INTRODUCTION

This report provides statistics from the 1976 Census on private households by certain characteristics of the head.

Table 35 presents data for private households by age and sex of head for Canada and provinces, urban size groups, rural non-farm and rural farm. Similar data are presented for census divisions in Table 36, for census metropolitan areas and census agglomerations of 25,000 population and over, urbanized core and fringe in Table 37, and for municipalities of 5,000 population and over in Table 38.

Table 39 presents data for private households by marital status and sex of head, for Canada and provinces, urban size groups, rural non-farm and rural farm. Similar data are presented for census divisions in Table 40, for census metropolitan areas and census agglomerations of 25,000 population and over, urbanized core and fringe in Table 41, and for municipalities of 5,000 population and over in Table 42.

Where applicable, relevant parts of the Census questionnaire and instructions are reproduced in the Introduction to Volume 3 (Catalogue No. 93-800).

DEFINITIONS

Household: Refers to a person or group of persons (other than foreign residents) who occupy a dwelling and do not have a usual place of residence elsewhere in Canada. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, a group of unrelated persons, or one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household.

Households are classified into three groups: (1) A PRIVATE household refers to persons (other than foreign residents) who occupy private dwellings and do not have a usual place of residence elsewhere in Canada. (2) A COLLECTIVE household consists of persons (other than foreign residents) who occupy collective dwellings and do not have a usual place of residence elsewhere in Canada. (3) A HOUSEHOLD OUTSIDE CANADA refers to military, diplomatic or other government personnel together with their dependents who reside outside Canada. Unless otherwise specified, all data in household reports are for private households only.

Private Household: Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Household Head: For census purposes, every household has a head and only one person is so designated. This is either the husband or the wife; the parent where there is one parent only, with one or more children (who have never married, regardless of age); or any member of a group sharing a dwelling equally. A person occupying a dwelling alone is always reported as the head. The minimum age for the head of household is 15 years.

Age: Age refers to the number of completed years of age at last birthday, and is computed on the basis of the census questionnaire item on date of birth.

Ce bulletin présente les statistiques du recensement de 1976 sur les ménages privés selon certaines caractéristiques du chef.

Le tableau 35 présente des données sur les ménages privés selon l'âge et le sexe du chef pour le Canada et les provinces, les régions urbaines par groupe de taille et les régions rurales non agricoles et rurales agricoles. Des données semblables sont indiquées pour les divisions de recensement au tableau 36, pour les régions métropolitaines de recensement et les agglomérations de recensement de 25,000 habitants et plus, les noyaux urbanisés et les banlieues au tableau 37, et pour les municipalités de 5,000 habitants et plus au tableau 38.

Le tableau 39 présente des données sur les ménages privés selon l'état matrimonial et le sexe du chef, pour le Canada et les provinces, les régions urbaines par groupe de taille et les régions rurales non agricoles et rurales agricoles. Des données semblables sont présentées pour les divisions de recensement au tableau 40, pour les régions métropolitaines de recensement et les agglomérations de recensement de 25,000 habitants et plus, les noyaux urbanisés et les banlieues au tableau 41, et pour les municipalités de 5,000 habitants et plus au tableau 42.

Au besoin, certaines parties du questionnaire du recensement et des instructions ont été insérées dans l'Introduction au volume 3 (n° 93-800 au catalogue).

DÉFINITIONS

Ménage: Personne ou groupe de personnes (autres que des résidents étrangers) occupant un même logement et n'ayant pas de lieu de résidence habituelle ailleurs au Canada. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer de deux familles ou plus partageant le même logement, d'un groupe de personnes non apparentées ou d'une personne seule. Les membres d'un ménage qui sont temporairement absents le jour du recensement (par exemple, résidents temporaires ailleurs) sont considérés comme faisant partie de leur ménage habituel. Pour les fins du recensement, chaque personne est membre d'un seul et unique ménage.

Les ménages sont classés en trois catégories: (1) un ménage PRIVÉ, c'est-à-dire les personnes (autres que des résidents étrangers) qui occupent des logements privés et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada; (2) un ménage COLLECTIF, c'est-à-dire les personnes (autres que des résidents étrangers) qui occupent des logements collectifs et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada; (3) un MÉNAGE À L'EXTÉRIEUR DU CANADA, c'est-à-dire le personnel militaire, diplomatique et autres fonctionnaires, ainsi que les personnes qui sont à leur charge, qui demeurent à l'extérieur du Canada. Sauf indication contraire, toutes les données présentées sur les ménages se rapportent aux ménages privés uniquement.

Ménage privé: La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

Chef de ménage: Pour les fins du recensement, chaque ménage doit avoir un chef et seulement un membre du ménage peut l'être. Il peut s'agir de l'époux ou de l'épouse; du père ou de la mère, s'il n'y en a qu'un des deux, avec des enfants jamais mariés (quel que soit leur âge) ou n'importe quel membre d'un groupe partageant un logement à parts égales. Une personne occupant seule un logement est toujours le chef. Le chef de ménage doit être âgé d'au moins 15 ans.

Âge: L'âge représente le nombre d'années révolues au dernier anniversaire et il est calculé à partir de la date de naissance indiquée sur le questionnaire du recensement.

DEFINITIONS – Continued

Marital Status: Refers to the categories single (never married), married, widowed, separated and divorced. Note in particular that:

Married includes persons living common-law;

Separated includes married persons who have been deserted or have parted because they no longer wish to live together but have not obtained a divorce; this category, therefore, includes separations whether legal or otherwise;

Ever married consists of the married, separated, widowed and divorced.

In most tables, the married and the separated categories are reported together under the heading "married".

Province: Major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. There are ten provinces which are divided into federal electoral districts, census divisions, census subdivisions, etc. In census publications, provincial tables include the Yukon and Northwest Territories.

Census Division (CD): General term applying to counties, regional districts, regional municipalities, etc. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for counties.

Municipality: Area with corporate status governed by Provincial and Territorial Acts. These acts differ from province to province. Moreover, municipalities within each province vary in name, status, and administrative powers.

Census Subdivision Type: Census subdivisions (CSDs) are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories and Indian Reserves, the type indicates the municipal status of the CSD. The following list indicates the abbreviations used for the most common CSD types:

BOR	Borough
C	City – Ville
DM	District Municipality – Municipalité de district
HAM	Hamlet – Hameau
ID	Improvement District – District d'amélioration
IR	Indian Reserve – Réserve indienne
LGC	Local Government Community – Centre d'administration locale
LGD	Local Government District – District d'administration locale
LID	Local Improvement District – District d'amélioration locale
MD	Municipal District – District municipal
MUN	Municipality – Municipalité
PAR	Parish – Paroisse
RD	Rural District – District rural
RM	Rural Municipality – Municipalité rurale
SV	Summer Village – Village d'été
TM	Township Municipality – Municipalité de township
T-V	Town – Ville
V/C	Ville/Cité
VL	Village

Census Metropolitan Area (CMA): The main labour market area of an urbanized core (or continuous built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of their largest city. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core, and (2) other municipalities, if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

DÉFINITIONS – suite

État matrimonial: Indique la situation conjugale, c'est-à-dire célibataire (jamais marié), marié, veuf, séparé et divorcé. Il convient de signaler que la catégorie

marié comprend les personnes vivant en concubinage;

séparé comprend les personnes mariées qui ont été abandonnées ou qui sont séparées de leur conjoint parce qu'elles ne veulent plus vivre avec lui, mais qui n'ont pas obtenu le divorce; cette catégorie vise donc les personnes séparées légalement ou non;

non célibataire comprend les personnes mariées, séparées, veuves et divorcées.

Dans la plupart des tableaux, les personnes mariées et les personnes séparées figurent sous la même rubrique, c'est-à-dire "marié".

Province: Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Il y a dix provinces, divisées en circonscriptions électorales fédérales, en divisions de recensement, en subdivisions de recensement, etc. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

Division de recensement (DR): Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales, etc. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités géostatistiques créées comme équivalent des comtés et délimitées par Statistique Canada en collaboration avec la province.

Municipalité: Territoire constitué en corporation, régi par des lois provinciales et territoriales. Les lois diffèrent d'une province à l'autre. De plus, dans chaque province, les municipalités ont des appellations, des statuts et des pouvoirs administratifs différents.

Catégorie de subdivision de recensement: Les subdivisions de recensement sont classées en diverses catégories selon les appellations adoptées par les autorités provinciales ou fédérales. À l'exception des territoires non municipalisés et des réserves indiennes, la catégorie indique le statut d'une subdivision de recensement. Voici la liste des abréviations des catégories de subdivision de recensement les plus courantes:

Région métropolitaine de recensement (RMR): Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant 100,000 habitants ou plus. Les RMR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la ville principale. Elles renferment des municipalités (ou des subdivisions) entières. Une RMR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités, a) si au moins 40 % de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou b) si au moins 25 % de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

DEFINITIONS – Continued

Census Agglomeration (CA): A geostatistical area created by Statistics Canada comprised of at least two adjacent municipal entities. These entities must be at least partly urban and belong to an urbanized core having a population of 2,000 or more. The urbanized core includes a largest city and remainder, each with a population of 1,000 or more, and has a population density of at least 1,000 per square mile (386 per square kilometre). CAs with an urbanized core of 100,000 or more (based on previous census figures) are called census metropolitan areas.

Urbanized Core: Continuous built-up area including the largest city and, where applicable, the urban part of surrounding municipalities. To be considered as continuous, the built-up area must not have a discontinuity exceeding one mile (1.609 kilometres).

Fringe: Part of a census metropolitan area (CMA) or of a census agglomeration (CA) outside the urbanized core. The fringe consists of urban parts and rural parts which may cut across municipalities but never across enumeration areas. The concept of fringe is more restrictive in CAs than in CMAs. In a CA, the fringe is composed of the remaining part of municipalities having a part in the urbanized core, while in a CMA, the fringe comprises all the municipalities surrounding the core which meet the established criteria for inclusion in the fringe.

Enumeration Area (EA): The spatial unit canvassed by one Census Representative. It is defined according to the following criteria: (1) Population — An enumeration area may include as many as 375 households, depending on its location; (2) Number of Farms — An enumeration area always includes fewer than 100 farms; (3) Limits — An enumeration area, being the building-block of all geostatistical areas, never cuts across any area recognized by the census. Moreover, enumeration area boundaries are such that the Census Representative will be able to locate them without difficulty as, for example, streets, roads, railways, rivers and lakes. Enumeration areas are normally the smallest geographic units for which census data are available.

Urban Area: Area having a population concentration of 1,000 or more and a population density of 1,000 or more per square mile (386 per square kilometre).

Urban Population Size Group: Classification used in tabulations where the urban areas are distributed according to the following size groups:

1,000 –	2,499
2,500 –	4,999
5,000 –	9,999
10,000 –	29,999
30,000 –	99,999
100,000 –	499,999
500,000 and over	

Rural Area: All territory lying outside "Urban Areas".

Rural Farm Population: All persons living in dwellings situated on census-farms in rural areas. The rural farm population includes persons living on census-farms who are not connected with the farming operations and who derive their income from non-agricultural pursuits. Conversely, farm operators and their families who live elsewhere than on a census-farm are not included. A census-farm is any holding of one acre (0.405 hectare) or more with sales of agricultural products during the past 12 months of \$1,200 or more.

DÉFINITIONS – suite

Agglomération de recensement (AR): Unité géostatistique créée par Statistique Canada et composée d'au moins deux municipalités voisines. Ces municipalités doivent être au moins partiellement urbaines et faire partie d'un noyau urbanisé dont la population est de 2,000 habitants ou plus. Le noyau urbanisé comprend la ville principale et le reste du noyau urbanisé ayant chacun une population de 1,000 habitants ou plus, et dont la densité est d'au moins 1,000 habitants au mille carré (386 au kilomètre carré). Les AR dont le noyau urbanisé comprend 100,000 habitants ou plus (selon les chiffres du recensement précédent) s'appellent des régions métropolitaines de recensement.

Noyau urbanisé: Zone bâtie en continu comprenant la ville principale et, le cas échéant, la partie urbaine des municipalités environnantes. Pour être considérée comme continue, une zone bâtie ne doit pas comporter d'espaces libres de plus d'un mille (1.609 kilomètre).

Banlieue: Partie d'une région métropolitaine de recensement (RMR) ou d'une agglomération de recensement (AR) située en dehors du noyau urbanisé. La banlieue est formée de parties urbaines et de parties rurales qui peuvent comprendre des parties de municipalités, mais qui sont toujours formées de secteurs de dénombrement entiers. La notion de banlieue est plus restrictive dans le cas de l'AR que dans celui de la RMR. Dans une AR, la banlieue est composée du reste des municipalités dont une partie se trouve dans le noyau urbanisé, tandis que dans une RMR, la banlieue comprend toutes les municipalités situées aux alentours du noyau urbanisé et qui répondent aux critères établis pour faire partie d'une banlieue.

Secteur de dénombrement (SD): L'unité spatiale recensée par un représentant du recensement. Elle est définie suivant les critères suivants: (1) Population — Un secteur de dénombrement peut comprendre jusqu'à 375 ménages, selon sa localisation; (2) Nombre de fermes — Un secteur de dénombrement comprend toujours moins de 100 fermes; (3) Limites — Un secteur de dénombrement, étant l'unité de base de toutes les unités géostatistiques, ne déborde jamais une région reconnue par le recensement. Par ailleurs, les limites des secteurs de dénombrement sont telles que le représentant du recensement est en mesure de les localiser sans difficulté, par exemple, rues, chemins, voies ferrées, rivières et lacs. Les secteurs de dénombrement constituent normalement les plus petites unités géographiques pour lesquelles on peut obtenir des données de recensement.

Région urbaine: Région dont la concentration démographique est de 1,000 habitants ou plus et dont la densité de population est de 1,000 habitants ou plus au mille carré (386 au kilomètre carré).

Groupe de taille de la population des régions urbaines: Classement utilisé dans les tableaux pour indiquer la répartition des régions urbaines selon les groupes de taille suivants:

1,000 –	2,499
2,500 –	4,999
5,000 –	9,999
10,000 –	29,999
30,000 –	99,999
100,000 –	499,999
500,000 et plus	

Région rurale: Tout territoire situé en dehors des "régions urbaines".

Population rurale agricole: Toutes les personnes habitant des logements situés dans les fermes de recensement des régions rurales. La population rurale agricole comprend les personnes demeurant dans des fermes de recensement qui ne participent pas à l'exploitation agricole et qui tirent leur revenu d'occupations non agricoles. Inversement, les exploitants agricoles et leur famille qui demeurent ailleurs que dans leur exploitation ne sont pas compris. Constitue une ferme de recensement toute propriété d'une acre (0.405 hectare) ou plus dont la vente de produits agricoles s'est chiffrée à \$1,200 ou plus au cours des 12 derniers mois.

DEFINITIONS – Concluded

Rural Non-farm Population: All persons living in rural areas in dwellings not situated on census-farms.

SAMPLING AND WEIGHTING

The information in this report was collected on a 100% basis and as such represents the official census counts. All table headings are noted accordingly.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly. Additional details on the random rounding technique may be obtained by writing Census Information Services (see back cover).

BASIC MEASURES OF DATA QUALITY**Coverage Error**

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the over-all undercoverage rate to be of the order of 2% of the total population.

Evidence from studies of coverage errors in earlier censuses indicates that undercoverage is not evenly distributed throughout the population but tends to be higher in certain segments of the population, e.g., young male adults, recent immigrants.

Further details on this study may be obtained by contacting Census Information Services (see back cover).

Response Rates

The table below presents the response rates obtained in the 1976 Census for the stated characteristics. A response rate is defined as the number of times the value of the characteristic was obtained divided by the number of times it should have been obtained.

DÉFINITIONS – fin

Population rurale non agricole: Toutes les personnes demeurant dans une région rurale et habitant un logement situé ailleurs que dans une ferme de recensement.

ÉCHANTILLONNAGE ET PONDÉRATION

Les renseignements de la présente publication ont été recueillis à 100 % et représentent les chiffres officiels de recensement. Les titres des tableaux sont annotés en conséquence.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres présentés ici ont été soumis à une formule appelée "arrondissement aléatoire" qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à un multiple de "5". Cette technique assure une bonne protection contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme des pourcentages qui sont calculés à partir des chiffres arrondis ne correspond pas forcément au total. La plupart des répartitions en pourcentage et des taux sont basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont fondées sur des données non arrondies. Les utilisateurs sont priés de remarquer que chaque tableau est annoté en conséquence. On peut obtenir plus de détails sur l'arrondissement aléatoire en s'adressant à l'Information recensement (voir la couverture arrière).

MESURES DE BASE DE LA QUALITÉ DES DONNÉES**Erreur de couverture**

Une erreur de couverture se glisse chaque fois qu'une personne ou un ménage sont omis ou comptés plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, les erreurs de couverture introduisent un biais vers le bas dans les estimations du recensement de sorte que ces dernières ont tendance à sous-représenter la population réelle.

On a mené une étude spéciale concernant le recensement de 1976 afin de mesurer l'importance des biais attribuables au sous-dénombrement. On a estimé que le taux global du sous-dénombrement représentait 2 % de la population totale.

Des études d'erreurs de couverture effectuées à l'occasion de recensements antérieurs ont révélé que le taux de sous-dénombrement n'était pas également réparti dans toute la population, mais qu'il avait tendance à être plus élevé pour certains segments de la population, par exemple, chez les jeunes adultes de sexe masculin et les nouveaux immigrants.

On peut obtenir de plus amples renseignements sur cette étude en communiquant avec l'Information recensement (voir la couverture arrière).

Taux de réponse

Le tableau ci-dessous présente les taux de réponse obtenus lors du recensement de 1976 relativement aux caractéristiques citées. Le taux de réponse est égal au quotient du nombre de fois que la valeur de la caractéristique a été obtenue par le nombre de fois qu'on aurait dû l'obtenir.

BASIC MEASURES OF DATA QUALITY — Continued

These response rates are published in order to give an indication, for each characteristic, of the proportion of cases which required imputation for non-response.

RESPONSE RATES FOR SELECTED CENSUS CHARACTERISTICS, 1976**TAUX DE RÉPONSE POUR CERTAINES CARACTÉRISTIQUES DU RECENSEMENT, 1976**

Characteristics Caractéristiques													Response rate (%) Taux de réponse (%)			
Age — Âge.....													98.4			
Marital status — État matrimonial.....													98.0			
Sex — Sexe.....													98.6			

Total Standard Error

The measures of reliability given in the table below are estimates of the total standard error (TSE) of the published 1976 Census figures. These include the effects of sampling (where applicable) as well as the random or non-systematic components of response and processing errors. The total standard errors, however, do not include allowances for systematic errors such as coverage errors, biases due to similar misinterpretations of concepts by many respondents, or systematic processing errors. These estimates of reliability are published to give an indication of the level of error only and are not meant for use in hypothesis testing or detailed analysis.

Erreur type totale

Les mesures de fiabilité du tableau ci-dessous constituent des estimations de l'erreur type totale (ETT) des chiffres publiés du recensement de 1976. L'erreur type totale englobe les effets de l'échantillonnage (s'il y a lieu) ainsi que les composantes aléatoires et non systématiques des erreurs de réponse et de dépouillement. Cependant, l'erreur type totale ne comprend pas les erreurs systématiques telles que les erreurs de couverture, les biais découlant d'une mauvaise compréhension des concepts par plusieurs recensés et les erreurs systématiques de dépouillement. Ces estimations de fiabilité sont présentées uniquement pour donner une indication du niveau d'erreur dans les chiffres du recensement et ne doivent pas être utilisées pour faire des tests d'hypothèses ou effectuer une analyse détaillée.

¹ These correspond to the reliability measures that were presented as root mean square errors or reliability estimates in the 1971 Census publications. — Ces estimations correspondent aux mesures de fiabilité présentées comme écarts quadratiques moyens ou estimations de fiabilité dans les publications du recensement de 1971.

BASIC MEASURES OF DATA QUALITY — Concluded

Users wishing to obtain TSE estimates for a given cell of data in any table in the Volume Series should follow these procedures:

1. Determine if the table is based on the complete census or on the one-third sample.
2. Determine the categories defining the cell. In some cases, this may be just a single category (e.g., age 25-29), while for a cell in a cross-classification involving several variables, there may be several categories (e.g., married males aged 25-29).
3. Referring to the TSE table locate the cell-defining category which presents the highest value. Any column can be used for this comparison. For those categories where both 100% and sample TSE values are shown, use only the 100% rows for tables based on the complete census and only the sample rows for tables based on the one-third sample (see step 1).
4. Choose the column in the TSE table whose heading is closest to the value of the given cell in the census table. Approximations for intermediate values may be achieved by linear interpolation.
5. Read off the figure from the row (determined in step 3) and column (determined in step 4) of the TSE table.

When using these figures, the user can be reasonably certain that, for the enumerated population, the true value (discounting systematic and coverage errors) lies within plus or minus twice the total standard error (e.g., for a figure of 100 with a hypothetical TSE of 3, the range would be 100 ± 6) and virtually certain that it lies within plus or minus three times the total standard error (e.g., for the same figure of 100 with a hypothetical TSE of 3, the range would be 100 ± 9).

SYMBOLS

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

MESURES DE BASE DE LA QUALITÉ DES DONNÉES — fin

Les lecteurs qui veulent calculer des estimations de l'ETT pour une case donnée d'un tableau quelconque de cette série devront procéder de la façon suivante:

1. Déterminer si le tableau est fondé sur le recensement exhaustif ou sur l'échantillon partiel (un tiers).
2. Déterminer les catégories qui définissent la case. Dans certains cas, il peut n'y avoir qu'une seule catégorie (par exemple, les 25-29 ans), tandis que dans le cas des classements recoupés mettant en jeu plusieurs variables, il peut y en avoir plusieurs (par exemple, les hommes mariés âgés de 25 à 29 ans).
3. En consultant le tableau des ETT, situer la catégorie qui a la valeur la plus élevée. N'importe quelle colonne peut servir à cette comparaison. Dans le cas des catégories pour lesquelles sont indiquées les valeurs de l'ETT à la fois pour le recensement exhaustif et pour l'échantillon, utiliser uniquement les lignes du recensement pour les tableaux fondés sur le recensement exhaustif, et uniquement les lignes de l'échantillon pour les tableaux fondés sur l'échantillon d'un tiers des ménages (voir l'étape 1).
4. Dans le tableau des ETT, choisir la colonne dont l'en-tête se rapproche le plus de celle de la case donnée dans le tableau du recensement. Les approximations des valeurs intermédiaires peuvent être effectuées par interpolation linéaire.
5. Lire la valeur correspondant à la ligne (déterminée à l'étape 3) et à la colonne (déterminée à l'étape 4) du tableau des ETT.

L'utilisateur de ces chiffres peut être raisonnablement certain que, pour la population recensée, la vraie valeur (en faisant abstraction des erreurs systématiques et de couverture) se situe dans un intervalle de plus ou moins deux fois l'erreur type totale (par exemple, pour le chiffre 100 et une ETT hypothétique de 3, l'intervalle serait de 100 ± 6). L'utilisateur peut être presque certain que cette valeur se situe dans un intervalle de plus ou moins trois fois l'erreur type totale (par exemple, pour le chiffre 100 et une ETT hypothétique de 3, l'intervalle serait de 100 ± 9).

SIGNES CONVENTIONNELS

- ... non disponible.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.

Publications of the 1976 Census of Canada

Publications du recensement du Canada de 1976

This bulletin is one of a series of volume reports of the 1976 Censuses of Population, Housing and Agriculture.

Most of the bulletins in the regular Volume Series are data-oriented. Other reports containing more methodological, interpretative and evaluative content, are also issued. These are as follows:¹

- (a) 1976 Census Administrative Report
- (b) 1976 Census Quality of Data Series
- (c) 1976 Census Research Series
- (d) Introductory Reports to each of the regular Volume Series.

Also available on request is a series of Reference Lists developed largely for internal verification of basic geographical and population hierarchies, which could provide useful information to the outside user.

Users will note that the majority of census publications are colour-coded to identify with the four themes central to the presentation and to maintain comparability with the 1971 series, e.g., blue for Geographical and Demographic content, brown for Housing, Household and Family data, red for Economic Characteristics and gold for the series based on Agriculture.

These reports are listed in the *1976 Census Catalogue* which can be obtained free of charge from:

Publications Distribution,
Room 1200, Statistics Canada,
Ottawa, Ontario.
K1A 0T6

To order census publications, send a cheque or money order made payable to the Receiver General for Canada, to the above address.

In addition to published documents, the Census of Canada can provide other products and services about census: data on microform (film or fiche), computer tapes, computer print-outs, user-specified tables, maps, geographic files, geographic lists, etc.

For information write:

Census Information Services,
Statistics Canada,
Ottawa, Ontario.
K1A 0T7

or call (613) 996-5254.

Inquiries about census and other Statistics Canada information can also be directed to Statistics Canada Regional Offices located in: St. John's (Nfld.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

¹ It should be noted that these publications are generally released somewhat later than the data reports.

Ce bulletin fait partie de la série des publications des recensements de 1976 de la population, du logement et de l'agriculture.

La plupart des bulletins de la série ordinaire des volumes présentent des données. On publie également d'autres bulletins dont le contenu vise plutôt la méthodologie, l'interprétation et l'évaluation. Ces bulletins sont les suivants¹:

- a) Rapport administratif du recensement de 1976
- b) Série relative à la qualité des données du recensement de 1976
- c) Série du recensement de 1976 relative à la recherche
- d) Introductions à chacune des séries ordinaires des volumes.

Vous pouvez aussi vous procurer sur demande une série de Listes de référence, servant surtout à la vérification interne des catégories géographiques et démographiques de base, qui pourraient fournir des renseignements utiles aux utilisateurs à l'extérieur de Statistique Canada.

Les utilisateurs constateront que la plupart des publications du recensement sont classées par couleur, chaque couleur correspondant à l'un des quatre thèmes du recensement; cela permet d'assurer la comparabilité avec les séries de 1971; ainsi, le bleu est réservé aux publications de nature géographique et démographique, le brun, aux bulletins sur le logement, les ménages et les familles, le rouge, aux publications de nature économique et la couleur or, à la série relative à l'agriculture.

Ces bulletins figurent au *Catalogue du recensement de 1976* que vous pouvez obtenir gratuitement auprès de:

Distribution des publications
Pièce 1200, Statistique Canada
Ottawa (Ontario)
K1A 0T6

Envoyez vos commandes de publications du recensement à cette même adresse en y joignant un chèque ou un mandat postal à l'ordre du Receveur général du Canada.

Outre les publications, le Recensement du Canada offre divers autres produits et services: données en microcopie (film ou fiche), bandes pour ordinateurs, états mécanographiés, totalisations spéciales, cartes, fichiers et listes géographiques, etc.

Pour obtenir des renseignements, écrivez à:

Information recensement
Statistique Canada
Ottawa (Ontario)
K1A 0T7

ou téléphonez au numéro (613) 996-5254.

Toute demande de renseignement sur le recensement et les autres données de Statistique Canada peut également être transmise aux bureaux régionaux de Statistique Canada situés à St. John's (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton et Vancouver.

¹ Il convient de remarquer que ces bulletins sont généralement publiés quelque temps après les bulletins présentant des données.
