ET LE SEXE

INTRODUCTION

This report gives final figures from the 1971 Census for population and labour force 15 years and over (as reported for the week prior to enumeration), showing work experience classified by sex, for Canada and provinces, urban size groups, rural non-farm and rural farm and census divisions. Data are also shown for census metropolitan areas, urbanized core and fringe, census agglomerations of 25,000 and over, urbanized core and fringe, incorporated cities and towns and other municipal subdivisions of 10,000 and over.

In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. It should be noted that there are indications that the labour force counts for Quebec may be somewhat underestimated due to response problems. Further information regarding the labour force counts is available in the Population and Housing Research Memorandum (PH-EC-4) "Background Information on the 1971 Census Labour Force Data". This paper can be obtained on request from the Census User Inquiry Service.

Comparability with the Labour Force Survey: The Labour Force Survey is inclusive of 14-year olds and exclusive of residents of the Yukon and Northwest Territories, Indians on reserves, members of the Armed Forces, overseas households and inmates of institutions. Though the underlying labour force concepts used in the 1971 Census and the monthly survey were designed to be as consistent as possible the above differences in coverage plus different methodology, questions and operational procedures result in some loss of comparability of data. Further information on the comparison of Census and Labour Force Survey data is available in the introductory report to this volume (Catalogue No. 94-701); or in the Population and Housing Research Memorandum (PH-EC-4) previously referenced.

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The latter figures, of course, represent the official population counts (see Catalogue No. 92-715).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Ce bulletin présente les chiffres définitifs du recensement de 1971 en ce qui concerne la population et la population active de 15 ans et plus (pour la semaine précédant le dénombrement), selon le sexe et les antécédents d'activité, pour le Canada et les provinces, les régions urbaines par groupe de taille, les régions rurales non agricoles et rurales agricoles et les divisions de recensement. On y trouve également les données pour les régions métropolitaines de recensement avec leur noyau urbanisé et leur banlieue, les agglomérations de recensement de 25,000 habitants et plus avec leur noyau urbanisé et leur banlieue, les cités et villes constituées, et les autres subdivisions municipales de 10,000 habitants et plus.

Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. Il est à noter que, suivant certaines indications, la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation. On trouvera de plus amples renseignements concernant les chiffres de la population active dans une Note de recherche sur la population et le logement (PH-EC-4) intitulée "Étude des données du recensement de 1971 sur la population active". Cette note de recherche peut être obtenue sur demande au Service-utilisateurs du recensement.

Comparabilité avec l'enquête sur la population active: L'enquête sur la population active englobe les personnes de 14 ans, mais ne tient pas compte des résidents du Yukon et des Territoires du Nord-Ouest, des Indiens dans les réserves, des membres des Forces armées, des ménages outre-mer ni des pensionnaires d'institution. Les concepts fondamentaux d'activité utilisés au recensement de 1971 et dans l'enquête mensuelle se veulent aussi convergents que possible, mais les différences de champ d'observation mentionnées ci-dessus et les différences de méthodologie, de questions et de procédure réduisent la comparabilité des données. On peut obtenir plus de renseignements sur la comparaison des données du recensement et de l'enquête sur la population active dans l'introduction de ce volume (n° 94-701 au catalogue) ou dans la Note de recherche sur la population et le logement (PH-EC-4) citée plus haut.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données sont intégrales. Bien entendu, ce sont ces dernières données qui représentent les chiffres officiels de population (voir la publication n° 92-715 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

(1) POPULATION ACTIVE AU COURS DE LA SEMAINE PRECEDENT LE RECENSEMENT.

Statistics Canada Library
Bibliothèque Statistique Canada

1010017015

DEFINITIONS

Participation rate: The percentage the labour force forms of the population 15 years and over in the category or area.

Work experience: Refers to work experience prior to the census date derived from information on "when last worked" and on whether or not the person worked in 1970 as indicated by the reporting of some weeks worked in 1970.

Urban: Includes the population living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile.

Rural: Includes all the remaining population.

Urban size groups: Municipalities classed as urban under (1) and (2) above are classified by size groups according to their population. However, all municipalities (or parts) lying within the urbanized core of census metropolitan areas or other census agglomerations are allocated to the size group of the whole urbanized core.

Rural farm population: Includes the population living in dwellings situated on farms in rural areas. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus, the population living on "census-farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their farm holdings (e.g., in a neighbouring town or village).

Census Division: Includes a variety of titles such as the administrative units of the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario called "counties"; British Columbia's regional districts; Ontario's regional municipalities, territorial districts, district municipality and metropolitan municipality; and finally the use of the title "census division" itself, created by Statistics Canada in collaboration with the provincial governments of Newfoundland, Manitoba, Saskatchewan and Alberta, since these provinces do not possess administrative units comparable to the counties of other provinces. The few regional and district municipalities in Ontario were created by the Ontario Government beginning in 1969, while legislation forming the 29 new regional districts in British Columbia replacing the former 10 census divisions was completed in 1968.

Census Metropolitan Area (CMA): The main labour market of a continuous built-up area having 100,000 population or more.

Census Agglomeration (CA): A statistical area having an urban centre with a population over 1,000 and adjacent built-up area of at least 1,000 population and a minimum density of 1,000 persons per square mile. In this report only those census agglomerations of 25,000 and over are shown.

Urbanized Core: A continuous built-up area covered by a street pattern design and meeting a density of 1,000 persons per square mile.

Fringe: Part of CMA or of a CA outside the urbanized core. It corresponds to the immediate zone of influence of a multi-municipal urban centre with urban and rural parts.

Municipal subdivision: This term is used only in census publications to describe all categories of municipalities, both rural and urban e.g., municipal districts, boroughs, townships, as well as census subdivisions equivalent to municipalities.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 94-701). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

DÉFINITIONS

Taux d'activité: Pourcentage de la population active par rapport à la population de 15 ans et plus de la catégorie ou du secteur donné.

Antécédents de travail: On détermine les antécédents de travail à partir des renseignements recueillis sur la date du dernier travail recoupés avec les renseignements obtenus sur le nombre de semaines travaillées en 1970.

Régions urbaines: La population des régions urbaines comprend la population des: 1) cités, villes et villages constitués de 1,000 habitants et plus; 2) localités non constituées de 1,000 habitants et plus ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré.

Régions rurales: La population des régions rurales comprend tout le reste de la population.

Régions urbaines par groupe de taille: Les municipalités urbaines mentionnées en 1) et 2) ci-dessus sont classées selon le groupe de taille de leur population. Toutefois, toutes les municipalités (ou parties de municipalités) constituant le noyau urbanisé des régions métropolitaines de recensement ou des autres agglomérations de recensement sont classées dans le groupe de taille de l'ensemble du noyau urbanisé.

Population rurale agricole: La population rurale agricole comprend toutes les personnes occupant des logements de ferme situés dans des régions rurales. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour \$50 ou plus de produits agricoles au cours de l'année précédente. Toutes les personnes vivant dans une de ces exploitations situées dans une région rurale sont classées sous la rubrique "régions rurales agricoles", quelle que soit leur profession. La population des "fermes de recensement" comprend donc certaines personnes qui n'ont rien à voir avec l'exploitation agricole et qui tirent leur revenu de l'exercice d'activités non agricoles. En contrepartie, les exploitants agricoles et leur famille qui n'habitent pas leur exploitation agricole (par ex., ceux qui habitent une localité voisine) ne sont pas pris en compte.

Division de recensement: Cette désignation englobe divers titres tels que les unités administratives des provinces de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse, du Nouveau-Brunswick, du Québec et de l'Ontario, appelées "comtés"; les districts régionaux de la Colombie-Britannique; les municipalités régionales, les districts territoriaux, la municipalité de district et la municipalité métropolitaine de l'Ontario; et enfin, la "division de recensement" créée par Statistique Canada en consultation avec les gouvernements provinciaux de Terre-Neuve, du Manitoba, de la Saskatchewan et de l'Alberta, vu que ces provinces ne possèdent pas d'unités administratives comparables aux comtés des autres provinces. Les quelques municipalités régionales et de district de l'Ontario ont été créées par le gouvernement de l'Ontario à partir de 1969, tandis que la loi formant les 29 nouveaux districts régionaux en Colombie-Britannique en remplacement des 10 anciennes divisions de recensement a été finalement adoptée en 1968.

Région métropolitaine de recensement (R.M.R.): Principal marché du travail d'une zone bâtie en continu comptant 100,000 habitants et plus.

Agglomération de recensement (A.R.): Unité statistique ayant un centre urbain de 1,000 habitants et plus, adjacent à une zone bâtie d'au moins 1,000 habitants et d'une densité minimum de 1,000 habitants au mille carré. Dans ce bulletin, les données ne sont publiées que pour les agglomérations de recensement de 25,000 habitants et plus.

Noyau urbanisé: Zone bâtie en continu recouverte d'un réseau de rues et ayant une densité de 1,000 habitants et plus au mille carré.

Banlieue: Partie d'une R.M.R. ou d'une A.R. située en dehors du noyau urbanisé. Elle correspond à la zone d'influence immédiate d'un centre urbain multimunicipal ayant une partie urbaine et une partie rurale.

Subdivision municipale: Ce terme n'est utilisé que dans les publications du recensement pour désigner toutes les catégories de municipalités tant rurales qu'urbaines (par ex., municipalités de district, boroughs, cantons) ainsi que toutes les subdivisions de recensement équivalant à des municipalités.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas connues au moment de la publication. Elles seront disponibles dans l'introduction de ce volume (nº 94-701 au catalogue). Les utilisateurs désireux de connaître ce renseignement avant la publication du bulletin d'introduction devront s'adresser au Service-utilisateurs du recensement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.

Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-rélieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaires". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Service-utilisateurs, Secteur du recensement, Statistique Canada, Ottawa K1A 0T7.

Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. Il faut envoyer les demandes au Service-utilisateurs des données du recensement en précisant bien les classements ou recoupements et les régions géographiques. Il faut inclure les catégories exactes pour chaque caractéristique et une ébauche de la disposition des tableaux.

Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs du Secteur du recensement de Statistique Canada.
