

Tourism Snapshot

A Monthly Monitor of the Performance of Canada's Tourism Industry

December 2017
Volume 13, Issue 12

Canada

www.destinationcanada.com

KEY HIGHLIGHTS

- In 2017, international arrivals to Canada reached a new all-time high of 20.85 million (+4.4% over 2016), surpassing the record high of 20.06 million previously set in 2002 by 3.9%.
- US visitors (14.33 million, +3.1%) continued to make up the majority of tourist arrivals to Canada in 2017. Among Destination Canada's core markets, the Asia-Pacific region (1.90 million, +11.4%) led 2017 arrivals, followed by Europe (1.76 million, +0.7%), and Latin America (498,000, +39.3%).
- Overnight arrivals from non-US (overseas) origins (+7.2%) expanded at a pace slightly ahead of global international arrivals as reported by the UNWTO (+6.7%) in 2017, with Destination Canada's ten overseas markets (+9.1%) expanding at twice the rate of non-Destination Canada markets (+4.0%).
- These results reflect a shifting landscape for the Canadian tourism industry when compared with the previous peak in 2002, when just 19.4% of visitors

to Canada came from overseas origins (vs. 31.3% in 2017). Destination Canada's emerging Asia-Pacific and Latin America markets are also playing a larger role in overseas visitation, ahead of the historically strong European markets, with Destination Canada's target markets in Latin America leading year-over-year growth and Asia-Pacific now overtaking Europe as Destination Canada's largest overseas region in 2017.

- Much of the growth recorded in 2017 was driven by increased direct air arrivals, both from the US (+6.6%) and from overseas (+9.5%). This progress was particularly evident in direct air arrivals from Destination Canada's Latin American markets (+60.3%) and Asia-Pacific markets (+16.6%). The ongoing expansion of air access to Canada in 2017 was closely linked with this growth, with seat capacity increasing significantly overall (+7.0%) and in particular in Destination Canada's core markets – Latin America (+45.7%), Asia-Pacific (+22.2%), Europe (+4.4%), and the US (+3.8%).

Note the following caveat from Statistics Canada associated with the December 2017 data: Data for Statistics Canada's Frontier Counts program are produced using administrative data received from the Canada Border Services Agency (CBSA) on all international travellers who have been cleared for entry or re-entry into Canada. This includes residents of Canada, the United States and overseas entering Canada from abroad.

In 2017, the CBSA began introducing the electronic Primary Inspection Kiosk (PIK) system at airports in Canada. The PIK system replaces the E-311 Declaration Cards that are completed by international travellers to Canada. As of the end of November, the PIK system was deployed at the following airports: Macdonald-Cartier, Ottawa (March 2017), Vancouver (April 2017), Toronto International Airport T3 (June 2017), Edmonton (September 2017), Halifax (October 2017), and Pierre-Elliott Trudeau, Montréal (November 2017).

While awaiting receipt of PIK data, Statistics Canada has prepared preliminary estimates for airports at which PIK has been deployed. These estimates are based on CBSA reports of total international travellers by airport, while the distribution between Canadian, US and travellers from individual overseas countries are modelled estimates based on historical data and trends, using methods similar to those used to do seasonal adjustment.

Statistics Canada recently reached an agreement with CBSA on access to this data, and the estimates for these airports, as well as the provincial and national totals to which they contribute, will be revised in the near future.

Note also that figures reported at the Douglas (Peace Arch) land port in BC were partly estimated and will be revised at a future date.

UNITED STATES

- After a somewhat rocky start to the year, US overnight arrivals to Canada rounded off the latter half of 2017 with a fifth consecutive month of strong growth in December 2017 (+3.7%), bringing the annual 2017 total to 14.3 million (+3.1% over 2016). Even with the weaker purchasing power of the US dollar in Canada in 2017 (-4.2% in December, -2.1% total 2017), US tourists visited Canada in the highest numbers since 2005.
- Supported by the steady expansion of air capacity between Canada and the US (+4.2% in December, +3.8% total 2017), arrivals by air were a driving force behind the growth in US visitation, up 10.0% in December and 6.6% annually compared to 2016. In 2017, the number of US tourists arriving in Canada by air reached a new peak for the third consecutive year and represented 33.6% of total US overnight arrivals, up more than 10 percentage-points compared to the share of air arrivals in 2002 (23.4%). Arrivals by other modes of transportation, such as bus, train, and cruise, also recorded strong growth (+4.4% in December, +9.9% total 2017). While auto arrivals were generally on par with 2016 levels, they still continued to make up the largest proportion of US visitors (56.3% in December, 55.7% total 2017).
- In 2017, the largest share of US overnight arrivals by vehicle¹ originated from New York (18.0%), Washington (15.1%), and Michigan (11.4%). Among states further from the US-Canada border, the largest proportion of vehicle traffic arrived from California (2.4%) and Florida (2.1%). While the same three states make up the largest share of vehicle arrivals among both US residents and overseas residents driving across the Canada-US border, the data suggest that overseas residents may be more likely than US residents to drive the longer distances from California and Florida².
- Following two months of strong increases, the consumer confidence index published by the US Conference Board dropped 5.5 points to 123.1 in December 2017.

¹ States of origin information is based on Integrated Primary Inspection Lane (IPIIL) data collected from US residents entering Canada in automobiles with license plate registered in the United States.

² The US state of departure for overseas resident entering Canada by automobile is based on IPIIL information. Some automobiles driven by overseas resident may be rental vehicles. Rented vehicles in one US state may be registered in different state. The state of car registration may not necessarily be indicative of distance driven.

Trend Plot: Total DC Europe Arrivals

- In December 2017, Canada welcomed just over 107,000 visitors from Destination Canada's Europe region (-3.3% vs. December 2016), just bringing the 2017 total up to a new annual record of 1.76 million visitors (+0.7% vs. 2016).
- The muted performance from this region in 2017 was mainly due to a consistent decline in arrivals from the UK (-3.8% vs. 2016), which faced a deteriorating consumer mood since May 2017 in the midst of growing concerns over the economy ahead of Brexit and a weakened British pound in Canada (-6.9% vs. 2016). December (-6.0% vs. December 2016) marked eight consecutive months of declining arrivals to Canada from the UK, with outbound British travel to destinations outside of Europe also trending downward in the latter half of 2017.
- Steady gains in arrivals from Germany (+5.2%) and France (+4.6%) over the course of the year compensated for the losses from the UK, resulting in an overall positive trend in arrivals from the region. France was the only Europe market to hit new arrivals records for both the month of December (+2.2%) and annually in 2017, while Germany observed its best year for arrivals to Canada since 1999, despite finishing the year with a downturn in December (-6.3%).

DC Europe Arrivals by Port of Entry

- With overall air capacity for the region up 4.4% year-over-year in 2017, direct air arrivals from Destination Canada's three Europe markets were up slightly compared to 2016 (+0.8%). In 2017, 69.9% of visitors from Destination Canada's three European markets arrived by air directly from overseas, mainly via YYZ (36.3%) and YUL (31.7%).
- Most of the annual decline from the region was in arrivals via the US, both by land (-2.7%) and by air (-1.5%), while arrivals by sea increased significantly (+16.6%) – particularly from Germany (+47.9%).

Sources:
i. IATA-Diio SRS Analyser, Year-on-year % variance.
ii. Bank of Canada, Year on year % variance.
iii. Statistics Canada, Frontier counts, custom tabulations.

- With just over 133,000 arrivals in December 2017 (+14.5%), total 2017 visitation from Destination Canada's Asia-Pacific region reached 1.90 million (+11.4%), setting new monthly and annual peaks for the region. This year's strong performance moved the Asia-Pacific region ahead of Europe as Destination Canada's largest overseas regional market for the first time in 2017.
- Individually, double-digit gains were recorded from all of Destination Canada's Asia-Pacific markets except Japan in 2017 (+0.2%). Arrivals from India (+17.8%) posted the strongest growth, followed by South Korea (+17.0%), Australia, (+12.6%), and China (+11.8%). All but Japan also reached new arrivals records in 2017, both for the month of December and annually.
- The performance from this region in 2017 is especially notable given that the five Asia-Pacific markets saw relatively weak currency exchange rates with Canada this year. The strength of the Yen compared to the Canadian dollar was particularly poor (-5.2% in 2017), which may have contributed to the muted performance from Japan.
- Direct air capacity to Canada from the Asia-Pacific region expanded +22.2% in 2017, led by India (+52.7%), Australia (+28.6%), and China (+24.8%), supporting the particularly strong growth in direct air arrivals (+16.6%).

DC Asia-Pacific Arrivals by Port of Entry

- Direct air arrivals from Destination Canada's Asia-Pacific region soared by an average of +16.6%, while arrivals via the US averaged +3.6% (+3.8% by land and +2.1% by air), despite contractions from China (-0.2%), India (-6.2%), and Japan (-9.7%).
- The majority of direct air arrivals from Destination Canada's Asia-Pacific markets in 2017 entered the country via YVR (50.3% share of direct air arrivals) and YYZ (41.1% share of direct air arrivals). However, YUL and YYC also saw significant growth this year in arrivals from China.

LATIN AMERICA

- Close to 47,000 arrivals in December 2017 (+13.8%) brought annual 2017 total arrivals from Destination Canada's Latin America region to almost half a million (498,000, +39.3% over 2016). Setting new records for both the month of December and annually, growth from this region was well ahead of all other Destination Canada regions. Both Mexico (+47.4%) and Brazil (+22.0%) also hit new arrivals records individually in 2017.
- Both of Destination Canada's Latin America markets benefitted from the replacement of the visa requirement with the eTA over the last year. This was introduced for Mexican citizens on December 1st, 2016 and for some Brazilian citizens in May 2017. After averaging an increase in arrivals of 52.5% over the first 11 months of 2017, tourist arrivals from Mexico expanded by 10.6% in December 2017, which still represented a robust performance given the 69.1% jump in December 2016 following the eTA implementation.
- This region's stellar performance in 2017 was mainly driven by strong gains in air arrivals, primarily direct to Canada (+60.3%), but also by air via the US (+27.3%). Meanwhile, arrivals via the US by land were down (-12.1%), due to a decline from Mexico (-15.3%).
- Supporting this performance, Mexico saw the largest expansion of air capacity to Canada of all Destination Canada's key international markets in 2017 (+70.6%). From Brazil, air capacity was down overall in 2017 (-16.4%) but saw an increase over the last three months of the year (+61.5% in December).
- While the purchasing power of the Mexican Peso in Canada fell overall in 2017 (-3.3%), the Real remained strong compared to 2016 (+6.6%).

DC Latin America Arrivals by Port of Entry

- Overall in 2017, 63.1% of visitors from Destination Canada's two Latin America markets arrived by air directly from overseas. Visitors from Brazil arriving direct by air entered the country almost exclusively at YYZ (92.7%), while those from Mexico primarily crossed the border at YYZ (45.1%), YVR (25.8%), or YUL (24.2%).

CANADIAN OUTBOUND TRAVEL

Overnight Trips by Canadians

	December 2017	YOY % Variance	Jan.- Dec. 2017	YOY % Variance
United States	1,368,266	7.7	20,205,839	4.8
Other Countries	1,012,207	6.4	12,849,820	7.2
Total Trips from Canada	2,380,473	7.2	33,055,659	5.7

Source: Statistics Canada, International Travel Survey.

Note: The figures are preliminary estimates and are subject to change.

- Overnight trips by Canadians to international destinations continued to trend upward in December 2017, reaching 2.4 million (+7.2%), with more outbound trips recorded to the US (+7.7%) and to other international destinations (+6.4%).
- Overall in 2017, Canadians travelled more internationally than they did in 2016 (33.1 million trips, +5.7%). In particular, Canadians took more trips to the US (+4.8%) and especially to overseas destinations (+7.2%) this year.
- While the majority of Canadian residents' trips to the US were taken by automobile (53%), the biggest year-over-year growth was recorded in trips by air (+9.1%).
- The Canadian Consumer Confidence Index (published by the Conference Board of Canada) improved for a third consecutive month in December 2017, climbing a notable 7.3 points to reach 128.4 at the end of the year.

- In December 2017, the National Occupancy Rate was at 50.0%, up 1.6 points over December 2016, bringing the annual 2017 rate to 65.6%, up 1.8 points over 2016. Both for the month of December and overall in 2017, the highest occupancy rates were recorded in Northwest Territories (70.7% in December, 71.7% total 2017), Quebec (55.3% in December, 70.3% total 2017), and British Columbia (54.4% in December, 70.1% total 2017). Overall in 2017, Manitoba (up 5.3 points), Nova Scotia (up 2.7 points), and Northwest Territories (up 2.7 points) posted the strongest year-over-year growth in occupancy rate.
- Overall in 2017 the national average daily rate (ADR) reached \$155.10, up 4.8% over 2016. Provincially, the highest ADR in 2017 was recorded in the three provinces with the highest international arrivals for the year – British Columbia (\$172.51), Quebec (\$167.99), and Ontario (\$154.75). While year-over-year growth in ADR was

strong in these three provinces, the strongest growth was observed in Nova Scotia (+7.8%), Prince Edward Island (+7.2%), and Yukon (+6.9%).

- At the national level, the revenue per available room (RevPar) also climbed significantly in 2017, reaching \$101.69 (up 7.8% over 2016). Once again, the strongest annual performance on this metric was observed in British Columbia (\$121.01), Quebec (\$118.16), and Ontario (\$107.19). However, the biggest gains compared to 2016 were posted in Nova Scotia (+12.4%), Manitoba (+10.3%), and British Columbia (+9.6%).
- While a handful of provinces and territories registered overall annual declines in ADR and RevPar compared to 2016, occupancy rates were up year-over-year across Canada in 2017.

Note: Based on the operating results of 237,545 rooms (unweighted data).
^ Percentage points.

- In 2017, occupancy rate generally increased by property size, ranging from 52.5% for the smallest properties (<50 rooms) to 74.2% for the largest properties (500+ rooms). However, those smaller properties (+2.8 percentage points) saw larger year-over-year increases in occupancy rate than larger properties (+0.3 percentage points).
- ADR also increased by property size in 2017, ranging from \$113.30 to \$231.28; however, larger properties (500+ rooms) also recorded stronger year-over-year growth in ADR than smaller properties.
- Suite hotels recorded the highest occupancy rates in 2017 (74.2%), though Limited service hotels saw the biggest increase over 2016 occupancy rates (+2.5 percentage points). The highest ADR in 2017 was found at resorts (\$244.17), which also saw the biggest increase over 2016 (+6.4%).
- Upscale properties reported the highest occupancy rate (71.1%) and ADR (\$254.66) in 2017, but budget properties posted the biggest increases compared to 2016 for both occupancy (+2.7 percentage points) and ADR (+7.2%).
- These general trends in 2017 may suggest that as room rates climb and room availability falls at larger, more high-end properties, travellers are turning toward smaller, more budget-friendly accommodations characterized by lower occupancy rates and average daily rate, but benefitting from larger increases in both rates.
