

TRADE AND INVESTMENT

CANADA–COLORADO

COLORADO'S PROFILE

Economic Indicators

- Gross domestic product (GDP): US\$323.7 billion (2016)
- GDP per capita: US\$58,400 (2016)
- Population: 5.5 million (2016)
- Merchandise exports to Colorado: 23rd among the 50 U.S. states (2016)
- Merchandise imports from Colorado: 35th among the 50 U.S. states (2016)
- Estimated number of Colorado jobs that depend on trade with Canada: 131,000 (2013)
- Best States for Infrastructure ranking: 7th among the 50 U.S. states (2017)
- Canada's ranking as a destination for Colorado's international merchandise exports: 1st (2016)

NOTES

The Library of Parliament's Trade and Investment series provides information on Canada's trade and investment relationship with the world and with selected countries. It also describes the trade relationship of each of Canada's 10 provinces and three territories with the world. In addition, it presents Canada's merchandise trade relationship with each of the United States' 50 states.

All figures were prepared using Statistics Canada customs-based merchandise trade data available in spring 2017.

To see the data tables used to generate the figures, view the HTML version of this profile at [Trade and Investment Series 2016](#).

Numbers in this profile have been rounded.

All dollar amounts are in Canadian dollars unless otherwise noted.

Definitions appear at the end of this profile.

The five most highly valued merchandise export and import categories have been identified based on 2016 values.

In the Economic Indicators section, data for GDP are from the U.S. Bureau of Economic Analysis, Canada's ranking as a destination for the state's international merchandise exports and data on population are from the U.S. Census Bureau, the ranking of the state as a destination for Canadian merchandise exports and a source of Canadian merchandise imports is based on Statistics Canada data, and the best states for infrastructure ranking is from U.S. News & World Report. GDP per capita was calculated by dividing state GDP by state population. The estimated number of jobs that depend on trade with Canada is from Peter B. Dixon and Maureen T. Rimmer, [The Dependence of U.S. Employment on Canada, 2013](#), 3 December 2014.

(\$ billions)

Largest merchandise trade surplus in 2016: Metals, mines and energy, at \$1.8 billion

Largest merchandise trade deficit in 2016: Agriculture and food, at \$309.6 million

DEFINITIONS

Balance of trade: The trade balance is the difference between the value of exports and the value of imports. There is a trade surplus if the value of exports exceeds the value of imports. There is a trade deficit if the value of imports exceeds the value of exports.

Customs-based data: Customs-based data are compiled from declarations filed with the Canada Border Services Agency and are used to track the flow of goods into and out of Canada, with one exception: exports to the United States. Since 1990, customs-based data on Canadian exports to the United States have been based on declarations filed with U.S. Customs and Border Protection.

Gross domestic product (GDP): GDP measures an economy's total production in a given year. As one entity's income is another entity's spending, GDP is equal to the total value of final sales or to the total value of incomes.

Manufactured goods: Manufactured goods are finished or semi-finished products resulting from the transformation of materials and substances into new products (North American Industry Classification System, or NAICS, codes 31 to 33) and the output of establishments primarily engaged in operating electric, gas and water utilities (NAICS code 22).

Merchandise trade: Merchandise trade refers to trade in physical goods, such as cars, wheat and iron ore.

Resource-based goods: Resource-based goods are products of the agriculture, forestry, fishing and hunting sector (NAICS code 11), as well as the mining, quarrying, and oil and gas extraction sector (NAICS code 21).
