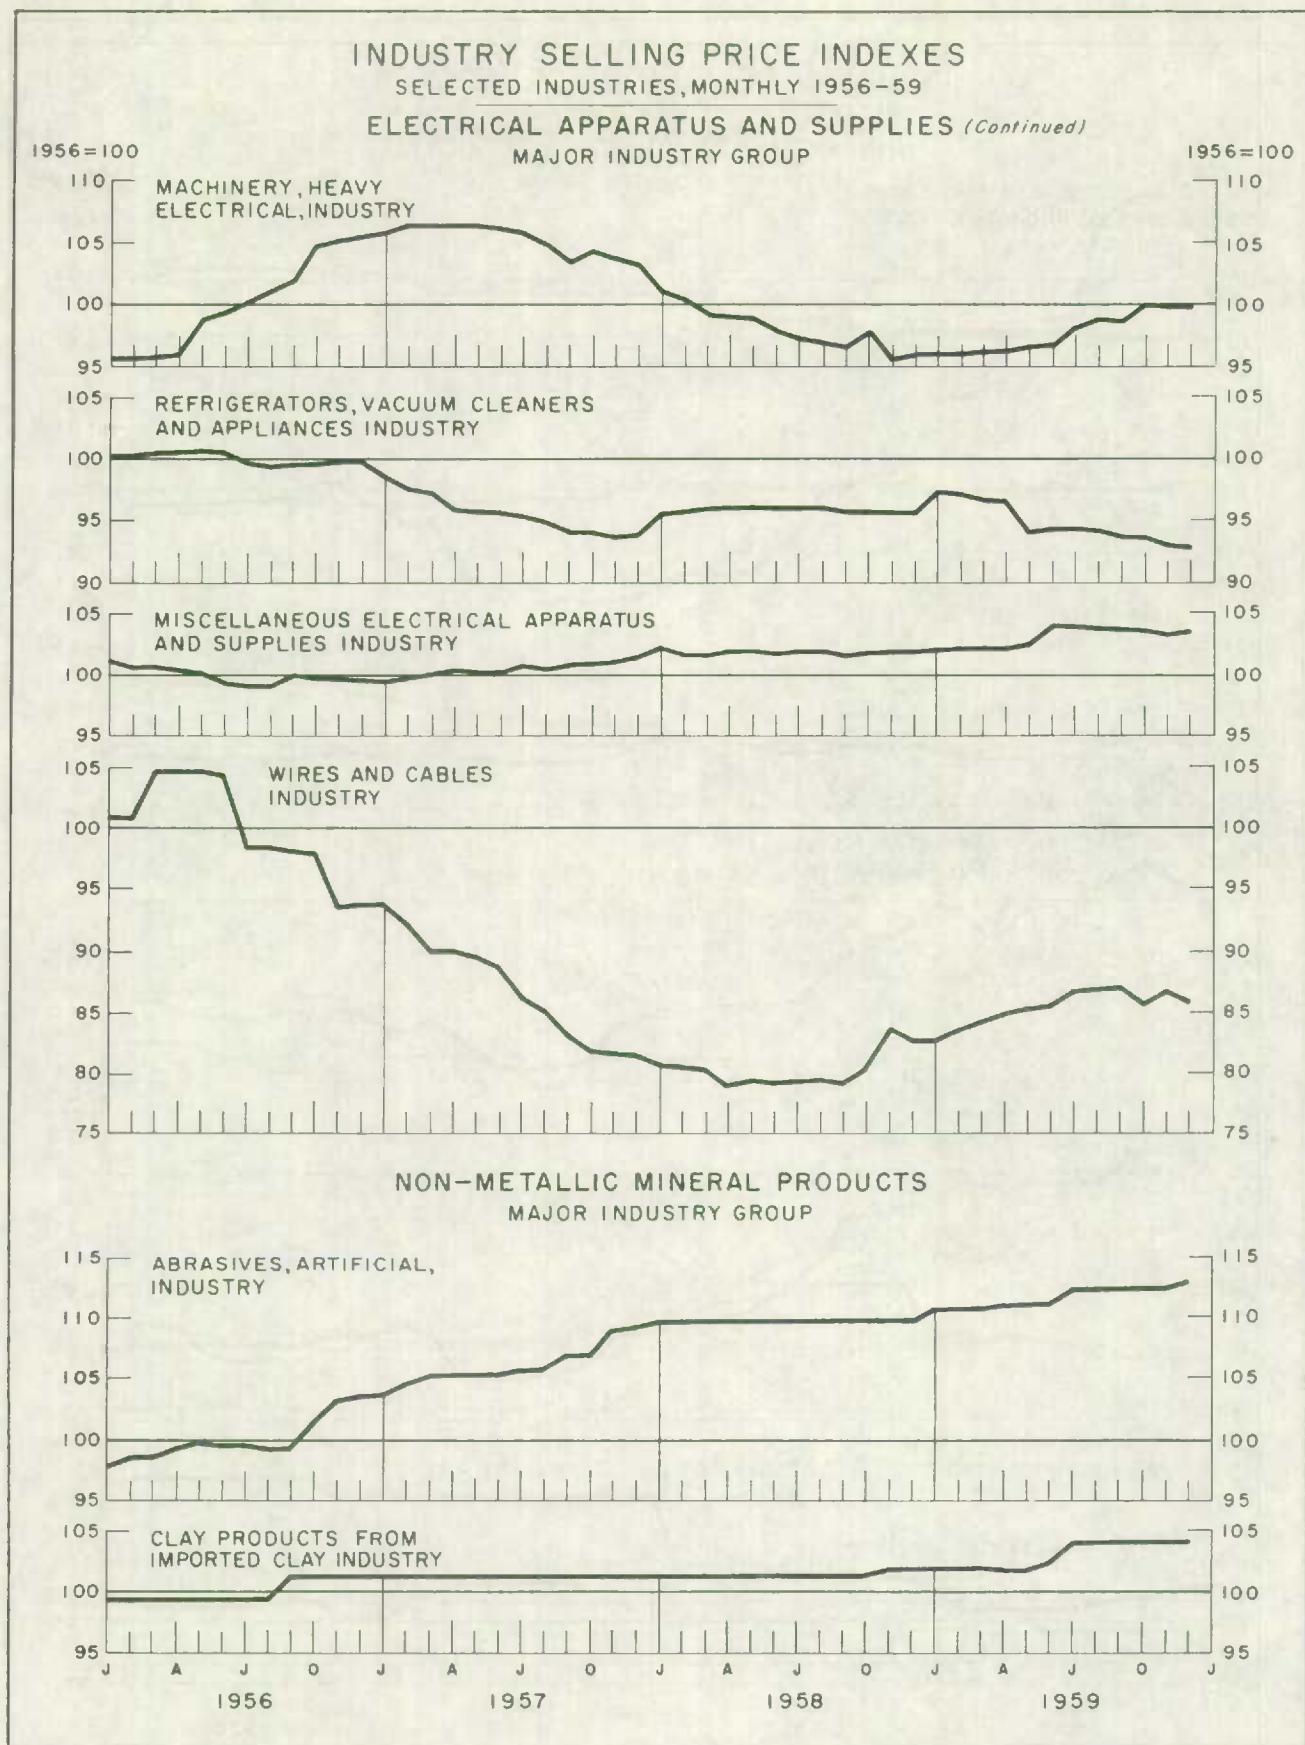

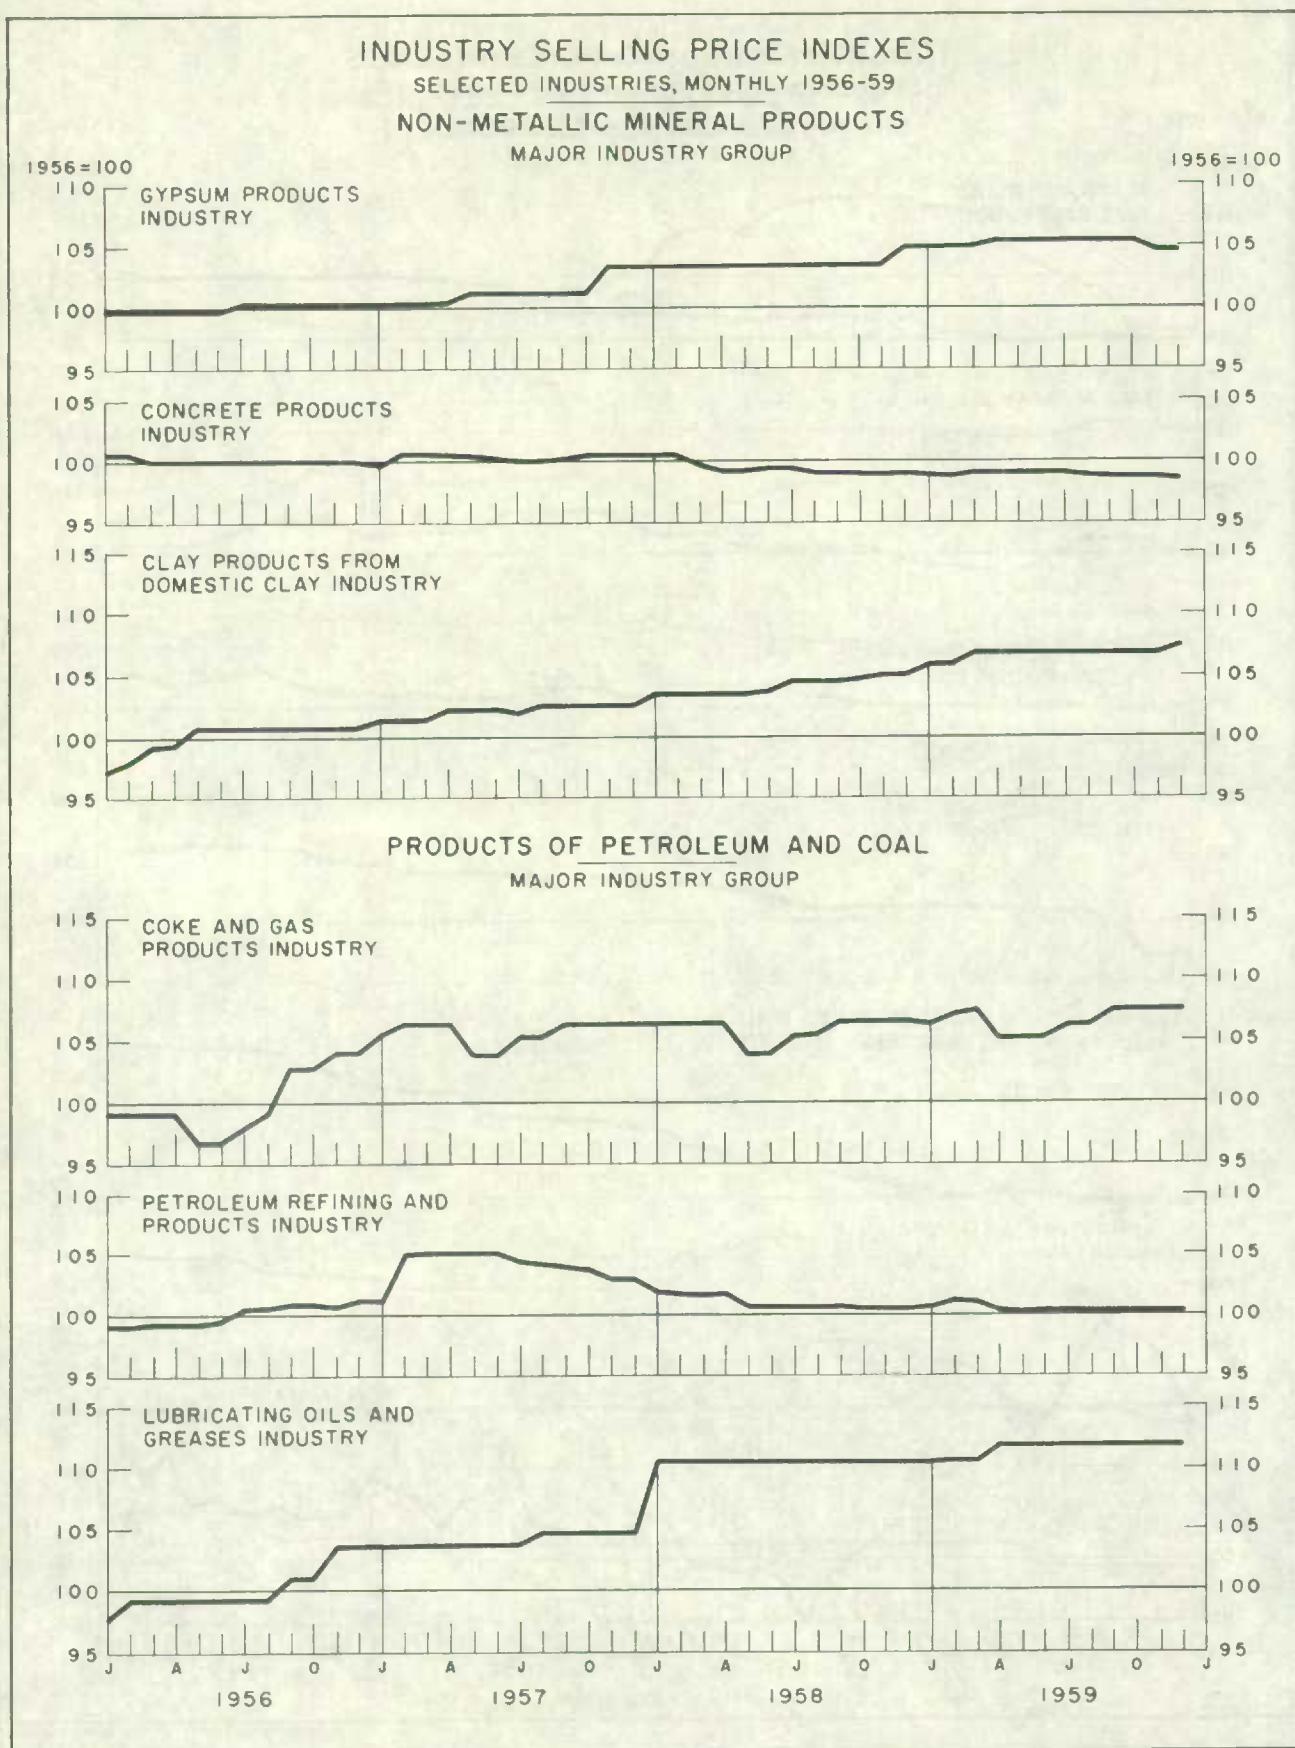

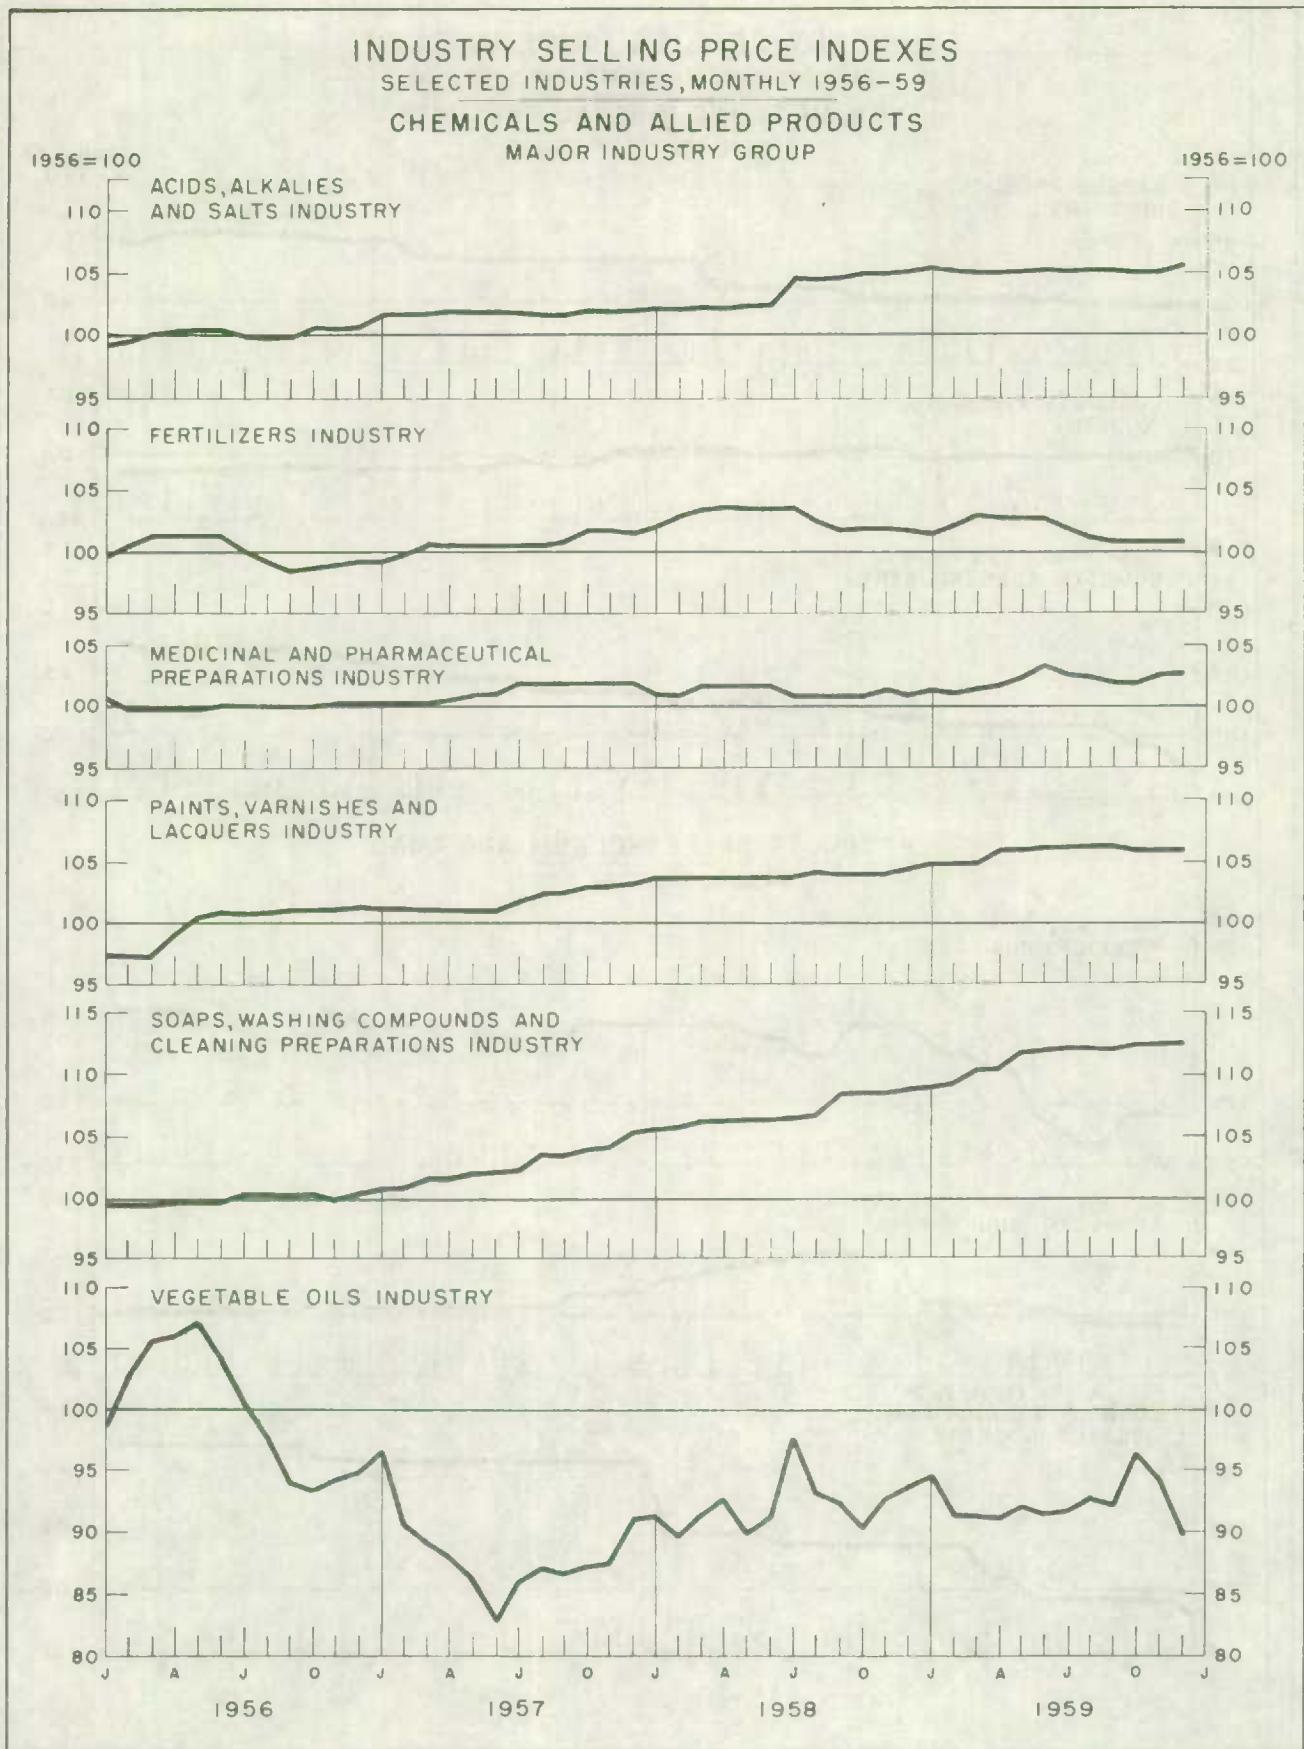

INDUSTRY SELLING PRICE INDEXES

SELECTED INDUSTRIES, MONTHLY 1956-59

## APPENDIX A

Base Period Weights of Industry Selling Price Indexes  
(1956 = 100)

Industry and Commodity or Commodity Group	Commodity weight in industry	Industry weight in major industry group
	%	%
<b>Foods and beverages major industry group .....</b>		<b>100.0</b>
<b>Meat products industry sub-group:</b>		
<b>Slaughtering and meat packing industry .....</b>	<b>100.0</b>	<b>21.7</b>
<b>Commodities:</b>		
Bacon and sides .....	5.9	
Beef, fresh or frozen .....	31.8	
Hams, cured .....	8.8	
Hides, cattle .....	1.9	
Lard .....	5.0	
Margarine .....	4.8	
Meats, canned, all kinds .....	4.4	
Mutton and Lamb, fresh or frozen .....	1.5	
Pork, fresh or frozen .....	20.5	
Poultry, fresh or frozen .....	2.2	
Sausage, fresh .....	4.5	
Veal, fresh or frozen .....	3.9	
Weiners and bologna .....	4.8	
<b>Dairy products industry sub-group:</b>		
<b>Concentrated milk products industry .....</b>	<b>100.0</b>	<b>1.5</b>
<b>Commodities:</b>		
Milk, skim, powder, spray process .....	18.6	
Milk, whole, evaporated .....	70.1	
Milk, whole, powder, spray process .....	11.3	
<b>Cheese, processed, industry .....</b>	<b>100.0</b>	<b>0.8</b>
<b>Commodities:</b>		
Cheese, processed, from cheddar only .....	100.0	
<b>Dairy products, other, industry .....</b>	<b>100.0</b>	<b>0.4</b>
<b>Commodities:</b>		
Ice cream, specialized industry .....	100.0	
<b>Canning and processing industry sub-group:</b>		
<b>Fish processing industry .....</b>	<b>100.0</b>	<b>3.9</b>
<b>Commodities:</b>		
Cod, dried, salted .....	8.0	
Cod, fillets, frozen .....	8.1	
Haddock, fillets, fresh or frozen .....	5.9	
Halibut, whole, fresh or frozen .....	7.1	
Herring, canned, kippered, pickled, etc. ....	8.4	
Lobster, canned .....	5.4	
Lobster, shell .....	12.2	
Salmon, canned, pinks .....	15.2	
Salmon, canned, sockeye .....	19.7	
Salmon, whole, fresh or frozen .....	10.0	
<b>Fruit and vegetable preparations industry .....</b>	<b>100.0</b>	<b>5.9</b>
<b>Commodities:</b>		
Apples, canned .....	2.1	
Beans, baked, canned .....	8.7	
Corn, creamed, whole grain, canned .....	4.2	
Fruits, quick-frozen .....	4.4	
Infants food, prepared .....	9.5	
Jams .....	13.1	
Peaches, canned .....	4.4	
Pears, Keiffer, canned .....	2.7	
Peas, canned .....	7.7	
Pickles, relishes and sauces .....	8.2	
Soups, canned .....	21.2	
Tomatoes, canned .....	4.0	
Tomato juice, canned .....	9.8

(1956 = 100)

Industry and Commodity or Commodity Group	Commodity weight in industry	Industry weight in major industry group
	%	%
<b>Foods and beverages major industry group — Continued:</b>		
<b>Grain mill products industry sub-group:</b>		
<b>Feed mills industry<sup>1</sup></b>	<b>100.0</b>	<b>5.7</b>
Commodities:		
Feeds, chopped grain .....	13.4	
Feeds, dairy and cattle .....	12.7	
Feeds, poultry, growing .....	15.7	
Feeds, poultry, laying and hatching .....	39.3	
Feeds, swine .....	18.9	
<b>Flour mills industry</b>	<b>100.0</b>	<b>7.6</b>
Commodities:		
Bran .....	6.9	
Shorts and middlings .....	10.2	
Wheat flour:		
Ontario, winter .....	6.2	
Spring, No 1, or top patent, including semolina .....	17.2	
Spring, No 2 patent .....	20.0	
Spring, No 3 patent (strong bakers or export patent) .....	39.5	
<b>Breakfast foods industry</b>	<b>100.0</b>	<b>0.7</b>
Commodities:		
Corn flakes .....	52.9	
Puffed grains, (wheat etc.) .....	47.1	
<b>Bakery products industry sub-group:</b>		
<b>Biscuits industry</b>	<b>100.0</b>	<b>2.1</b>
Commodities:		
Biscuits, plain, fancy .....	84.1	
Biscuits, soda .....	15.9	
<b>Bread and other bakery products industry</b>	<b>100.0</b>	<b>8.0</b>
Commodities:		
Bread .....	64.5	
Buns, fruit, yeast raised sweet goods etc. ....	6.0	
Pies, cakes, cookies and pastries .....	25.4	
Rolls and buns, plain .....	4.1	
<b>Beverages industry sub-group:</b>		
<b>Carbonated beverages industry</b>	<b>100.0</b>	<b>3.1</b>
Commodities:		
Carbonated beverages (soft drinks) .....	85.4	
Syrups, concentrates and extracts .....	14.6	
<b>Distilled liquors industry</b>	<b>100.0</b>	<b>3.5</b>
Commodities:		
Whiskies, Canadian rye .....	100.0	
<b>Breweries industry</b>	<b>100.0</b>	<b>5.8</b>
Commodities:		
Beer in draught and bulk .....	17.6	
Beer in small bottles .....	82.4	
<b>Wines industry</b>	<b>100.0</b>	<b>0.3</b>
Commodities:		
Wine, bottled .....	100.0

Industry and Commodity or Commodity Group	Commodity weight in industry	Industry weight in major industry group
	%	%
<b>Foods and beverages major industry group — Concluded:</b>		
<b>Other food industries sub-group:</b>		
<b>Confectionery industry</b> .....	<b>100.0</b>	<b>2.9</b>
Commodities:		
Chewing gum .....	11.8	
Chocolate bars .....	34.0	
Chocolate, in packages .....	20.4	
Chocolate confectionery, in bulk .....	9.4	
Sugar confectionery, in bulk .....	24.4	
<b>Sugar refining industry</b> .....	<b>100.0</b>	<b>3.3</b>
Commodities:		
Sugar, granulated, cane and beet .....	86.2	
Sugar, icing, cane and beet .....	5.3	
Sugar, yellow or brown, cane and beet .....	8.5	
<b>Miscellaneous food preparations industry</b> .....	<b>100.0</b>	<b>6.2</b>
Commodities:		
Coffee, roasted .....	46.3	
Jelly powders .....	7.6	
Margarine .....	5.2	
Peanuts, roasted and salted .....	9.8	
Potato chips and flakes .....	4.6	
Tea, blended, packaged .....	26.5	
<b>Macaroni and kindred products industry</b> .....	<b>100.0</b>	<b>0.3</b>
Commodities:		
Macaroni (spaghetti etc.) .....	100.0	
<b>Malt and malt products industry</b> .....	<b>100.0</b>	<b>1.2</b>
Commodities:		
Malt, barley .....	100.0	
<b>Other foods and beverages industries<sup>2</sup></b> .....	—	<b>15.1</b>
<b>Tobacco and tobacco products major industry group</b> .....		<b>100.0</b>
<b>Tobacco, cigars and cigarettes industry</b> .....	<b>100.0</b>	<b>68.8</b>
Commodities:		
Cigarettes .....	65.0	
Cigars .....	10.6	
Tobacco, smoking, fine-cut .....	24.4	
<b>Other tobacco and tobacco products industries<sup>2</sup></b> .....	—	<b>31.2</b>
<b>Rubber products major industry group</b> .....		<b>100.0</b>
<b>Rubber goods, including footwear, industry</b> .....	<b>100.0</b>	<b>100.0</b>
Commodities:		
Belting, rubber, conveyor .....	1.9	
Boots, all rubber, knee, stormking and hip .....	5.0	
Foamed latex .....	2.8	
Hose, fire, garden, etc. .....	4.1	
Overshoes, all rubber, lined and unlined .....	7.2	
Overshoes, cloth uppers .....	3.6	
Soling and slabs for heels, rubber and composition .....	3.5	
Tape, rubber, friction and pressure sensitive .....	2.3	
Tires, balloon, bus and truck .....	28.0	
Tires, balloon, passenger cars, standard .....	31.3	
Tires, implement and tractor .....	4.4	
Tubes, bus and truck .....	1.7	
Tubes, passenger cars .....	4.2	

**Base Period Weights of Industry Selling Price Indexes — Continued**  
(1956 = 100)

Industry and Commodity or Commodity Group	Commodity weight in industry	Industry weight in major industry group
	%	%
<b>Leather products major industry group</b>		<b>100.0</b>
Footwear, leather, industry	100.0	59.0
Commodities:		
Boots and shoes:		
Babies' and infants' stitchdowns .....	4.1	
Boys' stitchdowns .....	3.0	
Children's and little gents' stitchdowns .....	4.9	
Men's goodyear welts .....	26.8	
Men's stitchdowns .....	7.4	
Misses' stitchdowns .....	5.7	
Women's and growing girls' cements, California type .....	17.1	
Women's and growing girls' cements, regular type .....	25.0	
Slippers, Indian, women's and growing girls' .....	2.8	
Slippers, turns, soft soles, women's and growing girls'	3.2	
Gloves and mittens, leather, industry	100.0	4.4
Commodities:		
Gloves and mittens, dress, men's lined .....	38.1	
Gloves and mittens, work, men's unlined .....	61.9	
Leather tanning industry	100.0	21.6
Commodities:		
Bag, case, and strap leather .....	3.2	
Garment leather .....	3.0	
Glove leather .....	6.2	
Sole leather, bends .....	17.1	
Sole leather, shoulders .....	3.8	
Upper leather, calf skins .....	16.0	
Upper leather, cattle hides .....	46.1	
Upper leather, chrome splits .....	4.6	
Belting, leather, industry	100.0	0.8
Commodities:		
Belting, leather, transmission .....	100.0	
Other leather products industries <sup>2</sup>	—	14.2
Textile mills major industry group		100.0
Cotton goods industry sub-group:		
Cotton yarn and cloth industry <sup>3</sup>	100.0	31.4
Commodities:		
Blankets, all cotton .....	4.1	
Cotton fabrics, bleached .....	6.8	
Cotton fabrics, grey .....	27.1	
Cotton fabrics, piece dyed .....	10.0	
Cotton fabrics, printed and painted .....	7.4	
Cotton fabrics, tapestries and upholstering .....	3.2	
Cotton fabrics, yarn and stock dyed .....	6.3	
Cotton fabrics, other .....	2.3	
Tire fabric, nylon cord .....	3.4	
Tire fabric, rayon cord .....	8.0	
Towels, terry .....	2.4	
Twine, wrapping .....	1.5	
Yarn, spun cotton, grey, knitting .....	7.5	
Yarn, spun cotton, grey, other plied .....	6.4	
Yarn, spun cotton, grey, other singles .....	3.6	
Woollen goods industry sub-group:		
Woollen cloth industry	100.0	9.8
Commodities:		
Woven fabrics, all wool, woollen .....	44.7	
Woven fabrics, all wool, worsted .....	39.3

<sup>7</sup> In 1953, Abrasives, artificial, S.I.C. 3611 included Abrasive products, S.I.C. 3612.

<sup>8</sup> In 1953, Clay products from domestic clay, S.I.C. 3692 included Brick and tile, S.I.C. 3642.

<sup>9</sup> In 1953, Inks, printing S.I.C. 3894 included Inks, writing S.I.C. 3893.

## APPENDIX B

### General Description of Commodities for which Prices are Included in Industry Selling Price Indexes Arranged according to Industries

#### Slaughtering and meat packing industry (S.I.C. 2001):

Beef carcasses:  
Cow, good  
Steer, good, grade "B"  
Steer, commercial, grade "C"  
Bologna  
Fowl, dressed, grade "A"  
Hides and skins:  
Beef, butcher and country trimmed  
Beef, packer, light native steers  
Calf, city cured  
Lamb carcasses  
Lard, processed  
Margarine  
Pork:  
Bacon, side, rindless  
Canned luncheon  
Cottage roll, smoked  
Ham, smoked  
Loin, fresh  
Picnics, smoked  
Sausage, pure pork  
Shoulder, fresh  
Veal carcasses  
Weiners

#### Concentrated milk products industry (S.I.C. 2030):

Milk, whole, evaporated  
Milk, skim, powder, spray process  
Milk, whole, powder, spray process

#### Cheese, processed, industry (S.I.C. 2070):

Cheese processed, from cheddar only

#### Dairy products, other, industry (S.I.C. 2090):

Ice cream, brick  
Ice cream, bulk

#### Fish processing industry (S.I.C. 2100):

Cod, dried and salted  
Cod, fresh and frozen fillets  
Haddock, fresh and frozen fillets  
Halibut, fresh and frozen dressed  
Herring, kippered  
Lobster, canned  
Lobster, in shell  
Salmon, canned, pinks  
Salmon, canned, sockeye  
Salmon, fresh and frozen

#### Fruit and vegetable preparations industry (S.I.C. 2120)

Fruits, canned:  
Apples  
Peaches  
Pears  
Fruits, frozen:  
Cherries  
Raspberries  
Strawberries  
Infants' food:  
Canned fruits  
Canned vegetables  
Cereals, mixed  
Jams:  
Jam, plum  
Jam, raspberry  
Jam, strawberry

#### Fruit and vegetable preparations industry (S.I.C. 2120) — Concluded:

Pickles  
Relishes  
Sauces  
Soups, canned  
Vegetables, canned:  
Beans, baked  
Corn  
Peas  
Tomatoes  
Tomato juice

#### Feed mills industry<sup>1</sup> (S.I.C. 2130):

Cattle feeds:  
Dairy mash  
Dairy ration  
Chopped grain feeds  
Poultry feeds:  
Growing mash  
Hatching mash  
Laying mash  
Swine feeds:  
Hog finisher  
Pig grower  
Pig starter

#### Flour mills industry (S.I.C. 2140):

Bran  
Flour, Ontario winter wheat  
Flour, Spring No. 1  
Flour, Spring No. 2  
Flour, Spring No. 3  
Shorts and middlings

#### Breakfast foods industry (S.I.C. 2150):

Corn flakes  
Puffed wheat

#### Biscuits industry (S.I.C. 2180):

Biscuits, fancy  
Biscuits, plain  
Biscuits, soda

#### Bread and other bakery products industry (S.I.C. 2190):

Bread  
Buns, fruit  
Buns and rolls, plain  
Pies, cakes, cookies, pastries etc.

#### Carbonated beverages industry (S.I.C. 2200):

Soft drinks  
Syrups, concentrate

#### Distilled liquors industry (S.I.C. 2210):

Whiskey, Canadian rye

#### Breweries industry (S.I.C. 2220):

Beer, draught and bulk  
Beer, bottled small

#### Wines industry (S.I.C.) 2240

Wine, bottled

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Continued**

**Confectionery industry (S.I.C. 2250):**

Chewing gum  
Chocolate bars  
Chocolate confectionery, bulk  
Chocolate, packaged  
Sugar confectionery, bulk

**Sugar refining industry (S.I.C. 2270):**

Sugar, granulated, cane and beet  
Sugar, icing, cane and beet  
Sugar, yellow or brown

**Miscellaneous food preparations industry (S.I.C. 2281):**

Coffee, roasted  
Jelly powders  
Margarine  
Peanuts, roasted, salted  
Potato chips and flakes  
Tea, blended, packaged

**Macaroni and kindred products industry (S.I.C. 2283):**

Macaroni  
Spaghetti

**Malt and malt products industry (S.I.C. 2285):**

Malt, barley

**Tobacco, cigars and cigarettes industry (S.I.C. 2302):**

Cigarettes  
Cigars  
Tobacco, fine cut

**Rubber goods, including footwear, industry (S.I.C. 2390):**

Belting, rubber, conveyor  
Footwear:  
Boots, rubber  
Overshoes and galoshes, cloth uppers  
Overshoes and galoshes, all rubber  
Hose, rubber:  
Natural and synthetic for garden  
Synthetic for gasoline and oil  
Latex compounds:  
Adhesive  
Rug backing  
Upholstery  
Pillows and cushions, foam rubber  
Soling, rubber composition  
Soling and slabs, for heels  
Tape:  
Cellulose  
Electrical  
Friction  
Masking  
Tires:  
Balloon, bus and truck  
Balloon, passenger car, tubed type  
Implement  
Tubeless  
Tubes:  
Bus and truck  
Passenger cars

**Footwear, leather, industry (S.I.C. 2410):**

Moccasins, women's  
Shoes:  
Babies' stitchdowns  
Boys' stitchdowns  
Children's stitchdowns  
Men's goodyear welts  
Men's stitchdowns  
Misses' stitchdowns

**Footwear, leather, industry (S.I.C. 2410) — Concluded:**

Shoes — Concluded:  
Women's and growing girls', cements, casuals  
Women's and growing girls', cements, regular  
Slippers:  
Women's soft sole  
Women's Indian

**Gloves and mittens, leather, industry (S.I.C. 2450):**

Gloves:  
Men's, dress, lined  
Men's, work, unlined  
Mitts:  
Men's, work, unlined

**Leather tanning industry (S.I.C. 2471):**

Findings, leather  
Garment leather  
Glove leather  
Leather sides:  
Elk  
Retan  
Sole leather:  
Bellies  
Bends  
Shoulders  
Upper leather:  
Calf skins  
Cattle sides  
Chrome splits  
Trunk and bag

**Belting, leather, industry (S.I.C. 2472):**

Leather belting

**Cotton yarn and cloth industry<sup>3</sup> (S.I.C. 2520):**

Blankets, cotton  
Cotton fabrics:  
Bleached  
Grey  
Piece dyed  
Printed  
Yarn dyed  
Nylon tire cord fabric  
Rayon tire cord fabric  
Sheets, cotton  
Towels, terry  
Twines, cotton wrapping  
Upholstery fabrics  
Yarn:  
Hosiery  
Spun cotton, grey, knitting  
Spun cotton, grey, plied  
Spun cotton, grey, singles  
Warp

**Woollen cloth industry (S.I.C. 2550):**

Blankets, wool  
Woven fabrics:  
Woollen suiting  
Wool, worsted suiting

**Woollen yarn industry (S.I.C. 2570):**

Yarn:  
Hand knitting, worsted, oil spun  
Machine knitting, worsted, dry spun  
Machine knitting, worsted, oil spun  
Weaving, worsted, oil spun

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Continued**

**Miscellaneous woollen goods industry (S.I.C. 2590):**

Felts, wool, papermakers  
Wool, reworked and reprocessed

**Synthetic textiles and silk industry (S.I.C. 2600):**

Blouse fabrics  
Lingerie fabrics  
Nylon fabric, woven continuous filament  
Rayon fabrics:  
    Woven, continuous filament  
    Woven, spun  
    Woven, spun, and cotton mixture  
Shirting fabrics  
Yarn:  
    Nylon, singles  
    Nylon, thrown  
    Nylon tire cord  
    Spun rayon, blended  
    Spun rayon, carpet  
    Viscose rayon, tire cord

**Cordage, rope and twine industry (S.I.C. 2650):**

Rope:  
    Manilla  
    Sisal  
Twine:  
    Baler  
    Binder  
    Sisal

**Bags, cotton and jute, industry (S.I.C. 2660):**

Bags, cotton  
Bags, jute

**Oilcloth, linoleum and other coated fabrics industry (S.I.C. 2670):**

Coated fabrics  
Floor covering:  
    Linoleum  
    Felt base, printed surface  
Tiles, linoleum  
Window shades, cloth blinds

**Automobile accessories, fabric industry (S.I.C. 2691):**

Seat covers, automobile

**Clothing, men's factory, industry<sup>4</sup> (S.I.C. 2721):**

Dungarees, sanforized drill denim  
Jackets, leather  
Overalls  
Overcoats  
Pants:  
    All wool  
    Cotton  
    Rayon  
Pyjamas, cotton broadcloth  
Shirts:  
    Dress, cotton broadcloth  
    Dress, nylon tricot  
    Cotton, work  
Sport jackets, all wool  
Sportshirts:  
    Cotton  
    Rayon  
Suits, all wool  
Swim trunks  
Top coats

**Clothing, women's factory, industry<sup>5</sup> (S.I.C. 2731):**

Blouses, cotton  
Coats, wool  
Dresses:  
    Cotton  
    Linen  
    Housedresses, cotton  
Dusters, cotton  
Nightgowns, rayon jersey  
Skirts, all wool  
Slips:  
    Nylon  
    Rayon

**Hosiery industry (S.I.C. 2740):**

Hosiery, ankle socks:  
    Nylon, children's  
    Nylon, women's  
Hosiery, men's, seamless, fine socks:  
    Mixtures  
    Nylon  
    Orlon  
    Wool  
Hosiery, men's, seamless, work socks, wool  
Hosiery:  
    Nylon, ladies' full fashioned  
    Nylon, ladies' seamless

**Other knitted goods industry (S.I.C. 2750):**

Bathing suits, ladies' and girls'  
Combinations:  
    Men's and boys', cotton or chiefly cotton  
    Men's wool  
Glove and shoe linings, fleeced cotton  
Knitted goods, infants'  
Nylon fabric, knitted  
Panties:  
    Women's and misses', cotton  
    Women's and misses', rayon  
Stockinettes, cotton  
Sweaters, pullovers  
T-shirts, men's cotton  
Undershirts, men's and boys', cotton or chiefly cotton

**Hats and caps industry (S.I.C. 2780):**

Caps, cloth, men's and boys' lined  
Hats, men's fur felt

**Veneers and plywoods industry (S.I.C. 2810):**

Doors:  
    Birch plywood, interior  
    Douglas fir plywood, interior  
Plywood, Douglas fir  
Plywood, yellow birch  
Plywood panels, birch, for doors  
Veneer, yellow birch

**Sash, door and planing mills industry (S.I.C. 2831):**

Door frames  
Doors, wooden  
Lumber, matched:  
    Red cedar  
    Red pine  
    Spruce, eastern  
    White pine, eastern  
Lumber, planed:  
    Spruce  
    White pine  
Mouldings, room and door trim  
Sashes, window  
Window units, cellar, pre-fit

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Continued**

**Flooring, hardwood, industry (S.I.C. 2832):**

Hardwood flooring, yellow birch  
Hardwood flooring, red oak

**Lumber mills industry (S.I.C. 2851):**

Lumber, sawn:  
Birch, yellow  
Cedar, red  
Fir, Douglas  
Hemlock, eastern and western  
Jack pine  
Maple, hard (sugar)  
Pine, white, eastern  
Spruce, eastern and western  
Timbers, Douglas fir, rough

**Shingle mills industry (S.I.C. 2852):**

Shingles, red cedar

**Furniture industry (S.I.C. 2861):**

Bed springs, box and slat  
Mattresses, spring filled  
Metal furniture:  
Cabinets, filing  
Chairs, office, beauty parlor  
Desks, office  
Tables, kitchen and dinette  
Wooden furniture:  
Bedroom suites  
Buffets  
Chesterfield suites  
Davenport suites  
Desks, office  
Dining room suites  
Tables, living room, various types

**Boxes and baskets, wood, industry (S.I.C. 2870):**

Boxes, wooden, butter, explosive etc.

**Boxes and bags, paper, industry (S.I.C. 2920):**

Bags, paper:  
Grocery, self opening, square  
Kraft sacks  
Laundry, flat  
Multi-wall, pasted, open mouth  
Other multi-wall, flour, feed etc.  
Shopping  
Bags, special:  
Cellophane  
Glassine  
Polyethylene multi-wall  
Waxed  
Boxes:  
Corrugated  
Set-up, various types  
Boxes and cartons, folding  
Cellophane wraps, printed  
Containers, round, fibre or paper board  
Drinking cups  
Milk bottles, paper  
Napkins, paper  
Pails, paper  
Paper, waxed bread wrappers, coloured  
Paper, waxed, in rolls

**Pulp mills industry (S.I.C. 2941):**

Pulp, bleached:  
Sulphate process  
Sulphite process, dissolving grade  
Sulphite process, paper grade

**Pulp mills industry (S.I.C. 2941) — Concluded:**

Pulp, groundwood No. 1  
Pulp, unbleached:  
Sulphate process  
Sulphite process, newsgrade  
Sulphite process, strong

**Paper mills industry (S.I.C. 2943):**

Book paper  
Building boards:  
Insulating  
Structural hard board  
Building paper, dry:  
Light and heavy  
Sheathings  
Fine paper, various types  
Newsprint paper:  
Rolls  
Sheets  
Paper board:  
Box board for folding cartons  
Container board liners  
Natural kraft liner  
Corrugating board  
Wallboard  
Wrapping papers, Kraft No. 1

**Roofing paper industry (S.I.C. 2960):**

Building boards:  
Insulating panels  
Insulating panels, asphalt coated  
Building paper, sheathings, asphalt saturated  
Felts, tar and asphalt saturated  
Insulated siding  
Roofing:  
Asphalt shingles  
Roll felt, mineral surface  
Roll felt, smooth surface  
Tile:  
Acoustic, ceiling  
Asphalt, floor

**Miscellaneous paper goods industry<sup>6</sup> (S.I.C. 2991):**

Bags:  
Paper, grocery, heavy  
Cellophane  
Polyethylene  
Books:  
Exercise  
Note  
Scribblers  
Envelopes  
Facial tissues  
Napkins:  
Paper  
Sanitary  
Paper:  
Blueprint  
Cigarette  
Clay coated and enamelled  
Dry sensitized (reproduction)  
Photostat  
Refills, for loose-leaf  
Toilet  
Towels  
Wallpaper, manufactured  
Wallboard, fibre, laminated type  
Wax paper, including bread wrappers  
Wrapping paper, printed, gift  
Wrappers, printed  
Wrappers, unprinted

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Continued**

**Agricultural implements industry (S.I.C. 3110):**

Combine:  
Reaper-thresher  
Self-propelled  
Disc-harrow, one-way  
Disc-plough  
Drill:  
Fertilizer  
Grain  
Grain and fertilizer combined  
Harrower, 1 and 2 section  
Hay baler, pick-up  
Manure spreader  
Plough-harrow, one-way  
Swather  
Windrower

**Heating and cooking apparatus industry (S.I.C. 3180):**

Furnaces, oil burning, forced air  
Oil burner, power type, residential  
Radiators, sheet metal  
Refrigerators, electric, domestic  
Stoves and ranges:  
Coal and wood  
Electric  
Gas  
Gas and oil combination

**Machinery, household, office and store, industry (S.I.C. 3190):**

Accounting machines  
Adding machines  
Cash registers  
Refrigerator, commercial, display cases  
Sewing machines, electric  
Typewriters:  
Portable  
Standard  
Washing machines, electric, conventional

**Castings, iron, industry (S.I.C. 3200):**

Castings:  
Grey iron, commercial  
Malleable iron, commercial  
Fire hydrants  
Pipe and fittings:  
Cast iron, soil  
Cast iron, water  
Malleable iron  
Pipe, steel:  
Buttweld and lapweld  
Seamless  
Tubing, light steel  
Valves:  
Brass, plumber's  
Iron body

**Pig iron industry (S.I.C. 3251):**

Pig iron:  
Basic grade  
Foundry grade  
Malleable grade

**Steel ingots and castings industry (S.I.C. 3252):**

Castings, steel:  
Basic, open hearth  
Electric

**Rolled iron and steel products industry (S.I.C. 3253):**

Bars:  
Cold-rolled  
Concrete reinforcing  
Hot-rolled  
Blooms and billets, hot-rolled  
Plates:  
Carbon  
Universal  
Rails  
Rail fasteners and tie plates  
Shapes, structural steel:  
Heavy  
Light  
Sheets:  
Carbon, cold-rolled  
Carbon, hot-rolled  
Stainless, hot-rolled  
Skelp, carbon, hot-rolled  
Strips, stainless, cold-rolled  
Tinplate  
Wire rods

**Wire and wire goods industry (S.I.C. 3270):**

Chains, auto tire  
Screws:  
Steel, flat, machine  
Steel, tapping  
Springs:  
Mechanical  
Steel wire, upholstery  
Wire:  
Barbed  
Black, annealed  
Galvanized  
Plain  
Steel rope  
Steel twisted, strand  
Welded or woven mesh  
Steel, woven, farm fence  
Wire cloth, Fourdrinier  
Wire nails, iron and steel

**Boatbuilding industry (S.I.C. 3330):**

Boats, outboard

**Motor vehicles industry (S.I.C. 3340):**

Cars:  
Passenger, hard-top  
Passenger, 2-door sedan  
Passenger, 4-door sedan  
Passenger, station wagon  
Coaches, transit type  
Trucks:  
5,000 lb. or less  
5,001 to 10,000 lbs.  
14,001 to 16,000 lbs.  
16,001 to 19,500 lbs.  
19,501 to 26,000 lbs.

**Motor vehicle parts industry (S.I.C. 3350):**

Axles, truck  
Bodies and cabs:  
Delivery trucks  
Vans  
Braking units:  
Hydraulic  
Power  
Bumpers and bumperettes, passenger car  
Differentials, passenger car

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Continued**

**Motor vehicle parts industry (S.I.C. 3350) — Concluded:**

Drive shafts, propeller, and universal joints  
Generators, automotive  
Heaters, car  
Headlights and parts  
Ignition coils  
Oil filters:  
    Cartridges  
    Elements  
Pistons  
Radiators:  
    Automobile  
    Truck  
Shock absorbers  
Spark plugs  
Springs, leaf, passenger car  
Starters, automotive  
Steering gear assemblies  
Trailers:  
    Cabin or house type  
    Commercial, van type  
Transmissions:  
    Passenger car  
    Small truck

**Aluminum products industry (S.I.C. 3410):**

Bars and rods  
Cooking utensils  
Extruded shapes  
Sheets  
Tubing

**Brass and copper products industry (S.I.C. 3420):**

Castings, brass plumbing  
Copper in rolls  
Ingots, brass and bronze  
Pipes, copper  
Plates, bronze  
Sheets, yellow brass  
Sink and lavatory faucets and fittings  
Strips, copper  
Strips, yellow brass  
Tubing, copper  
Wire rods, copper  
Valves, brass and bronze

**Jewellery and silverware industry (S.I.C. 3430):**

Cutlery and flatware:  
    Silver-plated  
    Sterling silver  
Gold alloys  
Hollow-ware, silver-plated  
Sheet, sterling silver  
Silver anodes, fine

**Non-ferrous metal smelting and refining industry (S.I.C. 3450):**

Aluminum ingots  
Copper, electrolytic  
Gold bullion  
Lead, electrolytic  
Nickel cathodes, electrolytic  
Platinum, refined  
Silver bullion  
Zinc, electrolytic

**White metal alloys industry (S.I.C. 3470):**

Alloys:  
    Brass and bronze ingots  
    Solders  
    Type and type metals

**White metal alloys industry (S.I.C. 3470) — Concluded:**

Die castings, zinc base alloys  
Lead:  
    Antimonial  
    Pig, made from scrap lead  
    Pipe, pure  
    Sheet, pure

**Batteries industry (S.I.C. 3510):**

Batteries:  
    Flashlight  
    Radio (non-portable)  
    Storage, automotive

**Machinery, heavy electrical, industry (S.I.C. 3520):**

Generators, a-c. 1,000 kva. and under:  
    Under 500 r.p.m.  
    500 r.p.m. and over  
Meters, watthour  
Motors, d-c:  
    5 Horsepower  
    250 Horsepower  
Motors, fractional a-c:  
    1/8 Horsepower  
    1/4 Horsepower  
    1/2 Horsepower  
Motors, integral a-c:  
    5 Horsepower  
    300 Horsepower  
    300 Horsepower, synchronous  
Starters:  
    A.-c. full voltage magnetic  
    Synchronous motor  
Switchboard, low voltage distribution  
Switches, enclosed, safety  
Switchgear:  
    Metal clad units  
    Outdoor disconnecting switches  
    Power circuit breakers  
Transformers:  
    Distribution  
    Power, large  
    Power, small

**Refrigerators, vacuum cleaners and appliances industry (S.I.C. 3570):**

Floor polishers  
Food mixers  
Freezers, home and farm  
Heating elements, for stoves and ranges  
Irons  
Refrigerators, household  
Stoves and ranges  
Toasters, automatic  
Vacuum cleaners  
Washing machines, conventional

**Miscellaneous electrical apparatus and supplies industry (S.I.C. 3590):**

Boxes, switch and outlet  
Conduit, rigid iron  
Fixtures:  
    Fluorescent lighting, commercial  
    Incandescent lighting, residential  
Lamps:  
    Fluorescent  
    Incandescent, miniature  
    Incandescent, standard  
Pole line hardware  
Telephone materials

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Continued**

**Wires and cables industry (S.I.C. 3592):**

Cables:  
Aluminum and A.C.S.R.  
Aluminum, flexible, armoured  
Asbestos insulated, all types  
Cambric insulated and braided, all types  
Copper, copperweld, transmission  
Non-metallic, sheathed  
Paper-insulated, leaded covered, telephone  
Paper-insulated, leaded power  
Paper-insulated, telephone  
Rubber-insulated and braided  
Rubber-insulated, leaded power  
Cords, flexible, excluding telephone and switchboard  
Wires:  
Copper, solid, bare  
Magnet, enamelled  
Rubber-insulated, telephone  
Thermo-plastic, excluding telephone  
Weatherproof, all types

**Abrasives, artificial, industry<sup>7</sup> (S.I.C. 3611):**

Abrasive wheels  
Aluminum oxide, fused, crude  
Silicon carbide, crude

**Clay products from imported clay industry (S.I.C. 3641):**

Insulators, electric, porcelain  
Lavatory combinations, vitreous china

**Gypsum products industry (S.I.C. 3662):**

Gypsum:  
Wallboard  
Lath  
Hardwall plasters

**Concrete products industry (S.I.C. 3680):**

Blocks:  
Cinder  
Gravel  
Bricks  
Concrete, ready-mix  
Pipe:  
Culvert  
Sewer

**Clay products from domestic clay industry<sup>8</sup> (S.I.C. 3692):**

Brick:  
Face, dry press  
Face, rough texture  
Face, solid smooth  
Face, stiff mud  
Pipe, sewer, vitrified clay  
Tile, structural, clay

**Coke and gas products industry (S.I.C. 3731):**

Coal tar, crude  
Coke:  
Foundry  
Metallurgical  
Stove

**Petroleum refining and products industry (S.I.C. 3751):**

Asphalt:  
Hot-mix paving cement  
Roofing, packaged  
Solid, industrial  
Diesel fuel

**Petroleum refining and products industry (S.I.C. 3751)—  
Concluded:**

Fuel oil:  
Bunker type  
Furance  
Light industrial  
Stove  
Gasoline:  
Grade No. 1  
Grade No. 2  
Lubricating oil:  
General purpose  
Industrial  
Motor oil

**Lubricating oils and greases industry (S.I.C. 3752):**

Lubricant, transmission and differential

**Acids, alkalies and salts industry (S.I.C. 3800):**

Acetic acid, glacial  
Acetic anhydride  
Acetylene, carbon black, compressed  
Aluminum fluoride  
Aluminum sulphate  
Ammonia, technical grade  
Calcium carbide, lump  
Calcium chloride, flake  
Caustic soda  
Chlorine, liquid  
Cryolite, artificial  
Dicyandiamide  
Ethylene glycol, base blend  
Soda ash, 58% light  
Sodium cyanide  
Sodium hydroxide  
Sodium silicate, liquid  
Sulphuric acid, 66°  
Zinc oxide

**Fertilizers industry (S.I.C. 3820):**

Ammonia, anhydrous  
Ammonium phosphate  
Ammonium nitrate  
Ammonium sulphate  
Fertilizer, mixed:  
2-12-10  
2-16-6  
5-10-10  
5-10-13  
Superphosphate

**Medicinal and pharmaceutical preparations industry (S.I.C. 3830):**

Anti-nauseants  
Biologicals and vaccines  
Hormones  
Infant food  
Patent medicines  
Penicillin  
Urinary preparations  
Vitamin preparations

**Paints, varnishes and lacquers industry (S.I.C. 3840):**

Enamels, ready-mixed  
Lacquers  
Lacquer thinners  
Paints, latex base  
Paints, ready-mixed

**General Description of Commodities for which Prices are Included in Industry  
Selling Price Indexes Arranged according to Industries — Concluded**

**Soaps, washing compounds and cleaning preparations industry (S.I.C. 3850):**

Bleach, liquid  
Cleaning and scouring powder  
Dental cream  
Detergents:  
    Solid synthetic organic  
    Solid synthetic organic combined with alkaline detergents  
Glycerine, dynamite grade  
Shampoo, liquid and cream  
Shaving cream  
Soap:  
    Chips and flakes  
    Plain bar, laundry  
    Powder  
    Toilet, in bars

**Vegetable oils industry (S.I.C. 3870):**

Linseed oil, raw  
Linseed oilcake meal  
Soya bean oil, raw  
Soya bean oilcake meal  
Soya bean meal, extracted

**Primary plastics industry (S.I.C. 3880):**

Synthetic resins:  
    Alkyd type  
    Phenol-formaldehyde type  
    Polystyrene type  
    Polyvinyl chloride type

**Inks, printing, industry\* (S.I.C. 3894):**

Ink printers:  
    Letterpress  
    Lithographing  
    News, black  
    News, coloured

**Polishes and dressings industry (S.I.C. 3895):**

Leather dressings:  
    Edge and heel blackings  
    Polish  
    Spray finish  
    Stains  
Wax:  
    Paste  
    Self-polishing

**Gases, compressed, industry (S.I.C. 3897):**

Acetylene, in cylinders  
Carbon dioxide, in cylinders  
Carbon dioxide, solid  
Oxygen, in cylinders

**Adhesives industry (S.I.C. 3898):**

Adhesives:  
    Case sealing  
    Envelope  
    Gummed tape  
Glue:  
    Bone and hide  
    Synthetic resin, liquid  
    Vegetable, liquid

**Typewriter supplies industry (S.I.C. 3941):**

Carbon paper

**Fountain pens and pencils industry (S.I.C. 3942):**

Pencils, black lead  
Pens, fountain

**Clocks, watches and watch cases industry (S.I.C. 3952):**

Clocks, spring alarm  
Wrist watches

**Buttons, buckles and fasteners industry (S.I.C. 3981):**

Slide fasteners

**Candles industry (S.I.C. 3982):**

Candles, beeswax  
Candles, votive lights

**Pipes, lighters and smokers' supplies industry (S.I.C. 3993):**

Cigarette lighters:  
    Automotive  
    Pocket  
    Table

See footnote, page

APPENDIX C

1. -- Reproduction of Form Used to Collect Monthly Price Quotations.<sup>1</sup>

DOMINION BUREAU OF STATISTICS  
OTTAWA - CANADA

CONFIDENTIAL

Attention: \_\_\_\_\_ In reply please quote  
Reference No.

Dear Sirs:

Thank you for your previous kind co-operation in supplying wholesale price information.

Will you please report comparable price quotations for the current month, on the reverse side of this letter. In this connection, please report prices that refer to orders taken on the 15th of each month. If no orders were taken on any particular 15th for an item listed, use the price that applied to orders taken on the nearest earlier date. If a commodity is discontinued, please suggest a comparable replacement, giving complete "Product Descriptions and Terms of Sale", and the corresponding price quotation.

Any comment on the causes of price change will be very helpful; you may use the space below for this purpose.

Your continued co-operation is appreciated.

Yours very truly,

K. D. Wallace, Chief,  
Wholesale Prices Section,  
PRICES DIVISION.

.....  
Space for specification revisions and comments

<sup>1</sup> This schedule was introduced in 1961 and incorporates some revisions to its fore-runner.

## WHOLESALE PRICE QUOTATIONS 1961

## PLEASE READ THE FOLLOWING INSTRUCTIONS BEFORE ENTERING PRICES

1. Please enter under the current month, price quotations for the products described below. If the description of the product is general enough to permit you to quote for it more than one price at the same time, or if further descriptive detail is required before it is technically possible to give a quotation for it, please write in the necessary words to clarify the description so that it points distinctly to only one price at one point of time.
2. Report actual transaction prices after subtracting discounts, both ordinary and special. Do not include taxes of any kind unless they are asked for below.
3. If you make any other concessions to buyers which your terms of sale do not reveal, please mention it on the reverse side of this form. By concessions please understand, premiums, cumulative quantity discounts, extra units free, and other forms of rebate or discount. PLEASE DO NOT QUOTE LIST PRICES.

PRODUCT DESCRIPTIONS AND TERMS OF SALE	Report prices for orders taken on the 15th of each month (not the price of orders received earlier and shipped out on the 15th)											
	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Have any changes been made since last month in the above Product Descriptions and Terms of Sale. If "Yes" please explain on reverse side.	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	Yes <input type="checkbox"/>	
	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	No <input type="checkbox"/>	

2. - Reproduction of Form Used to Collect Data Relating to New Products.

DOMINION BUREAU OF STATISTICS  
OTTAWA - CANADA

Attention:

Dear Sirs:

It has come to our attention that you have recently modified the specifications of one of the commodities on which you have been reporting prices to us. Thus the continuity of this series of prices has been broken and to restore it, we require some information to serve as a basis for estimating a price equivalent of the new item if it had been sold competitively with its predecessor.

Accordingly, we ask you to please report your DIRECT COST OF LABOUR AND MATERIALS for the two versions of the product under discussion. We prefer precise figures, but if you do not keep such records, carefully considered estimates will be satisfactory. A form for your use is contained on the reverse side of this letter.

We ask you to continue your kind co-operation by making your return within the next two weeks.

Yours very truly,

K. D. Wallace,  
Chief,  
Wholesale Prices Section,  
PRICES DIVISION.

MOST CONFIDENTIAL - Dominion Bureau of Statistics - Wholesale Prices Section

PRODUCTION COSTS DATA

Section A: (1) In the month of \_\_\_\_\_ you reported a price of \$ \_\_\_\_\_ for your product described as:

(2) In the month of \_\_\_\_\_ you reported a price of \$ \_\_\_\_\_ for your product described as:

Section B: What was the total direct labour and materials cost per unit for:

(1) The discontinued product, that is the one mentioned in Section A(1) above, in the month of \_\_\_\_\_ \$ \_\_\_\_\_

(2) The new product, that is the one mentioned in Section A(2) above, in the month of \_\_\_\_\_ \$ \_\_\_\_\_

Section C: What was the total direct labour and materials cost per unit for components:

(1) Which were contained in the discontinued product but which are NOT retained in the new product \$ \_\_\_\_\_

(2) Which are contained in the new product but which were NOT contained in the discontinued product \$ \_\_\_\_\_

Section D: What was the total direct labour and materials cost per unit for components common to both products (that is the parts of the discontinued product which were unchanged and retained in the new product):

(1) In the month of \_\_\_\_\_ \$ \_\_\_\_\_

(2) In the month of \_\_\_\_\_ \$ \_\_\_\_\_

Note: If no change in costs occurred for reasons other than those reported on in Section C the answers to D(1) and D(2) will be the same.

Section E: (1) Were there technological innovations involving the use of different machinery or processes in the new product which were not employed in the discontinued product?

Yes  No

(2) Did these innovations change the man-hours or skill of labour required to produce the components common to both products?

Yes  No

(3) If "Yes" to (2) above by what per cent would this factor alone have affected the costs entered in Section D(1).

%  
(specify plus (+)  
or minus (-))

Pine, jack and lodge-pole.....	47	64	77	
Pine, white.....	47	84	77	

Alphabetical Directory to Contents - Concluded

Commodity and industry	Price index (page)	Chart (page)	Base weight (page)	Description (page)
Pipes, lighters and smokers' supplies industry.....	38		73	81
Pipe fittings, malleable iron, all kinds.....	50		66	78
Plywood, Douglas fir.....	46		64	76
Plywood, yellow birch.....	46		64	76
Polishes and dressings industry.....	37	27	72	81
Pork, fresh or frozen.....	39		58	74
Primary plastics industry.....	37	27	72	81
Pulp mills industry.....	33	20	65	77
Pyjamas.....	45		63	76
Refrigerators, household.....	54		69	79
Refrigerators, vacuum cleaners and appliances industry.....	35	24	69	79
Roll roofing, felt, mineral surfaced.....	49		65	77
Roll roofing, smooth surfaced.....	49		65	77
Rolled iron and steel products industry.....	34	21	66	78
Rolls and buns, plain.....	41		59	74
Roofing paper industry.....	33	20	65	77
Rope, steel wire.....	51		67	78
Rubber goods, including footwear, industry.....	30	15	60	75
Salmon, canned, sockeye.....	40		58	74
Sash and doors.....	47		64	76
Sash, door and planing mills industry.....	33	19	64	76
Sausage, fresh.....	39		58	74
Sheets, aluminum.....	52		68	79
Sheets, cold-rolled, reducing mill production.....	51		66	78
Shingle mills industry.....	33	19	64	77
Shirts, cotton, fine.....	45		63	76
Shirts, cotton, work.....	45		63	76
Shorts and middlings.....	41		59	74
Silicon carbide, crude.....	55		70	80
Slaughtering and meat packing industry.....	28	12	58	74
Slips, rayon and rayon mixtures.....	45		63	76
Soaps, washing compounds and cleaning preparations industry.....	37	26	72	81
Socks, wool and wool mixtures, men's, seamless, fine.....	46		63	76
Socks, wool and wool mixtures, men's, seamless, work.....	46		63	76
Sodium hydroxide (caustic soda).....	56		71	80
Soil pipe and fittings, cast iron.....	50		66	78
Solders.....	52		68	79
Sole leather, shoulders.....	44		61	75
Soya bean oilcake.....	57		72	81
Steel ingots and castings industry.....	34	21	66	78
Stoves and ranges, cooking, gas.....	50		66	78
Stoves or ranges, cooking, domestic, over 35 amps.....	54		69	79
Sugar confectionery, in bulk.....	42		60	75
Sugar, granulated, cane and beet.....	42		60	75
Sugar, icing, cane and beet.....	42		60	75
Sugar refining industry.....	29	14	60	75
Sugar, yellow or brown, cane and beet.....	42		60	75
Sulphate, bleached, export market.....	48		65	77
Sulphite, bleached, paper grade, domestic market.....	48		65	77
Sulphite, unbleached, strong, export market.....	48		65	77
Swathers or windrowers.....	50		66	78
Synthetic resins, phenol-formaldehyde type.....	57		72	81
Synthetic textiles and silk industry.....	31	17	62	76
Tea, blended, packaged.....	42		60	75
Thinner, lacquer, paint and enamel.....	57		72	80
Tile, structural, hollow blocks.....	55		70	80
Tires, balloon, passenger cars, standard.....	43		60	75
Tissues, facial.....	49		65	77
Tobacco, cigars and cigarettes industry.....	30	15	60	75
Tobacco, smoking, fine cut.....	43		60	75
Tomato juice, canned.....	40		58	74
Transformers.....	53		69	79
Trucks, 5,000 lbs. or less, gross vehicle weight.....	51		67	78
Trucks, 5,001-10,000 lbs., gross vehicle weight.....	51		67	78
Twine, all sisal.....	45		62	76
Type and type metals.....	52		68	79
Typewriter supplies industry.....	38		73	81
Upper leather, cattle hides.....	44		61	75
Upper leather, chrome splits.....	44		61	75
Utensils, cooking.....	52		68	79
Vegetable oils industry.....	37	26	72	81
Veneer, yellow birch.....	46		64	76
Veneers and plywoods industry.....	33	19	64	76
Vitamin preparations.....	56		71	80
Washing machines, electric, domestic, conventional.....	54		69	79
Wax, liquid, self-polishing.....	57		72	81
Weiners and bologna.....	39		58	74
Wheat flour, Ontario Winter.....	41		59	74
Wheat flour, Spring, No. 2 patent.....	41		59	74
Wheat flour, Spring, No. 3 patent.....	41		59	74
White metal alloys industry.....	35	23	68	79
Wines industry.....	29	14	59	74
Wire and wire goods industry.....	34	22	67	78
Wires and cables industry.....	35	24	69	80
Wire cloth, Fourdrinier.....	51		67	78
Woollen cloth industry.....	31	17	61	75
Woollen yarn industry.....	31	17	62	75
Woven fabrics, continuous filament rayon.....	44		62	76
Woven fabrics, mixtures of continuous filament rayon and cotton.....	44		62	76
Woven wire, farm fence, steel.....	51		67	78
