INTRODUCTION

The present report is one of a series presenting the findings of the 1971 Census with respect to the family.

Tables 14 to 18 present distributions of families by number of children. Tables 19 to 23 show distributions of children at home by age groups ranging from "Under 6 years" to "19-24 years". Tables 24 to 27 show families by age groups of children under 25 years at home.

The areas for which these figures are shown are as follows:

- (i) Canada and provinces, urban size groups, rural non-farm and rural farm (Tables 14, 19, 24);
- (ii) Census divisions (Tables 15, 20);
- (iii) incorporated cities and towns and other municipal subdivisions of 10,000 population and over (Tables 16, 21, 25);
- (iv) Census metropolitan areas (Tables 17, 22, 26); and
- (v) Census agglomerations of 25,000 population and over (Tables 18, 23, 27).

Table 13 shows comparative figures for 1961, 1966 and 1971. Families, children in families and average number of children per family are shown for Canada and provinces, incorporated cities, towns and villages of 1,000 population and over and other municipal subdivisions of 10,000 population and over.

With the exception of Tables 19 to 23, all figures in this report were derived from the 100 per cent portion of the 1971 Census. As data on school attendance were collected on a one-third sample basis, figures in Tables 19 to 23 had to be weighted up to be representative of the entire population. This weighting procedure accounts for any observed differences between figures in these tables and corresponding data in the balance of the report.

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Similarly, percentages which are calculated on rounded figures, do not necessarily add to the total. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Ce bulletin fait partie d'une série qui présente les résultats du recensement de 1971 relativement aux familles.

Les tableaux 14 à 18 donnent la répartition des familles selon le nombre d'enfants. Les tableaux 19 à 23 donnent la répartition des enfants à la maison selon le groupe d'âge "Moins de 6 ans" à "19-24 ans". Les tableaux 24 à 27 donnent les familles selon le groupe d'âge des enfants de moins de 25 ans encore à la maison.

Les chiffres sont publiés pour les secteurs suivants:

- i) Canada et provinces, régions urbaines par groupe de taille et régions rurales non agricoles et rurales agricoles (tableaux 14, 19, 24);
- ii) divisions de recensement (tableaux 15, 20);
- iii) cités et villes constituées, et autres subdivisions municipales de 10,000 habitants et plus (tableaux 16, 21, 25);
- iv) régions métropolitaines de recensement (tableaux 17, 22, 26); et
- v) agglomérations de recensement de 25,000 habitants et plus (tableaux 18, 23, 27).

Le tableau 13 donne les chiffres comparables de 1961, 1966 et 1971. Les familles, les enfants dans les familles et le nombre moyen d'enfants par famille y figurent pour le Canada et les provinces, les cités, villes et villages constitués de 1,000 habitants et plus, et autres subdivisions municipales de 10,000 habitants et plus.

Sauf pour les tableaux 19 à 23, tous les chiffres du présent bulletin proviennent de l'ensemble des chiffres (100 %) du recensement de 1971. Comme les données sur la fréquentation scolaire ont été recueillies pour un tiers de l'échantillon, il a fallu pondérer les chiffres des tableaux 19 à 23 pour qu'ils représentent bien la population entière. Cette pondération explique toute différence possible entre les chiffres de ces tableaux et les données correspondantes du reste du bulletin.

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total. Aussi, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

DEFINITIONS

Family:

A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

Children in family: Refers to sons and daughters, under 25 years, who have never married and are living at home. Children who have ever been married, regardless of age, are not considered as members of their parents' family even though they are living in the same dwelling. Unmarried sons and daughters 25 years and over living at home on the census date are also family members, but considered as children only in a broad sense in a few tabulations (e.g. Table 85, Report 2.1-12).

The following were to be included as children: adopted children, stepchildren, foster children and wards for whom no pay was received.

In Tables 24, 25, 26 and 27, Type A refers to families with children under 6 years, Type B to families with children in age groups under 6 and 6-14 only, Type C to families with children in age groups under 6 and 15-24 only, Type D to families with children in all age groups, Type E to families with children in age groups 6-14 only and Type F to families with children in age groups 6-14 and 15-24 only.

School attendance: Refers to full-time attendance at any type of educational institution since September 1970.

Definitions of these and other terms, including geographic terms, used technically in this report are discussed in the Introductory Report Volume II, Part 2 (2.2-1).

Les personnes suivantes sont aussi considérées comme enfants: les enfants adoptés, les enfants d'un autre lit, les enfants en tutelle et les pupilles pour lesquels il n'est pas versé de rémunération.
