INTRODUCTION

The present report is one of a series presenting the findings of the 1971 Census with respect to the family.

Tables 2 through 6 show total families and number of persons in families, while Tables 8 through 12 show families by type as of June 1, 1971.

The areas for which these figures are shown are as follows:

- (i) Canada and provinces, urban size groups, rural non-farm and rural farm (Tables 2, 8);
- (ii) census divisions (Tables 3, 9);
- (iii) incorporated cities, towns and other municipal subdivisions of 10,000 population and over (Tables 4, 10);
- (iv) census metropolitan areas (Tables 5, 11); and
- (v) census agglomerations of 25,000 population and over (Tables 6, 12).

Tables 1 and 7 show comparative figures for 1961, 1966 and 1971. Families, persons in families and average number of persons per family are shown in Table 1 for Canada, provinces, incorporated cities, towns and villages of 1,000 population and over and other municipal subdivisions of 10,000 population and over, while Table 7 shows number and percentage of families by type for Canada and provinces.

All figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Additional details on the random rounding technique may be obtained by writing to the Census User Inquiry Service, Statistics Canada, Ottawa K1A 0T7.

(See inside back cover for additional information.)

Ce bulletin fait partie d'une série qui présente les résultats du recensement de 1971 relativement aux familles.

Les tableaux 2 à 6 donnent le nombre total des familles et le nombre de personnes dans les familles, tandis que les tableaux 8 à 12 donnent la répartition des familles selon le genre, au 1^{er} juin 1971.

Les chiffres sont publiés pour les secteurs suivants:

- i) Canada et provinces, régions urbaines par groupe de taille et régions rurales non agricoles et rurales agricoles (tableaux 2, 8);
- ii) divisions de recensement (tableaux 3, 9);
- iii) cités et villes constituées, et autres subdivisions municipales de 10,000 habitants et plus (tableaux 4, 10);
- iv) régions métropolitaines de recensement (tableaux 5, 11); et
- v) agglomérations de recensement de 25,000 habitants et plus (tableaux 6, 12).

Les tableaux 1 et 7 donnent les chiffres comparables de 1961, 1966 et 1971. Les familles, les personnes dans les familles et le nombre moyen de personnes par famille figurent au tableau 1 pour le Canada, les provinces, les cités, villes et villages constitués de 1,000 habitants et plus et autres subdivisions municipales de 10,000 habitants et plus; le tableau 7 indique le nombre et le pourcentage des familles selon le genre pour le Canada et les provinces.

Par souci de confidentialité, tous les chiffres publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. On peut obtenir d'autres détails sur la technique d'arrondissement aléatoire en s'adressant au Service-utilisateurs, Direction du recensement, Statistique Canada, Ottawa K1A 0T7.

DEFINITIONS

Family: A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

Persons in families: The classification "persons in families" includes all persons who constitute a family in the sense defined above. Unmarried children (including own children, adopted children and stepchildren) are, regardless of age, members of the family and are classified together with parents as persons in families.

Type of family: Refers to the classification of families as to whether they maintain their own household (i.e., whether the Head of the family is also Head of the household). Families not maintaining their own household are further classified according to their relationship to the Head of the household, i.e., related or lodging families.

Definitions of these and other terms, including geographic terms used technically in this report are discussed in the Introductory Report to Volume II, Part 2 (Bulletin No. 2.2-1).

DÉFINITIONS

Familles: Époux et épouse avec ou sans enfants célibataires (peu importe leur âge) ou l'un ou l'autre des parents avec un ou plusieurs enfants célibataires vivant dans le même logement. Une famille peut être formée également d'un homme et d'une femme vivant avec un enfant en tutelle ou un pupille de moins de 21 ans pour lequel ils ne reçoivent pas de rétribution.

Personnes comprises dans les familles: La classification des personnes comprises dans les familles inclut toutes les personnes qui constituent une famille selon le sens de la définition mentionnée ci-dessus. Les enfants non mariés (comprenant les propres enfants, les enfants adoptés, les beaux-fils et les belles-filles), quel que soit leur âge sont membres de la famille, et sont classés ensemble avec les parents comme personnes dans les familles.

Genre de famille: Les familles sont classées en familles principales (une famille dont le chef est aussi le chef du ménage) et en familles secondaires. Les familles secondaires sont subdivisées selon leur lien avec le chef du ménage, c'est-à-dire suivant qu'elles sont des familles apparentées ou des familles non apparentées (familles chambreuses, etc.).

Les définitions de ces termes et d'autres termes techniques employés dans ce bulletin sont données dans l'Introduction au volume II, partie 2 (Bulletin n° 2.2-1).

Publications of the Census of Canada, 1971.

Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.
