INTRODUCTION

This report presents final results of the 1966 Census on the urban-rural and farm-non-farm distribution of the population of Canada. Table 13 shows the 1966 urban, rural non-farm and rural farm population of each county or census division by sex together with comparative figures from the 1961 Census. Table 14 further classifies the 1966 urban component of each county or census division by size group. Additional classifications of the urban, rural non-farm and rural farm segments of the population by such characteristics as age groups, sex and marital status will be included in subsequent reports (see Reports 1-10, 1-12 and 1-13).

The classification "urban" includes the population living in cities, towns and villages of 1,000 and over, whether incorporated or not. It includes also the urbanized fringes of these centres in all cases where the population of the city or town together with its urbanized fringe amounts to 10,000 or more. The remainder of the population living outside of the urban centres and suburban fringes was classed as "rural". It should be noted that in the "urban size group" classification, a central city and each municipality in its urbanized fringe are allocated to the size group of the total agglomeration.

A "farm" for census purposes is defined as an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus, the population living on "farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their holdings (e.g., in a neighbouring town or village).

Le présent rapport donne les résultats définitifs du recensement de 1966 quant à la répartition urbaine et rurale, agricole et non agricole de la population du Canada. Le tableau 13 donne la population urbaine, rurale non agricole et rurale agricole de chaque comté ou division de recensement par sexe en 1966 ainsi que les chiffres comparatifs du recensement de 1961. Le tableau 14 répartit, en plus, la population urbaine de chaque comté ou division de recensement en 1966 par tranche de taille. Des classements additionnels de la population urbaine, rurale non agricole et rurale agricole, par des caractéristiques telles que groupes d'âge, sexe et état matrimonial, seront inclus dans les rapports subséquents (voir rapports 1-10, 1-12 et 1-13).

La catégorie "urbaine" comprend la population demeurant dans les cités, villes et villages de 1,000 habitants et plus qu'ils soient constitués ou non. Elle comprend aussi les banlieues urbanisées de ces centres, dans tous les cas où la population de la cité ou de la ville compte, avec la banlieue urbanisée, 10,000 habitants ou plus. Le reste de la population demeurant en dehors de ces centres urbains et des banlieues suburbaines constitue la catégorie "rurale". Il faut remarquer que dans la catégorie "urbaine par tranche de taille" la cité centrale et chaque municipalité de sa banlieue urbanisée sont attribuées à la tranche de taille correspondant au total de l'agglomération.

Une "ferme" aux fins du recensement est une exploitation agricole d'une acre ou plus dont les ventes de produits agricoles ont atteint \$50 ou plus durant l'année précédente. Toutes les personnes demeurant dans ces exploitations dans les secteurs ruraux sont classées dans la population "rurale agricole" quelle que soit leur occupation. Ainsi, la population demeurant dans les "fermes" comprendrait des personnes non associées à des opérations agricoles et qui tirent leur revenu d'une occupation non agricole. Par contre, les exploitants de ferme et leur famille qui ne demeurent pas dans leur exploitation (e.g., dans une ville ou un village voisin) sont exclus.
