FORME JURIDIQUE DE LA FERME

Population, Tenure, Age and Residence of Operators, Type of Farm Organization, for Provinces and Census Divisions, 1971

This report presents the final count of the 1971 Census of Agriculture for population living on census-farms (farm population), tenure, age and residence of operators and the type of farm organization as reported in the 1971 Census.

A "census-farm" was defined as an agricultural holding of 1 acre or more with sales of agricultural products during the preceding 12 months of \$50 or more. This definition was the same as that used in the Censuses of 1961 and 1966 but differed from the Censuses of 1956 and earlier.

In the 1971 Census, a hired manager was asked to report whether the land operated by him was owned or rented by his employer. This was a change from previous censuses wherein a farm operated by a hired manager was classified as being managed rather than owned or rented.

The count of farm population includes all persons, regardless of their occupations, living in a dwelling situated on a census-farm. It includes both urban and rural farm population. In the case of institutions located on a census-farm, only the manager and members of his household were counted as farm population.

The census-farm operator is the person responsible for the day-to-day decisions made in the operation of the holding, whether as owner, tenant or hired manager. As only one operator is listed for each census-farm, the number of operators is the same as the number of census-farms. If, for example, the holding was operated by a partnership, only one partner was considered to be the census-farm operator.

Population, mode d'occupation, âge et résidence des exploitants, forme juridique de la ferme, provinces et divisions de recensement, 1971

Ce bulletin présente les chiffres définitifs de la population demeurant dans des fermes de recensement (population agricole), le mode d'occupation, l'âge et la résidence des exploitants et la forme juridique de la ferme d'après le recensement de 1971.

Une "ferme de recensement" était une exploitation agricole d'une acre ou plus qui avait vendu au cours des 12 derniers mois pour \$50 ou plus de produits agricoles. Cette définition était la même que celle employée pour les recensements de 1961 et 1966, mais différait de celle des recensements de 1956 et antérieurs.

Au recensement de 1971 un gérant devait déclarer si la terre qu'il exploitait appartenait à son employeur ou si elle était prise en location. Ceci constituait un changement des recensements antérieurs où la ferme exploitée par un gérant était déclarée comme gérée sans tenir compte si elle était possédée ou louée.

Le chiffre de la population agricole comprend toutes les personnes, indépendamment de leur profession, demeurant dans un logement situé dans une ferme de recensement. Il vise la population agricole, tant rurale qu'urbaine. Dans le cas d'institutions situées dans des fermes de recensement, seuls le gérant et les membres de son ménage ont été comptés comme population agricole.

L'exploitant de fermes de recensement est la personne chargée des opérations au jour le jour de l'exploitation, soit à titre de propriétaire, de locataire ou de gérant. Étant donné qu'un seul exploitant est attribué à chaque ferme de recensement, le nombre d'exploitants est le même que le nombre de fermes de recensement. Si, par exemple, la ferme est exploitée en société, un seul des associés est considéré comme exploitant de la ferme de recensement.
