Bulletin spécial

RECENSEMENT DU CANADA 1971

CHARACTERISTICS OF
CENSUS AGGLOMERATIONS

CARACTÉRISTIQUES DES
AGGLOMÉRATIONS DE RECENSEMENT

INTRODUCTION

The census agglomeration bulletin is a new publication similar in content to the census tract bulletins. The purpose of this report is to present, under one cover, the tables of census data that are most frequently used, for census agglomerations with populations ranging from 2,000 to 100,000 (and over). This report will facilitate comparisons between centres of similar structure.

A census agglomeration is a geostatistical unit having an urban centre of over 1,000 population, with an adjacent built-up area of at least 1,000 population and a minimum density of 1,000 persons per square mile. The largest urban centre and its adjacent urban part must be in two different municipalities and constitute a continuous built-up area with no separation greater than one mile.

The urbanized core is the continuous built-up area covered by a street pattern design and meeting a density of 1,000 persons per square mile. The fringe area is determined by subtracting values for the urbanized core from the total values for the census agglomeration. The fringe is the part outside the urbanized core, corresponding to the immediate zone of influence of a multi-municipal urban centre.

The data cover the demographic and economic characteristics of individuals as well as characteristics of households, families and housing. The geographic level of information includes the total census agglomeration and the urbanized core. In order to show significant data and respect confidentiality, groupings of variables are formed in terms of the smallest census agglomerations.

There are 87 census agglomerations. Only 78 of them are shown in this bulletin as the other nine have already been covered in the Census Tract Series: Sherbrooke and Trois-Rivières in Quebec; Brantford, Guelph, Kingston, Oshawa, Peterborough, Sarnia and Sault Ste. Marie in Ontario. The Chicoutimi-Jonquière Census Metropolitan Area, not covered in the Census Tract programme, is also included in this report.

Explanations of the variables used in this report are found following the tables. The last part of the report contains a series of reference maps, shown in the same order as the census agglomerations.

The information in this bulletin was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The 1971 population figures represent the official population counts (see Catalogue No. 92-708, Bulletin 1.1-8).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Similarly percentages, which are calculated on rounded figures, do not necessarily add to the total. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Le bulletin des agglomérations de recensement est une nouvelle publication dont le contenu s'apparente à celui des bulletins des secteurs de recensement. Le but de ce bulletin est de présenter sous une même couverture un choix de données du recensement d'usage courant, pour des agglomérations dont la population varie entre 2,000 à 100,000 habitants (et plus). Ce bulletin permettra de comparer rapidement des centres dont la structure est voisine.

Une agglomération de recensement est une unité géostatistique ayant un centre urbain de 1,000 habitants et plus, adjacent à une zone bâtie d'au moins 1,000 habitants et d'une densité minimum de 1,000 habitants au mille carré. Le plus grand centre urbain et sa partie urbaine adjacente doivent se trouver dans deux municipalités différentes et constituer une zone bâtie en continu ne comportant pas d'espaces libres de plus d'un mille.

Le noyau urbanisé est la zone bâtie en continu recouverte d'un réseau de rues et ayant une densité de 1,000 habitants et plus au mille carré. En soustrayant les valeurs pour le noyau urbanisé du total de l'agglomération de recensement, on pourra retrouver les valeurs pour la banlieue qui est la partie située en dehors du noyau urbanisé, correspondant à la zone d'influence immédiate d'un centre urbain multimunicipal.

Les données produites portent sur les caractéristiques démographiques et économiques des individus, et sur les caractéristiques des ménages, des familles et des logements. Le niveau d'information géographique comprend le total de l'agglomération de recensement et le noyau urbanisé. Les groupements de variables sont formés en fonction des plus petites agglomérations de recensement, afin de montrer dans la majorité des cas des valeurs significatives et de respecter la confidentialité des renseignements.

Les agglomérations de recensement sont au nombre de 87. Dans ce bulletin, on ne retrouve que 78 agglomérations de recensement car neuf d'entre elles sont déjà couvertes par la série des publications sur les secteurs de recensement: Sherbrooke et Trois-Rivières au Québec; Brantford, Guelph, Kingston, Oshawa, Peterborough, Sarnia et Sault Ste. Marie en Ontario. Comme la région métropolitaine de recensement Chicoutimi-Jonquière n'est pas couverte par le programme des secteurs de recensement, elle est également intégrée à ce bulletin.

Les définitions des variables présentées dans ce bulletin suivent les tableaux de données. La dernière partie du bulletin comprend une série de cartes de références, placées dans l'ordre où les agglomérations de recensement apparaissent dans le bulletin.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3%. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données sont intégrales. Les chiffres de la population de 1971 représentent les chiffres officiels de population (voir la publication n° 92-708 au catalogue, bulletin 1.1-8).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, la somme des pourcentages calculés à partir de chiffres arrondis, ne correspond pas forcément au total. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Census Agglomerations by Population Size Groups, for Provinces, 1971

Agglomérations de recensement selon leur groupe de taille, provinces, 1971

| Size group — Groupe de taille | Provinces | | | | | | | | | | Average municipalities per CA — Moyenne de municipalités par A.R. | Total population | Percentage distribution — Répartition en pourcentage | Cumulative percentage | |
|---|-----------|---------------------|-------------------------|--------------------|--------------------|------|------|------|-------|--------------------|---|------------------|--|-----------------------|-------|
| | Total | Nfld. — T.-N. | P.E.I. — I.-P.-É. | N.S. — N.-É. | N.B. — N.-B. | Qué. | Ont. | Man. | Sask. | Alta. — Alb. | | | | | |
| 50,000+ | 12 | — | — | 1 | 1 | 3 | 7 | — | — | — | — | 3.7 | 974,707 | 39.9 | 39.9 |
| 25,000-49,999 | 26 | — | 1 | 1 | 1 | 13 | 3 | — | — | 1 | 6 | 3.1 | 907,094 | 37.1 | 77.0 |
| 10,000-24,999 | 31 | 2 | 1 | 3 | 2 | 6 | 10 | 1 | 1 | — | 5 | 2.7 | 469,881 | 19.2 | 96.2 |
| 5,000-9,999 | 10 | 2 | — | — | 1 | 3 | 2 | — | — | 1 | 1 | 2.6 | 67,047 | 2.7 | 98.9 |
| 2,000-4,999 | 8 | 1 | — | — | 7 | — | — | — | — | — | — | 2.3 | 27,031 | 1.1 | 100.0 |
| Total | 871 | 5 | 2 | 5 | 5 | 32 | 222 | 13 | 1 | 2 | 12 | 2.9 | 2,445,760 | 100.0 | |
| Average municipalities per CA — Moyenne de municipalités par A.R. | 2.9 | 2.2 | 3.6 | 4.2 | 4.2 | 2.5 | 2.8 | 3.0 | 3.0 | 3.5 | 3.3 | | | | |

¹ Tracted CA's are included in the total. — Les A.R. subdivisées en secteurs de recensement sont comprises dans le total.

² All of Hawkesbury is included in Ontario totals. — Hawkesbury est comprise dans les totaux de l'Ontario.

³ All of Flin Flon is included in Manitoba totals. — Flin Flon est comprise dans les totaux du Manitoba.

Note: Nfld. = Newfoundland; P.E.I. = Prince Edward Island; N.S. = Nova Scotia; N.B. = New Brunswick; Ont. = Ontario; Man. = Manitoba; Sask. = Saskatchewan; Alta. = Alberta; B.C. = British Columbia; CA = Census Agglomeration. — Nota: T.-N. = Terre-Neuve; I.-P.-É. = Île-du-Prince-Édouard; N.-É. = Nouvelle-Écosse; N.-B. = Nouveau-Brunswick; Qué. = Québec; Alb. = Alberta; C.-B. = Colombie-Britannique; A.R. = Agglomération de recensement.

EXPLANATIONS OF CENSUS TERMS

Population totals: The 1966 population figures are based on the areas as of the 1971 Census, and are comparable with the 1971 counts where census agglomeration boundaries have been revised.

Age: Age classifications in the census are based on the number of completed years of age at last birthday prior to June 1, 1971. Respondents were asked to report their month and year of birth, which was converted by mechanical means to age at last birthday.

Marital status: Totals shown under the heading "Married" include all married persons whether living together or living apart for any reason unless a divorce has been obtained. Divorced persons are not included due to small numbers.

Ethnic group: In the census, a person's ethnic group is traced through the father. In 1971, each person was asked to reply to the question: "To what ethnic or cultural group did you or your ancestor (on the male side) belong on coming to this continent? ". Language spoken by the person or by his or her paternal ancestor on first coming to this continent was a guide to the determination of a person's ethnic group in some cases. Note that British Isles includes English, Irish, Scottish and Welsh, and that Scandinavian includes Danish, Icelandic, Norwegian and Swedish.

Official language: The term "official language" refers to the ability to carry on a conversation of some length on various topics in either of the official languages of Canada (English and French). It should be noted that persons speaking either or both of the official languages may also speak other languages and may have a mother tongue other than English or French.

Mother tongue: The mother tongue concept refers to the language the person first learned in childhood and still understands. In the case of infants, this is the language most often spoken in the home.

Religion: In the 1971 Census, respondents were asked to give a specific religious body, denomination, sect or community in answer to the question "What is your religion? ", even if they did not attend a place of worship. Provision was made for marking "no religion" if the person considered this to be an appropriate answer. Greek Orthodox includes those Churches which observe the Greek Orthodox rite, such as Russian Orthodox, Ukrainian Orthodox and Syrian Orthodox.

Period of immigration: Persons born outside Canada reported the year (or period) when they first came to live in Canada.

Migration: Under this heading, the population 5 years and over is classified as **migrants** and **non-migrants**. Migrants are persons whose place of residence five years prior to the census was outside the municipality in which they were residing at the census date. Non-migrants are persons who were residing in the same municipality five years prior to the census, even though they may have changed dwellings within the municipality or have moved out of the municipality and returned to it within the five-year period.

School attendance and years of schooling: Population 5 years and over attending either full-time or part-time at any type of educational institution since September 1970 was included in answer to the question: "Have you attended school or university since last September? ". A person was considered as attending full-time if he took 75% or more of the normal course load in the grade or year in which he was registered.

The highest level of schooling refers to the highest grade or year of elementary school, secondary school or university attended, and whether or not additional training in the form of vocational and/or post-secondary non-university was obtained. Persons with no schooling, or who were not attending full-time, were included in the category: "Less than Grade 9".

Women ever married: Women 15 years and over, identified as married, widowed, divorced or separated under "marital status" are included in this classification.

EXPLICATIONS DES TERMES DE RECENSEMENT

Chiffres de population: Les chiffres de population de 1966 sont fondés sur les limites utilisées en 1971, et peuvent être comparés avec ceux de 1971 même pour les agglomérations de recensement dont les limites ont été modifiées.

Âge: Les classements par âge sont fondés sur le nombre d'années révolues au dernier anniversaire de naissance avant le 1^{er} juin 1971. Les recensés devaient indiquer le mois et l'année de leur naissance; une simple opération mécanique a ensuite permis de fixer l'âge au dernier anniversaire.

État matrimonial: Les totaux publiés sous la rubrique "Mariés" comprennent toutes les personnes dont le conjoint est vivant, qu'elles vivent ensemble ou non, à moins d'avoir obtenu un divorce. Les personnes divorcées ne sont pas prises en compte en raison de leur nombre restreint.

Groupe ethnique: Au recensement, le groupe ethnique d'une personne est déterminé par celui du père. En 1971, chaque personne devait répondre à la question: "À quel groupe ethnique ou culturel appartenait votre ancêtre paternel (ou vous-même) à son arrivée sur le continent? ". La langue parlée par le recensé ou par son ancêtre paternel à son arrivée en Amérique pouvait servir de guide pour déterminer le groupe ethnique dans certains cas. À remarquer que "britannique" comprend anglais, irlandais, écossais et gallois, et que "scandinave" comprend danois, islandais, norvégien et suédois.

Langue officielle: La langue officielle est déterminée par la possibilité de soutenir une conversation sur divers sujets dans l'une ou l'autre des langues officielles du Canada (le français et l'anglais). Les personnes parlant l'une ou l'autre des langues officielles ou les deux peuvent également parler d'autres langues et leur langue maternelle peut être autre que le français ou l'anglais.

Langue maternelle: La langue maternelle est la première langue apprise dans l'enfance et encore comprise. Dans le cas des enfants en bas âge, c'est la langue le plus souvent parlée à la maison.

Religion: Au recensement de 1971, les recensés devaient indiquer un organisme, une confession, une secte, une communauté ou un culte précis en réponse à la question "Quelle est votre religion? ", même s'ils étaient non-pratiquants. Chacun avait la faculté d'indiquer "aucune religion" s'il jugeait que c'était la réponse appropriée. La confession grecque orthodoxe comprend les Églises qui observent le rite orthodoxe grec, comme les Églises orthodoxes russes, orthodoxes ukrainiennes et orthodoxes syriennes.

Période d'immigration: Les personnes nées à l'extérieur du Canada ont indiqué l'année (ou la période) où elles sont arrivées au Canada pour la première fois avec l'intention d'y demeurer.

Migration: Sous cette rubrique, la population de 5 ans et plus est classée comme **migrants** et **non-migrants**. Les migrants sont les personnes dont le lieu de résidence cinq ans avant le recensement était en dehors de leur municipalité de résidence le jour du recensement. Les non-migrants sont les personnes qui demeuraient dans la même municipalité cinq ans avant le recensement, même si, entre-temps, elles ont changé de logement dans la municipalité ou sont parties et revenues dans la municipalité.

Fréquentation scolaire et années de scolarité: Les personnes de 5 ans et plus fréquentant l'école à plein temps ou à temps partiel dans un établissement d'enseignement depuis septembre 1970 étaient incluses en réponse à la question: "Avez-vous fréquenté l'école ou l'université depuis septembre dernier? ". La fréquentation scolaire est à plein temps lorsqu'on suit 75 % ou plus des cours qui se donnent normalement au niveau où l'on est inscrit.

Le niveau de scolarité atteint correspond à la dernière année d'études primaires, secondaires ou universitaires, qu'il y ait eu ou non d'autre formation professionnelle postsecondaire non universitaire. Les personnes n'ayant aucune scolarité et qui ne fréquentent pas l'école à plein temps entrent dans la catégorie: "N'ayant pas atteint la 9^e année".

Femmes non célibataires: Les femmes de 15 ans et plus qui sont mariées, veuves, divorcées ou séparées sont comprises sous cette rubrique.

Household: For census purposes, a household consists of a person or group of persons occupying one dwelling. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, of a group of unrelated persons or of one person living alone. Every person is a member of some household and there is a one-to-one relationship between households and occupied dwellings except in the case of certain special households, such as those of military and diplomatic personnel stationed overseas, from which no housing information was collected.

The census classifies households into two main groups: (1) the household which consists of one person or a small group of persons occupying an ordinary dwelling, usually spoken of as a private household, and (2) the "collective" type household which includes hotels, large lodging-houses of 10 or more lodgers, institutions, hospitals, military camps, lumber camps and other establishments of a similar nature. Unless otherwise specified, these "collective" type households are excluded from household reports.

Family: A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

Children in family: Refers to sons and daughters under 25 years, who have never married and are living at home. Children who have ever been married, regardless of age, are not considered as members of their parents' family even though they are living in the same dwelling. Unmarried sons and daughters 25 years and over living at home on the census date are also family members, but considered as children only in a broad sense in a few tabulations.

Total income: Refers to the total income received during 1970 from wages and salaries, business or professional practice, farm operations, family and youth allowances, government old age pensions, other government payments, retirement pensions from previous employment, bond and deposit interest and dividends, other investment sources, and other sources. In the case of "family" income it refers to the sum of the incomes received by all members of the family 15 years and over. Average family income figures are calculated on the basis of total families rather than just for those reporting income.

Incomes of "under \$. . .": In the case of families these figures include both those reporting losses as well as those reporting no income.

Dwelling: Refers to a structurally separate set of living quarters with a private entrance from outside or from a common hallway or stairway inside the building, i.e., the entrance must not be through someone else's living quarters.

Owned: Refers to a dwelling which is owned by some member of the household. This also includes dwellings under separate ownership in any multiple dwelling structure. A dwelling is classified as owned even though it may be mortgaged.

Rented: Refers to a dwelling which is not owned by any member of the household.

Single detached: This type is commonly called a "single house". A structure with only one dwelling, separated by open space from all other structures except its own garage or shed.

Single attached: This category includes dwelling units separated by a common wall extending from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as single attached (double). All other single attached dwellings whether in rows of three or more dwellings, or simply a unit adjoining a store or other non-residential structure are classified as single attached (other).

Apartment: These dwellings are also subdivided into two categories. Apartment (duplex) refers to each dwelling in a structure originally designed, or structurally converted, to provide two dwelling units, one above the other and adjoining no other structure. Apartment (other) includes all dwellings of the apartment-type other than the duplex-type mentioned above.

Mobile: Refers to any dwelling designed and actually movable, such as a trailer, railway car or boat, if occupied by persons with no other usual residence on census date. If placed on a permanent foundation, it is considered to be "single detached".

Ménage: Aux fins du recensement, un ménage est formé d'une personne ou d'un groupe de personnes occupant un logement. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer d'un groupe de personnes non apparentées, de deux familles ou plus partageant le même logement ou d'une personne seule. Toute personne est membre d'un ménage quelconque et le nombre de ménages est égal au nombre des logements occupés, sauf dans le cas de certains ménages spéciaux, (les ménages des militaires et des membres du corps diplomatique en poste outre-mer par exemple) pour lesquels on n'a pas recueilli de données relatives au logement.

Les ménages sont divisés en deux groupes principaux: 1) les ménages privés composés d'une personne ou d'un petit groupe de personnes occupant un logement ordinaire, et 2) les ménages collectifs (hôtels, grandes maisons de chambres de 10 chambreurs ou plus, institutions, hôpitaux, camps militaires, camps de bûcherons et autres établissements semblables). Sauf indication contraire, ces ménages collectifs ne sont pas pris en compte dans les bulletins sur les ménages.

Famille: Une famille de recensement se compose de l'époux et de l'épouse avec ou sans enfants célibataires (peu importe leur âge) ou de l'un ou l'autre des parents avec un ou plusieurs enfants célibataires vivant dans le même logement. Une famille peut être formée également d'un homme ou d'une femme vivant avec un enfant en tutelle ou un pupille de moins de 21 ans pour lequel il (elle) ne reçoit pas de rétribution.

Enfants faisant partie de la famille: Fils et filles célibataires de moins de 25 ans qui vivent à la maison. Les enfants qui ont déjà été mariés, peu importe leur âge, ne sont pas considérés comme membres de la famille de leurs parents même s'ils vivent dans le même logement. Les fils et filles célibataires de 25 ans et plus qui vivent à la maison le jour du recensement sont aussi membres de la famille, mais ils sont considérés comme "enfants" au sens large seulement dans quelques tableaux.

Revenu total: Revenu total reçu en 1970, provenant de la rémunération, de l'exploitation d'une entreprise ou d'une ferme, de l'exercice d'une profession pour compte propre, d'allocations familiales et d'allocations aux jeunes, d'une pension de vieillesse de l'État, d'autres sources publiques, de pensions de retraite relatives à un emploi antérieur, d'intérêts d'obligations et de dépôts et de dividendes, d'autres placements, et d'autres sources. Dans le cas d'une "famille", le revenu est la somme des revenus touchés par tous les membres de la famille âgés de 15 ans et plus. Les chiffres du revenu moyen de la famille sont calculés pour le total des familles et non seulement pour les familles déclarant un revenu.

Revenu de "moins de \$. . .": Dns le cas des familles, ces chiffres prennent en compte celles qui ont déclaré une perte et celles qui n'ont déclaré aucun revenu.

Logement: Ensemble structurellement distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur, c.-à-d. que l'entrée doit donner accès au logement sans qu'on ait à passer par les pièces d'habitation de quelqu'un d'autre.

Possédé: Logement qui appartient à un membre du ménage. Cela vaut également pour les logements appartenant à des propriétaires distincts dans les constructions à logements multiples. Un logement est classé comme "possédé" même s'il est hypothéqué.

Loué: Logement qui n'appartient pas à un membre du ménage.

Individuel non attenant: Ce genre de logement est ordinairement appelé "maison individuelle". Construction ne contenant qu'un seul logement et qui n'est rattachée à aucune autre construction, si ce n'est à un garage ou à un hangar en dépendant.

Individuel attenant: Cette catégorie comprend les logements séparés par un mur mitoyen s'élevant du sol au toit. Tout logement individuel attenant dans une construction ne contenant que deux logements est classé comme "individuel attenant (maison double)". Tous les autres logements individuels attenants (en rangée de trois logements ou plus ou tout simplement attenants à un magasin ou à une autre construction non résidentielle) sont classés comme "individuels attenants (autres)".

Appartement: Cette catégorie est également subdivisée en deux groupes. Un "appartement (duplex)" est un logement faisant partie d'une construction conçue à l'origine ou transformée par la suite pour contenir deux logements superposés et non attenants à une autre construction. Un "appartement (autre)" est un logement de la catégorie "appartement" autre qu'un logement faisant partie d'un duplex.

Mobile: Tout logement conçu pour être transporté et qui est effectivement mobile, comme une roulotte, un wagon de chemin de fer ou un bateau, s'il est occupé par des personnes n'ayant pas d'autre résidence habituelle le jour du recensement. S'il est placé sur une fondation permanente, il est considéré comme "individuel non attenant".

Rooms: Refers to an enclosed area within a dwelling which is finished and suitable for year-round living. Partially divided L-shaped rooms are considered to be separate rooms if they are considered as such by the respondent (e.g., L-shaped dining-room, living-room arrangements). Not counted as rooms are bathrooms, clothes closets, pantries, halls and rooms solely used for business purposes.

Period of construction: Refers to the date of completion of the original building, not to any later remodeling, additions or conversions. Figures for 1971 extend to June 1, 1971 only.

Home freezer: Refers to a separate gas or electric-powered household facility designed and used for the storage of frozen food, exclusive of refrigerators and their freezer compartments.

Automatic clothes dryer: Refers to a gas or electric-powered household facility designed and used for the purpose of drying clothes.

Television: Refers to both portable, console and combination models, powered by either battery or regular electrical sources, and belonging to any member of the household including relatives and lodgers.

Automobiles: Passenger vehicles available for personal use by any member of the household.

Value: Figures for "value" relate to single detached owner-occupied non-farm dwellings, and are based on the amount expected by the owner if the dwelling were to be sold to a willing buyer.

Cash rent: Figures for "cash rent" relate to tenant-occupied non-farm dwellings and are based on the dollar amount required to secure occupancy, but not the ownership, of a dwelling for either the week or month prior to enumeration day. Averages have been determined on the basis of stated rent, excluding cases in which no cash rent was paid.

Labour force: Refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours.

Labour force activity: Refers to the labour market activity of persons 15 years and over in the week prior to enumeration, i.e., working for pay or profit, or in unpaid family work, looking for work, on temporary lay-off, or with a job but not at work.

Participation rate: Refers to the percentage the labour force forms of the population 15 years and over in the category or area.

Employed labour force: Refers to all non-inmates 15 years and over, who, during the week prior to enumeration, worked for pay or profit, or helped (without pay) in a family business or farm. It also includes persons who had a job from which they were temporarily absent, because of illness, vacation, strike, etc., providing they were not also looking for work.

Unemployed labour force: Refers to all non-inmates 15 years and over, who, during the week prior to enumeration, were **not** working but were looking for work, or were on temporary lay-off, or would have been looking for work except that they were temporarily ill, or believed no suitable work was available in the community.

Occupation: Refers to the specific kind of work the person did on the job, as determined by the reporting of the kind of work, the description of the most important duties and the job title. Data relate to the respondent's job in the week prior to enumeration if he or she had a job during that week, or to the job of longest duration since January 1, 1970 if not employed in that week. Data, therefore, exclude those persons in the labour force who were looking for work but had not worked since January 1, 1970 or had never worked. Persons with two or more jobs during the reference week were asked to give the information for the one at which they worked the most hours. For further information on the occupational classification, see "Occupational Classification Manual, Census of Canada, 1971", Volume I, Catalogue No. 12-536.

Pièces: Dans un logement, espace fermé qui est fini et habitable toute l'année. Les pièces partiellement divisées en forme de "L" sont considérées comme formant deux pièces distinctes si le recensé les juge distinctes (par ex. les salons-salles à manger en forme de L). Ne sont pas comptés comme pièces les salles de bains, les garde-robés, les dépenses, les vestibules ou couloirs et les pièces servant exclusivement à des fins commerciales.

Période de construction: Date où la construction initiale du logement a été achevée, par opposition à la date de rénovations, rajouts ou modifications ultérieurs. Les chiffres de 1971 visent la période du 1^{er} janvier au 1^{er} juin 1971 seulement.

Congélateur: Appareil ménager, électrique ou à gaz, conçu et utilisé pour conserver les aliments congelés, à l'exclusion des réfrigérateurs et des compartiments de congélation des réfrigérateurs.

Sécheuse automatique: Appareil ménager, électrique ou à gaz, conçu et utilisé pour sécher le linge.

Téléviseur: Téléviseur portatif, meuble ou combiné, électrique ou à piles, appartenant à un membre du ménage, y compris à un parent ou à un chambreur.

Automobile: Voiture particulière disponible pour l'usage personnel d'un membre du ménage.

Valeur: Les chiffres pour la "valeur" se rapportent aux logements individuels non agricoles, non attenants occupés par leur propriétaire et sont basés sur le montant que s'attendrait de recevoir le propriétaire s'il vendait le logement à un acheteur libre.

Loyer en espèces: Les chiffres pour le "loyer en espèces" se rapportent aux logements non agricoles occupés par un locataire et sont basés sur la somme versée pour avoir le droit d'occuper un logement (sans en être le propriétaire) pendant la semaine ou le mois précédent le jour du dénombrement. Les moyennes ont été déterminées sur la base du loyer déclaré, sans les cas où il n'est pas payé de loyer en espèces.

Population active: Non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire, ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale.

Activité: Activité sur le marché du travail des personnes de 15 ans et plus au cours de la semaine précédant le dénombrement, c.-à-d. travaillant contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, cherchant du travail, en congédiement temporaire, ou ayant un emploi mais n'étant pas au travail.

Taux d'activité: Pourcentage de la population active par rapport à la population totale de 15 ans et plus de la catégorie ou du secteur donné.

Population active occupée: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise ou une ferme familiale. Sont également comprises les personnes qui avaient un emploi dont elles étaient temporairement absentes à cause d'une maladie, de vacances, d'une grève, etc.. à condition qu'elles n'aient pas également cherché du travail.

Population active en chômage: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ne travaillaient pas mais cherchaient du travail, ou étaient en congédiement temporaire, ou auraient cherché du travail s'ils n'avaient pas été temporairement malades ou s'ils n'avaient pas été convaincus qu'il n'y avait pas de travail convenable dans la localité.

Profession: Genre de travail que faisait le recensé, déterminé par l'indication du genre de travail, la description des fonctions principales et le titre de l'emploi. Les données portent sur l'emploi du recensé au cours de la semaine précédant le dénombrement, s'il avait un emploi cette semaine-là, ou sur l'emploi de plus longue durée depuis le 1^{er} janvier 1970, s'il n'avait pas d'emploi cette semaine-là. Les données excluent donc les actifs qui cherchaient du travail, mais qui n'avaient pas travaillé depuis le 1^{er} janvier 1970 ou qui n'avaient jamais travaillé. Les personnes ayant deux emplois ou plus pendant la semaine de référence devaient fournir les renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures. Pour de plus amples renseignements sur la classification des professions, voir "La classification des professions, Recensement du Canada, 1971", volume I (n° 12-536F au catalogue).

Industry: The industry classes are based on the general nature of the business carried out in the establishment where the respondent was employed as indicated by the reporting of the name of the employer (or business name if self-employed) and the kind of business, industry or service engaged in by this establishment. If not employed in the week prior to enumeration, the information was to relate to the respondent's job of longest duration since January 1, 1970. Data, therefore, exclude those persons in the labour force who were looking for work but had not worked since January 1, 1970 or had never worked. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

For further information on the industrial classification, see the "Standard Industrial Classification Manual", Dominion Bureau of Statistics, 1970, Catalogue No. 12-501.

Class of worker: Refers to the classification of employment according to whether persons mainly worked for someone else for wages, or helped without pay in a family farm or business, or mainly worked for themselves with or without paid help in their job in the week prior to enumeration, or if not employed at that time, in the job of longest duration since January 1, 1970. The labour force data by class of worker (and occupation and industry) therefore, exclude persons looking for work who had not worked since January 1, 1970 or who had never worked.

Wage-earners: Refers to persons 15 years and over who indicated that in the job reported they were mainly working for wages, salaries, tips or commissions or were self-employed in an incorporated company.

Self-employed: Refers to persons 15 years and over for whom the job reported consisted mainly of self-employment (including partnership) in their own unincorporated business, professional practice or farm, with or without paid help.

Employment income: Refers to the total income received in 1970 as wages and salaries, net income from business or professional practice and/or net farm income.

Persons who worked in 1970: Refers to persons 15 years and over, who reported having worked during one or more weeks in 1970, even for a few days. This includes weeks of paid vacation or sick leave or paid absence on training courses. "Work" implies work for "pay or profit", self-employment, unpaid work in a family farm or business, and work for payment "in kind" in a non-family enterprise.

Employment income of "under \$": In this report, these figures include persons reporting losses, but exclude those reporting no employment income.

Average employment income: Average employment income is calculated only for persons reporting some income from employment.

ESTIMATES OF RELIABILITY

The introductory reports of the 1971 volume series will include measures of reliability in the form of estimates of the mean square error for sets of characteristics covered in that volume. The user interested in obtaining an indication of the reliability of the data for a given characteristic published in the present report should refer to the appropriate Introductory bulletin in the volume series. For example, the present report contains ethnic distributions. To obtain an estimate of the reliability of ethnic data, the reader should refer to Report 92-722.

Copies of the available measures of reliability may also be obtained from the User Inquiry Service, Census.

Activité économique: Les classes d'activité économique sont fondées sur la nature générale de l'activité de l'établissement employant le recensé, déterminée par le nom de l'employeur (ou par le nom de sa propre entreprise s'il travaille à son compte) et par le genre de commerce, d'industrie ou de service dont s'occupe l'établissement. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le dénombrement, les renseignements devaient porter sur son emploi de plus longue durée depuis le 1er janvier 1970. Les données excluent donc les actifs qui cherchaient du travail mais qui n'avaient pas travaillé depuis le 1er janvier 1970 ou qui n'avaient jamais travaillé auparavant. Les personnes ayant deux emplois ou plus devaient fournir des renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures.

Pour de plus amples renseignements sur la classification des activités économiques, voir la "Classification des activités économiques", Bureau fédéral de la statistique, 1970 (n° 12-501F au catalogue)

Statut: Classement des personnes occupées suivant qu'elles ont surtout travaillé contre rémunération, qu'elles ont travaillé sans rémunération dans une ferme ou une entreprise familiale ou qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée, dans l'emploi qu'elles occupaient au cours de la semaine précédant le dénombrement ou, si elles n'avaient pas travaillé au cours de cette semaine, dans leur emploi de plus longue durée depuis le 1er janvier 1970. Par conséquent, les données sur la population active selon le statut (et la profession et l'activité économique) excluent donc les personnes qui cherchaient du travail, et qui n'avaient pas travaillé depuis le 1er janvier 1970 ou qui n'avaient jamais travaillé.

Salariés: Personnes de 15 ans et plus qui ont indiqué que, dans leur emploi, elles travaillaient surtout contre rémunération, à la commission ou pour des pourboires ou qu'elles travaillaient à leur propre compte dans une entreprise constituée en corporation.

Travailleurs indépendants: Personnes de 15 ans et plus dont l'emploi déclaré consistait surtout en travail autonome (y compris en association) dans leur entreprise non constituée en corporation, leur profession ou leur ferme, avec ou sans aide rémunérée.

Revenu de l'emploi: Revenu total reçu en 1970 sous forme de rémunération, de revenu net provenant de l'exploitation d'une entreprise ou de l'exercice d'une profession pour compte propre et (ou) de revenu agricole net.

Personnes ayant travaillé en 1970: Personnes de 15 ans et plus qui ont déclaré avoir travaillé pendant une semaine ou plus en 1970, ne fut-ce que quelques jours. Cela comprend les semaines de vacances payées, de congé de maladie ou d'absences payées pour des cours de formation. "Travail" veut dire travail "contre rémunération ou en vue d'un bénéfice", emploi autonome, travail sans rémunération dans une ferme ou une entreprise familiale ainsi que travail contre rémunération "en nature" dans une entreprise non familiale.

Revenu de l'emploi de "moins de \$": Dans le présent bulletin, ces chiffres prennent en compte les personnes qui ont déclaré une perte, mais excluent celles qui n'ont déclaré aucun revenu de l'emploi.

Revenu moyen de l'emploi: Le revenu moyen provenant de l'emploi est calculé seulement pour les personnes qui ont un revenu de l'emploi.

ESTIMATIONS DE FIABILITÉ

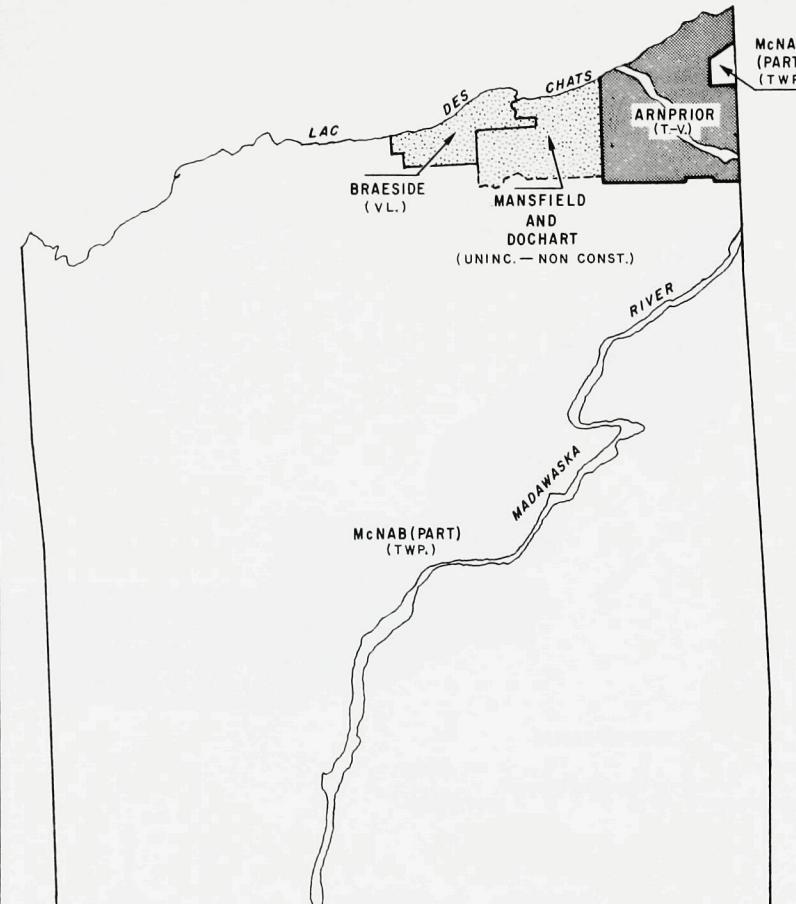

Les bulletins d'introduction de la série des volumes de 1971 comprennent des mesures de fiabilité sous forme d'estimations de l'erreur quadratique moyenne pour les ensembles de caractéristiques étudiées dans ce volume. L'utilisateur désireux de connaître le degré de fiabilité pour une caractéristique donnée dans ce bulletin devra consulter le bulletin approprié de la série des volumes. Par exemple, le présent bulletin contient des répartitions selon l'ethnicité. L'utilisateur devra se reporter au bulletin 92-722 pour obtenir une estimation de la fiabilité des données sur l'ethnicité.

On peut également obtenir des exemplaires des mesures de fiabilité disponibles en s'adressant au Service-utilisateurs, Recensement.
