## REPORT OF THE DEPUTY MINISTER.

The Right Honourable

Sir GEORGE E. FOSTER, P.C., K.C.M.G., B.A., LL.D., D.C.L., M.P.,  
Minister of Trade and Commerce,  
Ottawa.

SIR,—I have the honour to submit herewith the Twenty-fourth Annual Report of the Department of Trade and Commerce of Canada for the fiscal year ended March 31, 1916.

Special attention is directed to the important changes made this year in this volume in presenting the trade figures of Canada. A large number of trade tables have been eliminated or transferred from Part I, and new tables substituted therefor. These changes have been made to meet the constant demand made upon the department for statistical information which could not be supplied by statements heretofore published.

The aim of the Department is to issue a trade report that will meet the needs of the business men of Canada, and hence new tables have been introduced, the object of which is to show the imports and exports of Canada *by articles* and *countries*, for a five-year period, in concise and convenient form and without necessitating a search throughout the volume for information respecting various details connected with any one article.

The annual report, therefore, issued herewith will, it is hoped, be received with approval by those engaged in commercial pursuits and by trade statisticians generally, in Canada and abroad. We believe it is the best trade report ever issued in Canada, and that it will compare favourably with that of any other country in the world. For this, credit is due to Mr. W. A. Warne, Chief Trade Statistician, and his staff. Changes in the arrangement have entailed months of arduous and painstaking labour.

### GENERAL REVIEW OF THE TRADE OF CANADA.

Current trade returns show that the volume of the external trade of Canada is now greater by far than at any previous period in the history of the Dominion. For the fiscal year ended March 31, 1916, the grand total of the imports for consumption and exports of Canadian produce—taking no account of the extraordinary movement of coin and bullion occasioned by the war—amounted to \$1,249,427,797, imports amounting to \$507,817,159 and exports to \$741,610,638. Compared with 1915, the imports of merchandise show an increase of \$52,370,847 or about 11 per cent, while the exports of Canadian produce, under the stimulus of war demands, show an increase of \$332,191,802 or about 81 per cent, a net increase in the total trade of Canada for the year of \$384,562,649. Statistics for the months of April to December show that this rate of increase is being well maintained.

For the twelve months ended December 31, 1916, the total of the imports for consumption and exports of Canadian produce—omitting coin and bullion—was \$1,858,433,294, imports totalling \$766,726,891 and exports \$1,091,706,403. In the last twelve months before the war the total for the same trade was \$995,152,685. The increase during the twenty-nine months of war is thus \$863,280,609, or more than the *whole trade* for the fiscal year 1912. During this period the imports show an increase of \$203,548,207 and the exports an increase of \$659,732,402.

## GENERAL EFFECTS OF THE WAR.

The closing of all avenues of trade between the Entente Allies and the Central Powers had, of course, the direct result of opening new channels for Canadian trade within the British Empire and with all friendly and neutral countries. New sources of supply had to be developed and consequently the inquiries reaching the Department of Trade and Commerce increased many fold. This swelled considerably the volume of work in this Department. Demands were made upon Canada for raw materials and manufactured goods to an enormous extent which in many cases could not be met, notwithstanding the fact that there was a very large increase in the output of many plants.

## BRITISH TRADE RESTRICTIONS.

The import and export trade restrictions imposed by the United Kingdom have naturally led to considerable difficulties and a great deal of correspondence. Many materials hitherto purchased from the United Kingdom in either a semi-manufactured or finished state have been obtainable only after long delays and in some cases not at all. Markets for Canadian raw materials have also had to be considerably curtailed in the United Kingdom, notwithstanding which the industrial activity of Canada has increased to an extent which two or three years ago would have been believed impossible.

## WAR ACTIVITIES OF THE DEPARTMENT.

In addition to many difficult problems which presented themselves to the department in trade matters as a direct result of the war, large purchases were made for some of the Allied Governments. The department, therefore, was required to put forth great efforts in the matter of buying, inspecting and shipping such purchases, and gladly contributed its share of such work to the Allied cause. It may, therefore, be of interest to briefly recite these and other special war activities of the department.

## APPLE ADVERTISING CAMPAIGN.

In the fall of 1914 it was brought to the attention of the Minister of Trade and Commerce that a large part of the Canadian apple crop for that year would probably be wasted, owing to the disorganization of trade as a result of the war. The Minister at once inaugurated a campaign to interest the public in the greater use of apples in the hope that a demand would be created for this fruit. An arrangement was made with one of the largest advertising agencies in Canada to prosecute a campaign of advertising the apple and its use. Many of the leading newspapers of Canada carried advertisements of Canadian apples and the campaign proved a great success. No less than 61,000 books of recipes on the use of apples were distributed to inquirers by the department. The success of the movement was amply evidenced by the results attained by the sale of apples, at reasonable prices to the general public, which would otherwise have been lost. The many expressions of approval from all parts of Canada demonstrated that the apple campaign met with general approbation.

## ONTARIO FARMERS' GIFT.

Early in the war the farmers of Ontario expressed a desire to show their loyalty to the Empire, and signified their wish to contribute a part of their surplus crops to the people of the United Kingdom. The Canadian Government accepted the gifts, on behalf of the British Government, and the organization

and management of the donations were entrusted to the Department of Trade and Commerce. The Minister of Trade and Commerce, early in October, 1914, sent a notification to the municipal authorities of Ontario, requesting that the donations be packed and forwarded to Montreal. An officer of the Department was stationed at Montreal to receive the donations and to house the same in a suitable warehouse. Large stores of oats, wheat, barley, rye, corn, peas, beans, flour, oatmeal, rolled oats, butter, cheese, canned goods, dried apples and other commodities were collected for shipment to the United Kingdom. The estimated value of the goods donated was \$91,564, while the contributions in cash totalled \$5,426. Owing to the dearth of ocean tonnage it was impossible to arrange for the transportation of the gifts from Montreal to London, and the various consignments were forwarded to St. John for shipment from that port.

## BLANKETS FOR THE FRENCH ARMY.

The French Government late in October, 1914, expressed a desire to purchase blankets in Canada for the French soldiers. The Minister of Trade and Commerce, acting for the Purchasing Committee of the Cabinet, made the necessary arrangements to purchase the blankets. The Department of Militia and Defence supervised the inspection of the blankets, and the Department of Trade and Commerce made payment therefor on presentation of the necessary certificate of inspection. The order from the French Government was for 400,000 blankets to be delivered at the earliest possible date. Much difficulty was encountered in placing so large an order in Canada, as the Canadian factories were working at full capacity. Canadian factories were given orders to the limit of their capacity, but a portion of the order allotted to Canada had to be filled in the United States. Considerable trouble was experienced in obtaining sufficient ocean transportation from St. John, the port of shipment, but shipments were made as promptly as possible. Orders were placed for over 457,000 blankets, but the mills supplied 406,716 blankets of a value of \$1,631,000.

## FLOUR FOR SOUTH AFRICA.

The South African Government early in March, 1915, cabled that they desired to purchase 35,000 bags of flour. The Department of Trade and Commerce was charged with the matter, and on March 6 called for tenders from the principal flour mill companies in Canada. A contract was entered into with one of the principal companies for the delivery of flour in New York for shipment to South Africa. The Department also arranged for the inspection of the flour at the mill. The shipments were made from New York on March 30 and April 17. The total expenses in connection therewith amounted to \$129,663.

## SHIRTS AND BLANKETS FOR THE ITALIAN ARMY.

In July, 1915, the attention of the Government was directed to the condition of the knit goods industry of Canada. It was pointed out that the mills producing underwear, sweater coats and socks were practically idle and the assistance of the Government was asked in securing orders from the Allied Governments for a portion of their military requirements. The Minister of Trade and Commerce took the matter up promptly and effectively. Orders were secured from the Italian Purchasing Commission for 600,000 undershirts and 100,000 blankets. The Department undertook the inspection of the shirts and blankets which were sent from the mills to the Italian Government via New York. The Department made payment to the mills on receipt of invoices

7 GEORGE V, A. 1917

covering the shirts and blankets supported by certificates of inspectors and certificate of arrival in New York. Up to February 15, 1917, 101,974 blankets were shipped to Italy at a cost of \$335,618, and up to the same date 1,909,624 shirts had also been sent to Italy at a cost of \$1,946,492 a total of \$2,282,110.

## CANADIAN WHEAT FOR ITALY.

It became evident early in the autumn of 1915 that Canada, in common with Australia and the United States, would have a large surplus of wheat for export. Representations were made to the British Government with a view of interesting the Allied Governments in the purchase of Canadian wheat to supplement the large quantities they would require. These representations were successful and on November 23 the Canadian Government was requested to purchase a large quantity of wheat for shipment to the Italian Government. It was decided to purchase the wheat by way of commandeering, and accordingly instructions were issued on the evening of November 27 to hold at the disposition of the Government all wheat, grades Nos. 1, 2, and 3 Northern, in the elevators at the Head of the Lakes, and in the elevators east of the Lakes. The prices at which the wheat was commandeered were the prices which ruled at the close of the market in Winnipeg on the said date, viz.: No. 1, \$1.04 $\frac{3}{4}$ ; No. 2, \$1.03 $\frac{1}{2}$ ; No. 3, 98 $\frac{3}{4}$  cents. The quantity of wheat commandeered was 13,621,822 bushels, 10,300,364 bushels being in the elevators at the Head of the Lakes, and 3,321,458 bushels in the elevators east of the Lakes.

The Department of Trade and Commerce had to make all the necessary arrangements for the purchase and delivery of the wheat commandeered. Many difficulties were encountered in carrying out the original plan of purchase. The immediate needs of the flour millers of the country had to be considered as well as the fulfilling of contracts of exporters for immediate delivery. In order to meet these various needs wheat was released for grinding and for export with the distinct understanding that the same would be returned to the elevators later. Very considerable labour was entailed not only with regard to the amount of wheat released but also in respect to the transportation from Canada to Italy.

The disposition of the wheat commandeered was as follows:—

	Bushels.
Released to millers.....	1,736,313
Released to exporters.....	350,375
Sold for Belgian relief.....	118,649
Rail and lake shortages.....	35,085
Shipped overseas.....	11,381,400
Gross quantity commandeered.....	13,621,822

This wheat was shipped from the following ports:—

	Bushels.
New York.....	3,154,406
Boston.....	789,849
Baltimore.....	294,545
Halifax.....	371,335
West St. John.....	1,831,954
Portland.....	3,629,618
Montreal.....	1,309,693
Total.....	11,381,400

## SESSIONAL PAPER No. 10

This wheat was forwarded in sixty shiploads, and, as may be expected, the transportation of the wheat to the seaboard and the loading of these ships entailed an enormous amount of labour, and even though at a time of great seaboard congestion, demurrage was paid on only two cargoes; in fact the rapid despatch of the wheat prompted a congratulatory cable to the Department from the Italian Commission in London.

## WEST INDIES TREATY APPARENTLY EFFECTIVE.

There is now ample evidence to justify the statement that the Canada-West Indies Trade Agreement has been effective in increasing the volume of trade exchanges between Canada and the West Indian Colonies. The effect is especially noticeable in the imports of certain important articles of Canadian produce into the Colonies that are parties to the agreement.

Eighty per cent of the trade of the Colonies that are parties to the agreement is carried on by Barbados, British Guiana and Trinidad, and conclusions based upon an analysis of the trade of these three may be taken as true regarding the whole group. Such an analysis shows that:

The imports from Canada from 1912 to 1915 increased from \$2,362,072 to \$4,364,791, or 85 per cent, while the imports from the United States for the same period increased from \$7,922,502 to \$8,412,678, or 6 per cent. The preference has greatly benefitted the trade with Canada in articles such as boots and shoes, butter, cheese, condensed milk, cordage, fish, flour, lumber, oats, paints and colours, paper, potatoes, pulse and soap, and has been very effective in assisting imports of Canadian fish, flour, oats and lumber as will be noted from the following table.

## CANADA TO BENEFIT BY ANGLO-PORTUGUESE TREATY

A treaty of commerce and navigation between the United Kingdom and Portugal was signed at Lisbon on August 12, 1914. Ratifications took place on May 20, 1916, and the treaty went into force on September 23, 1916. The usual colonial clauses were included in the treaty whereby British dominions, colonies, and possessions could become parties to the treaty upon giving notice of their intention so to do before the expiration of one year from the date of the exchange of ratifications of the said treaty.

On the recommendation of the Minister of Trade and Commerce of date December 1, 1916, an Order in Council was passed on December 7, 1916, that notice of adhesion upon the part of Canada be duly given, so that Canada may

7 GEORGE V, A. 1917

obtain the benefits of the conventional tariff of Portugal, in return for which Canada will grant to Portugal the benefits of the intermediate tariff upon the articles mentioned in the Franco-Canadian Convention of 1907.

The department at this date has not received notification that the adhesion of Canada has been made finally effective by the Portuguese Government. As soon as such notification is received due notice will be given.

#### THE BUSINESS MEN'S COMMISSION TO EUROPE.

During the early part of 1916 a number of business men and experts from France, with the knowledge and sanction of the French Government, paid a casual visit to the United States and Canada for the purpose of inquiring into the sources of supply therein for materials needed for the work of reconstruction in France. During their stay in Canada they were much impressed by the resources of the country and its possibilities for trade with France, and suggested the desirability of a return visit being made by Canadian representatives to their country. After due consideration it was considered advisable to send a governmental commission to make a fairly inclusive examination into possible opportunities for trade opened up by conditions caused by the war, either during the continuance or after its conclusion.

Accordingly, by Order in Council of May 9, 1916, the following gentlemen were appointed a commission for that purpose and instructed to extend their inquiries to the United Kingdom, France, Belgium, and Italy:—

Mr. H. Edmond Dupré, Quebec;  
Mr. W. F. Hatheway, St. John, N.B.;  
Mr. T. H. Wardleworth, Montreal;  
Mr. Frank Pauzé, Montreal;  
Mr. J. W. Woods, Toronto;  
Mr. Geo. W. Allen, Winnipeg, Man.

Mr. Roy Campbell, of Montreal, was appointed secretary of the commission.

The commission sailed on May 17, 1916. They spent four months in visiting the principal trade centres in those countries and received a cordial welcome everywhere, together with much valuable assistance from the Canadian Trade Commissioners in Great Britain and France. They found everywhere a desire to do more business with Canada, and brought back a large number of trade inquiries for Canadian goods. These inquiries are being made known by the department throughout the Dominion. The report of the commission is now in the printers' hands, and will be published shortly by the department.

#### COMMERCIAL INTELLIGENCE BRANCH.

As an indication of the development of the work of the Commercial Intelligence Branch, which is in charge of Mr. Watson Griffin, Superintendent, it may be noted that comparing the year 1916 with the year 1915 there was an increase of over 46 per cent in the ordinary correspondence, without including a large number of circular letters and the replies thereto.

At the beginning of the year, Mr. C. F. Just, who was formerly Canadian Trade Commissioner in Germany, entered upon his new duties as Canadian Trade Commissioner in Petrograd, Russia, and a few months later Mr. L. Dana Wilgress opened an office in Omsk as Canadian Trade Commissioner in Siberia. Both Mr. Just and Mr. Wilgress have already sent valuable reports to the department.

## SESSIONAL PAPER No. 10

Mr. H. R. MacMillan, who visited the United Kingdom, France, South Africa, Australia and India as a special timber commissioner, made a number of valuable reports, which were published in the *Weekly Bulletin*. His report on the possibilities of the Australian market for Canadian timber is in the hands of the printers and will soon be issued.

## THE TOY INDUSTRY.

Soon after the outbreak of war the Minister of Trade and Commerce was informed that merchants were having very great difficulty in securing supplies of toys. The great wholesale houses and department stores of Canada had for many years depended upon Germany for large supplies. When German toys were shut out of the country, merchants could not find substitutes. It was therefore decided to hold an exhibition and conference, with a view to encouraging toy-making in Canada. It was believed that many Canadian manufacturers might make use of waste materials by making toys as a side line, or that they might sell their waste to manufacturers devoting their attention exclusively to toys. Samples of German toys were secured to show Canadian manufacturers what was formerly imported that might be made in Canada, and arrangements were made for a display of American toys to illustrate what our neighbours in the United States are doing. In selecting German toys the aim was not to secure a sample of every toy formerly imported from Germany, but only such toys as expert toy buyers believed were in sufficient demand to justify manufacture in Canada.

A systematic investigation was undertaken by the Department of Trade and Commerce to discover Canadian toymakers, and when the exhibition opened in the Royal Bank Building, Toronto, on the 28th of March, 1916, there were forty-nine Canadian exhibitors with a most varied assortment of toys and children's playthings. The leading wholesale houses and department stores in Montreal, Toronto, Winnipeg, and other Canadian centres were invited to send their buyers, and a large proportion of them responded. As most of the toymakers were men of small means, who had started after the outbreak of war, and capital was required for the expansion of the industry, a large attendance of financial men was secured. Two important results were achieved. The toymakers received orders enough to keep them busy all the year, and most of them were able to secure money to carry out their undertakings. Many of the large buyers who had been accustomed to getting toys from Germany expressed amazement at the variety and excellence of Canadian toys.

While the toy fair was in progress all the women's organizations of Toronto were asked to send representatives to inspect the toys. After a visit to the fair a union meeting of women's organizations was held in the Board of Trade Assembly Hall, at which the National Council of Women, the Women's Patriotic League, the Daughters of the Empire, the Women's Canadian Club, the University Women's Club, the Rosary Hall Association, and other women's organizations were represented, and resolutions were unanimously passed calling on the women of Canada to buy Canadian-made toys. These resolutions have since been endorsed by many women's organizations from the Atlantic to the Pacific.

The Executive Committee of the Canadian National Exhibition were so pleased with this toy fair that they asked the Minister of Trade and Commerce to arrange for an exhibition of Canadian toys at the Toronto Exhibition. This was agreed to and about seven thousand square feet of space was filled with Canadian toys. The exhibit proved to be one of the most attractive features of the Canadian National Exhibition, being visited by nearly a million people.

7 GEORGE V, A. 1917

In addition to the Canadian toys there was a collection of toys purchased in England to show what British merchants would be willing to buy from Canadian toymakers.

#### EXHIBIT OF GERMAN AND AUSTRIAN GOODS.

Soon after the outbreak of the war the British Government arranged for the purchase of about 8,000 samples of German and Austrian goods in about seventy markets of the world to show what the enemy countries had been exporting. After these samples had been exhibited in the leading industrial centres of England the Minister of Trade and Commerce arranged to have them brought to Canada and they were exhibited under the auspices of the department at Montreal, Toronto, London, Hamilton, St. John, and Halifax. The general public was not invited, but an invitation was extended to all the manufacturers and wholesale houses. It is gratifying to note that the attendance was larger in proportion to the populations of the cities where the exhibition was held than in the industrial cities of the United Kingdom where the same classes were invited to attend and where the exhibition was considered a great success. Comparing British and Canadian cities, Toronto stood third in the list, and Montreal fifth, the larger attendance at Toronto than at Montreal was due to the fact that many of the small industrial cities of Ontario were represented among the visitors at Toronto.

#### COMMERCIAL AND INDUSTRIAL MUSEUM.

With a view to the establishment of a Commercial and Industrial Museum all the Canadian Trade Commissioners were instructed to secure samples of manufactured goods in demand in the different countries where they are located for the purpose of showing Canadian manufacturers what they might make for export. The Trade Commissioners have devoted a great deal of time to the selection of articles and the gathering of information about them and although only a few samples have as yet arrived in Ottawa it is expected that before the war closes a very valuable collection will be available for the inspection of Canadian manufacturers. Owing to war conditions a suitable building for the exhibition of these commercial samples has not yet been secured.

#### GRAIN INSPECTION.

While the Board of Grain Commissioners, who are especially charged with the administration of The Canada Grain Act, will present to Parliament in due season their annual report, it may be well to briefly summarize a few of the more important points covered by their activities.

For the crop year ended August 31, 1916, there was inspected, under the Board of Grain Commissioners, in the Western Grain Inspection Division, 474,129,250 bushels of grain, the greatest in the history of Canada. Of this quantity 338,425,200 bushels consisted of wheat and 116,157,100 bushels of oats.

The following statement shows the total grain inspected in the Western Grain Inspection Division for the past five crop years ended August 31:—

Crop Year to August 31.	Total in bushels
1912 .....	212,612,000
1913 .....	238,411,225

### WORK OF THE CENSUS AND STATISTICS OFFICE, 1916-17.

The chief work of the branch under Mr. R. H. Coats, Dominion Statistician, during 1916-17 was in connection with the quinquennial census of population and agriculture in the provinces of Manitoba, Saskatchewan and Alberta (section 12 of the Census and Statistics Act), which was taken as of date June 1, 1916, the plans being completed during the winter of 1915-16. Thirteen commissioners and some 1,290 enumerators were employed in the field work, and the office took on temporary clerks to the number of three male and 78 female, for the compilation work at Ottawa. Three schedules were employed in taking the census, namely, a population schedule embracing twenty-six questions, an agricultural schedule of thirty-two questions, and a schedule of thirty questions covering live stock in cities, towns and incorporated villages. Each farm was taken on an individual schedule, and the result, it is thought, was an improvement in the efficiency of the inquiry. The preliminary results of this census were given out in the closing weeks of the year, and showed a material increase in the population and agricultural resources of these provinces compared with 1911.

Perhaps the second most important work of the year was the taking of a postal census of manufactures as for the year 1915. A form was mailed to each manufacturer in the closing week of 1915 from a list of over 50,000 names, compiled from the various sources available, including the Census of 1911, city directories, departmental reports, books of commercial ratings, etc. The work of securing replies and of completing the compilation occupied upon the average a staff of eight clerks throughout 1916, at the close of which the preliminary tabulation in the nature of a summary of results was issued. The total product of manufactures was shown to be \$1,392,516,953 in 1915 (including war orders

to the value of over \$130,000,000 actually delivered), compared with \$718,-352,603 in 1905.

Work was continued on the analysis of the Census of 1911, the following special reports being issued: Volume VI, Occupations of the People; Special Report of the Foreign-born Population.

Publication of the Census and Statistics Monthly, which consists for the most part of a record of the crop reporting service of the branch, was continued, and the Year Book was issued with, it is thought, some improvement in detail over preceding years. The annual report of Criminal Statistics was also issued.

It may be added that following upon the report of the Commission on the Official Statistics of Canada, 1912, and the filling of the office of Dominion Statistician, a considerable amount of time has been devoted to the formulation of a series of memoranda on statistical reorganization. A memorandum summarizing the results of these inquiries was presented to Council in October, 1916, and subsequently an Order in Council was passed which it is hoped will have far-reaching results in the direction of a more comprehensive and scientific statistical organization in Canada in future, which will enable greater concentration in the preparation and publication of all Federal Government statistics.

#### SCIENTIFIC AND INDUSTRIAL RESEARCH IN CANADA.

The experiences of the war have given a notable impulse to the work of scientific and industrial research in all parts of the Empire. The sudden deprivation of certain essential products of which Germany has been allowed to secure the monopoly and the tremendous demand for increased supplies of material, new and old, for war purposes showed the necessity for home production and conservation and sharpened the determination of the British people not to make themselves industrially dependent on outside countries for the essential material necessary for defence and national sustenance.

Following the establishment, in July, 1915, of a scheme for the organization and development of scientific and industrial research in Great Britain, the Dominion Government took action along similar lines.

On June 6, 1915, a committee of the Privy Council of Canada, consisting of the Right Honourable the Minister of Trade and Commerce (Chairman), the Honourable the Ministers of the Interior, Agriculture, Mines, Inland Revenue and Labour, was appointed by the Privy Council to devise and carry out measures designed to promote and assist scientific and industrial research with a view to the fuller development of Canadian industries and production in order that, during and after the present war, they may be in a position to supply all Canadian needs and to extend Canadian trade abroad.

Under this committee of the Privy Council there was constituted on the 29th of November, an Honorary Advisory Council for Scientific and Industrial Research, composed of the following eleven members, representative of scientific and industrial interests of Canada:—

- A. B. Macallum, M.D., Ph.D., Sc.D., LL.D., F.R.S., Administrative Chairman, Ottawa.
- F. D. Adams, Ph.D., Sc.D., LL.D., F.R.S., Dean, Faculty of Applied Science, McGill University, Montreal.
- T. Bienvenu, Esq., Vice-President and General Manager, La Banque Provinciale du Canada, Montreal.
- R. Hobson, Esq., President, Steel Company of Canada, Hamilton.
- S. F. Kirkpatrick, M.Sc., Professor of Metallurgy, Queen's University, Kingston.

## SESSIONAL PAPER No. 10

- J. C. McLennan, Ph.D., F.R.S., Professor of Physics and Director of the Physics Laboratory, University of Toronto, Toronto.
- A. S. Mackenzie, Ph.D., D.C.L., President, Dalhousie University, Halifax.
- W. C. Murray, M.A., LL.D., President, University of Saskatchewan, Saskatoon.
- R. A. Ross, Esq., E.E. (Tor.), M. Can. Soc. C.E., Consulting Engineer, 80 St. François Xavier St., Montreal.
- R. F. Ruttan, M.A., M.D., Sc.D., Professor of Chemistry and Director of the Chemical Laboratories, McGill University, Montreal.
- A. Surveyer, B.A.Sc., M. Can. Soc. C.E., Consulting Engineer, 274 Beaver Hall Hill, Montreal.
- Secretary: J. B. Challies, C.E. (Tor.), M. Can. Soc. C.E., Superintendent, Dominion Water Powers Branch, Department of the Interior, Ottawa.

This Advisory Council, by direction of the Chairman of the Committee of the Privy Council, has been charged with the following duties:—

(a) To ascertain and tabulate the various agencies in Canada which are now carrying on scientific and industrial research in the universities and colleges, in the various laboratories of the Government, in business organizations and industries, in scientific associations or by private or associated investigators.

(b) To note and schedule the lines of research or investigation that are being pursued by each such agency, their facilities and equipment therefor, the possibilities of extension and expansion, and particularly to ascertain the scientific man-power available for research and the necessity of adding thereto.

(c) To co-ordinate these agencies so as to prevent overlapping of effort, to induce co-operation and team work, and to bring up a community of interest, knowledge and mutual helpfulness between each other.

(d) To make themselves acquainted with the problems of a technical and scientific nature that are met with by our productive and industrial interests, and to bring them into contact with the proper research agencies for solving these problems, and thus link up the resources of science with the labour and capital employed in production so as to bring about the best possible economic results.

(e) To make a scientific study of our common unused resources, the waste and by-products of our farms, forests, fisheries, and industries, with a view to their utilization in new or subsidiary processes of manufacture and thus contributing to the wealth and employment of our people.

(f) To study the ways and means by which the present small number of competent and trained research men can be added to from the students and graduates of science in our universities and colleges, and to bring about in the common interest a more complete co-operation between the industrial and productive interests of the country and the teaching centres and forces of science and research.

(g) To inform and stimulate the public mind in regard to the importance and utility of applying the results of scientific and industrial research to the processes of production by means of addresses to business and industrial bodies, by the publication of bulletins and monographs, and such other methods as may seem advisable.

7 GEORGE V, A. 1917

The Honorary Advisory Council in proceeding along these lines will render valuable assistance to a movement, the success of which is not only vital to the proper development of the resources of the Dominion, but which is absolutely necessary in order to enable Canada to compete with progressive countries in the great race of national expansion.

The Advisory Council has organized its work in a very thorough fashion. Special committees have been appointed to deal with a number of pressing problems of national import. At present the Council has under way a complete inventory of all research facilities in Government departments, universities and manufactures.

#### MOVING PICTURES.

During the year a new feature has been added to the work of the department in the utilization of the moving picture for the purpose of visualizing Canada's vast natural resources, her great primary productive occupations, and her developed lines of secondary and industrial activities. Films have been prepared illustrative of the grain industry of the Northwest and depicting the course it takes through the various phases of soil preparation, seed sowing, harvesting, and railway transportation from the country elevators and loading platforms, the operations of sampling, inspection and grading, the passage through the big terminal elevators at Fort William, the passage across the Great Lakes and via the St. Lawrence river to Montreal, until it is ultimately loaded into the big liners which carry it across the Atlantic.

Films are also completed showing the principal water-powers of Canada, developed and undeveloped, and these will be supplemented by others displaying the chief features of our lumbering, mining, fishing, and manufacturing industries. These are intended for use by our Trade Commissioners and for circulation overseas and in outside countries, to the end that the productive possibilities and industrial development of Canada may become more widely known.

#### LATEST CANADIAN TRADE STATISTICS.

The usual unrevised statement of the imports and exports of Canada, by months, from January 1, 1910, to December 31, 1916, and for the twelve months ended December 31, 1910 to 1916, will be found on page xx. On page xxii will be found a statement showing the exports from Canada, by months, from August 1, 1914, to December 31, 1916, of goods which show large increases under the stimulus of war orders, while on page xxv a statement will be noted showing the trade of Canada and the United States since the war, by months, viz.: from August 1, 1914, to December 31, 1916.

I have the honour to be, sir,

Your obedient servant,

F. C. T. O'HARA,

*Deputy Minister.*

## EXPLANATORY NOTES, PART I.

The term "Entered for Consumption" is the technical term in use at the custom-house, and does not imply that the goods have been actually consumed in Canada, but that they have passed into the possession of the importer and that duty has been paid on that portion liable for duty.

The value given for goods imported is the fair market value thereof when sold for home consumption in the principal markets of the country whence and at the time when the same were exported directly to Canada.

The term "The produce of Canada" includes all imported articles which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined in Canada from imported raw sugar, flour ground from imported wheat, and articles constructed or manufactured from imported materials.

The term "Goods not the Produce of Canada" or "Foreign Produce" applies to the exports of foreign goods which had been previously imported.

The value of "Goods the Produce of Canada" is their value at the time of exportation at the ports of Canada whence shipped.

The value of "Goods not the Produce of Canada" is the actual cost of such goods.

The initials N.E.S. mean "not elsewhere specified."

The initials N.O.P. mean "not otherwise provided for."

The expression "Ton" means two thousand pounds, and "Cwt." one hundred pounds.

The expression "Standard hundred," when applied to deals, means 2,750 feet board measure.

The expression "Ton," applied to square timber, means 40 cubic feet.
