WHOLESALE TRADE PROPER 1958 AND 1959

Wholesalers proper had sales of \$9,129,460,000 in 1959 compared with \$8,259,463,000 in 1958, an increase of 10.5%. Inventories held by wholesalers proper were valued at \$1,036,125,000 at the end of 1959 compared with \$933,561,000 at the end of 1958, an increase of 11.0%. Table 1 shows sales and inventories of wholesalers proper classified into 48 trades and one residual category for the years 1958 and 1959. Sales increased in 43 trades, increases ranging from 0.2% in the case of farm supplies to 92.0% for office furniture. Sales decreased in 5 trades, decreases ranging from 2.1% in the case of china, glass and housewares to 6.6% for Motion picture apparatus and supplies. The residual category (other kinds of business) increased 30.4%. The 1959 figures are estimates based on response to a sample survey of about five thousand wholesale establishments. Respondents accounting for about eight per cent of 1958 sales and nine per cent of 1959 sales did not report inventory data. The bracketed figures in Table 1 are the total sales of firms that reported both sales and inventory figures.

Table 2 shows the number of establishments and the sales of wholesalers proper for 1951 and 1958. For 1958, the number of firms, a breakdown of sales into three components, beginning and end-of-year inventory, receivables, employment and payroll are also given. All firms reporting receivables did not report information on the proportion of receivables considered collectible. Therefore, the pub-

lished data on collectibles should be considered an estimate. Wholesalers proper had sales of \$8,259,463,000 in 1958 compared with \$5,518,241,000 in 1951, an increase of 49.7%. Inventories owned at the end of 1958 were valued at \$933,561,000 compared with \$672,747,000 at the end of 1951, a rise of 38.8%. There were 134,939 employees on the payroll of wholesalers proper during the last pay period of September 1958 while in 1951 there was a minimum of 106,375 employees and a maximum of 131,353 reported for the year. Salaries and wages paid in 1958 amounted to \$504,324,000 compared with \$313,587,000 in 1951, an advance of 60.8%. The 1951 figures differ from those published in Volume VIII, Census of Canada, 1951, by an adjustment required in the Chemicals, Drugs, and Allied Products group of trades.

The 1951 and 1958 figures are not strictly comparable for the following reasons:

(1) About 1,300 wholesalers proper having no paid employees in 1958 were not included in the survey. Using the results of the 1951 census survey which was based on a door-to-door enumeration of businesses it is estimated that less than 1% of wholesale trade is done by establishments without paid employees. The percentage varies from trade to trade. In only eight instances does it exceed 3%. There follows a table showing by trades the amount of business accounted for in 1951 by small establishments without paid employees. The 1958 data have not been adjusted for this factor.

¹ Less than 0.1 per cent.

(2) Firms making up about 8% of sales in 1958 reported sales data only. Therefore, published data on inventory, receivables, number of employees and payroll are not comparable with the 1951 figures for this additional reason. Sales data relating to other data are shown in brackets above the total sales figure, trade by trade, in Table 2. The unbracketed figure is the total sales volume of the trade and includes the business of respondents who did not submit the other information.

(3) Grain firms with sales of \$772,200,000 and petroleum distributors with sales of \$169,000,000 (1958 figures) were not within the scope of the 1951 survey.

Wholesalers proper are merchants who, for the most part, take ownership of merchandise, perform at least some of the wholesale functions and sell goods primarily to buyers other than householders or individuals for personal use. Not included are

merchandise agents and brokers, and sales outlets of Canadian manufacturing plants (except separately incorporated subsidiary outlets), the bulk plants of petroleum refiners, and businesses that primarily buy directly from the primary producer, i.e., farm, mine, logger and fishermen.

The basic mailing list for this survey was the employers index of the Unemployment Insurance Commission where business establishments are classified according to the Standard Industrial Classification. This is the first time U.I.C. records have been put to this use and, to some extent, the project was experimental. It will not be known whether this means of securing a mailing list is entirely satisfactory until after the 1961 census of merchandising when the next door to door enumeration occurs. Establishments without insured employees are not recorded in the U.I.C. index but, as indicated, these account for a minor part of wholesale trade.

In 1951 there were 10,486 establishments in the wholesalers proper classification. These included 1,206 establishments having no paid employees. The 1958 survey, excluding any estimate for establishments without employees, revealed that there were 10,316 establishments. This would indicate an increase of about 1,000 establishments during the seven-year period.

The reader may wish to refer to Table 3, Volume VIII, Census of Canada, 1951, (Queen's Printer, Ottawa, 1954) for more information about the 1951 survey. In this case it should be noted that the trade "other automotive equipment" is now included with "industrial and transportation machinery, equipment and supplies" and "frozen or frosted foods", "produce", and "other food products" are now part of "groceries and food specialties". The 1951 figure for "drugs and drug sundries, general line" has been revised upwards by \$25.5 million.

Explanatory notes regarding some of the trades:

Tires and Tubes.—A number of establishments classified to this trade in 1951 are now classified to "automotive parts and accessories".

Chemicals and Allied products (residual category).—Some establishments are now classified to the machinery, equipment and supplies group.

Coal and Coke.—A decrease in this trade would be expected.

Radio, Television and Electronic Parts and Accessories.—This trade identified for the first time in 1958.

Farm Products (residual category).—In spite of an increase in the number of establishments, the

channel for merchandising a considerable volume of products other than grain and livestock appears to have changed.

Farm Supplies.—A number of establishments with an undetermined sales volume are now classified as retailers.

Tobacco and Confectionery.—This classification is eliminated and establishments are included with the trades "confectionery and soft drinks" and "cigars, cigarettes and tobacco" depending on which line predominated. The greater number are now included in the latter.

Forest Products (except lumber).—The decrease in number of establishments and business volume indicates a change in the marketing channel for forest products.

Office Furniture.—A number of establishments are now classified to the commercial, institutional and service equipment and supplies trade.

General Merchandise.—A few large establishments and a considerable number of small ones have withdrawn from this business.

Waste Materials.—In spite of an increase in the number of business establishments the volume of this trade did not increase.

Books, Periodicals and Newspapers.—The decrease in the number of establishments and business volume indicates a change in the marketing channel for this merchandise.

Table 3 shows the business of wholesalers proper distributed by kind of business and size of firm.

Table 4 shows the business of wholesalers proper distributed by kind of business and size of firm but in this table size is indicated by the number of establishments owned in the same or related kind of business.

Table 5 shows the number of employees, male and female, receiving pay during the last pay periods of the months of 1958 in a sample of wholesale establishments, by kind of business, for Canada and the economic areas.

Table 6 shows the forms of ownership that exist in the wholesale proper sector. Only firms that submitted all data are included in the analysis.

Table 7 shows data on trade-in allowances given by wholesalers proper.

Table 8 shows data on revenue of wholesalers proper from rentals, repairs and services.
