# INTRODUCTION

Households are classified in this report according to number of persons per household, showing such characteristics of the household head as marital status, schooling, immigrant status, occupation and earnings.

Figures are shown for the following areas:

- (i) provinces (Tables 35, 37, 39, 41)
- (ii) census metropolitan areas (Tables 36, 38, 40, 42).

Hotels, large lodging houses, institutions, camps and other such collective-type households are excluded from this report.

## Definitions

### Household

For census purposes, a household consists of a person or group of persons occupying one dwelling. It usually consists of a family group, with or without lodgers, employees, etc. However, it may consist of a group of unrelated persons, of two or more families sharing a dwelling, or of one person living alone. Every person is a member of some household, and the number of households equals the number of occupied dwellings.

### Dwelling

A dwelling is a structurally separate set of living quarters, with a private entrance either from outside the building, or from a common hall, lobby, vestibule or stairway inside. The entrance must not be through anyone else's living quarters.

### Labour force

The 1961 Census labour force includes all persons, 15 years of age and over, who were reported as having a job of any kind, either part-time or full-time (even if they were not at work) or were reported as looking for work, during the week prior to enumeration. In urban localities the major portion of the enumeration extended over the first two weeks in June and in rural areas over the first three weeks. The item "Total household heads in labour force", therefore, includes all households in which the household head was in the labour force, as defined above, except a few in which the household head was reported as seeking his or her first job during the week prior to enumeration.

### Occupation division

Heads of households in the labour force, as defined above, are grouped in this report by occupation divisions. The occupation divisions are comprised of individual classes based mainly on the kind of processes performed and the kind of material worked upon regardless of the nature of business of the establishment in which it is carried on. The group of "Labourers" includes workers in "unskilled" occupations except those in "Primary" occupations. Also excluded from the "Labourers" category are "Longshoremen and other freight handlers", as well as "Sectionmen and trackmen" who are included in the "Craftsmen, etc." division.

### Wage-earner household

A wage-earner household is one in which the household head was a wage or salary earner during the census week, i.e., the week prior to the enumeration.

### Earnings

By "earnings of head" is meant the gross wage and salary income received by the household head as cash wages and salary from all employers during the 12 months prior to June 1961, including money received as commission, tips, piece-rate payments, etc. "Average earnings" are obtained by dividing the aggregate earnings for wage-earner heads by number of wage-earner heads with stated earnings.

Le présent rapport classe les ménages suivant le nombre de personnes par ménage et contient certaines caractéristiques du chef de ménage telles que l'état matrimonial, le degré d'instruction, le statut d'immigrant, la profession et le gain.

La statistique porte sur les régions suivantes:

- i) provinces (tableaux 35, 37, 39, 41)
- ii) zones métropolitaines de recensement (tableaux 36, 38, 40, 42).

Les hôtels, les grandes maisons de chambres, les institutions, les camps et autres ménages collectifs du genre sont exclus du présent rapport.

## Définitions

### Ménage

Pour les fins du recensement, un ménage se compose d'une personne ou d'un groupe de personnes occupant un logement. Il consiste ordinairement en un groupe familial avec ou sans chambres, employés, etc. Il peut aussi se composer d'un groupe de personnes non parentes, de deux familles ou plus partageant le même logement, ou d'une personne vivant seule. Toute personne est membre d'un ménage quelconque et le nombre de ménages est égal à celui des logements occupés.

### Logement

On entend par logement une série de pièces d'habitation distincte quant à la structure et ayant une entrée privée donnant sur l'extérieur ou sur un endroit commun à l'intérieur (corridor, vestibule ou escalier). L'entrée doit donner accès au logement sans obliger à passer par les locaux d'habitation d'une autre personne.

### Main-d'oeuvre

La main-d'oeuvre recensée en 1961 comprenait toutes les personnes âgées de 15 ans et plus qui, durant la semaine ayant précédé le dénombrement, avaient un emploi quelconque, à temps partiel ou de plein temps (même si elles n'étaient pas au travail) ou qui étaient en quête de travail. Dans les localités urbaines, le dénombrement a été fait en majeure partie durant les deux premières semaines de juin, et, dans les régions rurales, durant les trois premières. Par "nombre total de chefs de ménage dans la main-d'oeuvre", on entend tous les ménages dont le chef faisait partie de la main-d'oeuvre, selon la définition donnée ci-dessus, sauf quelques-uns où le chef a été déclaré comme étant en quête de son premier emploi au cours de la semaine précédant le dénombrement.

### Division professionnelle

Les chefs de ménage faisant partie de la main-d'oeuvre, selon la définition ci-dessus, sont groupés, dans le présent rapport, suivant les divisions professionnelles. Les divisions professionnelles sont formées de classes particulières fondées surtout sur la nature du travail accompli et sur les matières employées, indépendamment de la nature d'entreprise de l'établissement qui les emploie. Le groupe "Manoeuvres" comprend les travailleurs dans les "professions non spécialisées" sauf ceux qui exercent des professions "primaires". La catégorie des "Manoeuvres" exclut aussi "Débardeurs et autres ouvriers de la manutention", ainsi que "Cantonniers et poseurs de rails", qui sont versés dans les divisions "Ouvriers de métiers, artisans, etc."

### Ménage salarié

Un ménage salarié est celui dont le chef était un employé à salaire ou à traitement au cours de la semaine du recensement, c'est-à-dire au cours de la semaine précédant le dénombrement.

### Gain

Par "gain du chef", on entend le salaire ou le traitement brut reçu par le chef du ménage en salaire ou traitement monétaire provenant de tous ses employeurs durant les 12 mois antérieurs à juin 1961, y compris les sommes reçues en commission, pourboires, paiements pour travail à la pièce, etc. On obtient le "gain moyen" en divisant le gain global des chefs salariés par le nombre de chefs salariés déclarant un gain.
