

Not a **Bright** idea

Pointing a laser at an aircraft is **illegal** and a **criminal** offence. And it's happening more and more.

Offenders will be charged and could face fines up to \$100,000, 5 years in prison - or both.

Lasers put the pilot, crew, passengers, and people on the ground at risk of injury or death.

If you see someone point a laser at an aircraft, **report** it to your local police.
