Advance bulletin

1971 CENSUS OF CANADA

SUMMARY OF HOUSING CHARACTERISTICS
(100 PER CENT*)

This advance report presents a summary of housing characteristics based on the 100 per cent data from the 1971 Census for census divisions, urban centres of 10,000 population and over and census metropolitan areas.

More detailed information on dwellings will be issued at a later date as part of the regular volume series of final reports of the 1971 Census. The purpose of this advance report is to make available summary totals for census divisions and large urban centres at the earliest possible date.

Definitions on which these statistics are based appear on page 15. The following statement shows a comparison of some of the main items with the 1961 Census.

All figures in this report have been subjected to the confidentiality procedure introduced in the 1971 Census to prevent the possibility of associating small figures with any identifiable individual. Briefly, it involves the random rounding of all last or unit digits. Since totals are independently rounded, they do not necessarily equal the sum of rounded figures in distributions. Also there may be slight differences between comparable figures in this report and those in other census bulletins. This technique will be described in the reports of the 1971 Census volume series.

Each bulletin of the 1971 Census volume series will include measures of reliability in the form of estimates of the mean square error for sets of characteristics covered in that bulletin. The user interested in obtaining an indication of the reliability of these advance data should refer to the appropriate bulletin in the volume series.

* Advance Report AH-3 will include sample data also.

Bulletin préliminaire

RECENSEMENT DU CANADA 1971

CARACTÉRISTIQUES SOMMAIRES DU LOGEMENT
(DONNÉES INTÉGRALES*)

Ce bulletin préliminaire présente un sommaire des caractéristiques du logement d'après les données intégrales du recensement de 1971 pour les divisions de recensement, les centres urbains de 10,000 habitants et plus et les régions métropolitaines de recensement.

De plus amples détails sur les logements paraîtront à une date ultérieure dans la série des volumes du recensement de 1971. L'objet de ce bulletin préliminaire est de communiquer le plus tôt possible les résultats sommaires pour les divisions de recensement et les grands centres urbains.

Les définitions sur lesquelles sont fondées ces statistiques figurent à la page 15. On trouvera ci-après une comparaison de certains des principaux points avec ceux du recensement de 1961.

La confidentialité de toutes les données présentées ici est assurée par la méthode utilisée au recensement de 1971 pour interdire la possibilité d'associer des chiffres de faible importance à une personne en particulier. En un mot, cette méthode consiste à arrondir au hasard tous les derniers chiffres, c'est-à-dire les chiffres représentant les unités. Ainsi, tous les chiffres ayant été arrondis individuellement, leur somme ne donne pas nécessairement les totaux indiqués. Il peut également y avoir de légères différences entre des chiffres comparables de ce bulletin et ceux d'autres bulletins du recensement. Une description de cette technique figurera dans les bulletins de la série des volumes du recensement de 1971.

Chaque bulletin de la série des volumes du recensement de 1971 renfermera des mesures de fiabilité sous forme d'estimations de l'erreur quadratique moyenne relativement aux groupes de caractéristiques observées. L'utilisateur désireux de connaître le degré de fiabilité de ces données préliminaires devra consulter le bulletin approprié de la série des volumes.

* Le bulletin préliminaire AH-3 comprendra aussi des données fragmentaires.

DEFINITIONS

Dwelling

For census purposes, a dwelling is a structurally separate set of living quarters, with a private entrance either from outside or from a common hall or stairway inside the building. The various types of dwellings are:

Single detached. — This type is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

Single attached. — This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as single attached (double). All other single attached dwellings whether in rows of three or more dwellings, or simply a unit adjoining a store or other non-residential structure are classified as single attached (other).

Apartment or flat. — These dwellings are also subdivided into two categories. Apartment, flat (duplex) refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. Apartment, flat (other) includes all dwellings of the apartment, flat-type other than the duplex-type mentioned above.

Mobile. — Refers to any dwelling designed and actually movable, such as a trailer, railway car, or boat, if occupied by persons with no other usual residence on census date.

Tenure. — A dwelling is classified as "owned" (even though mortgaged) if it belongs to some member of the household, otherwise, it is classified as "rented", whether or not a specified rent is paid.

"Crowded" dwelling. — For census purposes, any dwelling in which the number of persons exceeds the number of rooms occupied is classified as crowded.

Rooms. — Only rooms used or suitable for living purposes in the dwelling (including rooms occupied by servants, lodgers, or other members of lodging families) are counted. Sun rooms, summer kitchens, recreation rooms, attic rooms, etc., are counted only if they are finished and suitable for year-round living quarters. Not counted as rooms are bathrooms, clothes closets, pantries, halls, or rooms used solely for business purposes.

Bath and toilet facilities. — Includes "exclusive and shared" use.

DEFINITIONS

Logement

Aux fins du recensement, un logement est un ensemble distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur. Les divers genres de logements sont les suivants:

Individuel non attenant. — Ce genre de logement est ordinairement appelé "maison individuelle". Il consiste en une construction qui contient un seul logement et qui n'est rattachée à aucune autre construction.

Individuel attenant. — Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Tout logement individuel attenant dans une construction ne contenant que deux logements est classé comme "individuel attenant (maison double)". Tous les autres logements individuels attenants (en rangée de trois logements ou plus ou tout simplement attenants à un magasin ou à une autre construction non résidentielle) sont classés comme "individuels attenants (autres)".

Appartement ou plain-pied. — Cette catégorie est également subdivisée en deux groupes. Un "appartement ou plain-pied (duplex)" est un logement faisant partie d'une construction conçue à l'origine ou transformée par la suite pour contenir deux logements superposés et non attenants à une autre construction. Un "appartement ou plain-pied (autre)" est un logement de la catégorie "appartement ou plain-pied" autre qu'un logement faisant partie d'un duplex.

Mobile. — Tout logement conçu pour être transporté et qui est effectivement mobile, comme une roulotte, un wagon de chemin de fer ou un bateau, s'il est occupé par des personnes n'ayant pas d'autre résidence habituelle le jour du recensement.

Mode d'occupation. — Un logement est classé comme "possédé" (même s'il est hypothéqué) s'il appartient à un membre du ménage; autrement, il est classé comme "loué", qu'un loyer déterminé soit payé ou non.

Logement surpeuplé. — Aux fins du recensement, un logement où le nombre de personnes dépasse le nombre de pièces occupées est classé comme surpeuplé.

Pièces. — Seules les pièces du logement qui sont utilisées à des fins d'habitation ou qui sont habitables (y compris les pièces occupées par des domestiques, des chambreurs ou des membres de leur famille) sont comptées comme pièces. Les solariums, les cuisines d'été, les salles de récréation, les greniers, etc., ne sont comptés que s'ils constituent des pièces finies habitables toute l'année. Ne sont pas comptés comme pièces les salles de bains, les garde-robés, les garde-manger, les corridors ou couloirs ou les pièces servant exclusivement à des fins commerciales.

Baignoire et toilettes. — Baignoire et toilettes "à usage exclusif" et "à usage partagé".
