

1971 CENSUS OF CANADA

RECENSEMENT DU CANADA 1971

# Population

INTERNAL MIGRATION

# Population

MIGRATIONS INTERNES

## INTRODUCTION

In the 1971 Census, a person's "migration status" was determined by the response to a question relating to place of residence five years earlier, that is, on June 1, 1966. If residing in the same municipality five years prior to the 1971 Census, the person was classified as a "non-migrant" even though he or she may have changed dwellings within the municipality or have moved out of the municipality and returned to it within the five-year period. If the place of residence five years ago was outside the municipality of present residence, the person was classified as a "migrant".

Non-migrants were further classified according to whether or not they were living in the same dwelling five years ago, while migrants were classified according to the geographic location of their place of residence in 1966 (i.e., same or different province, outside Canada, etc.).

The data in this report relate to the migration status of persons 5 years and over. Although the question was not asked of persons under 15 years, the migration status of persons 5-14 years was assumed to be the same as that of the family head (or the household head for a non-family person).

Canadian residents stationed abroad in the Armed Forces or the diplomatic service are excluded from all census tables dealing with internal migration. This will explain the fact that, for Canada as a whole, the total number of migrants and non-migrants is about 36,000 fewer than the total population 5 years and over.

For census purposes, age is defined as the number of completed years of age at last birthday prior to June 1, 1971. Respondents were asked to report their month and year of birth which was converted by mechanical means to age at last birthday.

Geographic terms used in this report are defined for census purposes as follows:

**Urban:** Includes the population living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile.

**Rural:** Includes all the remaining population.

**Rural farm population:** Includes the population living in dwellings situated on farms in rural areas. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus, the population living on "census-farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their farm holdings (e.g., in a neighbouring town or village).

**Census Metropolitan Area:** The main labour market of a continuous built-up area having 100,000 population or more.

The facing page shows in chart form the classification of Canada's population 5 years and over by migration status, showing the number and percentage of migrants and non-migrants, as well as the different categories of each. The tables which follow provide data relating to the following aspects of internal migration:

- (1) historical comparison for the periods 1956-61 and 1966-71;
- (2) migration status by age groups and sex;
- (3) interprovincial migration flows;
- (4) movement of population between different types of areas;
- (5) measurement of migration for census divisions and census metropolitan areas.

Later reports in the 1971 Census series will provide statistics dealing with the demographic and economic characteristics of all migrants, as well as migrants who were members of the labour force in 1971.

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707).

Au recensement de 1971, le "statut migratoire" était déterminé par la réponse à une question portant sur le lieu de résidence cinq ans plus tôt, soit le 1<sup>er</sup> juin 1966. Les "non-migrants" sont les personnes qui demeuraient dans la même municipalité cinq ans avant le recensement de 1971, même si, entre-temps, elles ont changé de logement dans la municipalité ou sont parties puis revenues dans la municipalité. Les "migrants" sont les personnes dont le lieu de résidence cinq ans avant le recensement était en dehors de leur municipalité de résidence le jour du recensement.

Les non-migrants sont classés en personnes qui demeuraient ou qui ne demeuraient pas dans le même logement il y a cinq ans; les migrants sont classés d'après la situation géographique de leur lieu de résidence en 1966 (même province, province différente, en dehors du Canada, etc.).

Les données présentées ici concernent le statut migratoire des personnes de 5 ans et plus. La question ne s'adressait pas aux personnes de moins de 15 ans; c'est pourquoi, il a fallu imputer aux personnes de 5-14 ans le statut migratoire du chef de famille (ou du chef de ménage dans le cas d'une personne hors famille).

Les résidents du Canada membres des Forces armées ou du corps diplomatique en poste à l'étranger ne sont pas pris en compte dans les tableaux du recensement portant sur les migrations internes, ce qui explique que, pour l'ensemble du Canada, le nombre total de migrants et de non-migrants soit d'environ 36,000 inférieur à la population totale de 5 ans et plus.

L'âge est défini comme étant le nombre d'années révolues au dernier anniversaire avant le 1<sup>er</sup> juin 1971. Les recensés devaient indiquer le mois et l'année de leur naissance; ces renseignements permettaient d'établir l'âge au dernier anniversaire par des moyens mécanographiques.

Voici la définition, aux fins du recensement, des termes géographiques utilisés ici:

**Régions urbaines:** Comprend la population vivant dans: 1) les cités, villes et villages constitués de 1,000 habitants et plus; 2) les localités non constituées de 1,000 habitants et plus et ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) les banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré.

**Régions rurales:** Comprend tout le reste de la population.

**Population rurale agricole:** Comprend la population vivant dans des logements situés dans des fermes dans des régions rurales. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour \$50 ou plus de produits agricoles au cours de l'année précédente. Toutes les personnes vivant dans une de ces exploitations situées dans une région rurale sont classées sous la rubrique "régions rurales agricoles", quelle que soit leur profession. La population des "fermes de recensement" comprend donc certaines personnes qui n'ont rien à voir avec l'exploitation agricole et qui tirent leur revenu de l'exercice d'activités non agricoles. En contrepartie, les exploitants agricoles et leur famille qui n'habitent pas leur exploitation (par ex., ceux qui habitent une localité voisine) ne sont pas pris en compte.

**Région métropolitaine de recensement:** Le principal marché du travail d'une zone bâtie en continu comptant 100,000 habitants et plus.

Dans le graphique ci-contre, on a classé la population de 5 ans et plus au Canada selon le statut migratoire ainsi que le nombre et le pourcentage de migrants et de non-migrants, par catégorie. Les autres tableaux portent sur les aspects suivants des migrations internes:

- 1) une comparaison chronologique pour les périodes 1956-1961 et 1966-1971;
- 2) le statut migratoire selon le groupe d'âge et le sexe;
- 3) les mouvements migratoires interprovinciaux;
- 4) le mouvement de la population entre les diverses catégories d'habitat;
- 5) une mesure des migrations dans les divisions de recensement et les régions métropolitaines de recensement.

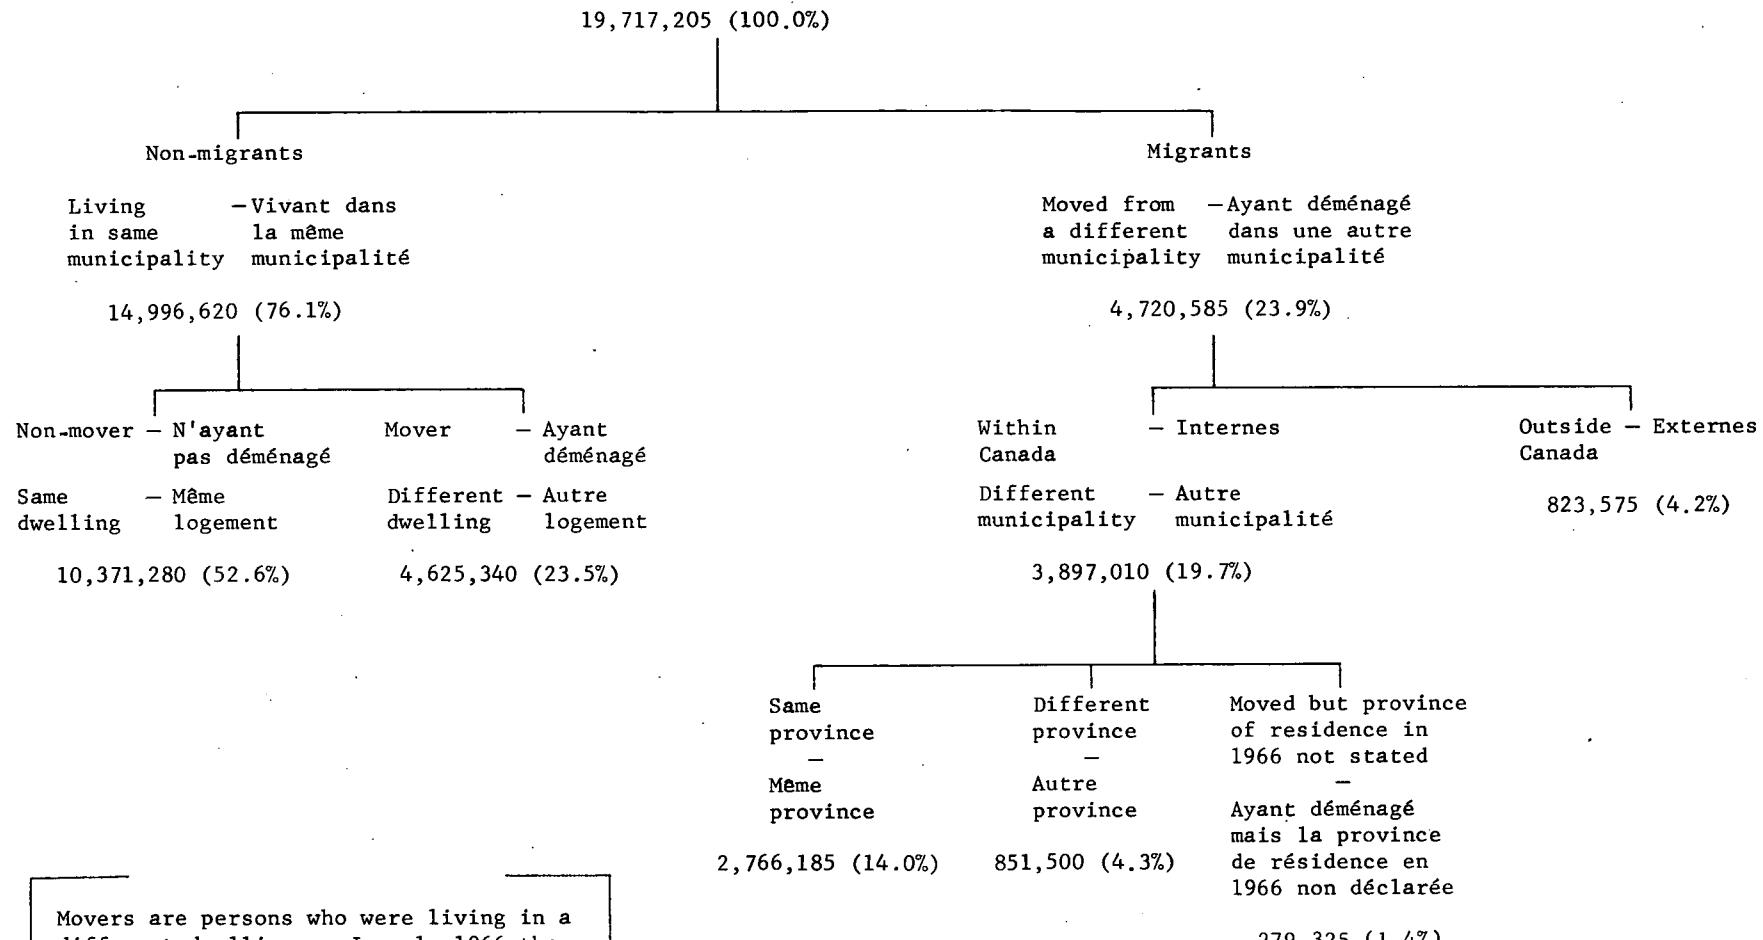

Les bulletins ultérieurs de la série du recensement porteront sur les caractéristiques démographiques et économiques de tous les migrants et sur les migrants qui faisaient partie de la population active en 1971.

Les renseignements de la présente publication ont été recueillis par un échantillonnage de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 %. Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir les publications nos 92-704 à 92-707 au catalogue).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Similarly percentages, which are calculated on rounded figures, do not necessarily add to the total. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 92-713). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total. Aussi, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas disponibles au moment de la publication. Elles seront disponibles dans le rapport introductoire de ce volume (n° 92-713 au catalogue). Les utilisateurs demandant ce renseignement avant la publication du rapport introductoire devraient s'adresser au Service-utilisateurs, Recensement.

## Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

### Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

### How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

### Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

### Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

### Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.

## Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-relieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

### Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

### Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

### Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaires". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Service-utilisateurs, Secteur du recensement, Statistique Canada, Ottawa K1A 0T7.

### Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. Il faut envoyer les demandes au Service-utilisateurs des données du recensement en précisant bien les classements ou recoupements et les régions géographiques. Il faut inclure les catégories exactes pour chaque caractéristique et une ébauche de la disposition des tableaux.

### Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs du Secteur du recensement de Statistique Canada.
