Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialling area of any of the regional reference centres:

Newfoundland & Labrador	Zenith 07037
Nova Scotia, New Brunswick & Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
British Columbia (South & Central)	112-800-663-1551
Yukon & Northern B.C. (area served by NorthwesTel Inc.)	Zenith 08913
Northwest Territories	Zenith 22015

How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres de référence régionaux:

Terre-Neuve et Labrador	Zénith 07037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (région sud et centrale)	112-800-663-1551
Yukon et le nord de la Colombie-Britannique (région desservie par NorthwesTel Inc.)	Zénith 08913
Territoires du Nord-Ouest	Zénith 22015

Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

INTRODUCTION

This report is concerned with the age/sex/marital status composition of Canada's population, 1981, and as such provides fundamental demographic data. The report consists of seven tables which show various cross-classifications for Canada and the provinces. Some tables incorporate additional historical data (e.g., Tables 1 and 3), some provide additional urban/rural breakdowns (e.g., Tables 5 to 7) while others furnish detailed classes for age (Table 2) or marital status (Tables 3 and 7). Two of the seven tables refer to the cross-classification of age, sex and marital status (Tables 4 and 5) while each of the other five tables is concerned with only two of these three variables.

Tables on age/sex/marital status for other geographic areas (e.g., CDs) may be found in Volume 2 - Provincial Series of the 1981 Census, Catalogue Nos. 93-913 to 93-924.

DEFINITIONS

Age. Refers to age at last birthday (as of the census reference date, June 3, 1981). This variable is derived from date of birth.

Date of Birth. Refers to the day, month and year of birth, collected for the purpose of determining the person's age as of the census reference date. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

Marital Status. Refers to the following conjugal status of a person:

Now married (excluding separated) -

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married";

Separated -

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce;

Divorced -

Persons who have obtained a legal divorce and who have not remarried;

INTRODUCTION

Ce bulletin fait état de la composition de la population canadienne de 1981 selon l'âge, le sexe et l'état matrimonial et, à ce titre, présente des données démographiques de base. Il comporte sept tableaux comprenant divers classements recoupés pour le Canada et les provinces. Certains renferment des données chronologiques complémentaires (les tableaux 1 et 3 par exemple), d'autres donnent des ventilations supplémentaires par régions urbaines et rurales (voir les tableaux 5 à 7) alors que d'autres illustrent des catégories détaillées d'âge (tableau 2) ou d'état matrimonial (tableaux 3 et 7). Deux de ces sept tableaux font l'objet de classements recoupés par âge, sexe et état matrimonial (tableaux 4 et 5) tandis que les cinq autres visent que deux de ces trois variables.

Le volume 2 de la série provinciale du recensement de 1981 (n°s 93-913 à 93-924 au catalogue) renferme des tableaux sur l'âge, le sexe et l'état matrimonial de la population pour d'autres régions géographiques (les DR par exemple).

DÉFINITIONS

Âge. Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1981). Cette variable est établie d'après la réponse à la question sur la date de naissance.

Date de naissance. Jour, mois et année de naissance aux fins d'établissement de l'âge du recensé au jour du recensement. Les personnes qui ne connaissaient pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

État matrimonial. Situation conjugale d'une personne, notamment:

Actuellement marié(e) (sauf séparé(e)):

personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé; les personnes vivant en union consensuelle sont considérées comme actuellement mariées.

Séparé(e):

personne qui a été abandonnée, ou qui est séparée de son conjoint, légalement ou non, parce qu'elle ne veut plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

Divorcé(e):

personne qui a obtenu un divorce et qui ne s'est pas remariée.

DEFINITIONS - Concluded**Widowed -**

Persons who have lost their spouse through death and who have not remarried;

Never married (single) -

Persons who never married (including all persons less than 15 years) and persons whose marriage was annulled.

Sex. Refers to the gender of the respondent.

Urban Population. Refers to persons living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre.

Urban Population Size Group. Refers to the classification used in tabulations where the urban areas are distributed according to the following size groups:

1,000-	2,499
2,500-	4,999
5,000-	9,999
10,000-	29,999
30,000-	99,999
100,000-499,999	
500,000 and over	

Urban areas are defined using population data from the previous census. It can therefore occur that an area meeting the criteria and defined as urban according to the population data of the 1976 Census will contain fewer than 1,000 people according to the 1981 Census. Where this occurs the population is assigned to the urban population size group 1,000 to 2,499.

Rural Population. Refers to persons living outside "Urban Areas".

Rural Non-farm Population. Refers to all persons living in rural areas and who are not members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural non-farm population was defined as all persons living in rural areas in dwellings other than those situated on census farms.

Rural Farm Population. Refers to all persons living in rural areas who are members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural farm population was defined as all persons living in rural areas in dwellings situated on census farms.

DÉFINITIONS - fin**Veuf(ve):**

personne dont le conjoint est décédé et qui ne s'est pas remariée.

Célibataire (jamais marié(e)):

personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé.

Sexe. Qualité d'homme ou de femme.

Population urbaine. Personnes demeurant dans une région qui a une concentration démographique de 1,000 habitants et plus, et une densité de population de 400 habitants ou plus au kilomètre carré.

Groupe de taille de la population urbaine. Classement utilisé dans les tableaux où la répartition des régions urbaines est indiquée selon les groupes de taille suivants:

1,000-	2,499
2,500-	4,999
5,000-	9,999
10,000-	29,999
30,000-	99,999
100,000-499,999	
500,000 et plus	

Les régions urbaines sont définies à partir des données démographiques du recensement précédent. Il peut arriver qu'un territoire répondant aux critères et défini comme urbain selon les données démographiques du recensement de 1976 contienne moins de 1,000 personnes selon les résultats du recensement de 1981. Dans ce cas la population de ce territoire fera partie du groupe de taille de la population urbaine 1,000 à 2,499.

Population rurale. Toutes les personnes vivant à l'extérieur des régions urbaines.

Population rurale non agricole. Toutes les personnes qui vivaient dans une région rurale mais n'étaient pas membres de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale non agricole comprenait toutes les personnes vivant dans une région rurale et habitant un logement situé ailleurs que dans une ferme de recensement.

Population rurale agricole. Toutes les personnes demeurant dans des régions rurales, qui font partie de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale agricole comprenait toutes les personnes vivant dans des logements situés dans des fermes de recensement dans des régions rurales.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

SAMPLING

The 1981 Census data were collected either on a 100% basis (i.e. from all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 100% basis. All table headings are noted accordingly.

DATA QUALITY

Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of these random errors increases as the population or cell size decreases. Thus, small data values, even though collected on a 100% basis, should be used with some caution.

Other of the errors will tend not to cancel out as errors will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

ÉCHANTILLONNAGE

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis selon la première méthode. Tous les titres des tableaux ont été annotés en conséquence.

QUALITÉ DES DONNÉES

Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus, même si ces données ont été recueillies auprès de l'ensemble de la population.

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un biais.

The data contained in this bulletin are subject to coverage errors, response errors and to processing errors.

Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population for persons and 2% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1971 Census.

A comparable study was undertaken for the 1981 Census but the results were not available at the time this report was published.

Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

A comprehensive assessment of the quality of the census data collected on a 100% basis will be included in Data Quality - Total Population (Catalogue No. 99-904).

SPECIAL NOTES

It is quite probable that the counts shown for "rural farm population" are below the 1976 counterparts due to the more exclusive nature of the 1981 definition - see "Rural Farm Population" in the definition section.

Des erreurs d'observation, des erreurs de réponse et des erreurs de traitement ont pu influer sur la qualité des données fournies dans le présent bulletin.

Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le compte plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

On a entrepris une étude spéciale sur le recensement de 1976 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population dans le cas des particuliers et de 2 % pour les ménages. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1971.

Une étude similaire a été entreprise pour le recensement de 1981, mais les résultats n'étaient pas accessibles au moment de la parution du présent bulletin.

Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrives en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

Une évaluation détaillée de la qualité des données du recensement recueillies sur une base intégrale sera présentée dans la publication Qualité des données - Population totale (n° 99-904 au catalogue).

NOTES SPÉCIALES

Il est fort probable que les chiffres de la "population rurale agricole" soient inférieurs à ceux de 1976 en raison de la nature plus restrictive de la définition de 1981 - voir "Population rurale agricole" dans la partie des définitions.

REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include lists and indexes of tables appearing in the data publications, as well as reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

A wide range of other analytical and reference products are available and described, along with information on data products and available services, in Products and Services of the 1981 Census of Canada.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (n° 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (n° 99-902 au catalogue) et le Guide sommaire - Population-échantillon (n° 99-903 au catalogue), présentent un intérêt général puisqu'ils donnent la liste et l'index de tous les tableaux des publications ainsi qu'une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (n° 99-904 au catalogue) et Qualité des données - Population-échantillon (n° 99-905 au catalogue).

La publication Produits et services du recensement du Canada de 1981 décrit une foule d'autres analyses et de produits de référence, et fournit des renseignements sur les produits et services disponibles.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.

TABLE 1. POPULATION BY FIVE-YEAR AGE GROUPS AND SEX, FOR CANADA AND PROVINCES, 1976 AND 1981
