Message from the Minister

When Canadian workplaces are diverse and equitable, our middle class is stronger and our economy thrives. Workplaces that make diversity and equity a priority know that it is not only the right thing to do, it is also the smart thing to do.

Our government knows that increasing the number of women, Canadians from underrepresented groups, Canadians with disabilities and Indigenous people in the workforce will help grow our economy in a way that benefits everyone.

But we cannot foster more diverse and equitable workplaces alone, which is why our partnerships with employers and the labour movement will be essential as we work to implement pay equity, pay transparency and flexible work arrangements, and as we continue to promote good-quality jobs, modernize federal employment standards and eliminate workplace harassment and violence.

Through our shared commitment to creating equitable, diverse and inclusive workplaces, we will help grow our middle class, help those working hard to join it and build a country where every Canadian has a real chance to succeed.

With this in mind, I'm pleased to present the *Employment Equity Act: Annual Report 2017*. This year marks the 30th edition of the report, which outlines the progress made by federally regulated private-sector employers towards achieving equality and fairness in workplaces across Canada.

While progress has been made, there is still work to be done. A more diverse, equitable and inclusive workforce is key to ensuring all Canadians can benefit from our economic growth. I encourage all employers to continue their efforts to create equitable workplaces that are truly inclusive and representative of the diversity of our country.

The Honourable Patty Hajdu, P.C., M.P.
Minister of Employment, Workforce Development and Labour

Introduction

Under the *Employment Equity Act* (the Act), it is the duty of the Minister responsible for Labour to submit an annual report to Parliament on the status of employment equity in the federally regulated private sector.¹ This document consolidates and highlights the statistical results achieved by employers subject to the Legislated Employment Equity Program² during the 2016 calendar year for the four designated groups: women, Aboriginal peoples, persons with disabilities and members of visible minorities. While qualitative data from employers is not consolidated in this report, it is used in program and policy development to support employers in achieving employment equity.

Data from 2015 is included throughout the report to allow for year-to-year comparisons.

The purpose of the Act is to achieve equality in the workplace so that no person shall be denied employment opportunities or benefits for reasons unrelated to ability. In the fulfilment of that goal, the Act seeks to correct the conditions of disadvantage in employment experienced by women, Aboriginal peoples, persons with disabilities and members of visible minorities.

The Act gives effect to the principle that employment equity means more than treating persons in the same way but also requires special measures and the accommodation of differences.

Federally Regulated Private Sectors

Employers are organized by sector, based on the classification of the majority of their workforce using the North American Industry Classification System (NAICS). The federally regulated private-sector workforce comprises four sectors:

Banking and Financial Services	Includes all major Canadian banks and other establishments primarily engaged in financial transactions or in facilitating transactions.
Communications	Comprises businesses that operate radio and television broadcasting studios and facilities, as well as telecommunications services providers.
Transportation	Consists of employers in the air, rail, bus, water and pipeline transportation industries; inter-provincial trucking; postal service; couriers; as well as warehousing and storage.
'Other'	Encompasses a diverse group of employers working in industries such as nuclear power generation; metal ore mining; professional, scientific and technical services; investigation and security services; construction; food and wood manufacturing; wholesale trade; arts, entertainment and recreation; and public administration.

¹ Private-sector employers include federal Crown corporations and other federal government business enterprises.

² The Legislated Employment Equity Program applies to all federally regulated private-sector employers, federal Crown corporations and other federal government business enterprises with 100 or more employees in four industrial sectors: banking and financial services, communications, transportation and 'other'.

About the Data

Employment equity encourages the establishment of working conditions that are free of barriers, corrects the conditions of disadvantage in employment and promotes the principle that equality requires special measures and the accommodation of differences.

The most common quantitative measure of employment equity is the extent to which the representation of members of designated groups in the employers' workforce meets their representation in the Canadian workforce. The representation of each of the four designated groups is compared to their availability in the Canadian labour market—referred to as labour market availability (LMA). A workforce is considered fully representative when the representation of designated group members is equal to their LMA.

The extent to which the representation of a particular designated group approaches, meets or surpasses LMA is referred to as the attainment rate of LMA. This indicator allows for the identification of gaps between the representation of a particular designated group and its LMA. For example, if a designated group's representation is below the LMA, the attainment rate of LMA will be less than 100% and further analysis may be required to understand if barriers to employment exist and where appropriate measures would need to be implemented.

Progress has been made when the gap between a designated group's representation and LMA narrows (i.e. the attainment rate approaches 100%) or when a group's representation equals or exceeds LMA (i.e. the attainment rate equals or surpasses 100%).

Other quantitative indicators of equality include salary ranges, as well as shares of hires, promotions and terminations. This report provides details on each of these indicators for the four designated groups.

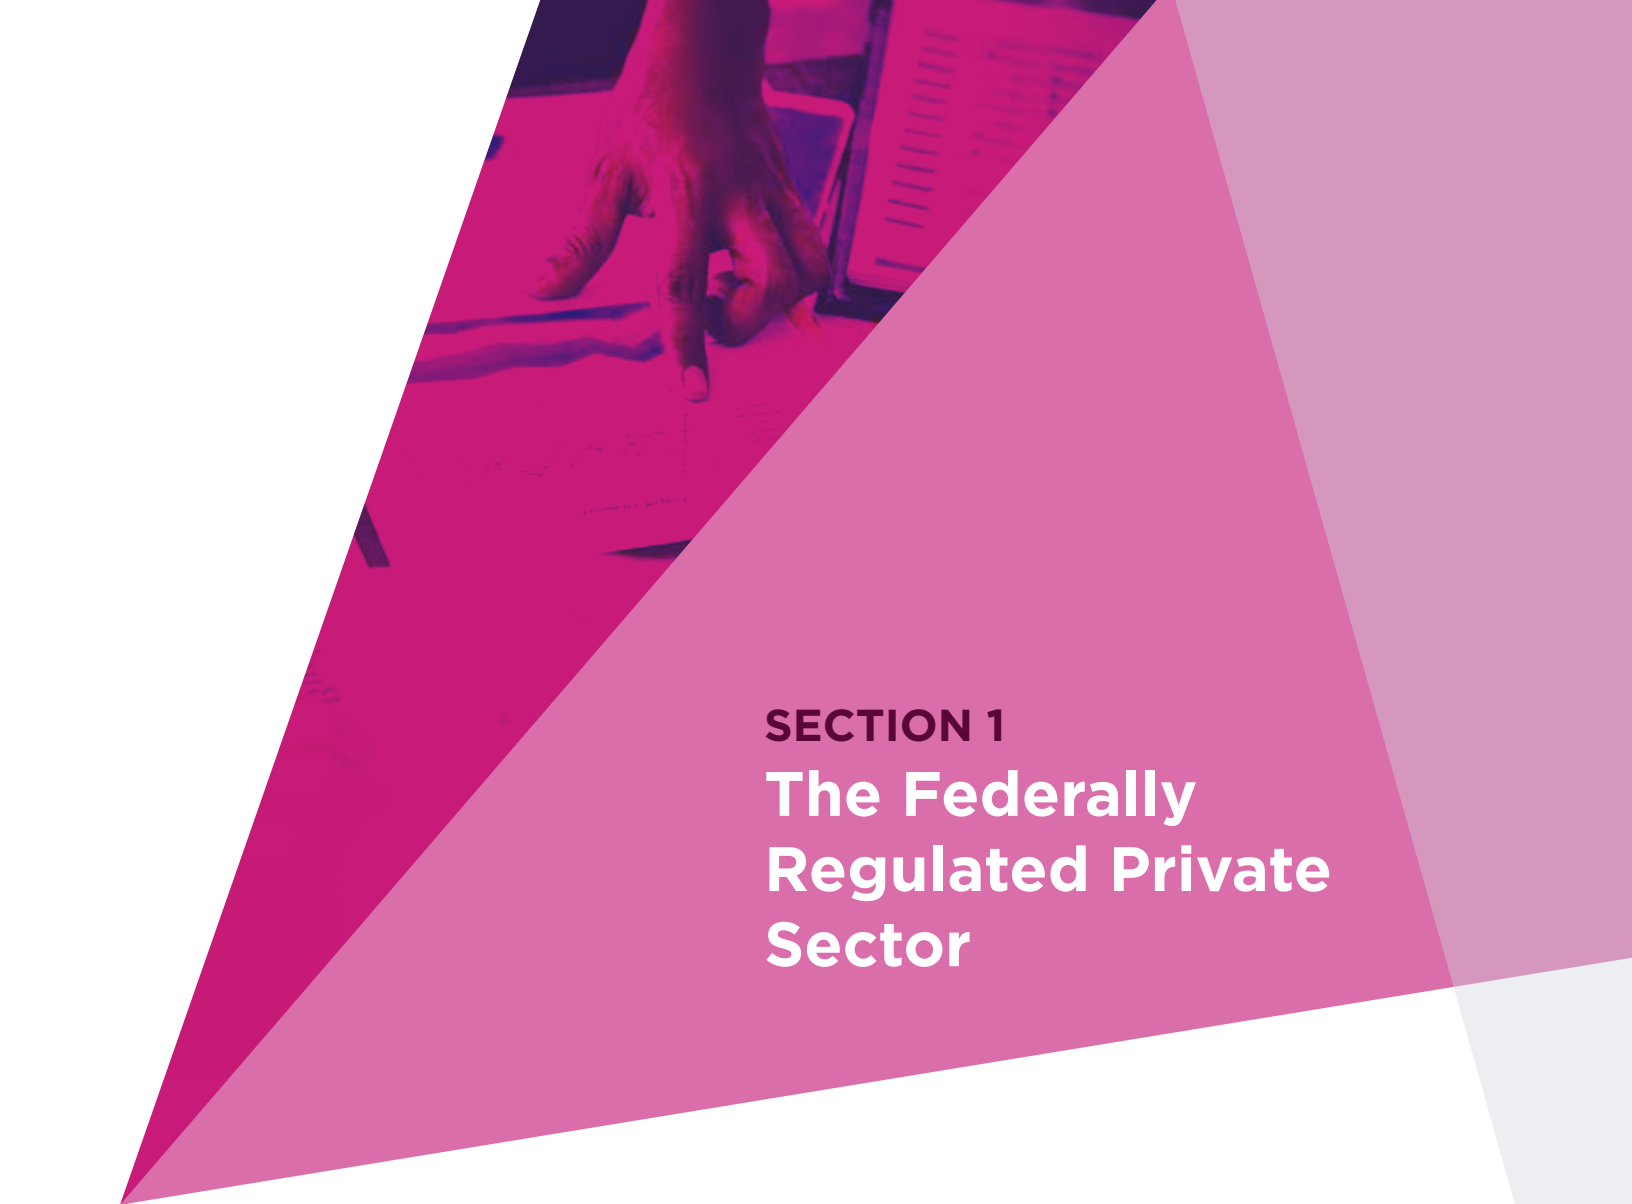

The current LMA data for women, Aboriginal peoples and members of visible minorities is obtained from Statistics Canada's 2011 National Household Survey. Data for persons with disabilities is obtained from the 2012 Canadian Survey on Disability, also conducted by Statistics Canada. Additional information regarding data used for employment equity purposes can be found in Appendix B.

Representation is the share of designated groups in a given labour force (e.g. the entire federally regulated private-sector workforce, the banking and financial services sector or an individual bank).

Labour market availability refers to the share of designated group members in the workforce from which the employers could hire.

Attainment rate of labour market availability refers to the extent to which representation approaches, meets or exceeds labour market availability by dividing the representation rate by the LMA rate.

Note for the 2017 Annual Report: To better align the employment equity sector data with the NAICS code structure, some employers were reclassified in 2017. The new sector classification methodology has been applied to the 2015 data presented in this report to allow for year-to-year comparisons. A table summarizing the changes is provided in Appendix B.

SECTION 1
**The Federally
Regulated Private
Sector**

Overview

For the 2016 calendar year, 477 employers submitted a report to the Minister responsible for Labour. Together, these employers had a total of 720,092 employees across Canada, which represents approximately 3.7%³ of the Canadian workforce.

Table 1 indicates that overall, members of visible minorities made the most progress from 2015 to 2016, increasing their overall representation by one full percentage point. Members of visible minorities were the only designated group whose representation continued to surpass Canadian LMA, with an overall attainment rate of LMA increasing from 119.1% in 2015 to 124.7% in 2016.

Table 1: Designated Group Representation and Attainment Rate of Canadian LMA* for the Federally Regulated Private Sector, 2015 and 2016 (%)

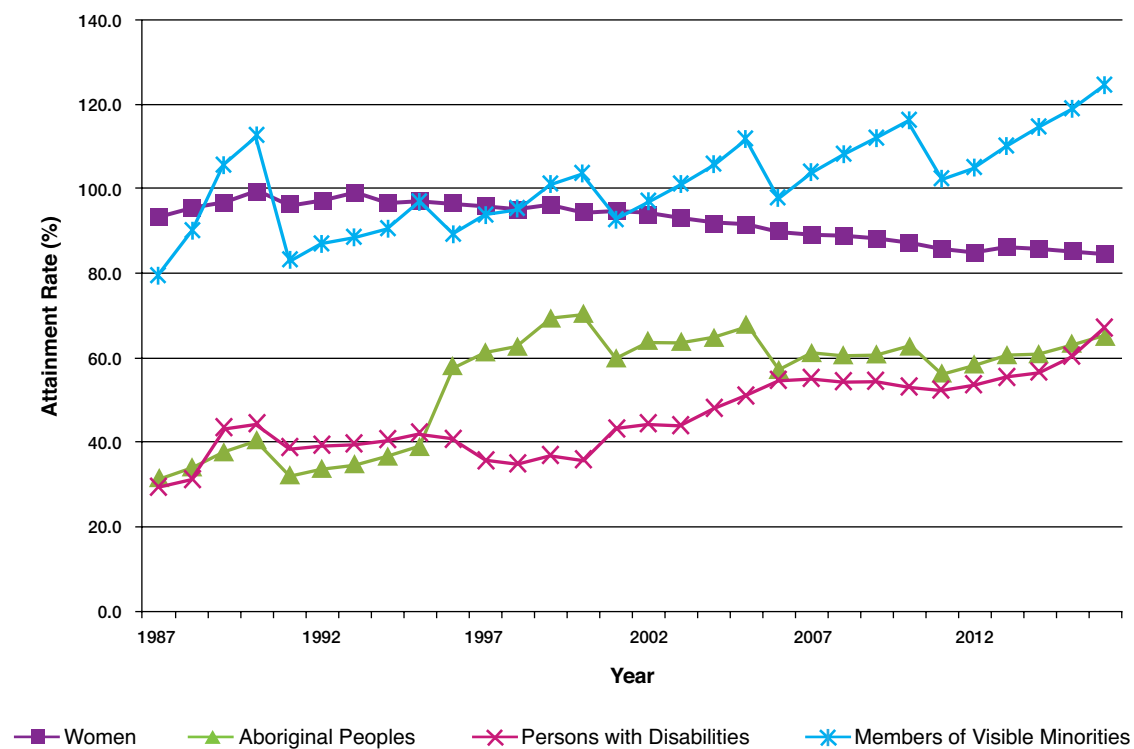

Federally Regulated Private Sector (Overall)	Women	Aboriginal Peoples	Persons with Disabilities	Members of Visible Minorities
	%	%	%	%
2015 Representation	41.0	2.2	3.0	21.2
2016 Representation	40.7	2.3	3.3	22.2
Change in Representation Δ	-0.3	+0.1	+0.3	+1.0
2015 Attainment Rate of Canadian LMA	85.1	62.9	61.2	119.1
2016 Attainment Rate of Canadian LMA	84.4	65.7	67.3	124.7
Canadian LMA	48.2	3.5	4.9	17.8

* Sources: Statistics Canada, 2011 National Household Survey and 2012 Canadian Survey on Disability.

³ Source: Statistics Canada, Table 282-0002 - Labour Force Survey estimates, the number of civilian non-institutionalized persons 15 years of age and over who during 2016 were employed or unemployed.

Chart 1 provides an overview of the extent to which representation approaches, meets or exceeds LMA for the four groups covered by the Act. The chart shows that Aboriginal peoples and persons with disabilities have made progress towards LMA since 1987 and members of visible minorities have surpassed LMA. However, the attainment rate of Canadian LMA for women has been declining since reaching its highest attainment rate in 1990 (99.4%). In addition, 2016 marked the lowest attainment rate of Canadian LMA (84.5%) for women. The attainment rate of Canadian LMA for Aboriginal peoples reached 65.1% in 2016, its highest level in the last 11 years. The attainment rate of Canadian LMA for Aboriginal peoples, while still below full representation in the federally regulated private sector, has more than doubled since the Act came into force. However, it remains the lowest attainment rate of Canadian LMA of all designated groups. The attainment rate of Canadian LMA for persons with disabilities continued on an upward trend, reaching its highest level in 2016 (67.0%). The only group whose representation has continued to surpass LMA is members of visible minorities, making additional progress from 2015 (119.0%) to 2016 (124.4%).

Chart 1: Designated Groups Attainment Rate of Canadian LMA* from 1987 to 2016 (%)

* Sources: Statistics Canada, 1986 to 2006 Census; 1986 and 1991 Health and Activity Limitation Survey; 2001 and 2006 Participation and Activity Limitation Survey; 2011 National Household Survey, and 2012 Canadian Survey on Disability.

Note: In 1996, the Census methodology for calculating LMA of Aboriginal peoples changed, causing a drop in LMA. In 2001, Statistics Canada began using the World Health Organization's *International Classification of Functioning, Disability and Health* framework to define disability rather than the 1980 *International Classification of Impairments, Disabilities, and Handicaps*; this resulted in a drop in LMA for persons with disabilities.

Table 2 shows that 44.0% of employees in the federally regulated private sector earned less than \$60,000 in 2016. Women were less likely to make salaries of \$50,000 or more than any other designated group or employees.

Table 2: Salaries by Designated Groups of Federally Regulated Private-Sector Employees in Permanent Full-Time Employment as of December 31, 2016 (%)

* Each figure in the Cumulative % columns represents the cumulative total percentage of each designated group in the identified salary range or lower.

Federally Regulated Private Sectors

This section provides an analysis of the composition of the federally regulated private sector by each of the sectors that comprise it.

Table 3 shows that overall, the number of employers and of employees decreased by -1.9% and -1.4% respectively from 2015 to 2016. While the banking and financial services sector accounts for less than 10% of employers in the federally regulated private sector, it employs about a third of all federally regulated employees. The transportation sector saw the largest decline in the number of employers (-2.4%), while the communications sector was most impacted by a reduction in the number of employees (-5.0%). The majority of employers in the transportation sector operated in the ground transportation subsector. The number of employers in the 'other' sector remained stable between 2015 and 2016, but this sector was the only one to experience an increase in the number of employees (+2.8%). The service industries subsector had the most significant increase in the number of employees (+6.2%).

Table 3: Federally Regulated Private-Sector Employers and Employees in 2015 and 2016

Sectors	Employers*					Employees				
	2015		2016		Δ (%)	2015		2016		Δ (%)
	#	%	#	%		#	%	#	%	
Banking and Financial Services	36	7.4	36	7.5	-	238,575	32.7	237,225	32.9	-0.6
Communications	54	11.1	53	11.1	-1.9	140,445	19.2	133,492	18.5	-5.0
Transportation	334	68.7	326	68.3	-2.4	296,715	40.6	293,113	40.7	-1.2
Air Transportation	83	24.9	84	25.8	+1.2	82,452	27.8	83,751	28.6	+1.6
Ground Transportation	215	64.4	207	63.5	-3.7	196,980	66.4	191,601	65.4	-2.7
Water Transportation	36	10.8	35	10.7	-2.8	17,283	5.8	17,761	6.1	+2.8
'Other'	62	12.8	62	13.0	-	54,750	7.5	56,262	7.8	+2.8
Production Industries	29	46.8	28	45.2	-3.4	30,229	55.2	30,229	53.7	-
Service Industries	33	53.2	34	54.8	+3.0	24,521	44.8	26,033	46.3	+6.2
All Sectors	486		477		-1.9	730,485		720,092		-1.4

*The number of employers in the federally regulated private sector can change from year to year as a result of mergers, acquisitions, closures, start-ups or organizations fluctuating above or below the 100-employee threshold.

Table 4A shows that in the banking and financial services sector, the representation of women and members of visible minorities continued to surpass Canadian LMA in 2016. This sector also made gains for persons with disabilities, bringing their Canadian LMA attainment rate from 81.6% in 2015 to 91.8% in 2016. The representation of persons with disabilities and of members of visible minorities both surpassed sector LMA, with an attainment rate above 100%.

Table 4A: Representation and Attainment Rate of Canadian and Sector LMA* of Designated Group Members in the Banking and Financial Services Sector, 2015 and 2016 (%)

	Women	Aboriginal Peoples	Persons with Disabilities	Members of Visible Minorities
Banking and Financial Services Sector	%	%	%	%
2015 Representation	59.9	1.3	4.0	30.2
2016 Representation	58.8	1.3	4.5	31.3
Change in Representation Δ	-1.1	0.0	+0.5	+1.1
2015 Attainment Rate of Sector LMA	96.8	81.3	121.2	114.0
2016 Attainment Rate of Sector LMA	95.0	81.3	136.4	118.1
Banking and Financial Services Sector LMA	61.9	1.6	3.3	26.5
2015 Attainment Rate of Canadian LMA	124.3	37.1	81.6	169.7
2016 Attainment Rate of Canadian LMA	122.0	37.1	91.8	175.8
Canadian LMA	48.2	3.5	4.9	17.8

* Sources: Statistics Canada, 2011 National Household Survey and 2012 Canadian Survey on Disability.

Table 4B indicates that in the communications sector, the representation of members of visible minorities continued to surpass Canadian LMA (attainment level of 127.0% in 2016), with representation increasing by 2.8 percentage points from 2015 to 2016, an increase well above the other designated groups. When compared to sector LMA, Aboriginal peoples reached full representation in 2016 and members of visible minorities continued to exceed sector LMA. Overall, while the attainment rate of women remained stable for both Canadian and sector LMA, the other groups experienced increases of approximately 20 percentage points in the attainment rate of sector LMA and of at least 10 percentage points in the attainment rate of Canadian LMA.

Table 4B: Representation and Attainment Rate of Canadian and Sector LMA* of Designated Group Members in the Communications Sector, 2015 and 2016 (%)

	Women	Aboriginal Peoples	Persons with Disabilities	Members of Visible Minorities
Communications Sector	%	%	%	%
2015 Representation	36.3	1.8	2.5	19.8
2016 Representation	35.7	2.3	3.4	22.6
Change in Representation Δ	-0.6	+0.5	+0.9	+2.8
2015 Attainment Rate of Sector LMA	80.7	78.3	49.0	143.5
2016 Attainment Rate of Sector LMA	79.3	100.0	66.7	163.8
Communications Sector LMA	45.0	2.3	5.1	13.8
2015 Attainment Rate of Canadian LMA	75.3	51.4	51.0	111.2
2016 Attainment Rate of Canadian LMA	74.1	65.7	69.4	127.0
Canadian LMA	48.2	3.5	4.9	17.8

* Sources: Statistics Canada, 2011 National Household Survey and 2012 Canadian Survey on Disability.

Table 4C indicates that in the transportation sector, representation remained generally stable from 2015 to 2016. While none of the designated groups reached or surpassed Canadian LMA, the representation of women exceeded sector LMA with an attainment rate of almost 120% in 2016. The representation of persons with disabilities remained low in 2016 compared to both sector and Canadian LMA.

Table 4C: Representation and Attainment Rate of Canadian and Sector LMA* of Designated Group Members in the Transportation Sector, 2015 and 2016 (%)

	Women	Aboriginal Peoples	Persons with Disabilities	Members of Visible Minorities
Transportation Sector	%	%	%	%
2015 Representation	30.3	2.8	2.5	15.9
2016 Representation	30.7	2.8	2.5	16.0
Change in Representation Δ	+0.4	0.0	0.0	+0.1
2015 Attainment Rate of Transportation Sector LMA	117.9	84.8	42.4	81.5

2015 Attainment Rate of Canadian LMA	62.9	80.0	51.0	89.3
2016 Attainment Rate of Canadian LMA	63.7	80.0	51.0	89.9
Canadian LMA	48.2	3.5	4.9	17.8

* Sources: Statistics Canada, 2011 National Household Survey and 2012 Canadian Survey on Disability.

Table 4D indicates that the representation of women increased and continued to surpass the transportation sector LMA in the air and ground transportation subsectors. The representation of Aboriginal peoples continued to surpass the transportation sector LMA in the water transportation subsector. The representation of persons with disabilities remained well below LMA across all subsectors, with the highest level of attainment reaching 45.8% in the ground transportation subsector in 2016. Representation of members of visible minorities remained below the transportation sector LMA across the three subsectors, but remained closest to full LMA attainment in the air transportation subsector.

Table 4D: Representation and Attainment Rate of Sector LMA* of Designated Group Members in the Subsectors of the Transportation Sector, 2015 and 2016 (%)

* Sources: Statistics Canada, 2011 National Household Survey and 2012 Canadian Survey on Disability.

Table 4E shows that in the 'other' sector, the representation of Aboriginal peoples decreased slightly (-0.2%), but remained above Canadian LMA, the only designated group for whom this is the case, with an attainment rate of 117.1% in 2016. When compared to sector LMA, the representation of members of visible minorities continued to exceed LMA in 2016, with an attainment rate of 104.3%.

Table 4E: Representation and Attainment Rate of Canadian and Sector LMA* of Designated Group Members in the 'Other' Sector, 2015 and 2016 (%)

	Women	Aboriginal Peoples	Persons with Disabilities	Members of Visible Minorities
'Other' Sector	%	%	%	%

Table 4F shows that the representation of women and members of visible minorities continued to exceed the sector LMA in the service industries. Aboriginal peoples also continued to surpass the sector LMA in the production industries. The attainment rate of sector LMA was the lowest for persons with disabilities across both subsectors of the 'other' sector in 2015 and 2016.

Additional data on the representation of employees by designated group and sector is provided in Appendix A.

SECTION 2
**Designated
Groups Profiles**

Women

In 2016, the representation rate of women decreased by 0.3 percentage point compared to 2015 (from 41.0% in 2015 to 40.7% in 2016), the only designated group to have experienced a decrease. All sectors combined, the share of terminations of women exceeded their share of hires, meaning that women left the workforce at a higher rate than they entered it. This trend has been noted since 2008 and contributes to the ongoing decline in representation levels. However, progress can be observed in some areas; for instance, the representation of women in the *Middle and Other Managers* occupational group surpassed LMA and progress was also noted in the *Senior Managers* occupational group.

Chart 2 shows that since 1987, the representation of women increased and peaked in 1993; however, it has been on a mostly downward trend since the early 2000s. The representation of women in 2016 (40.7%) was 0.2 percentage point below what it was in 1987 (40.9%).

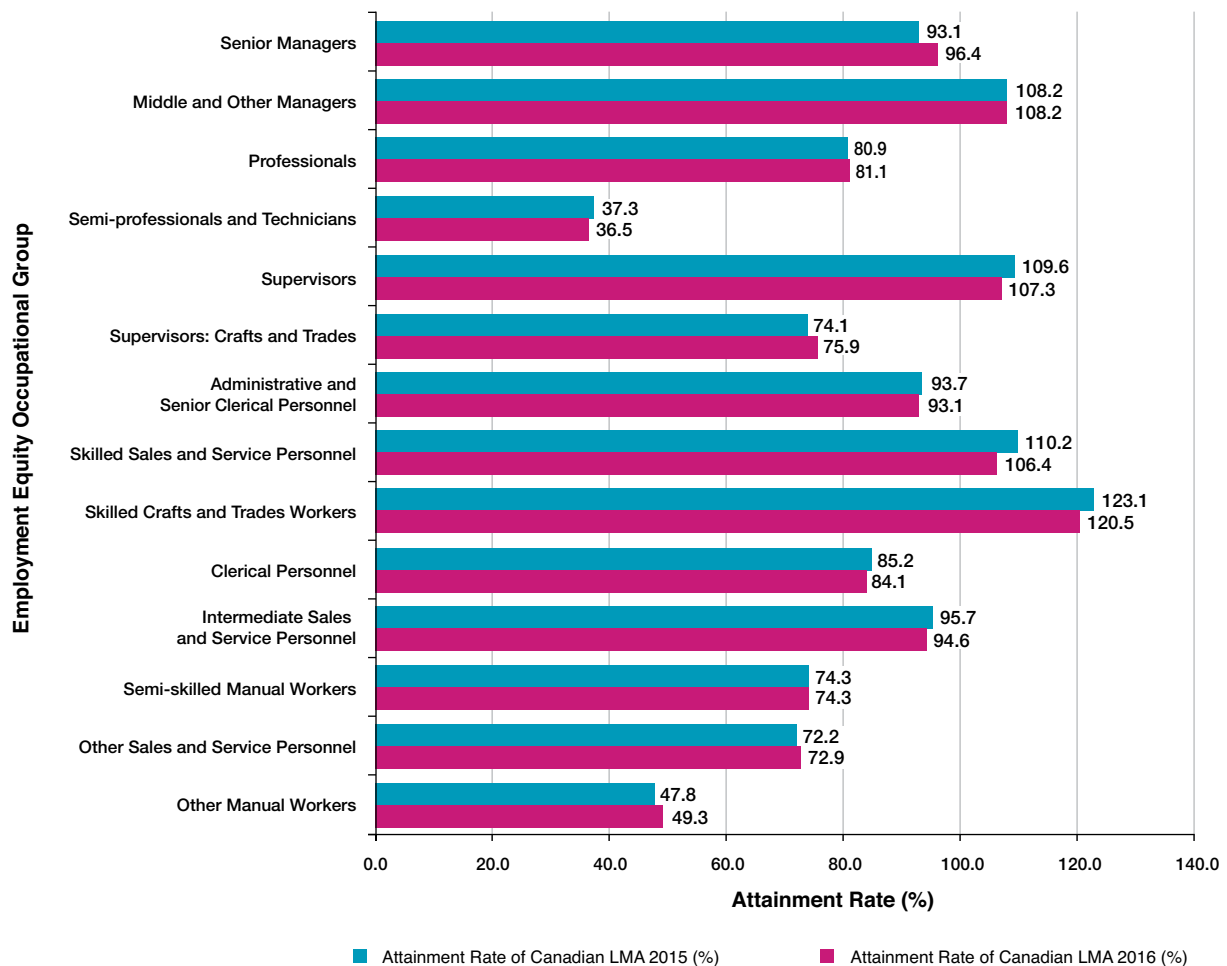

Chart 2: Representation and Canadian LMA* of Women in the Federally Regulated Private Sector, 1987 to 2016 (%)

* Sources: Statistics Canada, 1986 to 2006 Census and 2011 National Household Survey.

Chart 3 illustrates that the attainment rate of Canadian LMA of women is particularly low for the following two occupational groups: *Semi-Professionals and Technicians* and *Other Manual Workers*. However, the LMA attainment rates of women in management categories approached or exceeded the overall Canadian LMA (*Senior Managers, Middle and Other Managers, and Supervisors*). Women have the highest attainment rate of Canadian LMA of all four designated groups in the *Senior Managers* occupational group. Of all occupational groups, the attainment rate is highest for women in the *Skilled Crafts and Trades Workers* group.

Chart 3: Attainment Rate of Canadian LMA* of Women by Occupational Groups in the Federally Regulated Private Sector, 2015 and 2016 (%)

* Source: Statistics Canada, 2011 National Household Survey.

Table 5 provides a more in-depth analysis of occupational group representation as compared to their respective sector LMA. The representation of women in the *Senior Managers* occupational group surpassed sector occupational LMA in all four sectors, the only occupational group for which this is the case.

** Change values may not equal the differences between the attainment rates due to rounding.

Banking and financial services sector

Women increased their rate of attainment of sector occupational LMA from 2015 to 2016 in the *Senior Managers, Skilled Crafts and Trades Workers, Other Sales and Service Personnel* and *Other Manual Workers* occupational groups. The increase for this last occupational group is particularly noticeable, at +34.4%. In 2016, the representation of women was above sector occupational LMA in the *Senior Managers, Professionals* and *Semi-Skilled Manual Workers* groups. However, the representation of women was well below sector occupational LMA in the *Supervisors: Crafts and Trades* and *Other Sales and Service Personnel* occupational groups.

Communications sector

Women significantly increased their rate of attainment of sector occupational LMA from 2015 to 2016 in the *Other Manual Workers* occupational group, and improved but much less significantly in other occupational groups (*Senior Managers, Professionals, Supervisors: Crafts and Trades, Administrative and Senior Clerical Personnel* and *Other Sales and Service Personnel*). In 2016, the representation of women was above sector occupational LMA in the *Senior Managers, Semi-Skilled Manual Workers, Other Sales and Service Personnel* and *Other Manual Workers* occupational groups. However, women in this sector have the lowest level of attainment of sector occupational LMA in the *Supervisors, Supervisors: Crafts and Trades, and Skilled Crafts and Trades Workers* occupational groups.

Transportation sector

Women increased their rate of attainment of sector occupational LMA in eight of the 14 occupational groups from 2015 to 2016. In 2016, women were also above sector occupational LMA in nine out of 14 occupational groups, making this sector the most successful at reaching full representation at the occupational level, compared to sector-specific occupational level LMA.

'Other' sector

Women increased their rate of attainment of sector occupational LMA in all management and supervisory occupational groups between 2015 and 2016, with the exception of *Supervisors: Crafts and Trades*. In 2016, women's representation surpassed sector occupational LMA in the *Senior Managers, Administrative and Senior Clerical Personnel, Skilled Crafts and Trades Workers, Clerical Personnel* and *Other Sales and Service Personnel* occupational groups.

Additional data on the representation of employees by designated group and sector, including data on hiring, promotions and terminations, is provided in Appendix A.

Aboriginal Peoples

From 2015 to 2016, the representation of Aboriginal peoples in the federally regulated private sector increased by 0.1 percentage point. Overall, as well as in every sector, Aboriginal employees left the workforce at a higher rate than they entered it.

Chart 4 shows that the representation of Aboriginal peoples increased from 2.2% in 2015 to 2.3% in 2016 and remained short of the 3.5% Canadian LMA; however, the representation of Aboriginal peoples has been increasing steadily since its initial low of 0.7% in 1987.

Chart 4: Representation and Canadian LMA of Aboriginal Peoples in the Federally Regulated Private Sector, 1987 to 2016 (%)

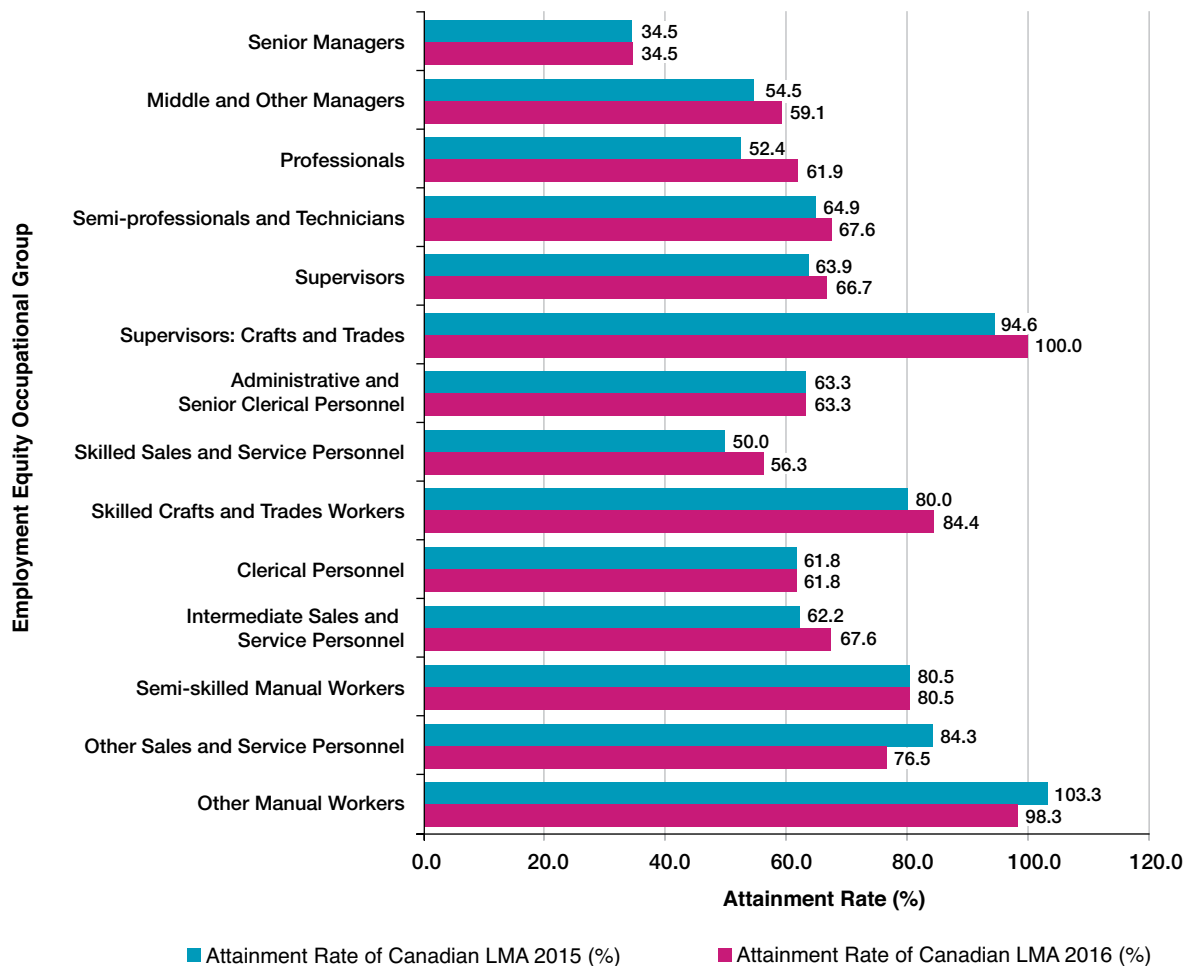

* Sources: Statistics Canada, 1986 to 2006 Census and 2011 National Household Survey.

Note: In 1996, the Census methodology for calculating LMA of Aboriginal peoples changed, causing a drop in LMA

Chart 5 shows that the representation of Aboriginal peoples fell significantly short of reaching full representation at the *Senior Managers* occupational group level. Other supervisory and management occupations also fell short but to a lesser extent, with the exception of *Supervisors: Crafts and Trades* which is the only occupational group in which Aboriginal peoples were fully represented in 2016.

Chart 5: Attainment Rate of Canadian LMA* of Aboriginal Peoples by Occupational Groups in the Federally Regulated Private Sector, 2015 and 2016 (%)

* Source: Statistics Canada, 2011 National Household Survey.

Table 6 provides a more in-depth analysis of occupational group representation as compared to their respective sector LMA.

* Source: Statistics Canada, 2011 National Household Survey.

** Change values may not equal the differences between the attainment rates due to rounding.

"N/A" No employees were reported for that occupational group.

Banking and financial services sector

The attainment rate of sector occupational LMA of Aboriginal peoples increased in the *Supervisors, Administrative and Senior Clerical Personnel* and *Skilled Sales and Service Personnel* occupational groups. Overall, there was also little movement in the attainment rate of occupational LMA between 2015 and 2016, with no changes observed in over half of the 14 occupational groups. However, the representation of Aboriginal peoples was at or above LMA in three of the 14 occupational groups in this sector in 2016.

Communications sector

The attainment rate of sector occupational LMA increased in all but three occupational groups between 2015 and 2016. The representation rate of Aboriginal peoples was above sector occupational LMA in nine out of the 14 occupational groups in 2016. The attainment rate of sector LMA in the *Senior Managers* occupational group decreased from 2015 to 2016 and remained below full representation. However, the attainment rate in the following occupational groups increased to above sector occupational LMA between 2015 and 2016: *Middle and Other Managers, Professionals, Clerical Personnel* and *Intermediate Sales and Service Personnel*.

Transportation sector

The attainment rate of sector occupational LMA in the transportation sector remained unchanged between 2015 and 2016 in all but five occupational groups. The attainment rate of sector occupational LMA was well above 100% in six occupational groups, including in the *Senior Managers* and *Professionals* occupational groups.

'Other' sector

The attainment rate of sector occupational LMA for Aboriginal peoples in the *Senior Managers* occupational group remained low in 2016. This sector decreased their attainment rate of sector occupational LMA in the *Middle and Other Managers* and *Supervisors* occupational groups, but increased their attainment rate of sector occupational LMA in the *Supervisors: Crafts and Trades*, bringing it above sector occupational LMA in 2016.

Additional data on the representation of employees by designated group and sector, including data on hiring, promotions and terminations, is provided in Appendix A.

Persons with Disabilities

The representation of persons with disabilities in the federally regulated private sector increased by 0.3 percentage point between 2015 and 2016. Overall and in all four sectors, more persons with disabilities left than entered the workforce.

Chart 6 illustrates that the representation of persons with disabilities reached its highest level in 2016 (3.3%), a significant increase from the initial low of 1.6% in 1987. The 2016 representation rate remained 1.6 percentage points below the 4.9% LMA.

Chart 6: Representation and Canadian LMA* of Persons with Disabilities in the Federally Regulated Private Sector, 1987 to 2016 (%)

* Sources: Statistics Canada, 1986 and 1991 Health and Activity Limitation Survey, 2001 and 2006 Participation and Activity Limitation Survey and 2012 Canadian Survey on Disability.

Note: In 2001, Statistics Canada began using the World Health Organization's *International Classification of Functioning, Disability and Health* framework to define disability rather than the 1980 *International Classification of Impairments, Disabilities, and Handicaps*; this resulted in a drop in LMA.

Chart 7 shows that the LMA attainment rate of persons with disabilities is relatively low in all occupational groups, with the exceptions of *Administrative and Senior Clerical Personnel* and *Skilled Sales and Service Personnel*, where the attainment rate of Canadian LMA has increased from 2015 to 2016 beyond the 100% threshold. The attainment rate of persons with disabilities is particularly low in the *Supervisors* and *Supervisors: Crafts and Trades* occupational groups.

Chart 7: Attainment Rate of Canadian LMA* of Persons with Disabilities by Occupational Groups in the Federally Regulated Private Sector, 2015 and 2016 (%)

* Source: Statistics Canada, 2012 Canadian Survey on Disability.

Data on the attainment rate of sector occupational LMA of persons with disabilities is not available as numbers are negligible.

Additional data on the representation of employees by designated group and sector, including data on hiring, promotions and terminations, is provided in Appendix A.

Members of Visible Minorities

The representation of members of visible minorities in the federally regulated private sector increased by 1 percentage point between 2015 and 2016. All sectors combined, members of visible minorities received a share of promotions that is higher than their representation level. Only in the 'other' sector did more members of visible minorities enter the workforce than left it.

Chart 8 illustrates that since 1987, the representation of members of visible minorities has been increasing steadily; this designated group has made the most progress in overall representation since 1987.

Chart 8: Representation and Canadian LMA* of Members of Visible Minorities in the Federally Regulated Private Sector, 1987 to 2016 (%)

* Sources: Statistics Canada, 1986 to 2006 Census and 2011 National Household Survey

Chart 9 shows that members of visible minorities had attainment rates of Canadian LMA that are above the 100% threshold in eight of the 14 occupational groups. Members of visible minorities had overall higher attainment rates of Canadian LMA than the other designated groups. This designated group's representation continued to surpass Canadian LMA in important feeder groups to the *Senior Managers* occupational group; however, their representation level in this occupational group remains below LMA despite a small increase between 2015 and 2016.

Chart 9: Attainment Rate of Canadian LMA* of Members of Visible Minorities by Occupational Groups in the Federally Regulated Private Sector, 2015 and 2016 (%)

* Source: Statistics Canada, 2011 National Household Survey.

Table 7 provides a more in-depth analysis of occupational group representation as compared to their respective sector LMA.

“–” Amount is negligible.

Banking and financial services sector

Despite a decrease in attainment rate for a number of occupational groups, members of visible minorities still either exceeded or approached sector occupational LMA in all occupational groups where the sector reported representation in 2016.

Communications sector

The attainment rate of sector occupational LMA increased in all but two of the 14 occupational groups. In this sector, the representation of members of visible minorities continued to surpass or moved to surpassing sector occupational LMA in more than half of the occupational groups in 2016 when compared to 2015.

Transportation sector

The attainment rate of sector occupational LMA increased in all management or supervisory occupational groups, with the exception of the *Supervisors: Crafts and Trades* occupational group, where it remained at the same level.

'Other' sector

The representation of members of visible minorities exceeded sector occupational LMA in six of the 14 occupational groups, including the *Middle and Other Managers* and *Professionals* occupational groups. This sector also significantly increased its rate of attainment of sector occupational LMA in 2016 in the *Supervisors, Skilled Crafts and Trades Workers* and *Other Sales and Service Personnel* occupational groups.

Additional data on the representation of employees by designated group and sector, including data on hiring, promotions and terminations, is provided in Appendix A.

SECTION 3
**Employment Equity
Programs Highlights**

In addition to ensuring compliance with the annual reporting requirements for federally regulated private-sector employers, the Act mandates a number of responsibilities to the Minister of Labour, including:

- administrating the Federal Contractors Program;
- undertaking research and developing information programs that foster understanding and promote the purpose of employment equity; and
- recognizing private-sector employers that demonstrate outstanding achievement and efforts in implementing employment equity.

This section provides an overview of the Labour Program's activities as they relate to the Federal Contractors Program, the Workplace Opportunities: Removing Barriers to Equity grants and contributions program and the Employment Equity Achievement Awards.

Federal Contractors Program

The Federal Contractors Program (FCP) seeks to generate positive social change by ensuring that organizations that do business with the Government of Canada implement employment equity in their workplace. It applies to provincially regulated organizations that have a workforce of 100 or more employees located in Canada and that received a federal goods and services contract valued at \$1 million or more (including applicable taxes).

As part of their obligations, contractors must collect and analyze data about their workforce and, where gaps in representation exist, establish goals to increase representation for the four designated groups: women, Aboriginal peoples, persons with disabilities and members of visible minorities. Contractors are required to make reasonable efforts to ensure that reasonable progress is made towards meeting their goals and achieving an equitable workforce.

As of December 31, 2016, the FCP comprised 257 employers. A total of 75 contractors were added during the 2016 calendar year.

Contractors are subject to compliance assessments to ensure that they fulfill their commitment to implement employment equity. A first compliance assessment is conducted one year after an employer has been awarded a contract. Subsequent assessments may be conducted four years after the contract award date and every three years thereafter to verify that progress is being made. In 2016, the Labour Program completed 142 first-year compliance assessments, with all contractors being found in compliance.

Additional information on the FCP, including the requirements of the program, can be found on the Canada.ca website.

Workplace Opportunities: Removing Barriers to Equity

Workplace Opportunities: Removing Barriers to Equity is a grant and contribution program created in 2014 and designed to support employers subject to the Act in their efforts to improve the representation of designated groups in areas of low representation through partnerships, sharing of information and implementing of industry-tailored strategies. In total, \$500,000 per fiscal year is available through Workplace Opportunities.

Four grant projects were funded through Workplace Opportunities in 2015. Five contribution agreements were subsequently funded in the same year, focusing on the transportation sector, given that it was identified in 2014 as having greater gaps in representation than the other federally regulated sectors (banking, communications and 'other' sectors.).

Two of the four grant projects concluded in 2015 (see Box 1) and two were completed in 2016 (see Box 2).

Box 1: Highlights of the Workplace Opportunities Projects Completed in 2015

Van Horne Institute

Funding: \$125,000 (March 2015 to October 2015)

The project involved creating a call to action, raising awareness and communicating the benefits of building inclusive workplaces by exploring issues related to workplace equity from all four designated groups' point of view, and benchmarking Canada's corporate cultures, policies and human resources practices. The Van Horne Institute created a corporate change model that enhances Canadian workplace diversity policies and practices to increase representation within the transportation sector. It also made available a library of research on diversity and inclusion that includes best practices and information on barrier reduction and elimination. Finally, it developed an education communication strategy and a content communication strategy to continue to promote diversity and inclusion through blog posts from project leaders to inspire and educate the community and its partners.

A project report is available at the following address: <http://www.buildinginclusiveworkplaces.com/wp-content/uploads/2016/05/Building-Inclusive-Workplaces-Corporate-Change-Model.pdf>

Trucking Human Resources Canada

Funding: \$125,000 (March 2015 to November 2015)

The project involved developing a business case to support industry action on workplace diversity, and the identification of challenges faced by employers in recruiting and retaining Aboriginal peoples, persons with disabilities and members of visible minorities. Overall barriers for employers were identified, such as the lack of skilled/certified employees, including heavy duty journeypersons, qualified apprentices and people with mid-level experience; turnover for trucking employees, especially in the first year of hire; and the belief that as long as employers treat everyone the same, that they are being fair and inclusive.

The business case is available on Trucking Human Resources Canada's website at the following address: <https://truckinghr.com/content/explore/recruitment-retention/workplace-diversity>

Box 2: Highlights of the Workplace Opportunities Projects Completed in 2016

Maritime Employers Association (MEA)

Funding: \$71,500 (March 2015 to September 2016)

The project involved developing a bilingual promotional video to raise awareness, dispel longshoring-related stereotypes and attract a greater number of women, Aboriginal peoples, persons with disabilities, and members of visible minorities into the industry. The video involved collaboration and partnerships between unions, federally regulated private-sector member employers, and current/future employees to ensure support for employment equity in the longshoring workforce.

The video (available in French with English subtitles) can be viewed online by visiting the following website: www.mea.ca.

National Institute of Disability Management and Research (NIDMAR)

Funding: \$125,000 (March 2015 to March 2016)

The project involved raising awareness and improving employment outcomes for persons with disabilities by encouraging and supporting employers to undertake assessments/audits of their current return to work (RTW)/disability management (DM) practices and programs. Assessments of 11 RTW/DM programs were completed in businesses in the banking, air/railway/road transportation and pipeline sectors, as well as in a Crown corporation. Employers received an analysis of their RTW/DM programs and detailed roadmaps to improve outcomes. NIDMAR also conducted detailed research and analysis of key challenges facing Canadian employers in the implementation of optimum RTW/DM policies and programs. It was found that when clear legislation is in place and when the policies were regularly monitored and reviewed (e.g. health and safety and duty to accommodate), employers did well in implementing optimum RTW/DM policies and programs. However, for newly regulated areas (e.g. workplace culture, policy development, case management procedures and tracking of injury, disability and lost time patterns), employers were less likely to implement optimum policies or programs.

Of the five contribution agreements, two concluded in 2017 and the remaining will be completed in 2018:

- **National Educational Association of Disabled Students (NEADS)**
\$161,010 (June 2015 to August 2017)
The project involved using a reverse mentoring approach between post-secondary students and employers to identify sector-specific barriers and solutions to hiring persons with disabilities.
- **BC Centre for Ability Association**
\$449,367 (June 2015 to November 2017)
The project aimed to strengthen the transportation sector's capacity to recruit and retain persons with disabilities.
- **Canadian Apprenticeship Forum**
\$210,000 (June 2015 to March 2018)
The project aims to identify and disseminate successful workplace practices on hiring and retaining Aboriginal apprentices.
- **Paqtnkek Mi'kmaw Nation**
\$269,950 (June 2015 to March 2018)
The project seeks to create partnerships between federally regulated employers and Aboriginal organizations, to identify barriers to employment faced by Aboriginal peoples.
- **Trucking HR Canada**
\$409,440 (December 2015 to March 2018)
The project seeks to improve the understanding of barriers faced by Aboriginal peoples and persons with disabilities in trucking and road transportation occupations.

2017 Employment Equity Achievement Awards

On October 5, 2017, the second annual Employment Equity Achievement Awards (EEAA) were held in Ottawa. These awards recognized federally regulated private-sector employers and federal contractors for their commitment to creating diverse and inclusive workplaces. The 2017 EEAA also provided a forum for showcasing and sharing best practices in implementing employment equity. The EEAA featured the following:

- an award ceremony with the Minister of Employment, Workforce Development and Labour;
- a panel of employers presenting their experience in equity, diversity and inclusion;
- a presentation on behavioural insight and nudging from Policy Horizons Canada; and
- small group discussions on workforce trends.

Through an application process, 18 employers were selected to receive an award (see Box 3) in one of the following categories:

- **Sector Distinction:** the Sector Distinction award recognizes employers who are inspirational role models in their sector. In addition to demonstrating a strong commitment and achieving success in implementing employment equity in their own organization, these employers also champion employment equity for the sector.
- **Outstanding Commitment:** the Outstanding Commitment to employment equity award recognizes employers who have demonstrated outstanding commitment in implementing their employment equity plans by instituting measures to remove barriers, adopting special measures and/or establishing positive policies and practices to achieve tangible results.
- **Innovation:** the Innovation award recognizes employers who have been innovative in the implementation of employment equity. This can include creativity in the design and implementation of measures to remove barriers, adoption of special measures, establishment of positive policies or practices, forward-thinking in human resources practices and/or development of new or unique initiatives.

Box 3: 2017 Employment Equity Achievement Awards Recipients

Sector Distinction

- Enbridge
- Jazz Aviation
- Royal Bank of Canada

Outstanding Commitment

- ATCO Structures & Logistics Ltd.
- Bell Canada
- Business Development Bank of Canada (BDC)
- Canadian National Railway (CN)
- Capital One Bank (Canada)
- Cogeco Connexion Inc.
- Defence Construction (1951) Ltd.
- Hemmera Envirochem Inc.
- HSBC Bank Canada
- Kindersley Transport Ltd.
- Shaw Communications Inc.

Innovation

- Export Development Canada
- Hudson Bay Mining and Smelting Inc.
- Queen's University
- Rogers Communications Inc.

The awards highlight the Labour Program's commitment to continue to work with employers to make further progress on equity and inclusion for under-represented groups in the Canadian workforce.

Employment Achievement

“The employers that were recognized for outstanding achievement in employment equity are showing real leadership in fostering diverse and inclusive workplaces. Our workplaces thrive when they are equitable, diverse and inclusive.”

– The Honourable Patty Hajdu speaking at the 2017 Employment Equity Achievement Awards in Ottawa, Ontario on October 5, 2017

The 2017 EEAA recipients with the Honourable Patty Hajdu

Representatives from Bell MTS, Jazz Aviation, HSBC and Queen's University taking part in an employer panel at the 2017 EEAA to discuss their successes, vision and lessons learned in fostering equitable, diverse and inclusive workplaces.

Conclusion

The data reported for the 2016 calendar year demonstrates that progress was made for designated groups in several underrepresented sectors or occupational groups. Overall, women's representation continued to decrease in 2016; however, this group increased its representation in sectors and occupational groups where women were historically underrepresented. Aboriginal peoples and persons with disabilities continued to make progress as well, but as was the case in previous years, they continue to struggle with representation in supervisory and management occupations. Members of visible minorities are the most successful designated group from an employment equity standpoint, both overall and in terms of sector and occupational representation.

While this report contains a brief analysis of the consolidated statistical information provided by employers, it is clear from their narrative reports, and from the successes and accomplishments recognized during the 2017 Employment Equity Achievement Awards, that they have a strong commitment to employment equity and broader diversity and inclusion goals. The findings of this report support the need to implement innovative measures to remove systemic barriers that persist in employment systems and to create workplaces that are welcoming, respectful and inclusive of all Canadians. To that end, employers are encouraged to improve their workplaces using the many resources available, including tools created by organizations that receive funding under the Workplace Opportunities: Removing Barriers to Equity program.

The Labour Program will continue to work with employers towards ensuring that every Canadian has equal access to employment and every opportunity to realize their potential.

*"Equality in employment will not happen unless we make it happen."
– Justice Rosalie Abella, 1984*

Appendix A

Tables – Federally Regulated Private-sector Employers

The following tables consolidate data from the annual reports submitted by federally regulated private-sector employers. To allow for comparative analysis, some of the data from 1987 (the year data was first collected) is included with 2015 and 2016 data.

Tables 1 to 3 in this appendix present data aggregated to include permanent full-time, permanent part-time and temporary employees. Table 4 summarizes information for the four industrial sectors, including: number, representation, hires, promotions, terminations and the net effect of hires less terminations. Tables 5 and 6 present salary data for permanent full-time and permanent part-time employees respectively.

* The number of employees and representation of the designated groups cover permanent full-time, permanent part-time and temporary employees. The hires, promotions, terminations and net effect data cover only permanent full-time and permanent part-time employees.

** The number of employees hired reduced by those terminated.

Appendix B

Technical Notes

Employers covered under the *Employment Equity Act*

The Act covers:

- federally regulated private-sector employers, federal Crown corporations and other federal government business enterprises with 100 or more employees;
- core public administration organizations listed under Schedule I or IV of the *Financial Administration Act* (FAA) (federal government departments and agencies);
- separate employer organizations in the federal public sector with 100 or more employees, listed in Schedule V of the FAA (separate agencies);
- other public-sector employer organizations with 100 or more employees, including the Canadian Forces (officers and non-commissioned members in the Regular and Reserve Forces) and the Royal Canadian Mounted Police (regular and civilian members, excluding federal public service employees); and
- federal contractor organizations that are provincially regulated suppliers of goods and services with at least 100 permanent full-time and/or permanent part-time employees in Canada that receive contracts of \$1 million or more from the federal government.

Limitations of the employment equity data

This report provides the most recent information on employment equity data for the federally regulated private sector, with the following limitations:

- To measure progress of the designated groups covered by the Act, their representation (i.e. the number of designated group employees divided by the number of all employees) in the federally regulated private sector is compared to their availability in the workforce population. Availability data is obtained from censuses or surveys conducted every five years by Statistics Canada. As a result, there is a time lag in measuring representation gaps. The current labour market availability (LMA) is based on the 2011 National Household Survey and the 2012 Canadian Survey on Disability. More information on LMA can be found in the *2011 Employment Equity Data Report*.
- Data is received annually from employers; however, the number of employers can differ from one year to the next.
- The Treasury Board of Canada Secretariat is responsible for reporting on employment equity in the federal departments, agencies and commissions that make up the core public administration. This information is available on the Canada.ca website. Other areas of the federal public sector are responsible for preparing their own reports on employment equity, which can be found on their respective websites or obtained upon request. Federal contractors are not required to report annually.

Sector and subsector data

Commencing with this annual report, the four sectors (banking, communications, transportation and 'other') were reorganized to better align the employment equity data with the North American Industry Classification System (NAICS) code structure, which resulted in some employers being reclassified to a different sector than was previously reported. This methodology has been applied to the 2015 data presented in this report to allow for year-to-year comparisons. The following table provides a summary of the changes.

Subsector	From	To
Postal Service, Couriers and Messengers	Communications	Transportation – Ground
Investigation and Security Services	Transportation	'Other' – Service Industries
Finance and Insurance	'Other'	Banking and Financial Services
Warehousing and Storage	'Other'	Transportation – Ground
