INTRODUCTION

Tables of this report show religious denominations cross-classified by five-year age groups and sex, for the urban, rural non-farm and rural farm population of Canada in the 1971 Census. Similar tables with less detailed classifications of religious denominations by specified age groups and sex are also given for the provinces and metropolitan areas. Basic distributions of the population by each of these characteristics have been presented in earlier reports of the 1971 Census volume series.

In answer to the question "What is your religion?" in the 1971 Census, respondents were asked to report a specific denomination, if possible (rather than terms such as Protestant, Christian, Believer, etc.), even if they did not actually attend a place of worship. Thus, census figures do not measure church membership or indicate the degree of affiliation with a particular religious body, but rather indicate the one to which each person stated he or she belonged, adhered to, or favoured. Provision was made on the questionnaire for marking "No religion" if the respondent so desired.

Age classifications are based on the number of completed years of age at last birthday prior to June 1, 1971. Respondents were asked to report their month and year of birth which was converted by mechanical means to age at last birthday.

Definitions of geographic terms (e.g., urban, rural, farm population) can be supplied on request. They also appear in most reports of earlier issues of the Volume I series.

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100 p.c. basis. The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707).

Les tableaux publiés ici contiennent des données sur les confessions religieuses par groupe d'âge quinquennal et par sexe, pour les régions urbaines et les régions rurales non agricoles et rurales agricoles du Canada, au recensement de 1971. Des tableaux semblables, mais contenant des classements moins détaillés des confessions religieuses selon certains groupes d'âge et par sexe, sont également donnés pour les provinces et les régions métropolitaines. Les répartitions de base de la population selon chacune de ces caractéristiques ont été publiées dans des bulletins antérieurs de la série des volumes du recensement de 1971.

En réponse à la question "Quelle est votre religion?", le recensé devait, dans la mesure du possible, indiquer une confession religieuse précise (plutôt que protestant, chrétien, croyant, etc.), même s'il était non-pratiquant. Ainsi, les chiffres du recensement ne constituent pas une mesure du nombre de membres des Églises ni n'indiquent le degré d'adhésion aux divers organismes cultuels; ils indiquent plutôt à quelles religions les recensés appartiennent, adhèrent ou accordent leur préférence. Chacun avait la faculté d'indiquer "aucune" religion, s'il le désirait.

Les classements par âge sont fondés sur le nombre d'années révolues au dernier anniversaire de naissance avant le 1^{er} juin 1971. Les recensés devaient indiquer le mois et l'année de leur naissance; une simple opération mécanique a ensuite permis de fixer l'âge au dernier anniversaire.

Les définitions des termes géographiques (par ex., régions urbaines, régions rurales, population agricole) peuvent être obtenues sur demande. Elles figurent également dans la plupart des bulletins déjà publiés du volume I.

Les renseignements de la présente publication ont été recueillis par un échantillonnage de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 p. 100. Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir les publications nos 92-704 à 92-707 au catalogue).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Similarly percentages, which are calculated on rounded figures, do not necessarily add to the total. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 92-729). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total. Aussi, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas disponibles au moment de la publication. Elles seront disponibles dans le rapport introductoire de ce volume (n° 92-729 au catalogue). Les utilisateurs demandant ce renseignement avant la publication du rapport introductoire devraient s'adresser au Service-utilisateurs, Recensement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.
