# Families

GENERAL CHARACTERISTICS  
OF ECONOMIC FAMILIES

# Familles

CARACTÉRISTIQUES GÉNÉRALES  
DES FAMILLES ÉCONOMIQUES

## INTRODUCTION

This report is one of a special series of reports designed to provide more detail on given subjects or to focus on materials of special interest than is possible in the Volume Series of the Census Publication Programme. It presents selected statistics for economic families as tabulated from the 1971 Census of Canada. The economic family is a "family unit" quite distinct from the family unit conventional to the Volume Series, the census family. The distinction between the two family units rests on differences in the criteria for the assignment of family status to all members of any household. Unique configurations of blood, marriage, or adoption relationships serve as the assignment criteria. An economic family refers to a group of two or more persons living together related by blood, marriage, or adoption. A census family refers to a group consisting of a husband and wife (with or without children who have never married, regardless of age) or a parent with one or more children never married living in the same dwelling. The census family concept requires that family members be members of a husband-wife or parent-child relationship whereas the economic family concept requires that family members be merely related by blood, marriage, or adoption with no stipulation that the relationship be a husband-wife or parent-child relationship. For example, a widowed mother living with her married son and daughter-in-law would be treated as a non-family person under the definition of a census family, but would be counted as a member of an economic family which would include her son and daughter-in-law. Two or more related census families living together also constitute one economic family. Two or more brothers or sisters living together will form an economic family but not a census family since they do not meet the requirements of the latter. In a few situations imposed by data processing constraints, particularly where blood relations exist (e.g. two brothers) but the relationship to head of household is stated as lodger, partner, employee or inmate, it is not possible to determine economic families. Either "family unit", be it economic family or census family, has its particular statistical rationale. First, the economic family concept may be considered to be synonymous with a "family spending unit". Consequently, several special surveys concerned with aggregate economic behaviour (i.e. Consumer Finance Survey and Labour Force Survey) use the economic family concept as the "family unit". Secondly, the conventional "family unit" of the U.S. Census corresponds to the economic family concept. For purposes of American-Canadian comparisons of family data it is the economic family definition, rather than the census family definition, that is comparable to the family definition of the U.S. Census. Finally, the census family concept (by restricting the blood, marriage, and adoption relationship to husband-wife and parent-child relationships) approximates the "nuclear family unit". The use of the census family concept is advantageous in cases of social research where the biological family unit is the central focus.

The organization of this report by subject-matter and by geographic area is as follows: Tables 1 to 6 provide data for the statistical comparison of the size and composition of economic families and census families. Tables 7 to 10 present data on the economic characteristics of selected members of the economic family, while Tables 11 and 12 present data on the wage and salary income of the head and total family income, respectively, for census and economic families. The geographic areas for which these figures are shown are: (i) Canada (Tables 2-6), (ii) Canada and Provinces (Tables 1, 7-9, 11 and 12), and (iii) Canada and Provinces, Urban Size Groups, Rural Non-farm and Rural Farm (Table 10).

Ce bulletin fait partie d'une série spéciale qui vise à fournir des renseignements plus détaillés sur certains sujets ou à mettre davantage l'accent sur certains textes d'intérêt spécial que ne le permettrait la série des volumes du Programme de publication du recensement. Il présente certaines statistiques concernant les familles économiques totalisées à partir du recensement du Canada de 1971. La famille économique est une "unité familiale" assez différente de l'unité familiale traditionnelle que l'on retrouve dans la série des volumes, c'est-à-dire la famille de recensement. La distinction entre les deux repose sur la façon d'attribuer le statut familial aux membres d'un ménage. Des profils uniques de relation par le sang, par alliance ou par adoption servent comme critères d'attribution. Une famille économique est un groupe de deux personnes ou plus vivant ensemble et qui sont apparentées par le sang, par alliance ou par adoption. Une famille de recensement est un groupe comprenant l'époux et l'épouse (avec ou sans enfants célibataires, peu importe leur âge) ou un parent avec un ou plusieurs enfants célibataires habitant dans le même logement. Le concept de la famille de recensement exige que les membres de la famille soient rattachés par des liens conjugaux ou de filiation, tandis que le concept de la famille économique repose sur le fait que les membres de la famille n'ont besoin que d'être apparentés par le sang, par alliance ou par adoption sans qu'il doive exister pour autant un lien conjugal ou de filiation. Par exemple, une veuve qui demeure avec son fils et sa bru sera une personne hors famille suivant la définition de la famille de recensement, mais fera partie de la famille économique qui comprendrait son fils et sa bru. Deux ou plusieurs familles de recensement apparentées vivant ensemble constituent également une famille économique. Deux ou plusieurs frères ou sœurs vivant ensemble formeront une famille économique mais non une famille de recensement puisqu'ils ne répondent pas à la définition d'une telle famille. Dans quelques situations où le traitement des données impose certaines limites, particulièrement lorsqu'il existe une parenté par le sang (par exemple deux frères) mais que le lien au chef du ménage se fait à titre de chambreur, d'associé, de salarié ou de pensionnaire, il est impossible de distinguer les familles économiques. L'une ou l'autre des "unités familiales", qu'elle soit famille économique ou famille de recensement, comporte une raison statistique fondamentale. En premier lieu, le concept de la famille économique peut être considéré comme synonyme de l'"unité familiale de dépense". Par conséquent, plusieurs enquêtes spéciales touchant le comportement économique des ensembles (par exemple, l'enquête sur les finances des consommateurs, et l'enquête sur la population active) utilisent le concept de la famille économique comme l'"unité familiale". En deuxième lieu, l'"unité familiale" traditionnelle du recensement des États-Unis correspond au concept de la famille économique. Afin de pouvoir comparer les données sur les familles entre les deux pays, on se sert de la définition de la famille économique plutôt que de celle de la famille de recensement comme point de comparaison avec la définition de la famille dans le cadre du recensement des États-Unis. En dernier lieu, le concept de la famille de recensement (en limitant les liens conjugaux et de filiation par le sang, par alliance et par adoption) se rapproche à l'"unité familiale nucléaire". L'emploi du concept de la famille de recensement apporte certains avantages en recherches sociales où l'unité familiale biologique constitue le point central.

Voici la structure de ce bulletin par domaine spécialisé et par secteur géographique: les tableaux 1 à 6 fournissent des données qui permettent une comparaison statistique de la taille et de la composition des familles économiques et des familles de recensement. Les tableaux 7 à 10 présentent des données sur les caractéristiques économiques de certains membres de la famille économique tandis que les tableaux 11 et 12 présentent respectivement des données selon la rémunération du chef et le revenu total des familles pour les familles de recensement et les familles économiques. Les secteurs géographiques auxquels s'appliquent ces chiffres sont les suivants: (i) Canada (tableaux 2-6), (ii) Canada et provinces (tableaux 1, 7-9, 11 et 12), et (iii) Canada et provinces, régions urbaines par groupe de taille et régions rurales non agricoles et rurales agricoles (tableau 10).

Inconsistencies between any comparable figures in this report and any other 1971 Census publication are the product of two census procedures, weighting and random rounding. First, some of the data in this report are tabulated from information collected by an enumeration of the total population and some of the data are tabulated from information collected from a 33 1/3% sample. Data based on the one-third sample have been weighted up to be representative of the total population. This weighting procedure accounts for observed differences of 15 or more between comparable figures in this report and other publications in the 1971 Volume Series. Secondly, the figures in this report, as with figures in all 1971 Census publications, have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Similarly some percentages, which are calculated on rounded figures, do not necessarily add to the total. An observed difference of less than 15 between comparable figures contained in this or other census publications is due to random rounding.

Toute divergence entre des chiffres comparables dans ce bulletin et d'autres publications du recensement de 1971 provient de deux méthodes statistiques soit la pondération et l'arrondissement aléatoire. D'abord, certaines des données de ce bulletin sont totalisées à partir des renseignements recueillis du recensement de toute la population tandis que d'autres le sont à partir des renseignements recueillis auprès d'un échantillon de 33 1/3 %. Les données fondées sur l'échantillon d'un tiers ont été pondérées pour représenter toute la population. Cette procédure de pondération explique les différences de 15 ou plus observées entre les chiffres comparables dans ce bulletin et d'autres publications de la série des volumes de 1971. En second lieu, les chiffres de ce bulletin, tout comme les chiffres de toutes les publications du recensement de 1971, ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, quelques pourcentages calculés à partir de chiffres arrondis ne correspondent pas forcément au total. Une différence observée inférieure à 15 entre des chiffres comparables de ce bulletin ou d'autres publications du recensement provient de l'arrondissement aléatoire.

## DEFINITIONS

**Economic family:** An economic family consists of a group of two or more persons living together and related to each other by blood, marriage or adoption.

**Economic family head:** Refers to one of the following: The head of a census family maintaining own household is the head of an economic family. A non-census family head of household is the head of an economic family if the household includes one or more census families related to the household head. The head of a census family unrelated to the head of household is the head of an economic family. Finally, the head of the household is the head of an economic family if the household does not include census families related to household head, but does include non-census family persons who are related to the household head.

**Persons not in economic family:** Refers to persons who are not related by blood, marriage or adoption to any other member of the household in which they reside.

**Census family:** A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. Children includes sons and daughters, and guardianship children under 21 years for whom no pay is received.

**Census family head:** Refers to the husband in a husband-wife family or the parent in a one-parent family.

**Persons not in census family:** Refers to persons who are not members of a husband-wife or parent-child relationship.

**Census families not maintaining own household related to household head:** Census families are classified as to whether they maintain their own household (i.e. whether the head of the family is also the head of the household). Census families not maintaining their own household are further classified according to the relationship of the family head to the household head. Thus, for example, in a household consisting of a household head, head's spouse,

## DÉFINITIONS

**Famille économique:** Une famille économique se compose d'un groupe de deux personnes ou plus vivant ensemble et apparentées entre elles par le sang, par alliance ou par adoption.

**Chef de famille économique:** S'applique à l'un des cas suivants: Le chef d'une famille principale de recensement est le chef d'une famille économique. Un chef de ménage hors famille de recensement est le chef d'une famille économique si le ménage comprend une ou plusieurs familles de recensement apparentées au chef de ménage. Le chef d'une famille de recensement non apparentée au chef du ménage est le chef d'une famille économique. En dernier lieu, le chef de ménage est chef d'une famille économique si le ménage ne comprend pas de famille de recensement apparentée au chef du ménage, mais qu'il comprend des personnes hors famille de recensement apparentées au chef de ménage.

**Personnes ne faisant pas partie d'une famille économique:** Personnes qui ne sont pas apparentées par le sang, par alliance ou par adoption à aucun autre membre du ménage avec lequel elles demeurent.

**Famille de recensement:** Une famille de recensement se compose de l'époux et de l'épouse avec ou sans enfants célibataires (peu importe leur âge) ou de l'un ou l'autre des parents avec un ou plusieurs enfants célibataires vivant dans le même logement. Les enfants comprennent les fils et les filles et les enfants en tutelle de moins de 21 ans pour lesquels le ou les parents ne reçoivent pas de rétribution.

**Chef de famille de recensement:** Le chef de famille est l'époux dans une famille époux-épouse ou le père ou la mère dans une famille monoparentale.

**Personnes hors famille de recensement:** Personnes qui ne se rattachent pas au chef par des liens conjugaux ou de filiation.

**Familles secondaires de recensement apparentées au chef de ménage:** Les familles de recensement se divisent en familles principales et en familles secondaires, selon que le chef de famille est aussi le chef de ménage. Les familles secondaires de recensement se subdivisent ensuite en fonction du lien qui existe entre le chef de famille et le chef de ménage. Par exemple, dans un ménage comprenant le chef de ménage, l'épouse du chef, le frère et la belle-sœur (épouse du frère), le frère et la

Definitions – Continued

brother and sister-in-law (brother's wife), the brother and sister-in-law comprise a census family not maintaining own household related to household head.

**Non-census family economic family:** Economic families are classified as to whether they include a census family. A household consisting of a household head, head's spouse, and brother, the household head and head's spouse comprise a census family; the household head, head's spouse, and brother comprise an economic family; and the economic family according to the above classification is a census family economic family. In a household consisting of a household head and the head's brother, the head and brother comprise an economic family but not a census family, and according to the above classification, this economic family is a non-census family economic family.

**Economic families with census families not maintaining own household related to non-census family head of household:** Census families are classified as to whether they maintain their own household (i.e. whether the head of the family is also the head of the household). Census families are further classified according to the relationship of the family head to the household head. In a household, for example, consisting of a household head, head's brother and sister-in-law (brother's wife), the brother and sister-in-law comprise a census family not maintaining own household related to the household head; and the household head, head's brother and sister-in-law comprise an economic family. According to the above classification this economic family is an economic family with a census family (or families) not maintaining own household related to non-census family head of household.

**Age:** Classifications are based on the number of completed years of age at last birthday prior to June 1, 1971.

**Household:** A household consists of a person or group of persons occupying one dwelling. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, of a group of unrelated persons or of one person living alone. Every person is a member of some household and there is a one-to-one relationship between households and occupied dwellings except in the case of certain special households, such as those of military and diplomatic personnel stationed overseas, from which no housing information was collected.

**Household head:** For census purposes, every household must have a head. This is the husband if both husband and wife are present, the parent (regardless of age or dependency) if living with unmarried children, or any member of a group sharing a dwelling equally. The household head may or may not be the family head as well. A person occupying a dwelling alone is always reported as the head.

**Type of household:** Refers to the basic division of households into family and non-family households. The term **FAMILY HOUSEHOLD** refers to a household containing at least one census family. **ONE-FAMILY HOUSEHOLD** refers to a single census family occupying one dwelling. The family may be that of the household head or one living as a related, lodging or other type of family with a household head who is a non-family person. A **TWO-OR-MORE FAMILY HOUSEHOLD** is one in which two or more census families occupy the same dwelling. One family may be that of the household head, or the household head may be a non-family person with whom two or more census families are residing. A **NON-FAMILY HOUSEHOLD** refers to one person living alone in a dwelling or a group of persons, occupying one dwelling, who do not constitute a census family.

**Labour force:** In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business

Définitions – suite

belle-soeur constituent une famille secondaire de recensement appartenant au chef de ménage.

**Famille économique sans famille de recensement:** On classe les familles économiques selon qu'elles comprennent ou non une famille de recensement. Dans un ménage composé du chef, de l'épouse du chef et du frère, le chef et son épouse constituent une famille de recensement, tandis que le chef de ménage, l'épouse du chef et le frère forment une famille économique. Si l'on se reporte à la classification mentionnée précédemment, la famille économique est une famille économique avec famille de recensement. Un ménage composé du chef et de son frère forme une famille économique (mais non une famille de recensement) sans famille de recensement.

**Familles économiques avec familles secondaires de recensement appartenant à un chef de ménage hors famille de recensement:** Les familles de recensement se divisent en familles principales et en familles secondaires, selon que le chef de famille est aussi le chef de ménage. Elles se subdivisent ensuite en fonction du lien qui existe entre le chef de famille et le chef de ménage. Ainsi, dans un ménage comprenant le chef, le frère du chef et la belle-soeur (épouse du frère) du chef, le frère et la belle-soeur constituent une famille secondaire de recensement appartenant au chef de ménage; les trois membres forment une famille économique qui, d'après la classification indiquée plus haut, est une famille économique avec famille (ou familles) secondaire de recensement apparentée au chef de ménage hors famille de recensement.

**Age:** Nombre d'années révolues au dernier anniversaire avant le 1er juin 1971.

**Ménage:** Un ménage est formé d'une personne ou d'un groupe de personnes occupant un même logement. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer de deux familles ou plus partageant le même logement, d'un groupe de personnes non apparentées ou d'une personne seule. Tout le monde est membre d'un ménage et le nombre de ménages est égal au nombre de logements occupés, sauf dans certains cas particuliers, comme dans celui des militaires et des diplomates postés outre-mer, pour lesquels on n'a pas recueilli de renseignements relatifs au logement.

**Chef de ménage:** Aux fins du recensement, chaque ménage doit avoir un chef. Le chef est l'époux lorsque les deux conjoints sont présents, le père ou la mère (quel que soit l'âge ou le lien de dépendance) s'il n'y en a qu'un des deux avec des enfants non mariés, ou n'importe quel membre d'un groupe se partageant un logement à parts égales. Le chef de ménage peut être ou ne pas être aussi le chef de famille. Une personne occupant seul un logement est toujours le chef.

**Genre de ménage:** Division fondamentale des ménages en ménages familiaux et ménages non familiaux. Un **MÉNAGE FAMILIAL** comprend au moins une famille de recensement. Un **MÉNAGE UNIFAMILIAL** se compose d'une seule famille de recensement occupant un logement. La famille peut être celle du chef de ménage ou une famille apparentée, chambreuse ou autre, vivant avec un chef de ménage qui est une personne hors famille. Un **MÉNAGE MULTIFAMILIAL** se compose de deux ou plusieurs familles de recensement occupant le même logement. Une famille peut être celle du chef de ménage, ou le chef de ménage peut être une personne hors famille avec qui résident deux familles de recensement ou plus. Un **MÉNAGE NON FAMILIAL** est constitué d'une personne vivant seule dans un logement ou d'un groupe de personnes partageant le même logement, sans toutefois constituer une famille de recensement.

**Population active:** Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémuné-

Definitions – Continued

or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own homes or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. It should be noted that the labour force counts for Quebec may be somewhat underestimated due to response problems.

**Labour force activity:** Refers to the labour market activity of persons 15 years and over in the week prior to enumeration, i.e. working for pay or profit or in unpaid family work, looking for work, on temporary lay-off, or with a job but not at work.

**Labour force participation rate:** The percentage the labour force forms of the population 15 years and over in the category or area.

**Class of worker:** Refers to the classification of employment according to whether persons mainly worked for someone else for wages, or helped without pay in a family farm or business, or mainly worked for themselves with or without paid help in their job in the week prior to enumeration, or if not employed at that time, in their job of longest duration since January 1, 1970. Those who were self-employed were asked in addition, if their farm or business was incorporated.

**Wage-earners in the labour force:** Persons in the labour force who indicated that in the job reported, they were mainly working for wages, salaries, tips or commissions. Included are persons working for piece-rates, those working for payment "in kind" in non-family enterprises, salesmen on commission working for only one company and not maintaining an office or staff, and persons working casually by the day as odd-job labourers and baby-sitters. Self-employed in incorporated companies are included as wage-earners in 1971, but were probably not included in 1961.

**Self-employed in the labour force:** Persons in the labour force, for whom the job reported consisted mainly of self-employment (including partnership) in their own unincorporated business, professional practice or farm, with or without paid help. Included are persons working mainly on contract or as free lancers, private duty nurses, etc.

**Unpaid family workers in the labour force:** Persons in the labour force, for whom the job reported consisted mainly of work without regular money wages for a relative who was a member of the same household, at tasks which contributed to the operation of the business or farm owned or operated by the relative.

**Occupation:** Refers to the specific kind of work the person did on the job, as determined by the reporting of the kind of work, the description of the most important duties and the job title. Data relate to the respondent's job in the week prior to enumeration if he or she had a job during that week or to the job of longest duration since January 1, 1970 if not employed in that week. Persons with two or more jobs during the reference week were asked to give the information for the one at which they worked the most hours.

**Note: Comparability with previous censuses:** The 1971 occupational classification differs considerably from previous ones. It is the result of a complete revision of earlier classifications. Consequently, comparisons with earlier censuses cannot be made at

Définitions – suite

ration ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. Il est à noter que la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation.

**Activité:** Activité sur le marché du travail des personnes de 15 ans et plus au cours de la semaine précédant le dénombrement (travaillant contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, cherchant du travail, en congédiement temporaire, ou ayant un emploi mais n'étant pas au travail).

**Taux d'activité sur le marché du travail:** Pourcentage de la population active par rapport à la population de 15 ans et plus de la catégorie ou du secteur donné.

**Statut:** Classement des personnes occupées suivant qu'elles ont surtout travaillé pour d'autres contre rémunération, qu'elles ont travaillé sans rémunération dans une entreprise ou une ferme familiale ou qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée, dans l'emploi qu'elles occupaient au cours de la semaine précédant le dénombrement ou, si elles n'avaient pas d'emploi à ce moment-là, dans leur emploi de plus longue durée depuis le 1er janvier 1970. Les travailleurs indépendants devaient également indiquer si leur ferme ou leur entreprise était constituée en corporation.

**Actifs salariés:** Personnes actives qui ont indiqué que, dans l'emploi qu'elles occupaient, elles travaillaient surtout contre rémunération, à la commission ou pour des pourboires. Sont compris les personnes travaillant à la pièce, les personnes travaillant contre rémunération en nature dans une entreprise non familiale, les vendeurs travaillant à la commission pour une seule entreprise et n'ayant ni bureau ni personnel, ainsi que les personnes travaillant occasionnellement à la journée, comme les hommes à tout faire et les gardiennes d'enfants. Les travailleurs indépendants dans des entreprises constituées en corporation sont compris comme salariés en 1971, mais ils ne l'étaient probablement pas en 1961.

**Travailleurs indépendants actifs:** Personnes actives dont l'emploi déclaré consistait surtout en travail autonome (y compris en association) dans leur entreprise, profession ou ferme non constituée en corporation, avec ou sans aide rémunérée. Sont comprises les personnes travaillant surtout à contrat ou à la pige, les infirmières privées, etc.

**Travailleurs familiaux actifs non rémunérés:** Personnes actives dont l'emploi déclaré consistait surtout en travail sans rémunération régulière en espèces pour un parent membre du même ménage à des tâches contribuant à l'exploitation de l'entreprise ou de la ferme dont le parent était le propriétaire ou l'exploitant.

**Profession:** Genre de travail que faisait le recensé déterminé par l'indication du genre de travail, la description des fonctions principales et le titre de l'emploi. Les données portent sur l'emploi que le recensé occupait pendant la semaine précédant le dénombrement, s'il avait un emploi cette semaine-là, ou sur l'emploi de plus longue durée depuis le 1er janvier 1970, s'il n'avait pas d'emploi cette semaine-là. Les personnes ayant deux emplois ou plus pendant la semaine de référence devaient fournir les renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures.

**Nota: Comparabilité avec les recensements antérieurs:** La classification des professions de 1971 diffère grandement des classifications précédentes. Elle est le produit d'une révision complète des anciennes classifications. Par conséquent, il est impossible de faire des comparaisons avec

### Definitions – Concluded

this time. It is hoped a means of obtaining 1971 data on occupations, classified by the 1961 classification, will be available (at a later date) to allow comparison.

**Income:** Persons 15 years and over, were asked to report total income received during the calendar year 1970 from each of the sources explained below:

(a) **Wages and salaries** (amount before deductions for income tax, pensions, unemployment insurance, etc.): Includes military pay and allowances, tips, commissions and bonuses and piece-rate payments received during 1970, but excludes free room and board or other payments in kind.

(b) **Net income from self-employment (non-farm)** (gross receipts minus expenses of operations): Amounts received from own non-farm unincorporated businesses or from a professional practice during 1970. In the case of partnerships, only the respondent's share was to be included.

(c) **Net income from farm operation** (gross receipts minus expenses of operations including depreciation): Amounts received from the operation of a farm, either for own account or in partnership, during 1970. Advance, supplementary or assistance payments to farmers (including Lower Inventory for Tomorrow programme payments) by federal or provincial governments were to be included.

(d) 1. **Family and youth allowances:** The amount received from this source is included in the census family head's income although reported by the wife. Provincial as well as federal allowances are included.

2. **Government old age pensions, Canada pensions and Quebec pensions:** Includes Guaranteed Income Supplement.

3. **Other government payments:** Includes all other government transfer payments from all levels of government such as unemployment insurance, veterans' pensions and allowances, welfare, workmen's compensation, mothers' allowances, etc.

4. **Retirement pensions from previous employment:** Includes all regular income received as a result of previous employment of the respondent or a deceased relative. Includes pensions to retired civil servants, RCMP or career military personnel, and all annuities regardless of who purchased them but excludes lump-sum payments.

5. **Bond and deposit interest and dividends:** Includes interest from deposits in banks, trust companies, co-operatives, Credit Unions, etc., as well as bond and debenture interest and all dividends.

6. **Other investment income:** Includes net rents from real estate, mortgage and loan interest, regular income from an estate or trust fund, and interest from insurance policies.

7. **Other income:** Includes regular income from alimony, child support, non-investment income from abroad, scholarships, etc.

**Family income:** Refers to the sum of the income received by all members of the family 15 years and over from the sources listed above.

**Note:** Coverage in 1961 was for non-farm private dwellings only (excluding Northwest Territories). Since farm income was not collected in 1961, these data are not directly comparable.

### Définitions – fin

les recensements antérieurs pour l'instant. Nous espérons pouvoir fournir (plus tard) des données de 1971 concernant les professions classées selon la classification de 1961 afin de permettre des comparaisons.

**Revenu:** Les personnes de 15 ans et plus devaient indiquer le revenu total reçu pendant l'année civile 1970 de chacune des sources suivantes:

a) **Rémunération:** Rémunération totale avant déductions de l'impôt sur le revenu, des cotisations à un régime de pensions, des cotisations d'assurance-chômage, etc., y compris les soldes et indemnités militaires, les pourboires, les commissions et les gratifications ainsi que les paiements à la pièce reçus en 1970, mais sans la pension gratuite ou les autres paiements en nature.

b) **Revenu net d'un emploi autonome (non agricole):** Recettes brutes, moins les dépenses d'exploitation, provenant de l'exploitation en 1970 d'une entreprise non agricole non constituée en corporation ou de l'exercice d'une profession pour compte propre. Dans le cas d'une société en nom collectif, seule la part du recensé est prise en compte.

c) **Revenu net provenant d'une exploitation agricole:** Recettes brutes, moins les dépenses d'exploitation, y compris l'amortissement, provenant de l'exploitation en 1970 d'une ferme pour compte propre ou en association. Les paiements anticipés, les paiements supplémentaires et les paiements d'assistance (y compris les paiements en vertu du programme de réduction des stocks de céréales) versés aux cultivateurs par le gouvernement fédéral ou les provinces sont pris en compte.

d) 1. **Allocations familiales et allocations aux jeunes:** Le montant provenant de cette source est compris dans le revenu du chef de famille de recensement, même si c'est l'épouse qui le reçoit. Les allocations provinciales aussi bien que fédérales sont comptées.

2. **Pensions de vieillesse de l'État et pensions du Régime de pensions du Canada et du Régime de rentes du Québec:** Est compris le supplément de revenu garanti.

3. **Paiements provenant d'autres sources publiques:** Tous les autres transferts de tous les niveaux de gouvernement, comme les prestations d'assurance-chômage, les pensions et allocations d'anciens combattants, les prestations de bien-être, les indemnités pour accidents du travail, les allocations aux mères nécessiteuses, etc.

4. **Pensions de retraite relatives à un emploi antérieur:** Tout revenu régulier relativement à un emploi antérieur du recensé ou d'un parent décédé, y compris les pensions des fonctionnaires, des membres de la G.R.C. et des militaires de carrière à la retraite ainsi que toutes les rentes, quel qu'en soit l'acheteur, mais sans les paiements forfaitaires.

5. **Intérêts d'obligations et de dépôts et dividendes:** Intérêts de dépôts dans des banques, des sociétés de fiducie, des coopératives et des caisses d'épargne et de crédit, etc., intérêts d'obligations et dividendes.

6. **Autre revenu de placements:** Loyers nets provenant de la location de biens immobiliers, intérêts de prêts hypothécaires et autres, revenu régulier provenant d'une succession ou d'un fonds de fiducie et intérêts de polices d'assurance.

7. **Autre revenu:** Revenu régulier provenant d'une pension alimentaire ou du soutien d'un enfant, revenu net provenant de l'étranger (sauf de placements), bourses d'études, etc.

**Revenu de la famille:** Somme des revenus touchés par tous les membres de la famille âgés de 15 ans et plus d'après les sources ci-dessus.

**Nota:** En 1961, seuls les logements privés non agricoles (à l'exclusion de ceux des Territoires du Nord-Ouest) ont été pris en compte. Comme on n'a pas recueilli de données sur le revenu agricole en 1961, ces chiffres ne sont pas directement comparables.
