INTRODUCTION

This report presents information on individual incomes obtained from the 1961 Census of Canada. Data are shown for provinces, counties, incorporated cities, towns and villages of 10,000 and over, and census metropolitan areas.

These statistics were collected from a 20 per cent sample of private non-farm households. The sample excluded farm households, institutions, collective households such as hotels and large lodging houses and all households in the Northwest Territories. In addition, persons away from their usual place of residence such as, persons travelling abroad, persons in families of military personnel stationed in Europe, were excluded from the sample.

The total population, 15 years and over, on June 1, 1961, was 12,046,325. The estimated number of individuals for whom figures in this report are published is 10,101,772. Approximately two thirds of the persons excluded from the estimates lived in rural farm households while one-third resided in collective households, institutions, or, in some cases, in farms in urban centres which were also excluded from the sample.

The sample data were collected from every fifth non-farm private household in each of approximately 31,000 enumeration areas in Canada. Only those individuals 15 years of age and over were asked to report information on income. The sample was weighted to the total number of individuals in each enumeration area to obtain aggregate estimates. Because of the weighting system used, the estimated number of individuals for some of the smaller counties or cities may differ somewhat from the totals compiled from the complete Census enumeration and published in Volume I, Parts 1, 2 and 3, *Population*.

Average income figures in this report are calculated only for individuals reporting income; individuals reporting no income are shown separately and excluded from the averages.

Where the estimated total is less than 250 the distributions are not shown but indicated by the symbol (-). The symbol (-) indicates that there was no income return within the income group.

DEFINITIONS

Household

A household consists of a person or group of persons occupying one dwelling. It usually consists of a family group, with or without lodgers, employees, etc. However, it may consist of a group of unrelated persons, of two or more families sharing a dwelling, or of one person living alone. A dwelling is defined as a structurally separate set of living quarters with a private entrance either from outside the building, or from a common hall, lobby, vestibule or stairway inside.

Individual

The term individual refers to the non-farm population 15 years of age and over.

Income

All individuals residing in sample households were asked to report total income received from each of the sources listed below for the twelve-month period ending May 31, 1961, or, if this figure could not be provided, for the calendar year 1960.

The sources were:

- (a) gross cash wages, salaries, commissions and tips (before deductions for income tax, pensions, unemployment insurance, etc.);
- (b) net income (gross income less operating expenses) received from own business or from a professional practice, but exclusive of net income earned from operation of a farm;
- (c) family allowances;
- (d) old-age assistance and old-age security payments;
- (e) other government transfer payments, e.g., unemployment insurance, workmen's compensation, veterans' pensions and allowances, disability pensions, mothers' allowances, etc.;
- (f) retirement pensions;
- (g) bond and bank interest and dividends;
- (h) other investment income, e.g., net rents, mortgage interest, estate income, etc.;
- (i) all other money income, e.g., annuities, income from roomers and boarders, alimony, etc.

Individual income is the total of the above sources of income reported by each person 15 years of age and over.

(Concluded on inside back cover)

Le présent rapport contient des renseignements obtenus lors du recensement de 1961 sur les revenus des particuliers. Les chiffres sont donnés pour les provinces, comtés, cités, villes et villages constitués de 10,000 habitants et plus, et pour les zones métropolitaines de recensement.

Les chiffres ont été obtenus d'un échantillon de 20 p. 100 des ménages non agricoles privés. Étaient exclus de l'échantillon les ménages agricoles, les institutions, les ménages collectifs tels que les hôtels et les grandes maisons de chambres, et tous les ménages des Territoires du Nord-Ouest. Étaient exclues, en outre, les personnes absentes de leur résidence habituelle, telles que les personnes en voyage à l'étranger et les membres des familles de militaires en garnison en Europe.

La population totale âgée de 15 ans et plus, le 1er juin 1961, était de 12,046,325. Le nombre approximatif de personnes à l'égard desquelles le présent rapport donne des chiffres est d'environ 10,101,772. Près des deux tiers des personnes exclues des estimations demeuraient dans des ménages agricoles et un tiers dans des ménages collectifs, dans des institutions ou, dans certains cas, dans des fermes situées dans des centres urbains, lesquelles étaient aussi exclues de l'échantillon.

Les chiffres échantillon ont été obtenus de chaque cinquième ménage non agricole privé dans chacun des quelque 31,000 secteurs de dénombrement au Canada. Seules les personnes âgées de 15 ans et plus devaient fournir des renseignements sur leur revenu. En vue d'obtenir des estimations d'ensemble, l'échantillon a été pondéré en fonction de toutes les personnes dans chaque centre de dénombrement. En raison de la méthode de pondération employée, les estimations quant au nombre de personnes dans certains petits comtés ou certaines petites villes différeront peut-être quelque peu des chiffres établis d'après le recensement complet et publiés dans le 1er volume, parties 1, 2 et 3, *Population*.

Le revenu moyen, indiqué dans le présent rapport, n'est calculé que pour les personnes bénéficiaires d'un revenu. Celles qui n'ont déclaré aucun revenu sont indiquées à part et exclues des moyennes.

là où le total évalué est de moins de 250, les répartitions ne sont pas données mais indiquées plutôt par le signe conventionnel (-). Le signe (-) indique qu'aucun revenu n'a été déclaré dans la catégorie de revenu.

DÉFINITIONS

Ménage

Un ménage se compose d'une personne ou d'un groupe de personnes occupant un logement. Il consiste ordinairement en un groupe familial avec ou sans locataires de chambres, employés ou autres personnes. Il peut aussi se composer de personnes non apparentées, de deux familles ou plus partageant le même logement, ou d'une personne vivant seule. Un logement est une série de locaux d'habitation distincts quant à la structure avec entrée privée de l'extérieur ou donnant sur un corridor, un vestibule ou un escalier intérieur commun.

Personnes

Le terme "personnes" s'applique à la population non agricole âgée de 15 ans et plus.

Revenu

Toutes les personnes qui faisaient partie des ménages échantillon devaient déclarer leur revenu provenant de chacune des sources ci-dessous mentionnées durant les 12 mois terminés le 31 mai 1961 ou, si ce chiffre ne pouvait être obtenu, durant l'année civile 1960.

Les sources:

- a) salaire, traitement, commission, pourboires bruts (avant impôt sur le revenu, pensions, assurance-chômage, etc.);
- b) revenu net (revenu brut moins frais d'exploitation) provenant d'une entreprise autonome ou de l'exercice d'une profession mais sans le revenu net provenant de l'exploitation d'une ferme;
- c) allocations familiales;
- d) prestations de sécurité de la vieillesse et d'assistance-vieillesse;
- e) autres paiements de transfert des gouvernements (assurance-chômage, indemnisation des accidentés du travail, pensions et allocations aux anciens combattants, pensions d'invalidité, allocations maternelles, etc.);
- f) pensions de retraite;
- g) intérêt et dividendes (obligations et banques);
- h) autre revenu de placement (loyer net, intérêt bancaire, revenu successoral, etc.);
- i) tout autre revenu monétaire (rentes, revenu provenant de locataires de chambres et de pensionnaires, pension alimentaire, etc.).

Le revenu particulier est l'ensemble du revenu provenant des sources ci-dessus mentionnées et déclaré par chaque personne âgée de 15 ans et plus.

Rural and urban

Centres of at least 1,000 persons, whether incorporated or not, are classed as urban, as well as the urbanized fringes of metropolitan areas, other major urban areas, and smaller cities if the city together with its urbanized fringe was 10,000 population or over. All other areas are classed as rural.

All persons living on farms were excluded from both the rural and urban samples. In the 1961 Census a farm is defined as an agricultural holding of one acre or more with sales of agricultural products during the past 12 months of \$50 or more.

Major source of income

This is the source of income that is the largest component of an individual's total income. Two main classifications are used (a) income from employment (wages and salaries or income earned from self-employment, the operation of a business or from professional practice), and (b) other sources (income other than earnings, as for example investment income, pensions, or government transfer payments).

Period of immigration

The foreign-born population were asked to report the period in which they came to Canada. The year 1961 includes only the five months prior to June 1.

Schooling

Schooling refers to the highest grade of school attended by the individual. In Tables A9 and A11 the classification "Kindergarten and elementary" includes all persons who have attended kindergarten or elementary school regardless of whether or not they have completed elementary school.

Marital status

Persons were asked to report their marital status on the census date, June 1, 1961. Those who were legally separated are included in the classification "married".

Age

Age reported in the 1961 Census was the completed years of age at last birthday prior to the census date, June 1, 1961.

Relationship to head of household

In Table A7 the category "married children" includes sons- and daughters-in-law as well as own children in the household. Other relatives may include parents, brothers or sisters, nieces and nephews, etc. "Others" include lodgers, employees or partners living in the household.

Rural et urbain

Les centres, constitués ou non, comptant au moins 1,000 habitants sont classés urbains, de même que les banlieues urbanisées des zones métropolitaines, les autres grandes agglomérations urbaines, et les petites villes, si la cité et la banlieue urbanisée réunies comptent 10,000 habitants et plus. Toutes les autres régions sont classées rurales.

Toutes les personnes demeurant dans des fermes ont été exclues tant de l'échantillon rural que de l'échantillon urbain. Une ferme, lors du recensement de 1961, était une exploitation agricole d'une acre ou plus ayant vendu, au cours des 12 mois écoulés, pour \$50 ou plus de produits agricoles.

Principale source de revenu

C'est la source qui constitue la majeure partie du revenu total d'une personne. Deux principales catégories sont employées: a) revenu provenant d'un emploi (salaire, traitement ou revenu provenant d'un emploi autonome, de l'exploitation d'une entreprise ou de l'exercice d'une profession), et b) autres sources (autre que la rémunération, telles, par exemple, le revenu de placements, les pensions et les paiements de transfert des gouvernements).

Période d'immigration

Les personnes de naissance étrangère devaient déclarer la période de leur arrivée au Canada. L'année 1961 ne comprend que les cinq mois qui ont précédé le 1er juin.

Degré d'instruction

Le degré d'instruction veut dire le plus haut grade atteint par la personne. Dans les tableaux A9 et A11, la catégorie, "jardin d'enfants et élémentaire" comprend toutes les personnes qui ont fréquenté le jardin d'enfants ou l'école élémentaire, qu'elles aient ou non terminé leurs études élémentaires.

État matrimonial

Les personnes devaient déclarer leur état matrimonial à la date du recensement, 1er juin 1961. Celles qui vivaient légalement séparées sont classées dans la catégorie "marié".

Âge

L'âge déclaré au recensement de 1961 était l'âge en années révolues au dernier anniversaire antérieur à la date du recensement, 1er juin 1961.

Lien avec le chef de ménage

Au tableau A7, la catégorie "enfants mariés" comprend les gendres et les bru aussi bien que les propres enfants du ménage. Les autres parents peuvent comprendre le père et la mère, les frères et les sœurs, les nièces, les neveux, et autres. Les "autres" comprennent les locataires de chambres, les employés ou les associés cohabitant avec le ménage.
