## Departmental Evaluation Plan FY 2018 to 2019 to FY 2022 to 2023

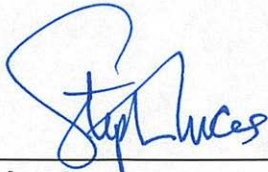

### Deputy Minister Departmental Evaluation Plan Confirmation

I approve the Departmental Evaluation Plan of Environment and Climate Change Canada for the fiscal year 2018 to 2019 to fiscal year 2022 to 2023, which I submit to the Treasury Board of Canada Secretariat as required by the Policy on Results.

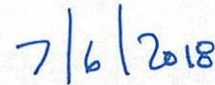

I confirm that this five-year rolling Departmental Evaluation Plan:

- Plans for evaluation of all ongoing programs of grants and contributions with five-year average actual expenditures of \$5 million or greater per year at least once every five years, in fulfillment of the requirements of subsection 42.1 of the Financial Administration Act
- Meets the requirements of the Mandatory Procedures for Evaluation
- Supports the requirements of the expenditure management system including, as applicable, Memoranda to Cabinet, Treasury Board submissions, and resource alignment reviews

I will ensure that this plan is updated annually, and I will provide information about its implementation to the Treasury Board of Canada Secretariat, as required.

## 1. Introduction

This document presents Environment and Climate Change Canada's (ECCC) Departmental Evaluation Plan for the period from fiscal year 2018 to 2019 to fiscal year 2022 to 2023. In accordance with the Treasury Board of Canada [Policy on Results](#), ECCC's Audit and Evaluation Branch (AEB) produces a five-year rolling departmental evaluation plan that is informed by an annual planning exercise and approved by the Deputy Minister. The plan follows the Mandatory Procedure for Evaluation outlined in the [Directive on Results](#).

The primary purpose of the plan is to help the Deputy Minister and senior management ensure that credible, timely and neutral information on the ongoing relevance and performance of direct program spending and ongoing programs of grants and contributions is available to support evidence-based decision making and provides results for Canadians.

The plan serves as a resource to:

- assess the Department's compliance with the [Financial Administration Act](#) (FAA) and the [Policy on Results](#)
- ensure that evaluation commitments in submissions approved by the Treasury Board are respected
- confirm evaluation coverage of the areas of highest risk for the Department
- assess the adequacy of resourcing for the evaluation function

It also:

- provides an opportunity to align evaluations, to ensure that the information needs of the Department and other evaluation users (for example, other government departments where ECCC is delivering horizontal programming) are being met
- helps ensure that evaluations supporting program redesign are planned and completed in advance of program renewal
- allows departmental groups engaged in strategic planning and reporting activities to identify when evaluation results will be available to inform their work
- provides central agencies with advanced notice of when evaluation results will be available to inform government policy development, spending reviews and resource allocation decisions

## 2. Planning context

The AEB uses the previous year's risk assessments and plans as a starting point for the annual planning exercise. The approach to planning considers the following key elements and principles.

- A planning exercise is conducted before the start of each fiscal year, in consultation with senior executives, relevant ECCC governance committees and the Treasury Board Secretariat. Planned evaluation projects, scheduling and resources are discussed and recommended for approval by the Deputy Minister.
- An initial review is based on the AEB's knowledge of ECCC's programs and priorities and consideration of a number of key sources and documents, including the Departmental Plan (DP) and the Departmental Corporate Risk Profile (CRP).
- The plan ensures that all mandatory evaluation requirements are met, including fulfilling commitments specified in Treasury Board submissions and addressing the statutory requirements of the FAA (section 42.1).
- Planned projects are presented to demonstrate how they align with the programs in the Program Inventory in the newly developed Departmental Results Framework (DRF). As well, alignment with the 2017 to 2018 Program Alignment Architecture (PAA) is included for reference.
- Where appropriate, the AEB takes into account similar risks and projects identified by key partner departments (for example, science-based departments and agencies), and considers opportunities for collaboration and joint evaluations.
- The plan reflects an adequate resource allocation that factors in the AEB's available resources, capacity and expertise. It also considers the capacity of ECCC branch and program areas to accommodate multiple projects.

This year's plan is a result of discussions at each ECCC branch executive management table. It was also reviewed at the ADM Corporate Operations Committee, and discussed at the Executive Management Committee, which recommended the plan for approval by the Deputy Minister.

### **3. Past year in review (2017 to 2018)**

In 2017 to 2018, AEB evaluators worked on 19 projects, including eight horizontal evaluations, three of which were led by ECCC. Of the 19 projects, 13 were initiated prior to fiscal year 2017 to 2018, and six were initiated in FY 2017 to 2018. A backlog of projects had resulted from a combination of two factors: a large number of evaluations initiated to meet the 100% coverage requirements of the previous 2009 Policy on Evaluation and a staff shortage in the Evaluation Division.

Nine of the 19 projects were approved in fiscal year 2017 to 2018. Another six projects are planned for approval in 2018 to 2019. Two large-scale horizontal evaluations are planned for completion after fiscal year 2018 to 2019 (Youth Employment Strategy and the Oceans Protection Plan). A further two projects were postponed or cancelled, based on feedback received from program senior management.

In fiscal year 2017 to 2018, in addition to this exceptionally high number of evaluation projects, evaluation staff reviewed and provided input on 15 Memoranda to Cabinet and nine Treasury Board Submissions. These reviews were conducted to ensure that findings from relevant past evaluations were appropriately reflected and that future evaluation requirements are identified and funded. Evaluation staff coordinated input from AEB colleagues so that external and internal audit results and requirements were also appropriately reflected.

AEB staff is continuously collaborating with the Corporate Services and Finance Branch (CSFB), departmental planners and managers to improve performance measurement. In fiscal year 2017 to 2018, evaluation staff reviewed and provided input on 12 implementation or performance measurement strategies for new or amended regulations. Staff was also an active participant in tiger teams responsible for developing performance information profiles for each of the 16 programs included in the Program Inventory, as required by the [Policy on Results](#).

A summary of the past year's evaluation projects is presented in [Table 1](#).

## 4. Five-year plan (fiscal year 2018 to 2019 to fiscal year 2022 to 2023)

### 4.1 Planning highlights

A total of 28 evaluation projects are planned for the five-year planning horizon.

- Twenty-five of the 28 projects are being conducted to meet mandatory evaluation requirements, including fulfilling evaluation commitments specified in TB submissions and addressing the statutory requirements of the FAA (section 42.1), taking into consideration the exemptions identified in the TB [Policy on Results](#).
- Three of the 28 projects are discretionary evaluations (non-mandatory under the [Policy on Results](#)). They were identified during consultations with senior management and the Deputy Heads as being of particular value to support decision making.
- Fourteen of the 28 projects are horizontal evaluations that will address initiatives across multiple departments and organizations. Through the AEB, ECCC is the lead department on six horizontal evaluations and a participant in eight evaluation projects.

The following appendices present the AEB's detailed five-year evaluation plan.

- [Appendix A](#) presents the detailed five-year evaluation schedule, identifying planned evaluations by year of completion, the rationale for project selection for both mandatory and discretionary evaluations and the estimated resource requirements in person-days and dollars for all projects in progress during fiscal year 2018 to 2019. It also presents planned evaluation coverage, including spending coverage and programs in the Program Inventory, and identifies a rationale for spending and programs not scheduled to be evaluated.
- [Appendix B](#) identifies program activities and initiatives not being evaluated during the five-year evaluation schedule.

## 4.2 Resources

The current plan is based on the AEB's fiscal year 2018 to 2019 planned budget of \$3.3 million and an estimated total of 27.6 FTEs (see [Table 4](#)).

<sup>1</sup> The fiscal year 2018 to 2019 planned budget represents the resources required to maintain the AEB's core capacity and deliver the Risk-Based Audit Plan and the Departmental Evaluation Plan. It includes both base funding and discretionary or temporary funds.

<sup>2</sup> Predetermined projects represent discretionary funds identified in TB submissions for the conduct of specific evaluations. These funds cannot be used for other purposes and normally vary from year-to-year, depending on the specific programs and approvals. No discretionary funds were approved for fiscal year 2018 to 2019.

The Evaluation Division shares resources with the Internal Audit Division for the provision of support to committees, publication on the ECCC website and follow-up on recommendations. As shown in [Table 5](#), the budget for evaluation activities is \$1.4 million, with 13.3 indeterminate FTEs to provide direct evaluation and advisory services. The AEB has the mix of skills that allow it to carry out most of its evaluations without having to resort to outsourcing; however, if an evaluation project requires a specific expertise, the AEB will use contracted experts to complete the evaluation team.

<sup>1</sup>The salaries include casuals, as well as 50% of the Chief Audit Executive and Head of Evaluation's office, 50% of the administrative function, 100% of Professional Practices and Liaison and 50% of the committee coordination.

<sup>2</sup>Amounts only include consultant fees related to evaluation projects. They do not include translation and editing fees.

<sup>3</sup>Training is based on 1% of the salary requirements.

<sup>4</sup>Operations and Maintenance include 50% of the Chief Audit Executive and Head of Evaluation's office, 50% of the administrative function and 50% of Professional Practices and Liaison.

The AEB's management team is committed to delivering the planned audit and evaluation projects planned for fiscal year 2018 to 2019. Should the feasibility of delivering on the Departmental Evaluation Plan be constrained by available resources or other factors, the Head of Evaluation will bring this to the attention of the Performance Measurement, Evaluation and Results Committee, and will recommend any necessary changes to the Deputy Minister.
