

Advance bulletin 1971 CENSUS OF CANADA

Bulletin préliminaire RECENSEMENT DU CANADA 1971

POPULATION BY SCHOOL ATTENDANCE AND LEVEL OF SCHOOLING

Final population counts of the 1971 Census are presented in this report, distributed according to school attendance and selected classifications of schooling level in Canada. Figures are also shown for provinces, census divisions, incorporated cities, towns and villages of 10,000 and over, and census metropolitan areas.

More detailed classifications of schooling by sex, age groups, etc., will be issued at later dates as part of the regular volume series of final reports of the 1971 Census. The purpose of this advance report is to make available summary totals at an earlier date.

In this report persons 5 years and over are classified according to whether or not they had reported full-time attendance at school at any time since September 1970. "School" was defined to include attendance at an elementary or secondary school, university, technical institute, teachers' college, nursing school, business school, etc. Level of schooling refers to the highest grade or year attended by the person.

The information in this report was collected on a sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100 p.c. basis. The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707).

All figures in this report have been subjected to the confidentiality procedure introduced in the 1971 Census to prevent the possibility of associating small figures with any identifiable individual. Briefly, it involves the random rounding of all last or unit digits. Since totals are independently rounded, they do not necessarily equal the sum of rounded figures in distributions. Also there may be slight differences between comparable figures in this report and those in other census bulletins. This technique will be described in the reports of the 1971 Census volume series.

Each bulletin of the 1971 Census volume series will include measures of reliability in the form of estimates of the mean square error for sets of characteristics covered in that bulletin. The user interested in obtaining an indication of the reliability of these advance data should refer to the appropriate bulletin in the volume series.

POPULATION SELON LA FRÉQUENTATION SCOLAIRE ET LE NIVEAU DE SCOLARITÉ

Ce bulletin présente les chiffres définitifs de population, au recensement de 1971, selon la fréquentation scolaire et certaines catégories de niveau de scolarité au Canada. Les chiffres sont également répartis par province, division de recensement, par cité, ville et village constitués de 10,000 habitants et plus et par région métropolitaine de recensement.

Des classements détaillés de la scolarité selon le sexe, le groupe d'âge, etc., paraîtront ultérieurement dans le cadre de la série des volumes du recensement de 1971. L'objet de ce bulletin préliminaire est de communiquer les résultats sommaires le plus tôt possible.

Ce bulletin porte sur les personnes de 5 ans et plus qui ont déclaré avoir fréquenté l'école ou non, à plein temps ou à un moment donné depuis septembre 1970. Suivant la définition, la "fréquentation scolaire" s'entend de la fréquentation d'une école primaire ou secondaire, d'une université, d'un institut technique, d'une école normale, d'une école de sciences infirmières, d'un collège commercial, etc. Le niveau de scolarité correspond à la dernière année atteinte.

Les renseignements de la présente publication ont été recueillis par échantillonnage. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 p. 100. Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir publications nos 92-704 à 92-707 au catalogue).

La confidentialité de toutes les données présentées ici est assurée par la méthode utilisée au recensement de 1971 pour interdire la possibilité d'associer des chiffres de faible importance à une personne en particulier. En un mot, cette méthode consiste à arrondir au hasard tous les derniers chiffres, c'est-à-dire les chiffres représentant les unités. Ainsi, tous les chiffres ayant été arrondis individuellement, leur somme ne donne pas nécessairement les totaux indiqués. Il peut également y avoir de légères différences entre des chiffres comparables de ce bulletin et ceux d'autres bulletins du recensement. Une description de cette technique figurera dans les bulletins de la série des volumes du recensement de 1971.

Chaque bulletin de la série des volumes du recensement de 1971 renfermera des mesures de fiabilité sous forme d'estimations de l'erreur quadratique moyenne relativement aux groupes de caractéristiques observées. L'utilisateur désireux de connaître le degré de fiabilité de ces données préliminaires devra consulter le bulletin approprié de la série des volumes.

TABLE 1. Population 5 Years and Over, by School Attendance, Level of Schooling and Sex, for Canada, 1971

Note: There is evidence of bias in respondent reporting of school attendance. As a result the 1971 Census data shown in the tables of this report overstate those "not attending school" at the expense of the population "attending school". It is not possible at this time to measure the extent of this error. — Nota: Certains indices portent à croire qu'il y a eu un biais de réponse en ce qui concerne la fréquentation scolaire. Il s'ensuit que les résultats du recensement de 1971 présentés dans les tableaux de ce bulletin surestiment le nombre de ceux "ne fréquentant pas l'école" aux dépens de la population "fréquentant l'école". Il n'est pas possible de déterminer en ce moment l'importance de cette erreur.

(AP-13)

1971 Census of Canada

Recensement du Canada de 1971

ERRATA

The figures shown under "Attending full-time" in this bulletin include persons attending educational institutions other than elementary, secondary schools, and universities, e.g. trade or business schools, technical institutes, teachers' colleges, schools of nursing, etc. Also the "level of schooling" data shown (for both those "attending" and "not attending") underestimate educational attainment since it does not include training received at such institutions. Details regarding this additional training will be provided in reports in the volume series, e.g. Cat. No. 92-720 - School Attendance and Schooling (1.2-8).

Les chiffres figurant sous la rubrique "Fréquentant l'école à plein temps" dans ce bulletin comprennent les personnes qui fréquentent un établissement d'enseignement autre qu'une école primaire, une école secondaire ou une université, par ex., une école de métiers ou un collège commercial, un institut technique, une école normale, une école de sciences infirmières, etc. De plus, les données relatives au "niveau de scolarité" (tant pour ce qui est des personnes "fréquentant l'école" que des personnes "ne fréquentant pas l'école") représentent mal le niveau d'instruction puisqu'elles ne tiennent pas compte de la formation reçue dans ce genre d'établissements. On trouvera les détails relatifs à cette autre formation dans la publication n° 92-720 de la série des volumes "Fréquentation scolaire et scolarité" (1.2-8).
