INTRODUCTION

This report provides breakdowns of the population in private households according to household and family status. The data are shown for Canada and the provinces. Table 47 shows the age, sex and marital status of individuals within each component of household and family status, while Table 48 contains data on the relationship to the head of the household by age and sex.

In 1971, the head of the household was always the husband if both husband and wife were present. Data were presented for heads and for wives. In 1976, however, either the husband or the wife may be the head. Therefore, in this report, data are shown for the head and the spouse where the latter may be either male or female.

Where applicable, relevant parts of the Census questionnaire and instructions are reproduced in the Introduction to Volume 3 (Catalogue No. 93-800).

DEFINITIONS

Household: Refers to a person or group of persons (other than foreign residents) who occupy a dwelling and do not have a usual place of residence elsewhere in Canada. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, a group of unrelated persons, or one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household.

Households are classified into three groups: (1) A PRIVATE household refers to persons (other than foreign residents) who occupy private dwellings and do not have a usual place of residence elsewhere in Canada. (2) A COLLECTIVE household consists of persons (other than foreign residents) who occupy collective dwellings and do not have a usual place of residence elsewhere in Canada. (3) A HOUSEHOLD OUTSIDE CANADA refers to military, diplomatic or other government personnel together with their dependents who reside outside Canada. Unless otherwise specified, all data in household reports are for private households only.

Private Household: Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Household Status: Refers to the relationship of persons in the household to the household head. A person may be related to the head through blood, marriage or adoption (e.g., spouse, son or daughter, brother-in-law) or may be unrelated to the head (e.g., lodger, employee).

A LODGER is a person, unrelated to the household head, who pays for accommodation (e.g., boarder). He/she does not share responsibility for maintenance of the dwelling. If the lodger's spouse or child is present, the relationship to the household head is "lodger's spouse" or "lodger's child". In addition to these, unrelated wards and foster children, irrespective of whether pay is received, are designated as lodgers.

A PARTNER is a person, unrelated to the household head, who has equal access to dwelling facilities (e.g., friend) and/or shares responsibility for the maintenance of the dwelling (e.g., roommate). A partner must be 15 years or over. If the partner's spouse or child is present, the relationship to the household head is "partner's spouse" or "partner's child".

Ce bulletin présente des données sur la population dans les ménages privés selon la situation des particuliers au sein des ménages et des familles. Les données portent sur l'ensemble du Canada et sur les provinces. Les données du tableau 47 indiquent l'âge, le sexe et l'état matrimonial des particuliers selon leur situation au sein du ménage et de la famille, alors que les données du tableau 48 indiquent leur lien avec le chef de ménage selon l'âge et le sexe.

En 1971, le chef du ménage était toujours l'époux lorsque l'époux et l'épouse étaient présents. Les données étaient présentées pour les chefs et pour les épouses. En 1976, toutefois, le chef peut être soit l'époux, soit l'épouse. Par conséquent, dans ce bulletin, les données sont indiquées pour le chef et le conjoint, et ce dernier peut être soit l'époux, soit l'épouse.

Au besoin, certaines parties du questionnaire du recensement et des instructions ont été insérées dans l'Introduction au volume 3 (n° 93-800 au catalogue).

DÉFINITIONS

Ménage: Personne ou groupe de personnes (autres que des résidents étrangers) occupant un même logement et n'ayant pas de lieu de résidence habituelle ailleurs au Canada. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer de deux familles ou plus partageant le même logement, d'un groupe de personnes non apparentées ou d'une personne seule. Les membres d'un ménage qui sont temporairement absents le jour du recensement (par exemple, résidents temporaires ailleurs) sont considérés comme faisant partie de leur ménage habituel. Pour les fins du recensement, chaque personne est membre d'un seul et unique ménage.

Les ménages sont classés en trois catégories: (1) un ménage PRIVÉ, c'est-à-dire les personnes (autres que des résidents étrangers) qui occupent des logements privés et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada; (2) un ménage COLLECTIF, c'est-à-dire les personnes (autres que des résidents étrangers) qui occupent des logements collectifs et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada; (3) un MÉNAGE À L'EXTÉRIEUR DU CANADA, c'est-à-dire le personnel militaire, diplomatique et autres fonctionnaires, ainsi que les personnes qui sont à leur charge, qui demeurent à l'extérieur du Canada. Sauf indication contraire, toutes les données présentées sur les ménages se rapportent aux ménages privés uniquement.

Ménage privé: La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

Situation des particuliers au sein des ménages: Lien de chaque personne avec le chef du ménage dont elle est membre. Une personne peut être apparentée au chef de ménage par le sang, par alliance ou par adoption (par exemple, conjoint, fils ou fille, beau-frère) ou n'avoir aucun lien de parenté avec lui (par exemple, chambreur, employé).

CHAMBREUR: Personne qui n'est pas apparentée au chef de ménage et qui doit payer pour son hébergement (par exemple, un pensionnaire). Cette personne ne participe pas à l'entretien du logement. Si le conjoint ou un enfant du chambreur vit avec lui, son lien avec le chef de ménage est "conjoint du chambreur" ou "enfant du chambreur". De plus, les pupilles et les enfants en tutelle non apparentés, pour lesquels il est versé ou non une rétribution, sont considérés comme des chambreurs.

ASSOCIÉ: Personne sans lien de parenté avec le chef de ménage qui partage son logement (par exemple, un ami) ou qui participe aux travaux d'entretien du logement (par exemple, un compagnon de chambre). Un associé doit être âgé de 15 ans ou plus. Si le conjoint ou un enfant de l'associé demeure avec lui, son lien avec le chef de ménage est "conjoint de l'associé" ou "enfant de l'associé".

DEFINITIONS – Continued

An **EMPLOYEE** is a person, unrelated to the household head, who is employed by the household or the household head, and resides in the same dwelling as the household head (e.g., maid, nurse, hired farm labourer). An employee must be 15 years or over. If the employee's spouse or child is present, the relationship to the household head is "employee's spouse" or "employee's child".

Household Head: For census purposes, every household has a head and only one person is so designated. This is either the husband or the wife; the parent where there is one parent only, with one or more children (who have never married, regardless of age); or any member of a group sharing a dwelling equally. A person occupying a dwelling alone is always reported as the head. The minimum age for the head of household is 15 years.

Family Status: Refers to the classification of the population in private households into family and non-family persons. Family persons are further classified as: husband, wife, lone parent, spouse, child.

FAMILY PERSONS are members of a census family (e.g., persons living in the same dwelling who have a husband-wife or parent-child relationship). **HUSBAND/WIFE** refers to persons living in the same dwelling as their spouse. **LONE PARENT** refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children. **SPOUSE** refers to either the husband or the wife of a husband-wife census family. **CHILDREN** refers to sons and daughters (including adopted and stepchildren) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever married, regardless of age, are not considered as members of their parents' family, even though they are living in the same dwelling.

NON-FAMILY PERSONS are not members of a census family. They may be related to the household head (e.g., brother-in-law, cousin) or unrelated (e.g., lodger, employee).

Family Structure: Refers to the classification of census families into husband-wife families or lone parent families. **HUSBAND-WIFE FAMILIES** consist of a husband and a wife (with or without children), or persons who live common-law (with or without children). **LONE PARENT FAMILIES** consist of a parent, regardless of marital status, with one or more children living in the same dwelling (see **CHILDREN**).

Family Type: Refers to the classification of census families according to whether they maintain or do not maintain their own household (i.e. whether or not the husband, the wife or the parent in a lone parent family is also the household head). Families not maintaining their own household are further classified according to their relationship to the household head (e.g., related and non-related families).

MAINTAINING OWN HOUSEHOLD (PRIMARY FAMILY) refers to the family of the household head where the household head is a family person (i.e. a member of a census family).

NOT MAINTAINING OWN HOUSEHOLD (SECONDARY FAMILY) refers to a census family other than that of the household head. Note that it is possible to have secondary families without having corresponding primary families, as in the case of a non-family household head and a lodging family. Secondary families are further classified into **RELATED FAMILIES**, consisting of a census family in which the husband, the wife or the parent in a lone parent family is related by blood, marriage or adoption to the household head. Non-related families are further subdivided into **LODGING FAMILIES** and **OTHER NON-RELATED FAMILIES** (employee's family, partner's family).

DÉFINITIONS – suite

EMPLOYÉ: Personne sans lien de parenté avec le chef de ménage qui est employée par le ménage ou le chef de ménage et qui réside dans le même logement (par exemple, bonne, infirmière, ouvrier agricole). Un employé doit être âgé de 15 ans ou plus. Si le conjoint ou un enfant de l'employé est également membre du ménage, son lien avec le chef de ménage est "conjoint de l'employé" ou "enfant de l'employé".

Chef de ménage: Pour les fins du recensement, chaque ménage doit avoir un chef et seulement un membre du ménage peut l'être. Il peut s'agir de l'époux ou de l'épouse; du père ou de la mère, s'il n'y en a qu'un des deux, avec des enfants jamais mariés (quel que soit leur âge) ou n'importe quel membre d'un groupe partageant un logement à parts égales. Une personne occupant seule un logement est toujours le chef. Le chef de ménage doit être âgé d'au moins 15 ans.

Situation des particuliers au sein des familles: La population dans les ménages privés est classée en personnes faisant partie d'une famille et en personnes hors famille. Les personnes faisant partie d'une famille se classent en époux, épouse, parent seul, conjoint, enfant.

PERSONNES FAISANT PARTIE D'UNE FAMILLE: Membres d'une famille de recensement (par exemple, personnes vivant dans le même logement ayant des liens conjugaux ou des liens de filiation). L'**ÉPOUX** ou l'**ÉPOUSE** est une personne habitant le même logement que son conjoint. Un **PARENT SEUL** est un père ou une mère, sans conjoint présent, partageant un logement avec un ou plusieurs enfants jamais mariés. Le **CONJOINT** est soit l'époux, soit l'épouse dans une famille de recensement époux-épouse. Les **ENFANTS** sont les fils et les filles (y compris les enfants adoptés et les enfants d'un autre lit) qui ne se sont jamais mariés, peu importe leur âge, et qui vivent dans le même logement que leurs parents. Les fils et les filles qui se sont déjà mariés, peu importe leur âge, ne sont pas considérés comme des membres de la famille de leurs parents, même s'ils vivent dans le même logement.

Les **PERSONNES HORS FAMILLE** ne sont pas membres d'une famille de recensement. Elles peuvent être apparentées au chef de ménage (par exemple, beau-frère, cousin) ou non apparentées (par exemple, chambreur, employé).

Structure de la famille: Les familles de recensement sont classées en familles époux-épouse ou en familles monoparentales. Les **FAMILLES ÉPOUX-ÉPOUSE** se composent d'un mari et de sa femme (avec ou sans enfants), ou de personnes vivant en concubinage (avec ou sans enfants). Les **FAMILLES MONOPARENTALES** se composent d'un père ou d'une mère, peu importe leur état matrimonial, ayant un enfant ou plus vivant dans le même logement (voir **ENFANTS**).

Genre de famille: Les familles de recensement sont classées en familles principales et en familles secondaires (c.-à-d. selon que l'époux, l'épouse ou le père ou la mère, s'il s'agit d'une famille monoparentale, est ou n'est pas le chef de ménage). On subdivise les familles secondaires selon leur lien avec le chef de ménage (par exemple, familles apparentées et familles non apparentées).

FAMILLE PRINCIPALE: Désigne la famille du chef de ménage lorsque ce dernier est une personne faisant partie d'une famille (c.-à-d. membre d'une famille de recensement).

FAMILLE SECONDAIRE: Désigne une famille de recensement autre que celle du chef de ménage. Il peut exister des familles secondaires sans famille principale correspondante, comme dans le cas d'un chef de ménage hors famille et d'une famille chambreuse. Les familles secondaires se subdivisent en **FAMILLES APPARENTÉES**, c'est-à-dire des familles de recensement où l'époux, l'épouse ou le père ou la mère, s'il s'agit d'une famille monoparentale, est apparenté par le sang, par alliance ou par adoption au chef de ménage. Pour leur part, les familles non apparentées se classent en **FAMILLES CHAMBREUSES** et en **AUTRES FAMILLES NON APPARENTÉES** (famille d'un employé, d'un associé).

DEFINITIONS – Concluded

Census Family: Consists of a husband and a wife (with or without children who have never married, regardless of age) or a lone parent, regardless of marital status, with one or more children (who have never married, regardless of age) living in the same dwelling. Persons living common-law are directed to report as now married on the census questionnaire. Such persons are therefore indistinguishable from those who are legally married and will appear as a husband-wife family in the census reports. Unless otherwise specified, all family data in family and housing reports are for census families.

Age: Age refers to the number of completed years of age at last birthday, and is computed on the basis of the census questionnaire item on date of birth.

Marital Status: Refers to the categories single (never married), married, widowed, separated and divorced. Note in particular that:

Single (never married) includes all persons under age 15;

Married includes persons living common-law;

Separated includes married persons who have been deserted or have parted because they no longer wish to live together but have not obtained a divorce; this category, therefore, includes separations whether legal or otherwise.

In most tables, the married and the separated categories are reported together under the heading "married".

Province: Major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. There are ten provinces which are divided into federal electoral districts, census divisions, census subdivisions, etc. In census publications, provincial tables include the Yukon and Northwest Territories.

SAMPLING AND WEIGHTING

The information in this report was collected on a 100% basis and as such represents the official census counts. All table headings are noted accordingly.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of ".5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly. Additional details on the random rounding technique may be obtained by writing Census Information Services (see back cover).

DÉFINITIONS – fin

Famille de recensement: Époux et épouse avec ou sans enfants jamais mariés (peu importe leur âge) ou l'un ou l'autre des parents (peu importe l'état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Les personnes qui vivent en concubinage doivent indiquer qu'elles sont actuellement mariées dans le questionnaire du recensement. Par conséquent, aucune distinction n'est faite entre ces personnes et les personnes mariées légalement; elles figurent comme époux et épouses dans les bulletins du recensement. Sauf indication contraire, toutes les données sur la famille présentées dans les bulletins sur le logement et la famille se rapportent aux familles de recensement.

Âge: L'âge représente le nombre d'années révolues au dernier anniversaire et il est calculé à partir de la date de naissance indiquée sur le questionnaire du recensement.

État matrimonial: Indique la situation conjugale, c'est-à-dire célibataire (jamais marié), marié, veuf, séparé et divorcé. Il convient de signaler que la catégorie

célibataire (jamais marié) comprend toutes les personnes âgées de moins de 15 ans;

marié comprend les personnes vivant en concubinage;

séparé comprend les personnes mariées qui ont été abandonnées ou qui sont séparées de leur conjoint parce qu'elles ne veulent plus vivre avec lui, mais qui n'ont pas obtenu le divorce; cette catégorie vise donc les personnes séparées légalement ou non.

Dans la plupart des tableaux, les personnes mariées et les personnes séparées figurent sous la même rubrique, c'est-à-dire "marié".

Province: Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Il y a dix provinces, divisées en circonscriptions électorales fédérales, en divisions de recensement, en subdivisions de recensement, etc. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

ÉCHANTILLONNAGE ET PONDÉRATION

Les renseignements de la présente publication ont été recueillis à 100 % et représentent les chiffres officiels de recensement. Les titres des tableaux sont annotés en conséquence.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres présentés ici ont été soumis à une formule appelée "arrondissement aléatoire" qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à un multiple de ".5". Cette technique assure une bonne protection contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme des pourcentages qui sont calculés à partir des chiffres arrondis ne correspond pas forcément au total. La plupart des répartitions en pourcentage et des taux sont basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont fondées sur des données non arrondies. Les utilisateurs sont priés de remarquer que chaque tableau est annoté en conséquence. On peut obtenir plus de détails sur l'arrondissement aléatoire en s'adressant à Information recensement (voir la couverture arrière).

BASIC MEASURES OF DATA QUALITY**Coverage Error**

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the over-all undercoverage rate to be of the order of 2% of the total population.

Evidence from studies of coverage errors in earlier censuses indicates that undercoverage is not evenly distributed throughout the population but tends to be higher in certain segments of the population, e.g., young male adults, recent immigrants.

Further details on this study may be obtained by contacting Census Information Services (see back cover).

Response Rates

The table below presents the response rates obtained in the 1976 Census for the stated characteristics. A response rate is defined as the number of times the value of the characteristic was obtained divided by the number of times it should have been obtained.

These response rates are published in order to give an indication, for each characteristic, of the proportion of cases which required imputation for non-response.

MESURES DE BASE DE LA QUALITÉ DES DONNÉES**Erreur de couverture**

Une erreur de couverture se glisse chaque fois qu'une personne ou un ménage sont omis ou comptés plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, les erreurs de couverture introduisent un biais vers le bas dans les estimations du recensement de sorte que ces dernières ont tendance à sous-présenter la population réelle.

On a mené une étude spéciale concernant le recensement de 1976 afin de mesurer l'importance des biais attribuables au sous-dénombrement. On a estimé que le taux global du sous-dénombrement représentait 2 % de la population totale.

Des études d'erreurs de couverture effectuées à l'occasion de recensements antérieurs ont révélé que le taux de sous-dénombrement n'était pas également réparti dans toute la population, mais qu'il avait tendance à être plus élevé pour certains segments de la population, par exemple, chez les jeunes adultes de sexe masculin et les nouveaux immigrants.

On peut obtenir de plus amples renseignements sur cette étude en communiquant avec Information recensement (voir la couverture arrière).

Taux de réponse

Le tableau ci-dessous présente les taux de réponse obtenus lors du recensement de 1976 relativement aux caractéristiques citées. Le taux de réponse est égal au quotient du nombre de fois que la valeur de la caractéristique a été obtenue par le nombre de fois qu'on aurait dû l'obtenir.

Ces taux de réponse sont publiés afin d'indiquer, pour chaque caractéristique, le pourcentage de cas qui ont dû être imputés en raison de la non-réponse.

RESPONSE RATES FOR SELECTED CENSUS CHARACTERISTICS, 1976**TAUX DE RÉPONSE POUR CERTAINES CARACTÉRISTIQUES DU RECENSEMENT, 1976**

| Characteristics Caractéristiques | Response rate (%) Taux de réponse (%) |
|--|--|
| Age — Âge | 98.4 |
| Marital status — État matrimonial | 98.0 |
| Sex — Sexe | 98.6 |
| Relationship to head — Lien avec le chef | 98.4 |

BASIC MEASURES OF DATA QUALITY — Continued**Total Standard Error**

The measures of reliability given in the table below are estimates of the total standard error (TSE) of the published 1976 Census figures. These include the effects of sampling (where applicable)

MESURES DE BASE DE LA QUALITÉ DES DONNÉES — suite**Erreur type totale**

Les mesures de fiabilité du tableau ci-dessous constituent des estimations de l'erreur type totale (ETT) des chiffres publiés du recensement de 1976. L'erreur type totale englobe les effets de l'échantillonnage (s'il

¹ These correspond to the reliability measures that were presented as root mean square errors or reliability estimates in the 1971 Census publications. – Ces estimations correspondent aux mesures de fiabilité présentées comme écarts quadratiques moyens ou estimations de fiabilité dans les publications du recensement de 1971.

as well as the random or non-systematic components of response and processing errors. The total standard errors, however, do not include allowances for systematic errors such as coverage errors, biases due to similar misinterpretations of concepts by many respondents, or systematic processing errors. These estimates of reliability are published to give an indication of the level of error only and are not meant for use in hypothesis testing or detailed analysis.

y a lieu) ainsi que les composantes aléatoires et non systématiques des erreurs de réponse et de dépouillement. Cependant, l'erreur type totale ne comprend pas les erreurs systématiques telles que les erreurs de couverture, les biais découlant d'une mauvaise compréhension des concepts par plusieurs recensés et les erreurs systématiques de dépouillement. Ces estimations de fiabilité sont présentées uniquement pour donner une indication du niveau d'erreur dans les chiffres du recensement et ne doivent pas être utilisées pour faire des tests d'hypothèses ou effectuer une analyse détaillée.

BASIC MEASURES OF DATA QUALITY – Concluded

Users wishing to obtain TSE estimates for a given cell of data in any table in the Volume Series should follow these procedures:

1. Determine if the table is based on the complete census or on the one-third sample.
2. Determine the categories defining the cell. In some cases, this may be just a single category (e.g., age 25-29), while for a cell in a cross-classification involving several variables, there may be several categories (e.g., married males aged 25-29).
3. Referring to the TSE table locate the cell-defining category which presents the highest value. Any column can be used for this comparison. For those categories where both 100% and sample TSE values are shown, use only the 100% rows for tables based on the complete census and only the sample rows for tables based on the one-third sample (see step 1).
4. Choose the column in the TSE table whose heading is closest to the value of the given cell in the census table. Approximations for intermediate values may be achieved by linear interpolation.
5. Read off the figure from the row (determined in step 3) and column (determined in step 4) of the TSE table.

When using these figures, the user can be reasonably certain that, for the enumerated population, the true value (discounting systematic and coverage errors) lies within plus or minus twice the total standard error (e.g., for a figure of 100 with a hypothetical TSE of 3, the range would be 100 ± 6) and virtually certain that it lies within plus or minus three times the total standard error (e.g., for the same figure of 100 with a hypothetical TSE of 3, the range would be 100 ± 9).

SYMBOLS

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

MESURES DE BASE DE LA QUALITÉ DES DONNÉES – fin

Les lecteurs qui veulent calculer des estimations de l'ETT pour une case donnée d'un tableau quelconque de cette série devront procéder de la façon suivante:

1. Déterminer si le tableau est fondé sur le recensement exhaustif ou sur l'échantillon partiel (un tiers).
2. Déterminer les catégories qui définissent la case. Dans certains cas, il peut n'y avoir qu'une seule catégorie (par exemple, les 25-29 ans), tandis que dans le cas des classements recoupés mettant en jeu plusieurs variables, il peut y en avoir plusieurs (par exemple, les hommes mariés âgés de 25 à 29 ans).
3. En consultant le tableau des ETT, situer la catégorie qui a la valeur la plus élevée. N'importe quelle colonne peut servir à cette comparaison. Dans le cas des catégories pour lesquelles sont indiquées les valeurs de l'ETT à la fois pour le recensement exhaustif et pour l'échantillon, utiliser uniquement les lignes du recensement pour les tableaux fondés sur le recensement exhaustif, et uniquement les lignes de l'échantillon pour les tableaux fondés sur l'échantillon d'un tiers des ménages (voir l'étape 1).
4. Dans le tableau des ETT, choisir la colonne dont l'en-tête se rapproche le plus de celle de la case donnée dans le tableau du recensement. Les approximations des valeurs intermédiaires peuvent être effectuées par interpolation linéaire.
5. Lire la valeur correspondant à la ligne (déterminée à l'étape 3) et à la colonne (déterminée à l'étape 4) du tableau des ETT.

L'utilisateur de ces chiffres peut être raisonnablement certain que, pour la population recensée, la vraie valeur (en faisant abstraction des erreurs systématiques et de couverture) se situe dans un intervalle de plus ou moins deux fois l'erreur type totale (par exemple, pour le chiffre 100 et une ETT hypothétique de 3, l'intervalle serait de 100 ± 6). L'utilisateur peut être presque certain que cette valeur se situe dans un intervalle de plus ou moins trois fois l'erreur type totale (par exemple, pour le chiffre 100 et une ETT hypothétique de 3, l'intervalle serait de 100 ± 9).

SIGNES CONVENTIONNELS

- .. non disponible.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.

Publications of the 1976 Census of Canada

Publications du recensement du Canada de 1976

This bulletin is one of a series of volume reports of the 1976 Censuses of Population, Housing and Agriculture.

Most of the bulletins in the regular Volume Series are data-oriented. Other reports containing more methodological, interpretative and evaluative content, are also issued. These are as follows:¹

- (a) 1976 Census Administrative Report
- (b) 1976 Census Quality of Data Series
- (c) 1976 Census Research Series
- (d) Introductory Reports to each of the regular Volume Series.

Also available on request is a series of Reference Lists developed largely for internal verification of basic geographical and population hierarchies, which could provide useful information to the outside user.

Users will note that the majority of census publications are colour-coded to identify with the four themes central to the presentation and to maintain comparability with the 1971 series, e.g., blue for Geographical and Demographic content, brown for Housing, Household and Family data, red for Economic Characteristics and gold for the series based on Agriculture.

These reports are listed in the *1976 Census Catalogue* which can be obtained free of charge from:

Publications Distribution,
Room 1200, Statistics Canada,
Ottawa, Ontario.
K1A 0T6

To order census publications, send a cheque or money order made payable to the Receiver General for Canada, to the above address.

In addition to published documents, the Census of Canada can provide other products and services about census: data on microform (film or fiche), computer tapes, computer print-outs, user-specified tables, maps, geographic files, geographic lists, etc.

For information write:

Census Information Services,
Statistics Canada,
Ottawa, Ontario.
K1A 0T7

or call (613) 996-5254.

Inquiries about census and other Statistics Canada information can also be directed to Statistics Canada Regional Offices located in: St. John's (Nfld.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

¹ It should be noted that these publications are generally released somewhat later than the data reports.

Ce bulletin fait partie de la série des publications des recensements de 1976 de la population, du logement et de l'agriculture.

La plupart des bulletins de la série ordinaire des volumes présentent des données. On publie également d'autres bulletins dont le contenu vise plutôt la méthodologie, l'interprétation et l'évaluation. Ces bulletins sont les suivants¹:

- a) Rapport administratif du recensement de 1976
- b) Série relative à la qualité des données du recensement de 1976
- c) Série du recensement de 1976 relative à la recherche
- d) Introductions à chacune des séries ordinaires des volumes.

Vous pouvez aussi vous procurer sur demande une série de Listes de référence, servant surtout à la vérification interne des catégories géographiques et démographiques de base, qui pourraient fournir des renseignements utiles aux utilisateurs à l'extérieur de Statistique Canada.

Les utilisateurs constateront que la plupart des publications du recensement sont classées par couleur, chaque couleur correspondant à l'un des quatre thèmes du recensement; cela permet d'assurer la comparabilité avec les séries de 1971; ainsi, le bleu est réservé aux publications de nature géographique et démographique, le brun, aux bulletins sur le logement, les ménages et les familles, le rouge, aux publications de nature économique et la couleur or, à la série relative à l'agriculture.

Ces bulletins figurent au *Catalogue du recensement de 1976* que vous pouvez obtenir gratuitement auprès de:

Distribution des publications
Pièce 1200, Statistique Canada
Ottawa (Ontario)
K1A 0T6

Envoyez vos commandes de publications du recensement à cette même adresse en y joignant un chèque ou un mandat postal à l'ordre du Receveur général du Canada.

Outre les publications, le Recensement du Canada offre divers autres produits et services: données en microcopie (film ou fiche), bandes pour ordinateurs, états mécanographiés, totalisations spéciales, cartes, fichiers et listes géographiques, etc.

Pour obtenir des renseignements, écrivez à:

Information recensement
Statistique Canada
Ottawa (Ontario)
K1A 0T7

ou téléphonez au numéro (613) 996-5254.

Toute demande de renseignement sur le recensement et les autres données de Statistique Canada peut également être transmise aux bureaux régionaux de Statistique Canada situés à St. John's (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton et Vancouver.

¹ Il convient de remarquer que ces bulletins sont généralement publiés quelque temps après les bulletins présentant des données.
