Statistics Canada Statistique Canada

Canada

Data in many forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

| | | | |
|------------|----------|-----------|----------|
| St. John's | 772-4073 | Winnipeg | 949-4020 |
| Halifax | 426-5331 | Regina | 359-5405 |
| Montréal | 283-5725 | Edmonton | 420-3027 |
| Ottawa | 992-4734 | Vancouver | 666-3691 |
| Toronto | 966-6586 | | |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

| | |
|---|----------------------|
| Newfoundland & Labrador | Zenith 07037 |
| Nova Scotia, New Brunswick & Prince Edward Island | 1-800-565-7192 |
| Québec | 1-800-361-2831 |
| Ontario | 1-800-268-1151 |
| Manitoba | 1-800-282-8006 |
| Saskatchewan | 1 (112)-800-667-3524 |
| Alberta | 1-800-222-6400 |
| British Columbia (South & Central) | 112-800-663-1551 |
| Yukon & Northern B.C. (area served by NorthwesTel Inc.) | Zenith 08913 |
| Northwest Territories | Zenith 22015 |

How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

| | | | |
|------------|----------|-----------|----------|
| St. John's | 772-4073 | Winnipeg | 949-4020 |
| Halifax | 426-5331 | Regina | 359-5405 |
| Montréal | 283-5725 | Edmonton | 420-3027 |
| Ottawa | 992-4734 | Vancouver | 666-3691 |
| Toronto | 966-6586 | | |

Un service d'appel sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres de référence régionaux:

| | |
|---|----------------------|
| Terre-Neuve et Labrador | Zénith 07037 |
| Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard | 1-800-565-7192 |
| Québec | 1-800-361-2831 |
| Ontario | 1-800-268-1151 |
| Manitoba | 1-800-282-8006 |
| Saskatchewan | 1 (112)-800-667-3524 |
| Alberta | 1-800-222-6400 |
| British Columbia (South & Central) | 112-800-663-1551 |
| Yukon & Northern B.C. (area served by NorthwesTel Inc.) | Zenith 08913 |
| Northwest Territories | Zenith 22015 |

Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

LAND USE

This report presents data relating to the distribution of size and use of land from the 1981 Census of Agriculture. Table 2a shows the historical comparison with the censuses of 1951, 1961, 1971 and 1976 at the provincial level. Table 12 shows the geographical breakdown of the data by province, agricultural region and census division for 1981. An outline map of the census division boundaries is also included.

Census Farm

The basic unit for which a questionnaire was collected was termed a "census farm". This term is defined in the 1981 Census as a farm, ranch or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more. Operations which anticipated sales of \$250 or more in 1981 were also included.

The definition is different from that used in recent censuses in that the requirement for 1 acre or more of land has been dropped and the sales limit has been changed from \$50. Where comparisons between 1981 data and previous censuses are shown, the data for 1981 using the \$250 definition are compared to data using the \$50 definition from previous censuses.

Total Farm Areas

The operator was to include all land operated, whether owned, rented or leased from others. Land rented or leased to others was to be excluded.

Crown lands, usually pasture land, which were operated under a lease arrangement with federal, provincial or municipal governments, are reported as part of the farming operation of the person to whom the land was leased. However, land which was used under a per head grazing permit or fee is not included.

Large areas of timber land or other non-agricultural land held by the operator, but operated apart from the farm business, are excluded.

The area of farms reported at any geographic level represents the area of land operated by farmers whose headquarters are located in that geographical unit. Therefore, any part of the operation located outside that unit will be included inside it and the reported area will be different from the actual agricultural area within the boundaries of that unit. This discrepancy tends to become less significant as the number of farms in the unit increases.

UTILISATION DE LA TERRE

Ce bulletin présente les données ayant rapport à la répartition de la taille de la ferme et l'utilisation de la terre d'après le recensement de l'agriculture de 1981. Le tableau 2A présente la comparaison historique avec les recensements de 1951, 1961, 1971 et 1976 au niveau des provinces. Le tableau 12 illustre la répartition géographique des données par province, région agricole et division de recensement en 1981. Une carte-index des limites de division de recensement est annexée.

Ferme de recensement

On a appelé "ferme de recensement" l'unité de base pour laquelle un questionnaire du recensement a été recueilli. On l'a définie au recensement de 1981 comme une ferme, un ranch ou une autre exploitation agricole dont les ventes de produits agricoles au cours des 12 derniers mois se sont élevées à \$250 ou plus. Les exploitations prévoyant des ventes de \$250 ou plus en 1981 étaient incluses aussi.

Cette définition diffère sur deux points de celle qui a été employée aux recensements antérieurs: d'abord, le critère prévoyant une superficie de base d'une acre ou plus a été abandonné, puis le seuil des ventes fixé à \$50 a été modifié. Lorsque nous présentons des comparaisons entre les données du recensement de 1981 et celles de recensements antérieurs, les données de 1981 utilisant le seuil de \$250 sont comparées à celles utilisant le seuil de \$50.

Superficie totale des fermes

L'exploitant devait inclure toute la terre exploitée, qu'elle soit possédée ou prise en location. La terre louée à autrui devait être exclue.

Les terres de la Couronne, habituellement des pâturages, qui étaient exploitées en vertu d'un bail conclu avec l'administration fédérale, provinciale ou locale, sont déclarées comme faisant partie de l'exploitation agricole de la personne à qui la terre a été louée. Toutefois, les terres utilisées en vertu d'un permis ou d'un droit de pacage par tête de bétail ne sont pas prises en compte.

Les grandes terres à bois ou autres terres non agricoles appartenant à un exploitant, mais non exploitées comme entreprises agricoles, ne sont pas comptées.

La superficie des fermes déclarée à tout niveau géographique représente la superficie des terres exploitées par les exploitants agricoles dont le siège est situé dans l'unité géographique. Par conséquent, toute partie d'une ferme située en dehors de cette unité sera déclarée comme se trouvant à l'intérieur de celle-ci, et la superficie déclarée sera différente de la superficie réelle des terres agricoles situées dans l'unité. Cet écart s'amoindrit à mesure que s'accroît le nombre de fermes dans une même unité.

Use of Land

All farm land is classified according to use under two major divisions: improved land and unimproved land. Data in the land use tables may not add exactly in some cases due to rounding.

Improved Land

The area of improved land consists of the total of the areas reported for the following four land categories: crop land, improved pasture, summerfallow and other improved land.

(1) **Cropland** - Included in this item is the total area of land sown or to be sown for harvest in 1981. Cropland includes the total area of all field crops, plus the areas of fruits, vegetables, greenhouses, mushroom houses and nursery products. The sum of the individual crops is not necessarily equal to cropland since occasionally two crops may be harvested from the same land in one year and crops reported in fractions of acres are rounded.

(2) **Improved pasture** - All land which was being used for pasture or grazing and which has had some improvements made to it in recent years is included. Improvements include cultivation, drainage, irrigation, fertilization, seeding or spraying.

(3) **Summerfallow** - The enumerator was instructed to include in this item land from which no crop was to be harvested during 1981, but which was to be cultivated, worked or sprayed during the year for weed control and for moisture conservation.

Areas where the crop was ploughed under as green manure were enumerated as summerfallow, but land ploughed or cultivated in the summer after a crop (such as hay or fall rye) had been harvested, was to be enumerated as cropland.

(4) **Other improved land** - This item includes the area of barnyards, home gardens, lanes and roads on farms. It also includes areas of cultivated land that were lying idle, being neither summerfallowed nor cropped, and areas of new breaking that had not been seeded to a crop.

Utilisation de la terre

Toutes les terres agricoles sont classées suivant leur utilisation dans deux catégories principales: terre améliorée et terre non améliorée. Dans certains cas, la somme des chiffres présentés dans les tableaux sur l'utilisation de la terre peut ne pas correspondre aux totaux indiqués à cause de problèmes d'arrondissement.

Terre améliorée

La superficie de terre améliorée est la somme des superficies déclarées appartenant aux quatre catégories suivantes: terre en culture, pâturage amélioré, jachères et autre terre améliorée.

(1) **Terre en culture** - Cette rubrique comprend la superficie totale des terres en culture ensemencées ou à ensemencer pour la récolte de 1981. La terre en culture comprend la superficie de toutes les grandes cultures plus les superficies des fruits et des légumes, serres, champignonnières et produits de pépinière. La somme des superficies cultivées peut s'écarte de la superficie totale des terres en culture pour deux raisons: la récolte de deux cultures sur la même terre au cours d'une année, et l'arrondissement des chiffres lorsque les superficies en culture sont inférieures à une acre.

(2) **Pâturage amélioré** - Est incluse toute terre utilisée comme pâturage ou pacage et améliorée de quelque façon ces dernières années. Les améliorations peuvent comprendre: mise en culture, drainage, irrigation, fertilisation, ensemencement ou pulvérisation.

(3) **Jachères** - Le recenseur avait pour instruction de prendre en compte dans cette rubrique les terres qui n'allait pas produire de récolte en 1981, mais qui seraient cultivées, labourées ou poudrées au cours de l'année pour empêcher la croissance des mauvaises herbes et conserver l'humidité.

Les superficies dont les cultures ont été enfouies pour constituer de l'engrais vert ont été comptées comme jachères, mais les terres labourées ou cultivées en été après la récolte d'une culture (de foin ou de seigle d'automne, par exemple) devaient être comptées comme terres en culture.

(4) **Autre terre améliorée** - Cette rubrique comprend la superficie des basses-cours, jardins potagers, chemins et routes dans les fermes de recensement. Elle comprend également les superficies de terre cultivée qui sont demeurées incultes, n'ayant pas été mises en jachères ni en culture et les superficies de nouveaux labours qui n'avaient pas été ensemencées en vue d'une récolte.

Unimproved Land

The area of unimproved land consists of the total areas reported for woodland and other unimproved land.

(1) **Woodland** - This includes farm woodlots, land leased for cutting, sugar bush and cut-over land with young growth which has or will have value as timber, fuelwood or Christmas trees. The area of trees planted for wind-breaks was also to be included. It excludes large timber tracts which are run as a separate business from the farm. There is some evidence that changes in the area of this item between censuses may be due to differences in interpretation. This would be particularly true in areas of bushland.

(2) **Other unimproved land** - Areas of native pasture or hay land that had not been cultivated, brush pasture, grazing or waste land, sloughs, marsh and rocky land, etc., are all included in this item.

Conversion of "Imperial" to "Metric"

This report presents area data in metric (hectares) as well as imperial (acres) units. This conversion from acres to hectares was made by Statistics Canada using the factor 0.404 685 6 hectare equals one acre. Where areas are reported in square feet, the metric equivalent used is square metres. The conversion factor is 0.092 903 04 square metre equals one square foot. Data expressed in metric units may not add exactly due to rounding.

Conversion of Arpents to Acres

In the province of Quebec, some respondents reported land areas in arpents. The conversion to acres was made by Statistics Canada using the factor 1,000 arpents equal 845 acres.

Availability of Additional Information

The data presented in this bulletin represents only the most frequently requested tabulations. Data for small geographical areas are available on request as photocopies of computer printout, on microfiche or magnetic tape. Specific requests for data not already tabulated may also be serviced. Details of the methodologies for the processing of the data are not described in the text but may be of interest to selected users. Further information may be obtained by contacting: Agriculture Division, Census of Agriculture Section, User Services Unit, Statistics Canada, Ottawa K1A 0T6, (613) 995-4936.

Terre non améliorée

La superficie de terre non améliorée représente les superficies totales de terres à bois et boisés de ferme et autre terre non améliorée.

(1) **Terre à bois et boisés de ferme** - Cette rubrique comprend les terres à bois et les boisés de ferme, les terres louées pour la coupe du bois, les érablières et les terrains déboisés où se trouvent des jeunes pousses ou des arbres qui ont ou auront de la valeur comme sciages, bois de chauffage ou arbres de Noël. La superficie des brise-vent devait également être prise en compte. Ne comprend pas les grandes sections de coupe du bois exploitées indépendamment de la ferme. Il se peut que les variations de superficie à cette rubrique d'un recensement à l'autre proviennent des différences d'interprétation, notamment pour ce qui est des superficies de buissons.

(2) **Autre terre non améliorée** - Les superficies de pâturages naturels ou les terres à foin non cultivées, les pâturages en broussailles, les terres incultes ou de pacage, les marécages, les marais et les terres rocheuses, etc., sont tous pris en compte dans cette rubrique.

Conversion d' "impérial" à "métrique"

Ce bulletin présente les données de superficie en unités métriques (hectares) ainsi qu'en unités impériales (acres). La conversion d'acres en hectares a été faite à Statistique Canada en employant le facteur 0.404 685 6 hectare égale une acre. Quand les superficies sont déclarées en pieds carrés, l'équivalent métrique employé est le mètre carré. Le facteur de conversion est 0.092 903 04 mètre carré égale un pied carré. Certains chiffres métriques ayant été arrondis, leur somme peut ne pas correspondre exactement aux totaux indiqués.

Conversion des arpents en acres

Dans la province de Québec, certains recensés ont exprimé l'étendue des superficies en "arpents". La conversion en acres a été faite à Statistique Canada en utilisant le facteur suivant: 1,000 arpents égalent 845 acres.

Disponibilité des données supplémentaires

Les données de ce bulletin représentent seulement les totalisations le plus souvent demandées. Les utilisateurs peuvent obtenir sur demande des données pour de petites régions géographiques sous la forme de photocopies d'imprimés d'ordinateur, sur microfiches ou sur bandes magnétiques. Nous pouvons aussi donner suite aux demandes de données qui ne sont pas déjà totalisées. Le détail des méthodes du traitement des données n'est pas décrit dans le texte mais il peut être d'intérêt à certains utilisateurs. Pour de plus amples renseignements, prière de s'adresser à la Division de l'agriculture, Section du recensement de l'agriculture, Sous-section des services aux utilisateurs, Statistique Canada, Ottawa K1A 0T6, (613) 995-4936.

Confidentiality

All data released by the Census of Agriculture are subject to the confidentiality restrictions of Statistics Canada. To prevent disclosure of confidential material, data for areas of less than 10 farms will not be published separately, but merged with a geographically adjacent area. Also, certain data have been suppressed to prevent disclosure of operations of an identifiable individual agricultural holding. In such cases, the relevant data cell will be replaced with an "x".

Confidentialité

Toutes les données du recensement de l'agriculture sont soumises aux restrictions qu'impose Statistique Canada pour protéger leur caractère confidentiel. Par conséquent, pour empêcher la divulgation de renseignements secrets, les données pour les régions comptant moins de 10 exploitations agricoles ne seront généralement pas publiées mais seront incorporées à celles d'une région voisine. De même, certaines données ont été supprimées de façon à éviter la divulgation des opérations d'une exploitation agricole identifiable. Pour ces cas particuliers, les données pertinentes seront remplacées par un "x" dans les tableaux.

SYMBOLS

- nil or zero.
- less than one unit.
- .. not available.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

- néant ou zéro.
- moins d'une unité.
- .. non disponible.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.
