

Table 1

Reportable Pipeline Occurrences

	June			Year to date (June)		
	2018	2017	2013-2017 average	2018	2017	2013-2017 average
Total number of occurrences	9	12	11	46	58	63
Total number of occurrences with product release	4	3	6	27	30	41
Total number of serious injuries	0	0	0	0	0	0
Total number of fatalities	0	0	0	0	0	0
Accidents	0	0	0	0	4	2
Product released	0	0	0	0	3	1
Release of hydrocarbon gas	0	0	0	0	0	1
Release of HVP hydrocarbons ¹	0	0	0	0	1	0
Release of LVP hydrocarbons ^{2, 3}	0	0	0	0	2	1
Release of other product	0	0	0	0	0	0
Release from line pipe body	0	0	0	0	1	1
Fire/ignition	0	0	0	0	1	1
Explosion	0	0	0	0	0	0
Rupture	0	0	0	0	0	0
Pipeline contacted by object	0	0	0	0	2	1
Operation beyond limits	0	0	0	0	0	0
Geotechnical/Hyrotechnical/Environmental activity	0	0	0	0	0	0
Incidents	9	12	11	46	54	61
Product released	4	3	6	27	27	40
Release of hydrocarbon gas	4	3	3	25	16	18
Release of HVP hydrocarbons ¹	0	0	0	0	3	3
Release of LVP hydrocarbons ^{2, 3}	0	0	2	2	3	13
Release of other product	0	0	0	0	5	6
Release from line pipe body	0	0	1	3	0	2
Fire/ignition	1	0	0	3	3	2
Explosion	0	0	0	1	1	0
Pipeline contacted by object	0	1	1	0	2	3
Operation beyond limits	0	3	2	7	10	11
Geotechnical/Hyrotechnical/Environmental activity	4	4	1	11	7	2
Unauthorized 3rd-party activity affects pipeline structural integrity	0	0	0	0	0	1

Data extracted July 16, 2018

NOTES:

¹ HVP means high vapour pressure as defined in Canadian Standards Association Standard Z662.

² LVP means low vapour pressure as defined in Canadian Standards Association Standard Z662.

³ As of July 2014, the minimum reporting threshold for releases of low vapour pressure hydrocarbons was established at 1.5m³.
