155. Return to an Order of the House of March 16, 1925, for a Return showing:—  
1. Whether the Government established any Rural Mail Routes in the years 1924 or 1925. 2. Whether any tenders have been asked for in connection with any proposed routes. If so, in what counties, and, from what post offices. 3. Whether it is the policy of the Government to establish any new mail routes. Presented April 2, 1925. Mr. Maybee. *Not printed.*
156. Return to an Order of the House of March 11, 1925, for a Return showing:—1. How much the Vancouver Board of Harbour Commissioners paid for the waterfront property lying immediately east of and adjoining No. 1 Harbour Board elevator, portion of which is now occupied by elevator known as Spillers elevator. 2. The total area of the said property: (a) above high water mark; (b) below high water mark. 3. Whether the said property was offered to the Harbour Board for \$275,000. 4. Whether the said price of \$275,000 included a sawmill and buildings then on the property. 5. Whether the Harbour Board secured an option at this price and if so, for how long. 6. Subsequent to the purchase of the said property, whether the Harbour Commissioners permitted the former owners to remove the mill and other buildings, or to whom the said mill was sold, or given, or released. 7. Whether a portion of the said property was leased to R. H. Gale of Vancouver, acting for himself or a company, and if the latter, the name of the company to whom the lease was issued. 8. Whether the said R. H. Gale negotiated the said lease. 9. Whether there has been any transfer of the said lease since the original issue. If so, to whom. 10. Amount of rental being paid to the Harbour Commissioners for the said lease. 11. Whether the Harbour Commissioners undertook to build a jetty for grain conveyors as a condition or term in the said lease. If so, what the said jetty and conveyors and equipment cost. 12. Whether the said original lease, or a later transferred lease has been assigned to the "Spillers" Grain Company of England. Presented April 2, 1925. Mr. Black (Yukon).  
*Not printed.*
157. Return to an Order of the House of April 7, 1924, for a return showing the names or numbers of all ships or boats of every class and description, whether naval or merchant or fishing craft, which were sold by the Government of Canada or any Department thereof, or by any Commission acting in behalf of the Government, or under the authority of the Parliament of Canada since the signing of the Armistice, showing: (a) the prices paid for said ships, vessels or boats on their purchase by the Canadian authorities, and also the price received for each when sold; (b) the number of ships, vessels or boats on hand which the Government of Canada or any Department thereof, or any Commission acting under the authority of the Government or Parliament of Canada, have for sale, with their names and numbers and showing where they are at present; (c) the contract price to be paid to the Government of Canada, or any Department thereof, as the purchase price of any ship, vessel or boat sold as herein-

# CONTENTS OF VOLUME 5—Continued

before referred to, and how the said payments were made, and also the outstanding sums due on payment, if any, and from whom, the said return to show all purchasers of any and all of the hereinbefore mentioned ships, vessels and boats, and their addresses; (d) all other details in anyway relating or appertaining to the foregoing. Presented April 2, 1925. Mr. Martell.....*Not printed.*

158. Return to an Order of the House of March 4, 1925, for a Return showing:—  
1. Number of Royal Commissions appointed by the present Government. 2. Their personnel. 3. Cost of each to date. Presented April 3, 1925. Hon. Mr. Manion.  
*Not printed.*

- 158a. Return to an Order of the House of March 9, 1925, for a Return showing:—1. How many Royal Commissions were appointed by the Federal Government from November 1, 1911, to December 31, 1921. 2. Their personnel. 3. The cost of each. Presented April 3, 1925. Mr. Forrester.....*Not printed.*

159. Return to an Order of the House of March 30, 1925, for a Return showing:—1. When Federal grading of butter and cheese for export came into effect. 2. The names and salaries of the Dominion graders of butter and cheese. 3. The standard grades for butter and what determines each grade. 4. The recognized difference in price of the several grades. 5. From the time Federal grading went into effect, quantity of (a) pasteurized, (b) unpasteurized butter exported each year to the end of 1924. 6. Whether the grade was stamped on all packages of butter exported and what quantity of each grade was exported in each year. 7. The standard grades for cheese and the recognized difference in price of the several grades. 8. Whether any cheese has been exported to Great Britain since Federal grading went into effect without the grade being clearly indicated, and if so, when and what quantity. 9. Quantities of (a) graded and (b) ungraded cheese exported from Canada to Great Britain in each of the calendar years 1921, 1922, 1923 and 1924. 10. Quantities of each grade exported to Great Britain in 1923 and 1924. 11. Whether the producer of the cheese must abide by the decision of the Federal graders as to the grade of his cheese or whether there is any person or board to whom he can appeal against their classification. Presented April 6, 1925. Mr. Stewart (Leeds). .....*Not printed.*

160. Return to an Order of the House of April 6, 1925, for a Return showing:—1. What have been during the fiscal year 1923-24, month by month and in each province separately, the imports of each of the following articles: apples, onions, potatoes, tomatoes, butter and eggs. 2. The United States duty on each of these articles. Presented April 6, 1925. Mr. Morin.....*Not printed.*

161. Annual Report of the Canadian National Railway System, for the year ended December 31, 1924. Presented April 11, 1925.....*Presented in printed form.*

162. Return to an Order of the House of February 19, 1925, for a Return showing:—  
1. The total cost of acquiring land, and of construction, at the Buffalo Park at Wainwright, Alberta. 2. The total cost to date of the Jasper Park. 3. The total cost to date of the Buffalo Park near Fort Smith. 4. The cost of administration in each of the above parks. 5. The revenue derived from each of the above parks. 6. The cost of the Government buildings, fencing, etc., at Fort Smith. 7. The amount of the contract entered into for the moving of Buffalo from Wainwright to the North Park. Presented April 15, 1925. Mr. Kellner.  
*Not printed.*

163. Return to an Order of the House of February 25, 1925, for a Return showing:—  
1. The gross postal revenue derived from newspapers for the last two years of record. 2. The estimated expenditure for the same years, as far as can be arrived at, in so far as newspapers are concerned, and what bulk of the mail do newspapers make up. 3. The average daily weight of newspapers carried in the mails and the estimated deficit to the country in delivery of newspapers in the mails. Presented April 15, 1925. Mr. Church.....*Not printed.*

Return to an Order of the Senate, dated April 28, 1925, for the production of a comparative statement of the Importation from England and the United States, of shoes, or iron, steel, and woollen manufactured goods, during the last three years ending April 1, 1925. Presented June 9, 1925. Hon. Mr. David..*Not printed.*
228. Return to an Order of the House of May 11, 1925, for a return showing statement made out by Messrs. Wilson and Wilson, in October, 1924, as auditors for Vancouver Harbour Commissioners, covering the operation of No. 1 elevator, for crop year ending July 31, 1924. Presented June 11, 1925. Hon. Mr. Stevens..*Not printed.*
229. Copy of Interim Report of the Registrar of the Combines Investigation Act, 1923, of his investigation into an alleged combine operating to limit competition in connection with the marketing of the New Brunswick potato crop, dated June 9, 1925. Presented June 11, 1925.....*Presented in printed form.*
230. Return to an Order of the House of May 25, 1925, for a Return showing: 1. Number of translators employed by the Senate and House of Commons, respectively. 2. Number of translators employed by the public departments in Ottawa, or branches of the Government Service. 3. Duties of the Blue Book translation staff of the House of Commons. 4. Whether the Blue Book translation staff has been relieved of the duty of translating the annual departmental reports. 5. If so, why and upon whose authority. Presented June 12, 1925. Mr. Hocken..*Not printed.*
231. Return to an Order of the House of April 27, 1925, for a copy of all correspondence, letters, telegrams, and communications passed between the Government, any member or official of the Government, and any persons concerning the establishment of Drumheller as a Customs Excise Outport, and Warehouse Port, under the survey of the Port of Calgary, Alta. Presented June 12, 1925. Mr. Garland (Bow River).....*Not printed.*
232. Return to an Order of the House of March 11, 1925, for a Return showing: 1. Name, rank, position, and pension of each officer on the Staff at Headquarters, Ottawa, and the Military Districts, who has been retired from the service, from January 1, 1924, to March 1, 1925. 2. Name, rank, position, and salary, including pay and all allowances, of each officer of the Staff at Headquarters, Ottawa, and the Military Districts, who has received: (a) an extension of term; (b) a reappointment, from January 1, 1924, to March 1, 1925. 3. Who recommended to the Minister and the Deputy Minister of the Department of National Defence: (a) the retirement of an officer; (b) the extension of term to an officer; (c) a reappointment of an officer; (d) the promotion of an officer. 4. Name of each officer of the Staff at the General Headquarters and Local Headquarters, Ottawa, and in the Military Districts, who has held the same rank more than four years, and the tenure of appointment of all positions on the Staff. 5. The intention of

# CONTENTS OF VOLUME 5—Continued

the Minister of the Department of National Defence regarding those officers who have not been promoted in the army for many years. Presented June 15, 1925. Mr. Doucet.....*Not printed.*

233. Return to an Order of the House of March 11, 1925, for a Return showing: 1. Tenure of appointment of an officer commanding a Military District. 2. Names of the officers commanding the Military Districts of Halifax, Nova Scotia; St. John, New Brunswick; Toronto, Ontario; Montreal, Quebec; Quebec, Quebec; from August 1, 1912, to March 1, 1925. 3. During the above years, (a) the date of the first appointment as officer commanding a Military District of each of the above officers; (b) the date of each reappointment; (c) the date of each extension of term; (d) the total number of years of service as officer commanding a Military District. 4. Whether it is the intention of the Minister and the Department of National Defence to maintain in his position an officer commanding a Military District for a term of more than four or five years, by this fact stopping promotion to a lot of officers of the Permanent Force well qualified and available for such a position. Presented June 15, 1925. Mr. Doucet.....*Not printed.*
234. Return to an Order of the House of June 11, 1925, for a Return showing: 1. Whether any June or other training camps are being held for the Militia. 2. If so, where and for what units and length of time. 3. What will be done this year for artillery units as to training. Presented June 15, 1925. Mr. Church.....*Not printed.*
235. Return to an Order of the House of June 1, 1925, for a copy of the lease made by the holding company of the Scribe Hotel property in Paris purchased by the Canadian National Railway System, and any other papers and documents in any way relating to the said lease of the said property or the title thereof. Presented June 15, 1925. Sir Henry Drayton.....*Not printed.*
236. Return to an Order of the House of March 4, 1925, for a Return showing: 1. Total cost of the investigation lately conducted by David Campbell, K.C., of Winnipeg, into the supplies of coal and other matters affecting Military District No. 10. 2. Whether any suspensions of Militia Officers have been made as result and if so what officers have been suspended, if any. 3. Whether such militia officers, if so suspended, were given the opportunity to conduct their defence with the assistance of counsel. 4. Whether such militia officers so suspended, if any, were accorded the right of an officer to court martial. 5. In each case of an officer so suspended, if any, the reason, and how long the suspension lasted. 6. Whether any such officer so suspended is drawing his regular military pay while under suspension. 7. Fees paid each counsel for the Government in the matter or for the Commission. Presented June 16, 1925. Mr. Ross (Kingston).  
*Not printed.*
- 236a. Return to an Order of the House of March 4, 1925, for a Return showing: 1. Total cost of the Commission appointed by the Government regarding the coal enquiry at Tuxedo Barracks, Winnipeg. 2. What amount the Commissioners received. 3. Whether the Government received any objection as to the amount paid from Winnipeg or elsewhere. Presented June 16, 1925. Mr. Arthurs....*Not printed.*
- 236b. Return to an Order of the House of March 2, 1925, for a copy of all accounts sent in to the Government for payment for services rendered by Commissioner David Campbell, K.C., and D. R. MacLean, Government Counsel, during the enquiry into coal supplied at Tuxedo Barracks, Winnipeg, together with a copy of all correspondence passing between the Solicitor General, or any other official of the Government or any department thereof, and Messrs. Campbell and MacLean, or any other person or persons, in connection with said accounts. Presented June 20, 1925. Mr. Arthurs.....*Not printed.*
- 236c. Return to an Address to His Excellency the Governor General of March 2, 1925, for a copy of all telegrams, letters, Orders in Council, evidence and report or reports, and other documents in connection with the investigation lately conducted by David Campbell, K.C., of Winnipeg, into the supplies of coal and other matters affecting Military District 10, and especially copies of telegrams passing between the Solicitor General and the said Commissioner or Counsel for the Commission and between the Defence Department and the Commissioner or Counsel for the Commission. Mr. Ross (Kingston).....*Not printed.*

CONTENTS OF VOLUME 5—*Continued*

Also,—Return to an Order of the House of March 30, 1925, for a copy of correspondence passing between the Department of National Defence or the Department of Justice and the Canadian Coal Sales Company, Limited, in the years 1924 and 1925, and also, for a copy of all charges made, in relation to the sale of coal or otherwise, affecting militia officers at Winnipeg in the said years with the name of the party making such charges, and also, for a copy of the reports of General Ketchen, with respect to said charges. Hon. Mr. Stevens. Presented June 22, 1925.....*Not printed.*

237. Return to an Order of the House of June 10, 1925, for a Return showing:—1. Amounts paid, per year by the Government of Canada to the Honourable E. N. Rhodes, during the years 1919-1920, 1920-1921, and 1921-1922. 2. Amounts paid during these years for cab hire for Mr. Rhodes. Presented June 16, 1925. Mr. Carruthers.....*Not printed.*
238. Copy of Report on Problems relating to Grading of Grain; Copy of Report of Dominion Grain Research Laboratory, dated August 9, 1924; Memoranda prepared by Dr. Robert Newton, and Dr. G. S. Whitby, regarding the report of the Dominion Grain Research Laboratory. Presented June 17, 1925.....*Not printed.*
239. Return to an Order of the House of June 1, 1925, for a return showing the cost to the Government of all leather goods used by the Medical Branch of the Soldiers' Civil-Re-establishment in Edmonton, Alberta. Presented June 17, 1925. Mr. Kellner.....*Not printed.*
240. Return to an Order of the House of March 30, 1925, for a Return showing:—1. The annual cost of the Soldier Settlement Board since its inception: (a) amount spent on rent of offices, and where the offices are located; (b) amount spent on salaries; (c) how much the head office in each province cost; (d) amount expended in other ways, as overhead. 2. Number of farms purchased under the Soldier Settlement Board: (a) by provinces; (b) amount paid per farm; (c) the area of each farm in acres. 3. Number of farms occupied under the Board, by provinces. 4. The total amount loaned to settlers: (a) amount of such loans expended in permanent improvements; (b) amount of such loans expended in purchasing live stock; (c) amounts loaned by provinces; (d) rate of interest charged; (e) the nature of the securities on which loans were made; (f) the currency of these loans; (g) who holds the mortgages. 5. Number of farms, by provinces, which have been retained, and the present economic condition of these farms. 6. Number of farms, by provinces, vacated: (a) what was done with such farms; (b) what happened to the loans made on such farms. 7. Whether all such settlers were required to carry all overhead of both purchase and equipment loans. 8. If not, what percentage they were supposed to carry, and who carried the rest. 9. Who determined what advance should be made to settlers under the Board. Presented June 17, 1925. Mr. Irvine.....*Not printed.*
241. Return to an Order of the House of May 6, 1925, for a copy of all correspondence passing to and from the Department of Public Works relating to the wharf at Matane, including copies of contracts, if any, or other documents or agreements relating to such wharf. Presented June 17, 1925. Mr. Hanson.....*Not printed.*
242. Return to an Order of the House of May 25, 1925, for a copy of all specifications and contracts made regarding the new Halifax elevator. Presented June 18, 1925. Mr. Black (*Halifax*).....*Not printed.*
243. Return to an Order of the House of April 22, 1925, for a Return showing:—1. The total amount spent by the present Government since coming into office for public printing, aside from that done by the Printing Bureau. 2. The names of the firms or individuals awarded this printing, what amount of work was done by each, and at what price each year since the coming into power of the present Government. Presented June 18, 1925. Mr. Sutherland.....*Not printed.*
244. Return to an Order of the House of February 23, 1925, for a Return showing:—1. On what date and by what authority the Dominion of Canada acquired the North-west Territories and Rupert's Land and at what cost to the Dominion of Canada

CONTENTS OF VOLUME 5—*Continued*

- as a whole. 2. The total cost to the Dominion of Canada as a whole in administering and developing said Northwest Territories and Rupert's Land. 3. What portion of the Northwest Territories and Rupert's Land is still owned by the Dominion of Canada. 4. What portion of the Northwest Territories retained by the Dominion of Canada lies within the confines of each of the provinces of Manitoba, Saskatchewan and Alberta. 5. The total cost to the Dominion of Canada of administering and developing the last-mentioned areas. 6. What portion of the lands referred to in paragraph four have been sold or otherwise disposed of since same were acquired by the Dominion of Canada. 7. The proceeds from (a) sales of said lands mentioned in paragraph four; and (b) revenue derived thereon from all sources. Presented June 19, 1925. Mr. Clark.....*Not printed.*
245. Return to an Order of the House of June 10, 1925, for a Return showing:—1. Whether L. A. Forsythe, or James M. Davison, his partner, received legal work from any Department of the Government since January 1, 1922. 2. If so, the items, dates, and accounts for the moneys so paid to Mr. Forsythe or Mr. James M. Davison, his partner. 3. What amount, if any, is still owing them. 4. Whether they are at present in receipt of legal work from the Government. Presented June 19, 1925. Mr. Black (*Halifax*).....*Not printed.*
246. Return to an Order of the House of February 23, 1925, for a Return showing:—1. Since Confederation, how many acres of land belonging to the Dominion of Canada have been transferred to the Province of Ontario, and on what date transfers were made. 2. Consideration paid by said Province of Ontario for said transfers. 3. Cost to the Dominion of Canada of administering and developing said lands prior to the date of transfer. 4. Since Confederation, how many acres of land, belonging to the Dominion of Canada, have been transferred to the Province of Quebec, and on what date transfers were made. 5. Consideration paid by said Province of Quebec for said transfers. 6. Cost to the Dominion of Canada of administering and developing said lands prior to the date of transfer. 7. Whether the rights of the other provinces of Canada to compensation were reserved when the boundaries of Ontario and Quebec were extended. Presented June 19, 1925. Mr. Clark.....*Not printed.*
247. Return to an Address to His Excellency the Governor General of May 18, 1925, for a copy of all letters, telegrams, memoranda, orders in council, and other documents in the possession of or under the control of the Government of Canada or any department thereof, of date subsequent to May 17, 1924, relating to the proposed reclamation of the area in the Province of British Columbia and the State of Idaho, known as the Kootenay Flats. Presented June 19, 1925. Mr. Humphrey.....*Not printed.*
248. Return to an Order of the House of May 11, 1925, for a Return showing:—1. Number of grain elevators owned or operated, (a) by Dominion Government; (b) by Harbour Commissioners under control of the Minister of Marine; (c) by the Canadian National Railways; (d) or sublet from any of the above. 2. Location of each elevator, type of construction, and the storage capacity of each. 3. Cost of each, exclusive of site. 4. Cost of each, including site. 5. Number and kind of separator, cleaner and dryer in each. 6. Capacity and kind of conveyor system in each elevator, including the number of legs. 7. By what kind of power each is operated, showing maximum demand and connected load of each plant. 8. Amount of grain each handled during each of the crop years, ending 1922, 1923, 1924 inwards and outwards. 9. Which of the above elevators are operated under the Canada Grain Act, and under what authority others are operated. 10. Which are licensed and bonded by the Board of Grain Commissioners. 11. Insurance rate on each (a) building; (b) contents. 12. Charges in each and in case of conveyor charges, at what rate in each case. 13. Number of receiving pits in each elevator and number of car loading spouts. 14. In which of the above elevators "car dumps" are used, or automatic power, or shovels, and if car dumps are used, what make. 15. Whether any of the above elevators are in process of construction, or if incomplete, how much still remains to complete. 16. Operating revenue and operating expenses, exclusive of interest and sinking fund, on each of the above elevators. 17. In cases where elevators are leased, (a) the rentals; (b) to whom leased; (c) terms of lease. 18. Number of scales in each elevator, showing receiving, shipping, bagging capacity of each. Presented June 19, 1925. Hon. Mr. Stevens.....*Not printed.*

# CONTENTS OF VOLUME 5—Continued

249. Return to an Order of the House of March 25, 1925, for a return for the months of May and June, 1924, showing invoiced value of importations into Canada of canning machinery, suitable for use as equipment in fruit or berry canning factories, which were released by the Customs Department without duty being actually paid thereon, together with copies of all correspondence and documents received by the Department of Customs or any member of the Government relating to such importations, together with a statement for the first six months of 1924, showing importations into Canada of canning machinery suitable for equipment in fruit or berry canning factories on which duty was paid, showing the amount of duty paid thereon and the invoiced value of such importations. Presented June 19, 1925. Mr. Grimmer.....*Not printed.*
250. Return to an Order of the House of June 1, 1925, for a copy of all correspondence exchanged between the Department of Customs and Excise, the Civil Service Commission and others, relating to the appointment of a customs and excise examiner at St. Leonard in the electoral district of Restigouche-Madawaska, New Brunswick. Presented June 19, 1925. Mr. Doucet.....*Not printed.*
251. Return to an Order of the House of June 15, 1925, for a Return showing:—1. Number of employees on April 1, 1925, in each of the Canadian Penitentiaries. 2. Name, rank, creed and salary of each such employee and the date of first appointment. 3. Number of employees on April 1 1915, in each of the Canadian Penitentiaries. 4. Name, rank, creed and salary of each such employee and the date of first appointment. Presented June 19, 1925. Mr. Deslauriers.....*Not printed.*
252. Letter from the Auditor General in respect to a statement made by the Acting Minister of Finance in the House of Commons (June 11, 1925) dealing with the audit made by officials of the Auditor General's office of the securities held by the Finance Department, and letter from Mr. Robb, in reply thereto. Presented June 19, 1925.....*Not printed.*
253. Return to an Order of the Senate, dated May 28, 1925, for a return to include copies of all correspondence, documents, and other writings relating to the appointment or recommendation for appointment of Joseph McDonald in 1924 or 1925, as an Excise Prevention Officer in the district of Lingan or of Glace Bay in Nova Scotia, and to refusal of the Department of Customs and Excise to accept him for the position. Presented June 19, 1925. Hon. Mr. Tanner.....*Not printed.*
254. Return to an Order of the House of March 9, 1925, for a copy of all correspondence, documents, statements and communications concerning exemption or partial exemption from payment of income tax on payments or remuneration, whether paid as salary, living allowance or otherwise, by the Government of Canada to officials of Yukon Territory, and showing what exemptions (if any) from income tax have been allowed to Yukon officials on amounts paid them by the Government of Canada during the past seven years. Presented June 20, 1925. Mr. Black (Yukon).....*Not printed.*
255. Return to an Address to His Excellency the Governor General of March 30, 1925, for a copy of all letters, telegrams, papers and other documents between the Government of Canada and the mine workers of Cape Breton, or received by the Government on their behalf, and between the Government of Canada and the Government of Nova Scotia, respecting the condition of the mine workers, and between the Government of Canada and any towns or municipalities in Cape Breton, respecting the conditions of the mine workers and the necessity for relief owing to the labour troubles in that district. Presented June 20, 1925. Mr. Arthurs.....*Not printed.*
256. Copy of Agreement between the Government of Canada and the Manitoba Pulp and Paper Company, Limited, dated June 12, 1925, respecting the right to cut pulpwood on certain timber berths in Manitoba, together with schedules to agreement marked "A," "B," "C," and "D." Presented June 22, 1925.  
*Not printed.*
257. Return to an Order of the House of June 15, 1925, for a Return showing:—1. The total debt of the Canadian National Railways and all its subsidiaries up to March 31, 1925. 2. The total revenue of the said railways for the year ending March 31, 1920, 1921, 1922, 1923, 1924 and 1925. 3. The deficit or surplus for each year from 1920 up to 1925, inclusive. Presented June 22, 1925. Mr. Tobin.  
*Not printed.*

**CONTENTS OF VOLUME 5—Continued**

---

- 258, 258a.** Return and supplementary return to an Order of the House of June 8, 1925, for a return setting forth the total expenses incurred by the Special Committee in its investigation into Ocean Rates, showing: (a) full amount paid to Mr. Symington in fees; (b) the amount in fees still due Mr. Symington as counsel; (c) total amount paid and incurred for expenses to Mr. Symington; (d) the amount paid to each witness for fees and for expenses; (e) the amount paid or proposed to be paid to Sir William Petersen in fees, or, and, for expenses; (f) amount in full paid to W. T. R. Preston in fees or, and, for expenses since January, 1921; and all other expenses, including reporting and printing, incurred by the Committee, or by the authority of the Government. Presented June 22 and 27, 1925. Hon. Mr. Stevens.....*Not printed.*
- 259.** Return to an Order of the House of June 15, 1925, for a Return showing:—1. Number of Hog Graders on the pay roll of the Department of Agriculture. 2. Amount paid to such graders, respectively, as salaries, wages, and expenses, for the year ending March 31, 1924. 3. Number of veterinary inspectors and lay inspectors, respectively, employed by the Department in the inspection of animals slaughtered, and the carcasses of such animals in abattoirs and packing-houses in Canada, during the year ending March 31, 1924. 4. Amount paid in salaries and wages to such veterinary and lay inspectors, respectively, for the time mentioned above. 5. Number of hogs graded by Government inspectors during the year referred to. 6. Total weight of hogs so graded and the percentage of the whole in each grade or classification made by the Government officials. 7. How the output of said packing-houses corresponds as to grade for home consumption or for export, with the classification of live animals made by Government graders. 8. Whether any classification of the output of packing-houses is made by the Government in accordance with that made of animals purchased. 9. If not why this is not done. Presented June 22, 1925. Mr. Sutherland.....*Not printed.*
- 260.** Copy of Order in Council, P.C. 993, dated June 20, 1925, cancelling Order in Council, P.C. 623, dated April 23, 1925, re appointing a Committee to consider and report on the most suitable design for a Canadian National Flag for use ashore. Presented June 22, 1925.....*Not printed.*
- 260a.** Copy of Order in Council, P.C. 623, dated April 23, 1925, appointing a Committee to consider and report on the most suitable design for a Canadian National Flag for use ashore. Presented (Senate) June 25, 1925.....*Not printed.*
- 261.** Return to an Order of the House of June 18, 1925, for a Return showing:—1. How many returned soldiers of the Great War are detained in the penitentiaries of Canada and where. 2. What inspection there is of these institutions, by whom, when, and whether Government officials are the only inspectors. 3. Whether it is the intention of the Government to introduce legislation this session to empower grand juries, sitting at the assizes or general sessions of the peace holden in the municipality where these institutions are or the nearest municipality, regularly to visit and inspect these institutions, similar to the law of England and all the overseas Dominions (Canada excepted) and in the same way that juries now visit provincial prisons. 4. If not, why not. Presented June 23, 1925. Mr. Church.....*Not printed.*
- 262.** Return to an Order of the House of April 22, 1925, for a copy of all correspondence, reports, documents, telegrams, or memoranda, passing between the Department of Justice and any other Departments of the Government, or Ministers, or any other parties whatsoever, within the past six months, relating to the appointment of Inspector of Penitentiaries, and especially relating to the refusal to accept for such appointment Colonel Eric W. MacDonald of Halifax. Presented June 23, 1925. Mr. Bluck (*Halifax*).....*Not printed.*
- 263.** Return to an Order of the House of June 9, 1924 for a copy of all correspondence, letters, telegrams and other documents passing between the Government or any member thereof and the Canadian Bank of Commerce and the Bank of Hamilton or any of the directors of the said banks or any other parties, in any way relating to the amalgamation of the Canadian Bank of Commerce and the Bank of Hamilton. Presented June 24, 1925. Mr. Coote.....*Not printed.*

**CONTENTS OF VOLUME 5—Continued**

---

264. Return to an Order of the House of June 18, 1925, for a Return showing:—1. Number of juveniles under 18 now detained in the penitentiaries of Canada, where, and how many 16 or under, 17, 18 and 19 years of age. 2. Whether it is the intention of the Government to give effect to the recommendations for years of grand juries and public bodies to provide separate institutions for these cases. If not, why. 3. Whether it is the intention of the Government to so readjust the rules of these institutions so that juveniles and first offenders will have preferential rules and also a better classification consideration to those of repeaters. 4. Whether it is the intention of the Government in the recess of Parliament to appoint a Royal Commission or Committee of the House to go into the whole question of prison reform in Canada as suggested in the debates in Hansard, 1922. If not, why not. Presented June 24, 1925. Mr. Church.....*Not printed.*
265. Return to an Order of the House of April 27, 1925, for a Return showing:—1. Whether any retired officers of the Imperial Forces are now employed by the Department of National Defence. 2. If so, their names, rank or position. 3. What salaries they receive from the Canadian Government. 4. What pension they receive from the Imperial Government. 5. Whether the pay and allowances of private soldiers in the Permanent Militia have been decreased since the year 1922. 6. If so, to what extent. 7. Whether the pay and allowances of non-commissioned officers in the Permanent Militia have been decreased since the year 1922. 8. If so, to what extent. Presented June 24, 1925. Mr. Power.....*Not printed.*
- 266, 266a. Return and Supplementary Return to an Order of the House of March 9, 1925, for a return showing the number of motor cars purchased by the Government, since January 1, 1912, the make of said cars, the total price paid for each, the date of purchase, to what duty assigned or by whom used, the total amount of gasoline purchased; also, showing the number of buildings in which the said motor cars are housed, showing when owned by the Government, date purchased and at what price, and when rented, what rental and when leased. Also showing the number of employees engaged in the care and upkeep of said motor cars, and the total amount spent on repairs to these cars, since January 1, 1912. Presented June 24, 26, 1925. Mr. Simpson.....*Not printed.*
267. Return to an Order of the House of May 20, 1925, for a Return showing:—1. During the year 1924, prior to August 1, what rate per day was paid to the following officers, non-commissioned officers and men of the permanent force of Canada, namely, General of various ranks, Colonel, Lieutenant-Colonel, Major, Captain, Lieutenant, Second Lieutenant, Regimental Sergeant-Major, Company Sergeant-Major, Sergeant, Corporal and Private. 2. The value in money of any per diem allowance paid or furnished each of said ranks in addition to pay during said period. 3. The rate of pay and rate of allowance paid each of said ranks since August, 1924. Presented June 24, 1925. Mr. Black (Yukon).....*Not printed.*
268. Return to an Order of the House of March 23, 1925, for a Return showing:—1. The actual strength of the Canadian Permanent Force. 2. The present number of officers of the Staff and Permanent Force who are holding the full, temporary and brevet ranks: (a) Colonel; (b) Lieutenant-Colonel. 3. The position and the salary of the following Generals who are vet in the service: General MacBrien, General Ashton, General Panet, General Macdonell, General King, General Elmsley, General McNaughton, General Thacker, General Bell, General Ross, General Ormond, General Ketchen, General Armstrong, General Landry. 4. The name of each of those generals whose tenure of appointment or the extension of term will end during the fiscal year, April 1, 1925, to March 31, 1926. 5. Whether the Department of Defence allows a six months' leave with pay and allowances to the officers before being pensioned. 6. If so, whether it is the intention of the Minister of National Defence to notify, through the Adjutant General, each general six months before the expiration of his tenure of appointment or his extension of term that he will be retired from the service, thus allowing promotion to other officers. Presented June 24, 1925. Mr. Lanctôt.....*Not printed.*
269. Return to an Order of the House of March 23, 1925, for a Return showing:—1. The present number of officers of the Permanent Force who are qualified for a higher rank, but who are waiting for a promotion: (a) Lieutenants for the rank of Captain; (b) Captains for the rank of Major; (c) Majors for the rank of Lieu-

---

- tenant-Colonel; (d) Lieutenant-Colonels for the rank of Colonel; (e) Colonels to Command a Military District. 2. Whether the Minister of the Department of National Defence intends to retire the generals and other officers who have been in the service for some years, thus stopping the promotion on the Staff and in the Permanent Force. Presented June 24, 1925. Mr. Lanctôt.....*Not printed.*
270. Return to an Order of the House of June 11, 1925, for a Return showing:—1. Whether Colonel A. H. Borden, lately Assistant Officer Commanding at Toronto, is now in receipt of pay and allowances from the Militia Department. 2. If not, on what date he retired. 3. On what grounds his retirement was sanctioned. 4. Amount of his retiring allowance. Presented June 24, 1925. Mr. Black (Halifax).  
*Not printed.*
271. Copy of Rhineland Security Pact Proposals: Note from German Government, February 9, 1925, and reply of French Government thereto of June 16, 1925. Presented June 24, 1925.....*Not printed.*

REPORT  
OF THE  
MINISTER OF AGRICULTURE

1923—24

---

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander in Chief of the  
Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit to Your Excellency a report of the Department of Agriculture for the fiscal year ended March 31, 1924.

The work of the department was carried out in a most satisfactory and efficient manner, and there will be found included herein a summary of the operations of the different Branches of the Department, all of which is laid before Your Excellency under their respective headings.

The legislation affecting the department during the period consisted of:—

Chapter 3, 13-14, George V, intituled "An Act to amend the Animals Contagious Diseases Act." (Assented to April 13, 1923.)

Chapter 15, 13-14, George V, intituled "An Act to regulate the sale and inspection of Fruit and Fruit Containers." (Assented to April 13, 1923.)

Chapter 18, 13-14, George V, intituled "An Act to amend and consolidate the Acts respecting Live Stock." (Assented to April 13, 1923.)

Chapter 27, 13-14, George V, intituled "An Act respecting the Testing, Inspection and sale of Seeds." (Assented to April 13, 1923.)

Chapter 43, 13-14, George V, intituled "An Act to amend the Dairy Industry Act." (Assented to June 13, 1923.)

Chapter 47, 13-14, George V, intituled "An Act to amend The Feeding Stuffs Act." (Assented to June 13, 1923.)

By proclamation of date 12th day of September, 1923, the "Act respecting the Testing, Inspecting and Sale of Seeds," (assented to on the 13th day of April, 1923), came into operation on the 1st day of October, 1923. (Vide *Canada Gazette*, Vol. LVII, page 1222).

By Order in Council approved under date May 11, 1923, under and in virtue of the provisions of section 11 of the Root Vegetables Act, 1922 (P.C. 840), the regulations relative to containers in which potatoes shall be packed, established by Order in Council of August 2, 1922, were amended by adding thereto a section providing penalties for infractions. (Vide *Canada Gazette*, Vol. LVI, 1923, page 4784.

By Order in Council approved under date June 26, 1923, (P.C. 1148), Regulations dealing with fruit packages were established under and in virtue of the provisions of subsection 5 of section 10 of the Act of 13-14, George V, intituled "An Act to regulate the Sale and Inspection of Fruit and Fruit Containers." (Vide *Canada Gazette*, Vol. LVI, Supplement, June 30, 1923.)

By Order in Council approved under date June 26, 1923, (P.C. 1149), Regulations dealing with the inspection and branding or marking of imported fruit were established, under and in virtue of the provisions of section 5 of the Act of 13-14, George V, intituled "An Act to regulate the Sale and Inspection of Fruit and Fruit Containers." (Vide *Canada Gazette*, Vol. LVI, Supplement, June 30, 1923.)

By Order in Council approved under date June 26, 1923, (P.C. 1150), the Regulations under the Destructive Insect and Pest Act established by Order in Council of May 17, 1917, were rescinded and new regulations substituted in lieu thereof. (Vide *Canada Gazette*, Vol. LVI, Supplement, June 30, 1923.)

By Order in Council approved under date June 26, 1923, (P.C. 1151), the Regulations respecting the grading and marking of eggs as established by Order in Council (P.C. 2001) of date September 25, 1922, and amendments thereto, were rescinded and new regulations established and substituted in lieu thereof. (Vide *Canada Gazette*, Vol. LVI, Supplement, June 30, 1923.)

By Order in Council approved under date October 12, 1923, (P.C. 2076) under and in virtue of the provisions of chapter 43 of the Statutes of 1923, 13-14, George V, intituled "An Act to amend the Dairy Industry Act, 1914," the regulations established under the provisions of the Dairy Industry Act, 1914, as amended, were further amended. (Vide *Canada Gazette*, Vol. LVII, page 1343.)

By Order in Council approved under date March 4, 1924, (P.C. 352), under and in virtue of the provisions of section 9 of the Live Stock and Live Stock Products Act, 1923, section 3 of the Regulations respecting the grading of hogs as approved by Order in Council, (P.C. 2035), of date October 6, 1922, was amended. (Vide *Canada Gazette*, Vol. LVII, page 3321.)

By Order in Council approved under date March 12, 1924, (P.C. 398), Regulations established by Order in Council, (P.C. 317), under and in virtue of the provisions of the Dairy Produce Act, chapter 28 of the Statutes of 1921, were amended. (Vide *Canada Gazette*, Vol. LVII, page 3511.)

## DOMINION EXPERIMENTAL FARMS AND STATIONS

The total value of all field crops in 1923 is estimated by the Dominion Bureau of Statistics as having value of \$899,166,200, as compared with \$962,293,200 in 1922. This is a decrease of \$63,127,000, caused mainly by lower prices in almost every crop. Following will be found a table showing the estimated area, yields, and valuation of the various field crops throughout Canada, and also a table showing the number of farm live stock in the Dominion:—

## SESSIONAL PAPER No. 16

## AREAS AND ESTIMATES OF YIELD AND VALUE OF FIELD CROPS, 1923

Crop	Area	Yield per acre	Total yield	Weight per measured bushel	Average price per bushel	Total value
	acres	bush.	bush.	lbs.	\$	\$
Fall wheat.....	815,706	23.75	19,315,000	60.23	0.92	17,850,900
Spring wheat.....	21,856,158	20.75	454,884,000	58.55	0.66	299,083,800
All wheat.....	22,671,864	21.00	474,199,000	58.80	0.67	316,934,700
Oats.....	14,387,807	39.25	563,997,500	35.55	0.33	184,857,400
Barley.....	2,784,571	27.75	76,997,800	47.19	0.42	32,570,700
Rye.....	1,448,142	16.00	23,231,800	54.61	0.49	11,339,900
Peas.....	169,330	17.00	2,898,200	60.00	1.72	4,987,400
Beans.....	63,151	16.50	1,041,700	59.09	2.66	2,773,000
Buckwheat.....	440,121	22.25	9,743,700	47.80	0.84	8,191,700
Mixed grains.....	843,757	35.25	29,750,500	44.19	0.59	17,654,800
Flax.....	629,938	11.30	7,139,500	54.63	1.77	12,643,900
Corn for husking.....	317,729	42.75	13,608,000	55.29	0.92	12,466,000
Potatoes.....	560,942	cwt.	cwt.		per cwt.	
Turnips, mangel, etc.....	194,512	99.00	55,497,000		1.02	56,397,800
		196.00	38,116,500		0.59	22,483,100
		tons	tons		per ton	
Hay and clover.....	9,725,602	1.55	14,844,900		10.97	162,882,000
Fodder corn.....	659,070	8.10	5,320,800		4.62	24,605,000
Sugar beets.....	22,450	9.60	216,200		6.48	1,401,000
Alfalfa.....	391,116	2.65	1,028,600		11.58	11,914,000

## NUMBER OF FARM LIVE STOCK IN THE DOMINION, 1919-23

Live Stock	1919	1920	1921	1922	1923
Horses.....	3,667,369	3,400,352	3,813,921	3,648,871	3,530,641
Milch cows.....	3,548,437	3,504,692	3,736,832	3,745,804	3,659,365
Other cattle.....	6,536,573	6,067,504	6,469,373	6,074,065	5,586,866
Sheep.....	3,421,958	3,720,783	3,675,860	3,262,626	2,753,860
Swine.....	4,040,070	3,516,678	3,904,895	3,915,684	2,753,860

Following will be found some very brief notes indicating the results achieved and progress made on the various Experimental Farms and Stations. These may be characterized in general as very satisfactory indeed.

In addition to the regular three issues of Seasonable Hints and the sending out of several hundred press articles, the following bulletins, pamphlets and circulars were issued during the year:—

## BULLETINS, NEW SERIES

- No. 28. Rabbits.
- No. 33. Bees and How to Keep Them.
- No. 36. Medicinal Plants and Their Cultivation in Canada.

## PAMPHLETS, NEW SERIES

- No. 35. Silage and Silo Construction for the Maritime Provinces.
- No. 39. How should Canada Export Beef Cattle.

## EXHIBITION CIRCULARS

- No. 107. Growing of Feeds for the Winter Feeding of Beef Cattle.
- No. 108. Flowers for the Prairie Home.
- Complete Index to Seasonable Hints.

## DIVISION OF ANIMAL HUSBANDRY

With horses the breeding work with Clydesdales was continued, and also the collection of data as to work performed and cost of work by horses. Some interesting work was done with beef cattle in the sending of two trial shipments overseas. Of the results of these shipments the first appears in pamphlet No. 39 and the second is reported on in the Report of the Division of Animal Husbandry.

The dairy cattle have continued to show improvement. Tuberculosis, while not entirely eradicated, has been kept still more closely in check. Some importations of pure-bred cattle were made, and an exhibit of Ayrshires, made at the Royal Winter Fair, was exceptionally successful. Importations of pure-bred swine were also made and a wide range of experimental work was continued, much of it looking to the production and correct feeding of the bacon type of hog. Work in the dairy was continued along usual lines, and much assistance was obtained both in the cattle barns and dairy through the co-operation of the newly-formed Division of Bacteriology.

Agricultural survey work was continued in the province of Quebec, and the results, combined with those of the previous year, are being brought out in Bulletin form.

## DIVISION OF FIELD HUSBANDRY

As a rule, large crop yields were secured on the Central Farm in 1923, such as oats, 67.4 bushel per acre; wheat, 38.6 bushels per acre; barley, 56.4 bushels per acre; hay, 3.8 tons per acre; corn, 15.4 tons per acre; mangels, 21.4 tons per acre. Accurate records were, as usual, kept on cost of production of field crops on all the Farms throughout the System. Experimental work was conducted on various rotations, cultural methods, use of farm manure vs. commercial fertilizer, etc., etc.

## DIVISION OF HORTICULTURE

As in previous years the work of this division was continued mainly along practical lines. For many years it has paid special attention to the originating of new varieties of fruits better suited to the different conditions of Canada, and, in all, six silver Wilder awards have been won from the American Pomological Society, the oldest association of the kind in America. The one in 1923 was for the Lobo apple, originated in the Horticultural Division.

An investigation was conducted into the cause of the breakdown of the Jonathan apple, strong evidence being secured that the greatest cause of this trouble lies in stage of maturity at which the apples are picked. Work was also conducted on the identification of varieties of apples by their leaves and with the work in fruit breeding. In vegetable gardening there were continued the usual tests of varieties, and also a considerable amount of breeding work to secure earlier varieties. A bulletin on "Modern Orchard Practices" was brought out during the year.

## CEREAL DIVISION

The chief function of this division is to discover or produce superior varieties of cereal grains, peas, beans, flax, hemp and buckwheat. Practically all the cross breeding work in connection with this is conducted at the Central Farm, the product being sent to the branch Farm for wider testing and multiplication, in cases where the product proves of value. Breeding work with wheat to secure a variety resistant to rust is an important feature. The work in milling and baking, discontinued for several years, was resumed this year.

## SESSIONAL PAPER No. 16

The usual testing of varieties was continued on some 3,277 plots. The distribution of small samples of seed was, however, discontinued, its place being taken by special opportunity afforded to secure larger quantities of pure seed.

## FORAGE CROPS

Work in this division was continued and a special opportunity for corn breeding work has been provided for 1924 by the extension of the area on what was formerly the tobacco station at Harrow, in southwestern Ontario.

A large number of grasses and clovers, biennials and perennials and hay crops were under trial. The improved variety "Boon" timothy, originated at the Central Farm, is being multiplied. Over ten thousand isolations of individual sunflower plants were made, and a large number of tests of field roots were conducted in order to establish a standard variety.

## POULTRY DIVISION

The work of this division is becoming more and more widespread and important. The breeding work is yielding excellent results, both on the Central and on many of the branch Farms, as is the work with feeds and feeding both of chicks and of hens and pullets for winter egg production. The study of poultry diseases is facilitated by the co-operation of an officer of the Health of Animals Branch, who devotes his full time to this work.

An interesting feature of the work of the division is the egg laying contests, one of which is conducted in each province of the Dominion, as well as the national one at the Central Farm, Ottawa, Records made in these contests are now made the basis of registration.

A considerable amount of field work, or poultry survey work, is being done especially in the province of Quebec with excellent results.

## DIVISION OF CHEMISTRY

The year's work consisted largely in the continuation of lines of investigation involving analysis and furnishing information on soils, manures, fertilizers, forage crops, feeding stuffs, waters, insecticides and fungicides, etc., etc., together with a considerable amount of analysis of food samples for the Meat and Canned Foods Division and work for other departments of the Government.

## DIVISION OF BOTANY

In economic botany the division has maintained and extended its services to farmers relative to weed extermination. A number of addresses on this topic have been given and a large amount of printed material sent out. A weed survey has also been made by means of a questionnaire sent out to a large number of farmers. A number of poisonous plants, samples of which were sent in, have also been examined and reports made.

In plant pathology continued progress has been carried on. The department was represented at the International Conference in plant pathology at Wageningen, Holland, during the year, and a statement presented re international plant disease investigation. The study of white pine blister rust and rust of wheat and cereal smut was continued, as well as the seed potato certification and mosaic free raspberries distribution.

## ECONOMIC FIBRE PRODUCTION

Owing to late spring and unfavourable growing weather, the yields of flax were considerably lower in 1923 than in the previous year. The experimental work comprised variety tests, harvesting at different stages of maturity, seeding experiments, application of commercial fertilizers, retting experiments, tests of the Bobby scutching machine, cost of growing an acre of flax and converting the same into fibre, etc., etc. The possibilities of producing fibre flax at a number of the branch Farms are well brought out and a certain amount of extension work was carried on at Caraquet, N.B.

## BACTERIOLOGY

This division was created during the year for the purpose of dealing with those problems of agriculture essentially bacteriological. It will, of course, in carrying out this policy, maintain the closest co-operation with other divisions. A laboratory is being formed for its use. It will take charge of the sending out of nitro culture for leguminous crops formerly handled by the Botanical Division. Its main lines of investigation will be pure milk production, bacteriological life in soils, retting of flax, etc., etc.

## TOBACCO DIVISION

The season of 1923 was very unfavourable, both in Ontario and Quebec, as far as yields were concerned. The quality, however, of the bright flue-cured tobacco was exceptionally good. During the last few years, special attention has been devoted to varieties of aromatic tobacco likely to become acclimatized in the province of Quebec, and certain varieties of these are giving great promise in this regard. The usual experiments were carried on in the applications of fertilizers of different formulae, the preparation and treatment of the tobacco seed bed and seedlings, transplanting, cultivation, topping, harvesting, curing, fermenting, etc., and also the treatment of diseased land.

## BEE DIVISION

The winter of 1922-23 was noted for the large number of colonies which perished from lack of or unwholesome stores or insufficient protection. During the season of 1923, however, excellent yields in honey production were obtained at a large number of Experimental Stations throughout the Dominion. The experiments carried on were mainly the effort to ascertain the value of bees as agents in the cross pollination, a comparative test of various means and rates of foundation experiments in swarm control, tests of various sizes of hives, and means of protecting colonies.

## DIVISION OF ILLUSTRATION STATIONS

The work of this division has widened, thirty-six new sites have been selected, making a total number of Stations now 125, located as follows; six stations in Prince Edward Island, fifteen in Nova Scotia, seventeen in New Brunswick, thirty-five in Quebec, seven in Ontario, twenty in Saskatchewan, twelve in Alberta, and thirteen in British Columbia.

The work of the Divisions of Illustration Stations briefly is to carry to the farmer in his own district and especially in those cases where he is so far remote that he cannot visit the Experimental Farm itself the proved results of experiments, thereby demonstrating to him their practical money making

## SESSIONAL PAPER No. 16

value as applied to his farm practise. Most excellent results have been obtained from this work, such as crop rotations, time and manner of cultivation and seeding, smut control, clover seed growing, introducing new crops, growing certified seed potatoes and registered seed grain, summerfallow treatment, growing corn and sunflowers as summerfallow substitutes, etc., etc. In connection with all this work careful cost of production records are kept. Field meetings are held wherever possible, and every effort is made to stimulate the interest of the farmer.

## EXTENSION AND PUBLICITY

The work of this division may be briefly defined as an endeavour to carry to the farmer some of the results obtained on the Experimental Farms by means of educational exhibits, collecting and editing material for the press, assembling and preparing for publication material for "Seasonable Hints", preparing material for lectures and sets of lantern slides, etc., etc. During the year exhibits were made at fifty-nine different points, and speaking briefly it may be said that the activities and usefulness of the Division are limited only by its ability to fill the numbers of requests received from the public for its information and material.

## GENERAL

Besides the activities which may be attributed to some special division of the work at the Central Farm, there is a large amount of work being done and a great deal of information sent out; among these may be included the work of the Draughting Room, where in addition to the drawing up of the plans and specifications for most of the buildings to be erected upon the Experimental Farms themselves, much assistance is given the farmer in the construction or repair of his farm buildings. Sets of stock plans are kept on hand of almost every style and size of building which might be required, lumber specifications for the same, etc., etc., are available free for the asking, and through correspondence all possible information is furnished him in his construction and repair.

## EXPERIMENTAL STATION, CHARLOTTETOWN, P.E.I.

Seeding was not general until May 18, fully a week later than usual. The summer was cool and crops matured slowly; pastures were good throughout the entire season. During the year, the Henrietta Connolly property of three acres was added to the Station. The work of draining the Blake property was continued and the Station buildings were kept in good repair.

With dairy cattle, the Ayrshire breed was greatly improved by the addition from the Central Farm at Ottawa of Lord Kyle 8th No. 81916, the Junior Champion at the 1923 Royal at Toronto, Ont., and by the excellent young heifers bred at the Station. The herd including young calves numbered eighteen at the close of the year. Experiments in feeding steers were continued as was work with swine breeding, the demand for young pigs from boys' clubs being so great as entirely to take up all the spring litters.

With poultry, work was continued in developing uniform bred-to-lay strains of Barred Plymouth Rocks and Single Comb White Leghorns. The 5th Egg Laying Contest closed in October, the average number of eggs per hen being 160.

The usual work was carried on in production of field crops, cultural experiments and variety tests of cereals, forage crops, fruits, vegetables, etc.

A considerable amount of work was done in attending and addressing agricultural meetings and showing at fairs.

Six Illustration Stations located on the island were under the immediate supervision of the superintendent during the year.

## EXPERIMENTAL STATION, KENTVILLE, N.S.

Spring was late and summer temperatures were low, thus maturity of crops was delayed.

With fruit, the blossoming period was late, but the fall was favourable and the fruit was well coloured. A considerable percentage of it was blown off by two severe wind storms during the growing season.

Extensive work was continued in the control of apple diseases and insects, also in the production of special early vegetable crops, growing of disease-free potatoes, etc.

Work with forage crops embraced tests of clovers and grasses of different strains and the mixtures of the same likely to prove desirable for hay. Varieties of roots and sunflowers were also tested.

With field husbandry, the work included tests to gather information as to the fodder crops likely to give most economical returns for the labour required to produce them. It was shown that while Indian corn can be grown more cheaply than roots, the lack of special storage facilities for the former makes roots a cheaper crop to grow. Extensive work was conducted with fertilizers; the value of ground limestone in the production of hay and cereal crops was well brought out.

An experimental shipment of steers was made to England and the returns above cost of transportation, showed one cent per pound live weight more than local buyers were offering at the time.

With poultry, considerable progress has been made in the production of heavy laying strains and the work with bees has been increased to include seventy colonies with two out-apiaries of four colonies each.

Fifteen Illustration Stations are under the direct supervision of the superintendent.

## EXPERIMENTAL FARM, NAPPAN, N.S.

Spring opened late, seeding being delayed until the last of May, but a favourable fall permitted of harvesting all crops in excellent condition.

With live stock, Guernseys, Shorthorns, and Holsteins are kept on the Station, both grades and pure-breeds. With the first named breed, the first prize in the senior calf class and reserve junior championship were won at the Royal Show. With swine, the Yorkshires and Berkshires are being kept and figures on cost of maintenance of pork production, housing conditions, and breeding for bacon type are being collected. With sheep, the Shropshires only are maintained. No breeding work has yet been done with horses.

Variety tests were carried on with cereals, forage crops, tree fruits, small fruits, and vegetables.

In poultry, the 4th Egg Laying Contest was completed at the end of November. The average production per hen in the contest was 143.3 eggs. In the Station flock, the highest egg record so far obtained is 308 eggs for the year.

Exhibits from the Station were shown at a number of points in the province during the season, and addresses were delivered by the superintendent and his assistants.

## EXPERIMENTAL STATION, FREDERICTON, N.B.

The Holstein, Ayrshire, and dual purpose Shorthorn breeds are kept here, the herd having been fully accredited as free from tuberculosis, on February 16, 1923. Experimental work in feeding, breeding, and housing is conducted with all these. The breed of sheep kept is the Shropshire, with which various breeding and feeding experiments are conducted. No experimental work is being carried on with horses, they being kept for farm labour only.

## SESSIONAL PAPER No. 16

With poultry, egg production was higher than during any previous year, one hen in the Farm flock laying 306 eggs. Hatching results, however, were unsatisfactory. In the Egg Laying Contest, the average was higher than in the previous year, being 163.25 eggs per hen.

Variety tests were continued with cereals and some especially interesting work was done in the use of fertilizers.

In field husbandry, a comprehensive system of crop rotations was commenced.

The superintendent had supervision over the Illustration Stations conducted in the province, the work from which is already showing excellent results.

## EXPERIMENTAL STATION, STE. ANNE DE LA POCAITIÈRE, QUE.

The severe winter of 1922-23 delayed the opening of spring, the first grain being sown on May 5. The cold spring was followed by a severe drought ending only in the middle of August, which resulted in very poor crop yields, with the exception of late crops which benefited by moisture and warm weather in late summer and early fall.

A stud of Percheron horses is being built up at this Station. With dairy cattle, the Ayrshire is the best breed kept, and it was much improved this year by the introduction of a few cows of excellent quality. Experimental work is being carried on in the rearing of calves and the feeding of dairy cattle to determine the comparative values of corn and sunflower silage, oat hay and roots.

In horticulture, variety tests were conducted with tree fruits, small fruits, vegetables, potatoes, shrubs, and flowers, and also tests with varieties of cereals and forage crops. In the latter two cases, however, the severe drought practically destroyed the plots and made the results of little or no value.

During the year, a Plant Pathological Laboratory was erected on the Station.

An Egg Laying Contest was commenced during the year with poultry, being made up of twelve pens. Results cannot be given until next fall.

The year was a very poor one for bees owing to the late spring and lack of blossom.

Eighteen Illustration Stations are under the direction of the superintendent and were regularly visited. Although many of these suffered from seasonal conditions, yet the work at all was carefully conducted.

During the year, the superintendent and his assistants gave over forty addresses on farm topics and a number of exhibits were shown at various fairs.

## EXPERIMENTAL STATION, LENNOXVILLE, QUE.

The summer was cool but with abundant rainfall which gave good yields of field crops with the exception of corn which was late.

No experimental work with horses was conducted, but the imported Shire stallion "Snelston Topper" (38528) was kept at the Station during the year. With cattle, Ayrshires, Jerseys, and Shorthorns are kept, and experimental feeding of steers was also conducted during the winter. With sheep, the purebred Oxford Down and high grade Oxfords are kept, the purebred ram lambs to be sold for breeding stock and the others as market lambs. With swine, the main object is breeding and feeding for production of the bacon type of hog.

The work in field husbandry included experiments in drainage, renovation of pasture land, experiments with lime and fertilizers, tests of rotations and cultural methods, etc. In all this work cost of production is kept. Experimental work with forage crops was considerably extended during the year.

With horticulture, a wide field of experiment is covered. With three fruits, difficult conditions are encountered owing to severe winter conditions.

With poultry, the Farm flock is an excellent one. In the Egg Laying Contest, twenty-three birds proved eligible for registration and the highest individual record was 253 eggs.

A considerable amount of fencing was done during the year. An exhibit from the Station was shown at a number of fairs and members of the staff addressed a number of agricultural meetings. Field Days and a special Farmers' Day at which some two thousand people were present, were held during the year.

#### EXPERIMENTAL STATION, CAP ROUGE, QUE.

The year 1923 was colder, drier and duller than the average of the last seven years. Most crops, however, were fairly good with the exception of timothy hay, Swede turnips, and some garden crops.

A feature of the work at Cap Rouge, or rather at the Horse Farm at St. Joachim which is under the control of the Cap Rouge superintendent, is the breeding of the French-Canadian horse, in which remarkable success is being obtained as noted by the fact that in 1923, twenty-nine first prizes, all diplomas and the Godin cup were won. With French-Canadian cattle, more first prizes were won than by any other herd. Experimental work is conducted in breeding, feeding and housing poultry. The most important work is that of breeding.

The work in field husbandry comprises experiments in soil and crop management, including the use of fertilizers.

In cereals and horticulture, a wide range of variety testing is being carried on as well as some breeding work.

During the year a creamery was built, considerable fencing erected, and some draining and clearing done. A large number of excursionists visited the Station during the year.

#### EXPERIMENTAL STATION, LA FERME, QUE.

Nineteen twenty-three was one of the most unfavourable seasons ever experienced in the district. Spring was late and no seeding was done before the 25th of May.

With live stock, horses are kept only for the Station work, no experiments having yet been undertaken. The dairy herd is made up of pure-bred Ayrshires and Ayrshire and Holstein grades. The sheep are composed partly of pure-bred Cheviots and the remainder grades, they being utilized for experimental work both in the production of lamb and mutton and of wool. With swine, there is a considerable demand for breeding stock from farmers in the district, the remainder being kept for experimental feeding.

The field crops were all much below the average on account of weather conditions. During the year, thirty-eight acres were cleared bringing the total cleared area of the Farm up to 238 acres.

Extensive tests of varieties were carried on with forage plants and in horticulture.

The flock of poultry has become well established and some excellent experimental work is being done.

During the year the sheep shed was built and the reconstruction of the piggery was finished, as well as repairs to various buildings.

Exhibits were sent to several neighbouring points.

## SESSIONAL PAPER No. 16

## EXPERIMENTAL STATION, KAPUSKASING, ONT.

Seeding commenced on May 1, the earliest date on record at this Station. Growth, however, was retarded by drought until after June 22, and snow after the middle of September made harvesting very difficult.

The present dairy herd at the Station consists of pure-bred and grade Ayrshires, and the beef herd of grade Shorthorns. The entire herd at the Station is accredited. With sheep, considerable experimental work was conducted and a large number of young rams were sold as breeding stock to settlers. The same may be said of swine. With horses, no breeding work has yet been undertaken.

In field husbandry, the yields in 1923 were higher than those in previous years due to more favourable weather conditions. Some of the experimental work being carried on is to ascertain the best mixtures of grain, the best rates of seeding, crops best suited to the district, study of rotations, cultural methods, etc., etc.

The work with horticulture includes the testing of varieties of tree and small fruits, vegetables, shrubs, and flowers.

With forage crops and cereals, variety testing was carried on.

The experimental work with poultry is along the lines of breeding, feeding, housing and general management methods. There was a considerable sale of cockerels for breeding purposes and eggs for hatching.

While the yield of honey was light, the bees came through the winter in excellent condition.

During the year a new log sheep barn and log poultry house were constructed, considerable repairs done, as well as fencing and farm roads made.

During the year, five Illustration Stations were opened, these to be under the supervision of the superintendent.

## EXPERIMENTAL STATION, MORDEN, MAN.

The year 1923 was the poorest on record for the farmers of the Morden district, owing to cold spring weather followed by hot dry weather. Severe damage from rust resulted.

In live stock, work is conducted with Percheron horses, Ayrshire dairy cattle, and Hampshire sheep, records being kept of cost of maintenance and young stock being sold at moderate prices. Some excellent dairy records are being made.

In field husbandry, two new rotations thought possibly suitable to southern Manitoba were commenced during the year. With cereals and forage crops, variety tests were conducted.

Horticulture, as heretofore, was made a special feature of the work of the Station, and some excellent work is under way. Three trial orchards have been established and a new greenhouse has been erected. With vegetables, much variety testing work was conducted and the ornamental planting has been extended.

With poultry, the object in view is high egg production with preservation of standard sizes and colour of plumage of Barred Rocks and Single Comb Rhode Island Reds.

A number of meetings were addressed and exhibits made by the superintendent and his assistants during the year.

## EXPERIMENTAL FARM, BRANDON, MAN.

Spring was late and no seeding was possible until May, while growth was backward until June. Later a very severe attack of stem rust in wheat

occurred, which cut the crop to less than half of what it would have been. Other crops were somewhat affected by rust, but on the other hand, the returns from these were satisfactory. Early fall frost did some damage to the corn crop.

The herd of dual purpose shorthorn cattle continues to improve by breeding and selection. Experimental work in steer feeding was continued, and the trench silo dug as an experiment in 1922 has proved such a success as to attract attention and many enquiries not only from Manitoba but from adjoining States of the Union.

With swine breeding, work has been continued with a view of the formation of a bacon type of hog.

Breeding work was continued with Clydesdale horses and Oxford Down sheep.

In field husbandry the rotation work was again interrupted by the flooding of the Assiniboine river. A wide range of cultural experiments with grain and forage crops was conducted, and also tests of varieties of both these. In horticulture special attention is given to experimental work with potatoes. Variety test work was also carried on with other varieties of vegetables and small fruits. In tree fruits the hardy plums and crab apples are giving good results, but not yet the standard apples.

Progress is to be reported in the development of good utility strains of Barred Rocks and White Wyandotte. The average egg production is showing steady increase. The fourth year of the Manitoba Egg Laying Contest was completed on October 30 with a greatly increased production over previous years.

An exhibit was sent to a number of the local fairs in the province, and also to the provincial exhibition and the horticultural show at Brandon. The superintendent and his assistants also addressed a number of agricultural meetings and wrote a number of papers on agricultural subjects.

#### EXPERIMENTAL FARM, INDIAN HEAD, SASK.

The season of 1923 was remarkable for heavy precipitation during the latter part of June and the month of July. However, only fair yields were obtained, except with hay, which was a good crop. Damage from rust and other diseases was serious with the grain crops.

The breeding of Clydesdale horses is a feature of the work at this Farm. Four fillies won one first, one third and two ninth prizes at the Royal Winter Fair in Toronto and the same at the International at Chicago, both in competition with some of the best specimens of the breed on the continent. With cattle the Shorthorn breed is kept. The herd at present consists of sixty-seven pure breds and also sixty steers on feeding experiments. The object with the pure-bred herd is to develop good beef lines together with profitable milk production. Extensive feeding experiments were carried on with this herd during the year.

Breeding operations were continued with both Yorkshire and Berkshire swine with improvement in both strains from the standpoint of the bacon hog. Comparison of various pastures and of self feeders with feeding by hand were made.

With sheep pure-bred Shropshires and grades are kept.

In field husbandry a considerable number of rotations are under way, together with a wide range of cultural experiments.

Variety tests with cereals, and forage crops were conducted together with small fruits and vegetables. With tree fruits, hardy plums and crab apples yielded very well, but although some seedlings and hybrids of standard apples have started to fruit and show hardiness and good quality, nothing definite as yet can be said as to these.

## SESSIONAL PAPER No. 16

The work with poultry is confined to the White Wyandottes and an excellent strain is being formed here. At the Saskatchewan Egg Laying Contest, conducted at this Farm, a distinct improvement in yield is noticed each year from the birds entered therein.

During the year exhibits were made at a number of points and the superintendent and his assistants did considerable work in classes of live stock, judging, delivering addresses, writing agricultural articles, etc., etc.

## EXPERIMENTAL STATION, ROSTTHERN, SASK.

Early drought caused premature heading out of early and early sown varieties, but the latter ones yielded very satisfactorily.

During the winter of 1922-23, sixty-six steers were fattened comparing sunflower silage with turnips, and during 1923-24 the same experiment is being repeated with fifty-nine steers. In both years so far the ensilage is showing a considerable advantage.

From the excellent small herd of Holsteins on the Farm the average yearly production for eight cows that completed the R.O.P. test was 13,608 pounds of milk and 458.5 pounds of butter fat.

The present flock of sheep is a high grade one evolved from a flock of grade ewes and Leicester rams. The principal work being done is an attempt to solve the problem of goitre in young lambs.

With swine the Berkshire and Tamworth breeds and their crosses are being compared as to the production of marketable hogs of a desirable type, and pasture experiments are also being carried on.

The work with rotations and cultural experiments is being continued, the former especially with a view to the prevention of soil drifting and extermination of weeds. In horticulture marked progress has been made and 1923 was notable for the high yield of apples, none of them, however, being larger than crab.

The usual test of variety work was conducted with cereals and forage crops.

During the year the superintendent addressed twenty-one public meetings and a display of farm produce was made at some of the local fairs. A considerable number of excursions and picnics took place at the Station during the year, especially in the month of July.

## EXPERIMENTAL STATION, SCOTT, SASK.

The summer of 1923 was favourable throughout northwestern Saskatchewan, resulting in yields above the average and good qualities of grain.

The Shorthorn herd at the Station now number thirty head. With horses the Percheron breed is kept, and these animals are used both for breeding work and for doing the work on the Station. With swine comparative feeding experiments were conducted, and also with the flock of sheep.

In field husbandry, the work comprises the comparative study of rotations, their suitability, rates and costs and cultural experiments.

The work in horticulture, as is customary at this Station, gave excellent returns from vegetables and small fruits. With cereals and forage crops the customary test of varieties was conducted. With poultry and bees work was continued, the former comprising feeding, housing and breeding experiments. With the bees a comparison in wintering was made between wintering in the cellar and wintering outdoors.

An exhibit from the Station was made at six fairs, and a number of addresses were delivered during the year by the superintendent and his staff.

15 GEORGE V, A. 1925

## EXPERIMENTAL STATION, SWIFT CURRENT, SASK.

Experimental work at this Station is now fairly under way. The season of 1923 was one of the wettest on record, the precipitation for May, June, July being 12.88 inches, as compared with a 38-year average for these months of 7.35. There was thus a heavy growth of straw and some crops lodged, while there was a certain amount of damage from rust, but wheat yielded 30 bushels per acre and oats 70 bushels per acre. In field husbandry the cultural experiments started in 1923 were continued, as was the test work with cereals and forage crops. In animal husbandry a herd of Shorthorns has been well established, it now comprising twenty-three animals.

During the year two cottages, an implement shed and work shop and two portable granaries, also a cattle stable, were constructed, and an abundant supply of good water was obtained.

## EXPERIMENTAL STATION, LETHBRIDGE, ALTA.

Work on the land commenced the second week in April. Conditions during the growing season were fair, and a good yield of high grade wheat resulted. The western half of southern Alberta may be regarded as having obtained a wonderful crop in 1923, and most of the remaining part of good crop with the exception of a small area in the southeast. A few small localities suffered during July and early August from hail storms.

With live stock, experimental work was conducted with various feeding tests for steers and lambs and the pasturing of sheep on the forest reserve was continued. With poultry the Barred Rock is the only breed kept and an excellent laying strain has been developed. During 1923 some outstanding records were made. One pullet laid 315 eggs in 365 days; 20 pullets averaged 229 eggs each, and fifty pullets 211. The average for all pullets kept for the year was 200 eggs per bird.

The Alberta Egg Laying Contest is being conducted at this Station and is causing great interest.

Beekeeping is becoming a commercial proposition in the irrigated section of southern Alberta, and is being given special attention on the Station, the number of colonies in 1923 being over thirty and the average production of extracted honey 190 pounds per colony.

The rotation work on both the dry and irrigated farms was continued during the year, there being eight rotations under trial on dry land and three under irrigation.

With cereals, forage crops and in horticulture variety tests were conducted under both conditions and considerable data of value were gathered in connection with duty of water.

## EXPERIMENTAL STATION, LACOMBE, ALBERTA

The crop year here was remarkably good, owing to abundant moisture, warm weather and an ideal harvest season.

With horses breeding work has been continued here for a number of years with the Clydesdale, while during the year pure-bred Shires were added, creating a great deal of interest in the district. These latter animals were the gift of the Shire Horse Association of Great Britain. With beef cattle, the Aberdeen Angus is kept, and during the year a number of prizes were obtained.

With dairy cattle the Holstein is the breed kept, the herd now totalling sixty-five head. Fourteen pure-bred Holsteins gave an average of 15,737 pounds of milk and 65.1 pounds of butter for the year.

## SESSIONAL PAPER No. 16

With sheep a grading up experiment is being carried on, using pure-bred Leicester sheep, Cheviot, Corriedale, Oxford, Hampshire and Shropshire rams on range ewes. The good results of this work are already becoming evident.

With swine, the Yorkshires, Berkshires and Duroc-Jerseys have so far been kept, but the last named is being discarded. The object of the work is the production of the bacon type of hog and the Duroc-Jersey does not seem capable of producing this.

In field husbandry there are now thirteen rotations under test, together with a large number of cultural experiments and soil moisture yields requiring some 480 plots in all.

The season was ideal for horticulture, but the vegetables and bush fruits yielded well. The native Manitoba plums produced a fair crop, but none of the other recently planted tree fruits have come into bearing. With cereals and forage crops the usual test of variety work was conducted.

With poultry, White Wyandottes and Barred Rocks are the two breeds kept. All the hens were trapested and a start was made in pedigree work.

To meet the increased interest in beekeeping in central Alberta special attention was given to this work and considerable information acquired.

During the year the Superintendent and his assistant addressed forty-two farmers' meetings and wrote a large number of articles for the press, while an exhibition was taken to some ten fairs.

## EXPERIMENTAL STATION, SUMMERLAND, B.C.

The season of 1923 throughout the Okanagan was favourable both to agriculture and horticulture. Good weather prevailed during harvest periods and there was no severe weather until the end of December.

With live stock, a commencement has been made with Cheviot sheep and Berkshire swine, while a small Jersey herd has been established. The horses on hand are used for farm work only, no experimental work being attempted.

Horticulture, of course, is a main feature of the work at this Station and special attention is given to the study of orchard soil problems and to experiments in the storage of apples, the latter with a special view to the efficiency of common or air-cooled storage as a means of prolonging the life of the apple.

In field husbandry, a seven-year rotation has been put under way. With cereals and forage crops, variety and strain tests were continued.

Twelve Illustration Stations located in the central and southern interior of British Columbia are administered directly by the superintendent.

The Station attended three local fairs with exhibits during the year, and a number of addresses were given to farmers' meetings by the superintendent and his assistants.

## EXPERIMENTAL STATION, INVERMERE, B.C.

The season was mild with abundant precipitation and hence good crop yields.

In animal husbandry very little experimental work was attempted owing to lack of land. However, a start was made in establishing a herd of Ayrshires by acquiring some good females and a young bull. Yorkshire swine are also kept on the Station.

In field husbandry, four rotations are being conducted at the Station with a view to maintaining soil fertility and adaptability to farming practices throughout the district. Variety tests with cereals, forage crops, and horticulture were conducted, along with cultural experiments with the latter, especially with potatoes.

15 GEORGE V, A. 1925

The work with poultry is proving very successful and pedigree trap-nesting is followed with both Wyandottes and Leghorns. In the apiary, six colonies came through the winter and during the season 502 pounds of honey were extracted.

The Station exhibit was shown at eight points and the Superintendent delivered a number of addresses during the year. No building operations were undertaken.

#### EXPERIMENTAL FARM, AGASSIZ, B.C.

The spring of 1923 was one of the earliest on record but was rather uncertain and was followed by drought and heat. Early sown crops, however, gave an excellent yield and one of the best crops of hay grown in the district was harvested in July.

The Clydesdales are kept and bred at the Station and the eighteen head of purebreds again made an excellent showing at New Westminster. The dairy herd consists of seventy-four head of pure-bred Holsteins. Twenty-seven cows finished their lactation period during the year with an average of 12,371 pounds of milk and 540 pounds of butterfat. A larger output than ever was made of Stilton, cream, Cheshire and Meilleur cheese, and a large number of milk and cream samples were tested for the farmers of the district. Approximately one hundred breeding ewes mostly of the Dorset breed were on hand, and Yorkshire swine are the breed kept.

The popularity and success of the work in poultry increases each year, the Barred Plymouth Rock and the White Leghorn breeds being kept. A considerable amount of experimental work in breeding and feeding was done and the 3rd Egg Laying Contest was conducted and was even more successful than either of the other two. The average percentage of eggs for 360 birds was 199.85; the best individual, a White Wyandotte, laid 306 eggs.

Work with field crops is limited by the amount of land for this work, and most of this was devoted to production of corn and sunflowers for ensilage and for hay and roots.

The work in horticulture consisted of variety experiments with potatoes, vegetables, fruits and flowers, and also cultural methods. The season was so dry that yields in general were below the average.

#### EXPERIMENTAL STATION, SIDNEY, B.C.

The winter of 1922-23 was cold and unusually disagreeable, but on the whole the following growing season was a good one permitting of planting under excellent conditions with a fair amount of moisture during the growing season.

A small herd of Jersey dairy cattle has been established and placed under accreditation. No experimental work was done with horses or with sheep.

In field husbandry, the rotations outlined in the previous report have been followed but are handicapped by the high price of land and difficulty in clearing the same. Tests of varieties were conducted with cereals and forage crops, both with winter and fall seeding.

Horticulture is made a specialty at this Station, and a large number of experiments were conducted in soil treatment, pruning, spraying, fertilizing, variety tests, etc.

Poultry is also featured, and probably at no other Station is wider work being carried on or more accurate results obtained. A complete system of pedigreeing is followed and a laying contest for poultry breeders of the Island is being conducted.

## SESSIONAL PAPER No. 16

The work with bees is also a feature and forms a valuable source of information for Island bee keepers.

Several fall fairs were attended at which an exhibit of Station produce was made and addresses and demonstrations given. A large number of visitors visited the Station during the year.

## EXPERIMENTAL SUB-STATIONS

As in former years, experimental work was conducted at Fort Vermilion and at Beaverlodge in the Peace River district and a certain amount of experimental work with tree fruits especially at Salmon Arm, B.C. A limited amount of experimental work also was conducted under the supervision of the Fathers of the Missions at Forts Smith, Resolution and Providence, Northwest Territories, at Swede Creek, near Dawson, Y.T., and at Betsiamites, Saguenay county, Que.

From the first-named two points excellent results were obtained. The work at Salmon Arm, being with newer varieties of apples, is necessarily slow in conclusion. The work at Forts Smith, Resolution and Providence was greatly hampered by a very unfavourable season, that of Betsiamites was hindered somewhat by a change of priests in charge of the mission. The work here is also preparatory in nature dealing largely with problems of soil fertility, and considering the condition of the land, excellent progress is being made. At Swede Creek for the second year in succession wheat grown on the Station was made into flour which created a great deal of local interest.

## DAIRY AND COLD STORAGE BRANCH

The record for the dairy season of 1923 presents no very striking features. Weather conditions were about normal, except in certain areas. The production of cheese shows an increase of over 15,000,000 pounds in excess of the previous year, although the complete figures are not yet available. There was also an increase in the production of creamery butter of over 8,000,000 pounds, in spite of the fact that a much larger quantity of cream was exported to the United States than during the previous year.

The average price of cheese for the season was a little over nineteen cents per pound at country points. This price is nearly 50 per cent higher than the average price in any pre-war year, including that of 1914, when the price in the autumn was raised considerably by war conditions. It is doubtful if the price of any other Canadian farm product has been so well maintained since the war period.

The average price of butter for the season of 1923 has been placed at 33.4 cents per pound at country points, and was, therefore, relatively lower than the price of cheese throughout the season. With cheese at 19 cents, the equivalent for butter is 41½ cents, excluding the difference in value of the skimmilk and whey. The disparity between butter and cheese was never as great as at times during the past season. The prices were more on a parity towards the end of the season.

On the whole, the dairyman in 1923 was in a better position than those who depend on other crops.

The total exports of dairy produce for the calendar year, plus excess of holdings, show an increase in fat equivalent of 1,733,532 pounds as compared with 1922, while the value of the exports, plus excess holdings for the same period, shows an increase of \$5,215,818.

The most outstanding feature of the dairy situation in Canada at the present moment is the strong tendency towards dairying in the prairie provinces.

Recognizing the importance of the competition which Canada is meeting from New Zealand and Australia, it was decided to send Mr. J. A. Ruddick, Dairy and Cold Storage Commissioner, and Mr. W. A. Wilson, then Manager of the Saskatchewan Co-operative Creameries, on a visit to these countries to study the conditions and methods which are followed there, and to report on the prospects of further competition from that source. They left Canada on January 26, 1923, and returned on April 21, 1923. The Dairy and Cold Storage Commissioner prepared a full report of the trip, which was published as bulletin 34, and which may be obtained on application to the Publications Branch of this department. This report points out very clearly the urgent need for Canadian dairymen to take advantage of every opportunity for improvement if they are to successfully meet the ever growing competition from the southern hemisphere.

Mr. G. H. Barr, who has been on the staff of the Dairy Branch for seventeen years, and Chief of the Dairy Division since 1909, resigned his position at the end of February and left the service, with a good record behind him.

#### REORGANIZATION

The Dairy Branch has recently been somewhat reorganized. A beginning was made in the creation of a Division of Dairy Research, and Mr. E. G. Hood, B.S.A., Ph.D., was appointed to the position of Chief of the Division. It is hoped that this division may be helpful in solving some of the problems which butter and cheese makers have to contend with from time to time.

In order to deal with the large increase of work involved in the grading of dairy produce since the Dairy Produce Act and Regulations came into force on April 1, 1923, a new "Division of Dairy Produce" has been established. This division will deal with grading, educational scoring contests, grading classes, judging at exhibitions, etc. The Dairy Division has been renamed "Division of Dairy Manufactures". It will have to do with all activities of the Branch relating to the manufacture of butter, cheese, and other dairy products, the operation of the government dairy stations, etc. The Cold Storage Division has been merged with the Extension of Markets Division, which will hereafter be known as the "Division of Dairy Markets and Cold Storage". The administration of dairy laws, which has been under the Extension of Markets Division, will be disassociated from that division and the work carried on as a separate "Service".

The cow testing work which has been carried on by the Dairy and Cold Storage Branch since it was first started in 1904, has, by mutual arrangement, been transferred to the Live Stock Branch. It has been felt for some time that the Dairy Branch did not have the requisite machinery and organization for carrying on this work to best advantage, and the Dairy and Cold Storage Commissioner has frequently asked to be relieved of it. The Live Stock Branch is in closer touch with the live stock owners of the country. The transfer was made on March 31, 1924.

#### CREAM GRADING

There is a very general movement throughout the provinces towards the grading of cream for butter making. Cream grading is now well established in Alberta, Saskatchewan, Manitoba and Nova Scotia, and a good start has been made in Ontario and Quebec. While the grading of cream is a matter which comes under the jurisdiction of the provincial authorities, the Dairy Branch has assisted in every possible way to introduce this important reform in the creamery industry, and to co-ordinate provincial effort along this line.

## SESSIONAL PAPER No. 16

## EXTENSION OF MARKETS DIVISION

The iced car services for butter and cheese were again arranged for with the railways, and supervised by the inspectors under this Division.

The cargo inspectors were employed as usual at Montreal during the season of navigation, at Halifax throughout the year, and at the ports of St. John, N.B., and Portland, Me., after the close of navigation at Montreal until the end of January when the shipment of perishable products practically ceased.

Inspectors are still stationed in the United Kingdom at the ports of London, Bristol, Liverpool, Manchester, and Glasgow. Thus cargoes of perishable products are inspected as to condition, temperature, packing, etc., both at the point of loading and at the point of discharge. Detailed reports are made on every shipment, and recording thermometers are placed with all such cargo, the records of which, along with other information contained in the reports, are made available to all interested persons.

## DAIRY DIVISION

## THE GRADING OF DAIRY PRODUCE

The Dairy Produce Act and Regulations came into force on April 1, 1923. Some preliminary grading was done in 1922, mainly for the United Dairymen Co-operative, an organization selling cheese by auction at Montreal. The following quantities of cheese and butter were graded during the calendar year of 1923:—

## CHEESE—ALL CANADA

Montreal is naturally the principal centre for the grading of dairy produce for export, and the bulk of the grading is done there. A Dominion Dairy Produce Grader was stationed at Belleville for central Ontario, one at Stratford for western Ontario, and one at Charlottetown for Prince Edward Island. An arrangement was made with the provincial departments of agriculture for Manitoba, Saskatchewan, and Alberta, to have the provincial graders act as dominion dairy produce graders as required for the grading of butter intended for export.

No attempt was made to place any marks on the butter or cheese packages indicating the grade in which the respective lots had been placed. The grade certificates have served in some measure to identify graded lots through the churning numbers and vat numbers entered in the certificate. Amended regulations now provide for the marking of grades on the packages, and although there are serious practical difficulties in the way of carrying out this marking, it is believed to be desirable that it should be done, and it is hoped that some way will be found of doing it.

The export trade in dairy produce from Canada has been long established and the method of handling, the arrangements of warehouses, etc., have become firmly fixed. It was felt to be undesirable to introduce any system that would cause serious dislocation or interruption to the established practices unless there were good reasons for doing so. In grafting the grading system on the export trade the department has endeavoured to permit the handling of dairy produce along the usual lines as far as possible, and to accommodate the grading system to existing conditions with a minimum of disturbance. It may be necessary in the interests of the trade and to protect the grading so as to establish confidence therein, to make some changes in the future. On the whole the grading of dairy produce for export has been inaugurated with very little difficulty and without friction with either the exporters or the producers.

#### REGISTRATION OF FACTORIES

The registration of all cheese factories and creameries, which has now been carried out, and the requirement that after May 1, 1924, all packages containing butter and cheese shall bear the registered number of the factory, will greatly assist in the identification of different lots of butter and cheese, and enable the dairy produce graders and others to correspond more effectively with the authorized representatives of the different factories.

#### MILK UTILIZATION SERVICE

This service was strengthened during the past year by the addition of an assistant demonstrator and lecturer who speaks French as well as English. A large number of publications on the use of milk and its products were distributed through provincial organizations, Boards of Health, Departments of Education, Child Welfare Associations, etc.

Exhibits and booths, where the food value of milk products was demonstrated, were erected at eight of the leading agricultural exhibitions in Canada during the past year, and also at the Exposition of Western Canada Farm Products promoted by the T. Eaton Company at Winnipeg.

Addresses have been given by the Demonstrators at the World's Dairy Congress at Syracuse, at various national, provincial and local meetings of women's institutes, child welfare organizations, educational associations, dairy-men's associations, and at nine of the normal schools in Ontario and Quebec.

## SESSIONAL PAPER No. 16

Some work has been done in the public schools by encouraging milk poster competitions, and a close connection has been established with the various child welfare, public health, women's institutes and other organizations throughout Canada.

## FINCH DAIRY STATION

The Finch Dairy Station had another successful year. Over eight million pounds of milk were received, making it the largest whole milk cheese and butter factory in Canada. There was manufactured 148,479 pounds of cheese, and 20,302 pounds of butter while 210,579 pounds of butter fat were sold as cream, and 107,156 pounds of whole milk were disposed of. The total value was \$149,598.14. The average net payment to the patrons was \$1.62 per 100 pounds of milk. The quantity of milk received during the four winter months, December to March inclusive, 1922-23, was 1,731,869 pounds. In the same period in 1912-13 (first year of operation) the receipts were only 208,937 pounds.

## DOMINION EDUCATIONAL BUTTER SCORING CONTEST

The educational butter scoring contests, in which samples of butter from creameries selected by the provincial authorities in the different provinces are sent to Montreal once a month throughout the season, was repeated in 1923.

An educational cheese scoring contest along the same lines was inaugurated in 1923 and created considerable interest among the cheese factories.

The objects of these contests are to secure uniformity in type and character of the butter and cheese manufactured in different parts of Canada. It has been demonstrated through this work that just as good butter can be made in one part of the country as another, and that it is possible for every part of Canada to make the very highest grade of creamery butter. The cheese contest was naturally confined very largely to Ontario and Quebec, with a few samples from New Brunswick and Prince Edward Island.

## DAIRY NEWS LETTER

Publication of the monthly Dairy News Letter was continued. This publication affords a medium through which information as to world's conditions in dairying, the progress of the industry in Canada, and any items of interest to those engaged in the manufacture of butter and cheese in Canada can be disseminated promptly and directly to those who are especially interested.

## DAIRY MARKET INTELLIGENCE

A weekly Dairy Market Letter is mailed every Monday to every creamery and cheese factory in Canada and to any other person who makes application to be placed on the mailing list. This letter is published only from April to December.

In addition to the Market Letter, paid telegrams are sent out regularly on Mondays and Fridays to officials in the various provinces and districts, and collect telegrams are sent to any person who makes application for them.

This market information seems to be appreciated by creameries and cheese factories, especially in outlying parts of the country.

## MEETINGS

The commissioner and the staff of the Dairy and Cold Storage Branch have attended numerous dairy conventions and other meetings throughout the year. Some special meetings were held during the winter to which cheese makers and factory operators were invited with a view of becoming familiar with the methods and standards followed in the grading of dairy produce. A number of the dairy produce graders were assigned to this work and samples of cheese of different types and grades were taken along for examination by those in attendance.

## HEALTH OF ANIMALS' BRANCH

In this branch the year just passed has been a busy one, although fortunately the extra pressure has not been due to any serious or wide spread outbreaks of disease within our borders.

Unfortunately, very serious outbreaks of foot and mouth disease have been occurring in Great Britain with dangerous regularity for some time, and quite recently this disease has been detected in the State of California, the infection having been introduced from foreign sources through the port of San Francisco.

It has been necessary to prohibit the importation of cattle, sheep, goats, swine, poultry, and dogs, with the exception of toy dogs, from Great Britain and Ireland.

The British Ministry having placed an embargo upon the importation of cattle, sheep, goats and swine from all the States of the Union, it was further necessary, in order to protect our British market, to enforce a similar order. As it is essential to protect the reputation of Canadian animals, the transit shipment of American animals through Canadian territory has been prohibited, as well as the transit of Canadian animals through the United States.

More stringent measures are being enforced with regard to the infected State of California, and its two bordering States, Nevada and Oregon. The importation of cattle, sheep, swine, goats, dogs and poultry, or of the flesh, hides, horns, hoofs, or other parts of such animals, or of hay, straw, fodder, or manure originating in, or which have been within, any of these three States has also been absolutely prohibited.

Foot and mouth disease is one of the most contagious of all known maladies, and one transmissible to a remarkable degree by indirect channels of many different kinds. There is consequently always a danger of the infection being introduced, and this is very much enhanced when this disease exists in the United States.

The enormous losses resulting from an invasion of this disease are well known, and while the enforcement of precautionary measures cause a great deal of annoyance, inconvenience and financial loss to importers, and others, these losses are infinitesimal when compared with those resulting from an invasion of the disease. It has therefore been incumbent upon the department to enforce absolutely all possible precautionary measures.

The commendable promptness and energy with which the initial outbreaks were dealt with by the American authorities will, I hope, result in the early eradication of the disease.

The British regulations governing the shipment of Canadian stores, which have been in force since the removal of the embargo on April 1, 1923, have been carefully complied with. A close supervision has been maintained over

## SESSIONAL PAPER No. 16

all shipments from point of origin to the British market. This has necessitated the sending of approximately sixty veterinary inspectors to England whose services were not available for their regular duties for periods varying from six weeks to two months. Approximately 23,500 stores left our shores for the British market during the period covered by this report, and all these animals passed the rigid inspection for health conducted by the British officers.

Although the supervision of these shipments entailed a great deal of additional work, what may be termed the ordinary duties of the staff, namely the work of controlling animal diseases with a view to their ultimate eradication, that of maintaining a strict quarantine against the introduction of infection from other countries, and that of research and experiment have all been carried on in a satisfactory and effective manner. The details of the work performed in these various lines are briefly dealt with below, and will be found fully set forth in the report of the Veterinary Director General, which will be issued as a separate publication.

It has not been found necessary in the past year to erect any new quarantine stations, nor have any changes been made in the quarantine regulations, except, of course, those above outlined. These are temporary measures, and will be rescinded as soon as it is safe to do so.

The compulsory slaughter and compensation policy which has been followed for many years in dealing with outbreaks of glanders has practically eradicated this very serious disease of horses. Outbreaks occur occasionally, but they have in recent years been very limited, and have been promptly controlled. During the past year only one outbreak was dealt with, and this was located in the province of Quebec.

A similar policy has been followed in the control of hog cholera with marked success. The system of inspection of licensed garbage feeders has resulted in prompt notification of this disease, which has made it possible to deal more promptly with outbreaks.

Small outbreaks have occurred in the Provinces of Ontario, Manitoba, Saskatchewan and British Columbia, which necessitated a total slaughter of 581 hogs.

The control of bovine tuberculosis is a most difficult problem largely due to the chronic tendency of this disease. It is not possible to detect this malady by physical examination, except in very advanced cases. The great majority of infected cattle show no signs of illness, and it is only by the administering of the tuberculin test that they can be detected. Compulsory regulatory measures are therefore impracticable, and it has been necessary to exercise caution in selecting policies for its control. As however, it is essential to protect our foreign markets in countries where active measures are being carried on, and realizing the great economic losses resulting from bovine tuberculosis, as well as the humanitarian aspect of this disease, it is advisable to take all possible, practicable measures for its control.

In view, however, of the enormous cost involved this work must necessarily be limited, and it is important that only those policies are selected which give the best returns for the money expended.

Experience having shown that under the provisions of the Municipal Tuberculosis Order, satisfactory progress was not being made in the control of this disease, it was decided that the department would not be justified in accepting any more applications for assistance under this order.

As, however, a large number of applications had been received, an opportunity was given to the municipalities in which the testing of cattle had not been commenced to apply for assistance under the Restricted Area plan, but they did not see fit to take advantage of it.

The policy of eradicating this disease in pure bred herds, and maintaining them free from it, known as the Accredited Herd plan, is giving good results, and is becoming very popular in districts where the stock men are most familiar with it. It was, however, necessary, in order to limit this plan to pure bred herds, to require that there should be a definite number of registered cattle in the herd before accepting it for accreditation. This number was at first placed at twelve, and as it practically eliminated the many owners of small herds who desired to take advantage of this policy, it was afterwards decided to accept herds containing at least five registered cattle, one of which must be a herd sire.

Under this plan 2,648 pure-bred herds are now being dealt with and 908 of these herds have already been fully accredited as tuberculosis free herds. It was necessary to conduct 119,551 tuberculin tests, and 7,153 cattle were found to be tuberculous, necessitating the payment of \$539,414.66 in compensation.

This plan is most popular in districts where the stockmen are most familiar with it, and although every effort is being made to deal promptly with all applications for accreditation, they have been too numerous to permit of immediate action in all cases.

The Restricted Area plan has many advantages over other tuberculosis policies, in so far as under the regulations governing this plan all cattle of all classes located within a specified territory are tested with tuberculin as often as is considered necessary, and diseased animals slaughtered. It is therefore possible by careful organization to carry out the testing of cattle in the most expeditious and economical manner. It is further possible to destroy all infected centres, and in this way to provide a clean area for the healthy herds.

All reasonable measures are taken to maintain such an area free from infection. Cattle coming into this area, except for transit through the area, or for immediate slaughter in the area, must first pass a tuberculin test conducted by one of the department's officers. Those for transit through the area must be unloaded for feeding purposes at special designated points, where they cannot come in contact with the area cattle, and the same conditions apply to those for immediate slaughter within the area.

An area in Manitoba comprising three townships in the Carman district is being dealt with under this plan. The first test was commenced on February 1, 1923, and a total of 16,550 cattle were submitted to tuberculin; 918 of these reacted, or 5.57 per cent, necessitating the payment of \$32,830 in compensation. All herds from which reactors had been removed were retested after a period of 60 days elapsed. There were 344 of these herds, which contained 5,990 cattle, and 97 animals reacted, or 1.6 per cent. These animals were slaughtered, the premises disinfected, and \$3,128 paid in compensation.

The second general test of all cattle in this area was completed in October last. There were 15,600 cattle in the area at this test, and 87 of these reacted, or .55 per cent, for which \$3,154 was paid in compensation.

These figures show that it is possible to eliminate the greatest number of diseased cattle at the first test, and that with the continued support of the stockmen infection will be ultimately eradicated from this area. It will, however, require the utmost vigilance and perseverance to maintain this area free from tuberculosis.

The supervised plan for the eradication of this disease is still available to stock-owners who cannot take advantage of the other policies. Under this plan no compensation is paid, but the Department places at the disposal of the owner the services and advice of its veterinary officers free of charge. Every effort is made to clean up such herds expeditiously, and in the best interests of the owner, and to maintain such herds free from tuberculosis.

More trouble has again been experienced with mange in cattle, the largest number of outbreaks occurring in the Prairie Provinces.

## SESSIONAL PAPER No. 16

Although the disease was detected in not more than 414 animals, it has been necessary to quarantine for treatment as contacts 39,234 cattle. Experience has shown that it is essential, in order to control this disease, to quarantine and treat all cattle which may have been in contact with infected herds.

Unfortunately the large majority of stock men do not thoroughly appreciate the great importance of promptly notifying the department's officers at any time they detect skin irritation in their cattle. Practically all of these cases during this period have been discovered by officers of the department, and in many instances it has been found that animals had been shipped from infected herds to other districts, and also to other provinces.

This has necessitated a great amount of investigational work, and caused un-suspecting purchasers much trouble, expense, and annoyance. It is, in view of our export trade, most important to control this disease, as if mange is found in Canadian cattle in our foreign markets, this trade will be promptly terminated. It is, therefore, highly essential that stockmen in their own interests, as well as those of our live stock in general, should notify the Department immediately they observe any symptoms of this disease in their cattle, or those of others.

All infected and contact animals have been quarantined, and are being treated under supervision as expeditiously as circumstances will permit.

Mange in horses has not at any time been prevalent in Canada, but outbreaks of this disease have not been uncommon during the past year. The majority of these outbreaks occurred in the provinces of Manitoba and Saskatchewan. A total of 61 horses were found to be actually affected, requiring the treatment of 483 contact horses in addition to the infected ones.

Sheep scab has only been detected in the provinces of Alberta and British Columbia; three outbreaks having been dealt with in the former province, and one in the latter. All infected and contact sheep, numbering 21,497 animals, have been quarantined, and are undergoing treatment under supervision.

Rabies and dourine, two very serious diseases of live stock, have not been detected in this country during the period covered by this report, while only one outbreak of Anthrax has been dealt with, and this occurred in the province of Quebec.

Careful and systematic supervision has been maintained over the stock-yards throughout this country, and they have been cleansed and disinfected, as well as all stock cars, at frequent intervals.

## PATHOLOGICAL DIVISION

This division has accomplished a vast amount of laboratory routine work and has engaged in special investigation and research to the utmost limitations of existing laboratory accommodation and equipment. Five laboratories are maintained under this division, the main one being located in Ottawa, with the Chief Pathologist in charge.

## BIOLOGICAL LABORATORY, OTTAWA

The manufacture and preparation of tuberculin, mallein, and other biological products has continued throughout the year and with an increasing demand and supply.

*Tuberculin*.—637,596 doses of tuberculin, as required for the subcutaneous, intradermal and ophthalmic tests, have been issued, being an increase of 155,494 over the previous year. This tuberculin is distributed throughout Canada for use in Government testing for tuberculosis.

15 GEORGE V, A. 1925

*Mallein*.—10,860 doses were issued for use by veterinary inspectors for the diagnosis of glanders in horses.

*Anti-abortion Vaccine*.—133 doses were issued for the experimental treatment of infectious bovine abortion.

*Disease Diagnosis and Laboratory Examinations*.—Cadavers, pathological specimens, parasites, samples of blood, serum, milk, meat, canned foods, etc., have been received from Government inspectors, practising veterinarians, farmers and live stock owners, 1,213 of such specimens have been reported on, an increase of 557 over the previous year.

*Special Investigations and Research*.—Losses, diseases and problems affecting live stock are investigated by the pathologists co-operating with veterinarians, Experimental Farm officials and the owners concerned.

*Museum Specimens*.—A collection of pathological specimens has been exhibited at various places in the provinces of Ontario and Quebec for educational and public health purposes. This exhibit has attracted much favourable comment and several requests have been received for similar sets of specimens, which, unfortunately, we are unable to meet.

#### RESEARCH STATION, HULL, QUEBEC

At this Station, continuous research on tuberculosis is carried on.

The study of immunity reactions in tuberculous animals has enabled the pathologists to set up a new method for the standardization of tuberculin, which was very urgently needed in view of the importance and wide application of tuberculin testing of cattle in the Accredited Herd Plan.

Various strains of tubercle bacilli, originating from the cattle, buffalo, swine and poultry, are maintained and the different properties and characteristics of each are under investigation.

Some preliminary experimental work has been done on tuberculosis vaccination and immunization, with encouraging results.

Improvements have been made in the test known as the "Complement Fixation Test"—a blood serum reaction which can be applied for the detection of tuberculosis infection.

Blood and milk tests of herds of cattle in which infectious bovine abortion exists have been made and recorded. It is intended to repeat these tests annually, or oftener, and to study the relationship between reacting cattle and the continuance of infection.

The Research Station, by an arrangement between my department and the Research Council, maintains an experimental "Fox Ranch" for the study of the nutritional problems of foxes in captivity.

#### VETERINARY RESEARCH STATION, LETHBRIDGE, ALTA.

A study has been made on the biology of the parasites causing sarcoptic mange in cattle.

The investigation of Swamp Fever in horses has been continued further.

Routine serological tests for Dourine have been made, all with negative results. Although this disease appears to have been completely eradicated, it is considered advisable to make occasional tests as a precaution against a possible recurrence.

One hundred and seventeen specimens have been received for laboratory examination, diagnosis and report.

A pathologist of this division attended the slaughter of surplus buffalo at Wainwright Park, which afforded an excellent opportunity for a study of pathological conditions and parasitical infestations.

## SESSIONAL PAPER No. 16

## VETERINARY RESEARCH STATION, AGASSIZ, B.C.

The results of the investigation of the disease locally known under different names, such as "Timber Paralysis of Sheep" and "Kamloops Cattle Disease" strongly indicate that the condition is caused by eating the plant "*Astragalus Campestris*".

Further experiments have been made in connection with the poisoning of stock by eating bracken.

Serological tests are made and data collected with regard to Infectious Abortion of Cattle.

The study of Red Water of cattle in British Columbia continues.

The causes of losses among live stock are investigated by the pathologist from time to time. A large number of specimens are received for diagnosis and report. Piroplasmosis was detected in Indian deer imported from the Orient and held in quarantine at Vancouver.

## FOX RESEARCH STATION, CHARLOTTETOWN, P.E.I.

One of the chief problems in raising foxes in captivity is parasitical infestation. A collection and study of the various parasites affecting these animals has been made and many experiments undertaken on methods of prevention and treatment. Very good results have been obtained where the methods advised have been applied.

Other pathological conditions affecting foxes, particularly distemper, nutritional disorders and the causes of premature birth, have received attention.

Five hundred and thirty-three specimens have been sent to the laboratory for diagnosis and laboratory report, many of these specimens being carcasses of foxes dying from unknown causes.

## PUBLICATIONS, MEETINGS, ETC.

Members of the staff of the Pathological Division have contributed many articles to the agricultural press, fox farming magazines and scientific journals, and have distributed in this way much valuable information. Papers have been read and addresses given at various meetings throughout the country.

## MEAT AND CANNED FOODS DIVISION

During the year just closed, a larger volume of work was carried on by the officers of this division due, in most part, to a substantial increase in the number of meat food animals sent forward to the inspected establishments for slaughter. This increase was made up through a steady forwarding to the market rather than by a sudden rush in the fall, as has been too often the case in the past. This condition was, no doubt, influenced by the fine weather and good pasture during the late months, together with an abundant supply of winter feed and grain. The increase was principally in hogs, which show approximately 420,000 over the year previous. Cattle and sheep show a combined decrease of approximately 150,000.

The prices paid to the producers have not been as remunerative as desired due to the slow demand in our foreign markets. Canadian bacon in England has begun to re-establish itself, and larger quantities of select bacon have been sent forward.

Very close examinations have been given during slaughter and cure, and the inspectors have been in a position, at all times, to guarantee absolutely the wholesomeness and freedom from disease of all meats and meat food products emanating from establishments operating under the provisions of the Meat and

Canned Foods Act and Regulations. Sanitary conditions of a high order in these plants have been maintained. Structural changes, additions and new modern equipment have been supplied whenever required, with the result that these plants will compare favourably with the plants engaged in similar work in other countries.

Some new establishments were placed under inspection during the year, and by the enquiries being made regarding inspection and export trade, it is safe to presume that more will be operating under the Act during the coming year.

The people are slowly awakening to the question of public health and are beginning to pay special attention to their food supply. They have learned that no matter how anxious they may be, they are not able to protect themselves, and depend more and more upon public officials to safeguard the healthfulness of the foods consumed by themselves and those dependent upon them. This is showing itself in the increased demand in Canada for Government Inspected meats. This is also the first requisite from our foreign customers. Our complete system of inspection and the final certification are such that their exacting demands are fully met. It is felt that during the coming year we may look forward with confidence to an increased activity in the inspected slaughtering establishments, as it would appear that there is an increased production of meat food animals, which is essential to the development of agriculture in Canada.

Full and complete statistics covering the work will be published later in the report of the Veterinary Director General. These figures will show no great change from those issued in previous years, other than the increase previously mentioned. Tuberculosis and injuries such as bruises, cripples, etc., account for the greater amount of condemnations and loss. With reference to the former, it is confidently expected that this will decrease as the present policy of control and eradication is extended. As to the latter, it could be immediately reduced, if those entrusted with the handling and shipping of live stock from the time they leave the farm until they reach the slaughter house, were alive to their responsibility and possessed even normal intelligence regarding the care which should be given dumb animals.

The establishments engaged in canning fruits and vegetables had a fairly successful year. In some few of the products, there was a light run. On the whole however, there was an average pack. Prices for the finished articles were well maintained. This with a considerable export trade has resulted in a brisk movement of this class of foods, which has enabled the manufacturer practically to empty his plants. This condition should stimulate increased activity during the coming year. If we are favoured with a good season for growing this class of foods, the canners will undoubtedly be ready to take care of all that is offered. The sanitary conditions of the plants were kept up to a satisfactory standard. New equipment is being constantly added and with a continuance of the present co-operation, this phase of the work will steadily improve with the result that producer, manufacturer, and consumer will benefit to the extent, that it will become a very safe stable industry, from which the pessimism and uncertainty of the past will have entirely disappeared.

Material progress has been made in the quality of the products prepared. The different processors are lending themselves to a more thorough understanding and observance of the standards. The only formation upon which this industry can be built is to meet foreign competition, and establish itself at home or abroad. Every assistance is being given in interpreting these requirements, so that there may be uniformity in their methods of application

## SESSIONAL PAPER No. 16

in order that the declaration of quality on these products carries the same meaning and guarantee, irrespective of geographical location or the individual establishment in which they were manufactured.

The activity in the evaporating of fruits was sectional. Many of these plants in Ontario did not operate during the past year, owing to a short apple crop and an uncertainty of the export market, while those in the Annapolis Valley in Nova Scotia ran longer than usual and were fortunate in being able to market their products on a rising market, which developed as the season advanced. Improvement in the control of sanitation, equipment and construction of these plants has been, if anything, more noticeable than in any of those under the control of the department. The products also show an equal advance, yet it would appear that as the new process of dehydration is developed and perfected, it will displace many of the older methods of preparation such as evaporating and sun drying, as the finished product obtained by dehydration is of exceptionally fine appearance and at once appeals to the housewife as a clean, wholesome and convenient food.

A splendid export trade is being developed in condensed, evaporated and dried milks. Our manufacturers have been able to meet readily the conditions imposed by our foreign customers and are manufacturing a really high class food. No criticism can be made as to plant equipment or cleanliness, as they are managed to meet the most exacting requirements.

## LIVE STOCK BRANCH

## HORSE DIVISION

The fiscal year of 1923-24 showed considerable improvement in the horse breeding industry. The demand for big drafters at good prices, for city work continued. Bush horses, during the lumber season were also in greater demand than for some years past. Farm horses sold steadily throughout the year, particularly in Eastern Canada. A few years ago thousands of horses were shipped to the western provinces annually. Now the tide has turned and some ten thousand western horses found a market last year in Ontario, Quebec, and the Maritime Provinces. The starting of this movement to ship horses eastward has been credited, and rightly so, to officers of the Horse Division, of the Live Stock Branch.

There is another class of horse for which there is a steadily growing market both in Canada and the United States; that is for a horse that can be used for riding and hunting purposes. There are at the present time some sixty-five hunt clubs in Canada and the United States, while the cities, and even small towns have riding clubs; in fact in some of the larger cities there are as many as eight or ten clubs with hundreds of members. Canadian bred saddlers and hunters have always found favour south of the line, and never more so than at the present time. Good green saddlers and hunters are picked up wherever they can be secured, the trouble at the present time being that the demand far exceeds the supply. The kind most sought after are the big strong horses of type and quality up to carrying heavy weight. Such horses are also suitable for delivery, fire, police and remount work. They also make excellent farm horses. Canadian polo ponies, particularly those bred in the Calgary country are also finding a good market at remunerative prices.

The outlook for horse breeding has improved greatly during the past year, particularly in the western provinces. Economic conditions are really forcing people to use the cheapest form of power, whether it be on the farm, in the

lumber woods, or in the city, and this is supplied by horses. Hence it is, that the horse men are again taking up breeding seriously, knowing that there is bound to be a steadily increasing demand particularly as the country returns to normal conditions.

There are three types of horse which are finding a ready market; big drafters, weighing at least seventeen or eighteen hundred pounds and upwards; clean legged delivery and express horses, weighing from thirteen to fourteen hundred pounds, that can step along at a fair gait and good saddlers and hunters of which there is a decided shortage. Depending on conditions, these are the three types that should be bred at the present time.

#### CLUBS

There was a fair increase in the number of clubs operating under the Federal Assistance Policy in 1923 and much more interest was displayed in the horse industry during the year particularly in the western provinces. The policy of making grants to clubs that hire approved stallions has now been in existence for nine years and has done much to encourage our breeders to carry on even under unfavourable circumstances. During the war years when the prices of all other classes of live stock doubled and trebled, the prices of horses were practically cut in two. In fact, it would scarcely be said for a few years that there was a market. To this might be added the use of trucks and tractors, which, for the time being, replaced to a considerable extent horses, not only in the cities, but on the farms. Under the changed economic conditions of the last two or three years horses are steadily but surely coming back and the demand to-day is greater than it has been for a number of years. Knowing that with the return to normal conditions, horses will be again in keen demand, the wide awake horsemen are raising colts for the coming market and the club system is particularly popular in the western provinces. This policy, which has been commended both by Canadian breeders and foreign horsemen, is undoubtedly the only one of its kind in existence at the present time, whereby the owners of mares as well as the proprietors of good stallions are protected. The former are enabled to secure the services of first class horses at a very nominal fee, while the latter are assured by contract of a certain definite sum for the year's work. Thus, private individuals are able to keep good stallions without loss to themselves, while community breeding, better feeding, and up-to-date care and management are encouraged amongst the mare owners.

There is another phase of this question which is quite evident, namely, that members of clubs use only their good, sound, young mares for breeding purposes and take better care of them. On the other hand, the stallion owner being guaranteed a definite number of mares for the season is able to spread the season's work over the whole period and thus not over breed his horse during any week. The use of better mares, together with a sane system of mating, care and management, is leaving a higher percentage of good sound, strong, healthy colts, than was ever possible under the ordinary system.

The organization of communities for the purpose of hiring the best stallions available is helpful in many ways. In the first place, there is the fostering of the community spirit of working together and of helping one another. Secondly, under club organization, it is possible to hold colt shows, horse sales and engage in other work for the promotion of the horse industry. The club system has also created a healthy rivalry between districts, in that each club is anxious to secure the best stallion possible and thus a premium is set on the good horses. The use of good stallions of the same breed for a number of years results in the rapid grading up of the horses of the district, which in turn advertises the community and attracts outside buyers.

## SESSIONAL PAPER No. 16

Another point which cannot be too strongly emphasized in connection with the club scheme is the fact that all stallions hired by clubs must pass a rigid inspection by an experienced officer of the Live Stock Branch. Accordingly, only sound, individually excellent animals that possess size and the characteristics of the breed are allowed to stand for service in a club. In this way the breeder, whether he be a capable horse judge or not is given double protection when he uses a club horse. The Live Stock Branch has steadily and persistently eliminated the stallions that were not up to a high standard. In fact, a few years ago, as high as twenty per cent of the horses hired by clubs were rejected after inspection. During the last couple of years, however, not over three per cent have been refused on account of being unsound, or otherwise not up to the standard required. In this way, club members are being educated, as naturally when a stallion is thrown out by inspection, it leads the club members to inquire the cause.

By steadily raising the standard and by eliminating all the unsound horses as well as undersized stallions that while sound possess such bad conformation that they should not be used for service, good results are slowly but nevertheless surely being produced. Stallion owners to-day do not hesitate to say that only the good ones are wanted. Accordingly, importers when buying have ever before them the fact that in order to sell they must import only the good ones.

## BREEDING STATIONS

The first Breeding Station was started in 1921 with the idea of seeing what might be done in the production of saddlers and hunters, delivery, and remount horses. Some investigation has shown that there was a demand for horses of this type. This demand has steadily grown and to-day it is impossible to supply the number wanted, owing to the shortage of this type of horse.

At the present time, four Stations are in operation: one at Reddick Lake, Que.; a second at Chaffey's Locks, Ont.; a third at Millarville, Alberta, and a fourth at Ailsa Craig, Ont. At each of these Stations, three approved Thoroughbred stallions stood for service last year. In each case the stallions were well patronized; two of the stallions served in the neighbourhood of one hundred mares each, while the lowest number served by any one of the twelve horses was sixty.

The steady demand for saddlers and hunters, both from our Canadian cities and from the United States has done much to revive the interest in this class of horse and to make it profitable as well. The stallions used at the various stations are good specimens of the Thoroughbred and suitable for producing high class saddlers and hunter and other useful horses of that type. As an instance of the effect of Thoroughbred blood in grading up with the ordinary mares of the country, the following may be cited: One of the stallions at Chaffey's Locks, that had been imported from Britain the year before, was bred to sixty mares and left thirty-five colts. The officer who inspected them reported that they were the most uniform lot that it had ever been his pleasure to look over. They showed very strongly the characteristics of the sire and looked as if they had at least two crosses of Thoroughbred blood in their veins. The similarity of type between colts sired by the various horses and also the marked characteristics of the Thoroughbred are readily noticeable and has been frequently remarked upon in the various districts, where these stations are located.

Last year, colt shows in connection with the stations were held at Reddick Lake, Chaffey's Locks and Millarville. In each case there was a splendid exhibit brought out which aroused the keenest competition amongst the exhibitors. In each case the countryside attended the show. In one place the

attendance was over 2,000 although it was held miles from even a village. The holding of these shows is doing two things: on the one hand, it is educating breeders in the feeding, care and management of their colts, as well as making them judges of the type of horse they are raising; on the other hand, it is advertising the district as a breeding centre and drawing outside buyers who are ready to pick up good prospects at fair prices. In one district at least all saleable animals have been picked up and many more could have been sold if they had been available.

#### SILVER BLACK FOXES

The Silver Black Fox industry of Canada had, all things considered, a very successful year. It is true, that owing to the exceedingly heavy snow fall in the Maritime Provinces, the conditions for mating and the raising of foxes, was anything but favourable; nevertheless, the final results showed a fair pup crop, and an improved market. From Prince Edward Island alone, approximately 4,000 live foxes were shipped, of which over 3,400 were exported. The pelt market, although somewhat slow in the early part of the fur season, picked up wonderfully around the beginning of the new year, and later fur sales showed an improvement of fifty per cent in price for the better class of pelts. This revival of the pelt industry has also had a beneficial influence on the live fox trade and present conditions point to even better things for the coming year.

During the inspection season, which began about the middle of September and ended the middle of January, in the neighbourhood of 10,000 foxes were inspected, tattooed in the ears for identification and duly registered in the office of the Canadian National Live Stock Records. This brings the number of registered foxes, to date, to over 20,000, and preparations are being made for the inspection of even a larger number during the coming year. The inspection of foxes and their registration by the Canadian National Records, is having a very beneficial effect. The fact that beginners, by buying recorded foxes, are assured of getting animals of fair quality, and that have been bred true to type for a number of generations, has done much to stabilize the industry and put it upon a sound financial basis.

During the year inquiries have been received from many sections of Canada and various parts of the United States asking as to the future of the silver fox industry. In reply it has been pointed out that there is not only a steady but increasing demand for furs, but on the other hand the supply from the wilds, particularly of the higher priced furs, is diminishing, hence as the years go by there must needs be a steady growth of the raising of these fur bearing animals in captivity. The silver fox pelt has long been known as the "Golden Pelt of the Fur Industry," in that it is the highest priced fur on the market, and as it cannot be successfully imitated, it is bound to continue to hold the premier place, and to be worn by the people who can best afford to pay the high prices which it has always commanded.

#### FUR FARMING

The raising of various kinds of fur bearing animals in captivity, although carried on by a few individuals for a number of years is still in more or less of an experimental stage. At the present time there are some thirty mink, seventeen raccoon, twelve skunk and eight muskrat ranches in various parts of Canada. Beaver, marten, fisher and rabbits are also being raised by a few people in different parts of the country. It is too early to predict what will be the final outcome of fur farming, but judging by the large number of inquiries received during the past year, it is evident that it is attracting a very considerable amount of attention at the present time. One thing certain, however, is that furs are steadily growing in popularity, not only for the warmth they supply during the

## SESSIONAL PAPER No. 16

cold winter months, but also for summer wear. As the number of some of the higher priced animals at least, is evidently decreasing in the wilds, it is reasonable to assume that the raising of them in captivity will be profitable and as time goes on will be engaged in more and more, particularly as the Canadian climate is suitable and there is much land well adapted to fur raising.

## CATTLE DIVISION

## ENCOURAGEMENT OF WINTER FEEDING

During the past two years, the Live Stock Branch has been steadily promoting increased winter feeding of beef cattle and has been working out a programme designed to give greater permanence and stability to this phase of the cattle industry.

The policy of the branch in this respect is based on the principle that a relatively low initial cost of feeder cattle is an essential factor in making this business a profitable one. For many years, winter feeding of cattle has been carried on more or less extensively in several counties in western Ontario, and the system of farming followed in that part of the province lends itself to this practice. Under existing conditions as regards land values and general overhead expenses, however, feeder cattle cannot be raised at a low cost in the majority of these districts. In the grain growing areas in Western Canada, an immense quantity of feed is available annually, much of which is practically valueless unless fed to cattle. Here again, feeder cattle cannot be raised at a low cost and as is the case in Western Ontario, finishing of cattle on an increased scale can be developed only by providing a steady and adequate supply of well bred feeder cattle which have been produced at a minimum cost.

It is an accepted fact that range areas are the logical breeding ground for the production of feeder cattle under low overhead cost. It is also well known that none of our commercial cattle are better bred than those which come from the range, which for years have consistently used only pure bred bulls. It is essential, therefore, that the remnant of our ranching industry should be safeguarded, extended and moulded so as to make it a permanent and dependable source of supply for high grade young feeder cattle to be finished in grain growing districts in Western Canada and in feeding areas in Ontario. The branch is doing everything possible to impress the importance of this question upon the public mind.

The development of such a policy will naturally involve considerable change in practice on the part of many ranchers. Instead of carrying their steers until three or four years of age and selling them off the grass as over-weight and frequently only half-finished beef at a period of the year when the market is usually at its lowest point, it will be necessary for them to feed their calves during the first and possibly their second winters and put them on the market as yearlings or two year olds. Under favourable conditions, an expanding demand for range bred calves may even be developed, thereby facilitating an annual turnover.

During the past year, this policy has been widely discussed with ranchers in both Alberta and Saskatchewan by officers of the Branch and has received very general acceptance even by old timers in the business. The waste of good material in the present ranching practice is fully realized by ranchmen, and if a profitable outlet for young range steers can be developed, they have expressed themselves as fully prepared to remodel their business in order to take advantage of it.

The proposal has an additional appeal to ranchers in that the elimination of three and four year old steers from the range will make possible a gradual increase of the stock. This will naturally result in an increase in the annual output as regards numbers from each herd and on the basis of prices received during recent years for grass finished range cattle, should also result in increased annual net profits.

A preliminary step in making this policy effective was taken in 1923 in organizing and supporting feeder shows and sales at Calgary, Moose Jaw and Winnipeg. Approximately 90 per cent of the cattle which were entered in these events were range bred steers. Practically all of these cattle had been dehorned as calves and this fact, combined with their uniformity, breediness and general evidence of quality and thriftiness, made them very attractive to buyers.

#### BULL LOANING POLICY

Under this policy which was inaugurated in 1913 the Live Stock Branch has purchased and loaned over 4,000 bulls to farmers' associations in different parts of the country where pure-bred sires would not otherwise have been available.

The majority of the bulls loaned have given a good account of themselves and have not only effected a marked improvement in the quality of the cattle in the districts in which they have stood but have also impressed many farmers with the value of improved blood to the extent of inducing them to purchase pure-bred sires for their own use.

In purchasing bulls the aim has been to encourage the breeders who are producing worth while commercial bulls and for this reason the majority of the bulls secured in recent years have been bought at large consignment sales where support could be given to a maximum degree and in a public way to the better class of bulls offered.

The bulls owned by the branch are retained in service as long as they continue to give satisfaction. Discarded bulls are sold for beef and the proceeds from the sale of such bulls has returned a large percentage of the amount originally invested in them.

#### SIRE PURCHASE POLICY

In the spring of 1921 the branch inaugurated the above policy with a view to encouraging a more extensive use of properly selected sires and of providing an agency through which farmers could secure such sires with the least possible expense and difficulty.

Under the terms of this policy the branch is prepared to fill orders for bulls, boars and rams under certain conditions. An applicant is required to deposit a percentage of the purchase price with his order. The sire when secured is shipped to him on approval. If no complaint regarding the animal is made within three days after delivery the balance of the purchase price becomes due.

A considerable number of bulls have been purchased under the terms of this policy for farmers who are not in touch with breeders and who are so situated that they could not start out to purchase for themselves without running up travelling expense bills out of proportion to the amount of the investment involved. The general terms of the policy have also been used to good advantage in handling bulls through exchange stables in Ontario and in purchasing bulls for the live stock improvement trains which operated in Manitoba in 1922 and 1923 and in Ontario in 1923. In the latter cases the bulls were not purchased on order but were bought outright and exposed for sale at the original cost price plus freight and maintenance charges. Any bulls which

## SESSIONAL PAPER No. 16

were not resold were utilized in connection with the Loaning Policy. In the past three years upwards of 350 bulls have been sold to farmers under the terms of this policy.

## SCRUB BULL CAMPAIGN IN ONTARIO

For three seasons the branch has co-operated with the Ontario Department of Agriculture and the Ontario Live Stock Improvement Committee in eradicating the scrub bull from a number of selected counties throughout the province. An officer of the branch has devoted practically all his time to this work and has assisted agricultural representatives in several counties in the organization and carrying on of their campaigns.

In the spring of 1923 the Live Stock Improvement Committee arranged with the Railway Companies for the running of a better live stock train throughout the province. This train commenced its itinerary on March 1 and in the course of the next two months covered the greater part of the province. A number of carefully selected bulls were offered for sale from this train and in all twenty-seven head were disposed of. These bulls were purchased in advance by the branch and any that were left on hand at the end of the trip were used in connection with the Bull Loaning Policy.

A grant of \$2,500 was again made to the Improvement Committee for advertising purposes which amount was supplemented by an equivalent amount by the provincial department.

## CAR LOT POLICY

Under this policy the Live Stock Branch pays reasonable travelling expenses of farmers residing in Canada who purchase stock at central stockyards to be returned to country points. In Eastern Canada the assistance rendered is confined to purchases of female breeding stock, cattle, sheep or hogs. In Western Canada the policy covers stocker and feeder cattle in addition to breeding stock. Purchasers have to fulfil certain requirements of the department in connection with their shipments and to give satisfactory assurance that none of the stock is being purchased for speculative purposes.

The cost to the department of all cattle shipped under the terms of this policy during the period of three years averaged 59 cents per head. The average cost of all sheep shipped during the same period was slightly over 18 cents per head.

This policy has proven very valuable as an educational agency in that its terms have encouraged farmers from different parts of the country to visit stockyards and to become acquainted with methods of doing business at these points and has unquestionably played a very important part in encouraging the return of unfinished cattle and sheep to country points for further feeding and also in the return of young female breeding stock, particularly from yards in Western Canada.

## CAR LOT SHIPMENTS TO DECEMBER 31, 1923

Year	Steers	Heifers	Sheep
1916 (3 months).....	6,208	3,113	1,407
1917.....	11,334	10,411	1,800
1918.....	20,703	18,745	7,978
1919.....	22,490	17,550	9,408
1920.....	14,009	7,957	6,317
1921.....	8,599	7,659	9,968
1922.....	5,681	4,897	3,121
1923.....	9,970	6,538	6,602
Total.....	98,994	76,870	46,601

## FREE FREIGHT POLICY

In co-operation with the Railway Companies of Canada the Live Stock Branch inaugurated the Free Freight Policy in the fall of 1917. the aim being to prevent as far as possible the slaughter or exportation of useful heifers, young ewes and young sows offered for sale on the open market at central stockyards. Under this policy the Live Stock Branch pays 75 per cent of the freight charges on such shipments, the remaining 25 per cent being rebated by the railway companies.

During the time the policy has been in operation shipments under its terms from the different yards up to December 31, 1923, number as follows:—

Name of Yard	Heifers	Ewes	Sows
Edmonton.....	27,356	10,295	156
Calgary.....	38,401	56,484	207
Winnipeg.....	27,822	11,644	459
Prince Albert.....	185	160	40
Moose Jaw.....	558	1,030	.....
Toronto.....	2,850	19,484	.....
Montreal.....	193	452	11
Total.....	97,365	99,549	873

Shipments for the twelve months ending December 31, 1923, were: 8,666 heifers, 16,127 ewes, and 200 sows.

## BOYS' BREEDING CLUB POLICY

The policy has been in operation for only two seasons but the constructive work already accomplished under its terms has been the subject of much favourable comment, particularly in Quebec and the Maritime Provinces. It has stimulated an interest on the part of farm boys in breeding, feeding and showing good cattle. The competitive feature introduced has encouraged the proper development of the calves and the keeping of exact records of the cost of production of the original heifers supplied. Incidentally the boys have been given a great deal of training in live stock judging and have learned the importance of maintaining the proper balance between individuality and production capacity in appraising breeding stock. The clubs already established are gradually developing into small breeding centres and are the means of promoting the principle of community breeding.

## GET OF BULL COMPETITIONS

Under this policy which was inaugurated in the spring of 1923 the branch has assisted a limited number of agricultural societies in financing special classes at their exhibitions based on a unit of free yearling progeny of one pure-bred bull. The branch has paid 50 per cent of the prize money awarded in the competitions, the remainder of the money being raised by the society. The number of competitions assisted during the past year was definitely limited in advance and it was also specified that the grant from the Branch to any competition would in no case exceed \$100. The object of these competitions is to advertise good sires in the district and to encourage the proper development of their progeny. It has not been required, therefore, that all the animals entered under one group should belong to one owner. The policy is being used to good effect in encouraging members of associations to which bulls have been loaned by the Branch to give more care to their young stock and to bring them out as a demonstration as to what improved blood means to a district.

## RECORD OF PERFORMANCE

Although some breeders were of the opinion that the regulations which became effective April 1, 1923, would very considerably reduce the number of places where testing was being carried on, the Record of Performance has during the past year continued to increase both in number of farms to be visited and in the number of cows under test per farm. A few breeders have, however, withdrawn their herds owing to their disinclination to comply with the following new regulation which eliminates the possibility of testing only one or two outstanding cows in a herd:—

"Every owner making application for entry of a cow must agree to enter in the test all normal, untested, milking, pure bred cows in his herd which freshen during the period that such cow is under test. The acceptance of an application for the entry of a cow will not bind the Department to continue the supervision of the test in the event of a change of ownership unless the new owner complies with the above requirement. (In the case of Shorthorn and Red Polled breeds 'milking' in the above clause will be interpreted as meaning 'hand or machine milked'.)"

At the present time there are upwards of seventy more farms being visited by our inspectors than at the same date last year, an increase of ten per cent. During the past eight months the number of cows under test has increased thirteen per cent.

Following is a brief summary of the year's work:—

## NUMBER OF COWS ENTERED FOR THE TEST

Ayrshire.....	1,281
Brown Swiss.....	12
French Canadian.....	128
Guernsey.....	131
Holstein-Friesian.....	1,685
Jersey.....	1,055
Red Poll.....	38
Shorthorn.....	405

Shorthorn.....	860	22
Totals.....	9,812	404

## POULTRY DIVISION

Notwithstanding the somewhat lower level of prices for poultry products in 1923 as compared with 1922, it is noteworthy the frequent expression that is heard on the part of the farming public in many parts of the country that the poultry is one of the most profitable lines of activity which they have on the farm. This condition is most evident in the increasing number of requests received for information in reference to poultry, the number of people who are contemplating specializing in poultry-keeping as a business, and the general desire for most up-to-date information apparent at all points where poultry meetings are held.

Possibly one of the most significant things that has occurred in a poultry way in Canada was the holding in Ottawa in August last of the annual convention of the American Association of Poultry Instructors and Investigators. Not only was there a wide representation from the faculties of the different United States Agricultural Colleges and Experiment Stations, but also several of the most prominent men in poultry work in Great Britain, among them being the British Poultry Commissioner, Mr. Francis, and the President of the International Association of Instructors and Investigators in Poultry Husbandry, Mr. Edward Brown, F.L.S. While no attempt was made to enlarge unduly upon Canadian policies for the advancement of the poultry industry, yet it was very evident that not only representatives from the United States but more particularly from Great Britain were very much impressed with the nature and scope of the policies evolved by Canada, particular mention being made of the standardization of eggs, and the Record of Performance for Poultry, two developments in which Canada stands pre-eminent and alone among the nations of the world.

## ADMINISTRATION AND ENFORCEMENT OF THE EGG REGULATIONS

The feature of principal interest during the year in connection with the egg regulations was the introduction of amendments covering domestic trading, provided for under the revision of the "Live Stock and Live Stocks Products Act" at the last session of the House. These amendments simply gave effect to the principle which has already been in vogue as covering export and inter-provincial shipments for a period of five years with provisions whereby the utility of grading would be more apparent to both producer and consumer.

Following the date of becoming effective in July last, the first two months or more were devoted almost entirely to the explanation of these regulations, first in meetings arranged by country shippers in different parts of the country and, later, by detailed inspection work and explanation among retailers in the larger centres.

There is no one among consumers but who desires a prime quality egg. The whole policy underlying these regulations is to devise some way whereby the consumer may have an opportunity to express his preference for quality through the medium of standardized legal grades, the intention with regard to legislation being simply to provide that minimum of legislation necessary to make these grades effective.

From the producers' standpoint, the object has been to introduce a system of trading whereby the benefit of the consumers' preference for quality may find its way back to the producers through the medium of a price differential.

For years Canadian farmers had been losing annually a large sum of money through the marketing of large numbers of bad eggs and eggs of inferior quality. This loss was not only the loss from eggs unfit for food but the condition apparent had a decidedly adverse effect on consumption. The condition of marketing was largely the result of the "flat rate" or "case count system"

## SESSIONAL PAPER No. 16

of purchasing whereby eggs were bought by number without regard to quality. The "case count system", where practiced, not only proves decidedly unfair to the farmers and other producers who have taken pains to market good, clean, fresh eggs, but in reality in many instances through placing no premium whatever on good eggs actually formed an incentive to the continuance of careless and dilatory methods not only in the gathering and marketing of eggs on the farm but in the holding and general care of eggs by country merchants and other first receivers.

Some producers argue that the "case count system" of purchase is advantageous to themselves in that they receive the same price for eggs sometimes known to be of inferior quality as they do for eggs of good quality, to say nothing of those that are bad and unfit for food. In this, however, they are mistaken, for the wholesale dealers and others who purchase the eggs know very well what the loss of shrinkage is in eggs at certain seasons, and in order to safeguard themselves, simply set the price for all eggs at a safe level to themselves.

No more significant statement with respect to the utility of these regulations has come to the Department's attention than the remark of one egg merchant from western Ontario at the recent convention of wholesale egg merchants held in Montreal. Some criticism of the regulations was being made by certain members of the wholesale trade, this criticism very largely turning on the requirement for a graded return to the producer. The egg merchant in question rose in his place and stated that no matter what the Government or the wholesale trade might do with regard to requirement for a graded return, he would have to continue the system in his district for the simple reason that the producers who supplied him with eggs had come to realize the advantage to themselves of payment on grade; that they themselves are making closer and closer selections from their own eggs, keeping those of questionable quality, small, and dirty, at home, marketing only the best, and that he was satisfied that if he were to stop, the people of his district would take the matter into their own hands, organize egg circles, and carry on on the graded basis.

One object of the broad policy for egg trade improvement, of which the regulations form a part, is increased consumption of eggs. Canada's home market for eggs is her largest market, and while every effort is being made to extend the export outlet for eggs, yet the home market has long been more or less overlooked. While it may be too early as yet to draw any final conclusions from the operation of this policy, particularly since the regulations affecting domestic trading went into effect, the indications are that during the last six months of 1923 egg consumption per capita in Canada reached the highest point yet attained. No doubt the lessened cost to consumers has been a large contributing factor, but cost alone will not suffice to promote the consumption of an article if the quality is not good. There is no doubt that since the regulations became effective egg handlers generally throughout Canada have paid more attention not only to quality but to the despatch and general efficiency with which the eggs have been handled from producer to consumer.

In addition to domestic trading, the egg regulations also provide for inspection by approval at point of shipment, of export shipments in lots of 25 cases or more; interprovincial shipments in lots of 100 cases or more; and all eggs imported into Canada for domestic consumption. In addition, on request in which inspectors are located, certain number of inspections are made on local shipments, that is, shipments going from one point to another point within the same province. The total number inspections for which certificates were issued in the calendar year 1923 was 1,528 as against 1,063 in 1922. During 1923, 104 inspections were made in which the shipments were not approved for ship-

15 GEORGE V, A. 1925

ment as against 83 in 1922. 1,230 inspections of eggs imported for domestic consumption covering 218,148 cases were made during 1923. Of the 440 cars, (197,093 cases) of eggs originating in the Prairie Provinces and British Columbia for eastern shipment 24,964 cases equalling 56 cars had their origin and were inspected in British Columbia; 54,609 cases equalling 121 cars had their origin in Alberta; 46,560 cases equalling 105 cars in Saskatchewan; and 70,960 cases equalling 158 cars in Manitoba.

During the six months ending December 31, 1923, since the regulations covering domestic trading became effective, upwards of 15,000 inspections and visits to retailers have been made. In all, eight prosecutions were undertaken during the calendar year, a favorable judgment being obtained in each case.

#### EGG AND POULTRY MARKETS INTELLIGENCE

An increase in the interest on the part of producers and shippers in the markets intelligence distributed has been noted during the past year. Requests for market reports are being received continually. Practically no change has been made during the past year in the system of distributing these reports. The two chief mediums of distribution are the weekly egg and poultry markets report which is distributed to all parts of Canada by mail and the daily reports distributed through the medium of the Canadian press. In addition a daily report is issued by mail to points that can be reached over night. The cost of all this service is extremely small and particularly so when considered from the standpoint of the benefit derived from the reports by those receiving them.

Many business houses and co-operative concerns rely almost entirely upon this service for special daily and weekly reports. During busy seasons 'collect' messages by wire are sent to many shippers in different parts of Canada. Previous to this year this service was confined chiefly to eggs, but with the growing importance of the West as a producer of live and dressed poultry it has been necessary to extend the service to cover poultry. In this connection it was found necessary during November and December of last year to secure special reports on the poultry markets at Boston, New York and Buffalo in order that the necessary information might be sent to those making requests for it. There is no doubt that the securing of this information made for very much better prices and more intelligent marketing by those shipping poultry particularly from Western Canada.

Cable information received from Great Britain each week has been of considerable service to exporters, and this service is now being augmented by a cable report sent from Ottawa to the British press through Reuters Limited.

#### CO-OPERATIVE MARKETING AND POULTRY PROMOTION

While progress in the development of co-operative marketing of eggs and poultry was comparatively slow during the recent years of high prices, it has remained for the somewhat adverse prices of 1923 really to establish the utility of co-operative marketing, particularly to those producers less favourably situated from the standpoint of markets.

The result is that co-operative marketing of eggs and poultry is being taken up and discussed in a large, constructive way throughout Canada, and the results are already outstanding and evident in a great many provinces.

In British Columbia the membership of the British Columbia Poultrymen's Co-operative Exchange increased from 610 members on December 31, 1922, to 1,032 on December 31, 1923, an increase of 422 members. During the year the quantity handled was 2,159,610 dozen eggs as against 1,250,000 in 1922.

## SESSIONAL PAPER No. 16

In Alberta as a direct result of the activities of the Egg and Poultry Marketing Service and the field work performed by officers of the Live Stock Branch, the matter of an Egg and Poultry Pool, similar in form to the Wheat Pool, has been very much to the fore since the close of the egg and poultry shipping season, with the result that twelve representative men have been appointed to organize and lay the plans for the operation of an extensive egg and poultry pool on a contract basis for the coming year in Alberta.

In Saskatchewan and Manitoba, while the Saskatchewan Co-operative Creameries have during the past year operated a small pool in eggs, the most active attention has been paid to the co-operative marketing of poultry, more particularly turkeys.

In Ontario the most outstanding development has been in the instance of the Oxford County Co-operative. For several years a number of individual circles have been operating on an independent basis in Oxford County. Last year, encouraged by federal and provincial officers, several of them decided to amalgamate and opened up a central candling and grading station in Woodstock. One outstanding feature of their success was their winning of premier honours for Colonial eggs at the London Dairy Show in October last.

The success attained by the Oxford County Co-operative has attracted the attention of many other districts in Ontario and was the contributing factor which led to the lengthy discussion of co-operative marketing of eggs in the United Farm Women's Convention held in Toronto in December, the result of which has been the action of the United Farmers' Co-operative Company in Ontario definitely committing themselves to the operation of an egg pool in 1924.

In Quebec the Société Co-opérative Fédérée has continued its egg and poultry operation and has become one of the largest, if not the largest, handlers of live poultry in the city of Montreal, handling not only carlots originating in Quebec, but from the western provinces as well.

In Nova Scotia and New Brunswick co-operative activities develop slowly, although very satisfactory results were obtained from the co-operative marketing of their poultry last fall. New Brunswick obtained possibly the highest price for poultry shipped, in the Dominion.

In Prince Edward Island the P.E.I. Co-operative Egg and Poultry Association has largely recovered from the reduction in membership subsequent to the failure of Canadian Farm Products and the liabilities which individuals who were members of both associations were obliged to meet, the quantity of eggs handled by the P.E.I. Co-operative during 1923 being well in advance of the three-quarter million mark.

## CARLOT MOVEMENT OF LIVE POULTRY

During 1923 the carlot movement of live poultry was greatly facilitated by the equipment by the Canadian railways of a number of live poultry cars. Heretofore it had been necessary to bring in special live poultry transit cars from the United States for practically every shipment that was made. The availability of Canadian-owned equipment has done much to stimulate this trade, the cars being built at the representations of officers of the Live Stock Branch.

The development of live poultry shipments has been most marked in the province of Alberta, where not only co-operative enterprise but also private enterprise has taken up the movement of poultry by freight. Previously, practically all live poultry was moved by express, but with lower prices and increasing rates, together with the shrinkage in transit, shippers were literally forced to adopt some other method of transportation.

The peculiar advantage of carlot movement by freight, to producers, is that payment is made at point of shipment and the grading is done at the car door, in the presence of shipper, whereas by express the payment was nearly all on a delivered basis and the express and shrinkage were deducted by the receiver.

#### RECORD OF PERFORMANCE FOR POULTRY

This policy has to do with the inspection of trap-nested flocks of pure-bred poultry on breeders' own plants and the subsequent certification of the production recorded. The policy has been in effect since the fall of 1919. The record year commences in the fall, entries being received from August until December.

The most striking feature during the past year was the increase in the number of breeders entered, 175 entries being received for the record year 1922-23 as compared with 122 the previous year.

One hundred and fifty eggs is the number of eggs required for a bird to qualify for Record of Performance certificate; 225 eggs for an Advanced certificate; providing each individual bird has laid during an inspection an egg weighing 2 ounces or over.

At the annual convention of the American Association of Instructors and Investigators of Poultry Husbandry held in Ottawa in August, 1923, the Canadian policy of Record of Performance for Poultry was most strongly endorsed. Several of the foremost poultry authorities in the United States and England were present and during the convention spent considerable time in thoroughly going into all details of the policy. These men gave it as their opinion that the policy being carried out was one of the most potential factors that had come to their attention in the way of national returns from the poultry industry and particularly in establishing known sources of high producing strains of poultry.

Probably the development of greatest importance during the year is the extension of the Record of Performance policy to the approval and banding of Record of Performance cockerels, the progeny of qualified females. This is a matter which a number of the Record of Performance Associations have been urging for some time, as it is felt that once these birds have passed a rigid inspection and been approved for vigour, type, and freedom from standard disqualifications it will do a great deal to stimulate the demand for this class of stock.

#### EXHIBITS AND PUBLICITY

Egg and poultry exhibits have been staged during the past year at the following large exhibitions and poultry shows:—

*Alberta.*—Camrose, Calgary, Red Deer, Lethbridge, Edmonton Exhibition, Edmonton Winter Fair.

*British Columbia.*—Duncan, Chilliwack, Vancouver, Victoria, New Westminster.

*Saskatchewan.*—Regina, Saskatoon, Prince Albert.

*Manitoba.*—Brandon, Neepawa, Dauphin, Russell, Carmen, Portage la Prairie, Winnipeg, (Eaton's Store.)

*Quebec.*—Valleyfield, Three Rivers, Sherbrooke, Quebec.

*New Brunswick.*—St. John, Woodstock, Fredericton.

*Prince Edward Island.*—Charlottetown.

## SESSIONAL PAPER No. 16

*Nova Scotia*.—Pictou, Antigonish, Sydney, Truro, Kentville, Amherst.

*Ontario*.—Essex, Windsor, Kitchener, Petrolia, Chatham, London Exhibition and Poultry Show, Galt, Dundas, Toronto Exhibition and Royal Fair, Simcoe, Guelph, Peterboro, Ottawa Exhibition and Winter Fair, Renfrew, Pictou Exhibition and Poultry Show, New Hamburg.

The standardization and co-operative marketing of eggs and poultry and economic production through flock improvement (Record of Performance) are the phases of work that have been featured during the past year. Applications for literature and requests for exhibits and demonstrations show this means of placing the general public in touch with the work of the division continues very popular. Since the egg regulations affecting trading in domestic channels came into force, the interest of consumers in a graded article has grown very rapidly and the demand for candling appliances has been larger than ever.

Candling demonstrations have been given at many points, many hundreds of people taking advantage of these and showing their interest in this phase of the work.

Live birds were again used in connection with the exhibits at the larger centres for the purpose of demonstrating good and poor producing specimens. Motion pictures have also been a feature at many of the exhibitions during the past year, and it is anticipated that this line of work will become a very important publicity factor.

Particular and special phases of the poultry work are made the subject of press notices. These constitute a very valuable and necessary link between the department and those interested in the poultry industry.

#### MOTION PICTURES

Motion pictures have been used by the Live Stock Branch during the past three years. Projection machines have been distributed to officers of the branch in charge of certain districts or provinces. The distribution of projectors and films is done entirely from Ottawa; the arranging of meetings at which the pictures are to be shown is left in the hands of the district officers.

Some strictly technical films have been made such as "Demonstrating the Judging of Hens for Production," "The Co-operative Marketing of Eggs and Poultry," and "Eggs and Health." Scenarios are prepared by officers of the branch, who also superintend the locating of suitable settings for the pictures, the necessary properties, etc.

The programme of the meetings at which these pictures are shown is usually arranged to provide some variety. A short address on the subject of the technical films, and one or two scenic films. The latter are also secured from the Department of Trade and Commerce, being part of the "Seeing Canada" series that is now receiving world-wide distribution.

The motion picture as a means of actually depicting agriculture in all its varied phases is increasing in popularity. Officers of the Live Stock Branch report good results from the use of the pictures and the pictures are in increasing demand.

#### SHEEP AND SWINE DIVISION

##### INTRODUCTION

The opening of the wool marketing season showed that wools were being brought at a substantial advance in prices over the year previous, and the fact that the lamb prices remained steady throughout the season created an increased

demand for breeding ewes. At all the stock yards throughout the Dominion, any ewes with good mouths were readily picked up for breeding purposes and a continued demand indicates that there is a considerable shortage of breeding ewes, particularly in the western provinces. There was also a keen demand for feeder lambs, both East and West. Range lambs were picked up readily, as were feeder lambs of domestic breeding. The price of breeding ewes advanced considerably over values of the past two years. A large percentage of ewe lambs were retained this fall to replace older ewes and, in many cases, for the establishment of new flocks. Sheep have been a very profitable side line on all farms and, as a result, farmers are using pure bred rams more extensively, following which there is a steady improvement in the quality of lambs marketed.

The inception of swine grading has given greater confidence and considerable stimulus to the swine industry. During the early part of the year, the price of hogs remained steady in comparison with the price of feeds, and farmers were able to make reasonable profits from raising hogs. These prices, however, were higher than export values of bacon justified. During the early summer months trade influences were able to bring about a reduction in the price of live hogs. This reduction in hog prices established a basis of values comparable to export values of bacon during the summer months. Farmers naturally did not take kindly to the lowering of prices and for a time there was a tendency to hold hogs for a better market. This naturally resulted in some increase in the marketings of heavy hogs and later on, owing to lack of confidence in market values, increased the percentage of light unfinished hogs. The new level of prices has reduced the farmers' margin of profit to the point where it is necessary to exercise the best of judgment in breeding, feeding and management, if he is to make a reasonable profit. Prices for live hogs were fairly well maintained throughout the fall months. The bacon market continued to drop steadily until it reached the ninety shilling point and, while there were minor fluctuations during the winter months, the bacon market became generally stabilized at lower values and the price of hogs reacted accordingly. Despite the fact that losses in spring litters were high, especially in early litters, there have been considerably more swine marketed in 1923 than in 1922. There has been a steady increase during the year in the percentage of select bacon hogs, also a continued demand for improved breeding stock. The lowering of market prices will, undoubtedly, check the expansion of the industry considerably. However, with an abundance of oats, barley, and low grade wheat in the country which can still be marketed to advantage by feeding hogs, most farmers are accepting the situation as inevitable and are endeavouring to increase their profits by paying stricter attention to the breeding of hogs of the select bacon grade.

#### PURE-BRED RAM PREMIUM POLICY

Applications under this policy have shown a slight increase during the year. This is due largely to ram club organization work in numerous sheep districts which have not previously used pure bred rams. The market demand for better quality lambs and the increase in the price of wool has helped to revive interest in the breeding of better sheep. Sheep raisers who have adhered to the regulations of the policy with regard to docking and castrating, were handsomely rewarded this fall in that they escaped the cut on buck lambs which was imposed at the stockyards on lambs marketed after August 27, 1923. The operation of this policy very materially increased the sale and demand for pure bred rams this fall and the fact that these were procurable at prices in keeping with wool and lamb values has enabled grade flock owners to improve their flocks with a

## SESSIONAL PAPER No. 16

minimum cost to themselves, in fact in many cases, especially where lambs had been marketed through the sheep fairs and lamb sales, the added premium has in most cases more than offset the initial cost of the ram.

## PURE-BRED RAM CLUBS

In communities where it is possible to secure a club membership of twenty-five or more farmers who desire to purchase a pure-bred ram this Branch permits a purchasing delegate to be chosen whose travelling expenses will be paid during the time required to purchase the rams. The purchasing delegate is accompanied by one of the Live Stock Branch Promoters who acts in an advisory capacity in making the selection. The delegate is responsible entirely for the actual financial settlement of all purchases made and the distribution of the rams to their owners. The object of this policy is primarily to develop the principle of community breeding. One breed only can be purchased by a club. Up to the present Quebec is the only province to take advantage of this policy and during the last year 829 pure-bred rams were purchased under this arrangement. A number of the other provinces have in part applied this policy and developments are taking place which will permit of the policy becoming effective in a number of the other provinces in future. This policy has been a means of bringing about a marked improvement in the quality of commercial lambs in the province of Quebec. Lambs now arriving on the Montreal market compare very favourably in quality with lambs offered for sale on other markets of the Dominion.

## PURE-BRED RAM GRADING

The policy of grading pure-bred rams was continued during 1923 in the provinces of Nova Scotia, New Brunswick, Quebec, Saskatchewan, Manitoba, and Alberta. Under this policy applications by pure-bred breeders are made to the provincial departments and an official grader is appointed by this branch to visit the flocks and grade the pure-bred rams which the breeders have for sale. The outstanding rams are designated a "XXX" grade. Rams of this grade must be outstanding individuals of the breed which they represent. The second grade is known as "XX" rams. Rams of this category are those considered suitable from a commercial point of view to head grade flocks. The third grade known as "X" rams are those considered to be inadvisable to breed from. These rams are recommended to be slaughtered. Rams are designated according to grade by means of tattoo marks in the ear. A record is kept of the number of pure-bred rams graded for each farmer, their grades, and the prices which are being asked for them. In some provinces a pamphlet is issued by the provincial authorities containing this information in detail. The distribution of this information has meant more and better sales for the small individual breeder than was heretofore the case, in fact reports received indicate that there are practically no graded rams available for purchase in any of the provinces. With the possible exception of the Ram Premium Policy this policy has been one of the most appreciated of any ever undertaken by this branch in connection with sheep.

## SHEEP FAIRS AND LAMB SALES

The Sheep Fair and Market Lamb Sales Policy of the Dominion Live Stock Branch, Sheep Division, culminates commercially, as well as educatively, the various improvement activities related to sheep extension work. For many years past farmers have been encouraged to dock and castrate their lambs, buy pure-bred rams, dip their flocks, and in other ways practise modern methods of

sheep management. In the raising of sheep, as well as in other things pertaining to agriculture, the farmer requires a definite and practical demonstration to convince him that for such efforts he receives monetary returns not only for the cash outlay in the pure-bred rams used, but also for the labour involved.

In many districts where sheep raising is general it is found possible through the operation of the Ram Premium Policy to induce practically all sheep raisers to buy pure-bred rams, and, in the organization of these ram clubs, the importance of deciding on one breed only for each respective community was pointed out, with the result that little difficulty was experienced in establishing the use of one breed of rams. In such districts where a definite breed improvement policy has been adopted and is operative, the Sheep Fair and Lamb Sale provides a means whereby sheep raisers in the district can exhibit their lambs for comparison with those of their neighbour. Lambs of uniform breeding that have been docked and castrated permit of their being graded advantageously for sale purposes, thus enabling farmers to get the premium which improved and well-finished stock always brings on the market.

During the past year fifty-three fairs were held in the Dominion, three in Manitoba, three in Ontario, forty-five in Quebec, one in New Brunswick, and one in Nova Scotia. At each of these fairs, exhibits consisted of pens of five finished market lambs, pens of ten finished market lambs, and a class for a pure-bred ram and three ewe lambs of his progeny. The various pens of market lambs were judged from a market standpoint and, wherever possible, a packer's buyer was secured to assist with the judging. The minimum entry which justified a fair was three hundred head. Many of the fairs greatly exceeded this number. Victoriaville, Que., had the largest exhibit, with 650 head. The second largest exhibit was at the Botsford Fair, New Brunswick, where 615 head were exhibited, and the third largest fair was at Arborg, Manitoba, where 530 head were shown. At all these fairs a total of 15,823 lambs were on exhibition.

At each fair the judging was followed with keen interest by the exhibitors and other farmers who attended. The judges took pains to explain the present day requirements of market lambs and in making the awards pointed out to the exhibitors the good points of the winning pens as well as the defects in the pens which were being placed towards the bottom of the classes. After the various pens had been placed by the judges, the lambs were offered for sale. In the organizing of these fairs, a special sales committee was appointed for each fair. Previous to the date of the fair, these sales committees were kept fully advised as to the market values for lambs on all competitive markets. At most fairs, the sales committee offered the lambs locally by public auction. A good deal of publicity was invariably given to the lamb selling feature of the fair with the result that local drovers and packers' buyers participated in the bidding. The sales committee decided on a minimum sales price and, if the highest bid represented full market value, the lambs were sold, otherwise they were loaded on cars and shipped to the best available market. When auctioning the lambs they were offered with a view to suiting the buyers. The leading prize winning pens comprised the first lots and succeeding lots were made up on the basis of comparative merit. Lambs which were brought in for sale although not exhibited were graded and sold as No. 1, No. 2, or Culls. The highest price obtained for lambs at these sales was \$12.50 per cwt. The general net price for choice lambs ranged from \$9.50 to \$10.85 per cwt.

A very important feature of these fairs this year was the number of ewe lambs purchased by farmers for the establishment of new flocks, as well as the ewe lambs of improved breeding retained by sheep raisers to improve their own flock. These sheep fairs are, undoubtedly, reviving interest in sheep raising. They have materially improved the average prices to the farmer and, through added returns, have convinced farmers that it pays to use a pure-bred ram.

## SESSIONAL PAPER No. 16

They have, furthermore, created a greater knowledge among packers of where the best market lambs are produced and, as the fair provides a medium through which quality lambs can be purchased in quantity with a minimum of expense, the larger lamb buyers are already much interested in this project, which, undoubtedly, combines successful educational and marketing features in a way that works out to the general satisfaction of the producer and the buyer.

Prize money for these fairs is contributed, one-half by the Dominion Live Stock Branch, and one-half by the Provincial Departments of Agriculture. At many fairs, donations for special prizes were received locally.

## SHEEP FEEDING COMPETITIONS

These competitions which were begun two years ago in the province of Quebec were limited during the past year almost entirely to those sections where sheep improvement was being brought about through the organizing of pure-bred ram clubs. The purpose of these competitions is to encourage the better care of the flock and those other practises which are essential in preparing lambs and wool for market. In connection with this policy the branch co-operates with the Quebec Department of Agriculture in that 50 per cent of the prize monies offered are paid by each department. The maximum prize money for each competition must not exceed \$100. Inspectors in making the awards consider the buildings, equipment, uniformity of the flock, condition of the ewes and rams, feeds and methods of feeding, use of forage crops, weight and quality of wool clip, and weight and quality of lambs marketed. In so far as possible, flock management and flock improvement were discussed with each farmer who entered the competition. Assistance as necessary, was given in the docking and castrating of the lambs and dipping of the lambs and ewes.

Twenty of these competitions were held in the province and as a result of inspections made many flocks have been culled of undersirable ewes, improved feeding racks have been built, proper roughages have been grown, and farmers will market wool of a superior quality and lambs of a more desirable market type.

## SIRE LOAN POLICY FOR RAMS AND BOARS

Requests for loans of rams under this policy continue to be received. However, in view of the assistance given under the Ram Premium Policy, and in the organization of ram clubs, loans have been restricted to associations formed in newly settled districts, and in districts where returned soldiers have settled. In 1922 there were 118 rams on loan under this policy. These have been reduced during the year to 96. The reduction in the number of rams loaned has made it feasible to give these associations closer supervision. The operation of the policy has also been more definitely confined to special districts and this of itself has tended to reduce supervising costs as well as intensifying the results of the policy where it is operated.

Owing to the rapid expansion of the Boy's and Girls' Swine Club Policy, and the subsequent necessity for supplying these clubs with outstanding breeding sires, the demand for loans of boars to these clubs has increased during the year. A total of 182 boars are on loan as compared with 110 last year.

## MEETINGS AND SHORT COURSES

Throughout the winter months an extensive programme of meetings and short courses was carried out. The programme of these meetings and short courses included the judging of hogs and sheep alive, followed by a study of the same animal after slaughter. It was possible by this method to give farmers a more definite conception as to why certain points are essential in a lamb or hog

from a commercial point of view. Aside from the main object of these demonstrations farmers are able to gather some good pointers on home butchering. Sides of cured Wiltshire bacon were carried from one course to another for the purpose of illustrating the manner in which bacon is exported and the various grades recognized by the trade. The courses were held not only at country points but at a large number of the packing plants as well. It is felt that these meetings are largely responsible for the fact that farmers are continuing to demand an extension of the sale of hogs by communities on a graded basis.

In addition to the practical features put on during the day, a special programme was arranged for in the evening to which men, women and children were invited. Educational motion pictures dealing with live stock are recognized as one of the most effective methods of illustrating features of live stock marketing. A series of films recently completed, dealing with such subjects as co-operative marketing of wool, swine club work, marketing and processing of hogs and the raising of hogs for profit, have proved of much interest and have been of great value in adding to the educational scope of meetings and short courses held during the year. During 1923 there were 182 meetings on topics related to sheep, 263 meetings on topics related to hogs, 111 other meetings, and 152 short courses. At these meetings and short courses there was a total attendance of 54,092 throughout the Dominion.

#### DEMONSTRATIONS

Demonstration work constitutes one of the main features of the Sheep and Swine Division activities. All the policies pertaining to sheep contain, as one of the qualifying regulations, the stipulation that all lambs must be docked and all male progeny, except pure-breds, must be castrated. The effect of this stipulation has been widespread and when coupled with the Sheep Fairs Policy has enabled farmers to capitalize the practice in actual monetary returns. The correctness of the policy of encouraging docking and castrating has been further substantiated by the market cuts which went into effect on some of the stock yards last fall.

Dipping demonstrations have had a definite influence in eradicating ticks. Interest in the dipping of sheep has been developed in many new districts through the demonstrations given by field men with the galvanized tanks used for this purpose. In order to encourage the permanent dipping of sheep in communities, permanent concrete tanks were built in fifty-one districts last year. The demand for permanent tanks has been greatest in Ontario but there has also been some demand in the Maritime Provinces, Quebec and Manitoba. The low cost of construction and their adaptability for community use has made these tanks very popular.

In the province of Manitoba, Ontario, Quebec, Nova Scotia, and Prince Edward Island, a considerable number of demonstrations were given at which farmers were shown the proper method of removing the fleece from a sheep and the manner in which it should be prepared for market. There were 339 demonstrations of this kind given and graders, who graded the wool when it was marketed co-operatively, state that there was a marked improvement in the condition of the wool as compared with former years.

Under this heading we may also include a large number of demonstrations given at shipping points where hogs were graded in accordance with the official grades. As a result of the inception of hog grading a year ago, there has been a keen demand, more particularly in Ontario, for demonstrations of this nature especially on hog shipping days. At such demonstrations an official grader is present to grade the hogs and to explain matters pertaining to hog grading. In the province of Ontario alone 145 of these demonstrations were given during

## SESSIONAL PAPER No. 16

the year. These demonstrations are particularly valuable as a means of pointing out to farmers the market defects of their hogs and have been a very effective means of establishing the buying of hogs on grade at country points and on this account the demand for these demonstrations is steadily increasing.

Associated with hog grading demonstrations there has been a demand for information on the grading of bacon and it has been found necessary to demonstrate with Wiltshire sides the actual requirements of the British market. Following the instructions received at hog grading and Wiltshire demonstrations farmers have asked for special advice in the selecting of breeding gilts. A very considerable number of brood sows have been selected at the hog grading demonstrations. In other cases farmers have requested the demonstrator to visit their farms in order that advice may be secured on the type of sows being kept for breeding purposes. These demonstrations have resulted in a demand by a number of districts in the provinces of Manitoba, Saskatchewan and Alberta for the shipment of specially selected bacon type sows from the stockyards for general distribution. The application of the Free Freight Policy has made it possible to meet these requests by selecting bacon type sows and shipping them out to country points in lots of twenty-five or more. By this method farmers have been supplied with specially selected sows at actual market values.

A new phase of the work undertaken this year was the use of mobile exhibit trucks which were operated in the provinces of Alberta and Ontario. In Alberta the truck was instrumental in bringing to many farmers the correct idea of the select bacon hog and, as a result of demonstrations held, several hundred bacon type sows were sold in the districts visited and an average of one bacon type boar was sold at each demonstration given. In Ontario the truck was used largely in connection with sheep demonstration work including the dipping of sheep and exchanging and distributing of pure-bred rams. The truck proved to be of extreme value on Manitoulin Island where through its use farmers received first hand information on shearing, wool grading, sheep dipping, and the value of using a pure-bred ram. Both trucks proved to be a very economical method of reaching the farmers in districts where they do not readily come in contact with marketing problems.

## WOOL GRADING

The policy of grading wool offered for co-operative sale was continued in 1923. In some sections this year a considerable increase in the amount of wool sold co-operatively was noted. However, in the total amount graded there was some reduction as compared with former years. This reduction in actual amount was partly due to a smaller number of large shipments from the western ranches, and also because of a decrease in the size of the average farm flock. There were more shippers in 1923 than in some other years when more wool was handled.

The prices for wool were very good in the earlier part of the season and wool sold previous to the end of July, particularly the Ontario, Quebec, and Maritime Province clips, realized very good prices. The most unfortunate thing about the past season's co-operative sales was that western wool, quoted at very high figures in the early spring, because of the time taken in collecting and grading, reached the market at a time when wool values were much reduced. During the months of October and November the market recovered considerably and the balance of the wools on hand were cleared at prices in advance of those prevailing during the summer months. It is gratifying to note that, for the first time, a considerable quantity of Canadian wool was successfully sold on the British markets. Over 500,000 pounds were sold to Bradford and London firms.

## SHEEP AND SWINE EXHIBITS

At all the larger provincial fairs in the Dominion, at the winter fairs and at as many of the country fairs as was practical, sheep and swine exhibits were shown.

The sheep and wool exhibits featured profits from sheep, the quality of Canadian wools adaptable to the manufacture of Canadian textiles, and the market requirements in lambs. The section devoted to featuring Canadian textiles made from Canadian wools attracted a great deal of interest and should do much to do away with the popular fallacy that one must buy imported cloth in order to secure wearing qualities.

The bacon hog and its relation to Canada's swine industry was made a special feature of the swine exhibit section. Prolificacy of bacon sows as a factor in reducing production costs, the benefits of hog grading, and the sale of hogs on a quality basis, were the three main ideas which were given special emphasis and the illustrations used in this connection did much to acquaint the farmer with the principles and importance of hog grading in the development of a bacon hog policy for the Dominion.

A special exhibit of wool and bacon was put on during the month of February at the T. Eaton Company, Limited store at Winnipeg. This exhibit was arranged in co-operation with the company as a feature of their annual attraction which this year included a seed grain competition. The exhibit of Canadian wools and textiles was quite extensive and set forth the special advantages of the wool of each of the four western provinces for specific purposes. The bacon hog exhibit by means of Wiltshire sides and carcasses from select bacon and thick smooth hogs cut into the various English and domestic cuts demonstrated in quite a convincing manner that the product of the select bacon hog is the most profitable for our domestic as well as our export trade.

## CO-OPERATIVE MARKETING

The co-operative marketing of sheep and swine has been more or less centralized to sales through sheep fairs and boys' and girls' swine clubs. Through these mediums it is possible to assemble for sale both lambs and hogs in volume at local centres and to demonstrate market values by selling on a graded basis. In the Maritime Province the limited market for both lambs and hogs has necessitated the continuance of co-operative shipping and this was organized so as to effect local sales in sufficient volume to meet consumptive capacity and at a price in keeping with market values. Surplus supplies of hogs were produced in Prince Edward Island and assistance was given in the shipping of these to the Montreal market. Surplus supplies of lambs were offered for sale in such a manner that Boston and Montreal buyers competed and as a result very satisfactory prices prevailed throughout the marketing season.

In Quebec, Ontario, and Western Canada, where pure-bred rams have been introduced and where special organization work had been done in connection with the improvement of sheep it was possible to arrange for the co-operative shipping of special carloads of market lambs. This was most successfully carried out in Grey county, Ontario, where numbers of early lambs were marketed and realized the top price of 16 $\frac{3}{4}$  cents per pound.

## BOYS' AND GIRLS' SWINE CLUBS

This policy, although only adopted in 1921, has been so favourably received in all the provinces that, during the past year, further organization work was possible and during the year one hundred and fifty-eight clubs were in operation. As a result of the organization of this number of clubs, much new interest has

## SESSIONAL PAPER No. 16

been created in the raising of bacon hogs, large numbers of improved breeding stock have been introduced into club districts, members have received instruction on feeding and finishing methods and the foundations have been laid for improvement of the local hog marketing system.

Quite a number of the clubs made arrangements whereby some members purchased specially selected breeding gilts in the fall, these being bred to a boar of outstanding merit. This provided a source of supply of young pigs for the remaining club members in the spring. This plan of organization has the advantage that it ensures a supply of uniformly bred pigs of good quality. In other clubs, orders were given by the various members and pigs of suitable merit were selected to meet the requirements of club members. In some cases a supply could be obtained locally, while in other cases, the supply had to be shipped in from outside districts.

Complete arrangements for the supply of pigs were made early in June, after which the pigs were tagged and members assumed responsibility for feeding. Several circular letters dealing with feeding and management problems were issued during the summer. In addition, by personal contact work, the members were advised as to the progress they were making, consulted about the feeds used and the balancing of rations for the pigs at different ages. Matters such as housing accommodation, exercise, and use of green feeds were also dealt with. In addition, club members were given instruction in the judging of bacon hogs.

The local exhibits of club hogs proved to be a valuable educational feature of the whole policy, particularly where fifteen to twenty or more pairs of bacon hogs were exhibited. The local swine club fair provided an opportunity for the club members to study the quality of their exhibits in comparison with their competitors. The pigs shown at these fairs were generally of such high quality that parents and neighbours were definitely influenced in favour of the bacon hog and, as a result, members, who had the outstanding exhibits, found no difficulty in booking orders for pigs to be farrowed the following spring. The Federal Department of Agriculture pays one-third of the local prize money and the other two-thirds are paid by the Provincial Department and by the community.

The carlot entries in the carlot Competitions were much improved over those of a year ago, in fact, during the fall months, the hog grading records show that there was a decided increase in the percentage of select bacon hogs during the period when swine club hogs were going to market. The breeding, type and finish of the carlot entries reflected the value of care in selecting breeding stock and in paying close attention to all the details of feeding practice. Information gathered from some of the districts in which the best carlots were finished indicate that these members made the greatest use possible of skim milk and green feeds. On this account their production costs were particularly low, thus leaving them a good margin of profit over cost of production.

Teams of two boys from each club competed at the central marketing points in a bacon hog judging competition. Over four hundred club members visited their respective marketing centres where they saw the carlots entered in the carlot competitions, participated in the judging competitions, observed the methods of buying and selling practiced at the stockyards, visited packing plants, and, in a general way, became acquainted with the procedure common to the marketing of livestock. The knowledge thus gained will enable them to develop breed improvement policies with a clearer understanding of market requirements.

The Federal Department of Agriculture pays all the prize money for the Carlot Competitions and for the Interclub Judging Competitions. The agricultural field men of the various provinces undertake the responsibility of

organizing the swine clubs under this policy and a great deal of the success attained is due to the splendid efforts of these field men. The sheep and swine promoters have co-operated with the provincial men in organization work, in securing a suitable supply of pigs and have participated in the contact work with the club members in association with the provincial field men. Similarly federal promoters have had the assistance and co-operation of the provincial officers in making arrangements for the judging competitions and the marketing of the earlots entered in the earlot competitions.

#### HOG GRADING

Hog grading has now been in effect for sixteen months and, while there is practically nothing by way of precedent and no statistics to refer to, yet there is evidence in plenty to indicate that hog grading has done more than any other policy towards improving the quality of Canadian hogs.

During the year, as a result of the hog grading regulations, packers' buyers and live stock commission men at the various stock yards have become definitely acquainted with the official hog grades. The continued grading of hogs at all marketing centres has also acquainted shipping agents and drovers with the weights and types of hogs designated to the various grades. Farmers also, through contact with buyer or shippers and through the medium of meetings and demonstrations have come to realize more and more what is required in a select bacon hog both from the standpoint of type and finish. This knowledge, on the part of the trade, has permitted of steps being taken to simplify the grading methods at stockyards and packing plants. Similarly the fact that drovers and farmers are now acquainted with the grades of hogs has permitted of the buying and selling of hogs at many country points on a graded basis with general satisfaction to both producer and buyer.

The whole policy of hog grading is therefore steadily gaining in popularity largely because, firstly: it has been found to be a practical method of trading in hogs; secondly, it has greatly improved the quality of hogs in the Dominion, and thirdly, has provided a basis of scale which recognizes quality in product. Hog grading statistics show the percentage of select bacon hogs to be 14.97 per cent in 1923, but these statistics do not tell the whole story in so far as analyzing the figures pertaining to the marketing of commercial hogs. The infusion of bacon blood has modified the type of the thick smooth hogs to a very marked degree. Quite a percentage of these hogs are now approaching the select bacon standard and, in consequence thereof, produce a much better carcass. The average finished weight of both the select bacon and thick smooth hogs indicates that farmers are paying close attention to the correct market weights.

One of the main difficulties under which the grading system has laboured has been to find a solution for the problem of getting the premium back to the producer of the select bacon hogs. From the outset, the majority of shipping associations and a percentage of drovers have made returns to farmers on a graded basis. The percentage of drovers who buy on grade is steadily increasing\* but there is still a big percentage of hogs bought on a flat basis at country points. In many districts, where hogs are sold flat, the percentage of select bacon hogs is so very small that no great loss is sustained. On the other hand, there are many good districts where the quality of the hogs is good and where the drover buys flat and very often sells at the market point on a graded basis. In such districts it is felt that the farmers should take action to protect themselves and organize so as to secure the advantage of selling their hogs on grade. An effort is being made to bring to the attention of farmers

## SESSIONAL PAPER No. 16

in the poorer hog raising sections the value of the bacon hog type in the production of commercial hogs, and steady progress is being made with these communities, although it will take time to cover all the ground needing attention.

At the last meeting of the Joint Swine Committee recommendations were made to the Minister of Agriculture to have certain changes made in the weight limits of the official grades and, as the recommendations were approved by the minister, they were made effective by Order in Council No. 352. Under this Order in Council a difference of ten pounds is made between hogs weighed off ears and those that are fed and watered. This brings hogs, handled under the two methods of sale, to a common level of relative values.

The following extract from Order in Council No. P.C. 352 includes the amendments respecting the grading of hogs:—

3. Hogs intended for slaughter in Canada and when sold or accepted for purchase according to grade shall be graded as follows:—

Grade 1.—Select Bacon: Hogs weighing 170 to 220 pounds W.O.C. at stockyards and abattoirs, or hogs weighing 180 to 230 pounds fed and watered at stockyards or at local shipping points and at such other points as may be designated from time to time; of a type and finish indicating suitability for the production of choice bacon. Jowl and shoulder light and smooth; back from neck to tail evenly fleshed; side long, medium depth, dropping reasonably straight from back; ham full, good general finish; no excess fat.

Grade 2.—Thick Smooth; Hogs weighing 100 to 210 pounds W.O.C. at stockyards and abattoirs or hogs weighing 170 to 220 pounds fed and watered at stockyards or at local shipping points and at such other points as may be designated from time to time not conforming to Select Bacon standard but of smooth conformation and finish.

Grade 3.—Shop Hogs: Hogs weighing 120 to 160 pounds W.O.C. at stockyards and abattoirs or hogs weighing 130 to 170 pounds fed and watered at stockyards or at local shipping points and at such other points as may be designated from time to time, of smooth conformation and finish.

Grade 4.—Heavies: Hogs weighing over the maximum weights for selects and thick smooths and up to 260 pounds W.O.C. at stockyards and abattoirs or hogs weighing up to 270 pounds fed and watered at stockyards or at local shipping points and at such other points as may be designated from time to time. Hogs of Select Bacon or Thick Smooth conformation and finish.

Grade 5.—Extra Heavies: Hogs weighing over 260 pounds W.O.C. at stockyards and abattoirs or hogs weighing over 270 pounds fed and watered at stockyards or at local shipping points and at such other points as may be designated from time to time. Of Smooth conformation and finish.

Grade 6.—Feeders: All unfinished hogs of any weight. Any type of smooth conformation but unfinished.

Grade 7.—Roughs: Hogs of rough conformation. Any weight.

Grade 8.—Sows: All females that have raised one or more litters.

Sub-Grade (a).—Those of smooth finish and trim underline weighing up to 350 pounds at stockyards and abattoirs or sows weighing up to 360 pounds at local shipping points and at such other points as may be designated from time to time.

Sub-Grade (b).—All other sows.

Grade 9.—Stags: Boars which have been castrated and are well healed.

It will be noted that the new Order in Council provides for a weight range on select bacon hogs at country points of 180 to 230 pounds. This weight range, allowing for the usual shrinkage in transit to market or for fed and watered hogs when shrunk for slaughter, produces a range of carcasses suitable for making Wiltshires of the most desirable weights for the British market. This increase in weights for select bacon hogs gives the producer of this grade an added advantage in marketing because he can now keep his hogs longer during a period when gains are rapid and most economical.

No change has been made in the weights for thick smooth hogs except that, as in all other grades, a difference of ten pounds is allowed between off ear hogs and fed and watered hogs. It was not considered wise to raise the

weights of thick smooth hogs because, by so doing, it would be necessary to include heavier and fatter hogs which would deteriorate the quality of the class and lower their commercial value.

It is expected that the new Order in Council will give added stimulus to the production of bacon hogs in the Dominion.

The following table gives a brief summary of the hog grading statistics for the year 1923:

SUMMARY OF OFFICIAL HOG GRADING BY PROVINCES, YEAR 1923

NOTE.—The above tables show the grading of hogs marketed in the various provinces, regardless of the province of origin. For example, marketings in Quebec include a large percentage of Ontario hogs. Figures showing marketings by province and county of origin will be published in report No. 4 "Origin and Quality of Live Stock Marketed in Canada" at a later date.

## SESSIONAL PAPER No. 16

## BACON GRADING INVESTIGATIONAL WORK

During the past year an officer of the branch has devoted practically his entire time to familiarizing himself with methods and practices in the various packing plants throughout the Dominion, and in addition to this, ten weeks of his time was spent in England studying the requirements of the bacon market there and the relationship of our product to these requirements. A complete report with recommendations covering this work has been submitted to the minister.

A brief of this report was submitted to the Joint Swine Committee for their consideration and, after due consideration, they passed a resolution recommending that it was not considered feasible at the present time to grade Canadian bacon officially, but were of opinion that further work should be carried on by the Department in co-operation with the packers with a view to securing continued improvement in the development of existing grade standards. The Committee were further of opinion that the unification and improvement of bacon standards will depend largely on the improvement in the quality of Canadian hogs.

Acting in accordance with the recommendations made by the Joint Swine Committee, further investigational work will be carried on. In order to expedite this work and to centralize discussion and thought on a definite objective, each exporting packer has received a copy of the report as presented to the Joint Swine Committee. After this has received their consideration, it is the intention to have a representative of this Branch meet the packers as a body and to discuss the objective of securing official recognition for grades of Canadian bacon.

Further work has already been instituted to analyze the degree of uniformity in our export of Wiltshires, but as yet there is nothing to report.

## BACON PRODUCTION TEST WORK

Two years ago an effort was made to secure information which would make it possible to grant recognition to breeding stock that has proved their ability in the production of bacon hogs. Last year further information was obtained by scoring the carcasses of a number of experimental hogs. The difficulties attached to securing central feeding stations and also a proper means of correlating the carcass scores with other information pertaining to feeding and management has made it impossible to announce a programme in this work which would be satisfactory to conditions in all parts of the Dominion.

At the present time valuable information is being secured on the relative merits of breeding stock by analysis of hog grading and what it shows concerning the hogs from a given district. This is being further developed with a view to showing the percentage of selects from the various boars in the district. This work shows promise and it is hoped that, during the coming year, various provincial organizations may be induced to co-operate in securing this information.

Further to encourage and direct the efforts of pure-bred swine breeders in order to ensure the distribution of the proper type of bacon breeding boars and sows, it is proposed this year to encourage pure-bred breeders to enter two hogs from a litter in a carcass competition. These will be held at five centres in Canada and, coincident with this competition, a short course will be held. At these courses the results of cutting demonstrations and of experimental feeding trials will be placed before the breeders in such a way as to emphasize the proper course for their activities as breeders.

## LIVE STOCK PURCHASED

The organization work connected with the Sheep Fairs and Boys' and Girls' Swine Club policies has created a demand for the participation of our field men in the selection of stock of the desired type. Districts have been encouraged to appoint purchasing agents who have been advised and aided when making selections. The knowledge which our field men have of pure-bred stock available for sale has enabled them to bring many individual buyers and sellers together in effecting purchases and sales.

Owing to the restrictions placed on the importation of pure-bred stock from Great Britain as a result of foot and mouth disease, our breeders of pure-bred sheep and swine had reached the point where they felt that their flocks and herds were decidedly in need of new blood. It was realized that individual breeders would be decidedly handicapped in securing suitable individuals, and, furthermore, the purchasing and transportation costs would be prohibitive. The breeders requested assistance from the Federal and Provincial Departments of Agriculture in order that importations of both sheep and swine might be made in sufficient numbers to meet the breeders' requirements. A plan of assistance was authorized which provided for the defraying of all purchasing and transportation costs, provided one-half of these costs were met by the various Provincial Departments in the provinces where the breeders participated.

The regulations provided for the appointment of one purchasing delegate from each province or a group of provinces where thirty or more head of stock was ordered. The provinces of Ontario, Quebec, Saskatchewan, New Brunswick, Nova Scotia and British Columbia co-operated in giving assistance to their breeders, and Purchasing Delegates were appointed for Ontario, Quebec and Saskatchewan. Orders from the other provinces were taken care of by the Dominion representative who was also responsible for details of finance, registration, certificates, insurance, transportation and shipping arrangements.

Each breeder in placing an order for an imported animal, in addition to making the initial deposit, specified the breed, age, price and other particulars regarding the type of animal required. The purchasing delegates endeavoured to buy animals of the specified qualities mentioned in the order and within the price range limit. Considerable difficulty was experienced in securing animals of the desired quality and at prices stipulated by Canadian breeders. However, the orders were eventually all filled and, upon delivery, apparently gave general satisfaction to the breeders who placed orders.

## GOAT EXTENSION WORK

The interest which was evidenced in the goat demonstrations held in 1922 seemed to warrant their continuance this year and accordingly the work was carried out in the vicinity of Oakville, Humber Bay, Long Branch, Weston, Westmount, Mount Denis, Fairbank and Mimico. In these districts truck farming is being carried on and, as the farms are small and intensively farmed, it is not considered economical to keep a cow although there is ample roughage suitable for a goat. These sections have difficulty in getting a suitable milk supply consequently their needs can be most easily met by keeping a family goat.

As a result of contact work brought about through the demonstrations already held, numerous sales have been effected. However, the demand is away beyond the available supply provided by Ontario goat breeders, and the Ontario Milk Goat Breeders' Association is contemplating the importation of a carload or more of milking does from the province of British Columbia. If these does are available it will warrant the department in carrying on further goat demonstration work in 1924.

## SESSIONAL PAPER No. 16

## MARKETS INTELLIGENCE AND STOCKYARDS SERVICE DIVISION

The Markets Intelligence and Stockyards Service has been in operation since 1916.

The policies effective through this division promote the development of live stock marketing in the Dominion along lines designed to stimulate efficiency in actual purchase and sale.

Under provisions of the Live Stock and Live Stock Products Act, consolidated and revised in 1923, this Division through the Live Stock Commissioner, enforced regulations governing the construction, maintenance and operation of public stockyards in Canada, and the methods employed in public purchase and sale of publicly marketed commercial live stock. The Division also procured and distributed detailed information on supply and demand, maintained a bureau on general live stock and meat trade information, issued up to date, daily, weekly, monthly and annual market reviews. It supplemented the above publicity with statistical information concerning the origin, quality and outlet of every meat animal publicly marketed. Also, associated with the service on the domestic industry and trade, was one on foreign live stock and trade conditions.

The stockyards activities are undertaken by especially qualified officers of the branch, stationed at each of the terminal stockyards. These yards are eight in number, and are located at the following places: Calgary, Alta.; Edmonton, Alta.; Prince Albert, Sask.; Moose Jaw, Sask.; Winnipeg, Man.; Toronto, Ont.; East End, Montreal, Que., and West End, Montreal, Que. The Markets Intelligence Service is provided through the co-operation of the stockyards agents and their assistants with the Markets Intelligence editorial and statistical staff at headquarters in Ottawa.

Some idea of the extent of supervision and general activity necessary to deal with this commercial phase of the livestock industry of the five provinces, may be obtained from the following figures: During the past year, over 1,000,000 cattle, 260,000 calves, 1,000,000 hogs and 500,000 sheep and lambs were handled through public stockyards operated under the Act. The value of that amount at public sale was approximately \$40,000,000 for cattle, \$2,350,000 for calves, \$18,500,000 for hogs and \$3,500,000 for sheep and lambs, a total value of \$63,850,000. The equipment and service necessary to the handling and sale of approximately that total volume and value of business is under the constant supervision of the Stockyard agents. In addition a detailed record of every sale was made, recorded and despatched to headquarters for statistical purposes, and used both for the Stockyards office and the Ottawa office as a basis for market letters, market reports, and market wires.

## OUTLINE OF WORK

1. The enforcement of regulations made under the Live Stock Products Act, consolidated and revised in 1923, has resulted in the bonding of commission men, operating on public stockyards, efficient and standardized operation of live stock exchanges, the elimination of undesirable traders and practices on the yards, the regulation of charges made on the yards by the stockyards company and by commission men for services, improvement in accommodation for live stock, and the regulating of the quality and charges on feed supplied by the stockyards companies.

2. Officers of the branch, located at the Central Stockyards at Montreal, Toronto, Winnipeg, Calgary, Edmonton and Prince Albert, classified and graded, for purposes of information, all live stock offered for sale, obtained details as to the selling price, origin and disposition of the stock and on the general condition of supply and demand.

3. The stockyards offices supplied the press with daily market news letters and representative live stock sales. The need for absolute accuracy in commercial reports is recognized, and a superior quality of material is the object; these together with the extended weekly, monthly and annual analysis of supply and demand, have practically supplemented other sources of markets information. The effect has been the standardization of market reports throughout the Dominion, guaranteed accuracy and quick service, where heretofore many contradictory ambiguous, or unreliable statements of market conditions were in circulation.

4. The Inter-Stockyards Telegraph Service inaugurated during 1919, consisted of an exchange of market wires between stockyards offices, for a public posting, so that a knowledge of trade conditions on one market may be available on all other markets as soon as the day's trading is established. These telegrams are prepared by the stockyards agents after a careful analysis of the condition of trading and wired each day as soon as the market is established to the other stockyards in Canada. Previously, only firms which could afford to have a private telegraph service were able to benefit by immediate knowledge of the day's trading conditions at other than their own market. As the trend of business on one yard may greatly affect that on other yards, this service is of tremendous value to the trade, and very effective in bringing about a clearance of stock.

5. The Daily Markets Telegraph Service inaugurated in 1919 was continued. This consisted of analysis of the condition of supply and demand, telegraphed over the wires of the Canadian Press, Limited, for publication in the daily press of Canada. These wires are prepared by the officers at each of the yards, at 11 a.m. and 4 p.m. daily, and appear the same evening and the following morning in practically every evening and morning paper in Canada. These have a reputation as being absolutely reliable.

6. A Weekly Markets News Service is prepared and mailed to the agricultural press of Canada, to district representatives of Agriculture, to a selected producers' mailing list, and to the various Provincial Departments of Agriculture. This service consists of an analysis of the week's supply and demand for live stock; comments on prospects for future markets, statistical tables showing comparatively, the grading, numbers, average price, price range for bulk of sales, and top price of all live stock offered for sale, the disposition and comparative receipts of the same, the gradings of hogs under official grades, and the exports of live stock.

7. In order that the weekly agricultural newspapers and financial trade journals might have the most up to date markets information obtainable, a special market report was prepared on the opening market of each week, by the stockyards representatives and sent to the farm press in time for publication in the current issue.

8. Each month, publicity was given to the live stock industry by the distribution of interesting information on crops, weather condition, live stock and allied industries, as regards both domestic and foreign fields. This information is distributed through the regular mailing list.

9. Memoranda on production, distribution and consumption of live stock and live stock products, both domestic and foreign were prepared for the information of officers of the department.

10. Numerous articles and press notices touching on the live stock industry prepared, either voluntarily or by request, for publication in the press.

11. The division continued the building up of an information service with reference to statistical condition of local production and distribution of live

## SESSIONAL PAPER No. 16

stock, general condition under which live stock production was undertaken, the foreign live stock situation; world's animal foodstuffs situation; the condition of the import and export trade in live stock and live stock products, and financial conditions influencing the industry.

12. The Division undertook the recording of the point of origin, class, grade and sex of all stock offered for sale at stockyards. It is estimated that the total marketings including direct shipments for the year exceeded three million five hundred head. Our records cover the sales trade during the past four years and are compiled in such a way as to be of immediate value in estimating the condition and extension of the marketable surplus, either locally, provincially, or for the Dominion. Policy to bring about improved conditions as regards production for markets and marketing is receiving definite direction through the medium of these records.

13. The service obtains from the various packing plants throughout the Dominion, weekly statements as to shipping station of private or country purchases. As from 40 to 70 per cent of the annual slaughterings by inspected establishments do not appear on the public market, the aptness of the information obtained can be appreciated.

14. Through arrangement between the Departments of Agriculture and Customs, the branch is now recording and issuing information covering the origin and destination of all classes of live stock exported from the Dominion. This information completes the scheme for a full record of the total movement of Canadian live stock during the period of the year, and allows for the working out of formula on which to estimate probable proceeds and distribution.

15. A connection has been made with British firms interested in the Canadian trade in store cattle, with importers and distributors of Canadian fresh-killed beef and with distributors of Canadian bacon, and has established a clearer understanding of the problems involved in the export trade in relation to the British market.

16. A Weekly Cable Service on the British Market for Canadian cattle and bacon is telegraphed by the division, to the Canadian newspapers. The information is being supplied by the most reliable operators on the markets at Glasgow, Liverpool and London. These cables are elaborated in the branch and given the widest publicity possible through the medium of the Associated Press of Canada and other mediums of publicity.

17. A daily wire service is operative between the stockyards officers and the United States markets, with a view to obtaining exact and immediate knowledge of the prospects for export. Considerable financial benefit to the live stock industry is resulting from this service, shippers having been better able to estimate the margin between domestic and foreign market prices, before making shipment.

18. Reports consisting of the classification and grading of all classes of meat animals shipped by drovers, packers, buyers and farmers organizations, from all shipping points in Quebec, Ontario, Manitoba, Saskatchewan and Alberta is being supplied to producers and the trade.

19. Purchasers of live stock under the Car Lot and Free Freight Policies of the branch were again given assistance by the stockyards agents. The activities of the agents greatly facilitates the movement back to country points, and as well materially encourages the conservation of desirable stock.

20. The Fifth Annual Review of the Live Stock Meat Trade Situation was published and distributed.

21. The Third Annual Report of the Origin and Grades of Commercial Live Stock was published and distributed.

22. The administration of the policy whereby immature calves offered for sale on public stockyards are subject to condemnation, is administered through the Live Stock Commissioner by the stockyards representatives. Suitable calves are allowed to be shipped for store purposes. This policy has been effective for a number of years, and has resulted in marked improvement of the quality of veal.

#### WORK RECENTLY UNDERTAKEN

The Markets staff in the branch is taking care of the compilation of grading and prices paid on the new basis of sale under the Hog Grading Policy. The trend of production and marketing is being interpreted from the records submitted by the official graders and statements on which to base practical and close-up publicity work are being prepared, as also a statistical report on the first year of grading.

The stockyards agents are assisting the graders in every way possible, co-operating in promoting satisfactory development of the work.

The branch, through this division, has developed a form of Trust Account for the live stock commission houses at stockyards, with the primary object of protecting the industry against financial losses, so as to promote the commission business to a higher plane than formerly.

The stockyards agents have extended their activities toward promoting familiarity with required market types of live stock. On request, the agents address meetings, pay visits to farms for the purpose of grading the stock into the various classes and commenting on the commercial value of each, and as well encourage the clearance of unsuitable feeding stock and the purchase of that of good feeding type and quality.

All activities in the division are designed to develop the commercial end of the live stock industry, and a steady improvement is perceptible in many phases of marketing operations.

During 1924-25, this division will confine its efforts to perfecting and enlarging the projects already in operation.

#### THE SEED BRANCH

The Seed Branch maintains laboratories or analytical services for the testing of seeds, feeding stuffs and fertilizers; encourages the production of superior seeds for domestic requirements and export; develops the marketing of seeds, feeding stuffs and fertilizers; and provides an inspection service for the enforcement of the Acts which control the sale of these products.

#### SEED TESTING AND FEED ANALYSIS

During the year April 1, 1923, to March 31, 1924, 41,291 samples of seed and feed were received and analyzed, the former for purity or germination, in most cases for both, the latter for the determination of ingredients. The following table gives an analysis of the number of samples received in each of the five laboratories, and their sources:—

	Quebec	Ottawa	Toronto	Winnipeg	Calgary
Trade.....	970	9,985	5,108	3,659	4,410
Customs.....	976	1,046	2,376	2,850	1,821
Official.....	43	1,139	401	98	140
Feeding stuffs.....		90		187	40
Investigation.....	875	2,632	946	171	1,328
Totals.....	2,864	14,892	8,831	6,965	7,739

## SESSIONAL PAPER No. 16

The Quebec laboratory was opened officially on January 1, 1924, and the number of samples given for Quebec in the above table was received during the three months.

*Trade* refers to samples of seed sent in by merchants, farmers and institutions.

*Customs* refers to samples of seed taken from imported shipments by the customs officials.

*Official* includes both seed and feed samples taken by inspectors from lots which are sold or offered for sale and suspected of violating the Seeds Act or the Feeding Stuffs Act. Prosecutions are based on the results of analyses of such official samples.

*Feeding stuffs* includes all feeds, and in addition condiments and tonics sent in by farmers, merchants and others who desire to know the approximate composition and value.

*Investigation* comprises all work of an experimental nature.

## SEED INVESTIGATION

During the past year the methods of testing seeds, especially with regard to germination tests, have been somewhat modified. All changes are based on a considerable amount of investigational work. Some special work commenced in former years has been carried further and new problems have been investigated between trade seasons, as follows:—

1. Standard samples supplied by the Association of Official Seed Analysts of North America, and another series supplied by a European station, have been tested with a view to standardizing, in so far as practicable, laboratory methods of seed testing.

2. Longevity tests of field root and garden seeds have been continued.

3. A series of tests on a broad basis has been commenced with a view to ascertaining the influence of storage conditions on the vitality of different kinds of seeds.

4. The studies on the characteristics of Canadian grown red clover seed have been continued. This work was undertaken in collaboration with European and American workers.

5. Investigations on the bulking and sampling of seeds, in connection with establishing a tolerance formula applicable to variations between two tests on samples taken from the same lot.

6. Investigation of different methods of germinating certain kinds of seeds, especially those brought under grade by the Seeds Act, 1923.

7. Study of new methods for determining the percentage of other cultivated seeds occurring in clover and alfalfa seed.

8. The influence of diluted solutions on the germination of certain seeds.

## SEED COLLECTION

The collection of economic and weed seeds has been revised in accordance with the new Seeds Act. It contains 100 samples in glass vials which are labelled with the common names, and includes besides certain grass and clover seeds, the primary and secondary noxious and the common harmful or useless weed seeds found in Canada. They are arranged in numerical order with key of scientific names, and are retained by steel clips in a heavy cloth-pasteboard box. The price of the collection is five dollars prepaid in Canada.

## MICROANALYSIS OF FEEDING STUFFS

The feeds examined in the laboratory during the year may be summarized as follows:—

Millfeeds.....	165
Screenings.....	95
Concentrates and condimental feeds.....	90
Miscellaneous.....	141
Total.....	491

A number of the millfeeds were sent in by individuals who had suspected them of being injurious to the health of animals or had found them unsatisfactory for feeding purposes. It is quite probable, however, that the amendment to the Feeding Stuffs Act, whereby wheat by-products are sold unmixed, will do away with further complaints.

The elimination of screenings as an adulterant of millfeeds naturally led to an increased quantity of mill screenings on the market. To ascertain the average quality of such feeds as percentage analysis was made of 56 unground samples. This investigational work also provided a valuable addition to an already large collection of standard reference samples.

In the summer of 1923 a general survey was made of a number of concentrates and condimental feeds on the market. It was found that on the whole they contained the ingredients claimed by the manufacturer on registration, but a percentage determination of ingredients showed that this list was by no means an index of the quality of the feed. In some cases, indeed, where only a small fraction of one per cent of a cereal or condiment had been added and the feed was not thoroughly mixed in the process of manufacture, more than one sample of the feed had to be taken before even the slightest trace of said ingredients was detected on analysis.

Many of the other feeds examined showed a varied use of by-products as ingredients. Some of these feeds were of very poor quality but the high grade of a few others would lead to the belief that, in *judicious combinations*, most by-products could be utilized to good advantage.

Feed investigations were conducted as follows:—

1. Method of determining mould content of a sample of feeding stuffs and the effect on this content of shipping the sample in air-tight glass containers.
2. Comparison of a cereal by-product with the chop manufactured from a low-grade sample of the same cereal.
3. Microanalytical studies in the qualitative and quantitative determination of ground feeding stuffs and stock tonics.

## THE SEED DIVISION

The Chief of the Seed Division devotes attention to that part of production pertaining to interprovincial and interdistrict commerce in seed supplies, and to the international trade in seeds of all kinds.

Laws and regulations applying to the export and import of seeds have a very important bearing on Canadian seed supply. The trend of the trade in many kinds of seeds would seem to indicate that unless our seed control regulations are equivalent to those of other countries we are apt to have on our markets too much of the seed of a quality that cannot be marketed to advantage in those countries because of their higher standards and more efficient control.

## SESSIONAL PAPER No. 16

## THE SEEDS ACT

The Seeds Act, 1923, with the regulations made by the Minister of Agriculture, came into operation November 1, 1923, and is proving a very successful means of preventing the marketing of inferior seeds, both home-grown and imported. The favourable reception accorded the Act and grade standards has been due in no small degree to the consultation with advice of the Advisory Board appointed under the Act, and to the thoughtful deliberations given the Bill by the Agricultural Committee of the House of Commons before the Act was finally passed and made law.

Several pleasing comments received from Canadian and United States sources more than compensate for a few adverse criticisms from parties who have been restricted from handling their seed business in the same manner as was their custom in the past.

In connection with the standards contained in the regulations it is proposed to make such changes from year to year as ought to be made to provide for the variations in each season's crop. Provision is made to have the Advisory Seed Board, which is composed of equal numbers of representatives of farmers and seed merchants, meet each fall and make recommendations in this connection. The Minister has power to make changes in the regulations without the necessity of amending the Act.

## CANADIAN SEED EXHIBIT AT BRITISH EMPIRE EXHIBITION

A thoroughly representative Canadian seed exhibit was selected and prepared for display at the British Empire Exhibition. The aim was to secure:

First, an educational exhibit showing the varieties of seeds originated or improved by plant breeders and particularly well adapted to northern climatic conditions; and

Second, a commercial exhibit showing representative samples of seed available for commerce in car lots for both home consumption and export.

Thirty boxes of seed, of approximately six hundred pounds each, were assembled in Ottawa and shipped to London in care of the Canadian Exhibition Commissioner. Suitable pictures to illustrate seed production and marketing, and sheaves of grain, grasses and clovers for decorative purposes, formed a part of the exhibit. This material was collected from various Dominion and provincial plant breeding stations, individual growers, and the wholesale seed trade, and included the first prize Canadian championship exhibits at the larger Canadian shows and at the International Hay and Grain Show, Chicago.

## INVESTIGATION

In connection with the control of the trade in field root and garden vegetable seeds, samples of the different kinds and varieties distributed by wholesale seedsmen are taken from the retail dealers and tested at Ottawa for vitality and genuineness of variety. The latter is determined in field tests conducted by the Forage Plant and Horticultural Divisions of the Experimental Farms Branch.

During 1923, 3,053 plots of field root and garden seeds were tested, and the notes taken on these tests will be used in revising standards under the regulations for the sale of these seeds in Canada. These plot tests, which are being carried on again this year with vegetable seeds only, will provide data for preparing a list of standard variety names and descriptions for addition as an appendix to the regulations under the Seeds Act. Members of the wholesale seed trade with whom this matter has been discussed approve the establishing of such a list, which will serve to simplify the advertising in seed catalogues principally through the elimination of the many synonymous variety names that are now carried by the Canadian trade.

## CO-OPERATION WITH THE PROVINCES

With a view to encouraging the production of high grade, hardy, northern grown seed for commerce, subventions are paid to Provincial Departments of Agriculture towards conducting seed crop competitions, combined seed crop and cleaned seed competitions, seed fairs, and provincial seed exhibitions. The maximum amounts made available for each of these competitions from the Seed Branch appropriation are as follows:—

Standing field crop competition.....	\$ 50 00
Combined seed crop and cleaned seed competition.....	200 00
Local seed fair.....	75 00
Provincial seed exhibition.....	600 00

Any one agricultural society is eligible to conduct competitions, including either a field crop competition and seed fair, or a combined seed crop and cleaned seed competition and seed fair. The subvention grants are payable to the Provincial Departments of Agriculture on the basis of two-thirds of the premiums paid by the provinces in prize money, but shall not exceed the maximum amounts above named. The provinces pay the cost of organization and judging, so that the expenditures by the Provincial and Dominion Departments of Agriculture are about equal.

The subventions paid by the Seed Branch on account of these competitions during the fiscal year ending March 31, 1924, were as follows:—

## STANDING FIELD CROP COMPETITIONS

	Number	Amount
Prince Edward Island.....		
Nova Scotia.....	8	\$ 180 00
New Brunswick.....	26	999 95
Quebec.....	120	5,550 00
Ontario.....	248	9,135 93
Manitoba.....	36	1,222 79
Saskatchewan.....	167	5,634 65
Alberta.....		
	605	\$ 22,723 32

## COMBINED SEED CROP AND CLEANED SEED COMPETITIONS

Prince Edward Island.....	9	\$ 658 32
Nova Scotia.....	3	226 33
New Brunswick.....		
Quebec.....	29	2,950 00
Ontario.....	45	8,842 00
Manitoba.....	2	210 00
Saskatchewan.....	1	183 33
Alberta.....		
	89	\$ 13,069 98

## LOCAL SEED FAIRS

Prince Edward Island.....		
Nova Scotia.....	6	\$ 366 16
New Brunswick.....	5	323 66
Quebec.....	75	3,711 30
Ontario.....	8	251 80
Manitoba.....	14	783 85
Saskatchewan.....	28	1,262 82
Alberta.....		
	136	\$ 6,699 59

## SESSIONAL PAPER No. 16

## PROVINCIAL SEED EXHIBITIONS

Prince Edward Island.....			
Nova Scotia.....	1	\$	600 00
New Brunswick.....	1		385 00
Quebec.....			
Ontario.....	2		822 99
Manitoba.....	1		600 00
Saskatchewan.....	1		405 34
Alberta.....			
	6	\$	2,903 33

In the case of British Columbia an annual grant of \$2,500 is paid to the Department of Agriculture towards encouraging the production and marketing of field root and garden seed. The Provincial Department of Agriculture authorizes the expenditure of an equal amount for this purpose.

## ASSISTANCE TO CANADIAN SEED GROWERS' ASSOCIATION

The Canadian Seed Growers' Association is a national organization of farmers who specialize in the production of Registered and Extra No. 1 seed. They multiply for commerce the foundation stock seeds called "Elite Stock Seed" produced by Dominion and Provincial Experiment Stations and sometimes by individual growers. Registered and Extra No. 1 seed provides much of the seed stocks for field crop competitions, local seed fairs and provincial seed exhibitions.

The association office functions as a registration bureau for seeds; maintains systematic records of their history, pedigree, disposal and performance; directs the work of the growers, and acts as a connecting medium between them and the Dominion crop and seed inspection services; publishes a seed crop catalogue; and serves as a clearing office for marketing.

Complete information as to the work of the association may be obtained from their Annual Report published in 1923. Financial support from the Seed Branch was continued during the past year to the extent of \$10,000.

## THE FEED DIVISION

The Feed Division is primarily concerned with the administration of the law governing the sale and inspection of live stock and poultry feeds. Those products which are subject to the provisions of the Feeding Stuffs Act are divided into three main groups, namely, commercial feeding stuffs, flour mill by-products, and chop feeds.

Commercial feeding stuffs include the numerous ready-mixed feeds offered in the trade, many of which are sold under proprietary names. Because of the extent to which by-product materials enter into the manufacture of these feeds it had become an increasingly difficult problem for purchasers to ascertain their true value or worth, or to detect adulterants that might be present. The control exercised under the law over manufacturers and their methods of naming, labelling and guaranteeing such products, has had a marked effect in preventing fraudulent and misleading practices and in maintaining uniformity in composition and quality, and has greatly facilitated the economical purchasing of concentrates where feeders have found it necessary to supplement home grown fodders.

In view of the numerous and wide-spread complaints arising out of the practices of millers in adulterating their wheat millfeeds with the screenings removed from the wheat before milling, special attention has been given to this problem. Not only was this practice generally condemned by feeders, but it

was a stumbling block in the way of the effective standardization of the several wheat by-products. An amendment to the Feeding Stuffs Act was passed by Parliament to correct this situation, and became effective from October 1, 1923. This amendment, together with the regulations thereunder, entirely prohibits the adulteration of wheat millfeeds with screenings, scourings, or any other foreign materials, and standardizes all flour mill by-products both as to name and chemical composition, as follows:—

Name	Minimum protein	Minimum fat	Maximum fibre
	p.c.	p.c.	p.c.
Bran.....	15.00	3.50	11.50
Shorts.....	16.00	5.00	8.00
Middlings.....	16.50	3.50	4.50
Feed flour.....			2.00
Mill screenings.....			8.00

The legal construction placed on this amendment gives it the further effect of making unlawful the use of pure wheat offal in the manufacture of commercial mixed feeds. While such an application has met with both opposition and support, according as the interests concerned are affected thereby, there is general accord that this provision, insofar as it is necessary to prevent a reversion to the former practices of adulterating millfeeds with inferior or worthless material, should be carefully guarded.

Investigation as to the classification and quality of screenings removed from the western grain crop at the terminal elevators, have been continued. It is now the general practice at terminal elevators to reclean these screenings and separate them for commerce into several more or less distinct classes of material. With the co-operation of the Department of Trade and Commerce, conventional standards of quality have been established for the various classes under the designations, Standard Recleaned Screenings, Oats Scalpings, Elevator Screenings, Refuse Screenings, and all shipments booked out are covered by grain inspectors' certificates bearing the grade designation of the material. There is little or no market in Canada for screenings which have not been recleaned to remove deleterious fine weed seeds and inert matter. The value accruing from the establishment of standards is, however, reflected in a domestic demand for the recleaned grades, practically equal to the supply. These recleaned grades, while sufficiently free from deleterious weed seeds and materials to render them palatable and wholesome for stock feeding purposes, nevertheless carry sufficient weed seeds of western origin to make their transportation to eastern provinces in the whole condition a matter for growing concern.

During the past year representative collections of milling and industrial by-products which are commonly employed in the manufacture of commercial feeding stuffs, have been assembled and supplied to all the principal agricultural colleges and schools throughout the Dominion.

## MARKETS AND FERTILIZER DIVISION

### MARKET REPORTING

Commencing November 21, 1923, seed, feed and fertilizer market reports covering Eastern Canada and important American and European markets were issued every two weeks in English, and since January first in French. The object is to supply farmers and dealers with authoritative information as to

## SESSIONAL PAPER No. 16

current supply, demand and prices of seed, feed and fertilizer. Interest in these reports is increasing as their value is becoming known, the mailing list having reached 8,000 by March 31. Information for these reports is received from 460 correspondents in Eastern Canada. Markets information from other countries is gathered through the Canadian Government trade commissioners and through direct correspondence with the Department of Agriculture, Washington, D.C. In addition to providing these reports through the mails, weekly summaries of seed, feed and fertilizer market conditions are broadcasted from the Canadian National Railway radio station, C.K.C.H., Ottawa.

## SEED MARKETS EXTENSION

The demand from farmers' organizations for information regarding seed warehouse plans and machinery continues to increase from year to year. Particularly in the seed producing districts of Ontario and the Prairie Provinces, farmers' organizations engaged in assembling and distributing farm supplies of various kinds are proceeding to reconstruct their warehouses with a view to storing, cleaning and shipping seed. In some districts there is a demand for plans and specifications of a small seed elevator suitable for handling local seed production co-operatively. Blueprint plans and specifications of this type of elevator were prepared by the Public Works Department in conjunction with the Seed Branch, and a copy was placed in the office of each county agricultural representative of the Provincial Departments of Agriculture. Interested persons may study them there free of charge, and if considered suitable for their purposes, may procure a complete set from this office at a nominal charge of \$2. If elevators are constructed, using at least some of the ideas contained in these plans, they should prove satisfactory from the standpoints of economy and efficiency in handling seed.

## FERTILIZER REGISTRATIONS AND RENEWALS

Under the provisions of sections 3 of the Fertilizers Act, 1922, registrations and renewals of registrations expire on July first following the date of issue, but may be renewed from year to year.

The total fees collected for registrations and renewals amounted to \$7,530.

The principal kinds of fertilizer for which application for registration was made include:—

- (1) chemical fertilizer of different but complete formulae;
- (2) fertilizer carrying organic nitrogen and phosphoric acid of different but complete formulae;
- (3) bone fertilizers;
- (4) tankage;
- (5) low grade nitrogen, phosphoric acid and potash materials which are not exempt from registration under Section 8 (b) of the Act.

A Fertilizer Advisory Board meeting was called at Ottawa in July, 1923, and on the recommendation of the Board additions were made to the regulations under the Fertilizers Act. These additional regulations have for their purpose the further limitation of the use of brand names and statements of guaranteed analyses, with a view to protecting the purchaser against being misled in buying fertilizer. Definitions were provided also for fish scrap, bone meal, and bone flour.

The results of analyses of official samples of fertilizer taken during the registration year ending July 1, 1923, were published in pamphlet form and distributed to interested persons. A total of 430 samples of fertilizer were taken

15 GEORGE V, A. 1925

by inspectors and analyzed by the official analysts. Three hundred and fourteen of these represented different brands of mixed fertilizer and fertilizer materials offered on the market. Based on the results of official analyses compared with the guarantees of vendors, the 314 brands may be classified as follows:—

1. Found to meet requirements of guarantee.....	97
2. Found to meet guarantee by compensation.....	64
3. Found deficient in excess of legal limits.....	116
4. Offered without the guaranteed analysis on the package, label or invoice.....	24
5. Offered without being registered as legally required.....	13
Total.....	314

A surprisingly large number of apparent infractions of the labelling and registration provisions of the Act were recorded. These infractions when investigated by inspectors were found to be due chiefly to a lack of knowledge of the Act and regulations. Court action was taken only in cases where violations were of a flagrant nature, as it was the first year of the operation of the Fertilizers Act, 1922, and the trade had not yet adjusted its business procedure to meet requirements. The publication of the official analyses has supplemented in a marked degree the work of the inspection staff in enforcing the Fertilizers Act. From the results of analyses the interested public is able to select those firms whose products are up to their guarantees of analyses.

In April, 1923, a fertilizer test competition was planned for agricultural societies. One was conducted last year by the Brompton Agricultural Society of Quebec, and it proved a marked success in teaching the farmers how to use fertilizers profitably on their own farms. The supervision of the competition was exercised jointly by the Seed Branch inspector and the Provincial Government of Quebec.

Representative fifty-pound lots of practically all the important materials used in fertilizer mixtures, and of brands mixed from these materials, were gathered for the purpose of putting up educational collections for use in agricultural schools. These collections with an explanatory pamphlet are now ready for distribution at a nominal charge of ten dollars.

#### MARITIME DISTRICT

This district comprises the three provinces, Prince Edward Island, Nova Scotia and New Brunswick. A district office is maintained in the Canadian National Railway station building, Truro, N.S. The work is directed by a district inspector, and four seasonal inspectors are employed during the busy season, more especially of the seed and fertilizer trade.

#### SEED PRODUCTION AND SUPPLY

The season of 1923, although one of remarkable growth, was not in most sections of this district best adapted for the production of farm seeds. Unfavourable weather delayed ripening, but autumn coming in and continuing fine resulted in a good crop of well filled oats and barley in almost every section of the Maritime Provinces. The only sections having a shortage of seed oats were in the northeastern counties of New Brunswick and parts of Cape Breton. Wheat did not develop so well, but in most cases was fit for seed.

The seed fairs, with one exception, were held in connection with the combined seed crop and cleaned seed competitions. In New Brunswick the standing field crop competitions will be replaced in 1924 by the combined seed crop and cleaned seed competitions, with special attention to seed oats, clover seed, and potatoes for seeding purposes. During the past season a combined competition was held in one county in oats and in another county in wheat.

## SESSIONAL PAPER No. 16

The only seed fair in the province was the Provincial Fair at Fredericton, which brought out a good exhibit of seed. In Prince Edward Island combined seed crop and cleaned seed competitions were held, one in each of the three counties in wheat, oats and barley. Eighty-eight entries produced over 35,000 bushels of Banner oats grading Registered and No. 1. At the seed exhibit held during "Farmers' Week" at Charlottetown there were over sixty entries of the finest Banner oats ever shown in Prince Edward Island, practically every sample weighing from forty to forty-three pounds per measured bushel. In Nova Scotia there were three combined seed crop and cleaned seed competitions in oats, with a total entry of forty-seven. In the Pictou county competition every competitor had good clean seed at bin inspection. In Antigonish and Inverness counties, owing to bad harvest weather discolouring the grain, only a little more than half entered for bin inspection. This seed has all been disposed of locally. In connection with these competitions two seed fairs were held, one at Antigonish and one at Mabou. The Maritime Seed Fair at Amherst, while exhibiting a good quality of seed, was not so large as the previous year, owing to the very late season delaying the farmers in threshing and cleaning their seed. Our inspectors acted as judges at all these fairs, which, with the competitions, are conducted by the Provincial Department of Agriculture with the financial assistance of the Seed Branch. The district inspector assists in training the judges for the competitions.

Prince Edward Island growers are supplying the seed oats shortage in northeastern New Brunswick, where, owing to the very dry season and shortage in the hay crop, many of the farmers cut the oats green for fodder. They are also sending considerable quantities to eastern Quebec. Quite a large number of orders for Registered seed oats have been filled for eastern Nova Scotia and New Brunswick points. This is largely for seed crop competitions this season.

## INSPECTION

Inspection work is fairly expensive in this somewhat scattered district, extending from Sydney to the head of the St. John river in New Brunswick, with many towns and villages away from the lines of railways. Last year 1,296 visits were made to points requiring inspection; 1,067 inspections were made of seed warehouses, 1,822 of feed, and 154 of fertilizer. There were six suspected violations of the Seeds Act, and as these were of a minor nature only one was recommended for prosecution, which was successfully conducted. Of 169 samples of fertilizer analyzed some thirty were slightly to considerably below guarantee. Most of these shortcomings apparently occurred through lack of knowledge of the Fertilizers Act. One case was recommended for prosecution where the vendor seemed inclined to persist in violation of the Act, and he was fined a hundred dollars. Nearly all fertilizers analyzed later in the season were up to standard. Eighteen samples of feeding stuffs were sent in for chemical analysis and eight for micro-analysis. Some of these were suspected violations of the Act, and as they had their origin with feed manufacturers and milling companies in other districts they were turned over to the district inspectors concerned and were dealt with in a satisfactory manner. So far this season our inspectors have inspected and sealed 1,520 bushels of Registered and Extra No. 1 seed; 19 carloads of oats were inspected and graded No. 1, and one car graded No. 2.

## EDUCATIONAL WORK

Samples of fertilizer were displayed, copies of the Seeds, Feeding Stuffs, and Fertilizer Acts were distributed, and information was given at a Seed Branch booth conducted at the Maritime Winter Fair, Amherst. The fertilizer inspector

addressed several meetings on the Act and on the general use of fertilizers. The district inspector addressed a number of meetings throughout the district, and conducted seed judging classes at the short courses which were held at the Agricultural College, Truro, and in People's Schools at Lawrencetown and Mabou. At all of these, explanations were given of the three Acts under our administration. He and his staff judged at local fall fairs and at school fairs, and were always given an opportunity to explain the work of the branch.

### QUEBEC DISTRICT

The inspection personnel of this district consists of a district inspector, with headquarters at Quebec city, and six permanent and seasonal inspectors at outside points. In order to cope with the increase of work on account of the new laboratory established in Quebec during the year, three employees were added to the office staff. One of these was an inspector who was brought in during the rush season to take charge of grading.

### SEED PRODUCTION AND SUPPLY

Seed production and supply is considered an important part of our work. To encourage this, 120 field crop competitions, 75 seed fairs and 40 combined competitions were held in the province during the year. There were 4,000 competitors for the field crop competitions, and 1,182 for the combined competitions. Through the combined competitions 52,000 bushels of seed oats and 12,480 pounds of clover seed were produced and tested in the laboratory. They graded as follows:—

—	Registered and Extra No. 1	No. 1	No. 2	No. 3	Rejected
	%	%	%	%	%
Oats.....	6	66	10	5	13
Clover.....		10	17	22	51

Over 25,000 bushels of No. 1 seed oats, produced in the combined competitions in the Montreal district, were marketed in Eastern Quebec at fifteen cents per bushel lower than the seed oats offered through the trade, and the growers received considerably more than they usually get for oats of the same quality.

Through an experiment conducted last year in co-operation with the Provincial Department of Agriculture, we were able to market this year one carload of Registered and Extra No. 1 Alaska oats. The price obtained for the growers was \$1.25 per bushel. This has encouraged them to organize for the production of this variety which commands a good market.

A new plan was introduced for the centralization, cleaning and marketing of clover and timothy seed in Quebec. A trial was made at Ste-Rosalie with two carloads of clover seed shipped by the farmers to the elevator of the co-operative society. The results have been satisfactory for both the growers and the society. This plan will enable the growers of clover and grass seed to put these crops on the market with greater facility, and will result in a greatly increased production.

### REGISTERED SEEDS

Under the new Seeds Act the inspection work of the Canadian Seed Growers' Association was transferred from the Provincial Government to the Seed Branch. About 4,000 bushels of seed oats were registered, and the same

## SESSIONAL PAPER No. 16

quantity was rejected on account of the presence of barley and bad colour, the latter being caused by the prevailing bad weather in the Quebec District last year. Most of the Registered seed oats was cleaned at Ste-Rosalie under the plan established for clover and grass seed. The market for this grade of seed was very good and the growers were well satisfied with the service obtained.

## INSPECTION

The number of points covered by the inspectors during the year was 1,170 and visits were made to 1,308 seed merchants, 1,856 feed, and 219 fertilizer merchants.

With the introduction of the new Seeds Act more attention had to be given to the inspection of seed. This Act is so different from the old Seed Control Act that it will take two or three years for the dealers and farmers to become familiar with its provisions. Tolerance had to be exercised with the trade because of their lack of knowledge of this new legislation. The good results, however, will soon be felt, as Quebec was often made the dumping ground for cheap seeds with tags indicating in small type the presence of weed seeds. Several articles were written on this particular subject, and reports have come from farmers expressing their appreciation of the new Act which compels the seed dealer to sell under grade.

The reports on fertilizer inspection show that improvements have been made in the trade over last year. The violations were fifty per cent less than during previous years, and the farmers are becoming more familiar with the different kinds of fertilizers and their relative values.

Our inspection of feeding stuffs has helped considerably in eliminating from the market low grade feeds which were sold at high prices. Although very few prosecutions were taken, co-operation from the large mills and conscientious dealers has forced out of the market the unscrupulous feed dealers who take advantage of the public by misrepresenting the material they offer for sale.

## FERTILIZER EXPERIMENTS

The demonstration organized last year in the county of Richmond, for the purpose of showing the farmers the kind, value and best way to apply fertilizers, is being followed with a lime demonstration. For these demonstrations 40 farmers are selected throughout the county. As the soil is very acid through that district very good results are expected from the work with lime. The fertilizer experiment gave specially good results with potatoes, some fields yielding as much as 200 bushels per acre in favour of fertilizers. With the other crops, namely corn and roots, there was practically no benefit.

## EDUCATIONAL WORK

The inspectors attended the seed fairs held in the respective sub-districts and gave lectures on the new Seeds Act and the work of the branch. Fertilizers, feeding stuffs and seed production were discussed at special meetings throughout the district. Several articles were prepared and published in the agricultural press and weekly papers. Judging was done at the provincial seed fair and at some of the local fairs. The district inspector attended the monthly meetings of the Provincial Seed Board.

## EASTERN ONTARIO

This district comprises eastern Ontario from York county, northern Ontario, as far west as lake Nipigon, the counties of Wright and Pontiac in Quebec. The district inspector has headquarters at Ottawa, and four permanent and seasonal inspectors are conveniently located in the district.

## SEED PRODUCTION AND SUPPLY

Bad weather prevailed in northern Ontario for harvesting the grain crops. Much of the grain was damaged in colour and some in germination. Throughout eastern Ontario and western Quebec dry weather, which set in about hay-making time, affected particularly the late sown crops. Oats in many places did not fill well, and there was a large percentage of light weighing oats this year. The seed, however, proved to be vital and there is an adequate supply of seed grain. It is probable that in some sections farmers may prefer to feed their lighter oats and buy good western oats for seeding purposes. Central Ontario had a splendid crop of alsike seed estimated at 100,000 bushels, but the red clover seed crop was not so good as last year. A large acreage of red clover was saved for seed in eastern Ontario, but the most of it grades only No. 2, not on account of weed seeds but rather because of a large percentage of brown and shrunken seeds. Considerable quantities of alfalfa seed were produced, mostly in central Ontario, but there was a falling-off in sweet clover seed production. The barley crop was a very good one. The yield of garden peas was below the average on account of the very dry weather which prevailed about blooming time and later affected the development.

## INSPECTION

During the spring special emphasis is laid on seed and fertilizer inspection. More attention is paid to feeding stuffs throughout the rest of the year. Some 2,340 places were visited and received 2,384 seed inspections, 3,058 feed, and 12 fertilizer, or a total of 5,079 farmhouse inspections. There were discovered 216 violations of the Seeds Act, most of which were minor offences, 48 feed violations, and 4 fertilizer. Four prosecutions were successfully conducted, and several other cases were settled by adjustments between the parties concerned.

Thirteen agricultural societies carried on the combined competitions. This entailed about 200 field and 150 bin inspections. Other inspections were made for individual growers engaged in the production of high-class seeds, and the following kinds and quantities qualified for sealing in sacks:—

	Registered	Extra No. 1
	bushels	bushels
Oats.....	2,633	1,746
Barley.....	446	..
Wheat.....	132	..
Total.....	3,211	1,746

## EDUCATIONAL WORK

Educational work was carried on at a number of exhibitions in the district. Assistance was given in conducting the eastern Ontario short course in field crop judging at the Central Experimental Farm, and also at a short

## SESSIONAL PAPER No. 16

course held at New Liskeard. The seed department of the Ottawa Winter Fair was also under our direction, and special features was made of a competition in seed judging open to young farmers in eastern Ontario.

## WESTERN ONTARIO

The Western Ontario District comprises that portion of Ontario west of and including the counties of York, Simcoe, Muskoka and Parry Sound. A district office and laboratory are maintained in the General Post Office building, Toronto. The organization for inspection includes a district inspector and staff at Toronto, with four permanent and seasonal inspectors stationed at convenient points in the district.

## SEED PRODUCTION AND SUPPLY

Western Ontario is well adapted for the production of seed wheat, oats, barley, rye, buckwheat, peas, beans, corn, alsike, sweet clover, red clover, alfalfa and blue grass. In 1923 the alsike crop was above average, which increased the amount of seed available for export. Sweet clover is used largely for pasture and for ploughing under. Much of the seed has been exported and the supply which remains is not more than equal to the demand. Red clover was not a heavy crop and some imported seed will be required for the 1924 seeding. The alfalfa seed crop was the largest in the history of the district. The production of this seed has increased enormously. There is a sufficient amount of high quality seed to supply the assured heavy demand for seeding in Ontario, and some has been sold for export. The Peel County Alfalfa Seed Producers' Association offered for sale 3,500 bushels of No. 1 and 320 bushels of No. 2 seed, which was grown by sixty farmers. An average crop of blue grass seed for the district is estimated to be 96,000 bushels, and most of this is sold for export.

Large areas are devoted to the production of Dent and Flint corn, and a large percentage of the crop is saved as seed. Ontario grown seed corn is increasing in favour and in normal years the district will produce sufficient to supply the demand. The 1923 seed corn crop was much below normal. It suffered from early frosts and when harvested the grain was comparatively immature and contained a high percentage of moisture. During the early and mid-winter seasons heavy frosts seriously affected the vitality of the seed. The supply of good seed is therefore limited, and the amount of No. 1 grade is not sufficient to meet the demand. A considerable quantity will be offered as No. 2 and No. 3 grades.

Competitors of the combined seed crop competitions and members of the Canadian Seed Growers' Association produced large quantities of good seed grain, most of which graded No. 1. A satisfactory portion was suitable to seal in sacks as Registered or Extra No. 1, and the production of these grades of seed will be greatly increased during the coming year.

## INSPECTION

During the year 1,054 visits were made to points requiring inspection; 3,321 warehouses were visited, namely, seed 2,096, feed 1,529, and fertilizer 118; 1,083 complaints were received including 316 seed, 591 feed, and 176 fertilizer. The number which proved to be suspected violations were, seed 78, feed 212, and fertilizer 48. There were 19 prosecutions under the Seed Control Act and 2 prosecutions under the Feeding Stuffs Act. Many of the violations were of a minor nature, in which case a warning has been issued and a record kept.

There was a decided increase in the number of field and bin inspections on account of various combined seed crop and cleaned seed competitions and

15 GEORGE V, A. 1925

organized associations for the production and sale of certified seed. Inspections were made of 175 fields of alfalfa, 317 fields of corn, 312 fields of oats, and 1 field of barley. There were 264 bin inspections, alfalfa 22, corn 38, and oats 204.

Seed inspected and sealed under grade:—

	Registered	Extra No. 1	No. 1	No. 2
	bushels	bushels	bushels	bushels
Oats.....	646	2,384		
Barley.....	214			
Flax.....			2,085	
Alfalfa.....			3,090	352
Total.....	860	2,384	5,175	352

There is an increasing demand for the better grades of seed, for standard feeds, and for fertilizers of superior value. The quality of cereals offered by farmers for local seeding is much improved and will be a strong factor towards increasing cereal production. Bran, shorts, middlings, feed flour, crushed oats, and screenings particularly are considerably improved in quality. Standard Recleaned Screenings have been purchased for feeding, but elevator screenings and refuse screenings are not in demand. Oats Scalpings are used sparingly as compared with Standard Recleaned Screenings.

#### EDUCATIONAL WORK

The district inspector was president of the Ontario Provincial Winter Fair, acted as judge of corn at the Essex Corn Improvement Association Exhibition and at the Peninsular Winter Fair, and as judge of seeds at most of the leading exhibitions. The permanent inspectors acted as judges at many of the seed fairs in the local districts, and delivered addresses on subjects pertaining to seeds, feeds and fertilizers.

Exhibits of seed at the Royal Winter Fair and the Ontario Provincial Winter Fair were sampled, analyzed and graded at the laboratory in Toronto as a basis for judging. Premiums were not awarded on seed which did not grade.

The annual meetings of the Ontario Fairs and Exhibitions and the Ontario Field Crop and Seed Growers' Associations were attended and addresses were delivered pertaining to seed growing. Addresses on production and judging of seed were given at Junior Farmers Association meetings. Merchants, manufacturers and farmers have visited the office at Toronto and received information and advice concerning the production, manufacture and sale of seed, feed and fertilizer, and the laws governing them. Inspectors have addressed meetings on the combined seed competitions, and made suggestions with regard to the sowing, harvesting, threshing, cleaning and grading of seed to be offered for sale. At several points addresses were given on the seeds, Feeding Stuffs and Fertilizers Acts. The inspection staff has worked in co-operation with the district representatives and other provincial officials in the production of seed, particularly alfalfa and corn.

#### MANITOBA AND SASKATCHEWAN

This district extends eastward into Ontario as far as lake Nipigon. The district office and laboratory are located at 173 Portage avenue East, Winnipeg. Sub-offices are maintained at 216 Grain Exchange building, Fort William, and Post Office building, Regina, with a permanent inspector at each. In addition four seasonal inspectors are employed with headquarters at Winnipeg, Brandon, Saskatoon and Moose Jaw.

## SESSIONAL PAPER No. 16

## SEED PRODUCTION AND SUPPLY

Favourable weather prevailed during the 1923 season, resulting in heavy grain crops in Saskatchewan and northern Manitoba. Southwestern Saskatchewan had some trouble with grasshoppers which were successfully combatted. Southeastern Saskatchewan and more particularly southern Manitoba suffered seriously from rust, and heavy crops yielded poorly. On this account production of Registered wheat in Manitoba was almost nil, but a surplus was produced in Saskatchewan.

The seed centre idea is being fostered by the Saskatchewan Department of Agriculture and the university, with several districts specializing in seed wheat, oats, barley, sweet clover, millets and brome grass. In Manitoba seed centres are being developed with sweet clover, alfalfa, corn and oats, and in northern Ontario are well known centres at Oxdrift and Emo. With the exception of Oxdrift the cleaning and marketing problem is causing seed growers concern and is being studied by a committee in each province.

During the year there developed a shortage of red clover, sweet clover, barley and flax. There was a plentiful supply of wheat and oats, and an increased amount of local grown corn, millet, etc. Interested districts in each province have been organized for the production of early seed corn.

Saskatchewan secured sweepstakes and second place for barley at the Chicago International.

Six combined field crop and cleaned seed competitions with wheat were successfully conducted in Saskatchewan, one with wheat and one with oats in Manitoba, and one seed oat competition at Emo, Ont.

New diseases are becoming a source of anxiety, basal glume rot being prevalent on wheat in the northern half of both provinces.

## INSPECTION

Points requiring inspection received 722 visits. Stores and warehouse inspections were made for seed, 2,323, and for feed, 1,030. There were 63 suspected seed violations and 52 suspected feed violations. Two farmers and one company were prosecuted under the Seed Control Act. A Winnipeg milling company was prosecuted under the Feeding Stuffs Act for selling oats scalpings as No. 2 Oat Chop.

Inspectors reported fewer carload shipments of seed than usual, also less bulk seed stocked by retailers. On the whole there was improvement in quality and reasonable observance of regulations. Farmers are found selling seed without grade in violation of section 3 of the Seeds Act, 1923. The new Act resulted in an increased number of samples for laboratory test and grade.

Contrary to expectations, corn imported into this district for 1924 seeding proved of fairly high vitality, perhaps due to careful buying and the desire of our seedsmen to handle No. 1 grade. Importations of carrot, parsnip and spinach cleared customs by narrow margins of vitality, and a few lots were deported. Some lots of vegetable seed had to be cleaned to remove noxious weed seeds before being released by customs officials. Customs receipts totalled 3,293,520 pounds.

Inspection of crops for registration by the Canadian Seed Growers' Association necessitated visits to 172 districts and over 300 farms, representing 19,000 acres of wheat, oats, barley, flax, rye and other seed crops. Only a small percentage of growers applied for seed inspection and sealing in sack. Slow demand, faulty system of cleaning and marketing, resulted in sales as ordinary grain for ready cash.

## Inspections to March 31:—

	Registered	Extra No. 1
	bushels	bushels
Wheat.....	10,322	1,538
Oats.....	5,384	2,150
Barley.....	150	.....
Flax.....	60	.....
Total.....	15,916	3,688

Feed manufacturers and dealers under close observation show improvement in quality of products and in tendency to observe the law. A close check on screenings particularly at Fort William indicated Standard Recleaned Screenings and Oats Scalpings to be of satisfactory quality. The inspector stationed at Fort William saw a sample of every shipment, and informed district inspectors regarding quality and necessary particulars of shipments en route to their districts.

## EDUCATIONAL WORK

The district inspector attended the annual meeting of the Canadian Seed Growers' Association and led in the discussion of a paper on seed control. He attended the provincial seed fairs and acted as judge at Eaton's Exposition of Western Canada Farm Products. The Branch had a booth at Eaton's Exposition in which to demonstrate and meet the public. Meetings of seed growers were addressed by the district inspector. Several local meetings were addressed by field inspectors and a lecture was given to the students at Saskatoon.

Courses were arranged at the Manitoba and Saskatchewan Agricultural Colleges for men going out on crop inspection work. Following a staff conference at Ottawa the district inspector called together his field staff to review and plan their work and reach a better understanding of the new Seeds Act.

## ALBERTA AND BRITISH COLUMBIA

The organization in this district includes an inspection office and a seed laboratory at Calgary. The chemical analysis of feeds and fertilizers is performed by an official analyst at the University of Alberta, Edmonton. The trade is controlled by a district inspector, two permanent inspectors, one in each province, and four seasonal inspectors. The permanent inspector in British Columbia is also a seed production specialist.

## SEED PRODUCTION AND SUPPLY

Interest in the production of pure seed by farmers in Alberta has continued to increase. Growers now realize that if they are going to obtain the highest grade of commercial grain and thus secure the highest price, they must sow only pure varieties of grain. Alberta growers again brought distinction to the province and to Canada in securing so many high awards at the Chicago Hay and Grain Show. Major H. G. L. Strange won first placing and the Grand Championship in wheat, while another grower in the extreme north, at Grande Prairie, secured third. The same grower who secured highest awards in oats last year, Mr. J. W. Biglands, Lacombe, took first place and Grand Champion-

## SESSIONAL PAPER No. 16

ship again this year. This honour has been captured by our growers for four consecutive years. Nunemaker Brothers, Brooks, captured highest honours on red clover seed, and Major Strange secured first place on yellow field peas. In all, our growers secured twenty-two out of thirty-five prizes in oats, five prizes in wheat, one in red clover, two in timothy, three in alfalfa, three in field peas, one in Durum wheat, one in white winter wheat, four in barley, one in rye, and one in flax. Such a large number of awards has been an excellent advertisement for Alberta, as it is recognized that this exhibition is unquestionably the best of its kind in the world. All Alberta growers competing in the cereal classes showed registered seed and are members of the Alberta Seed Growers' Association.

Field inspections were made for all growers of registered grain. Through the kind co-operation of the University of Alberta and the Provincial Department of Agriculture we were able to secure qualified officials to assist our inspectors in this work. A total of 375 inspections were made of cereal crops and 182 of crops of Grimm alfalfa. Our inspectors graded as Registered and Extra No. 1 the following kinds and quantities of seed:—

—	Variety	Registered	Extra No. 1
		bushels	bushels
Wheat.....	Ruby.....	2,528	172
	Marquis.....	18,547	3,313
Oats.....	Victory.....	9,650	3,501
	Banner.....	16,751	5,645
Barley.....	Bark's.....	640	15
Totals.....		48,116	12,646

Approximately four-fifths of this grain was cleaned and marketed through the provincial seed cleaning plant at Edmonton. The Provincial Government provided this plant and operate it for the benefit of the growers. Representatives from the executive of the Alberta Seed Growers' Association and from the Dominion and Provincial Seed Departments form the Provincial Seed Board, which acts in an advisory capacity in the operating of this plant and the marketing of seed. The experiment has worked very satisfactorily and has made it possible to place on the market a uniform quality of seed, which has undoubtedly been largely responsible for the success that our growers have attained in the profitable marketing of their product.

The season was very unfavourable for alfalfa seed, but about 100,000 pounds were produced, of which the following quantities have been inspected:—

—	Variety	Registered	Extra No. 1
		pounds	pounds
Alfalfa.....	Grimm.....	14,961	4,940

Approximately 440,000 pounds of timothy seed were produced, and of this amount the Pincher Creek district produced and marketed 212,000 pounds.

The United Seed Growers, Pentteton, have been able to liquidate all their old indebtedness which was incurred during the war years. This organization is not, however, receiving the support of the majority of the seed growers in British Columbia, and it has been recommended to the Provincial Government that they take over their plant and run it in a similar manner to the

15 GEORGE V, A. 1925

operating of the cleaning plant by the Alberta Government. The following quantities of seed were produced:—

	Pounds
Peas (canners).....	132,016
Peas (garden).....	39,798
Beans (garden).....	8,000
Carrot (garden).....	250
Onion.....	4,125
Swede turnip.....	711
Mangel.....	6,210
Sweet corn.....	10,100
Other small seeds.....	500

The growers are preparing to produce Registered and Extra No. 1 seed, as it is realized that only by producing the highest grades can a satisfactory profit be made. Recognition has already been given to 240 pounds of Sludstrup mangel seed which was graded Extra No. 1.

#### INSPECTION

Inspectors made 641 visits to 350 towns and cities, making 2,033 inspections. The inspections covered 843 seed dealers, 721 feed dealers, 82 fertilizer dealers, 49 feed manufacturing plants, and 14 fertilizer manufacturing plants. It was found necessary to have only one prosecution under the Seeds Act and one under the Feeding Stuffs Act. Inspectors have been giving a great deal of attention to educating seed merchants and dealers in regard to the new requirements under the Seeds Act, 1923. Merchants who understand the Act have expressed themselves as heartily approving the new requirements, which place recognition on the highest quality of seed.

The inspectors submitted 57 samples of fertilizers for analyses by the official analyst. The results indicate that many manufacturers were putting out fertilizers inferior in quality to their guarantee. This appears to have been done through a misunderstanding of the requirements, and efforts are being directed to educating the manufacturers in this connection.

They have also submitted for chemical analyses 138 samples of feeding stuffs. Because of the changes made during the year in the Feeding Stuffs Act with regard to the mixing of flour mill by-products, there has been great opposition especially from the smaller manufacturers who mix for the retail trade. Millers are found to be manufacturing within the requirements.

#### EDUCATIONAL WORK

The district inspector again acted as chairman of the Provincial Seed Board, also as vice-president of the Alberta Seed Growers' Association. These organizations endeavour to promote interest in seed production, and act in an advisory capacity to growers and to the Provincial Government in regard to the seed cleaning plant operations, the marketing of seed, the holding of local and provincial seed fairs, standing field crop and cleaned seed competitions. It was considered advisable to defer the establishing of another provincial seed cleaning plant in southern Alberta, but the one at Edmonton was operated day and night. Two seed inspectors were provided for this work.

A Provincial Seed Board has also been organized for British Columbia. The local seed inspector is a member of this Board and the district inspector is an honorary member. At the request of the Provincial Department of Agriculture the Board is making a complete survey of the possibilities in the production and marketing of seed, and when full particulars are available some changes may be made in the present arrangement of giving assistance to seed production.

## SESSIONAL PAPER No. 16

The alfalfa growers in the Brooks district have organized into the Grimm Alfalfa Seed Growers' Association of Alberta, Limited, and with the assistance of the Canadian Pacific Railway have erected a seed cleaning plant valued at ten thousand dollars and equipped with the most modern cleaning machinery.

The timothy growers in the Pincher Creek district are organized as the Pincher Creek Co-operative Growers' Association and have this year installed their own cleaning machinery, which arrangement is working much more satisfactorily than the former one of shipping seed for cleaning at the Government elevator, Calgary.

Great interest has been aroused in the production of seed corn in the south-eastern part of Alberta. Growers are finding that if proper strains are secured, profitable crops can be harvested. It is the intention to hold a provincial corn show at Medicine Hat this coming year to stimulate interest in this direction.

The district inspector judged and gave addresses at the provincial seed fairs in Alberta and British Columbia, and attended several meetings throughout the district in the interests of seed production.

## ENTOMOLOGICAL BRANCH

The work of the Entomological Branch, in addition to the administration of the Destructive Insect and Pest Act, comprised investigations relating to insects affecting field and garden crops, forest and shade trees, fruit crops, greenhouse and ornamental plants, live stock, etc. The officers attached to the Division of Field Crop and Garden Insects, Division of Forest Insects, Division of Foreign Pests Suppression and Division of Systematic Entomology, have all had a very active year as a result of which the department is in possession of further important information on the life habits and control of many of our important insect pests.

Under the direction of the Dominion Entomologist, the Regulations under the Destructive Insect and Pest Act have been administered in so far as they refer to insect pests. The following amendments to the regulations, relating to insects, were passed during the year April 1, 1923, to March 31, 1924.

By Order in Council passed on May 31, 1923, the Order in Council passed on May 21, 1922, was amended by adding the additional territory in the United States found to be infested by the European corn borer.

By Order in Council passed on June 26, 1923, the Regulations under the Destructive Insect and Pest Act, as established by Order in Council on July 17, 1917, and all amendments thereto, were rescinded, as on the first day of September, 1923, and revised regulations substituted therefor, which now appear as general regulations, foreign regulations and domestic regulations.

## DIVISION OF FIELD CROP AND GARDEN INSECTS

In the Prairie Provinces a further outbreak of grasshoppers occurred in 1923, particularly in the province of Alberta. These insects were materially reduced in Saskatchewan and Manitoba by the presence of natural enemies and disease. In British Columbia outbreaks were also investigated by our officers and systematic collections of species made, demonstrations in mixing and distributing poisoned baits given, and information generally disseminated at farmers' meetings. In this latter province it has been established that by a proper rotation of the range lands the native vegetation is not seriously damaged by grasshoppers alone. The work of our officers is being supported by the Department of Lands for British Columbia so that a proper system of range rotation may be effected by the owners of stock, horses and sheep. One may expect that

in due course the immense range areas of the interior section of British Columbia will be enabled to carry a greater quantity of stock in the years to come with little depletion of the native vegetation.

Reports received from our officers indicate that the western wheat-stem sawfly now occurs in practically all of the wheat growing areas of Manitoba, and further, that it has extended its ranges in Saskatchewan and Alberta. The farmers in infested areas are recognizing the value of cutting the grain on the green side; in other words four or five days ahead of the regular time of cutting. Losses by this insect in Manitoba, while of a serious nature in 1923, were not so widespread or important as in 1922, being due in many localities to the saving of the crop by cutting it on the green side.

The infestation of the European corn borer has been further studied and "clean-up" campaigns among farmers were organized in Elgin county, Ontario, early in the spring and autumn of 1923 to demonstrate the value of green farming in the control of this insect. Biological studies were carried on at Port Stanley, Harrow, and other points in southwestern Ontario to discover any possible variations in the life-history of the borer. The advent of this insect into the corn growing areas has brought very clearly to the front the absolute necessity of properly disposing of crop remnants. Better ploughing methods at stated intervals in the course of the year are being adopted and selective planting of corn is being practiced. These agricultural methods, while bearing upon the control of the European corn borer, are undoubtedly indirectly responsible for the control of other insect pests and for the better cultivation of crops. In the area which our officers have used for demonstration purposes there has been during the last two years a marked reduction in the corn borer infestation, and in areas where fields of corn were very seriously damaged in 1921, practically no commercial injury has since occurred. The insect, however, has spread into new townships at the present time. One hundred and seventy townships in Ontario are infested, covering an area of 13,266 square miles.

In the province of Alberta the control of the pale western cutworm has been the major problem for a number of years. An intensive study has been undertaken by our officers and we are now able to predict in large measure where serious damage is likely to occur on the basis of rainfall during the previous season. Furthermore, satisfactory control measures have been established in the matter of soil cultivation or the withholding of cultural operations in certain seasons of the year which harmonize with the life-history of the insect. This, of course, has resulted in much saving of crop in the southern sections of the province where recommendations have been especially made.

In the alfalfa regions of Alberta, the alfalfa thrips and the alfalfa seed chalcid are both assuming important proportions. The study of these two insects is only commencing but sufficient has been established to indicate that an early clipping of alfalfa, two or three weeks earlier than normally occurs, is sufficient to control these insects in alfalfa fields without endangering the yield of hay or seed.

Other investigations carried on by officers of this Division related to the cabbage butterfly, root maggots, flea beetles, wireworms, potato insects, etc.

#### DIVISION OF FOREST INSECTS

Important studies of the spruce budworm have been completed and are soon to be published. In 1923, the officers of this Division obtained additional data from the dead timber in different localities. Active budworm injury was not found in 1923 in Quebec or in the Maritime Provinces. A small outbreak was investigated in the Rainy River district of Ontario. Our recommendations regarding future outbreaks of this insect relate to the removal of mature balsam trees

## SESSIONAL PAPER No. 16

and special methods of lumbering suitable to the locations, with a view to maintaining a healthy vigorous stand of timber throughout all eastern coniferous forests.

The study of the eastern spruce bark beetle in the Gaspé peninsula of Quebec has been continued and this has included surveys in infested areas as a result of which recommendations have been made to lumber companies concerned. This investigation will be continued while the opportunity is at hand so that needed information will be available for the future as well as during the continuance of the present outbreaks.

Control work in connection with the pine bark beetles in British Columbia was continued in 1923 in co-operation with the Provincial Forest Branch. This control work has already saved an immense amount of valuable timber and it is expected that this co-operative work will continue so as to include all the infested yellow pine stands in British Columbia, as well as infestations in other timber trees. In August, 1923, an entomologist was appointed to conduct investigations in shade tree insects in the Prairie Provinces and a laboratory for this work was established at Indian Head, Sask. This work is being conducted in co-operation with the Dominion Forestry Branch and the Dominion Experimental Farms Branch. These investigations will cover: (1) a general survey of the situation with respect to insects affecting shade trees, (2) detailed inquiry into the most important and the most urgent problems and (3) methods of control. Our officer made a survey of the forest tent caterpillar outbreaks in 1923 in southern Saskatchewan and southern and western Alberta south of Edmonton. A study of shade tree insects has also been continued in eastern Canada, particularly at the forest insect laboratory near Aylmer, Que. The establishment of forest sample plots in various sections of eastern Canada has brought together a vast amount of valuable information regarding the injury caused by insects and other enemies. During 1923, further new plots were laid out in the provinces of New Brunswick and Quebec.

An exhaustive study of wood borers in fire-killed timber and logs has been incepted in the province of New Brunswick and already through studies made by our officers important recommendations have been made which resulted in savings to the New Brunswick Crown Lands Department of many thousands of dollars in stumpage dues.

Other investigations conducted by officers of this division related to the satin moth, the larch sawfly, Douglas fir beetle, lodge pole pine beetle, etc.

## DIVISION OF FOREIGN PESTS SUPPRESSION

The work of the officers of this division has to do with the immediate enforcement of the regulations under the Destructive Insect and Pest Act in so far as insect pests are concerned. On account of the revised regulations under this Act, effective September 1, 1923, the work regarding enforcement has increased greatly. This work includes the issuance of permits for proposed importations of nursery stock from all foreign countries; the importation of nursery stock entering Canada from all countries other than the United States; the supervision of inspection headquarters at the importation ports maintained at St. John, N.B.; Montreal, Que.; Niagara Falls, Ont.; Ottawa, Ont., and Vancouver, B.C., the establishment and maintenance of quarantines and embargoes against foreign pests, studies of foreign pests likely to be introduced into Canada, etc. This work, which is largely of a preventive nature, has increased considerably during 1923. Not only have our officers been concerned in the examining of imported nursery stock to discover such pests as the gipsy moth,

15 GEORGE V, A. 1925

brown tail moth and other insects which are carried on such stock, but they have also been conducting important scouting work within Canada as a result of which the spread of such pests as the European apple sucker and the European corn borer have been prevented. As has previously been pointed out, experience has shown the necessity for preventing as far as possible the introduction and spread of destructive pests and diseases. In the case of the European corn borer particularly, the double quarantine which has been placed on Middlesex and Elgin counties in Ontario has undoubtedly added very considerably in confining the serious outbreak of the corn borer in these sections of the province. The movement of corn from these counties is absolutely forbidden.

During the importation season of 1922-23 a total of 2,883,122 plants classed as nursery stock entered Canada from France, Belgium, Holland, Great Britain, Japan, Italy, Luxemburg, Germany, Poland and United States. All of these plants were examined by inspectors and 71 shipments were found to be infested with foreign pests. The value of plants, trees, shrubs, vines and florists stock, but not including cutflowers, imported into Canada for the year ending March 31, 1923, was \$928,078.

The new fumigation and inspection building established jointly by the Federal Department of Agriculture and the Provincial Department of Agriculture for British Columbia was completed in the spring of 1923. It is one of the most modern plant inspection buildings in existence.

The new regulations under the Destructive Insect and Pest Act which went into effect September 1, 1923, require all importers of nursery stock which includes trees, shrubs, vines, roots, perennials, green house plants, etc., to secure permits. All plants and plant products from countries other than the United States are subject to inspection.

The Dominion Entomologist is Chairman of the Destructive Insect and Pest Act Advisory Board and the Chief of the Division of Foreign Pests Suppression is the Secretary.

The European apple sucker has been spreading gradually in Nova Scotia each season. Scouting is carried on annually to determine this spread and all infested areas are placed under quarantine. No nursery stock may be transported unless it is accompanied by either a certificate or a permit. The total area now infested by the apple sucker covers 3,750 square miles. During 1923, 237 certificates and 311 permits were issued for the movement of 103,381 plants.

Scouting for the gipsy moth was continued in the province of Quebec in the fall of 1923, the area investigated being adjacent to the international boundaries of New Hampshire and Vermont. This was done on account of the gradual spread northward of this pest. Early in October, a very serious infestation of the gipsy moth, comprising about 5,000 egg clusters was found in Albany township, Vt., one half mile from the Quebec boundary. To assist in this scouting work two trained scouts were kindly furnished by the United States Department of Agriculture. No egg masses of the gipsy moth have as yet been found in Quebec province.

The brown tail moth suppression work in New Brunswick and Nova Scotia was continued during the year. In New Brunswick no nests were found. In Nova Scotia 492 nests were found in 1922-23, as compared with 979 collected the previous season.

In the province of Alberta in 1923, scouting for the alfalfa weevil was continued. A total of 491 farms were visited. As yet no specimens of this important pest have been discovered in Canada.

## SESSIONAL PAPER No. 16

## THE DIVISION OF SYSTEMATIC ENTOMOLOGY

The maintenance and building up of the National Collection of Insects constituted the main activities of the officers of the Division of Systematic Entomology. During the summer months the time of the divisional staff is largely spent in making faunal collections of much interesting material. As a result of these activities more than 30,000 specimens were added in 1923 to the National Collection. During the year, 150 species of insects new to science have been described and types of these deposited in the collection. The value of the National Collection is becoming more and more apparent. Field officers of the Entomological Branch are now able to secure prompt and reliable determinations of insects occurring in their respective localities. Frequently these are of decided economic importance. Schools and other institutions have also during the year availed themselves frequently of the services of our entomologists.

Important studies have been made of the Ephemeroidea fauna of Canada, which insects are of considerable economic importance as food for fish. Further studies have also been made of Canadian Tabanidae, known commonly as horse-flies. Other important studies have been made in the Tortricidae (leaf-rollers), many species of which are of economic importance; Diptera, particularly the Asilidae (robber-flies); Syrphidae (hovering-flies); Aphididae (plant lice); Orthoptera (grasshoppers); Thysanoptera (thrips), etc.

## NATURAL CONTROL INVESTIGATIONS

Through the courtesy of the United States Department of Agriculture in furnishing our officers with breeding material of an important parasite of the European corn borer, imported from France, excellent progress was made in building up a strong colony of the parasite in 1923 at our St. Thomas, Ont., laboratory. This parasite known as *Habrobracon brevicornis* is a very active one and during the year, from the original breeding stock 585,000 adults were reared and liberated in the more heavily infested corn borer districts of Ontario. As an indication of the work necessary in breeding this material, it is of interest to state that it was necessary to collect by hand approximately 50,000 corn borer larvae to serve as hosts for the parasite.

The predatory mite, *Hemisarcoptes malus*, introduced into British Columbia in 1917, to prey upon the oyster shell scale, has been found to have practically exterminated the scale upon the trees in certain sections on which it was introduced. Recent examination of adjacent areas indicates that the mites are numerous and that they have become well established in surrounding orchards.

In Nova Scotia, the apple sucker fungus, *Entomophthora sphærosperma*, has had considerable attention and much progress was made in the artificial spread of this fungus. For the first time in history this disease was grown artificially in cages and then spread from such cages into orchards infested by the apple sucker. By this means an epidemic was started among the apple suckers, nearly a month earlier than had been possible the previous year. The artificial spread of the apple sucker fungus in the Annapolis Valley, Nova Scotia, particularly in that section with Wolfville, as a centre, contributed to an important degree in increasing the apple crop in such section where many large orchards are located.

Further important data has been secured regarding the natural control of the large larch sawfly, tent caterpillar and other important pests.

## FRUIT INSECT INVESTIGATIONS

During 1923, an important study of the codling moth in the province of Ontario was incepted, having for its chief object the discovery of a simple means of determining at what time the application of a "cover" spray will give

maximum results in preventing the injury known as "side-worm" injury. This investigation involves, among other things, a prolonged careful study of the effect of meteorological factors on the behaviour of the insect. During 1923, a marked increase of the fruit-tree leaf-roller was noted in the province of British Columbia. Control investigations have been concerned largely with establishing the value of miscible oil sprays. Much important information has been secured on the life-history of this insect.

In the province of Quebec our officers have demonstrated the control of the apple maggot under commercial conditions by spraying trees in infested orchards with lead arsenate or calcium arsenate mixtures. Orchards in which the fruit two years ago was wholly destroyed by the pest, in 1923, gave excellent returns. The Fameuse apple is a variety commonly attacked by this insect, the maggot of which makes tunnels through the flesh, rendering the fruit unfit for use.

The apple curculio and the plum curculio have again required attention, the former in Quebec province and the latter in Ontario, as well as Quebec. Observations have been continued and further evidence of the value of arsenate of lead sprays at certain definite periods has been obtained. The control of both of these orchard pests is very similar.

In the Okanagan Valley of British Columbia, the blister mite of apple has developed into an important pest. During 1923, experiments were conducted jointly with the Provincial Horticultural Department. This work has demonstrated under commercial conditions the value of dormant applications of lime sulphur (1-9), during a period in spring, to destroy the overwintering mites upon the bud scales.

Due to a publicity campaign conducted in the Niagara district of Ontario, in co-operation with the grape growers, most of the vineyards infested with the grape leaf hopper were sprayed in 1923 and the outbreak was, to a very marked extent, brought under control. As a result of the investigations conducted by our officers the method of combating leaf hoppers has been perfected to such an extent that hopper injury can not only be prevented but the insect themselves can be reduced to absolutely insignificant numbers.

In the province of Ontario a special study of the rose chafer was undertaken. As a result of our control experiments it was again proved that severe injury by the insect to grapes, cherries, etc., can be prevented by proper spraying. Severe outbreaks of this insect occurred in most of the sandy sections of southwestern Ontario.

Other important fruit insect investigations related to the biology and control of the strawberry root weevil, various bush fruit insects, etc.

#### INSECTICIDE INVESTIGATIONS

Important developments have taken place particularly with regard to improved and cheaper dusts and this work has meant large savings to many sections. Important progress was made in Nova Scotia in connection with the control of plant lice on truck crops through the application of nicotine impregnated dusts, requiring the invention and construction of suitable apparatus and methods of application.

The apple maggot, one of the worst pests of the apple is usually controlled by power sprays. In 1923, in Nova Scotia, our officers succeeded in perfecting a much more rapid and effective method of control through the use of a specially prepared poisoned dust. In 1922, growers in the Annapolis Valley in certain sections lost many thousands of barrels of apples through the ravages of this insect, whereas by applying the dust recommended in 1923, no damage from the insect resulted and the trees bore excellent crops.

## SESSIONAL PAPER No. 16

Studies on the control of the strawberry weevil have proved successful and our officers are now able to recommend satisfactory control measures for this troublesome pest. A series of experiments for the perfection of sheep dips was commenced in 1923. Considerable time is devoted each season to the study and testing of standard insecticides sold on the market.

## MOSQUITO INVESTIGATIONS

Further investigational and control work was conducted at Banff, Alberta, in 1923, in co-operation with the Dominion Parks Branch of the Department of the Interior. Control operations were undertaken from April 16 to September 15, and during this period most of the time of an expert entomologist was taken up in supervision. Applications to mosquito breeding places of an improved oil for killing the larvæ were made as required and this method of control was the one especially practised. On the whole, fairly satisfactory control of the mosquito pest in the Banff district was obtained.

## LIVE STOCK INSECT INVESTIGATIONS

A special study of insects affecting live stock was undertaken during the year with the object of preparing a special bulletin upon the same. This latter was duly published. It discusses such important pests as horse flies, lice of various hosts, ticks, etc. Observations on live stock insects were also made at several of our entomological laboratories.

## INDIAN ORCHARD WORK

The work of the Supervisor of Indian Orchards in British Columbia is under the direction of the Dominion Entomologist. This officer is employed by the Department of Indian Affairs. During 1923, the progress of this work has been very gratifying. On some of the Indian reserves excellent orchard fruit has been raised, packed and graded, and sold for satisfactory prices. In some sections hay and grain are the staple crops grown, while in others special attention is being given to dairying, small fruit culture, etc. Special instructions have been given to the Indians regarding the control of the commonly occurring insects of the orchard and farm and demonstrations in spraying have been undertaken.

## ADVISORY BOARD ON WILD LIFE

During 1923, the Dominion Entomologist as the representative of the Department of Agriculture on the Advisory Board on Wild Life Protection, attended the meetings of the board. The departments represented on this board are Agriculture, Indian Affairs, Mines, Interior, Fisheries and Mounted Police. On February 6, 7 and 8, 1924, the Dominion Entomologist acted as chairman at an important conference of provincial and federal officials interested in wild life protection which was held in Ottawa under the auspices of the Canadian National Parks Branch.

## INTERDEPARTMENTAL COMMITTEE ON AIR OPERATION

During the year, the Associate Dominion Entomologist was appointed as the representative of the Department of Agriculture on the above committee, the members of which act in an advisory capacity in matters relating to the flying work required by the various government departments. Meetings of the board have been attended during the year by this officer.

## EXHIBITION WORK

During the year the Entomological Branch prepared special exhibits of insects and their work which were shown at the larger exhibition centres, such as Toronto, Ottawa and London. At the smaller exhibitions held in several of the provinces attractive exhibits were also made. At each of these exhibitions an officer of the Branch was present to give information of value regarding the control of insects, etc. These exhibits attracted a great deal of interest and undoubtedly assisted to an important degree in bringing the work of the Branch to the attention of the public generally.

## LIBRARY

During the year a number of important works on economic and taxonomic entomology have been added to the library of the Entomological Branch and considerable progress made in cataloguing the books, pamphlets, etc.

## FIELD LABORATORIES

*Annapolis Royal, N.S.*—Special efforts were directed by officers attached to this laboratory, to assist fruit growers and others in the control of destructive species of insects. The apple maggot which has been especially abundant in certain fruit centres was given particular attention as a result of which growers became familiar with the proper methods of control and thereby saved their crops. The strawberry weevil was also specially investigated and information relating to control disseminated among the growers. Important progress was made at the laboratory during the year in developing cheaper and better insecticides for the control of insects. Much educational work was also conducted, addresses being given at farmers and fruit-growers' meetings, demonstrations given in the spraying and dusting of orchard trees, and the publication of timely information.

*Wolfville, N.S.*—Investigations at this laboratory related particularly to the control of the European apple sucker by the *Entomophthora* fungus. Studies were also continued on the *Empusa* parasite of the green apple bug. Scouting work in connection with the spread of the apple sucker was directed mainly from this laboratory. The natural control of aphids attacking the apple was also investigated. Aphids were abundant in the neighbourhood and this afforded an opportunity for the obtaining of predators and parasites.

*Kentville, N.S.*—Studies in the control of wireworms affecting vegetables were conducted from this temporary field laboratory during 1923. Insect carriers of mosaic diseases to potatoes also received attention, together with the perfection of spraying and dusting machines and materials. The life-histories and control of many insects affecting vegetables are also being studied.

*Fredericton, N.B.*—Investigations relating to forest, fruit and other insects were conducted from this laboratory. A large amount of timber in the condition of fire-killed trees, windfalls and logs, is ruined each year by wood-boring insects and our officers have commenced an extensive study of this problem with a view to perfecting methods of preventing this form of injury. Additional studies of the larch sawfly which is again becoming abundant and threatens to kill the young crop of larch, were undertaken. An investigation to determine the condition of forest trees most attractive to the different species of insects, involving monthly cutting of different species of trees was commenced in 1923, near Fredericton, in co-operation with the Provincial Forestry Branch and the University of New Brunswick staff. The information obtained should aid us in perfecting

## SESSIONAL PAPER No. 16

our methods of control. An extensive cutting operation was also conducted by our officers in co-operation with one of the lumber companies, to determine the value of recovering dying beetle infested balsams in preventing further similar injury to the area. On two areas representing different types of forest, detailed studies were made to determine the quantity of budworm-killed timber still valuable for lumber and pulp.

Insects injurious to the orchard and farm were abundant in New Brunswick in 1923. Remedies for tent caterpillars, fruit worm, apple maggot, fall webworm, codling moth, pear slug, flea beetles, aphids, plant bugs, cutworms, etc., were frequently requested. In many cases farms and orchards were visited by our officers and in some districts control demonstrations undertaken under commercial conditions.

*Hemmingford, Que.*—The officer in charge of this laboratory has devoted considerable attention to the life-history and control of the apple maggot, which is one of the most important fruit insects occurring in Quebec province. A definite spray recommendation has been evolved for the control of this insect. Other studies in which excellent control measures have been developed, relate to the apple curculio, the plum curculio, the round-headed apple tree borer, the cigar and pistol case-bearers, etc. Considerable extension work was conducted among fruit growers, and timely articles published in local papers from time to time. In order to direct further attention to the work conducted from this laboratory, special exhibits were prepared for a number of the fall fairs, an officer being stationed with the exhibit to supply information desired. In addition to outbreaks of the insects mentioned above, other pests such as cutworms, white grubs, tent caterpillars, fall webworm, etc., were abundant and required attention.

*Aylmer, Que.*—As in previous years this field station has conducted investigations relating to important shade tree insects of Eastern Canada and to the biology of numerous species of injurious forest insects. Special studies in the control of destructive boring insects are being conducted. The relation of weather conditions to insect activities is receiving special attention. Monthly cuttings of different species of trees were made to determine the condition of the wood and bark most attractive to different boring insects. Forest insect material is sent to this laboratory from the forests of Quebec and Ontario for biological studies.

*Vineland Station, Ont.*—In the Niagara district of Ontario work on the grape-leaf-hopper was continued. With the information our officers now have, the quelling of an outbreak of this insect in one season is easily within the bounds of possibility. Further important progress has also been made in the control of the rose chafer, which insect within recent years has been an important enemy of grapes, cherries, etc. In co-operation with the St. Catharines, Ont., laboratory of plant pathology, a joint investigation on raspberry mosaic was inceptioned. The entomological phase of this investigation includes studies on the transmission of the disease through the agency of aphids and the other insects, etc. An extensive study of the codling moth was inceptioned, and further progress made in studies of the pear psylla, peach plant bugs, blackberry leaf-miner, European red mite, etc.

*Strathroy, Ont.*—This permanent laboratory serves as headquarters for all field work in the common field crop and vegetable insect studies of western Ontario, from which practical extension operations in the control of insect pests are developed. Furthermore, being situated in a mixed farming and dairying centre studies are being maintained on insects affecting forage crops and hay,

particular attention being directed to clover insects, hessian fly, white grubs, and chinch bug. The officer in charge of this laboratory has continued to assist in the inspection of imported nursery stock entering western Ontario.

*Port Stanley, Ont.*—This temporary laboratory is maintained especially for use in the European corn borer studies which are being undertaken in Elgin county, Ont., which at the present time represents the centre of infestation. This laboratory, however, serves as a general headquarters for all biological studies on this insect throughout Ontario having been established first in 1921.

*St. Thomas, Ont.*—This laboratory is devoted to the rearing of parasites of the European corn borer, and their colonization in areas in Ontario where infestations of the corn borer have been serious. The parasite studied and reared in 1923, is the species known as *Habrobracon brevicornis*. Breeding stock of this parasite, imported from Europe, was obtained from the United States Bureau of Entomology. As mentioned in another part of this report, 595,000 individuals of this parasite were reared at this laboratory and liberated in fields where the corn borer has been serious. Arrangements were also made to receive breeding stock of another important parasite of the corn borer in Europe, namely, *Exoristes roborata*. The Dominion Entomologist, while in western Ontario located a native parasite of the corn borer, also of the genus *Habrobracon* and material of this species has been under observation at the St. Thomas laboratory.

*Treesbank, Man.*—The decline of the grasshopper outbreaks in Manitoba, which have occurred in recent years, has permitted the extending of more time to the less spectacular but probably more important insect pest, the wheat-stem sawfly. This insect has spread to a very great extent across the Prairies of late years and it is receiving attention at this laboratory which is situated in the most severely infested area. Studies in insects affecting sunflowers, sweet clover, alfalfa and such crops which are of importance in mixed farming centres are also being undertaken. As time permits, observations are being continued on insects affecting live stock, and also on insects affecting shade trees.

*Indian Head, Sask.*—The shade trees in the prairie provinces have suffered severely from insect injuries during recent years. Large numbers of them are being planted each year on the prairie farms and we are making a special effort to aid in protecting them from insect injuries. A laboratory has been established at Indian Head to conduct needed investigations on the control of shade tree insects and to recommend effective methods for prevention and control of injuries. An extensive outbreak of forest tent caterpillars was the most important subject investigated and a circular on the subject has been written and distributed in the infested areas. More than thirty other species of important shade tree insects demanded more or less attention. The work of this laboratory is conducted in close co-operation with the Tree Planting Division of the Forestry Branch, Department of the Interior.

*Saskatoon, Sask.*—An effort is being made at this laboratory, using the excellent facilities offered through the association with the University of Saskatchewan, to study the soil faunal content in a series of fields under certain crop rotation practices. An analysis of the typical habitats of such soil-infesting insects as cutworms and wireworms, is also being made and it is hoped the results will indicate the most suitable crop rotations from a soil faunal point of view. In addition, life-history and control studies are being continued with many grain insects, such as chinch bugs, wheat stem sawflies, wireworms, and cutworms.

*Lethbridge, Alta.*—The most important insect studies being undertaken at this laboratory relate to grasshoppers and to the pale western cutworm. Both these insects have of recent years caused a great deal of damage and special

## SESSIONAL PAPER No. 16

efforts have been made to study their parasites and other natural control factors so that some evidence of their future occurrences as pests may be obtained. The growth in the development of alfalfa and clover hay and seed growing in southern Alberta has necessitated instituting studies on insects affecting these crops. Special investigations were made on the seed chalcid and thrips. The vegetable growing interests of Alberta required the inception of certain studies notably against the onion and cabbage maggots.

*Banff, Alberta.*—Investigations at this laboratory have related particularly to the various species of mosquitoes present in the Rocky Mountains National Park. Excellent control of these objectionable insects has been demonstrated and undoubtedly this has added very considerably the tourist traffic to this wonderful mountain park. In this work our officers have had the close co-operation of the Dominion Parks Branch of the Department of the Interior.

*Vernon, B.C.*—Investigations relating to many forest insects were conducted from this laboratory and special efforts were made to control the destructive pine bark beetle outbreaks of the yellow pine areas. Investigations were conducted to determine the relation of neglected slash to the development of bark beetle outbreaks. The results indicate that slash burning must continue to form an essential part of our bark beetle control work. As in previous years, our officers planned and supervised the extensive bark beetle control operations conducted by the Provincial Forest Branch. Forest insect surveys made by our officers in different parts of the Interior of the Province determined the areas where control work was required and plans were devised for the conducting of the control operating. Bark beetle investigations and the control operations include, particularly, injuries to yellow pine, lodgepole pine, western white pine and Douglas fir. Studies in many other important forest insects were conducted with particular reference to the biology of the injurious species.

At this laboratory, too, other officers were detailed for special investigations of insects attacking fruits and vegetables. The fruit-tree leaf-roller, an insect which is developing into a serious pest in the Okanagan Valley, was given special attention, and in co-operation with the provincial Horticultural Department, oil sprays have been tested, as a result of which definite recommendations have been made to the fruit growers. Other foliage-eating caterpillars have also been studied, as well as species of thrips, mites, etc.

*Victoria, B.C.*—The work carried on from this laboratory consisted of a continuation of tests of strawberry root weevil barriers, control of holly infesting insects, control of leaf rollers, collection and rearing of bud moth material and parasites, and experiments with insect carriers of mosaic disease in potatoes. In all of this work important progress was made. The strawberry root weevil investigations have demonstrated to commercial powers the value of the barrier method of control.

*Agassiz, B.C.*—Studies of flea beetles, root maggots, etc., as well as insects attacking bush fruits, have occupied the attention of the officer in charge of this laboratory. Further data has also been secured on the satin moth, an European insect introduced into the province of British Columbia and one which is spreading gradually. Systematic and other studies of the various species of aphids of the province have also been undertaken. Assistance in the inspection and fumigation of imported nursery stock has also been given from this laboratory.

*Nicola, B.C.*—During 1923, a temporary field laboratory at this point devoted attention to the control of grasshoppers as they affect the range and stock conditions of the "dry interior" regions of the province. Ecological and life-history studies on many insects of the range were also conducted.

## PUBLICATIONS

The following publications have been issued from the Entomological Branch during the year:—

## BULLETINS

- No. 22.—Biological Notes on Parasites of the Prairie Cutworms. By E. H. Strickland.  
No. 23.—North American Cerambycid Larvae. By F. C. Craighead.  
No. 24.—Insects Affecting Live Stock. By S. Hadwen.

## CIRCULARS

- No. 10.—The Fruit-tree Leaf-roller and its Control in British Columbia. By E. P. Venables.  
No. 12.—How to Foretell Outbreaks of the Pale Western Cutworm in the Prairie Provinces. (Revised.) By H. L. Seamans.  
No. 14.—The Beet Webworm. By E. H. Strickland and N. Criddle.  
No. 19.—The Control of Forest Tent Caterpillars in the Prairie Provinces. By J. J. deGryse.  
No. 21.—The Walnut Caterpillar and its Control. By C. B. Hutchings.  
No. 22.—Two Insects Affecting Cane Fruits in British Columbia. By W. Downes and R. Glendenning.

## PAMPHLETS

- No. 6.—The Western Wheat-stem Sawfly and its Control. (Revised.) By N. Criddle.  
No. 14.—Directions for Collecting and Preserving Insects. (Revised.) By J. H. McDunnough.  
No. 31.—Aphids or Plant Lice. (Revised.) By W. A. Ross.  
No. 32.—Root Maggots and their Control. By R. C. Treherne.  
No. 33.—Wireworm Control. By R. C. Treherne.

In addition to the above department publications the officers of the Branch have contributed articles in the *Agricultural Gazette of Canada*, as well as in the entomological journals such as *The Canadian Entomologist*, transactions of various societies, etc. Many articles were also prepared by our entomologists for the agricultural and horticultural press.

## THE FRUIT BRANCH

## INSPECTION SERVICE

The inspection staff in 1923-24 was seventy-five as compared with seventy-one in 1922-23, the slight increase being in temporary men to assist in additional work caused by the enforcement of the Root Vegetables Act, 1922. The staff is employed primarily for inspectional work under the Fruit Act and the Root Vegetables Act, but in addition give practical demonstrations in approved methods of picking, packing, grading and loading for the various domestic and foreign markets. They also endeavour to meet the increasing demand for special inspections of fruits and vegetables at point of shipment and in the distributing centres—producers, the trade and public carriers find-

## SESSIONAL PAPER No. 16

ing it of very considerable value to be able to secure the services of the inspectors and the benefits derived from handling certified shipments. The inspector's impartial report is practically always accepted by shipper and consignee, and in most cases forms a satisfactory basis for settlement in connection with disputed lots.

In co-operation with the various Provincial Departments of Agriculture meetings were arranged during the winter months when our inspectors were able to assist at packing demonstrations and by giving information with respect to packing, grading and marketing. In many cases the inspectors acted as judges at exhibitions.

The increased demand for boxed apples in the markets of Eastern Canada and the United Kingdom has stimulated interest in box packing and our fruit packing and orchard specialist, together with those inspectors competent to give instruction in box packing, has done excellent work in giving practical instruction both to individual growers and at packing schools.

During the season of 1922 it was found that the tender fruit markets, particularly in Eastern Canada, were being glutted with fruit which arrived in poor condition, caused largely by improper packing and handling at point of shipment. This fruit was being marketed in competition with imported fruits packed under the best modern methods, and consequently sold at greatly reduced prices. It was, therefore, decided to engage the services of an expert in western methods of fruit packing to work in conjunction with the permanent packing and orchard specialist. Both experts devoted their whole time during the shipping season to demonstration work in the tender fruit districts of Ontario, and as a result marketing conditions and prices showed a material improvement. This work was later extended to include special instruction in apple box and crate making, box packing and warehouse management.

The assistance rendered the blueberry shippers and dealers in Quebec was continued last season, when two officers were stationed in the Lake St. John district during the rush movement.

The inspectors in the districts affected, again co-operated with the Entomological Branch by being on the watch for violations of the European corn borer quarantine.

The inspection of cooperage stock and barrel factories was vigorously prosecuted in order to ensure a supply of standard sized barrels for both apples and potatoes. Convictions were secured against three manufacturers of undersized barrels, a conviction also being secured in connection with the manufacture and use of undersized apple crates. Basket factories and fruit containers generally were systematically inspected, some 375 inspections being reported.

## THE FRUIT ACT

This legislation, which is a consolidation of Part IX of the Inspection and Sale Act and amendments made in accordance with resolutions passed at the Dominion Fruit Conference of 1922, became effective June 13, 1923. It provides new grade designations and definitions for apples, crabapples and pears when packed in boxes, some slight changes in the definitions covering barrelled apples and the standardizing of additional packages. Throughout the past year educational work has been carried on by personal explanation, at public meetings and through press publicity to familiarize the trade with the new regulations, particularly in respect to the box packs.

The number of violations reported under the Fruit Act during the past year was 953, as compared with 1,280 in 1922-23. All violations were carefully investigated, and in nineteen cases prosecution followed.

15 GEORGE V, A. 1925

The following table shows the number of lots of various kinds of fruits inspected and the number of packages inspected during the year ending March 31, 1924:—

Variety		Number of lots inspected	Number packages in lot	Number packages inspected
Apples.....	Barrels	11,820	1,550,473	66,473
Apples.....	Boxes	5,036	1,817,246	72,695
Apples.....	Baskets	303	33,564	3,280
Pears.....	Packages	593	116,324	7,770
Peaches.....	"	1,136	252,775	14,034
Plums.....	"	877	228,391	10,593
Tomatoes.....	"	592	94,660	5,375
Small fruits.....	"	3,428	459,908	58,162
Grapes.....	Baskets	232	285,091	9,420
Miscellaneous fruits.....		72	72	.....
Total.....		24,089	4,838,504	247,802

#### THE ROOT VEGETABLES ACT

Substantial progress has been made in the enforcement of the Root Vegetables Act, which has now been in effect for nearly two years. While there are minor points which require adjustment and possibly amendment, the past season's operations have confirmed the opinion of producers, shippers and dealers that the Act is progressive legislation and its enforcement of value in stabilizing the industry.

With the exception of four temporary men appointed specially for work in the commercial potato districts, the enforcement of the Root Vegetables Act has been carried on by the fruit inspection staff, necessitating very little additional expenditure in enforcing the potato and onion grading regulations. Further educational work is still required to familiarize producers with these regulations, particularly in some of the large potato districts where fruit is not commercially grown and where our staff of inspectors is consequently small. The number of violations recorded under the Root Vegetables Act during the fiscal year 1923-24 was 1,315, with prosecutions following in ten cases, three of these being in connection with the manufacture of potato barrels of less than standard size.

The following statement shows the number of lots of potatoes and onions inspected and the number of packages inspected during the year ended March 31, 1924:—

	Total of Inspections	Number of packages in lot	Number of packages inspected
Potatoes (90 lb. bngs).....	3,170	714,439	36,995
Potatoes (180 lb. bags).....	65	14,090	2,318
Potatoes (barrels).....	110	22,783	1,958
Potatoes (bulk).....	1,609	.....	.....
Miscellaneous vegetables.....	58	.....	.....
Onions (bags).....	585	122,385	6,181
Totals.....	5,597	873,697	47,452

#### FRUIT SEASON, 1923

A season approximately two weeks later than normal in all the fruit-growing provinces with the exception of British Columbia followed a winter during which but little, if any, injury was done to the fruit plants, bushes and trees. The

## SESSIONAL PAPER No. 16

blossom was heavy and there was every indication of a crop of most fruits slightly in excess of the abundant crop of 1922. Slight frosts and less favourable conditions later in the season however, reduced the crop prospects so that at harvesting time the total yield of practically all kinds of fruits was less than the year previous.

The total apple crop of the Dominion was 4,399,969 barrels, slightly less than that of 1922, when 5,018,405 barrels were produced and of 1920 when the crop totalled 5,828,632 barrels. The following table shows the comparison between the crop of other fruits for 1922 and that of 1923.—

	1922	1923
Pears.....	461,227 bush.	227,335 bush.
Plums and prunes.....	408,438 "	348,482 "
Peaches.....	577,561 "	403,660 "
Apricots.....	37,766 "	32,850 "
Cherries.....	202,740 "	203,125 "
Strawberries.....	8,678,200 qts.	8,652,200 qts.
Raspberries.....	6,271,725 "	4,496,840 "
Other berries.....	2,837,549 "	2,527,700 "
Grapes.....	70,308,462 lbs.	42,185,077 lbs.

It is estimated that the commercial crop of all fruits in 1923 had a whole-sale value of \$33,169,143.

Growing conditions in British Columbia were particularly favourable. All fruits bloomed freely and gave indication of a very satisfactory crop. In the Okanagan Valley the season was two weeks in advance of that of 1922. Early estimates of a crop of apples in excess of that of 1922 were fulfilled, final crop estimates being 3,700,000 boxes as compared with 3,082,000 boxes the previous year and 1,819,995 boxes in 1920. Summer apples were lighter, fall apples about equal, but winter apples considerably heavier, particularly such varieties as the Wagener, Rome Beauty, Spy, and Jonathan. The crop of pears, peaches, cherries, strawberries and raspberries was in excess of 1922, but the crop of plums, prunes and apricots, showed a slight decrease.

Although the season in Ontario was somewhat backward, early conditions were very favourable and there was a record showing a bloom on apples and a good showing on other fruits. The weather conditions however, during blossoming time were not favourable for a good set and resulted in the total apple crop being but 1,304,400 barrels as compared with 1,739,000 barrels the year previous and the 1920 crop of 3,257,483 barrels. Baldwins, Spies and Starks, however, were a heavy crop. The crop of other fruits such as peaches, pears, plums, cherries and berries showed a considerable drop from that of 1922.

The fruit trees in the Province of Quebec came through the winter in a very healthy condition, but although the bloom was heavy, the set was very light so that early indications did not promise a total crop of apples greater than 50 per cent of that of the year previous. Even these early indications were not maintained, as unfortunately during early July a very severe hail storm visited the St. Hilaire and Rougemont districts and caused material damage to the crop. In some districts, and especially where certain varieties were not heavy in 1922, the total crop was heavier, but throughout the province the final yield was but 65,094 barrels as compared with 216,984 barrels in 1922 and 334,045 barrels in 1920.

In New Brunswick the season was considerably later than usual. The apple trees did not come into full blossom until the week of June 8th. Duchess, Dudley, Ben Davis, Russets, Wealthy and McIntosh showed a full bloom and set for a full crop. Tent Caterpillars caused considerable damage but on the

whole the fruit was of good size and particularly clean. While the apple crop of 1920 totalled 130,876 barrels and in 1922 totalled 173,236 barrels that of 1923 packed only 69,292 barrels. The strawberry crop was estimated at 500,000 quarts as compared with 672,000 quarts the year previous and raspberries at 16,995 quarts as compared with 28,324 quarts in 1922.

All fruit trees and plants in Nova Scotia wintered well there being practically no indication of winter injury either from the cold or severe storms. In a few instances the limbs of trees were broken due to the weight carried while the snow was melting. The total damage from this cause however, was not serious. The season was approximately 10 days later than average, but the apple blossom was unusually abundant with practically all trees showing full. From early indications the crop was estimated at 10 per cent heavier than that of 1923, with Ben Davis, Golden Russets, Kings, Greenings, Spies and Blenheims, particularly heavy. The quality of the fruit was good, but the colour was not up to normal. Heavy wind storms in August followed by a severe storm early in October caused a very severe loss, so that the total crop when harvested was practically the same as that of the year previous of 1,821,064 barrels, as compared with 1,891,852 barrels in 1922 and 1,440,812 barrels in 1920.

The crop of strawberries, 135,000 quarts and of raspberries 36,000 quarts was slightly in excess of that of 1922.

In spite of unusually heavy snow storms on Prince Edward Island the fruit trees suffered little damage and all trees and plants came through the winter in good condition. Of the small quantity of fruit produced in this province, apples, cherries and strawberries comprise the larger portion. According to the census of 1921, the crop of 1920 totalled approximately 50,000 barrels of apples, 2,400 bushels of cherries and 91,600 quarts of strawberries.

#### EXPORT MARKETS

The Canadian Fruit Trade Commissioner in England rendered many exhaustive and very favourable reports covering the fruit market conditions in the principle markets in Great Britain and on the Continent. He also acted as the Canadian Representative on the Imperial Fruit Show Committee.

The export apple season of 1923 opened very satisfactorily; prices during September and October maintaining a level, that in view of general conditions of industrial depression, the considerable amount of unemployment, the resulting reduced purchasing power of a large proportion of the consuming public, and the fact that twice as many barrelled apples and three times as many boxed apples went forward during the period as compared with last year, was really remarkable. The important factor however, in the situation was the shortage of continental crops and the fact that England had possibly no more than one-third of a one hundred per cent crop.

During the month of November the quantity of apples exported was just about double that of the previous year and the reaction of the market to such heavy overseas supplies was naturally disastrous, prices dropped from 2s. to 3s. on both boxes and barrels, 2s. compared with mid October values and 5s. to 8s. per barrel as compared with those of late September and early October. The barrel apple prices would not average higher than 20s. to 22s. for No. 1 and 12s. to 16s. for No. 3, while boxed apples fell below profit returning figures, Jonathans, Extra Fancy, only very occasionally making as high as 10s. and usually only from 8 6 to 9 6.

The low prices prevailing on all markets discouraged shipments during December. Boxed apples particularly showed a considerable reduction. Bar-

SESSIONAL PAPER No. 16

relled apples nevertheless continued to be considerably in excess of those for the same period last year. The reduced quantities, together with the stimulating effect of Christmas trade activities reacted favourably on prices which showed a slight increase in barrelled apple values of from 1s. to 6s. in the maximum and from 3s. to 4s. in the minimum. There was also an improvement in prices paid for British Columbia boxes from 1s. to 2s.

During January the arrivals were comparatively moderate, especially as regards boxes, which were somewhat less than during the same month of 1923, while barrels, although not overloading the market, greatly exceeded the quantities offered during the same period last year. The prices of all apples advanced over those of December from 2s. to 4s. for all grades. During February, the arrivals were heavy for the season, barrelled apples showing a considerable increase over those on the market during February last year, and boxed apples being nearly double the shipments in 1922.

The total shipments to April 30 of Canadian apples of the 1923 crop was 1,326,656 barrels and 568,545 boxes, as compared with 1,169,685 barrels and 340,685 boxes of the 1922 crop.

#### FRUIT AND VEGETABLE CROP REPORTS

The Fruit and Vegetable Crop Reports were issued each month from June to October, inclusive, and a special potato crop report in November. Each report contained a summary of the crop prospects throughout the Dominion and a detailed report on the prospects in each of the producing sections of the Dominion, the United States and Europe. In addition there were notes on transportation matters and on fruit and vegetable insects, the latter being prepared by the Entomological Branch of the department. A large number of requests were received for this report and the mailing list was consequently increased during the year by over 800 names bringing the total list to slightly over 10,000.

#### TELEGRAPHIC MARKET REPORTS

During the year seventy-one Telegraphic Market Reports were issued from Ottawa, once every week except during the heavy fruit marketing season when they were issued twice weekly and simultaneously from Vancouver, Winnipeg and Ottawa. These reports contain quotations on all fruits and vegetables submitted to the Fruit Branch by telegraph from all the principal marketing centres throughout the Dominion. In the exporting season they also contain quotations on fruits forwarded by cable from the more important export markets. The mailing list for this report now contains approximately 4,500 names.

#### EXHIBITIONS

With a view to encouraging the greater use of Canadian fruits and vegetables, a booth was placed at the following exhibitions: Brandon, Calgary, Edmonton, Saskatoon, Regina, Canadian National Toronto, Central Canada Ottawa, Royal Agricultural Show Toronto, and T. Eaton Company, Winnipeg.

An experienced demonstrator in household science gave daily demonstrations in the booth of various approved methods of canning and preparing fruits and vegetables.

Booklets in which were printed a large number of recipes covering practical and simple methods of canning, preserving and storing fruits and vegetables were distributed to housewives.

According to reports received from the fruit and vegetable trade in the districts concerned, a very considerable amount of encouragement was given to the industries in this manner.

For the Imperial Fruit Show held in Manchester, England, from October 25 to November 5, 1923, the Fruit Branch collected and prepared an exhibit of the better varieties of export apples. This exhibit which was one of the major attractions at the Show proved to be of very material value in the advertising of Canadian grown fruit. The whole exhibit was in charge of a representative from the Fruit Branch, who also acted as the Canadian representative on a board of three judges for the British Empire section. The Canadian exhibits in the competitive sections, while not as numerous as in previous years, due to the early date of the exhibition and the unfavourable condition of the fruit growing season, were of very superior quality and attracted a considerable amount of attention and favourable comment from the public, the fruit growers and the fruit trade in Great Britain. It is worthy of note that in addition to the awards to the Canadian entries of one gold cup, two silver cups, fourteen gold medals and two silver medals, the premier prize of the show was awarded to an exhibit of McIntosh Red from British Columbia. This is the first time on record that a variety of apple other than the Cox Orange has been awarded the premier prize in the dessert class at a fruit show in Great Britain.

#### BRITISH EMPIRE EXHIBITION

The Branch co-operated with the Canadian Exhibition Commissioner of the Department of Immigration and Colonization in securing apples for the British Empire Exhibition. In addition to locating orchards where fruit of exhibition quality was to be found, our expert packers assisted by the local inspectors selected, packed and shipped the apples secured in Ontario, Quebec and the Maritime Provinces, amounting in all to about 1,000 boxes.

#### JONATHAN BREAKDOWN

Assistance was given the Experimental Farms Branch in British Columbia in connection with the special inquiry into the Jonathan rot. From September 15 to October 31 practically the whole time of one inspector was devoted to picking and packing Jonathans at Summerland, Kelowna, Okanagan Centre, Vernon and Salmon Arm twice weekly for the purpose of determining the effect of the maturity at time of packing on the development of the rot in storage.

#### THE CANADIAN HORTICULTURAL COUNCIL

The Canadian Horticultural Council, organized at the Dominion Fruit Conference, 1922, at the request of the horticultural and allied industries, continued to function in a manner most satisfactory to all the interests represented. A number of meetings, attended by representatives from the fruit and vegetable industries throughout the Dominion, were held, and questions and problems of vital importance to these industries discussed and adjusted. A large number of new varieties of horticultural trees, shrubs and plants from all sections of the Dominion were recorded and are now being tested with a view to registration. Complete information as to the work of the council may be obtained from their Annual Report published in 1923.

#### TRANSPORTATION

Our supervisory and educational work in fruit transportation has proven increasingly important during the past year. Active measures by the railways towards reducing loss and damage claims have resulted encouragingly. The greatest success in claims prevention work has been in losses, while the damage proportion of the whole has correspondingly increased particularly in car-

## SESSIONAL PAPER No. 16

loads. The claims problem is slowly resolving itself into one of carload damage, and the Transportation Division is co-operating with shippers and carriers towards correction of all loading and handling methods that can be considered responsible for depreciation or damage of these perishables in transit. A typical figure of success of claims prevention work is the ratio of claims paid to gross revenues on the Canadian National Railways in the past three years—1.4 per cent in 1921, .8 per cent in 1922 and .7 per cent in 1923. Shippers have freely admitted that the service rendered by the railway and express carriers in 1923 has been the most satisfactory on record, and we are hopeful that this same relative efficiency increase will prevail as both shippers and carriers continue their efforts to overcome damages and depreciation in transit. Improved methods of transportation are steadily extending the radius of distribution.

The refrigerated carload movement of tender fruits is recognized as the essential factor in the wide distribution necessary. The most modern refrigerator cars offer dependable transportation if correctly loaded and braced and kept fully iced en route. The onus does not rest solely on either the shipper or the carrier. Our instructional work is being continued towards still more general understanding among shippers of the principles involved, while experiments are continuing co-operatively with the carriers towards perfection of equipment and icing arrangements.

Shippers have asked that we include in experimental work of the coming season tests of ventilated instead of refrigerated carload movement of cherries. Humidity comparisons will be included in this test. Humidity comparisons will be made also in different types of refrigerator cars.

The new berry box legalized by the Fruit Act, 1923, was tested last season and found to be an efficient carrier as well as an acceptable marketing package.

In the 1922-23 winter movement of Nova Scotia apples to Great Britain considerable frosting resulted, and at the suggestion of Annapolis Valley shippers a meeting was arranged last July between railway and steamship officials and the growers, when preventive measures were decided on for every step in transportation. A gratifying result is that the past winter's movement was carried out with practically no frost damage.

Experimental tests are now under way on a ventilating installation for the non-refrigerator equipment in express fruit service from producing districts, which it is expected will help to overcome the high temperatures which have prevailed in field-warm loadings.

A new fruit shed opened in Bonaventure terminal, Montreal, last August greatly improved the handling and marketing facilities for daily arrivals. Handling at the Point St. Charles terminal had been a source of constant protest, being too remote from the wholesale section of the city.

Strawberry growers in the vicinity of Sackville, N.B., are being assisted in improving their carloading methods. This district has the greatest commercial production of strawberries in the Maritime Provinces and profitable markets are available in the cities and summer resorts of Eastern Canada and the New England States. In recognition of the development of this traffic into carload movement, additional carload express rates and reduced minimum have been negotiated for the coming season.

On the boats collecting fruit and vegetable shipments from Okanagan Lake ports improvements are promised before this season opens for protection from boiler heat and to provide fanned fresh air through the cargo.

Experiments were conducted during the past winter in unheated refrigerator movement of apples from British Columbia to prairie markets and to Eastern Canada. Additional to the protection afforded by the insulated car

body the load was blanketed with straw or hay. These experiments are directed towards avoidance of the over-maturity and quality depreciation that has so frequently resulted in heated carloads of apples loaded from storage at practically full maturity, as well as towards lower transportation costs. A continuation of these loading tests will be carried out the coming winter.

During the past winter the express companies of Canada have applied to the Board of Railway Commissioners for upward revision of express rates. Our Transportation Division has assisted the organized shippers in the different districts of production to set before the board their actual position with the relation of transportation costs to their marketing problem. It was considered reasonable that the carriers should be asked to recognize the value of transportation rather than proportionate cost of service, in establishing their rates on these commodities of such relatively low ton-value.

An effort was made to have preferential freight rates introduced for the encouragement of wider and more general inter-district and interprovincial exchange of certified seed potatoes. We are hopeful that before another season the railways will co-operatively assist in this means towards improvement in quality and quantity of production.

### THE PUBLICATIONS BRANCH

*Method of Distribution.*—The publications of the department are prepared and issued by the respective branches. The Publications Branch functions as the distributing agency. Notification of the issue of a publication is sent by the head of the originating branch to the Director of Publicity, together with any special instructions that may be necessary as to distribution.

The general practice is to distribute to applicants and to what is termed the "special general" list. This is a standing list which includes agricultural officials, public libraries, members of Parliament and provincial legislatures, the press, institutions, and exchanges. The list contains 2,485 English and 535 French names.

To the policy of distribution to applicants, an exception is made in two instances, namely, in the case of "Seasonable Hints," issued three times a year by the Experimental Farms Branch, and the interim reports of the Experimental Farms and Stations. "Seasonable Hints" is sent to the general mailing list and supplementary lists, comprising 273,173 names. It is also sent in small bulk lots to banking institutions and elevator companies for distribution to farmer patrons.

The second exception is in connection with the interim reports of the branch Experimental Farms and Stations. These are distributed to the names on that section of the general mailing list which covers the province or the portion of the province in which the Farm or Station is located.

The publications of the department as issued are announced in two ways. First, along with each copy of "Seasonable Hints" is enclosed a supplementary list of new publications. By this means, all whose names appear on the general list are kept advised of new issues, and of the fact that copies are obtainable on request. Attention is also directed to the regular list of publications, which is issued annually. By this means upwards of 270,000 persons, mostly farmers, are kept informed as to the publications available. The second method of announcement is by means of notices and short articles sent to the press. These are prepared in such a way as to indicate the usefulness and value of the publications and to stimulate demand for them. Many of the weekly papers throughout the country avail themselves of this means of giving service to their rural subscribers.

## SESSIONAL PAPER No. 16

*Distribution.*—The following comparative statement shows the total distribution of publications by the branch in 1922-23 and 1923-24, respectively.

	1922-23	1923-24
Reports.....	173,566	155,521
Bulletins.....	39,068	17,923
"Seasonable Hints".....	774,910	921,255
Pamphlets and Circulars, etc.....	1,626,899	1,329,960
"The Agricultural Gazette".....	49,173	51,975
	2,663,616	2,476,634

Included in the above statement under Pamphlets and Circulars are the following multigraphed or printed periodicals, the distribution of which is performed on behalf of the originating Branch, together with the maintenance of the address lists.

Title	Period	Originating Branch
Dairy Market Report.....	Weekly.....	Dairy Branch
Egg and Poultry Market Report.....	Weekly.....	Live Stock Branch
Dairy News Letter.....	Monthly.....	Dairy Branch
Entomological News Letter.....	Monthly.....	Entomological Branch
Fruit Crop Report.....	Monthly (May-Oct.).....	Fruit Branch
Seed, Feed and Fertilizer Markets.....	Bi-weekly (printed).....	Seed Branch
Library Accessions, Descriptive list of.....	Bi-monthly.....	International Institute Branch

The number of envelopes addressed for Seasonable Hints shows approximately the distribution through the mails of that periodical by the Publications Branch. This is given in the following table, which includes March, 1923, for comparison with March, 1924, showing a gain in that period of 10,395 copies:—

	English	French	Total
March, 1923.....	216,968	45,810	262,778
July, 1923.....	217,490	49,143	266,633
November, 1923.....	220,139	50,272	270,411
March, 1924.....	221,563	51,610	273,173

The following periodicals were multigraphed or mimeographed by the Publications Branch but, with the exception of the Entomological News Letter, were distributed by the originating branch, namely:—

Title	Period	Originating Branch
Entomological News Letter.....	Monthly	Entomological Branch
Insect and Pest Review.....	Monthly	Entomological Branch
Progress Report.....	Monthly	Entomological Branch

*Duplicating.*—In addition to the periodicals appearing in the above table, the duplicating work includes circulars, form letters, etc., as well as special articles for distribution to the press, comprising in all, 171,806 sheets, compared with 172,304 sheets in 1922-23.

*The Agricultural Gazette of Canada.*—This bi-monthly periodical, which is compiled and edited by the Publications Branch, is sent to officials, teachers of agriculture, senators, members of parliament, Dominion and Provincial, agricultural representatives, secretaries and presidents of agricultural associations, the press, libraries, exchanges, consuls, and to 267 paid subscribers. The distribution list comprises 6,883 English and 1,518 French names.

The publication of the *Agricultural Gazette* was discontinued at the conclusion of the fiscal year.

*Seed, Feed and Fertilizer Markets Report.*—The issuing of this bi-weekly report in English and French was begun by the Seed Branch during the year, and its distribution to the free list and to paid subscribers was undertaken.

*Branch Lists.*—The Branch lists, sixty in number, were maintained for various branches of the department, and total 39,460 English and 5,986 French names. During the year, the Entomological Branch lists were revised and six new ones added. The Poultry Division added three new lists, and the Dairy Branch revised the list of cheese and butter factories.

*Additions and Revisions.*—During the year 17,048 names were removed from the various mailing lists, principally through returned envelopes; 32,765 names were added, and 2,821 changes of address were made.

The general mailing list is augmented by placing thereon the names of all new applicants for publications, as well as names secured at the leading exhibitions, and in other ways.

Cards of application were sent during the year to all box holders on rural routes in the postal divisions of Charlottetown, Halifax, St. John, Quebec, Sherbrooke and Montreal. Out of 61,572 cards sent 6,596 or 11 per cent were returned.

*Machine Addressing.*—The number of envelopes addressed from lists by automatic machinery was 2,190,843 compared with 1,567,582 in the year previous. The classified statement follows:—

Machine addressed—Bulletins, etc.....	1,302,619
"      Market Reports.....	686,331
Press Notices, Circulars.....	39,170
Addressing for branches.....	58,758
	<hr/>
Lists of addresses.....	2,086,878
	139,019
Total.....	<hr/>
	2,225,897

*Hand Addressing.*—All publications mailed in response to individual request are hand addressed by typewriter. The number of envelopes so addressed was 123,347 compared with 126,670 in 1922-23.

*Press Articles.*—The press articles distributed by the branch are issued with the object of giving publicity to the work of the department, and of stimulating demand for publications. They comprise items of news, notices of publications, and short articles conveying information of interest and value to the farming community. They are prepared chiefly by the branch, and are despatched to various sections of the Canadian press—dailies, weeklies, and agricultural journals. The total number of press articles issued during the year was 481 compared with 578 in 1922-23.

*Special Publications.*—Three illustrated booklets, intended for distribution at the British Empire Exhibition, were compiled by the branch during the year. These were "Canadian Dairying", "Canadian Wheat and Wheat Flour", and "Canadian Live Stock and Meat Industries", and the preparation of a fourth, "Canadian Fruit, Vegetables and Honey" was begun. The first named was also made use of at the World's Dairy Congress and National Dairy Show held in the United States in the autumn of 1923.

*Change of Quarters.*—The premises at 72 Queen street being required by another Department of the Service, new quarters were assigned to the Publications Branch in the Transportation building, and were occupied early in 1924.

*Publications Issued.*—A list is appended of the printed publications issued by the department during the year, showing the title, classification, the number issued, and the number received and distributed by the branch.

## THE INTERNATIONAL INSTITUTE OF AGRICULTURE

At the Convention of 1905 the number of Governments which adhered to the International Institute of Agriculture was forty; this year the number has risen to sixty-two. The following are the only independent States that have not as yet adhered to the Convention: In Europe, the Kingdom of Albania (800,000 inhabitants), the Republic of Andorra (5,231), the Principality of Monaco (19,121), the Principality of Lichtenstein (9,900); in America, the Republic of Bolivia (2,265,000), Honduras (554,000), Panama (350,000), San Domingo (700,000), Venezuela (2,750,000); in Africa, the Republic of Liberia (1,500,000); in Asia, the Sultanate of Oman (500,000), Afghanistan (6,000,000), the State of Bhutan (250,000); the Kingdom of Siam (6,500,000). That is to say, of the total population of the globe, estimated at 1,800,000,000 inhabitants, not many more than 27,000,000 belong to independent States not yet adhering to the International Institute of Agriculture.

The management of the Institute is vested in the General Assembly and the Permanent Committee. The Assembly meets every two years at the seat of the Institute to consider the work and expenditure during the two previous years, and to determine the programme of work and vote credits for the two ensuing years. The next Assembly will be held in May next, when Canada is to be represented by Sir Thomas Elliott, Bart., K.C.B., the Delegate on the Permanent Committee for Great Britain, also the Acting Delegate on the Permanent Committee for Canada and the other British Dominions. The Permanent Committee comprising the permanent or resident delegates of the adhering countries who form the Directing Board, is entrusted with the function of seeing that the programme laid down by the General Assembly is carried out as completely and efficiently as circumstances permit. Some of the reports prepared by members of the Permanent Committee during the year mark important departures in the policy and activities of the Institute.

The contributions of the adhering States are regulated according to the particular one of the five groups in which each adheres; those adhering in the first group having sixteen units of contribution to pay and five votes, and those adhering in the fifth group having only one unit of contribution to pay and a single vote. Fifteen countries adhere to the first group, among them Great Britain, who, at the present rate of exchange, contributes from \$17,000 to \$18,000. Canada, adhering in the second group, pays one-half this sum. At a rate of exchange slightly above the present rate, conceding a value of five cents to the Italian lira, the total contributions at present assessed against the adhering governments is only slightly in excess of the total sum which has been spent in each of the last two years, viz., \$165,000. Of this amount the King of Italy contributes regularly 300,000 liras annually: \$60,000 at the normal rate of exchange, or \$15,000 at the present rate. The performance of the very many important services is rendered possible only because of the extreme economy practised by the Permanent Committee. During the war the reserve fund, which had grown to something over \$400,000, had, a couple of years ago, almost completely disappeared. A reserve is once more beginning to accumulate, chiefly because of the payment of arrears by some of the central governments that had become impoverished during the war.

Of the numerous objects with which the Institute deals it had until a couple of years ago dealt chiefly with the first, namely, "to collect, study and publish as promptly as possible statistical, technical, or economic information concerning farming, vegetable and animal products, the commerce in agricultural products, and the prices prevailing in the various markets." In the reports of the Permanent Committee for the General Assembly of 1924 the Institute is devoting more attention to another of its objects, namely, to "submit to the approval of the Governments, if there is occasion for it, measures for the protection of the common interests of farmers and for improvement of their conditions after having utilized all the necessary sources of information, such as the wishes expressed by international or other congresses, or by congresses of science applied to agriculture, or agricultural academies, learned bodies, etc."

The latter cause of the Convention of 1905 grants to the Institute extensive powers in dealing with agricultural problems of the most varied nature, as will appear from the further reference to them in this report. Its success in dealing with the world's crop statistics during and immediately after the war, won important recognition from the Genoa Economic Conference of the Allied and Other Powers, when the Institute was formally entrusted with furnishing for the League of Nations all the economic information which the latter might require in connection with the world's agriculture. A protest launched by the General Assembly of the Institute in 1920 against the action of the International Bureau of the League in proposing in its programme an eight-hour day for agricultural labour, raised the question of the jurisdiction of the Institute in matters of agricultural labour. The question was referred for adjudication to The Hague tribunal of the League, with the result that a mixed Committee of the League and of the Institute was recently formed to deal with such questions in the future.

When the building of the Institute was in the course of this year extended, much additional space was reserved for the use of the Institute Library, now consisting of over 100,000 bound and unbound volumes, and for the periodical room attached to it. There was a lack of funds to furnish the equipment needed for the new quarters. A donation of 50,000 liras was generously placed at the disposal of the Institute for the purpose by D. Roffredo Caetani, Prince of Basoiano. This is in response to a suggestion recorded at one of the General Assemblies, that donations would be gratefully received. One of the first to respond was Mons. de Vilmorin, of Paris, the famous scientist and agricultural

## SESSIONAL PAPER No. 16

experimentalist. In the spring of this year when the Italian Commission for the Encouragement of the Cultivation of Citrus Fruits dissolved its organization it had in its treasury from the Italian State the sum of 100,000 liras to dispose of. The Commission created a fund having for its object the distribution of premiums for research work and scientific studies in connection with the cultivation of citrus fruits, and the administration of this fund was entrusted to the Institute.

During the year the Permanent Committee tendered a reception to Their Majesties the King and Queen of Spain, accompanied by Their Majesties the King and Queen of Italy. Another distinguished visitor was the ex-Minister of Agriculture for Great Britain, Sir Arthur Griffiths-Boscawen.

Recognizing the paramount importance in all countries of milk and milk products the Institute was particularly active during the year in preparing a scheme for an effective international information service which would include the production of and trade in milk in its various forms, as well as butter and cheese (hard and soft varieties). As a sound basis for the service it is hoped that in future censuses and annual statistics of the various governments care will be taken to classify separately the females which produce milk for human consumption as distinguished from those whose milk serves only for the rearing of calves. The proportion of cows producing milk for human consumption to the whole number of milk-producing females varies widely, the proportion in France being only 70 per cent. A scheme had already been outlined in 1914 and had been referred to by the General Assembly of 1922. The difficulties confronting the Institute in its present undertaking arise chiefly from the serious lack of statistics in the majority of countries and from the incomplete and non-comparable statistics in other countries. The Institute finds this problem in the same state of chaos in which it found the world's crop statistics when it set out in 1908 to urge the governments without a statistical service to organize one, and the governments with an inadequate service to re-organize it so as to permit of comparisons between uniformly classified products. Once more the diversity of language, of standards of quality, weights, measures and currencies has to be met and surmounted. The Institute's decision now to proceed energetically with the work was to some extent influenced by the following resolutions, the first being that of the International Agricultural Congress at Paris in May, and the other the International Live Stock Congress at The Hague in August, 1923. *Paris Congress*: "Considering the role which has been vested in the Institute and the achievements which it has already accomplished, Resolved that there be organized, in accord with the International Institute of Agriculture, a permanent International Live Stock Bureau, having for its object to continue to study the questions presented at this Congress (questions of breeding, the keeping of herd books, the re-organization of methods of selection, notably in the line of milk producers, etc.), and to work out their realization." The Congress, moreover, favours an understanding between the different States to fix a common unit of measure of the alimentary value of different feeds and to arrive at a unification of methods in rationing. *The Hague Congress*: "The Congress, appreciating the work which has already been accomplished by the International Institute of Agriculture, and considering the practical results obtained in the line of statistics on the trade in animal products, milk control, and the breeding of domestic animals, requests the Institute to continue to extend its work along these lines."

The Institute's present report refers to direct enumeration of quantities of milk by applying to individual farmers as being so expensive that it is resorted to collect them only at decennial censuses and by a small number of governments. At the inception of the proposed service the Institute will rely more on securing the total production of a country on the basis of the number of milk

producing animals and on an average annual per capita production; or again on the basis of a knowledge of the data relating to a part only of the production, such for instance as the quantities of milk delivered to co-operative dairies and made into butter, cheese and other milk products. Statistics based on such criteria, although at first lacking absolute reliability, will be of value, and can at once be supplied annually by a large number of important countries. To begin with, the service will be furnished annually, but will be more frequent as soon as governments, through improving their statistical organizations, make this possible. The Institute will have an easy task in dealing with the world's trade in dairy products because imports and exports are dealt with in the returns of the Customs Departments. There exists a difficulty in the diversity of classification of products. The Institute for the present will have to rely chiefly on the simple classification proposed by the Brussels Convention of 1913, which provides for data under three heads—milk, butter and cheese—because the actual statistical data of the adhering countries could be easily brought into these three classifications, although eventually the aim would be to secure more detailed information on other milk products.

Mr. Anders Fjelstad, Delegate for Norway on the Permanent Committee, in the report to which reference has just been made furnishes a lengthy statistical statement of the world's position as to numbers of milk cows and the trade in milk and milk products, from which it can be appreciated how great are the difficulties that have to be surmounted for an efficient international service. Comparison in numbers of cows is made between the year 1913 and each of the years 1918 to 1922; the trade figures cover all the years from 1909 to 1922.

Dr. Asher Hobson, Delegate for the United States on the Permanent Committee, introduced in his report the subject of a universal classification for cotton. The United States, he states, has established a national classification for cotton, as well as for the major portion of other agricultural products. (The Reporter might have applied the latter statement also to Canada). An international classification is now expedient. Ten years ago in the United States that question was from the national point of view about in the position it is to-day from the international point of view. Hence, at his instance a resolution was adopted by the Permanent Committee, recognizing that all the countries interested should establish a universal classification of the type qualities of cotton in order to arrive at a uniform system of classification, such as the Institute has been endeavouring to realize for other agricultural products, in order thus to promote and facilitate international trade in agricultural products. The Institute is to stress to the governments interested the advantages of a universal classification for cotton, securing the views of the producers, the manufacturers and commercial associations, as well as of the consumers, so as to form a sound basis for further future action.

The Vice-President of the Institute, Mr. Louis Dop, presented another series of his important reports on agricultural meteorology, which reviews the world's activities on the subject. His recommendations for future action are based largely on the resolutions of the Conference of meteorological directors assembled at Utrecht in September, 1923. The International Committee on Agricultural Meteorology is to meet at Rome in May to formulate their views as experts on the various recommendations, and the International Institute at its General Assembly is to formulate its decision and appeal to the various governments to invite their Meteorological Stations to co-operate along the lines of co-ordination of effort, systematization, centralization and publication of all the questions in their relations to agricultural products. Particular mention is made of Canadian collaboration with the Institute in the way of contributing valuable studies of the Canadian Meteorological Station.

## SESSIONAL PAPER No. 16

The report of Dr. Asher Hobson on agricultural statistics is the basis for the following recommendations of the Permanent Committee (summarily expressed): That arrangements be made to ensure the rapid collection and transmission of unofficial as well as official information, the permission of the governments for transmission of unofficial information having been previously obtained. That the governments continue their efforts to amplify their statistical services so as to embrace the information concerning the new data (re cotton and dairy products) which the Institute desires. That the telegraphic service should be ultimately developed in the measure justified by the extension given by the adhering governments to their statistical services. That greater attention should be given to the preparation of monographs and special studies on methods of statistics as applied to agriculture. The report stresses the usefulness of a general census by all the adhering countries at the same date 1930-31 on a uniform plan. It stresses the importance of engaging the adhering governments to follow out these various recommendations and to conduct a well considered study as a basis and preparation of a programme which will be submitted to an international conference of experts in 1926.

The lengthy report of Dr. Valentino Dore, Chief of the Institute's Statistical Service, presents tables of striking importance showing the progressive improvement of the Institute's services even in the last three years, 1921-23, and showing the increased number of countries that have perfected their systems of statistics so as to furnish the data in the manner and with the promptness desired for the various products. The results of these improvements and of the more important ones which the Institute has brought about from the beginning of its work fifteen years ago in the way of available statistics, have gradually come to be regarded by the agricultural and other press of North America as common property. Sir Thomas Elliott is to present the following proposals of the British Government:—

1. That in view of the provisions of Article 9 (b) of the Convention of 7th June, 1905, the Institute should be regarded as the seat and centre of all voluntary international action for the development of agriculture.

2. That international organizations concerned with agriculture or desirous of obtaining the support of agriculturists should be invited to place themselves in communication with the Institute with a view to secure the co-ordination of the arrangements to be made with regard to—

- (a) the dates and places of their meetings,
- (b) the publication of their resolutions, proces-verbaux and reports,
- (c) the constitution of their permanent bureaux, if any, and
- (d) any other matters likely to be of interest to agriculturists generally.

3. That the adhering Governments be invited to take the foregoing resolutions into their consideration and to adopt such measures as they may think desirable in order to give effect to them.

A report of the French Government concludes with the following recommendations:—

That the VIIth General Assembly of the International Institute of Agriculture:—

1. Should request the adhering States to establish among Agricultural Associations and Societies an active propaganda for the encouragement among farmers of the idea of agricultural progress, which is indissolubly connected with peaceful development in international relations.

2. Should instruct the Permanent Committee to enter into communication with the various Associations in order, in agreement with them, to discover the best practical methods for influencing public opinion throughout the world, basing this propaganda on the necessity for the order, tranquility and peace of the agricultural population in each country.

The United States Government is to introduce the resolution "that consideration be given to the admittance of agricultural and other associations as

associate members of the Institute." Madam Olivia Rossetti Agresti, Secretary of the late David Lubin, has been an ardent promoter of this recommendation. She states (January, 1924) that "the original intention of the founder of the Institute was to establish a World Chamber of Agriculture to which the voluntary agricultural associations would appoint their representatives. This would have formed an international advisory body for promoting the interests of agriculture, more especially in the field of economics."

Quite apart from the decisions which these various Institute reports seek to bring about, the value of the ascertained facts and information therein contained, and not heretofore assembled in any other single series of publications, should not be under-estimated.

Of the \$15,000 voted by the Canadian Parliament for the International Institute of Agriculture, approximately \$9,500 are for the direct contributions and about \$5,500 are for the maintenance of the Canadian office. The greater part of the latter fund is for the acquisition of books, periodicals and stationery for the Institute Library. The distance from Ottawa to the headquarters of the Institute requires, for an exchange of correspondence, from 25 to 30 days, hence the expediency of the creation in 1910 of the Canadian office, an outstanding function of which is to reproduce in Canada the essential features of the Institute's work in Rome, to adapt it, in so far as possible, to Canadian needs, and ensure that its decisions shall exert a direct influence on Canadian agriculture. This it has been heretofore enabled to do in a certain measure through its communications to the *Agricultural Gazette* and the agricultural press, and through its library.

Apart from the Institute Branch's allotted task to disseminate useful information emanating from the Institute, there has been a great deal of advertising abroad of Canada, her products, her agricultural achievements, and of her leading experts through the Institute's various monthly and annual publications. A considerable portion of space devoted to Canada has been secured through the efforts of the Branch, whose duty it is to keep the Institute constantly supplied with information concerning Canadian agriculture, including full details forwarded by cable throughout the year in regard to her various products. Canada's pre-eminence as a leading agricultural country, and chiefly as a producer of cereals, has been frequently asserted in the Institute's publications. These publications circulate widely among our prospective purchasers in Europe.

The Institute collects and publishes, and this Branch disseminates in summarized form, to the extent of the means placed at its disposal, agricultural information other than statistics. Canadian farmers are vitally interested in learning how Germany grows more grain and live stock per acre than any other country; how Argentina and Australia succeed with their chilled meats and systems of shipping and marketing them; how Denmark beats the world in the British markets with its bacon and butter. (Abstract from Rt. Hon. Lloyd George's speech, October 1919). Our Departmental officers, are concerned with the local or Canadian national work in direct contact with the farmers, attend meetings, Conferences, Conventions, and International Congresses. The Institute steps in at the final stage and at the General Assembly and Permanent Committee meetings and in its publications discusses the results, and formulates decisions for universal adoption. It is the permanent institution established for, among other objects, giving universal and practical effect to the resolutions of congresses, hence the Institute, in addition to other means towards the attainment of this end, also collects and summarizes for each country the published results of its national or local work, including research and scientific investigations.

The Institute Branch frequently elaborates and publishes the Institute's data on the world's food and feeds, important factors in the formation of market prices, so that the aggregate supply and demand may be clearly understood and

## SESSIONAL PAPER No. 16

taken advantage of by producers, their agents and the shippers. These interests have had to market abroad this year an average of about one million bushels of wheat per day.

*The International Yearbook of Agricultural Statistics* for 1922 was published in September last. Beginning with this issue the Yearbook, instead of being published only once every two years, is made an annual. It is also more adapted to the convenience of English speaking readers than were previous issues. It contains complete data of population, area and production of crops, international trade in and prices of agricultural products, ocean freight rates, numbers of live stock, etc., in all countries for the years 1919 to 1922 and the average for the period 1909-1913.

The twelfth volume of *The International Yearbook of Agricultural Legislation*, containing the more important legislation enacted in the different countries in 1922 was received. It contains the complete text of many laws on trade in agricultural products, farm machinery, and live stock, and laws that promote the activity of those engaged in agriculture, regulate co-operation and co-operative credit, etc. The titles only of a large number of laws of local interest are given.

The necessary information concerning Canada for these two Yearbooks as well as all other information required by the Institute, including regular reports on the Canadian crops and statistics of imports and exports was furnished by this Branch throughout the year. Articles and monographs were prepared for publication in the Institute reviews. Several articles analyzing the world's crop situation were published.

The original Institute publications were distributed to selected lists of officials and agronomists throughout Canada. Summaries of articles in the Reviews as well as special articles on the world's wheat situation and the world's live stock were published in the *Agricultural Gazette*. The foreign agricultural intelligence service of the Branch furnished a great deal of information to correspondents during the year. Information on the subjects discussed by the Committee were supplied to the Special Committee of the House of Commons Investigating Agricultural Conditions and, on agricultural credit, to the Honorary Advisory Council for Scientific and Industrial Research.

*The Library.*—The branch makes available its Library's considerable resources to research workers and others who, in large numbers, make personal visits or, through correspondence, consult the branch's Library and Periodical Room, borrow books and secure bibliographies. The Branch records show that the benefits of these resources are enjoyed by a larger number of scientific specialists and administrators outside than within the Department of Agriculture, no doubt because the objects of the Institute are so wide and all-embracing, with the accumulated resources of the Library correspondingly so.

*Borrowers' Record:*—

	Borrowers	Books
Department of Agriculture.....	117	1,303
Ottawa (exclusive of Department of Agriculture).....	152	1,013
Ontario (exclusive of Ottawa).....	90	452
Quebec.....	92	436

College d'Agriculture, Ste. Anne de la Pocatiere, P.Q.....	13	145
Agricultural College, Truro, N.S.....	8	65
University of Saskatchewan.....	15	77

*Card Catalogues.*—The total number of cards in the catalogues is approximately 245,548, including:—

Shelf list.....	8,975
United States Department of Agriculture.....	35,775
Experiment Stations.....	39,100
Continuations of Series.....	2,888
Special veterinary catalogue.....	3,350
Library of Congress depository catalogue.....	92,500
General catalogue.....	58,675
Unfiled cards.....	4,285

*Accessions.*—Nine hundred and forty-two bound volumes were acquired by purchase, gift, exchange and binding, made up as follows: by exchange or gift and bound, 199; through entry on mimeographed book review list, 177; by exchange of *Agricultural Gazette* and other departmental publications, 286; by gift, 86; by purchase, 194. The average cost of the purchased books is considerably less than the cost of the volumes bound for the Library by the Printing Bureau. There is a decrease in the total number of accessioned volumes owing to the greatly decreased number of books bound. Ten thousand seven hundred and thirty-seven unbound books and pamphlets were received, of which 8,731 were continuations of series. There are now 12,768 bound volumes in the Library, but as the unbound material is greatly in excess of the bound, we estimate the Library as representing 22,500 volumes of one and a half inches each by actual measurement.

*Periodicals.*—Eleven thousand six hundred and sixty-five periodicals (pieces) were received representing 114 Canadian, 170 American, 58 from the British Isles and 251 from other countries, making a total of 593 titles. Of these 152 were subscribed for, and the others secured free of charge.

*Booklists.*—Descriptive lists of the most important accessions—excluding bulletins, proceedings, reports, etc.—were sent to a mailing list of agricultural officials and professors four times during the year.

*New Work.*—The Library of Congress has agreed to print catalogue cards for the more important series of bulletins of the Federal Department of Agriculture. We prepared cards for the bulletins of the new series and the bulletins of the Entomological Branch. To date, cards for thirty bulletins have been received. Others are now in their hands and will be printed shortly.

Respectfully submitted,

W. R. MOTHERWELL,  
*Minister of Agriculture.*

REPORT OF THE DEPARTMENT  
OF  
NATIONAL DEFENCE  
CANADA

FOR THE  
FISCAL YEAR ENDING MARCH 31,  
1924

(MILITIA SERVICE)

*PRINTED BY ORDER OF PARLIAMENT*

200—9-24.  
650—5-28

OTTAWA  
F. A. ACLAND  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1924

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander-in-Chief of the  
Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the report of the Department of National Defence (Militia Service) for the fiscal year ending March 31, 1924.

Respectfully submitted,

E. M. MACDONALD,  
*Minister of National Defence.*

DEPARTMENT OF NATIONAL DEFENCE,

OTTAWA, November 15, 1924.

OTTAWA, November 12, 1924.

The Honourable the Minister,  
Department of National Defence,  
Ottawa.

SIR,—I have the honour to submit for your consideration, to be laid on the Table of the House, this the Annual Report of the Department of National Defence (Militia Service), for the fiscal year 1923-24.

I have the honour to be, sir,

Your obedient servant,

G. J. DESBARATS,  
*Deputy Minister.*

REPORT OF THE  
DEPARTMENT OF NATIONAL DEFENCE, CANADA  
(MILITIA SERVICE)

FOR THE FISCAL YEAR ENDING MARCH 31, 1924

---

REPORT OF THE CHIEF OF STAFF FOR THE YEAR ENDING  
MARCH 31, 1924

(1) Military Policy and Organization for Defence.

The organization of the Department of National Defence has progressed slowly during the period under review, especially with regard to the inclusion of the Navy and the amalgamation of its ancillary services with those of the Militia and Air Force.

The Defence Council commenced to function on January 31, 1924, and the formation of the Departmental Defence Committee is still under consideration.

Attention is again drawn to the fact that there is no defensive gas equipment nor have we been able to purchase any tractors or tanks.

The General Staff reports have been subdivided into Directorates and are as follows:—

- (2) Military Operations and Intelligence Directorate.
- (3) Training and Staff Duties Directorate.
- (4) Cadet Services Directorate.
- (5) Historical Section.
- (6) The Royal Canadian Air Force Directorate.

The foregoing reports detail fully the various aspects of the work performed by the Directorates of the General Staff, but it is considered that a few comments on the principal features will not be out of place.

*Surveys*

It is interesting to note that the Military Survey Division has surveyed and mapped a total area of 39,207 square miles since the division was first established. The Board of Topographical Surveys and Mapping is functioning and representatives of the Interior Department have been co-operating with surveyors from the Military Surveys Division in producing the Warwick Sheet, Quebec.

*Training*

With regard to training, the money available was expended on the training of officers, non-commissioned officers and specialists, there not being sufficient funds to devote to training on a larger scale. In this connection, the time has now arrived when officers have become tired of training skeleton formations and the interest is waning. It is most discouraging to those commanding officers who have brought their units up to full strength by their enthusiastic

15 GEORGE V, A. 1925

work, and at considerable personal expense, not to be given an opportunity of training the unit in a proper manner. It is, therefore, important that facilities should be made available to train larger numbers of the rank and file.

The number trained during the period under review at local headquarters and camps was approximately 38,000 as compared with 34,000 the previous season. The total establishment calls for about 130,000 all ranks, and if the appropriation cannot be increased, the only alternative is the reduction and reorganization of the number of units that we are attempting to maintain. To obtain the efficiency desired, the whole of the peace establishment of the Canadian Militia should be trained from twelve to sixteen days.

Our expenditure on defence per head of population is \$1.46, or about \$2.99 out of every \$100 of total expenditure. This compares with the leading nations of the world as follows:—

	Expenditure on Defence per head of Population	Amount devoted to Defence out of every \$100 of total expenditure
	\$	\$
Canada .....	1 46	2 99
Great Britain.....	23 04	19 96
Australia .....	3 30	5 95
New Zealand.....	2 33	2 08
South Africa.....	4 27	5 38
United States .....	6 51	16 96
Argentine Republic.....	4 13	17 55
Belgium.....	13 37	10 96
France.....	24 66	20 16
Italy.....	16 58	15 87
Japan.....	4 34	36 00
The Netherlands.....	7 87	14 17
Switzerland.....	4 04	15 43

Owing to the need for economy the training of the Permanent Force had to be kept down to the minimum, and for the same reason there was an insufficient number of instructors and trained personnel for demonstration purposes in connection with the training of the Non-permanent Active Militia. As is pointed out in the report, the Instructional Cadre deserve credit for the work accomplished by their limited establishment, considering that the number of personnel of the Non-permanent Active Militia attending courses at Royal and Permanent Schools was double that of the previous year. The need for more extensive artillery training is being felt, especially with regard to mounted training for light and medium artillery units.

The Militia Staff Course again proved very popular. Forty-five candidates attended the Practical portion during the summer of 1923, all of whom obtained "m.s.c." certificates.

#### *Royal Canadian Corps of Signals*

Attention is invited to the report of the Royal Canadian Corps of Signals, especially that portion dealing with radio-telegraphy in conjunction with the Royal Canadian Air Force and for the Department of the Interior. The work commenced for the Royal Canadian Air Force during 1921 has been successfully continued. Stations at Winnipeg, at Norway House and at Victoria Beach on lake Winnipeg have been installed and are operated by the Royal Canadian Air Force in connection with forestry patrols for the Manitoba Gov-

## SESSIONAL PAPER No. 17

ernment. The radio-telephone work at High River, Alberta, has proved of immense value in the suppression of numerous outbreaks of forest fires. Communication between High River, Alberta, and the Manitoba radio system has been maintained, the distance being approximately 790 miles.

A radio-telegraph system extending from Edmonton up the Mackenzie river and across into the Yukon has been commenced for the Department of the Interior. The complete system includes stations at Dawson City and Mayo in the Yukon, and at Herschel Island, Fort Simpson and Fort Smith in the Mackenzie Basin, with a southern terminal at Edmonton. The equipment necessary was constructed by the Royal Canadian Corps of Signals and the first complete high powered set was completed in July, 1923. The first two stations were put into operation in October, 1923, between Dawson and Mayo, and are working satisfactorily.

*Canadian Small Arms School*

The results obtained by the Small Arms School are very encouraging, especially with regard to the weapon training courses both for the Permanent and Non-Permanent Active Militia. The standard attained by the Permanent units compared favourably with that of the Britannic Forces.

*Historical Section*

The report of the Historical Section is of much interest. It is regretted that unexpected delay occurred in connection with the printing of the History of the Canadian Medical Services in the Great War, and it is hoped that the work will be proceeded with during the coming summer.

Much assistance has been rendered by this directorate to the Battle Honours Committee. The preparation of statements showing the composition of each battalion in the field at the end of each month, throughout the war entailed much research.

*Cadets*

With regard to Cadets, the reduction of \$100,000 in the vote for the previous year necessitated the cancellation of camps, consequently many units lost interest and became reduced in numbers. However, against this loss, 65 units were organized during the period under review, bringing the total number of enrolled Cadets to 110,120. It will be noted that very considerable progress in marksmanship was made by the Canadian boys, practically one team in every four reaching the prize list, an improvement of 100 per cent on their performance for the previous year. This reflects great credit upon the Instructors of competing units.

It is pointed out that unless cadet training, which is now receiving the wholehearted support of educationalists and medical authorities, is to be seriously curtailed increased appropriations are necessary. In the year 1913-14 with a strength of 47,039, the sum of \$390,500 was voted for cadet services. In 1923-24, with a strength of 110,120, the sum of \$450,000 was provided.

*Royal Canadian Air Force*

The Royal Canadian Air Force has been placed on a permanent basis and is operated as a Directorate of the Chief of Staff Branch. King's Regulations and Orders for the Royal Canadian Air Force as well as Pay Regulations, have been promulgated.

Cadet officers for the Royal Canadian Air Force are being furnished from the Royal Military College and from the Officers Training Corps, arrangements having been made to train these cadets at Camp Borden during the summer vacation, and the scheme is meeting with great success. The annexed report contains detailed information regarding this subject.

The work in connection with the aerial survey and forestry protection has been extended in the provinces of Manitoba, Saskatchewan and Alberta.

Full particulars regarding this work are contained in the report covering Civil Aviation and Operations of the Royal Canadian Air Force for Civil Departments during 1923, which has already been published.

## (2) Military Operations and Intelligence

### *Operations*

Further attention has been given to the work referred to in the annual report of 1922-23. Nearly all questions of military policy have been referred to this directorate for investigation and report. Close attention has been given to all international questions to study their effect on the arrangements for national defence. Some of the questions considered were:—

1. The Great Lakes and the St. Lawrence Deep Waterway.
2. Hudson Bay Railway and route.
3. Revision of the Rush-Bagot Treaty.
4. League of Nations, and various reports called for by the temporary Mixed Commission.

Control of manufacture of arms and munitions by private firms. Colonel David Carnegie consulted this department before he submitted his scheme concerning the limitation of private manufacture to the sub-committee appointed to investigate that subject.

### *Mobilization*

More study and work in connection with mobilization has been carried out.

The Director has been appointed the Chairman of the Sub-committee for the purpose of drafting the Mobilization Regulations for the general mobilization of the Canadian Militia.

### *Intelligence*

The collection, collation and distribution of military intelligence has been continued with as great efficiency as possible in view of the lack of funds set aside for the purpose.

The directorate can give in a short time a fair report on almost any military or related question.

### *Organization and Liaison*

Questions of military organization, localization of units of the Non-Permanent Militia and establishments have been referred to this directorate for concurrence or criticism.

The officers of this directorate have been required to give a good deal of time as presidents or members of various military courts, boards and committees.

The Assistant Director of Military Intelligence has been required to devote a large portion of his time to the perusal, correction and circulation of the Annual Inspection reports. This work was formerly done by the Branch of the Inspector General.

The officers of the directorate have spent considerable time in research work and in lecturing.

*Departmental Library*

The work of reclassification and recataloguing, as mentioned in last year's report, has gone on, and at the end of the fiscal year, 6,046 volumes were reclassified and recatalogued: there remain about 4,000 bound volumes and many pamphlets, etc., to be attended to.

One hundred and forty-seven new volumes dealing with military questions were ordered during the year, of which 104 were received, together with 20 ordered in the previous year.

Nine volumes were presented to the Library.

Various service papers, periodicals and other publications of interest to the service have been received and circulated.

Press clippings of interest to military, naval and air force officers have been circulated daily.

*Military Survey Division*

Survey work was carried out in Ontario, Quebec and Alberta.

The Course of Instruction in Surveying, beginning February 1, 1923, was completed December 22: of the class of ten taking this course, five obtained certificates as topographic surveyors. A new course was begun January 2, 1924, which will be terminated at Christmas, 1924.

The Survey Division was established in 1902, and the carrying on of topographic surveys and production of maps has, from that time to the present, been steadily and systematically proceeded with. At the present time the area of country accurately surveyed and mapped is as follows:—

Area surveyed and maps published.....	30,607 sq. miles
Area fully surveyed, not yet mapped.....	3,440 "
Area partly surveyed.....	5,160 "
Total.....	39,207 "
Standard maps published, 1" to 1 mile.....	90
Standard maps published, 1½" to 1 mile.....	8

The new offset press has been used to print all the later one-inch sheets and much other work, and has already proved its great value. The elimination of the long, difficult and expensive photo-etching process will reduce the cost of reproduction very considerably, while the beauty and accuracy of printing are most satisfactory.

Five Dominion land surveyors, detailed by the Director General of Surveys, Department of the Interior, at the request of the Department of National Defence, to co-operate in the survey being carried out in Quebec by the Survey Division, were under instruction in this office for about one month, and two weeks in the field under a topographic supervisor of this department. This was for instruction in topography before taking over the topographic field work of the Warwick sheet, Quebec: the complete control having been finished by the Survey Division in 1922. This party, with assistants, left June 1 for Quebec and during the season completed one hundred and seventy-seven miles of the Warwick sheet. This work was carried out under our supervision. A special grant of \$7,500 was allotted by the Interior Department for 1923, which has been increased for 1924 to \$9,000, for the completion of the Warwick sheet.

*Control.*—The surveys for the control of new one-inch sheets being at least one year in advance of the topographers, no further work of this nature was done, except at Camp Sarcee. Three surveyors, under the supervisor of control, left for Calgary in June and completed the full control for the Camp Sarcee map by the end of August. This work was as follows:—

Primary chained traverse.....	85 miles
Secondary Traverse.....	70 "
Levelling.....	155 "

*Magnetic Declination.*—The supervisor of control determined the declination at a definite point on the ground in eighteen map sheets, five of these being new. The remainder were repeat visits to sheets where the declination had been obtained from ten to fifteen years ago.

*Long Branch Survey.*—Early in October directions were received to make an accurate detail survey at 200 feet to 1 inch with 2-foot contours of all Government property, at Long Branch, near Toronto; about four hundred and fifty acres. A party of six, later eight, left for Toronto October 12 and completed the survey in about one month. The work was carried out with great care, both as to survey and draughting, and to preserve the accuracy of the field work in the map, it was printed in black only.

*Revision.*—An officer, with three topographers, began the revision in the field of the four one-inch sheets—Toronto, Brampton, Markham and Bolton. This was required to bring the survey work up to date before the production of the Toronto half-inch sheet, which will include the detail of the above four sheets. Revision was completed December 22.

*Topography.*—On April 17, revision of the Ottawa sheet was begun, and completed with field work examined by July 1. Any changes to this sheet in future revisions should now be of the nature of additions, rather than corrections.

As the topographers finished their work in the Ottawa district they left for Quebec, with the exception of three, who proceeded June 1 for the Camp Sarcee survey, the control for this being under the supervisor of control, the topography and examination of field work under a senior topographer.

In Quebec, the Arthabaska and Scottstown sheets, partly surveyed last season, were completed as well as all the Megantic sheets.

On two occasions the Director of Military Operations and Intelligence inspected the work in the field. The interest thus shown in the work being carried out by the men was much appreciated by them.

Total topography completed:—

Sheet	Scale	Area
Ottawa.....	2"	440 miles
Scottstown.....	2"	110 "
Megantic.....	2"	405 "
Arthabaska.....	2"	94 "
Sarcee.....	4"	76 "
Total.....		1,125 "

The present condition of the field and draughting work is as follows:—

Districts fully controlled, ready for topographers.—Ontario, 6—Grand Bend, St. Marys, Stratford, Alliston, Barrie, Beaverton. Quebec, 6—St. Sylvestre, Thetford, Disraeli, Warwick, St. Evariste, Armstrong.

Districts fully surveyed, ready for draughtsmen.—Quebec, 3—Arthabaska, Scottstown, Megantic. Nova Scotia, 3—Bras d'Or, Mira, Louisburg.

Ready for printing, 2—Malvina, 1-inch; Drummond,  $\frac{1}{2}$ -inch.

*Draughting.*—Work in the hands of the draughtsmen and engraver, 6 sheets: 1-inch, Ottawa; Lyster, Que.; Sydney, Louisburg and Glace Bay, N.S.;  $\frac{1}{2}$ -inch, Toronto.

*Printing.*—The following new maps and diagrams were printed:—

Standard 1" sheets:—Uniacke, Yamaska, Becancour, Aston, Three Rivers, La Patrie, Woburn.....	6,262
Other maps, 20 Truro, Gallipoli Campaign (6), History P.P.C.L.I. (11), Long Branch (2).....	26,295
Diagrams, etc., 49. Different.....	8,813
Reprints 1" and $\frac{1}{2}$ "... Sheets (14).....	9,990
	51,361

## SESSIONAL PAPER No. 17

*Maps and Diagrams issued—*

1" and 1½" sheets free to various Government departments.....	7,468
1" and 1½" sheets sold to public.....	7,070
Special maps.....	25,396
Diagrams.....	8,813
	<hr/>
Photographs (80).....	48,727
Lantern slides.....	953
	<hr/>
Total documents.....	50,409

## (3) Military Training and Staff Duties

## TRAINING

*Remarks.*—The small increase in the annual drill vote over that allotted for last year was not sufficient to warrant any material change in the programme of training. As only sufficient funds were available to train a small proportion of selected units, it became increasingly difficult to maintain in the Active Militia that interest and keenness so essential to successful results in training. While the organization of existing units remained intact, a general advance in efficiency could not be expected.

Similarly to last year, the available funds were devoted principally to the training of officers and N.C.O.s, and while in this essential respect satisfactory progress was made, it cannot be considered that this programme alone will bring the Militia of Canada to a satisfactory state of efficiency.

It is now an urgent necessity that unit training on a comprehensive scale be resumed.

## PERMANENT FORCE

Owing to their reduced strength and heavy calls for instructional duty with the Non-Permanent Active Militia, it has not been possible to concentrate the personnel of Permanent Force units for camp and combined training.

The training of the personnel available was therefore carried out in the respective areas under arrangements made by the District Officers Commanding. The following units proceeded to camp for training as shown, but with the exception of those marked \* were withdrawn for strike duty in Nova Scotia before completion of training.

## SESSIONAL PAPER No. 17

## NON-PERMANENT ACTIVE MILITIA

*Unit Training.*—Central camps were held to a very limited extent, otherwise, unit training (except artillery) was carried out at local camps or local Headquarters for a period of 9 days and, units in general were necessarily restricted to an average strength of 40 per cent.

Detachments of mobile artillery batteries were permitted two days' training at local headquarters and 8 days at practice camp for firing detachments. The coast artillery were allowed eight days at local headquarters and four days' practice at the forts.

The following table shows the training completed by units of the Non-permanent Active Militia during the financial year 1923-24.

## SESSIONAL PAPER No. 17

## SCHOOLS OF INSTRUCTION

*Remarks.*—Instructional work had to be considerably restricted again this year owing to the financial situation.

*Permanent Force.*—The attendance of candidates at courses in England for the higher military education of officers and N.C.Os. of the Permanent Force was necessarily kept down to the minimum. A number of applications for candidates to proceed to England for instructional courses had to be refused on grounds of economy.

While it is essential that the full number of technically trained Permanent Force personnel should be maintained, this was not possible under the economic conditions which prevailed.

*Non-Permanent Active Militia.*—It is gratifying to note that the number of personnel of the N.P.A.M. attending courses at Royal and Permanent Schools has increased to double that of 1922.

Owing, however, to the reduced strength of the Permanent Force, there was an insufficient number of instructors and trained personnel for demonstration purposes; consequently, at many schools, full value could not be given to the members of the Non-Permanent Active Militia attending for instruction. It is greatly to the credit of all ranks engaged on this instructional work that with the limited facilities available they were able to accomplish as much as they did.

Courses for both Permanent and Non-Permanent Active Militia were held and attended by personnel as shown below:—

## COURSES IN ENGLAND

*Permanent Force.*—*Staff College, Camberley*

Major (Bvt. Lt.-Col.) W. G. Beeman, DSO., R.C.A., January, 1922, to December, 1923.

Capt. (Bvt. Lt.-Col.) R. J. Brook, CBE., DSO., R.C.R., January, 1922, to December, 1923.

Major (Bvt. Lt.-Col.) H. D. G. Crerar, DSO., R.C.A., January 1923, to December, 1924.

Major G. P. Vanier, DSO., MC., Royal 22nd Regt., January, 1923, to December, 1924.

Lt.-Colonel E. W. Sansom, DSO., C.S.A.S., January, 1924, to December, 1925.

Capt. (Bvt. Major) M. A. Pope, MC., R.C.E., January, 1924, to December, 1925.

*Staff College, Quetta*

Captain J. K. Lawson, The R.C.R., February, 1924, to December, 1925.

*Attachments and Senior Officers School*

Major (Bt. Lt.-Col.) W. H. Bell, DSO., The R.C.D., February, 1924, to August, 1924.

Major C. E. Connolly, DSO., L.S.H. (R.C.), February, 1924, to August, 1924.

Major E. A. S. Smith, The R.C.R., February, 1924, to August, 1924.

*Ordnance Officers Course*

Lieut. (T. Capt.) V. A. Curmi, R.C.O.C., February, 1924, to January, 1925.

*Gunnery Staff Course*

Captain C. C. Shaw, R.C.A., October, 1922, to July, 1924.

Captain R. L. Fortt, R.C.A., October, 1922, to July, 1924.

Lieut. (Bvt. Capt.) R. O. G. Morton, R.C.H.A., September, 1923, to June, 1924.

*Master Gunners Course*

No. 8008 QMSI. S. G. Williams, R.C.H.A., April, 1923, to March, 1924.

No. 4011 Sergt. D. McCarthy, R.C.G.A., April, 1923, to March, 1924.

*Small Arms Course*

Major A. K. Hemming, The R.C.R., March, 1923, to November, 1923.

Captain K. C. Burness, MC., P.P.C.L.I., March, 1923, to November, 1923.

*Physical Training Course*

Captain F. M. W. Harvey, VC., MC., L.S.H. (RC.), April, 1922, to July, 1923.

*School of Military Engineering*

Captain J. E. Lyon, R.C.E., September, 1922, July, 1924.

*Armament Artificers Course*

No. 34756 S/Sergt. H. W. Thomas, R.C.O.C., April, 1923, to March, 1924.

*School of Mil. Administration*

Lieut. (Bvt. Capt.) J. E. H. Tidswell, R.C.A.S.C., September, 1923, to January, 1924.

*Laboratory Foreman's Course*

No. 34606 Pte. W. S. McFarlane, R.C.O.C., September, 1923, to January, 1924.

*Special—To Visit Armourers' Establishments*

Major R. B. Whyte, R.C.O.C., July, 1923, to October, 1923.

*Non-Permanent Active Militia—**Special Signalling Courses*

P/Major F. H. M. Jones, MC., 6th Signal Bn., April, 1923, to August, 1923.

## COURSES IN CANADA

*Staff College Preparatory Course*

The third post-war course for officers preparing for the examination for admission to the Staff College was held from October 1, 1923, to February 26, 1924, at the Royal Military College, Kingston. This course was attended by five officers of the Permanent Active Militia, all of whom competed at the examination for admission to the Staff College for the two vacancies allotted to Canada.

*Refresher Course, R.M.C.*

In conjunction with the above, a Refresher Course was held for officers of the Permanent Active Militia from October 1 to the end of December, and was attended by eleven officers.

*Artillery Staff Course*

The second post-war Artillery Staff Course commenced during the last financial year (January, 1923), and continued for the following nine months. Four officers and five N.C.Os. qualified at this course.

*School of Military Engineering, Halifax*

Searchlight Operators, Foreman of Works and Field Engineering Courses were held for personnel of the R.C.E. A total of one officer and nine other ranks attended during the year.

*Royal Canadian Ordnance Corps, Ottawa*

Courses of Instruction were held at Ottawa for personnel of the R.C.O.C. A total of 42 other ranks attended during the year.

*Signal and Small Arms Courses*

See under "Signal Service" and "Small Arms Training" respectively.

*Militia Staff Course*

The Militia Staff Course Syllabus is drawn up so as to enable officers of the Non-Permanent Active Militia to fit themselves for employment on the staff of formations in the field.

The theoretical portion of the first post-war course was carried out in 1922. The practical portion of this course (of twelve days' duration) was carried out during the summer of 1923 at St. John's, P.Q., for candidates from Eastern Canada, and at Sarcee Camp, Alberta, for candidates from Western Canada. Forty-five candidates attended, all of whom obtained "m.s.c." certificates.

The theoretical portion of the second post-war course was held in the several districts during the winter months, and again proved very popular. One hundred and seventy-four officers attended the lectures in this portion, while many others attended unofficially from time to time as opportunity offered.

*Qualifying and Special Courses*

Qualifying and Special Courses for Non-Permanent Active Militia were held at Royal and Permanent Schools of Instruction as follows:—

M.D.	School	From	To	Number attending	
				Officers	Other Ranks
2	Royal School of Cavalry, Toronto.....	Oct. 8	Nov. 12	8	14

3	Can. Army Medical Corps .....	1	8	.....

The number of officers and N.C.O's who obtained certificates at the above schools is shown in statements appearing on pages 26 to 29.

*Staff Tours, War Games, Etc.*

Staff Tours, War Games, and Tactical Exercises were carried out at various times and places under arrangements made by the District Officers Commanding. These exercises were well attended and produced good results.

## EXAMINATIONS

*Promotion Examination Permanent Active Militia.*—A total of 29 presented themselves at the written examinations held in April, and October. Of this number five qualified in one or more subjects for the rank of Major, and 18 for the rank of Captain.

*Foreign Languages.*—Interpretership examinations in French were held under the regulations of the British Civil Service Commissioners at certain centres in Canada in June, 1923, and January, 1924, at which officers qualified as follows: first-class interpreter, 2; second-class interpreter, 7.

*Canadian Officers Training Corps.*—In addition to the annual training of C.O.T.C. Contingents as shown under "Training" above, there was a satisfactory attendance of Cadets at the half yearly examinations for Certificates "A" and "B" as shown in the summary of results given on page 25.

The former certificate qualifies a candidate for a commission in the Non-Permanent Active Militia, and the latter is equivalent to a certificate for the rank of Captain.

45 Officers passed the Militia Staff Course.

*Courses Held in England—*

1 Special Instructors' certificate of Signalling (School of Signalling), Maresfield, England.

1 Satisfactory certificate (School of Military Administration) Chiseldon, England.

2 Officers "Qualified" in "The Rifle and Light Automatic" (School of Musketry) Hythe, England.

## ARTILLERY

*Armament*

The two Q.F. 6-inch guns and mountings received from the Department of Naval Service last year have been mounted in replacement of two obsolete B.L. 6-inch disappearing guns. An additional two Q.F. 6-inch guns and mountings have been secured from the Naval Service, and it is proposed to mount these also in replacement of obsolete equipment so soon as funds covering the small expenditure involved are available.

The serviceability of armaments has been maintained in so far as available funds permitted. The Reserves of Coast and Mobile Artillery ammunition are much below the minimum required for the several natures of guns.

*Artillery Training, 1923-24*

The early resumption of Mounted Training for Light and Medium Artillery units is most necessary. The present system of only training small detachments from each unit which has been found necessary owing to the financial situation cannot be continued much longer without serious effect on the efficiency of the artillery of the Canadian Militia.

*Royal Schools of Artillery*

Courses of instruction were held at all schools during the late autumn of 1922 and winter of 1923 with satisfactory results. The number availing themselves of the instruction and qualification offered is still below the normal requirements of Non-Permanent Artillery.

The total attendance of N.P. Artillery was 53 officers and 100 N.C.Os.

There has been a tendency to ask for Provisional Schools of Artillery and, in some cases, it has been found necessary to grant such requests. These schools can only qualify candidates in theoretical subjects and are in any case, unsatisfactory as the attendance is irregular and it is impracticable to provide at the local centres the equipment and apparatus necessary for a proper gunnery course. Provisional Schools are, therefore, only authorized under exceptional conditions.

The instructional capacity of the Permanent Force Artillery was raised considerably by the successful qualification of four officers and five N.C.Os. on the Artillery Staff Course. The usual attention was paid to special and short courses for the purpose of qualifying personnel for promotion in the junior ranks of the P.F. Artillery.

## SIGNAL SERVICE

The work of the year under report has resulted in a general advancement of the organization and training of Signallers both in the Permanent and Non-Permanent Active Militia and Cadets.

*The Royal Canadian Corps of Signals*

The limited establishment of the Royal Canadian Corps of Signals is not sufficient at present to enable the Unit to supply the Administrative and Training Staffs for the Militia and the special Communication Services that are now being carried out by the Department of National Defence for other departments and branches of the Dominion Government.

## SESSIONAL PAPER No. 17

The Northwest Territories and Yukon Radio System and the Radio Service for the Royal Canadian Air Force is being conducted without a sufficient margin of safety as regards staff and personnel training, engineering, supervision, etc.

The Instructional Cadre.—Signals have been fully occupied during the year at Provisional and Royal Schools of Signalling, Summer Camps of Instruction and the supervision of Signal training with other Permanent and Non-Permanent Active Militia Units and Cadet Corps.

During the year 1923-24, a total of 66 Provisional Schools of Visual Telegraphy and eight Schools of Line Telegraphy, together with 72 Cadet Classes in Signalling, have been conducted.

The comparison with the number of schools held in preceding years, is given below:—

	V/T.	L/T.	Cadets	Total
Year 1921-22.....	47	1	44	92
Year 1922-23.....	49	6	53	108
Year 1923-24.....	66	8	72	146

The number of certificates granted, as compared to previous years, is as under:—

	1921	1922	1923
<i>Visual Telegraphy—</i>			
Officers Grade "A".....	48	55	57
Officers Grade "B".....	21	8	8
Other Ranks "A".....	134	219	233
Other Ranks "B".....	284	174	183
Other Ranks "Signalman".....		60	57
Totals.....	487	516	538
<i>Line Telegraphy—</i>			
Officers Grade "A".....	4	18	13
Officers Grade "B".....	1	1	1
Other Ranks "A".....	1	21	42
Other Ranks "B".....	6	21	25
Totals.....	12	61	81

While these figures exhibit steady progress and the training staff available has been fully employed, it must be emphasized that the number of certificates issued still falls far short of the requirements of the Canadian Militia. Increased facilities for signal training are most urgently required.

### *Royal Canadian Schools of Signalling*

Qualifying Courses in Visual Telegraphy for selected candidates of the Permanent and Non-Permanent Active Militia were held at Camp Borden and Winnipeg during the summer of 1923.

Thirteen officers were successful in qualifying as Instructors, and 26 N.C.Os. obtained their qualifications as Assistant Instructors in Visual Telegraphy.

*Cadet Signalling Classes*

The majority of the 72 Cadet Classes conducted during the year were held concurrently with Provisional Schools of Signalling conducted for the Non-Permanent Active Militia. The number of classes held, as also the totals of Cadets successful in obtaining certificates, show an appreciable increase over previous years.

	1921	1922	1923
<i>Cadet Certificates Granted—</i>			
1st Year—Semaaphore .....	993	1,186	1,422
2nd Year—Morse .....	100	242	246
3rd Year—Advanced .....		60	67
Totals .....	1,093	1,488	1,736

*Radio Activities—The R.C.C.S.*

*R.C.A.F.*—The radio work which this department began for the Royal Canadian Air Force during 1921 has been successfully continued during the past year.

The three Ground Stations in Manitoba were reopened in May, 1923, and were operated continuously until the end of October. Stations were located at Winnipeg and at Norway House and Victoria Beach on lake Winnipeg. These Stations are operated by the *R.C.A.F.* in connection with forestry patrols for the Manitoba Government and it is intended to equip the seaplanes in use in Manitoba with radiotelephone apparatus during the coming season, so that the patrol system in operation in Alberta can be carried on in Manitoba.

The radiotelephone work with aircraft at High River, Alberta, was continued during the summer with very satisfactory results. There was no change in equipment or planes; and as was the case during the season 1922, only one-way communication was attempted.

An average range of 150 miles for good commercial speech between the patrol planes and the Ground Station was maintained.

The main purpose of the Air Station at High River, Alberta, is the patrol of the Bow and Crow Forest Reserves on the eastern slopes of the Rocky Mountains for the detection of forest fires in these areas and the installation of radiotelephony has proved of incalculable value in the immediate reporting and quick suppression of numerous outbreaks.

Communication between High River Alberta and the Manitoba Radio System was again maintained this year, the distance being approximately 790 miles.

An additional Station is now under construction for the *R.C.A.F.* and is to be installed at the Air Station, Jericho Beach, Vancouver. This station is designed to operate with the *R.C.A.F.* forestry and fisheries patrols for the British Columbia Government.

*Ottawa Radio Station*

The Ottawa Station was moved during the year from Rockcliffe to a new location, selected to avoid certain interference from the street car system. The design of this station is identical with those built for other Government departments and is utilized for radio communication between Ottawa and Camp Borden for the *R.C.A.F.* and for experimental and test work on radio apparatus designed and built in the Signals Inspection and Test Department.

*Radio Work for Department of the Interior*

A radiotelegraph system, extending from Edmonton up the Mackenzie river and across the Yukon, has been begun for the Department of the Interior.

The complete system, as at present projected, includes stations at Dawson City and Mayo in the Yukon, and at Herschel Island, Fort Simpson and Fort Smith in the Mackenzie Basin, with a southern terminal located at Edmonton.

The main steps in this system are approximately 600 miles each, and as military equipment capable of covering such distances commercially was not available in Canada, it became necessary to design and build special apparatus.

On account of the isolated nature of most of the stations on this system, it was essential that they should be made self-contained in every way, from the source of power out. In selecting the various elements comprising the station equipment, an effort was made to use equipment manufactured on this continent, in order to facilitate the supply of spare parts.

The construction of the necessary equipment was undertaken by the Radio Engineers of the R.C.C.S., and the first complete high-powered set was turned out in the signals workshop in July of last year.

As funds had not been made available sufficiently early, it was impossible to complete the construction and installation of the entire system in one season. After consultation with the Department of the Interior it was decided to concentrate attention on the Dawson-Mayo link; the reason for this was to avoid the necessity of building 165 miles of telegraph line into the new mining district of Mayo.

This was the shortest step in the chain and in order to complete the work before freeze-up, a 120-Watt Portable Military Set was sent to Mayo, and the one standard station available installed in Dawson City. The set in Mayo will be replaced by standard equipment this summer.

A party of two officers and six men of the R.C.C.S. were sent from Ottawa to install these two stations. The work was completed and the first part of the system put into operation in October, 1923. Since that date these two stations have been in continuous communication and satisfactory results have been obtained.

At present the amount of traffic is not heavy but it is all remunerative, and with the installation of the new stations connecting up with the Canadian National Telegraphs at Edmonton a great increase in traffic may be looked for. In addition to serving the needs of the Government and commercial interests in the Yukon and Mackenzie Basin, the system will also be of great value to fur trading and development work in those districts, and it will also assist police supervision and render regular Meteorological Reports to the Dominion Meteorological Service from a part of the world which up to date has been closed to Meteorological investigation.

*Signals Inspection and Test Department*

This department has been working at full capacity throughout the year on the design and construction of the "Standard Set," for installation in all Radio Stations in operation, or projected, by the Department of National Defence. To date eight complete Stations have been manufactured and the numerous components in masts, aerial gear, and power plants assembled. Experimental and Research Work has been carried out during the year and two special portable radio sets have been designed and built in the workshops, one for the Director of Surveys, Department of the Interior, the other for the Dominion Forestry Inspector of Manitoba. In each case the instruments gave perfect satisfaction in the work for which they were especially designed.

A considerable amount of wireless and telephone equipment has been overhauled, repaired and tested for the R.C.A.F. and Non-Permanent Active Militia.

### *The Signal Depot*

The R.C.C.S., located at Camp Borden, has been engaged throughout the year on the training of recruits and in carrying out successive courses in visual, line and wireless telegraphy for the training of personnel either for employment as wireless operators and electricians on Department of National Defence Radio Stations or for duty as Assistant Instructors in signal work.

## SMALL ARMS TRAINING

During the period under review training in the rifle, bayonet, light automatics (Lewis and Hotchkiss), Vickers machine gun and revolver, were carried out in both the Permanent and Non-Permanent Active Militia. In addition to general training the following annual courses were fired:—

### *Permanent Active Militia*

The annual weapon training courses were practically identical with those fired in the British Army, being slightly modified to suit our conditions.

With the rifle recruits of Cavalry, Engineers and Infantry fired the complete course. Recruits of other units fired a modified course. Trained soldiers of Cavalry and Infantry fired the classification practices, and those of other units a shorter course more suitable to their requirements.

Hotchkiss and Lewis Light Automatic courses were fired by Cavalry and Infantry; all men so advanced carrying out a short course and three men per gun firing the complete course.

The Machine Gun Companies of Infantry units fired the course laid down for the Regular Army.

All ranks armed with the revolver fired the courses laid down for the various branches of the service.

The results obtained in the foregoing courses showed a marked improvement over those of the previous year, and compared very favourably with the standard attained in the British Army.

### *Non-Permanent Active Militia*

The programme of weapon training was published in "Memorandum for Camps of Instruction, Part I, 1923," the various courses being based on those laid down for the British Territorial Army and modified to suit our conditions. Interest in this branch of training was greater than in the previous year and the results obtained were satisfactory.

### *Cambridge Challenge Bowl*

During the year 1923, the Cambridge Challenge Bowl was competed for by the various units of the Permanent Active Militia and was won by No. 3 Battery, R.C.A. (M.A.), Kingston, Ont., with an average score of 148 7 points.

This trophy, which was donated by the officers of His Majesty's Regular Army on leaving Canada, is awarded to the Squadron of Cavalry or Battery or Company of Artillery, or Company of Engineers, Infantry or Signal Corps, Pay Corps, Army Service Corps, Corps of Military Staff Clerks, or Headquarters of units or detachments of the foregoing having a strength of 40 all ranks or over, obtaining the highest average in certain of the practices of the annual rifle course.

## SESSIONAL PAPER No. 17

No squadron, battery, company or detachment is eligible for the award unless at least 80 per cent of the actual strength, as shown by the parade states on the days of firing for the trophy, has taken part in the practises.

*Best Shot Badges*

Best Shot badges for the year 1923 were awarded to the best shot in the Royal Military College and in each squadron, battery or company of Cavalry, Artillery, Engineers (including field troop attached), Corps of Signals, Corps of Guides, Canadian Officers' Training Corps, Infantry, Machine Gun Corps and Army Service Corps of the Non-Permanent Active Militia.

The badge, which is worn on the left fore-arm, is awarded to the non-commissioned officer or man obtaining the highest score in the classification practices of the annual rifle course.

The names of winners of these badges were published in Militia Orders.

*Rifle Associations*

On March 31, 1924, there were in existence 154 Military Rifle Associations with a total membership of 25,382, and 112 Civilian Rifle Associations with a total membership of 6,898.

Dominion of Canada prizes, which consist of silver salvers mounted with the Canadian Coat of Arms, and engraved with the name of the winner and association, were competed for in 17 Civilian Rifle Associations; the names of the winners being published in Militia Orders.

To be eligible for this prize, the association must hold four competitions during the season, in each of which at least 40 per cent of the members must take part. Competitors must be duly enrolled members of the association they represent as shown by the service roll.

The competition is fired at 200, 300, 500 and 600 yards, five shots at each range, service targets being used.

The Dominion of Canada Rifle Association and all the Provincial Rifle Associations held annual prize meetings during the period under review.

*Courses of the Canadian Small Arms School*

Annual courses of the Canadian Small Arms School were held during the summer of 1923.

In addition to the courses at the main school, a branch school was established at Camp Hughes, Manitoba, to accommodate candidates from the Western Military Districts.

In July, 1923, the main school was transferred from Rockcliffe Rifle Range to Connaught Rifle Range. The new range, which is 14 miles from Ottawa, covers an area of 2,800 acres and is modern in all respects.

The results of the courses were as follows:—

COURSE NO. 5 (CAMP HUGHES)

<i>Attendance—</i>		
Officers.....		22
W.O's. and N.C.O's.....		4
<i>Results—</i>		
	Passed	Failed
Officers.....	21	1

#### (4) Cadet Services

A reduction of \$100,000, in the cadet vote for 1922-23, and the consequent cancellation of camps, was followed in many centres by a loss of interest and shrinkage in numbers. Against this, however, sixty-five new Units were organized during the present year, bringing the total number of enrolled cadets to 110,120.

The changes in the syllabus of training referred to in last year's report have proved beneficial, and reports from all Provinces indicate an improvement in the carriage and bearing of the cadets as a result of the concentration of attention on physical exercises.

## SESSIONAL PAPER No. 17

In order that all school teachers should be qualified to instruct in these exercises classes in physical training were held at Normal Schools throughout the country, with 12,184 student teachers in attendance, of whom 5,876 completed courses and received certificates of qualification.

One thousand and forty-four graduate teachers attended refresher courses with beneficial results.

Four hundred and eleven male teachers obtained Cadet Instructor's Certificates, and 36, certificates of qualification at the Small Arms School.

The number of cadets instructed in signalling again shows an increase. Seventy-two classes were held at which 1,422 first year, 246 second year and 67 third year certificates were granted.

Due to the introduction of the new .22-inch rifles, target practice received a great impetus. In all competitions the entries were in excess of the numbers received in any previous year.

For the Imperial Challenge Shield Competitions—miniature rifle shooting for boys of the Empire—2,578 teams entered, 241 being from Canada of whom 134 returned scores.

The report of the National Rifle Association in regard to Canada's part in the competitions reads as follows: "Very considerable progress in marksmanship is made by the Canadian boys, practically one team in every four which fired has succeeded in getting into the prize list; this is an improvement of 100 per cent on their performance last year and reflects great credit upon the instructors of the competing units.

"Canada wins the first three places in the Senior Competition, the Calgary Boy Scouts standing at the head with the fine average score of 97.6 points.

"The Canadian results as regards numbers (134 teams firing) continue, however, to be well below the standard of the other Dominions, notably of South Africa (609 teams firing) and New Zealand (574 teams firing.) It is sincerely hoped that Canada will soon put forward her great strength and will have well over 1,000 teams in the field."

Peterborough Collegiate Institute Cadet Corps won second prize and the Commercial Academy Cadet Corps, Quebec, third.

As the cadets become more accustomed to the new rifles, it is confidently believed very marked improvement will be observed, both in the numbers competing and in the quality of the shooting.

In this competition a Challenge Cup generously donated by His Excellency the Governor General for award to the organization showing the greatest all-round efficiency, was won by Trinity College School Cadet Corps, Port Hope, Ont.

The most gratifying progress was made during the year in the miniature rifle matches of the Dominion of Canada Rifle Association, in which 233 Cadet teams entered as against 76 the preceding year. The senior series was won by Colchester Academy Cadets, Truro, N.S., and the junior series by Trinity College School, Port Hope, Ont.

There was a marked improvement in the Service Rifle competitions. Twenty-seven teams fired for the King George Challenge Cup, which was won for the second time in succession by the Winnipeg Grenadiers Cadet Corps, with Trinity College, Port Hope, a close second.

The Royal Military College Inter-Schools Competition brought out fifty-eight teams, Hamilton Collegiate Institute again winning the trophy, with Kingston Collegiate Institute in second place.

The trophy donated by the late Earl Grey, when Governor General of Canada, to be awarded annually to the province having the largest number of cadets in proportion to school attendance, was again awarded to the province

of Quebec, to be held for six months by Lower Canada College Cadet Corps, Montreal, and for six months by the Commercial Academy Cadet Corps, Quebec, these being the most efficient Cadet Corps in the province.

During the school year 1913-14, 47,039 cadets were trained, of whom 10,581 received additional instruction in camps. The appropriation for Cadet Services that year was \$390,500, whereas in the present year, with a vote increased by only \$60,000, it was found possible to train 110,120 cadets at local headquarters and permit 9,287 of the senior boys to go to camp for periods of from five to eight days.

Unless cadet training, which is now receiving the wholehearted support of educationalists and medical authorities, is to be seriously curtailed, increased appropriations must in future be made. In this regard the action of the Government of the province of Quebec in voting recently the sum of \$5,000 for the encouragement of physical training in schools is noted with great satisfaction.

A comparative statement of enrolled strength by provinces for the years 1913-14 and 1923-24 is given below, with amounts voted for Cadet Services in each of these years:—

Province	1913-14	1923-24
	Enrolled Strength	Enrolled Strength
Ontario.....	14,610	34,293
Quebec.....	18,148	50,266
Nova Scotia.....	1,675	2,524
Prince Edward Island.....	471	807
New Brunswick.....	763	1,838
Manitoba.....	4,164	5,079
Alberta.....	3,778	5,513
Saskatchewan.....	1,937	4,500
British Columbia.....	1,493	5,300
Total.....	47,039	110,120
Amount voted for Cadet Services .....	\$390,500 00	\$450,000 00

## (5) Historical Section

### *Collection, Classification and Disposal of Historical Documents*

Owing to part of the clerical staff having to be transferred to work connected with Battle Honours the task of classifying, indexing and filing the enormous mass of documents pertaining to the Great War, contained in packing cases and custody parcels, has been considerably restricted. In the course of the year, however, 5,700 files have been dealt with and the information made available for immediate reference, in addition to a considerable number of maps and plans. Other material which is now in custody of this Section has been sorted into folders, and is in course of being arranged in chronological or subject order so that the final process of abstraction may be pursued unhindered. There remains, however, a further mass of papers accumulated during the War containing much of historical value which has yet to be taken over from the Directorate of Records and examined, classified and made ready for immediate reference.

A great amount of material consisting of artillery documents, maps, nominal rolls, etc., filling two large cabinets, not previously in possession of the Historical Section, has also come to light and has been examined and an inventory made.

## SESSIONAL PAPER No. 17

With the view of facilitating the work of writing the history certain officers have been most helpful by donating or loaning to the section private diaries, memoranda, duplicate reports, field messages, letters, sketch maps, aeroplane photographs, vital statistics, etc., relating to their experiences overseas or which have come into their possession in various ways. These are most valuable. The Section is particularly indebted to Lieut.-General Sir R. E. W. Turner, Major General Sir E. W. B. Morrison, Major General J. H. MacBrien, Brigadier General A. G. L. McNaughton, Lieut.-Colonel W. Bovey and Major R. Nordheimer. There must, however, be many other ex-officers and other ranks of the Canadian Expeditionary Force who are in possession of similar official and personal material and it would be of immense service to the Historical Section if the documents could be placed at its disposal. Where return is desired the Historical Section would undertake, after making copies or extracts, to effect this with as little delay as possible. The story of a personal experience may often throw light on some point which official records leave obscure, while it sometimes transpires that neither originals nor copies are available, in the Section, of duplicates of official papers which have been retained in their possession by individual officers or units.

*Official History of the C.E.F. in Canada*

The preparation of skeleton histories of pre-war Non-Permanent Active Militia units has been undertaken and has been completed. Apart from certain other routine details regarding organization, reorganization, etc., the following information is being recorded:—

Commanding Officers 1914-1920.

Date unit placed on active service.

C.E.F. units recruited.

Contribution of men made to C.E.F.

Locality in which unit was authorized to recruit for C.E.F.

Other duties performed by the unit during the Great War.

This series will be capable of expansion to cover the period of existence of the units prior to 1914.

In connection with the work of the Battle Honours Committee the Historical Section has compiled a great amount of information which has involved much research extending throughout the year under review. The preparation of a statement for each battalion in the field, showing the composition at the end of each month throughout the war in terms of reinforcements from depleted C.E.F. battalions, has been completed, this being an essential preliminary to determination of Battle Honours of Militia units which perpetuate C.E.F. battalions which were disbanded in England. The honours due to the militia units which perpetuate the depleted C.E.F. battalions have been compiled primarily on the basis of the foregoing material, for the purpose of ascertaining how the proposals of the Battle Honours Committee will work out in practice. Similarly, lists of Battle Honours for all C.E.F. cavalry and infantry units were prepared, including alternative honours in certain cases, on the basis of the Battle Honours Committee's scheme and on the services of the units, and summaries were made and an analysis of Honours worked out. Should the recommendations of the committee receive final approval without material change there need, therefore, be no delay in publishing the Great War Battle Honours for which Active Militia units and former C.E.F. regiments and battalions are eligible.

The Directorate received the thanks and appreciation of the chairman on behalf of the Battle Honours Committee for the great amount of work which has been done by the Section to enable definite recommendations to be arrived at.

The reports and supplementary reports of the Committee were also drafted in the Historical Section, as well as the various statements annexed thereto.

Statistics were compiled, derived from information furnished by the soldier on enlistment, to determine the number of militiamen who volunteered for service in the Infantry of the First Contingent and to arrive at facts and figures relating to pre-war service of personnel of the original seventeen C.E.F. battalions.

*Compilation of an Historical Account of the Military Forces of Canada  
in the Great War*

Unexpected delay has occurred in the publication of the History of the Canadian Medical Services in the Great War (the first of the series of official volumes dealing with the History of the Canadian Forces, 1914-1920) and this work has not yet gone to the printers. It is understood, however, that the requisite authority will probably be issued very shortly.

The manuscript of the monograph written by the Deputy Director of the Medical Services on "The Canadian Army Medical Corps with the Canadian Corps during the Last Hundred Days, August-November, 1918," has been examined with a view to checking certain details. The proofs of this work have also been checked and eight maps compiled in the Historical Section.

The work of transcribing the records of Canadians who served in the Royal Flying Corps, the Royal Naval Air Service and the Royal Air Force and the compilation of a "Who's Who" of Canadian Airmen in the Great War have been completed so far as possible on the material available in this country. A list of the names of some 1,300 Canadian Officers and Cadets who entered the Flying Services direct without first passing through the C.E.F. has been sent to England and the necessary particulars are being obtained from Royal Air Force Records by the Canadian Liaison Officer at the Air Ministry.

Further progress has been made towards the compilation of the official History of the Canadian Forces in the Great War, but a stage has now been reached when it is absolutely essential to have access to the diaries and other records of British, Australian, Indian and French units which served under Canadian Headquarters or on the Canadian flanks in various operations. The information is in possession for the final stage of the War but not in respect to the earlier period. Without recourse to these records it is impossible to make correct appreciations of situations or to write a complete and accurate story of operations in which the Canadian Corps took part. Any history based on the knowledge of the operations of purely Canadian formations, only, would necessarily lack balance and give a very imperfect record of events. Moreover, conflicting accounts of the general trend of events repeatedly occur and questions have arisen which cannot be answered by available documents; these can only be adjudicated and settled after personal discussion with the writer of the British official history. It is most necessary that a representative of this Section, conversant with what exactly is required, should as soon as possible proceed to England to obtain copies or extracts of maps, sketches, plans, orders, field messages, diaries, strength returns, etc., which relate to Canadian operations and are not available in our own records, and to consult with the General Officer and his staff at the Historical Section, Committee of Imperial Defence, who are engaged on the task of compiling the British official history. Arrangements to this end are now being made.

To illustrate the extent to which other than Canadian units were involved in Canadian operations it may be mentioned that six British Cavalry regiments and thirty-seven British Infantry battalions were attached to and temporarily

## SESSIONAL PAPER No. 17

formed part of the 1st Canadian Division in the course of some ten days during the Battles of Ypres, 1915. Their story is inextricably woven into the history of the 1st Canadian Division during that period and just as much so as the record of a Canadian battalion.

Arrangements have been partially carried through for the compilation of a history of the Canadian Engineers in the Great War on lines somewhat similar to the Medical History already written.

Much work has been devoted to the preparation of further maps to illustrate the fighting of Canadian troops in the Great War for inclusion in the official History.

Arrangements have been made with the War Office for the supply of maps and black impressions not already in possession. These are necessary for reproduction and the work of compilation, transferring boundaries, dispositions and objectives for war diaries and other records will be proceeded with on receipt. In the meantime this work is already in progress or has been completed in respect to maps and black impressions already available.

The Section has continued its function of giving all possible assistance to regimental historians.

The manuscripts and maps of the History of the P.P.C.L.I., one of the most outstanding regimental histories which has yet seen light in the British Empire, were read and commented upon prior to publication. The assistance afforded by the Historical Section from time to time during the compilation of this History from June, 1921, onwards was generously acknowledged in the preface when the work was published.

The historian engaged on the record of the 4th C.M.R. spent some time in this section, when all relevant documents were placed at his disposal. A map and legend were subsequently compiled for his use, showing every move of this battalion during the Great War. The late struggle on the Western front is regarded as almost entirely a stationary war, apart from its opening and closing stages, and except by those who actually served the extent to which individual units were moved around is scarcely realized. The case of the 4th C.M.R. is typical. During that battalion's 42 months' service in France its headquarters were established in over 200 places.

Other regimental histories in course of preparation in respect to which it has been possible to give assistance by means of advice and supply of material to the historians are:—

The Royal Canadian Dragoons.

The Royal Canadian Regiment.

13th Battalion R.H.C.

42nd Battalion R.H.C.

1st Pioneer Battalion (9th Canadian Railway Troops).

Belonging practically to this category, a history of the war activities of the Y.M.C.A. is in course of compilation by that organization. In order to assist, copies of Routine Orders, O.M.F.C., dealing with the organization and establishment of the "Military Services Department Canadian Y.M.C.A." in the field and in England were secured and supplied to the National Council, Y.M.C.A. of Canada.

Data relating to the history of the affiliated Canadian Battalions, i.e., the 13th, 42nd, and 73rd Battalions, R.H.C., was prepared and forwarded to the Black Watch, Perth, Scotland, for inclusion in the history of that regiment now being written.

Work is progressing in the preparation and collection of material for a file on each C.E.F. unit which served in the field. This should be of value to

Regimental Historians whose chief difficulty is the erection of a framework of facts into which the more intimate history of the unit can be fitted. It is intended that Active Militia units which perpetuate C.E.F. units should be given a copy for their records. Each file will contain the following:—

Skeleton History.

Origin and formation.

Battle Honours, Colours, Badges, etc.

Detailed action in each battle, and moves.

Tactical Commanders with dates.

Nominal Roll and Record of Services of Officers.

Honours and Awards.

Statistics—

(a) Casualties.

(b) C.E.F. units contributing and personnel supplied to Battalion.

(c) Total Other Ranks passed through.

*Historical Monographs on Military Subjects in Connection with the  
History of Canada*

A full account of the military operations in the campaign in Northwest Canada in 1885 was prepared from original sources, illustrated by a sketch map of the theatre of operations, with the movements of the several columns noted thereon.

A similar narrative of the military operations arising out of the Fenian Raids of 1866 and 1870 were also compiled from contemporary records. In addition, in order to determine a claim for a Battle Honour, the Historical Section carried out a special investigation of the rather confused records of the fighting at Ridgeway, June 2, 1866, and prepared for the Battle Honours Committee a clear narrative of events.

A thorough study has been made of Militia Reports, Militia Acts, and other original sources for a monograph on the development of the Military Forces of Canada from 1855, when the first Militia Act for United Canada was passed, to the outbreak of the war. This monograph is now in course of preparation and will be drawn upon for an introductory chapter to be included in the History of the Military Forces of Canada in the Great War showing the gradual evolution of the militia organization as it existed in 1914.

A summary of operations of the Canadian Cavalry Brigade was prepared, covering all the battles in which the cavalry regiments participated.

A summary of the Second Battle of Ypres was supplied to the St. George's Society, Hamilton, Ont., and included in this was a copy of the German official list of the various engagements to illustrate the offensive from the German side.

To assist in the preparation of lectures, addresses and literary articles various militia officers and others were provided with material. Among other instances were the following:—

A map and short account of the Battle of Festubert.

Synopsis of the history of the 1st Canadian Infantry Battalion, together with chronological list of Commanding Officers, statement of casualties, details of personnel supplied by reinforcing battalions and complete list of decorations awarded to personnel of the battalion.

Similar information respecting the 54th Battalion, C.E.F.

Information regarding the services of the 2nd Canadian Machine Gun Brigade.

## SESSIONAL PAPER No. 17

In response to a request from Scotland in connection with the writing of the story of the Davidson tartan and the services of units throughout the British Empire which wore that distinctive dress, an outline history was prepared of the 48th Regiment (Highlanders) from date of organization in 1891 to 1914 and of the services in the Great War of its perpetuated C.E.F. units—the 15th, 92nd and 134th Battalions, C.E.F.—giving all the main features of the activities of these units during the period of their existence.

Information regarding the Battle of Vimy Ridge with lantern slides of map.

In response to another request particulars were extracted from various sources and a statement compiled showing the approximate number of men who passed through Valcartier Camp in 1914, 1915, 1916, 1917 and 1918, and the number of troops trained at Borden during 1916, 1917 and 1918.

*Supply of Information to Historical Investigators*

Numerous calls for information and documents have been made upon the Section under this head and have been complied with. Among them are the following:—

Triplicate War diaries checked, all missing folios to the number of 2,050 duplicated from originals, and the completed triplicate copies supplied to perpetuating units or to accredited historians—

- Canadian Cavalry Brigade.
- Lord Strathcona's Horse.
- Fort Garry Horse.
- Canadian Corps Cavalry Regiment.
- Canadian Light Horse.
- 5th Canadian Siege Battery.
- 11th Canadian Infantry Brigade.
- 8th Battalion, C.E.F.
- 42nd Battalion, C.E.F. (R. H. of C.).
- 102nd Battalion, C.E.F.

The Fort Garry Horse was also supplied with copies of various other records of an historical character from their custody parcels to replace similar documents which had been lost.

This Section was requested to provide material and information for the Canadian Exhibition Motor Train about to tour France under the direction of Senator Beaubien. Maps, statements of strength, casualties and captures were furnished, prepared in form suitable for display, as well as lists of lantern slides which were available.

For the Czechoslovak Military Museum, Prague, certain printed official reports and memoranda were supplied in addition to a set of bronze Maple Leaf badges as worn by Canadian troops in the Great War.

Various official and semi-official publications of which extra copies were available in the Section were donated to the—

- Departmental Library.
- Parliamentary Library.
- Dominion Archives.
- Imperial War Museum.

Further material (additional to that referred to in the last annual report) was supplied to the Royal Military College, Kingston, for record on panels or tablets in the Sir Arthur Currie Hall, including notes and charts of the convoy carrying the First Canadian Contingent and lists of battles in which Canadian troops took part.

The Oshawa War Memorial Committee was given a list of the names of towns, villages and other places where Canadians fought in the Great War and from which stones might be secured for inclusion in the proposed memorial and also lists of battles and other engagements in form suitable for engraving thereon.

The Directorate of Records (which, in turn, has been helpful in furnishing statistical and other information to this Section) was supplied, on request with information regarding unit locations, burial places and casualties.

Extracts from Militia Orders, General Orders, Militia Lists and Annual Reports of the Department, relating to organization, designation and circumstances of formation of Lord Strathcona's Horse (R.C.) were made and forwarded to the Commanding Officer.

The Section was called upon to furnish a nominal roll showing:—

Rank Overseas,  
Appointment Overseas,  
Decorations,  
Present Rank,  
Present Address,

of all surviving officers of field rank coming within certain categories who served in the Canadian Corps during the period that the Corps was commanded by the present Governor General. The total number of officers included in the roll was approximately 400 and much time and labour were necessary to ensure that no officers were omitted and to obtain the necessary particulars.

In response to an inquiry from outside the Department another list was compiled of all surviving senior officers (Lieut.-Colonels and upwards) who served with the Canadian Corps, showing the various appointments held by them and their present rank, decorations and addresses. There was a total of 382 officers.

Apart from the foregoing the usual stream of enquiries continued to flow into the Section throughout the year from official and private sources. These ranged from a local request for the origin of the name Nepean Point, Ottawa, to an enquiry from Shanghai, China, as to the services of Danes who enlisted with the Canadian Expeditionary Force. Each was dealt with in its turn and frequently much research was involved before an answer could be furnished.

## (6) The Royal Canadian Air Force

The reorganization of the Canadian Air Force following the formation of the Department of National Defence, under which the naval, military and air forces of Canada are now grouped together in one Department, has been completed during the period under review. The reorganized force, now known as the Royal Canadian Air Force, His Majesty the King having graciously granted permission for the use of the Royal title, has, under the new regulations, the following composition:—

(a) The Active Air Force.

(b) The Reserve Air Force.

(a) The Active Air Force comprises:—

1. The Permanent Active Air Force of Canada consists of officers and airmen permanently embodied or employed for continuous service, and is available for general service. It is maintained for the instruction of the Non-Permanent Active Air Force.

## SESSIONAL PAPER No. 17

2. The Non-Permanent Active Air Force is comprised of such units or detachments and other formations as are from time to time named by the Governor in Council.

(b) The Royal Canadian Air Force Reserve consists of qualified officers and airmen. The personnel are liable to be called out for such training as may be prescribed.

The period of service in time of peace for the Royal Canadian Air Force is as under:—

(a) For the Active Air Force, three years.

(b) For the Reserve Air Force, such a period as may be prescribed by the Governor in Council.

No non-permanent Active Air Force units have as yet been formed as financial limitations have made this impossible. For the same reason it has not been possible to provide training for any of the Air Force Reserves.

During the year the reorganization and formation of the permanent Air Force has necessitated a complete revision of the regulations under which the Air Force operates. The King's Regulations and Orders for the R.C.A.F., 1924, were duly approved by His Excellency the Governor in Council on the 15th of January, 1924. Pay, dress and other subsidiary regulations have also had to be entirely recast during the year. The sub-committees formed for these duties have finished their work, the new regulations are now approved and will come into operation on the 1st of April, 1924.

Under the old regulations the Air Force was on a non-permanent militia basis, the officers and men being normally called up for duty for one month in every twenty-four. Certain officers required for staff and instructional purposes were employed for longer periods. These were chosen from the best qualified officers available and they undertook longer tours of duty when the nature of their work so required.

In the permanent Air Force, thus constituted, officers and men will make the Air Force their profession for life, in the same way as do the sailors and soldiers in the sister services. So far as conditions permit the Air Force Regulations follow closely the precedents set in the Militia and Naval Services of Canada and the terms of service are as much alike as the varying conditions to be met with in the three services permit. The scheme of organization, training and equipment will also follow the example of the Royal Air Force in so far as the different scale of the two services and natural conditions of the countries allow.

The operations for civil government departments were, under the old organization, undertaken by a civil organization who held their appointments under the Civil Service Commission. This branch has now been abolished and the duties formerly carried out by it have been amalgamated with those of the permanent Air Force. Under the old organization all stations, except Camp Borden, were run on civilian lines. All stations have now been absorbed as integral units of the permanent Air Force, under Air Force discipline, manned entirely by commissioned officers and enlisted men.

A report covering civil aviation and operations of the R.C.A.F. for Civil Government departments during the year 1923 has already been published (copies of this may be obtained upon application to the Secretary, R.C.A.F., Department of National Defence, Ottawa). In this report are given full details as to civil aviation in the country, including operations of commercial aviation firms and the activities of the R.C.A.F. undertaken in conjunction with other Departments of the Government, for the better protection of forests from fire, aerial surveying, exploratory work, transportation in remote parts of the country, fishery protection, etc. It will therefore not be necessary to deal with these phases of the work in this report, which is confined entirely to Air Force duties.

*R.C.A.F. Organization*

The R.C.A.F. is a directorate of the Chief of Staff's Branch in the Department of National Defence. It is divided into three sections as follows:—

Director, R.C.A.F.

(1) Assistant Director, Air Staff and Personnel.

(2) Assistant Director, Supply and Research.

(3) Assistant Director and Secretary.

(1) The Branch of the Assistant Director, Air Staff and Personnel, is divided into four sections,—

(a) Personnel,

(b) Training,

(c) Civil operations,

(d) Intelligence duties,

each under its own Staff Officer.

(a) This section deals with appointments, promotions, transfers, courts of inquiry, regulations, pay, dress and other similar matters.

(b) This section is responsible for the training of the R.C.A.F., including cadet training, combined operations with the military and naval forces, courses of instruction and all other matters connected with Air Force training and operations.

(c) This section deals entirely with the operations undertaken in conjunction with civil branches of the Government Service and includes such work as forestry and fishery patrols, aerial survey, photography, transportation, preventive patrols, etc.

(d) The Air Intelligence Officer is responsible for the collection, recording, and dissemination of all Air Force intelligence. He works in collaboration with the military and naval intelligence staffs and is at all times in the closest touch with their work, so that the other services may be fully informed on Air Force intelligence matters and that duplication of effort in the collection of Defence information may be avoided.

(2) The Branch of the Assistant Director of Supply and Research is divided into two sections:—

(a) The technical and research,

(b) The equipment and supply.

(a) The technical and research section deals with the technical development of aeronautics, the design and construction of aircraft, engines and accessories, their maintenance, questions of airworthiness of civil aircraft, and any other aeronautical engineering questions arising.

(b) This section deals with all matters pertaining to the supply of equipment, storekeeping duties, storage depots, the disposal of surplus equipment and other duties of a like nature. It is responsible for all indents made on the Contracts Branch for the purchase of supplies so that adequate stocks of all classes of material may be maintained at all times for the proper execution of the various duties of the Air Force.

(3) The Secretary's Branch is responsible for the control of civil aviation, including the licensing of pilots and air engineers; the registration, inspection for airworthiness, and marking of commercial aircraft; inspection and licensing of airharbours, and the conduct of commercial aviation operations generally. This branch is also responsible for the preparation of the Air Force estimates

## SESSIONAL PAPER No. 17

and reports on the work of the Air Force, the control of the civil staff and other civil duties. The control of civil aviation is carried out by the Controller of Civil Aviation, an officer of the permanent Air Force, appointed to this branch for these duties.

*R.C.A.F. Units*

*Vancouver Air Station.*—This Station was established in the summer of 1920 at Jericho Beach, on English bay, just outside the city. The site is an ideal one and was granted by the provincial Government free of charge. It originally was part of an old naval reserve, the property of the Imperial Government, and was given by them to the province when no longer required for its original purpose.

The station is now well equipped for its purpose, a large concrete platform for handling machines, with slipway for launching them being built in 1920 21 and permanent hangars and workshops built during 1922. A wireless station is now under construction to provide for communication with machines during flights.

The operations carried out at this station are as follows:—

R.C.A.F. duties.

Combined operations and training with naval and military forces.

Forest fire protection work for the federal and provincial governments.

Aerial surveys and photography.

Fishery protection.

Customs preventive patrols.

Immigration and police transportation flights.

*High River Air Station.*—This station was originally established at Morley on the main line of the Canadian Pacific Railway in the fall of 1920, for the purpose of the patrol of the forest reserves on the eastern slopes of the Rocky mountains. The protection of these forests is of great importance. They cover the eastern slopes of the Rocky mountains where the great rivers flowing through the prairie country have their source. The denudation of these reserves would affect adversely the whole water supply of southern Alberta, Saskatchewan, and Manitoba. The original base at Morley was found to be too close to the mountains to give good flying conditions and in the spring of 1921 the station was moved to High River, about 40 miles south of Calgary, where an admirable site was found on the outskirts of the town. During the past three seasons adequate buildings have been gradually provided, including three permanent hangars, for the housing of the machines, shops and store-rooms for the carrying out of repairs and storage of material, office accommodation and a wireless station, so that the base is now well found in ground facilities. Sub-stations at Eckville at the northern limit of the forest patrol and Pincher creek, towards the southern extremity have been leased. These landing fields were necessary in order to double the efficiency of the patrol system by providing for a complete reconnaissance of the situation in the forest reserve twice daily.

The operations carried out at this station are as follows:—

R.C.A.F. duties.

Combined operations and training with military forces.

Forest fire protection.

Aerial surveys.

Aerial photography.

*Winnipeg Air Station.*—The headquarters of this unit was established at Fort Osborne Barracks during 1922. Previous to that the headquarters were situated at Victoria Beach on Lake Winnipeg during the summer season and in rented premises in the city of Winnipeg during the winter, where the overhaul of the flying boats used in the forestry patrol and aerial survey work in northern Manitoba was carried out. Though this arrangement was perfectly satisfactory so long as the unit was a civil one, it was deemed essential to provide a better base for its headquarters on the reorganization of the unit on an Air Force basis. Fortunately, accommodation for the personnel was available at Fort Osborne Barracks and the adjacent tract of land, suitable for aerodrome purposes, has been purchased.

Up to the present, funds have not permitted the erection of both hangars and workshops on the aerodrome site but it is hoped that this may be possible before long.

Victoria Beach is now a sub-base to the Winnipeg Station and, with Norway House and Le Pas, is used as an operating base for the summer operations for other Government departments in Manitoba and northern Saskatchewan. Wireless communication has been established, with the assistance of the Royal Canadian Corps of Signals, between the three bases and the headquarters at Winnipeg. A slipway, platform and hangars have been provided at Victoria Beach for the maintenance and overhaul of machines during the summer months. The three sub-bases are closed during the winter and the personnel and machines withdrawn to Winnipeg, where they are employed on the overhaul of the aircraft and engines, Air Force training and courses of instruction.

The operations carried out at this station are as follows:—

R.C.A.F. duties.

Combined operations and training with the military forces.

Forest fire protection.

Aerial surveys.

Transportations for the Departments of Indian Affairs, Mines, Mounted Police, and other services.

*Camp Borden, Ont.*—The Air Station at Camp Borden was built during the war by the Imperial Munitions Board as a training ground for the R.A.F. units recruited in Canada. After the Armistice the station and its buildings were given by the Imperial Government to Canada. The station, though admirably suited for training operations on a large scale, is too large for the present establishment of the R.C.A.F. The maintenance charges on the Camp are altogether disproportionate to the present strength of the R.C.A.F. The buildings are large, and as they are temporary structures the cost of their maintenance is high, while the fuel bill for their heating is a heavy charge on the present small Air Force estimates. Camp Borden, too, is isolated and difficult of access. It is far removed from centres of population and transportation facilities are inferior, requiring heavy maintenance charges on the sidings from the main lines of the railways and considerable outlay in the maintenance of roads into the Camp. For these reasons it is hoped that accommodation on a more suitable scale, involving smaller maintenance charges, will be made available at an early date for the training of the R.C.A.F. Plans have been prepared for the removal of the training base to a more convenient location at Long Branch, near Toronto, which would be more easy of access and cheaper to maintain. The estimates provided so far have been insufficient to allow for any expenditures on the new site. These must be faced in the near future, however, if efficient facilities for the training of officers and mechanics for the Force are to be provided.

## SESSIONAL PAPER No. 17

Activities at this station are chiefly confined to R.C.A.F. training, and combined operations and training with the military forces.

*Ottawa Air Station.*—The present headquarters of the unit at Victoria island are part of the shipyard of the Public Works Department. These premises are not required by that department and have been made available for Air Force use for the present. The site, while serving its temporary purpose well, is not altogether suitable as an air station. It is too near the Chaudiere Rapids, and while machines can be brought to the slipway, approach is difficult. The buildings, too, are not suited for aircraft construction and storage. Adequate accommodation should be provided in Ottawa for the requirements of this unit in the near future. It is desirable that the main workshops and stores depot of the Force should be situated here, where they will be under close supervision of the technical and equipment staff at Headquarters. The operating base at Rockliffe is part of the old rifle range property, some three miles below Ottawa. Good landing facilities for seaplanes in the Ottawa river are available, but the aerodrome is small and somewhat difficult of approach. The banks of the river, too, are high, and the cost of providing an adequate slipway for launching machines would be great. The site is also difficult of access to the city.

The duties carried out at this station are as follows:—

R.C.A.F. duties.

Combined training and operations with military units.

Central stores depot, R.C.A.F.

Experimental flights for development purposes.

Aerial surveys.

Aerial photography.

Transportation.

*Dartmouth, N.S.*—The seaplane base at Dartmouth is situated on the eastern side of the outer harbour at Halifax, three miles below the town of Dartmouth. It was built in the summer of 1918 as headquarters of the Naval Air Forces engaged in the anti-submarine patrol of the Atlantic coast for the protection of incoming and outgoing convoys of stores and troops. It was transferred from the Department of Naval Service to the Air Board in 1920 and has since been used as an operating base for machines required for R.C.A.F. duties in the Maritime Provinces. It is the only seaplane station open all the year round in Eastern Canada and is admirably situated for the training of the R.C.A.F., in combined operations with the Naval and Coast Defence Forces based on Halifax.

Operations conducted from the station are as follows:—

R.C.A.F. duties.

Combined training with naval and military forces.

Aerial surveys and aerial photography.

#### *R.C.A.F. Training*

Air Force training may be divided into two categories, training for officers and for men.

#### *Officers' Training.*

Training for officers also falls into two classes, officers' training and cadet training.

*Officers' Training.*—Arrangements have been made with the authorities of the other Services for the attachment for duty of R.C.A.F. officers to courses

of instruction at the Royal Military College and elsewhere throughout the country. Special courses of instruction in various subjects have been arranged at the Headquarters of the various units. Arrangements have also been made for the senior officers of the R.C.A.F. to attend the Air Force Staff College at Andover in England, and to take their staff courses with officers of the R.A.F. and other Dominions. Wing Commander J. S. Scott, M.C., A.F.C., is now in attendance at the Staff College, and on completion of his course, Wing Commander J. L. Gordon, D.F.C., will proceed there. The Imperial authorities have also expressed their willingness to accept officers for training in special courses at their training establishments until the numbers employed in Canada justify the establishment of special courses of instruction in this country.

### *Cadet Training.*

The idea underlying the present scheme of R.C.A.F. cadet training is to obtain, with the minimum expense, a class of young officer having, in addition to his knowledge of flying, a thorough, all-round education with special qualifications on the technical side. With this in view arrangements have been made with the Canadian universities to accept for Air Force training a number of students in their first year from the Applied Science and Engineering faculties, and train them at Camp Borden during the summer vacations each year of their university course. A gratifying response is being received and sufficient numbers of volunteers are forthcoming already to ensure the success of the scheme. A number of Gentlemen Cadets from the Royal Military College are accepted each year in the same way. The scheme of training is as follows:—

The course of training consists of three terms, each of three and a half to four months' duration (approximately May 15 to September 1) in three consecutive years.

To be eligible for selection, a candidate must be attending a Canadian university or the Royal Military College of Canada. If the former, it is required that the candidate—

- (a) Be a member of the Canadian Officers' Training Corps, and have performed the requisite qualifying service, and passed the practical examination for certificate "A" C.O.T.C.
- (b) Be following a course of study as an undergraduate, leading to a degree in applied science.
- (c) Be physically fit for Air Force Service as a Pilot.
- (d) Be unmarried.
- (e) Be under 21 years of age upon the commencement of the course.
- (f) Be recommended by the Military Committee of the University as likely to become an efficient Air Force officer.
- (g) Give an understanding to complete the whole course.

Before attending the second term, the candidate is required to be in possession of a certificate "A" C.O.T.C.

Candidates who are gentlemen cadets attending the Royal Military College are required to—

- (a) Be first year students who are recommended by the Commandant as likely to become efficient Air Force officers, or if second year students of the R.M.C., undertake to continue Air Force Training after graduating from the Royal Military College, and who are recommended by the Commandant as likely to become efficient Air Force officers.
- (b) Be physically fit for Air Force Service as a Pilot.
- (c) Be over seventeen years of age on January 1 of the year of the commencement of the course.
- (d) Give an understanding to complete the whole course.

## SESSIONAL PAPER No. 17

District Officers Commanding the several Military Districts throughout Canada are responsible for the distribution of information covering Air Force Cadetships to universities within their respective districts, and the forwarding of applications to the Department of National Defence.

*Status.*—While in attendance at the Royal Canadian Air Force Training Station, candidates are granted temporary commissions as Provisional Pilot Officers, and receive pay and allowances in accordance with Pay and Allowance Regulations for the Royal Canadian Air Force. The rates are as follows:—

*Pay.*—During the first term, \$3 per day; during the second term, \$3.50 per day; during the third term, \$4 per day.

*Allowances.*—While travelling to and from the Royal Canadian Air Force Training Station, candidates receive free transportation and a travelling allowance of \$5 per day.

*Messing.*—Candidates are required to live in the Officers' Mess, while at the Royal Canadian Air Force Training Station. The mess draws a free ration on behalf of each candidate, but in addition, the candidate is required to pay a mess bill of approximately 75 cents per diem, to cover the additional cost of messing.

*Quarters, Uniform, and Medical Attention.*—While under training, candidates are provided with uniform, camp equipment and quarters, medical and hospital services being provided as necessary without charge.

*Qualifications.*—On completion of the course, a candidate will be eligible for—

- (a) Appointment as Pilot Officer in the Royal Canadian Air Force for permanent duty (the number of vacancies for such appointments will, in all probability, be very limited).
- (b) Appointment as Pilot Officer in the Royal Canadian Air Force for active duty twenty-eight days in every two years, and in emergency.
- (c) Transfer to the reserve of officers, in which case they will not be liable for further service, except in time of emergency.

Owing to the unavoidable delay in the announcement of the Royal Canadian Air Force Training Scheme in 1923, only nine applicants were found to possess the necessary qualifications for admission to Course 1, which commenced May 15, 1923. Of these nine candidates, eight proved efficient, and are eligible for further training.

It has been arranged that Course No. 2 will consist of twenty candidates, ten of whom are being nominated by the various Canadian universities, and ten by the Commandant, Royal Military College.

The second term of Course No. 1 and first term of Course No. 2 will commence on May 15, 1924, at the R.C.A.F. Training Station. Candidates from the universities will report on the date of commencement, and on account of the Royal Military College regular spring term ending early in June, candidates nominated from there will not be required to report until June 15, 1924. It is considered that as these candidates are specialized in military training, they will not be handicapped by the loss of one month.

### *Training for Airmen*

Funds have not been available for the establishment of any regular training establishment for boys up to the present. Airmen have therefore been entered direct from civil life and their training has proceeded at the unit to

which they are attached for duty. Special courses for recruits have been held at Camp Borden and elsewhere, so as to give as thorough a preliminary training as the circumstances permit. As far as possible, trained mechanics are enlisted to fill the technical ranks. Training for airmen, however, cannot be considered complete until some suitable establishment can be provided whereby young mechanics may be thoroughly trained in Air Force duties, preparatory to joining a unit for actual service.

### *Combined Operations With Naval and Military Forces*

Every opportunity has been taken to co-operate with the naval and military forces in courses of instruction and joint training exercises. The importance of such combined operations cannot be exaggerated. Under modern conditions, air co-operation is essential to the success of operations by the land and sea forces. In the same way, independent air operations without the support of the sister services, can seldom push home a definite result. Familiarity with the work and organization of the navy and army is therefore essential to the Air Force and vice versa. The peace time training of the defence forces in Canada does not at present permit of long or extended operations, but no opportunity has been missed for co-operating with the army and navy during the year. Combined training operations and courses of instruction have been carried out as follows:—

Where held	Purpose	Commenced	Completed	Number of flying hours
Sarcee Camp, Alberta.....	Staff course.....	Aug. 7, 1923	Aug. 9, 1923	18 hrs. 30 mins.
Sarcee Camp, Alberta.....	Artillery observation.....	Aug. 13, 1923	Aug. 14, 1923	8 " 15 "
St. John, Que.....	Staff course.....	July 16, 1923	July 27, 1923	12 " 20 "
Dartmouth, N.S.....	Battle practice.....	Oct. 8, 1923	Oct. 13, 1923	10 " 40 "
Dartmouth, N.S.....	Co-op. Sandwich Battery....	Nov. 11, 1923	Nov. 11, 1923	2 " 05 "
Camp Borden, Ont.....	Artillery observation.....	Nov. 19, 1923	Dec. 5, 1923	38 " 30 "

During these courses of instruction every opportunity was taken to provide for observation from the air by officers of other services, so that they might gain experience in flying and familiarity with methods of observation, spotting, etc., from the air. In the same way the R.C.A.F. personnel were given every opportunity of familiarizing themselves with the work of the other services. Wireless communication between aircraft in flight and the ground was a feature of these courses, the Royal Canadian Corps of Signals participating in the work and supervising the intercommunication work. Much valuable experience and training were gained and it is hoped that conditions may permit of the wide extension of such combined exercises in future years, for the mutual benefit of all services taking part.

In addition to these regular courses, every opportunity has been taken of permitting the officers of other services to participate in flights for communication or transportation purposes, so that they may become familiar with flying conditions and accustom themselves to aerial observation. The attached statement shows the flying operations carried out by the R.C.A.F. during the year, the number of flights, their nature, length of duration, etc.

## SESSIONAL PAPER No. 17

## SUMMARY OF FLYING, 1923-24

	Number of hours flown	
	Hrs.	Mins.
Forest Fire Protection.....	750	18
Forest Reconnaissance and Type Sketching.....	3	25

Service Flights (Militia and R.C.A.F.).....	681	30
Miscellaneous.....	55	05
Grand total.....	2,090	25

## REPORT OF THE ADJUTANT-GENERAL

## (1) Permanent Active Militia

During the past financial year, changes have been made in the Peace Establishment of some of the Permanent Force units, as under:—

	Officers	Other Ranks	Total	Horses
R.C.D.....	28	498	526	437
L.S.H. (R.C.).....	28	498	526	437
R.C.C.S.....	15	87	102	
R.C.A.M.C.....	37	103	140	

The actual strength of the Permanent Force during the past year has been limited in number in accordance with the amount of funds voted by Parliament at the last session.

The following table shows the Peace Establishment, Limited Establishment, and the actual strength in personnel of units of the Permanent Active Militia:—

## PERMANENT ACTIVE MILITIA

Units	Authorized Establishment			Limited Establishment			Actual Strength		
	Offrs.	O. R.	Total	Offrs.	O. R.	Total	Offrs.	O. R.	Total
Officers permanently employed not borne on Regimental Establishment (Staff and Cadet Officers).....							33		33
Officers seconded from Regimental Establishments—not paid from P. F. Vote.....							50		50
Royal Canadian Dragons.....	28	498	526	18	250	268	17	242	259
Lord Strathcona's Horse (Royal Canadians).....	28	498	526	18	192	210	16	183	199
Royal Canadian Artillery.....	65	999	1,064	63	637	700	56	617	673
Royal Canadian Engineers.....	48	360	408	32	249	281	31	239	270
Royal Canadian Corps of Signals.....	15	87	102	14	87	101	13	83	96
Royal Canadian Regiment.....	36	924	960	29	400	429	25	379	404
Princess Patricia's Canadian Light Infantry.....	29	690	719	28	248	276	29	240	269
Royal 22nd Regiment.....	15	422	437	13	177	190	13	176	189
Royal Canadian Army Service Corps.....	33	412	445	26	247	273	27	243	270
Royal Canadian Army Medical Corps.....	37	103	140	29	95	124	30	92	122
Royal Canadian Ordnance Corps.....	35	691	726	34	438	472	34	426	460
Royal Canadian Army Veterinary Corps.....	7	23	30	7	7	14	7	7	14
Royal Canadian Army Pay Corps.....	25	100	125	19	71	90	19	68	87
Corps of Military Staff Clerks.....	32	199	231	8	192	200	8	188	196
Canadian Small Arms School.....	4	2	6	6	2	8	5	2	7
Totals.....	437	6,008	6,445	344	3,292	3,636	413	3,185	3,598

aIncludes 5 Officers and 36 Other Ranks employed at Wireless Stations, maintained in connection with Royal Canadian Air Force and Dept. of the Interior (N.W.T. Branch).

bIncludes 4 Officers and 36 Other Ranks whose pay and allowances are recoverable from funds of the Royal Canadian Air Force and Dept. of the Interior (N.W.T. Branch).

## SESSIONAL PAPER No. 17

*Organization*

Schools of Instruction for the Army Service Corps Units have been organized at Toronto, Halifax, Winnipeg and Victoria, being conducted by the Detachments of the R.C.A.S.C. at those Stations.

*Nomenclature*

The Royal Canadian Garrison Artillery has been redesignated as under:—

Old Nomenclature	New Nomenclature
No. 1 Company, R.C.G.A.	No. 1 Battery, R.C.A. (Coast Artillery)
No. 2 Company, R.C.G.A.	No. 2 Battery, R.C.A. (Coast Artillery)
No. 3 Company, R.C.G.A.	No. 3 Battery, R.C.A. (Medium Artillery)
No. 4 Company, R.C.G.A.	No. 4 Battery, R.C.A. (Coast Artillery)
No. 5 Company, R.C.G.A.	No. 5 Battery, R.C.A. (Coast Artillery)

**(2) Non-Permanent Active Militia**

The following changes in organization have been authorized:—

*Cavalry*

Headquarters, 8th Mounted Brigade, at London, Ont.  
Headquarters, 9th Mounted Brigade, at St. John, N.B.

*Artillery*

94th Battery, 13th Brigade, C.F.A., at Quebec, Que.  
39th Battery, 18th Brigade, C.F.A., at Lethbridge, Alberta.

*Signals*

No. 13 Signal Battalion Headquarters at Calgary, Alberta.  
No. 2 Signal Company at Edmonton, Alberta.

*Canadian Officers Training Corps*

LaSalle Contingent, C.O.T.C., at Quebec, Que.  
Ontario Agricultural College Contingent, C.O.T.C., at Guelph, Ont.  
University of Toronto Contingent, C.O.T.C., at Toronto has been increased from four to six Companies.

*Infantry*

29th Infantry Battalion at Edmonton, Alberta.  
14th Infantry Brigade, Military District No. 2 has been re-constituted and now includes only City Units located in the city of Toronto, Ont.

*Medical*

No. 4 Field Ambulance, C.A.M.C., at Port Arthur, Ont.  
No. 10 Field Ambulance, C.A.M.C., at Moose Jaw, Sask.

*Reserve Units*

Reserve Topographical Section, Canadian Engineers.

*Localization*

The localization of units of the Non-Permanent Active Militia has been changed from time to time to suit the conditions and population of the country.

*Alliances*

His Majesty the King has authorized several units being allied with regiments of the British Army during the past year.

*Discipline*

The discipline of the Permanent and Non-Permanent Active Militia during the past year has been very satisfactory.

*Dental Services*

Dental treatment has been carried out at the different stations satisfactorily.

**(3) Personal Services**

The appointment of officers to the Non-Permanent Active Militia units has made considerable progress during the past year. Approximately some 9,900 changes in officer personnel have taken place.

Owing to the unsettled conditions of the country, many young officers have been compelled to relinquish their appointments in the active cadre and have either been transferred to reserve units or to the Reserve of Officers. These officers are available for reappointment when the opportunity arises.

The reserve formations have a large number of well trained officers with war experience at present, but this will gradually diminish by the age limit regulations and other changes which usually follow in the ordinary course of events.

The reserve units are making progress and Commanding Officers are now paying more attention to the proper organization of these units.

The Reserve of Officers List, which was largely increased by the number of surplus officers who had to be absorbed on disbandment of the Canadian Expeditionary Force has been verified, with a view to having all officers who have reached the age limit for their rank, disposed of by being placed on the Retired List as prescribed by the regulations. The Reserve of Officers List has now been reduced to those officers who are actually within the regulations for reappointment to Active Cadres should their services become necessary.

The following is a statement showing the number of officers (including provisional appointments) appointed to the Active Militia (Non-Permanent) during the twelve months ending March 31, 1924:—

Cavalry.....	119
Artillery.....	125
Engineers.....	31
Corps of Guides.....	11
Canadian Officers Training Corps.....	73
Infantry.....	664
Canadian Machine Gun Corps.....	63
Canadian Army Service Corps.....	23
Canadian Corps of Signals.....	38
Canadian Army Medical Corps.....	36
Nursing Sisters, C.A.M.C.....	94
Canadian Army Dental Corps.....	2
Canadian Army Veterinary Corps.....	3
Canadian Postal Corps.....	.....
Canadian Ordnance Corps (N.P.).....	4
Corps of School Cadet Instructors.....	59
Canadian Militia (General List).....	12
Temporary appointments (General List).....	5
Canadian Chaplain Services.....	8
Reserve of Officers.....	4
Total.....	1,374

*Document Commissions*

Fourteen hundred and three document Commissions were prepared and issued to officers who had qualified during the year.

*Warrants*

One hundred and eleven document Warrants were authorized for issue to those promoted to warrant rank, class 1, during the year.

*Reduction in strength (Officers)*

Owing to the necessity of economy, a reduction of 21 officers of the Permanent Force had to be effected.

*Militia List*

Difficulties were encountered in connection with a regular publication of the Militia List during the past year, and only one issue amended to the 23rd January, 1924, could be made available. Consequent upon the reorganization of the Canadian Militia, this book has been subject to a complete revision.

Being a book of reference regarding all military formations within the Dominion as well as a guide respecting their locations, the production of revised editions is much desired by all responsible for the administration of military units, and it is hoped that its regular issue will again be made possible, at much shorter intervals than during the past few years. Owing to the large quantity of reference matter of which it is composed, its publication in two parts has become necessary, but in the interests of economy, Part I, the more frequent issue, is only to include those portions relating to lists of officer personnel carried on the active strength, i.e., lists that are subject to constant amendment by changes promulgated through the weekly *Canada Gazette*. It is the changes so incurred which require to be kept up to date in the Militia List, and therefore more frequent publication is a necessity.

All Lists comprised of officers not serving on the Cadres of Units, as well as the Permanent Active Militia Graduation List, Reserve of Officers, The War Services of Officers, Retired List, and many other particulars have been assigned to Part II, which is also to include the War Services of Officers now in course of preparation, and it is the intention to have this volume in readiness for the printers by the beginning of December of this year.

#### (4) Medical

*Permanent Corps—Royal Canadian Army Medical Corps*

During the fiscal year ending March 31, 1924, the increased work in this department, owing to the amalgamation of the Royal Canadian Navy, Royal Canadian Air Force and Militia and Defence under the Department of National Defence, has been successfully carried on, and, with the exception of one Medical Officer and three Orderlies, no increase in personnel has been necessary.

One Medical Officer was appointed to the R.C.A.M.C. on July 1, to replace the Medical Officer of the Non-permanent Active Militia who had been on duty at Camp Borden since 1919; three other ranks also were enlisted for duty in this hospital. The annual report of last year pointed out the necessity of more hospital accommodation at Camp Borden. This has been provided in a building well laid out for the purpose, where a well-equipped hospital is now available to meet all requirements of the camp.

The medical work for the Royal Canadian Navy has gone on smoothly, all naval patients being admitted to the Military Hospitals at Halifax and Esquimalt. One Medical Officer recently appointed to the Canadian Navy, is now taking a course at the Royal Naval College, Chatham, England.

During the year training for other rank personnel of the R.C.A.M.C. was carried out to a limited degree. Owing to the reduced strength of the various detachments in districts, field training was not attempted and only training in first aid and hospital duties was possible.

Diets Station Hospitals are maintained in all districts, with the exception of M.D. 7, 12 and 13, in each of which is an inspection room and detention ward. In Military District No. 3, Kingston, steps were taken, towards the end of the year, to prepare the Sydenham Military Hospital for a Station Hospital.

In June the D.G.M.S. made an official visit to the Pacific coast, taking in, on the way, the various medical units as well as the Air Force at High River and the annual camps of training. He found the medical administration satisfactory in the different Military Districts.

*Non-Permanent Active Militia—Canadian Army Medical Corps.*

Appointments to the medical units of the Non-Permanent Active Militia continued satisfactorily throughout the year. The following table shows the strength in officers and nursing sisters as at March 31, 1924:—

Units	Medical Officers	Quartermasters	Nursing Sisters
Field Ambulances.....	191	25	
Sanitary Sections.....	6		
Cavalry Clearing Stations.....	49	4	77
General Hospitals.....	86	3	198
Stationary Hospitals.....	134	6	88
Other Units.....	4		
Totals.....	470	38	363
Corps Reserve.....	39	5	
Totals.....	509	43	363
General List (attached to units).....	213		
" (unattached).....	12		
Regimental Medical Services.....	14		
" (Corps Reserve).....	4		
Totals.....	752	43	363

During the year there was an increase in the amount of training for militia medical units. One Cavalry Field Ambulance and 14 Field Ambulances trained at local Headquarters, while 1 Cavalry Field Ambulance and 4 Field Ambulances did field training at camps of instruction. At Niagara a composite detail of C.A.M.C. personnel from No. 7 Cavalry Field Ambulance and Nos. 2, 5, 16 and 19 Field Ambulances trained under the senior officer present.

Issues of surplus stores to Government departments, without repayment, to the amount of \$8,769.24 were made.

As in previous years the qualified dispenser has manufactured many preparations at a much lower cost than would be entailed by purchase in the open market. In the same way the mechanic employed in repairing instruments and hospital furniture and refitting field medical equipment has been the means of a considerable saving of public funds.

*Health of the Troops*

The health of the troops of the Permanent Force, during the year, was generally good and no serious outbreaks of infectious disease occurred. A mild epidemic of chicken-pox, among the dependents living in barracks in Winnipeg, was soon under control and nothing of a serious nature developed. There were some forty cases of a mild form of influenza among the Gentlemen Cadets of the Royal Military College, but the disease subsided without the occurrence of any serious complications. During annual training at the Niagara Camp M.D. 2, a case of smallpox developed but by prompt action in the matter of quarantine and vaccination, all further progress of the infection was arrested.

## SESSIONAL PAPER No. 17

The total number of patients treated during the period from April 1, 1923, to March 31, 1924, was 2,980, this total is made up as follows:—

Permanent Force.....	1,735
Non-Permanent Active Militia.....	148
Royal Military College.....	181
Royal Canadian Air Force.....	166
Royal Canadian Navy.....	149
Royal Navy.....	5
Cadets.....	589
Civilians.....	7
Total.....	2,980

There were 14 deaths during this period, 11 Permanent Force, 1 Royal Can. Air Force, 2 Civilians.

Two thousand eight hundred and sixty-three Medical Boards were held during the year.

### Miscellaneous

During the year the formation of a National Defence Centre of the St. John Ambulance Association was authorized. Classes were organized and lectures given in first aid by Medical Officers of the Permanent Force and Non-Permanent Active Militia. Examinations were held and 237 certificates of the association issued to successful candidates through the National Defence Centre.

The Association of Militia Medical Officers, which last met in February, 1914, was reorganized at a meeting held on the 9th of April, 1924, and will be dealt with in the next annual report.

The final meeting of the executive of the Editorial Board of the Canadian War Museum, Medical Section, at which the Director General of Medical Services was represented, was held at McGill University on September 19, 1923. A full report was received as to the progress in the different sections of the Descriptive Catalogue. The material is now ready for the printer and only awaits authority for publication. Special arrangements for the care and up-keep of the Museum were made and an agreement drawn up between the Department of National Defence and McGill University authorities.

The official booklet, "Instructions for the Canadian Medical Service" was revised and a new edition published. This includes information and instructions, in complete and concise form, for the Royal Canadian Navy and the Royal Canadian Air Force.

The general history of the Medical Service during the Great War, by Sir Andrew Macphail, O.B.E., B.A., M.D., C.M., LL.D., although somewhat delayed in publication has now been given to the printer and may be expected in book form shortly.

The story of the C.A.M.C. with the Canadian Corps during the last 100 days of the Great War, by Colonel A. E. Snell, C.M.G., D.S.O., has now been printed and will be available for distribution immediately.

### (5) Pay Services

The situation in the Pay Department for the year 1923-24 remains much the same as during the previous year, excepting that the work in connection with the war has continued to decrease, and the time is near at hand when the duties consequent thereon can be completely taken over by the regular staff.

The members of the Royal Canadian Army Pay Corps and the civilian staff employed under this directorate deserve credit for the efficient manner in which they have carried out the duties assigned them during the past year.

The usual financial statements showing the expenditure during the fiscal year ending March 31, 1924, in the different districts, in connection with the Permanent and Non-Permanent Active Militia, are embodied in appendix "B," as follows:—

1. Allowances paid to the Active Militia in the various districts.
2. Statement of expenditure, by stations, on account of Pay and Allowances of the Permanent Force.
3. Statement of expenditure on account of Pay and Allowances of Officers and Warrant Officers of the Permanent Force.
4. Statement of expenditure on account of Pay and Allowances of Officers and Warrant Officers of the Permanent Force, with details of expenditure by stations.
5. Statement of expenditure on account of Pay and Allowances of Non-Commissioned Officers and Men of the Permanent Force.
6. Statement of expenditure on account of Pay and Allowances of Non-Commissioned Officers and Men of the Permanent Force, with details of expenditure, by stations.

### (6) Records

The administrative organization of the directorate and the functions of its different sections during the period under review remain as outlined in the annual report for the fiscal year 1922-23. There was, however, a total decrease of 137 in the personnel employed, but notwithstanding this decrease, very satisfactory progress was made in all branches of the post-war problems with which the directorate has to deal.

Every effort has been made to locate ex-soldiers for whom war medals are available, and in this task great assistance has been given by the Department of Soldiers' Civil Re-establishment. There remain for distribution, however, approximately 2,809 1914-15 Stars, 91,013 British War Medals, 54,255 Victory Medals, 1,129 Memorial Crosses, 5,886 Memorial Plaques, and 5,608 Memorial Scrolls.

Four hundred and twenty-four applications for Service Medals other than the Great War were received and dealt with by the Awards Board, and 280 of these were awarded and transmitted for presentation.

The total despatch of awards is as under:—

War Service Badges.....	671
King's Certificates.....	79
Medals and Decorations.....	83
1914-15 Stars.....	424
Long Service and Good Conduct Medals.....	55
C.A.F. Officers Decorations.....	92
C.A.F. Long Service Medals.....	117
Penian Raid.....	8
N. W. Rebellion.....	8
Memorial Crosses.....	796
Scrolls.....	1,839
Plaques.....	1,796
British War Medals.....	20,609
Victory Medals.....	14,325
Total.....	40,902

Four hundred and seventy-one new estates were received for distribution, 579 full estates were distributed and there still remain on hand 886 full estates to be distributed. Funds in the custody of the directorate awaiting distribution amount to \$164,034.19 and funds amounting to \$27,258.94 are held in trust.

## SESSIONAL PAPER No. 17

During this year, much more minute researches were necessary than previously due to the detailed information requested. Statistical rolls were supplied to five regiments, five cities, seven districts and counties, three universities and nine clubs and fraternal organizations.

As the consolidation and the permanent architectural treatment of military cemeteries overseas nears completion, a gradual decrease of the work of War Graves Section is apparent. During the year, however, 503 new graves were registered in all theatres and 981 burial reports despatched. 7,118 forms for the verification of cemetery registers and the inscription on headstones were despatched to the next of kin; also 3,036 registers of cemeteries overseas were forwarded to the relatives.

### (7) Extract from Report of Commandant of the Royal Military College of Canada

#### *Discipline*

The college year, 1923-24, opened auspiciously with a First Class in which we all had implicit confidence, and none more so than myself. Special privileges were granted to them in the way of leave, etc., and until February, 1924, the discipline enforced seemed, on the surface, to be all that could be desired. Owing to a regrettable incident, however, it was found essential after a searching investigation to deal severely with certain members of the Senior Class, and to take rigid measures to ensure strict compliance with the regulations.

Since then, with the exception of breaches of discipline by two cadets of junior classes, the discipline of the college has been very good.

Both the academic and military work of the cadets has been satisfactory and the progress made has been far ahead of any recent years. They have evinced a distinct inclination to study and have brought receptive minds to their work, with gratifying results.

#### *Sports*

During the past year, there has been the usual activity in sports at the college, and the college rugby football team won the Intermediate Dominion Championship.

#### *Attendance*

Sixty-seven candidates were admitted to the college in September, 1923. At that time the strength was 171 (with four cadets absent pending discharge). During the year one cadet had to retire on leave owing to ill health, and five cadets were discharged at the request of their parents.

The three cadets mentioned in my last year's report as leaving on account of ill health, and probably returning this year, did not return.

National Defence Headquarters has been informed that there will probably be vacancies for 50 recruits next autumn.

#### *Deaths*

I regret to have to report the sudden death of Lieut.-Colonel J. A. Scroggie, D.S.O., M.C., P.P.C.L.I., a member of this year's Staff College Class.

Until September, 1923, he was a valued member of the College Staff, and all ranks at the R.M.C. feel that they have lost a real friend, and none more so than myself.

An extremely loyal, gallant, dependable officer, he will be sincerely mourned by his many friends of the old 1st Division. In war and in peace he was always the same; full of courage, faithful, painstaking and efficient and everyone admired him as an officer and considered him a very real friend.

### *Medical Arrangements*

During the past year the health of the Gentlemen Cadets has been very good. No deaths have occurred. An outbreak of influenza occurred in March, and about forty cases developed. These cases were treated in our own hospital and an improvised ward in the Main building, without any additional outside help, with the exception of two orderlies, who were loaned by the Quartermaster from his staff of cleaners and helpers. The outbreak this year was not very serious and no serious complications developed.

One hundred and eighty-one Gentlemen Cadets were admitted to the hospital for treatment during the year, and 614 attended the hospital for treatment.

### *Subordinate Staff*

**Military.**—The work carried out by the Military Subordinate Staff has been satisfactory in every way, and I am well pleased with their conduct throughout the year. I would not willingly lose any one of them.

**Civilian.**—The work of the Civil Subordinate Staff has been satisfactory, and I believe that each and every member has given of his best.

### *Training*

This subject was thoroughly gone into by the Advisory Board during their annual visit, and their general remarks are available in their Report of this year. A detailed report was submitted by the Commandant, which, upon examination, is considered to be adequate and satisfactory.

### *Riding Establishment*

Good progress has been made by the cadets in riding, and the usual syllabus of instruction has been carried out, including instruction in shoeing horses, fitting and assembling harness, etc.

### *Improvements to College*

Many improvements to the college grounds and buildings have been made during the year.

Numerous improvements have been made to the grounds generally, and Captain F. Vokes, R.C.E., the hard-working District Officer deserves great praise for his untiring efforts.

### *Attached Officers*

During the past year the General Staff Branch of the Royal Military College has conducted two courses at the college—a Preparatory Course for officers who were candidates for admission to the Staff College and a Refresher Course for officers of the Permanent Force.

The Preparatory Course commenced on October 1, 1923, and was concluded on February 25, 1924. Five officers of the Permanent Force attended it, and one officer of the R.C.A.F. was attached. The work was arranged to allow of that most suitable to the officers of the Refresher Course being taken up before Christmas.

## SESSIONAL PAPER No. 17

The Refresher Course, which was attended by eleven officers of the Permanent Force, with three officers of the R.C.A.F. attached, commenced also on October 1, and was concluded on December 21, 1923. During this period the officers of both courses took up the same work and worked together.

*Militia Staff Course*

The number of officers taking this course has greatly increased. Three hundred and twenty-five copies of each lecture and scheme have been distributed to the districts, while 172 candidates have written on the examinations.

The examinations this year have been distributed throughout the course instead of being all held at the end of the course as last year. This made it easier for candidates to take the necessary time to sit for the examinations.

*Officers' Courses—General*

In the various officers' courses which have been conducted by the General Staff Branch of the college very considerable training has been given to both the Permanent and Non-Permanent Militia and it is hoped that this sphere of the college work will continue and increase. It is, however, necessary to ensure that the cost of this branch of the work is kept separate from the other expenditures in connection with the college and not allowed to appear as a charge against the education of the Gentlemen Cadets.

The work of Colonel T. V. Anderson, D.S.O., p.s.c., has been carried out with signal success. He has been most painstaking in his efforts to impart knowledge to those attending the courses, and he is a valued member of the R.M.C. Staff; always ready to assist in anything appertaining to the welfare of the college.

*Trophies and Gifts*

T. L. Church, Esq., M.P., again very kindly presented a beautiful trophy for the Recruits' obstacle race.

Through the kind efforts of the Honourable, the Minister of National Defence, and Major-General J. H. McBrien, C.B., C.M.G., D.S.O., the Government consented to the beautiful collection of silver plate of the 1st Battalion, The Leinster Regiment (Royal Canadians), being placed in the care of the Royal Military College, where it is now on display in an alcove specially fitted up as a strong room for the purpose.

The collection of the 1st Battalion, the Prince of Wales' Leinster Regiment (Royal Canadians) is the finest that could be seen anywhere, and it is doubtful if its historical value could be computed by any expert. The one hundred and five different pieces are of a pleasing variety, and there runs through all a strain of the great traditions and accomplishments of the officers and men of the regiment, and strong reflections of nearly every spot in the British Empire, for it was the lot of the regiment to serve in almost every domain where the Union Jack is flown.

The Honourable the Minister of National Defence has also presented to the college a valuable collection of medals of the late and other wars, which have been placed at the entrance of the Educational building with other war trophies, thus enlarging the interesting and valuable collection already at the college.

All ranks at the college feel sincerely grateful to the Honourable the Minister for the kindly thought which prompted this gift.

15 GEORGE V, A. 1925

The college appreciates very much indeed the kindness of the under-mentioned, who have generously presented books to the Library during the period under review:—

J. R. Brown, Esq., of New York.

W. W. Gibson, Esq., of Kingston.

F. McLennan, Esq., K.C. of Montreal.

Major H. T. Cock, M.C., The R.C.R.

Captain F. Vokes, R.C.E.

P. C. Stevenson, Esq., of Ottawa.

Lieut.-Colonel J. A. Scroggie, D.S.O., M.C., P.P.C.L.I.

## REPORT OF THE QUARTERMASTER GENERAL

*General*

Consequent upon the amalgamation of the Naval, Military and Air Services in the Department of National Defence, the Quartermaster-General's Branch has taken over certain duties in connection with all services, where it was considered efficiency and economy in administration would be secured.

These details include matters relating to all three directorates into which this Branch is divided, viz.:—

1. Supplies and Transport.
2. Equipment and Ordnance Services.
3. Engineer Services and Works.

The report of each service is submitted.

## (1) Directorate of Supplies and Transport

This directorate includes all services in connection with the Army Service Corps, Veterinary and Postal Corps, including:—

- Feeding and housing of troops and horses.
- Rental of buildings (in conjunction with the Department of Public Works),
- Heating and lighting of buildings,
- Transportation by land and sea (ocean, rail and mechanical transport),
- Horse transport, and the provision of publicly owned horses,
- Veterinary services,
- Telephone services,
- Barrack services.

The necessity for the observance of the strictest possible economy has been recognized and this has been the governing policy. It is considered, however, that all services are now at their minimum strength consistent with efficiency.

*Royal Canadian Army Service Corps*

In order to carry on satisfactorily, it was found necessary to obtain amendments to the Establishment of the R.C.A.S.C. which provided for a slight increase of personnel amounting to seventeen other ranks.

The strength of this unit on the 31st of March, 1924, was 24 officers, 241 other ranks.

*Supplies for Troops and Horses (Permanent and Non-permanent Active Militia)*

During the period covered by this report, 1,585 contracts for various supplies and services were made by the Contracts Branch at the request of this Directorate.

The following supplies were issued:—

Food rations.....	583,824
Hospital diets.....	22,736
Forage rations.....	285,795

The food and forage provided by the contractors was of excellent quality and at very reasonable prices. The average cost per ration of food was .00112 cents higher than the previous year, but, on the other hand, the cost of a forage ration dropped .00478 cents.

The following is a comparison of the cost per ration for the past four years:—

March, 1921—Food.....	\$ 0.47423	Forage.....	\$ 0.4763
March, 1922—Food.....	0.33418	Forage.....	0.37312
March, 1923—Food.....	0.31265	Forage.....	0.30692
March, 1924—Food.....	0.31377	Forage.....	0.29614

*Accommodation Generally*

The remarks contained in the reports of this Branch for the years 1921-22 and 1922-23 with regard to Permanent Force accommodation are still applicable. Another fire occurred in March, 1924, at Rosedale Heights, leaving only one building standing. This building is to be vacated in the near future, as the land is being disposed of by the Department of Public Works. The cost of upkeep of all of the Barracks with the exception of the newer groups (such as the Fort Osborne Barracks, Tuxedo) is now a very large item and must continue so until funds become available for the construction of new Barracks.

*Lighting and Heating of Buildings*

The difficulties met with in the past few years in obtaining fuel for the heating of buildings have not been experienced during the period covered by this report. The supply was ample and generally of good quality. The use of bituminous coal, instead of anthracite, has been continued where feasible, and the danger from fire as a result of the use of this class of coal has been greatly lessened, due to the fact that the caretakers and firemen have become better informed as to the proper mode of firing this coal. A certain degree of danger will, however, always exist where heating plants and chimneys are not suitably constructed to burn soft coal.

The supply of light to all buildings has been satisfactorily and economically taken care of.

*Transportation by Ocean and Rail*

The provision of ocean transportation is practically confined to personnel attending Schools of Instruction, proceeding to and returning from England.

There are still a number of accounts covering transportation in connection with the Canadian Expeditionary Force outstanding, and these are dealt with on presentation by the carrier companies.

This Branch is responsible for the issue of all rail transport. This is kept down to a minimum.

The railways are giving satisfactory service in connection with the movements of troops to and from annual training camps.

*Mechanical Transport*

The number of motor vehicles owned and operated by the Department of National Defence on March 31, 1924, was slightly in excess of the number in use on the same date in 1923. This is due mainly to greater demands for motor transport for various services.

On March 31, 1923, the following motor vehicles were owned by this department:—

Motor cars.....	19
Heavy trucks.....	7
Light delivery trucks.....	24
Ambulances.....	20
Motor cycles.....	5
Total.....	<hr/> 75

During the past fiscal year, seven motor cars and six light delivery trucks were purchased at a cost of \$29,245.50. Two heavy Leyland trucks were also acquired by transfer without payment from the Royal Canadian Air Force.

## SESSIONAL PAPER No. 17

As a result of constant use during the past five or six years, it was found necessary to dispose of the following vehicles, they being found unfit for further service:—

Motor cars.....	4
Ambulances.....	2
Motor cycles.....	3
Total.....	9

There were therefore the undermentioned motor vehicles, in use on March 31, 1924:—

Motor cars.....	22
Heavy trucks.....	9
Light delivery trucks.....	30
Ambulances.....	18
Motor cycles.....	2
Total.....	81

*Horse Strength, Permanent Active Militia*

On March 31, 1923, the total number of horses in the Permanent Force, including Cavalry, Artillery, Infantry, Army Service Corps and other units, was 754, of which number 109 were cast or sold, 19 died or were destroyed and 11 transferred, leaving a balance of 615.

Additional horses were acquired, by purchase, 103; by transfer, 11; and returned from straying, 1, or a total of 115.

The present strength is 730, allocated as shown in the following statement:—

Royal Canadian Dragoons.....	155
Lord Strathcona's Horse (Royal Canadians).....	137
Royal Military College.....	52
Royal Canadian Horse Artillery.....	224
Royal Canadian Artillery (Coast Arty. and Mobile Arty.).....	33
Royal Canadian Engineers.....	25
Royal Canadian Regiment.....	17
Princess Patricia's Canadian Light Infantry.....	13
Royal 22nd Regiment.....	9
Royal Canadian Army Service Corps.....	61
Royal Canadian Army Medical Corps.....	3
Royal Canadian Ordnance Corps.....	1
Total.....	730

Cartage was, for the most part, carried out by the R.C.A.S.C. Horse Transport and Mechanical Transport, but in all districts, contracts were made with civilian carters to supplement the above, when necessary.

*Veterinary Service*

This Branch of the service is responsible for the care and health of the horse strength, and although the Establishment has been reduced to a minimum, these duties have been very satisfactorily carried out.

*Telephones*

In view of the necessity for the exercise of the greatest economy, the expenditure for the provision of telephones was kept down to a minimum. Owing to the reopening of several Armouries closed down during the previous year on account of the shortage of fuel, and the organization of new units, the cost of telephones was slightly in excess of that for 1922-23.

The total expenditure during 1923-24 was \$14,167.22, as compared with \$13,611.80 during 1922-23, or an increase of \$555.42.

*Barrack Services*

This service is responsible for the proper conduct of all duties in connection with the receipt, custody, issue and accounting for fuel, light, gas, water and paille straw and also for the allotment of quarters.

## (2) Directorate of Equipment and Ordnance Services

During the year ending March 31, 1924, the Branch of the Director of Equipment and Ordnance Services carried out the usual provision and distribution of clothing, necessaries, equipment and ammunition. Owing to lack of funds, many important services had to be curtailed or postponed completely with the result that the general provision question is now far from satisfactory.

With the funds available in the Warlike Stores Votes this Department was barely able to provide for a skeleton upkeep service for the small force trained.

### *Universal Baling System for Clothing and Textiles Generally*

During the year a Universal Pressure Baling System for clothing and necessaries was introduced for use in all Ordnance Depots. Fixed quantities of each class of garment were adopted to bring the weight of complete bales to approximately 100 pounds. It has been found that the following advantages have resulted:—

- (a) A very great reduction in storage space.
- (b) A reduction in transport rates. Original packing cases were heavy and on long freight hauls the transport charges high.
- (c) Little likelihood of pilfering en route. Once opened, the bale cannot be re-closed without being placed in a baling machine.
- (d) With heavy paper lining it has been found that bales are a better protection against moths.
- (e) The work of handling in Ordnance Depots is greatly facilitated and the appearance of the storehouses improved.

The Ordnance personnel have been actively employed in baling stocks of clothing and other textiles held in all Ordnance Depots.

### *Wheels*

From general reports received from Inspectors of Ordnance Machinery throughout Canada, it was found that the wood in wheels of all artillery vehicles returned from overseas had shrunk so badly that very considerable repairs were necessary. This repair service involved the use of highly technical machinery and has been well carried out. In all, there was a total of 4,000 wheels repaired.

### *Petawawa Fire*

On July 17, 1923, a disastrous fire broke out in the Ordnance Depot, Petawawa Camp, and stores and property to the value of \$97,285.23 were destroyed.

A Court of Inquiry proceeded to Petawawa on July 18, and made a thorough investigation into the circumstances of the fire but no evidence could be produced which would enable this court to fix the responsibility for the outbreak. All reasonable precautions had been taken and there was no evidence of negligence or carelessness on the part of the personnel.

### *Inspection of War Trophies*

This department undertook to have departmental inspectors carry out the inspection of war trophies which have been allotted by the Deputy Minister of Public Archives to cities, towns, villages, etc., throughout Canada. Complete provincial lists were supplied to this department. These lists were arranged by Military Districts and forwarded to District Officers Commanding to have inspections carried out and reports rendered for the information of the Deputy Minister of Public Archives. These reports are to deal particularly with the general condition of the war trophies and the service is to be carried out without additional expense to the public.

## SESSIONAL PAPER No. 17

*Removal of clothing stocks from George Street Building to Castle Building*

The stock of clothing held at the Headquarters Depot, Ottawa, was removed from the George Street building to the Castle building.

The move occupied about one month's time and was very successfully carried out.

*Defective Revolvers and Revolver Ammunition*

During the past year several revolvers became damaged in firing. This matter is under investigation and has been referred to the War Office for advice on the subject.

*Q.F. 18-pr. Shrapnel*

During the Petawawa Training Season 1923, several "bursts" occurred in using Q.F. 18-pr. shrapnel ammunition. An immediate investigation was started and it was found that the "bursts" were due to a defect in the cartridge case known as "annular ring." An examination was made of all cartridge cases which had been fired at Petawawa during the season and it was found that this defect was common in a large percentage of these cases. Specimens of defective cases were forwarded to the War Office to be placed before the Ordnance Committee for report and as a result of this report it was decided that all cases should be thoroughly examined and any showing the defect of annular ring should not be used for firing service charges. Examination and rectification is being carried out at the Dominion Arsenal, Quebec.

*Inspector of Armourers Services, Quebec*

During the past year the Inspector of Armourers Services perfected a sight base for adapting Ross Rifle Aperture Sights to S.M.L.E. Rifles. The department adopted this base for use, and arrangements have been made for an initial supply.

The work of overhauling and repairing rifles received from overseas as divisional equipment was continued.

*Chief Inspector of Ammunition*

This Branch inspected all the output of the Dominion Arsenal, Quebec, and in addition carried out considerable inspection work particularly in connection with small arm ammunition.

*Dominion Arsenal, Quebec*

The following detail shows the output during the year:—

Cartridges, S. A. Ball .455" Revolver, Mark II.....	800,000
" " " Blank " " " ".....	100,000
" " .22" Long Rifle.....	730,700
" " .22" " naval service.....	200,000
" S. A. Ball .303" Mark VII.....	3,718,500
" " " D.R.A.....	200,000
" " .303" Drill.....	1,000,000
" " .303" Blank.....	500,000
" Filled B.L. or B.L.C. 15 or 12 pr. 14 lb. Blank.....	6,009
" Q.F. 12-pr. 12 cwt. Filled with Primer Blank.....	606
" Q.F. 12-pr. 12 cwt. Filled 2 lbs. Cordite M.D. Size II, with adapter, Mk. III.....	2,134
Shells, Q.F. Filled H.E. 12-pr. & 14-pr. Mk. V.....	2,134
Discs, Marking, Butt.....	5,200
Chargers, New, .303".....	98,500
Chargers, repaired .303".....	54,441
Boxes, Pistol.....	3,139
" .303" New.....	3,615
" .303" repaired.....	1,803
" .22" calibre.....	25
" Mk. I, XI, and XV.....	371
" 12-pr. repaired.....	277
" 12-pr. for H.E.....	357
" Metal-lined.....	67
Vehicles repaired.....	57

The following facts in connection with last year's work are of interest:—

(1) The Charger Plant formerly located at St. Valier street was transferred to the Arsenal premises. This was necessary owing to the fact that the building in which the Plant was located had been sold.

(2) An oil-burning furnace has been installed in the Shell Factory for nosing 4 5-inch Howitzer shell. This is the first oil furnace ever installed in this plant.

(3) Two thousand 12-pounder High Explosive shells were completed and filled with T.N.T. during the year. These shells were proved at Halifax by the Chief Inspector of Ammunition and functioned most satisfactorily.

The production of High Explosive shells is a new departure as far as the Dominion Arsenal, Quebec, is concerned, and the results obtained are extremely reassuring.

(4) The heating system throughout the whole plant was overhauled, remodelled and modernized. It is expected that this will result in greatly increased efficiency and will effect a considerable saving in fuel.

(5) Experiments were carried on in connection with the production of tracer ammunition and these experiments are now in a fairly advanced stage and it is hoped that the Dominion Arsenal will shortly be able to manufacture our total requirements of this ammunition.

Financial Reports relating to the Dominion Arsenal, Quebec, will be found in Appendix "C."

#### *Inspectors of Ordnance Machinery*

Inspectors of Ordnance Machinery visited all Artillery Batteries throughout the country and examined the equipments generally. The condition of the guns and vehicles is good, but there are certain batteries particularly in Winnipeg, where the equipment has suffered considerably due to inadequate storage accommodation. Efforts have been made to obtain more suitable storage space but lack of funds has seriously handicapped the department.

#### *Supply of Cordite for Small Arm Ammunition for Dominion Arsenal, Quebec*

Under a five-year agreement made on the thirty-first of March, 1911, the Canadian Explosives Limited, manufactured Cordite, size 5 2 for use in production of small arm ammunition. The contract expired during the war and was not renewed. During the year it was represented to the department that unless a fresh contract was entered into, the Canadian Explosives would have to dispose of their Cordite plant. It was thought most desirable to have this plant retained and the necessary arrangements were made this year to obtain the requirements of 5 2 Cordite for Dominion Arsenal from Canadian Explosives, Limited.

#### *Inspections by R.C.O.C. Inspecting Officers of Non-Permanent Units' Arms, Clothing, Equipment and Stores Generally*

A total of 680 Reports of Inspection of N.P. Units have been received, checked and recorded during the past year. Records have been maintained of all debits and credits in connection with deficiencies and subsequent recoveries of arms, clothing, equipment and stores of all units.

It has been decided that under existing circumstances, the actual production of all articles, for inspection, each year is a necessity so far as N.P. units are concerned; but that the D.O.C. may make an exception in the case of articles of clothing provided a bond is obtained in each individual case and a signature obtained within a period not exceeding 6 months prior to date of inspection.

## SESSIONAL PAPER No. 17

*Courts of Inquiry and Boards of Officers*

Proceedings of Courts of Inquiry and Boards of Officers to the extent of approximately 450 have been dealt with during the past year. These proceedings in the great majority of instances dealt with losses and deficiencies generally of arms, clothing and equipment on charge of units of the Non-Permanent Force Rifle Associations and Cadet Corps.

The number of proceedings dealt with is still considered to be abnormal notwithstanding the fact that a substantial reduction over last year is reported.

*Reports of R.C.M.P. Investigations and Activities Connected with Missing Arms*

In accordance with arrangements made with the Commissioner, the R.C.M.P. authorities have investigated so far as possible all losses of small arms and other losses of a miscellaneous nature where theft has been involved. Generally speaking, a measure of success has been obtained. Several rifles have been recovered from individuals who were found to be unlawfully in possession of arms and arrangements made for the recovered arms to be returned to Ordnance Depot or to unit as the case may be.

In several cases the culprits have been brought to justice.

*Measures taken to reduce Deficiencies of Clothing and Equipment Etc. in Possession of Units of the N. P. Force*

A Bond system has been introduced whereby certain arms and articles of clothing and equipment can only be removed from the N.P. Units Armoury when the individual concerned signs a bond form on which is recorded full particulars as to the articles to be removed and the full name and address of the member of the unit who accepts the articles.

A copy of the bond form duly completed, is given to the member of the unit concerned and a copy is retained by the responsible accounting officer.

*Serial Numbers of Arms to be Recorded*

In order to facilitate investigations of losses of arms by the R.C.M.P. authorities, all District Officers Commanding have been instructed to notify all Officers Commanding N.P. units within the several Military Districts that a complete record of the serial numbers of all arms in their possession will be maintained in future and that R.C.O.C. Armourers will arrange to check all such records of serial numbers of arms when carrying out their annual inspections.

*Washing Contracts*

The usual estimates were prepared in connection with washing of blankets and bedding, etc. and cleaning services generally, and submitted to the Director of Contracts in order that the necessary contracts in each Military District might be awarded.

*Sales of Surplus Stores, Produce, Etc.*

Surplus, obsolete and condemned stores and clothing to the value of \$71,925.98 were disposed of by sale or by transfer to other Government departments.

*Stocktaking*

In spite of reduced staffs, good progress has been made throughout the several Ordnance Depots in connection with stocktaking. Weekly Reports are now being received regularly at National Defence Headquarters from the whole of the District Ordnance Depots inclusive of Petawawa Camp.

*Miscellaneous*

Approximately 25,000 H.Q. files were received in the directorate during the past year.

Sixteen thousand eight hundred letters were received and 21,600 letters were despatched.

*Corps Administration*

*Establishment.*—The limited establishment of the corps at the present time is: Officers, 35 (excluding seconded officers, 4): Other Ranks, 415, (including 75 enlisted caretakers, but not including 2 supernumeraries (tailors) at the R.M.C. Kingston). During the early part of the year, the limited establishment was slightly increased, but consequent upon the lack of funds, was again correspondingly reduced during the year, with a result that the present establishment of the Corps is approximately the same as it was at the termination of last financial year. The general efficiency of the corps is to an extent impaired by so reduced an establishment. Difficulty has been experienced during the year in obtaining for enlistment skilled men such as clerk-typists, textile refitters, tailors and saddlers. This has resulted in moves being made of personnel between stations to meet the situation.

*Caretakers—Armouries and Drill Halls.*—The shortage of caretakers for the various armouries and drill halls throughout the Dominion has again been brought to attention during the year, the present number of caretakers authorized being: Enlisted 75, Civilian Grade III (Chief Caretakers), 7, Grade II (full-time) 105, Grade I, (Part-time) 57. These numbers are insufficient to meet actual requirements, and by employing the men available to the very best advantage, it has only been possible to partially meet the situation. Some 35 additional caretakers are needed to supervise valuable public property; these cannot be supplied from present appropriations.

*Armourers and Armament Services.*—The Inspector of Armourers Services proceeded from Quebec to England during the past year on an instructional tour. He visited many of the Ordnance Depots in England and Small Arm Section at Weedon, obtaining first-hand knowledge in matters appertaining to small arms and machine guns, studying the latest Royal Army Ordnance Corps methods of workshop management, storage, upkeep and preservation of arms, and the arrangements employed to carry out annual inspections and upkeep of arms on units' charge.

It is intended as far as possible to apply the Imperial Army procedure in Canada.

Since returning to Canada, the Inspector of Armourers Services has inspected the arms on ordnance charge and the Armourers Services generally in London, Toronto and Kingston. Arrangements have been made for a complete tour of the various stations during the present year.

*Courses of Instruction.*—During the past year two members of the Royal Canadian Ordnance Corps attended Courses of Instruction at the Artillery College, Woolwich, England, one taking the Armament Artificers (Fitters) Course and the other a course for Ammunition Examiners. Each successfully passed the final examinations in the respective subjects and were very favourably reported upon.

The Armament Artificer is now doing duty in Military District No. 6 and the Ammunition Examiner in Military District No. 11.

Lieut. (Temp. Capt.) V. A. Curni, R.C.O.C. is at present in England taking the Ordnance Officers Course.

## SESSIONAL PAPER No. 17

Two Qualifying Courses for Armourers under the Inspector of Armourers Services were arranged during the year. Five Armourers attended and qualified for the rank of Armourer Staff Sergeant at the first course, and 8 at the Course which terminated on June 30 last.

*Revision of Standing Orders and Corps Forms*

Standing Orders for the Royal Canadian Ordnance Corps have been revised and recompiled during the year. These orders have been approved and are now being printed; distribution of copies will be made as soon as they become available.

During the year 61 enlistments into the Corps were effected and the following discharges were carried out:—

For usual reasons.. . . .	25
Compulsory (on reduction of strength).. . . .	31

**(3) Engineer Services and Works, 1923-24***Nature of Work covered by Engineer Service Vote*

The Vote for Engineer Services and Works provides funds for,—

(a) The design, construction and maintenance of all Defence Department (Militia Service) works, buildings, general machinery and accessories; water and lighting systems; drains, parades, roads, bridges, culverts, piers, fortifications, field works, telephones, surveys, Engineer launches, etc. Certain large works of the above nature are carried out by the Department of Public Works.

(b) The charge and conservation of lands, stores, unoccupied buildings, camp grounds, rifle and artillery ranges, the property of, or held by, the Department of National Defence.

(c) The operation of military telephones, Defence Electric lights, water supply and lighting systems, water transport, etc.

(d) The preparation and custody of all plans, drawings and documents connected with the above subjects.

*Personnel for Engineer Services*

The Quartermaster General is charged with the general supervision of the above mentioned services and working under that official at Headquarters is a Director of Engineer Services directly in charge of all work and personnel. A small staff is maintained at Headquarters for administrative and inspection purposes. In each district are one or more Engineer Officers with the necessary staff for the execution of the various services. Work is carried out by military labour, by civilian labour under the supervision of military personnel, or by civilian contractors.

*Distribution of Expenditure*

The funds voted for 1923-24 were expended almost entirely for maintenance of existing buildings and works. The following table shows the percentage of funds expended according to the class of building and work:—

	p.c.
Maintenance of Rifle Ranges.....	11.1
" Barracks, including offices, quarters, stables, workshops, etc. . . .	34.2
" Ordnance Buildings.....	6.3
" Drill Halls.....	19.7
" Camp Grounds.....	10.2
" Fortifications.....	5.7
" ArsenaIs.....	2.1
" Royal Military College.....	6.4
New construction, Connaught Rifle Range.....	4.3
	<hr/> 100 <hr/>

The distribution of expenditure in the various districts was as follows:—

	p.c.
M. D. No. 1—H.Q. London, Ont.....	7.0
" 2—H.Q. Toronto, Ont.....	7.4
" 3—H.Q. Kingston, Ont.....	8.3
Royal Military College, Kingston.....	6.5
Ottawa Services.....	1.2
Pitawawa Camp.....	3.1
Connaught Rifle Range.....	9.1
M. D. No. 4—H.Q. Montreal, P.Q.....	6.0
" 5— " Quebec, P.Q.....	14.5
" 6— " Halifax, N.S.....	18.0
" 7— " St. John, N.B.....	2.3
" 10— " Winnipeg, Man.....	7.5
" 11— " Esquimaux, B.C.....	5.3
" 12— " Regina, Sask.....	1.3
" 13— " Calgary, Alta.....	2.5

The existing buildings and works have been maintained in a fairly satisfactory condition except for the roofs of several drill halls which it is hoped will be renewed during 1924-25. It will be noted that the only new work carried out was at the Connaught Rifle Ranges. A new building for the joint use of the Dominion of Canada Rifle Association, the local Militia units and the Small Arms School, was erected which has made a very great improvement in the facilities for rifle practice and training at this range. A cottage for permanent occupation by the Foreman of Works was constructed which will make for greater efficiency in the operation and maintenance of the range generally.

#### *Future Requirements*

The existing accommodation for the Permanent Force is not satisfactory. The most urgent need for new barracks exists at Toronto and at Halifax. Preliminary plans have been made for new barracks at Long Branch, Toronto, and further study of the requirements is going on at present. Married quarters are required at every Permanent Force Station. The service generally would attract a better class of men and greater efficiency would be attained if more married quarters could be provided.

Many armouries require repairs that cannot well be further delayed. Many new rifle ranges are required and several old ranges have inadequate danger areas, due to the increased range of modern ammunition. A growing demand exists for new rifle ranges for use not only by the Militia but also by Civilian Rifle Associations and Cadet Corps. Proper magazine accommodation is needed at several points in Canada, the ammunition at present being stored in unsuitable buildings. At Halifax a combined military and naval magazine is an urgent necessity. Plans for such a magazine have been prepared and it is hoped that sufficient funds for a start on this work will be available in 1924-25.

#### *Notes on Various Agreements Made During the Year*

The following notes refer to some of the more important arrangements made during the year under review:—

(a) Connaught Rifle Range has been further developed and used for the Annual Meeting of the Dominion of Canada Rifle Association; for courses of instruction of the Canadian Small Arms School, and as a camping ground for the local Non-Permanent Militia. It has proved to be most suitable for all the above purposes. It is expected that no further rifle practice will take place at Rockcliffe Rifle Range and preliminary arrangements for rifle practice have been made to provide accommodation for the local military units and Rifle Associations at Connaught Ranges.

## SESSIONAL PAPER No. 17

(b) An agreement has been entered into with the Forestry Branch, Department of the Interior, whereby that Branch assumes responsibility for fire protection over a large part of Petawawa Military Reserve and in return is allowed to carry out experiments in sylviculture. This arrangement works to the advantage of both departments.

(c) The agreement with the Department of Agriculture whereby that department has the use of Connaught Rifle Ranges for grazing and haying purposes, has been continued with mutual benefit.

(d) Preliminary arrangements have been made with the Public Works Department concerning the division of expenditure by the two departments on buildings used by this department. For some time there has not been any definite rule governing such expenditures and each case was considered separately. This entailed considerable correspondence. It is fully expected that an agreement will be arrived at that will be acceptable to both departments.

(e) There has been very close co-operation between this Department and the Parks Branch, Department of the Interior, concerning sites and structures of historical interest and a number of such sites have been handed over to the Parks Branch during the year under review.

*Use of Bituminous Coal*

The use of bituminous coal, reported on last year, has been continued. Experience has shown that with a few exceptions this coal can be used. Generally speaking, when using it, labour costs for firing, clearing chimneys, etc., are greater and the smoke nuisance objectionable. In a few cases the use of anthracite coal has been authorized after it had been fully demonstrated that the use of bituminous coal was impracticable. In other cases, experience in firing bituminous coal has given more satisfactory results. New installations or replacements of heating apparatus have all been of a type suitable for the use of bituminous coal.

*Temporary War Buildings*

Since the close of the late war, an endeavour has been made to utilize temporary buildings, built during the war, for various purposes. On account of the inflammable nature of these buildings special precautions were taken to guard against fire. Notwithstanding the extreme precautions, several serious fires have taken place and on account of the danger to both life and property it has been decided to discontinue the use of these buildings at London and Toronto. The abandoning of these buildings intensifies the already great shortage of married quarters and makes it more necessary than ever that funds be provided for the construction of permanent buildings. It is proposed to carry out the sale of military properties not required and it is hoped that the proceeds of such sales may be made available for the construction of those buildings which are most urgently required, without expense to the public.

*Engineer Services for R.C.A.F.*

All work of a construction nature required by the Royal Canadian Air Force has been carried out under the supervision of the Engineer Service, such sums expended being chargeable to Air Force Vote.

Designs and specifications have been prepared for Wireless Stations and the hut for one station constructed in Ottawa for use by the Royal Canadian Corps of Signals.

Due to the isolated location of Camp Borden, a proposal has been considered of moving this Air Station to Long Branch and sketch plans have been prepared for it, in conjunction with plans for barracks on this same property.

*Training Camps*

Temporary Engineer Services for Training Camps have been carried out by the Engineer Services. Satisfactory arrangements have been made but it is not possible to arrange the same comforts for the troops that could be provided if training were on a larger scale and took place at permanent central camps.

*Adjustment of War Claims Vote*

The Sydenham Military Hospital at Kingston which had been temporarily handed over to the Department of S.C.R. was closed up by that department and the property handed back to the Defence Department, less certain buildings destroyed by fire during the period.

The provision of new offices for Headquarters, for a small military hospital, and for Ordnance Stores at Kingston, has for some time been a matter of great importance.

After a careful consideration of the whole situation at Kingston, it was decided that the Old Sydenham Hospital would, with certain alterations, provide excellent accommodation for the above mentioned purposes. The work was put in hand during the late fall and it is hoped that all necessary alterations will be complete early in 1924-25.

This is the only large work that has been undertaken during the year.

*Naval Services*

Minor work in fitting up quarters for the Royal Canadian Naval Volunteer Reserve has been carried out under the supervision of the Engineer Services, funds being provided from the Naval Vote.

*Cadet Services*

Temporary Engineer Services required for Cadet Camps were carried out by the Engineer Services, funds being provided from the Vote for Cadet Services.

*Work Carried Out in 1923-24*

The following is a list of the more important work carried out in 1923-24 and chargeable to the Vote for Engineer Services and Works:—

*Military District No. 1*

London.—Wolseley Barracks, fitting up and renovation for accommodation for R.C.R.; provide gymnasium for R.C.R. Armouries, install new boilers.

Stratford.—Armouries, renew hot water boilers.

*Military District No. 2*

Toronto.—Stanley Barracks, external painting; complete lavatory; stables, replace swinging bales with partitions.

Oshawa.—Armoury, internal painting.

Hamilton.—New armouries, new roof.

Niagara Camp.—Cavalry lines, extension of drainage; horse lines.

Camp Borden.—Concrete bases for masts, etc., radio plant.

*Military District No. 3*

Kingston.—Tete du Pont, general repairs to brick stables; grading barrack square; heating "E" block. Calderwood House, repair roof. Fort Henry, repairs to magazine accommodation. Artillery Park, alterations to stables. Tete du Pont Barracks, repairs due to fire; repair electric wiring.

## SESSIONAL PAPER No. 17

Alexandria.—Regrade drill hall site, sow with grass seed, concrete entrances, etc.

Gapanoque.—Repairs to walks at east and west ends of drill hall.

Renfrew.—Repairs to brickwork at gable ends.

Napanee.—Armoury, repairs to plumbing and shooting gallery.

Pembroke.—Armoury, provide guard to prevent ice and snow sliding off roof.

Peterborough.—Armoury, repairs to roof.

*Military District No. 4*

Point-aux-Trembles.—Renew platform and overhead shelter.

St. John's.—The Barracks, levelling, draining, etc., drill area; paint interior and exterior of stables.

Montreal.—Craig Street Drill Hall, alterations and interior renovations; repair floor in main hall; renew eaves gutters and conductor pipe; white-washing interior walls, painting, etc. Armoury, Les Carabiniers, roofing and plumbing work. Victoria Rifles of Canada Armoury, repair roof, brickwork, etc.

Sherbrooke.—Old Courthouse, painting new porch, etc.

*Military District No. 5*

Levis.—Provide accommodation for ten Rifle Associations. Repair road from St. George street to No. 2 Fort.

Quebec.—St. Louis Barracks, shed for Engineer Stores. Shell Factory, new floor, tool room skylight; remove smoke stack.

*Military District No. 6*

Halifax.—Citadel, R.C.A.S.C. Stables, repair drains and roadway. Cambridge Library, enlarge furnace room. Sackville Married Quarters, repair roof. R.A. Park, R.C.A. and R.C.E. Officers' Mess, repair damage by fire. Repair road from Sackville street to Citadel gate. Military Hospital, fit up vacant ward for use as medical store. H.M. Gun Wharf, "A" store, renew slating; take down and rebuild chimney; machine shop, repair damage by fire. Armoury, main floor, renew in part. Sandwich F.C. Post, renew wire fencing around P.F. Cell and F.C. Post. Portuguese Cove and Devil's Island, datum posts for range finding instruments. Engineer Yard, repairs to wharf. Brunswick street, paving in front of military property. Cunard street, paving in front of military property. Queen street, paving west end "E" side and south end "E" side. Fort McNab, construct mobilization shelter; Master Gunners' Quarters, install new furnace. Ives Point Battery, erect new building, baths, wash house and flush closets; repairs to roof in 12-pounder magazine. Fort Ogilvie, install heating system in equipment room.

*Military District No. 7*

Sussex.—Rifle range, repair stop butt.

Woodstock.—Armoury, new heating plant.

St. John.—Armoury, repairs to roof.

Sussex Camp.—Clearing, ploughing and seeding grounds; construct and move cook houses, etc.; damage by flood.

*Military District No. 10*

Winnipeg.—St. Charles Rifle Range, repairs to caretaker's cottage; competitors' huts. Main Street Armouries, external painting. Fort Osborne Barracks, Station Hospital, linoleum.

Brandon.—Rifle Range, repairs to caretaker's cottage.

Camp Hughes.—Temporary repairs to Ordnance Equipment Building.

*Military District No. 11*

Esquimalt.—Work Point Barracks, renew floors in barrack rooms; married quarters, build nine doorways; hospital, install heating plant; officers' rms. and qrs., kalsomine where required; improve playing and parade grounds; hospital, electric light wiring. Provide additional ordnance accommodation by conversion four naval coal sheds. Additional ordnance accommodation as above.

New Westminster.—General repairs to drill hall.

*Military District No. 12*

Moosomin.—Armoury, new roof covering.

Maple Creek.—Armoury, new roof covering.

*Military District No. 13*

Calgary.—Saree Camp, reshingle roof of men's mess building, Artillery mess and hospital building (contract to Baird Construction Co., Ltd.). Saree Indian Reserve, clearing brush from artillery ranges.

The following is a list of Military properties disposed of during the fiscal year 1923-24:—

*Military Properties sold or transferred to other Departments*

*Beamsville, Ont.*—Old Drill hall and site sold to the municipality of Leeds and Lansdowne for \$400 under authority of Order in Council dated July 30, 1923.

*Burlington Heights, Ont.*—Old military cemetery transferred to the Department of the Interior under authority of Order in Council dated July 16, 1923.

*Campbellville, Ont.*—Old drill hall sold for \$205; site transferred back to the original donor, Mr. Felix Devlin, under authority of Order in Council dated October 19, 1923.

*Oshawa, Ont.*—Drill hall site—a strip containing 240 square feet—sold for \$420 under authority of Order in Council dated November 25, 1923.

*Kingston, Ont.*—Part of Sydenham Hospital site sold to T. A. McGinnis for \$10,000 under authority of Order in Council dated December 12, 1923.

*Kingston, Ont.*—Old Shoal Tower and water lot fronting on Market Battery transferred to the Department of the Interior under authority of Order in Council dated January 18, 1924.

*Cobourg, Ont.*—Old armoury site conveyed to the town of Cobourg under authority of Order in Council dated October 19, 1923.

*Prescott, Ont.*—Fort Wellington and site transferred to the Department of the Interior under authority of Order in Council dated April 19, 1923.

*Montreal, P.Q.*—McGill University drill hall site reconveyed to the donors under authority of Order in Council dated October 14, 1923.

## SESSIONAL PAPER No. 17

*Three Rivers, P.Q.*—Rifle range site—a right of way for an electric power line—was sold to the Shawinigan Water and Power Company for \$300 under authority of Order in Council dated August 17, 1923.

*Quebec, P.Q.*—A strip of the Citadel Glacis, containing 1,185 square feet, was sold to Mr. J. R. Strang for \$1,500 under authority of Order in Council dated December 30, 1922.

*Levis, P.Q.*—A part of the Levis Military Reserve, containing 6.95 acres transferred to the Department of the Interior for sale, under authority of Order in Council dated December 19, 1922.

*Shelburne, N.S.*—Nine former Military reserves, containing about 1,500 acres, transferred to the Department of the Interior for disposal. Authority—Order in Council dated May 26, 1923.

*Yarmouth, N.S.*—Cape Forchu Military reserve containing 8.9 acres transferred to the Department of the Interior for disposal. Authority—Order in Council dated May 18, 1923.

*St. John, N.B.*—Old Martello Tower, Blockhouse and site, containing about 5 acres, transferred to the Department of the Interior. Authority—Order in Council dated June 30, 1923.

*New Westminster, B.C.*—Rifle Range site, containing 130.4 acres, transferred to the Department of the Interior for sale. Authority—Order in Council dated June 23, 1923.

*St. Johns, P.Q.*—2.3 acres from the south side sold to A. E. Brunet for \$375 under authority of Order in Council dated January 30, 1924.

*St. Johns, P.Q.*—About 750 square feet transferred to the Department of the Interior as a site for a tablet by Order in Council, P.C. 461, dated March 26, 1924.

*Truro, N.S.*—Rifle Range—about 5 acres to the southwest of the Canadian National Railways transferred to the Department of Indian Affairs by Order in Council P.C. 486 dated March 26, 1924.

*Sarnia, Ont.*—Rifle Range—property rights formerly allowed by the Department of the Interior now abandoned.

*List of Military properties acquired during 1923-24*

Nil.

## REPORT OF THE CHIEF ACCOUNTANT FOR THE FISCAL YEAR 1923-24

The Accounts Branches of the Militia, Naval and Air Services were amalgamated as from April 1, 1923, the merging of the different accounting systems having been successfully effected since that date. Following the amalgamation, the Staff of the Accounts Branch at Ottawa was reduced by sixteen employees, or 17 per cent. There has been no change indicated either in procedure or personnel in respect of the work performed by employees of the Branch outside of Ottawa.

The expenditure and revenue statements, and the remarks contained in this report relate only to Militia and Air Services, the Naval expenditure being dealt with in the report of the Naval Service.

The expenditure for Militia Services during the fiscal year 1923-24 was practically the same as for the previous year. That for Adjustment of War Claims, however, was much lower than for 1922-23, due largely to the fact that payment of an account for £375,000, representing interest claimed by the British Shipping Liquidation, was withheld pending settlement of several outstanding accounts due Canada by the Imperial Government. There was also quite a substantial reduction in the expenditure in respect of belated claims for Separation Allowance and War Service Gratuity and for medals purchased.

The Air Service expenditure for 1923-24 shows an increase of \$244,195 over 1922-23, which is due to the appropriation of \$250,000 for the purchase of new air-craft and equipment.

Following are comparative tables of expenditure, refunds and revenue for the fiscal years 1922-23 and 1923-24. Civil Government is not included in either case, it being shown in Statement No. 3, Appendix "A."

### EXPENDITURES—MILITIA AND AIR SERVICES

	Militia Votes	Air Votes	Adjust- ment of War claims	Imperial War Graves	Battle- fields Memorials	Total
	\$	\$	\$	\$	\$	\$
1922-23.....	9,797,408	1,004,983	4,279,236	378,442	174,945	15,635,014
1923-24.....	9,675,341	1,249,178	678,320	371,785	108,773	12,083,397
Decrease.....	122,067		3,600,916	6,657	66,172	3,551,617
Increase.....		244,195				

### CREDITS—REFUNDS AND REVENUE—MILITIA AND AIR SERVICES

Revenue			Refunds			Total
	Militia Services	Air Services	Militia Votes	Demobiliz- ation and Adjust- ment of War Claims	Air Votes	
	\$	\$	\$	\$	\$	\$
1922-23.....	466,714	27,092	293,045	1,281,335	311,170	2,379,356
1923-24.....	296,784	11,532	460,087	106,890	261,273	1,136,566
Decrease.....	169,930	15,560		1,174,445	49,897	1,242,790
Increase.....			167,042			

## SESSIONAL PAPER No. 17

The following statements of expenditure and revenue will be found in Appendix "A."

- (1) Appropriation Accounts 1923-24.
- (2) Revenue 1923-24.
- (3) Comparative Statement of Expenditure and Revenue for ten years, 1914-15 to 1923-24.
- (4) Expenditure on account of Adjustment of War Claims 1923-24.

*Transport and Freight Claims*

Two thousand two hundred and sixty-one transportation accounts were audited and paid during the fiscal year under review; the amount outstanding March 31, 1924, being \$11,905.82.

Reductions made in accounts paid during the year, resulted in a saving of \$9,681.34.

Settlement of the following was effected—

8 claims for loss and damage to shipments.....	\$ 2,767 96
57 applications for refund of unused portion of tickets.....	1,103 56

*Recoverable Accounts*

Recoveries were effected during the past year of moneys expended on behalf of the Imperial Government and Canadian Government departments. Some of the accounts previously rendered the Imperial Government are still the subject of audit observations entailing considerable research and correspondence.

The accounts of Canadian Battlefields Memorials and Imperial War Graves Commission (Canadian Agency) are dealt with by this section, together with many other miscellaneous recoverable accounts affecting the Militia, Naval and Air Services.

Recoveries effected in the fiscal year 1923-24 were:—

British Government—	
Recovered by cash.....	\$ 428,803 36
Other Government Departments—	
Recovered by cash or transfer warrants through the Finance Department.....	199,631 73

*Surplus Stores*

There was a decided decrease in the value of surplus stores sold during the year 1923-24, the amount collected and deposited to the credit of the Receiver General being \$31,070.02, as compared with \$122,542 for the previous year.

*Costs and Statistics*

As intimated in last year's report, a system to produce costs and statistics in respect of Non-Permanent Active Militia training was developed during the year under review.

The purpose of this work is (1) to provide the Chief of Staff with financial and other data to assist in the administration of the training programme, and (2) to provide information for the use of the department generally.

The various training schemes are controlled by allotments made to each Military District while allotments for general training expense are controlled at Headquarters.

District Commanders were assisted in effecting a current control of their allotments by monthly statements from Headquarters showing disbursements made from all sources.

A complete analysis of all training expenses was carried out, the following data being produced,—

For each District's troops and each scheme of training:—

1. Numbers trained by units.
2. Cost analysis of direct expense.
3. Cost analysis of general expense.

The results of the first year's work have proved satisfactory and beneficial to all concerned.

A comprehensive Cost and Statistical Record is also maintained in connection with the Royal Canadian Air Force, reflecting value of assets, operational costs, number of men days, number of flights, flight mileage, flying time, consumption of gasoline and oil, rations issued, etc.

## REPORT OF THE ASSISTANT DEPUTY MINISTER

Submitted herewith are reports relative to (1) Civilian Employees, (2) Printing and Stationery, and (3) Correspondence Registry Office.

## (1) CIVILIAN EMPLOYEES

During the fiscal year certain questions relating to allotment of duties and organization have been dealt with in conjunction with the Civil Service Commission. It has been found that the tentative organizations created for the Accounts Branch, and the Naval Service Branch, were inadequate, and in other respects unsatisfactory. The Civil Service Commission is now (March 31, 1924) engaged on the work of reorganizing these branches, and it is expected that in the near future they will be placed on a more satisfactory basis.

A further reduction has been made during the year in the civilian personnel of the department. A number of employees, both permanent and temporary, have been retired and laid off and their positions abolished.

The statement given below shows the number of civilian employees in the Department of National Defence (permanent and temporary) at Ottawa, and the amount paid in salaries on April 1, 1923, and on March 31, 1924.

	Employees at Ottawa		Total Amount of Salaries	
	April 1, 1923	March 31, 1924	April 1, 1923	March 31, 1924
			\$ cts.	\$ cts.
Permanent.....	433	405	57,247 65	52,423 56
Temporary.....	275	86	23,349 97	8,713 73
	708	491	80,597 62	61,137 29

The figures given above as of April 1, 1923, are greater than those shown in the annual report for the fiscal year 1922-23 as of March 31, 1923. This difference is due to the fact that the Naval Service and Air Force employees, who were brought within the Department of National Defence upon amalgamation, were only taken into the records of that department with effect from the beginning of the new fiscal year, i.e., April 1, 1923.

## (2) PRINTING AND STATIONERY

Statistical statement showing work performed and expenditure:—

	1922-23	1923-24	Increase or Decrease
Printing requisitions issued.....	530	653	*123
Stationery requisitions issued.....	1,607	2,364	*757
Records of sales of military books.....	\$ 1,595 14	\$ 1,438 80	\$ †156 34
Expenditure for printing.....	37,098 17	46,414 04	*9,315 87
Expenditure for stationery.....	39,183 21	20,874 23	†18,308 98

Staff—April 1, 1922.....	46	April 1, 1923.....	47
March 31, 1923.....	37	March 31, 1924.....	46

The apparent increase in the staff as of April 1, 1923, as against March 31, 1923, is accounted for by the fact that up to the latter date only the Militia and Air Service Staffs were included. On April 1, 1923, the Naval Service Staff (brought in as a result of the amalgamation) was added.

## REPORT OF THE JUDGE ADVOCATE-GENERAL

Under the terms of the National Defence Act, 1922, the Judge Advocate-General's office ceased to be a directorate in the Branch of the Adjutant-General, and from January 1, 1923, the Judge Advocate-General became responsible to the deputy minister.

Thirty-three courts-martial were held in Canada during the fiscal year ending March 31, 1924, all of such courts-martial being district. This is a decrease of sixteen compared with the preceding year, and, generally speaking, the offences were not of a serious nature. This is indicative of the continued improvement in the discipline of the Permanent Force.

The proceedings of these courts-martial indicate a substantial improvement in the knowledge of military law possessed by the officers sitting on the courts in question. It is extremely desirable, however, that a thorough knowledge of military law and the provisions of the King's Regulations relative to discipline should be possessed by all officers, and it is pointed out in this connection that the various proceedings of courts-martial and courts of enquiry which have come before the Judge Advocate-General for review indicate that there is still considerable room for improvement.

As stated in the report for the preceding year, on the creation of the Department of National Defence the Judge Advocate-General now performs similar duties in relation to the Royal Canadian Navy and the Royal Canadian Air Force as he formerly did in relation to the Canadian Militia. During the period under review the King's Regulations and Orders for the Royal Canadian Air Force were prepared by that officer, and have now gone into effect.

During the period under review two amendments were made to the Militia Pension Act, one dealing with the suspension, and, in certain instances, the continuance of the pension when the pensioner is employed in the public service of Canada, and the other restoring the period of service required to establish eligibility for pension to twenty years, as it was prior to the amendment of 1919 which reduced such period to one of ten years. Both these amending Acts were prepared by the Judge Advocate-General.

The Judge Advocate-General has been a member of various departmental committees, and his duties have been increased as a result.

Owing to the Crown's title to considerable property under the control of the department being disputed, certain litigation has ensued. It has been the Judge Advocate-General's duty to prepare the necessary material in collaboration with the Department of Justice, and it is hoped that such litigation will effectually settle a number of points which have been a matter of long standing dispute.

With a view to minimizing as much as possible the number of cases of deficiencies in clothing and equipment on charge to Units of the Non-Permanent Active Militia, proceedings have been instituted through the Department of Justice against the officers whom the Department considers financially responsible. The preparation of these cases and the necessary reference to the Department of Justice have been dealt with by the Judge Advocate-General.

All important reports to Privy Council have either been prepared by him, or submitted for his consideration, and, in addition, he is responsible for the drafting of certain orders and regulations.

As a member of the Pensions and Claims Board, administering the Militia Pension Act, the Judge Advocate-General has prepared numerous opinions and memoranda on matters affecting pensions.

A system for simplifying the procedure followed in the issuing of orders and regulations was put forward by the Judge Advocate-General, and has now been approved and put into effect.

## REPORT OF THE DIRECTOR OF CONTRACTS

During the fiscal year under review the functions of the Contracts Branch remained the same as in the preceding year. The duties of the branch include the purchase of all supplies of whatever nature required by the Militia, Naval and Air Services; the execution and supervision of contracts for the performance of services as distinguished from purchases, and the inspection of the supplies delivered on contract.

The purchases included all those required during the fiscal year, and consisted of all the provisions, medical supplies, fuel and forage for the Royal Military College, the Dominion Arsenal, the Permanent Militia, Air and Naval Forces, and the Camps of Instruction; uniform clothing of many patterns; furniture; field equipment of various kinds; guns, and gun carriages; automobiles, trucks, and other military vehicles; small arm ammunition; paints, varnishes and oils, ironmongery; electrical equipment; telegraph and wireless apparatus; armament and torpedo stores; boats, aircraft and flying equipment; and a very wide variety of other stores such as are necessary for the use of the Militia, Naval, and Air Services.

During the year contracts were made for electric lighting; snow cleaning; laundry, washing and dry cleaning; cartage; conservancy and scavenging; repairing motor cars, trucks, steamers, lighters and motor boats, at different centres throughout the Dominion, and for various other services incidental to the proper maintenance of the Permanent as well as the Non-Permanent Military, Naval, and Air Forces.

Considerable quantities of supplies were also purchased on behalf of ships of the Imperial Service, as well as to meet demands from Bermuda Dockyard.

In making contracts competitive tenders were invited in practically every instance.

The policy of purchasing supplies made in Canada out of Canadian material was continued, but when Canadian-made goods were not procurable preference was given to goods of British manufacture. Only in exceptional cases were contracts placed with firms in foreign countries, and when this was done it was because suitable substitutes were not available either in the home market or in Great Britain.

During the year the co-ordination of the work previously done in the Purchasing Sections of the Militia, Naval and Air Services prior to the amalgamation, was completed with the result that there is now a unified system of dealing with the many demands made on the branch and which, in case of emergency, can be readily expanded without disturbing the functions of the branch in any degree.

## APPENDIX A

The following are statements for the fiscal year showing:—

1. Appropriation Accounts 1923-24.
2. Revenue 1923-24.
3. Comparative statement of expenditure and revenue, Militia and Air Services for the ten years 1914-15 to 1923-24.
4. Expenditure on account of Adjustment of War Claims, 1923-24.

## STATEMENT No. 1.—Appropriation Accounts, 1923-24—Militia and Air Services

OTTAWA, July 1, 1924.

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander in Chief of the  
Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit for the information of Your Excellency and the Parliament of Canada, the second Annual Report of the Department of National Defence (Naval Service), being for fiscal year 1923-24.

I have the honour to be,

Your Excellency's most obedient servant,

E. M. MACDONALD,  
*Minister of National Defence.*

OTTAWA, July 1, 1924.

The Honourable,

The Minister of National Defence,  
Ottawa, Ont.

SIR,—I have the honour to enclose Annual Report of the Department of National Defence (Naval Service) for the fiscal year ended March 31, 1924.

I have the honour to be, sir,

Your obedient Servant,

G. J. DESBARATS,  
*Deputy Minister.*

OTTAWA, July 1, 1924.

G. J. DESBARATS, Esq., C.M.G.,  
Deputy Minister, Department of National Defence,  
Ottawa, Ont.

SIR,—I have the honour to report on the Department of National Defence (Naval Service) for the fiscal year ended March 31, 1924, under the following headings:—

1. H.M.C. Ships.
2. R.C.N. Establishments.
3. H.M.C. Dockyards.
4. Naval Intelligence.
5. Royal Canadian Naval Personnel.
6. Naval Stores.
7. General.
8. Financial Statement.

### 1. H.M.C. SHIPS

The following ships belonging to the Royal Canadian Navy were in commission during the year:—

#### *East Coast—*

H.M.C.S. *Patriot*.  
H.M.C.S. *Festubert*.  
H.M.C.S. *Ypres*.

#### *West Coast—*

H.M.C.S. *Patrician*.  
H.M.C.S. *Armentieres*.  
H.M.C.S. *Thiepval*.

H.M.C.S. *Aurora* has been placed out of commission. All ships of *Aurora's* class in the Royal Navy have been paid off.

H.M.C. submarines *C.H. 14* and *C.H. 15* are in reserve. They are kept in a seaworthy condition and can be recommissioned on short notice.

#### H.M.C.S. "PATRIOT"

H.M.C.S. *Patriot* is a destroyer. Following are particulars of her dimensions, armament, etc.:—

Tonnage.....	1,004
Length.....	271 feet
Beam.....	27½ "
Draught.....	10½ "
Speed.....	35 knots
Complement.....	74 officers and men
Armament—	
Guns.....	3 4-in. 1 2-pdr. pom pom 4 Lewis
Torpedo tubes .....	4 21-in.

The *Patriot* was presented as a free gift to the Canadian Government in 1920 by the British Admiralty. The ship has been in commission since its arrival in Canada, and is used for training personnel of the Royal Canadian Navy and Royal Canadian Naval Volunteer Reserve.

During the summer of 1923, *Patriot* cruised along the Canadian coast and up the St. Lawrence as far as Montreal. En route the ship called at Sorel, Three Rivers, Quebec, and Pictou. The cruise began on June 2, and was completed on July 24. In addition to the complement, *Patriot* had on board twenty-six ratings and one officer of the Royal Canadian Naval Volunteer Reserve.

While underway the personnel of both services trained in gunnery, torpedo, seamanship and engine room duties. Ratings of the signal and wireless branches also received instruction and all ratings trained in squad drill, and other disciplinary lines. Regular educational classes are held on board ship. For boys and ordinary seamen these classes are obligatory. For higher ratings attendance is optional. The classes were well attended and good progress has been made.

At Montreal and Quebec local ratings of the R.C.N.V.R. joined the ship and trained in company with the ship's personnel. The ship was inspected in Montreal by the Minister of National Defence and Director of Naval Service.

At Pictou the naval personnel took part in the celebration in commemoration of the first landing of Scottish settlers in Canada.

A five days' cruise to Lunenburg and return was completed on July 29. A class of R.C.N.V.R. recruits were given practical sea training during this cruise.

*Patriot* then sailed for Quebec calling at the following places en route: Murray Bay, Gaspé, Campbellton, Chatham, Charlottetown and Baddeck.

The ship had thirty-three R.C.N.V.R. ratings on board for sea training and at Quebec and Charlottetown also embarked local R.C.N.V.R. ratings who trained with the personnel. Whilst cruising, instruction in seamanship, gunnery, etc., was carried out.

The *Patriot* was at Chatham during the visit of His Excellency the Governor General to that place. A Naval Guard of Honour was detailed to receive the Governor General who inspected the ship and reviewed the personnel. The *Patriot* returned to Halifax on September 14.

During the international schooner races off Halifax from September 29 to October 2, *Patriot* represented Canada. The committee in charge of the races have reported very favourably upon the excellent services rendered by the ship and upon the efficiency of the personnel.

As in previous years, *Patriot* proceeded to Bermuda during the winter months and was based on Bermuda with ships of the North America and West Indies Squadron of the Royal Navy.

Whilst at Bermuda every opportunity was taken to carry out joint exercises with ships of the squadron. These exercises included not only training in manœuvres with other ships but also joint training in gunnery, torpedo, signal and wireless telegraph. This training affords to the young Canadian personnel of *Patriot* an excellent opportunity to train in and with larger ships, and to familiarize themselves with customs of the Royal Navy.

During the stay at Bermuda, opportunity was also taken to give engine-room ratings an auxiliary machinery course, which cannot be given in ships of the *Patriot* class. The ratings who took the course were successful and qualified to be sent to England for mechanical training courses in training establishments of the Royal Navy.

The reports of the Commander in Chief, North America and West Indies Station, and the Commanding Officer of *Patriot*, are gratifying and show that

## SESSIONAL PAPER No. 17a

the ability of the Canadian Navy officers and men is well up to the standards of the Royal Navy. The department is also pleased to note from reports, the keenness, enthusiasm and general exemplary behaviour of the personnel.

## H.M.C.S. "PATRICIAN"

H.M.C.S. *Patrician* is a destroyer and is a sister ship of the *Patriot*. The *Patrician* is based on Esquimalt, and is utilized for training personnel of the R.C.N. and R.C.N.V.R.

The ship cruised to Nanaimo during May, 1923, and called at Comox and Drew Harbour en route.

At Comox control parties were exercised and a shore party took musketry training at the ranges. The ship was open to visitors and the Comox Boys Naval Brigade were received and shown over the ship. The ship was also open to visitors at Nanaimo.

Throughout the cruise the personnel trained in seamanship, gunnery, torpedo, signal and W/T.

In June a cruise to Prince Rupert was carried out and the following places were visited: Port Alberni, Forward Inlet (Quatsino Sound), and Portland, Oregon.

Whilst at Forward Inlet, traverses of the upper reaches of Winter Harbour were made. These reaches are uncharted.

After leaving Forward Inlet, *Patrician* proceeded to sea and met H.M.S. *Curlew*, a light cruiser of the Royal Navy. Joint range and inclination exercises were carried out in company with *Curlew*. The two ships then proceeded to Prince Rupert. At Prince Rupert, the Commanding Officer of *Curlew* inspected *Patrician*. *Patrician* was then opened to visitors.

On July 1, 1923, *Curlew* and *Patrician* sailed from Prince Rupert for Portland, Oregon. This cruise was taken to enable *Patrician* to carry out joint cruising exercises with *Curlew*.

During the stay of *Patrician* at Portland, Oregon, the ship was open to visitors and official visits were made.

While in company with *Curlew* every opportunity was taken to carry out combined exercises in gunnery, torpedo and manœuvres, and all signal ratings were given instruction in *Curlew* during harbour periods.

On July 23, *Patrician* proceeded to Vancouver to act as an escort to the United States destroyer bringing President Harding to that city.

En route to Vancouver, in company with H.M.S. *Curlew* short range surprise torpedo attack was carried out by *Curlew* on *Patrician*. High angle firing was also carried out. In the strait of Georgia gunnery and torpedo exercises and manœuvres were performed.

On arrival at Vancouver a reception was given by the mayor to the officers of *Patrician* and *Curlew*.

On July 26, *Patrician* and *Curlew* proceeded to sea and met U.S.S. *Henderson* with President Harding on board. A guard of honour for the President was provided from *Patrician's* complement. A number of *Patrician's* officers attended the official functions at Vancouver in honour of the President. A reception was held in *Patrician* for officers of the U.S.S. *Henderson* and the ship's company were entertained by H.M.S. *Curlew*.

On September 4, *Patrician* sailed for San Francisco and returned on September 14. This cruise was for the purpose of meeting H.M.S. *Curlew* to embark R.C.N.V.R. ratings who had completed six weeks' training on the latter ship.

En route to San Francisco, sea boats crews exercised and R.C.N.V.R. ratings received instruction in steering and compass. General quarters were also exercised.

On September 7, *Patrician* met *Curlew* and joint signal exercises were performed.

Upon arrival at San Francisco the Commanding Officer of *Patrician* and Captain of *Curlew* paid official calls and visits were also paid to Admirals of American ships in San Francisco harbour.

The *Curlew* and *Patrician* left San Francisco on September 9 and proceeded to sea where joint exercises in gunnery, torpedo and signalling were carried out, after which *Patrician* parted company with *Curlew* and proceeded to Esquimalt, where it arrived on September 11.

During the cruise every opportunity was taken to carry out signal and tactical exercises with H.M.S. *Curlew*.

The fifteen R.C.N.V.R. ratings who trained for six weeks on board *Curlew* were discharged to *Patrician* and returned to Esquimalt.

On September 17, the ship proceeded to Comox in company with H.M.C.S. *Thiepval*.

During the cruise, ships' companies were employed in torpedo exercises and testing gun circuits.

At Comox, R.C.N.V.R. ratings were given instruction in seamanship and a party was sent ashore for musketry practice. Torpedo and gunnery practices were also carried out.

H.M.C.S. *Armentieres* arrived at Comox and joined *Patrician* and *Thiepval* on September 19.

Joint seamanship and gunnery exercises were performed by R.C.N.V.R. and R.C.N. ratings from the three ships.

While at Comox sea cadets visited *Patrician* and were shown through the ship.

On September 24, *Patrician* proceeded to Bay sound for torpedo practices in company with *Thiepval* and *Armentieres*. The ships returned to Comox in the evening.

A party was sent ashore for gunnery practices on the range, and R.C.N.V.R. ratings were given instruction in torpedo and gun drill.

On the return journey, off Tribune bay, sub-calibre exercises were performed after which the ship returned to Esquimalt.

On October 13 the *Patrician* proceeded to Bamfield with the Deputy Minister of Marine and Fisheries on board. The lifeboat station at Bamfield was inspected by the deputy minister, after which the ship proceeded to Esquimalt, where the deputy minister disembarked.

On October 14 *Patrician* sailed for Prince Rupert and returned to Esquimalt on November 8.

The following ports were visited: Quatsino Sound, Lowes Inlet, Caughlar Anchorage, Alert Bay, Blinkinsop Bay, Drew Harbour, and Vancouver.

At Quatsino Sound the ship's medical officer visited the Indian settlement and gave medical assistance to some of the inhabitants who were ill.

At this point *Thiepval* joined *Patrician* and accompanied her for the remainder of the cruise.

At Prince Rupert official visits were made to the mayor and Minister of Marine and Fisheries.

During the cruise the heavy weather encountered gave the ship's company a good opportunity to train in seamanship but prevented gunnery and torpedo exercises.

At Vancouver, joint exercises with the air forces were performed.

## SESSIONAL PAPER No. 17a

On January 25, *Patrician* proceeded to Bamfield, where it joined *Thiepval*. Port Alberni and Christy Bay were also visited. During the cruise wireless telegraphy training was performed. At Bamfield, owing to heavy rains, wireless communication was difficult; although messages were received, *Patrician* could not send messages owing to wet insulation.

On February 1, *Patrician* cruised to San Diego and en route visited San Pedro and San Francisco.

While at San Pedro official visits were made and the ship was opened to visitors. The ships returned to Esquimalt on February 29.

During this cruise rough weather was encountered and it was difficult to carry out gunnery and torpedo exercises at sea. From a point of view of seamanship training, however, the cruise was beneficial to the young ratings.

While in harbour, boat pulling exercises were performed and various other instructions were given on board.

During the year eighty R.C.N.V.R. ratings trained at sea on voluntary service in *Patrician*.

The reports of the Commanding Officers of H.M.S. *Curlew* and H.M.C.S. *Patrician* show that the *Patrician's* personnel are efficient and are very keen in the performance of their duties.

The department is gratified with the progress which has been made during the past year in the training of the ship's company.

## H.M.C. MINESWEEPERS "YPRES" AND "FESTUBERT"

The *Ypres* and *Festubert* were stationed at Halifax and were in commission throughout the year. These two ships did not take any long cruises but were used at the Halifax base as training ships for R.C.N.V.R. officers and men from April 1 until October 1.

From October 1 to March 1, officers and men of the R.C.N.R. were trained. The training given in these two ships consisted of gunnery, seamanship, signalling and discipline.

The reports show that the ships have rendered efficient service throughout the year. The officers and men have carried out their duties in a creditable manner and the reports on training of reserve forces show that good progress was made.

## H.M.C.S. "THIEPVAL" AND "ARMENTIERES"

The *Thiepval* and *Armentieres* were in commission throughout the year. During the summer of 1923, both vessels were stationed at Esquimalt and utilized for training R.C.N.V.R. ratings.

They carried out a number of cruises to Vancouver, Comox and other western ports in company with H.M.C.S. *Patrician*.

In September, both ships spent ten days at Comox in company with *Patrician*.

During these cruises combined tactical exercises, gunnery drills and signalling practices were performed.

During the winter months, the *Thiepval* and *Armentieres* were detailed alternately to carry out Fishery Protection Service duties off Bamfield. This work was performed upon request from the Department of Marine and Fisheries. The ships continued on fishery protection duties until March 1.

Throughout the whole period of patrol R.C.N.V.R. ratings were given training. The nature of the services upon which the ships were employed provided most valuable training.

On February 27, *Thiepvál* was commissioned to proceed by way of Alaska, the Aleutian islands, the northeastern coast of Russia and Japanese islands as far as Hakodate, to deposit petrol and oil dumps for the Round-the-World British flight under Major Stuart MacLaren. The laying of these dumps was in charge of Colonel C. E. Broome.

During the cruise the complement of *Thiepvál* was brought up to full war strength. Lieutenant R. Shipley, R.C.N.V.R., Company Commanding Officer of the Ottawa Half Company, and a number of R.C.N.V.R. ratings were detailed for service in *Thiepvál* during the cruise. The vessel left Esquimalt on February 27.

Supplies of petrol and oil were shipped at Vancouver and the *Thiepvál* proceeded to Prince Rupert on March 1, arriving on March 4.

From Prince Rupert she proceeded along the Alaska coast, calling at Dutch Harbour. At the end of the fiscal year, the *Thiepvál* was at Dutch Harbour awaiting final instructions in order to proceed on her cruise.

The cruise undertaken by the *Thiepvál* will be of great value to the young Canadian ratings who compose her complement, and also to the R.C.N.V.R. personnel.

It is expected that the cruise will be completed and *Thiepvál* return to her base toward the end of August, 1924. The total distance covered will have been over eleven thousand miles.

The *Thiepvál* and *Armentières* have both rendered valuable service in training Canadian ratings and R.C.N.V.R. reserve officers and men throughout the year.

## 2. R.C.N. ESTABLISHMENTS

The Royal Canadian Naval Barracks at Halifax and Esquimalt are maintained as training establishments for ratings of the Royal Canadian Navy, Royal Canadian Naval Volunteer Reserve, and Royal Canadian Naval Reserve, and as Depots for the R.C.N.

The training equipment installed during 1923 has been perfected and new equipment has been installed during the past fiscal year.

### HALIFAX BARRACKS

The complement has been increased from 69 to 110 officers and men. The reason for this increase is to provide instructional staff to deal with the training of R.C.N.V.R. and R.C.N.R. officers and men, to maintain a percentage of R.C.N. ratings to fill vacancies in ships and establishments caused through sickness or injury, and to enable a limited number of R.C.N. ratings to attend professional courses in England to qualify for advancement. The training facilities at the disposal of the department in Canada are not yet sufficiently developed to permit training in all branches of ratings up to the standards in the Royal Navy. The British Admiralty have permitted Canadian ratings to attend training establishments of the Royal Navy, thereby maintaining the same standards of efficiency.

The following training equipment has now been installed at R.C.N. Barracks, Halifax:

Modern gun and control instruments, including director and other firing teachers. As far as equipment is concerned the establishments are now fitted to train seaman gunners in Canada.

Torpedo and electrical lecture room: The equipment installed will enable ratings to qualify in Canada for the rating of seaman torpedomen.

## SESSIONAL PAPER No. 17a

A modern drill shed is in process of completion and will be ready for use early in 1924-25.

The question of providing a suitable exercise ground in proximity to the barracks is under consideration and will be settled during the coming year.

Owing to the large number of reserve ratings reporting to Halifax barracks for training, it has been necessary to provide additional accommodation. This has been accomplished by converting the officers' quarters for this purpose and providing new quarters for the officers in houses 9 and 10 located near the barracks.

In addition to technical training, the ratings in R.C.N. barracks are also given educational training. For this purpose a qualified civilian schoolmaster has been appointed who has given both compulsory and voluntary training in academic subjects. The education of ratings is thereby safeguarded and they are enabled to pass the educational test, Part One, and the higher educational test necessary for advancement to petty officer and warrant rank respectively.

The marked improvement in technical and educational ability of ratings has justified the action of the department in providing training facilities in Canada.

The expense of sending the ratings to England for training in the subjects now dealt with in Canada has also been eliminated. Two hundred and fifty-six R.C.N.V.R. ratings and 71 R.C.N.R. ratings were trained during the year.

## ESQUIMALT BARRACKS

The Royal Canadian Naval Barracks at Esquimalt has been organized on the same basis as Halifax. The complement has been increased and training has been carried out with equally gratifying results.

A gun battery containing guns of the most modern type and of all calibres up to 6 inches has been installed but fire-control instruments, which have been ordered from the Admiralty have not yet been received. It is expected that the battery will be fully equipped in time for R.C.N.V.R. training during the coming summer.

The torpedo and electrical lecture room and drill shed have been completed and are now in full operation. Parade grounds have also been completed.

During the early part of the year, the hospital buildings were converted into naval barracks. This work involved many alterations, all of which have been carried out.

Training has been given throughout the year, not only to R.C.N. ratings but also to the reserve forces, classes in gunnery torpedo, signal and seamanship, were maintained throughout the year. A civilian schoolmaster has been appointed to give educational training. The personnel of the R.C.N. have taken advantage of training facilities to qualify both educationally and professionally for advancement.

Two hundred and five R.C.N.V.R. ratings and ten R.C.N.R. ratings were trained during the year.

## GENERAL

At both Halifax and Esquimalt, sports have been organized and the various lines of sport including baseball, football and hockey have been enthusiastically taken up. Naval teams in all lines of sport have been entered in local leagues and the showing made has been creditable.

In sport, as in the regular work, the spirit of the Navy has been instilled in the men and their enthusiasm shows, beyond doubt, their readiness to respond to the arduous duties of active service.

## 3. H.M.C. DOCKYARDS

## HALIFAX DOCKYARD

The activities of this dockyard were increased during the year in order to undertake the refitting of H.M.C.S. *Patriot* and minesweepers *Ypres* and *Festubert*. Other work dealt with being certain requirements for the Imperial Service; supervision of repairs to ships of other Government services; maintenance and upkeep of dockyard and barracks establishments, their equipment and plant.

The technical staffs have been maintained at the reduced numbers during the year despite the heavier demands placed upon them.

Although the dockyard is being operated on a semi-closed basis, it can be placed in full working order on short notice. The general equipment is in good condition and the various elements comprising the establishment are being effectively maintained.

## ESQUIMALT DOCKYARD

Prior to this year very little work has been handled at this dockyard since it was closed down in 1920. This year with the operation of a Training Squadron and Training Establishment on the west coast greater activities have been experienced.

Work performed includes the preparation and supervision of the contracts for dealing with the dockings and refits to the ships stationed West; surveying preparing specifications, and supervising repairs to ships of other Government services and general maintenance of works connected with the dockyard and barracks establishments, also plant equipment and accessories.

The condition of this establishment as a whole has been well maintained.

## 4. NAVAL INTELLIGENCE

The Canadian Naval Intelligence Service forms a part of the Admiralty World Wide Intelligence System.

The service provides routine reports on naval intelligence, shipping, trade routes, etc., for the Ottawa area, and also keeps in close touch with other Intelligence areas, exchanging information and reports of naval interest.

Valuable assistance in the compilation of this report has been received from the Department of Public Works, the Harbour Commissioners, Montreal; the Department of Marine and Fisheries and the Department of Railways and Canals.

The Canadian Naval, Military and Air Services are now co-operating in the closest possible manner in dealing with Intelligence matters.

## 5. ROYAL CANADIAN NAVAL PERSONNEL

## PERSONNEL

*Royal Canadian Navy Ratings.*—Throughout the year the policy of manning H.M.C. ships by Canadian officers and men has been followed. Royal naval ratings on loan to R.C.N. whose period of loan expired during the year were returned to England and their places filled by qualified Canadian ratings.

## SESSIONAL PAPER No. 17a

A limited number of ratings specially qualified in gunnery and torpedo have been borrowed from the R.N. for short periods pending qualification of a sufficient number of Canadian ratings to meet requirements.

Training in R.C.N. Barracks and H.M.C. ships. Training in ships and barracks has been carried out in a satisfactory manner throughout the year.

The various cruises of H.M.C. ships have afforded excellent opportunity of training the ratings under seagoing conditions and at the R.C.N. Barracks special attention to gunnery and torpedo has been given as a result of the improved training facilities afforded.

Educational training has also been carried out and eighty-one ratings have sat at the Educational Test, Part 1, examinations; nine ratings have passed the Higher Educational Test; fifteen ratings have qualified in England at Gunnery courses and ten ratings have qualified in Torpedo courses.

A special effort has been made to complete engine-room ratings amongst Canadian ratings and all stokers and leading stokers are now R.C.N. ratings. During the year fourteen engine-room ratings successfully passed the Mechanical Training courses in England. One Ordnance Artificer also qualified in England in Ordnance courses.

The Admiralty have co-operated with the Canadian Navy in permitting ratings of the R.C.N. to attend the training courses in England, thereby qualifying for advancement in branches, training for which, has not yet been provided in Canada.

There are now a total of 394 ratings in the Royal Canadian Navy, of which nine are borrowed from the R.N. The remainder are R.C.N. ratings.

*Officers.*—There are a total of seventy-three Commissioned and Warrant Officers of the Royal Canadian Navy. Of this number only four Commissioned and two Warrant Officers are on loan from the Royal Navy. The remainder are permanent Royal Canadian Navy officers.

The following table shows the allocation of officers:—

H.M.C.S. <i>Armentieres</i> .....	1
H.M.C.S. <i>Festubert</i> .....	1
H.M.C.S. <i>Naden</i> (Esquimalt Barracks).....	10
H.M.C.S. <i>Patrician</i> .....	5
H.M.C.S. <i>Patriot</i> .....	5
H.M.C.S. <i>Stadocona</i> (Halifax Barracks).....	11
Headquarters.....	8
H.M.C.S. <i>Thiepval</i> .....	2
H.M.C.S. <i>Vpres</i> .....	1
In England for Training.....	29
	<hr/> 73

Officers of the Royal Canadian Navy train in ships and establishments of the Royal Navy until they qualify for and are advanced to the rank of Lieutenant. Those wishing to specialize are given courses in Royal Naval Establishments on completion of which they are given appointments in the R.C.N. in Canada. The appointments alternate approximately as far as the exigencies of the service permit every two years and are as follows:—

Two years' courses in England or to H.M. ships.

Two years' appointment to H.M.C. ships.

Two years' appointment to shore (Headquarters or R.C.N. Barracks).

## ROYAL CANADIAN NAVAL VOLUNTEER RESERVE

The authorized strength of the R.C.N.V.R. is 70 officers and 930 men. The force is organized at Headquarters located at the following places and the numbers indicated have been recruited:—

Place	Officers	Men
Charlottetown...	2	28
St. John...	5	82
Quebec...	2	54
Montreal (English)...	4	39
Montreal (French)...	3	27
Ottawa...	3	50
Toronto...	2	60
Hamilton...	3	57
Winnipeg...	9	107
Regina...	5	65
Saskatoon...	2	51
Edmonton...	4	54
Calgary...	4	51
Vancouver...	2	39
Total...	50	764

These companies are recruited up to full strength except Charlottetown, Montreal and Vancouver. The companies authorized for Halifax and Victoria have not yet been organized.

Four hundred and sixty-one ratings of the R.C.N.V.R. were given training at the bases at Halifax and Esquimalt during the year. Thirty-two officers also performed their compulsory annual training.

A large percentage of the ratings who reported for annual compulsory training also performed voluntary service afloat for periods ranging from one to three months. The voluntary service afloat was carried out in H.M.C.S. *Patriot*, *Patrician*, H.M.S. *Curler*, *Calcutta* and *Constance*.

Company headquarters' drills have also been well attended most of the ratings having shown keen interest in the success of their respective companies. The few who did not complete the number of drills required by the regulations, have been discharged from the force and their places have been filled by more suitable applicants of which most companies have a waiting list.

Each company headquarters has been supplied with a field gun, rifles, and a naval cutter fully equipped for training purposes. The St. John, Charlottetown and Vancouver companies have also been given the use of private yachts for training their personnel.

Sports have been organized by the R.C.N.V.R. companies, who have taken up football, baseball and hockey and have entered their local leagues under R.C.N.V.R. colours. In sports as in the work of the force the ratings have shown keenness, enthusiasm and efficiency.

#### ROYAL CANADIAN NAVAL RESERVE

The R.C.N.R. forces authorized is 70 Officers and 430 men, recruited from amongst seafaring personnel. Recruiting for the force is carried out locally by registrars appointed at Halifax, Lunenburg, St. John, Charlottetown, Quebec, Montreal, Prince Rupert, Vancouver, and Victoria. The registrars supply information to those inquiring regarding entry in the force, arrange for medical examination, attestation and training of ratings and keep a complete record of men enlisted in their locality. Twenty-four officers (including nine registrars) and eighty-one men have been recruited and given training at Halifax or Esquimalt. Training for the R.C.N.R. is carried out during the winter months.

It is expected that the force will be recruited up to full strength during the coming year.

## 6. NAVAL STORES

The activities of the Naval Stores Branch have been continued under the same organization as has obtained in past years, viz., the Naval and Victualling Stores Division, comprising the Supply Depots at the Dockyards, and the Naval Armament Supply Division, likewise comprising the Naval Armament Supply Depots at Halifax and Esquimalt.

The supply work of the branch is organized solely for the supply and equipment of men-of-war and all auxiliary services with every possible expedition and to render the maximum assistance required for their efficient maintenance. The organization, though now on a peace-time basis, is such that in any emergency all existing facilities are capable of expansion and development at short notice to provide for whatever requirements may arise. The trained personnel and storing facilities at the Dockyards and Armament Supply Depots are adequate for present requirements, in addition to which they constitute a nucleus for an emergency.

There has been a marked increase in the activities of the branch during the year due to the equipping of the R.C.N.V.R. personnel with uniforms and the company headquarters at the various centres with naval and naval armament stores necessary for the training of the volunteers and the operation of the units in general. In addition uniforms have been provided for the R.C.N.R. ratings enlisted to date.

In continuing the policy of disposing of all vessels not required by the department, sale was made during the year of the *Canada*, the only vessel which remained on the disposal list from the previous year.

## NAVAL AND VICTUALLING STORES DIVISION

The functions of this division have remained unchanged, embracing as in past years all phases of naval supply work as regards naval and victualling stores.

During the past year supplies of stores were arranged for vessels of the Canadian Naval Service and for all other naval establishments. The greatest possible economy was exercised in this by the transfer of stores between dockyards and by shipment to other points as necessary. Service was also rendered to the Imperial Naval Service and to vessels of other Government departments. Supply depots are maintained at both Halifax and Esquimalt Dockyards. These are in charge of experienced store officers, who supervise the work and who are responsible to the Director of Naval Stores for the performance of the duties allotted to them. They must be prepared at all times to provide and issue supplies of whatever nature required to all ships and establishments under the jurisdiction of the department and to such others as may be approved; to make a strict and careful accounting of all such issues; and to see that all supplies purchased are in accordance with specifications and in other respects suitable for the service. The variety of stores handled is necessarily very extensive, and for men-of-war particularly excellence of quality and reliability are of the most vital importance. To this end standardization of supplies and a rigid system of inspection constitute two important factors of the supplies organization.

The nature of the service demands that substantial reserves be maintained at each naval base and kept readily available at all times. In time of peace, ships' requirements can be forecasted very accurately, their allowances being carefully regulated. Ordinarily and within reasonable limits these reserves are based upon six months' requirements for all purposes. Owing to the large stocks which were available at the end of the war, provision has been made in the case

of stores which are not of a perishable nature for reserves against the anticipated requirements of the next five to ten years, depending upon the quantities in stock and upon the extent of perishability. In the case again of certain other stores, likewise unperishable, further additional quantities have been retained to constitute a war reserve for the equipment of naval personnel enlisted during the first few months following the outbreak of war and to fit out the ships which would at that time be placed in commission. At the close of the fiscal year 1923-24, the stocks at Halifax totalled in value \$1,234,610.50, and at Esquimalt \$487,950.85.

In addition to the stores actually carried at the supply base, contracts are arranged and maintained at both coasts for the supply of fresh provisions, coal, ice, etc., for the convenience of ships operating in adjacent waters. These are made applicable to, and are taken advantage of by, ships of the Imperial Service.

A review of the stocks at the dockyards, particularly at Halifax, has been made with a view to disposing of all obsolete, unserviceable and surplus stores. Lists of these have been compiled and placed in the hands of the Government salvage officer for disposal. Satisfactory progress in this connection has been made.

The volume of business transacted in 1923-24 at both dockyards is reflected in the following brief statistics:—

		Number transactions involved
<i>Halifax Dockyard—</i>		
Value of stores received.....	\$103,360 89	1,181 (orders)
Value of stores returned.....	3,306 62	890
Value of stores issued.....	347,483 54	5,946
<i>Esquimalt Dockyard—</i>		
Value of stores received.....	\$126,636 05	1,444 (orders)
Value of stores returned.....	3,698 81	717
Value of stores issued.....	169,283 96	5,379

The overhead costs at the dockyards in connection with the supply of stores to all ships and establishments for the year under review were 16.22 per cent at Halifax and 10.28 per cent at Esquimalt. These percentages embrace all costs of whatever nature incidental to the maintenance and operation of the supply bases, including also extensive repairs to certain of the storehouses.

The audit of all stores accounts has been conducted with satisfactory results. Both dockyards and the ships and naval establishments under the department keep stores accounts in which receipts and expenditures are fully recorded. These are audited at Naval Service Headquarters to see that all stores of whatever nature are properly accounted for, and for the control of expenditures. In the case of the store accounts at the dockyards, the system of concurrent audit at headquarters has been continued with great success, serving not only as an audit but also affording information on stores matters at all times as an integral part of the system of stores control.

The system of biennial stocktaking at both dockyards has been continued and good progress made. Under this system the stocks are completely reviewed in the course of two years. The results on the whole are very gratifying and testify to the efficient manner in which the staffs concerned perform their duties.

The system of general messing whereby the complements of ships and establishments are victualled by the department direct has been continued, likewise with very satisfactory results. The essential features of the general messing system are direct control of the stewards, the supply of stores purchased by contract and a particular Naval Service Headquarters audit. This system effects a considerable saving in the cost of victualling the ships of the department. During the past year the average cost of victualling was 49 cents per man per diem.

## NAVAL ARMAMENT SUPPLY DIVISION

The functions of this division are in general terms the supervision and control of all matters pertaining to the provision, receipt, issue, care and maintenance, repair, testing, examination, accounting and audit of all Naval Armament stores in connection with the Canadian Naval Service at both Halifax and Esquimalt.

An agreement made with the British Admiralty to maintain sufficient reserves of ammunition for issue to H.M.C. ships on repayment as required has proved very satisfactory. The storekeeping of all Imperial stocks whether for ultimate issue to Imperial or Canadian services which is undertaken by the department in return for this accommodation by the Admiralty has been carried on to the mutual satisfaction of both services.

The Imperial stocks at Halifax were recently inspected by the Admiralty Inspector of Ordnance Depots, who rendered a very favourable report on the condition of the stores.

The stocks of Naval Armament stores at both Halifax and Esquimalt are maintained in an efficient manner and have been depleted of all obsolete and unserviceable stores. Where necessary these have been replaced by modern equipment and stores of the latest manufacture.

The store accounts of both depots, as well as of H.M.C. ships and establishments, have been kept and rendered in a satisfactory manner.

Certain Naval Armament stores not required for the Naval Service have been transferred to the Militia Services free of charge. The value of these stores amounted to \$46,163.

The following represents the value of the receipts and issues made on behalf of the Canadian Naval Service during the year:—

Receipts at Halifax.....	\$188,035 00
"    " Esquimalt.....	254,538 00
Issues " Halifax.....	467,528 00
"    " Esquimalt.....	176,644 00

A system of continuous stocktaking is carried on in such a way as to ensure that the complete stocks of Naval Armament stores both Imperial and Canadian are verified every year. Certificates of comparison of stock lists with ledger balances are rendered periodically. All discrepancies other than those of trivial nature, i.e., wrong nomenclature or obvious clerical error, are thoroughly investigated and the necessary adjustment made. The results of these stocktakings have been very satisfactory.

## PURCHASES

During the year the total value of Naval, Victualling and Armament stores purchased on account of the Naval Service for delivery to the Dockyards, Armament Supply Depots and to services direct amounted to \$429,101.

## 7. GENERAL

I have to express appreciation for the competent manner in which officers and men of the Royal Canadian Navy, Reserve Forces, and civilian employees of the Naval Service have performed their duties during the past year.

The behaviour of the Naval ratings has been exemplary both at home and whilst serving on board Imperial ships and attending courses at Royal Naval Training Establishments, Commanding Officers of the R. N. ships have complimented the service on the efficiency and good behaviour of Naval Ratings coming under their command for training.

15 GEORGE V, A. 1925

The general health of the service has been excellent. During the year all officers and men who served during the war were examined to ascertain if they are suffering from disabilities attributable to war service. In practically all cases the men were found physically fit for the service.

I have the honour to be Sir,  
Your obedient servant,

WALTER HOSE,  
*Commodore R.C.N.,*  
*Director of Naval Service.*

## REPORT OF CHIEF ACCOUNTANT

The attached statements show an expenditure under various appropriations amounting to \$1,405,090 and a revenue of \$113,659.45.

Refunds for the year on account of demobilization, previous years amounts to \$57,596.95.

## DEPARTMENT OF NATIONAL DEFENCE (NAVAL SERVICE), 1923-24

Total Revenue of the Naval Service for fiscal year ended March 31, 1924.	\$	113,659 45
Demobilization refunds previous year.....		57,596 95
	\$	171,256 40
Net expenditure for the year on Naval Service appropriations.....	\$	1,405,090 59
Value of work done and materials supplied for account of other Canadian Government departments, British Admiralty and others.....		401,356 98
Gross disbursements for the year.....	\$	1,806,447 57

## INTRODUCTORY LETTER

## TO REPORT OF THE

## DEPARTMENT OF SOLDIERS' CIVIL RE-ESTABLISHMENT

The Hon. H. S. BÉLAND, M.D., M.P.,  
Minister of Soldiers' Civil Re-establishment,  
Ottawa.

SIR,—In accordance with your instructions I have the honour to submit the attached report of the work of the Department of Soldiers' Civil Re-establishment for the calendar year 1924. During the year the Sir Oliver Mowat Sanatorium, Kingston, has been turned over to the Kingston Health Association and the departmental patients in that institution are now under the care of the association, the cost of their treatment being paid by the department. The department continues to operate nine hospitals with a total bed capacity of 2,647.

2. The number of patients undergoing treatment has continued to decrease but at a far less ratio than formerly. The following statement shows the number of in-patients and out-patients at the end of 1921, 1922, 1923 and 1924:—

	In-patients	Out-patients	Total
1921.. . . . .	5,053	287	5,340
1922.. . . . .	4,014	293	4,307
1923.. . . . .	3,619	125	3,744
1924.. . . . .	3,347	80	3,427

It may be expected that there will be very little reduction for some years to come and there may in some departments be an increase. Several factors are operating towards the maintenance of patient numbers such as increasing age, complication of war disabilities by those common to civilian life and lapse of time, meaning in many cases progress of disease and steady deterioration of health. These factors will as time goes on demand longer in-patient treatment and consequently with the constant re-admission, a maintenance of patient strength. This has already been the experience of the department of the Australian Government which conducts similar work to that of the Department of Soldiers' Civil Re-establishment. The in-patient strength at June 30, 1921, 1922, 1923, and 1924 was as follows:—

1921.. . . . .	2,346
1922.. . . . .	2,258
1923.. . . . .	1,975
1924.. . . . .	1,714

Clinical treatments are less numerous than formerly. There was a reduction of approximately \$4,000 in 1922, a further 50,000 in 1923 and a further 20,000 in 1924. Here again it will be seen that the reduction is becoming less marked.

On the other hand, due to the very careful business methods employed it has been possible to continue a considerable reduction in the number of the staff. The figure at December 31, 1924 was 2,524, a decrease of 570 during the year. In view of the permanent nature of most of the hospitals now operated by the department and the fact that a considerable proportion of the staff is

employed in these hospitals there is unlikely to be a material further reduction for some time to come.

At the last session of Parliament two amendments were made to the Department of Soldiers' Civil Re-establishment Act, one dealing with the classification and control of the staff and the other empowering the department to receive and hold moneys belonging to ex-members of the forces who have received treatment, particularly those suffering from mental diseases. This authority was implemented by Order in Council P.C. 2161 (appendix No. III).

The operation of the authority under which the department may assume responsibility for Workmen's Compensation in the case of pensioners of 20 per cent and upwards is becoming more generally known and appreciated and is resulting in the more settled employment of disabled men. In consequence the appropriation of \$30,000 made last year has been expended and it will be necessary to secure a supplementary vote in order to meet the claims already in hand and others which will be received prior to the end of the fiscal year.

It has unfortunately been necessary for the department to continue a certain measure of relief to pensioners. Particulars of the expenditures in this connection are set forth in the report. Relief is in no instance issued in cash but always by orders on landlords, grocers, coal dealers, etc. and the accounts are paid direct to these persons. A supplementary vote to meet the extra expenditure involved in this connection will be submitted.

The sheltered employment workshops, both those operated by the department and those operated by the various branches of the Red Cross, continue to serve a useful purpose. Numbers of men who otherwise would be unemployable are provided with remunerative occupation at a cost a good deal less than would be incurred if they were carried on relief, which without these workshops would be necessary. As soon as it is proved that a man is able to work regularly and satisfactorily every effort is made to find him employment in some industrial plant.

A report is included from the Toronto Rehabilitation Committee. This committee was formed in order to assist those who have not yet found their niche in the fabric of industry to procure employment at a fair cost of the employer and a minimum cost to the Federal Government. While the cost of operation has been somewhat high it will be noted that 162 men have been placed permanently since the commencement of the activities of the Committee.

No decrease is shown in the amount of expenditure on pensions, in fact there has been an increase this year and it will be necessary to ask Parliament for a supplementary vote in this regard.

Special attention is called to appendix II, setting forth Order in Council P.C. 1653, under which the department has been authorized to provide quarters and maintenance for indigent pensioners. As time goes on it will probably be necessary to make still further provision for the maintenance of men who served in the Canadian Expeditionary Force who through increasing age and the development of disabilities in civilian life, superimposed on service disabilities, are thereby rendered unable to secure ordinary employment. Under the authority of this Order in Council certain sections of departmental hospitals have been set aside for present and early future requirements. This will entail increased expenditure during the next fiscal year, notwithstanding the fact that the benefits are confined to pensioners of 20 per cent and upwards. Each year the number of those making application for board and quarters will doubtless materially increase.

A change has been made in the method of presentation of the annual financial statement of the department. In order that the exact situation may be seen the accounts have been made up to the end of the last fiscal year instead of the end of the calendar year which has been the previous practice. A general

## SESSIONAL PAPER No. 18

financial statement is given which is divided into sections, each of which covers a particular activity of the department. It will be seen that the amounts set forth on the income side correspond with the appropriations voted by Parliament plus moneys received from other sources. On the expenditure side the authority for each general item is given. The total expenditure for the year was \$51,541,824.82. This is divided as follows:—

Direct payments to men and dependents in cash consisting of pensions, pay and allowances, relief, etc. . . . .	\$41,570,221 93	
Payments for services to men and dependents including hospital treatment, orthopaedic appliances, transportation of patients and pensioners, funeral expenses and sheltered employment under the control of department and employers' liability compensation. . . . .	5,648,188 40	
Payments to outside organizations not under the direct control of the department such as the Last Post Fund, Canadian Red Cross for sheltered employment, Royal Commission on Pensions and Re-establishment and Federal Appeal Board. . . . .	238,425 88	
Capital expenditure. . . . .	6,120 54	
Recoverable expenditure and casual revenue. . . . .	1,593,222 90	
Total payments apart from administration. . . . .		\$49,056,179 65
Administration, including salaries, telephones, telegrams, transportation, stationery, rent, light, heat, etc., etc. . . . .		2,485,645 17
		<hr/> \$51,541,824 82

In order to assess the cost of administration against the work done by the department it is necessary to add to the foregoing figure of total expenditure the amount of \$1,574,627.43, representing the premiums collected under the Returned Soldiers' Insurance Act. A considerable staff is maintained by the department for this purpose. With this item included the cost of administration amounts to 4.679 per cent. On the other hand the Board of Pension Commissioners, which is a separate entity from the department, expended during the last fiscal year \$97,523.44, which amount should be considered in arriving at the percentage of cost of administration. If this be added the percentage is increased to 4.863, which it is submitted is an exceedingly creditable showing in view of the services which the department is called upon to render.

I have the honour to be, sir,  
Your obedient servant,

N. F. PARKINSON,  
*Deputy Minister.*

OTTAWA, January 31, 1925.

## REPORT OF THE TREATMENT BRANCH, MEDICAL DIVISION FOR THE YEAR 1924

During the year 1924, the Sir Oliver Mowat Memorial Sanatorium, at Kingston, Ont., was turned over to the Kingston Health Association, leaving nine institutions, with a bed capacity of 2,647, under the direct control of the department.

On December 31, 1924, there were on the strength of the department 3,427 treatment cases, distributed as follows:—

In Canada.....	3,105
In Great Britain.....	101
In the United States.....	221

In addition there were 123 civilian cases, making a total treatment strength of 3,550.

Of the 3,105 cases in Canada, 3,045 were in institutions, and the number of out-patients totally incapacitated was 60.

The patients were classified as follows:—

	Canada	Great Britain	United States	Total
General (medical and surgical)....	1,474	53	109	1,636
Tuberculous (sanatorium cases)...	691	14	88	793
Mental.....	940	34	24	998
Total.....	3,105	101	221	3,427

The following figures give the approximate number of admissions to hospital by the Military Hospitals Commission and the department to December 31, 1924:—

July 1, 1915, to December 31, 1916, by Military Hospitals Commission, approximately.....	22,742
January 1, 1917 to March 31, 1918.....	28,258
April 1, 1918 to December 31, 1919 by D.S.C.R.....	36,625
January 1, 1920 to December 31, 1920.....	23,591
January 1, 1921 to December 31, 1921.....	13,890
January 1, 1922 to December 31, 1922.....	10,015
January 1, 1923 to December 31, 1923.....	8,516
January 1, 1924 to December 31, 1924.....	8,234
Total.....	151,871

### CLINICAL TREATMENTS

May 1, 1919 to December 31, 1919 by D.S.C.R.....	126,057
January 1, 1920 to December 31, 1920.....	447,142
January 1, 1921 to December 31, 1921.....	300,895
January 1, 1922 to December 31, 1922.....	216,991
January 1, 1923 to December 31, 1923.....	167,291
January 1, 1924 to December 31, 1924.....	147,675
Total.....	1,406,051

The number of pension medical examinations carried out in Canada during the year was 34,013

British Isles.....	1,794
United States.....	5,722
	41,534

## FOREIGN RELATIONS SECTION

From January 1—December 31, 1924

The following is a comparative statement showing the numbers of pension examinations requested and reports received during 1924:—

	Requested	Received
(I) Ex-members of the Canadian forces—		
(a) Residing in Europe and Great Britain.....	1,509	1,703
(b) " Foreign Countries.....	87	91
(c) " the United States.....	2,351	3,109
(II) Ex-members of the Imperial forces residing in the United States.....	2,047	2,561
(III) " " Australian forces—		
(a) Residing in Canada.....	21	10
(b) " the United States.....	41	48
(IV) Ex-members of the New Zealand forces—		
(a) Residing in Canada.....	11	8
(b) " the United States.....	7	4
(V) Ex-members of the Newfoundland forces in Canada.....	47	45
(VI) " " United States forces in Canada.....	220	162
(VII) " " French forces in Canada.....	15	13
	6,356	7,755

The difference in number between the reports on ex-members of the Allied forces requested and received is explained by the fact that in many cases examinations are cancelled before the report is received and, in the case of the ex-members of the United States forces, several returned to the United States before being examined.

## TUBERCULOSIS

The work of the department during the year 1924 in so far as tuberculosis is concerned is outlined in the tables below.

During the year the Sir Oliver Mowat Sanatorium at Kingston has reverted to the control of the Kingston Health Association, leaving only one institution, the Central Alberta Sanatorium at Robertson, near Calgary, under departmental operation and control. Patients are receiving treatment in provincial and other institutions in all provinces where these exist.

Table 1 shows that admissions have decreased by 224, deaths by 15, and the average number on strength monthly by 206 during the year 1924 as compared with 1923.

Table 2 shows only 276 new cases of tuberculosis accepted for treatment during 1924, a decrease of 133 over the preceding year, while table 4 shows that one-third of those in hospital on December 31 were receiving treatment for the first time.

15 GEORGE V, A. 1925

Although table 1 shows an average of 839 patients on strength during each month in the year, table 3 shows that of this number an average of 75 were receiving treatment without full pay and allowances.

Table 5 is compiled from available data and, as in former reports, is to be considered as only approximately correct.

## REPORT OF MEDICAL STORES SECTION FOR THE YEAR 1924

The department has continued the policy of centralized purchasing and distribution of medical and surgical supplies as outlined in previous annual reports.

The following statement summarizes the operations of Medical Stores for the twelve-month period ending December 31, 1924:—

Total value of stock on hand December 31, 1923.....	\$24,502 16
Total value of goods received during period.....	73,421 08
Total value of goods issued during period.....	80,548 83
Total value of stock on hand in stores as at December 31, 1924....	17,374 41

## DIETETICS

The department has continued the same policy as regards food service in hospitals and sanatoria. The dietitians are responsible for the requisitioning, preparation and distribution of food, the management of employees and the general sanitation of the dietary department. A monthly report is submitted to head office from each departmental institution, showing an analysis of amounts, prices and the total cost of each classification of food used in the institution; also a summary of the menus provided and details of special diets. These reports are reviewed, and a comparative criticism is returned to the institution so that each may have the advantage of the average experience. In the Units where poultry raising and gardening operations have been carried on, primarily for curative purposes, the institutions have benefited considerably.

15 GEORGE V, A. 1925

The system inaugurated in connection with the Diabetic Clinic at Toronto is now also carried on in most of the hospitals. The correctly prepared, proportioned and selected diet is so intimately allied with treatment that it has necessitated the closest co-operation of the dietary and medical staffs. The preparation of food for diabetics is arranged quite separately from the general food supply and is done under the supervision of the dietitians. Materials used are weighed and left-overs from trays, if any, are weighed and checked. Patients are instructed regarding the food that is permitted and the articles of diet to be avoided. On leaving hospital, each patient is provided with a copy of all recipes used, information regarding certain food stuffs, and where these are obtainable, also a copy of the "Insulin Diabetic Diet Table," in order that treatment may be carried on at home. The need for guidance in after-care is of such vital necessity that a book has recently been written by the two dietitians who were the first to provide dietary treatment in conjunction with the use of insulin. The book is a simplified hand-book for diabetics, devoted chiefly to dietary recipes and suggestions. It is of great value in the treatment of diabetes, having been compiled as a result of the successful experimental work at the original Diabetic Clinic at Christie Street Hospital, Toronto.

### DENTAL SERVICES

The following dental clinics were closed in 1924:—

Mowat Sanatorium, Portsmouth, Ontario.

Windsor, Ontario.

Calgary, Alberta.

Victoria, British Columbia.

The employees of the Dental Division now number 31, as compared with 46 on December 31, 1923.

A resume of the services rendered during the year January 1, 1924 to December 31, 1924 follows:—

SESSIONAL PAPER No. 18

**ADMINISTRATION BRANCH**

During the year 1924 the accounting work of the department which up to April 1 had been conducted as a separate branch under the direction of a Supervisor of Expenditures, was placed under the control of the Director of Administration with a Chief Accountant in charge. No other changes of importance took place in the organization of this branch.

Every effort has been made to effect as big reductions in staff as possible with the following results:—

—	Staff	Salaries
		\$
Administration Branch, December 31, 1923.....	920	1,099,880
Reduction during the year.....	193	208,048
Administration Branch, December 31, 1924.....	727	891,832
Accounts Branch, December 31, 1923.....	305	394,832
Reduction during the year.....	51	64,676
Accounts Division, December 31, 1924.....	254	330,156

The salaries of the staff employed in the Orthopædic and Surgical Appliances Division shop are absorbed in the cost of manufacturing. As they are not a charge against the general administrative cost they are not included in the statement shown above.

—	Staff	Salaries
		\$
O. and S. A. Division, December 31, 1923.....	125	223,750
Reduction during the year.....	16	35,783
O. and S. A. Division, December 31, 1924.....	109	187,967
Total reduction Administration Branch for the year 1924.....	260	308,507

**VOCATIONAL TRAINING**

During the past year\* 180 ex-soldiers were accepted for training and on December 31, 87 were still on the strength.

**LOANS**

During the year 20 applications were approved entailing an expenditure of \$7,986.76.

The collections during the year have been very satisfactory.

\*Of this number 40 were trained in Federal Government Departments under the provisions of P. C. 2944.

## EMPLOYMENT

Further progress was made during the year towards amalgamating the Employment Service of the department with that of the Employment Service of Canada. This work has now been transferred in every Province except the province of Quebec. The employment situation as regards disabled ex-service men has not been as good during the year 1924 as it was during 1923. Reports received indicate that there will be a great deal of unemployment among this class of ex-soldiers during the coming winter.

	1921	1922	1923	1924	Totals
Disabled men.....	970	516	375	296	2,157
Ex-service men (not disabled)	1,218	920	817	703	3,658

## TRAINING AND EMPLOYMENT IN THE FEDERAL CIVIL SERVICE

During the year 40 disabled men were accepted for training under the provisions of P.C. 2944. Thirty-five of these have completed training and been provided with positions through the Civil Service Commission. Five are still in training.

## BLINDED SOLDIERS

After care of blinded ex-members of the forces has been carried on through arrangements made with the Canadian National Institute for the Blind. The Institute with its services organized in various parts of Canada operates through its representatives or establishes such other contact as may be necessary in individual cases. It is not necessary to deal at length with the forms of service being given beyond listing as follows:—

- 1st. Book loans from Library.
- 2nd. Monthly Braille magazine.

- 3rd. Provision of raw material at cost price.
- 4th. Purchase for cash of products in excess of local sales.
- 5th. Employment in industries organized by institute.
- 6th. Placement in private industries or occupations.
- 7th. Visiting, follow up and advice with more or less continual contact by correspondence.
- 8th. Provision of poultry feed at cost price for poultry farmers.
- 9th. Provision of typewriter and Braille writer supplies.
- 10th. Provision of brush-up courses through home teachers, etc., where necessary.

Club rooms are permanently maintained at Pearson Hall for the use of blinded soldiers only, also lodging accommodation for transient blinded soldiers. In September of this year a meeting of the members of the Sir Arthur Pearson Club of Blinded Soldiers and Sailors was held at Pearson Hall, followed by a social gathering and reunion. This was attended by all blinded soldiers within reasonable distance.

Blinded soldiers are, with scarcely an exception, now settled down in their own homes or with relatives or friends and are following trades or occupations for which they were trained. In a certain number of cases original occupation has been given up owing to ill health or changed circumstances while in others opportunities have led to change. Listed below will be found occupational divisions with stated number of men following each line mentioned.

During the year the death of two blinded soldiers has been reported. This brings the number of blinded soldier deaths up to ten.

TABLE SHOWING OCCUPATIONS OF BLINDED SOLDIERS

Boot repairing and matmaking	3
Broom making...	3
Book agent...	2
In business for themselves...	7
Employed with business firms	9
Employed with Canadian National Institute for the Blind	1

Retired on account of ill health or other reasons	2
Deceased....	10
	<hr/> 168 <hr/>

Of the above classified list 125 are resident in Canada, 29 in England, 1 in Belgium, 1 in France and 2 in the United States.

### SHELTERED EMPLOYMENT

Workshops are still operated by the Red Cross Society in Halifax, St. John, N.B., Montreal, Winnipeg, Vancouver and Victoria under the agreement outlined in last year's report. Little change in organization has taken place, but the Montreal shop has removed to larger and better equipped premises.

## SESSIONAL PAPER No. 18

The department is taking over the operation of the St. John workshop on January 1, 1925.

The department still continues to operate Vetract shops at Toronto, Hamilton, Kingston, and London. Owing to the necessity of vacating the Scott Barracks at Hamilton the shop and sub-unit office staff were moved to the Sanford building on February 7, 1924. After careful investigation it was found to be desirable and economical to move the Toronto shop also. A new one-story building 60 feet by 100 feet was constructed at Christie Street Hospital; it was occupied on December 1, 1924, in addition to taking over part of the O. and S. A. Factory and an unoccupied building. This centralizes all the department's activities in Toronto and affords excellent shop accommodation.

On the whole the workshops have made a very good showing, more particularly when the difficulties due to the prevailing industrial depression are taken into consideration. They are all becoming firmly established in the community and receiving good support.

The need of some provision of this nature was closely examined into by the Ralston Commission and favourably reported on. A number of the men have shown marked improvement and are fit for outside employment, but satisfactory placements are hard to secure.

Arrangements were again effected whereby the department secured the manufacture of the poppies and wreaths for Armistice Day. Orders were secured for practically the whole Dominion and in the case of British Columbia, Manitoba, Quebec, Ontario, Nova Scotia, and New Brunswick the poppies were made in the provincial workshops. In Alberta and Saskatchewan, where no workshops are operated, the work was given to disabled veterans through an arrangement with the unit offices.

The number of men on strength as at December 31, 1924, was 346, distributed as follows:—

<i>Red Cross Workshops—</i>		<i>Departmental Workshops—</i>	
Halifax.....	20	Toronto.....	99
St. John, N.B.....	22	Hamilton.....	35
Montreal.....	32	London.....	18
Winnipeg.....	40	Kingston.....	11
Vancouver.....	37		
Victoria.....	32		

Since provision was first made for the care of this class 1,053 men have been struck off the strength of the shops, of whom approximately 50 per cent have gone to regular employment, or owing to increase of pension, etc., have taken their discharge from the shops.

The average cost per man per month based on returns for the past year for all shops is \$30.78.

## RETURNED SOLDIERS' INSURANCE DIVISION

The latest date to which applications for insurance under the Returned Soldiers' Insurance Act could be received was September 1, 1923. The work of issuing policies has, therefore, now ceased. The principal work of the division is now concerned in the receiving of premiums and the paying of claims. There is a considerable volume of work, however, entailed in these activities, as an average of twenty thousand remittances are received each month, and during the calendar year just closed 267 claims were received for a policy value of \$687,500.

The settlement of death claims entails the most careful supervision, as many legal points are constantly arising. Many policies have now earned the

15 GEORGE V, A. 1925

right to cash values or extended term insurance, and by September, 1925, all policies will have earned these privileges.

To date 211 have surrendered their policies for cash.

The income received from premiums has been more than sufficient to meet all claims, and it is anticipated that this condition will continue for some years to come.

## STATEMENT FOR PERIOD JANUARY 1, TO DECEMBER 31, 1924

---------------------------------------	-----------------

Interest from April 1, to December 31, 1924, not included.

## ORTHOPÆDIC AND SURGICAL APPLIANCES DIVISION

The work of the division during the past year has closely followed that of previous years and the twelve Orthopædic Depots are still operating.

The return of appliances issued corresponds with that of last year in that there is again a general slight decrease on the whole. The rawhide dress arm which was introduced in 1922 still finds great favour on account of its lightness and this development of the department is an important one.

## SESSIONAL PAPER No. 18

There is no radical change to report from the designs and standards of last year, although the average weight of artificial legs shows a decrease which is greatly appreciated by the wearers. There has naturally been certain agitation regarding the introduction of metal limbs and the department ordered two from each of the leading manufacturers in England. These are all of the wood metal type and they are at present being tried out in actual use. Observations made so far do not show any pronounced superiority of the wood metal limb over the very satisfactory willow appliance which is now being manufactured. The department has also successfully produced a Duralumin metal shin which is meeting with success, and the experimental shop has produced a combination Duralumin control of standard type to replace three of those already in use.

The Ophthalmic Section is kept very busy, and many extremely difficult cases, after extensive trials, have been fitted with satisfactory eyes.

One marked feature of the year's work has been in the manufacture of orthopædic boots. By improved methods of manufacture and the co-operation of the depots a reduction in cost of \$2.78 per pair has been effected.

The average costs of the different classes of appliances manufactured during the past four years is as follows:—

	1921	1922	1923	1924
	\$	\$	\$	\$
Artificial legs.....	81 73	76 34	78 28	70 99
Artificial arms.....	97 53	56 27	54 37	76 96
Peg legs.....	27 55	35 15	32 48	33 87
Orthopædic boots.....	20 48	20 80	20 59	17 81
Minor orthopædic appliances.....	13 39	8 83	7 83	8 24
Spectacles.....			5 05	4 78
Artificial eyes.....			4 59	1 56

A comparison with last year's figures shows a general decrease, except in the case of arms and minor orthopædic appliances. In the former the increase is due to the rawhide arm and the latter to the fact that abdominal belts and appliances of this nature are practically all made in the depots now, instead of being purchased.

The increase in the average cost of the arms is due to the additional cost in making the rawhide arm. The additional comfort given to the wearer is well worth the additional cost.

15 GEORGE V, A. 1925

## PAY AND PENSIONS DIVISION

The functions of this division have not changed materially during the past year. The most important alteration was the transfer of the Pensions Administration Section (whose function was to give effect to the decisions of the Board of Pension Commissioners) to the Accounts Division when that division came under the jurisdiction of the Director of Administration. This transfer naturally decreased the staff and the monthly pay-roll. On December 31, 1923, the number of staff was 41 and the total monthly pay-roll \$3,675. On December 31, 1924, the number of staff was 14 and the total monthly pay-roll \$1,550.

## CHAPLAIN SERVICES

Religious work in the hospitals and visitation of the sick, whether in hospital or in their homes, has been maintained by the chaplain services. At present one full-time and fifteen part-time chaplains take care of this work. This is a reduction of three part-time chaplains over the preceding year. The total cost for chaplain services at present is \$9,470 per year. The Canadian Red Cross, the Y.M.C.A., and kindred organizations have carried on their work in providing recreation and entertainment for the patients in the hospitals during the past year.

## ASSISTANCE FOR RETURN OF EX-MEMBERS OF THE FORCES TO BRITISH ISLES

The Parliamentary Committee on Pensions and Soldiers' Re-establishment recommended that in special cases assistance should be granted to men who were patients of the department to enable them to return to their own people overseas. During the past year authority was granted in the following case:—

P.C. 281-1940, dated October the 31st, 1924, authorized transportation to Lt. Thomas Stephens, his wife and child, from Montreal to England. This was given effect to and carried out in December, 1924.

## SESSIONAL PAPER No. 18

## INVESTIGATION SECTION

During the year 1924 investigations have been carried out by the Investigation Section as follows:—

Social Service Reports regarding orphan children to the number of 600.

Investigations concerning widows and children and dependent parents approximately 5,000.

Investigations concerning the dependants of disability pensioners approximately 200.

Other investigations to the number of 50 have been carried out at the request of the Australian Government.

As a result of the investigations carried out the Board of Pension Commissioners have been enabled to decide whether pension shall be awarded, continued, cancelled, increased or decreased. The nature of other investigations was to ascertain whether pension is properly applied for the care of such children as are in receipt of pension. New claims received have also required investigation. Inquiry was necessary in many cases to ascertain whether widows had remarried or not. Inquiry was also carried out as to whether guardians were expending pension moneys wisely for the care of children entrusted to them or not. Investigations were conducted concerning the condition of pensioners claiming additional pension for alleged dependents. Complaints made concerning disability pensioners who are not supporting their dependents are also inquired into.

Inquiry is also made into claims made by dependents in cases where it is shown that the death of an ex-member of the Forces, or pensioner, is attributable to service and that the dependents are eligible for pension or insurance.

The above procedure, in so far as disability pensioners and dependent parents, widows and children and orphan children are concerned, is also carried out in Great Britain and Western Europe.

## PAYMENTS OF WAR SERVICE GRATUITY

The total number of War Service Gratuity payments between January 1, 1924, and November 30, 1924, was 110, amounting to—principal, \$13,151.49, and interest, \$2,231.40.

In sixteen cases lump sum payments were made to the amount of \$3,501.65 and interest \$647.84.

Payments to the Director of Records were made in nine cases, the principal amounting to \$3,159.97, and interest \$587.86.

The number of ordinary payments completed was twenty-four, amounting to—principal, \$2,332.23, and interest, \$995.70.

The number of monthly payments was thirty-six, amounting to—principal, \$2,575 and the number of payments made to the Receiver General was twenty-five, amounting to \$1,582.64.

## FOREIGN RELATIONS SECTION

Pursuant to the reciprocal arrangements entered into between the Department of Soldiers' Civil Re-establishment and the respective Governments of the United States of America, South Africa, France and Belgium, the Foreign Relations Section of this division has continued to furnish such benefits as were due ex-members of the Allied forces resident in Canada (excluding ex-Imperials), ex-members of the Canadian forces resident outside Canada (exclusive of Great Britain and the Irish Free State) and ex-members of the Imperial forces resident in the United States of America.

As might be expected by far the greater part of such benefits have been distributed to Canadian and British ex-service men in the United States of

15 GEORGE V, A. 1925

America, who (with the exception of ex-British officers) are eligible to the same benefits as if they were residing in Canada.

Examinations, hospitalization and treatment are arranged and provided by the United States Veterans' Bureau, which bureau is reimbursed by the department for its expenditure. Such allowances however as are due the pensioners and patients are paid direct to them by this division. The following is a statement of the disbursements during the year, January 1 to December 31, 1924:—

(a) Treatment pay and allowances issued .....	\$ 181,924 79
(b) Clothing for the insane .....	192 50
(c) Funeral grants.....	2,785 38
(d) Travelling allowances to patients—	
(1) ex-Canadians.....	383 30
(2) ex-Imperials.....	287 79
(e) Travelling Allowances to pensioners—	
(1) ex-Canadians.....	1,011 54
(2) ex-Imperials.....	564 31
(f) Refunded to United States Veterans' Bureau for patients and pensioners (travelling allowances).....	23,764 26
Total.....	\$ 210,913 87

### IMPERIAL PENSIONS DIVISION

During the present year a net increase of 586 pensioners is shown in the following table:—

	Number as at 31, 12, 23	Number taken on during year	Number struck off during year	Number as at 31, 12, 24
1. Officers and dependents of officers and Royal Irish Constabulary.....	2,604	1,901	1,400	3,105
2. Disability pensioners at British rates residing in Canada and the United States.....	6,911	1,437	1,676	*6,672
3. Disability pensioners at Canadian rates residing in Canada and the United States.....	1,316	77	102	1,291
4. Widows and dependents at British rates residing in Canada and the United States.....	4,457	796	553	4,700
5. Widows and dependents at Canadian rates residing in Canada and the United States.....	350	14	19	345
6. Service pensioners and army reserve residing in Canada and the United States.....	1,324	305	131	1,498
7. Naval Service and pre-war disability pensioners residing in Canada and the United States.....	1,226 214	282 25	358 12	1,150 227
8. All others.....				
Totals.....	18,402	4,837	4,251	18,988

\*Of this number 2,824 reside in the United States.

In the "Awards Section" the work has remained practically stationary except that the number of pension medical examinations has been reduced from 8,197 to 6,481; this being explained by the system of Final Awards mentioned in the report for the year 1923.

### AWARDS MADE

Canadian new awards.....	48
Canadian renewal awards.....	1,177
Canadian final payments.....	13
Amended awards.....	241
Imperial renewal awards.....	3,629
Imperial interim awards.....	511
"No payment" awards (Art. 9 pre-war disability etc.).....	559
Officers' interim awards.....	8
Comparative rates for election.....	43
	6,529
Final awards recommended.....	502

## SESSIONAL PAPER No. 18

## ENTITLEMENT APPEALS

Appeals prepared for Entitlement Appeals Tribunal—London, England.. 360

## ASSESSMENT APPEALS AGAINST FINAL AWARDS UNDER SECTION 4 OF THE WAR PENSIONS ACT, 1921

	Canada	United States
Appeals listed.....	849	447
Appeals prepared and forwarded to Federal Appeal Board, Ottawa.....	401	30
Balance to be prepared.....	448	417

At the present time the department has on strength for medical treatment 241 ex-members of the Imperial forces, of which number 75 are in the United States and 166 in Canada. During the year just closed 790 ex-members of the Imperial forces have received treatment at the hands of the department, of which number 332 were in the United States and the remaining 458 in Canada.

It is estimated that during the year 52,000 letters were despatched from the division to pensioners and to official offices.

A summary of the disbursements made by this division follows:—

## GENERAL STATEMENT OF DISBURSEMENTS MADE BY THE IMPERIAL PENSION DIVISION FROM JANUARY 1, 1924, TO DECEMBER 31, 1924

	London Account	Ottawa Account
	£ s. d.	\$ cts.
Payments of retired pay, pension, etc. to officers and dependents of officers chargeable to the War Office, Air Ministry, Ministry of Pensions, Admiralty, Indian Office, Colonial Office, Royal Irish Constabulary, including miscellaneous payments of balances of service pay, etc. authorized by War Office accounts.....	261,357 15 4	
Treatment allowances at Imperial rates to officers.....	2,042 10 9	
Payments of pension to W.O.'s, men and dependents chargeable to War Office, Ministry of Pensions and Admiralty accounts.....	438,929 19 2	704,484 91
Payment of Chelsea pensions—chargeable to War Office.....	57,633 9 5	
Payment of Naval pensions—chargeable to Admiralty.....	25,145 9 6	
Payment of marriage allowance—chargeable to War Office.....	483 7 7	
Payment of Reserve Pay—chargeable to War Office.....	148 14 1	
Payment of Decoration Awards in respect to members of C.E.F.—chargeable to War Office.....	4,381 1 0	
Payments to Department in respect of treatment and maintenance, pay and allowances, subsistence and sundries, medical examinations, clothing and comforts, and transportation—chargeable to Ministry of Pensions..		626,501 31
Miscellaneous charges to War Office, Ministry of Pensions and Admiralty.....		6,648 84
Sub accounts including express charges and postage.....		89 80
Commission paid during 1924.....	27,225 4 6	28,157 59
Canadian Supplementary Pensions, officers and dependents—chargeable to Canadian Government.....		60,260 53
Canadian Supplementary Pensions, W.O.'s, N.C.O.'s and men—chargeable to Canadian Government.....		16,682 31
Payment of difference between proceeds in currency of sterling pension and par rates of exchange to pensioners in receipt of Canadian Supplementary Pensions—chargeable to Canadian Government.....		10,687 94
Total.....	817,347 11 4	1,453,513 23

## ENGINEERING DIVISION

The Engineering Division is responsible for the maintenance and repairs to hospitals, clinics and administration offices. Also for rentals, taxes and water rates, fuel supply, fire protection, mechanical transport, laundries and farm and garden operations.

## MAINTENANCE AND REPAIRS

The Department of Public Works upon request carry out major repairs, the general maintenance being taken care of by the employing of general service staff under the department.

Department of Public Works' appropriation, twelve months to December 31, 1924.....	\$ 31,250 00
Expenditure—Appropriation used up by October, 1, 1924.....	
Dept. S.C.R. appropriation, twelve months to December 31, 1924..	45,165 00
Expenditure.....	45,161 00

## RENTALS

Premises rented through the Department of Public Works comprise practically all accommodation used by this department.

Rentals in force January 1, 1924.....	\$ 113,322 84
“ “ December 31, 1924, P.W.D.....	\$ 47,646 60
“ “ “ S.C.R.....	\$ 1,378 60
	\$ 49,024 60
(Made up of hospital accommodation.....)	\$ 10,544 31
Clinics, offices, etc.).....	38 480 29

## FUEL SUPPLY

Quantity of fuel purchased 12 months to Dec. 31, 1924.....	tons 28,137
Bonuses paid.....	\$ 536 20
Penalties imposed.....	4,870 21
Net cost of fuel in bunkers.....	157,906 30
Average cost per ton in bunkers.....	5 62
“ “ 1923.....	6 84

## FIRE PROTECTION

Six fires in hospitals were reported during the year but the property loss was practically nil.

Fire protection appliances have been kept up to standard and carefully inspected and fire drills carried out periodically at each hospital.

## MECHANICAL TRANSPORT

Number of cars in operation January 1, 1924.....	23
Number of cars in operation December 31, 1924.....	11
Cost of maintenance including drivers' wages.....	\$ 20,968 71

## LAUNDRY OPERATIONS

During the past year the laundry at Christie Street Hospital was closed as it was found that laundry could be done by contract more cheaply.

Laundries are still being operated at the Psychopathic Hospitals of Ste. Anne's and Westminster.

Number of pieces laundered for twelve months ending December 31, 1924.....	1,098,460
Number of pieces last year.....	1,358,212
Average cost per piece this year.....	02-645c.
“ “ last year.....	02-824c.
Number of pieces contracted for with outside laundries this year....	656,397
Number of pieces last year.....	702,439
Average cost per piece this year.....	04c.
“ “ last year.....	0447

## SESSIONAL PAPER No. 18

## FARM AND GARDEN OPERATIONS

Farm and garden operations and beautification schemes show good progress at the Psychopathic Hospitals of Ste. Anne's and Westminster, and with the advantage of greenhouses recently constructed at these centres, a further advance in the above operations may be expected.

No outside labour has been employed as the patients are able, with the supervision of the hospital staff, to take care of all operations.

## RECORDS AND CENTRAL REGISTRY DIVISION

## RECORDS

1. Generally the work of maintaining records and statistics has been continued with but few changes. The checking of pension and treatment pay and allowances as shown in Daily Orders against the Head Office file was discontinued when the unit auditors were made responsible for auditing all authorizations of treatment pay and allowances.

2. During the year a new Hollerith card for pensions statistics was adopted and the pension records were repunched on it. This has simplified the method of maintaining these statistics.

3. Life Certificates which were sent out to all permanent disability and dependent pensioners have proven to be useful not only in picking up changes in the status of the pension but also in securing additional allowances for pensioners who had failed to claim for them.

4. The Transportation Section was transferred to the Accounting Group with effect October 16, 1924.

5. There has been a reduction of over thirty-three (33) in the staff of the division.

## CENTRAL REGISTRY

The total turn-over of files and correspondence during the year reflects in a general way the work of the department. This, it will be seen from the following figures, indicates a slight reduction in the volume of work. The reduction of files was partly due to the simplification of the work of pensions authorization.

	1924	Weekly Average	
		1923	1924
<i>Files—</i>			
Total number issued .....	493,480		
Total number re-charged .....	225,862		
	719,342	17,806	14,680
<i>Correspondence—</i>			
Incoming.....	642,046		
Outgoing.....	1,035,997		
	1,678,043	37,458	34,245

## PURCHASING AND STORES DIVISION

This division makes purchase of all supplies required by the department and provides service by carrying in stock certain standard supplies for which there is frequent demand. Competitive prices are obtained on all purchases made and only such supplies are purchased as are not readily available by transfer from another Government department. No issues are made from Stores except on requisitions signed by a duly authorized party.

15 GEORGE V, A. 1925

Discounts are, wherever possible, taken advantage of with the result that during the year a saving has been effected of over \$10,289.97. The total purchases for the year, which include equipment, stores, drugs, fuel and food supplies amount to \$827,504.54.

## DISPOSAL

The amount of surplus stores placed on disposal since January 1, 1924, and the total amount to date is as undernoted:—

	Amounts		Total amount listed
	\$	cts.	\$ cts.

## SESSIONAL PAPER No. 18

All equipment on charge to the department was checked up during the year. An inventory was taken of all stock in stores. This includes commissary stores, general supply stores and stores in disposal.

## STORES

*Commissary Supplies.*—The only stock carried has been such as has been necessary to supply the services required for the hospitals. Advantage has been taken, wherever possible, to make contracts for supplies to be delivered as required from the vendor. In order to obtain the best prices, also to keep the quality of the goods supplied on contract to a high standard, it has been necessary in most cases to have these contracts cover a comparatively short period of time.

## SUMMARY OF STORES AND EQUIPMENT

The amount of equipment on hand on December 31, 1924:—		
Equipment .....		\$ 1,493,907 03
The amount of stores on hand as on December 31, 1924—		
General and medical .....	\$ 330,351 53	
Surplus .....	30,298 20	
		360,649 73
Value of stores and equipment on hand .....		\$ 1,854,556 76
Value of Surplus Stores January 1 to December 31, 1924 .....		125,876 20
Surplus stores transferred within department, January 1 to December 31, 1924 .....		81,439 51
Value of supplies and equipment issued twelve months ending December 31, 1924 .....		1,452,522 12
Total value of stores and equipment issued 1924 .....		\$ 1,669,837 83

## EQUIPMENT SECTION

A certain amount of equipment became surplus to requirements, was listed for sale and passed to the salvage officer of the Government Contracts Supervision Committee for disposal.

Very little equipment was purchased during the year, generally speaking, only such as was required for replacing worn out equipment and furnishings in the different hospitals.

## STATIONERY AND MULTIGRAPH SECTION

Supplies were procured on requisition on the Government Stationery Office with the exception of certain inter-departmental forms which were multigraphed by the department.

## REPORT ON THE WORK OF THE REHABILITATION COMMITTEE OF TORONTO

BY THE DIRECTOR OF THE COMMITTEE

## POLICIES

The policies which this committee adopted and are rigidly adhering to may be stated as follows:—

1. They set aside all political, religious and personal ambitions, and must concentrate their efforts on the sole object of securing suitable and permanent employment for partly disabled ex-service men.

2. They feel assured that in every place of employment there are jobs which do not make demands upon all the physical faculties of a man, and that by careful study of these jobs partly disabled ex-service men can be selected

with remaining physical resources sufficient to enable them to do the work as efficiently as any able-bodied man.

3. They study the man in a private and personal interview, endeavouring to find the kind of work for which the man is best fitted in temperament, social tendencies, etc. This is no superficial interview but rather a friendly discussion of the man's problems from every angle with a view to best serving him.

4. They study the job from the standpoint of physical and mental demands together with any technical knowledge or experience that may be required.

5. They submit the job specifications to their industrial doctors, who examine every man before placement so that they may be assured of the exact nature of his disability and have the benefit of professional judgment upon his physical fitness for the job to which they are assigning him.

6. They keep in touch with the man when placed in employment to learn whether or not he is capable of doing the work to the satisfaction of his employer and to guard him against any misunderstanding on the part of his fellow-employees or his foreman.

7. In cases where the man proves incompetent or inefficient they assume the responsibility for taking him off the job; this relieves the employer of any unpleasantness which may be connected with the discharging of a partly disabled ex-service man.

8. They keep the job and finally fit a man to the work who will produce on a par with any able-bodied man on that particular job. This means they place the man on the basis of service and not sympathy. The bonus feature covers only the breaking-in period when a man starts on a production job, and must not be considered as a form of vocational training. Where piece-work is in practice they make up the difference between what he actually earns on piece-work *plus his pension—if any*—and 32½ cents per hour for a limited period. Where he is on day work he may not be able to produce enough to justify the payment of the usual base rate on the job; in this case they ask the employer to pay him what he thinks he will be worth for a short time and they make up the difference between that *plus his pension—if any*—and 32½ cents per hour. When they place a man they have a definite understanding with the employer as to the time required to break him in to the job. The rate of 32½ cents per hour is only a temporary subsisting wage, and both the man and the employer are usually as anxious as the Committee for the man to become proficient and earn the full base rate.

In other words, the committee practically adopts the partly disabled ex-service man and directs him as a business man would his son.

#### RESULTS

Despite the discouraging experiences which some employers have had with a percentage of returned men, the committee has succeeded in impressing over 500 employers with the necessity of giving partly disabled men an opportunity to work and of further assisting them to "make good." Employers have assured the committee that they will give partly disabled ex-service men preference in placement, and will entertain suggestions in selecting jobs which are suitable to the various disabilities.

The first month was spent in organizing, selecting and training a competent staff, registering men and installing a flexible office record system which would facilitate an accurate and reliable classification of men according to disabilities, pension, age, etc. This registration is not merely a superficial interview but rather a friendly discussion with the man in relation to his disabilities, past experience, economic needs and social tendencies. The committee considers "Registration" one of the most essential features of the scheme. Total registrations to December 31 were 1,082 men.

## SESSIONAL PAPER No. 18

The gross expenditures to December 31, 1924, were \$20,737.34, which includes the cost of organization, administration and bonus. During this period the committee has placed 162 men at a gross cost per placement of \$122.38. Only five men, or approximately three per cent of the total placements can be classed as "failures," which indicates that partly disabled ex-service men can "make good" in employment if properly selected and systematically followed up, after placement.

The total bonus paid amounts to \$310.70, or \$23.90 per man receiving bonus, or \$1.91 per man placed. It is remarkable that only 13 men required a special breaking-in allowance—or bonus—to fit them to the job. The gross cost per placement has been reduced from \$173.25 in August to \$122.38 in December, and as business conditions improve this cost will undoubtedly be reduced.

These men have 414 dependents; therefore, the work of the Committee has actually contributed to the welfare of approximately 575 individuals. These men have been unemployed for an aggregate of 1,355 months during the past two years, or an average of 8.3 months per man.

During the past two years these men have drawn \$13,540 cash relief, and have contracted debts (which are outstanding) of \$13,609.96, which makes a total liability to the Government or Community of \$27,149.96.

The average present earnings of the men placed are at the rate \$998.57 per year; therefore, from permanently placing these men at an expenditure of \$20,737 (expenditures of the Committee) will change the economic condition of these men from a liability of \$27,149.96 to an asset of \$161,767.

The General Committee, after making a careful analysis of the Director's report on operations, which was submitted at the semi-annual meeting, feels assured that the results attained thus far are sufficient to confirm the view expressed in the last paragraph of the Scheme submitted to the Federal Government which read: "The placement of men by this selective method may be comparatively slow, but we believe positive. It offers a high percentage of permanency in employment, which is the prime object of this Scheme, and we believe will eventually reduce the cost of relief, improve the unemployment situation, and greatly improve the morale of the ex-service men in general."

## ACCOUNTS DIVISION

In connection with the report of the activities of this division it may be of interest to mention that 192,916 cheques were issued on Re-establishment account; 764,424 cheques were issued on Pensions account; in addition, 18,612 items of refunds were received from all sources; approximately 36,000 warrants for passenger transportation and 3,200 warrants covering freight and express shipments were issued during the same period.

In addition to the usual books of account required to record the financial transactions of the department, a system of Cost accounts is maintained to control the operations of the O. and S. A. workshops in Toronto and each of the units, and the Veteraft workshops in Toronto and Hamilton.

At Head Office Cost Control accounts are maintained for each institution operated by the department.

All subsidiary ledgers and books of original entry at Head Office and the units are in balance and agree with the relative Control accounts in the main books at Head Office.

It will be observed that the form in which the financial operations of the department are presented has been materially altered this year. It is felt that the new arrangement will display in a more concise and readable manner the results of the year's transactions.

These statements, with a short explanation as to the features contained in each, are as follows:—

1. *Income and Expenditure, Fiscal Year 1923-24.*—On the left side is shown the appropriations granted by Parliament; revenue received from all sources, together with the balances of trust funds as at the first of the year. On the right side is shown the gross disbursements made, divided into direct payments to men and their dependents, both on account of pensions and re-establishment, payments for services rendered such men, and payments made to outside organizations which render service to returned men, unexpended portions of the appropriations voted by Parliament for the fiscal year and the balances of trust funds at the close of the year.

The various authorities under which expenditures were made are quoted following the items to which they apply. Where no authority is given the Department of Soldiers' Civil Re-establishment Act applies. The various items of income and expenditure are in agreement with the amounts shown in the Public Accounts and Auditor General's reports. The summary statement covers the main divisions of the department's income and expenditure condensed for reference purposes.

2. Net Disbursement on Pensions Account for the period April 1, 1916, to March 31, 1924, by fiscal years.

3. Net Disbursements of the Department of Soldiers Civil Re-establishment on Re-establishment Account for the period July, 1915, to March 31, 1924, by fiscal years.

4. Current Assets of the department as at March 31, 1924.

Cash advances made for travelling, petty cash, maintenance accounts outside institutions, Red Cross workshops, etc.

Stores—value food, equipment, etc., held by department for use in hospitals, offices, etc.

Disposal Stores—surplus goods available for cash sale or transfer to other Government departments.

5. *Vocational Loans as at March 31, 1924.*—Outstanding Loans distributed by Provinces.

6. *Accounts Receivable at March 31, 1924.*—Amounts due from Great Britain, British Dominions, United States and Allied Governments for treatment of their ex-nationals, and services rendered Canadian Government departments—Department of National Defence, Department of Indian Affairs, etc.

Red Cross Memorial Workshops.—Payments made by department on account of shops in St. John and Halifax. Amounts due from outside hospitals and sanatoria.

Value departmental equipment on loan to civilian institutions in which departmental patients are treated.

7. *Government Department Transfers, P.C. 3017, 1920.*—Value of equipment, stores, etc., transferred to other Government departments during the fiscal year, and from date of passing of above mentioned Order in Council.

8. *Transportation Issued—Fiscal Year 1923-24.*—Cost of transportation warrants issued by department covering all passenger travelling and freight and express shipments; distribution by railways.

9. *Appropriations by Fiscal Years to March 31, 1924.*—Appropriations granted by Parliament for account of pensions and re-establishment.

## APPENDIX I

**Order in Council P.C. 212, dated the 8th February, 1924. Rules and regulations regarding the Federal Appeal Board.**

His Excellency the Governor General in Council on the recommendation of the Minister of Soldiers' Civil Re-establishment, and pursuant to sections 11 and 13 of chapter 62, 13-14 George V, being an Act to amend the Pension Act, and pursuant to section 2 of chapter 69, 13-14 George V, being an Act to amend the Department of Soldiers' Civil Re-establishment Act, is pleased to make the following rules and regulations and the same are hereby made and established accordingly:—

1. The Federal Appeal Board may hear appeals from decisions of the Board of Pension Commissioners concerning pensions and appeals from decisions of the Department of Soldiers' Civil Re-establishment as to the rights of former members of the forces to treatment with pay and allowances and such appeals may be heard by a member or members of the Board at the following places from time to time as occasion may demand: Ottawa, Halifax, St. John, Charlottetown, Quebec, Montreal, Kingston, Toronto, Hamilton, London, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria, provided that if at any time there are, in the opinion of the board, a sufficient number of appellants at any place and it is considered that it would be more convenient to hear appeals at such other place, the Board or any member thereof may sit at such place;

2. The Federal Appeal Board, if requested by the proper authority of His Majesty's Government, may hear appeals of former members of the Imperial forces against decisions of the Ministry of Pensions, subject to proper provision for repayment of expenses involved;

3. The following appeal procedure in respect of eligibility for pension, or treatment with pay and allowances shall be operative:—

(a) Notice of appeal shall be sent by the appellant or on his behalf, by letter addressed to the Secretary, the Federal Appeal Board, Ottawa. The notice should state whether the appeal is taken against a decision of the Board of Pension Commissioners or the Department of Soldiers' Civil Re-establishment, and it should give the address to which communications regarding the appeal may be directed;

(b) Upon receipt of notice of appeal otherwise than through the Official Soldiers' Adviser or other representative of the appellant, the Federal Appeal Board shall refer the case to the Official Soldiers' Adviser or other representative, who after examining the Unit Office file in the presence of a representative of the Department of Soldiers' Civil Re-establishment, as provided for in paragraph (d), (e) and (f) hereunder, shall advise the appellant whether in his judgment it is advisable for him to proceed with his appeal. Should he recommend that the appeal be not proceeded with, the appellant shall have the right to withdraw it or not, as he deems best;

(c) When an appeal is to be proceeded with, the Federal Appeal Board shall forward to the unit office of the Department of Soldiers' Civil Re-establishment a list of all relative papers on the head office file. If it is found that there are any relative papers not on the unit file, a copy of the same shall be made and shall be forwarded to the Unit Director of Administration or, for any sittings of a quorum of the board, the head office file may be forwarded to the unit office.

## SESSIONAL PAPER No. 18

(d) In cases where the Official Soldiers' Adviser is acting for the appellant the Official Soldiers' Adviser shall have reasonable access to the file relating to the appellant's claim in the presence of a representative of the Department of Soldiers' Civil Re-establishment, provided (i) that a written request is received from the appellant that the case to be taken up by the Official Soldiers' Adviser or in the case of his applying in person to the Official Soldiers' Adviser that written authorization is furnished by him that the Official Soldiers' Adviser be granted access to the file, or (ii) that the case has been referred to the Official Soldiers' Adviser by the Federal Appeal Board.

(e) Should appellant desire that his case be handled by counsel or representative other than the Official Soldiers' Adviser, authority for such counsel or representative to see the file in the presence of a representative of the Department of Soldiers' Civil Re-establishment may, in the discretion of the department, be granted by the deputy minister. The conditions respecting the production of files to the Official Soldiers' Advisers shall also apply to any other representative;

(f) Access to the file of any former member of the forces shall only be granted to an Official Soldiers' Adviser or other representative of an appellant on his undertaking to respect the confidential nature of any information contained therein or otherwise communicated to him in the course of his duty, that he will disclose such information to the appellant only insofar as is necessary to enable such additional evidence or proof to be produced in substantiation of the appellant's claim and will not disclose to the appellant or to anyone else except the Department of Soldiers' Civil Re-establishment, the Federal Appeal Board or the Board of Pension Commissioners, the name of the informant or the source of such information as may be contained on the said file.

(g) Should it be found by the appellant, the Official Soldiers' Adviser, or other representative of the appellant, that there is evidence in support of the claim which had not been considered by the Board of Pension Commissioners or the Department of Soldiers' Civil Re-establishment, the Federal Appeal Board shall be notified and the appeal shall not be disposed of until the new evidence has been submitted to the Board of Pension Commissioners or the Department of Soldiers' Civil Re-establishment, as the case may be, and a further decision given;

(h) The Federal Appeal Board shall give the appellant and the Official Soldiers' Adviser not less than seven days' notice—by letter or telegram sent to the address given on the notice of appeal—of the date and place at which his appeal will be heard.

(i) Should an appellant fail to proceed with his appeal at the time at which it is set down for hearing, the Commissioner presiding at the hearing may in his discretion dismiss the case, in which event there shall be no further right of appeal, or allow it to stand over until another occasion on which appeals are heard in the district in which he resides;

(j) The provisions of section 11 of chapter 62, 13-14 George V, relating to procedure and practice shall apply, *mutatis mutandis*, to appeals made under section 2 of chapter 69, 13-14 George V;

(k) The out-of-pocket expenses of an appellant whose appeal is maintained whether by a member of the Board or a quorum thereof shall be paid on the scale provided for in clause 20 of Order in Council P.C. 580, dated the 10th day of March, 1922, as amended;

(l) In appeals from decisions as to the right of former members of the forces to treatment with pay and allowances, when a decision in favour of the appellant is given the costs or allowances antecedent to the appeal—including the cost of medical treatment and hospitalization and the issue of pay and allowances—shall only be paid in accordance with the regulations of the Department of Soldiers' Civil Re-establishment;

(m) In all cases, the appellant and the Board of Pension Commissioners or the Department of Soldiers' Civil Re-establishment, as the case may be, may by consent in writing, with the approval of the board, or the presiding member thereof, dispense with the form of proceedings herein mentioned, or some portion thereof;

(n) After hearing the case, the Board or presiding member thereof may allow the appeal or disallow the same or reserve its decision as may be warranted by the evidence and may seem to it or him just;

(o) The formal judgment of a quorum of the Board shall be signed by the Chairman, or presiding Commissioner, and the Secretary.

(p) In case the appeal is allowed, the formal judgment shall contain such information regarding the nature and time of origin of the disability in respect of which appeal is made as to enable the Board of Pension Commissioners or the D.S.C.R. to intelligently assess the pension or extend treatment.

(q) In case the appeal is disallowed, the formal judgment shall contain such information regarding the nature of the disability as will enable the Board of Pension Commissioners to determine whether a further claim for pension on new grounds, may be entertained.

(Sgd.) E. J. LEMAIRE,

*Clerk of the Privy Council.*

## APPENDIX II

### **Order in Council P.C. 1653, dated the 18th September, 1924. Authority under which the Department of Soldiers' Civil Re-establishment may provide quarters and maintenance for indigent pensioners.**

The Committee of the Privy Council have had before them a report, dated September 16, 1924, from the Minister of Soldiers' Civil Re-establishment, submitting that from time to time the Department of Soldiers' Civil Re-establishment is called upon to deal with former members of the forces who have been awarded pension for less than their total disability, as only a part thereof is attributable to service, but who, due to the effect of the non-pensionable portion of their disability, are in need of treatment or merely quarters and maintenance. The disability from which they suffer does not require active hospitalization and is incurable in nature. As time goes on such pensioners will become more numerous, due largely to increasing age.

The matter was considered by the Parliamentary Committee on Pensions, Soldiers' Insurance and Re-establishment, which met in 1922. The following extract is taken from the report of that Committee:—

“Under legislation as now existing, the Department has no general authority to provide treatment except with full pay and allowances. That being the case, it would seem clear that it cannot provide continuous care for the cases under discussion to which, under other circumstances, if legislation was provided, care might be given. It is felt that the Government would be meeting its obligations were such cases to be provided with whatever care or treatment each requires, and rather than pay each one full pay and allowances, to grant medical treatment subject to a continuation of the pension as granted by the Board of Pension Commissioners less a fair deduction for maintenance cost in the case of those pensioners whose pensions are sufficiently high to enable deduction to be made without personal hardship to the man and his dependents.”

## SESSIONAL PAPER No. 18

The class of pensioners who would appear to have a first claim on the department are those with a pensionable disability of 20 per cent and upwards. It is, therefore, considered that the case would be fully met were provision made for the care and maintenance of such pensioners.

At the present time the Department is operating hospitals at Halifax, St. John, Ste. Anne de Bellevue, Toronto, Winnipeg, Calgary and Vancouver, where there are available beds, some of which might be set aside for those men for the purposes of quarters and maintenances and, if necessary, treatment.

The minister, therefore, recommends that the Department of Soldiers' Civil Re-establishment be authorized to put into effect the following regulations:—

1. The term "pensioner" as used herein means a former member of the Canadian forces or a former member of the Imperial or Allied forces who was a pre-war resident of Canada who is in receipt of or is entitled to a pension of not less than 20 per cent, or other allowances of equal value, payable by or through the Board of Pension Commissioners or the Department of Soldiers' Civil Re-establishment in respect of a disability resulting from injury or disease or an aggravation thereof attributable to or incurred or aggravated during service in the Great War and who does not require therefor active hospitalization.

2. The department may, at its discretion, provide quarters and maintenance, and when necessary medical treatment in a departmental institution for any indigent pensioner whose pensionable disability though not requiring active hospitalization or whose non-service disability added to his pensionable disability prevents him permanently from obtaining or continuing remunerative work and thereby earning sufficient to maintain himself and who as a result of these conditions has or will become a public charge.

3. On the admission of a pensioner to a departmental institution, partial cost of his maintenance up to forty dollars (\$40) per month may, at the discretion of the Board of Pension Commissioners and the Department be paid to the department from pension or any other moneys to which the said pensioner may be entitled provided that such payment to the department shall not be made from pension or other payments, payable to or in respect of his dependents. Of the sum so paid to the department, three dollars (\$3) per month shall be repaid to the said pensioner in order to provide comforts, etc., and seven dollars (\$7) per month shall be credited to him on the books of the department for the provision of such clothing as he may require.

The Committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) E. J. LEMAIRE,  
*Clerk of the Privy Council.*

## APPENDIX III

**Order in Council P.C. 2161 dated the 13th December, 1924. Authority under which the Department of Soldiers' Civil Re-establishment may receive monies, &c. on behalf of ex-members of the Forces and may assume guardianship in certain cases.**

His Excellency the Governor General in Council, on the recommendation of the Acting Minister of Soldiers' Civil Re-establishment, and under the provisions of subsection 5 (2) (d) of chapter 67 of the Statutes of 1924, being an Act to amend the Department of Soldiers' Civil Re-establishment Act, is pleased to make the following regulations and the same are hereby made and established accordingly:—

(1) The Department of Soldiers' Civil Re-establishment is authorized to receive from any Department of the Government of Canada or any Provincial Government, or any person, any properties or monies held or payable on behalf of any persons or any properties or monies held or payable on behalf of the dependents of any such persons, whenever such persons are being or have been cared for under the provisions of the Department of Soldiers Civil Re-establishment Act, either by medical treatment or training. Such authority shall extend to any case where the person cared for is on the strength of the department for medical treatment or training or has died while on the strength of the department or having completed treatment or training has been discharged therefrom.

(2) A receipt given by the deputy minister or by an officer of the Department of Soldiers' Civil Re-establishment duly authorized by the deputy minister for properties or monies received under the authority of the preceding regulation shall constitute a valid receipt and a full and complete discharge for any such properties or monies received by the department.

(3) The deputy minister may and is hereby authorized to assume the guardianship of any insane person who is being or has been cared for under the Department of Soldiers' Civil Re-establishment Act and as guardian to administer the properties or monies authorized to be received by him or his dependents as hereinbefore provided and the deputy minister may assume the guardianship of such person and perform the functions of such office without an order of the court or other formality, and any notification in writing to any person by him that he is guardian of any insane person shall be accepted as evidence of that fact.

(4) In any case where the deputy minister has assumed the guardianship of a former member of the Imperial forces who was a resident of Canada or of the United States on the 4th August, A.D. 1914, he may subject to the regulations of the British Ministry of Pensions elect whether the said former member of the Imperial forces and his dependents shall be granted or credited with allowances at British or Canadian rates in accordance with the agreement between the department and the British Ministry of Pensions, and any such election shall be binding upon such former member of the Imperial forces and upon his dependents.

(5) The department may retain any properties or monies which it has received on behalf of any insane person who has been cared for under the provisions of the Department of Soldiers' Civil Re-establishment Act, for such time as the deputy minister considers necessary or desirable, and the department furthermore may dispose of such properties or monies to such insane person or his dependents or as may be deemed expedient or may dispose of such properties or monies to the estate of such person if deceased.

(6) "A former member of the forces" shall include any person who has served in any of the Naval, Military or Air forces of Canada or any person who may be granted treatment by the department under a reciprocal agreement between the department and the Government of any country outside the Dominion of Canada.

(Sgd.) E. J. LEMAIRE,

*Clerk of the Privy Council.*

REPORT  
OF THE  
DEPARTMENT OF HEALTH  
FOR THE  
FISCAL YEAR ENDED MARCH 31, 1924

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
F. A. ACLAND  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1924

*To General His Excellency the Right Honourable Lord Byn of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander in Chief of the  
Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit, herewith, for the information of Your Excellency and the Parliament of Canada the Annual Report of the Department of Health, being for the year ended March 31, 1924.

I have the honour to be, sir,  
Your Excellency's most obedient servant,

H. S. BÉLAND  
*Minister of Health.*

OTTAWA, September 1, 1924.

# REPORT OF THE DEPARTMENT OF HEALTH

FOR THE FISCAL YEAR ENDED MARCH 31, 1924

OTTAWA, August 28, 1924.

Hon. H. S. BÉLAND, M.D.,  
Minister of Health,  
Ottawa.

SIR,—I have the honour to report on the Department of Health for the year ended March 31, 1924, under the following headings:—

1. Quarantine Service (including Leger Stations).
2. Immigration Medical Service.
3. Marine Hospitals Service.
4. Venereal Disease Control.
5. Housing, with Hospitalization and Sanitation.
6. Opium and Narcotic Drugs.
7. Proprietary or Patent Medicines.
8. Child Welfare.
9. Food and Drug Laboratories.
10. Public Works Health Act.
11. Pollution of Boundary Waters.
12. Financial Statement.

J. A. AMYOT,  
*Deputy Minister of Health.*

## (1) QUARANTINE SERVICE

Organized Quarantine Stations were maintained during the fiscal year at the following ocean ports:—

Charlottetown, P.E.I. (Keppoch),  
Chatham, N.B. (Middle Island),  
Halifax, N.S. (Lawlor's Island),  
Louisburg, N.S.,  
North Sydney, N.S.,  
Quebec, Que. (Grosse Isle),  
St. John, N.B., (Partridge Island),  
Victoria, B.C. (William Head).

The following table shows the number of vessels and personnel inspected at the several stations:—

Station	Vessels inspected	Passengers			Crews	Cattlemen	Slowaways	Distressed seamen	Total persons inspected
		Cabin	Inter-mediate	Steerage					
Charlottetown, P.E.I.	5				49				49
Chatham, N.B.	18				340				340
Halifax, N.S.	398	14,157	8,500	32,997	37,676	84	41	24	93,479
Louisburg, N.S.	39	10		1	1,367				1,378
North Sydney, N.S.	97	15			3,050		9		3,074
Quebec, Que.	862	4,303	36,088	86,198	71,313	587	169		198,658
St. John, N.B.	288	2,805	4,808	23,510	27,774	86	33	10	59,086
Victoria, B.C.	427	8,257	3,537	19,627	41,013				72,434
Totals.....	2,134	29,517	52,993	162,333	182,582	757	252	34	428,498

## SESSIONAL PAPER No. 19

Persons to the number of 758 were detained at Quarantine Stations. Of these, 189 were actually sick; the remainder, 569, either accompanied the sick or were contacts of the respective diseases. These latter include a large number detained for observation at the William Head Quarantine Station from vessels arriving with smallpox on board.

\* These cases were landed at Quarantine for observation on account of pyrexia, indicating possible infectious disease. Conditions were later diagnosed as stated.

Commencing with the opening of navigation on the St. Lawrence river in the spring of 1923, the quarantine inspection base was transferred from Grosse Isle to Father Point, the quarantine officer now going on board vessels at the same time as the pilot. Any vessel found to have quarantinable or minor infectious disease on board was ordered to stop at Grosse Isle for the discharge of the sick and contacts. This new arrangement, together with the now established practice of clearing vessels passing Father Point during the night, on the sworn statement of the captain and ship's medical officer that the passengers and crew are free from quarantinable or other infectious disease, aids materially in the expeditious movement of vessels steaming up the St. Lawrence river.

The following extracts are from reports received from the respective quarantine officers:—

*Grosse Isle, Quebec* (Medical Superintendent, Dr. G. E. Martineau).—"The quarantine inspection of vessels arriving by the St. Lawrence, which had taken place at Grosse Isle since the year 1886, was this year carried out at Father Point, the steamers stopping at Grosse Isle only when they had cases of contagious disease to land, or when, for one reason or another, they could not be cleared at Father Point. For this purpose the assistant medical superintendent here was transferred to Father Point as quarantine officer in charge, and a fourth medical officer was appointed for service there, also a cabin steward to care for the doctors. Two residences were purchased at Father Point for the accommodation of the medical quarantine officers and their families.

"Eight hundred and sixty-two vessels arrived at Father Point which required inspection, and of these all but twenty were granted pratique there immediately on arrival. Of the twenty which passed Father Point without pratique, eighteen were cleared here, one at Chicoutimi and one at Levis, the two latter having passed quarantine on account of misunderstanding and the inspection boat being out of commission.

"Of these 862 steamers inspected, 142, or about 16 per cent, were passenger vessels, the remaining 720 being freight boats, ninety-two of which, however, carried from one to thirty-seven passengers, and one carrying 63.

"The total of 198,658 persons passing quarantine this season shows an increase of 56,457 over last year in the number of passengers, although the number of passenger steamers this year was thirteen fewer than that of last year. This marked increase is made up almost entirely of passengers travelling third-class, who numbered 32,837 in 1922, as compared with 86,198 in 1923, an increase of 53,361.

"Infectious diseases were reported or discovered on inspection fifty-nine times. The diseases so reported or discovered included typhus, smallpox, scarlet fever, diphtheria, measles, erysipelas, mumps, enteric fever, and pyrexia for observation. On several occasions steerage passengers refused to allow the ship's surgeon to vaccinate them or their children, but allowed the quarantine officer to do so.

## SESSIONAL PAPER No. 19

"Deaths and births occurring on board ships during the voyage were recorded as follows:—

Name of Vessel	Number of deaths	Cause of deaths	Number of births
Man. Regiment .....	1	Bronchitis.....	
Regina .....	1	Tuberculosis.....	
Megantic.....	1	Bronchitis.....	
Keyingham.....	1	Peritonitis.....	
Marloch.....	1	Epilepsy.....	
Metagama.....	1	Pulmonary œdema.....	
Marburn.....	1	Pneumonia.....	
Delaware.....	1	Accident.....	
Bruton.....			3
Totals.....	8		3

"The ss. *Swiftsure*, *Conia* and *San Macdonia* coming from Tampico, Mexico, where smallpox was reported to be present at the time they sailed, in May last, were ordered to call at Grosse Isle for final pratique and completion of fourteen days from the date of departure as required by the regulations.

"Following is a table of vessels arriving at Father Point with suspicious or positive cases of major quarantinable diseases on board and sent to Grosse Isle for diagnosis or necessary action to be taken:—

Name of Vessel	Date arrived	Suspected disease	Disease diagnosed	Pratique granted
Canadian Logger .....	May 21 .....		Alastrim.....	May 23
Montrose.....	June 30 .....	Smallpox.....	Varicella.....	June 30
Regina .....	July 1.....	Typhus.....	Measles.....	July 1
Megantic.....	July 8 .....	Smallpox.....	Varicella.....	July 8
Montcalm.....	Oct. 12 .....	Typhus.....	Measles.....	Oct. 12
Empress of France.....	Nov. 7.....	Typhus.....	Typhus.....	Nov. 9
Montlaurier.....	Nov. 24 .....	Smallpox.....	Varicella.....	Nov. 24

"The Government Merchant Marine steamer *Canadian Logger* arrived at Grosse Isle from Barbados, May 21, with a case of alastrim among her crew of twenty-seven. The bill of health mentioned five cases of alastrim at St. Lucia where she had touched. All members of crew who had been landed to be disinfected, together with their baggage, bedding, etc., were detained for quarantine and observation with the exception of two who had had smallpox. The steamer having been thoroughly disinfected was permitted to proceed on the 23rd in charge of a new crew sent down from Montreal for that purpose. The members of crew detained under observation having been vaccinated and re vaccinated were released as soon as evidence of successful vaccination appeared or definite immunity reaction manifested itself; that is, seventeen on May 29, six on June 2, and one on June 5. The patient under treatment at the hospital was discharged as cured on June 16.

"The ss. *Empress of France* from Southampton via Cherbourg with 83 cabin, 129 intermediate, 739 steerage passengers, and 492 crew, arrived at quarantine at 1 p.m., November 7, with a case of high pyrexia and rash, very suspicious of typhus fever, among foreign steerage passengers. The patient, a child of five years old, with six members of her family, were immediately removed from the ship and hospitalized at the station, and the Weil-Felix test was made to ascertain the condition before allowing the vessel to proceed. Although the Weil-Felix test was negative, the clinical symptoms and history of the case were found so pathognomonic that we could not but conclude the pres-

15 GEORGE V, A. 1925

ence of typhus fever, the Typhus Research Commission of the League of Red Cross Societies to Poland reporting a failure of the test in 3 to 3.6 per cent of the cases, and Leonard Rogers in as many as 10 per cent. The 397 steerage passengers occupying the section of the ship where the case had developed and the forty-one crew attending to these were therefore landed at the Western Division of the station for quarantine and observation; and the fumigation of the emptied section and hospitals, of a cubic capacity of 133,000 feet, was carried out at once by burning 413 pounds of sulphur. All intermediate and remaining steerage passengers on board were also examined, but being found free from vermin, and not having been exposed to infection, they were permitted to proceed with the steamer, which left quarantine at 1.45 a.m., November 9. No new cases developed among the detained passengers and crew in the Western Division and, consequently, they were released on November 20 after having taken a disinfecting bath on arrival and having had all their personal effects, baggage, etc., thoroughly disinfected. One birth occurred during the detention, and it was necessary to transfer a female contact to the hospital for a case of abortion.

"Six hours after landing a secondary case of typhus fever developed at the hospital among the children of the family detained under observation for typhus, but it was of a milder form than the original case, which recovered slowly. This secondary case was able to leave the hospital with the rest of the family on December 1.

"The total number of days during which the above passengers and crews were detained is as follows:—

SS. Canadian Logger.....	206
SS. Empress of France.....	5,256
Total.....	5,462

"The following cases of measles were overlooked on inspection at Father Point, or developed on the journey to Quebec, where they were found on arrival and returned to the station on the quarantine boat:—

Name of Vessel	Date	Disease	Number of cases	Number of contacts
Regina.....	July 28	Measles.....	3	7
Regina.....	Aug. 25	"	2	3
Montclare.....	Nov. 10	"	1	2
Total.....			6	12

"Vaccinations at the station were carried out during the year as follows:—

Staff and dependents.....	74
Crew of ss. Canadian Logger.....	29
Persons detained at hospital.....	3
Total.....	106

"The persons admitted to the hospital were divided as follows with regard to their nationality:—

British.....	212	Flemish.....	5
German.....	22	Belgian.....	5
Russian.....	20	Hungarian.....	4
Polish.....	16	American.....	4

## SESSIONAL PAPER No. 19

"Six cases of chickenpox, five of measles, and one of typhus fever developed among the contacts detained under observation at the hospital. Of the chickenpox cases two developed nine days, three eleven days, and one fifteen days after landing. Three cases of measles developed almost on admission, one two days, and one three days afterwards. The case of typhus fever developed six hours after landing. All these cases had been disinfected and isolated on admission to hospital with the exception of three cases of measles which showed symptoms of the disease on admission, and another measles case who was too young to be separated from the mother.

"One birth occurred in the Western Division during the detention of passengers ex ss. *Empress of France*. No deaths were recorded at the station during the year.

"Besides urine examinations done at the hospital, the undermentioned chemical and bacteriological examinations were done at the laboratory:—

Swabs (nose and throat).....	10
Sputum.....	3
Blood for enteric fever.....	5
Blood for typhus fever.....	5
Water (chemical analysis).....	13
Water (bacteriological analysis).....	1
Fæces.....	2
Total.....	39"

*Lawlor's Island, Halifax, N.S.* (Acting Quarantine Officer, Dr. Judson V. Graham).—"There was one death at the hospital during the year—a child being held for deportation at the Immigration building as a Mongol imbecile, developed chickenpox, was transferred to the quarantine hospital, where it died of septicaemia.

"A female passenger refusing vaccination, not having been previously vaccinated, was taken to the station to complete the detention required by the regulations, but after three days' detention, at her request, she was vaccinated and released.

"The ss. *Caronia* arrived here on July 21, reporting two cases of smallpox in the third-class. The first case was discovered by the ship's surgeon on July 16, with the rash well developed. The case and family, nine in all, were immediately isolated in the ship's hospital. The second case developed in the same family, July 20, the rash appearing July 21.

"The first-class passengers were permitted to proceed the same day and the third-class passengers destined to Canada, numbering 400, including the two sick cases, were disembarked into quarantine the following day, July 22. The delay in disembarking the third-class passengers was occasioned by the ship's agents requesting that the proposed action be submitted to Ottawa for confirmation before any passengers were disembarked into quarantine. On disembarking the passengers destined to Canada, the ship sailed for New York without being released from quarantine.

"The 398 passengers landed into quarantine were vaccinated on July 22 (among whom were four who had never been previously vaccinated), also the attendants which accompanied them. It was necessary to revaccinate fifty of these, the first vaccination not showing a satisfactory reaction. On appearance of immunity reactions or successful takes, the passengers were released from quarantine, with the exception of the sick and their immediate families.

"The ss. *Cedric* arrived at quarantine on March 8, the ship's doctor reporting that they had rejected three steerage passengers suffering from smallpox, at the time of embarkation at Liverpool. These three cases were picked up when crossing the gangway and were immediately isolated in one of the ship's hospitals until embarkation was completed, when they were put ashore again. The ship's surgeon took all necessary precautions on the voyage, vaccinating

all the steerage passengers with the exception of twenty-two who refused to submit to it. These twenty-two with four members of their families accompanying were landed into quarantine to complete the period of detention required under the regulations. However, on explaining to these passengers why the ship's surgeon wished to vaccinate them, they requested that it be done at this station, and were all vaccinated by me. They were released as soon as a satisfactory reaction showed or the required period of detention was completed.

"Including the passengers and attendants quarantined from the ss. *Caronia*, but exclusive of the quarantine staff and their families, there were 476 vaccinations performed at this station during the year, with the following results: Positive takes, 61; immunity reactions, 398. The remaining 17 left before the result could be determined.

"In accordance with the regulations, the entire quarantine staff and the members of their families resident at the station were vaccinated in February, with the exception of one child who was successfully vaccinated last year, and four who are protected by previously having had smallpox. The results showed as follows: Positive takes, 3; immunity reactions, 26."

*William Head, Victoria, B.C.* (Quarantine Officer, Dr. C. P. Brown).—

"There were twenty-five sufferers from the Japanese earthquake disaster ex the ss. *President Jefferson* landed here September 15. They were all British. This station co-operated to the best of its ability in housing and caring for them. Mr. Skinner, of the Immigration Department, attended to them for that department, chiefly transportation. Mrs. Fleming arranged the Red Cross assistance especially in outfitting and securing them positions. Hon. Mr. Oliver, Premier of British Columbia, had Colonel Ross Napier visit them to arrange any assistance that could be extended from the province. Miss Williams, trained nurse, who assisted Mrs. Fleming, was very kind indeed, staying here constantly without pay. Three families remained in Canada. The last left the station on October 24.

"Buildings generally have all been in use this year. They have been found to be in fit condition for occupation and use and well suited to the needs. The routine repairs have been carried out by our own staff, with materials purchased by the Public Works Department. Some minor alterations have been made which have added to their efficiency, the most important being the installation of additional washing accommodation in the second-class detention building and the oriental steerage quarters. Some needed furniture has also been supplied.

"Major Quarantines: The epidemic of smallpox on the Asiatic coast has been severe and virulent. Five vessels, three passenger and two freighters, have brought smallpox. The procedure followed with these has been, to determine the location of the disease among the passengers and crew, and decide which classes of passengers and what part of the crew were to be regarded as sufficiently close contacts to warrant detention. Then inspect these and land those not having been successfully vaccinated within one year or having had smallpox. Next, inspect all the rest on board and vaccinate those who come under above category. Fumigate the quarters where the patient has been. As soon as the patients and detentions with stores and supplies are landed, release the vessel. This was followed with the *Empress of Australia* and *Asia* with a delay of about three and one-half hours each. The *Canada* had a larger passenger list and all the oriental steerage was landed to save delay. But it was found they could have been inspected on board as quickly. With the freighter *Capto* it was necessary to delay the vessel until sufficient of the crew were found immune by the vaccination reaction to operate the vessel. The *Kurdistan* had enough men vaccinated recently to allow the vessel to proceed with less than three hours' delay.

## SESSIONAL PAPER No. 19

"In this connection the department authorized the enforcing of Section 29 of the Regulations on vessels coming from San Pedro, Cal., as from January 31, 1924. As a consequence, two vessels arrived and were detained for vaccination. By the immune reaction it was possible to release them in twenty-four hours.

"Our difficulty in the quarantines referred to above has been to read accurately the results of the vaccinations carried out on board by the ships' surgeons. Their difficulty has been in enforcing the vaccination of all members of the crew, especially a large Chinese crew. They are overcoming this by careful records of vaccinations performed. We have tried to have them do the vaccinations in the approved intracutaneous way with control, and keep records accordingly. By doing this here we have been able to cut the period of detention short and lessen the number detained.

"In connection with the smallpox situation it should be reported that last September outbreaks of smallpox were occurring among the Indians of this coast, and the suspicion was that Indians returning from Washington State from hop-picking were bringing it with them. I consulted with Hon. Dr. Young, Provincial Officer of Health for British Columbia, and as a consequence our department had the immigration authorities segregate all returning Indians on landing from the coastwise boats for inspection by the immigration medical officer, and vaccinate if needed. Dr. Milne at Victoria did this from September 12 to November 23, vaccinating 271.

"Attention is also drawn to the number of vessels arriving with bills of health showing the presence of quarantinable disease. Smallpox was shown at San Pedro, San Francisco, Philadelphia, Rio de Janeiro, Algiers, Tokyo, Kobe, Shanghai, and Hongkong. Plague was shown at Singapore, Hongkong, Shanghai, Paita, Callao, Sourabaya. Typhus was shown at Algiers, Sourabaya and Samarang.

"An attempt was made this past winter season to lessen the delay occasioned vessels through waiting at the station for daylight. Vessels were accordingly inspected after sundown, freighters till 6 p.m., and passenger boats on providing approved lights and conditions until 9 p.m.; all vessels at 6 a.m. This has been found satisfactory so far as it goes. Roughly there were 123 vessels waited at the anchorage an average of six hours each during the year. Of course it is not meant by this that all of these vessels suffered financial drawback; many of them did not, in so far as they waited subsequently for berth or cargo.

"The total number of vessels inspected this year, 427, as compared with 285 last year, shows an increase of 50 per cent. The diversified nature of the traffic is shown by the nationality of the vessels, the British predominating with 46 per cent of the total:—

British.....	196
Japanese.....	111
American.....	69
Norwegian.....	26
Danish.....	10
Dutch.....	7
Spanish.....	3
Italian.....	2
French.....	1
Nicaraguan.....	1
Panmian.....	1

"The wharves at the quarantine station have had constant supervision by Mr. Ford, District Engineer, Public Works Department. He has had extensive repairs carried out on both wharves, especially the small one. This was found in very bad condition and will need more extensive repairs as soon as possible.

The dolphin at the outer end of the big wharf was injured last December during the docking of the *Canada*. This has been the subject of special report and recommendation. Mr. Ford's staff have also kept supervision of the water system and assisted with such repairs as our own staff could not handle."

### LEPER STATIONS

Leper stations or lazarettos in Canada are two in number, one at Tracadie, N.B., of which Dr. J. A. Langis is the superintendent, and one on the Pacific coast at Bentinck Island, B.C., in charge of Dr. C. P. Brown, the quarantine officer at William Head.

*Lazaretto, Tracadie, N.B.*—The number of patients in this institution at the close of the fiscal year was ten, viz., six males and four females, as compared with eleven at the close of the previous year, one patient having died on March 13, 1924, in the last stage of the disease. No new cases were admitted during the twelve-months period under review. The oldest inmate is age 78, and the youngest, 23. Seven are native of Tracadie, N.B., and surrounding country, all French Acadians; one Chinese, one of French and Scotch descent, and one Iclander. The following extract is from Dr. Langis' report:—

"Patients reported last year as arrested cases, with one exception, are enjoying the same good health and are contented. The last one to be admitted, October 6, 1922, is so much improved that we expect to return him to his family some time during next fiscal year.

"With our youngest patient we had to stop the intramuscular injections of the Dean Derivatives, 'H.I.' in November last, on account of leprosy fever, which has some similarity to hectic fever. This girl is decidedly ill and willing to remain in bed. We have in this case what some authors call papular leprosy, and according to their experience, though there is close resemblance to the original leprosy nodes, they are not real nodules, and are free of organism. We therefore, in this particular case, expect to resume the treatment with 'H.I.' as soon as this fever stops.

"My experience with Dr. Pomaret's arsenical preparation 'Eparseno' is not what I expected, after reading about its great value in the hands of Professor H. Gougerot, Dr. Pomaret and others. But I derive some consolation from what Professor Jeanselme, the President of the Third International Congress of Leprosy, held in Strasbourg in 1923, says: 'Results obtained by the use of Amino-Arseno-Phenol, "Eparseno," ought to be submitted to a severe test, and a longer experimentation is necessary before judging of the merit of this medicine.' The same gentleman has about the same observation through the use he made himself of the Ethyl Esters of Chaulmoogra Oil, and the poor results he had with four of his leper patients. My oldest patient after two years treatment with 'H.I.' had a relapse about ten months ago, and at my suggestion, accepted the arsenical compound, of which we had such laudable reports in the treatment of leprosy. The first injection,  $\frac{1}{2}$  c.c., on the 2nd of October, was also given to another male patient, age 52 years, who though faring well on the 'H.I.' treatment, begged to be treated with 'Eparseno'. Instructions were strictly followed, but within two months, after 23 c.c. had been injected, the old man got worse. The other patient developed a good size gluteal abscess after the eighteenth injection and stopped taking it with no apparent results. Since February he resumed the 'H.I.' injections. This is my first experience with an abscess consequent to hypodermic, intravenous and intramuscular therapy to my leper patients in fifteen years.

"A director of the Investigation Station, United States Public Health Service, Kalihi Hospital, Honolulu, recently wrote: 'Leprosy is such a slow,

## SESSIONAL PAPER No. 19

chronic disease, so insidious and sluggish in its attack, and heretofore, at least, so stubbornly rebellious to therapy, that it taxes all the powers of patience and courage both in its victim and his medical attendant. Advantage has to be taken of every helpful measure for the maintenance of a steady, persistent and unflagging course of treatment which knows no faltering and no discouragement.' And also as Dr. Isadore Dyer, Dean of Tulene University, Louisiana, has aptly said: 'Above all things individualize the leper patient; watch for improvement. If it does not show in three months, wait a year and longer. Keep on driving at the treatment until the patient dies or gets well.' Since the Tracadie Lazaretto has had a resident physician, this in 1896, this practise has been followed. We have two men on parole, the first since 1898, and the other since 1912. Both are in the same good health as when they left the Institution. In our wards we presently have six arrested cases, who could go on parole if they were capable of looking after themselves; but they are all more or less impotent. "I regard it a pleasant duty to express my gratitude to the staff of the lazaretto who have co-operated so diligently in the welfare of the lepers."

*Lazaretto, Bentinck Island, B.C.*—At the close of the fiscal year there were seven leper patients under treatment at this colony, viz., five Chinese, one Russian Jew, and one Doukhobor. These are classified by Dr. Brown as follows: Disease checked, four; active, but improving under treatment, two; commencing treatment, one.

During the year the lepers were transferred from D'Arcy Island to the new leper station at Bentinck Island, following its construction by the Department of Public Works. The new station is much more easily accessible from the Quarantine Station at William Head, being but three miles distant, whereas D'Arcy Island is thirty miles away. This ensures close oversight of the leper colony by the medical officers of the Quarantine Station.

Two new cases of leprosy were discovered in Western Canada during the year, and prompt arrangements were made for their removal to the lazaretto.

One Chinese patient who had spent several years under treatment at D'Arcy Island was released on parole on August 22, 1923, as free from leprosy infection, following his examination by a medical board consisting of Dr. C. P. Brown, medical superintendent of the Quarantine Station, Dr. H. E. Young, Provincial Officer of Health for British Columbia, Dr. F. F. Underhill, Medical Officer of Health for Vancouver, and Dr. R. L. Fraser, of Victoria. On returning for re-examination on March 29, 1924, Dr. Brown found a reappearance of symptoms which had previously disappeared, which led him to require the man's readmission for a further course of treatment.

Dr. Brown reports that the condition of both the new cases admitted during the year shows encouraging improvement under the treatment being administered, and concludes his report by an appreciative reference to the faithful service rendered during the year by the lazaretto staff.

## (2) IMMIGRATION MEDICAL SERVICE

At the large ocean ports of Canada at which immigrants regularly arrive, there are stationed officers of the Immigration Medical Service whose business it is to medically inspect each and every newly-arriving immigrant, also other passengers of the non-immigrant classes referred to in section 2 of the Immigration Act, exclusive of returning Canadians. Those found mentally or physically defective to a marked degree are "certified" as prohibited of entry under one or other of the subsection of sections 3 of the Immigration Act, and they then pass under the jurisdiction of an officer of the Department of Immigration for disposal.

The Immigration medical officer's work consists of detecting persons who come within the following classes of prohibited immigrants as set out in the Immigration Act:—

(1) Idiots, imbeciles, epileptics, feeble-minded or insane persons—Section 3 (a).

(2) Persons affected with tuberculosis or other contagious or loathsome disease which is not curable within a reasonably short time—Section 3 (b).

(3) Immigrants who are dumb, blind, or otherwise physically defective to a degree rendering them liable to become a public charge—Section 3 (c).

(4) Persons of constitutional psychopathic inferiority—Section 3 (k).

(5) Persons with chronic alcoholism—Section 3 (l).

(6) Persons (other than those stated above) who are mentally or physically defective to such a degree as to affect their ability to earn a living—Section 3 (m).

Passengers, immigrant and non-immigrant, to the number of 138,241 were medically inspected at the Atlantic and Pacific ports of Canada during the fiscal year, which is an increase of 71,761 over the figures for the previous year. In addition, 8,169 persons bound to Canada via the ports of New York and Boston were medically inspected by officers of the United States Public Health Service.

## SESSIONAL PAPER No. 19

## (3) MARINE HOSPITALS SERVICES

During the year 1923-24 the Department of Health operated two Marine Hospitals, namely at Sydney and Lunenburg in Nova Scotia. Sick mariners arriving at these ports and outports in the vicinity are therefore directed to these hospitals. At the larger ports where there are hospital facilities, sick mariners are treated at these hospitals at fixed contract rates. At some where there is occasional need for hospital treatment, the department arranges with some suitable private residence. At all other ports best arrangements are made under the authority and direction of the collectors of customs.

The following is a list of the hospitals under contract with this department:

## NOVA SCOTIA

Amherst.....	Highland View Hospital
Antigonish.....	St. Martha's Hospital
Bridgewater.....	Dawson Memorial Hospital
Glace Bay.....	St. Joseph's Hospital
Halifax.....	Victoria General Hospital
	City Health Board (Contagious diseases)
	Tuberculosis Hospital
Kentville.....	Nova Scotia Sanatorium
Middleton.....	Soldiers' Memorial Hospital
New Glasgow.....	Aberdeen Hospital
North Sydney.....	Hamilton Memorial Hospital
Pictou.....	Pictou Memorial Hospital
Springhill.....	Springhill Cottage Hospital
Windsor.....	Payzant Memorial Hospital
Yarmouth.....	Yarmouth Hospital

## NEW BRUNSWICK

Bathurst.....	James H. Dunn Hospital
Campbellton.....	Hotel-Dieu Hospital
Chatham.....	Hotel Dieu
Moncton.....	Moncton Hospital
River Glade.....	Jordan Memorial Sanatorium
St. John.....	General Public Hospital
	County Hospital (T.B.C. cases)
St. Stephen.....	Chipman Memorial Hospital
Tracadie.....	Hotel-Dieu

## PRINCE EDWARD ISLAND

Charlottetown.....	Charlottetown Hospital
	P.E.I. Hospital
Summerside.....	Prince County Hospital

## QUEBEC

Chicoutimi.....	Hotel-Dieu
Lake Edward.....	Lake Edward Sanatorium
Levis.....	Hotel-Dieu
Montreal.....	Montreal General Hospital
	Notre-Dame Hospital
	Hotel-Dieu
	Royal Victoria Hospital
	St. Paul's Hospital (Contagious diseases)
	Alexandra Hospital (Contagious diseases)
	Grace Dart Home (T.B.C. cases)
Quebec.....	Hotel-Dieu
	Jeffery-Hale's Hospital
	Civic Hospital (Contagious diseases)
	Laval Hospital (T.B.C. cases)
Sorel.....	Hôpital General
St. Jean.....	Hôpital St. Jean
Three Rivers.....	Hôpital St. Joseph

## BRITISH COLUMBIA

Anyox.....	Anyox General Hospital
Chemainus.....	Chemainus General Hospital
Cumberland.....	Cumberland General Hospital
Ladysmith.....	Ladysmith General Hospital
Nanaimo.....	Nanaimo General Hospital

Emergency hospitals were operated at the following ports:—

*Nova Scotia.*—Arichat, Canso, Liverpool, Lockport, Louisburg.

*Prince Edward Island.*—Souris.

*Quebec.*—Port Alfred.

It is gratifying to report that during the year there was no epidemic of contagious diseases; only a few isolated cases were reported. However, there has been a marked increase in the shipping activities during the year just ended, as instanced by the large increase in the amount of Sick Mariners' Dues collected. This increase was more especially noticeable at the ports of Halifax, Montreal, Vancouver and some other ports in the province of British Columbia. As a matter of fact, shipping was even greater than in pre-war years. Consequently, the Marine Hospitals Service had to deal with a larger number of sick, injured and distressed mariners than heretofore and the expenditure was proportionately increased.

During the past year the total number of sick, injured and distressed who were looked after by this Service was 2,745, as compared with 2,035 in the previous year, or an increase of 710. It is apropos to mention that as the amount voted by Parliament was insufficient to cover payment of the whole expenditure for the year, a considerable number of accounts had to be transferred to the year 1924-25 for payment. Had the parliamentary vote been sufficient to cover all the expenditure incurred during 1923-24, the total number of sick mariners would then have been 2,985.

Concerning the days of treatment in hospitals and private residences, they number 30,646, as compared with 32,679 in the previous year. Apparently there was a decrease in the number of days, but for the reason here above given, accounts covering treatment for 3,403 days were paid out of the year 1924-25. The correct number of days of hospital treatment given in the year was therefore 34,049, or an increase of 1,370 days on the previous year.

Very few changes were made in the personnel during 1923-24. The Marine Hospitals at Lunenburg and Sydney underwent certain necessary repairs and improvements, and were operated very satisfactorily. Readjustments were made in the salaries of some of the port physicians and also in the contract rates with the various hospitals. The policy of providing necessary and proper treatment to mariners suffering from incipient tuberculosis, which was initiated in the year 1922, was pursued during the year just ended, and the service has now complete and satisfactory arrangements for the treatment of such cases on both the Atlantic and Pacific coasts.

## SESSIONAL PAPER No. 19

Following are tabulated statements of the diseases and injuries for which mariners received treatment during the year:—

## (4) VENEREAL DISEASE CONTROL

The venereal disease campaign which was inaugurated in the year 1919 and which has been carried on successfully during the past four years was continued during the past fiscal year. The outstanding feature of the campaign is the free clinic for the treatment of the venereal diseases. During the past year there were fifty-six free venereal disease clinics in operation throughout the country distributed as follows:—

Nova Scotia.....	5
New Brunswick.....	8
Quebec.....	10
Ontario.....	17
Manitoba.....	4
Saskatchewan.....	6
Alberta.....	4
British Columbia.....	2

There are, in addition, a number of subsidiary clinics in women's hospitals, maternity hospitals, child welfare centres, children's hospitals, day nurseries, etc. Treatment is free for all. During the fiscal year there were under treatment in clinics:—

Total cases admitted to clinics.....	12,526
Total cases treated by physicians.....	23,022
Total treatments in clinics and institutions.....	328,963
Total laboratory examinations.....	36,334
Total Wassermann reactions.....	20,932
Total doses of Arsphenamine.....	51,133

Treatment was continued in reformatories and jails throughout the country during the year. With the approval and assistance of General St. Pierre Hughes arrangements were made whereby all prisoners entering penitentiaries are given a Wassermann and smear, and treated if necessary

SESSIONAL PAPER No. 19

Venereal disease literature was distributed during the year as follows:—

	Publication:	Number of copies distributed:

	Special Abstract of Current Venereal Disease Literature, English.....	5,000

Numerous lectures were given throughout the country which were largely attended. In our educational campaign during the year the American Social Hygiene films, "The Health Twins at Work," "Social Protective Measures," "Youth and Life," and "Keeping Fit" have been used. Our method of procedure is as follows: Through the co-operation of the Canadian Social Hygiene Council and the Dominion Department of Health, on Sunday night the most popular moving picture theatre in some town is engaged and the meeting advertised in the local newspapers and churches. The programme opens with "The Health Twins at Work," followed by "Social Protective Measures." A lecture is then given, dealing with various phases of social hygiene. As these lectures are for adults, a special effort is made to drive home to them the necessity for the education of boys and girls in the elemental principles of life as a preparation for their careers as citizens and parents. The provision of recreational facilities is stressed; the problem of prostitution and venereal disease, the relationship of immoderate and extravagant living and of excesses of various kinds to present day unhappiness are discussed. Following the lecture, some of the slides from the series "Youth and Life" and "Keeping Fit" are shown. This programme gives two hours of instruction in an entertaining way. We believe that in this way the representative people of the community are influenced to take a greater interest in the problem of boys and girls. At times the programme is given as outlined to women only, and, at other times, to men only. This gives us the opportunity of reaching these groups with special types of lectures.

The advisability of a medical certificate as a prerequisite of marriage was stressed at public meetings and by articles in various publications. Birth control propaganda was combated by means of lectures and magazine articles. Higher education as a preventive of prostitution and venereal disease was stressed. Education alone will do much to prevent prostitution but to this

15 GEORGE V, A. 1925

should be added specific knowledge of life. The duty of the community to the boy and girl has been pointed out and communities urged to provide recreation facilities for the young as well as the necessity of removing harmful influences. Supervision of dance halls, pool-rooms, movies and other places of public amusement was repeatedly urged.

During the year the venereal disease grant was continued. Each province received the following amount of the grant for the year:—

Nova Scotia.....	\$10,744 33
New Brunswick.....	6,710 35
Quebec.....	48,430 14
Ontario.....	60,171 83
Manitoba.....	8,930 75
Saskatchewan.....	15,537 16
Alberta.....	12,069 65
British Columbia.....	10,759 61

The Canadian Social Hygiene Council worked energetically throughout the year and have reached many thousands with lectures and exhibits. The provincial health authorities are to be congratulated on their activities during the year. There is no falling off in the number of treatments; the attendance at clinics is keeping up and the treatment in institutions is being constantly extended.

It is still very difficult to obtain statistics of value. A questionnaire sent to all physicians throughout the country was answered by approximately only one-fourth of the recipients. Out of 9,000 physicians who received the questionnaire only 2,577 replied. These reported 23,022 cases of venereal disease. Of the many venereal disease specialists in Toronto only two made returns. In Montreal only three or four of the many venereal disease specialists made returns. Well known gynecologists who are removing pus tubes constantly report no cases of gonorrhœa. One of the best known and busiest nerve specialists in Canada reports no syphilis. Well known consultants who see hundreds of patients annually report no venereal disease.

The only conclusion one can draw is that the returns are very inadequate and physicians are apathetic about reporting.

The progress made during the year is in the main satisfactory.

## (5) HOUSING, WITH HOSPITALIZATION AND SANITATION

### HOUSING

The total amounts loaned to the provinces since the enactment of the Order in Council, P.C. 2997, dated December 3, 1918, as of date March 31, 1924, were:—

Manitoba.....	\$ 1,975,000 00
New Brunswick.....	1,525,000 00
Ontario.....	9,350,000 00
British Columbia.....	1,701,500 00
Quebec.....	7,369,689 62
Nova Scotia.....	1,537,000 00
Prince Edward Island.....	50,000 00
	<hr/>
	\$23,508,189 62

The total number of houses erected, 6,244.

The number of municipalities operating, 179.

A revote of four million dollars was approved by Parliament for fiscal year 1923-24 for the purpose of making loans to provinces to encourage the erection of dwelling houses on the terms and conditions set forth in the Order in Council of December 3, 1918, and amendments made thereto; the appropriation to be

## SESSIONAL PAPER No. 19

applied only to the Provincial Governments which had already made commitments to the municipalities, and to cease at the end of the fiscal year 1923-24.

The amount loaned by the Federal Government to the different provinces as of date March 31, 1924, under the housing appropriation of 1923-24 was \$3,174,783.46, and the unexpended amount of revote of 1923-24 as of date March 31, 1924, was \$825,216.54.

Marked activity in housing development is taking place in northern Ontario and increasing demands made for planning with due regard to community needs and not merely for separate unorganized individuals, realizing that the elements of a healthy existence will be lacking unless provision is generously made from the outset for a vigorous associative life.

The division at the request of the Royal Commission on Pensions submitted evidence on the question of housing for ex-service men. *Inter alia* the following commentary emphasized the condition obtaining when such evidence was adduced, i.e.:—

It is conceded by the housing directors of the various provinces that the acuteness of the housing situation has passed to a certain extent, but there is still a visibly expressed desire of the people to participate in home building if facilities are available, which desire, doubtless, has been actuated by the example set by those who have participated under the provisions of the housing schemes.

The vacancies which may have been noted in various cities have doubtless been caused by the desire for better living conditions as expressed in urban and rural localities, in preference to the crowded tenement and badly lighted and ventilated houses which obtain in many of the cities throughout the Dominion to-day.

As to the question of giving assistance to ex-service men in altering houses and, further, as to the expediency for such provision, it is to be noted that in the provinces of British Columbia and Manitoba such assistance has already been rendered under the provisions of the housing schemes, with excellent results.

From the correspondence which has been received by this department from time to time the ex-service men and others living in rural districts would seem to appear to have been at a disadvantage as compared with those living within the precincts of municipalities, towns or cities.

However, since the Federal Government, under the provisions of the General Project for Housing, provided that monies should be loaned to the Provincial Governments for housing purposes, the Provincial Governments to loan the said monies to housing societies, companies, or individual owners of lots, the onus would seem to rest entirely with the Provincial Governments as to the disposition or uses of the money made for housing in the particular provinces, subject only to the four conditions imposed by the Federal Government.

It is to be noted that the present cost of building houses for men who cannot pay more than \$25 a month is too great to permit of an adequate rent being obtained.

## HOSPITALIZATION

The division has been consulted by hospital trustees, superintendents and others interested in community hospital work concerning principles, practise and planning, exhibiting a keen interest and desire for information on this subject. It is evident that there is an outstanding demand for such information and judging by the correspondence received the appreciation is manifold.

The hospitalization, incidental to the federal quarantine services, which has been considerably remodelled, is proving its efficacy. The hospitals at Rock-head, Halifax, N.S., and Savard Park, Que., which have been remodelled to conform with present day principles and practice it is anticipated will be the means of largely eliminating cross infection, the *bête noir* of physicians in the past.

Infectious diseases from the viewpoint of efficient planning in hospitalization are receiving very close attention by hospital trustees, consultants and the architectural profession throughout Canada. The division through intensive study of the subject has advised thereon, inculcating the latest principles in planning accepted by the medical profession.

Buildings of the new lazaretto, including leper huts, hospital, caretaker's residence and stores, at Bentinck Island, B.C., which takes the place of the former lazaretto at D'Arcy Island, B.C., have been completed, the medical officer reporting that both patients and personnel have become established in the new quarters.

The residences of the medical officers at the boarding of vessels' station at Father Point, Que., have been remodelled to meet the requirements of the service; the work being executed by the workmen attached to Grosse Isle Quarantine Station, Que.

#### SANITATION

The division was consulted by the Canadian National Parks Branch concerning the sanitation of residences at Jasper park.

The publications covering sewage disposal and water supplies have been eagerly sought throughout the Dominion, so much so that second editions have been issued.

From time to time the division has furnished technical and educational publications with material covering "Duties of Municipalities Concerning Water and Drainage Facilities," rural water supplies and sewage treatment and disposal.

The Biological Board of Canada consulted the division upon raw water filtration installations for lobster canning factories, and a complete scheme including raw water sedimentation, filter and storage tanks was prepared. This installation would be the means of considerably, if not entirely, eliminating the bacterial content of the water used in such industry.

Opportunity has been taken to acquire information and data upon refuse disposal and treatment of industrial wastes, both of which subjects have already been valuable for disseminating in various parts of the Dominion.

The Provincial Councils of Architectural Associations of the Dominion have sought advice upon the desirability of the preparation of building by-laws applicable to the whole of the provinces. It would appear that, generally, the city building by-laws are not applicable in rural districts and that building is practically carried on without any attempt to follow a code, thereby endangering the health of the people. The associations stated that in Great Britain the Ministry of Health was responsible for the preparation of a building code governing the building operations throughout the British Isles, and furthered their statement with a request that a similar code may be prepared by the Dominion authorities. It is appreciated that there are many difficulties in the way of consummation for such a proposition, which in the meantime is being considered by the Dominion Council of Health.

## SESSIONAL PAPER No. 19

HOUSING—STATEMENT SHOWING USE OF FEDERAL LOAN IN THE PROVINCES  
(Compiled from Official Reports as of date March 31, 1924)

Province	Amount payable on basis of 1911 census on \$25,000,000 basis	Additional amount payable on basis of \$31,250,000, including revote of \$9,550,080, 1922-23	Amount actually borrowed from Federal Government	Amount advanced by Province	Number of houses built	Number of municipalities

" .....	British West Indies..	5 "

In connection with the export of narcotics from Canada, it may be explained that most of these drugs are included in a mixture with other ingredients in tablet or pill form, etc., or in the form of tinctures, and are generally included with a general order for drugs of various kinds. The export of narcotics is controlled under license.

Some time ago the department sent out a questionnaire to all registered practising physicians in Canada, numbering 8,300, to ascertain the number of persons requiring narcotics under the care of a doctor. Replies were received from 4,019 physicians, or 48.42 per cent. A summary of the replies received, as shown in the following table, may be of interest.

TABLE 8

Province	Medical Cases	
	Male	Female
Ontario.....	163	140
Quebec.....	74	126
Nova Scotia.....	10	20
New Brunswick.....	10	18
Manitoba.....	28	20
Saskatchewan.....	27	25
Alberta.....	24	14
British Columbia.....	59	19
Prince Edward Island.....	Nil	Nil
Totals.....	395	382
Grand Total.....		777

In connection with these figures it is of interest to note the results obtained by the authorities in the city of New York in connection with a somewhat similar questionnaire sent out to 14,715 physicians in the state of New York. Replies were received from 7,559 physicians, or a percentage of 51.37. These 7,559 physicians who replied had under their care or treatment, 775 persons who required narcotics.

The majority of the cases included in the returns furnished the department can be properly classified as medical cases, such as chronic neuritis, chronic neuralgia, chronic rheumatism, cancer, tumor, etc. A large number of them, however, were simply cases of straight drug addiction with no apparent organic trouble or, in other words, victims of the habit, relying on the physician to obtain their usual supply of their favourite drug.

At the time the questionnaire was sent out to members of the medical profession, information was collected from every reliable source—medical officers of health, chiefs of police, crown attorneys, magistrates and others who might be in a position to furnish information as to the number of drug habitues in their community. As a result of the information received, an approximate estimate of the number of drug addicts, other than those under medical care, was estimated to be as follows:—

TABLE 9

British Columbia.....	2,250 drug addicts
Alberta.....	350 "
Saskatchewan.....	250 "
Manitoba.....	500 "
Ontario.....	1,800 "
Quebec.....	3,800 "
Nova Scotia.....	300 "
New Brunswick.....	250 "
Prince Edward Island.....	Nil
Total.....	9,500 drug addicts

These figures, of course, are only approximate as it must be realized that it is practically impossible to obtain accurate figures as to the exact number of drug users in Canada, when it is borne in mind that the vast majority of these people obtain their supplies through the medium of the street trafficker or peddler.

## SESSIONAL PAPER No. 19

At the meeting of the Dominion Council of Health held in November, 1923, arrangements were made for this department to draw up a model law providing for the treatment, compulsory or voluntary, of all drug habitues and for the provision of suitable institutions at which to treat such cases. At this date, Alberta and Nova Scotia have passed such legislation and now have facilities for dealing with cases of drug addiction. The other provinces have agreed in principle to the provisions of the model law and also to take the necessary steps to submit the bill to their respective legislatures at the earliest opportunity.

During the year, the department has been in constant communication with the Secretary General of the League of Nations respecting narcotic matters, furnishing the League with much detailed information with regard to seizures of narcotic shipments, so that they might be traced to their source and proper action taken by the Governments concerned.

During the past three or four years, the Opium Committee of the League of Nations has been gathering information from all countries signatory to the International Opium Convention or members of the League of Nations as to the amount of opium and cocaine, etc., produced annually and the requirements of such drugs for legitimate medicinal or scientific purposes throughout the world, with a view to devising some practical way of limiting the production of opium and the coca leaf to meet the world's requirements for legitimate medicinal use. Sufficient information has been gathered by the League to determine approximately the amount of narcotics required for legitimate use and a conference has been called to meet at Geneva in November, 1924, to deal with this problem.

On the whole, conditions have improved during the past year due to closer co-operation among all interested authorities in Canada, more drastic laws, better enforcement and, to a large extent, through the co-operation of this department with the authorities of the United States and Great Britain in the way of exchanging information and photographs and finger prints of internationally known drug traffickers.

#### (7) PROPRIETARY OR PATENT MEDICINES

During the fiscal year ended March 31, 1924, 660 new medicines were registered under the Proprietary or Patent Medicine Act, and a total number of 5,528 licensed.

As it is now a general practice to require manufacturers to submit for inspection before placing their products on the market a sample of all labels, wrappers and literature used in connection therewith, the labels, cartons, wrappers and advertisements of fifty-nine firms were examined, and thirty-two of these were found satisfactory. The others were instructed to make the necessary modifications to meet requirements.

In the enforcement of this Act fifty-eight seizures were made, fifty-five of which were not maintained, the goods being released on assurance given by the manufacturer that, in future, requirements would be strictly conformed to. The medicines involved in the other three were confiscated and destroyed.

The registration numbers assigned forty preparations comprised of medicated wines and other alcoholic remedies suspected of being available for beverage purposes were cancelled, thus further reducing the number of such products licensed. The remaining ones will be further investigated.

A number of medicines which were examined at the departmental laboratory at the request of this branch were found to violate the terms of registration and in each case such penalizing action was taken as the circumstances warranted.

The Advisory Board approved the medication of sixty-five alcoholic preparations and rejected forty as insufficiently medicated. Other matters dealt with by this board were the establishment of rulings in the matter of drug combinations and the fixing of quantities for certain potent drugs.

An Order in Council was passed extending the time for the sale or disposal of all proprietary or patent medicines for internal use on the market bearing a registration number granted under the Act of 1908 and all external proprietary or patent medicines on the market which bear an external medicine stamp marked "Prior to Proprietary or Patent Medicine Act 1919," until the first day of January, 1925.

### (8) CHILD WELFARE

The general work of the division has enlarged during the year.

#### CO-OPERATION WITH OTHER DEPARTMENTS AND DIVISIONS

Some progress has been made in the matters noted:—

*Department of Immigration.*—(a) Women's Division: Conference and correspondence with the supervisor in regard to the welfare, comfort and safety of women and children; equipment and furnishing of nursery and waiting-rooms at the ports; deportations and other matters. In co-operation with the supervisor, special attention has been given to young women who have recently immigrated to enter home service or to be married and make their homes in Canada.

(b) Juvenile Immigration Division: Conference with minister, the deputy minister and the supervisor.

*Department of the Interior.*—Northwest Territories and the Yukon: Conferences have taken place with persons who formerly lived in this part of Canada, re general child welfare and maternal welfare there.

*Department of Agriculture.*—Dairy Branch: Numerous conferences re milk and publications on this subject.

Health of Animals Branch: Conferences arising out of requests made for information re bovine tuberculosis.

*Department of Indian Affairs.*—Conferences re Field Matrons, education of Indian Children, "The Little Blue Books" and other publications.

*Department of Soldiers' Civil Re-establishment.*—Conferences re diet in hospitals and other matters.

*The Soldiers Settlement Board, Home Branch.*—Conference re Outpost Homes and also re publications especially "The Supplement to The Canadian Mother's Book."

*The Department of Trade and Commerce.*—(a) Bureau of Statistics: Conferences and correspondence re Vital Statistics including births, infant mortality, maternal mortality and comparable statistics from other countries.

(b) Canadian Government Motion Picture Bureau: Correspondence re films, motion pictures, photographs and other matters.

*Department of Mines.*—Conferences, by request, with officials re matters specially affecting the health of women.

*Department of Justice.*—A number of conferences have taken place with the Inspector of Penitentiaries about boys who are presently confined in penitentiaries.

## SESSIONAL PAPER No. 19

## CO-OPERATION WITH PROVINCIAL AUTHORITIES

By special invitation, visits have been made during the year to the following provinces: New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, British Columbia.

Special conferences and correspondence have taken place *re* the following. Provincial organization for child welfare, maternal welfare and public health nursing. Minimum wage. Children needing special care on account of not being in their own homes, or because of mental or physical disability and defect. Children of unmarried parents. Hospitals. Mothers' allowances.

## CO-OPERATION WITH VOLUNTARY SOCIETIES

Many opportunities have occurred throughout the year for co-operation with societies which are provincially organized, and with others which have a Dominion-wide organization. Among these may be mentioned the Canadian Council of Child Welfare, the Canadian Association of Child Protection Officers, the Women's Institutes, Dominion and provincial, the Homemakers' Clubs, the Women's Section of the Grain Growers' Association, the United Farm Women, the Victorian Order of Nurses, the National Council of Women, the Imperial Order of the Daughters of the Empire, the Canadian Red Cross, the Association of Maternal Assistance, the Association of the Goutte de Lait, Fédération Nationale Saint-Jean-Baptiste and the Fédération des Femmes Canadiennes-Françaises.

## PUBLICATIONS (CHILD WELFARE)

The demand for publications has increased during the year, but every effort has been made to conserve the supply by sending less than the number requested and by making inquiries before sending, in order to make sure that distribution would be careful and satisfactory. In most instances, publications are sent out singly and on personal request only.

*New Publications.*—No new publications have been published during the year but four new series have been outlined and a good deal of material, which has been gathered for some years past, has been reread, revised and arranged in order under the above-mentioned outlines.

*The Little Blue Books.*—The New and Revised Edition of "The Canadian Mother's Book" was published in English in May, 1923, and in French in November, 1923. The New and Revised English Editions of the other "Little Blue Books"—publications 3-16—appeared at varying intervals during the year, the last being published on February 5, 1924. The French editions are in preparation.

*Supplement to the Canadian Mother's Book.*—The "Supplement to the Canadian Mother's Book," which is for distribution by doctors and nurses only and is intended for use in Outpost Homes, has apparently been found useful and satisfactory for the purpose for which it was intended. The proof edition of 1,000 copies was issued September 3, 1923, and was sent to a number of doctors and nurses, also to some others who had special knowledge of Outpost Homes. A good many suggestions and improvements were thus received, which were embodied in the revised edition published February 11, 1924.

*The Handbook of Child Welfare Work in Canada.*—The "Handbook of Child Welfare Work in Canada" is now out of print. The demand exceeded the supply early in the present year.

*Age—Height—Weight.*—These statistics have been completed and tabulated. They were published during the year by the Department of Health of

15 GEORGE V, A. 1925

Toronto, in co-operation with the Dominion Bureau of Statistics and with this division. The same statistics have also appeared in the New Edition of "The Little Blue Books" and it is expected they will be of practical use.

#### OUTPOST HOMES

More interest is being taken in this subject, and we have had more letters from these homes. Much remains to be done.

#### CHILDREN NEEDING SPECIAL CARE

A good deal of time has been given to this subject, chiefly in conference with parents and teachers. Except in one or two centres, the work of organization proceeds slowly and the needs of these children are great.

#### HOME SERVICE

Conferences and correspondence with the Overseas Settlement Committee and others have advanced this important matter a little.

Steps have been taken by the Department of Health in one of our largest cities to train and register women who are willing to take up this work in co-operation with the other work of the department.

#### SCHOOL JOURNEYS

Conferences on this subject have been held, and it seems probable that before long this plan may be tried in some simple way.

#### CHILD INSURANCE

Anxiety was expressed by certain persons in regard to the above subject, and reliable information seemed to be needed. The result of enquiries into two cases cited and of conferences and correspondence with the Dominion and the Provincial Inspector of Insurance, respectively, and the heads or medical directors of three insurance companies showed that there were no grounds for such anxiety.

#### INFANT MORTALITY AND MATERNAL MORTALITY

This is the best index we have, not only to child welfare, but to general welfare and civilization. The publication, for the first time, of National Canadian Statistics of Infant and Maternal Mortality was made in the "Handbook of Child Welfare Work in Canada" on March 27, 1923, as for the year 1921. Some attention has thus been aroused and frequent references have been made to these figures during the year. The figures for the following year, 1922, are now available and show little or no improvement. They are as follows:—

Total number of infants dying under one year old.....	25,553
Total number of mothers dying in child-birth.....	1,248
Number of infant deaths per 1,000 births.....	101
Number of mothers' deaths per 1,000 births.....	5

In other words, we lose over 73 lives of mothers and children every day, and over 514 every week.\*

Infant mortality in Canada is more than twice as high as in New Zealand. Maternal mortality in Canada is nearly twice as high as in England and Wales.

\* Statistics obtained from the Dominion Bureau of Statistics on request. Quebec figures are reported from provincial records only.

## (9) FOOD AND DRUGS DIVISION

During the year ended March 31, 1924, the activities of this division have been carried on with the purpose of maintaining the quality of food and drugs as sold to the people of Canada. Samples of many articles were procured and analyzed. In all cases where it was found that inferior goods were on the market, effort was made to remove the cause of the difficulty by correction at the source. Wilful and persistent offenders were summoned to court and the final results have proven that this procedure was justified.

Control of importations of food is one of our best protections, because it is much better policy to stop defective goods at the ports of entry than to try to control the sale after they have passed through the regular channels of trade.

In addition to the general routine work in connection with suspected articles, several systematic collections were made, including the following foods and drugs: honey, butter, caramels, peanut butter, salt, coffee, vinegar, lard, chloride of lime, disinfectants, hydrogen peroxide, rhubarb, senna leaves, epsom salts, fluid extract of cascara, fluid extract of senna, liquor arsenicalis, mercury ointment, zinc ointment, paregoric, tincture of iodine and tincture of gentian. The general condition of the supply of these articles is regarded as satisfactory, although retailers do not always take the necessary trouble to store unstable articles so as to prevent decomposition and there is apparent lack of care in manufacture of such preparations as liquor arsenicalis, and tincture of iodine.

In the laboratories operating at Ottawa, Halifax, Montreal, Winnipeg, and Vancouver analyses were made of 6,274 samples, as detailed in the following tabulated summary:—

## (10) PUBLIC WORKS HEALTH ACT

The regulations made under authority of this Act require that every public work within the legislative authority of the Parliament of Canada be periodically inspected by a medical officer of the Department of Health, in order to see that the said regulations are enforced and complied with, having in view the preservation of health and the mitigation of disease among the persons employed thereon. This includes the inspection of the accommodation afforded said employees so as to ensure its sanitary condition, the provision of adequate hospital accommodation and medical attention in time of sickness, disease or accident, and the proper isolation and care of persons suffering from contagious or infectious diseases.

## WESTERN CANADA

Dr. A. E. Clendenan, medical inspector for Western Canada, reports as follows:—

"The public work inspected was limited entirely to railway construction. No epidemics occurred on any of the contracts. A medical service was freely provided by the contractors without request, with one exception. In this case it was installed at once when representations were made by your Inspector as to the requirements of the Act.

"All the construction work during the past year was on branch lines of the Canadian Pacific Railway, and in all cases it was feasible and advisable to use established municipal and red cross hospitals by special arrangements with them. Sick employees like them better than temporary hospitals along the grade, and they are much better for surgical cases.

"The following contracts were visited as often as was necessary to keep the medical service up to standard:—

"Canadian Pacific Railway, Cutknife Branch from Cutknife, Sask. to Battle River, Alberta: Chief contractor, W. A. Dutton, Winnipeg, Man.; principal sub-contractors, P. Mannix, Jas. Fitzgerald, A. Young, E. Foley; total employees, 208; Dr. Banting, Cutknife, Sask. in charge; the local Red Cross Hospital was used.

"Canadian Pacific Railway, Leancoil, B.C.: Contractor, H. H. Boomer, Leancoil, B.C., with 180 employees; Dr. Ewert in charge; hospital conducted by Golden Hospital Society.

"Canadian Pacific Railway, Milden-Empress Line in Saskatchewan: Force work with 156 employees; F. Jackson, Rosetown, chief contractor, with the following sub-contractors: A. Marks, P. Jackson, Frizzell and Simmons; total employees, 100; Dr. A. A. Drinnan, Outlook, in charge and using the Outlook Municipal Hospital.

"Canadian Pacific Railway, Rosetown, southeasterly: Wm. Dutton, chief contractor; principal sub-contractors, D. Grant, Ward and Sproule, Van Buskirk; total employees, 130; Dr. Johnson, Brock, Sask., in charge, having a private hospital of six beds.

"Canadian Pacific Railway, Wymark—Archives, Sask.: First contract of 35 miles by Stewart & Welsh, Vancouver, B.C., who sublet to J. A. Sandgren, Kimfall Bros., and Morrison & Dempster; second contract of 15 miles to D. Grant; total employees, 283; Dr. Knippel, Swift Current, Sask., in charge, using Swift Current Municipal Hospital.

"Canadian Pacific Railway, Naicarn, Melfort, Sask: Chief contractors were Stewart & Cameron, 167 Grain Exchange, Winnipeg, Man., assisted by nine sub-contractors; total employees, 243. Doctors in charge were Dr. Thorn, Pleasantdale, and Dr. Baker, Melfort. Hospital used was Melfort Municipal.

"Canadian Pacific Railway (1) Tuffnell, Sask. to 20 miles north of Wadena, Sask., 50 miles in all. Chief contractors were Grant Smith & Co., and McDonald Ltd., Vancouver, B.C. There were eight small sub-contractors; total employees, 180.

"(2) Extension of above line for 45 miles to Tisdale, Sask., also contracted by Grant Smith & Co., and McDonald Limited, with Treadway & Sons, Tisdale, and Jas. Miller, Tisdale, as sub-contractors; total employees, 225. Medical service was furnished by Dr. Rollins of Wadena and Dr. Somers of Foam Lake with hospitals in Wadena and Tisdale."

#### EASTERN DIVISION

The Inspector for Eastern Canada reports as follows:—

"The chief works going on in the Eastern Division are the construction of the dry dock at Courtenay Bay, N.B., and of the Welland canal.

"*Courtenay Bay*.—Courtenay Bay is situated about three miles from the centre of St. John, N.B.

"The work consists of the building of a dry dock and the dredging of the bay. The average number of men employed is from six hundred to seven hundred. The work is carried out by contracts and sub-contracts and all of the personnel are placed under the provisions of the Workmen's Compensation Act of New Brunswick.

"With the exception of perhaps eight or ten workmen, all the others reside at St. John. The quarters occupied by the few workmen who are living on the construction plant are clean and comfortable. The meals are provided by the Dry Dock Company and the food is of excellent quality. Full provision is made for the medical and surgical care of the employees. There have been very few accidents during the year. Those that occurred were of minor nature.

"*Welland Canal*.—

"From a professional standpoint two matters are of interest: first, the increase in the number of patients requiring medical and surgical attention and, second, the more decided interest taken in this work by the Workmen's Compensation Board.

"The number of patients.—Our records afford the following statistics:—

"(a) The Canal Hospital, April 1, 1923, to March 31, 1924:

"Out-patient clinical examinations and treatments 3,413.

"Visits made to employees sick or injured at their homes 897.

"Patients admitted to the wards of the hospital 122.

"Hospital days 2,449.

"Deaths in hospital 4.

"(b) The Thorold Office:

"Out-patient clinical examinations and treatments 1,948.

"(c) General averages.—Of the number of patients treated the percentage of illness as against surgical (mostly accident) cases is: Medical cases, 39 per cent; surgical cases, 31 per cent.

"The percentage of returned men applying for treatment is 18.5 per cent.

"I am glad to say that the instructions I gave during my last visit, concerning the sanitation of camps, were in the main carried out. At lock No. 2, a building occupied by sub-contractors Aiken and Innes for their employees and which was condemned as totally unfit for human habitation has been abandoned. In addition, Campbell's Hotel at Port Robinson, which was likewise condemned is no longer in use. While there is some room for improvement, the sanitary conditions are in the main satisfactory.

## SESSIONAL PAPER No. 19

"In my last report, I pointed out the fact that dredges working in the Port Robinson section were discharging raw sewage into the canal. This would appear to have been a contributory factor to the outbreak of typhoid which occurred at Thorold. This pollution has now ceased.

"While sanitary conditions in the canal area are on the whole satisfactory, there is still room for some improvement in the camps, and it is hoped that the advice which has been tendered by your Inspector in this regard will result in further improvement."

## (11) POLLUTION OF BOUNDARY WATERS

By Order in Council of June 19, 1923 (P.C. 1091), approval was given to the "Regulations concerning Water for Drinking and Culinary purposes on Vessels navigating on the Great Lakes and Inland Waters."

The following is a report of the work done towards the enforcement of these regulations during the navigating season of 1923.

The general idea underlying the work done was a reconnaissance of the conditions prevailing relative to the supply of a potable water for drinking and culinary purposes for vessels engaged in navigation on the Great Lakes.

This involved the physical examination of the pumps, piping, tanks, outlets and water purification apparatus, if any, aboard these vessels, as well as a quick reconnaissance of the vessels themselves for possible causes of contamination of the water supply; visits to the docks at the terminal ports of the various fleets of passenger steamships engaged in this traffic; correspondence and interviews with health and navigation officials regarding the certification of water supplies ashore, compliance with regulations for maintenance of water supplies of standard quality, etc.

Considerable co-operative work has been carried on with the representative of the United States Public Health Service, by correspondence, reports of steamship inspections, certification of water supplies, and water analyses reports exchanged.

Throughout the season, steamship companies operating vessels in passenger service on the Great Lakes have been supplied with copies of Water Analyses reports and where it seemed advisable, attention of the management of these organizations was drawn to flagrant violations of the Regulations. Also copies of the Regulations concerning water for Drinking and Culinary purposes on vessels navigating on the Great Lakes and Inland Waters of Canada, were distributed to every known Canadian steamship company operating vessels on the Great Lakes.

A definite result is shown by the improvement in the quality of the drinking and culinary water in use by the following companies:—

(1) Niagara, St. Catharines and Toronto Railway and Navigation Company; the ss. *Dalhousie City* and *Northumberland* have now the record for the cleanest water in the port of Toronto, for the season 1923; whereas formerly they were reported against as careless by the officials of the Department of Health, City Hall, Toronto.

(2) The Canadian Pacific Great Lakes Passenger Steamship Service was improved by alterations to the drinking water tanks on board the ss. *Manitoba*, the capacity of this tankage being changed from about 900 gallons to 5,200 imperial gallons, which is equivalent to 30 gallons per capita. On the occasion of re-examination of this steamship on August 10, the shore superintendent for the Canadian Pacific Railway at Port McNicol, expressed his appreciation of the work being done by health officials to improve the water service on their vessels.

15 GEORGE V, A. 1925

(3) The Dominion Transportation Company and the Owen Sound Transportation Company both have shown appreciation of the work being done.

Bacteriological reports of samples of water taken throughout the season of navigation from the vessels of these organizations are evidence of improvement accomplished by cleaning and chlorinating the ships' water supply systems.

(4) Three deaths from typhoid fever having been reported among the crew of the freighter *Canadian Engineer* of the Canadian Government Merchant Marine, special attention was given to this vessel and the attention of the Master particularly drawn to various possible sources of contamination of the water supply aboard his ship.

Certification of the municipal water supplies at various Great Lakes ports having been obtained from such authorities as the Provincial Board of Health for Ontario ports and the United States Public Health Service for ports on the other shore, note was taken of the facilities available at the docks of ports visited for supply of such water to vessels. It was found that:—

At *Montreal*, vessels of the Canada Steamships Line obtain water from hydrants at Victoria pier.

At *Prescott*, drinking water is obtained from the municipal system by the Prescott and Ogdensburg ferry steamships.

At *Kingston*, water is taken by various passenger vessels.

At *Toronto*, passenger vessels of the following steamship companies fill their tanks from hydrants at the wharves, viz.:—

(1) Niagara, St. Catharines and Toronto Railway and Navigation Company.

(2) Canada Steamships Lines Limited.

(3) Toronto Ferry Company.

*Windsor-Walkerville* area has two points where steamships may fill their water tanks, viz., at hydrant at foot of Brock Street and the hydrants at Walker dock.

*Sarnia* has pipe lines laid on to the docks at Point Edward.

*Midland* wharf is provided with water pipes that are supplied by the municipal water works.

Of the eighteen Canadian ports, suggested by officials of the Provincial Board of Health of Ontario as probably capable of furnishing water equal to the United States Treasury standard, only seven have facilities at the wharves from which vessels may obtain drinking and culinary water.

As the polluted water of Great Lakes harbours is unfit for use, and vessels are often detained for periods of variable duration at these ports, it is very important that the storage capacity of the tanks for drinking and culinary water should be ample.

That there is a great variation in the quantity of water available for drinking and culinary purposes on Great Lakes vessels is clearly shown. It is also noticeable that although it is a comparatively simple matter to obtain water of the required standard, there are numerous passenger vessels of Canadian register in this area, whose water tanks have a per capita capacity less than the water consumption on vessels of the British Navy or Merchant Marine.

In this regard it is of interest to note, that almost invariably, the bacteriological records of steamships having water tanks of small capacity, such as the *Manitoba*, *Caribou*, *Manitou*, *Midland City*, *Alberta*, *Bon Ami*, *Corona*,

## SESSIONAL PAPER No. 19

*Cayuga, Rapids King, Rapids Queen*, were far from satisfactory. There would appear to be two important points with respect to the water tanks, i.e.:—

- (1) They must be kept clean.
- (2) They should be of ample capacity.

In the cases of the passenger steamships in the above list, not only were the tanks for drinking and culinary water inadequate in size, but also, laboratory tests of samples of water taken at regular intervals from the supply systems aboard these vessels, showed the culinary and drinking water to be badly contaminated by the presence of colon bacilli in excess.

The provision for protection of the water supply, at the waterworks, has been noted at practically every terminal port visited through the season. It was observed that with perhaps three exceptions, the method of disinfection was by means of liquid chlorine.

With regard to the responsibility for supervision of the supplies of water for drinking and culinary purposes, on passenger steamships, engaged in other than ferry service on the Great Lakes system, a general division of the traffic is as follows:—

On the lake Ontario-river St. Lawrence routes the tourist traffic is carried almost entirely by passenger steamships of Canadian register.

On lakes Erie and Michigan the opposite condition holds true. But, on the lakes Huron-Superior service statistics, compiled by officials of the United States, show that sixty-one per cent of the travelling public is carried by passenger steamships owned in Canada.

The taking of water samples and the reports on their subsequent analyses by health officials at Toronto, Windsor, Owen Sound and Fort William, has been a powerful aid in accomplishing such improvements as have been made this season.

During the present season of navigation the appearance of fleets such as those of the Bay Line, Eastern Steamships Company and other owners have increased shipping of Canadian register on the lower lakes by over forty steamships. So also, a Norwegian fleet of some sixteen steamships has added to the problems involved in the whole matter under investigation. To handle these steamships in the Great Lakes, pilots of Canadian nationality are taken aboard at Montreal. These pilots should be instructed as to the regulations concerning drinking and culinary water, restricted areas, etc.

Typhoid fever among passengers and crews of Great Lakes steamships is undoubtedly much greater than is shown by the figures given below which were compiled from data of a fragmentary nature. The limited time spent on the whole question of water supply of the Great Lakes shipping did not admit of a thorough investigation of any particular phase of the matter.

The total number of cases of typhoid fever reported from Great Lakes shipping during the period under review is as follows:—

Steamships of Canadian register—45 cases, 7 deaths.

Steamships of United States register to August 18, 1923.—18 cases, 1 death.

## SUMMARY OF SEASON'S WORK, 1923

Vessels boarded by Health Officials	Port	Had vessel separate supply system	Number of anal- yses of water supply	Remarks
"Keewatin".....	Sault Ste. Marie { Fort William Port McNicol Port McNicol	Yes	7	Considerable improvement in quality of water supplied.
"Assiniboia".....	Sault Ste. Marie { Fort William	Yes	11	Considerable improvement in quality of water supplied; two persons developed typhoid in August.
"Manitoba"....	Owen Sound { Port McNicol { Sault Ste. Marie	Yes, but inadequate	12	Two cases of typhoid developed in August. New tank capacity of 5,200 gallons put aboard this ship.

DOMINION OF CANADA

ANNUAL REPORT

OF THE

SUPERINTENDENT OF PENITENTIARIES

FOR THE YEAR 1923-24

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
F. A. ACLAND  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1925

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander in Chief of the  
Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to lay before Your Excellency the Annual Report of the Superintendent of Penitentiaries for the fiscal year ended March 31, 1924, made by him in pursuance of the provisions of section 19 of the Penitentiary Act.

I have the honour to be, sir,

Your Excellency's most obedient servant,

ERNEST LAPOINTE,  
*Minister of Justice.*

# REPORT OF THE SUPERINTENDENT OF PENITENTIARIES

FOR THE  
FISCAL YEAR ENDED MARCH 31, 1924

To the Hon. ERNEST LAPOINTE, B.A., LL.B., K.C.,  
Minister of Justice.

HONOURABLE SIR,—I have the honour to submit reports and statistics regarding the administration of penitentiaries for the fiscal year ended March 31, 1924.

The number of inmates in custody at the close of the fiscal year was 2,225, as compared with 2,486 at the beginning of the year. The average daily population was 2,373.

The following table shows the movement of population at the several penitentiaries:—

Average daily population.....	2,058	2,417	2,582	2,373

There has been a considerable reduction in the number of inmates sentenced to penitentiary throughout Canada during the fiscal year 1923-24.

The average daily population was 2,373.

The net cost per capita per diem was \$1.30.

Mr. W. A. Patchell, warden of British Columbia penitentiary, who, for thirty-two years, had been a very outstanding and most reliable officer, retired on account of ill health, the result of an injury received through coping with an insane inmate some years previously.

His place in the British Columbia institution was filled by transferring Colonel H. W. Cooper from the wardenship of the Manitoba penitentiary.

William Meighen, warden of Dorchester, New Brunswick, penitentiary, was transferred to the Manitoba institution vice Colonel Cooper.

Major George T. Goad has occupied the position vacated by Mr. Meighen, as acting warden, and has demonstrated that he possesses administrative and disciplinary ability of a very high order; that he is a discerning student of human nature. He has proven himself a born handler of men.

Satisfactory progress has been made with the construction and remodelling programme in connection with the various institutions.

At British Columbia, work on the new prison wall, to entirely enclose the buildings, was prosecuted vigorously, and Warden Patchell and his officers are to be congratulated on what was done in this connection.

Remodelling and placing in a thoroughly sanitary and fireproof condition of the various workshops of the institution has been begun.

Great improvements have been made in the waterworks, heating and lighting systems; repairing of the warden's and accountant's residences; foundation of new kitchen, bakery, officers' mess, cooling-rooms, etc., has been begun.

New double gateway has been built, and is soon to be placed in operation.

At Saskatchewan, tremendous farming and breaking of new land operations were carried on; more than half of new wall constructed, same being 25 feet high, and enclosing 22 acres of land.

Seven thousand feet of 8-inch water pipe, to connect the penitentiary with city system, was laid by inmates, and when tested with a pressure of 300 pounds to the square inch, no leak was found. This pipe was laid at a depth of from 9 to 11 feet during the winter months, with the temperature ranging from zero to 40 below.

About four hundred thousand bricks were made. Wood was cut by inmates, and hauled to the prison for the burning of brick kilns. All clay, sand, etc., used in the manufacture, are brought in from outside the prison walls by the inmates.

Sewage disposal plant has been entirely remodelled, and extended to meet the needs of the growing population.

New concrete root cellar, 50 by 100 feet, with 10-foot ceiling, has been completed; cold-storage room built under kitchen; new pipe organ installed in chapels.

At Manitoba, a modern stable, capable of accommodating twenty-four horses, has been begun; new root house and storehouse are being built, and large granary begun.

Work on new cell block, containing 208 standard cells, has been prosecuted satisfactorily throughout the year.

Extensive farming operations were carried on, and a fair crop resulted. A herd of Hereford cattle, started three years ago, has proven an unqualified success. It is hoped they will furnish, in another year, all milk and butter required by the institution, and supply sufficient beef to meet the needs of the prison as well.

Wonderful improvement in the remodelling of the buildings within the enclosure has been made.

At Kingston, the new boiler-house, electric room, pipe-fitting shop, bath-house, barber shop, changing-room, laundry, and coal vaults have been completed; new boilers installed, and placed in operation. This building is considered by experts who have examined it as the best of its kind they have seen, and frequent applications are received from outside sources, asking to be permitted to view the very efficient engineer's department now erected at this institution.

Large gangs have been employed in pointing the old prison wall, built between 1825 and 1830.

## SESSIONAL PAPER No. 20

Renovation of the entire prison has been carried out. Quarrying and extensive farming operations, as well as repairing of roads surrounding penitentiary property, have been carried on. The construction of a new sewage disposal plant has been begun.

At St. Vincent de Paul, a new gateway containing administration offices, has been begun.

Completion of the new 208 standard cell wing, remodelling of several of the shops, and other important construction work, together with farming operations, have been carried on. Continuation of waterworks system has been prosecuted.

At Dorchester, the completion of the new hospital, school-room, and south wing has been accomplished; new residences for the warden and deputy warden are being erected.

A great deal of fencing has been done on the prison property, as well as rebuilding and repairing of many of the original buildings.

Farming operations have been prosecuted on an extensive scale. Stock-raising has proven profitable and desirable, and a large herd of thoroughbred Shorthorns is now owned by the penitentiary.

The discipline in most of the institutions has shown great improvement. The method of handling each inmate separately, and by methods suitable to his temperament, has produced wonderful results. This, together with a varied food diet, excellent libraries, schools, and institutional schools of correspondence, has materially assisted in the discipline.

Offence reports have been materially reduced, one institution having had only 128 offence reports recorded against inmates during the entire year.

The revenue for year amounted to \$167,910.90. This was largely derived from work done for other Government departments. Only about one-twentieth of the work that may possibly be done has as yet been furnished by the Government. It is to be hoped that sufficient work to keep all inmates usefully and continually employed will soon be forthcoming. In this connection, I quote from the report of 1919:—

The inmates of the penitentiaries are the wards of the Dominion Government, and there is no valid reason why goods required for Government use, and Government use only, should not be made, in so far as is possible, in the penitentiaries. The Government spends many thousands of dollars yearly for furniture, furnishings and equipment of various kinds, a small portion of which could be made in the penitentiaries. The revenue derived from this source would enable the institutions to pay each inmate on his discharge, or to his family while he is in prison, a small wage, which would materially assist the stricken family in keeping the wolf from the door while the wage-earner is incarcerated.

With such employment and pay for their labour, a powerful incentive would be added to the industry and good conduct of the inmates, while the wardens of the different penitentiaries would be relieved of the great trouble and anxiety now experienced by the lack of such blessings.

Religious missions were held in all of the penitentiaries during the year, and wardens report that they were productive of wonderful good, and were of assistance in the discipline.

Schools have been increased, and a great deal of correspondence work has been carried on by the various school-teachers. All teachers are impressed with the idea that it is not what inmates are taught, but what they learn, that produces results, and influences them.

Two inmates in St. Vincent de Paul penitentiary were presented with medals by provincial Government officers on account of the wonderfully good showing made in their examinations.

Libraries have been further improved by the addition of many valuable works, and also contain the very best magazines and periodicals.

The work of inspection and audit has been carried on efficiently throughout the year.

Imperial Service Medals have been awarded by His Majesty's Government to the following officers retired from the service:—

Kingston Penitentiary.—Steward Charles Bostridge, Keeper John Kennedy, Keeper James Arthur Rutherford, and Guard Calvin Silas Wheeler.

St. Vincent de Paul Penitentiary.—Hospital Overseer Daniel O'Shea.

Dorchester Penitentiary.—Engineer James Adolphus Piercy and Assistant Steward Thomas Francis Gillespie.

British Columbia Penitentiary.—Assistant Steward Thomas Sampson.

The above-mentioned had served as officers on the staffs of the penitentiaries for from twenty-eight to forty-seven years, with unblemished records.

For many years, penitentiary officials were denounced for their failure to subscribe to the doctrine of "Criminal characteristics." This continued until the most ardent of the advocates of the same admitted their mistake.

A new and equally erroneous "science" is now being advanced. Its exponents claim that any person who commits a crime is either mentally or physically defective, and usually both.

The best evidence in rebuttal of this argument is found in the fact that many thousands of men and women, who, though they have been convicted of crime, are to-day living upright, honest, and honourable lives.

Believing that "Prison reform" should emanate from a conference of those having intimate and expert knowledge of the subject in general, and experience in the handling of criminals, and the administration and disciplining of penal institutions, the superintendent provided for such a conference at Ottawa during the spring of 1923, when the following penitentiary officers met, and for nine days discussed, at great length, every branch of prison life and management:—

Brigadier General W. S. Hughes, D.S.O., Superintendent of Penitentiaries;

H. G. V. Smith, Inspector of Penitentiaries;

H. C. Fatt, Inspector of Penitentiaries;

R. R. Creighton, Dominion Parole Officer;

R. F. Uniacke, Chief Penitentiary Engineer;

W. S. Lawson, Structural Engineer;

J. C. Ponsford, Warden, Kingston Penitentiary;

W. J. Macleod, Warden, Saskatchewan Penitentiary;

W. Meighen, Warden, Dorchester Penitentiary;

Colonel R. de la Bruère Girouard, Warden, St. Vincent de Paul Penitentiary;

Colonel H. W. Cooper, Warden, Manitoba Penitentiary;

Major G. W. Trollope, Deputy Warden, British Columbia Penitentiary.

The following subjects were discussed, and great benefit has resulted through the very able handling of same by the various officers whose long experience in the penitentiaries enabled them to speak authoritatively on all subjects:—

Penitentiary Act, clause by clause, and amendments recommended;

Rules and regulations revised, and many changes submitted; and recommended;

Reception of inmates;

The care and treatment of inmates;

Segregation of inmates;

Education and reformation;

Libraries and schools;

Work for inmates;

Wages for inmates;

Teaching of agriculture to inmates;

Hospitals for and medical treatment of inmates;

## SESSIONAL PAPER No. 20

Dental clinics for inmates;  
Treatment of venereal diseases of inmates;  
Food of inmates;  
Parole Boards;  
Area parole officers;  
Discipline in general;  
Training of officers;  
Selection and appointment of officers;  
Uniforms;  
Administration;  
Purchasing of supplies.

The treatment of inmates in a penitentiary continues to be a subject for debate, and many hundreds of persons, who know little of crime, and nothing of criminals, still continue to offer suggestions or make demands for treatment of the criminal. It is most fortunate for the convicted ones that the suggestions of these inexperienced people are seldom attempted.

In a properly managed institution, discipline is essential. It was the lack of discipline in most cases that caused the commission of the crime for which the inmate has been sentenced. Proper discipline does not tolerate dungeons, chains, nor any form of cruelty or brutal treatment.

There are occasions when inmates must be placed under restraint, but any such must be of a friendly and merciful nature. Real discipline must be humane, just, and firm. There should be no pampering or coddling of inmates. Such treatment has a tendency to make them consider themselves as heroes, and in some cases acts as an incentive for them to continue in wrongdoing. Persons who commit crime are confined in prison to protect society from them, and also punish them for the offence committed. At present, they are disciplined, taught a trade, how properly to live, treated for mental or physical defects, if they have any, and turned out of prison much improved generally, but our system, while excellent in the care and treatment of inmates as above described, is far from satisfactory in the great essential of character building.

Penitentiaries should be places wherein an inmate may be confined to protect society from him, and in order that he may learn to appreciate the value of his liberty; where he may be trained to become a useful citizen. A penitentiary has no right to exist if inmates discharged from same are not turned out better citizens than when they entered. Inmates might be made a profitable asset, rather than a dangerous liability. This may be done through their being given a fair education, taught a trade, paid a fair wage for labour well performed, thus enabling them to assist in supporting those dependent upon them; where they should be well grounded in the matter of their responsibility as citizens.

This may be done by the Government providing sufficient work to keep all inmates suitably and continually employed, and providing the proper class of officer.

These are two of the great essentials in connection with penitentiary management. No success may be looked for where idleness and inefficiency prevail. There may be a chance for reform where work is provided, but idleness breeds perpetual despair, discontent, and engenders viciousness, which cannot be cured by punishment or solitude. Without sufficient and proper work, much of what may be learned in a penitentiary is not that which will make for efficiency or morality, outside.

In the past, a great mistake has been made by many nations in attempting to supervise the inmates in their institutions in masses, or to treat them on an average. In Canadian penitentiaries, an endeavour to study the inmates thoroughly, and handle them individually, is being made.

Classification and segregation of inmates are essential before real success may be looked for. Recommendations from all administrative penitentiary officers for the past thirty years have continually been made in this connection.

It is good to do all that is now done, but if along with what we now do, we could build better characters so as to make them manly, God-fearing men, a still greater essential and benefit would result.

There should be a training school for officers, not only for those now on the staffs, but one in which all new officers should be thoroughly instructed how to properly deal with, control, and morally improve their fellow-men before they be permitted to assume duty in an institution in charge of inmates. It is a very serious mistake to place human beings under the control of officers untrained and entirely unfitted to even properly supervise them at work, much less to influence them for good.

Character builders are essential as successful penitentiary officers. Great care should, therefore, be taken in the selection of all officers employed.

On a religious conception of the entire prison problem real prison reform must be based. It is a recognized fact that, in order to secure a rebuilding and satisfactory reconstruction of the inmate's character, his heart must be reached. It is a very serious mistake to place law-abiding, God-fearing officers. Should a godless or brutal officer be placed in charge of inmates, his example will undoubtedly make an impression on them for evil.

Many of the young men coming to penitentiary confess to a lack of home influences that make for good. Most of these are naturally endowed, who became criminals through lack of good influences, bad environment, and lack of proper disciplinary training in their youth.

There are some subnormal mentally, who were more susceptible to above conditions, and, therefore, fell more readily.

There are others who may be said to be mentally irresponsible, yet not altogether insane.

Occasionally one who is really insane is received. He is at once transferred to a mental disease hospital for care and treatment.

Most of the disciplinary trouble in the penitentiaries is attributable to the two middle classes. There should be separate institutions for their care and treatment.

If proper selection and inspection of immigrants, before permitting them to come to Canada, were made, it would materially reduce the numbers committed to penitentiary, and, I am credibly informed, would largely reduce the numbers now confined in mental disease hospitals.

All women sentenced to penitentiary in Canada are incarcerated in the female prison of Kingston penitentiary. This department is very ably managed by the matron, Miss Robinson, and her assistants, Mrs. Allain and Miss Frizzell. Wonderful improvement has been made, and the female ward ranks high as compared with similar female institutions viewed elsewhere.

Work has been begun on the new female prison, separate and apart from the male enclosure. This will materially further improve opportunities for advancement.

## RECOMMENDATIONS

(1) The providing of institutions for the segregation and classification of all inmates is again strongly recommended.

## SESSIONAL PAPER No. 20

(2) The reopening of a mental disease hospital in connection with penitentiaries is considered essential, as great difficulty is experienced in securing the transfer of really bad men, who go insane, to the provincial mental disease hospitals.

(3) Segregation of habitual criminals.

(4) More Government work for inmates should be provided. At the present time, only about one-twentieth of what can be done is provided.

(5) Payment of wages to well-behaved inmates for work well done.

(6) Appointment of parole officers in each penitentiary area.

(7) The securing by area parole officers of situations for inmates prior to discharge.

(8) The creation at each institution of a Parole Board.

(9) Training of officers before being permitted to assume duty or take charge of inmates.

(10) The empowering of those in charge of penitentiary administration with authority to administer and discipline same on similar basis to that of the Royal Canadian Mounted Police.

(11) The annual Penitentiary Congress held for three years past has proven such a success, and so much good has resulted therefrom, that it should be made compulsory, and meetings held yearly at the different institutions in turn.

(12) A change in the method of purchasing supplies should be made. At the present time, with few exceptions, the penitentiary officers are not furnished with samples of the goods the firm receiving the tender has supplied the purchasing agent. They, therefore, have no knowledge that what they receive is up to the sample submitted with tender. Great delay often results in the delivery of goods requisitioned for, while a tremendous financial saving will result if methods suggested by superintendent be adopted. Present methods employed are unbusinesslike and expensive, and would not be tolerated by an efficient business concern. Now that a tremendous amount of work is being undertaken for other Government departments, it is essential that the cumbersome methods of purchasing now in vogue be abandoned, and replaced by business methods.

### "AS OTHERS SEE US"

The following are a few letters and reports eulogistic of what is being done in penitentiaries. These could be augmented by many more, as from Halifax to Vancouver, complimentary letters have been received by the superintendent as to what is now being done in penitentiaries.

#### *Extract from letter written by C. F. Neelands, Superintendent of the Ontario Reformatory at Guelph*

I wish to express my great appreciation of the courtesy shown me recently, when I visited your institutions at St. Vincent de Paul and Kingston, and I must congratulate you on the efficient manner, in my opinion, in which they are operated.

I realize to some extent the great difficulties which you have met and overcome, and those which you are now striving to overcome, and I must say that of all the institutions which I have visited in recent years, the one at Kingston is the best prison, and the most efficiently operated.

Will you accept my congratulations for what you have accomplished, and my best wishes for future success.

15 GEORGE V, A. 1925

*Extract from letter of Doctor Alfred E. Lavell, Parole Officer for the province of Ontario*

I meant to have written you some time ago to thank you for your kindness in making the arrangements concerning which I wrote you from New York city. Mr. Neelands and I were given a royal reception by Lieut.-Col. Girouard and Mr. Ponsford. I think I ought to tell you that I noticed an immense improvement at St. Vincent de Paul, and there is no doubt that that is chiefly owing to Girouard and his very able chief of staff there (the C.T.I., Major Donnelly). You are fortunate indeed to have such an able warden and a graduate of the R.M.C. to assist him. To convert an institution like St. Vincent de Paul into a modern place would tax anybody's energies to the utmost but they are doing a very fine job indeed.

I was delighted to see how the penitentiary at Kingston has come on since my last visit. I never saw it in such efficient shape as now. There has been improvement, I think, in every respect. As I passed through it the other day, my memory went back many times to the place as it was when I first saw it, forty-five years ago, and the contrast was very startling.

We saw nothing in Ohio, New York or New Jersey that was fit to be put in the same class with the penitentiary at Kingston and the Ontario reformatory at Guelph. These two latter are quite distinct and this is necessarily the case, but it was a great satisfaction for an Ontario citizen to see the difference between our two best places and what they have across the line.

The following extracts are from the report of an officer of the Health Department of the Dominion Government, made to the Superintendent of Penitentiaries after a visit of inspection to the three eastern penitentiaries:—

#### KINGSTON PENITENTIARY

Dr. Anglin, who is in charge of the medical service of the prison, took me through the medical quarters. The quarters both for examination and treatment and hospitalization are attractive, comfortable and spotless. The system of examining and treating prisoners for the venereal diseases is modern and adequate in every way. Every prisoner entering the institution is given a blood test (Wassermann) for the presence of syphilis. If positive, modern treatment is given. This work is carried on by Dr. Austin who is in charge of the provincial clinic.

As treatment is proceeded with, the blood is taken and examined at intervals as a control of progress of cure. Spinal fluid examinations are made at the conclusion of treatment. The work of examination and treatment of cases of syphilis is all that could be desired. No general examination is made for gonorrhœa of prisoners entering the institution. Those only who have symptoms of either acute or chronic gonorrhœa are treated. Every facility is at hand for doing this work efficiently and satisfactorily. Records of patients are kept from day to day, showing the method of treatment and the progress of the disease while under treatment.

Patients who are in an infectious stage are isolated. Their eating utensils, personal and bed linen are kept apart from those of other patients, so that there is no possibility of spreading the infection. It is found that 10 per cent of those examined give a positive Wassermann test for syphilis. The adequate treatment of this number will not only very materially diminish the number of cases of syphilis in the community, but will mean a very great saving financially to the community as this class of patient is apt eventually to become a public charge either in an incurable institution or an asylum for the insane.

The percentage of those who have had gonorrhœa is not known but the number of those who present themselves for treatment for either acute or chronic symptoms is not very great.

The work of venereal disease control is in every way modern and adequate and there is very little room for improvement.

#### ST. VINCENT DE PAUL PENITENTIARY

Dr. Robert is admirably suited to his work, is enthusiastic, energetic and capable. He spent some time in the study and treatment of the venereal diseases in the army, so that he is personally well equipped for the work.

The quarters for treatment of the sick are admirable in every way; spotlessly clean and comfortable. The system for the handling of venereal disease patients is excellent. Records of patients and treatments given are well kept and the history and progress of each case is readily accessible at a moments notice. Modern treatment is given and every

## SESSIONAL PAPER No. 20

facility is at hand for this purpose. Prisoners who are suspected of having venereal disease are subjected to whatever bacteriological or serological examinations as are considered necessary and treatment is instituted as required.

Patients suffering from venereal disease, if an acute or infectious stage of disease, are isolated; their personal linen, such as underwear, shirts, socks, blouses, and other garments as well as their bedding, are kept apart from those of other prisoners. Their laundry work is done apart from the laundry work of other patients. Their dishes—cups and saucers, plates, knives and forks—are kept apart and washed apart from the others and the patients bear upon their uniforms a special mark which acts as a warning to the other prisoners to keep away. If the patient is refractory or refuses treatment he is isolated.

## DORCHESTER PENITENTIARY

Colonel Goad and Dr. Teed, of the Dorchester penitentiary, afforded me every opportunity for studying the conditions appertaining to the examination and treatment of prisoners for venereal disease and very materially aided me in the course of my work. I was struck with the kindly and sympathetic way in which the prisoners were treated by Colonel Goad, Dr. Teed and their associates.

The method of procedure and treatment of prisoners who are suffering from venereal diseases are identical with those in force at St. Vincent de Paul. All prisoners suffering from venereal diseases receive modern and adequate treatment. Isolation of the patient and proper care of clothing and utensils are carried out. Records are excellently kept. Under present hospital conditions it is very difficult to give adequate treatment, but this difficulty will soon be overcome by the splendid new hospital section which is under construction.

## A VISITOR FOUND IT A MODEL

GAOL PHYSICIAN, HOME FROM PENITENTIARY, WHITHER HE ACCOMPANIED PRISONER, DESCRIBES INSTITUTION

Dr. W. D. Forrest has arrived home from Dorchester, N.B., whither he accompanied a prisoner sentenced to the penitentiary whose condition of health made it necessary for him to be accompanied by a physician. The doctor is most enthusiastic over the perfection of all the arrangements at the penitentiary and describes the management, as he saw it, as being the last word in efficiency.

"An addition is now being built to the infirmary, which will make it when the work is completed, fully equal in the completeness of the equipment and in every other respect to the new pavilion at the Victoria General hospital," said he. Really it is magnificent. There are offices for the doctors, an operating room, an X-ray room, a dark room, for use in case of eye troubles, a dispensary and a spacious sun parlour, while on the roof is a recreation hall seating fully five hundred persons.

I was conducted through the domestic department, and saw samples of food—and excellent food it is. I tasted some of the bread, and was informed that the prisoners have meat once every day, with some good broth and jam in the evening, the breakfast being of porridge, bread and tea. The rooms occupied by the prisoners are well heated, each being provided with a bed which folds up against the wall, and thus gives plenty of space, a table for writing, hot and cold water, and toilet, as well as electric light, the use of which is permitted until nine o'clock in the evening. There is a fine library. I went through all the workshops—shoemaking, clothing, blacksmith, for the place is a hive of industry. There is a large farm outside the grounds of the institution, which is worked by the prisoners—trusted men, under guard, of course. Those who cannot read or write are taught to do so, and in short, there is every evidence of wise and capable management. I should say that there is not on the continent a penal institution conducted on finer lines, or affording finer facilities for its uses as a penitentiary. The buildings are very fine. Convict labour is used in the construction work, under a master mechanic. At the present time they are shaping in the stone department large blocks of stone to be used in building a residence for the warden, and also one for the deputy warden.

The warden remarked to the doctor that the great difficulty is finding suitable employment for the prisoners, and certainly the problem seems to be one which he is solving in a very masterly way. The penitentiary, as is well known, is located in a beautiful and healthful section of New Brunswick, and it is interesting to know that it affords so satisfying an illustration of the sense of responsibility to the prisoners which marks the ideal prison management.

15 GEORGE V, A. 1925

*Copy*

BARON DE HIRSCH INSTITUTE

410 BLEURY STREET, MONTREAL.

Brigadier-General W. S. HUGHES,  
Superintendent, Penitentiaries,  
Ottawa.

DEAR SIR,—As per your request, I have pleasure in submitting to you my report of my visit at the Dorchester penitentiary, which took place on the 23rd of July.

I may state that I was very much pleased to see everything was conducted in the best manner. The cells are in a scrupulous condition and in general the discipline is very good, and the inmates are not of a troublesome type. The mechanical work there is the most splendid that I have ever seen in an institution. The industrial work in the tailor shop and shoe shop surprised me very much. They are given very good material, and the things turned out for the prisoners who are released are of the latest fashion. The new hospital will be a credit to you after it is constructed, and will vie with the Royal Victoria hospital, of Montreal, in its comfortable and airy rooms. The school is conducted in a very good manner, and I noticed that there were some inmates who were taking up engineering and did very good drafting.

I cannot refrain from complimenting the warden upon the good work which he is doing. I have been informed that as there is no Prisoners' Welfare Society in New Brunswick, the warden is doing all their work, namely, looking after the prisoners after they have been released from the institution and giving them positions, so as to keep them from reverting to their old habits. It is, therefore, no wonder to me, that 175 inmates of that institution have been released on ticket of leave last year.

I may say that you can very well be proud of this institution, as to me, it seems one of the best that I have visited in the Dominion, and I thank you very much for proposing to me to call there, during my stay in New Brunswick.

Yours very truly,

(Sgd.) A. L. KAPLANSKY,  
*Superintendent, Legal Aid Department.*

(NOTE: Mr. Kaplansky looks after the spiritual welfare of the Jewish inmates at St. Vincent de Paul penitentiary.)

*Copy*

REV. L. J. WASON

St. JOHN, R.R.I., NEW BRUNSWICK

To W. S. HUGHES, Esq.,  
Superintendent of Prisons,  
Ottawa.

Dear Mr. HUGHES,—It was for a long time my desire to visit the prison at Dorchester, N.B., but that wish was only gratified a few days ago, when on Sunday I was privileged to preach in the chapel and on Monday when I was permitted to look over the institution, and hearing that you were Superintendent of Prisons I thought I would take the liberty of writing you and saying how much I was pleased with my visit.

In the first place I was glad to know that the spiritual interests of the inmates were so well cared for, and I am bound to say that the heartiness with which the latter entered into, or participated in the service which I conducted with the chaplain was at once a surprise and delight to me. Then I ought to say that I was glad to see that a strong and earnest effort is being made, not simply to punish, but to make the punishment remedial, and from the good account I got of men on parole, I feel satisfied that the attempt is meeting with a good measure of success, which fact, I noted, was most encouraging to both warden and chaplain.

I was also much pleased with the way in which the work was carried on by the men at their various occupations, and also the provision made for them in respect of food and cells, the latter in the new wing and in the hospital, now in course of erection, being a great revelation to me.

## SESSIONAL PAPER No. 20

The warden, I found, was inordinately proud of the new wing, and thinks there is "Nothing finer in Canada." I was gratified to see the way in which Mr. Meighen seems to be carrying out his heavy and responsible task (for such it evidently is) to an outsider, at least; he apparently knows his work and takes pride in lifting the institution to the highest point of perfection possible.

On leaving I could not forbear to say to both the chaplain (who seems to be much respected and liked by the men) and warden that it was a pity that such places had to exist, but since they are a necessity, it was good to be able to find that they were so well conducted.

Now, Mr. Hughes, if what I have said is of any gratification to you, or to your chief, to whom also I have written, I am sure I shall be very glad, for in all ranks of life when praise is due, I do think it ought to be given.

With kind regards, I am, my dear sir,

Yours very sincerely,

LEONARD J. WASON.

### CONVICTS AT ST. VINCENT DE PAUL STUDY SUBJECTS TO ENTER LOCAL UNIVERSITIES

*Are Taught by Experienced Teachers and Competitions for Medals and Diplomas are Keenly Contested—Extensive Improvements Have Been Made to Exterior of Building Which Ensures Largest Degree of Cleanliness and Comfort.*

Studying to pass matriculation examinations, and to obtain diplomas and medals given for class leaders, living in rooms with running water and individual closets, seeing moving-picture shows, and attending entertainments held periodically, and, on Sunday, listening to the gospel and music on an organ played by a master organist, 550 convicts at St. Vincent de Paul penitentiary are being equipped mentally and physically for a new beginning in life.

A visit to the penitentiary shows what wonders modern methods and expert supervision have wrought for those condemned to spend years shut out from the ordinary life of the world.

At St. Vincent de Paul for the past few years there has been considerable activity for warden, keepers and convicts alike, in the matter of building extensions. Thousands of dollars have been saved and the future of hundreds of unfortunate men assured. This activity can be directly attributed to the energy and understanding of General Hughes, Federal Superintendent of Penitentiaries and of Colonel R. de la B. Girouard, Warden of St. Vincent de Paul, Captain Poirier, his chief assistant, and others who are at the head of the "save the convicts" movement which attains at St. Vincent de Paul. Colonel Girouard in going over the various activities and achievements of his charge with a *Standard* representative, paid special tribute to the co-operation of the Superintendent of Penitentiaries.

### WORK OF RECONSTRUCTION

Through a constructive programme two of the prison's six wings have already been reconstructed. Dingy cells have been replaced by white enamelled rooms with private toilets and wash basins with running water. The whole work has been done by the convicts themselves, thereby saving the country thousands of dollars.

A particularly fine chapel fitted with an up-to-date organ has been built. On Sundays the convicts receive spiritual refreshment and hear sacred music. The newest wing has accommodation for two hundred inmates in healthy, comfortable cells. Spring mattresses and bed sheets changed weekly preserve cleanliness.

### EDUCATION SYSTEM

The warden and his assistants are proud of an education system which has already reduced the prison percentage of illiteracy—22 per cent three years ago, to 8 per cent at the present time—among the convicts.

Two hundred and seventy convicts attend three education classes. These classes are for English, French and Italian inmates and are under direction of qualified schoolmasters.

Matriculation papers in use at Laval and McGill universities are studied and some of the more promising pupils have passed the examinations and are competent to enter these

15 GEORGE V, A. 1925

universities when they are freed. Ludger Gravel, well known Montreal merchant, has offered a diploma and a bronze medal for the convict who obtains the highest marks in the French class every year, and a diploma and a silver medal is given to the best in the English class through the courtesy of Mr. Walsh of Stratheona Academy, Outremont.

There is intense inter-racial competition between the students. Warden points with delight to the fact that last year scholars of the French class won both French and English prizes.

One of the teachers is M. Lapierre, B.A., the penitentiary librarian. The library of which he has charge would be prized by many an educational institution. It consists of 9,000 of the finest books, in both French and English.

Colonel Girouard remarked on the decrease of crime in recent months and declared that he believed this to be due to the fact that there is more employment in Eastern Canada than formerly. Last year there were 100 more inmates of the penitentiary than this year.

Respectfully submitted,

W. S. HUGHES,  
*Superintendent.*

## APPENDIX A—DOMINION PAROLE OFFICER'S REPORT

*R. R. Creighton, Dominion Parole Officer, reports:*

The following tabulated statement serves to show that the parole system continues to function in a most encouraging way, as evidenced by the fact that so large a percentage to whom executive clemency has been extended live up to the conditions imposed when parole is granted:—

TABULATED STATEMENT FOR YEAR ENDED MARCH 31, 1924

Prisoners released on parole		Revocations per cent	Forfeitures per cent	Total Loss per cent
Dorchester.....	148	2 or 1-35	4 or 2-70	6 or 4-05
St. Vincent de Paul.....	118	5 or 4-23	7 or 5-93	12 or 10-16
Kingston.....	156	5 or 3-20	10 or 6-41	15 or 9-61
Manitoba.....	33	.....	2 or 6-06	2 or 6-06
Saskatchewan.....	77	1 or 1-29	1 or 1-29	2 or 2-59
British Columbia.....	33	2 or 6-06	2 or 6-06	4 or 12-12
Total, penitentiaries.....	565	15 or 2-65	26 or 4-60	41 or 7-25
Jails, reformatories, industrial farms, etc.....	522	6 or 1-14	4 or 0-76	10 or 1-91
Grand total.....	1,087	21 or 1-93	30 or 2-75	51 or 4-69

The total number of inmates released from the various penitentiaries, reformatories and jails during the year was 1,087, showing a decrease of 266 as compared with the preceding twelve months; the number released from penitentiaries shows a decrease of 68 and from the other institutions 198. Paroles revoked and forfeited were 51, or 4.69 per cent of those issued, as compared with 5.31 per cent for the preceding year.

The receiving of reports from those on parole comes within the scope of the duties of the Royal Canadian Mounted Police and the following table as prepared by them gives the movement from 1899 to March 31, 1924:—

Released on parole from penitentiaries.. . . .	7,879
Released on parole from jails and reformatories.. . . .	8,983
	16,862
Licenses revoked.. . . .	558
Licenses forfeited.. . . .	401
Sentences completed on parole.. . . .	14,982
Sentences not yet completed.. . . .	921
	16,862

A reference to the above table shows that of those paroled 14,982 have carried out the conditions under which they were liberated. The forfeitures and revocations number 959, or 6.4 per cent.

During the year this office reported on 480 cases and it is gratifying to be able to state that in almost every instance employment was found for those released. This, together with the securing of information regarding antecedents and general character prior to incarceration of applicants, necessitated an extensive correspondence of a widely varied nature.

In this connection I again wish to express my sincere thanks to the Salvation Army for its willing and practical co-operation. They have always extended a helping hand and the "down and outs" as well as ourselves owe them a deep debt of gratitude. The police authorities also are always of very great assistance in promptly furnishing any information requested coming within their knowledge.

15 GEORGE V, A. 1925

During the year the usual visits to the various penitentiaries were paid and those inmates who expressed a desire to interview me were given the opportunity. Notes were kept of the salient points they wished to bring out in connection with their cases. These prove of much value when preparing reports for the department. Although the time at my disposal is too short to make a study of the man, even a few moments of frank conversation very frequently enables me to form a fairly correct opinion as to his attitude towards society. It is also a satisfaction to the inmate to feel that he has had an opportunity of making his representation to an officer of the department sent specially for that purpose all of which makes for greater contentment and better discipline particularly when it is impressed upon him that unless he helps himself by uniform good conduct in the institution he cannot expect that others will be able to do much for him.

If I may be permitted to do so, in view of my long experience in various phases of prison management, I would like to add a few words to much that has already been said favouring a proper and thoroughly equipped institution for the first offender and others amenable to reformation.

In spite of the fact that those in charge of our penitentiaries fully realize the desirability of separating those susceptible to reform from the more hardened class of inmates and conscientiously strive towards that end, it is generally admitted that the present physical conditions are such that it is impossible to achieve much in that direction. That the close contact into which the two classes are of necessity brought while confined in the same institution has a pernicious effect upon the better disposed I do not think there can be any doubt. It is not unnatural to suppose that the younger class of inmates (and they comprise a large percentage of our population) are ever ready to listen to and follow the advice of those whose exploits in the path of crime and long criminal careers have fired their misguided ambitions. Were they removed entirely from the contaminating influence of their pernicious associates the prospects of reform would be very much enhanced, and I am satisfied that had we such an institution it would well repay the original cost and upkeep by the increased number of inmates it would return to society as law-abiding citizens.

In conclusion I desire to express my sincere thanks to the wardens for their assistance and kindly co-operation with me in my work at all times, but more particularly when visiting their institutions.

## APPENDIX B—WARDENS' REPORTS

## KINGSTON

*J. C. Ponsford, Warden, reports:*

	Male	Female	Total
Inmates remaining at midnight, March 31, 1923..	703	26	729
Inmates remaining at midnight, March 31, 1924..	661	31	692

There, therefore, was a decrease in the inmate population as compared with the previous year of 37, the male population having decreased 42 while the female increased 5.

The number of inmates received during the year was:—Males, 270; females, 19; total, 289.

The discharges during the year were as follows:—

	Male	Female	Total
Expiration of sentence.. . . . .	100	3	103
Parole.. . . . .	149	7	156
Deportation.. . . . .	32	3	35
Death.. . . . .	3	..	3
Pardon.. . . . .	20	..	20
Escape.. . . . .	4	1	5
Returned to provincial authorities.. . . . .	4	..	4
	312	14	326
Inmates received during year.. . . . .			289
Net decrease.. . . . .			37

There are at present 12 inmates confined in the different asylums of the province, 9 of whom are serving life sentences.

Of the 692 incarcerated here, 448 are under the age of 40 years, and 100 between 40 and 50 years.

The sanitation of the institution is all that could be desired. Infectious and contagious diseases are unknown. From the 1st January, 1924, three samples of water have been sent to Queen's University Laboratory weekly for examination.

The hospital maintains its usual high standard of efficiency. A large number of minor operations have been performed and eighteen major operations. All the latter cases have made exceptionally good recoveries.

An operation which calls for special mention is one performed on inmate, K-614. This man, after killing his wife, turned a shotgun on himself. On reception of this inmate surgeon reported:—

"On examination I find a large ventral hernia on the right side of his abdomen, with a large mass of unprotected bowel protruding about one foot in length. This mass appears to consist of the entire caecum and a portion of the ascending colon, and at one point there is a fistula through which all the feces discharge into the dressings, and there is no natural bowel movement through the anus.

"Since June last he has been in the hospital and jail at Welland, Ont., and he states that after two operations were performed the bowel has been in its present condition since that time. Dr. Howell, surgeon of Welland jail, reports that he had requested that a radical operation for re-section and anastomosis of the bowel be performed last September but the Attorney General advised against an operation being done.

"This man's mental condition is dull, but physically he is well nourished and suffers comparatively little pain. An operation for re-section of the exposed bowel and closure of the abdominal wound will be necessary in the near future. This serious operation will require the services of a skilled specialist in abdominal surgery."

An operation was performed by Prof. Austin, restoring the protruding intestine, and closing up the abdominal wall. This inmate has now made a good recovery, and is doing light duty around the institution.

I regret to have to report three deaths during the year, two of which took place in the provincial mental disease hospitals. K-448, died on September 5, 1923, from Hemiplegia and Glycosuria. He was received here on a stretcher in this condition. C-574, died in the Psychiatric Ward, Ontario Reformatory, Guelph, on May 1, 1923, and C-815, passed away at the same place on June 22, 1923.

The past year has been a very unfortunate one in the matter of escapes. On September 10, 1923, inmates Sullivan alias A. Brown, H-590; A. Slade, alias Ryan, K-166; T. Bryans, H-367; G. Simpson, H-751; E. McMullen, K-239; who were working with the carpenter and mason gangs, made their escape over the eastern boundary wall. McMullen was recaptured the same afternoon about five miles from the institution. Slade alias Ryan was recaptured in Minneapolis, Minnesota, and returned to this penitentiary on January 8, 1924. Sullivan alias Brown, who was with Slade, was shot and killed in Minneapolis the day after Slade's recapture. Simpson and Bryans are still at large.

An investigation was held into the escape, and as a result two officers were dismissed, one was retired, and four were fined substantial amounts. Had the two dismissed performed their duties any attempt to escape would have been frustrated.

On September 20, 1923, insane inmate Henrietta Dougherty, H-308, escaped from the Hospital for the Treatment of Mental Diseases, Queen street, Toronto. She was picked up at Niagara Falls, Ont., and returned here on March 3, 1924.

Inmate W. H. Jones, K-399, escaped from the farm gang on the afternoon of March 29, 1924, and was recaptured about forty minutes later.

Good progress has been made in the building programme. The new laundry and bath-room has been completed and is modern in every respect.

The changing room has been finished and is now all that could be desired. Considerable painting and decorating have been done throughout the prison and everything is spick and span.

The carpenter, tin and paint and blacksmith shops have been kept very busy with institutional work besides doing a large amount of work for the different penitentiaries, also custom work.

The sewage disposal plant has been started and it is expected that it will be finished and in operation before the cold weather in the autumn of 1924 sets in.

A fire, which might have assumed serious proportions, broke out in the store-room of the shoe shop in the early morning of January 8, 1924, but owing to the prompt work of the officers of this institution, who were ably assisted by the Kingston Fire Brigade, the fire was got under control in a short time. About \$1,200 damage was done.

The mail bag department shows a revenue for the year just closed of \$36,949.30, which is arrived at through doing work for other Government departments.

The tailor shop has been kept busy all year by doing work for the Indian Department, Royal Canadian Mounted Police, Forestry Branch, as well as making uniforms for officers and inmates' clothing.

The same remarks apply to the shoe shop, which has turned out work for the Indian Department, Interior Department, Post Office and Air Force; besides making all footwear required for officers and inmates.

The steward's department has given good service throughout the year, and no complaints have been received regarding the food.

SESSIONAL PAPER No. 20

The engineer's department has been moved into its new quarters and this institution can now boast of one of the finest boiler and dynamo rooms in the country. It is modern and up to date in every respect and is a model in its appointments. Considerable work has been done throughout the prison towards the improvement of things in general.

The farm has shown good results, 120 acres being under cultivation and 90 acres growing hay, with a net profit of \$1,745.25.

The school and library department take care of the literary side of the inmates' lives. Only the best reading matter is furnished them at all times. Illiterates are being taught the fundamentals of the English language, and in little or no time write their own letters in a good legible hand.

Several concerts were held throughout the year which were thoroughly enjoyed by all the inmates. I am of the opinion that moving pictures, interspersed with good, clean humour, lift many an inmate from a valley of depression.

Special menu was prepared by the steward's department for the Christmas season and no stone was left unturned to brighten the inmates' lives during the holidays.

The chaplains have been doing a wholehearted work in the uplift of the unfortunates here, and as a result the inmates leaving this institution on discharge have a brighter view of the future.

The female ward has been painted throughout and is the essence of cleanliness. Miss Robinson is to be congratulated on the magnificent manner in which she has handled the female department.

In conclusion, I wish to express my appreciation to all the officers on the staff who have so ably assisted me during the past year, and to thank the superintendent and the staff at headquarters for their kindness and assistance, all of which has been appreciated.

## ST. VINCENT DE PAUL PENITENTIARY

*R. de la B. Girouard, Warden, reports:*

I have the honour to submit herewith my third annual report; this for the fiscal year ended March 31, 1924, with the following:—

- (1) Statistical Report.
- (2) Surgeon's Report.
- (3) Chief Industrial Officer's Report.
- (4) Farmer's Report.
- (5) Librarian and School Teacher's Report.

On the night of March 31, 1924, the population of the institution stood at 551 inmates, while on the same date the previous year we had 625, showing a decrease of 74. The average population for the previous year was 666, the highest in the history of the institution. The daily average for this year shows 581, a decrease of 85. In my opinion this is caused by better labour and local conditions; the unemployment situation having eased off during the last year. There were four deaths in the institution during the fiscal year, and two inmates were transferred to the provincial institutions for the insane. Two inmates escaped from the penitentiary reserve on May 21, 1923, but were recaptured on June 10 in Toronto, each receiving one year extra sentence for this offence. One hundred and eighteen were paroled, one pardoned, and sixteen deported during the fiscal year.

15 GEORGE V, A. 1925

The general health was remarkably good, a daily average of 1.3 per cent of the population being confined to hospital. Blood tests were taken of 355 inmates, giving 61 Wassermann positive reaction. One hundred and ninety-three inmates refused to go through this test. The surgeon reports that 17 per cent of the population are syphilitic. During the year \$363.23 was spent in procuring medicaments to treat this disease. This, of course, slightly affected our medical per capita statement, which amounted to \$1.42, a slight increase over the previous year. Arrangements have now been made for a free supply from the provincial clinics. The administration of the hospital and the general health of the institution reflect credit on the officer in charge, Dr. L. Robert.

Our construction programme has not been neglected. The northeast wing, with the exception of the laying of a 12-inch water main, has been completed. It is a very fine structure and modern in every respect, capable of accommodating 200 inmates. It is estimated that the cost of erecting a building of this sort under ordinary conditions would have been in the neighbourhood of \$370,000. The fact that it was built by inmate labour, at a material cost of \$95,000, thus saving \$275,000 to the public, should be noted.

Work was started in February in refitting the old temporary cells and tinsmith shop into a new bath and change room. This new system will allow the bathing, shaving, and changing of forty-two inmates at a time. A large plunge was also built to facilitate this programme. At present it takes practically two and one-half days to do this work; under the new system it is expected to put through the weekly clean up in six hours.

At the end of the fiscal year a large new stone store at the west gate was 95 per cent completed and half occupied.

In May, 1923, excavation was started for the new façade or front of the institution. The building is 50 feet 6 inches by 28 feet solid masonry, providing a double-door vestibule for pedestrians, armoury, gatekeeper's room, waiting room, and visiting room downstairs. Upstairs will become the warden's and executive offices. At the end of the year the building was completed outside, and it is now expected to have it occupied by the end of July.

The old kitchen in the hospital was done away with and converted into a dispensary ante-room.

Five hundred and fifty lineal feet of trench and a double line of 6-inch concrete was excavated, and laid, along the front of the institution, to do away with the unsightly telegraph and electric light poles, and to carry the light, 'phone and power cables.

Seven hundred lineal feet of tunnelling in solid rock 2½ feet by 5½ feet was excavated in the prison yard to carry the new installation of water and heating pipes.

A vacuum pump well was sunk in solid rock 11 feet deep, 12 feet by 14 feet, lined with concrete and reinforced concrete top; this works in with the boiler room.

The roofs of the main building in the compound were painted and treated with roofing preparations.

A new addition was built to the garage, doubling its capacity.

The central dome of the prison was thoroughly cleaned and painted with two coats of flat white and one coat of white gloss enamel. This had not been done for many years and the accumulation of dust made the dome extremely dark and unsightly. By doing this the natural illumination of this building has been greatly improved.

The club house veranda was glazed in.

A large derrick was taken down, new anchor chains installed, and concrete base built.

## SESSIONAL PAPER No. 20

Deputy warden's quarters were refitted. Remainder of tenements were painted, redecorated, and new floors laid where necessary.

One thousand two hundred lineal feet of 6-inch concrete pipe was manufactured.

The old woodshed was divided by a brick wall to make room for a new tinshop and engineers' pipe room.

New refrigerating room for steward and large vegetable bins made.

Quarry track graded, ballasted, and new steel laid.

A siding was built into garage for quarry engine.

I will refer you to the Chief Industrial Officer's report in connection with the work done by the different departments under his charge. Suffice it to say that they have produced many useful and substantially made articles which have netted this institution an increased revenue over last year. It is encouraging, and more than demonstrates that we are in a position to accept and complete contracts of a nature which should result in making this institution absolutely self-supporting in time. I am aware that this is the old cry of "give us more work," but results, I am sure, have satisfied you that we are certainly in a position to handle it, and the benefits derived to both the department and the inmates from a moral and financial point of view certainly justify it. Major Donnelly, the Chief Industrial Officer, is responsible in a large measure for the intelligent and able way he has administered his departments, and I find it a pleasure to mention him in my report.

The farm report is not favourable this year. Mr. Cliche, who was in charge of this department, had, no doubt, to contend with adverse climatic conditions. This, I believe, would in a measure account for the small crops. He left the service and was transferred to the Department of Agriculture on January 18, 1924, and was replaced by Guard Damien Dupuis. It is hoped and generally expected that this year, under the new administration, the farm will show a decided improvement.

The school teacher's report is very encouraging, compared with last year's annual report which was good. The attendance has practically doubled whilst the correspondence work has largely increased. The library is in excellent condition, and Mr. Lapierre, the schoolmaster, is to be congratulated.

The engineering department has established a good record during the last fiscal year. Unfortunately, as mentioned in my last report, it is a kind of work that leaves a lot to the imagination with very few visible results, consisting mostly as it does, of repairs and maintenance. They have excavated 1,800 lineal feet of trench through solid rock in the village, installing a 4-inch water and sewage pipe and several hydrants. This will be a great blessing to the municipality, as that part of the village was unprotected against fire.

A great deal of work has been done in replacing old pipe, putting up new buildings, and extending the central heating plant to take in the Government block.

Mr. Champagne, the officer in charge, has contended with many difficult and onerous problems with credit to himself.

The steward's department gave perfect satisfaction throughout the year, though handicapped by poor kitchen accommodation.

The chaplains report good and satisfactory progress in their departments. Religious missions were held in both churches during Lent, and I have only to repeat that these have been found, to say the least, beneficial.

## RECOMMENDATIONS

I feel it again my duty to start my recommendations by mentioning as first and paramount the setting aside of a new institution to take care of the first and youthful offenders. It seems a pity that this recommendation which is so obviously the first crying need of this service, one that has been asked for so often, should not be acted upon. Had this much needed and so logical a reform been carried out years ago, there is very little question in my mind that our criminal population at large would not have assumed such large proportions as they evidently have. The press has printed many articles lately commenting on criminal conditions existing. If the reasons for this existence were studied, they would find, without the shadow of a doubt, that it is in a large measure traceable to non-action in carrying out the above recommendation, which, I believe, has been advocated by every responsible penitentiary official for the last 40 years.

The passing of legislation granting a monopoly to the Penitentiaries Branch of manufacturing *some commodity* would permit the institutions to become self-supporting, and carry out their policies of reform without having recourse to the public funds. Should this measure be found too drastic at present the other Government departments should be compelled to give preference to penitentiary-made goods when purchasing their supplies.

It has been said by opponents to the scheme that the payment of a small wage to the *working and deserving* inmate would result in the thug, bandit and recidivist benefiting to the detriment of honest labour. This is not the case, for if my first recommendation was carried out the inmates of this new institution would be the ones who would benefit, not the old timer or hardened criminal who would be incarcerated elsewhere. It is a grievous mistake in my opinion to imagine that all who are condemned to penal servitude are hopelessly lost. If such were the case it would indeed be a travesty on the teachings of the Master.

The thanks of the institution are due to the Prisoners' Welfare Association, the Knights of Columbus, and the Salvation Army for their help and encouragement during the past year.

In conclusion I wish to tender the thanks of myself and staff to the Superintendent of Penitentiaries, his inspectors, engineers and staff for their courteous help during the past year, and also my thanks to the members of my personal staff without whose co-operation success could not have been attained.

## DORCHESTER

*G. T. Goad, Acting Warden, reports:*

I have the honour to submit my annual report in connection with Dorchester Penitentiary for the fiscal year ended March 31, 1924, with attached:

- (1) Statistical Report.
- (2) Farm Report.
- (3) Surgeon's Report.
- (4) School Teacher's Report.
- (5) Librarian's Report.
- (6) R.C. Chaplain's Report.
- (7) Protestant Chaplain's Report.
- (8) C.T.I.'s Report.
- (9) Engineer's Report.

## SESSIONAL PAPER No. 20

At the closing of the prison, March 31, 1924, our inmate population was 266, a decrease from the previous year of 97. We received during the year 117 inmates, and discharged 214, as follows:—

By expiry of sentence.. . . . .	38
By parole.. . . . .	148
By pardon.. . . . .	2
By deportation.. . . . .	13
By death.. . . . .	5
By order of court.. . . . .	2
By transfer to other penitentiary.. . . . .	6
	<hr/>
	214

Our female ward was closed on June 6, 1923, and three inmates, Matron Robinson and Deputy Matron Allain were transferred to Kingston Penitentiary.

In connection with the work carried on in the various departments during the year, I beg to submit a brief statement on each one as follows:—

*Blacksmith Shop.*—Work done in this department consisted of making barriers for windows of new hospital; installing of locking bar system on each landing of south wing; making barriers for the different landings and erecting same, also placing iron railings in front of the landings; horseshoeing; repair work on wagons, sleds, carts, and implements in connection with the Farm; making chisels, drills, etc., and repairing tools for the engineer's mason's and stonecutter's departments; also general repairs in prison and shops, as well as steel and iron work on custom orders.

*Carpenter Shop.*—Work has been vigorously carried on in connection with repairs to officers' houses; exterior repairs to hay barns on the marsh; building forms, etc., for concrete foundations of the warden's and deputy warden's new houses; reshingling of warden's residence with "Winthrop" fire-proof shingles; putting on roof of new hospital wing, and general repair work on the exterior of this building. Also work on the interior, including the making of window and door sashes, etc., for the several offices. Storm sashes have been made and hung on windows of the new assembly hall. Prison dome has been renovated and finished in white enamel, which adds greatly to the appearance of same. Kitchen has also been repainted and finished in a similar manner. General repair work has been carried out in connection with the farm buildings, wagons, sleds, etc.—four large wagons and two double dump carts were constructed; over 150 ornamental posts have been turned and painted for farm fencing.

In addition to the above, custom work has been done to the extent of over \$800.

*Change Room.*—All socks for inmate wear and discharge purposes have been made in this department; also repairing and patching of all underwear has been done. May say much difficulty has been experienced in the past in the shrinkage of underwear. All kinds of methods and instructions have been followed but still the shrinkage continues.

*Roman Catholic Chapel.*—Regret to report the deaths of two Roman Catholic inmates during the year. The spiritual needs of these inmates were well looked after by the chaplain during their illnesses. The conduct as regards discipline and morals of the inmates has been satisfactory. They have been very attentive to instructions given them on discipline, morals and religion.

Ninety-two Roman Catholic inmates were released on expiration of sentence, parole, etc., during the year.

*Protestant Chapel.*—The interest in the church services has been well maintained and the conduct of the inmates exceptionally good.

The Sacraments were administered at regular intervals during the year. Bible class was held every Sunday, which has proven a source of blessing and help to those attending.

No effort was spared to minister to the needs of the three Protestant inmates who died; they were well looked after regularly and given every care possible during their periods of illness.

The Salvation Army officers visited the prison the last Sunday of each month, and their presence and organized "sing-songs" were much appreciated by the inmates.

*Engineering Department.*—This department is subdivided into several trades, i.e., machinist, tinsmith, electrical, plumbing and steamfitting.

The machinists have been employed in repairing and maintaining the power plant and machinery of the different shops; also repairing and making new parts for the motor department, and doing general custom work.

The tinsmiths have been busily engaged in making and installing the ventilating system in the new hospital and assembly hall; also making sheet-metal utensils for prison use, and doing general repair work around the institution and for customers.

The plumbers and steamfitters have been busy installing the plumbing, water, steam and heating services in the new hospital; laying 1,500 feet of new 6-inch water main to cottages for fire protection; repairing and maintaining steam, heating, water and plumbing systems in the prison and officers' cottages.

The electricians have been engaged installing the conduit system and wiring in the new hospital; removing and relaying (in a new location) the underground electric cables in prison yard; also in the reconstruction of electric light lines on the prison reserve, and doing general electrical repairs in the institution.

*Farm.*—Owing to the excessive snow fall of the previous winter, seeding was late this year, the first oats being sowed on May 18, and at that date there were snow drifts in many of the fields and fence corners.

Cattle were not turned out until the middle of June as the fences could not be repaired sooner.

Thirty head of steers were slaughtered for prison use from November, 1923, to the end of March, 1924; some of these dressed between 700 and 800 pounds. We have now on hand ninety head of cattle, which are pure-bred registered Shorthorns. We have sold two young bulls and expect sale for more shortly. The brood sows have done well and averaged good litters. Horses were kept continually at work during the winter and are all in good condition.

A new fence on both sides of "Woodlawn" (or "Back road") has been partially erected, using turned posts, set in concrete, and woven wire. Completion of this fence will take place during the coming summer, and when finished same will be both useful and ornamental.

The farm gang has been kept busy during the winter cutting and clearing back pasture, getting out fence-posts, cordwood, etc.

*Hospital.*—Five deaths occurred during the year from the following causes:—

Pulmonary tuberculosis.. . . .	3
Meningitis.. . . .	1
Chronic heart disease.. . . .	1

---

5

Am glad to report that there are no cases of pulmonary tuberculosis amongst the inmates at present.

## SESSIONAL PAPER No. 20

The general health of the inmates has been good, no serious epidemics having occurred.

Many of the staff suffered from an epidemic of suppurative form of tonsillitis, which was a severe type of infection.

*Library.*—During the year 130 books were condemned as they were more or less dilapidated and obsolete. These were replaced with 173 of the latest writings. We also secured the "Book of History," containing eighteen volumes, which has been in great demand. This brings our total number of library books up to 1,474. Forty-one of the best monthly magazines and periodicals obtainable are received, and inmates learning trades in the various departments are supplied with technical books which are used to great advantage.

*Mason Department.*—When work closed in the new hospital in November, 1922, four courses of stone work had been laid on the third floor level. In April, 1923, a start was made backing up the stonework laid and piers were carried up to cornice level. Concrete course of cornice was poured and stone cornice laid. The roof trusses were placed in position, labour being supplied from the mason department. A 12-inch brick wall was laid from top of cornice to level of top of purlins. Approximately 50,000 bricks were used in this work, a large quantity of which were salvaged from the east wing air ducts.

About 80 per cent of the plastering in hospital has been finished, and it is estimated that approximately 6,500 square yards (three coat work) will have been covered when completed.

Stone work on the south wing and hospital walls was pointed and about 20,000 square feet of granolithic flooring laid in the hospital. The grinding down of these floors has been carried on and is still in progress. Concrete walks in new hospital duct are finished. The end wall separating the corridor of south wing from the dome (on east side) was removed during the winter. Concrete piers were poured, and plastering that was unfinished in south wing was completed. Windows in the south end of south wing were bricked up and plastered.

During the summer nine stone gate and boundary posts were erected, and 300 wooden fence posts were placed in concrete bases for the farm department. Concrete foundations have been built for the warden's and deputy warden's new residences.

In addition to the above, general repairs in connection with the institution have been carried out.

*Motor Department.*—During the summer season two large trucks (3½ tons) and two Reo speed wagons, used in the hauling of coal and merchandise from the railway siding, stone and gravel from the quarry, and general messenger work, have been maintained and kept in working order. This department has also kept in operation the farm tractor, stone crushing, tile pipe, hoisting, oil pumping and portable engines. During the winter all these engines, as well as those of the heavy trucks and speed wagons were taken down, thoroughly overhauled and reassembled.

*School.*—During the year we had an average monthly enrolment of 93 inmates and an average daily attendance of 81. Subjects taught in class-room consisted of reading, writing, spelling, dictation, arithmetic, and geography. Individual instruction was also given to inmates in the evenings at their cells. Test papers are given to the advanced inmates and are highly appreciated and eagerly looked for.

Out of a total of 214 inmates released during the year, 49 had entered as illiterates, but am pleased to say the 49 referred to all went out with a certain amount of education; they could both read and write and had a working knowledge of figures.

Discipline in the school has been excellent.

*Shoe Department.*—This department has been very active during the year making uniform shoes, inmates' discharge shoes, prison shoes and slippers, moccasins and prison mitts. All harness has been repaired by this department for the farm. Repair work for the different shops, and general custom work has also been carried on.

*Steward's Department.*—The food served to the inmates has been of first-class quality, and a change of menu has been supplied daily. All food has been wholesome and well cooked. Not one complaint has been received during my wardenship regarding food.

*Stone Cutters.*—Work has been briskly carried on in this department getting out stone such as lintels, sills, etc., for the warden's and deputy warden's new houses; also the manufacturing of tile, 3-inch, 6-inch, 12-inch and 18-inch, which is used extensively by the farm department.

Many concrete crosses for prison cemetery have been made.

*Quarry.*—A large quantity of stone and gravel has been gotten out for road making and concrete work, consequently the stone crusher has been kept busy during the season.

*Tailor Shop.*—Work done in this department consisted chiefly of making and repairing of uniforms, inmates' discharge and prison clothing, custom tailoring, cleaning and pressing. Also making uniforms for the Royal Canadian Mounted Police (Halifax).

In addition to the above, approximately 8,000 mail bags were repaired during the year.

In view of the fact that nearly all the inmates employed in this department are juveniles, the results obtained are very encouraging and reflect much credit on the tailor instructor.

#### GENERAL REMARKS

Am pleased to report that prison cemetery is now in good shape, all overgrowth being gotten rid of, gravel walks made, and temporary wooden crosses erected. Plan of this cemetery has been drawn and all lots properly recorded on same.

Our central dome has been renovated and is now of good appearance. This also applies to our workshops dome, which has been repainted, and all surplus goods usually stored in this place have been removed. The change for the better is very noticeable.

The locking device having now been completed on the east side of south wing, every effort will be put forth to get the cells on this side cleaned up and painted, and ready for occupation at the earliest opportunity.

The farm department has kept the steward well supplied with beef during the winter season.

Am pleased to say the farm generally has had a successful year.

The results of the school classes have been very satisfactory, inmates now leaving the institution being able to read and write. Many prisoners arrive here without any education whatever, and you will readily understand that it is not an easy matter to try and educate men when they have reached the age of thirty years or over. This is what our school teacher has to contend with, but am glad to report that he is doing excellent work and obtaining good results.

Our library has been kept up to date with new books, and those of an educational and mechanical nature have been much in demand.

The social side of prison life has not been forgotten. On New Year's Eve the Salvation Army's "Silver Band" of Moncton, N.B., paid us a visit and

## SESSIONAL PAPER No. 20

rendered a high-class programme of music. The inmates were delighted and showed their appreciation in a very hearty manner. I trust they will pay us frequent visits during the coming year.

Our Christmas entertainment consisted of high-class motion pictures (kindly loaned by Mr. L. H. Cullinan, of St. John, N.B.), and specialty acts by the inmates, some of the men showing exceptionally fine talent. I would ask that a fire-proof picture machine be supplied to this institution.

I wish to thank Mr. George H. Cochrane, of Moncton, N.B., Messrs. Henderson and Weldon, of the Minto Coal Mines, Minto, N.B., and the Fraser Lumber Companies, who have several woodworking factories and mills throughout the province, for the sympathetic help extended in obtaining employment for many of the inmates released on parole.

Am also pleased to report that since taking over the duties of acting warden the behaviour of the inmates has been good.

I regret to report the loss by death of Accountant C. S. Starratt from heart complications, and Assistant Engineer E. H. Haviland from Brights disease. Both were exemplary officers and had the confidence and respect of the whole staff.

In conclusion. I wish to thank the officers of this institution for their loyal support, and also the superintendent and his staff for the courteous treatment and assistance given me.

## MANITOBA PENITENTIARY

*W. Meighen, Warden, reports:*

I have the honour to submit my annual report for the fiscal year ended March 31, 1924, together with the following reports:—

- (1) Statistical Report.
- (2) Surgeon's Report.
- (3) Farm Report.
- (4) Chief Trade Instructor's Report.
- (5) School Teacher and Librarian's Report.
- (6) Roman Catholic Chaplain's Report.
- (7) Protestant Chaplain's Report.

Farming operations were not good generally throughout Manitoba the past year, owing to a long spell of hot, dry weather setting in shortly after seeding.

The total population at the close of the prison on March 31, 1924, was 199. The average daily population for the year ended March 31, 1924, was 211.04. Of this number four are confined in mental disease hospitals at expense to this institution.

One Eskimo, possibly the first of his nationality to be imprisoned in a Canadian penitentiary, was received. Since his reception he has gained ten pounds in weight, is acquiring a knowledge of the English language, and is a good and willing worker.

We have, during the past winter, started to excavate for the foundation of a new horse stable, implement shed and root house; these we hope to complete this year. The following year a new piggery, also a cattle barn, should be constructed.

Considerable fencing requires to be done and I would advise making all boundary fences of woven wire.

Necessary work on the road just north of the reserve will be begun as soon as possible, in order to make it the public thoroughfare to and from the village. When this is done, the road now used, which passes immediately alongside our prison enclosure, will be closed to the public. This will make it not only safer for ourselves, but also for the public who use it.

The new east wing is nearing completion. It has been plastered, and most of the plumbing done during the past winter. We are awaiting now the material to complete the making of the cell barriers, and as soon as we can get the cell barriers and locking bars erected it will be ready for use.

The two chapels, Roman Catholic and Protestant, have been refloored, kalsomined and painted, and now look clean and beautiful.

I am pleased to say that both chaplains take a keen interest in the various inmates that come under their charge, and they have a considerable influence for good with many. A very successful mission was held recently, special reports of which will be forwarded you in a few days.

Our school teacher and librarian performs his duties in a very satisfactory manner, as you will notice by the monthly reports forwarded.

I desire to mention also that our new steward, who is a chef of wide experience, is giving splendid satisfaction. Using practically similar material, and at no additional cost, he has been providing a splendid variety of properly cooked meals and knows how to prepare and serve food in so many different ways that he does not have to adhere to any regular routine, and consequently the inmates never know one meal ahead what they are going to have. This is naturally having a decided influence for contentment and satisfaction.

As reported by our surgeon, the sanitary conditions of the prison, cleanliness of inmates, etc., are good.

Acting on your instructions, we had all our inmates tested for venereal diseases, and, in conjunction with the Provincial Board of Health, we had Wassermann tests taken of some 216 inmates. Of these, 14 gave a positive reaction, and they have been receiving the necessary treatment, though none were active cases.

I want to place myself on record as in favour of all of the eleven special recommendations contained in your report of last year.

Please accept my thanks for the help and assistance extended to me during the year. I also wish to express my sincere gratitude, not only to the officers of Manitoba Penitentiary with whom I have worked for the past seven months, and who have supported me loyally, but to the officers of Dorchester Penitentiary, with whom I worked for three years, and from whom I got the most loyal support, and about whom I could say nothing but good, for while there were around one hundred different officers employed there during that period, 98 per cent of them performed their duties honestly and faithfully at all times.

## BRITISH COLUMBIA PENITENTIARY

### *H. W. Cooper, Warden, reports:*

The prison population on April 1, 1924, showed an increase of eight over the number of inmates confined on April 1, 1923. Approximately 10 per cent of the inmates are not over 20 years of age, while 20 per cent are Orientals.

There have been no successful attempts at escape during the past year.

Warden W. A. Patchell retired on December 31, 1923, after 32 years of unblemished service.

Changes have been made in the diet with a view to providing a wider variety of food.

Occasional concerts have been given.

The vocational training has been extended and a larger number of men employed in skilled labour. The employment of a blacksmith instructor in addition to the engineer has proved of material benefit.

The farm acreage (47½) is so inadequate and inconveniently situated that only a negligible number of men can be employed in agriculture, so valuable in the rebuilding of men.

## SESSIONAL PAPER No. 20

The penitentiary officials are required by law to employ the inmates at hard labour. The public expects that attempts be made to rebuild character and to turn out useful citizens, yet the penitentiaries are denied facilities for useful employment except practically for the needs of the institution. The habit of work is the surest support of a man's moral and physical well-being; it is through lack of the will and ability to work that many men come to the penitentiaries, yet were it not for structural alterations, 50 per cent of the inmates of this penitentiary would to-day be condemned to idleness or the stone pile.

I trust it will soon be found possible to utilize the labour of the inmates to supply the needs of other Government departments.

There can be no efficient scheme of classification or segregation except by the provision of separate buildings or institutions. Until these are provided, it would be helpful if one Central Penitentiary could be designated to which would be transferred those men who are centres of moral infection and who remain so in spite of reformatory efforts.

I must repeat my recommendation for the establishment of a Central Criminal Asylum.

## SASKATCHEWAN

W. J. Macleod, Warden, reports:

I beg to enclose all reports for the year 1923-24.

*Building Work.*—During the summer we built 1,250 feet of our new wall, including one tower at the northwest corner. New concrete root cellar, 50 feet by 100 feet, with 10-foot ceiling, was completed and vegetables stored in it last fall. It is covered with 6 feet of earth, thus making it frost-proof. The ventilating system worked perfectly last winter. The cells on north side of east wing were plastered and all work on this side of this wing will be completed before work is started outside. The brick partition walls and oven in old kitchen have been removed and laundry enlarged, giving us more floor space which was badly needed. Cold-storage rooms in kitchen basement have been completed and will be put into use this summer. New pipe organ has been installed and two very handsome oak altars, which were made in our carpenter shop, have been placed in chapel. Our chapel is now a very bright and attractive place of worship. The dome has been painted and walls kalsomined. New concrete lamp standards were made and placed on road in front of prison.

*Tin and Sheet-Metal Work.*—A new galvanized iron roof was put on sewage works. Seven large ventilators were made and placed on roofs of cell blocks. Water troughs were made and put around roof of dome. The steward's department was supplied with all utensils required, and pails, dustpans, etc., were made for the various departments.

*Steam-Fitting Work.*—Temporary heating pipes were removed and permanent radiators were installed in administration wing, dome, hospital and isolation building. Numerous repair jobs were done in this department during the year.

*Electrical Work.*—A great amount of work was done in the electrical department during the year. A new switch board was put in keepers' hall, giving the officer in charge full control of all lights. A Luxolite fixture was placed in dome. The root-cellar was wired and we now have this place well lighted so that men can see in picking over vegetables, etc. The transformer

15 GEORGE V, A. 1925

house has been remodelled and a new switchboard was made and equipped with all necessary power and lighting switches; an oil circuit breaker and panel, with volt meter and ammeter installed. A new cable was laid from city limits to transformer house and all necessary connections made. Street lights were wired and are now in use. Conduit pipes are being put in cement cap on top of wall to carry wires for heating of towers and lighting purposes. The electric night clock has been moved from shops' hall to keepers' hall and the wiring all rearranged. A new set of telephones, connecting keepers' hall and dome, have been set up and are now in use. A telephone cable was laid across river lots 60 and 61, and connected with old cable, so that now all telephone and electric light wires on penitentiary property are underground. Numerous other jobs have been done in this department during the year.

*General Work, Engineer's Department.*—Changes have been made at sewage disposal plant; new flues have been put in boilers, three cement mixers and two hoists have been kept in good working condition. Some 4,200 feet of water pipe laid along 15th street to connect up the city's water works with the penitentiary. Eight hydrants and sixteen valves and valve easings were installed along this line.

*Farm Work.*—We had some 618 acres under cultivation, and off this land we took 12,365 bushels of oats, 1,003 bushels of barley, 558 bushels of wheat, 152 bushels of peas, 12 tons green feed, 155 loads cultivated hay, 7,020 bushels of potatoes, 648 bushels of turnips, 856 bushels of carrots, 340 bushels of beets, 240 bushels of parsnips, 130 bushels of mangolds, 60 bushels of onions, 5,000 heads of cabbage, 1,645 heads of cauliflower, and other vegetables such as peas, beans, radishes, lettuce, corn and rhubarb.

Our teams hauled 3,494 cubic yards of gravel. We cut, on the reserve, 260 cords of wood. Two hundred and twenty-five young pigs were raised and we sold \$3,687.30 worth of pork to the steward and customers.

The surgeon reports that the sanitation, light and ventilation are good in the cell blocks and the various workshops.

The chaplains' reports are very satisfactory and they certainly attend to their duties with commendable zeal and are doing a great work among our inmates. His Lordship, Right Reverend J. H. Prud'homme, Bishop of Prince Albert and Saskatoon, has taken a great interest in the inmates and has visited the institution on several occasions and held High Mass, which was very much appreciated. The choir from the Roman Catholic Cathedral, with the Rector, the Reverend Father Munroe, held service in our chapel. These special services help a lot in the management and discipline of the institution. Both chaplains arranged concerts, at different times, for our inmates which were enjoyed immensely, and our thanks are due to them and to those who gave their time and came to take part in these entertainments.

The school-teacher reports that his pupils are making excellent progress. About 65 per cent of the pupils are foreigners and the great majority of them are anxious to learn to read and write English. During the year 33 men who could neither read nor write were started in the primary class; 19 of these are now in grade 3. The average number of pupils at day school was 64.36 and 67 were on the roll for night class. Our school-teacher is very conscientious and is doing excellent work with his pupils.

The magazines and books in our library are greatly appreciated by the inmates.

I wish to thank the members of my staff who have loyally supported me during the year, and also the Superintendent and his Staff for the courteous treatment and assistance given me at all times.

# ROYAL CANADIAN MOUNTED POLICE

HEADQUARTERS,

OTTAWA, ONT., 1924.

The Honourable the Minister  
in Control of the Royal Canadian Mounted Police,  
Ottawa.

SIR,—I have the honour to submit herewith the Annual Report of the Royal Canadian Mounted Police for the year ended September 30, 1924.

## STRENGTH AND DISTRIBUTION OF THE FORCE

On that date the strength of the force was 58 officers, 962 non-commissioned officers and constables, and 433 horses. On the corresponding date in 1923 the strength was 58 officers, 1,090 non-commissioned officers and constables, and 543 horses. The decrease in strength which was noted last year has been continued. Since the reorganization of the force the strength in successive years has been:—

Year	Officers	N.C.O. and Constables	Total Personnel	Horses
1920	73	1,598	1,671	942
1921	70	1,610	1,680	795
1922	64	1,163	1,227	656
1923	58	1,090	1,148	543
1924	58	962	1,020	433

Since April 1 the decrease has been about 150; no recruits have been accepted since that date, whereas in the six months preceding that date there had been a slight gain in numbers. The decrease works out at 12.4 per cent, or roughly one-eighth.

The following shows the distribution in the several provinces and territories on September 30, 1924:—

	Commissioner	Asst. Commissioners	Superintendents	Inspectors	Surgeons	Asst. Surgeon	Asst. Vet'y Surgeon	Staff-Sergeants	Sergeants	Corporals	Constables	Special Constables	Total	Saddle horses	Team	Total	Dogs
Headquarters Staff	1	1	2	2	1			8	11	13	20	13	72				
Maritime Provinces..				1				1	4	2	24		32				
Quebec.....				1				1	4	7	14		27				
Ontario.....			2	5				9	22	25	217	15	295				
Manitoba.....				12				3	8	6	31	1	51	19	2	43	6
Saskatchewan.....				2	1		1	8	25	35	98	13	192	164	14	178

15 GEORGE V, A. 1925

On the same date the distribution into posts and detachments was as follows:—

	Divisional Posts	Detachments
Maritime Provinces...	1	
Quebec.....	1	3
Ontario.....	2	12
Manitoba.....	1	10
Saskatchewan.....	2 (1 depot)	19
Alberta.....	2	27
British Columbia.....	1	15
Yukon Territory.....	1	11
Northwest Territories.....		12
Baffin Island.....		2
Ellesmere Island.....		2
	11	113

The number of divisional posts has not been changed, but the detachments have fallen from 124 in 1922 and 117 in 1923 to the present figure, making a drop of four in the year. The decreases have been five in British Columbia, four each in Manitoba and Saskatchewan, and one in Yukon Territory, while against these there are increases of four in Alberta and six in the Far North—four in the Northwest Territories and two in the islands of the eastern Arctic.

The alterations of strength of personnel in the several districts have been:—

	1920	1921	1922	1923	1924
Maritime Provinces.....	25	32	33	32	31
Quebec District.....	8	23	31	27	24
Eastern Ontario.....	395	442	325	343	339
Western Ontario.....	31	37	34	37	46
Manitoba.....	189	203	100	85	55
Southern Saskatchewan.....	354	277	225	214	159
Northern Saskatchewan.....	53	60	58	49	41
Southern Alberta.....	248	211	121	103	97
Northern Alberta.....	59	104	92	87	90
British Columbia.....	229	238	157	128	97
Yukon Territory.....	50	53	51	43	41

### VOLUME OF WORK

The number of cases handled by the force has nearly doubled, amounting to over 30,000, as against not quite 16,500 last year. A comparative statement is:—

Year	Number	Increase	Per cent
1920.....	10,808		
1921.....	12,595	1,787	16.5
1922.....	14,032	1,437	11.4
1923.....	16,463	2,431	17.3
1924.....	30,680	14,217	86.3

The increase has been due to the trebling of work of the sort classified as "Investigations for other Departments." For four years this stood at about 8,000 cases a year, showing a tendency to decline; this year it has leaped to 24,500. The enforcement of federal statutes, which in 1923 rose from something over 5,000 to nearly 7,500, has fallen back to 5,200.

## SESSIONAL PAPER No. 21

A comparative analytical statement is:—

	1920	1921	1922	1923	1924
Federal Statutes.....	2,068	3,675	5,235	7,447	5,210
Criminal Code.....	152	513	470	807	701
Provincial Statutes and Parks Regulations.....	88	172	219	294	238
Investigations for other departments.....	8,500	8,235	8,108	7,915	24,531
	10,808	12,595	14,032	16,463	30,680

The decrease under the heading "Federal Statutes" is partly accounted for by changes in classification, sundry activities formerly described as investigations under federal acts now being described as investigations for the departments particularly interested in those acts. This does not, however, fully account for the decrease in cases handled under the Opium and Narcotic Drug Act, which have fallen from nearly 2,200 to not quite 800, or by over 60 per cent; this can be assigned to several causes, among which may be mentioned the attack made in British Columbia upon the methods followed by members of the force and agents in enforcing the act; while a searching investigation failed completely to establish wrongdoing, our work was crippled, and the number of cases in that province fell from 834 to 89.

One effect of this reform in classification is shown in the higher proportion of convictions secured to the total number of cases handled. For some years, due in part at all events to the inclusion in this category of investigations which hardly come under the uncompromising heading of breaches of the law, the proportion had been decreasing, as the following analysis shows:—

Year	Cases handled	Convictions	Proportions
1920.....	2,068	1,254	60.6 per cent
1921.....	3,675	1,930	52.5 "
1922.....	5,235	2,375	45.3 "
1923.....	7,447	2,307	30.9 "
1924.....	5,210	1,978	37.9 "

The remarkable increase in investigations for other departments in some small part is due to the changes in classification noticed in the foregoing paragraphs. This, however, is a trifling consideration in an increase from 8,000 to 24,500. What renders this increase the more interesting is the fact that in former years the total numbers had shown a disposition to decline, having fallen between 1920 and 1923 from 8,500 to 7,900. Last year an analysis showed that this decrease was wholly due to a sharp drop in inquiries into applications for naturalization. It is noteworthy that these particular inquiries have undergone an increase which can only be described as extraordinary, from fewer than 4,000 to over 8,600. The analysis is:—

Year	Naturalization Inquiries	Other Investigations	Total
1920.....	6,817	1,683	8,500
1921.....	5,533	2,702	8,235
1922.....	4,396	3,712	8,108
1923.....	3,858	4,057	7,915
1924.....	8,638	17,893	24,893

Thus the investigations other than those connected with naturalization, which showed a steady if slow increase from 1920 to 1923, more than quadrupled during 1923-24.

In view of the history of the force, which for many years was confined in its operations to a portion of the prairie region of Western Canada, and only recently has been employed in the rest of the Dominion, the distribution of the total volume of work becomes of interest.

1923-24	Eastern Canada	Western Canada
Federal Statutes.....	1,423	3,787
Criminal Code.....	322	379
Provincial Statutes and Parks Regulations.....	9	229
Investigation for other departments.....	6,457	18,044
	8,241	22,439

Thus the work performed in Eastern Canada was 26.8 per cent of the whole.

Attention already has been drawn to the remarkable increase in the applications for naturalization which we have investigated; what is equally worthy of notice is the steady increase in both the number and proportion of aliens in Eastern Canada who come under our notice as seeking the rights and duties of citizenship. A comparison shows:—

Year	Eastern Canada	Western Canada
1920..	1,196	5,621
1921..	1,914	3,619
1922..	2,134	2,264
1923..	2,117	1,741
1924..	4,562	4,076

In 1920 more than four-fifths of these inquiries had to be prosecuted in Western Canada; during 1922 and 1923 half of them were in Eastern Canada; and in the year under review the eastern cases considerably outnumbered the western inquiries.

Before proceeding to set forth in some detail the various types of work done, it may be advisable to explain the four headings under which our duties are classified.

1. The enforcement of federal statutes hitherto has been regarded as the regular work of the force; it consists of the enforcement of the penalty clauses of the various federal statutes in which federal departments are directly interested. Fuller particulars of these are given in Appendix C, what follows being a summary tabulation. The change in classification which has been noted already has been in the direction of restricting this category to actual infractions of statutes.

2. Associated with this is the class of work described as investigations for other departments, that is, the special inquiries and investigations concerning departmental matters, made at the request of Federal Government departments; together with a small number of cases in which assistance is rendered to Provincial Police departments. As the increase has been so remarkable, comparative figures may be given regarding a few departments on whose behalf

## SESSIONAL PAPER No. 21

we have been particularly busy; the most striking advance, that in naturalization inquiries has been dealt with already:—

Department	1922	1923	1924
Immigration and Colonization.....	567	272	4,970
Marine and Fisheries .....	15	701	2,649
Mines.....	153	502	2,407
Health.....	346	217	1,846
Interior.....	125	492	1,047

3. As regards the Criminal Code, the force is charged with the maintenance of law and order in the Northwest Territories, in the Yukon Territory, in the National Parks, and in Indian reserves. It also acts where departments of the Federal Government are the aggrieved parties in breaches of the Criminal Code, as in thefts of Government property, frauds in connection with the post office, etc. In other cases the provincial administrations are responsible.

4. By special arrangements between the Federal Government and the Provincial Governments of Alberta and British Columbia the Royal Canadian Mounted Police enforce both federal and provincial laws in the federal parks in these two provinces.

The tables which follow set forth these several classes of work in detail.

RECAPITULATION of Cases Investigated and Convictions Made under Federal Statutes and Criminal Code in all Provinces and under Provincial Statutes and Dominion Parks Regulations in all Provinces from October 1, 1923, to September 30, 1924.

## PATROLS, GUARDS, ETC.

The foregoing record of "cases" does not convey an exact idea of the work performed, for a proportion of our activities has to do with the prevention of crime, or of disorderly conduct, rather than with the detection of wrongdoing or with inquiries into specific questions. In Ottawa and the dockyards at Esquimalt and Halifax the guarding of Government property means a great deal of labour, usually devoid of incident, and the same can be said of the posting of permanent guards to protect the offices of Assistant Receivers General, the furnishing of escorts to representatives of other departments who have to convey large sums in cash from their offices to the bank, the escorting of Indian agents when paying the annual stipends to the various bands in Western Canada, etc. In some parts of the country long patrols are periodically made, and while a number of individual investigations may be made while on one of these excursions, these often are incidental to the real purpose of reminding people who are remote from the ordinary machinery of administration that the laws must be observed. Our increasing control of the Arctic coast-line and islands is an illustration of this aspect of our work; despite the shrinkage in our total strength we are increasing the number of our detachments in the far north and bringing those living there, both native and white, under a supervision which it is to be hoped will decrease violence and improve the conditions of their life.

## ASSISTANCE TO PROVINCES

In this category, which in some years has entailed important and onerous duties, a long patrol made in northern British Columbia may perhaps be included. The matter is dealt with at some length later in this report and it will suffice here to say that the patrol was undertaken to investigate rumours that a group of nomadic Indians living in a very remote region on the upper reaches of the Liard river had murdered another Indian for having as they believed bewitched a member of the tribe; it proving inconvenient for the provincial authorities to undertake the investigation, which involved over 2,500 miles of travel, a party dispatched from Vancouver discovered evidence of the commission of a crime and arrested and brought out several Indians.

We rendered the usual miscellaneous assistance to the provinces of Alberta and Manitoba in the administration of their northern regions, a certain amount of work being done as game guardians, in controlling the fur trade, helping with

the registration of vital statistics, etc. Assistance occasionally is rendered to the provincial police forces, especially in handling emergency cases.

### ASSISTANCE TO OTHER DEPARTMENTS

To a great extent this force may be described as a handmaid to other departments, a very large proportion of our work consisting of the performance of services for them, often of a singularly varied nature. The tables which precede this show the bulk of this work; the more detailed figures to be found in Appendix C show over how wide is its range; and the analytical comparisons already given make it clear that this aspect of our duties in the last year has undergone a remarkable increase. As I observed in former reports, if the force did not undertake these duties, either they would remain undone, to the detriment of the public service, or the departments concerned would have to make their own arrangements to perform them. In the latter case there would be an increase of staff, with the accompanying expense, or, in many cases, it would be necessary to employ private detectives. The fact that this force is available has enabled the departments to avoid increases of personnel and has saved them from employing on delicate duties persons over whom the Government has no satisfactory control. Apart from these considerations, we have enabled certain departments to extend greatly their control over important matters entrusted to them, examples being the regular checking of druggists' sales of narcotics and of the sale of explosives by hardware merchants—duties which have become matters of routine with us, to be attended to in the intervals of other employments.

### DEPARTMENT OF HEALTH

Our principal, though not our sole connection with this department has to do with the enforcement of the Opium and Narcotic Drug Act. Mention already has been made of the decrease in the volume of work performed in this respect. Conditions vary remarkably in the different provinces, and in some places there is reason to believe that the decrease in the number of cases handled is due to a decline in the extent of the plague; frequent robberies of narcotics from drug stores in these areas suggest that the underground trade has been so circumscribed as to drive addicts to desperate measures to obtain the drugs. In others again the decline seems attributable to the increasing cunning of the vendors. These consolations, however, apply chiefly to areas where population is not dense, and where the evil never reached great dimensions, and at the two principal points of entry, Vancouver and Montreal, other explanations must be sought.

In Vancouver our operations have been paralyzed for a time by the charges laid against members of the force and agents; this matter was referred to briefly in my last report. An investigation by a Royal Commission has disproved the charges, but the occurrence necessitated the suspension of our efforts, and the publicity given to our men and their methods further prejudiced our work. The Royal Canadian Mounted Police were directed in November, 1920, to help to enforce the Opium and Narcotic Drug Act in British Columbia, and from that date until August, 1923, a period of 33 months, this force prosecuted in that province 800 cases of infraction of the Act and secured 561 convictions, this being an average of about one prosecution for every working day, and of 17 convictions a month. In the enforcement of the Act several agencies were concerned, our force, customs preventive officers, the provincial authorities, and the municipal police, and between some of these friction existed. In August, 1923, at the instance of certain customs preventive officers, a detective constable of this force, an agent, and an informant were arrested in Victoria while in pos-

## SESSIONAL PAPER No. 21

session of a quantity of opium; their statement, which ultimately was shown to be true, was that they were in the midst of a transaction which in a few hours would have resulted in the arrest of a trafficker and the seizure of a larger quantity of opium, but the charge was made that they had been dealing in the drug on their own account. The Attorney General of the province pressed the charge and the accused were convicted in police court after a trial in which their defence was hampered by certain considerations which subsequently were fully explained. Following this the Attorney General communicated with the Dominion Government making charges against those members of the force who were concerned with the suppression of the drug traffic in Vancouver, from the Assistant Commissioner in command down, these ranging from inefficiency to corruption and gross personal misconduct. The Dominion Government appointed a Royal Commission, the gentleman selected as commissioner, J. P. Smith, Esq., K.C., having been suggested by the Attorney General of the province. A searching investigation followed, a large number of charges of misconduct, etc., being presented by the representative of the provincial Attorney General, and more than ninety witnesses being examined, and in February, 1924, the commissioner submitted his report. In his own words, the investigation "completely exonerates the Mounted Police force as a body." In dealing with aspersions on the general management of this portion of our work in British Columbia, he said:—

"I would report favourably on the whole as to the state and management of the drug squad."

And elsewhere he said:—

"The drug squad, so far as the evidence showed, was in a good state and was well managed."

The Royal Commission in the course of its work reviewed what was known as the "Victoria Case," the police court trial already mentioned in which a constable, an agent and an informant had been convicted of possession of drugs. Additional evidence was adduced, and Mr. Commissioner Smith found unreservedly in favour of the accused, saying in part:—

"In the present case there is no proof of guilt, and for that reason alone the men must be declared innocent. That which was done was consistent with the performance of what they were sent to do."

He added:—

"There is a lack of evidence to prove guilt, and there is evidence, that I believe, to prove innocence."

Following upon this report, and after an independent review of the evidence by the Department of Justice, the Governor General in Council granted a free pardon to the men who had been convicted in the police court, this being granted on the express ground that they were innocent.

The commissioner's finding was not made public until February, 1924, and for the period between that date and the attack in the previous August the force necessarily did nothing to enforce the Opium and Narcotic Drug Act. When our hands were freed, we were hampered by the fact that the proceedings had made public alike the identity of our men and the nature of our methods, so that the law-breakers had been presented with information of the utmost value in eluding detection and conviction; in consequence it was necessary to build our organization up again from the foundation, and only recently has it been possible to resume the work of suppression.

In Montreal there has been a diminution in prosecutions due to several causes. One of these is a change in policy, whereby the attack upon the small traffickers, who yield the greatest number of cases, is left to the municipal police

15 GEORGE V, A. 1925

authorities, while our men have directed their vigilance against the fewer but more important persons who direct these minor agents. Another reason is the fact that a great amount of attention and energy was absorbed in what is known as the "Spanish Consul case." We had reason to suspect that the Spanish consul stationed at Montreal was prostituting his high and honourable position to facilitate the smuggling of narcotic drugs and other articles into this country, and two non-commissioned officers of this force, posing as unscrupulous merchants, won his confidence and caught him in the act of conniving at the smuggling of a quantity of alcohol. The original intention of the conspirators who thus were uncovered was to bring narcotics into Canada, and our non-commissioned officers went to Spain in the course of this operation, expecting thereby to strike a blow at the drug traffic; on their arrival internal conditions in Spain caused the transaction in drugs to fall through and the one in alcohol to take its place. The consul and an accomplice were convicted and sentenced to terms of imprisonment. In this case much time and effort went to establish one case, and two or three prosecutions.

#### NATURALIZATION

Investigation of applicants for naturalization accounts for much work; attention already has been drawn to the remarkable increase in the number of applications, and also to the increase of them in Eastern Canada. Many of these applicants live in cities, so that no great amount of travel is needed to find them, but in the case of rural applications long journeys sometimes have to be made.

#### SPECIAL GUARDS

The supplying of permanent guards for the offices of the Receiver General at Victoria, Vancouver, Calgary, Regina, and Toronto has in the last year or two become one of our regular commitments; men are kept on duty continuously. In addition requests for additional protection or assistance are addressed to us from time to time. An occasion of this nature when the force comes under public attention is afforded in April, May, and June when armed guards are provided for the offices of the Taxation Branch of the Department of Finance in connection with the heavy payments made on account of income tax. Nearly twenty offices are thus protected and the duty requires not far short of one hundred non-commissioned officers and constables. Again, at certain places customs officers from time to time find themselves in possession of considerable sums of money, and when requests are received suitable arrangements are made to protect them. A guard is supplied to assist the immigration authorities at Vancouver.

The arrangement whereby the naval storerooms and dockyards at Halifax and Esquimalt are protected by us has been continued through the year.

#### SUPERVISION OF PARI-MUTUEL BETTING ON RACE TRACKS

This duty, which is undertaken on behalf of the Department of Agriculture, was performed without special incident. The number of meetings at which pari-mutuel machines was used was fifty-three, an increase of six from last year. On the Quebec tracks there was a slight change in the arrangements, one non-commissioned officer being detailed to supervise the work of a party of civilian employees; elsewhere our men were employed as in former years. In all about fifty non-commissioned officers and constables were concerned in this duty at various times.

## ESCORTS FOR HARVESTERS' TRAINS

This year our work in furnishing escorts for harvesters' trains was not as heavy as on former occasions. In part this was due to the fact that this annual migration was of smaller dimensions than in former years, and in part because escorts were furnished only to Canadian Pacific Railway trains, the Canadian National Railways deciding to arrange for their protection themselves. Escorts were provided for nineteen trains, of which four were cancelled, and these trains conveyed just over 11,000 passengers. The non-commissioned officers and constables actually employed numbered 38. As last year, this duty was administered by N Division at Ottawa, details being provided to help it in this from Regina and Lethbridge. The most interesting episode was the arrest of a party of four youths who had been concerned in a robbery and were trying to make their way to the West as harvesters; this matter was handled with intelligence by the constables on the train. The general behaviour of the passengers was good; one of our non-commissioned officers in reporting observed that the lunch-counter provided on the train was of great use in preventing the rushes which formerly were made to station restaurants. Mr. A. H. Cadieux, the acting Chief of the Department of Investigation of the Canadian Pacific Railway, in writing to notify me that the movement was at an end, said:—

"I wish to take this opportunity of thanking you for the efficient manner in which the trains were handled by your men. Up to the present time, no complaints whatever have been received of any trouble, such as has been experienced in the past, on any of our trains this year, due, no doubt, to the presence and efficiency of your representatives."

## CUSTOMS AND EXCISE

Mention has been made in another connection of the detection of a plot, in which the Consul of Spain stationed at Montreal was a participant, to smuggle narcotic drugs and alcohol into this country. Beginning as an attempt to strike at the drug traffic, it turned through the course of events in Spain into a case of the smuggling of alcohol; a large seizure was made, and convictions ensued. Staff-Sergeant E. C. P. Salt and Sergeant C. C. Brown, the two non-commissioned officers principally concerned in this case, conducted prolonged and laborious investigations, which included a voyage by them to Europe.

An interesting capture was made in December, 1923, when Sergeant J. P. Blakeney seized a large quantity of liquor in an out-of-the-way place on the coast-line of the county of Lunenburg, this being followed up by the seizure of the schooner *D. C. Mulhall* in Halifax harbour and the trial and conviction of her captain and others. Acting upon information received, Sergeant Blakeney proceeded on December 11 to Mahone Bay and found 150 gallons of rum hidden at Indian Point. Further search, under arduous conditions, enabled him to discover 169 ten-gallon kegs of rum cleverly concealed in a patch of woodland near Gorham's Point, a remote and almost inaccessible place, thirteen miles from Mahone Bay; it had been landed from the *D. C. Mulhall* on November 30. Sergeant Blakeney sent his chauffeur to Mahone Bay to telephone for assistance to Halifax; the message was received late on December 12, a party was despatched at once by motor in a snow-storm, and it joined Sergeant Blakeney at 1.30 o'clock in the morning. It proved difficult to move the seizure, the absence of roads making it necessary to send a schooner to convey it by water, and shipment being delayed by cold and stormy weather, so that our men were on duty for over forty-eight hours at a stretch without sleep. The rum had to be hauled 500 yards to the shore, and it was not till December 17 that it could be got aboard the vessel. Sergeant Blakeney in his report says:—

15 GEORGE V, A. 1925

"We were compelled to guard the liquor day and night from December 12th to the 17th, and during the first two days and two nights we had no shelter of any kind, and the weather was cold and stormy, but during the remaining three days I was able to get a tent which afforded us some shelter, but owing to the cold and stormy weather even this was not very pleasant."

A somewhat interesting seizure was effected in the early morning of July 29 at Little river, a creek entering the Detroit river a few miles from Windsor. Acting on information supplied by a constable of the city police force, Sergeant A. Birtwistle accompanied by a party of our men and by the informant surprised and seized a row-boat containing over 100 gallons of grain alcohol which was being smuggled into the country from the American side of the river. It was understood that similar cargoes had been brought over weekly. The two men were local fishermen, who were employed by a well-known bootlegger, against whom a case could not on this occasion be made out.

As the detailed statistics show, there have been many cases of seizures of illicit stills. This work affords few special incidents, but one seizure which was effected on September 12, 1924, near Turtle Lake, Mine Centre, Ont., may be worth mention. It was marked by co-operation between this force and the Ontario Provincial Police, Constable Kilbride of that force conveying the original information to Corporal F. H. Bebb, the non-commissioned officer in charge of the Fort Frances detachment. Corporal Bebb and Constable Kilbride approached the suspected locality by an unusual route, which involved some difficult travel by canoe, and found a large still in a shack concealed in the woods. The two lay in wait and next morning a man and his wife living in the vicinity appeared and began to work the still. Not only was a considerable quantity of spirits and mash found on the premises, but various signs indicated that manufacture had been going on in the preceding winter. The magistrate before whom the man was convicted commended Corporal Bebb and Constable Kilbride.

#### DEPARTMENT OF INDIAN AFFAIRS

It has been necessary to maintain the detachment at Ohsweken on the Six Nations reserve near Brantford. On the occasion of the inauguration of the elective system of administration it was judged prudent to support the departmental officers by the presence of an adequate number of police; the proceedings passed off without untoward incident. A good deal of work has been done in Eastern Canada, mostly of a routine nature in such work as guarding against the corruption of the Indians through liquor. An interesting case arose in the Maniwaki reserve, where a tumultuous assembly of Indians intimidated some men who were operating a saw-mill; the case arose out of a legal dispute, the Indians claiming the timber, maintaining that the persons operating the mill were trespassing, and endeavouring to take the law into their own hands. Prosecutions and convictions followed, and the Deputy Superintendent General was good enough to write:—

"The officers who were instructed to follow the case informed me that the verdict obtained was largely due to the excellent work of Detective Cox of your staff, not only in carrying out his regular duties pertaining to the arrest of the accused and the assembling of the Crown witnesses, but also in gathering information which was of great value to the Crown Counsel in the prosecution of the case."

Two long patrols from the Kenora detachment were occasioned by tragic occurrences north of the Canadian National Railway. At Fort Hope, north of Lac Seul, a half-breed boy nine years old killed his sister, a child of seven, with a gun with which he had just been shooting at birds. A non-commissioned officer and a constable were sent to look into the matter, the total distance

## SESSIONAL PAPER No. 21

traversed being 654 miles by rail, 120 miles by motor-boat and 350 miles by canoe, this last involving 60 portages. Another patrol was made to Osnaburgh House to investigate the shooting of an Indian girl; it was ascertained that the occurrence had been accidental, the weather conditions having prevented the moving of the girl, who died in a short time.

An outbreak of smallpox at Sioux Village, an Indian reserve near Portage la Prairie, imposed on our men the duty of maintaining quarantine from January 17 to March 15. Out of 80 or 90 Indians 31 contracted the disease; though several deaths occurred in the community during the period none of these were due to smallpox. The duties involved in this were sufficiently varied, including the shooting of 60 or 70 dogs. This is typical of many cases, ten outbreaks of smallpox having been handled in the Manitoba District alone.

The usual escorts were provided to the Department of Indian Affairs when paying treaty money. Some of these journeys are very long, the one down the Mackenzie meaning over a thousand miles of travel.

## DEPARTMENT OF IMMIGRATION AND COLONIZATION

The remarkable increase in our work for the Department of Immigration and Colonization, from fewer than 300 to nearly 5,000 cases, is mainly to be ascribed to the new Chinese Immigration Act, the registration of these people having fallen upon us and having proved very heavy. No special incidents occurred in this connection. In addition, we furnish guards at certain ocean ports, conduct special inquiries, and do a certain amount of detective work, our activities from time to time causing undesirable persons to be excluded.

## MARINE AND FISHERIES

The increase in work for the Marine and Fisheries Department, from 700 cases to more than 2,600, is very largely due to the administration of the Radio Telegraph Act, this force doing much both in the issuing of licenses and in calling to account persons who neglect to comply with the requirements of the Act. Not only has this type of work grown greatly, but the present tendency is towards a further increase, arrangements having been made for an increase in the number of members of the force who are empowered and equipped to issue licenses.

As regards the fisheries, something has been done to enforce the regulations in inland waters, more especially in Manitoba; a number of infractions of these were observed and the offenders brought to book.

## POST OFFICE

The volume of thefts from the thousands of post offices and numerous postal routes in the country inevitably is considerable, and every year a number of robberies come before us for solution. These often are tedious and complicated cases, and at times it is necessary to work for two or three years before the facts are cleared up and the culprits brought to justice. No outstanding features of this year's work present themselves. In Montreal money disappeared from a sub-district office early in May; late in the month we were called in, and in October the thief, a youth employed on the premises, confessed, and restitution was made. In December, 1923, the sum of \$5,000 was stolen from a post office in a small town in Western Canada, and within a week a youth who had acted as assistant had made a confession acknowledging that he was the thief, had restored a portion of the sum stolen, and had accused the postmaster of being an accomplice. The postmaster was tried and acquitted; the youth has pleaded guilty and been sentenced to a term of imprisonment.

15 GEORGE V, A. 1925

In another case there was reason to suspect that thefts were taking place in the mail cars on a line in Western Canada. A constable was given a position as railway mail clerk, and after three months' work he secured evidence upon which charges were made against three mail clerks. Two of the accused were convicted, and Mr. W. M. Rose, of Moose Jaw, who conducted the case on behalf of the Crown, addressed to the Officer Commanding the district a letter from which the following is an extract:—

"I am taking the liberty of writing to you with reference to Constable Bland of your force, who made investigations and gave evidence herein; I deem it my duty to do so, and the duty is a pleasing one. The task imposed upon him was difficult, requiring great patience, skill and tact and the manner in which he performed it was only equalled by the way in which he gave his testimony from the witness box, both of which were beyond reproach and called for the highest praises. Without resorting to any underhand practice, or doubtful practice, or doubtful methods, he accomplished his object completely, and his whole work was in keeping with the best traditions of the Force to which he belongs. That is saying much."

#### THE MIGRATORY BIRDS ACT

The Migratory Birds Act was passed in consequence of an international obligation assumed by the Dominion of Canada. While the actual number of cases handled is somewhat smaller than last year, the interest of the work increases. Some attention has been paid to the suppression of the killing of ducks in the spring along the Detroit frontier. A number of men were observed shooting from a blind on the ice, out in the river, but on the Canadian side; if our men approached the culprits directly the latter were certain to retire to the American side and so be out of jurisdiction; so an ambush was set and on the poachers coming ashore we succeeded in arresting two of them. On being tried the delinquents set up the defence that the shooting had taken place on the American side of the boundary, whereupon one of our constables turned out to be a qualified river pilot and as such gave evidence which showed that the offence had taken place 300 yards on the Canadian side. Convictions ensued, and the incident was followed by the conclusion of an arrangement whereby the Mounted Police and the American authorities co-operate to reduce the annoyance caused by this trick of dodging backwards and forwards across the line. Another piece of work in this region has been the affording of protection to wild geese and whistling swan at and near Mr. Jack Miner's sanctuary in the vicinity of Kingsville. In the spring of 1924 thousands of geese stayed there and a considerable number of swans, the latter being comparative newcomers. Constables were kept on duty there during the critical period, and it may be added, as an example of a new pleasure afforded to us by modern conditions, that numbers of spectators watched this great assemblage of birds, about 5,000 people, motorists from Windsor, Detroit and other places, having been there on one Sunday.

On the Pacific coast a certain amount of work has been done in protecting sea-birds. For the past two years a member of the force has camped during the hatching season on Bare island, a rocky islet in the gulf of Georgia, and in 1924 we also kept a constable during the season on Mittenatch island, farther up the coast. In both cases vigilance had to be exercised to prevent Indians and white people from landing to take eggs and destroy fledglings. In both cases, too, crows were observed to be destructive, and many of them were shot. At Masset, B.C., in the Queen Charlotte islands patrols have been made on this duty. In this latter connection we have come into contact with the problem of oil pollution of the water, with its consequent destructions of bird life.

Our annual patrol was made along the north shore of the St. Lawrence to protect eggs and nestlings there. An incident in the course of this patrol illustrates the advantages to be gained from the wide distribution of the force. A

## SESSIONAL PAPER No. 21

large steam yacht cruising among these islands committed some depredations in contravention of the Act and evaded local pursuit; recourse was had to the wireless, and when the yacht entered Halifax harbour the Mounted Police were waiting to enforce the penalties of the Act. In the Maritime Provinces we co-operate closely with the permanent staff employed for the enforcement of the Act, and from time to time when the wardens are inconveniently well known in certain localities a visit from a constable in plain clothes yields results.

The banding of birds is regarded as of importance by the authorities concerned with the conservation of wild life, and all over the northern wilderness our detachments are on the lookout for birds so marked. In learning of the capture of such birds the natives' belief in magic is sometimes helpful, as cases have occurred where they have regarded the band as a taboo mark of some sort, and have consulted us.

## DEPARTMENT OF THE INTERIOR

As in former years, our work for the Department of the Interior has increased, having doubled in the twelve month. To some extent this is due to the increase in the activities carried on in the Dominion Parks, the general policing of the territory included in the boundaries of the parks being committed to us. There also has been a great increase in the work performed in the Northwest Territories, for commercial enterprise is being increasingly directed to these regions, the fur trade needs ever greater supervision to avert depletion of what is at once a valuable natural endowment and the essential food supply of the aboriginal inhabitants, and the task of supervision requires more and ever more travel and the continual strengthening of our personnel. In this connection it should be remarked that much of our work in the Arctic regions proper, which is dealt with in another portion of this report, is performed in close co-operation with this department.

Changes in the system of licenses for game animals and birds, designed at once to conserve the fur and food supply, to protect the aborigines, and to give preferential treatment to British subjects, have greatly increased the administrative work done by our men, who in many respects act as the executive arm of the Department of the Interior. For instance, alterations have been made in the conditions of the wolf bounty; large trapping reserves have been set aside for the benefit of the aborigines; and the conditions of the several types of game and trapping licenses have been altered.

## PENITENTIARIES INVESTIGATIONS

The Dominion penitentiaries from time to time need our assistance, particularly in case of escapes. Some interest attaches to the recapture of a convict who got out of St. Vincent de Paul on April 19, 1924. The man made his escape at 3.45 p.m., our men began their search at 4.45 p.m., and they found him crouching in a thicket about five miles from the prison at 6.30 p.m. The Superintendent of Penitentiaries was good enough to express his appreciation of the "prompt and efficient action" of our men. This incident was marked by some clever tracking.

## COUNTERFEITING

Our activities against counterfeiting have been somewhat less this year than formerly, though they have by no means closed, and though this crime is by no means extinct in the country. The most interesting affairs of this sort which we have had to handle have taken the form of assisting the Government of the United States, a group of criminals having been engaged in counterfeiting American paper money on Canadian soil. Certain of these were arrested and dealt with.

## THE EXPLOSIVES ACT

The Explosives Act, which is administered by the Department of Mines, occasions much routine work; the number of cases handled for that department rose during the year from 500 to 2,400. Much of this is the inspection of firms which sell explosives or ammunition, to make sure that these articles are stored under proper conditions and sold to proper persons; mines also are inspected. A contracting firm in New Brunswick was observed to be keeping its explosives in a careless manner and on being directed to effect an improvement disregarded the warning, so that it was necessary to prosecute. Thefts of explosives were the occasion of one or two laborious investigations, as in such a case uncertainty exists as to the purpose of the delinquent.

## SOLDIERS' SETTLEMENT BOARD

Some work falls upon us in supporting the Soldiers' Settlement Board, chiefly in the direction of investigating in cases where there is reason to suspect attempts to take advantage of the board. None of the cases which occupied us this year call for especial mention.

## BRITISH EMPIRE EXHIBITION AT WEMBLEY

A detachment consisting of Inspector C. H. Hill, M.C., and nine non-commissioned officers and constables was supplied for the purpose of guarding the Canadian Pavilion at the British Empire Exhibition at Wembley. The detachment left Canada on March 19 and returned on November 22, after a successful tour of duty. From the opening to the closing of the exhibition members of the force were on duty, and a guard was maintained in the building at night. As is well-known, the attendance at the Canadian Pavilion was very great, and our men proved of service in guiding and controlling the crowds. Mr. A. W. Tolmie, the Canadian Government Exhibition Commissioner, has been good enough to write to me to express satisfaction with the manner in which our work was performed. On several occasions the Mounted Police detachment took part in ceremonial parades, such as that on Empire Day, and the religious service held on Sunday, May 25.

## CO-OPERATION WITH OTHER POLICE FORCES

An aspect of police work in Canada is the number of separate forces maintained. A number of the provinces have their own constabularies, and in addition there are the several municipal police forces, so that it may happen that in a city three forces, federal, provincial and municipal, are operating to check the same type of crime, such as the evils arising from the use of narcotics. In such circumstances it is clear that great harm can be done by jealousy and ill-natured rivalry, and that the public interest demands that the various forces work in harmony, help each other, and do not permit their natural *esprit de corps* to go beyond a proper emulation. It is easy to argue that all police effort should be under one control, but in this country constitutional considerations entirely preclude any such solution of the problems of public order; and moreover, I am by no means persuaded that such an arrangement, even if possible, necessarily would be in the public service. Like every other department of human activity, police work has its temptations and its besetting sins, and it is my opinion that the existence of several forces can be a powerful defence against a number of evils. It is well known, for example, that the creatures who live by vice and law-breaking are incessantly on the alert to discover weak men among the police and are prompt to tempt them.

## SESSIONAL PAPER No. 21

If more than one force is at work in a place, the task of corruption set themselves by these wretches is rendered more difficult, for even if a venal man is bribed in one force, he cannot guarantee "protection," as the phrase is, from other forces. If proper use is to be made of this advantage, a general spirit of good-will must prevail. It has been my principle to endeavour to promote such a temper, and I am glad to be able to report that our relations with other police forces have been good. Apart from general willingness to help one another numerous instances occur where it is possible for information to be conveyed by one force to another which is in a position to make more use of it.

## SUPPRESSION OF COMMERCIALIZED VICE

The Rev. John Chisholm has continued his activities in controlling the immigration of women. Accounts have appeared in former reports of the organization which he directs, which is designed to protect the immigrant from her embarkation in Europe to her arrival at her ultimate destination in Canada. The principal addition to this organization during the year was the strengthening of the staff at Montreal by a Lutheran clergyman, the Rev. Mr. Cassling, to deal with incomers from Northern Europe in their own language; this gentleman, who speaks Swedish, Norwegian, Danish and Finnish, was procured by the good offices of the Lutheran synods of the United States, to whom Mr. Chisholm appealed because of the increase of this class of immigration; the Lutheran body is weak in this country. Another addition to the staff is a young woman who speaks three or four languages of the Northern European group, who accompanies the regular outdoor workers at the docks and stations. Mr. Chisholm and his helpers have devoted special attention to the international traffic in women, incidentally discovering that Mexico, not Canada, is the principal avenue whereby women are conveyed from Europe to the United States for improper purposes. Attempts continually are being made, however, to inveigle unsuspecting girls from Canada to questionable places in the United States, and a number of these plots have been frustrated. Mr. Chisholm reports that he has been aided in this by the recent changes in the American immigration law, which is particularly effective in checking the movement of recently arrived immigrant girls to the United States. During the last six months of the period under survey, writes Mr. Chisholm, "I succeeded in providing the American authorities with sufficient evidence to enable them to capture three different auto parties consisting chiefly of girls, after they had succeeded in reaching well into the state of New York."

In his half yearly survey Mr. Chisholm makes the following remark:—

"At a social service meeting in Toronto last month at which I was present, Dr. Clark, of the General Hospital, gave a survey of 125 overseas girls who passed through the unmarried mothers' clinic. He reported that in one year 77 of them were domestic servants from overseas. I was distressed at hearing this report before Miss Bondfield, M.P., of London, England. He also gave a summary of the unmarried mothers' clinics during the last seven years in the same institution. During that period 840 unmarried mothers gave birth to children, 65 per cent were foreign born, 32 per cent were British born and only three per cent were born in Canada. During a similar period there were only 12 illegitimate births among the entire number of girls received and distributed from overseas by the Dorchester House in this city."

## WORK OF THE DISTRICTS

The reports submitted by the officers commanding the several districts and divisions show an increasing volume of work, performed in nearly all cases by a smaller number of hands, and contain much matter of general interest.

## BRITISH COLUMBIA

In E Division, which comprises the province of British Columbia less the East Kootenay district, there has been a change of command, Assistant Commissioner T. A. Wroughton having retired on pension and Superintendent R. S. Knight having been transferred from Winnipeg to succeed him. Superintendent Knight reports a decrease of strength, from 128 to 97 all ranks, and remarks:—

"Since February, 1924, the decrease in strength (mostly constables) has been continuous from month to month, while no recruits have been taken on and no ex-members of the force have been re-engaged. Although some detachments have been closed, I consider that a divisional strength of 125 of all ranks is necessary for the prompt and efficient performance of all duties that we are called upon to perform."

The number of detachments was reduced by four—Cumberland, Alert Bay, Vernon and Grand Forks. Superintendent Knight says:—

"The above-mentioned detachments were closed on the grounds of economy, and at the time protests against the removal of our men were made by certain civic authorities and others at Grand Forks and Vernon. However, matters have been fairly quiet in the localities in question and cases demanding our attention have been attended to as promptly as possible from the nearest detachment. This has naturally entailed certain extra expense, especially in the way of railroad transportation."

In addition, the detachment at Nanaimo is to be closed temporarily; as an offset, members of the force have had to be stationed temporarily at New Westminster, Chilliwack and Agassiz, in all cases to enforce the Indian Act. An interesting duty, which is noticed at greater length elsewhere, is thus described:—

"A patrol, consisting of Inspector T. V. S. Wunsch and two constables, left Vancouver in June, 1924, for the Liard district, northern British Columbia. Supplies for summer and winter, also a canoe, were taken in with the party in anticipation of the necessity of spending the winter in that district. The main purpose of this patrol was to investigate the alleged murder of an Indian by other Indians. Inspector Wunsch and party are now returning to Vancouver with five Indian prisoners arrested in this connection."

Superintendent Knight adds:—

"At all points every endeavour has been made to co-operate with provincial and municipal police, with, on the whole, good results."

Turning to the assistance rendered to other departments of the Federal Government, Superintendent Knight makes the following remarks upon our co-operation with the Department of Health:—

"The enforcement of the Opium and Narcotic Drug Act in this district has, as you are aware, been greatly hampered by the revelation of our whole system of dealing with the narcotic drug traffic before the Royal Commission which met here last fall. The process of building up a new drug squad, with a view to getting inside information, has been necessarily slow, but is progressing favourably and I anticipate very good results in the near future."

"Throughout the past year 539 specific investigations were conducted, resulting in 27 convictions, 5 dismissals, 2 awaiting trial; 4 are still under investigation; in 17 cases no prosecutions were entered; and the remaining 484 cases, comprising inspection of drug store records, were handed over to the department concerned."

Under the heading of assistance to the Department of Indian Affairs the Officer Commanding records considerable activity, the most important piece of work being the patrol to the Liard river already described; no police have been sent to this district since a patrol of this force passed through to the Yukon in 1898, and he remarks that the lack of supervision was evident in many respects, witchcraft being freely practised among the Indians.

Concerning assistance rendered to the Department of Customs and Excise he observes:—

## SESSIONAL PAPER No. 21

"Liquor can be purchased so readily from the Government liquor stores scattered throughout the province that illicit distillation is not prevalent in this province."

Modern inventions have made more work for us, as is shown by the following passage in the paragraph relating to co-operation with the Department of Marine and Fisheries:—

"The inspection of 1,131 radiophones was carried out for the Radio Branch and results were forwarded for the information of the department. On two occasions instructions were received to prosecute under the Radiotelegraph Act, 1 conviction being secured and 1 charge dismissed."

## SOUTHERN ALBERTA

This division comprises the southern portion of Alberta and also the Eastern Kootenay region of British Columbia. Superintendent C. Junet reports a reduction of strength, from 103 to 97 all ranks. This division is noteworthy for its numerous detachments; upon this point Superintendent Junet says:—

"Although the large number of 23 detachments are maintained in southern Alberta district, which includes the eastern part of British Columbia, they are situated at strategic points, each having its special work to perform, and all are called upon to carry out a great variety of duties. Most noteworthy is the actual policing of Dominion Parks, the greater portion of which are located in this district, namely, Rocky Mountain, Kootenay, Yoho and Waterton. The former three form the Banff sub-district under Inspector Ryan, and as you will note from the attached summary of cases handled, they have had a very busy season, enforcing not only Dominion Parks regulations and federal statutes, but also the Criminal Code and the provincial ordinances; and at the Waterton Park we have one permanent detachment, which in previous years was only maintained during the summer months. Three motorcycle patrols were maintained during the summer months on the Banff-Windermere Highway, which has grown to be a very popular one by tourists.

"Five Indian reservations are situated in this division, several of which are large in area, and consequently a great deal of work is necessary not only in enforcing the Indian Act, but in maintaining law and order amongst the Indians. Detachments are stationed on or in the vicinity of these reservations. A number of detachments are situated on the international boundary, where a great deal of assistance is rendered the Department of Immigration. This is borne out by the fact that 147 infractions of the Immigration Act were dealt with, the majority of which were handled by boundary detachments. At Calgary, in addition to a variety of work in connection with the enforcement of federal statutes, a 24-hour guard is maintained at the office of the Assistant Receiver General. The remainder of the detachments such as Medicine Hat, Drumheller, Blairmore, Michel, Fernie and Cranbrook, are engaged in the enforcement of federal statutes in general and the carrying out of various investigations for other federal departments, etc."

An occasion peculiarly interesting to this force is thus touched upon:—

"One of the outstanding events during the year was the Macleod Jubilee, a celebration undertaken by the citizens of Macleod in commemoration of the fiftieth anniversary of the arrival of the North West Mounted Police at Fort Macleod. It was decidedly a success in every way; the celebration lasting three days was a great reunion of old timers. A great deal of work in connection with various arrangements, such as decorating, parades, musical rides, etc., fell upon this division, and I am glad to say that our part of the programme was very much appreciated. This was brought to your notice in various ways, I believe, when you visited Macleod during the past summer."

Dealing with assistance rendered to the Department of Customs and Excise, Superintendent Junet says:—

"A considerable amount of work has been done for this department in locating American automobiles, some for violating tourist permits and others for being unlawfully in the country. Several seizures were made and prosecutions entered by members of this force, whereas others were handed over to the department to be dealt with. Several cases of petty smuggling were handled. Cases of smuggling American tobaccos and cigarettes were not uncommon, several persons being prosecuted under the Inland Revenue Act for this offence.

"The illicit manufacture of liquor is falling off to a great extent since the coming into force of the Alberta Liquor Control Act which is somewhat similar to the Act in force in British Columbia, although perhaps a little more freedom is permitted in that beer parlours are provided for. This being the case, liquor of all kinds can be obtained readily and

15 GEORGE V, A. 1925

infractions of the Inland Revenue are mostly confined to the outlying portions of the district."

With regard to the Department of Health, he says:—

"The members under my command in connection with the enforcement of the Opium and Narcotic Drug Act during the past year, although working faithfully and on just as large a scale as in previous years, their efforts have not been rewarded with the usual success. A large number of cases were handled where conclusive evidence was adduced of infractions of the Act, which were either dismissed by magistrates or thrown out on appeal. One important case where a conviction was obtained in the magistrate's court and which was upheld on appeal, was eventually quashed by the Chief Justice of British Columbia as a stated case. . . . This applies to Orientals as well, they becoming more and more artful in their method of carrying on this traffic. I am convinced that this traffic is being carried on more or less extensively, and this is borne out by the fact that a large consignment of drugs was recently seized in this vicinity, amounting to over sixteen ounces of morphine and cocaine, evidently from an international source."

#### NORTHERN ALBERTA

This division embraces the northern portion of the province of Alberta, and in addition the district of Mackenzie, a huge area of about 525,000 square miles extending from latitude 60 degrees north to the Arctic coast, and from longitude 102 degrees west to the eastern boundary of Yukon Territory. In addition, the islands north of the Arctic coast are under supervision. In this vast region we have two sub-districts.

Superintendent James Ritchie's report contains the following passage:—

"You decided to materially increase the strength in the north and three new detachments were established namely Rae, Providence and Good Hope.

"In 1920 we had only three detachments in the Mackenzie district, namely: Fitzgerald, Resolution and Simpson, but we now have nine, and the sub-district in charge of Inspector G. F. Fletcher extends from Fort McMurray in Alberta to Arctic Red River in the Northwest Territories, with a strength of three officers and 26 non-commissioned officers and men and nine special constables. You are also contemplating opening three more detachments next year at Hay River, Arctic Red River and Dease Bay. The Arctic Sub-district under the command of Inspector T. B. Caulkin with headquarters at Herschel Island consists of Aklavik, Herschel Island, Baillie Island and Tree River."

The problems of and work in the north occupy much space in Superintendent Ritchie's report. He says, for instance:—

"There was an average catch of fur last winter and high prices were paid. The new game preserves are of great benefit to the natives and we are doing our utmost to see that they are not encroached upon.

"The increased fees for hunting and trapping under the Northwest Game Act have received much adverse criticism from American trappers, but those whose opinion is worth something believe that the regulations are wise in which I agree. For instance, in Alaska only United States citizens are allowed to hunt and trap and a foreigner enjoys few privileges in this connection in the United States.

"Law and order are maintained by the Royal Canadian Mounted Police, and all the various Acts of the Northwest Territories are enforced by us. For instance we have collected some \$20,000, principally for the Department of the Interior, during the last twelve months. The work of the Northwest Game Act and Wolf Bounty payments takes up much of our time.

"For the Indian Department we do much in the way of issuing rations and medicines, and providing escorts to agents paying treaty. Such escorts have in the past year travelled in the Mackenzie district alone a total distance of about 5,000 miles. Altogether the mileage covered in the Mackenzie district for the year totals 34,000 miles, by foot, steam-boat, gas-boat, canoe and with dogs.

"I might instance the work for the Public Administrator of the Northwest Territories, in which we collect the property of deceased persons, hold auctions thereof; the proceeds and reports are forwarded to Mr. H. Milton Martin, Public Administrator, in Edmonton.

"It would take too much space to elaborate upon the manifold services rendered to all by our men in the North, and of the hardships they manfully endure and of which no one ever knows.

## SESSIONAL PAPER No. 21

"The Indians are well behaved in the North and it is very touching to see their demeanour at the various services, showing the gradual, but wonderful state of Christianity which they have reached. The same remarks apply to the Eskimos, who especially have a wonderful faculty for copying what they see, many of whom have cameras and develop their own pictures.

"Too much cannot be said for the wonderful work done by the Roman Catholic and Anglican Church missions in the north and of the high state of efficiency the schools for native boys and girls at different points in the North, have attained.

"A new establishment of the Roman Catholic missions in the Far North will be erected at Aklavik, on the delta of the Mackenzie river, next summer. There will be a school for the Eskimo and Loucheux Indian children as well as a church and residence, this being the furthest north outpost of the Catholic Church.

"I should add that the Church of England have had a stronghold at Aklavik for many years and is regarded by that body as the centre of the Eskimo work."

On these northern rivers and lakes we have seven power-boats; the question of an auxiliary schooner for the Arctic sub-district is under consideration.

In the more settled portion of the division work went on as usual, the officer commanding remarking:—

"You will notice from the attached schedules that the investigations for other federal departments and miscellaneous enquiries have increased over 300 per cent this year.

"Investigations of alleged infraction of federal statutes, Criminal Code, provincial statutes and parks regulations show about 20 per cent decrease, but the percentage of convictions is higher."

Work for the other departments showed few novel features; that on behalf of the Department of Indian Affairs naturally was considerable and a good deal of patrolling, etc., was done for the National Parks Branch of the Department of the Interior. As in other divisions, investigations for the Naturalization Branch of the Department of the Secretary of State for Canada caused much work; Superintendent Ritchie says:—

"During the year investigations regarding 467 applicants for naturalization were made. These enquiries entailed considerable travelling, a total mileage of 24,299 being covered, 8,849 miles by train, 13,722 miles by trail and 1,628 miles by boat. This is practically double the mileage covered last year in the performance of the same duties."

## SOUTHERN SASKATCHEWAN

Superintendent A. B. Allard reports a total strength of 38 of all ranks, a reduction of four from last year, and an increase of work, the mileage traversed having increased from 221,459 to 244,707, and the work having increased. At present he has fourteen detachments, including Regina, a reduction of four. Three detachments, Maple Creek, Big Muddy, and Northgate, were closed on March 31, 1924, and Fort Qu'Appelle was closed on April 30, 1924. He says:—

"The total of investigations conducted last year were 2,218; this year they have jumped to 4,642, being an increase of 2,424, or 109 per cent, the particular reason for this increase being the registration of Chinese; 1,125 were registered, which entailed a great deal of careful work, each registration occupying approximately three-quarters of an hour. This was not the finish of it, as the certificates were returned to be handed back to the Chinamen, and also in several cases, further information was asked for by the Chief Comptroller, when the Chinamen had to be interviewed again.

"On behalf of the Inland Revenue Department 1,432 new investigations were conducted and 86 old cases, in all 1,518, being a decrease of 40 cases from last year; notwithstanding this, the convictions were greater by 33 (a total of 321). Included in these convictions were 8 for second offences, they being dealt with severely, both fine and imprisonment being imposed. The majority of the stills seized were 'drip stills,' the reason for this being in my opinion that these apparatuses are usually made up of kitchen utensils, etc., and easily dismantled when not in use and therefore difficult to detect. In the enforcement of this Act, 16 cases of obstruction were met with, and each was dealt with under the Criminal Code. In one particular case at Yorkton, a farmer was caught in the act of operating a still in the bush, and on his person was found a loaded revolver; for this offence he was charged under the Criminal Code and his revolver confiscated.

15 GEORGE V, A. 1925

"A great hindrance to our work in connection with the enforcement of the Inland Revenue Act is the telephone, as when our patrols leave certain points or are seen on the trails, farmers warn each other of our presence in the district, and I feel confident that about 25 per cent or 30 per cent of our searches were fruitless on this account. I have 13 enforcement officers and the major portion of the work is being performed in plain clothes."

A heavy increase in the work connected with the Indian Act is recorded; last year the cases investigated numbered 58, with 39 convictions, and this year the figures jumped to 139 and 124 respectively. Many of the convictions were in connection with liquor, lemon extract being much used as an intoxicant by them. Another heavy increase was in investigating applications for naturalization, the 591 cases representing an increase of 328 over 1923. Post office robberies accounted for a good deal of work.

#### NORTHERN SASKATCHEWAN

Superintendent F. J. A. Demers, Officer Commanding the Northern Saskatchewan district, reports a strength of 39 all ranks, exclusive of two special constables, divided among eight detachments and the divisional headquarters. Of the detachments, those at Chesterfield Inlet, Port Nelson and the Pas have to deal with northern affairs. Dealing with assistance rendered to the Department of Customs and Excise, Superintendent Demers says:—

"This year there were 363 cases entered and 114 convictions obtained under the Inland Revenue Act. This is a decrease of 112 cases entered and an increase of one for convictions from that of last year.

"The circumstances leading up to the various searches and subsequent conviction are very similar, with no outstanding feature to bring to your notice. The type of still, however, vary considerably; we find stills made out of all manner of utensils, the simplest being what is called the drip still, which is complete with the following: 1 bucket, 1 small lard pail, and a small basin, while others have all the different sections very similar to that used in a regular distillery."

A class of work in which a sharp advance is noticeable has to do with the radiotelegraph; 291 licenses were issued to operators of receiving sets, an increase of 257 in the year. These sets, the officer commanding remarks, are becoming very popular in the district. Much work was done in the patrolling of Indian reserves. As with Northern Alberta the work of this district extends into the far north and part of it is carried on under Arctic conditions.

#### MANITOBA

During the year a change took place in the command of this division, which extends to the eastward into Ontario so as to include Port Arthur and Fort William; Superintendent R. S. Knight was transferred to British Columbia, and Inspector T. Dann was appointed to succeed him. The strength of the division has been reduced by 30 officers, non-commissioned officers and constables; as a result the Fort William sub-district has been abolished, a detachment of one non-commissioned officer and three constables being substituted. In addition, the detachments at Gretna, Gypsumville, Killarney, Snowflake and Nipigon have been abolished. In the course of the autumn a detachment will be established on the Bloodvein Indian reserve, just above the narrows on lake Winnipeg.

Dealing with aid to the Customs Branch of the Department of Customs and Excise, Inspector Dann says:—

"As in previous years the bulk of the work in connection with assistance to this branch of the federal service has been done by our boundary detachments who have been called upon at various points to undertake considerable work in putting a stop to the very prevalent practice of smuggling goods into Canada from the United States by farmers living near the boundary; although the amounts so smuggled are in many instances not large, the practice itself is a common one, and to put a stop to same requires constant vigilance.

## SESSIONAL PAPER No. 21

"Apart from this phase of the work we are forced to realize that there is a very large amount of what may be termed smuggling of goods in wholesale quantities. This class of law breaking is very difficult to uncover and it practically means that information has to be obtained from some person within the ring operating, or benefitting by such operations. An instance in point occurred when we assisted Customs-Excise preventive officers to raid a house and dance hall in Winnipeg, and seized goods which included an automobile, silk wear, silk hosiery, household linen, silverware, cigarettes, fountain pens, stationery goods and a supply of special automobile search lights.

"Comments have appeared from time to time in the local press, supported by letters from business men, stating that this state of affairs is unfair to persons engaged in legitimate trade."

As regards the Excise Branch he says:—

"Considerable work has been done in connection with this branch, both by our men appointed as preventive officers and in conjunction with department officers. Three giant stills were among the many seized, each of these being fully capable of producing from 40 to 50 gallons of liquor in an eight-hour day. One of these stills was found on the same premises from which a large still has been taken twice previously.

"Investigations in this connection were made and convictions secured throughout the year. The obtaining of convictions in prosecution of this nature is now a difficult matter, owing to the fact that legal technicalities are largely taken advantage of to secure dismissals."

Much work was done for the Department of Indian Affairs, there having been 158 prosecutions and 135 convictions. Here again liquor figured largely. The report says:—

"A patrol was made to Cross Lake in August of this year to conduct an investigation which arose out of the drowning of a drunken Indian at Cross Lake, resulted in securing a number of convictions—seven against Indians for the manufacture of illicit liquor, one against an Indian for supplying liquor, and two against white men for supplying liquor to Indians, one of these two white men being a local magistrate.

"As a result of a patrol, made by Inspector Mead on the east shore of lake Winnipeg this fall, 36 convictions were secured for offences connected with liquor, all of which were attributable to illicitly manufactured spirits. I am pleased to state that the three white persons who supplied the liquor in the majority of these cases are at the time of closing this report being proceeded against and from the mass of evidence secured against these men we hope to secure convictions which will no doubt go a long way towards stopping a scandalous traffic of long standing."

In dealing with the work under the Opium and Narcotic Drug Act, Inspector Dann remarks:—

"A feature in the local drug situation not noticeable until within the last twelve months, has been the number of burglaries of drug stores. In this connection it has been found that practically the only supplies stolen have been narcotics; from this we might assume that the addicts are finding considerable difficulty in obtaining supplies, especially since owing to the prosecution of doctors are becoming very reluctant to issue drug prescriptions, and the peddlers so far as is known, are practically eliminated."

## WESTERN ONTARIO

Superintendent H. M. Newson reports an increase of nine in numbers, the division now having a strength of 46 all ranks; there are 10 detachments, and in addition a permanent guard is maintained in the office of the Assistant Receiver General in Toronto. The work of the Criminal Investigation Branch has practically doubled in the year, the number of cases rising from 2,136 to 4,207. Dealing with the enforcement of federal statutes, Superintendent Newson says:—

"During the course of our investigations under this Act, we came across a number of druggists in Toronto who were not complying with the Opium and Narcotic Drug Act, inasmuch as they were not keeping proper records of narcotic drugs handled. The inspection of druggists' records of narcotic drugs has had a healthy effect. In a number of instances when making these inspections, it was found that certain 'mushroom' drug stores existed simply for the purpose of retailing liquor. This was brought to the attention of the city police and it was not long before a clean-up was made and the stores in question closed down.

15 GEORGE V, A. 1925

"These inspections also serve a very useful purpose, as by careful checking it is possible to trace the activities of addicts and also of a few (and very few I am glad to say) members of the medical profession, who by lending themselves to doubtful transactions in drugs with addicts, are prostituting their profession.

"Reputable druggists and doctors appreciate our work; I have always received their support, particularly that of the College of Physicians and Surgeons of Toronto."

Another remark is:—

"We have also directed our energies to the enforcement of the Customs Act. Numerous patrols have been made along the frontier at Niagara Falls, Ont., with a view to securing information in connection with the smuggling of liquor, cigarettes, drugs and silk goods into this country from the United States. We were successful in a number of instances in making seizures of cigarettes and merchandise and in obtaining convictions under section 206 of the Customs Act.

"In our investigations under this Act we received every assistance from the Customs officials with whom we come in contact in the enforcement of the Customs Act."

#### EASTERN ONTARIO

"A" Division, with headquarters at Ottawa, consists of the force formerly known as the Dominion Police and has charge of the territory known as Military District No. 3, this extending into the western portion of Quebec. Superintendent T. S. Belcher reports a total strength of 230, this including the large detachment of 33 all ranks maintained in the Maritime Provinces. The work of this division largely consists of guarding Government buildings in Ottawa, though some of it lies out of town. Thus Superintendent Belcher reports:—

"At Amos, Que., we have one non-commissioned officer and one constable, but formerly during the year, owing to pressure of work, it was found necessary to send extra men to this place. They are entirely occupied looking after the Inland Revenue Act and the Indians. This detachment has a very large area to cover and really the district should be divided up into one other detachment, at a convenient point. This matter will be given attention during the coming year."

One interesting piece of work had to do with the Migratory Birds Act, and is thus reported:—

"A request was received from the department for a thorough patrol of the Ottawa district during the last half of August. This request was carried out from August 16 to September 2. The Ottawa river was patrolled from lake Deschenes, above Britannia, as far down as the vicinity of Cumberland, at all points where the birds are found. For this purpose two men were camped on the Quebec side at Angers, and two more at an island opposite Thurso, for several days. A continuous patrol was made of Constance lake and creek during most of this period, and patrols were also made at Manotick and Kars, Ont. These patrols had the effect of preventing any breaches of the Act in this district. A great amount of work was required as six men were employed for the greater part of this time, and during the week ends two more were out on patrol."

Another heavy piece of outside work had to do with conditions at the Kingston Penitentiary, the investigation taking much time.

The protection of Government property at Ottawa is arduous and calls for many men and much work, but is not productive of incident. Guards are maintained on 27 buildings, calling for 143 men daily, and in addition a large number of Government buildings are visited by patrols. Heavy guards are stationed at places indicated by the Department of Finance. Special calls, such as the public ceremonies associated with the opening of Parliament, are numerous and make heavy demands. The whole work of protection is carefully organized, an example being the precautions against fire; after explaining his method or organizing and enumerating the apparatus possessed, Superintendent Belcher says:—

"During the past year there were 24 fires in the different Government buildings. All, with one exception, were put out with our appliances and handled by the men on duty at the different buildings. Considering the number of buildings which are old and of an inflam-

## SESSIONAL PAPER No. 21

mable nature, there was very little damage done. In no case did we allow the fire to get headway which would have occurred if we did not have our men there and if they were not thoroughly acquainted with the handling of the different fire appliances."

A great proportion of the criminal investigation work performed by this division has to do with complaints of thefts, etc., from Government departments.

## QUEBEC

Inspector J. W. Phillips also has had a slight decrease in strength during the year, while the work, with certain fluctuations, has increased; detachments are maintained only in the cities of Montreal and Quebec. Dealing with the enforcement of the Opium and Narcotic Drug Act, Inspector Phillips says:—

"In dealing with the narcotic traffic, we are dealing with a unique class of crime. In nearly all cases where a crime has been committed, there is an aggrieved party, the complainant, as a basis to commence the investigation, but in the narcotic drug traffic there is no aggrieved party. The grower, the manufacturer, the trafficker, the peddler and the addict, that is to say, in every stage of the traffic every one is satisfied and every one is anxious to conceal the crime and to protect each other, and therefore the police have no basis from which to work. It is to the interest of each party at each stage, to assist each other in outwitting the police, and they will stop at nothing to gain their ends.

"The theory that respectable citizens are willing to assist the police in the suppression of crime is a fallacy, and this is not surprising. Should, by misadventure, a respectable citizen become involved in any particular case as a witness, he soon finds himself wasting day after day attending court waiting to give his evidence, losing both his time and money in an overcrowded court room, and surrounded by the most revolting characters. Can it be wondered at, then, that witnesses who could give valuable information are reluctant to tell the police anything, when they know that by so doing they subject themselves to these conditions?

"It is very seldom that any respectable person knows anything about the drug traffic, because, as I have already pointed out, there is no aggrieved party, and consequently, they do not come into contact with it unless it is a near relation or friend who has contracted the habit. They are then opposed to telling the police anything for fear of scandal.

"Another system which recommends itself is granting immunity to those turning King's evidence. Many men would tell all they knew about those higher up if immunity could be granted to them, but this immunity should be offered before the case comes to Court and before the arrest is known. This could easily be arranged if we could have a system of arraigning a prisoner before a judge privately immediately after arrest, and bonding him privately.

"Much may be said against the use of informers and their method of detection, but if they are not used, members of the force must be, and it cannot be expected that any man could meet and mix with this class of people and retain his self-respect, nor would it be fair to ask him to do so."

After remarking upon the necessity of preventing the smuggling of drugs into the country, Inspector Phillips adds:—

"Cases of note under this Act during the year, were the convictions of Harry Davis, now on bail, and of Hamany Goodman his runner, easily one of the worst narcotic traffickers on a retail scale, in Canada. 'Red' Miller, another trafficker on a large scale, is also before the courts. Three men, Ritzen, Atkinson and Bucci, were apprehended for the importation of narcotics. The Spanish Consul and his agent, Ramon Tey de Torrents, were also entrapped.

"On the whole, I believe that the narcotic traffic is on a slight decrease. This is caused by the publicity given to the deaths and evil results of narcotics."

A variety of other work was done for other departments. In regard to these Inspector Phillips quotes certain commendations which have been elicited by the work of our men. One passage from his report is:—

"In the case of *Rex vs. Towle*, Mr. R. L. Calder, M.C., K.C., Chief Crown Prosecutor, Montreal, under date of August 9, 1924, stated as follows:—

'In spite of the failure to bring Towle to justice, I do not think the prosecution entirely failed of its object. The mere appearance of the "Mounties" along the border and the interest shown by the Government, will, I think, do much to restrain this lawless community.'

15 GEORGE V, A. 1925

"In the case of the Spanish Consul, the same gentleman, under date of August 18, 1924, stated as follows:—

'I can not allow this opportunity to pass without extending to you special congratulations on the intelligence and activity of those charged with the case and with their upright and temperate giving of evidence under considerable provocation to be otherwise.'

"In speaking of the Spanish Consul case, Mr. F. B. Brais, Assistant Crown Prosecutor, Montreal, under date of June 20, 1924, states as follows:—

'In conclusion, I would wish to take the liberty of signalizing the numerous comments which have been made around the Court House and elsewhere in Montreal, by judges, advocates and the public in general, relative to the manner in which this case has been made. The work of Staff-Sergeant Salt and Sergeant Brown has elicited numerous and unstinted words of praise and surprise and has brought, once more, to the eyes of the public, the value, resource and morale of the Royal Canadian Mounted Police.'

'But, above all, I wish to signalize the careful and meticulous care given to the preparation of this case for the purpose of trial, the collection, tabulation and indexing of reports, notes, documentary evidence and exhibits.'

'These arrests were preceded by almost a whole year of resourceful work and during this time the evidence adduced had been carefully and systematically compiled and indexed by Staff-Sergeant Salt, so that, when forced to proceed to enquire two days after the arrest, it was possible for me to extract from the index and summary of the record, the exact evidence required and be ready to proceed within such a short delay. The value of this cannot be overestimated.'

'I have taken the liberty of making these comments as work such as this is so rarely encountered that it seems impossible not to make some mention thereof.'

In mentioning the Department of Indian Affairs, Inspector Phillips says:—

"Reg. No. 9455, Corporal Kyle, J. H. and Reg. No. 9339, Constable Dupuis, A. were stationed at Pointe Bleue from May 15 to August 25, by special request of the Department of Indian Affairs, and there is no doubt that their presence was beneficial to the community and did much to protect the Indians from unscrupulous visitors. I quote an extract from the *Quebec Diocesan Gazette* of September, 1924, page 6, column 1, which bears out this report:—

'A word must be said in praise of the work done by the two members of this splendid Force (Royal Canadian Mounted Police) at Pointe Bleue. Never has there been a quieter time on the reservation and the depredations of the bootleggers have been effectually stopped, owing to their presence. It is however, greatly to be hoped that the Ottawa Government will enlarge the scope of their operations so as to include a zone of ten miles or so around the reservation. A recommendation to this effect has already been made to the Department of Indian Affairs and all friends of the Indians should urge the department to act upon this recommendation.'

Special reference is made to the satisfactory work done by Sergeant F. W. Zaneth, who is in charge of the detachment at Quebec. A detail of the work at Montreal was the establishment by Sergeant Churchman of a small Criminal Investigation Bureau, where photographs and finger prints are taken.

#### THE MARITIME PROVINCES

Inspector C. D. La Nauze, like so many others, reports a decrease in strength and an increase in work. Much work is done in this district in checking the smuggling and illicit manufacture of liquor, Inspector La Nauze reporting:—

"Our total seizures of smuggled liquor in Nova Scotia for the period in question were 2,135 gallons of rum, 16 gallons of whisky and 12 gallons of brandy. Fines amounting to \$2,300 were collected and sent to headquarters.

"As our activities increase the difficulty of this work increases also, and I again report that had I more men and the necessary transportation, greater results might be expected."

With regard to the Department of Marine and Fisheries, Inspector La Nauze says:—

"Our work for this department ceased in November, 1923, and no further assistance has since been requested in connection with the enforcement of the Fisheries Act in the

## SESSIONAL PAPER No. 21

Maritime Provinces. In this connection I received a letter from the Chief Inspector of Fisheries (Eastern Division), of which the following is an extract:—

'I am pleased to have the opportunity to report that the services performed by Constables Tumblin, O'Brien, Conrad and Young in New Brunswick, and Constables Gillis and Beazley in Prince Edward Island were of the most satisfactory character, particularly with regard to preserving the lobster fishery from destructive and illegal fishing, and also the lobster canning industry from the serious injury suffered for many years past on account of the considerable quantities of illegal and poorly packed goods which were placed on the market, thus affecting the reputation of the trade.

'The value of the work of the constables, which was carried on with noteworthy discretion, cannot be too highly praised. Our officers were protected from bodily harm in some instances. Illegal practices were curtailed to a most gratifying degree and a wholesome respect for law and order largely regained the confidence restored to the industry. The prospects are that with similar assistance for the next several years illegal practices will be practically wiped out, and the most highly valued fishing and canning industry saved from the deplorable results that have accompanied illegalities in the past.

'The special work of several of your constables in investigating complaints against our officers and in assisting in the protection of the salmon sport fishing in each of the Maritime Provinces has also been of value.'

"I regret to report that one of our most energetic constables, Reg. No. 9177 Constable Tumblin, C. W., contracted a severe illness due to exposure and wetting while on this duty and is still under medical treatment."

An interesting case of assistance to the Provincial authorities is thus chronicled:—

"Upon your instructions of December last, four members, with the police car, were sent to Queens County, N.S. to investigate the looting of the British ship *River Wye* which went ashore near Port Mouton island, N.S. in November.

"Sixteen convictions were secured under section 430 Criminal Code, and the Attorney General of Nova Scotia wrote me a letter of which the following is an extract:—

'I must thank you and your staff for the services you have rendered and compliment you on the success you have attained, which, after all, is only to be expected from a Force with such glorious traditions behind it.'

## THE YUKON

Inspector E. Telford in his report once more lays stress on the multiplicity of the duties performed by the force in this district. Under the caption "Assistance to Other Departments," he says:—

"Under this head I would draw your attention to the increased amount of work taken over by this division: during the past year the office of 'Sheriff of the Yukon Territory' was handed over to the Officer Commanding. Under present instructions the Officer Commanding Whitehorse Sub-district will take over the duties now performed by the police magistrate at that point.

"S/Sergeant W. J. D. Dempster, in charge of the Mayo Sub-district, acts as magistrate and coroner in the Mayo district.

"Non-commissioned officers and constables at outlying points act as veterinary, immigration and customs inspectors, postmasters, collect royalty tax, search baggage for gold-dust, furs, etc.

"The Officer Commanding at Whitehorse, in addition to his other duties, is mining recorder, Crown land and timber agent, and fire inspector for the Department of forestry.

"The Officer Commanding division is sheriff, immigration officer, inspector of fisheries, inspector of weights and measures, registrar of vital statistics, and all members of the division are game wardens, *ex-officio*.

"In addition to enforcing federal and territorial laws, the duties of enforcing city by-laws also fall on us, and we issue permits to export fur, set out poison for exterminating wolves, issue licenses to big game hunters, keep records of all big game killed. Under direction of the Public Administrator the estates of persons dying from sudden or accidental death, and insane persons in outlying points are handled by us. Distant detachments issue rations to destitute Indians by direction of the Superintendent of Indian Affairs, and when necessary attend to the sick.

"Sick or destitute miners and prospectors or trappers are looked after, and their several cases brought to the attention of the Territorial Government, and if necessary they are brought to Dawson for treatment, etc.

15 GEORGE V, A. 1925

"The necessary guards are also furnished the local collector of Federal Income Tax."

No crime of a serious nature occurred during the year; he remarks:—

"Owing to the stock of liquor in the Government liquor store becoming exhausted illicit stills sprang up; suspected places were raided, and we obtained convictions in three instances acting in conjunction with the Department of Customs and Excise."

Discussing the nature of the work, Inspector Telford says:—

"All districts have been thoroughly patrolled, those where mining is being carried on more frequently than the more outlying ones. Patrols have frequently to be made to distant points to investigate reports of sickness or destitution, and if necessary, the parties are brought into town for treatment. Owing to the long distances between habitations many of the patrols have to carry all their supplies with them."

"The principal patrols made were:—

Rampart House—LaPierre House, 280 miles, 14 days.

Rampart House—Herschel Island, 356 miles, 28 days.

Whitehorse—Wellesley Lake, 874 miles, 45 days.

Teslin—Iron Creek, 192 miles, 6 days.

Teslin—Wolf Lake, 216 miles, 15 days.

Ross River—Whitehorse, 293 miles, 14 days.

"On the patrol from Rampart House to Herschel Island, the guide hired by Constable McCormick disappeared after arrival at the Island, and was not found for three days; he apparently went crazy, but was found at Demarcation Point rather weak, but otherwise all right and after a few days rest fit for their return trip."

The following notes upon general conditions appear in the report:—

"There is a considerable change taking place in the Dawson District, people gradually leaving. Whitehorse being almost entirely kept up by the railroad, and being the head of navigation, does not change to any extent."

"Merchants and others are somewhat disappointed with the slow growth of Mayo and Keno, but the silver mines continue to look promising. The Treadwell-Yukon Company are installing a mill and, I am informed, have enough ore in sight to keep the mill busy for three or four years, and in the meantime expect to uncover other rich leads. During the year further discoveries of large bodies of silver ore have been found in the Beaver District, some 50 miles east of Keno, and there is no doubt that the whole of this part of the territory is very highly mineralized."

"There have been no new finds in placer mining, and the only gold taken out in large quantities is that mined by the companies operating the creeks around Dawson."

"A large number of old prospectors are scattered over the territory, and it adds considerably to our work keeping track of them, as many are feeble, and have to be brought to Dawson, or given subsistence; most of these are men who prospected in the Caribou and Cassiar districts before the Klondyke was discovered, then followed the rush to the Yukon, and are now men of 65 to 75 years of age."

#### N DIVISION

Inspector C. Trundle reports a sharp decrease in this division, which is maintained at Ottawa as a reserve, it having declined in the year from two officers and 56 other ranks to one officer and 35 other ranks. Its duties remain of a miscellaneous nature, it being drawn upon for such special pieces of work as the guarding of taxation offices, furnishing escorts for harvesters' trains, strengthening other divisions at the time of the Post Office Strike, etc. A certain amount of ceremonial falls to the lot of this division, and its performance of these duties has elicited several expressions of commendations. On July 19, 1924, a mounted escort was furnished for His Excellency the Governor General on the occasion of the prorogation of Parliament.

#### TRAINING

Superintendent A. W. Duffus, the Officer Commanding the Depot at Regina, has had to contend with the decline in strength which has been so marked in the various districts. In the first six months of the year 60 recruits

## SESSIONAL PAPER No. 21

joined, and 30 non-commissioned officers and constables were transferred from other divisions to the depot, but 79 non-commissioned officers and constables were transferred to other divisions, and in addition over 70 were struck off the strength owing to various causes—death, invaliding, retirement to pension, time expired, etc., so that there was a drop from 213 to 158 all ranks. He remarks:—

"Owing to the limited number of men available for duty in the post, it has been very hard to have the necessary work done and at the same time carry on with training. During the summer months there are so many calls for men for outside duties, such as musical rides, escorts for harvester trains, guards for the Income Tax office, etc., that training is practically suspended with the exception of the musketry practice."

Apart from these outside calls, the tale of the year's work has to do with training and with sundry improvements to the buildings, rifle range, etc. The training has been carried on with the customary thoroughness, the most interesting feature of it being the good work done in musketry and revolver practice. In the rifle nine qualified as marksmen and 40 as first-class shots, while 37 won the standing of marksmen with the revolver. The depot did well in competitions, winning a considerable number of prizes, the most notable successes being the winning of gold, silver and bronze medals in the indoor championship competitions and military matches of the Canadian Revolver Associations.

## WORK IN THE FAR NORTH

The task of preserving order and protecting the natives in the Far North grows with the years. At present we have twenty detachments which conduct their operations under arctic or sub-arctic conditions, these being grouped into four sub-districts known as Ellesmere Island, Hudson Bay, Arctic, and Mackenzie River. The first of these embraces the three great islands which form the eastern face of the Canadian Arctic archipelago; on Baffin's Island are the present headquarters, Pang-nir-tung, and Ponds Inlet; on North Devon Island is the detachment, established this summer, of Dundas Harbour; and on Ellesmere Island is Craig Harbour, with a sub-post at Kane Basin. To the south of this, but administered direct from Ottawa, is the detachment at Port Burwell on Hudson strait. The Hudson Bay sub-district at present has only two detachments, at Chesterfield Inlet and Port Nelson. The Arctic sub-district has four detachments, at Aklavik, Herschel Island, Baillie Island, and Tree River. The Mackenzie River sub-district, which may be termed sub-arctic rather than arctic, has nine detachments, Fort Smith, Fitzgerald, Chipewyan, Resolution, Rae, Providence, Norman, Simpson, and Good Hope. Three of these were established this year, Rae, Good Hope, and Providence; it is intended to close the post at Fitzgerald, which is close to Fort Smith. These detachments represent much travelling, often in circumstances which entail hardship, and a great deal of work in administration.

## TRIAL OF IK-A-LUK-PIAK AT AKLAVIK

An account of the killing of the Eskimo Hav-ou-gaeh by Ik-a-luk-piak in November, 1921, appeared in the annual report of 1922. The affair took place about 90 miles inland from Tree River, and difficulties of travel, caused by unusual ice conditions on the coast, prevented the accused being placed on trial in 1923 when a judicial party was sent to Herschel Island. Another party was sent to Aklavik this year, and on July 7, Ik-a-luk-piak was tried before His Honour Judge Dubuc, found guilty of manslaughter, and sentenced to five years' imprisonment in Stony Mountain penitentiary. The prisoner was taken to the prison by us. The accused was represented by counsel, who set up a

15 GEORGE V, A. 1925

plea of self-defence and advanced sundry technical objections, one of them being to the swearing of native witnesses on the Bible, and another being a contention that the accused when he confessed had not understood the warning which had been given before he did so.

#### INSPECTION IN EASTERN ARCTIC WATERS

The customary voyage was made to the northeastern islands of the Arctic archipelago. The C.G.S. *Arctic* sailed from Quebec on July 5 with a non-commissioned officer and five constables of the force, and visited the several posts which have been established there. At Blacklead Island, near Pang-nir-tung, Inspector C. E. Wilcox, who had wintered there, was taken on board, and he inspected the detachments, ultimately returning to Ottawa to report. A new detachment was established at Dundas Harbour, on the south coast of North Devon island, Constable E. Anstead being left in charge, and a sub-detachment post was established on the eastern coast of Ellesmere island, on Rice strait, opposite Pim island, at the southern end of Kane basin; this is situated in latitude 78° 42' north and longitude 74° 45' west, and is about 200 miles farther north than Craig Harbour. A building has been erected and it will be visited during the coming winter by a patrol from Craig Harbour. The post has been named "Kane Basin detachment." The establishment of the detachment at Dundas Harbour, which is situated in approximately latitude 74° 35' north and longitude 82° 20' west, realizes a plan which has been under consideration for two years.

In the course of the voyage the *Arctic* visited Godhavn, the administrative centre of Greenland, and courtesies were exchanged with the Governor and other officials.

In the course of the voyage from Quebec to Blacklead Island an incident occurred which is described in the subjoined letter addressed under date of September 15, 1924, by Mr. F. D. Henderson, in charge of the expedition for the Department of the Interior, to Inspector Wilcox:—

"As you are aware the C.G.S. *Arctic* sailed from Quebec on July 5, having on board six members of the Royal Canadian Mounted Police, namely Corporal Tredgold, and Constables Dersch, Higgins, Maissoneuve, Margetts, and Mackinson.

"On July 12, when about one hundred miles out from Belle Isle, we encountered rough weather and owing to the heavy deck load the ship was unable to free herself from the water that came over the rail. This gradually accumulated and finally an unusually heavy sea came over which flooded the engine room and put out the fires.

"The ship was hove to, a bucket brigade was immediately formed, and the hand pumps were got going as soon as possible. It was apparent, however, that some more effective means must be taken if the ship was to be saved, and all hands who could be spared from the bucket line and the pumps were employed in jettisoning the deck load of coal. This had the desired effect. The ship rose from the water and the danger was past. However, before the engines could be started again, five days of continuous and most trying labour were needed to pump out the water and to clean up the coal which had been washed from the bunkers and had become packed around the machinery.

"During all this time the conduct of the police was excellent. They placed themselves under the orders of the ship's officers and worked with a will, long after the danger was past, to get things back into shape again.

"As senior officer in command of the expedition I wish to congratulate you on the very excellent behaviour of your men in a trying situation, and to ask you to convey to them my thanks and the thanks of the North West Territories and Yukon Branch which I represent for the great assistance they rendered in saving the ship and probably the lives of those on board."

#### PATROLS IN BAFFIN ISLAND

Inspector Wilcox, the Officer Commanding the Ellesmere Island sub-district, spent the winter at Pang-nir-tung fiord, on the north shore of Cumberland

## SESSIONAL PAPER No. 21

gulf. This detachment did a good deal of travelling, covering about 2,000 miles by dog team and over 500 by whaleboat. On two occasions, in December, 1923, and March, 1924, visits were made to an Eskimo settlement at Kekerten, a small island near the mouth of Kingnait fiord, to the east of Pang-nir-tung; both were errands of mercy, the first to relieve distress, as the natives were short of food, and the second to alleviate the condition of a native woman who was ill with tuberculosis. Two longer patrols, in January and February, 1924, covered the entire coast-line of Cumberland gulf. In addition, Corporal F. McInnes proceeded to Home Bay to investigate the deaths at Home Bay which were noticed in the annual report for 1923. Home Bay is a large indentation in the eastern coast of Baffin island, almost due north from Pang-nir-tung; a considerable eastward projection of the coast intervenes between the two places, and to pass from the one to the other it is necessary to proceed overland, up one of two fiords, Pang-nir-tung or Kingnait, which enter Cumberland gulf from the north. This patrol occupied 47 days, and the distance traversed exceeded 500 miles. The particulars of this patrol and of the investigation made by Corporal McInnes will be found in Appendix A.

Two or three notes may be appended relating of occurrences of interest. For example, on three occasions damage was caused by high winds. On November 17, 1923, and on May 1, 1914, the buildings were partly unroofed by the strong gales which raged; and on May 15, 1924, the canoe belonging to the detachment was picked up by a gust of wind, carried about 60 feet, and thrown upon some rocks. The damage sustained was made good by a member of the detachment.

An entry in Inspector Wilcox's diary under date of January 31, 1924, relates to a natural phenomenon which may merit notice:—

"Constable MacGregor left post in the morning to visit fissures in the earth's surface, on the western slope of a large hill, situated one mile northeast of Coolce river, and approximately two miles from coast line. He reports having seen two jets of hot air which are constantly emitted from the fissures conveying sufficient heat to melt snow with the temperature at  $-30^{\circ}$ ."

In addition to his patrols from Pang-nir-tung, Inspector Wilcox travelled over 1,750 miles by the C.G.S. *Arctic*.

## PONDS INLET DETACHMENT

Staff-Sergeant A. H. Joy and his detachment spent the winter of 1923-24 at Ponds Inlet. After the trial of Noo-kud-lah, of which an account was given in the annual report of 1923, the C.G.S. *Arctic* sailed south on September 3, 1923; the Hudson Bay Company's ship *Nascopie* left on September 18, for Montreal, and thereafter Ponds Inlet had no communication with the outside world until August of 1924.

Staff-Sergeant Joy reports an unusually mild winter, with less ice than usual; the lowest temperature recorded was  $49.5^{\circ}$  degrees below zero, which occurred early in February at the return of the sun. The Eskimos suffered a misfortune which is thus reported by Staff-Sergeant Joy:—

"An epidemic of an unrecognized disease, which made its appearance at the beginning of May, was responsible for 13 deaths in a few days. The disease was prevalent throughout the month of May and part of June, and almost every Eskimo in the district, adults and children, became infected more or less, and several about the post are still suffering from the after effects. A separate report covering the symptoms has been rendered."

The disease among the dogs which did so much harm in 1921, 1922 and 1923, apparently has run its course, so that the Eskimos are fairly well supplied with these indispensable creatures.

In addition to making sundry local patrols and a longer one to the river Clyde on the east coast of Baffin island, Staff-Sergeant Joy made a daring attempt to reach Ellesmere Island. This was foiled by ice conditions, but he was absent for 47 days and travelled about 650 miles, some of it in perilous circumstances. Details of this adventure are given in Appendix A, and it will suffice here to relate that he travelled from Ponds Inlet to the vicinity of cape Crauford, and then struck across Lancaster sound, intending to get to North Devon island, to traverse it, and then to cross Jones sound to Ellesmere island. The party found open water which they could not cross, and on returning encountered another channel which had opened in the ice behind them and which separated them from the land they had left; the ice upon which they were travelling was drifting, and they reached the mainland only by dint of great exertions and after incurring what must have been great danger.

Dealing with the economic condition of the Eskimos, Staff-Sergeant Joy writes:—

"Fur-bearing animals of all kinds have been scarce, and foxes in particular in the northern part of the district, but some creditable hunts were made by Eskimos living in the vicinity of Fury and Hecla strait.

"Caribou also have been less plentiful. Very few were killed in the district of Igloolik, and still less further north. The tracks of several herds crossing from Baffin Island to Bylot Island were seen during the winter.

"The necessity of keeping so many Eskimos here for the arrival of the ship prevented several families from making their annual summer deer hunt; as a result skins for clothing were scarce, the movements of some families were materially handicapped.

"The payment of wolf bounty has proven a boon to the Eskimos, and if the present enthusiasm maintains, it should be a good incentive to the reduction of these animals to a minimum on the caribou range within a few years. Bounty was paid on 17 wolves, most of which were captured in the district of Fury and Hecla strait. Wolves have been reported less plentiful this year, which may be attributed to the fact that caribou were more scarce.

"It is said that the traders are contemplating extending their operations further north to Ellesmere island, and that Eskimos are to be taken from the villages on Baffin island, where they are most plentiful, to Ellesmere Island to support the new posts, and as there are no caribou on the southern and eastern parts of Ellesmere island, skins are to be taken from Baffin island annually to clothe them. If these contemplations are effected, it will mean the exploitation of the caribou on Baffin island to such an extent that the existence of this herd will be seriously threatened within a few years. It appears, in the interest of game conservation, that such trafficking should be prevented by legislation; that the exportation of deer skins from one island to another should be prohibited, or such a heavy royalty should be put on each skin that the result would be as effective as prohibition. In any event the exploitation of big game should demand some substantial remuneration to the Government."

#### DETACHMENT AT CRAIG HARBOUR

This detachment, which is stationed at the southern end of Ellesmere island, in approximately latitude 76° 10' north, longitude 80° 55', during the winter of 1923-24 remained isolated for very nearly a whole year, the ship having left them there on August 15, 1923, and having returned on August 9, 1924. The principal occurrence of the winter was the destruction of the detachment building by fire on February 22, 1924. This misfortune, which vividly illustrates the dangers and hardships of life in the high latitudes, is thus chronicled by Inspector Wilcox:—

"It appears that on the day in question all members of the detachment were present in the building, being prevented from going outside by a blizzard which blew with great force from the northeast.

"The fire started apparently from the Bose Cone heater in the bedroom, or from the pipes leading from it by means of an elbow to the roof; at this time the three members of the detachment were all engaged on various tasks in the kitchen on the opposite side of the house.

"Although the bedroom had only been vacated a matter of a few minutes the fire broke out in this short space of time and had a strong grip on the inner flat roof on the building before it was noticed.

## SESSIONAL PAPER No. 21

"Inability to deal effectually with the outbreak is attributed to lack of adequate appliances, the Pyrene extinguishers being frozen, a very small supply of water in the building and the raging storm outside preventing anything being done from the exterior, after the outer roof had caught.

"Every possible effort under the circumstances was made to extinguish the flames but with no success, and when it was realized that the building was doomed attention was directed to saving whatever could be rescued, bedding and arms receiving first attention. Within a very short space of time the house was a red hot shell.

"Anxiety was felt for the storehouse which luckily did not catch fire although surrounded by flying sparks from the burning house.

"With great difficulty bedding and articles saved were conveyed to the blubber shed which was utilized as temporary quarters for the detachment. In the effort to salvage articles from the flames and convey them to safety all the men were frost bitten, and even the natives suffered severely pushing the salvaged gear by sled across to the blubber shed. Although in mid afternoon, a flag pole which had been erected as a wireless mast within five yards of the building could not be seen through the blinding snow. Articles were subsequently found scattered over the ice to a distance of nearly two miles.

"Following the fire the blubber shed was made as habitable as possible, wooden bunks erected and the cooking stove belonging to headquarters erected in place of the Bose Cone heater.

"Shortly after quarters were taken up in the blubber shed an incident occurred which might have proved fatal. When fixing up the cook stove various fittings could not be found as they were buried under several feet of snow, and therefore old fittings from the wreckage of the fire was used. On the night of February 26th the men were in bed, one of them, Constable Lee, was reading by candlelight when it was noticed that the light was growing dim, and was almost extinguished. Other members were asleep at this time. Feeling dizzy Constable Lee went to the stove and then feeling ill threw open the door and fell in a faint on the snow outside. The fall woke Corporal Michelson and Constable Anstead who were attempting to drag Constable Lee back into the building, when Corporal Michelson also sank down on to the floor in a stupor. Feeling as if he were about to do likewise Constable Anstead went outside and after a couple of minutes felt well enough to attend to the other men. The shed quickly cleared of the poisonous gas and in a few minutes the men were none the worse for their experience. The fire was immediately extinguished, and subsequently the proper fittings for the stove were found.

"Although February and March were intensely cold—the day succeeding the fire registering 55 degrees below zero—the men were comfortable in their temporary quarters, for although rather cramped one or more men were continually on patrol so that from the time of the fire until the arrival of the ship only 28 days were spent all together in the blubber shed."

The Eskimos who spent the winter with this detachment came from Greenland, and a passage in Corporal Michelson's report merits attention:—

"The two native families brought from Etah, North Greenland, for service with the detachment, have worked faithfully and intelligently throughout the year, and in spite of being separated from their tribe have appeared happy and contented. No case of sickness has occurred amongst the natives, their good health no doubt being due in part to their excellent standard of cleanliness and their greater understanding of the elementary laws of sanitation. In this respect so far as contact with a few families can be relied upon, these natives are far superior to those of Baffin Land.

"The natives have expressed themselves as entirely satisfied with their term of engagement both as to treatment and payment and were both ready to continue their service with the Royal Canadian Mounted Police."

During their period of isolation the members of this detachment made a number of patrols, and surveyed a portion of the coast line. Records deposited by Captain Sverdrup were found.

## AID TO ANTHROPOLOGICAL RESEARCH

Before leaving the northeastern Arctic, mention may be made of the occasional services which our detachments are able to render to the cause of scientific research. In the season of 1923-24 members of the detachment at Ponds Inlet gathered about thirty specimens of vegetation, and about fifty specimens of insects, and in addition excavated two old Eskimo igloos. In his report Staff-Sergeant Joy says:—

15 GEORGE V, A. 1925

"The first produced 167 specimens of Eskimos tools and pieces of worked bone, which were numbered consecutively and a record kept of the depth and location in the igloo each article was found. The second igloo I dug out with the assistance of Constable Must, which produced some 527 specimens, including several human skulls, most of them in first class condition; these were also numbered and recorded and the entire collection forwarded direct to the Museum, in compliance with the assistant commissioner's instructions."

The Chief of the Division of Anthropology in the Victoria Memorial Museum, in thanking me for the anthropological objects, described them as "magnificent material," and added:—

"The specimens are being cleaned by our preparator and form one of the most valuable accessions that the Division of Anthropology has received since I took charge of it in 1910. The care with which the collection was made is simply extraordinary and it would be difficult to find words of too great praise for the collection."

The Craig Harbour detachment has noticed remains of dwellings formerly inhabited by Eskimos, and some excavations have been made.

#### PORT BURWELL

Sergeant J. F. Wight spent a quiet winter at Port Burwell, the principal incident being a patrol in March to Georges river which involved about 300 miles of travel. One passage from Sergeant Wight's report may be quoted for the light it throws upon conditions in the north:—

"At 1 p.m. we reached a patch of scrub bush where we made tea. This is the most northerly wood growing on the Ungava coast and these are the first trees I have seen since coming north nearly four years ago."

#### CHESTERFIELD INLET

Our headquarters for the control of the northern portion of Hudson bay have been shifted from Churchill to Chesterfield Inlet. From this patrols are made south to Churchill, west to Baker Lake, and north to Fullerton; they probably soon will be pushed on to Repulse Bay. Police buildings are maintained at Fullerton and Baker Lake and have been visited. Corporal O. G. Petty, who spent some weeks at Fullerton in February and March, reports the scarcity of caribou which has been noticed in so many places in the north, and which is so ominous a sign. In March an Eskimo family whom he knew were carried out to sea and lost while hunting seal on a floe. Early in the year another family were carried out to sea in the same manner, but were saved by the floe drifting ashore.

#### THE ARCTIC SUB-DISTRICT

In his report for the six months ending June 30, 1924, Inspector S. T. Wood states that the suspected murder of Hik-tak by Komeuk, which was mentioned in the annual report for 1922, is under investigation by the Tree River detachment. He says:—

"A statement has been obtained from Hik-tak's son which is in the nature of strong circumstantial evidence against Komeuk. The latter and the wife of deceased are inland and will be interviewed on their return to the coast this spring."

Inspector Wood also mentions the supposed murder of Ook-pa-tow-yak by E-ter-goo-yak, near Baker Lake, which was reported upon in the annual report of 1923. The accused man at the time of writing was on Adelaide peninsula. One or two new cases are noted, one being thus outlined:—

"The abduction of native woman, Napnaikuk, by Eskimo Naofalik, winter 1922-23, is complained of by the husband of the woman. Inorajuk, the husband, of King William Island, with others went to meet a native trader near Lind Island. Here the accused Naofalik and members of his band took the woman by force. Naofalik and the woman are now

## SESSIONAL PAPER No. 21

residing at Cambridge Bay. Constable Brockie is now on patrol to that place to locate and bring back the woman. It is feared that there will be much trouble and loss of life unless the police take immediate action."

Dealing with the prevalence of game during the winter of 1923-24 Inspector Wood says:—

"In Coronation gulf the almost total absence of caribou now for the second year in succession is causing great hardship among the Eskimo, many cases of actual starvation being reported. Since the Eskimo depend on the caribou entirely for all clothing, bedding, summer shelters and various implements and also at certain seasons for their entire food supply, the seriousness of the situation is apparent. The establishment of trading posts in the routes of the bi-annual migration of the caribou to and from the northern islands, Victoria island in particular, has caused the caribou to go elsewhere, in fact reports show that caribou are increasing in the areas east and west of Coronation gulf. . . .

"From reliable information lately received it would appear advisable to extend the Backs River Preserve to the eastward to include the area from Chesterfield inlet north and west to include Boothia and Melville peninsulas and several islands north of that area. The area is described as being ideal for caribou, muskox, in fact all game and for the natives. It is essential that neither trading posts nor white trappers be allowed therein. Several traders and white trappers are headed for Boothia Peninsula this summer."

He adds that white trappers along the coast did badly. With regard to the Eskimos and Indians he says:—

"There has been no sickness with the exception of an epidemic of la grippe this spring which caught natives and whites alike everywhere.

"Cases of death by starvation are reported from Coronation gulf among the natives owing to absence of caribou. Among the western Eskimo the births have exceeded the number of deaths by a good margin."

One remark is:—

"Mr. T. Gordon, trader at Demarcation Point, just across the boundary, brought 150 head of reindeer from Point Barrow last fall, and these are now located near his post. They are doing well. A United States Government school and reindeer station is to be opened in that vicinity."

Active patrolling took place in this district, over 4,000 miles being traversed. On one patrol, made by Inspector Wood from Herschel Island to Aklavik in February, a temperature of 65° below zero was encountered; Inspector Wood's remarks are:—

"There was nothing unusual to report on the patrol except the exceptionally cold weather, which was hard on the dogs, affecting their lungs, and making them bleed at the mouth. The weather was the coldest I have experienced here in five years and is unusual for this section."

## THE MACKENZIE RIVER SUB-DISTRICT

The Mackenzie River sub-district was the scene of much travel, inspection trips and long patrols by officers, escort work with the Indian agent paying treaty money, and patrols by non-commissioned officers and constables accounting for a mileage of about 11,500; of this much was by steamboats and motor launches, a good deal by canoes, and about two thousand miles by dog teams. Inspector G. F. Fletcher, the Officer Commanding the sub-district, made two tours of inspection, one in the winter and one in the summer. Inspector H. L. Fraser made two journeys in the summer, the first from the sub-district headquarters at Fort Smith to Rae, and the second from Fort Smith post to Rae towards Great Bear lake along the chain of rivers and small lakes to a body of water described on the map as Lac Ste. Croix, but known to the Indians as lake Simitu, the meaning of the word being "lake of my net"; the object of this patrol was to establish a cache of provisions to facilitate a journey to Great Bear lake which is in contemplation, with the idea of ascertaining whether the coast of Coronation gulf may be accessible by this route. Inspector Fletcher's

15 GEORGE V, A. 1925

winter inspection, which was all performed with dog-teams, amounted to 1,128 miles; his summer inspection, which was principally done by steamboat, accounted for 1,982 miles; Inspector Fraser's two summer trips were of 1,074 and 1,414 miles respectively.

Inspector Fletcher's winter trip began on January 8 and ended on April 10. His account of conditions is in part as follows:—

"I found the Indians in very good circumstances, there being very little sickness and no destitution. The fur catch this year has been very fair, with a great number of mink caught, especially round the Slave River and Fort Resolution. Trappers were warned to stop trapping on the new Game Reserve on the Slave river. . . . The caribou have been farther west this year than they have been for several years, and as a consequence caribou meat has been fairly plentiful in the forts.

"Reports from Fort Rae and the east end of Great Slave lake state that there are practically no white foxes this year; great numbers were caught in this section last year, but this year they seem to have disappeared. Around Resolution itself, between Little Buffalo and Artillery lake, there are 29 white trappers. These white trappers are increasing in number every year, and their presence adds greatly to our work. There is no mining or development work being done in the North West Territories this winter; all companies have closed down, temporarily at least. I heard of no trouble between the Indians and white trappers, and I think that the setting aside of game reserves in which only Indians are allowed to trap will greatly lessen the chances of any friction between white and Indian....

"Our detachments have been kept very busy patrolling all winter, and the new detachments to be opened this year will enable us to more thoroughly cover the country in winter than we have been able to do with our present detachments. I have an exceedingly fine lot of winter travellers on my detachments at present; they can make the mileage and also look after themselves and dogs."

Inspector Fletcher's summer trip lasted from June 24 to July 20. In his report he gives interesting particulars of the several posts upon the Mackenzie, including the following note upon the Liard region:—

"The Liard river country is filling up quickly with white trappers and prospectors; it is one of the best fur producing countries in the north, a large number of marten being taken by trappers last season; marten is, of course, the highest priced fur that is taken in any numbers. There have been rumours for years of placer gold up the Liard and South Nahanni rivers—the Nahanni is a tributary of the Liard—and prospectors are working in that country and seem to thoroughly believe in the possibility of a big strike of placer gold at any time; there have been several small local rushes, but they have not amounted to anything.

"Patrols are made to Forts Liard and Nelson every year by our detachment at Fort Simpson, and trappers are visited as frequently as possible during the winter. Trappers have got into the habit of looking for these police patrols in winter, and undoubtedly experience a greater feeling of security in their isolation owing to the fact that they know that our patrols will be along. I have heard trappers tell strangers who inquired if they were not taking big chances in living so far away from settlements, that they were all right as the police patrols visited them to see how they were getting along. I hope with our increased strength to be able to pay more attention than has been possible in the past to this feature of our work in the North, which I think you will agree with me is a very useful and important one."

Inspector Eames was left at Norman, where he is to command the detachment, Inspector Fletcher remarking that the presence of a Justice of the Peace will be an advantage. At Good Hope another new detachment was established, a site being procured and the necessary buildings erected.

Inspector Fraser's earlier patrol was for the purpose of establishing the new detachment at Rae. Leaving Fort Smith on June 24, he travelled by steamer to Resolution, arriving there on June 25, and, leaving the steamer, made his way by motor launch across the Great Slave lake and up the North arm to Rae, where he selected a site on one of the three small islands on which the present settlement is situated, and made a beginning with the erection of the buildings. Early in July the annual gathering of Indians took place, entries in Inspector Fraser's diary being:—

## SESSIONAL PAPER No. 21

"2nd July. Blowing hard all day, so the *Liard River* would not be able to travel. Many more Indians arrived to-day. The Indians here use very narrow canoes, and seem to travel in any weather, and it is wonderful that they are not upset. It is very noticeable that the Indians coming from the south of the fort are very much more prosperous than those from the direction of the Barren Lands; the women and children of the former are quite well dressed, those of the latter are very dirty and almost in rags.

"3rd July. 71 canoes, packed with Indians, arrived from the head of the lake this morning. They came in one large flotilla, and, with small square sails spread on most of the canoes, and the square striped blankets in lieu of sails on others, their paddles flashing in the sunlight, they made an impressive showing. As they neared the fort they fired off guns, and Indians on shore replied. These Indians were mainly from the Martin Lake district, though some of them were from as far as the shore of the Great Bear Lake."

On his second visit Inspector Fraser travelled to Rae by steamer and motor launch as before, and left Rae on August 6 by canoe, returning on August 17, after traversing 318 miles by river and lake. As this patrol was made in a little-frequented part of the country, somewhat extended extracts from Inspector Fraser's general report will be found in Appendix A.

In addition to these long journeys, numerous patrols were made in the sub-district, more than 25 in all. One of these, made by Corporal F. Cook from Fitzgerald to the Lady Grey Lake district, on the edge of the Barrens, gave rise to some remarks by the non-commissioned officer making it upon game preservation:—

"The Indians who live in this part of the country are known as 'Caribou Eaters'. They consist of twelve families; I saw every family except one, and this family had recently been visited by some of the other Indians. They are all in good health, and have lots of meat and also a good fur catch. These Indians only come into the fort once a year for treaty, staying on their hunting grounds the rest of the time. I learned from the Indians that the caribou had come in in larger numbers than usual, and, contrary to custom, came from the northeast side, their usual route being from the northwest. They were there in large numbers when the patrol was out about 100 miles from Fitzgerald, but as travel is chiefly on the lakes, although we saw a great many tracks, we only actually saw 24 head as the caribou do not stay on the lakes, but stay in the bush. I was able to make clear to these people the importance of the protection of caribou. The Indians admitted that they can see themselves that the caribou are not as numerous as in the past, but claimed that occasionally it was necessary to kill female caribou in the summer time for clothing, and though they generally used all the meat from these animals it sometimes happened that out on the Barrens, where they have little means of transport, they had to leave a few carcasses. They promised that they would themselves do their best not to kill when not in need of food or clothing. The caribou have been plentiful in the Lady Grey Lake district this year."

Another remark by him is:—

"The majority of trappers will not bother trying to trap skunk owing to the low price the pelt fetches, and the unpleasant job of skinning them. As they are certainly increasing in this country, it might be a good thing if a bounty were placed on them to encourage the trapping of them."

Disputes between trappers caused several patrols; in one of these the constable making it did some clever tracking, and in another two men were found living in cabins fifty yards apart, on bad terms with each other, though dwelling in a very lonely place.

## WINTER JOURNEY FROM EDMONTON TO HERSCHEL ISLAND

The usual patrols were carried out in the portions of G Division (Northern Alberta and the Northwest Territories) south of the Arctic and Mackenzie river sub-divisions. Of these the most noteworthy was a journey performed by Sergeant H. Thorne from Edmonton to Herschel Island. This was in connection with the trial of the two Eskimos, Alikomiak and Tatamigana; the decision not to interfere with the death sentences was taken at a date when summer travel had ended and the winter trails on the Mackenzie river were not yet practicable,

so that a journey by a circuitous route was necessary. Sergeant Thorne left Edmonton on October 5, proceeding by Vancouver and Seattle to Alaska. On arrival at Fairbanks, in that territory, he was greatly delayed by unseasonable weather, there being neither snow, ice, boats nor any other means of travel. On November 7 he reached Circle, and after further delays there he travelled by dog-team to Fort Yukon by Birch Creek, covering the 150 miles in a little over two days, and arriving on November 18. He left Fort Yukon on November 20, arrived at Rampart House on November 26, and from there proceeded to Herschel Island, arriving at 2.15 p.m. on December 6. He remained at Herschel Island until February 19, and then, returned by the same route, arriving in Edmonton on April 3, 1924. The time consumed in actual travelling was 75 days, and the total distance traversed was 7,493 miles, of which 3,800 were by steamship, 2,398 by rail, 1,025 by dog-train and 270 by horse stage.

#### UPPER LIARD RIVER PATROL

An interesting episode was Inspector T. V. S. Wunsch's patrol in northern British Columbia in connection with the suspected murder of an Indian lad named Wasetla, or Atol, who was known to the whites as Mocassin. This affair, which took place on the upper Liard river, in a remote region difficult of access, was the outcome of fears of witchcraft entertained by nomadic Indians of a primitive type; it is the opinion of the few white men who live in the vicinity that many cruelties have been perpetrated because of this superstition. Atol came to his death in March, 1923, at Thirty-mile bar on the Liard river, and in September of that year a white man living at Liard communicated to Mr. W. Scott Simpson, Indian agent for the Stikine Agency, his suspicions that there had been foul play. In November, 1923, Superintendent J. H. McMullen, of the Provincial Police Department, asked if the Royal Canadian Mounted Police were in a position to investigate the matter. After some consideration, for it was uncertain at first whether the scene of the death could best be reached from Edmonton, from the Yukon, or from the sea-coast, it was decided to enter the country by the last-mentioned route, and in June, 1924, Inspector Wunsch and two constables travelled from Vancouver to Wrangel, Alaska, ascended the Stikine river to Telegraph Creek, and then travelled, by canoe and on foot, by Dease lake to the headwaters of the Liard. The Indians were recalcitrant, but after patient work Atol's body was discovered and disinterred, and admissions were secured which point to murder in a cruel form. An elderly Indian named Loot fell ill and died, and his family suspected the deceased of having bewitched him; at the instigation of an Indian named Big Alee, who himself about that time killed four of his dogs under the belief that they were guilty of witchcraft, the wretched Atol, who was a youth of about 18, was tied up and left on the ice to freeze, the person actually committing the deed being Edie Loot, daughter of the sick man and wife of an Indian named Pea Ell. Another daughter of the sick man, Lucy Loot, was absent from the camp; on her return she braved the anger of the others and released Atol, who had been lying tied up for six days, and tried to revive him, but he was badly frozen, and died. Five Indians, Edie, Big Alee, and three men of the Loot family, Dan, Clem, and Jimmy, were arrested and charged with murder. They were brought out and lodged in Oakalla jail; the further proceedings are in the hands of the provincial authorities.

Inspector Wunsch's journey was performed with celerity. His party left Vancouver on June 14, arrived at and departed from Wrangell on June 17, and

## SESSIONAL PAPER No. 21

arrived at Telegraph Creek on June 19. From there they went on foot to the head of Dease lake, arriving on June 27, and picking up there a canoe which had been sent for them. They then made their way by water to Liard, incidentally visiting the Indians and prospectors in the vicinity of their route, and arrived on July 19. Inspector Wunsch's report in part is as follows:—

"There were about forty Indians in the post and I made inquiries amongst them. A man named Big Alec, who had originally stated to the Hudson's Bay Company Post Manager that Mocassin had been killed, refused to substantiate his complaint, and told me that he had been misunderstood.

"The Indians were annoyed that we did not leave with the agent, and told me that we were making trouble for nothing. There have been no police in this district since 1898 when Inspector Moodie took a patrol of the North West Mounted Police through to the Yukon.

"I made inquiries as to what Indians had been camped at Thirty-mile Bar during the winter of 1922-23, where the murder had been reported. I met with great opposition and on one occasion was fired at from the vicinity of the Indian camp. . . .

"On July 30, I got hold of an Indian girl, Lucy Loot, who told me she had seen Mocassin lying with his hands and feet tied, on the frozen river at Thirty-mile Bar. She had untied him and lit a fire, but he died the same day. Her half-sister, Edie, wife of Pea Ell, had told her that she had personally tied up this man for witching old Loot who had just died. She refused to assist Lucy in her attempts to save Mocassin's life, and her three brothers, Dan, Jimmy and Clem, also told her to leave him alone. Lucy did not know where the body had been buried, but she thought they had dug a hole in the ground near the camp. (I had previously been told by the Indians that they cut a hole in the ice and buried him in the river.)

"The whole Loot family had left Liard the day previously and gone in a boat down the Liard river towards Thirty-mile Bar. I at once went after them with the two constables and a white trapper, Fred Allen, who offered to accompany me as a guide. (I took him as a witness if we found the body.)

"We found the three Loot boys at Twenty-mile Bar, but Edie had gone with her husband into the woods. I sent Constable Neville after her, and myself with Constable Martin went on to Thirty-mile Bar to search for the grave of Mocassin.

"In the afternoon of July 31, I came across a hole where wolves had been digging and been stopped by boards. There was a rude cross of wood stuck near, so we disinterred the body of a man in an advanced state of decomposition. He had been buried after being frozen with his knees under his chin. His hands and feet were not tied, but were frozen together as though the rope had been removed after death.

"While we were at work Clem Loot and another Indian, Charlie McDonald, came down the river in a canoe, and at once pulled into the bank and came running over to where we were. Clem was greatly agitated and said 'Who tell you Mocassin buried here?'

"I returned to Twenty-mile Bar and next day Constable Neville arrived; he had left Edie and her husband at Twelve-mile Bar. I instructed all the Loot family to return with me to Liard at once as I was going to hold an investigation. I did not arrest any of them as I had no interpreter to explain the charge.

"On August 4, Constable Neville arrested Edie, Dan, Jimmy and Clem Loot, and they appeared before me the same day for a preliminary inquiry. I committed them for trial.

"They all made statements involving Big Alec, so Constable Neville arrested him on August 8, and after a preliminary enquiry I committed him also."

Inspector Wunsch then returned with his prisoners, leaving Liard on August 26, ascending the streams flowing out of Dease lake. He says:—

"On September 9, we went in the Hudson's Bay Company motor boat to the head of the lake. I there learned that some prospectors had gone out in front of us with wild tales of our fighting with the Indians. I thought these very exaggerated reports might get into the newspapers before the Commissioner received any information, so therefore left the two constables to bring the prisoners along the seventy-five-mile trail to Telegraph Creek while I went on ahead. I left the head of the lake at 10 a.m. on September 10, and reached Telegraph Creek at 8 p.m. the next day."

Telegraph Creek was left on September 28, and the party reached Vancouver on October 9. The total mileage was 2,540, of which 1,470 was by steamer, 320 by motor launch, 250 on foot, and 500 by canoe and scow.

15 GEORGE V, A. 1925

Owing to the nature of the case, some curious incidents occurred. On July 23, Inspector Wunsch noted that all the white men of the region were certain that much cruelty was due to the Indians' belief in witchcraft, and added:—

"It seems that someone discovers that another is possessed of an evil spirit, or a witch. That unfortunate person is at once tied by his, or her, hands and feet and left for varying periods, until the witch has departed. If this happens during the winter death often occurs. Mocassin was supposed to have witched old Loot, and was therefore tied up for six days, dying at the end of that time from exposure.

"This district is rotten with witchcraft. I have myself seen a girl, Madeline, who was tied up for a witch, and is now a cripple; her left arm and one foot are both useless. Also a young boy, Seagull, whose mother cut off the tip of his ear when told by the other Indians that he was witching his little brother who was sick.

"The following incident may appear ludicrous, but will give an idea of the state of these Indians' minds. The day after we arrived an Indian named Little Jimmy came into our cabin and proceeded to 'witch' our arms. When he thought he was unobserved he revolved slowly on one foot in front of the rifle rack, and then solemnly touched each gun in turn. (I took great care to prove that the 'witchcraft' had had no effect that evening when I shot with all the Indians at a rock in the river about 800 yards distant. Our service rifles easily outlasted their 30-30's, which are not intended for long ranges.)"

Another remark of his is:—

"I have heard since that they all thought Mocassin spoke to me when we disinterred him."

The Loot family belong to the Tinneh subdivision of Indians; Big Alec is a Mackenzie river Indian who speaks Cree. It was necessary at the preliminary hearing held by Inspector Wunsch to have one interpreter for the Loot family and another for Big Alec. As throwing light upon these people's frame of mind, the evidence given by Jimmy Loot at the preliminary hearing may be quoted:—

"Jimmy Loot stated on oath:—

"Big Alec tell me three times tie Mocassin. He say Mocassin witch, kill my father; bad for Big Alec too. Big Alec say good thing if Mocassin dead. My sister Edie tell me she tie Mocassin because Big Alec tell her tie him for witch. I see Big Alec kill four his own dogs, two pups and two big dogs. Every night he kill one. He put string round dog neck. He tell me he dream witch, kill dog because he feel sick. Then feel better so kill all dog. He say Mocassin witch, burn him when he dead."

#### OTHER PATROLS IN NORTHERN BRITISH COLUMBIA

In addition to this journey, between fifteen and twenty patrols were undertaken in northern British Columbia, most of these having either Prince George or Telkwa as their base. Sergeant H. E. Taylor made two rather long trips in company with the Indian agents concerned, one from Fort Fraser south to the Kluskus district in June, and the other in September from Fort George north to the Fort Grahame district. The first of these, which involved traversing 448 miles, 221 of which were by pack-train, took our men into a portion of a wide stretch of difficult country, extending to the coast, which hitherto has had little supervision of any kind; they went to the Kluskus Indian reserve, returning by another route. At Kluskus they encountered a gathering of Indians of the region. Sergeant Taylor's report includes the following paragraphs:—

"This is the only opportunity throughout the whole year for a patrol to get in touch with all the Indians of this district. They are scattered on their trap lines all winter, and all summer they go to the hay meadows and camp there, and visit the lakes and catch and smoke fish. Indians living a distance of 60 miles both east and west had come to Kluskus for the week.

"There are no peace officers, game wardens or fire rangers throughout this district.

"We remained at Kluskus on June 3, and the Indian agent adjusted various tribal complaints, and presided over the election of a new chief for the Kluskus band. At the

## SESSIONAL PAPER No. 21

agent's request I attended the meeting of all the Indians and addressed them on the need of law observance, and the necessity of strictly obeying the game and fire ordinances.

"The only means of livelihood for these Indians is trapping in winter, and putting up hay and raising horses and cattle. They are too far from settlements to get any tie contracts or lumber or road work, and have to depend entirely upon the natural resources of their own district. Despite this, one or two of them have bank accounts and are very well fixed.

"This was the first occasion that a police patrol has been made through from the Fort Fraser end, and was also the first occasion on which a police patrol had been able to get in touch with so many Indians of the district at the same time.

An effort to compose a dispute as to trapping grounds between two Indian tribes marked this visit.

Sergeant Taylor's other patrol took him into the headwaters of the Peace river, the route followed taking them to McLeod lake, down the Parsnip river to Finlay forks, and up the Finlay river to Fort Grahame. Many prospectors were seen, and white trappers have entered the country and are encroaching upon the territory needed by the Indians for their subsistence; many of these are foreigners, and in the absence of surveillance are reported to show little respect for law. "There are no police officers, game wardens, justices or officials of any kind," Sergeant Taylor remarks, "nearer than Prince George or Hudson's Hope, which are 200 and 300 miles from the trapping grounds." He adds:—

"A recent amendment to the British Columbia game laws provides that no aliens shall be granted trapping licenses. As a result of this, there has been a rush of applications for naturalization papers. Some of the aliens have obtained trapping licenses despite the new regulation, and the remainder are trapping without licenses pending the outcome of their applications for citizenship.

"There are at present too many trappers in the district to allow of any conservation of fur. Those qualified to express an opinion, state that the defining and curtailing of trapping areas, and the cessation of indiscriminate issuing of trapping licenses, is the only solution of the problem."

A newspaper report that the Fort Grahame Indians were rapidly dying off with leprosy was found to be unfounded.

The friction between white trappers and Indians, the undesirable nature of some of the trappers, and the possibility of the existence of illicit trade in liquor, caused Colonel G. S. Pragnell, Inspector of Indian Agencies, who was one of the party, to urge the stationing of a police detachment at Fort Grahame.

Corporal T. C. Bruce made a patrol of 637 miles from Telkwa west to Hazelton and then to Fort Babine and Stuart Lake. This was also made in company with Colonel Pragnell, and the Indian agents concerned, and the party attended the annual gathering of the Indians at Hogwilget. Here also the Indians have grievances regarding trapping and fishing. Two paragraphs in Corporal Bruce's report are:—

"The Babine Indians struck me as being very poor navigators, and they are very much afraid of the water, and will not put out if it is at all windy; there is always a breeze on this lake. Although there have been Indians around Babine Lake for many many years they do not know what a sail is, and it is only in recent years that they have been using gasoline-propelled boats; formerly they used dug-outs.

"Whilst at Stuart Lake portage, one of the Indians accompanying us, who is suffering from tuberculosis, had a pretty bad attack, and Constable Woodman, who holds a St. John's Ambulance Association certificate, sat up all night with him, applying hot plasters and administering to his comfort."

## TICKET OF LEAVE ACT

It will be noted when comparing the following figures of work in connection with the Ticket of Leave Act with those for last year, that there were five fewer releases on parole, twelve more forfeitures and revocations, and one hundred and twenty-nine fewer sentences completed on parole.

<i>Report for period September 30, 1923-September 30, 1924—</i>		
Released on ticket of leave from penitentiaries.....	553	
Released on ticket of leave from prisons, gaols and reformatories.....	575	
		1,158
Licenses revoked.....	30	
Licenses forfeited.....	36	
Sentences completed on ticket of leave.....	1,080	
Licenses made unconditional.....	66	
		1,212
<i>From 1899 to September 30, 1924—</i>		
Released on ticket of leave from penitentiaries.....	8,103	
Released on ticket of leave from prisons, gaols and reformatories.....	9,231	
		17,354
Licenses revoked.....	573	
Licenses forfeited.....	413	
Sentences completed on ticket of leave.....	15,591	
Sentences not yet completed.....	777	
		17,354

## CRIMINAL IDENTIFICATION

The Finger Print Section, as in the past, continues to assist all police forces throughout Canada and the United States, in the matter of making identifications by finger prints, and furnishing criminal records of those awaiting trial, together with advising the various police departments of any additional convictions against criminals who have passed through their hands.

This entails considerable clerical work, and as the number of criminals and finger prints increases so will the work increase, and the personnel of the section must necessarily grow to meet the demands.

The figures for the past year, given below, again shows an increase of over a thousand cases.

Month	Finger-prints received	Identifications made	Parole violators located	Escapes located	Photo. negatives received	Photo. prints made	Photographs received
1923							
October.....	1,583	217	1	1	52	156	216
November.....	1,682	213	6	1	67	201	293
December.....	1,533	157	1	1	100	300	212

OFFICERS

Appointed Assistant-Surgeon—

P. E. Doyle, M.D.

Retired to pension—

Inspector G. W. Carrier.

In addition, during the year Assistant Commissioner T. A. Wroughton went on leave pending retirement to pension. Assistant Commissioner Wroughton had been in the force since 1887, thus having thirty-seven years of service to his credit.

Inspector Currier also joined the force in 1887 and was an officer of much experience.

## HEALTH

The reports of the principal and other medical officers show that the general health has been satisfactory, and the sanitary conditions of the barracks good.

It is with great regret that I chronicle the deaths of eleven non-commissioned officers and constables.

After the date of the closing of this report word was received of the drowning in the Arctic on August 26, 1924, of Reg. No. 9791 Constable Ian Mor MacDonald. This young constable was a member of the detachment at Herschel Island and had been sent on duty to Baillie Island and Simpson Bay in a coasting schooner. He disappeared from the vessel on the return voyage, having apparently fallen overboard. He was a particularly fine young man, of great promise.

## ST. JOHN AMBULANCE ASSOCIATION

During the year an active interest has been taken in first aid work, and classes have been held at Ottawa, Regina and Vancouver.

The following awards were made during the year to members of the force:—

Certificates—Regina.. . . .	37
Vancouver.. . . .	17
Ottawa.. . . .	11
Total.. . . .	<hr/> 65

In addition a number of instructor's certificates, vouchers, medallions, and other acknowledgments of proficiency have been won. At present 171 members of the force hold first aid certificates. The force has been very successful in the various competitions held throughout the Dominion, the Shaughnessy eastern and western trophies having been won, as well as ten or eleven other distinctions.

First aid classes will be held during the coming year wherever possible.

## HORSES

The health of the horses generally has been good. The casualties have been:—

Cast and sold.....	92
Died.....	3
Destroyed.....	13
Lost.....	2
	<hr/> 110

## TRANSPORT

Our motor transport, with the exception of the motor-cycles, is in good working order. The motor-cycles, as I reported last year, have proved costly to repair, and will be replaced by Ford cars as the service demands.

## BUILDINGS

As noted elsewhere in this report, the new detachment buildings at Providence, Rae and Good Hope have been erected, as also have been the new detachment building at Dundas Harbour and the sub-detachment post at Kane Basin.

At Ottawa certain buildings at Rockliffe have been handed over to us by the Department of National Defence. These have proved useful and comfortable for summer use. As it is the intention of that department ultimately to sell the property on which they are situated, it is useless to embark upon permanent repairs to them. The quarters at Lansdowne Park are uncomfortable and the annual exodus to make way for the Central Canada exhibition is most inconvenient. In addition these quarters are expensive.

Our buildings elsewhere are in good repair.

## CLOTHING

The supply and quality of clothing have been satisfactory.

## FORAGE

The supply of forage has been satisfactory and the quality good.

I have the honour to be, sir,

Your obedient servant,

CORTLANDT STARNES,

*Commissioner.*

## APPENDIX A

## CONTROL OF THE NORTHERN REGIONS

As the number of our posts in Northern Canada increases, members of the force constantly are engaged in arduous journeys, and in many of these noteworthy incidents occur, through the natural difficulties of travel, the interest attaching to passing through little known regions, or the strange superstitions encountered by those who come into close contact with natives in their primitive state. It is difficult to incorporate all of these reports in the body of the report, but it has seemed advisable to publish extracts from some of them in this appendix.

## KILLING OF THREE ESKIMOS AT HOME BAY

Notices have appeared in the annual reports of 1922 and 1923 of a dreadful occurrence at a place variously known as Kiveetung, Kingnitung, Kivetuk, Kevetuk, Kevetoo, or Kivitoo, at Home Bay, on the east coast of Baffin island. They were in brief that a native headman named Neakoteah or Neakuteuk, having become insane, partly through brooding on religion, terrorized the little community, caused two Eskimos named Munyeuk or Mungeuk and Seeming or Semik (spelled Lemik in the report of 1923) to be put to death, and finally was shot by one Kidlappik when about to strike a woman with a hammer. The affair was investigated in March and April, 1924, by a patrol from Pangnirtung Detachment and depositions taken from twelve of the natives concerned, including Kidlappik, who killed Neakoteah, and Kowtuk and Kedluk, the slayers of Mingeuk and Seeming. The information in the former reports proved to be substantially correct, and Inspector Wilcox has made the following report and recommendation:—

"It will also be seen that the murderers Kowtuk, Kedluk, and Kidlappik frankly admit their respective parts in the killing of Mungeuk, Seeming and Neakoteah. In the case of Kowtuk and Kedluk, their crimes appear to have been committed at a time when all the inhabitants of the village were in a state of excitement bordering on insanity, with their passions fired to the point of committing any act suggested by Neakoteah, who was apparently insane and had imbued the community with the idea that he was Almighty God and Jesus Christ, and possessed the power to do them good or evil. There is no doubt that, had he suggested it before they became frightened for their own lives they would have annihilated the entire settlement on his command.

"With the case of Kidlappik in the murder of Neakoteah this would appear to the primitive-minded Eskimos as the natural sequence to the other events, and justifiable from the fact that they had no other means of freeing the community of such a menace to its existence. Kidlappik appears to be the only person who partially resented the dictations of Neakoteah, and for this reason he would, most probably and naturally, be the next victim.

"Considering the circumstances under which these crimes were committed, they do not warrant the murderer being formally charged and tried, thereby incurring the enormous expense of bringing a Court into this country to dispose of the cases, and I would therefore respectfully recommend that no further action be taken in the matter.

"The perpetrators have been made aware of the seriousness of their crimes, and have been instructed what to do in such a case should occasion arise in the future."

The investigation was made by Corporal F. McInnes, who with Constable W. B. MacGregor travelled for that purpose from Pangnirtung Detachment to Kevetuk. The journey was begun on February 29, 1924, and was not completed until April 15, a period of 47 days elapsing, and the total distance

## SESSIONAL PAPER No. 21

traversed being about 510 miles; the travelling was difficult at times, the route, up Pangnirtung fiord, across the Penny Highlands, and down to the east coast of Baffin island near Broughton island, including the ascent of frozen waterfalls and the dragging of sleds across ice and snow made almost impassable by the sand blown over it by the terrific gales which prevail there. A good deal of time was compulsorily spent at sundry native settlements. An interesting feature of the investigation was that Constable MacGregor was able to act as translator.

The details of the series of tragedies are repulsive and painful. Neakoteah was the manager of the local post of a fur trading company, and as such was the recognized leader of the little community, which comprised ten families and from 35 to 40 individuals. He had been considered deranged for some time, but his aberrations first became dangerous at a dance on Christmas Day, 1921, when he announced that he was Jesus, and performed sundry grotesque ceremonies. His madness grew, and there ensued a season of terror, at once absurd and horrible, which all but overthrew the reason of the others, and which did not end until Kidlappik shot him in what may fairly be regarded as self-defence. The stories of miraculous happenings, which were glanced at in the annual report of 1923, illustrate at once the credulity of these particular savages, and the ease with which marvellous tales can be propagated. The first person murdered was a blind man named Mungeuk; Neakoteah undertook to make him see, and when his effort failed ordered the two natives Kowtuk and Kedluk, whom he had appointed his "policemen," to take him out and stab him. The story that the other victim, Seeming, though illiterate, had been able to read and write when under the madman's influence proves to be a confusion with other incidents. After the killing of Neakoteah the excitement of the Eskimos ran very high and several experienced hallucinations, some of them in their depositions affirming that when the water was heated to wash his body the lamp sung a song, and that music was heard in the air above; on the other hand Kidlappik, who seems to have been the strongest-minded of the natives, merely described the widow and others as dancing frantically about Neakoteah's body to bring him back to life, and as failing.

The story of the first murder as told by the onlookers is very grim. One of the statements says:—

"Kowtuk and Kedluk said nothing but each grabbed Mongeuk's arms and took him outside on the ice.

"Whilst Kowtuk and Kedluk were outside killing Mongeuk, Neakoteah told the natives to sing and wave their arms. Soon Kowtuk and Kedluk came back. Neakoteah said to Kowtuk, 'Show me the knife.' Kowtuk held the knife up in the air, and I saw it was covered with blood."

The killing of Seeming was very cruel, as he was merely wounded, and slowly froze to death, Neakoteah towards the end ordering that he be stripped of his clothing. One passage in the statement of Nohoyahveeng, one of the men of the village, narrates how Seeming after being wounded complained that he was freezing and proceeds: "I placed Seeming's hands inside my artigee (hood) to warm them, as I loved Seeming." Yet he obeyed the madman, pushing the wretched man out on the ice, and helping to tear his clothes off.

Corporal McInnes' general report on the investigation is of much interest and may be quoted in part. He says:—

"The statements in connection with this investigation, twelve in number, were taken by me, through the interpreter, Constable MacGregor, and considerable credit is due him for the efficient manner in which the interpretation was carried out, considering the fact that Constable MacGregor has only been in the country, in direct contact with the natives, for two years, and that their agglutinative and complex language is very difficult for a white man to converse in, also a difference in dialect and words in use, between Pond Inlet, Cumberland

Gulf and Kevetuk was met with. And as the murders occurred in the winter of 1921-22 (from Christmas, 1921 to January, 1922) much of the detail has been forgotten. The natives are wholly incapable of relating a story straightforwardly, from beginning to end (each event consecutively) but wander backwards and forwards in the course of narration, as each event is recalled to memory, forming a conglomerate mass of chaotic words, with no specifically marked division or distinction of time. Upon being confronted with a calendar of the years 1921 and 1922, they were nonplussed, and disclaimed all knowledge of computing time by such means; in fact some of the natives were most uncertain whether certain leading events in the murders occurred during the day or night-time, and preferred to evade giving a definite answer, or replied that they had now forgotten. Although it is possible that such is the case, owing to the excitement at the time of the murders, also loss of sleep on many consecutive nights, whilst Neakoteah was preaching to them, etc. The Kevetuk Eskimos have neither concentrative powers, nor ability to pursue a logical train of thought, being easily diverted into another channel, and when brought back to the subject in hand, are quite at a loss of both thought and speech for some considerable time, before again picking up the detail, whilst others sit with a vacant stare on their countenance, vainly endeavouring to recollect some of the salient features of the events that transpired."

After explaining Neakoteah's position in the community and remarking that for some years he had been considered to be deranged, Corporal McInnes adds:—

"So childish is the average native mind, that although I instructed them (the Kevetukmiut) through Constable MacGregor what to do in case of any further trouble cropping up, it would not be surprising if a similar scene were enacted at a future date. All that it needs is a master mind to start it off, as the natives in spite of their professing deep religious belief, are in much the same state of mind at present as they were when the murders occurred. The Kevetukmiut are looked upon with distrust generally by the Eskimos of Cumberland Gulf district, and elsewhere, although they are related by marriage, and kinship ties to the other tribes.

"It is customary at the completion of a dance, when the excitement of same is still fresh in their minds, to immediately close the merriment, by all joining in singing a hymn from the Psalm book, written in Eskimo script, as a finale; so much for their misbegotten idea of Christianity, and the application and fitness of things spiritual. This above-mentioned scene we witnessed at Kevetuk, accepting it as an endeavour on the natives part of impressing upon us their firm belief in religion."

After some remarks upon the sexual morals of this tribe, which are very low, Corporal McInnes says:—

"Many of the old Shamanistic performances of earlier days have been paralleled, and are brought to light, as being insidiously woven into the proceedings during the time before the murders, and also afterwards; in fact after Neakoteah's death the natives made a vain effort to bring him back to life again, by the simple expedient of singing, and invoking supernatural aid, also endeavouring to impart their own vigour and life into Neakoteah's corpse by licking the face and blowing their breath in his mouth. This last-mentioned method is a long standing ancient custom.

"Many vague rumours are constantly going the rounds from one tribe to another, and one native of Kevetuk informed me that it was a taboo, or bad practise to throw burnt matches upon the sea ice. He said that he had heard that a white man at Ponds Inlet a year ago had said it was bad to throw burnt match sticks upon the ice, and that all these matches should be picked up. To verify his belief in this taboo, he produced for my inspection, a bunch of burnt match sticks, that he had picked up the day previous, whilst following an old sledge trail. This man when questioned, could not give any reason why this was bad, but he just believed in it because somebody else had told him so.

"The people of Kevetuk do not understand the Eskimo Bible that is in circulation among them at the present time, and Kownang, the widow of deceased Neakoteah, informed me that it states in the Bible (Ten Commandments) that it is only right for a woman to have one husband, and that although her husband is dead, it would be wrong for her to marry again.

"The people are fond of and will listen attentively to addresses, and will accept gullibly the purport of the speech without the least meditation as to the meaning or correctness of same, and are ready to grasp a new idea, whether such idea is properly applicable to their mode of living or not. It is merely something new, to break the monotony of their lives). They also take great delight in religious seances, and as the Kevetukmiut have never had the benefit of proper instruction in the elements of Christianity, parts of their old Shamanistic performances are resorted in to more fully complete the performance.

## SESSIONAL PAPER No. 21

"The practice of walking around a body in a circle to the right comes from one of their ancient customs, the idea of which is to direct the body's soul or spirit from the place where the body lies towards the light (heavenly light).

"Death or the dying is feared, unless ordered by the Captain or Angakok, supported by popular sentiment, and after a death it is, or was, customary in their old belief, for part of the native's clothing to be thrown away.

"A dying person is always taken outside to expire, as it was customary to believe that if a person died inside the igloo the body's spirit (good or evil) would haunt the place. Reversions at times to all the old customs are apparent in the accompanying statements."

Another remark is as follows:—

"It was also a native practice of olden times, that when an undesirable person was killed or died, the body was not buried as were the bodies of the good people, but left to be eaten by the dogs, etc. This same thing happened to Mongeuk's and Seeming's bodies, as the natives had received severe injunctions from Neakoteah not to go near either of the bodies, and so faithfully was this order obeyed, that even after Neakoteah's death, none of Mongeuk's or Seeming's bones were picked up and buried, although many of the natives (some of whom were close relatives of the deceased) have told me that they dearly loved Mongeuk and Seeming. It is true that little sympathy and no real pity is expressed or shown by an Eskimo, and it is a trait of their character to adopt a very indifferent attitude towards the taking of human life, and no effort is made to save another person, although said person may have been their best friend, neither is the doomed person warned, and oftentimes, a mortal scene is witnessed without the spectators batting an eye or lifting a restraining hand."

And again:—

"The sewing of pieces of paper bearing the assumed Biblical names of the Kevetuk natives on the breasts of their clothes during a religious service given by Neakoteah corresponds to their ancient usage of charms, which were attached in the same manner to the clothes to ward off sickness, spirits, evil shades, etc.

"No definite information could be obtained as to why it was that three shots were fired, three cartridges exploded, etc., and practically all events in connection with the affair were triplicated. The natives could not explain why the number three was always to the fore, beyond the fact that it is customary on the arrival of the *Rosie*, the Sabellum Trading Company's supply ship, for three rifle shots to be fired by way of signal, and which are replied to by three consecutive shots from the ship. Then the natives know that it is the trading ship that is approaching."

In this small community, in addition to Neakoteah, no fewer than three persons were of doubtful sanity, and there is much disease, especially of the eyes.

## THE HOME BAY PATROLS

The investigation of the Home Bay murders called for arduous travelling. Home Bay is a large indentation in the eastern coast of Baffin island, almost due north from Pangnirtung; a considerable eastward projection of the coast intervenes between the two places, and to pass from one place to the other it is necessary to proceed overland, up one or other of the two fiords, Pangnirtung and Kingnait, which enter Cumberland gulf from the north. Corporal McInnes made the patrol, selecting the first-named of these routes.

By way of preparation, Constable W. B. MacGregor was despatched to the head of the fiord (at latitude 66° 30' north, and longitude 65° 7' west, approximately) to make a cache of provisions, and his experiences were unusually difficult. He gives the following geographical information:—

"Pangnirtung fiord (on which our day's course of 18 miles approximate had been completed) is about 30 miles in length, varying from four miles in width at the mouth, to 1½ miles width at its narrowest point, distant some ten miles from Kingardjuak; it trends in a northeast direction, being an arm of Cumberland gulf, and bordered by mountains with a general elevation of 2,000 feet above sea level; it is intersected by several valleys, with their streams, notably Coolee river (situated on the north side of fiord, opposite Pangnirtung Detachment). Near the head of the above mentioned fiord, on the north side are two glaciers fed by an ice-cap. At the confluence of Pangnirtung stream with the fiord, the stream has cut many channels through the gravel beds, some of which are dead-heads.

"The head of the fiord ends abruptly, terminating in a narrow, rocky gorge, flanked by steep-sided mountains, bearing an ice-cap. Through this funnel-shaped gorge runs Pangnirtung stream, up which we proceeded until the first low fall was arrived at. . . . This fall is caused by glacial drift from a glacier on the north side of the gorge, which is here about 40 feet wide and studded with large boulders. Above the fall the stream widens to seven or eight hundred yards width for several miles, until Oo-nee-ak-sah-gah falls is reached."

The difficulties of the return journey are thus described:—

"Accordingly we departed homeward bound at 1 p.m. The northeast gale had not abated and as we left the shelter of the small ravine, it became painfully apparent that the sledge was destined to be the toy of the wind, sweeping round, ofttimes in a semicircle, so that we proceeded downstream with the sledge leading, tangling the dog traces, and pulling the dogs backwards with it in its mad course. The axe was lashed to the runner to act as a scratcher, thereby steadying the sled's course, but this did not alleviate matters. Next several pieces of seal line were joined together and I proceeded to lower the sledge from rock to rock by instalments, taking up another vantage ground whilst Oo-nee-ak-sah-gah held the sled. After the sledge had received hard knocks against the rocks in the river bed, and all improvised innovations proved futile, we decided to try the sledding over the stones on the shore, at least until the gorge was arrived at, where it would again be necessary to return to the ice. Eventually we reached the lower fall and descended by degrees, much slower than we had ascended it, although our load was much lighter. It was quite dark at this time, and the gale and drifting sand increased in velocity, the temperature rose rapidly, becoming quite mild, but it was out of the question to think of building an igloo, or shelter, owing to the wind. In fact, on more than one occasion, the sledge was turned completely over, and at times the sand was so dense we could not see the dogs, and they, poor creatures, having their ears plugged with the drifting sand could not hear the words of command, and would often lie down being tired of dragging the sledge with steel shoeing across the bare rocks. The rising moon afforded us better light to choose our route, and we noticed that it appeared perfectly calm overhead, as the clouds were not drifting and the wind storm seemed to be localized in the funnel-shaped canyon; in the vicinity of Pangnirtung stream, flanked by sheer-sided mountains of some 3,000 feet altitude, bearing an ice-cap on north and south sides of the stream."

Following this, Corporal McInnes began his patrol on 29th February. His report is in part as follows:—

"Acting under instructions from Inspector C. E. Wilcox, I left the detachment at 11 a.m. on February 29, 1924, accompanied by Constable W. B. MacGregor and natives Kidlappik, alias Kidlappikloo and Koodloo, with two dog teams totalling 25 dogs, and load of about 1,100 lbs. divided between the two sledges. The day was very mild, and we were able to travel bareheaded and in shirt sleeves. Our course lay up Pangnirtung fiord in a north easterly direction, and a fair rate of progress was attained until 3 p.m. when we travelled upon a stretch of the fiord that had been previously covered with sand deposited by winds. Fortunately, however, owing to the warm temperature, the sand had attracted the sun's rays and sunk below the surface of the salt-water ice, leaving the surface fairly free from grit. At 4 p.m. we crossed the foot ice at the head of the fiord, and entered the mouth of Pangnirtung stream, which is a maze of ice patches, owing to the river having cut many channels through the low rocky beds that bound it on the lower reach, and so it is difficult to follow the frozen river's true course. At 4.30 p.m. a moderate north east wind sprang up, which, with the difficulty of following the river course, retarded the rate of progress. An igloo was built, and we turned in at midnight.

"Day dawned with a light drizzle of rain and a strong wind from the north east. We decided not to break camp whilst it was raining, as it would mean getting the camp equipment, bedding, etc., wet, which would later freeze, and therefore inconvenience us. At noon the rain stopped falling. We broke camp, and continued to travel up the winding river course. Numerous sand banks were encountered. After about an hour's travel we arrived at a stretch of the river's course covered by large patches of sand, which had been drifted onto the surface of the stream during the making of the ice and become frozen in, presenting a surface like emery cloth, and during succeeding storms fresh sand had accumulated in banks upon the preliminary coating, leaving but a lake of sand. Here with the combined efforts of men and dogs we were unable to move the sleds, and pieces of wood had to be placed under the runners to facilitate movement. In this manner progress was expedited in short stages. During this time the wind increased in velocity, bearing sand with it, and retarded our rate of progression. Travelling upstream, and against a head wind, the dogs were unable to secure a firm foothold, especially so when the sledges balanced on a sand bar and the dogs were left on a patch of glare ice beyond. Owing to the rugged contour of the land in this vicinity, north east winds of great violence are

## SESSIONAL PAPER No. 21

almost continually blowing, and occasionally gales of wind are met with, during which the sand drifts with much force. We were fortunate in arriving at a time when there was only a comparatively strong wind blowing. At 6 p.m. we arrived at an igloo previously constructed by the Oo-nee-ak-sah-gah Falls patrol, Constable MacGregor and native Oo-nee-ak-sah-gah, when they prepared a cache of dog feed and supplies above Oo-nee-ak-sah-gah Falls in preparation for the present patrol. Camp was made here for the night, at the foot of a large falls, where the river drops 200 to 300 feet, running on an incline for about half a mile, interspersed with large boulders, with here and there a small level patch of ice, connected with steep inclines, where the water had tumbled over the rocks and frozen in varied shapes. This falls was named by Constable MacGregor Oo-nee-ak-sah-gah Falls at an earlier date.

"The following day dawned clear and bright, with a strong wind from the northeast. A start was made, and part of our equipment carried up the falls. Then followed a great deal of hard work for men and dogs, getting the sledges and the remainder of the gear up the frozen or slippery falls. . . . Beyond the head of the falls we picked up the cache of dog feed, blubber, etc., that had been previously prepared, and which added considerably to the weight of our loads. We continued to meet with numerous sand banks above the cascade, until after travelling for about an hour, we arrived at smooth glare ice which afforded no foothold for the dogs, and immediately they tightened their traces, their feet slipped. The slight gradient of the stream's surface rendered our foothold as insecure as was the dogs', and little could be done to aid them, beyond chopping footholds and starting the sledges. The northeast wind drifted sand and gravel composing the river banks, and the dogs, finding themselves helpless on the smooth ice, would bolt for the shore, time and again driving the sled on to the gravel and rocks of the river banks, thereby causing a considerable loss of time before the heavy sledges could be brought back on to the ice. Much of the travelling was done, when possible, by one man running alongside of, and between the dog team and river bank, whilst the other kept the sled off the rocks and river bank. . . . We stopped at 7 p.m. to build our igloo, on the shore of the river.

"On March 3, owing to weather conditions, it being stormy with a strong wind from the northeast, and it being impossible to travel on the smooth ice with the heavy sledges against the head wind, we remained in camp all day. During the previous two days' travel, many small glaciers were observed, which indicates the presence of an ice cap covering the Penny Highlands. . . .

"The following morning, the wind having abated during the night, an early start was made. We continued to follow Pangnirtung stream, travelling conditions being fairly good, until we arrived in the vicinity of the third and last falls. The ice for about a mile below the falls was covered with several inches of water, caused by seepage from the falls, owing to the extremely mild weather. We pulled into the shore, and with all hands pulling and pushing took both sleds up along the frozen side of the main watercourse, where there had been an overflow, but which was now frozen, and innumerable rocks were embedded in the line of route. This falls is about 100 feet in height, with a slope of about 600 feet. After arriving at the top, we had not proceeded more than 200 yards, when we came to another falls of about the same height as the first, but of a much steeper gradient. All the dogs were hitched to one sledge, and by chopping footholds, and levering the sledge, with everybody shoving, (the dogs refused to pull as they had no foothold, being thereby rendered useless, and as a dog would fall and roll down, he was immediately pounced upon by the remainder of the team, then and there a battle royal would ensue the result of which was a hopeless tangling of traces, as each dog in Eskimo fashion is driven with a single long trace), the sled was moved gradually (a foot or so at a time) up the falls, and after arriving at the top, we returned and brought up the second sledge in the same manner. Continued travelling on the river course, crossed a long lake, and halted at 4 p.m. at the eastern end of aforementioned lake to melt snow with which to ice the sledge runners in preparation for a hard climb up a comparatively long hillside, through deep soft snow. This hill is the height of land in the Pangnirtung valley. After icing the runners, we continued up the hill, across a small lake, and down through a narrow steep rocky gorge, the bed of which was thickly interspersed with boulders, where it was again necessary to have recourse to boards being placed under the sled's runners, to expedite progress across the rocks, and arrived at another fair-sized lake, where camp was made late in the evening. . . .

"During the trip overland we had travelled through a long continuous valley that extends from the heads of north and south Pangnirtung fiord, and is bordered by the Penny Highlands. The valley constricts and widens from 100 yards to 3 miles, with general trend to the northeast. Several fox tracks were seen, and with the caribou seen to-day appears to be the only game in this vicinity, with the exception of wolves. The first good thaw makes conditions impassable for sledge travel over this route, owing to the volume of water discharged by the three falls and gorges, etc. The stretch of land between the fiords is about 60 miles wide, and North Pangnirtung fiord as shown on the map is 35 miles long, but it really is only about 23 or 25 miles in length. In recent years this cross-country trail has

not been used by the Eskimos when crossing the land. They prefer travelling via Kingnait valley, as they soon arrive at a native village, Padlee, on Ametoahgoogoose Island, near Durban Harbour, where dog feed is obtainable, whilst the Pangnirtung trail is more difficult, and necessitates carrying a heavier load of dog feed, as the nearest settlement of natives is at Kevetuk. From Kekerten and elsewhere is via Pangnirtung fiord, but it is essential that the dog sledges be shod with steel, owing to the inevitable contact with stones and boulders, and which must be crossed in certain places en route. Another essential item is ice creepers, which are of great assistance, allowing the men to walk and push the sled on the smooth ice, where the dogs are handicapped, especially so when the prevailing northeast winds are blowing."

The remainder of the journey, while difficult, was more normal, and the patrol reached Kevetuk on March 8. Corporal McInnes and his party remained there till April 7, when the return journey was begun. Difficulties were experienced in the gorge which had proved so troublesome in the outward journey. The height of land was crossed on April 13, and Corporal McInnes' report continues:—

"Much manipulation was required in getting the sledges safely across, and down to the small lake on the south side of the ridge, through the many boulders, and smaller rocks that were present in abundance. Arriving at a sharp declivity, the dogs were unhitched, and sledges lowered gently with a rope. This proved to be part of a fall that has a drop about 150 feet in a total distance of about 400 yards, the bed of which is covered with rocks of various sizes, flanked partly by low cliffs. At 2 p.m., near the foot of the falls, we met Mr. Hector Pitchforth, resident superintendent of the Sabellum Trading Company of Kevetuk, accompanied by natives Kedluk and wife, Nahsoogahloohang, Ahtakahleeng and wife Koonoo, Petahetoong and wife Peneloo, with families bound for Padlee and Kevetuk, with the exception of Peraketoong who is a Padlee native. Mr. Pitchforth stated that he had left Pangnirtung post 13 days previously, covering a distance that we later covered easily in two days' travel. Owing to the violence of the northeast gales, he had spent many days confined to the igloo, and was short of food, blubber, coal oil and dog meat. In fact his dogs had not had any meat for several days, and the natives had been eating the small quantity of meat that remained, and which was originally intended for the dogs' consumption. Although we had no superfluous rations, meat, etc., Mr. Pitchforth's needs were paramount, as his was the greatest distance to be travelled before arriving at the respective bases, so we were pleased at supplying him with meat, blubber, coal oil, dog meat and everything else that could possibly be spared in order to ensure the certainty of his safe arrival at Kevetuk. Being headed homeward, and with but a short distance to go, we could afford to take a chance, whereas Mr. Pitchforth unfortunately could not.

"I instructed Constable MacGregor to inform Kedluk that a statement was required from him, and that he must return to a chosen spot, near at hand, where we intended to build an igloo in order to take the statement. Mr. Pitchforth and party proceeded up the falls, and we built an igloo on the west bank of the stream, at the foot of the falls, and then had a meal. Later Kedluk arrived, and statement was taken under very awkward, difficult and trying circumstances, as our natives were snoring loudly in their troubled sleep, and the wind had cut many holes in the snow wall of igloo. The temperature of the igloo was more than several degrees below freezing point, and it was not conducive to penmanship. Just after daybreak we completed Kedluk's statement, and had a cup of tea before cooking breakfast. After breakfast, we decided to start immediately, and Kedluk returned to join Mr. Pitchforth's party above the falls."

Corporal McInnes' account of the community which he investigated in part is as follows:—

"The Kevetukmiut consist at the present time of 10 families, the heads of said families being seven men and the three widows of Neakoteah, Seeming and Ahlevahah. Total population, 33 persons, 13 males and 20 females. Three adults are afflicted with sore eyes, one man, Kedluk, having lost the sight of the left eye. Constable MacGregor washed the diseased eyes of a young girl daily during our sojourn and from the verge of blindness, her eyes responded quickly to this treatment, and before we left she had regained normal eyesight. This girl's mother, Milcoon, has very weak diseased eyes, and she told us that this affliction was prevalent in her husband's family to the second antecedent generation. As it was formerly the native custom to use birds' wings as towels until they were worn out, so is it now, and when a native is fortunate enough to become possessed of a cloth towel, it is used indiscriminately by all the members of the family, without ever being washed until nothing but a mere shred of the original fabric remains. By this means is infectious disease spread amongst them. Unfortunately they have no idea of personal hygiene. Much

## SESSIONAL PAPER No. 21

filth abounds in this settlement, and on the whole they are a more degenerate people than the neighbouring tribes. A lack of caribou skins suitable for clothing is obvious, consequently some of the natives are wearing skin clothing that they have had for two seasons, and it is in a dilapidated state, and very dirty, therefore not beneficial to general health. Also during the months of April and May, when the snow in contact with the skin covering of their tupeks (dwelling) is melting the atmosphere of the tupek is laden with humidity, and the people thereby contract hoarseness of the throat and severe colds, which has a telling effect on the health of the inmates of the said tupeks, specially infants and growing children. Rheumatic pains, lung trouble, insanity and occasional outbreaks of boils are the most common ailments peculiar to the Kevetukmiut. They are fond of dancing, and held several dances whilst we were there. Great interest is manifested in reading the Eskimo Bible, studying the different passages, etc., and it was habitual for our hostess, Kownang, to spend an hour or so each evening reading the Scriptures after she had gone to bed, but upon being questioned about the message conveyed to her in certain well known paragraphs, e.g., the tower of Babel, etc., she stated that she did not understand fully the purport of what she had read, therefore could not definitely say why God had made the confusion of tongues to fall upon the workmen.

"The word 'Kevetuk', which is the name of this village, is derived from a legend, part of which is the fact that the salmon trout in a small lake, 2 miles northeast of the village, when the natives are fishing refuse to take the bait, after coming up to it, but immediately swim away again, hence the significance of the name Kevetuk, Kevetoong or Kivitoon, which latter spelling is used by the Sabellum Trading Company in their correspondence, and is also stencilled on their cases, etc., destined for their trading post there. Kangeakdjung Peninsula, on which Kevetuk is situated, derives the appellation from a cliff of some 700 or 800 feet altitude, which faces east, true bearing, and situated several miles from the coast line of the promontory. Opposite the village of Kevetuk good anchorage is afforded, and sufficient depth of water to allow a vessel to stand in close to shore. Both channels, north and south of Idjuniving Island are navigable and deep enough for ships of ordinary draught. But this harbour is open to the eastward, and much ice often drifts in, and according to the natives the Sabellum Trading Company's ship 'Rosie' last year was nearly forced ashore by ice pressure in a narrow inlet southwest of the village, where she had retreated to safety before the ice. But this harbour was the retreat of whaling vessels in years gone by, during blubber stripping. No fresh meat was obtainable at the village during our stay, but the men had some in cache since the summer of 1923.

"This is a poor location for game, clothing, etc., according to the residents. Poor sealing is met with, but some walrus and white whale are taken in summer, also bear, salmon and ptarmigan, according to the season.

"The Kevetukmiut remarked that it was the first time they had had white men visit them in the winter time, also the first time a white man had wintered amongst them. There are four small wooden shacks here. One small house (residence of Mr. Pitchforth), being erected last summer, 1923, a small one-roomed house occupied by Kownang, post manageress for the Sabellum Trading Company at Kevetuk, and two storehouses all belonging to the above mentioned company.

"Native Peneloo of Teekeekan informed me that at that post there are five families of natives, totalling 19 persons, 9 males and 10 females, one aged woman, his mother, being totally blind.

"At River Clyde are one white man, Mr. R. L. Gaul of the new established Hudson's Bay Company post, 1923, and interpreter, Labrador native named Willie Powahdloo, and 15 native families, 23 males and 24 females, totalling 47 persons. Peneloo also reports that during the months of March and April natives will generally be found at or in the vicinity of Sahteksoon Island, as it is a good sealing ground in the spring. It is 10 day's spring time travel between Kevetuk and River Clyde.

"Padlee, or Ametoahgoogoose Island, is situated in Merchants bay, about 20 miles southwest of Durban Harbour, and also lies between Padloping island and the mainland, being closer to the latter. The Padlimuit appear to be a decidedly better class of natives than the Kevetukmiut, and their village is near good sealing grounds. During the summer months, walrus and marmosin pass within rifle shot from the village, and many are shot from beside the tupek door. Their tupeks (dwellings) are superior to those seen elsewhere, and one in fact is constructed in singular style, many skins being used in the covering of the framework which is rectangular in shape, and the place is both commodious and comfortable in comparison with the average tupek. Population of Padlee consists of 7 families, 16 males and 19 females, totalling 35 persons, four of the adults being widows, one of whom is totally blind, and one man, son of this widow, has defective eyesight. These natives also are zealous Christians, the head man displaying a deep interest in Christianity, and practically all of the younger people have biblical names. They are regretful that the minister comes not again, and stated that a long time ago, only one minister visited them at Padlee, also that this has been the first winter they have been visited by white men.

"The natives met with at Padlee and Kevetuk, also the Cape Kater natives have sufficient dogs for ordinary work such as hunting, moving from one camping ground to another, etc.

"On this trip, as well as on previous patrols that came in contact with natives at their villages, it has been noted that the people are in the habit of being present when cooking of meals is going on, and expect a share of the contents of the pot, whether one is on short rations or not, although they do not always ask, but remain watching with deep interest until they are asked to partake of something merely to get rid of them, as their presence at this time is quite embarrassing to a white man. They also look for presents when the patrol is about to depart. The above mentioned is according to their custom of the stranger (Eskimo) distributing part of his food supply to the village folk on arrival only, but this practice is generally prolonged where a white man is concerned, and few of the natives stop to consider as to how that white man is going to get home again, if weather conditions, etc., delay him. This was what happened to Mr. Pitchforth, as the natives had cleaned him out of biscuits, etc., when fortunately we met him.

"It is difficult to estimate correctly the distances as travelled by patrol. Pangnirtung to Kevetuk, via north and south Pangnirtung fiords, 200 miles. Kevetuk to Ametoahgoogoose Island, Padlee, Merchants Bay, 110 miles, and from thence to Pangnirtung detachment by Padlee and Kingnait fiords, 200 miles, total mileage, 510 miles approximately. Time occupied, 47 days."

#### PATROLS FROM PONDS INLET

The Ponds Inlet Detachment made two long patrols in the winter, Staff-Sergeant A. H. Joy, who was in charge of the detachment, making one from March 5 to April 20, to Lancaster Sound and Prince Regent Inlet, and Constable H. P. Friel making one from March 31 to May 3, to Clyde river, a stream falling into Baffin bay on the east side of Baffin island. Staff-Sergeant Joy, whose object was to test the practicability of communicating with the Ellesmere Island detachment, was absent for 47 days and travelled about 650 miles, some of it in perilous circumstances; and Constable Friel's patrol took 34 days and covered about 550 miles.

Staff-Sergeant Joy's report is as follows:—

"I left the detachment at noon on March 5, with Eskimo Oo-roo-re-ung-nak and a team of fourteen dogs, together with Constable Friel and Eskimo Kaehoo and a second team of 10 dogs to assist us for a few days in carrying dog feed, to see if it were possible in an ordinary season to communicate with the Ellesmere Island detachment. The ice on Eclipse sound was in splendid condition and we made very good time, arriving at an Eskimo village of seven families on the southwest corner of Bylot island after five hours travelling. After a few minutes' conversation, we continued to a point about 10 miles beyond, where we camped for the night at 8.30 p.m. During the afternoon we saw several seals on the ice, an unusual thing for this season of the year.

"The following morning I returned with Eskimo Kaehoo to the native village to interview Tom Koonnoon in regard to a rumour concerning the death of his son by starvation in the early part of the winter, which turned out to be native gossip. In the afternoon the patrol continued up Navy Board Inlet, camping a few miles short of Low Point at 9 p.m. We met a party of Eskimo going to the Post and passed a camp of one family *en route*.

"On the 7th a good day's march was made; we reached a point on the west side of the Inlet opposite Tay Bay. I had previously arranged to pick up a cache of walrus meat here, but the owner failed to mark it, and although a search was made for nearly two hours by all hands, we failed to locate it.

"Early on the morning of the 8th it commenced to snow heavily and a strong wind sprang up. In the afternoon we passed an Eskimo camp of three igloos at the junction of Navy Board Inlet and Lancaster sound, where I was informed that the ice on the latter as far west as they had travelled was very rough. We camped that evening a short distance east of Cape Charles Yorke, soon after entering the rough ice. I had intended, from previous information received concerning the condition of the ice on Lancaster sound, that Constable Friel and Eskimo Kaehoo should return from our present camp, but I now decided to have their assistance through the rough ice.

"We travelled through rough ice and deep, soft snow, with a continual heavy snow falling the next days, and made very slow progress. On the evening of the 10th we camped near the mouth of Admiralty Inlet. There were large patches of open water only a short distance out in the sound from our camp, and the ice was in motion as far out in the sound as could be seen.

## SESSIONAL PAPER No. 31

"It continued to snow, accompanied by a strong southwest wind, so that one could see only a few feet, until late in the evening of the 11th, and we remained in camp all day. Immediately it cleared enough to see, the Eskimos went out to the floe and Oo-roo-re-ung-nak killed a small seal.

"On the 12th we found the ice ahead impassable, and were compelled to travel on the land, where we encountered deep snow, and made slow progress for several hours. Upon entering Admiralty Inlet the ice was much better, although we still met with large patches of pressure ice, which necessitated detours being made, and we camped about 15 miles in Admiralty Inlet at 9.30 p.m. A large patch of open water several miles in width, extending from Lancaster Sound some 20 or more miles into the Inlet, caused us to make a circuit of two days' travel.

"On the morning of the 13th we continued down the Inlet, and in the afternoon met the wife of one of two Eskimos who were camped a few miles to our left. I learned from her that her husband knew something of the condition of the ice west of Cape Crauford, and decided to go to her camp and get some information. The men were out seal hunting and did not return until late in the night. I was informed here that there was a village of six native families on the ice at the edge of the open water a few miles south, and that nobody had been west of Cape Crauford during the winter, so that they had no knowledge of the ice conditions.

"The following afternoon we arrived at the village to the south. All the families were short of meat and oil, which condition had existed with them almost all winter. They wanted to make a trip to the trading post, but could not get sufficient meat ahead to make a start.

"Eskimo Sinnikah, upon hearing that I intended to cross Lancaster Sound, asked me to remain at the camp for a few days until he collected the dead seals in the open water, as he wished to accompany me, stating that it was not safe for one komitik to go alone, but the time required by him for the preparation for the trip was too indefinite and I decided to go ahead. He is a good, kind Eskimo, however, whose word can be thoroughly relied upon, so I decided to take Ahteetah, who said he could prepare for the trip in one day.

"On the morning of the 15th Constable Friel and Eskimo Kachoo left to return to the detachment; at the same time I and Oo-roo-re-ung-nak left for Lancaster Sound, and Ahteetah was to overtake us in one or two days. We arrived at Stanley Point, west of Cape Crauford at 9 p.m. where we camped. The condition of the ice during the day had been fair, but from our camp westward, as far as could be seen from the high-shore line, was very rough. The drifting ice reached within a few yards of the ice foot, and many large patches of open water could be seen in the Sound north and westward.

"On the 16th and 17th we remained in camp. Oo-roo-re-ung-nak killed a small seal on the 16th. Ahteetah, with his family arrived at our camp on the night of the 17th.

"Soon after leaving camp on the 18th we were compelled to travel alternately on the ice-foot and land; our advance was slow, so that we did not make more than 10 miles in the day's march. The spell of clear, mild weather, which had lasted from the morning of the 16th, was broken just before we went into camp by a gale from the east.

"On the 19th the travelling conditions were the same as the day previous. It snowed heavily and a strong wind blew from the east all day. We camped at Sargent Point late in the night.

"The next day the snow was drifting very badly, and a gale blew from the west, so we remained in camp all day. The floe at this point was within a hundred paces of our camp. The storm moderated somewhat during the night, and the following morning, when we were ready to leave, it became so bad that one could hardly see the length of the komitik, and we went into camp again. Eskimos Sinnikah and Ivahlung came to our camp during the night.

"The weather was clear and cold on the 22nd, and after passing Cape York we struck ice across Eardley Bay, and camped in very rough ice about 10 miles beyond late in the night.

"We remained in camp on the 23rd while Eskimo Sinnikah went along the coast to investigate the condition of the ice. He returned late in the evening reporting the ice both along the shore and out in the Sound very rough, although the latter, as far as he could observe, was stationary. Ahteetah and Oo-roo-re-ung-nak were out seal hunting all day, but had no success. The weather was clear, with a bitterly cold wind blowing from Prince Regent Inlet.

"On the morning of the 24th we struck out across Lancaster sound for the west end of North Devon Island. The travelling improved after leaving the shore a few hours. During the afternoon we killed two bears, which were devoured in less than five minutes by 50 hungry dogs. A strong wind blew from the west all day.

"We encountered rough ice again on the 25th soon after leaving camp, which we travelled through for the rest of the day; it had reached a thickness of about two feet,

then broken up by pressure or storm, and piled up in high ridges and rafted so that it was most difficult to travel over. We camped about midnight in the middle of Lancaster sound and almost in line with the centre of Prince Regent inlet. The natives informed me that it usually took about one and a half days to cross the sound at this point, and that they had never seen the ice so rough before.

"We left camp at noon on the 26th, and late in the afternoon we came to a lead in the ice from 25 to 400 yards wide, running northeast and southwest. This was followed for several miles in each direction, but no place was found where a crossing could be made. The ice was badly broken up as far as we could see in all directions. We were out of dog-feed, with no immediate prospects of getting any, so I decided to return to the shore. Sinnikah and Ivahung stated, although they were out of meat and grease, they intended to follow the lead to the southwest in the direction of Leopold island. Ahteetah, Oo-roo-re-ung-tak and myself returned on our old trail, and camped in our igloo of the previous night.

"The following morning, after an hour's travel, we came upon a wide lead that cut off our return; we followed the lead eastward for two hours, then encountered many of them running in different directions. Several attempts were made to cross the main lead, which was 100 yards wide and continued to get wider, but the ice being in motion east and west prevented our doing so. A gale was blowing from the west, and the thick vapour from the open water prevented us from seeing far. We built an igloo and waited for an opportunity to cross.

"Late in the afternoon of the 28th the young ice on the leads was strong enough to carry a komitik. We travelled for two hours, when we were again held up by open water until late in the evening. Oo-roo-re-ung-kan killed a seal during our enforced delay. Soon after starting again we came upon one of our old igloos, several miles from where we had built it. It was almost dark and we camped for the night.

"We remained in camp until 3 p.m. on the 29th, waiting for the leads to close. We then came within a half a mile of shore. Here we found the movement of the ice more rapid; at the time a heavy pressure existed towards the ice-foot, and we were kept very busy for several hours moving from ice pan to ice pan. Upon nearing the shore we were confronted by a perpendicular wall of ice 30 to 40 feet high, separated from the drifting ice by several yards of open water, or alternately by a heaving grinding mass of broken ice. We eventually succeeded in getting Ahteetah's outfit on firm ice just as darkness came on. By this time the ice was piled up all around our komitik 20 feet high, so that it was impossible to move. The noise made by the grinding ice was deafening, and the pressure was increased during the night by a gale from the southwest. Early the next morning the wind dropped; soon afterwards the pressure slackened, and we succeeded in getting our outfit on firm ice by noon on the 30th. The balance of the day and until late in the afternoon of the 31st was spent in drying out our clothing and equipment.

"During the afternoon and night of the 31st we moved east to Cape York. On April 1 the two Eskimos were out seal hunting all day, but the open water in the sound next the shore was several miles in width, and a gale and blinding snow-drift existed all day, and they returned in the evening without having seen a seal. On the 2nd all hands were out hunting until noon, but without success. In the afternoon we moved to Sargent Point, hunting at intervals *en route*. We were then out of oil, meat and blubber, and the dogs in a starving condition.

"On the 3rd all hands were out hunting again all day with no success. Ahteetah killed a large seal early on the morning of the 4th, which was sandwiched and carried out by the drifting ice. Shortly afterwards Oo-roo-re-ung-nak killed a very large oo-jouk, which was captured. Later in the day two more, a seal and an oo-jouk were killed, but sunk and drifted out of reach before they could be taken. In the evening Eskimo Munne and his family arrived at our camp from Admiralty Inlet. The weather was fine and clear all day.

"We left camp on the afternoon of the 5th. A bad blizzard blew from the west, and our dogs were hardly able to move after the big feed the day previous, following many days' starvation. The blizzard continued until the evening of the 6th, and we remained in camp. Oo-roo-re-ung-nak and Ahteetah were out seal hunting during the day; each killed a seal, which drifted out of reach before it could be recovered.

"We broke camp at noon on the 7th, and arrived at the Eskimo village on Admiralty Inlet late in the evening. Five families were now camped here, two of whom had recently arrived from Igloodik. They were still short of meat, barely getting enough for the needs of the people, and their dogs were in a wretched condition.

"We left the Eskimo camp at 3 p.m. on the 8th for Ponds Inlet. The ice was in splendid condition, and with a strong wind at our backs we made excellent time. One of our dogs stayed at the native village. He had been sick for several days and unable to haul, and when the Eskimos overtook me several hours from the camp, I learned that he had failed to follow.

## SESSIONAL PAPER No. 21

"The travelling was very good again on the 9th. All the old ice lying about the mouth of the Inlet on our outward journey had moved out and been replaced by new, smooth ice, and we camped that night well in Lancaster Sound.

"On the 10th soon after leaving camp, I met Mr. L. P. E. Freuchen, a member of the Fifth Thule Danish Expedition, with two families of Cape York Eskimos, *en route* to Cape York, Greenland. He was intending to travel by way of the south coast of North Devon island, or Wellington Channel and Jones Sound, and in the event of being delayed he might spend the summer on the west coast of Ellesmere Island. I stayed with Mr. Freuchen for about three hours, and then continued, camping that night a short distance west of Cape Charles Yorke.

"The next three days we spent in camp. A bad blizzard was blowing from the south-east on the 11th and 12th, and having contracted a chill while talking with the Danish party, after perspiring freely, I was glad of the opportunity to stay in bed. The Eskimos were out seal hunting each day, but the snow was drifting too badly to be able to see, and they had no success.

"On the 14th we left camp at 2 p.m. The snow was deep and soft, and we made very slow progress. We camped that night in our old igloo at the junction of Lancaster sound and Navy Board inlet.

"The 15th was a dull, mild day. Our dogs were weak with hunger, and we made very slow time. We also stopped several times during the day to re-ice the komitiks runners. We camped that night about five miles north of Canada point on Navy Board Inlet.

"The following day was a bitterly cold one; it was all one could do to keep from freezing while running in heavy deer skin clothing. We camped that night at Low Point. This place was described by a member of one of the Arctic expeditions as being 'the coldest place on earth,' and I fully concur, for the time being, with the man who made the statement. On my two previous visits here I saw the Eskimos lie face downwards on the ice to protect themselves from the fierce, penetrating wind.

"We left camp at 2 p.m. on the 17th. During the afternoon we met Eskimo Inngaluk returning to his camp from the Post. The day was clear and cold. We camped at 11 p.m. at the foot of Navy Board Inlet. Soon after going into camp a strong wind sprang up from the east, and it commenced to snow heavily. The storm continued until the night of the 19th. The condition of our dogs necessitated us getting home as soon as possible, and we left camp at noon on the 19th. The freshly fallen snow was at least two feet deep, and our dogs could hardly move. We arrived at the detachment on the afternoon of the 20th. It had taken us 27 hours to cover about 20 miles.

"From the information I had received in February about the condition of the ice on Lancaster Sound, I concluded that it would not be necessary to go further west than Cape Crauford to make a crossing, and if this were possible, a comparatively quick trip could be made to Craig Harbour by way of the eastern end of North Devon island. The trip could be made in any kind of winter season, however, by way of Wellington channel and Jones sound, providing a return trip was not necessary. It would have been possible for me to reach there, but not to return. The past winter has been a comparatively mild one, but the many long and severe gales that have blown since the middle of February, together with the total absence of old ice, has caused the ice to break up many times.

"From the information given by the Eskimos who accompanied me and others that we met *en route*, it is possible in the average year to secure any amount of dog-feed while travelling west of Cape Crauford, but this year must have been an exception to the rule, for we travelled many days without seeing a seal, although one or more of the party hunted for them almost every day. To illustrate two successive years, I may state, that a party of three Eskimos travelling west of Cape Crauford last year killed over 40 bears, in addition to seals and walrus, and left many hundreds of pounds of meat on the ice.

"The patrol occupied 47 days, and travelled approximately 650 miles."

## PATROL NORTH FROM RAE

Mention has been made in the body of the report of Inspector H. L. Fraser's patrol from Fort Smith by way of Resolution and Rae to Lac Ste. Croix (or Simitu), one of the chain of lakes and streams between Great Slave lake and Great Bear lake. Extracts from his account of his journey over the less-frequented part of the route may be of interest. Travelling as far as Rae by steamer and motor-launch, on April 6, he left Rae for the north, his purpose being to establish a cache for use in a winter patrol to Great Bear lake. Inspector Fraser says:—

"I took with me in two canoes Corporal Hall, Constable Baker, S/Constable Bouvier, and C. W. Grahame, an employee of the Northern Trading Company, intending to get a

guide at the head of lake Marion where Indians from the Lake Simitu district had been encamped since the treaty payment.

"Mr. Grahame was very useful as he not only lent me a second canoe, but had a very good knowledge of the river as far as the La Martre river and did a good deal of the cooking.

"As regards a guide, I was disappointed, as the chief, who evidently thought that he had me at a disadvantage, and that I couldn't leave without a guide, tried to hold me up for \$6 a day. He said that the trading companies were paying \$15 a day to Indians for cutting wood near Fort Rae last winter: this was true to a certain extent, the companies were paying very high wages—in trade, but this doesn't mean much in actual cash. This giving of wages in trade is what is spoiling the market for Government officials, and others who have to employ Indian and halfbreed labour and pay in cash. I told the chief that I had no time to waste in foolish talk of this sort, and pulled out without a guide: the water route as shown on the map giving me the idea that it might be possible to get along without one.

"On the following day I went off my road, taking a channel to the northeast, when I should have taken one to the northwest: the appearance of the channel was very deceptive, the main body of water and the current going to the northeast with all the appearance of being the main channel. Before I had gone very far, I met an Indian who told me that the channel I was in would take me in the direction of the Barren Lands, and that the stream which I should have taken was a mile or so back.

"I decided that it would only be a waste of time trying to get through without a guide, and hired this Indian as guide at \$3 a day. The experience of the trip proved that, while I should no doubt have got through to lake Simitu without a guide, a lot of time would have been wasted in the attempt. A week might easily have been spent in looking for the portage out of Lake Quichatee, and even on the river, some of the portages would have been quite hard to find quickly to anyone who had not been over the route before. Our guide was at fault once himself, and I had to climb a hill and put him on what I believed to be the direction by the lie of the land: it happened to be right, and shortly after he picked up his landmarks and was never at fault again.

"Although this was quite a hard trip, owing to the number of portages, 39 in all, and to the fact that the extra food for the cache, weighing about 350 pounds, had to be packed over these portages in addition to the canoes, bedding and food for the trip, I would call this a good canoe route.

"There was always a good depth of water, good camping grounds with a sufficiency of dry wood, and the portages were mostly short, and with good footing on them.

"As far as lake Kakatu, literally 'Swan lake' (lake Mazenod on map), the route followed the waterway as shown on the map, that is the Marion river. From here our guide hit a little east of north to the southeast corner of lake Quichatee, literally 'Big Rock lake' (lake Fabre), following a route very little used even by Indians through a rough and broken country. I should hazard the opinion that few, if any, white men have been over this bit of country; it was on the direct line to our guide's home, and he had not been over it for ten years and lost his way. From this point we followed the three larger lakes, Quichatee, Congatu, literally 'Jack-Pine lake' (Lake Rae) and Lake Simitu. The Indian houses are in the northwest corner of Lake Simitu.

"On the morning following my arrival at Lake Simitu, I climbed a hill about 700 feet high, which is on an island across a small arm of the lake, and it appeared to me that the lakes termed Simitu and Rogers on the map are in reality one large lake; the Indians call the whole expanse of water which includes these two lakes 'Simitu.' In taking the short cut we missed a fair-sized lake between Lakes Mazenod and Fabre, which has no name on the map. The Indians call it 'Quikasintu,' literally 'Lichen lake'; the guide told me once or twice after we left Lake Mazenod that a long portage to the west would take us into a big lake. After making the portage out of Lake Congatu, we were going down stream, and I figured that the height of land must be the chain of sloughs between Lake Quichatee and Lake Congatu. From the top of this hilly island on Lake Simitu a wonderful view of the country on all sides is spread out before one. To the northwest lies a long range of hills with other hills behind as far as the eye could see—the Barrier Mountains. To the northeast lies another smaller range. Between the two ranges, that is, due north, lies a fairly level bit of country with five small lakes strung across it. To the east one looks across Lake Rogers—a big sheet of water with a great number of islands—to a long low range in the distance. To the west is Lake Simitu, and a rolling country of small hills. Looking back to the south, it was possible to see a good deal of the way by which we had come, the portage we had made out of Lake Congatu, and a good deal of Lake Congatu itself. A river ran out of the northwest corner of Lake Rogers round the western spur of the hills which, according to our guide, is one winter route to Great Bear Lake—Lake Sequin, into which this river flows, and Lake Hardisty, were both hidden from view by the hills to the northwest.

"From Kakatu Lake on the water was so clear that it was possible to see the bottom at quite a depth, and I saw plenty of fish—whitefish and suckers: there is no need for a

## SESSIONAL PAPER No. 21

traveller who carries a net to starve in this country. There were ducks all the way, but otherwise the game seemed to be very scarce. We saw one fresh track of moose and some old bear tracks, but no other signs of animal life during the whole trip. On the trip north the ducks were in small numbers; a week later, coming south, they were in bigger flights, and seemed to be banding prior to going south.

"I saw Indians at the head of Lake Mariou, a few at the houses on Lake Chato, but none at the houses on Lakes Kakatu and Simitu. On the last day but one of the return journey, we passed several canoe-loads coming slowly up with the wind; they appear to travel very slowly, and to sit down and wait for a favourable wind to blow them to their destination.

"The Dogrubs of this part of the country appear to be a very healthy lot, with very little sickness amongst them, and those I saw were pretty good specimens of Indians.

"When I first engaged our guide, I asked him how long it should take us to reach Simitu. He replied that they (the Indians) travelling fast made it in about 14 days, but that we, having no need for haste, would probably take longer. It actually took us six days. The Indian was quite played out on his second day with us, and was tired every night when we made camp. Of course we were lucky to get a fair wind and to be able to sail on the three larger lakes, but this seems to be another proof that the present day Indian is not the traveller he is supposed by some to be.

"I made a cache of part of the food at Kakatu (Mazenod) Lake in the house of our guide. This is on the winter trail, about 90 to 100 miles from Fort Rae, and is marked "A" on my map (attached). The remainder I left at a house on lake Simitu, which is also on the winter trail, about 170 miles from Fort Rae, and is marked "B" on map. I have instructed Corporal Hall to push the cache at A to B with dogs in the early winter, so that at the time when the Great Bear Lake patrol is made, there may be a good supply of rations and dogmeat at the divide between the two great lakes.

"Being downstream better time was made on the return trip in spite of the fact that, owing to head winds, it was impossible to sail on the three large lakes, and both canoes reached Fort Rae in the early afternoon of the fifth day.

"This was a very interesting trip, and, although the winter trail to Great Bear lake does not altogether follow the river, an instructive one. One was able to get a good idea of the general lie of the country. Had it not been for the fact that I had to take the carpenter to Fort Providence to commence building there, I should have pushed on a little further in the direction of Great Bear lake.

"If a patrol is made through this country next summer, I would recommend that a lighter canoe be used; the Peterboro, which is at this detachment, is a good canoe for lake work, but is very heavy to pack over portages and to paddle against a swift current.

"It seems to me that by far the easier part of the journey to Great Bear lake would be the northern half—mainly lake travelling, and that two men, travelling with a light canoe, and without the extra load of food which we had to carry could go through to the Great Bear lake and back in little over three weeks. Dease Bay, of course, is further, and I figure that the patrol from Fort Rae to that point and return this winter will take, with average conditions, about a month."

REPORT  
OF THE  
SECRETARY OF STATE  
OF  
CANADA  
FOR THE  
YEAR ENDING MARCH 31, 1924

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
F. A. ACLAND  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1924

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander-in-Chief of the  
Dominion of Canada.*

My LORD,—I have the honour to lay before Your Excellency the accompanying report of the Department of the Secretary of State for the twelve months ended March 31, 1924.

I have the honour to be, My Lord,

Your Excellency's most obedient servant,

A. B. COPP,  
*Secretary of State.*

OTTAWA, April 1, 1924.

OTTAWA, April 1, 1924.

The Honourable ARTHUR BLISS COPP, LL.B.,  
Secretary of State of Canada.

SIR,—I have the honour to submit, herewith, my report of the operations of the Department of the Secretary of State for the fiscal year 1923-24.

I have the honour to be, sir,

Your obedient servant,

THOMAS MULVEY,  
*Under-Secretary of State.*

## CORRESPONDENCE BRANCH

The Correspondence Branch conducts the general correspondence of the department and administers the Boards of Trade Act, Canada Temperance Act, Ticket-of-Leave Act, Trade Unions Act and War Charities Act. The general correspondence includes the official correspondence of the Dominion Government with the Provincial Governments.

The volume of correspondence conducted during the year shows a slight increase over that of the previous year. The operations under the above Acts administered by the department may be briefly noted:—

### BOARDS OF TRADE ACT

Seven new boards of trade, a list of which will be found in the report of the Registrar's Branch, were registered during the year. All boards registered under the Boards of Trade Acts or under special Acts of Parliament have been required since the passage of the Amendment Act, 1920, to make annual returns to the department. These returns are examined and filed in the Correspondence Branch.

### CANADA TEMPERANCE ACT

#### IMPORTATION OF INTOXICATING LIQUORS

No further plebiscites under Part IV of the Canada Temperance Act were taken during the year. The prohibition of importation remains in force with respect to the seven provinces which adopted it. A statement of the vote in these provinces appears in last year's annual report.

#### EXPORTATION OF INTOXICATING LIQUORS

Under the amendment made to the Canada Temperance Act at the 1922 Session of Parliament Orders in Council were passed during the year prohibiting the exportation of liquor from the provinces of Manitoba, Prince Edward Island and New Brunswick, respectively. The prohibition of exportation is now in force with respect to the provinces of Saskatchewan, Alberta, Manitoba, Prince Edward Island and New Brunswick. The following schedule shows the dates of the Orders in Council and dates of coming into effect of the prohibition in these provinces:—

Provinces	Date of O.C.	Date effective
Saskatchewan	Nov. 11, 1922	Dec. 15, 1922
Alberta	March 5, 1923	Mar. 15, 1923
Manitoba	April 25, 1923	June 1, 1923
Prince Edward Island	June 19, 1923	Aug. 31, 1923
New Brunswick	Oct. 3, 1923	Nov. 30, 1923

### ELECTIONS UNDER PART I

Under this part an election was held on July 31, 1923, in the county of Stanstead, Quebec, on a petition for the revocation of the Order in Council which brought Part II of the Act into force in that county. The result of the vote being in favour of the revocation an Order in Council was passed accordingly, under date September 14, 1923, revoking the Order in Council of January 13, 1917, which made the Act effective in the county. The repeal took effect from September 22, 1923.

## SESSIONAL PAPER No. 22

Under the provisions of Chapter 30, 7-8 George V, "An Act to amend an Act in aid of Provincial Legislation prohibiting or restricting the sale or use of Intoxicating Liquors," the operation of Part II of the Canada Temperance Act in the county of Guysborough, N.S., was suspended by Order in Council without the taking of a vote. The method of suspending the Act without the taking of a vote is followed in counties or cities situated in provinces whose liquor laws are as restrictive as the Canada Temperance Act. Elsewhere a vote is taken on the repeal of the Act. The Order in Council suspending the operation of the Act in the county of Guysborough was passed on June 16, 1923, and the suspension became effective from July 1, 1923.

Part II of the Act continues in force in the following places:—

Ontario.—District of Manitoulin.

Quebec.—City of Thetford Mines and counties of Brome and Compton.

Manitoba.—Lisgar and Marquette.

## TICKET-OF-LEAVE ACT

This Act is administered jointly by the Department of Justice and the Department of the Secretary of State. The Secretary of State receives petitions for clemency and communicates His Excellency's pleasure in relation thereto to the parties concerned. The number of sentences which came under review in the Remission Division of the Correspondence Branch during the year closed was 2,704, as against 2,435 in the previous year, not including "No Interference" cases, that is, cases which had been under consideration on previous occasions and in which clemency was withheld. Licenses or tickets-of-leave were granted in 1,123 cases and temporary licenses in five. These temporary licenses are issued for the purpose of allowing prisoners to leave prison for medical examination or treatment.

## CAPITAL CASES

Nineteen capital cases were dealt with in the branch during the year, jointly with the Department of Justice. The judges' reports and the evidence in all such cases are filed with the Secretary of State, who also communicates His Excellency's decisions regarding the execution of the sentences to the authorities concerned. Of the nineteen cases the death sentence was carried out in thirteen; three were commuted; in two cases new trials were granted and in one a reprieve.

## WAR CHARITIES ACT

Some 226 societies are now registered under this Act and are making annual returns to the department. The fact that so many societies are still registered is evidence of a determination to pay the full debt due to the soldier and his dependents. The Imperial Order Daughters of the Empire is deserving of special mention for its sustained interest in this work. Ten new societies were registered during the year just closed. These societies are as follows:—

Name	Head Office	Date	President or Regent	Secretary
Nolan-Cornell Chapter, I.O.D.E. ....	Westmount, Que.	April 9, 1923	Mrs. Olive K. Wood....	Mrs. B. P. Wood.

## TRADE UNIONS ACT

One trade union was registered during the year. The returns made by registered unions were checked and filed in the Correspondence Branch.

## BANKRUPTCY ACT

Prior to the enactment of the 1923 amendment to the Bankruptcy Act, which came into force on October 1, 1923, applications for appointment as authorized trustee under the Act were made to the Secretary of State. The amendment provided that any person whom the creditors might select could act as trustee. No further appointments as authorized trustee have therefore been made by the Governor in Council since October 1, 1923, and the functions discharged by the Secretary of State in regard to the receipt of applications and the filing of security have consequently lapsed. Between April 1 and October 1, 1923, two additional authorized trustees were appointed by the Governor in Council, namely, Ernest J. Howson, Chartered Accountant, Toronto, and the Eastern Trust Company, Charlottetown.

## REGISTRAR'S BRANCH

The following is a detailed statement of the work performed in the Registrar's Branch for the year ended March 31, 1924:—

<sup>1</sup> Ordinance Land Grants.....	10	10	20
Special Grants.....	26	26	52
	242	1,565	1,807

<sup>1</sup> An annual statutory return of bonds is submitted to Parliament under section 32 of Chapter 19, R.S.C., 1906, giving full particulars of all bonds registered in the branch since last return.

<sup>2</sup> Quarterly returns of these lands were sent to the registrar of each city and county in the province of Ontario, and to the secretary-treasurer of each city and county in the province of Quebec in which patents were issued, and copies of the several returns in Ontario were also sent to the Provincial Secretary of Ontario.

During the year copies have been made of over 3,000 pages of documents and records including 600 certified copies and certificates.

Over 2,700 searches have been made for company names through the Dominion and provincial lists of incorporated companies in order to prevent duplication in names of companies incorporated.

A considerable amount of miscellaneous work has been performed, such as typing cards for card index of Dominion and provincial companies, proof reading, furnishing memoranda of various kinds, and supplying information from the indices and records.

A list of public officers to whom commissions were issued and lists of boards of trade and one trade union registered since the last report are also submitted herewith.

## COMMISSIONS TO PUBLIC OFFICERS

List of Public Officers to whom Commissions were issued from April 1, 1923, to March 31, 1924

## THE COMPANIES BRANCH

The number of companies incorporated under the Companies Act and amending Acts during the fiscal year 1923-24 was 604, including 20 corporations without share capital and 53 companies having shares without nominal or par value. The total capitalization of new companies having par value shares was \$183,986,933.33, and the working capital of companies having shares without nominal or par value was \$20,659,350. The number of existing companies to which Supplementary Letters Patent were issued was 168, of which 58 increased their capital stock by the amount of \$15,352,755, while 27 decreased their capital stock by \$57,944.40, the remaining 83 being granted Supplementary Letters Patent for various purposes such as change of name, extension of powers, etc. There were thus issued during the year a total of 772 charters and supplementary charters, the total capitalization of new companies and the increased capital of existing companies including the working capital of companies having shares without nominal or par value being \$219,999,038.33. The usual synopses (with index thereto) giving full particulars of all companies incorporated, as well as of Supplementary Letters Patent to existing companies, granted during the fiscal year, are appended hereto.

The total number of documents registered pursuant to provisions of section 69a of the Companies Act during the fiscal year was 103, the total amount secured being \$101,758,264.75. The instruments entered in the Register of Mortgages and Charges include 72 Trust Deeds, 12 Supplementary Trust Deeds, 11 Debentures not covered by Trust Deeds, 1 Charge secured by By-law and 4 Appointments of Receiver. There were also registered 3 Discharges and Memoranda of Satisfaction of Charges previously registered.

The number of returns submitted under section 106 of the Companies Act during the fiscal year ended March 31, 1924, was 5,026—an increase of 476 when compared with the number (4,550) received during the previous year. Certain details from the summaries submitted by 4,176 companies for the fiscal year ended March 31, 1923, appear in the annexed list, the remaining 850 returns being delinquents for previous years. The number of returns filed continues to increase, notwithstanding that a considerable number of companies have ceased to subsist, the charters of 146 of which were returned during the year to the department. Advice was also received to the effect that some 332 other companies were in bankruptcy or being liquidated.

**SYNOPSIS OF LETTERS PATENT ISSUED TO COMPANIES INCORPORATED UNDER "THE COMPANIES ACT," PART I OF CHAPTER 79, R.S.C., 1906, AND AMENDING ACTS, FROM APRIL 1, 1923, TO MARCH 31, 1924**

## NATURALIZATION BRANCH

The total number of certificates granted under the Naturalization Acts, 1914 and 1920, for the twelve months ended March 31, 1924, was 7,659.

The first schedule, hereunder, shows under the heading of nationality of origin, the number of persons naturalized during the above period.

The second schedule shows in alphabetical order the name, former nationality, date of Oath of Allegiance, date of Certificate, occupation, present residence and certificate number, of persons naturalized under the Naturalization Acts, 1914 and 1920, as registered in this Branch during the fiscal year ended March 31, 1924.

## SCHEDULE I

Nationality of Origin	Number Naturalized	Nationality of Origin	Number Naturalized
Albanians.. . . .	5	No Nationality.. . . .	2
Americans.. . . .	928	Norwegians.. . . .	160
Argentine-Republic.. . . .	1	Palestinians.. . . .	5
Austrians.. . . .	903	Persians.. . . .	1
Austrian-Hungarians.. . . .	11	Poles.. . . .	807
Austrian (Ukraine).. . . .	2	Pole (Ukraine).. . . .	12
Belgians.. . . .	141	Portuguese.. . . .	1
Brazilians.. . . .	1	Roumanians.. . . .	576
Bulgarians.. . . .	50	Russians.. . . .	1,274
Chinese.. . . .	20	Serb-Croat-Slovaks.. . . .	105
Czecho-Slovaks.. . . .	79	Spaniards.. . . .	7
Danes.. . . .	96	Subject of Allied Powers.. . . .	2
Dutch.. . . .	57	Swedes.. . . .	232
Egyptians.. . . .	1	Swiss.. . . .	47
Finn.. . . .	90	Turks.. . . .	14
French.. . . .	103	Turks (Armenian).. . . .	91
Germans.. . . .	221	Turks (Greeks).. . . .	8
Greeks.. . . .	309	Turks (Mesopotamia).. . . .	1
Hungarians.. . . .	56	Turks (Palestine).. . . .	1
Italians.. . . .	1,069	Turks (Syrian).. . . .	122
Japanese.. . . .	42	Venezuelans.. . . .	1
Luxembourgers.. . . .	3	Section 4.. . . .	1
Montenegrins.. . . .	1		
		Total for year.. . . .	7,659

Section 4, certificate granted to a person with respect to whose nationality as a British Subject a doubt exists.

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander in Chief of the Dominion  
of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to lay before Your Excellency the accompanying report of the Civil Service Commission of Canada for the year ending December 31, 1924.

Respectfully submitted,

ARTHUR B. COPP,  
*Secretary of State.*

OTTAWA, May 4, 1925.

to the  
ess has  
, depart-  
to report  
reductions

May 4, 1925.

The Hon. ARTHUR B. COPP,  
Secretary of State of Canada.

SIR,—In conformity with the provisions of section 36 of the Civil Service Act, 1918 (as amended by chapter 10 of the Statutes of 1919, Second Session), I have the honour to submit herewith a report of the proceedings of the Civil Service Commission of Canada for the year ending December 31, 1924.

I have the honour to be, sir,

Your obedient servant,

WILLIAM FORAN,  
*Secretary.*

## REPORT OF THE COMMISSIONERS

In compliance with the requirements of section 36 of the Civil Service Act, the Civil Service Commissioners submit their Sixteenth Annual Report covering the activities of the Commission for the calendar year 1924.

### EXAMINATIONS

During the year the Commission has conducted 1,878 civil service examinations—an increase of 365 over 1923—at which some 18,000 persons competed. As in previous years, much valuable assistance was given the Commission by officers of the various government departments, as well as by scientific, professional and other men in the business world. The acknowledgments of the Commissioners are due to these gentlemen, whose names are given on page x. In the majority of cases, they served as members of advisory examining boards without remuneration of any kind, and through their active interest and unselfish work, the merit system has been greatly assisted.

### APPOINTMENTS, PROMOTIONS AND TRANSFERS

The Commission received and took action upon 5,281 requisitions for appointments to the various departments, 2,727 dealing with positions of a permanent nature, and 2,554 with assistance of a purely temporary character.

The tables of the appendix show that during the year, 1,996 appointments of a permanent character have been made in the various departments of the administration (including rural postmasters and seasonal employees). Tables 1 and 2 indicate the departments to which such appointments were made, classes and salary ranges, appointees with overseas service, disabled war veterans and widows entitled to preference under section 39 (3) of the Act as amended in 1921. Other tables give particulars as to the promotions and transfers effected within the same period.

It may be observed here that no appointments are made to the different departments, and that no person is assigned to any position, except upon the special request of the deputy ministers. As to promotions, they are based mainly upon the ratings of the departments.

### RURAL POSTMASTERS

Regarding the filling of positions of rural postmasters, the Civil Service Commissioners think it their duty to respectfully call the attention of Parliament to the fact that the Act does not authorize the promotion of deserving and meritorious assistant postmasters. If it is the pleasure of Parliament, the Civil Service Act might be amended so as to authorize the promotion of well qualified and meritorious assistant postmasters, as being in the public interest.

### SEPARATIONS

During the year, 2,439 separations from the service were reported to the Commission, as against 1,996 appointments, which shows that progress has been made in the endeavour to reduce the establishments of the various departments. As the departments, however, are not required by the Act to report retirements to the Commission, no exact statement as to the actual reductions in the personnel of the service can be made here.

## CLASSIFICATION

The classification of positions has been correlated with the organization of branches. Instead of filling every vacancy, it frequently has been possible to transfer the duties attached to a former position to another. And, with a view to securing a uniform classification of similar positions in any branch, the Commission has, in a general way, deferred the consideration of individual cases.

## SALARY REVISION

The Commission was directed by the Order in Council of March 29, 1924 (P.C. 530), to undertake a revision of the salaries of the Civil Service. This work has been completed for the field services in the Post Office Department and the Department of Customs and Excise and a plan for the adjustment of the salaries of clerical classes has been prepared. The essential feature of this revision is the absorption of the cost of living bonus in a scale of equitable salary ranges for the lower-paid classes.

## ORGANIZATION

In conjunction with departmental officers, the Commission has undertaken a number of reorganizations, and has prepared an establishment for each branch or division affected. The allocation of a definite number of positions of appropriate grades to a branch, quite apart from any saving effected as the result of detailed investigation, provides a fixed basis on which subsequent adjustments may readily be made. It is a convenience, not only to the Commission, but also to departmental and branch heads, as every position in the unit is shown in its proper relation to others, and the effect of any change of duties can be gauged without difficulty.

Details of the more important organization work undertaken during the past year are given below:—

*Post Office Department—*

The reorganization of the Equipment and Supply Branch, which was delayed on account of the difficulty of obtaining suitable quarters, was completed during the year.

The work formerly performed in the Mail Contracts and the Rural Mail Delivery Branches has been amalgamated in a Mail Contracts Branch with a saving of three positions in spite of a considerable increase in work, and further savings will be effected upon the retirement of other employees of this branch, whose positions will not be required to be filled.

The financial and general secretarial activities of the Toronto Post Office have been placed under common supervision by the establishment of a Secretarial Branch. Thirty-one positions, eleven of which are now vacant, have been abolished, the remaining employees to be transferred to other branches of the office as vacancies occur.

With the introduction of Hollerith accounting machinery in the Money Order Division of the Financial Branch, a bonus system depending directly upon the production of the operators was established in connection with the key-punching of the Hollerith cards. As this system has been in effect since the introduction of this machinery it is difficult to obtain any close estimate of the saving involved, but from the constant increase in production of the operators and the incentive to greater accuracy, it is anticipated that considerable saving will be so effected. A new establishment for the Savings Bank Division with contemplated improvements in methods of work is in the course of preparation.

## SESSIONAL PAPER No. 24

*Department of the Interior—*

The amalgamation of the Water Power Branch and the Reclamation Service provided an excellent opportunity for the reduction of expenditure by reorganization. The original plans were prepared by the department, and reviewed by the Commission. Close co-operation resulted in a further reduction and the final organization showed a substantial decrease over the first draft. Prior to amalgamation the combined strength of the two branches was 210, which is now reduced to 186, with an annual saving of about \$100,000. The main saving was made in the head office organization, and in the Alberta and Saskatchewan Division.

A reorganization plan for the Topographical Survey has been considered. This is properly a preliminary step towards the centralization of all topographical work performed by the Federal Government, which the Commission has advocated for some time, but on which no agreement with the Departments concerned has yet been reached.

Investigations with a view to the reorganization of the Accounts Branch and the Dominion Parks Branch are now in progress, and a request has been received from the deputy minister for similar treatment of the Dominion Lands Service.

*Department of Immigration and Colonization—*

The department has been assisted in the reorganization of its Records Branch; this has involved the adoption of improved procedure to cope with a large increase in the volume of incoming correspondence. In conjunction with departmental officers establishments have been drawn up for the Records, Accounts and Supplies Branches, and a key establishment prepared to facilitate the reorganization of the department as a whole. Preliminary examinations of the work of other branches of the department for which establishments are in course of preparation have also been undertaken.

*Department of National Defence—*

Adjustments in the organization of three branches, rendered necessary by increased work, have been made. An establishment, involving some 200 positions, has been drawn up for the stationary engineers, firemen and caretakers of military buildings and properties, hitherto employed by the department on a temporary basis.

## SUPERANNUATION

The new Civil Service Superannuation Act which came into force July 19, 1924, is the consummation of years of advocacy on the part of civil servants and those whose duty it is to promote an efficient public service. It is in line with the policy recommended repeatedly by the Commission in its annual reports and is the logical outcome of the Public Service Retirement Act, 1920.

With the coming of the new Superannuation Act provision was made for the termination of the temporary measure on November 1, 1924. Under the Public Service Retirement Act, 995 employees were retired from January 1 to November 1, 1924, the date the Act lapsed. Of the vacancies so created only 734 required to be filled; consequently 261 positions were abolished, resulting in a saving in salaries amounting to \$421,880.92 annually.

The total effect of the operation of the temporary superannuation measure cannot be exactly estimated but a summary of what has been accomplished during the four years and four months it was in force shows that 2,284 employees were retired and of the vacancies so created, 771 were abolished. Salaries of these 771 positions total \$1,186,126.89. However, against this saving in salaries must be set the cost of annuities, which amounts to \$943,460.85 annually,

making a saving after annuities are paid and without any regard to deaths which have occurred amongst annuitants, of \$240,666.04 annually, from December 31, 1924. The cost of gratuities granted has been more than offset by the saving in salaries so that there was actually saved during the four years the Act operated approximately \$471,376.76.

The Public Service Retirement Act has cleared the service of 1,716 employees of sixty years of age and upwards and the fact that its application has resulted in such a saving in the public service has demonstrated some of the benefits to be expected from the new Act. The moral benefits are not so easily gauged but it is believed that the Superannuation Act will solve many problems that hitherto have yielded to neither classification nor reorganization. As a result, the Government will now be free to retire officers who have outlived their usefulness; a proper flow of promotions will be created; the service will be rendered more mobile; reorganization will be simplified and business administration improved, with greater efficiency and economy in the public service.

It may also be observed that in every case of retirement action was taken only after specific requisition and recommendation by the department concerned. The Civil Service Commission has been criticised for the number of retirements effected under the Act of 1920, but it must be remembered that the main duty devolving on the Commission was to check up the data submitted by the department and if the record of the officer concerned showed him eligible for retirement under the Act, and if the department was able to show that the retirement was in the public interest, the Commission endorsed the departmental recommendation and reported the details to the Governor in Council whose judgment was final.

#### OBSERVANCE OF CIVIL SERVICE ACT AND REGULATIONS

The Civil Service Act has been in effect for upwards of six years and the provisions thereof and the regulations made thereunder, may now reasonably be regarded as being known to and understood by the ranking officers of all departments of the public service within the jurisdiction of the Civil Service Commission. But there are instances yet occurring from time to time, which indicate, either that these officers are not familiar with the Civil Service Act, or are indisposed to respect it.

Section 4(b) of the Civil Service Act imposes upon the Commission the duty of reporting "upon the violation of any of the provisions of this Act, or of any regulation made thereunder."

In the opinion of the Commissioners, sufficient time has been allowed for departmental officers to familiarize themselves with the Civil Service law and regulations, and the Commissioners deem it their duty to hereafter report to Parliament any violation thereof.

#### SPECIAL COMMITTEE OF THE SENATE

A special committee of the House of Commons was appointed in March, 1923, to inquire into the operation of the Civil Service Act. This Committee reported *inter alia* as follows:—

"Your committee... recommends that the Civil Service Commission do forthwith, under the powers set out in subsection 4 of section 4 of the Civil Service Act, analyse and investigate the best methods of co-ordinating and harmonizing the various government departments into one organized administrative body, with a view to the elimination of duplication and overlapping in services and in order to eliminate and prevent any over-manning and to report thereon to the Governor in Council.

"Your committee further recommends that reorganization of those departments of the public service, which have not thus far been reorganized, should be undertaken by the Civil Service Commission without delay to facilitate the early application of a measure of superannuation, in co-operation with the deputy heads of the departments, with a view of setting up an establishment suitable to the requirements of each department."

In March, 1924, the Senate appointed a Special Committee to inquire into the operation of the Civil Service Act and the administration of the service. On the instructions of the chairman of this special committee the Commission prepared a report on reorganization work which, in its opinion, could profitably be undertaken. After hearing the evidence of a number of witnesses, most of whom were the deputy heads of departments, the committee found sufficient justification to recommend:—

"That an Order in Council be passed instructing the Civil Service Commission to proceed with the reorganization of those departments of the public service which have not been reorganized within recent years, and enjoining deputy heads to render the Commission the fullest co-operation and assistance. This order should further require the Commission to report to the Governor in Council and to Parliament all instances where their work is hampered or delayed by lack of co-operation upon the part of deputy ministers or their chief officials."

#### REDUCTION OF STAFF

As the work of readjusting and reorganizing (after the general classification had been completed) has now been substantially advanced, the Commission has found it possible to reduce its staff and thereby decrease expenditure. The cost of operating the Commission as indicated by the money voted by Parliament for that purpose was \$12,690 less in 1924-25 than in 1923-24 and the Commissioners believe that it will be possible to make a further reduction in this year's estimates; these decreases are equivalent to a reduction of over 10 per cent in the two-year period.

All of which is respectfully submitted.

W. J. ROCHE,  
*Chairman,*  
M. G. LAROCHELLE,  
CLARENCE JAMESON,  
*Commissioners.*

April 18, 1925.

## AN ACKNOWLEDGMENT

The Civil Service Commission desires to express its grateful appreciation to the individuals mentioned below who have willingly, and often at personal inconvenience, rendered valuable service by acting on examining boards in a number of the special competitions held under the direction of the Commission.

- W. C. Allen, Master-Bookbinder, Ottawa.  
 A. J. Ames, Managing Director, Instruments Limited, Ottawa.  
 R. M. Anderson, Division of Biology, Department of Mines, Ottawa.  
 F. W. Babington, Chief Analyst, Department of Customs and Excise, Ottawa.  
 J. W. Brant, Secretary, National Live Stock Records, Ottawa.  
 T. G. Bunting, Professor of Horticulture, Macdonald College, Ste. Anne de Bellevue, P.Q.  
 K. M. Cameron, Chief Engineer, Department of Public Works, Ottawa.  
 Dr. D. A. Clark, Assistant Deputy Minister of Health, Ottawa.  
 W. H. Collins, Director, Geological Survey, Department of Mines, Ottawa.  
 Karl Conger, Manager, Dominion Fruit Exchange, Ottawa.  
 S. A. Cudmore, Chief, Educational Statistics, and Editor, Canada Year Book, Dominion Bureau of Statistics, Ottawa.  
 W. C. Cunningham, Chief Map Engraver, Department of Public Printing and Stationery, Ottawa.  
 N. B. Davis, Mining Geologist, M. J. O'Brien Company, Ottawa.  
 R. J. Durely, Secretary, Canadian Engineering Standards Association, Ottawa.  
 R. B. Faith, Editor, Ottawa Valley Journal, Ottawa.

DOMINION OF CANADA

REPORT  
OF THE  
SECRETARY OF STATE  
FOR  
EXTERNAL AFFAIRS

FOR THE  
YEAR ENDING MARCH 31  
1924

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
F. A. ACLAND  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1925

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,  
G.C.M.G., M.V.O., Governor General and Commander in Chief of the  
Dominion of Canada.*

MY LORD,—

I have the honour to lay before Your Excellency the annual report of the Department of External Affairs for the year 1923-24.

I have the honour to be, my Lord,

Your Excellency's obedient servant,

W. L. MACKENZIE KING,  
*Secretary of State for External Affairs.*

OTTAWA, October 31, 1924.

## REPORT OF THE UNDER-SECRETARY OF STATE FOR EXTERNAL AFFAIRS

The Right Hon. W. L. MACKENZIE KING, C.M.G., M.P.,  
Secretary of State for External Affairs,  
Ottawa.

SIR,—I have the honour to submit the usual brief survey of the more important matters involving Canada's external relations which came before the department during the past year.

### EUROPEAN WAR

#### PEACE TREATIES

The *Treaty of Peace with Turkey*, signed at Lausanne, July 24, 1923, having been duly ratified by Turkey, and by Great Britain, Italy and Japan, and the ratifications deposited at Paris on August 6, 1924, public notification was made by His Majesty of the termination of the war as from that date.

The *Greek Minorities Treaty* and the *Treaty respecting Thrace*, signed by Sir George Perley as Canadian plenipotentiary at Sèvres on August 10, 1920, were also ratified and came into force on the same date.

The King's ratification of the protocol of an amendment to Article 393 of the *Treaty of Versailles* and the corresponding articles of the other peace treaties, was deposited with the Secretary-General of the League of Nations on October 20, 1923.

*Covenant of the League of Nations*.—The protocols embodying four amendments to the sixteenth article (adopted by the Second Assembly) were signed at Geneva on behalf of Canada by Mr. Lucien Pacaud, Secretary, High Commissioner's Office, London, on November 24, 1923. Amendments to Article 6 and to Articles 12, 13 and 15 of the Covenant, having been ratified by the members whose representatives compose the council and by a majority of the members whose representatives compose the assembly, came into force, the first as from August 13, 1924, the others as from September 26, 1924.

#### OTHER TREATIES WITH FOREIGN POWERS

*International Convention for the Suppression of Obscene Publications*.—This convention was adopted by an international conference for the suppression of the circulation of and traffic in obscene publications, convened under the auspices of the League of Nations at Geneva on August 31, 1923. Though not represented at the conference, Canada decided to adhere to the convention, and her adhesion was duly notified to the Secretary-General of the League, becoming effective from the receipt of such notification on May 31, 1924.

*Washington Conference Treaties*.—The ratifications of the powers (British Empire, United States of America, France, Italy and Japan) signatories of the *Treaty to Limit Naval Armament*, concluded February 6, 1922, were on August 17, 1923, deposited at Washington, and as a result of such ratification the *Treaty of Alliance between Great Britain and Japan* of July 13, 1911, was terminated. Ratifications were at the same time deposited by the same powers, excepting Italy, of the *Treaty relating to Insular Possessions in the Pacific Ocean*, concluded December 13, 1921, and of the *treaty supplementary thereto*, concluded February 6, 1922. In all these ratifications Canada concurred.

*Treaty regarding Spitzbergen.*—With Canada's concurrence this treaty, signed February 9, 1920, was ratified by the King, the Instrument of Ratification being deposited at Paris with the French Government on December 29, 1923. It does not, however, become effective until ratified by all the signatory powers, Japan, Norway and Sweden not having yet ratified it.

*Treaties with Greece.*—Notice was given by Greece on September 10, 1924, to terminate finally all her commercial agreements with the British Empire as from September 10, 1924. They had been provisionally operative since their first denunciation in March, 1919.

*International Copyright Convention, 1908.*—Canada's accession to the revised Copyright Convention, signed at Berlin on November 13, 1908, and to the Additional Protocol signed at Berne, March 20, 1914, to take effect as from January 1, 1924, was notified to the Swiss Government. This accession is subject to restrictions in respect of authors under the jurisdiction of the United States of America.

*Aerial Navigation Convention, 1919.*—The International Commission for Air Navigation at its Fourth Session in London, June 30, 1923, prepared a Protocol embodying amendments to Article 34 of this Convention, so that the British Empire should have but one vote on the International Commission, so that three of the five States, British Empire, United States of America, France, Italy and Japan, must approve of any modification made in the annexes to the Convention, and so that the allocation of expenses was altered. This Protocol was approved by Canada and signed on her behalf by the Honourable Peter Larkin. The King's ratification of the Protocol of October 27, 1922, amending Article 5 of the Convention, was deposited at Paris on December 19, 1923.

*Belgo-Canadian Commercial Convention.*—At Ottawa on July 3, 1924, a Commercial Convention between Canada and the Economic Union of Belgium and Luxemburg, was signed by the Honourable J. A. Robb, Acting Minister of Finance, and the Honourable H. S. Béland, Minister of Soldiers' Civil Re-establishment, as Canadian plenipotentiaries, and Mr. de Selys, Consul General of Belgium, representing His Majesty the King of the Belgians. The ratifications of this treaty were duly exchanged at Ottawa on October 22, 1924, by Mr. Robb and Mr. J. Van Rickstal, Belgian Consul at Montreal.

*Arbitration Agreement with Spain.*—Canada concurring, the Arbitration Agreement between His Majesty and Spain, signed February 27, 1904, was, by an exchange of notes, renewed for a further period of five years from February 26, 1924.

*Arbitration Convention with Italy.*—By an exchange of notes, dated August 14, 1923, this Convention was renewed for a further period of five years from February 1, 1924, Canada concurring to such renewal.

*Commercial Convention between Canada and Italy, 1923.*—Ratifications of this Convention were duly exchanged at London on January 8, 1924.

*Agreement with Finland regarding Tonnage Measurement.*—On June 21, 1924, with Canada's concurrence, an agreement was signed between His Majesty's Government and the Government of Finland, providing for the reciprocal recognition of tonnage measurement certificates of British and Finnish ships. The agreement as a whole, or separately, as to Canada, is subject to termination by a twelve months' notice given by either party.

*Treaty of Commerce and Navigation with Muscat.*—On February 11, 1923, an agreement was entered into with the Sultan of Muscat, prolonging for a year from that date the treaty of March 19, 1891, to which Canada has acceded. Provision is included in the agreement for Canada's withdrawal from the treaty on notice.

## SESSIONAL PAPER No. 25

*Liquor Treaty with the United States.*—A convention with the United States for the purpose of avoiding difficulties likely to arise in connection with the United States laws regarding alcoholic beverages, was signed at Washington on January 23, 1924, and after it had been approved by the Canadian Parliament, ratifications were duly exchanged, with the concurrence of the Canadian Government, at the same place on May 22, 1924.

*Halibut Fisheries Treaty with the United States.*—On May 31, 1924, the United States Senate approved this treaty as signed March 2, 1923, and the ratifications were duly exchanged at Washington by the Honourable Ernest Lapointe, Minister of Justice, and Mr. Secretary Hughes, on October 21, 1924.

*Treaty with the United States regarding Smuggling Offences.*—A treaty between Canada and the United States for the suppression of smuggling offences, and offences against the narcotic laws of the two countries, was negotiated and signed by the Honourable E. Lapointe, as Canadian plenipotentiary, and Mr. Charles E. Hughes, Secretary of State of the United States, as United States plenipotentiary, on June 6, 1924. It contains a provision limiting the carriage of alcoholic liquors in transit through Alaska to Yukon Territory. It awaits the approval of the United States Senate and the exchange of ratifications before becoming operative.

*Copyright Arrangement with the United States.*—Under the provisions of the respective laws of the two countries (Canadian Copyright Act, 1921, and Act of United States Congress, approved March 4, 1909) an arrangement was entered into with the United States, effective as from January 1, 1924, by which the benefits of the Act of either country were reciprocally extended to the citizens of the other.

## INTERNATIONAL CONFERENCES

*Assembly of the League of Nations.*—The Fourth General Assembly of the League of Nations was convened at Geneva on September 3, 1923, the session terminating on the 29th of that month. The delegates appointed to represent Canada were the Honourable Sir Lomer Gouin, Minister of Justice, the Honourable George P. Graham, Minister of Railways and Canals, and the Honourable Peter C. Larkin, High Commissioner for Canada in London—the last named, however, was unfortunately unable to attend the meetings.

The Canadian proposal for the amendment of Article 10 of the Covenant was further considered, and it was finally decided, while leaving the text of the article unchanged, to recommend the adoption of an interpretative resolution intended to achieve the purposes aimed at by Canada. The single vote Persia, however, cast against this resolution prevented its adoption.

It was decided to circulate to the members of the League for consideration, the draft treaty of mutual assistance, submitted by the Temporary Mixed Commission, and the Assembly further recommended that that commission be invited to prepare a new convention or conventions to replace the Treaty of St. Germain for the Control of Traffic in Arms, and to continue for another year the work which it had undertaken.

Abyssinia and the Irish Free State were admitted to membership in the League.

Monsieur Epitacio da Silva Pessoa, who had been nominated by Brazil, was elected to succeed Monsieur Ruy Barbosa as Judge of the Permanent Court of International Justice.

Conditions not proving favourable to the establishment of a definitive scale for allocation of expenses, the provisional scale of 1923 was continued with slight modifications.

*Conference on Communications and Transit.*—The Second General Conference on Communications and Transit was convened by the Council of the League of Nations in pursuance of the resolution adopted by the Third Assembly at Geneva on November 15, 1923, and continued its sittings until December 9. The Dominion was represented by Mr. Lucien Pacaud, Secretary, High Commissioner's Office, London. The conference adopted four draft conventions submitted to it as follows:—

1. Convention and Statute regarding the International Regime of Railways;
2. Convention and Statute regarding Maritime Ports;
3. Convention and Statute regarding Transmission in Transit of Electric Power;
4. Convention and Statute regarding the Development of Hydraulic Power affecting more than one State.

The question of the ratification of these conventions by Canada is still under consideration.

*International Labour Conference.*—The Fifth Session of this Conference was held at Geneva from the 22nd to the 29th October, 1923, Canada being represented by Mr. Philippe Roy, Canadian Commissioner General in Paris, and Miss Caroline E. Carmichael, of New Glasgow, Nova Scotia. A recommendation was adopted concerning the general principles for the organization of systems of inspection to secure the enforcement of laws and regulations for the protection of workers.

*International Conference on Customs Formalities.*—An International Conference on Customs Formalities, convened by the Council of the League of Nations, met at Geneva from October 15 to November 3, 1923, Mr. Philippe Roy acting as Canada's representative. An International Convention relative to the Simplification of Customs Formalities was adopted by the conference, though not signed by the Canadian representative. It has not been ratified by Canada.

*Inter-Allied Conference on German Reparations.*—The Reparation Commission constituted under the Treaty of Versailles, 1919 (German Peace) having appointed two Committees of Experts to report upon measures for balancing the budget and stabilizing the currency of Germany, and the means for bringing German exported capital back to Germany, communicated their reports when received and approved to the interested Governments on April 17, 1924. For the purpose of considering the questions arising from these reports, a Conference of Delegates of the Allied and German Governments was assembled at London on July 16, 1924, the Honourable N. A. Belcourt being appointed to represent Canada at the conference.

With the object of bringing into operation the plan proposed by the experts (known generally as the Dawes plan) four Agreements.—

1. Between the Allied Governments and the German Government concerning the agreement of August 9, 1924;
2. Between the Allied Governments and the German Government to carry out the experts' plan of April 9, 1924;
3. Between the Allied Governments to carry out the experts' plan of April 9, 1924; and
4. Between the Governments represented on the Reparation Commission to modify Annex II to Part VIII of the Treaty of Versailles;

were signed at London, August 30, 1924.

## SESSIONAL PAPER No. 25

The first three of these agreements were signed by the Canadian plenipotentiary.

*International Postal Conference.*—An International Postal Conference was held at Stockholm in June, 1924, Canada's representatives at such conference being Mr. P. T. Coolican, General Superintendent of the Postal Service, W. J. Glover, the Financial Superintendent, and Arthur Webster, Secretary of the Post Office Department.

*International Seed Testing Conference.*—The meetings of the Second International Seed Testing Conference were held in England from the 7th to the 12th of July, 1924, Mr. G. H. Clark, Dominion Seed Commissioner, attending as Canadian representative.

## THE PASSPORT OFFICE

The volume of business of this office has been steadily maintained, over 25,000 passports having been issued, and some 6,500 renewals granted. The passport fee was in February increased to \$5, and the revenue accruing from the business has reached a total of close on \$117,000, for the year.

It only remains for me to express my appreciation of the manner in which the members of the staff have discharged their duties.

I have the honour to be, sir,

Your obedient servant,

JOSEPH POPE,

*Under-Secretary of State for External Affairs.*

OTTAWA, October 31, 1924.

## APPENDIX A.

ALPHABETICAL LIST of Foreign Consuls, Vice-Consuls, Consular Agents and Commercial Agents in the Dominion, according to the latest informations supplied to the Department of External Affairs.

Name	Designation	Country	Residence	When Appointed
Adams, Ed. L.	Consul	United States	Sherbrooke	1919
Allison, M. A.	Consul	Portugal	St. John, N.B.	1903
Anderson, P. M.	Vice-Consul	Belgium	Regina	1924
Andrews, G. B.	Vice-Consul	United States	Montreal	1924
Angwin, J. G.	Vice-Consul	Sweden	Sydney, N.S.	1906
Antonisen, J.	Vice-Consul	Norway	Port Arthur	1922
Appleyard, G. S.	Vice-Consul	United States	Fernie, B.C.	1924
Armstrong, W. W.	Consul	Siam	Vancouver	1924
Atherton, E. N.	Vice-Consul	United States	Vancouver	1924
Aubert, L. C. M.	Consul General	Norway	Montreal, Que.	1917
Bailey, J. W.	Vice-Consul	United States	Halifax	1923
Barattieri, di San Pietro, Count G.	Consular Agent	Italy	Winnipeg, Man.	1910
Barnaby, A. C.	Consular Agent	United States	Bridgewater, N.S.	1920

REPORT  
OF THE  
DEPUTY MINISTER OF LABOUR  
FOR THE  
FISCAL YEAR ENDING MARCH 31, 1924

---

To the Hon. JAMES MURDOCK,  
Minister of Labour.

SIR,—I have the honour to submit a report on the work of the Department of Labour for the fiscal year ending March 31, 1924.

The efforts of the department followed much the same lines as in former years, with expansion in certain directions.

Canadian industry in general experienced somewhat better business conditions than in the previous fiscal period, and this was reflected in the employment situation, which on the whole showed a distinct improvement, the building trades being about the only class reporting less activity, while the average during the calendar year of unemployment amongst trade unionists was considerably lower than that for 1922. The general wage movement was slightly upwards and prices fluctuated but little. There was also an improvement in the strike situation. Although the number of disputes in 1923, namely, 91, exceeded by six those of 1922, there were no strikes of large numbers of employees for protracted periods, and time losses in working days resulting from strikes reached the lowest figure since 1918.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

The complete absence of strikes in the twenty-eight cases dealt with under the Industrial Disputes Investigation Act, 1907, was the outstanding feature of the record for the year, the strike which had threatened when each application for procedure under the statute was made having been averted. Eighteen Boards of Conciliation and Investigation functioned during the fiscal period; five of these had been established during the preceding year.

A case coming prominently to the public attention was that of the Toronto Electric Commissioners and their electrical workers, which resulted in the constitutionality of the Industrial Disputes Investigation Act being contested in the courts. In the past when on numerous occasions objection to the establishment of a conciliation board had been taken by a municipality, procedure under the statute was not pressed by the department, and the practice was to establish a board only on the joint consent of both parties concerned. The matter had never been, however, settled definitely by any court of law. In the case of the dispute between the Toronto Electric Commissioners and their electrical workers, however, it appeared essential to the minister that, in order to avert a serious strike, with attendant inconvenience and danger to the public, the department should proceed with the establishment of a board, and action was taken accordingly.

On the application of the Toronto Electric Commissioners an interim injunction was granted on August 29, 1923, by Mr. Justice Orde, of the High Court Division of the Supreme Court of Ontario, restraining the board from proceeding with its inquiry on the grounds that the Industrial Disputes Investigation Act did not, under Dominion jurisdiction, apply to municipal employees, and disputing the validity of the statute. The trial judge, Mr. Justice Mowat, found the Act to be within the powers of the Dominion Parliament, and, on December 15, 1923, refused the application for a permanent injunction. Owing to the difference of opinion between two judges of like authority, the case was referred to one of the appellate divisions of the Supreme Court of Ontario, by which, on April 22, 1924, the action was dismissed. The text of the various judgments mentioned above are printed in full in the chapter of this report relating to the Industrial Disputes Investigation Act.

Shortly after the close of the fiscal year the case was appealed by the Toronto Electric Commissioners direct to the Judicial Committee of the Privy Council in England, and will, it is expected, be heard by the Judicial Committee during the fall of 1924.

The amendments to the Industrial Disputes Investigation Act introduced at the 1923 session of Parliament with a view to clarifying sections 15, 57 and 58 of the statute, and which had been dropped owing to opposition in the Senate, were reintroduced by the Minister of Labour at the 1924 session. As during the previous session, the Bill passed the House of Commons without debate, but in the Senate an amendment to section 8 of the Act was added to the Bill involving a principle to which the House of Commons would not agree. The conflict of opinion between the two Chambers continued in spite of a conference of representatives of the Senate and House of Commons, and resulted in the Bill being again dropped.

#### COMBINES INVESTIGATION ACT, 1923

An important measure, "The Combines Investigation Act, 1923," was enacted during the parliamentary session and placed under the Minister of Labour for administrative purposes. The statute repealed "The Board of Commerce Act, 1919," and "The Combines and Fair Prices Act, 1919," and provided machinery for the investigation of such combines as have operated or are likely to operate to the detriment of or against the interest of the public, whether consumers, producers, or others, the expression "combine" being defined as including " (1) mergers, trusts and monopolies so called, and (2) the relation resulting from the purchase, lease, or other acquisition by any person or any control over or interest in the whole or part of the business of any other person, and (3) any actual or tacit contract, agreement, arrangement, or combination which has or is designed to have the effect of (i) limiting facilities for transporting, producing, manufacturing, supplying, storing or dealing; or (ii) preventing, limiting or lessening manufacture or production; or (iii) fixing a common price or a resale price, or a common rental, or a common cost of storage or transportation; or (iv) enhancing the price, rental or cost of article, rental, storage or transportation; or (v) preventing or lessening competition in, or substantially controlling within any particular area or district or generally, production, manufacture, purchase, barter, sale, storage, transportation, insurance or supply; or (vi) otherwise restraining or injuring trade or commerce."

If it is proven that a combine exists at the expense of the public, and that the disadvantage to the public is facilitated by the duties of custom imposed on the article, the Governor in Council is empowered to admit the article free of duty or reduce the duty and give the public the benefit of reasonable competition. Further provision is made for the revocation of patent rights if the owner or holder of any patent makes use of exclusive rights to unduly limit production or restrict or injure trade.

## SESSIONAL PAPER No. 26

Investigation may be made by the registrar of the Act or by any commissioner appointed for the purpose.

At the close of the fiscal year 1923-24 the Combines Investigation Act had been in operation for a little over seven months, and, although no formal applications were filed during this period, many inquiries and representations were received in the Department of Labour relative to the Act.

## OTHER BRANCHES OF WORK

An increasing interest in Dominion Government annuities was manifested throughout Canada as the result of the inauguration of a publicity campaign, purchase money received during the fiscal period aggregating \$1,458,975.92, a figure greatly in excess of that for any previous year. This amount covered 409 contracts for annuities (217 immediate and 192 deferred), totalling \$174,574.35.

Federal grants under the Technical Education Act paid to the various provinces during the fiscal year amounted to \$888,391.62. Particulars respecting the work being carried on in each province in connection with vocational education are given in the chapter of the present report discussing the operations of the Technical Education Act.

In so far as concerns the operations of the Employment Service Branch at the close of the fiscal year there were sixty-seven local employment offices in the various provinces. The number of applications for employment reported during the year was 597,783, and the number of placements totalled 468,815. A full statement of the operations for the year appears in the present report.

The fifth session of the League of Nations International Labour Conference was held in Geneva, Switzerland, on October 22, 1923, the delegates representing the Government of Canada being Mr. Philippe Roy, Commissioner General of Canada in Paris, France, and Miss Caroline E. Carmichael, of New Glasgow, N.S., President of the National Council of Women of Canada.

The Government delegates to the sixth session of the International Labour Conference, held in Geneva on June 16, 1924, shortly after the close of the fiscal year, were Mr. F. A. Acland, of Ottawa, King's Printer for Canada, and Mrs. Charles H. Thorburn, of Ottawa, Vice-President of the National Council of Women of Canada.

Four meetings of the Governing Body of the International Labour Office were held during the year. Mrs. James Carruthers (Violet Markham), of London, England, acted as substitute for the Minister of Labour at the meetings in April, June, and October, 1923, and Mr. Philippe Roy as substitute at the meeting in January, 1924.

A Federal-Provincial conference was called in Ottawa, September 24-26, 1923, by the Prime Minister of Canada, in conformity with the expressed wishes of the Provincial Governments, for the purpose of securing an exchange of views regarding the principles enunciated in the Treaties of Peace for the avoidance of labour unrest and also with the object of consultation relative to various proposals for legislative action which had been adopted by the International Labour Conference in the form of Draft Conventions and Recommendations and which have been deemed by the law officers of the Crown in Canada to deal with subjects within provincial legislative control. The Dominion Government was represented by the Hon. James Murdock, Minister of Labour, who acted as chairman, and the Hon. Ernest Lapointe, Minister of Marine and Fisheries. Representatives of the provinces of Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, and Alberta were in

15 GEORGE V, A. 1925

attendance. A statement concerning the proceedings of the conference and the text of the resolutions adopted on the respective items of the agenda will be found in the final chapter of this report.

Chapters are also included in the present report dealing with the conciliation work of the department, the administration of the Fair Wages Policy of the Government of Canada, the statistical work of the department, and the publication of the *Labour Gazette*.

Annual reports for the calendar year 1923 were issued on Labour Legislation in Canada, Labour Organization in Canada, and Organization in Industry, Commerce and the Professions in Canada. Various wages and other bulletins were also published during the year.

A change in the personnel of the departmental staff was made during the year when, on September 1, 1923, the undersigned succeeded to the position of Deputy Minister of Labour, and Mr. F. A. Acland, who had been Deputy Minister of Labour since October 1, 1908, was relieved of the duties of this office in order that he might be free to apply himself to the duties of King's Printer, an office which he had held since June 15, 1921.

I have the honour to be, sir,

Your obedient servant,

H. H. WARD,

*Deputy Minister of Labour and Registrar of Boards of  
Conciliation and Investigation.*

DEPARTMENT OF LABOUR,  
OTTAWA.

## I. INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### SEVENTEENTH ANNUAL REPORT OF PROCEEDINGS, BEING FOR THE FISCAL YEAR ENDING MARCH 31, 1924

#### INTRODUCTORY NOTE

During the fiscal year 1923-24 the Industrial Disputes Investigation Act, 1907, was less active than for several years, there having been only 22 applications for Boards of Conciliation and Investigation received, as compared with 39 during 1922-23, 49 during 1921-22, 63 during 1920-21, 72 during 1919-20, and 95 during 1918-19. Six cases were carried over from the preceding fiscal year, making a total of 28 cases dealt with; in 13 cases Boards of Conciliation and Investigation were established. In seven cases, after application had been made for a Board of Conciliation and Investigation to the department, direct negotiations were continued as a result of departmental mediation and an adjustment was effected without board procedure. Five disputes in the railway and shipping industries in St. John, N.B., were settled in this way subsequent to reference of the dispute under the Act and prior to the establishment of a board. Of the 28 cases dealt with during the fiscal year ended March 31, 1924, and as to each of which the applicants had declared a strike to be impending, the threatened strike was averted in all cases.

As stated above, during the fiscal year no strikes occurred in cases referred for conciliation and investigation under the Industrial Disputes Investigation Act. Strikes occurring in industries falling directly within the scope of the Act, but where neither of the parties concerned took advantage of the machinery provided by the statute, are of course not enumerated in the statement of proceedings under the Act, there being no proceedings to record. It is, however, thought desirable to make informal mention here of the more important occurrences of this nature. Information respecting all strikes during the year appears of course in the departmental strike records.

Sympathetic strikes of coal miners in the coal fields of Cape Breton and Pictou, N.S., and Drumheller, Alberta, occurred in July, 1923, in protest against the presence of the militia in the Sydney district during a serious strike of steel workers, a class of workmen not coming directly within the scope of the Industrial Disputes Investigation Act. The total time loss caused by these sympathetic strikes amounted to approximately 240,000 working days.

Coal miners in the employ of the British Empire Steel Corporation in Nova Scotia also ceased work on January 16, 1924, following the posting of a notice by the company of a reduction in wages of twenty per cent. The representatives of the miners proposed that application should be made under the Industrial Disputes Investigation Act for a Board of Conciliation and Investigation and that the 1923 rates of wages should be continued pending its report, but this was refused by the employer. The strike continued until February 11, when it was settled by direct negotiations. The time loss resulting from this strike amounted to 77,000 working days, 9,625 employees being involved.

The only other strike of considerable magnitude was that of longshoremen in Vancouver, involving 1,555 employees for 53 days, with a time loss of 82,415 working days. The dispute arose over a demand for increased wages and alterations in working conditions. A settlement was effected in this case through the mediation of the departmental officer resident in Vancouver, Mr. F. E. Harrison.

A dispute of much importance during the year was that of the Toronto Electric Commissioners and certain of their employees being linemen, groundmen and others concerned in the work of power transmission and distribution and being members of the Canadian Electrical Trades Union, Toronto Branch, in which a Board of Conciliation and Investigation was established on the application of the employees and which resulted in judicial proceedings. An interim injunction was, on the application of the Toronto Electric Commissioners, granted on August 29, 1923, by Mr. Justice Orde, of the High Court Division of the Supreme Court of Ontario, restraining the board from interfering with the business of the Toronto Electric Commission or from exercising any of the powers conferred on such a board by sections 30 to 38 of the Act. A permanent injunction against the board and for which application was subsequently made by the Toronto Electric Commissioners was, however, on December 15, refused by the trial judge, Mr. Justice Mowat. Mr. Justice Orde and Mr. Justice Mowat, judges of co-ordinate authority, having disagreed regarding a point of law, the case was referred to one of the appellate divisions of the Supreme Court of Ontario, by which, shortly after the close of the fiscal year, it was dismissed with costs, including costs of injunction proceedings. The counsel for the commissioners then appealed the decision of the First Appellate Division of the Supreme Court of Ontario direct to the Judicial Committee of the Privy Council, leave to appeal being granted on July 25, 1924. A statement of the situation, with texts of the various judgments mentioned above, appears in the present chapter.

Reference was made in last year's report to a Bill amending the Industrial Disputes Investigation Act which was passed in the House of Commons during the 1923 session of Parliament but was opposed in the Senate, and, the Senate amendments proving unacceptable to the House of Commons, the Bill was dropped. During the 1924 session amendments identical with those before Parliament at the preceding session were again introduced by the Minister of Labour. No new features were proposed by the amendments, which were intended simply to make clearer what had been regarded, since the passing of the Act, as the obvious intent of sections 15, 57 and 58. As in the previous year, the amendments passed the House of Commons, but in the Senate a further amendment to the Act was added to the Bill involving a principle to which the House of Commons would not agree. The disagreement between the two Houses continued in spite of a conference of representatives of the Senate and House of Commons, and resulted in the Bill being once more dropped. A brief statement on the subject is included in the present chapter.

#### SUMMARY TABLES RESPECTING PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

The tables here presented are arranged in several divisions, viz.; (i) showing proceedings by industries concerned from April 1, 1923, to March 31, 1924; (ii) showing proceedings by industries concerned from March 22, 1907, to March 31, 1924; (iii) showing by fiscal years, 1907-1924, number of disputes dealt with; (iv) showing by calendar years 1907-1924, number of disputes dealt with, and (v) containing statistical summary of operations under the statute for the fiscal year ended March 31, 1924.

## SESSIONAL PAPER No. 26

I. TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1923,  
TO MARCH 31, 1924

Industries affected	Number of applications for Boards received*	Number of Boards established	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication and other public utilities—			
(1) Mines—			
Metal.....	1	1	0
(2) Transportation and communication—			
(a) Railways.....	12	3	0
(b) Street railways.....	4	4	0
(c) Shipping.....	5	2	0
(d) Telegraphs.....	1	1	0
(3) Miscellaneous—			
†Light and power.....	3	2	0
II. †Disputes not falling clearly within the direct scope of the Act	2	0	0
Total.....	28*	13	0

\*Including six cases left over from preceding year, as stated below.

†During the period April 1, 1918, to March 31, 1923, jurisdiction under the statute in connection with disputes relating to industries under provincial or municipal control not being claimed by the department, no proceedings under the statute took place save by joint consent under Section 63 and any such proceedings were shown in Section II of the tables. During the present fiscal period, however, it has been held that jurisdiction in such matters rests with the federal authorities and proceedings in the case of disputes in industries to which the Act applies but which are owned or controlled by a municipal or provincial government have taken place without reference to Section 63; these proceedings are, therefore, now shown under their respective classifications in Section I and in the above table include three disputes, two involving street railways and one an electric light, heat and power plant.

The proceedings under the Act during the year include six cases in which certain proceedings had taken place during the preceding year, namely, disputes between (1) Canadian National Railways, Western Lines, and certain of its employees being members of the International Brotherhood of Steam Shovel and Dredge Men, District No. 6; (2) Canadian Pacific Railway Company, Western Lines, and certain of its employees being members of the International Brotherhood of Steam Shovel and Dredge Men, District No. 6; (3) Canadian National Railways, Western Lines, and its dining and sleeping car employees, members of the Canadian Brotherhood of Railroad Employees; (4) Brantford Municipal Railway Commission and certain of its employees being street railway workers, members of Local Division No. 685, Amalgamated Association of Street and Electric Railway Employees of America; (5) Corporation of the City of Prince Rupert and certain of its employees being members of Civic Employees' Union No. 20, Trades and Labour Congress of Canada, and (6) Winnipeg Electric Railway Company and certain of its employees being members of the Gas Workers' Union of Winnipeg (Independent).

On March 31, 1924, results were still pending in connection with three applications concerning disputes between (1) Toronto Electric Commissioners and certain of their employees being linemen, groundmen and others concerned in the work of power transmission and distribution and being members of the Canadian Electrical Trades Union, Toronto Branch; (2) Cities of Port Arthur and Fort William and their employees in street railway service, members of Division 966, Amalgamated Association of Street and Electric Railway Employees of America, and (3) various shipping companies trading to the Port of Montreal, Que., and certain of their employees being members of the Syndicated Longshoremen of the Port of Montreal.

15 GEORGE V, A. 1925

# II. TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM MARCH 22, 1907, TO MARCH 31, 1924

Industries affected	Number of applications for Boards received	Number of strikes not averted or ended
I. Disputes affecting mines, transportation and communication, other public utilities and war work—		
(1) Mines—		
(a) Coal.....	68	10
(b) Metal.....	20	5
(c) Asbestos.....	1	0
(2) Transportation and communication—		
(a) Railways.....	188	7
(b) Street railways.....	102	7
(c) Express.....	11	1
(d) Shipping.....	32	0
(e) Telegraphs.....	17	1
(f) Telephones.....	7	0
(3) Miscellaneous—		
(a) Light and power.....	22	3
(b) Elevators.....	1	0
(4) War work.....	30	1
II. *Disputes not falling clearly within the direct scope of the Act.....	120	2
Total.....	619	37

\*During the period April 1, 1918, to March 31, 1923, jurisdiction under the statute in connection with disputes relating to industries under provincial or municipal control not being claimed by the department, no proceedings under the statute took place save by joint consent under Section 63 and any such proceedings were shown in Section II of the tables. During the present fiscal period, however, it has been held that jurisdiction in such matters rests with the federal authorities and proceedings in the case of disputes in industries to which the Act applies but which are owned or controlled by a municipal or provincial government have taken place without reference to Section 63; these proceedings are, therefore, now shown under their respective classifications in Section I of the tables.

The figures contained in the above table may be thought to show discrepancies as compared with those appearing in the yearly summary. A closer examination will, however, show the respective statements to be in agreement. A complete statement of proceedings for a year must show all disputes dealt with during the fiscal year. The figures of the yearly statement include, therefore, disputes carried over from the previous year and which are counted in the summary of that year's proceedings. Thus the same dispute may properly figure in the annual statement for each of two years. In the statistical recapitulation covering several years, as above, it is necessary that no dispute shall be counted more than once, and account is taken of the number of applications received during the year and thus brought within the purview of the statute.

## III. TABLE SHOWING BY FISCAL YEARS, 1907-1924, NUMBER OF DISPUTES DEALT WITH

—	1907-1908	1908-1909	1909-1910	1910-1911	1911-1912	1912-1913	1913-1914	1914-1915	1915-1916	1916-1917	1917-1918	1918-1919	1919-1920	1920-1921	1921-1922	1922-1923	1923-1924	Total
Number of applications.....	34	21	27	24	18	21	16	16	14	36	52	95	72	63	49	39	22	619
Number of Boards granted.	31	19	25	19	15	17	15	17	11	20	38	60	46	37	31	27	13	441
Number of disputes where strike not averted (or ended).	1	1	4	4	4	4	0	1	1	1	1	2	3	6	1	3	0	37

(The remark following Table II applies equally to apparent discrepancies as between the above summary by fiscal years and yearly summaries of proceedings.)

## SESSIONAL PAPER No. 26

## IV. TABLE SHOWING BY CALENDAR YEARS, 1907-1924, NUMBER OF DISPUTES DEALT WITH

	1907* 9 mos.	1908	1909	1910	1911	1912	1913	1914	1915	1916	1917	1918	1919	1920	1921	1922	1923	1924† 3 mos.	Total
Number of applications.	25	27	22	28	21	16	18	18	15	29	53	93	70	61	51	42	22	5	619
Number of boards granted	22	25	21	23	16	16	15	18	12	16	37	59	47	41	26	29	17	1	441
Number of disputes where strike not averted (or ended).....	1	1	4	4	4	3	1	1	1	1	1	2	3	5	2	2	1	0	37

\* The Act became law on March 22, 1907, so that the proceedings cover nine months only.

† To the end of the financial year, March 31.

(The remark following Table II applies equally to apparent discrepancies as between the above summary by calendar years and yearly summaries of proceedings.)

Duff and Campbell submitted minority reports with respect to certain items. Both parties to the dispute later indicated their acceptance of the board's findings, the employees, however, protesting against the settlement. The claims having been considered by the board as outside its jurisdiction.
April 30, 1923	Canadian National Rail- way, Western Lines, and all classes of em- ployees in ships and round houses.	C.N.R. Lines.	Western 3,300.	Method of settlement of grievances, involving inter-union dispute.			Inquiry into this case did not dis- close a dispute within the meaning of the I. D. I. Act and a board could not be, therefore, estab- lished. No strike occurred.	
July 5, 1923	Algoma Steel Corpora- tion, limited, and cer- tain of its employ- ees, being engineers, fire- men, conductors and brakemen, members of the Brotherhood of Locomotive Firemen and Engineers and Brotherhood of Rail- road Trainmen.	Sault Ste Marie, Ont.	125 dir. 2,525 indir.	For standard rates of pay in engine and train service, payment of back time, and time and a half for over- time.	J. G. O'Donoghue, K.C., (c) 3; F. H. McGuigan, (c) 2; Hon Senator G. D. Robertson (s) 1.	July 31, 1923 Sept. 7, 1923	The company claimed that the provisions of the I. D. I. Act did not apply in this case. The minister, however, took the view that the employing company came within the classes enumerated in section 2 (c), since it was operating a railway and the employees concerned were engaged in engine and train service. A board was accordingly estab- lished, and its findings, which were accompanied by a minority report from Mr. McGuigan, were accepted by the employees, but rejected by the company. No strike occurred.	
July 13, 1923	Canadian Pacific Rail- way Company and cer- tain of its employ- ees, being checkers, truck- ers, carpenters, etc., em- ployed on the Mon- treal Wharf and mem- bers of the Brother- hood of Railway and Steamship Clerks, Ex- press and Station Em- ployees.	Montreal, Que.	300.	For increased wages and other changes.			After the application had been re- ceived a representative of the department intervened, and, through his mediation, nego- tiations between the disput- ants were renewed. An agree- ment was reached without board reference and the application was with- drawn by the employees.	
Aug. 10, 1923	Great Northern Rail- way Company and cer- tain of its employ- ees, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Ex- press and Station Em- ployees.	Vancouver, B.C.	1 dir. 30 indir.	Alleged unfair dismissal of employee.			This dispute was not deemed to be within the scope of the I. D. I. Act for adjustment and no board was established. An understanding was, however, believed to have been reached as a result of the minister's efforts. No strike occurred.	

## STATEMENT of Applications for Boards of Conciliation and Investigation and Proceedings thereunder, etc.—Continued.

(2) TRANSPORTATION AND COMMUNICATION—Continued  
(a) RAILWAYS—Continued

Date of receipt of application	Parties to dispute	Party making application	Locality	No. of persons affected	Nature of dispute	Names of Members of Board: (a) Chairman; (b) Employer; (c) Men	Date on which Board was constituted	Date of receipt of report	Result of reference
Aug. 16, 1923	(1) Various railways, including the Canadian National Railway and Canadian Pacific Railway, and (2) workmen, being maintenance-of-way employees and railway shop labourers, including bridge and building employees, trackmen, pumpmen, pump repairmen, signalmen, track watchmen, shop labourers, and others, represented by the United Brotherhood of Carpenters and Joiners of America, the Western Employees and Railway Shop Labourers and employed by said railways.	Employees....	Lines of the several railways in Canada.	30,000.....	For increased wages and a change in working conditions.	E. McG. Quirk, (c) 4; R. T. Riley, (b) 1; David Campbell, (a) 1.	Sept. 25, 1923	Oct. 19, 1923	The report was unanimous and contained recommendations as to settlement of the dispute. The award was accepted by the employees, but, however, on receiving the findings, the employees rejected the findings, withdrew their acceptance and a strike vote was taken. Although a majority of the employees voted in favour of a suspension of work, a further conference was arranged between the disputing parties, which resulted in a satisfactory working arrangement.
Aug. 31, 1923	Canadian Pacific Railway Company and certain of its employees, being Canadian agents, assistant agents, telegraph operators, train despatchers, traffic supervisors and linemen, members of the Order of Railroad Telegraphers.	Employees....	C.P.R. System....	3,095.....	For increased wages and a change in working conditions.	Lt. Col. O. M. Biggar, (c) 4; J. B. Coyne, R. C., (b) 1; David Campbell, (a) 1.	Sept. 27, 1923	Oct. 27, 30, 1923	The report was signed by the chairman and Mr. Coyne and contained recommendations with respect to the matters in dispute. Mr. Campbell submitted a minority report. The board's findings were not acceptable to the employees, but, through renewed negotiations, an amicable agreement was reached.
Jun. 1924	Canadian Pacific Railway Company and certain of its employees, being truckers, coopers, etc., employed on the West St. John Wharf, mem.	Employees....	St. John, N.B.....	400.....	For increased wages and a change in working conditions.	.....	.....	.....	A representative of the department visited the locality, and, through his efforts, an amicable settlement between the disputants was effected and a settlement reached without board procedure. The application was withdrawn by the employees.

## SESSIONAL PAPER No. 26

Jan 1924	7.	Members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.	Employees.	St. John, N.B.	70	For increased wages and changed working conditions.				A representative of the department visited the locality, and through direct negotiations between the two sides a settlement was reached without board procedure. The application was withdrawn by the employees.
Jun 1924	21.	Canadian Pacific Railway Company and its employees, including engine drivers, etc. employed on the West St. John Wharf, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.	Employees.	St. John, N.B.	77 dir. over 2,000 indir.	For increased wages and changed working conditions.				At minister's suggestion further direct negotiations took place, which resulted in a settlement being reached without board procedure.

## STATEMENT of Applications for Boards of Conciliation and Investigation and Proceedings thereunder, etc.—Continued.

(3) MISCELLANEOUS  
LIGHT AND POWER

Date of receipt of application	Parties to dispute	Party making application	Locality	No. of persons affected	Nature of dispute	Names of Members of Board: (c) Chairman; (e) Employer; (m) Men;	Date on which Board was constituted	Date of receipt of report of Board	Result of reference
Mar. 15, 1923	Winnipeg Electric Railway Company and certain of its employees, the Gas Workers' Union of Winnipeg (Independent).	Employees.	Winnipeg, Man.	2 dir. 48 indir.	Alleged unjust dismissals.	Rev. Dr. C. W. Gordon, (c); W. J. Ford, (e); J. H. Ward, (m) 1.	April 12, 1923	June 11, 1923	The report was unanimous and included a statement signed by both parties to the dispute definitely disposing of the points at issue.
June 25, 1923	Toronto Electric Commissioners and certain of their employees including the men and others concerned in the work of power transmission and distribution and being members of the Canadian Electrical Trades Union, Toronto Branch.	Employees.	Toronto and vicinity	412 dir. 325 indir.	For increased wages and changed working conditions.	Colin G. Snider, K. C., (c); F. H. McLaughlin, (e); J. G. C. McLaughlin, K. C., (m) 1.	Aug. 1, 1923	.....	The board met in Toronto in August, 1923, and its report was made by the Toronto Electric Commissioners to the Supreme Court of Ontario for an injunction to restrain the board from proceeding with its inquiry on the grounds that the provisions of the F. D. I. Act did not, under federal jurisdiction, extend to standard employees, and that the standards of the Conciliation Proceedings were stayed by an interim injunction granted on August 29 by Mr. Justice Orde, of the High Court Division, which restrained the board from interfering with the business of the Toronto Electric Commissioners and the conduct of the compulsory powers conferred on such a board by Sections 30 to 38 of the Act, the board being limited in its powers to an investigation of a voluntary nature. A subsequent application for a permanent injunction against the board by the Toronto Electric Commissioners was refused by Mr. Justice Orde on December 15, refused by the trial judge, Mr. Justice Mowat, Mr. Justice Orde and Mr. Justice Mowat, judges of co-ordinate authority, having disagreed regarding a point of law, the case was referred to one of the appellate divisions of the Supreme Court of Ontario, by which, shortly after

## SESSIONAL PAPER No. 26

the close of the fiscal year, it was dismissed, leave to appeal being then granted the Toronto Electric Commissioners, by the Judicial Committee of the Privy Council.

The report was unanimous and contained recommendations as to settlement of the dispute, which both parties later expressed their willingness to accept.

## II.—DISPUTES NOT FALLING CLEARLY WITHIN THE SCOPE OF THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

July 13, 1923	Montreal Light, Heat and Power Consolidated and certain of its employees being members of various unions and employed in the production and distribution of electricity and gas.	Employees.	Montreal, Que.	1,000 dir. 1,800 indir.	For increased wages and reclassification of certain classes of workmen.	P. W. Stewart, (c) 1; Bernard Ross, (c) 1; John T. Foster, (M) 1.	July 25, 1923	Aug. 11, 1923	The report was unanimous and contained recommendations as to settlement of the dispute, which both parties later expressed their willingness to accept.
Mar. 13, 1923	Corporation of the City of Prince Rupert and certain of its employees being members of Civic Employees' Union, No. 26, Trades and Labour Congress of Canada.	Employees.	Prince Rupert, B.C.	60 dir. 16 indir.	Against reduction in wages and longer hours.	Honour Judge F. McEl, Young, (c) 3; W. E. Fisher, (c) 1; T. Ross McKay, (M) 1.	Mar. 26, 1923	April 24, 1923	The report was unanimous and contained recommendations as to settlement of the dispute, which were, however, rejected by the city authorities. No strike occurred.
May 2, 1923	Corporation of the City of Calgary and certain of its employees being policemen, members of Calgary City Police and a Protective Federation of Trades and Labour Congress of Canada.	Employees.	Calgary, Alta.	64 dir. 8 indir.	Against decrease in wages, changed working conditions, etc.	.....	.....	.....	Shortly after the application was received the dispute was adjusted by direct negotiations.

## VALIDITY OF INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

As already mentioned in the opening paragraphs of this chapter, litigation arose during the year as the result of the refusal of the Toronto Electric Commissioners to recognize the authority of a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act to deal with a dispute between the commissioners in question and certain of their employees being linemen, groundmen and others concerned in the work of power transmission and distribution and being members of the Canadian Electrical Trades Union, Toronto Branch.

The application for the establishment of a Conciliation Board was made by the employees, the dispute being over a demand for increased wages and changed working conditions. A board was fully constituted, the member representing the employer being named, however, by the minister in the absence of a nomination from the Toronto Electric Commissioners, who had protested against the establishment of a board.

The board met in Toronto during the month of August, 1923. Application was made to the Supreme Court of Ontario by the Toronto Electric Commissioners for an injunction order to restrain the board from proceeding with its inquiry on the grounds that it was not within the jurisdiction of the Dominion Parliament to apply the Industrial Disputes Investigation Act to municipal employees. The application of the Toronto Electric Commissioners to the Court also disputed the validity of the statute.

The application of the Toronto Electric Commissioners was heard by Mr. Justice Orde, of the High Court Division of the Supreme Court of Ontario, and an interim injunction was granted on August 29, 1923, the judgment being to the effect that the board was restrained from interfering with the business of the commission, having no power to enter upon the premises of the plaintiffs or examine their works or exercise any of the powers conferred on such a board by section 38 of the Industrial Disputes Investigation Act. The board, moreover, had no authority to enforce the attendance of witnesses or the production of books, papers, etc., being limited in its powers to an investigation of a voluntary nature. The reasons for the judgment are given below.

## TEXT OF JUDGMENT OF MR. JUSTICE ORDE

Orde, J.:—By virtue of sections 16 and 17 of 1, Geo. V., chapter 119, and sections 34 (2) and 36 (1) of the Public Utilities Act, R.S.O., 1914, chapter 204, the plaintiffs are a body corporate charged with the duty of managing and operating the municipal electric light, heat and power works of the city of Toronto. That duty calls for the employment of a large number of men.

In June last representatives of certain of the plaintiffs' employees applied to the Federal Minister of Labour under the provisions of the Dominion Industrial Disputes Investigation Act, 1907, 6-7, Edward VII, chapter 20, for the appointment of a Board of Conciliation and Investigation. After some correspondence between the interested parties and the minister, the minister established a board, and, the plaintiffs declining to recommend any person for appointment as their nominee upon the board, the minister appointed one for them under paragraph 2 of section 8 of the Act. The present defendants constitute the board so appointed.

The plaintiffs at once took exception to the authority of the board and to the power of the Minister of Labour under the Act to appoint a Board of Conciliation and Investigation to enquire into matters concerning the operation by the plaintiffs of a public utility belonging to, or managed as a department of a municipality, or to interfere with the civil or municipal rights of the plaintiffs. The board refused to give effect to the plaintiffs' protest and issued an appointment to proceed with the enquiry. The plaintiff thereupon launched this action, and moved upon notice for an interim injunction, and after notice had been given by my direction to the Attorney-General of Ontario and the Attorney-General of Canada, pursuant to section 33 of the Ontario Judicature Act, the motion was very fully argued on the 27th instant.

## SESSIONAL PAPER No. 26

The writ by its endorsement claimed a declaration that the defendants are acting without lawful authority as a board under the Industrial Disputes Investigation Act and its amendments in respect of an alleged dispute between the plaintiffs and certain of their employees, and an injunction.

The points in issue are such that, notwithstanding their importance, it is impossible to postpone a decision upon them until the trial of the action. Mr. Duncan declined to consent to the motion being turned into a motion for judgment, but the intention of the board to proceed immediately with the enquiry necessitated a decision upon what is substantially the whole question involved, though given upon an interlocutory motion.

The question to be determined is whether or not the Industrial Disputes Investigation Act, 1907, with its amendments, was within the powers of the Parliament of Canada, having regard to the provisions of sections 91 and 92 of the British North America Act which divide the power to legislate between the Parliament of Canada and the legislatures of the respective provinces.

Counsel for the defendants does not contend that the subject-matter of the Act falls within any of the twenty-nine enumerated classes expressly assigned to the Dominion Parliament by section 91, but he says that it does not come within any of the sixteen classes exclusively assigned to the provinces by section 92 and that therefore it falls to the jurisdiction of the Dominion Parliament, under the residuary power given by the opening words of section 91, as a law made for the peace, order and good government of Canada, and he contends that, when so legislating, the Parliament of Canada may, as ancillary to the main subject-matters of the Act, enact laws which interfere with or override civil and municipal rights within the provinces.

The features of the Act to which objection is taken by the plaintiffs are to be found in those sections which interfere with civil rights and not in the innocuous sections which provide some means for settling industrial disputes. It is those provisions for conciliation and those alone that counsel for the defendant relies upon as falling within the residuary powers under section 91 and as justifying the ancillary coercive sections.

It may not be amiss to observe parenthetically that it is open to argument that legislation for the appointment of a board whose sole duty is to endeavour to adjust a dispute, but who are clothed with no coercive powers, and whose judgment or award has no binding effect, is not a "law" at all in the sense in which that word is used in sections 91 and 92 of the British North America Act. The same end might be attained by a mere resolution of the House of Commons or the Senate. Such a resolution could not affect civil rights, and I can see little practical difference between an Act of Parliament or of a provincial legislature merely appointing a body for that purpose, and a resolution passed by any deliberative body of men. A municipal council might do it, or any religious or fraternal body might do it, with as much force of law as the Act in question when stripped of all those provisions which interfere with civil rights or municipal powers. But it is not upon any such construction that my judgment is based. It may be that any act which the Canadian Parliament or a provincial legislature sees fit to pass is a "law" within the meaning of sections 91 and 92 of the British North America Act.

The Act in question is entitled "An Act to aid in the Prevention and Settlement of Strikes and Lockouts in Mines and Industries connected with Public Utilities."

The definition of "employers" by paragraph (c) of section 2 in effect limits the operation of the Act to those employing ten or more persons and who own or operate "any mining property, agency of transportation or communication, or public service utility, including, except as hereinafter prescribed, railways whether operated by steam, electricity or other motive power, steamships, telegraph and telephone lines, gas, electric light, water and power works."

The range of enquiry and investigation is to be found in the definition of "dispute" and "industrial dispute" in paragraph (e) of section 2—

"(e) 'Dispute' or 'industrial dispute' means any dispute or difference between an employer and one or more of his employees as to matters or things affecting or relating to work done or to be done by him or them, or as to the privileges, rights and duties of employers or employees (not involving any such violation thereof as constitutes an indictable offence); and, without limiting the general nature of the above definition, includes all matters relating to—(1) the wages allowance or other remuneration of employees, or the price paid or to be paid in respect of employment; (2) the hours of employment, sex, age, qualification or status of employees, and the mode, terms and conditions of employment; (3) the employment of children or any person or persons or class of persons, or the dismissal of or refusal to employ any particular person or persons or class of persons; (4) claims on the part of an employer or any employee as to whether and, if so, under what circumstances, preference of employment should or should not be given to one class over another of persons being or not being members of labour or other organizations, British subjects or aliens; (5) materials supplied and alleged to be bad, unfit or unsuitable, or damage alleged to have been done to work; (6) any established custom or usage, either generally or in the particular district affected; (7) the interpretation of an agreement or a clause thereof."

It is not easy to review all the provisions of the Act in detail. Its scheme is very simple. By section 5, whenever any dispute (as defined by section 2) exists between an employer (as so defined) and any of his employees which the parties cannot adjust, application may be made by either party to the minister for a Board of Conciliation and Investigation. Then follow provisions for the appointment of the board and for the procedure before it. The board's duties are to enquire into the matters in dispute and to "endeavour to bring about a settlement" and failing a settlement to report (sections 23 and 25). The board is not, however, a body of arbitrators, and its report and the findings and recommendations therein have no binding effect whatever, and cannot be enforced, unless the parties have expressly agreed to that effect (sections 62 and 64).

But it is certain coercive features of the Act to which exception is especially taken by the plaintiffs. The board is empowered to summon witnesses, including the parties to the dispute, to compel the production of books, papers and other documents, and to enter buildings and other premises for purposes of inspection, and to interrogate persons therein, and these powers are sanctioned by penalties for failure to attend or to give evidence or to permit inspection (sections 30, 32, 33, 36, 37 and 38).

Sections 56 to 59 contain extremely drastic provisions designed to preserve the *status quo* from the moment the minister grants the application for a board until it has made its report. Notwithstanding that the several contracts of employment may have come to an end, or be subject to cancellation for cause, neither the employers on the one hand nor the employees on the other can exercise their ordinary civil rights of bringing the engagement to an end, or of refusing to renew upon the same terms, if either party sees fit to apply for a Board of Conciliation, without subjecting themselves to serious penalties. Having in view the definition of "dispute" in section 2 (e), which includes, for example, "the interpretation of an agreement or a clause thereof," questions as to materials used, hours of employment, sex and age of employees and other matters going far beyond the mere question of wages, the far-reaching effect of the prohibitions contained in sections 56 to 59 will be appreciated. Once the reference to the board is made neither the employer nor the employee can put an end to the existing situation. The employee must still be retained in his employment and the employer must still pay the same wages, and the employee may not discontinue his employment, the result being that the civil rights of both parties to the dispute are seriously interfered with. Their hands are tied. They continue to be bound by a bargain which they never made until the board has made its report. It can hardly be suggested for a moment that these provisions are not a direct interference with the civil rights of the parties. That is particularly the case if the dispute is over "the interpretation of an agreement." An employer or employee who seeks the interpretation of an existing agreement may find that, instead of being able to go to the courts for a decision, he must await the report of the board, though that report cannot affect his legal rights in any way whatever. But in the meantime neither party can put an end to the contract on the ground of its alleged breach, or exercise any other civil right given him by the law of the province if it comes within the dispute submitted to the board.

Mr. Duncan justified all these provisions which interfere with the civil rights of the parties as being merely ancillary to the main purpose and object of the Act, namely, the settlement of industrial disputes and the prevention of strikes and lockouts, which, as he argues, comes within the authority reserved to the Parliament of Canada by section 91: "To make laws for the peace, order and good government of Canada in relation to all matters not coming within the classes of subjects by this Act assigned exclusively to the legislatures of the provinces". Assuming that the main purpose or object of the Act falls within the residuary power of Parliament under section 91, the judgment of the Judicial Committee in *City of Montreal v. Montreal Street Railway Co.*, (1912) A. C. 333, has made it clear that the provision at the end of section 91, which limits the provincial powers even in matters exclusively assigned to the provinces, applies only to the 29 enumerated classes of subjects assigned by section 91 to the Parliament of Canada and "that to those matters which are not specified amongst the enumerated subjects of legislation in section 91 the exception at its end has no application, and that in legislating with respect to matters not so enumerated the Dominion Parliament has no authority to encroach upon any class of subjects which is exclusively assigned to the provincial legislatures by section 92" (p. 343). Mr. Justice Duff, who was one of the three judges whose judgment was ultimately confirmed by the Privy Council in the Board of Commerce case (1920), 60 S.C.R., 456, at p. 508, makes this statement: "There is no case of which I am aware in which a Dominion statute, not referable to one of the classes of legislation included in the enumerated heads of section 91 and being of such a character that, from a provincial point of view, it should be considered legislation dealing with 'property and civil rights', has been held competent to the Dominion under the introductory clause".

The Act in question here, in my judgment, purports to interfere in the most direct and positive manner with the civil rights of employers and employees, and also with the municipal institutions of this province, both subject-matters of legislation exclusively assigned

## SESSIONAL PAPER No. 26

to the provinces by numbers 8 and 13 of the subjects enumerated in section 92. That the operation of an electric lighting, heating and power system for municipal purposes is within the competence of a provincial legislature was held by a Divisional Court in *Smith v. City of London* (1909), 20, O.L.R., 133, and the system is none the less a municipal one merely because it is operated by a commission having a separate corporate existence, but nevertheless a distinct department of the municipal government of the city of Toronto constituted by special legislation, for that purpose, of the provincial legislature. Municipal institutions and the provincial power to legislate in respect thereof are of course subject to encroachment by the exercise of the federal powers over the 29 subjects enumerated in section 91, but under the decision in the *Montreal case*, *supra*, no such encroachment can be justified when the Dominion Parliament is legislating under the residuary power.

If it is suggested that, by the provisions which impose penalties, and which subject both employer and employee to criminal prosecution for failure to observe the prohibitions imposed by the Act, it may be justified under the federal power to pass criminal laws, then I think the judgment of the Privy Council in the *Board of Commerce case*, where a similar contention was made, is applicable. Lord Haldane points out there that the Dominion Parliament cannot pass legislation interfering with provincial rights and attempt to justify it by ancillary provisions creating crimes: *In re the Board of Commerce Act, 1919*, and the *Combines and Fair Prices Act, 1919*, (1922) 1 A.C. 191, at pp. 198 and 199.

The recent judgment of the Judicial Committee delivered on the 25th July last in the case of *Fort Frances Pulp and Paper Company v. Manitoba Free Press Co.* might lend colour to the suggestion that there may be cases, notwithstanding what was laid down in the *Montreal Street Railway case*, where in a "national emergency" the Parliament of Canada may have power to pass legislation under the residuary clause infringing upon provincial rights. If that is what is meant, the decision in the *Montreal Street Railway case* must be read with some qualification. Mr. Duncan urged that the prevention of strikes and lockouts was a matter of such national importance as to bring the *Industrial Disputes Investigation Act* within the principle enunciated by Lord Haldane in the *Fort Frances case* (assuming that it has enunciated a principle which departs from that laid down in the *Montreal Street Railway case*), but, whatever the power of Parliament may be to legislate expressly in the event of an existing or threatened nation-wide strike of such proportions as to constitute a national danger, I am unable to see how an Act of general application which may be invoked by 10 employees can be treated as having been passed to meet a "national emergency" in the sense in which the *Fort Frances* judgment uses that term. That judgment will require careful thought before giving it any application at variance with earlier decisions of the Judicial Committee, and it may be that the Judicial Committee justified the *War Measures Act, 1914*, as competent to the Dominion "under other powers which may well be implied in the constitution". As the judgment says: "It is clear that in normal circumstances the Dominion Parliament could not have so legislated as to set up the machinery of control over the paper manufacturers" which was there in question. Here there is nothing abnormal or necessarily of national importance in an industrial dispute or in a threatened strike or lockout, and the desire of the Dominion Parliament to prevent strikes and lockouts, however laudable it may be, and however effective the machinery devised for the purpose might be if Parliament were not hampered by a divided field of legislative power, cannot empower Parliament to invade either directly, or indirectly, under the guise of ancillary legislation, right, either given by the civil laws of the province or existing under the exclusive provincial authority, to legislate as to municipal institutions. I have not overlooked the decision in the *Province of Quebec, Montreal Street Railway Co. v. Board of Conciliation and Investigation* (1913), Q.R. 44, S.C. 350. The authority of that decision has been so affected by later decisions of the Privy Council that I do not see that it is binding upon me or that it is now a correct exposition of the law.

Counsel for the defendants raised the objection that there could be no ground for an interim injunction until the board took or threatened to take steps to put the coercive provisions of the Act into operation. But when asked if he would undertake on their behalf not to do so, he declined. I do not think that the plaintiffs are called upon to wait until the defendants are about to enter their works and have demanded the production of their books and documents before coming to the court. The granting of an interim injunction is, of course, a matter of discretion, but it calls for the exercise of a little common sense. I think the plaintiffs are entitled to assume that the board may see fit to exercise or put into force all or any of the coercive powers given to it by the Act, and are not bound to wait until the defendants are demanding admission at their front door.

Mr. Duncan also raised certain objections to the form of the action, urging that it was not a case of a declaratory judgment as claimed by the writ and that no action lay against the defendants. It will be for the trial judge to deal with the former objections, but I desire to point out that, if an action for an injunction lies against these defendants, it is of little practicable importance whether the plaintiffs ask for a declaratory judgment as to

the validity of the Act or not, if, in order to determine the right to an injunction or otherwise, the court must pass upon the constitutionality of the Act, or of some of its provisions. As to the defendants being proper parties, if they are claiming to exercise to the detriment of the plaintiffs, powers for which there is no legal sanction, the plaintiffs are clearly entitled to enforce their rights by injunction.

I ought to add that I have come to this conclusion with reluctance. I am of course merely dealing with the bald question of law which presents itself for consideration under the provisions of the British North America Act. It seems to be generally recognized that the Industrial Disputes Investigation Act has been a beneficial one and has facilitated the settlement of numerous disputes, and it is to be hoped that, whatever the ultimate decision as to its constitutionality may be, it will be found possible to pass legislation, either federal or provincial or both, which will maintain the efficiency of the scheme of the Act.

The plaintiffs press for an injunction restraining the defendants from performing any of the functions which they are called upon by the Act to perform on the ground that the whole Act is unconstitutional. I am not prepared upon a mere interlocutory motion to go that far; whether or not an innocent enquiry as to an industrial dispute, not fortified by any coercive power, is beyond the competence of the Canadian Parliament, I do not think it necessary at this stage to determine.

The injunction ought to go restraining the defendants from interfering in any way with the business of the plaintiffs and from entering upon the premises of the plaintiffs for the purpose of examining their works or exercising any of those powers given them by section 38. They have no power to enforce the attendance of witnesses, or the production of books, papers or other documents either by the plaintiffs or by anyone else who chooses to withhold them. Of course individual witnesses not parties to these proceedings get no technical protection from this judgment. What remains is that the powers of the Board of Conciliation are in my opinion limited to an investigation merely of a voluntary character. I think they have no power to enforce, by the means the Act has provided, any of the provisions which interfere with the liberty or freedom of the parties to contract, or the right to strike or lockout, or to carry on their respective businesses as they may see fit. I do not think sections 56, 57, 58 and 59 are effective. Those sections have really nothing to do with the immediate subject-matters of this interim injunction because the Conciliation Board does not necessarily enforce them; they are perhaps enforceable by anyone who chooses to lay any information. The board is, in my judgment, limited to the innocuous duty of investigating and making a report, but cannot put into force those drastic provisions of the Act which interfere with the civil and municipal rights or the rights of property of any party to the dispute. The injunction will continue until the trial, the question of costs being reserved to be disposed of by the trial judge.

Application for the issuing of a permanent injunction against the board was subsequently made by the Toronto Electric Commissioners and the case was heard by Mr. Justice Mowat, who delivered his judgment on December 15, 1923. The Act was found by him to be within the powers of the Dominion Parliament and the application for a permanent injunction was, therefore, refused.

#### TEXT OF JUDGMENT OF MR. JUSTICE MOWAT

This action is for a declaration that the defendants have no right to act as a Board of Conciliation and Investigation in respect of an alleged dispute between the plaintiffs and their employees, and is brought in the main to dispute the constitutional right of the Parliament of Canada to pass the Industrial Disputes Investigation Act (1907) generally, and in particular as it affects the relations between the Toronto Electric Commissioners, who are entrusted by statutes of the province of Ontario with the powers and duties of producing and controlling electrical power, and their employees.

The Act in question is challenged upon the ground that it interferes with the remitted powers of the province under section 92 of the British North America Act, as follows: subsection 8, municipal institutions in the province; subsection 13, property and civil rights in the province; subsection 16, generally all matters of a merely local or private nature in the province.

The scheme of the Industrial Disputes Investigation Act is to compel the parties to a threatened strike or lockout to meet together in conference in which both employer and employees may state their cases and differences, with a view that they may be, by conciliatory efforts, induced to come to a fair and amicable settlement of the dispute, so as to remove tense and disrupted relations, failing which the board is to make a report giving its information to the public. And it is empowered for this purpose to interfere with contracts in existence between the hirer and the hired, freedom of action while the discussions and proceedings are taking place, and incidentally to enter upon and inspect works and examine books and reports, so that all facts and circumstances may be disclosed.

## SESSIONAL PAPER No. 26

It may be conceded that the obligatory character of the Act in these respects is an invasion of the field of "property and civil rights," but it is urged on behalf of the Attorney-General for Canada and the defendants, the members of the Board of Conciliation appointed under the Act, that such requirements are necessary and that the effective or possible determination of industrial strife gives the Dominion Parliament power so to trench upon the subjects mentioned in subsections 8, 13 and 16 of section 92, in order that a law necessary for "the peace, order and good government of Canada" may be effectively administered and enforced.

Having come to the conclusion that the constitutional question raised is the all important one, I do not here deal with the evidence directed to that feature of the case which deals with the procedure leading up to the appointment of the Board of Conciliation which was made and the propriety of its appointment. In a general way I find that the requirements of the statute have been complied with.

I therefore pass on to discuss the constitutional point raised.

The question of industrial strife, together with its ramifications and the growth of labour unions, is vastly different from the condition existing at the time of the passing of the British North America Act in 1867, and the silence of the Act regarding "labour" and the absence of the specific allocation of that subject to the Dominion or the provinces is thus accounted for. But it may be observed that the question of labour has, for more than twenty years, been appropriated by the Dominion Parliament and Government. There is a Department of Labour, with a Minister of Labour in charge; periodical publications dealing with labour questions, the labour market, the current cost of living, and the employment of the military forces of Canada in the protection of property and the public safety where violent eruptions have occurred or may. This department has, by common consent of the provinces during this long period, been the principal administrative means of dealing with the question of eruptive industrial strife; and, while the fact of acquiescence does not settle a constitutional point of law, and if there is no authority for the taking over of labour problems by the Dominion, yet a declaration of the court that all such administrative actions are to cease, and inferentially that all the governments and their law officers have erred, or slept, should not be arrived at unless the law is clear.

Canada's constitutional problems have all found their way to the Judicial Committee of the Privy Council, whose members have taken enormous pains, from period to period, in their elucidation, and it is by the views of that tribunal that we are to be guided.

The allocation by the British North America Act of subjects to Dominion or provinces by general heads or titles, means overlapping and impingement and in *Citizens and Queen Insurance Companies v. Parsons* (1881) 7 A.C. 96, Sir Montague Smith says, (p. 107):—

"The scheme of this legislation, as expressed in the first branch of section 91, is to give to the Dominion Parliament authority to make laws for the good government of Canada in all matters not coming within the classes of subjects assigned exclusively to the provincial legislature."

And at pages 108, 109:—

"It is the duty of the courts, however difficult it may be, to ascertain in what degree, and to what extent, authority to deal with matters falling within these classes of subjects exists in each legislature, and to define in each case before them the limits of their respective powers. It could not have been the intention that a conflict should exist; and, in order to prevent such a result, the two sections must be read together, and the language of one interpreted and, where necessary, modified by that of the other. In this way it may in most cases be found possible to arrive at a reasonable and practical construction of the language of the sections so as to reconcile the respective powers they contain and give effect to all of them."

And per Lord Dunedin in *Grand Trunk Railway Company v. Attorney-General of Canada* (1907) A.C. 65 ("Contracting Out" case), at page 68:—

"First . . . there can be a domain in which provincial and dominion legislation may overlap, in which case neither legislation will be *ultra vires* if the field is clear; and secondly, that if the field is not clear, and in such a domain the two legislations meet, then the dominion legislation must prevail."

In *John Deere Plow Company Limited v. Wharton* (1915), A.C. 330, Viscount Haldane said, (pages 333, 339):—

"The language of these sections (91 and 92) and of the various heads which they contain obviously cannot be construed as having been intended to embody the exact disjunction of a perfect logical scheme. The draftsman had to work on the terms of a political agreement, terms which were mainly to be sought for in the resolutions passed at Quebec in October, 1864. To these resolutions and the sections founded on them, the remark applies. . . . If there is at points obscurity in language, this may be taken to be due, not to uncertainty about general principles, but to that

15 GEORGE V, A. 1925

difficulty in obtaining ready agreement about phrases which attends the drafting of legislative measures by large assemblages. It may be added that the form in which provisions in terms overlapping each other have been placed side by side shows that those who passed the Confederation Act intended to leave the working out and interpretation of these provisions to practice and to judicial decisions. . . . In discharging the difficult duty of arriving at a reasonable and practical construction of the language of the sections so as to reconcile the respective powers they contain and give effect to them all, it is the wise course to decide each case which arises without entering more largely upon an interpretation of the statute than is necessary for the decision of the particular question in hand. The wisdom of adhering to this ruling appears. . . . to be of special importance. When putting a construction on the scope of the words 'civil rights' in particular cases, an abstract logical definition of their scope is not only, having regard to the context of sections 91 and 92 of the Act, impracticable, but is certain, if attempted, to cause embarrassment and possibly injustice in future cases. It must be borne in mind in construing the two sections that matters which in a special aspect and for a particular purpose may fall within one of them, may in a different aspect and for a different purpose fall within the other. In such cases the nature and scope of the legislative domain of the Dominion or Province, as the case may be, have to be examined with reference to the actual facts if it is to be possible to determine under which set of powers it falls in substance and in reality".

It appears to me that "labour" legislation such as the Industrial Disputes Investigation Act is one of national concern. It is important that a close touch should be kept of the movements and variations of industrial strife and that this can best be done, as such strife existed in 1907 and until the present time, by the Federal Government. A general strike in Winnipeg in 1919 was only brought to an end through the voluntary efforts of the non-industrial citizens to break it, and to prevent the misery and underfeeding of children which seemed likely to ensue. All important labour unions in Canada were sympathetically affected by it from ocean to ocean, and if it had spread, as at one time feared, ruinous conditions would have ensued to trade and stable industry. In such a case provincial lines are obliterated and the provinces, not having the means of free and instant communication with each other, or for concert, could ill avert dominion-wide trouble. The simple local strikes which alone could have been in contemplation of the Fathers in 1864 and 1867, have given place to those of brotherhoods composed in some instances of hundreds of thousands, and dominion-wide in their operations and probably beyond the resources of each province to deal with. As was said by Lord Watson, in stating the opinion of the Judicial Committee in *Attorney General for Ontario v. Attorney General for the Dominion* (1896), A.C. 348, 361:—

"Some matters, in their origin local and provincial, might attain such dimensions as to affect the body politic of the Dominion, and to justify the Canadian Parliament in passing laws for their regulation or abolition in the interests of the Dominion, but great caution must be observed in distinguishing between that which is local and provincial . . . and that which has ceased to be merely local or provincial and has become a matter of national concern, in such sense as to bring it within the jurisdiction of the Parliament of Canada".

In *Russell v. The Queen* (1882) 7, A.C. 829 it was held that the restriction of intemperance was a matter of public order and safety although it infringed on property and civil rights. And this case, although the Attorneys-General were not represented, has been expressly reaffirmed in statements by the committee.

If such an ill as occasional overdrinking is subject to Dominion legislation, it must follow that the prevention of strikes by conciliation which conceivably might occasion the starving of the people should also be.

In the last case on the subject, it was held that regulation of the price of newsprint paper, upon which soothing and uninterrupted information might be written to quiet the nerves of the people racked by the Great War, but which was over when the regulation was passed, was within the powers of the Dominion, the Viscount Haldane saying: "No authority other than the central government is in a position to deal with a problem which is essentially one of statesmanship." *Fort Frances Pulp and Paper Co. v. Manitoba Free Press Co.* (1923), A.C. 695, 706.

The elements of "municipal affairs" and "matters of a merely local and private nature" come within the same reasoning.

I note that Mr. Justice Orde in this very case, reported 25 O.W.N. 64, heard a motion for an interim injunction upon material which substantially raised the same issue as that raised by the evidence at the trial before me and gave a considered judgment, reasoned with his usual clearness, coming to a conclusion differing from that to be gathered from what I have here said.

## SESSIONAL PAPER No. 26

The Ontario Judicature Act, section 32, declares that a judge cannot disregard or depart from a prior known decision of any other judge of co-ordinate authority on any point of law without his concurrence, and, as I have not that concurrence, although I have no reason to think it would not be given, I must say with reluctance, but to be formally correct, that I deem his decision to be wrong and the case of sufficient importance to warrant me in referring it, with the record and evidence before me, to one of the appellate divisions, together with the costs of action; and such reference is therefore made.

Owing to the difference of opinion between two judges of co-ordinate authority, the case was referred to one of the appellate divisions of the Supreme Court of Ontario, by which judgment was delivered on April 22, 1924, shortly after the close of the fiscal year. Since, however, the questions raised in these proceedings are of the highest importance, it is thought desirable to include in the present review the text of the judgment of the Appellate Division. The proceedings before the Divisional Court comprised a continuation of the trial on reference to this Court by Judge Mowat. The judgment of the Appellate Division was delivered by Mr. Justice Ferguson and dismissed the action with costs, including costs of injunction proceedings. The issue of the judgment and the order dissolving the injunction were, however, directed to be stayed for such time as was reasonably necessary to allow an appeal to be taken. The judgment of Mr. Justice Ferguson was concurred in by Chief Justice Mulock and by Mr. Justice Smith and Mr. Justice Magee. Mr. Justice Hodgins dissented and was of opinion that judgment should be entered for the Toronto Electric Commissioners.

The Attorney General of Canada and the Attorney General of Ontario, though not parties to the case, were represented by counsel, as the constitutional validity of an Act of the Parliament of Canada was in question.

## TEXT OF DIVISIONAL COURT JUDGMENT

The judgment prepared by Mr. Justice Ferguson of the Divisional Court was as follows:—

Continuation of the trial on a reference to this court by Mowat, J., under section 32 of the Judicature Act., R.S.O., cap. 56, ss. 3 and 4, which read:—

"(3) If a judge deems a decision previously given to be wrong and of sufficient importance to be considered in a higher court, he may refer the case before him to a Divisional Court.

"(4) Where a case is so referred, it shall be set down for hearing, and notice of hearing shall be given in like manner as in the case of an appeal to a Divisional Court."

The plaintiffs are a Board of Commissioners appointed under sections 16 and 17 of 1 George V, chapter 119 (Ontario) (An Act respecting the City of Toronto), to manage the municipal electric light, etc., of the city of Toronto. They are a body corporate and have the duties and powers of commissioners under the Public Utilities Act, R.S.O. (1914), chapter 104. The defendants are a Board of Conciliation and Investigation appointed under and pursuant to the Industrial Disputes Investigation Act (1907) with all the powers conferred by that Act upon commissioners appointed thereunder for the purpose of investigating, reporting upon and bringing about a settlement between the plaintiffs and their employees. The Attorney General of Canada and the Attorney General of Ontario are not parties but appear pursuant to notice served upon them under section 33 of the Judicature Act, which provides that, where, in any action or proceeding, the constitutional validity of any Act of the Parliament of Canada or the Legislature of Ontario is brought into question, the same shall not be adjudged invalid until after notice has been served upon the Attorney General for Canada and the Attorney General for Ontario; also that the Attorney General for Canada and the Attorney General for Ontario shall be entitled as of right to be heard either in person or by counsel, notwithstanding that the Crown is not a party to the action or proceeding.

The plaintiffs plead that the Industrial Disputes Investigation Act is not within the powers conferred on the Parliament of Canada by the British North America Act, because (1) it deals with property and civil rights in the province, subjects (class 13) exclusively assigned to the provincial legislatures by section 92 of the British North America Act; (2) it interferes with municipal institutions, one of the classes of subjects (class 8) exclusively assigned to the provincial legislatures by section 92 of the British North America Act; (3) it is an interference with a local work or undertaking, subjects (class 10) exclusively assigned to provincial legislatures by section 92 of the British North America Act.

The plaintiffs ask the following relief: (1) a declaration that the defendants are, without lawful authority, acting as a Board of Conciliation and Investigation into alleged disputes between the plaintiffs and certain of their employees; (2) an injunction restraining the defendants and each of them from proceeding with the investigation, or, in the alternative, for a perpetual injunction in the terms of an interim injunction granted herein by the Hon. Mr. Justice Orde.

Before pleading, the plaintiffs applied for and obtained from Mr. Justice Orde, sitting in Weekly Court, an interim injunction restraining the defendants, until the trial, from interfering with the business of the plaintiffs, from entering upon the premises of the plaintiffs, from examining the plaintiffs' work or employees upon the plaintiffs' premises, and from exercising any of the compulsory powers contained in sections 30 to 38 of the Industrial Disputes Investigation Act, and from interfering in any way with the property and civil rights or the municipal rights of the plaintiffs.

The interim injunction was not granted merely because the learned judge who made the order was of opinion that sufficient had been shown to entitle the plaintiffs to have the rights of the parties determined by a trial before the proposed investigation was proceeded with. His reasons for making the order make it clear that, after a careful review and consideration of the authorities, he was of opinion that the Industrial Disputes Investigation Act is *ultra vires* of the Parliament of Canada. The trial judge, being of a different opinion, considered the interim injunction order granted by Mr. Justice Orde and his reasons therefor a decision previously given within the meaning of section 32 of the Judicature Act entitling and requiring him to refer the question raised to the Appellate Division for their decision.

It is not, I think, necessary for the decision of the case at bar to pass upon the constitutional validity of any sections or provision in this Act which do not deal with the powers of the board, and consequently it is not necessary to consider the constitutional validity of sections 56 to 61, which deal with strikes and lockouts prior to and pending a reference to a board of enquiry.

I am of opinion that, while sections 30, 36 and 37 of the Act confer on the board compulsory powers which trench upon property and civil rights, and authorize the board to inquire into industries that are in some cases local works carried on by municipalities, yet my opinion is that, according to the "true nature and effect of the enactment," "its pith and substance," the legislation is not law in relation to "municipal institutions" (8), local works (10), property and civil rights (13), matters purely local (16), as these words are used in subsections 8, 10, 13 and 16 of section 92 of the British North America Act, but is legislation to authorize and provide machinery for conducting an inquiry and investigation into industrial disputes between certain classes of employers and their employees, which disputes in some cases may, and in other cases will, develop into disputes affecting not merely the immediate parties thereto, but the national welfare, peace, order and safety, and the national trade and business.

The purpose of the inquiry authorized by the Act is, I think, three-fold: (1) the regulation of trade and business by preventing the interruption of trade and commerce necessarily incident to delaying, hindering, interrupting or stopping the operation of mines or public utilities; (2) the promotion and protection of national public peace, order and safety by (a) confining the dispute to a limited district, or bringing about a settlement, (b) by informing the public in reference to the cause and nature of the dispute, (3) by bringing to bear upon the parties intelligent public opinion, and through that agency preventing the breaking out and spreading of strikes or lockouts and the disturbances, rioting and breaches of the peace and criminal law which, it is common knowledge, frequently follow the stopping, by strike or lockout, of the operation of mines, agencies of transportation or communication and public service utilities which furnish such necessities as light, heat and power.

Counsel for the defendants and the Attorney General for the Dominion submitted that, as, according to its "true nature and effect," its "pith and substance," and its title, the Act here in question is legislation in reference to industrial disputes, and as the Imperial Parliament, in the Australian Constitution Act, (63-64) Victoria, recognized and treated industrial disputes as presenting an aspect of peace, order and good government that required special legislative treatment (see section 51 of the Australian Act), we may and should hold that the legislation does not fall within any of the classes enumerated in section 92 of the British North America Act. Basing his argument on the foregoing submission, and on a statement of the Judicial Committee in *Russell v. The Queen*, 7 A.C., at p. 836, and another statement in the *Alberta Insurance case* (1916), 1 A.C. 588 at 595, counsel for the Dominion urges that the legislation here in question is valid because it is a class of legislation not covered by or included in any of the classes enumerated in section 92 of the British North America Act.

## SESSIONAL PAPER No. 26

The statements of the Judicial Committee relied upon for this proposition, read (*Russell v. The Queen*, p. 836):—

"The first question to be determined is, whether the Act now in question falls within any of the classes of subjects enumerated in section 92, and assigned exclusively to the legislatures of the provinces. If it does, then the further question would arise, viz., whether the subject of the Act does not also fall within one of the enumerated classes of subjects in section 91, and so does not still belong to the Dominion Parliament. But if the Act does not fall within any of the classes of subjects in section 92, no further question will remain, for it cannot be contended, and indeed was not contended at their Lordships' bar, that, if the Act does not come within one of the classes of subjects assigned to the provincial legislatures, the Parliament of Canada had not, by its general power 'to make laws for the peace, order and good government of Canada,' full legislative authority to pass it."

(*The Alberta case*, p. 595):—

"It must be taken to be now settled that the general authority to make laws for the peace, order and good government of Canada, which the initial part of section 91 of the British North America Act confers, does not, unless the subject-matter of legislation falls within some of the enumerated heads which follow, enable the Dominion Parliament to trench on the subject-matters entrusted to the provincial legislatures by the enumeration in section 92. There is only one case, outside the heads enumerated in section 91, in which the Dominion Parliament can legislate effectively as regards a province, and that is where the subject-matter lies outside all of the subject-matters enumeratively entrusted to the province under section 92. *Russell vs. The Queen* is an instance of such a case."

Counsel for the plaintiffs and the Attorney General for Ontario submit that the legislation here in question trenches upon the classes of legislation enumerated in subsections 8, 10, 13 and 16 of section 92, and that the Dominion Parliament may not trench on any class enumerated in section 92, except to legislate in respect of a class enumerated in section 91, and for the later submission they rely upon the statements quoted by Mr. Justice Orde, from *Montreal v. Montreal* (1912), A.C. 333; the opinion of Mr. Justice Duff in the *Board of Commerce case*, 60 S.C.R. 456 at 508; the statements in *Attorney General for Ontario v. Attorney General for the Dominion* (1896) A.C. 348 at 360; the first sentence I have quoted from the *Alberta case* (supra). The plaintiffs and the Attorney General for Ontario further submit that *Russell v. The Queen* is not now regarded as authority for the statement that Dominion legislation which trenches upon any of the classes enumerated in section 92 can be supported on the peace, order and good government clause of section 91 without aid from one or more of the classes enumerated in section 91, and in support of this proposition they refer to a statement appearing at pages XIX and XX, *Cameron's Canadian Companies in the Judicial Committee*.

Though in the view I have taken it is not necessary to rest my judgment upon the meaning and effect of the authorities cited for and against the proposition stated by counsel for the defendants and the Attorney General for the Dominion, I think it proper to say that I am not convinced that the point raised has been yet decided. As I read *Russell v. The Queen*, there is much in the reasons for the result in that case to support the view that the right of the Dominion to enact the legislation there in question could be and was supported by reference to and on the power of the Dominion to legislate in reference to public wrongs and criminal law and trade and commerce, rather than on power to legislate in reference to an unenumerated subject. I am also of the opinion that the decision on this point was not necessary to the determination of the *Alberta Insurance case* (supra), and as I read the *Montreal case*, it decided only that the power to regulate rates and traffic on connecting provincial lines was not necessarily incident to the regulation of rates and traffic on Dominion railways. In the *Board of Commerce case*, Mr. Justice Duff's statement does not take the form of a pronouncement on a point necessary to the decision of the case he was considering.

In the *Distillers and Brewers case* (1896) A.C. at 360, the Committee states the proposition as it is stated by Mr. Justice Duff in the *Board of Commerce case*, and yet in the same case accepts and treats *Russell v. The Queen* as rightly decided.

After a careful perusal of the authorities, I am unable to reconcile the cases or the two propositions in the statement I have quoted from the *Alberta Insurance case*, unless it be that the legislation in *Russell v. The Queen* did not, in the opinion of the Judicial Committee, even trench upon any of the powers conferred upon the provinces by section 92, or unless it be that the opinions of the Judicial Committee in *Russell v. The Queen*, and in the *Fort Frances case* (1923), A.C. 695, are founded upon the proposition that, where a condition arises in which the peace, order and welfare of the Dominion as a whole is affected and that condition cannot be effectively met, controlled and regulated by provincial legislation, the Dominion Parliament has power to legislate under the peace, order and good government clause of section 91 even if in so doing it trenches upon some of the

classes enumerated in section 92. While there are statements in the reasons for judgments in the Russell case and the Fort Frances case which appear to support the last proposition, it is not, I think, clear that the proposition was necessary to the decision of either case or that it is laid down in either case.

In the absence of clear and binding authority requiring me to do so, I am not prepared to hold that such a wide and far reaching power must, can or should be implied in order to give effect to the agreement which the Imperial Parliament embodied in the British North America Act. I incline to the view that if the Russell case is not supported by reference to subsection 27 of section 91, criminal law, and subsection 2, trade and commerce, then it must be taken to have been determined on a finding that the legislation did not in fact trench upon any class enumerated in section 92 and that the Fort Frances case is based upon a finding of such an abnormal condition that the necessities of the situation demanded, required and justified the implying of an overriding power to legislate so as to meet, regulate and control an abnormal condition amounting to a great national emergency, in which the safety of the nation as such was threatened.

For these reasons I am of opinion that the weight of authority is in favour of the proposition that, except in conditions involving the very safety of the Dominion as a political entity, the Parliament of Canada may not in its legislation trench upon any of the subjects enumerated in section 92, unless such legislation, according to its pith and substance, is legislation in relation to a class of legislation enumerated in section 91 of the British North America Act.

Counsel for the Attorney General for the Dominion and the defendants submit that, if the legislation cannot be supported as not falling within or trenching upon any of the classes enumerated in section 92, it can and should be supported as legislation in respect of one or more of the classes enumerated in section 91 of the British North America Act.

The wording of section 91 of the British North America Act makes clear that legislation which comes within any of the enumerated classes of section 91 is within the power of the Dominion Parliament, and numerous cases, many of which are quoted in the latest pronouncement of the Judicial Committee in *re Reciprocal Insurance* (1921), 1 D.L.R. 789 at 795, establish that the class of legislation is determined by reference to "its true nature and character," "its pith and substance," "its paramount purpose."

I have already expressed my opinion as to "the true nature and character of the legislation," "its pith and substance," "its paramount purpose," and that brings me to the inquiry: Does legislation of that nature fall within any of the enumerated classes of section 91? In such an inquiry, two classes suggest themselves. They are:—

- (1) The regulation of trade and commerce (section 91, class 2).
- (2) The criminal law, except the constitution of courts of criminal jurisdiction (section 91, class 27).

The meaning of "trade and commerce" as used in the section has been considered in a number of cases. These cases are collected and discussed in Cameron's Canadian Constitution, pages 75 to 78, and while the scope of this power of the Dominion to regulate trade and commerce is not defined or determined by any of the cases considered, it was said in *Citizens v. Parsons*, 7 A.C. 96, that: "the words include the political arrangements in regard to trade requiring the sanction of Parliament, regulation of trade in matters of interprovincial concern, and it may be they would include general regulation of trade affecting the whole Dominion."

The scope of class 27 was considered in *Attorney General for Ontario v. Hamilton Street Railway*, 1903, A.C. 524, and in that case the Judicial Committee said that the words "criminal law" meant "criminal law in its widest sense."

While it may be argued that regulations in reference to trade and commerce mean regulations defining how or in what manner articles or commodities shall be dealt or traded in rather than regulations in reference to the production thereof, and that the object of the investigation is to prevent the interruption of production rather than interruption of trading in commodities produced, I am of opinion that the "employers" named in subsection (c) of section 2 of the Industrial Disputes Investigation Act are dealers and vendors in articles of trade and commerce, as well as producers thereof, and that the legislation here in question may be read as being legislation to prevent the shutting down and the stopping of plants and industries which vend and deal in articles of trade and commerce, which, by reason of their very nature, are of national importance. It cannot be disputed that to deprive the city of Toronto of electric power on which it depends for light, heat and power is to disturb and hinder the national trade and commerce and to endanger public peace, order and safety.

As to criminal law, it may be argued that criminal law means only law defining crimes and fixing punishments therefor. It is to be noted that section 91 of the British North America Act does not confine the power of the Dominion to making criminal law, but that the power extends to making law *in relation to* the criminal law. My view is that the power to make law *in relation to* the criminal law in its widest sense, includes power to make laws a paramount purpose of which is the prevention of public wrongs and crime, and the

## SESSIONAL PAPER No. 26

maintenance of public safety, peace and order, and that the power of defining what shall constitute a crime, and providing for punishment, is only a part of the power conferred on the Dominion Parliament by class 27, section 91, of the British North America Act.

Industrial disputes are not now regarded as matters concerning only a disputing employer and his employees. It is common knowledge that such disputes are matters of public interest and concern, and frequently of national and international importance. This is so, not because the disputes may result in many plants being shut down, or tens, hundreds and even thousands of employees drawing strike pay instead of wages, but because experience has taught that such disputes not infrequently develop into quarrels wherein or by reason whereof public wrongs are done and crimes are committed, and the safety of the public and the public peace are endangered and broken, and the national trade and commerce is disturbed and hindered by strikes and lockouts extending, not only throughout the Dominion, but frequently to the United States, where most of our trade unions have their headquarters. Being of opinion that the Act is not one to control or regulate contractual or civil rights, but one to authorize an inquiry into conditions or disputes, and that the prevention of crimes, the protection of public safety, peace and order and the protection of trade and commerce are of the "pith and substance and paramount purposes" of the Industrial Disputes Investigation Act and of the enquiry authorized and directed thereby, I think the legislation may and should be supported on the powers conferred upon the Dominion Parliament by section 91, British North America Act, to make laws "in relation to" "the regulation of trade and commerce," and to make laws "in relation to" "the criminal law" "in its widest sense," even though it does not enact a criminal law or a law defining how or in what manner trade and commerce shall be carried on. See *Russell v. The Queen*, 7 A.C. 829, in which the Judicial Committee, referring to the Canada Temperance Act, said (p. 839):—

"Laws of this nature designed for the promotion of public order, safety or morals, and which subject those who contravene them to criminal procedure and punishment, belong to the subject of public wrongs rather than to that of civil rights. They are of a nature which fall within the general authority of Parliament to make laws for the order and good government of Canada, and have direct relation to criminal law, which is one of the enumerated classes of subjects assigned exclusively to the Parliament of Canada. . . . Few, if any laws, could be made by Parliament for the peace, order and good government of Canada which did not in some incidental way affect property and civil rights, and it could not have been intended, when assuring to the province exclusive legislative authority on the subject of property and civil rights, to exclude the Parliament from the exercise of its general powers whenever any such incidental interference would result from it. The true nature and character of the legislation in the particular instance under discussion must always be determined in order to ascertain the class of subject to which it really belongs."

I would dismiss the action with costs including costs of injunction proceedings, but would stay the issue of the judgment and the order dissolving the injunction restraining the defendant from proceeding with the enquiry for such time as is reasonably necessary to allow an appeal to be taken.

SMITH, J. A.: I agree.

MAGEE, J. A.: I agree.

MULOCK, C. J. O.: I agree with my brother Ferguson that the impugned portion of the legislation in question is legislation within the competency of the Dominion Parliament under its powers to make laws for the peace, order and good government of Canada in relation to the regulation of trade and commerce, and therefore think the action should be dismissed with costs.

## DISSENTING OPINION OF MR. JUSTICE HODGINS

HODGINS, J. A.: This matter comes before us in the form, first, of an appeal by the defendants, members of a Conciliation Board appointed under the Industrial Disputes Investigation Act, 1907, and amendments, from an order of Mr. Justice Orde, and, second, for judgment in the action which was referred to this court by the trial judge, Mr. Justice Mowat, pursuant to section 32 of the Judicature Act.

It is to be doubted whether the last-mentioned section is applicable, as the order of Mr. Justice Orde merely continued an injunction in this action until the trial. It is true that he expressed an opinion upon the Industrial Disputes Investigation Act, from which the trial judge differed, but this view was given on an interlocutory application and upon certain facts disclosed in affidavits. This was, in my judgment, not binding upon the trial judge at the trial of the action where certain other facts, pro and con, were adduced in evidence, and therefore was not such a decision as would bring the case within that section. But as the

15 GEORGE V, A. 1925

appeal from the order, and the argument on the merits of the action, involved the same question as to the constitutionality of the Act referred to and its amendments, it is not necessary to say more on this point.

It was suggested during the argument that, as the Act was passed in 1907, it must be viewed and judged in relation to the industrial and social conditions which existed at that date, irrespective of what has happened since. Whether or not the existence of these conditions, either the earlier or the later, prove to be of importance upon the question of constitutionality, it is the fact that the Act was amended in 1910, 1918, and 1920. If, therefore, the question of *intra vires* or *ultra vires* depends in any way upon what was happening or had happened in the Dominion, it would seem reasonable that the action of Parliament in those years should be regarded as an affirmation by it of the Act of 1907 as applicable to national conditions existing when the amendments were made. This consideration cannot be left out of sight if, as I have said, such earlier or later events are of importance in considering the legal validity of the Act.

It was urged on behalf of the defendants, and by counsel for the Attorney General of Canada, that Parliament could enact statutes, under the general power given to it to be exercised for the "peace, order and good government" of Canada, provided these statutes were not enacted directly "in relation to" civil rights, but in relation to what was called "industrial strife," a subject not mentioned in 1867 and so not attributed by the British North America Act either to the provinces or to the Dominion. But industrial strife, as explained in the argument, is nothing more than the result of the misuse or undesirable use of the civil right to cease work or to cease the operations of various businesses, singly or in concert, with the consequences resulting therefrom which are generally known as strikes or lockouts. This argument is therefore practically an endeavour to define jurisdiction by attempting to invent a new field, which, when examined, is found to be only a department of, or development in, one of those mentioned as exclusively possessed by the provincial legislature. But the argument took a wider and more plausible range. It was said that the Act, when examined in the light of the evidence adduced, dealt with a subject which transcended or might easily transcend provincial limits and was in fact one of Dominion-wide aspect. The evidence discloses, what is well known, that strikes and lockouts, while arising in defined localities, are, owing to the highly organized methods of modern labour, likely to spread and have indeed in some instances spread among allied and sympathetic trades and businesses. This, it is said, enlarges the field to be covered by legislation so as to make it imperative to the peace, order and good government of the Dominion that Parliament should take command of the situation and provide against a probable spread of industrial strife and consequent dislocation of business which might extend throughout the whole country. No one can deny that these consequences may follow from certain labour disputes, nor if they do occur are the disastrous results forecast to be minimized. Indeed, it is conceivable that there may arise conditions in connection with this subject which might give great force to the contention that the peace, order and good government of the Dominion demanded that Parliament should use the general powers given to it by the British North America Act. It was also urged that these might rise to such a height as to be comparable to other contingencies, such as war, famine or rebellion, which, as indicated in the Board of Commerce case, (1922) 1 A.C. 191, and in the Fort Frances case, (1913) A.C. 695, might justify such action.

It is necessary, therefore, to consider whether this statute can be supported under (1) emergency, (2) as dealing with a matter of general Canadian interest and importance, and (3) whether under any enumerated head of jurisdiction it has been validly enacted. It must be premised that, as railways, steamships, telegraph and telephone lines are included in the definition of "employer," what follows is limited to the effect of the Act in relation to the respondents, a commission operating locally and formed by provincial authority.

To deal first with the emergency argument. Evidence in this case does not disclose that such an emergency had arisen in 1907 or in the later years mentioned (though a sympathetic strike in another province is shown), nor that it is to be definitely apprehended at present or at any particular time; nor is the legislation framed so as to come into operation only when these abnormal conditions have arisen or these consequences are imminent. This form of legislation is said to be convenient and not unusual and to be open to the appropriate legislature.—See *Russell v. The Queen* (1882), 7 A.C. 829, 835. Reasonable fear that these extraordinary circumstances might arise in this country would seem to indicate that much more drastic and effective legislation than the present would be necessary to cope with them. The present statute is not, when examined, based upon either condition, but upon the normal working of industrial relations, which often require time and patience and some restraint, to afford protection against dislocation or disturbance in the usual conduct of business as between employer and employees. It is essentially a sedative measure, and is not in any way designed to meet serious emergencies. It must be judged upon what it deals with in fact, and upon what is its effect in so dealing. What is referred to as the true nature and character of the legislation has hitherto been sought in the enactment itself and not in the

## SESSIONAL PAPER No. 26

desirability of the end which it is intended to accomplish, considered apart from its actual operation and legal effect. It is what it really does, and the means used, that determine whether the purpose has been achieved in a constitutional manner. If it passes over the line and invades provincial jurisdiction, then to that extent it must be invalid unless it comes within one or more of the enumerated matters attributed to the Parliament of Canada or there is shown to have transpired such a Dominion-wide condition of affairs as would necessarily compel the conclusion that the peace, order and good government of the whole country require its enactment in the interests of the whole Dominion. Such a condition was exemplified in the Board of Commerce (1922), 1 A.C. 191, and the Fort Frances case (1923), A.C. 695, and is discussed in relation to a threatened railway strike in the United States, in *Wilson v. New*, 243 U.S. 332, and as to the housing difficulty in *Block v. Hirsch*, 256 U.S. 136.

In both the Canadian cases "special circumstances such as those of a great war," "highly exceptional circumstances," "sudden danger to social order," "exceptional cases" (such as war), "special circumstances of national emergency which concern nothing short of the peace, order and good government of Canada as a whole" are the phrases used to illustrate the meaning of an emergency such as justifies calling into operation the ultimate power residing in the peace, order and good government clause. The special and exceptional conditions of national emergency do not seem to exist in fact, and the apprehension that they may and will arise in the future will be better considered under the second head.

This second head needs a more detailed consideration of the Act itself. Its intent is described in the words of the Deputy Minister of Labour in 1902, as "carrying as far as possible the principal of voluntary conciliation, but substituting for a compulsory arbitration, with its coercive penalties, the principal of compulsory investigation, and its recognition of the influence of an informed public opinion upon matters of vital concern to the public itself."

Its legal effect may be said to be the creation of a tribunal with such coercive powers as will enable it to investigate a local industrial dispute and to make a report upon the facts found by such investigation, but without authority to enforce or apply to the parties the recommendation or findings of that report.

It seems to fall naturally into four main divisions. It defines industrial disputes and the parties thereto; it enables either party to the dispute to create a Board of Conciliation either by the co-operation of the other party or through the intervention of the Minister of Labour, or by the minister, without any application, under certain circumstances; it compels the maintenance of the *status quo* as between employers and employees pending the action of the board; and finally it vests in the board certain coercive powers over the parties to the dispute and their affairs and imposes penalties for disobedience to the board's exercise of these powers or for disregard of the provisions of the statute. When the board has accomplished its work and made its report to the minister, the legislation carries the matter no further and publicity is the only restraining force set in motion by the carrying out of the Act. The statute is limited in its operation to certain industries, namely, mines and those connected with public utilities, most of which are usually local and provincial.

"Dispute" and "industrial dispute" are defined as: "any dispute or differences between an employer and one or more of his employees, as to matters or things affecting or relating to work done or to be done by him or them, or as to the privileges, rights and duties of employers or employees (not involving any such violation thereof as constitutes an indictable offence)."

This is amplified by some further definitions so as to include, among other things, disputes as to wages, hours of employment, age, sex, qualification or status of employment and the mode, terms and conditions of employment, the dismissal of or refusal to employ any person or class of persons, as to materials alleged to be bad or unsuitable, and the interpretation of an agreement or a clause thereof.

Strikes and lockouts are defined as concerted cessation of work by employees or concerted refusal by employers to continue to employ any number of employees, provided, in each case, that this is done as a means of compulsion to accept terms of employment.

It is provided that no dispute shall be referred to a board where the employees affected are fewer in number than ten (section 21), and by section 6 the minister is obliged to establish the board if satisfied that the provisions of the Act apply. How he is to satisfy himself that there are at least ten persons affected is not stated.

Section 30 is as follows:—

"For the purpose of its inquiry the board shall have all the powers of summoning before it, and enforcing the attendance of witnesses, of administering oaths, and of requiring witnesses to give evidence on oath or on solemn affirmation (if they are persons entitled to affirm in civil matters) and to produce such books, papers or other documents or things as the board deems requisite to the full investigation of the matters into which it is inquiring, as is vested in any court of record in civil cases.

15 GEORGE V, A. 1925

"2. Any member of the board may administer an oath, and the board may accept, admit and call for such evidence as in equity and good conscience it thinks fit, whether strictly legal evidence or not."

By sections 36, 37 and 38, failure to attend and produce books, documents, etc., refusal to give evidence, contempt of or in the face of the board and the hindering or obstruction of the board or any person authorized by it in entering premises where work is carried on and in interrogating persons therein are made offences punishable by the imposition of a money penalty to be enforced by proceedings under Part XV of the Criminal Code.

By section 56, strikes or lockouts are made unlawful prior to or during a reference to the board.

Section 57 is in part as follows:—

"Until the dispute has been finally dealt with by a board, and a copy of its report has been delivered through the registrar to both the parties affected, neither of those parties shall alter the conditions of employment with respect to wages or hours, or on account of the dispute do or be concerned in doing, directly or indirectly, anything in the nature of a lockout or strike, or a suspension or discontinuance of employment or work, but the relationship of employer and employee shall continue uninterrupted by the dispute, or anything arising out of the dispute."

Any violation of these provisions subject the party offending to a fine to be recovered by proceedings under Part XV of the Criminal Code.

The salient features objected to are, therefore:—

(1) Compelling the parties, pending the making of the report, to abstain from anything altering their conditions of employment with respect to wages or hours, or from doing or being concerned in doing anything directly or indirectly in the nature of a lockout or strike or a suspension or discontinuance of employment or work, or in other words compulsion to maintain and not to terminate the relationship of employer and employee and to continue such relationship without any alteration of wages or hours.

(2) Compelling the parties to give evidence on oath and to produce their books, papers and documents in the same way and to the same extent as may be insisted on by any court of record in civil cases, and the evidence which the parties may be so compelled to give is not limited to such evidence as is legal evidence by the law of the province.

(3) Empowering the board and any persons authorized by them to enter the employers' premises and to inspect and view the work, material or machinery, etc., therein and to interrogate any person therein.

(4) These powers are not limited in their effect to the immediate parties to the dispute which is to be investigated. They deal with parties "affected" by the dispute, though not then actively concerned in it, and by sections 30, 32, 34, 35, 36, 37, 38 and 60, individuals, who need not be employers or employees, or affected by the dispute, are liable to be summoned, examined by the board and punished under the Criminal Code for so-called offences against its authority.

(5) The Act, by section 6, prohibits recourse to any court in the province, *inter alia*, to restrain the proceedings of the board.

(6) All the powers of the board and disobedience to the coercive provisions of the Act are reinforced by the imposition of penalties which are recoverable under the Criminal Code.

Broadly speaking, the fundamental and I think obvious objection to the sections of the Act which I have mentioned is that they attempt to compel employers and employees in each province to exercise, or abstain from exercising, their civil rights in the way Parliament desires and to suffer interference with their property and its enjoyment as therein provided, and to submit to inquiry, inspection and compulsion in connection therewith while denied access to the courts, although power is taken to interpret their agreements and contracts. And those not concerned in the dispute are made liable to be summoned, put on oath, interrogated and punished if necessary. The question is whether regulation and alteration of civil rights, or invasion of property rights, in this way, in order to bring about a uniform and desirable way of dealing with industrial disputes, while admirable in purpose, can be effective notwithstanding that the exercise in the province of these rights is committed to its care and forms part of its enumerated jurisdictions, and whether that control and interference is not in this case extended to those exercising what are really municipal functions.

The Act, not being predicated upon unusual industrial conditions or a national emergency, is sought to be justified as involving matters of "general Canadian interest and importance," an expression borrowed from Lord Watson. It is to be observed that its whole purpose is served if the dispute is suspended and hung up for a short time, till the board can ascertain the facts and make its report, after which the Act fails to provide for any sort of action in case the suggested consequences ensue. Is it possible, in the face of the views expressed by the Judicial Committee, to hold this particular statute, which

## SESSIONAL PAPER No. 26

so plainly invades the specified domain of provincial legislation, yet deals with something so widespread and far-reaching as to be a subject constitutionally proper for Dominion legislation, as coming within the expression "a still wider and legitimate purpose," which may properly be based on the provision regarding peace, order and good government?

Looking at the Act as a whole, it is clear that, in the absence of its compulsory provisions, both those coercive in their character and those imposing penalties, the working of the Act would be completely ineffectual.

A consideration of the cases decided from 1896 down to the present time leads me to think that, if governed literally by what is said in them, the question is not open. But in reality what is raised here has not to my mind been definitely considered in its present aspect and may require further examination.

That question is whether, when a subject is considered and it is found that its nature and characteristics make it desirable, as well as suitable, in the interest of the whole community, that it should be dealt with by some national measure, legislation to that end can be supported under the power to legislate for the peace, order and good government of the Dominion, although, apart from the desirability indicated by its character of having it treated as involving the national interest, it cannot, having regard to its immediate manifestations or the method in which it is proposed to deal with it, be regarded as other than of a local and private nature.

It cannot be denied, I think, that labour troubles spring up locally, affect at first local concerns, and can best be dealt with in a spirit of conciliation, which in itself involves local action. But they are likely, if not so dealt with, to spread, and so spreading might reasonably be said to affect the whole industrial fabric of the nation. They do not always do so, but the possibility can be clearly appreciated. Is it, therefore, while "a subject of Canadian interest and importance," one that is barred from action by the Parliament of Canada because it requires in its treatment the invasion of some provincial jurisdiction? One cannot but observe that there are many other and diverse subjects that might conceivably thus rise to national importance under certain social or political conditions, as, for example, religion, the spread of disease, conservation of natural resources, secret societies, and perhaps others. It is perhaps worthy of mention, as indicating that this subject has been regarded as one of a "local and private nature" in the province, that Ontario and several of the other provinces have on their statute books legislation much resembling this in principle and outline.

The case in hand raises the question I have mentioned very clearly, because, granting its national importance, the whole success of the operation of the legislation depends upon its being able to seize upon local disputes, local contracts and property, and upon local conditions, and to manage the exercise of civil rights in regard thereto, and subordinate them to the interests of the nation. Has the success of the experiment in such circumstances any bearing on the subject as indicating that it is of national importance?

In considering the cases beginning in 1896, the following seems to throw some light upon this aspect of the subject.

In *Russell v. The Queen* (1882) 7 A.C. 829, intemperance and the liquor traffic are likened to dealings in poisonous drugs, explosive substances, diseased meat, and classed with such acts as arson, or cruelty to animals, and, the subject-matter of the Act there considered being in that view, as it was said, outside provincial authority, the Act was held not to be one in relation to property or civil rights, but one dealing with public wrongs and so drawn into direct relation with criminal law.

This decision was, in *Attorney General for Canada v. The Attorney General for Alberta* (1916) 1 A.C. at p. 595, thus referred to:—

"There the court considered that the particular subject-matter in question lay outside the provincial powers. What has been said in subsequent cases before this board makes it clear that it was on this ground alone, and not on the ground that the Canada Temperance Act was considered to be authorized as legislation for the regulation of trade and commerce, that the Judicial Committee thought that it should be held that there was constitutional authority for Dominion legislation which imposed conditions of a prohibitory character on the liquor traffic throughout the Dominion. No doubt the Canada Temperance Act contemplated in certain events the use of different licensing boards and regulations in different districts and to this extent legislated in relation to local institutions. But the Judicial Committee appear to have thought that this purpose was subordinate to a still wider and legitimate purpose of establishing a uniform system of legislation for prohibiting the liquor traffic throughout Canada excepting under restrictive conditions. The case must therefore be regarded as illustrating the principle which is now well established, but none the less ought to be applied only with great caution, that subjects which in one aspect and for one purpose fall within the jurisdiction of the provincial legislatures may in another aspect and for another purpose fall within Dominion legislative jurisdiction. There was a good deal in the Ontario Liquor License Act, and the powers of regulation which it entrusted to local authorities in the province, which seems to cover part of the field

of legislation recognized as belonging to the Dominion in *Russell v. The Queen*. But in *Hodge v. The Queen* the Judicial Committee had no difficulty in coming to the conclusion that the local licensing system which the Ontario statute sought to set up was within provincial powers. It was only the converse of this proposition to hold, as was done subsequently by this board, though without giving reasons, that the Dominion licensing statute, known as the McCarthy Act, which sought to *establish a local licensing system for the liquor traffic throughout Canada*, was beyond the powers conferred on the Dominion Parliament by section 91. Their Lordships think that, as the result of these decisions, it must now be taken that the authority to legislate for the regulation of trade and commerce does not extend to the regulation by a licensing system of a particular trade in which Canadians would otherwise be free to engage in the provinces. Section 4 of the statute under consideration cannot, in their opinion, be justified under this head. Nor do they think that it can be justified for any such reasons as appear to have prevailed in *Russell v. The Queen*. No doubt the business of insurance is a very important one, which has attained to great dimensions in Canada. But this is equally true of other highly important and extensive forms of business in Canada which are to-day freely transacted under provincial authority. Where the British North America Act has taken such forms of business out of provincial jurisdiction, as in the case of banking, it has done so by express words which would have been unnecessary had the argument for the Dominion Government addressed to the board from the Bar been well founded."

That explanation makes it clear that there the subject-matter of the legislation, namely, intemperance and the liquor traffic, lay outside provincial authority, and that the use of local institutions was subordinate to the wider purpose of prohibition which was held to be within Dominion legislative jurisdiction. What the *Russell* case insists upon is that a law placing restrictions upon the sale, etc., of intoxicating liquors is a law relating not to property or civil rights but to public order and safety which, it is said, is the primary matter dealt with. It is in that sense alone that it lay outside the provincial authority, which includes property, civil rights and matters of a local and private nature in the province. The *Alberta* case, which dealt with insurance contracts, seems to involve the proposition that the importance of the business of insurance, which had attained to great dimensions in Canada, did not bring it within the scope of the Dominion powers, because the Act dealt only with a widely spread business, but one having no relation in its operation, to the peace, order and good government of the Dominion. But the explanation of the *Russell* case and that case itself contain certain expressions which seem to justify my conclusion that this particular problem may or may not be intended to be covered by the definite restriction laid down in later cases to which I shall refer. To illustrate, I quote the following. In the *Russell* case, p. 838-9, Sir Montague Smith says:—

"What Parliament is dealing with in legislation of this kind" (i.e., an act restricting the sale or use of liquor as similar to articles dangerous to public safety) "is not a matter in relation to property and its rights, but one relating to *public order and safety*."

And again:—

"Laws of this nature designed for the promotion of *public order, safety, or morals* and which subject those who contravene them to criminal procedure and punishment, belong to the subject of public wrongs rather than to that of civil rights. They are of a nature which fall within the general authority of Parliament to make laws for the order and good government of Canada, and have direct relation to criminal law, which is one of the enumerated classes of subjects assigned exclusively to the Parliament of Canada."

In the later case in (1916) 1 A.C. 588, Lord Haldane, as already quoted, said, p. 596:—

"But the Judicial Committee appear to have thought this purpose" (i.e., the use of local institutions in licensing and regulating) "was subordinate to a still wider and legitimate purpose of establishing a uniform system of legislation for prohibiting the liquor traffic throughout Canada except under restrictive conditions."

If, in the latter quotation, the words "for prohibiting strikes and lockouts throughout Canada except under restrictive conditions" are substituted for those referring to the liquor traffic, the analogy is obvious and something similar may be said about the other extract.

In the case of Attorney General for Ontario v. Attorney General for Canada (1896) A.C. 318, these words occur on p. 361:—

"Their Lordships do not doubt that some matters, in their origin local and provincial, might attain such dimensions as to affect the body politic of the Dominion, and to justify the Canadian Parliament in passing laws for their regulation or abolition in the interest of the Dominion, but great caution must be observed in distinguishing between that which is local and provincial, and therefore within the

## SESSIONAL PAPER No. 26

jurisdiction of the provincial legislatures, and that which has ceased to be merely local or provincial, and has become a *matter of national concern*, in such sense as to bring it within the jurisdiction of the Parliament of Canada. An Act restricting the right to carry weapons of offence, or their sale to young persons, within the province would be within the authority of the provincial legislature, but traffic in arms, or the possession of them under such circumstances as to raise a suspicion that they were to be used for seditious purposes, or against a foreign State, are matters which, their Lordships conceive, might be competently dealt with by the Parliament of the Dominion.

But while that case suggests that some matters may, though local in their origin, attain dimensions so affecting the body politic of the Dominion as to justify Dominion legislation, it appears to me to lay down conditions which I think, taken literally, must for the present govern this branch of the case. It is there said,—

“These enactments appear to their Lordships to indicate that the exercise of legislative power by the Parliament of Canada, in regard to all matters not enumerated in section 91, ought to be strictly confined to such matters as are unquestionably of Canadian interest and importance and *ought not to trench upon provincial legislation with respect to any of the classes of subjects enumerated in section 92*. To attach any other construction to the general power which, in supplement of its enumerated powers, is conferred upon the Parliament of Canada, by section 91, would, in their Lordships' opinion, *not only be contrary to the intentment of the Act, but would practically destroy the autonomy of the provinces*. If it were once conceded that the Parliament of Canada has authority to make laws applicable to the whole Dominion, in relation to matters which in each province are substantially of local or private interest, upon the assumption that these matters also concern the peace, order and good government of the Dominion, there is hardly a subject enumerated in section 92 upon which it might not legislate, to the exclusion of the provincial legislatures”.

That case, while conceding matters of unquestionable Canadian interest and importance, which would seem to include such a subject as industrial conditions and dangers, as affecting the “public order and safety,” lays down as a qualification that legislation regarding such subjects “ought not to trench upon any of the classes specially confided to the provinces”.

In the *City of Montreal v. Montreal Street Ry.* (1912) A.C. 333, the views quoted from the case in 1896 A.C. were affirmed. It was there discussed whether, under the Dominion powers as to federal railways, it could exercise control over provincial railways by compelling the making of traffic arrangements with those under the jurisdiction of Parliament. Lord MacNaghten said:—

“It cannot be held, their Lordships think, that it is necessarily incidental to the exercise by the Dominion Parliament of its control over federal railways that provincial railways should be coerced by its legislation to enter into these agreements in the manner in which it sought to coerce the street railway company in the present case to enter into the agreements specified in the order appealed from. . . . In their Lordships' view this right and power is not necessarily incidental to the exercise by the Parliament of Canada of its undoubted jurisdiction and control over federal lines, and is therefore, they think, an unauthorized invasion of the rights of the legislature of the province of Quebec”.

In *Attorney General for Australia v. Colonial Sugar Co.* (1914) A.C. p. 252, Lord Haldane sums up the earlier pronouncements in these words:—

“By the 91st section a general power was given to the new Parliament of Canada to make laws for the peace, order and good government of Canada without restriction to specific subjects, *and excepting only the subjects specifically and exclusively assigned to the provincial legislatures by section 92*.”

In *Attorney General for Canada v. Attorney General for Alberta* (ante) the matter was again considered and Lord Haldane said (p. 595):—

“It must be taken to be now settled that the general authority to make laws for the peace, order and good government of Canada, which the initial part of section 91 of the British North America Act confers, does not, unless the subject-matter of legislation falls within some one of the enumerated heads which follow, enable the Dominion Parliament to trench on the subject-matters entrusted to the provincial legislatures by the enumeration in section 92. There is only one case, outside the heads enumerated in section 91, in which the Dominion Parliament can legislate effectively as regards a province, and that is *where the subject-matter lies outside all of the subject-matters enumeratively entrusted to the province under section 92*. *Russell v. The Queen* is an instance of such a case.”

I find these careful pronouncements by Lord Haldane to be reinforced in the *Board of Commerce* and the *Fort Frances* cases (ante).

In *Attorney General v. Manitoba License Holders' Association* (1902) A.C. p. 77, Lord MacNaghten points out that local legislation is not to be deemed *ultra vires* because it may have effect outside the limits of the province, and adds:—

"On the one hand, according to *Russell v. Reg.* (ante) it is competent for the Dominion Legislature to pass an Act for the suppression of intemperance applicable to all parts of the Dominion and when duly brought into operation in any particular district deriving its efficacy from the general authority vested in the Dominion Parliament to make laws for the peace, order and good government of Canada."

He also says that,—

"In the opinion of this tribunal matters which are 'substantially of local or of private interest' in a province—matters which are of a local or private nature 'from a provincial point of view,' to use expressions to be found in the judgement—are not excluded from the category of 'matters of a merely local or private nature,' because legislation dealing with them, however carefully it may be framed, *may or must have an effect outside the limits of the province*, and may or must interfere with the sources of Dominion revenue and the industrial pursuits of persons licensed under Dominion statutes to carry on particular trades."

I cannot but regard these decisions as laying down a rule which must, until circumscribed by the Judicial Committee, govern this case; and that rule is to confine the powers of the Dominion Parliament in its action, under the provision as to the peace, order and good government of the Dominion, to such matters of Canadian interest and importance as can be dealt with, without trenching upon any of the subjects specially reserved to the provinces. If it does encroach, then it is not to the extent to which it thus offends competent legislation for the peace, order and good government of Canada.

I do not think the considerations I have mentioned warrant us in departing from this rule of construction, as it is clear and distinct. Nor are the merits of the question in any way enlarged by the fact that persons in more than one province are or may be affected by the dispute. This is not in itself sufficient to justify Dominion interference if the operation of the statute affects property and civil rights in the province in which the dispute originates or to which it spreads.

So far as appears from the pleadings and evidence, this Act affects the respondent commission, which only operates in this province, and is constituted to carry out operations properly belonging to the spheres of municipal action. This forms another and important objection, as the Act interferes with what is in effect the right of the province to form and control municipal institutions, and appears to trench upon what is of a local and private nature within the province. The legal remedy sought by this commission, namely, an injunction restraining the members of the board from certain activities, may not involve all the matters referred to as important in considering the scope of the Act. But as the Act must "be scrutinized in its entirety" (*Great West Saddlery Company v. The King* (1921) 2 A.C. 117), the considerations I have discussed must be given weight to in determining the real scope and effect of the Act.

We are not called on to determine whether the Dominion jurisdiction as to railways, other than those under provincial control, or as to shipping and navigation, will preserve this Act in its relation to railway employees or those engaged in such shipping as may be considered a public utility.

It remains to be considered whether, under the powers respecting "trade or commerce," or "criminal law," this Act may be upheld. The case of *Citizens Insurance Co. v. Parsons* (1881) 7 A.C. 96, at p. 113, shows how wide a definition may be given to "trade and commerce." But even that definition does not touch this case, being limited to (1) political arrangements in regard to trade, requiring parliamentary sanction, (2) regulation of trade in matters of interprovincial concern, and (3) general regulation of trade affecting the whole Dominion. The relations of employer and employee, resulting in the production of articles which are the subjects of trade, and the use of property for that purpose, are not what is meant by the enumerated power referred to, which is directed, among other things, to the movement and interchange of commodities and their purchase and sale, but not to their production or manufacture, or any of the conditions dealt with by this Act, which result in that production.

I should hesitate to hold that jurisdiction could be founded on that expression so as to comprehend whatever makes trade and commerce possible. And this seems to be the effect of including, as arising out of or belonging to the domain of trade or commerce as commonly understood or defined, disputes between owners or operators of mining properties and of electric light, gas, water and power works and any group of persons, etc., acting together and whom the Minister of Labour considers to have interests in common.

Nor can I assent to the view that, if the real purpose and intent of an Act is to be found in relation to the peace, order and good government of the Dominion under the general power, and it invades provincial jurisdiction, it can be supported as one whose pith

## SESSIONAL PAPER No. 26

and substance has relation to "trade and commerce." Many acts relating to trade and commerce assist in preserving peace and order and aid in maintaining good government, but their constitutional validity must depend on one or other power, in which case different considerations at once arise according to which power is invoked.

In regard to the criminal law, it was urged in the latest case, *Attorney General of Ontario v. Reciprocal Insurers* (not yet reported), that if the true character of the section, 308 (c), was one regulating the exercise of civil rights, thus infringing the provincial jurisdiction, yet, the authority of Parliament in regard to criminal law being unlimited, it was valid as creating a crime. This device was rejected by the Judicial Committee on the ground earlier stated by Lord Haldane in the *Board of Commerce* case.

Mr. Justice Duff, in the *Reciprocal Insurance* case, says:—

"The claim now advanced is nothing less than this, that the Parliament of Canada can assume exclusive control over the exercise of any class of civil rights within the provinces, in respect of which exclusive jurisdiction is given to the provinces, under section 92, by the device of declaring those persons to be guilty of a criminal offence who, in the exercise of such rights, do not observe the conditions imposed by the Dominion. Obviously the principle contended for ascribes to the Dominion the power, in execution of its authority under section 91 (27), to promulgate and to enforce regulations controlling such matters as, for example, the solemnization of marriage, the practice of the learned professions and other occupations, municipal institutions, the operation of local works and undertakings, the incorporation of companies with exclusively provincial objects—and superseding provincial authority in relation thereto. Indeed, it would be difficult to assign limits to the measure in which, by procedure strictly analogous to that followed in this instance, the Dominion might dictate the working of provincial institutions and circumscribe or supersede the legislative and administrative authority of the provinces.

"Such a procedure cannot, their Lordships think, be justified, consistently with the governing principles of the Canadian constitution as enumerated and established by the judgments of this board. The language of sections 91 and 92 (which establish 'interlacing and independent legislative authorities,' *Great West Saddlery v. The King*, *supra*) being popular rather than scientific, the necessity was recognized at an early date of construing words describing a particular subject-matter by reference to the other part of both sections. As Sir Montague Smith observed, in a well-known passage in the judgment in *Citizens Insurance Company v. Parsons*, 7 A. C. at p. 109, 'The two sections must be read together and the language of one interpreted and, where necessary, modified by that of the other.' The scope of the powers received by the Dominion under item 27, section 91, is not to be ascertained by obliterating the context, in which the words are placed, in disregard to this rule."

If, therefore, this legislation is one substantially in relation to property and civil rights, this case applies and governs here.

I very much regret having to arrive at a conclusion adverse to the validity, in so far as it affects the respondent commission, of this Act. It has been a successful experiment in warding off industrial difficulties in many cases, all the more to be recognized in view of one of its provisions possibly thought to be unavoidable. Its capacity for service would, in my humble judgment, have been enhanced if it had provided an absolutely independent tribunal, instead of one in which two of the members are almost necessarily imbued with opposing views, and nominated by the contending parties. As its function is delay, consideration and publicity, its present shape practically compels the parties and the public to rely upon one member of the board who may happen to be chosen by the other two, and whose views may possibly be detached from the prepossessions of either side.

I think the appeal must be dismissed with costs and judgment entered for the respondents in the action, in accordance with these reasons, for the relief they seek, with costs.

At the time of writing, July 28, 1924, the counsel for the Toronto Electric Commissioners had appealed the decision of the First Appellate Division of the Supreme Court of Ontario direct to the Judicial Committee of the Privy Council in England and special leave to appeal had been granted by the King's order on July 25, 1924. The case will, no doubt, be heard by the Judicial Committee in the fall of 1924.

## PROPOSED AMENDMENTS OF INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

A Bill to amend the Industrial Disputes Investigation Act was introduced in the House of Commons on March 12, 1924, by the Minister of Labour. The amendments in question were identical with those which were before Parliament at the preceding session and which, although passing the House of Com-

15 GEORGE V, A. 1925

mons, were severely opposed in the Senate. At the close of the 1923 session, the Senate amendments having proved unacceptable to the House of Commons and the Bill having been dropped, the statute remained without amendments later than those of the year 1920.

The 1924 Bill also passed the House of Commons with little debate. In the Senate, however, an amendment to section 8 of the Act was again added to the Bill involving a principle to which the House of Commons would not agree. This conflict of opinion between the two Houses continued in spite of a conference of representatives of the Senate and House of Commons, and resulted in the dropping of the Bill.

The measure was explained in the Senate by the Honourable Senator Dandurand and was strongly upheld by him. After the second reading in the Senate the Bill was referred, on the suggestion of the Hon. G. D. Robertson, former Minister of Labour, to the Senate Committee on Railways, Telegraphs and Harbours, to enable parties interested in the proposed amendments to express their views. In support of his proposal Senator Robertson read a letter addressed to himself, and signed by representatives of 140,000 organized railway employees in Canada, with reference to the amending Bill (number 7). This letter was in part as follows:—

Although you have on several occasions clearly set forth in the Senate the views of labour on the principles of this legislation, as well as on the proposed amendments in Bill 7, it may be of interest to you to have at hand the opinions of the representatives of labour in Canada affected by this legislation.

It is not necessary at this time to refer in detail to the history of the legislation or the chief reasons for its enactment. Suffice it to say that during the time the Act has been in operation labour has generally accepted the principles of the Act and has co-operated in giving effect to its chief purpose "to aid in the prevention and settlement of strikes and lockouts in industries connected with public utilities." Generally speaking, this co-operation has continued, notwithstanding the fact that for many years the measure did not find popular favour among a large number of the workers affected. However, believing that in the public interest some legislative machinery should operate to insure ample opportunity for investigation and conciliation in industrial disputes, labour has gradually adapted itself to the principles and legal process of the Act, and is further willing that it should be continued, provided that its operation is made equitable to all concerned.

It would seem that during the discussion on this subject there has not been sufficient emphasis placed upon one of the fundamental principles of the Act, namely, conciliation. In order to maintain this spirit of conciliation before a board there should be equality of treatment under the Act. It is the adoption and acceptance of this principle by all parties concerned, both in the application for and subsequent to the appointment of a board, which is essential to the effective carrying out of, and wholesome respect for the Act.

That the Act has not always been used equitably in the matter of disputes between employers and workmen, because of unfair advantage being taken by employers of an omission inadvertently made in section 58, thus enabling employers to force changed conditions of employment for reduction in wages, contrary to the spirit and intent of the Act, is a matter of common knowledge to those conversant with the operation of the Act, especially within the past four or five years.

All that Bill 7 contemplates is to insure equality of advantage, as well as responsibility, under the operation of the Act. It cannot be consistently contended that any injustice or burden will be imposed upon the employer by the proposed amendment, unless he violates the Act. The employer should not entertain any fear of referring to a Board of Conciliation and Investigation any proposed changes in wages or working conditions, before making them effective, especially in view of the fact that employees have accepted this obligation for the past fifteen years.

Trusting that the honourable the Senate will see the consistency of concurring in Bill No. 7 as it passed the House of Commons, we remain,

Yours respectfully,

BYRON BAKER,

## SESSIONAL PAPER No. 26

The amending Bill affected sections 15, 57 and 58 of the Act. The first section related to cases in which the employers and employees were unable to come together because one of the parties had refused to enter into negotiations, the amendment providing that a sworn declaration to this effect by the employer, or by the workers' representatives, would afford sufficient grounds to the Minister to proceed with the formation of a Board of Conciliation and Investigation. The Senate agreed to this section without a division.

Section 2 was designed to amend the Act by placing clearly upon the party desiring the change the full responsibility for making an application for a Conciliation Board. Section 57 of the Act, to which this section applies, requires that the relations of the parties concerned are to remain unchanged pending proceedings before a board. The amendment consisted in the addition of a clause providing that "it shall be unlawful for the employer to make effective a proposed change in wages or hours, or for the employees to go on strike," until the dispute in question has been finally dealt with by a board; and in the further provision that "the application for the appointment of a board shall be made by the employers or employees proposing the change in wages or hours." This section was finally agreed to by a vote of 28 to 15.

An amendment to this section of the amending Bill, proposed by the Honourable Senator Bédard, was defeated by a vote of 31 to 13. This proposed amendment was explained by its mover as intending to give the employers or the employees "the right to change the conditions of employment after giving thirty days' notice to the other parties," the decision of the board to be retroactive. Senator Bédard's proposed amendment was as follows:—

It shall be unlawful for any employer, without the consent of a majority of the employees evidenced in writing, signed by them or their authorized representatives, or for any employee to make any change in the conditions of employment with respect to wages or hours, unless the party making the change has, within thirty days before doing so, applied for the appointment of a board to which the dispute shall be submitted, and, as regards wages, the board may declare its decision retroactive to any date not anterior to that on which the change was made. On the failure of either party to abide by the decision of the board, the other party may have recourse to a strike or lockout as the case may be.

Criticizing Senator Bédard's proposed amendment, the Honourable Mr. Dandurand said that it would result in a situation in which "the employer would give notice to the employees that he had applied for a board, and that thirty days hence he would reduce the wages. The board would then have to be organized, start its sessions, hear witnesses, and, if it had not succeeded in bringing the parties to an adjustment of their difficulties within those thirty days, then when the fatal hour intervened the conditions would be changed, the wages would be lowered, and the next day there would be a strike—just what the Act was to prevent."

In the course of the discussion on this section the Honourable Senator Robertson, former Minister of Labour, explained that the proposed amendments contained in the Bill were intended to meet the requests of the railway employees that the Act should be so changed as to apply equitably to all parties concerned. The railway employees made this request after the railway companies had, in 1921, forced upon the railway employees of Canada—about 200,000 in number—a loss of over two million dollars. While the employers had been able to reduce wages, the employees had hitherto, when they desired an increase, followed the procedure laid down in the Act. After discussion among themselves the employees would, having given the employer the required thirty days' notice, open negotiations with him. If an agreement had not been reached at the end of that time the employees had to apply for a board. For seventeen years, he said, they had complied with that law, and waited until the matter was referred to a board, and the board had made its report as the law required.

15 GEORGE V, A. 1925

In the course of the discussion the Right Hon. Sir George E. Foster, in opposing Senator Béique's proposal, paid the following tribute to the value of the Industrial Disputes Investigation Act as a reconciling force in the community:—

Everybody knows, and it has been acknowledged on both sides of this House, that from 1907 there began on the labour side a spirit of gradual approach towards the contemplation of that law as a thing which might be advantageous to labour and under which employees might work for their own benefit. They were absolutely suspicious of it at first, and they remained to a certain extent suspicious of it year after year, but gradually they overcame their prejudices, lost a good deal of their suspicion, and came to work under the law as well, I think, as any body of men have been induced to work under any law. They have, in the main, kept the spirit of the law. They have obtained its advantages and have suffered whatever disadvantages came to them through their compliance with the statute. Therefore we find to-day a mightily improved spirit as between these two vast sections of our people, upon whose good relations with each other depends so much that third body of the people, the main body, who are always affected one way or another by these disputes between capital and labour.

Section 3 of the amending Bill, amending section 58, the penalty section of the Act, so as to conform with the change in section 57, was passed without division.

The Honourable Senator Beaubien next proposed to limit to coal mines the operation of the Act in regard to mines. This proposal was defeated by 18 votes to 13.

#### JUDGES AS ARBITRATORS

On the third reading of the amending Bill the Hon. W. R. Ross moved the following amendment, which was identical with an amendment moved last year by the Hon. G. Lynch-Staunton, and which had been already during the present session proposed in committee by the Hon. Senator L. C. Webster and defeated on a vote of 16 to 14:—

4. (1) Subsection 2 of section eight of the said Act is hereby repealed and the following substituted therefor:—

"(2) If either of the parties fails or neglects to duly make any recommendation within the said period, or such extension thereof as the minister on cause shown grants, the Chief Justice of the province in which the dispute arose, or, if there be no such Chief Justice in that province, the Chief Justice of the highest court of last resort in civil matters in that province, or, in any case where the dispute did not arise in one province only, the Chief Justice of the Supreme Court of Canada, shall as soon thereafter as possible appoint a fit person to be a member of the board; and such member shall be deemed to be appointed on the recommendation of the said party."

(2) Section 4 of the said section eight is hereby repealed and the following substituted therefor:—

"(4) If the members chosen on the recommendation of the parties fail or neglect to duly make any recommendation within the said period, or such extension thereof as the minister on cause shown grants, the Chief Justice of the province in which the dispute arose, or, if there be no such Chief Justice in that province, the Chief Justice of the highest court of last resort in civil matters in that province, or, in any case where the dispute did not arise in one province only, the Chief Justice of the Supreme Court of Canada, shall as soon thereafter as possible appoint a fit person to be a third member of the board, and such member shall be deemed to be appointed on the recommendation of the other two members of the board."

(3) The following is hereby added to the said section 8 as subsection 6 thereof:—

"In subsections 2 and 4 of this section the expression 'Chief Justice' includes any judge duly authorized as and for the Chief Justice."

In support of the proposal Senator Ross said he had examined the arbitration acts in all the provinces of Canada and in Great Britain, and in every case, with the exception of the province of Quebec, it was provided that, if the parties concerned could not agree on an umpire, the appointment was to be made by a court. He claimed that the third man on a board should be "as impartial as it is possible for a man to be." "If the position of Minister of Labour."

## SESSIONAL PAPER No. 26

Senator Ross continued, "is occupied by a man in sympathy with labour, or if the government of the day is leaning that way, labour will in all probability have an advantage in the selection that would be made."

The proposed amendment was strongly opposed by the Hon. Mr. Dandurand and by the Hon. Mr. Robertson, who stated that the resulting delays in the operation of the Act would render it ineffective. On a division, however, the amendment was carried by a vote of 42 to 22, and the Bill, thus amended, was read the third time and passed.

## NON-CONCURRENCE BY HOUSE OF COMMONS

The Senate amendment was rejected by the House of Commons on July 7, on the ground that it introduced a new feature in the Bill, and would complicate rather than simplify procedure in connection with the administration of the Act.

The Minister of Labour, in moving the vote of non-concurrence in the Senate's amendment, made a statement similar to that made by him in 1923 when the same course was taken by the House of Commons. This statement was in part as follows:—

The statute as it stands provides for the selection of a chairman by joint agreement when possible of the other two members of a conciliation board, and requires that, where no agreement is reached, the minister shall make the necessary appointment. In about one-half of several hundred boards which have been established a chairman has been secured by agreement. It had become a general though not invariable practice for the Minister of Labour, when called upon to appoint a chairman, to select a judge, but this practice ceased when two or three years ago the Judges' Act was so amended as to prohibit the acceptance by a judge of the fees ordinarily payable to a chairman or member of a conciliation board. It is true that the Minister of Labour is not under the Judges' Act, as it has been amended, prohibited from asking a judge to act as a chairman, nor is a judge apparently prohibited from accepting a chairmanship; but since fees are no longer payable in such circumstances to a judge, it has not been thought reasonable as a rule to request a judge to undertake the duties involved in a chairmanship; such duties, it will be understood, are frequently of a severe and arduous nature and in nearly all cases are of the highest moment to employers and to large numbers of workmen, as well as frequently to the public. In two cases since the amendment of the Judges' Act, judges have been, however, appointed, once by the Minister of Labour of the late administration and once by the present Minister of Labour, but in the latter case the appointment was made on the joint recommendation of the other board members. In both cases the judges concerned accepted from a sense of public duty; no fees were of course paid them. It may be said that there is every advantage in a chairman being secured by joint agreement and the Minister of Labour appoints a chairman with reluctance. Inquiry shows that this has been the case with most previous ministers. The chances of an agreement are manifestly increased when a chairman is secured by joint request of other board members. The method or system, however, under which different Ministers of Labour have made appointments has not been the subject of any known criticism, and certainly the files contain no communications requesting or suggesting a change in the present practice.

The objections to the system laid down in the Senate amendment are obvious. In the first place, the appointment of a chairman by a Chief Justice, whether the Chief Justice of a province or of the Supreme Court of Canada, would entail inevitable delay. Such delays would be particularly unfortunate since, despite every effort under present procedure, one side or other of the disputing parties is sometimes disposed to object to the time necessarily occupied in procedure. In the second place, a Chief Justice or other judge cannot possibly be as intimately seized of the nature of the dispute involved and of the particular type therefore of man wanted for the chairmanship as would be the Minister of Labour, who has established the board and has been in touch with details of procedure from its inception. It would be impossible to convey to a judge at a distant point by correspondence, which would of necessity be as a rule by telegraph with consequent serious expenditure and some danger of inaccuracy, all the particulars which should be properly at hand to enable the judge to reach a correct conclusion as to the type of person apparently best suited for the important duties involved. The judge would exercise his best judgment and the appointment might or might not prove to be a good one. In any case the minister who is charged with the administration of the statute would be freed from responsibility on this most vital aspect of administration and the judges would become

involved in the technicalities of departmental procedure. Since a considerable proportion of the disputes dealt with under the statute extend to two or more provinces, the task of naming the chairman of conciliation boards would under the proposed Senate amendment fall most frequently to the Chief Justice of the Supreme Court, who from the nature of his functions may be presumed to be furthest removed from contact with industrial disputes and necessarily therefore the more dependent on the advice of others as to the type of person best suited for a chairman in a particular case. Despite the high legal and other attainments which a Chief Justice would undoubtedly possess, it is submitted that, in addition to the complication and delays in procedure which the proposed system of appointing chairmen would entail, the suggested change would be highly detrimental to the successful administration of the statute.

The Senate, on the return of the Bill from the House of Commons, resolved, by a vote of 34 to 10, to insist upon their amendment, for the following reasons:—

The amendment of the Senate must be read with the other amendments to the Industrial Disputes Investigation Act which impose heavy penalties in certain contingencies. The employer and the employees will each have a representative on the board, and it is in accord with natural justice that the third arbitrator should be chosen, as far as is legislatively possible, by a method that will guarantee an appointment free of political or economic influences. The amendment is fair and just to both parties to disputes arising under the Industrial Disputes Investigation Act.

A free conference was subsequently held between representatives of the two Houses, in order, if possible, to effect a compromise in regard to the Senate's amendment. No agreement or understanding, however, was reached as a result of this conference, and accordingly the Bill was dropped.

## II. CONCILIATION WORK

In addition to the administration of the Industrial Disputes Investigation Act, the services of the Department of Labour were utilized during the year in connection with the settlement of a number of labour disputes. In some instances the Minister of Labour assisted personally, and in other cases the good offices of the department were exerted through the fair wages officers who are stationed at different industrial centres. The officers in question are: Mr. Theo. Bertrand, stationed at Montreal; Mr. E. N. Compton, stationed at Toronto; Mr. F. E. Harrison, stationed at Vancouver. Mr. E. McG. Quirk, of Montreal, though not actually an officer of the department, acted on various occasions as a special representative in connection with conciliation work in Quebec and the Maritime Provinces.

Mr. F. E. Harrison, who had been for a number of years stationed at Calgary, was moved to Vancouver, and, in addition to his charge of departmental matters in British Columbia, has continued to keep in touch with labour questions in Alberta and Saskatchewan, particularly in connection with disputes occurring from time to time in the coal fields of Alberta and eastern British Columbia.

Mr. D. T. Bulger, who had represented the Department of Labour at Vancouver, and Mr. W. D. Killins, who had been employed at Ottawa for a number of years as fair wages officer, retired from the service.

As in preceding years, close attention was given by the Department of Labour to questions occurring in the coal fields of both Eastern and Western Canada. Mr. F. E. Harrison succeeded Mr. D. T. Bulger as chairman of the Cost of Living Commission which was established in 1918 on the request of the coal miners and operators of Vancouver island to deal with the cost of living and wages matters there. The other members of this commission are Mr. Tully Boyce, on behalf of the coal mine operators, and Mr. Matthew Gunniss, on behalf of the miners. Four reports were submitted by this commission during the year dealing with the cost of living for the quarters ending March 31, 1923; June 30, 1923; September 30, 1923; March 31, 1924. It was understood that wages adjustments were made in a number of coal mines of Vancouver island in accordance with the reports of the Cost of Living Commission.

In Alberta and eastern British Columbia the wage contract between the Western Canada Coal Operators' Association and District 18 of the United Mine Workers of America expired on March 31, 1924, and a cessation of work occurred in the collieries controlled by the members of the Western Canada Coal Operators' Association. Prior to that time negotiations were entered into between the contracting firms with a view to the renewal of the former agreement, but the coal miners declined to accept a proposed reduction of \$1.17 per diem from the pay of all contract and wage employees. This amount represented the increases which had been awarded to the miners by a Cost of Living Commission and by agreement during the years 1917-1920. Mr. F. E. Harrison, of the Department of Labour, was in Calgary during these negotiations and endeavoured by conference with the parties to prevent an interruption of coal mining operations. His efforts in this direction proved unavailing and over 8,000 miners employed in thirty of the leading collieries of southern Alberta and of eastern British Columbia participated in the strike which occurred at the end of March and which continued for months thereafter until a settle-

ment was finally reached through the mediation of the Minister of Labour of Canada, the Hon. James Murdock, and the Prime Minister of Alberta, the Hon. Herbert Greenfield, in the month of October following. Mr. Harrison's services were also exercised in connection with this settlement.

Several industrial disputes occurred in connection with the erection of grain elevators at Vancouver and Edmonton, which were, however, adjusted without stoppage of work. The good offices of Mr. Harrison were utilized in this connection and also in connection with the settlement of a strike of longshoremen to the number of 1,500 which occurred at Vancouver in October and November, 1923. A strike of the steam and operating engineers which occurred on the Government dry dock at Esquimalt was also adjusted through the intervention of the Department of Labour. Mr. Harrison visited southeastern British Columbia during the months of January and February, 1924, in connection with labour disturbances which had occurred in the lumber camps and which had caused a cessation of work in this industry for a period of several weeks. Eventually the lumber companies were able to secure men from the Prairie Provinces and operations were resumed thereupon.

Following charges made in the House of Commons that a pulp and paper manufacturing company at Powell River, B.C., had denied employment to its workmen, members of the International Brotherhood of Paper Makers, Mr. Harrison visited Powell River on instructions from the Minister of Labour for the purpose of investigating the employees' complaints and bringing the same to the company's attention. The charge of discrimination was denied by the company. An effort was also made by mutual explanations to promote good relations between the company and its operatives.

Mr. E. N. Compton, apart from the duties of his position as fair wages officer, lent his assistance to the Department of Labour in connection with the avoidance and settlement of various industrial disputes during the last fiscal year. A very large part of Mr. Compton's time was, however, taken up in connection with labour questions occurring on the contracts for the Welland Ship Canal, which are dealt with in another chapter of the present report.

Reference is made in the chapter of the present report dealing with the work of the Statistical Branch to the strike of the steel workers at Sydney, N.S., which occurred in the summer of 1923, and to the sympathetic strike of coal miners which was declared in connection therewith. Mention is also made in this other chapter to the strike of coal miners in Nova Scotia which occurred in January, 1924. The Department of Labour was in close touch with these occurrences, and efforts were made to assist the parties in reaching amicable settlements of the subject-matters in dispute.

Reference was made in the last report to a walk-out of a large number of employees of the Dominion Iron and Steel Company at Sydney which occurred on February 13, 1923, and which was caused by the discharge of a helper in the nail mill. This strike lasted four days and was settled by a promise of inquiry into the circumstances attending the dismissal. From the time of this strike until the following summer unrest among the workers in the steel plant was more manifest. Negotiations regarding wages, hours and union recognition occurred during the spring, and an increase of 10 per cent in wages was announced by the company in the middle of April. A strike of the company's employees was declared, however, by the union on June 28 for further wage increases, recognition of the union (including the check-off) and an eight-hour working day. Following certain disturbances of the peace, detachments of soldiers and provincial police were sent to the scene from Halifax. The aid of the militia force was also invoked on requisition of the County Judge. The strike of steel workers continued from June 28 to August 3. On July 3 the coal miners employed by the Dominion Coal Company and the Nova Scotia Steel and Coal Company

## SESSIONAL PAPER No. 26

went on strike in protest against the presence of the militia, and on July 17 the International President of the United Mine Workers of America revoked the charter of District 26, comprising the coal fields of Nova Scotia and New Brunswick, and replaced the district officials by others. International organizers of the United Mine Workers were also sent to Nova Scotia. Between July 19 and July 24 various locals of the employees' union voted to return to work, and within a few days the strike was formally called off on directions from the Provisional District President.

A representative of the Department of Labour visited Cape Breton during the occurrence of these disputes, and a Royal Commission was appointed by Order in Council on September 22 to inquire into the recurring industrial unrest among the steel workers at Sydney, N.S., "creating conditions which have occasioned the calling out of the active militia in aid of the civil power and their retention for a considerable period of time in the areas affected." This commission was composed of Dr. James W. Robertson, C.M.G., of Ottawa, as chairman, Mr. J. J. Johnston, K.C., of Charlottetown, P.E.I., and Mr. Fred. Bancroft, of Toronto. The commissioners held public sessions at Sydney, where 144 witnesses were examined, representing all interests concerned. The unanimous report of the commission was issued on February 9, 1924, and was printed as a supplement to the February number of the *Labour Gazette*. The commissioners, in the concluding portion of their report, made the following recommendations:—

## RELATIONS BETWEEN THE COMPANY AND THE EMPLOYEES

The commissioners are of the opinion that the absence of any recognized organized means through which representatives of the men could confer with representatives of the company prevented the development of amicable relations; and the commissioners are further of the opinion that the employees' representatives plan with a general works committee and other committees, which is now in effect on the plant, is a means whereby the management and the employees can get together to confer upon questions of mutual interest and obligation and seek their settlement by full frank discussion. Such contacts and conferences are not intended to impose settlements but to promote agreements and to provide regular and recognized opportunities in which mutual understanding can be promoted, confidence developed and co-operating good-will brought into play in the relations between the company and the workmen.

## HOURS OF LABOUR

The commissioners are of the opinion that the hours of labour have been excessively long in some departments of the plant under the two-shift system of operation.

The commissioners recommend that, in the interests alike of the company and the workmen, early and earnest attention be given to the elimination of the twenty-four-hour change-over period and to the abolition of the seven-day week.

The commissioners recommend that the question of adopting the three-shift plan (eight hours per shift) in the departments of continuous processes and a maximum of a ten-hour day for other workmen be given the most careful consideration. In our opinion the change would be advantageous to the company and beneficial to the men, and should be adopted.

## WAGES AND UNEMPLOYMENT

The commissioners are of the opinion that the iron and steel industry of Sydney can be carried on successfully and amicably in such a way as to meet the reasonable desires and requirements of the workmen and the company.

Since the steel industry is one which has been characterized by intermittent periods of prosperity and depression, the commissioners recommend that in the interests alike of the shareholders and the employees the company should discuss with representatives of the employees the question of drawing to some extent upon the surplus accumulated during fat years to tide the workmen as well as the shareholders over lean years when changes in rates of wages are in contemplation and when the prospect of regular employment is not good.

As an alternative, the commissioners recommend that in the public interest some competent authority be directed to investigate and report upon the use which is made of such surplus funds of the company.

## CALLING OUT OF THE MILITIA

The commissioners are of the opinion that the local police force was entirely inadequate to deal with the situation which had occurred at Sydney, that a riotous condition of mob rule prevailed for some days and nights and that the presence of the militia was necessary and beneficial.

The commissioners are of opinion that it is desirable that the Militia Act should be amended in such a manner as to provide that a requisition requiring the active militia to be called out for active service in aid of the civil power may be made only by a judge and the Attorney General of a province acting jointly in making the same and that the requisition should contain a statement by the Attorney General of the province to the effect that he shall as soon as possible, and not later than one week thereafter, cause an inquiry to be made into the circumstances which occasioned the calling out of the active militia and send a report upon the same to the Minister of National Defence.

Legislation giving effect to the recommendations of the commission with respect to the calling out of the active militia in aid of the civil power was passed at the 1924 session of Parliament.

On the expiry on January 15, 1924, of the agreement between the British Empire Steel Corporation and its coal miners, a strike occurred of the latter, which involved 9,625 employees in the following localities: Glace Bay, Sydney Mines, Thorburn, Stellarton, and Springhill. Negotiations had previously been in progress for a new agreement in which the employees contended for the restoration of the 1921 wage scale, which would mean an increase of about 20 per cent. The company posted a notice on January 15 announcing a reduction in wages of 20 per cent. Negotiations for a settlement were resumed in the first week of February, and a settlement effective for one year was reached in Montreal on February 11 between representatives of the British Empire Steel Corporation and of the United Mine Workers of America, including certain of the provisional officers of District 26. Mr. E. McG. Quirk, of Montreal, special representative of the Department of Labour, assisted as an intermediary in connection with these negotiations in Montreal.

Mr. Quirk's services were also utilized in connection with the settlement of labour difficulties in Montreal and Thetford Mines, Que., and in St. John, N.B.

### III. FAIR WAGES

As a result of experience gained in the administration of the fair wages policy of the Government of Canada, as set forth in the Order in Council of June 7, 1922 (see Annual Report, 1922, pages 42-46), certain amendments were made in this Order in Council on April 9, 1924, on recommendation of the Minister of Labour, which, without altering the scope and intent of the policy, are intended to make its purpose clearer and more definite.

The amendments in question apply to the "A" conditions of the fair wages Order in Council which are observable in connection with all contracts for the construction or remodelling of public buildings of all kinds, railways, canals, roads, bridges, locks, dry docks, elevators, harbours, piers, wharves, lighthouses, and other works for the improvement and safety of transportation and navigation, rifle ranges, fortifications, and other works of defence, dams, hydraulic works, slides, piers, booms, and other works for facilitating the transmission of timber, and all other works and properties constructed or remodelled for the Government of Canada; the like conditions are also observable as far as practicable in connection with all agreements made by the Government involving the grant of Dominion public funds in the form of subsidy, advance, loan, or guarantee for any of the purposes mentioned. The changes sanctioned by the amending Order in Council affect sections 2, 3, and 5 (a) of the "A" conditions. Under the fair wages policy, as it has been administered during the past twenty-four years, the Minister of Labour has been authorized to render a final decision in connection with any dispute arising as to wages or hours. The principal changes made in the policy are intended to secure more effective provision for the enforcement of the labour provisions of government contracts in this respect.

In the case of all contracts to which the "A" conditions apply, the department of the Government concerned is required to communicate to the Department of Labour the nature of the proposed contract and the classes of labour likely to be required in its execution. The Labour Department is charged with the preparation of schedules setting forth the rates of wages and hours of labour generally accepted as current, for competent workmen of the various classes required, in the district in which the work is to be performed. This fair wage schedule is thereupon embodied in the contract. In any cases where the Department of Labour is unable to furnish fair wages schedules for the purpose aforesaid, authority is given for the insertion in the contract of a general fair wage clause calling for the observance of the current wage rates and hours of the district. The general fair wage clause of the amended Order in Council reads as follows:—

All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine, for the purposes of this contract, what are the current or fair and reasonable rates of wages, and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend or vary any such decision, provided that his determination and any

amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof. Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the contractor and any such payment shall for all purposes as between the contractor and the Government be deemed and taken to be payment to the contractor, and the contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

The fair wages policy of the Government of Canada has been in effect since 1900 and is based on a resolution of the House of Commons which was adopted at the session of 1900 as follows:—

"That it be resolved, that all government contracts should contain such conditions as will prevent abuses which may arise from the subletting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the district where the work is carried out, and that this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect thereto.

"It is hereby declared that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all works aided by grant of Dominion public funds."

During the year 1923-24 the Department of Labour prepared fair wages conditions in connection with the execution of 79 contracts. These are divided among the different departments of the Government as follows: Public Works Department, 43; National Defence, 2; Interior, 2; Trade and Commerce, 1; Marine and Fisheries, 10; Indian Affairs, 11; Railways and Canals, 10.

#### WORKS FOR WHICH FAIR WAGES CONDITIONS PREPARED

The following tables give particulars regarding fair wages conditions prepared in the Department of Labour during the fiscal year 1923-24:—

## SESSIONAL PAPER No. 26

## DEPARTMENT OF PUBLIC WORKS

Nature of Work	Locality	Date fair wages supplied by Department	Amount of Contract	Issue of Labour Gazette in which fair wages conditions published	Vol.	Page
Reconstruction of Parliament Buildings.	Ottawa, Ont.	May 22, 1923	\$.....		XXIV	168
Alterations to a public building.	Windsor, Ont.	May 16, 1923	\$4,100		XXIV	1300
Repairs to quarantine building on the island in the harbour of St. John.	St. John, N.B.	May 12, 1923	\$3,589		XXIII	1149
Repairs and alterations to public buildings.	Montréal, Que.	May 14, 1923	\$7,638		XXIII	1300
Repairs and alterations to public buildings.	Quebec, Que.	May 21, 1923	\$6,600		XXIII	1419
Erection of heating plants.	Pierrreville, Que.	May 22, 1923	\$1,985		XXIII	1150
Erection of heating plants.	Moose Jaw, Sask.	May 17, 1923	\$10,960		XXIII	1421
Reconstruction of asphalt roadway around the Parliament Buildings.	Prince Albert, Sask.	May 26, 1923	\$2,888		XXIII	1149
Building construction.	Ottawa, Ont.	May 17, 1923	\$ 8,774 34			
Installation of a new heating plant at Sts. Anne de Bellevue Hospital.	Winnipeg, Man.	May 21, 1923	\$12,987 00			
Construction of Calgary Examining Warehouse.	St. Anne de Bellevue, Que.	May 28, 1923	\$12,475		XXIII	1149
Alterations to heating of public building.	Calgary, Alta.	June 6, 1923	\$9,500		XXIII	1420
Installation of a new boiler in government premises Nos. 22-24 Adelaide St. E.	Maple Creek, Sask.	June 6, 1923	\$1,850			
Roofing of public building.	Toronto, Ont.	June 13, 1923	\$2,297		XXIII	1150
Improvements to heating apparatus in Dominion public building.	Charlottetown, P.E.I.	July 10, 1923	\$2,860		XXIII	1420
Improvements to heating apparatus in Dominion public building.	Regina, Sask.	July 17, 1923	\$4,064		XXIII	1420
Improvements to heating apparatus in Dominion public building.	Weyburn, Sask.	July 17, 1923	\$2,460		XXIII	1418
Improvements to heating apparatus in Dominion public building.	Edmonton, Alta.	July 17, 1923	\$8,203		XXIV	55
Addition to dormitories, Royal Military College.	Lethbridge, Alta.	July 17, 1923	\$8,740		XXIII	1420
	Kingston, Ont.	July 16, 1923	\$103,000 and \$14 per cubic yard for additional concrete required.		XXIV	56
Work on Immigration building and post office.	Quebec, Que.	July 27, 1923	\$26,500		XXIII	1421
New buildings and additions at Central Experimental Farm.	Ottawa, Ont.	July 25, 1923	\$12,000 \$24,084 \$18,205			
Reconstruction of drill hall and public building.	Haileybury, Ont.	Aug. 1, 1923	\$31,979		XXIV	163
Alterations to Postal Station "K".	Alexandria, Ont.	Aug. 4, 1923	\$12,490			
Various trades for Negro Point breakwater.	Toronto, Ont.	Sept. 1, 1923				
Cribwork, pile sheathing and dredging.	St. John, N.B.	Nov. 24, 1923				
	Rimouski, Que.	Nov. 24, 1923	Unit prices as set forth in contract.		XXIV	169

## DEPARTMENT OF PUBLIC WORKS—Concluded

Nature of Work	Locality	Date fair wages conditions supplied by Department	Amount of Contract	Issue of Labour Gazette in which fair wages conditions published
Reconstruction of a public wharf and dredging a basin and boat channel.	Pembroke, Ont....	Nov. 28, 1923 ..	\$110,713 50	Vol. XXIV
Extension to headblock of wharf.....	Tadoussac, Que.	Dec. 1, 1923	\$2,800 for preparing bot- tom and filling pier site with stone, and \$3.58 per cubic yard for crib- work completely filled, including fenders, cop- ing, mooring posts, etc.	240
Addition to Archives building.....	Ottawa, Ont....	Oct. 31, 1923	\$294,787 and 84 per cubic yard for extra excav- ation, \$12 per cubic yards for extra concrete forms.	XXIV 169
Construction of a potato shed.....	St. John, N.B.....	Dec. 12, 1923	\$25,153 25	
Repairs to dredge Q. and R. No. 1 now on lake Ontario	Lake Ontario	Dec. 13, 1923	\$24,352 57	
Completion of third section of Steveston jetty.....	Steveston, Fraser river, New Westminster	Dec. 17, 1923	Unit prices.....	XXIII 186
Construction of new public building.....	Kamloops, B.C.....	Jan. 2, 1924	\$69,876	
Reconstruction of public wharf.....	Lefavre, Co. of Prescott, Ont.	Dec. 20, 1923	Unit prices as set forth in contract.	XXIV 240
Reconstruction of the approach to the pierhead of Young wharf.....	Caraquet, Gloucester Co., N.B.....	Jan. 7, 1924 ..	\$25,997 50	
Seed building for Department of Agriculture.....	Toronto, Ont.....	Jan. 10, 1924	\$43,834	
Construction of a wharf.....	Robichaud (Savoy) Landing, Shippigan Island, Co. of Gloucester, N.B.	Jan. 12, 1924	\$ 9,814	
Repairs to breakwater.....	Port Greville, Cumberland Co., N.S.....	Jan. 16, 1924	\$31,627 89	
Extension to outer end of West wharf.....	Pelee Island, Essex Co., Ont.....	Jan. 18, 1924	\$32,757 50	
Construction of breakwater wharf.....	Broad Cove Marsh, Inverness Co., N.S.....	Jan. 31, 1924	\$ 7,329 35	
Construction of a breakwater.....	Portuguese Cove, Halifax Co., N.S.	Feb. 12, 1924	\$15,203 10	
Construction of wooden highway bridge and road diver- sion.	Grand Etang, Inverness Co., N.S.....	Feb. 20, 1924	\$10,061 41	

## DEPARTMENT OF NATIONAL DEFENCE

Radio test hut.....	Rockcliffe Rifle Range, Ottawa, Ont.....	Aug. 1, 1923	\$3,303 00.
Reconditioning old power house, Sydenham Hospital, as a vehicle shed.	Kingston, Ont.....	Feb. 8, 1924	\$14,600 00.

## SESSIONAL PAPER No. 26

## DEPARTMENT OF THE INTERIOR

Construction of road way.....	Jasper Park, Alta.....	April 18, 1923.....	\$17,113 94.
Hauling of materials, cutting, clearing and grubbing of right of way, ploughing of a fireguard and erection of a fence around the extension to Elk Island Park.	Elk Island Park, Alta.....	May 21, 1923.....	\$15,627 98.

## DEPARTMENT OF TRADE AND COMMERCE

Erection of government elevator.....	Edmonton, Alta.....	Mar. 13, 1924.....	\$1,297,729 00.
--------------------------------------	---------------------	--------------------	-----------------

## DEPARTMENT OF MARINE AND FISHERIES

Construction of wooden range towers.	Reelfoot Point, Louisburg, N.S.....	May 11, 1923.....	\$3,400 00.
Wooden dwelling and lighthouse.....	Point Pelee, Gaspe Co., Que.....	June 21, 1923.....	Matter deferred.
Wooden dwelling and concrete tower.....	Louisburg, N.S.....	June 28, 1923.....	\$18,100 00.
Wooden dwelling.....	Seatur Island, Cape Breton, N.S.....	June 28, 1923.....	\$12,500 00.
Reinforced concrete tower.....	Cape Sable, N.S.....	June 28, 1923.....	\$10,800 00.
Fog alarm building.....	Green Island, Richmond Co., N.S.....	Aug. 3, 1923.....	Matter deferred.
Construction of wooden building.....	Riviere a la Marie, Gaspe Co., Que.....	Aug. 21, 1923.....	Matter deferred.
Erection of fog alarm building.....	Western Head, Queen's Co., N.S.....	Nov. 13, 1923.....	Contract not yet awarded.
Erection of sheds and mast lights.....	Sturgeon River, Ont.....	Feb. 18, 1924.....	Contract not yet awarded.
Construction of sheds and mast lights.....	Irwins Point, Wolfe Island, Co. of Frontenac, Ont.	Mar. 4, 1924.....	Contract not yet awarded.

## DEPARTMENT OF INDIAN AFFAIRS

Erection of a small hospital.....	Blackfoot Indian Reserve, Alta.....	May 11, 1923.....	\$22,425 00.
Erection of a three room day school on Indian Reserve.	Penttichon Indian Reserve, B.C.....	April 30, 1923.....	\$2,828 00.
Erection of cow and horse barn at Qu'Appelle Indian Industrial Institute.	Bersimis, Saguenay Co., Que.....	May 7, 1923.....	\$28,980 00.
Erection of Indian residential school.....	Qu'Appelle, Sask.....	May 22, 1923.....	\$10,692 00.
Erection of a barn for the Old Sun's Indian Boarding School.	Kamloops, B.C.....	June 9, 1923.....	\$88,987 00.
Erection of an Indian residential school.....	Blackfoot Reserve, Alta.....	June 19, 1923.....	\$10,350 00.
Erection of a teachers' residence.....	Blood Indian Reserve, Alta.....	June 23, 1923.....	\$123,000 00.
New heating system at Mount Virgin Institute.....	Tobique Indian Reserve, N.B.....	June 16, 1923.....	\$16,475 00.
Construction of gravel road.....	Muncy, Ont.....	June 21, 1923.....	\$0,600 00.
Erection of cow and horse barn.....	Tyendinaga Indian Reserve near Deseronto, Ont.	July 12, 1923.....	\$3,000 00.
	St. Georges Industrial School, Lytton, B.C.	Aug. 13, 1923.....	\$10,000 00.

## DEPARTMENT OF RAILWAYS AND CANALS

Nature of Work	Locality	Date fair wages conditions supplied by Department	Amount of Contract	Issue of Labour Gazette in which fair wages conditions published
Supply and erection of a highway steel fixed bridge over old Welland Canal.	St. Catharines, Ont.	Aug. 1, 1923.	\$4,033	Vol. XXIII 1153
Improvements to upper entrance.	Rapide Plat Canal.	Aug. 29, 1923	Schedule rates.	XXIII 1153
Repairing and resurfacing roadways and bridge approaches along canal.	Welland Canal, Ont.	Aug. 29, 1923	Schedule rates.	XXIII 1301
Construction of storage annex to the Port Colborne elevator.	Port Colborne, Ont.	Aug. 31, 1923	\$376,000	XXIII 1301
Concrete paving.	Port Dalhousie, Ont.	Sept. 18, 1923	No contract awarded.	
Erection of grain elevator.	Halifax, N.S.	Oct. 6, 1923	No contract awarded.	
Construction of Donnacona cut-off.	Grand Mere Division of Canadian Northern Railway to Mile 16 on the 1st	Nov. 26, 1923	\$177,175 00.	
	Tuque Sub-division of the National Trans-continental Railway.			
Supply and erection of the superstructure of two highway steel fixed bridges.	Laceline Canal, Que.	Dec. 28, 1923	\$5,275	XXIV 241
Deepening and improving the north entrance	St. Peters Canal.	Jan. 26, 1924	\$56,819 00.	
Construction of Section 8.	Welland Ship Canal.	Feb. 11, 1924	Schedule rates.

Supplying waterproof capes.....	350 00
Supplying cloth caps and waterproof covers.....	1,113 00

## FAIR WAGES COMPLAINTS ON GOVERNMENT WORKS

Complaint was made to the Department of Labour in various instances during the past year that contractors for government works were not complying with the fair wage requirements of their contracts. Most of these complaints related to alleged non-payment of the wages rates contemplated in the contract, the requirement in each case being that the contractor should pay the workpeople the rates of wages current in the district for the various classes of labour employed. In some cases the inquiry showed that the claims were not justified; in all instances, however, in which the complaints were well founded action was taken by the Department of Labour to uphold the rights of the workmen concerned.

As in the preceding year the principal complaints related to the contracts for the construction of the Welland Ship Canal, which is the largest public work under way in Canada at the present time. The construction of this canal was

begun in 1913. The work was discontinued during the later stages of the Great War, but was resumed later by the Department of Railways and Canals. Contracts for the completion of Sections 1, 2, 3, 4 and 5 were subsequently let and provision made by the Dominion Government in all cases for the observance of the rates of wages and hours of labour current in the district for the different classes of workmen employed. A contract was let in the month of February, 1924, for Section 8 of the Welland Ship Canal, which includes Lock No. 8, supply weir, the Lake Erie entrance and the extension of the western breakwater of the canal. Work on this section was only being started at the close of the fiscal year.

On account of disputes which had arisen on the Welland Ship Canal work, the Minister of Labour issued a ruling in the month of June, 1923, regarding the wages rates and hours of labour of the different classes of workmen employed. The rates and hours sanctioned by the minister were based on those current in the district in which the work was being executed. The schedule was not, however, put into effect at once by the contractors in all cases and an inspection was made subsequently, under the direction of the Minister of Labour, of the contractors' books to ascertain the exact situation. Payment was made by the contractors accordingly to individual workmen who had received less than the rates approved by the Minister of Labour, and workmen employed in excess of the hours set out in the schedule were paid for their additional service at the rate of time and one-half.

## SESSIONAL PAPER No. 26

TABLE of Fair Wages Complaints on Government Works and Disposition thereof during the fiscal year ending March 31, 1924

Complaint received	Locality and public work	Department affected	Subject of Investigation	Disposition
April 2, 1923	Brookton Point, Stanley Park, B.C. Steno retaining wall.	Public Works	Alleged that stonemasons were receiving less than the prevailing rate of wages.	The matter was investigated by an officer of the Department of Labour and it was found that the complaint was justified. Instructions were given by the Department of Public Works for the payment of current wage rates for stone masons in that district.
May 10, 1923	Kingston, Ont. Locomotive works.	Canadian National Railways.	Request that fair wage conditions be inserted in the contract for this work.	Settlement reached by agreement.
May 19, 1923	Montreal, Que. Harbour work.	Marine and Fisheries	Alleged that the prevailing rates of wages were not being paid.	Investigation of the complaint was made by officers of the Department of Labour and the matters in question were determined by union agreement between the Harbour Commissioners and the employees' union.
June 5, 1923	Halifax, N.S.	Public Works	Alleged that the prevailing rate of wages was not being paid to labourers.	Investigation showed that the complaint was based on incorrect information.
June 10, 1923	It. A. Park.	Canadian National Railways.	Alleged that carpenters were not receiving the current rates of the district.	The matter was referred to the Canadian National Railways and an investigation showed the complaint was not justified.
June 23, 1923	St. John, N.B. Work on freight sheds.	Canadian National Railways.	Alleged that bricklayers, masons and plasterers were not receiving the prevailing rate of wages.	Matter was referred to the Canadian National Railways for attention.
June 23, 1923	Vancouver, B.C. Esquimaux Dry Dock.	Public Works	Complaint was made that steam and operating engineers were not receiving the current wage rates.	The matter was investigated by a departmental officer and, following a ruling given by the Minister of Labour, settlements were made by the employer with certain workmen who had received less than the rates current in the district.
Aug. 21, 1923	Vancouver, B.C. Dry Dock.	Public Works	Alleged that certain workmen employed on the railway were not receiving the prevailing rate of wages.	Investigation by an officer of the Department of Labour showed that the complaint was due to individual workmen concerned.
Sept. 15, 1923	Quebec, Que. St. Malo Shops.	Canadian National Railways.	Alleged that bricklayers were not receiving the current rates of the district.	Matter was referred to the Canadian National Railways for attention.
Oct. 16, 1923	Long Lac, Ont. Construction of railway lines.	Canadian National Railways.	Alleged that station men did not receive proper settlement for their work.	The matter was taken up with the Canadian National Railways, also with the contractors, and an adjustment was understood to be under way at the close of the year.
Nov. 20, 1923	Port Colborne, Ont. Government elevator.	Public Works	Alleged that the current wage rates and hours of the district were not being observed for the district concerned.	Investigation was made by an officer of the Department of Labour and a schedule of wages was sanctioned by the Minister of Labour covering the classes of labour in the district.
Dec. 4, 1923	Fruitland, Ont. Road construction.	Trade and Commerce	Alleged that prevailing rates were not being paid.	The matter was referred to the Minister of Provincial Works and Highways.
Dec. 17, 1923	Edmonton, Alberta. Government elevator	Trade and Commerce	Alleged that prevailing rates of wages were not being paid to certain classes of labour and that they were working longer hours than were current in the district.	Schedule of wages and hours prepared by the Department of Labour and accepted by the contractor.
Dec. 28, 1923	St. Catharines, Ont. Freedom of freight shed.	Canadian National Railways.	Alleged that carpenters were not being paid the prevailing rate of wages.	The matter was referred to the Canadian National Railways for attention.
Dec. 29, 1923	Ontario Retaining wall, Rideau Canal.	Railways and Canals	Alleged that the prevailing rate of wages was not being paid to labourers.	The matter was taken up with Department of Railways and Canals and payment was made of certain wage claims.
Dec. 31, 1923	Ottawa, Ont. Archives Building.	Public Works	Alleged that the prevailing rate of wages was not being paid to labourers.	Investigation showed that the complaint was based on incorrect information.
Feb. 12, 1924	Blind River, Ont. Wharf.	Public Works	Alleged that the contractor was not paying the current rate for common labour.	The current rate of the district was ascertained by inquiry and settlements were made by the contractor with certain workmen who had received a lower rate.
Feb. 11, 1924	Port Stanley, Ont. Government pier.	Public Works	Alleged that workmen were performing country work at less than the current rate of wages.	Investigation showed that the complaint was not justified.

TABLE of Fair Wages Complaints on Government Works and Disposition thereof during the fiscal year ending March 31, 1924.—*Concluded*

Complaint received	Locality and public work	Department affected	Subject of Investigation	Disposition
Mar. 7, 1924	Halifax, N.S. .... Trancona Hospital, Dartmouth Pier	Public Works .....	Alleged that the current rates of wages were not being paid.	Investigation showed that the complaint was not justified.
Mar. 15, 1924	Malleybury, Ont. .... Wharf.	Public Works .....	Complaint was received that carpenters were not receiving the current rates of the district.	An investigation was made by an officer of the Department of Public Works and it was found that the claim was not justified.
Mar. 24, 1924	Kinston, Ont. .... Barrack Stables	National Defence .....	Alleged that a plumber was not receiving the current rate of wages.	Investigation showed that the complaint was not well founded.
April 9, 1923	Welland Ship Canal .....	.....	Alleged that iron workers employed on the canal contracts were not receiving the current rate of wages of the district.	The current rate of wages payable under the contract was determined by the Minister after inquiry by an officer of the Department of Labour and this rate was put into effect by the contractors.
May 25, 1923	Welland Ship Canal .....	.....	Complaint was made that carpenters had not received the current rate of wages in the district.	The current rate of wages payable under the contract was determined by the Minister of Labour after inquiry by an officer of the department. The rate fixed by the Minister was disputed by the contractors, but was later put into effect, and payments were made to various workmen accordingly.
Oct., 1923. Mar., 1924*	Welland Ship Canal .....	.....	Complaint was received from many individual workmen that they had not received the current rate of wages and that the contractors had not paid proper rates for overtime.	An examination was made of the contractors books by officers of the Department of Labour and cheques were issued to a large number of individual workmen for the additional amounts due to them, including payment at time and a half for overtime.
Jun. 4, 1924	Welland Ship Canal .....	.....	A proposal was made by the contractors for Sections 3 and 4 for certain reductions of wage scale for work performed during the winter months.	Correspondence was exchanged with the Minister of Labour on this point, who advised that the contractors should first take the matter up with their employees. No action was taken by the contractors looking to the reduction of rates during the winter months and the summer scale continued in effect.

#### IV. STATISTICS

During the year statistics of strikes and lockouts, wages and hours of labour, prices and cost of living, employment and industrial accidents have been collected and published regularly in the *Labour Gazette*, annual reviews also appearing soon after the close of the calendar year. In accordance with the "Statistics Act, 1918," and under arrangements with the Dominion Statistician, approved by Order in Council dated October 16, 1922, certain classes of these statistics are collected and published in co-operation with the Dominion Statistician, in close association with statistics of general social and economic conditions as organized in the Dominion Bureau of Statistics. The classification of industries and occupations drawn up in the bureau is followed in the compilation of the statistics of labour.

A statement as to fatal industrial accidents appears in chapter V of the present report, and statistics respecting employment in chapter VII.

##### STRIKES AND LOCKOUTS DURING 1923

The year 1923 was marked by the lowest figure for time loss in man working days since 1918, there being no strikes involving large numbers of employees for months, as was the case in 1922, 1919, 1917, and certain other years. The number of employees involved in strikes and lockouts was less than in 1922, but the number of disputes was slightly greater.

The departmental record of strikes and lockouts in Canada was begun on the establishment of the department toward the end of 1900 and particulars of industrial disputes have been given each month in the *Labour Gazette*; also as early in each year as possible a summary statement for the previous calendar year is printed in the *Labour Gazette*, with a statistical analysis. The figures are given for the calendar rather than the fiscal year, because in this form they become more easily comparable with statistics on the same subject gathered in other countries, which also as a rule use the calendar year. The figures printed are inclusive of all strikes which come to the knowledge of the department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. So far as concerns figures given with respect to duration of strikes, numbers of employees concerned, etc., it is impossible always to secure exact information, but the estimate made in such cases is the result of painstaking methods in the collection of data, and, with increasing experience in dealing with the subject, it is believed that the statistics indicate the conditions with reasonable precision.

The record of the department includes lockouts as well as strikes, but a lockout or an industrial condition which is undoubtedly a lockout is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together under the term "industrial disputes."

A strike or lockout, included as such in the records of the department, is a cessation of work involving six or more employees, and lasting more than one working day. Disputes of only one day's duration or less and disputes involving less than six employees have not been in the past included in the published record, but a separate record of such disputes has been maintained in the department. For 1923, however, any such disputes involving a time loss of ten working days or more are included in the published record, there being twelve of these, involving 1,447 employees and resulting in a time loss

of 1,405 working days. In addition there was a dispute involving only thirty employees for one hour, with a time loss, therefore, of less than ten days; this was a strike of coal miners at Drumbheller in sympathy with other coal miners who resumed work that day.

The outstanding feature of the year was a strike of steel workers at Sydney, N.S., resulting in sympathetic strikes of coal miners in Cape Breton Island, in other parts of Nova Scotia, and for a short time, in a small area in Alberta. The sympathetic strikes caused a time loss of about 240,000 working days, nearly one-third of the total for the year. The strike of steel workers, which was for higher wages, shorter hours of labour and recognition of the union, began on June 28, 1923, lasted until August 1, and, at the beginning, involved about 2,600 employees. The sympathetic strikes of coal miners occurred early in July, in protest against the stationing of militia troops and provincial police in the strike area where disturbances had occurred. The coal miners were ordered back to work by the International President of the United Mine Workers of America, and, the constitution of that labour organization having been violated in connection with the strike, the officers and charter of District 26 of the United Mine Workers of America, embracing the principal coal mining districts of Nova Scotia, were suspended. The sympathetic strikes involved about 13,000 miners in Nova Scotia for nearly three weeks. A Royal Commission was appointed to investigate the cause of the industrial unrest among the steel workers at Sydney, N.S., and the circumstances which occasioned the calling out and the retention of the militia in aid of the civil power in connection with the same. The report of the commission was published as a supplement to the *Labour Gazette* for February, 1924. Legislation giving effect to one of the recommendations of the commission in regard to the use of the militia was enacted at the next session of Parliament, provision being made for a requisition from the provincial attorney general, as well as from a judge, before such action could be taken.

Considerable time loss was caused by the strikes of printing compositors in job offices in various cities in Canada, as well as in the United States, for the 44-hour week. These strikes had begun in 1921, and involved, at the beginning, 2,451 employees in Canada. By January, 1923, there were involved, 1,365, and by December, 1923, only 521. Reports received in the department indicated that many of the employers involved had from the beginning of the strike gradually replaced the strikers. From time to time settlements were made by the union with various employers, or work was secured elsewhere by the employees. The strike at Vancouver, B.C., was called off November 10, 1923. At the beginning, these strikes involved numbers of printing pressmen and bookbinders, but these soon either settled with the employers or returned to work without a settlement.

A strike of 1,555 longshoremen at Vancouver, B.C., from October 8 to December 8, for increased wages and certain other changes on the expiration of an agreement, caused a time loss of 82,415 working days and ended in favour of the employers. During the strike the question of the reinstatement of the strikers and the dismissal of strikebreakers became an issue, it being finally arranged that the employers would secure men as needed from the government employment office where all might apply. The men returned to work at the wages and working conditions prevailing before the strike, but the employers refused to make an agreement with the union.

Two strikes of coal miners, in the Edmonton coal fields and at Cardiff near by, began toward the end of 1922 and at the beginning involved upwards of 750 employees. By the end of 1922, only about 500 remained on strike. The strikes were for recognition of the union and for union wages and working

## SESSIONAL PAPER No. 26

conditions covered by the agreement in District 18 of the United Mine Workers of America. In most of the mines the strikers were gradually replaced or returned to work before the spring but the union did not call off the strike until August. In the meantime the employees in the Edmonton field organized another union and entered into an agreement with the association of the employers providing for wages and working conditions then in existence.

These disputes caused a time loss of approximately 600,000 working days out of the total for Canada during the year of 756,494. In other industries the only instance of great time loss was in the manufacture of clothing, where six disputes caused time loss of 10,068 working days, four being strikes for recognition of union, one against the employment of particular persons, one for increased wages and one against a reduction in wages. One of these ended in a compromise and the others were unsuccessful. In the building industry, the number of disputes and the time loss were comparatively small, there being only seven disputes, involving 867 employees and causing a time loss of 10,005 days, as compared with 17 disputes, 1,396 employees and a time loss of 28,247 working days in 1922, and 36 disputes, 4,004 employees and 153,372 working days in 1921.

An analysis of the statistics by the number of employees involved shows over 10,000 employees in only one dispute, 1.1 per cent of all disputes, but this strike (the sympathetic strike of coal miners in Cape Breton Island) caused a time loss of 216,700 days, 28.2 per cent of the total for the year. Outside of this strike, disputes involving between 1,500 and 2,500 employees, between 500 and 1,000 employees, and between 100 and 250 employees caused most of time loss for the year.

An analysis by industries shows the greatest amount of time loss in mining, with printing a close second, and considerable amounts in water transportation and in iron and steel manufacturing. The same industries showed large numbers of employees involved.

Among causes of disputes, it appears that the chief cause was demands for increases in wages, 27 out of 91, involving 3,207 employees out of 32,868 and resulting in a time loss of 42,541 working days out of 768,494. Sympathetic strikes showed the largest number of employees involved and also the greatest time loss, the three coal miners' strikes in July being the chief factor. There were, however, 10 strikes for recognition of union, and 12 against discharge of employees, but these did not involve large numbers of employees nor result in great time loss.

By methods of settlement, the largest number of disputes, 36, were settled by negotiations between the parties, but in 19 disputes there was a return to work on employers' terms.

An analysis of the figures by time loss shows 44 per cent of the total for the year due to two strikes, with over 100,000 working days lost, the one strike being that of the Cape Breton coal miners and the other the printers' strike at Toronto; 17.5 per cent of the total time loss was due to two strikes with between 50,000 and 100,000 working days, that of longshoremen at Vancouver causing a loss of 82,415 days and that of steel workers at Sydney, 52,000 days.

In duration, most of the disputes lasted less than five days, but these caused comparatively little time loss. Considerable time loss occurred in disputes lasting from 20 to 30 days, involving 12,921 employees, but a large proportion of it, 32.9 per cent, was due to 10 disputes carried over into 1923, of which eight were in the printing trades, carried over from 1921.

By provinces, the greatest time loss occurred in Nova Scotia with 319,434 days, 41.6 per cent of the total for the year, while Ontario experienced a time loss of 165,681 days, 21.6 per cent of the total, and British Columbia 108,554 days, 14.1 per cent of the total for the year.

A comparison of figures by months for the past four years shows the greatest time loss, as well as the largest number of employees involved, in the spring and summer months, each year.

The accompanying chart of the time loss in working days by groups of industries for each year back to 1901, shows that in mining considerable time loss occurred in 1903, 1909, 1910, 1911, and 1913, and again in 1917, 1919, 1922, and 1923. In metal trades no great time loss appeared except in 1919, when the strikes in the metal trades in various cities and the general strike in Winnipeg, in sympathy with the metal trades' strike there, caused a time loss of about two million days. In 1918, 1920, and 1923, however, the time losses (in these trades) were larger than in other years. In building and construction considerable time loss appeared in 1903, 1907, 1911, and 1919. In transportation there was considerable time loss in 1901, due to a strike of trackmen; in 1908, due to a strike of railway shop machinists; and in 1918 and 1919, due to numbers of strikes in street railway operation, as well as among freight handlers in local transportation, cartage, etc.

From the charts showing results of the settlement arrived at, it appears that the majority of employees were successful in 1905, 1906, 1915, 1917, and 1918, periods of steadily rising prices and expanding business, and were unsuccessful in 1908, 1919, and 1920, years of uncertainty in industry.

RECORD OF INDUSTRIAL DISPUTES BY YEARS, 1901 TO 1923

Year	Number of Disputes		Disputes in existence in the year		
	In existence in the year	Beginning in the year	Employers involved	Employees involved	Time loss in working days
1901.....	104	104	273	28,086	632,302
1902.....	121	121	420	12,264	120,940
1903.....	146	146	927	50,041	1,226,500

TIME LOSS IN WORKING DAYS THROUGH STRIKES AND LOCKOUTS  
BY GROUPS OF INDUSTRIES EACH YEAR, 1901-1923

SESSIONAL PAPER No. 26

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBERS  
OF MEN INVOLVED

## WAGES AND HOURS OF LABOUR

Statistics as to wages and hours of labour are secured to a considerable extent in connection with the work of the department on strikes and lockouts, industrial agreements, conciliation and mediation proceedings under the Industrial Disputes Investigation Act, 1907, fair wage schedules, and reports of changes in wages and hours. Reports are also secured each year from representative employers in the various industries and from labour organizations as to the rates of wages in effect.

The series of bulletins on wages and hours of labour in Canada begun in 1921 has been continued. Report No. 5, prepared particularly for the Federal-Provincial Conference relative to obligations of Canada in connection with the recommendations of the International Labour Conference, dealt with hours of labour in Canada and other countries. Report No. 6, issued as a supplement to the *Labour Gazette* for January, 1924, gives information as to rates of wages in certain trades and industries for 1921, 1922, and 1923. The accompanying table from that bulletin indicates the movement in wage rates during 1923, as compared with previous years for the classes included, and these index numbers are intended to show the trend in wage rates pending the calculation and publication of an index number covering the industries more completely. It will be noted that during 1923 wages rose slightly in several of the groups, but fell in printing and in common labour in factories. In coal mining there was no change in the average. There were advances in the building trades, metal trades, and on electric and steam railways, as well as in factory trades and in lumbering.

INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA, 1901-1923

(Rates in 1913=100)

Year	Building Trades	Metal Trades	Printing Trades	Electric Railways	Steam Railways	Coal Mining	Average*	Common Factory Labour	Miscellaneous Factory Trades	Lumbering

\*Simple average of six preceding columns.

## PRICES AND COST OF LIVING

The publication in the *Labour Gazette* each month of statistics of retail prices of staple foods, and of coal and wood and coal oil, and as to the rentals of six-roomed workingmen's houses in some sixty of the industrial centres of Canada, begun in 1910, has been continued. As since 1921, the figures as to food prices have been secured through the Dominion Bureau of Statistics from representative butchers and grocers in these centres as well as through the resident correspondents of the *Labour Gazette*. The calculation of a weekly family budget of foods, fuel and rent, in order to show the changes in the costs of these items from month to month, which has been continued and supplemented by information as to the changes in the costs of clothing, boots, etc., secured half-yearly, has made possible the publication from time to time in the *Labour Gazette* of a table showing, by percentages, the changes in the cost of the principal items of family consumption as in the accompanying table.

In connection with the statistics of wholesale prices published by the department in special reports from 1910 to 1917 and monthly in the *Labour Gazette* since 1911, it is to be noted that, as a result of an arrangement made in 1918, the Dominion Statistician has constructed a new index number of wholesale prices in Canada designed to replace that published by the department as the official index number for Canada. The new index number was published in 1923 in a special report entitled "Prices and Price Indexes, 1918-1922." This publication contained two index numbers. The first, "unweighted" like that published by the Labour Department, covered the period 1890 to 1921 and was constructed chiefly from the records of prices back to 1890 compiled and published by the department. The other, "weighted" according to the importance of the commodities, covered the period 1919 to 1922, and this index is kept up to date from month to month and is published in the *Labour Gazette*. Both of these index numbers were based upon prices in 1913 as 100. The index number calculated by the department covering the period 1890 to date (based upon prices 1890-1899 as 100) is now, therefore, published only in summary form in order to afford comparison with the earlier years. The publication of this will be discontinued when the Dominion Statistician has carried the new "weighted" number back for years prior to 1913. In 1924 the Dominion Statistician published a second report carrying the new "weighted" index number back as far as 1913. Other index numbers of wholesale prices in Canada calculated by Professor H. Michell, the Canadian Bank of Commerce, and the United States Federal Reserve Board, are given in summary form each quarter in the *Labour Gazette*.

Statistics as to the movements of prices in other countries have been published in the *Labour Gazette* as in previous years, the considerable development of statistical work of this nature in nearly all countries having increased the amount of information available.

The statistics of prices and cost of living have been used to a considerable extent in the adjustment of wages, while in some cases employers and employees have agreed to adjust wage rates from time to time according to the cost of living statistics in the *Labour Gazette*.

In the coal mining district of Vancouver island the operators and the miners agreed to continue the arrangement made at the end of 1918, whereby the changes in the cost of living were ascertained every three months by a commission and a corresponding change in wages effected. Such adjustments in wages are in the nature of a flat increase (or decrease) for all classes of employees, including the clerical and office staffs.

15 GEORGE V, A. 1925

## V. LABOUR GAZETTE

The *Labour Gazette* was published regularly during the fiscal year in English and French, the combined average paid-up monthly circulation of the two editions having been approximately 8,000 copies. In addition to the individual subscriptions received for the *Labour Gazette*, a number of the chartered banks and employers of labour in various parts of the Dominion subscribed for certain of their officials and several local labour bodies subscribed for all their members. Besides the paid circulation, copies were supplied gratuitously to public libraries, boards of trade, labour organizations, government departments, newspapers, trade journals (both at home and abroad), as well as to certain persons from whom the department seeks information from time to time. The average monthly distribution of complimentary copies of the English and French editions was 4,400, making a total monthly average circulation for the fiscal year of 12,400 copies. Many applications for sample copies were received, and these were filled so far as circumstances would permit.

The *Labour Gazette* constitutes the medium of publication of the official record of all proceedings under the Industrial Disputes Investigation Act, 1907, including the full text of all reports of Boards of Conciliation and Investigation established under the Act. It contains also complete or summarized reports of proceedings of official commissions, employers' and workers' conventions, and international and other important conferences held in Canada and other countries on subjects of interest to labour. Among other regular features the *Labour Gazette* contains in condensed form information concerning industrial disputes and agreements, fluctuations in employment, changes in wages and hours of labour and other working conditions, the course of wholesale and retail prices in Canada and other countries, fatal industrial accidents, and technical education, while many other subjects are dealt with in special articles. In order that information with respect to Canada may be as comprehensive as possible, the department maintains correspondents in some sixty-four industrial centres in the Dominion. Important legal decisions affecting labour are either quoted in full or summarized, while other typical cases receive brief mention. Among the outstanding legal decisions treated in special articles during the fiscal year were a judgment of the Judicial Committee of the Privy Council respecting the employment of orientals in lumber camps of British Columbia, judgments respecting the validity of the Industrial Disputes Investigation Act, 1907, a judgment delivered at Winnipeg respecting the legal status of trade unions which was subsequently reversed on appeal, and a judgment of the United States Supreme Court concerning the validity of the Act establishing the Kansas Court of Industrial Relations. Summaries were published of new labour and social legislation enacted in Canada, Great Britain, the United States and other countries. The proceedings of the International Labour Organization (League of Nations) and the action arising therefrom in various countries are also noted from time to time.

Among the special articles appearing in the *Labour Gazette* during the year may be mentioned an account of changes in the cost of living in Canada and other countries from 1913 to 1922, a comparative review of workmen's compensation laws in the various provinces, summaries of various reports of the United States Coal Commission, and an account of the Federal-Provincial Conference relative to obligations of Canada under the labour sections of the Peace Treaties.

15 GEORGE V, A. 1925

Supplements to the *Labour Gazette* were issued during the fiscal year as follows: the Second Report of Proceedings of the Canadian Railway Board of Adjustment No. 1, from September 1, 1920, to September 30, 1923, and the Report of the Royal Commission appointed to inquire into the industrial unrest among the steel workers at Sydney, N.S.

In the preparation and indexing of Volume XXIII of the *Labour Gazette*, which covers the calendar year 1923, care has been taken to present material in concise form in order both to facilitate the work of reference and to effect economy in the matter of space. During the year it was found necessary to have reprints of certain articles of unusual industrial interest. These included reports on "Action of Various Countries on Draft Conventions and Recommendations of International Labour Conference," "Factory Legislation in Canada," "Trade Union Membership in Canada," "Proposed Amendments of Industrial Disputes Investigation Act," "Federal-Provincial Conference Relative to Obligation of Canada under Labour Sections of Peace Treaties," "Canadian Railway Board of Adjustment No. 1 (Report of Proceedings from September 1, 1920, to September 30, 1923)," "International Conference of Labour Statisticians," "Fifth Session of the International Labour Conference," and "Canadian Laws Governing the Employment of Women"; also reprints and revision to bring up to date articles on "Workmen's Compensation in Canada (A Comparison of Provincial Laws as Existing in 1923)" and "Minimum Wages for Female Employees in Canada."

In addition to the work in connection with the publication of the *Labour Gazette*, there was prepared in this branch a compilation of labour legislation enacted by the Dominion and provinces during 1923 and a compilation of fatal industrial accidents that occurred in Canada in 1923. Information with reference to various matters dealt with in the *Labour Gazette* was also supplied on request, particularly with regard to labour legislation and industrial accidents.

The *Labour Gazette*, being an official publication, is frequently used as a source of authoritative information on the matters with which it deals. The journals named below are among those which, during the year, reprinted, in whole or in part, original articles appearing in the *Labour Gazette*. The following list is not exhaustive and does not include references to the monthly and quarterly statistical articles on employment, prices, industrial accidents, etc.: *International Labour Review*, *Industrial and Labour Information*, *United States Monthly Labour Review*, *Weekly News Summary* (U. S. Department of Labour), *Industrial News Survey*, *The Queensland Industrial Gazette*, *Western Australia Industrial Gazette*, *Industrial Welfare*, *Social Welfare*, *Nova Scotia Industrial Safety News*, *Current Opinion*, *The Labour Press Service*, *The Painter and Decorator*, and the *International Brotherhood of Blacksmiths, Drop Forgers, and Helpers' Monthly Journal*.

#### FATAL INDUSTRIAL ACCIDENTS IN CANADA IN 1923

The Department of Labour maintains a record of fatal accidents occurring to workmen in the course of their employment, collected from provincial Workmen's Compensation Boards, Factory and Mine Inspectors, the Board of Railway Commissioners, the press and other sources. This record is published quarterly in the *Labour Gazette*, with an annual summary, in order to illustrate the hazards connected with specific employments.

Among the sources from which reports of industrial fatalities were received during the year may be mentioned the following: for Canada, the Board of Railway Commissioners and the Explosives Division of the Department of

## SESSIONAL PAPER No. 26

Mines, Ottawa; for Nova Scotia, the Workmen's Compensation Board and the Department of Public Works and Mines; for New Brunswick, the Workmen's Compensation Board; for Quebec, the Department of Public Works and Labour, and the Bureau of Mines; for Ontario, the Factory Inspector, the Workmen's Compensation Board, the Ontario Railway and Municipal Board, the Algoma Central and Hudson Bay Railway, the Algoma Steel Corporation, Limited, and the Lake Superior Paper Company; for Manitoba, the Bureau of Labour and the Workmen's Compensation Board; for Saskatchewan, the Bureau of Labour; for Alberta, the Workmen's Compensation Board; and for British Columbia, the Department of Mines and the Workmen's Compensation Board.

The records of the department show 1,412 fatalities as the result of industrial accidents in 1923, as compared with 1,128 in 1922. Sixteen deaths occurred among Canadian workmen engaged in industry at points outside of Canada. The highest record, 508 fatalities, was in the province of Ontario; British Columbia came next with 316; Quebec had 184; Nova Scotia, 111; Alberta, 81; Saskatchewan, 72; New Brunswick, 57; Manitoba, 56; Prince Edward Island, 9; and for the Yukon District and North West Territories there was only one reported. In the quarters ending August and December the record was higher than for the first and second quarters of the year, the highest record being shown in the last quarter with 379 deaths reported, which was five more than in the previous quarter.

There were 372 deaths, or 26.4 per cent of the total fatalities reported for 1923, in the transportation and public utilities group. In 1922, 319 deaths, or 28.6 per cent of the total industrial fatalities were reported in this group. Of the 372 deaths, 168, or 11.9 per cent, occurred in the steam railway service and 100, or 7.1 per cent, in water transportation. There were 97 deaths in the steam railway service through being struck by, run over, or crushed by or between cars and engines, 28 were due to derailments and collisions, and 25 to falls from cars and engines. On a basis of 165,635 employees in the steam railway service in 1922, as reported by the Dominion Bureau of Statistics, the figures show a fatality record of slightly over one per thousand employees, while in 1922 the record of 143 deaths was slightly below that ratio. (Maintenance-of-way men and car inspectors are included in the steam railway figures for 1923, but railway carpenters and car repairers in railway shops and on trains are included in the iron, steel and products section of the "manufacturing" group, there being 14 of these workmen reported.) In the manufacturing group there were 198 deaths, or 14 per cent of the total fatalities reported for the year, as compared with 164 in the previous year. Machinery and its connections accounted for 56 deaths and electricity for 15. In the mining, non-ferrous smelting and quarrying group there were 187 deaths, or 13.3 per cent of the total fatalities reported. Of these 113 were in the coal mining industry, falls of rock, stone, etc., and cave-ins accounting for 48. There were 35 deaths in the group caused by explosions, 33 being recorded as due to an explosion at a mine in Cumberland, B.C., on February 8; 19 deaths were caused by mine and quarry cars. In the logging industry 195 fatalities were reported, this being 13.8 per cent of the total. Falling trees, branches, etc., were responsible for 78 deaths, and drownings for 39 in this group. In agriculture the fatalities reported numbered 129, or 9.1 per cent of the total, 46 being due to horses kicking, bolting, etc., and 9 to being gored by bulls. The record of all the industries shows 92 deaths due to machinery and its connections, 55 due to hoisting apparatus, 207 due to dangerous substances (including steam escapes, boiler explosions and compressed air, 16; explosive substances, 85; electricity, 42; and gas, fumes, etc., 25). There were 220 deaths caused by falling objects, 184 by falls of persons, 147 by drowning, 66 by animals, and

54 while handling objects. (A table giving fuller particulars as to the causes of these accidents is given in the *Labour Gazette* for March, 1924, and in the quarterly statements published in the issues of May, August and November, 1923, and of February, 1924. Sixteen fatalities have since been added, as later reports show that the workmen in these cases died as the result of injuries sustained in 1923.)

The following tables show the fatal industrial accidents reported to the department by industries, months and provinces:—

TABLE I.—FATAL INDUSTRIAL ACCIDENTS DURING 1923, BY MONTHS

## VI. COMBINES INVESTIGATION ACT

The Combines Investigation Act, 1923, chapter 9, 13-14 George V, which became law on June 13, 1923, was, by P.C. 1483, August 14, 1923, placed under the Minister of Labour for general administration. By P.C. 1693 of August 25, 1923, Mr. Harry Hereford was appointed, under section 4 of the Act, Registrar of the Combines Investigation Act, 1923, the position to be held in conjunction with the position of Industrial Engineer in the Department of Labour already held by him.

At the close of the fiscal year 1923-24 the Combines Investigation Act had been in operation for a little over seven months; during this period various inquiries and representations were received in the Department of Labour relative to the Act, but no formal applications, in accordance with section 5 of the statute, were received. The fact that no formal applications were filed does not perhaps measure the value of the Act; no doubt, quite apart from any proceedings, there is value in the moral effect which the enactment of this law has had upon business in general through the instrument which has been placed at the disposal of the public for its own protection against combines of a detrimental nature.

The following is a classified list of representations and inquiries which have reached the department:—

*Inquiries Relating to Food.*

*Potato Combine in New Brunswick.*—Inquirer later stated that threat of investigation under the Act had effect of removing conditions of which complaint had been made.

*Bread.*—Complainant refused to make formal application for investigation, and informal investigation by Registrar disclosed fact that complainant was mainly concerned in embarrassing a firm from whose employ he had been discharged.

*Bread.*—Complaint that wholesaler refused to sell to retailer. Advised that Act did not specifically apply.

*Canned Goods.*—Preliminary inquiry made by Registrar and complainant invited to make formal application, but failed to do so.

*Confectionery.*—Inquiry regarding possibility of taking action *re* revoking patent if inquirer's statement proved that certain wrapping material was obtainable only from United States sources.

*Fruit.*—Inquirer complained of a fruit trust in Canada, but did not make formal application for investigation nor supply any definite information, although invited to do so.

*Fruit and Vegetables.*—Complaint received *re* condition existing in the western provinces regarding the marketing of British Columbia fruit. Inquiry initiated and still proceeding.

*Fruit and Vegetables.*—Complaint that produce merchants of Vancouver refused to supply dealers with citrous fruits or bananas unless they also took large quantities of American apples. Investigated by Vancouver officer of department, who reported that alleged condition was non-existent.

15 GEORGE V, A. 1925

*Sugar.*—Correspondent sought opinion and guidance with reference to the sale of sugar, and was informed that situation did not come within the scope of the Act.

*Wholesale Groceries.*—Inquiry as to method of proceeding against certain manufacturers who objected to supplying complainant. Advised that Act was not specifically applicable to subject-matter of inquiry.

*Inquiries relating to Footwear, etc.*

Inquiry regarding sale of goods under fixed resale price agreements. Result: no agreement found to exist.

Complaint regarding shoe machinery company. Complainant requested to make formal application, but failed to do so.

*Inquiries relating to Gasolene.*

Complaint that a certain vendor refused to sell on account of retailer cutting prices. No formal application for investigation received.

*Inquiries relating to Iron, Steel, Tools, etc.*

Various inquiries for information from foundries, metal brokers, etc.

*Inquiries relating to Leather.*

Complaint as to combine. Complainant refused to make formal application.

*Inquiries relating to Printing.*

Inquiry for general information.

*Inquiries relating to Plumbing Supplies.*

Two complaints as to combine. Informal investigation by department resulted in wholesalers ceasing practices of which complaint had been made and complainants therefore decided not to make formal application.

*Miscellaneous inquiries* as to functions of the Act, method of making applications, etc., from lawyers, merchants, manufacturers, and others.

In addition, investigations of a preliminary nature were initiated as a result of representations received in connection with the following matters:—

Representation that boot and shoe manufacturers and jobbers had entered into resale price-fixing agreements with retailers was investigated, with the result that the complaint was found to be unjustified.

Representations that certain wholesale dealers in plumbing supplies had organized a combine to prevent certain plumbers from obtaining supplies was investigated, with the result that wholesalers signified their willingness to supply complainants. Complainants stated that they were satisfied with the result of the departmental intervention and did not deem it necessary to make formal complaint. (This matter was not brought to a conclusion until a few days after the close of the fiscal year, but it is thought advisable to state the result in this report.)

Representations regarding conditions said to exist in connection with the marketing of British Columbia fruit and vegetables referred to above were being inquired into at the close of the fiscal year, and in due course a commissioner was appointed by Order in Council under section 10 of the Act to investigate an alleged combine.

## VII. THE EMPLOYMENT SERVICE BRANCH

The present statement is the sixth annual report of the Employment Service Branch, being for the fiscal year ended March 31, 1924. This branch functions in co-operation with the various provincial government branches which conduct employment offices, and the whole organization is designated the "Employment Service of Canada."

### AGREEMENTS WITH THE PROVINCES

The Employment Offices Co-ordination Act (8-9 George V, chapter 21), an act "to aid and encourage the organization and co-ordination of employment offices," provides, in section 6 (in part) that "the payments hereinbefore authorized shall, as to each province, be conditional upon agreement between the minister and the government of the province as to the terms, conditions and purposes within the meaning of this Act upon and for which the payments are to be made and applied." Accordingly, agreements were concluded with all of the provincial governments, except that of Prince Edward Island. This list of signatory authorities differed from that of the previous year in one important detail. The Government of New Brunswick, on July 1, 1923, for the first time signed on a provincial basis, and, consequently, the agreements with the three municipalities in that province, namely, Chatham, Moncton and St. John, which had previously been parties to agreements with the Federal Government under the Act, were allowed to lapse.

The terms and conditions embodied in the agreements, which were uniform throughout, contained no material change from those of the previous year. The sum of money provided by Parliament for distribution to the provinces, however, showed a reduction of \$50,000 from the amount provided for the fiscal year 1922-23. The appropriation of \$200,000 enabled the payment to the provinces of 42.8 per centum of their expenditures on maintenance and operation of employment offices. In addition to the subventions, the forms commonly used throughout the various offices were supplied by the Department of Labour to the provinces. Table No. 1 on page 82 gives in detail the amounts paid to the various provinces, with the totals divided under the different items which are considered legitimate expenditures under the Act.

In addition to the aforementioned or main agreements, supplementary agreements were entered into with certain of the provinces for the purpose, as stated in the instrument itself, "of endeavouring to find suitable work for employable handicapped ex-service men." The taking over of this special activity by the Employment Service from the Department of Soldiers' Civil Re-establishment, under whose direction it was formerly conducted, was in line with the recommendations of the Employment Service Council of Canada and the Ralston Commission on Pensions and Re-establishment.

Each province signing this additional undertaking agreed to endeavour to find, through the medium of the existing offices of the Employment Service of Canada, employment for partially disabled veterans of the Great War, while the Department of Labour, on its part, undertook to reimburse the provinces in full for such additional expenditures as might be necessitated by the accordance of especial attention to this phase of employment work. During the year four of the provinces, Alberta, Manitoba, New Brunswick, and Saskatchewan, signed the supplementary agreement, while Nova Scotia, under a previous agreement with the Department of Soldiers' Civil Re-establishment, also gave added facilities to handicapped ex-service men seeking employment.

## LOCATION OF EMPLOYMENT OFFICES

Every office of the Employment Service offers facilities for both men and women, in all occupations, who are seeking work, and for employers seeking any sort of help. Obviously, it is neither practicable nor advisable to segregate the various functions of the offices at all centres, but when the volume of work warrants it, and where the population to be served is of sufficient magnitude, such division of functions is made, and men's and women's skilled and unskilled, farm, factory and domestic, etc., divisions are separately operated. On the prairies, when farm labour is in brisk demand, it is common custom, particularly in Saskatchewan, to operate temporary offices. These are not included, however, in the list below.

At the beginning of the year offices were conducted at 69 centres, but at the close of the year this number had been reduced to 67. One new office, located at Penticton, B.C., was opened during the year; the offices at Amherst, N.S., The Pas, Man., and MacLeod, Alberta, were closed.

The list of centres where offices were located at March 31, 1924, follows:—

*Nova Scotia* (three centres).—Halifax, New Glasgow, Sydney.

*New Brunswick* (three centres).—Chatham, Moncton, St. John.

*Quebec* (five centres).—Hull, Montreal, Quebec, Sherbrooke, Three Rivers.

*Ontario* (twenty-five centres).—Belleville, Brantford, Chatham, Cobalt, Fort William, Guelph, Hamilton, Kingston, Kitchener, London, Niagara Falls, North Bay, Oshawa, Ottawa, Pembroke, Peterboro, Port Arthur, Sarnia, Sault Ste. Marie, St. Catharines, St. Thomas, Sudbury, Timmins, Toronto, Windsor.

*Manitoba* (four centres).—Brandon, Dauphin, Portage la Prairie, Winnipeg.

*Saskatchewan* (nine centres).—Estevan, Moose Jaw, North Battleford, Prince Albert, Regina, Saskatoon, Swift Current, Weyburn, Yorkton.

*Alberta* (five centres).—Calgary, Drumheller, Edmonton, Lethbridge, Medicine Hat.

*British Columbia* (thirteen centres).—Cranbrook, Fernie, Kamloops, Nanaimo, Nelson, New Westminster, Penticton, Prince George, Prince Rupert, Revelstoke, Vancouver, Vernon, Victoria.

For the purpose of co-ordinating the efforts of the various local offices, and to enable the transfer of any kind of labour from districts over supplied to those where a dearth exists, Clearing Houses have been established at eight centres throughout Canada. Those for provincial clearance, operated by the provincial governments as part of the Employment Service of Canada, are situated at: Montreal, Toronto, Winnipeg, Regina, Edmonton and Vancouver. Those for interprovincial clearance operated by the Department of Labour in the interests of the Employment Service of Canada are: Eastern Clearing House, Ottawa; Western Clearing House, Winnipeg.

## STAFF

At the close of the previous fiscal year, the personnel of the Employment Service totalled 272. This number was distributed among the various component authorities as follows: Nova Scotia, 9; New Brunswick (municipalities), 8; Quebec, 25; Ontario, 91; Manitoba, 29; Saskatchewan, 26; Alberta, 24; British Columbia, 33; Federal Government at Ottawa, 23, and at Winnipeg, 4.

On March 31, 1924, the total number of employees stood at 274, 20 of whom were employed by the Federal Government, which had 3 situated at

## SESSIONAL PAPER No. 26

Winnipeg and 17 at Ottawa. The provincial staffs were made up as follows: Nova Scotia, 11; New Brunswick, 7; Quebec, 29; Ontario, 96; Manitoba, 30; Saskatchewan, 26; Alberta, 22; British Columbia, 33. Under the supplementary agreement above referred to, Manitoba had added two employees to deal with employment activities on behalf of handicapped ex-service men, while Nova Scotia, in pursuance of the agreement with the Department of Soldiers' Civil Re-establishment, had three additional employees for the same purpose. Apart from the federal staff, where reductions were carried out, the changes in the working force of the Employment Service represented the additions and diminutions consequent on closing offices, increased activity, etc.

## CONFERENCES

The Employment Service Council of Canada, a body advisory to the Minister of Labour and composed of representatives of the various parties to the agreements, as well as representatives of the railways and organized labour and employers, held its fifth annual meeting at Ottawa on June 14 and 15, 1923. On June 19, 1923, a committee, named by the council for the purpose, met with representatives of the railways in order to discuss certain phases of the movement of labour within Canada. In addition to the above, the executive of the council met twice, namely, June 28, 1923, and January 22, 1924, to advise with the Minister of Labour on Employment Service work.

## EMPLOYMENT STATISTICS

Statistical information covering the field of employment is published monthly in the *Labour Gazette* and includes daily reports from employment offices, monthly trade union reports, monthly reports from employers and reports of building permits, the two latter being compiled by the Dominion Bureau of Statistics in accordance with the "Statistics Act, 1918."

Daily reports from all the offices of the Employment Service throughout Canada show the number of orders for workers received in each industry, the number of applications from workers for employment, and the number of placements made in each industry.

Reports from trade unions throughout the country show the number of members in each union, and the number of members out of work or working on short time, reflecting in a measure the state of employment in the more skilled trades. These reports are received monthly from approximately 1,500 labour organizations with an aggregate membership of about 150,000 persons.

## STATISTICAL REPORT OF EMPLOYMENT OFFICES

During the year 1923-24 the number of applications for employment reported by the offices of the Employment Service of Canada was 597,783, of which 480,894 were from men and 116,889 from women. During the previous fiscal year applications for employment numbered 547,377.

Employers notified the Service of 545,517 opportunities for employment, of which 438,390 were for men and 107,127 for women. The Service received notification of 489,816 vacancies during the preceding fiscal year. Placements effected by the Service during the fiscal year numbered 468,815, of which 347,482 were in regular employment and 121,333 in casual employment, that is, work of a duration of one week or less. The number of men placed in regular employment was 310,141, and of women, 37,341, while of the placements in casual work 73,254 were of men and 48,079 of women. During the fiscal year 1922-23 the number of placements was 412,527, of which 300,982 were in regular employment and 111,545 in casual work.

15 GEORGE V, A. 1925

The tables on pages 83, 84 and 85 show (Table No. 2) applications, (Table No. 3) vacancies, and (Table No. 4) placements in regular and casual employment as reported by the offices of the Employment Service in the various provinces, during the fiscal year; a statement of vacancies and placements by industrial groups during the same period is also given (Table No. 6).

### LABOUR MOBILITY

While the offices of the Service are located at the points of chief industrial activity, the facilities afforded are not only utilized locally, but each office supplies a considerable number of workers to the contiguous districts. Out of the total of 468,815 placements effected, 228,087 were made outside of the centres in which offices are situated.

Since 1919, the railways have accorded to bona fide applicants at the Employment Service, who may desire to travel to distant employment for which no workers are available locally, a concession involving a reduced fare. This privilege is effective on the following railroads: Canadian National, Canadian Pacific, Dominion Atlantic, Kettle Valley, Michigan Central, Pacific Great Eastern, Quebec Central, Temiskaming and Northern Ontario, and the Wabash. The reduced rate is for a second-class fare, obtainable on the surrender of a certificate secured from the Employment Office, at a rate of 2.70 cents per mile. A minimum fare of four dollars is stipulated so that a person travelling to employment at a distance where the reduced rate does not amount to the minimum is not able to derive the benefit therefrom. Table No. 5 on page 83 gives details regarding the use of this certificate. As will be seen in the table, during the year, 47,564 persons were by this means aided in securing employment.

TABLE No. 1—Federal Subventions to each province showing distribution of payments among the different items of expense accepted as proper maintenance expenditures under the agreement.

## VIII. TECHNICAL EDUCATION

The first half of the ten-year period during which federal grants are available under the provisions of the Technical Education Act ended on March 31, 1924. In some provinces the growth of vocational education has been slow, due to industrial and financial depression, but, on the whole, fairly satisfactory progress has been made and the prospects for future growth are encouraging.

### STATISTICS

The statistical tables for the past year, given on pages 90 to 92, show increases over the previous year in almost every department of the work. The amount expended by the Provincial Governments decreased from \$1,835,093.21 to \$1,817,443.38, but the federal grants paid to the provinces increased from \$648,227.03 to \$888,391.62. The decrease in provincial government expenditures is accounted for by the drop in capital expenditures on the Provincial Institute of Technology and Art in Calgary, which is now completed. The total amount spent by the Alberta Government on work coming within the provisions of the Technical Education Act decreased from \$526,208.90 to \$115,227.27. In previous years, Alberta's expenditures have greatly exceeded the amount which the Federal Government could share equally with the province, due to excessive expenditures on capital account and the limited amount of federal funds available under the Act. The greatest increase in federal grants occurred in Quebec where the amount paid to the Provincial Government increased more than 250 per cent. Expenditures on the two provincial schools of fine arts and the new provincial school of pulp and paper-making accounted for most of the increase. In every province, except Alberta and Manitoba, the federal grants were larger than in the previous year. Ontario is the only province which used up all of the federal funds available. The two provinces of British Columbia and Quebec had the full unexpended balance carried forward for use during the remaining years of the Act's duration. The other six provinces lost part of the money appropriated for use during the past year because their unexpended balances exceeded the amount which may be carried forward under the provisions of the Technical Education Act.

The number of municipalities conducting day schools increased from 54 to 58, but the number of evening schools remained the same at 156. There was an increase in the total number of teachers from 2,674 to 2,943. The number of teachers in training decreased from 290 to 269. The figures for enrolments show an increase in every department and the total enrolment in all classes increased from 70,300 to 79,829.

It should be borne in mind that the different methods of keeping records in the various provinces make it impossible to give figures which represent the exact number of individuals who enrolled for instruction during the year. In some schools students enrolled twice during the year for evening classes. Some principals make no distinction between the "total enrolment in all classes" and "the number of individuals enrolled," with the result that pupils enrolling in more than one class are counted at least twice. Some provinces report the maximum enrolment at any one period during the year, others give the enrolments at the beginning and end of the school period, and some give the total number of pupils who enrolled from the beginning to the end of the period. The latter figure is the one desired for the purposes of this report.

## SESSIONAL PAPER No. 26

In order to make comparisons, it is necessary to have the same information for each school and to know the local conditions governing the organization and operation of the schools. Educational statistics in Canada are not uniform and the varying conditions throughout the Dominion make it impossible from the available printed reports and statistics to fairly compare the work being done in the different provinces. The figures given in the annual reports of this office are at best a rough index of the growth of vocational education in Canada.

## SUMMARY OF DEVELOPMENTS

The principal developments during the past year occurred in Ontario, Quebec, and New Brunswick.

The extension of the work in Ontario exceeded that of any other year. New vocational schools were opened in Toronto and Windsor. Composite high schools, accommodating both academic and vocational classes, were opened in St. Catharines, Guelph, Kitchener, Renfrew and Weston. A composite school is being built in Galt and a vocational wing is being added to the Owen Sound Collegiate. New wings are also being added to the vocational schools in London and Ottawa. In addition to these building activities, new courses of study have been added to several schools, including a commercial department in Fort William and special apprenticeship classes in Hamilton and Ottawa.

Developments in Quebec include the appointment of a provincial director of technical education, the opening of the new provincial school of fine arts in Montreal, the establishment of a provincial pulp and paper school in Three Rivers and the operation of a provincial school for forest rangers in Berthierville. A director was appointed for the new Hull Technical School, which will be opened in October, 1924.

In New Brunswick, vocational education is beginning to make rapid progress. The opening of the new composite school at Edmundston with very successful classes has given impetus to the work. St. John has decided to build a large vocational school and Fredericton is erecting a composite high school. Three other places have new schools under way in which provision will be made for vocational classes. The itinerant instruction classes were again operated after a year's cessation, and 254 adults received instruction in automotive work at various centres throughout the province.

The correspondence work in Nova Scotia was extended to include short intensive lecture and laboratory courses for telephone workers and plumbers who have completed the regular correspondence courses.

The Agricultural and Technical High School at Charlottetown, P.E.I., had a very successful year. It has taken over the home making courses formerly conducted by the Provincial Department of Agriculture. There was talk of discontinuing the school at the close of the 1923 period, which seriously affected the enrolment in some departments, but, despite this handicap, the total enrolment increased from 172 to 293. It is probable that, for financial reasons, the school will not be operated during the coming winter.

No new developments are reported from Manitoba or Saskatchewan. Vocational classes have been discontinued in some centres in both provinces and enrolments have fallen off in both day and evening classes.

A provincial director was appointed in Alberta who is also the principal of the Provincial Institute of Technology and Art. The work of the institute has continued to grow and in some courses the accommodation is inadequate to meet the demand for training. There was a decided falling-off in the number of evening schools, but the total attendance in both day and evening classes has increased. The correspondence work has decreased.

15 GEORGE V, A. 1925

In British Columbia the day and correspondence classes remained almost stationary, while the evening classes were greatly increased. The number of municipalities conducting evening classes increased from 29 to 36 and the total enrolment jumped from 3,696 to 5,044.

Further particulars regarding the work being carried on in each province, including statistics for all schools, are given in the appended reports from the various provincial officials.

#### CONTROL OF VOCATIONAL EDUCATION

Federal grants have enabled the provinces to build and operate schools which offer a variety of courses specially designed to meet the educational and vocational needs of young people entering industrial life and of workers who desire supplementary education and training. The organization, administration and control of education, however, is entirely in the hands of the provincial and local authorities. Usually the initiative rests with the local school boards. The provincial governments render assistance as requested or advise the local officials in order that the work might be organized in conformity with existing regulations and thereby become entitled to provincial and federal grants. In a few cases, assistance is sought from the federal authorities in connection with the organization of new work, but ordinarily the Dominion Government is called upon to approve, for the purposes of federal grants, the work already being done.

#### BULLETINS

The Technical Education Branch has continued to issue the "Vocational Education" bulletins. The numerous applications to be placed on the mailing list and requests for additional copies to be used in teacher-training classes, libraries, etc., indicate that the bulletins are read and appreciated by people in every province. Over four thousand copies are distributed to directors, teachers, members of school boards, and other interested persons in Canada who have asked to be placed on the mailing list or whose names have been sent to the department by provincial officials. Five bulletins were issued during the past year dealing with the problems of evening schools, apprenticeship, vocational guidance, teacher-training and government publications for use in vocational schools.

#### CO-OPERATION AMONG PROVINCES

In addition to the annual trip to each province, the director has been called on to make several trips in connection with the approval of plans for new buildings, accompanying representatives from other provinces on inspection trips in Ontario and Quebec, etc. Co-operation between the provinces is gradually being developed and it is hoped that the provincial governments and local school boards will continue to send representatives to other provinces in order to exchange ideas and benefit by the experiences of others.

#### ADMINISTRATION OF FEDERAL GRANTS

The work varies in the different provinces and localities. No fixed standards have been established by which the courses in the various schools can be compared, and it is a very difficult matter to determine the eligibility of certain courses for federal grants. The Technical Education Act defines the work to be promoted as "any form of vocational, technical or industrial education or instruction, approved by agreement between the minister and the Government of any province as being necessary or desirable to aid in promoting industry and the mechanical trades, and to increase the earning capacity, efficiency and productive power of those employed therein." Because of the

## SESSIONAL PAPER No. 26

varying industrial conditions in each province and because of the newness of secondary vocational education, a very liberal interpretation has been placed upon the foregoing definition. The word "industry" has been interpreted to include commerce, homemaking and applied art in addition to the mechanical trades and manufacturing. Agriculture has been excluded because agricultural education has received federal grants amounting to \$10,000,000 under the provisions of the Agricultural Instruction Act which expired in March, 1924. The courses of study on which federal grants are payable were listed in the fourth annual report for the year ended March 31, 1923.

## VOCATIONAL COURSES DISTINCT FROM HIGH SCHOOL COURSES

The provisions of the Act are broad enough to include any form of education or training of direct vocational value to industrial workers or prospective workers, but the Act was not intended to provide assistance in connection with the established high school courses. There is an increasing tendency on the part of some provinces to include for the purposes of federal grants courses of study which have no direct relationship to any branch of industry. These courses include different forms of manual training or domestic science. In some cases they may be of vocational value to students who enter industrial employment, but they are not regarded as vocational because they do not definitely aim to prepare pupils for employment. Their chief objective is to equip the students for entrance to university. In order to benefit by grants under the Technical Education Act, secondary school courses should be specially organized to meet the particular needs of pupils who will not proceed to university and who desire training of direct vocational value.

In provinces where the work is new, the federal director has approved work which at best can only be regarded as advanced manual training. It was hoped that these courses would become more practical each year and that special efforts would be made to relate the courses to industrial life. Unfortunately, in some cases the tendency has been the other way and the courses are losing any vocational value which they may have possessed. A similar condition exists in connection with home economics courses, which, in some places, are of no more practical value than the regular high school courses. Indeed, in a few instances, no apparent difference exists between the so-called vocational or home economics courses and the ordinary high school courses for girls. It may be that there is no urgent demand for vocational courses in these localities or it may be that the responsible authorities do not feel justified in increasing school expenditures by organizing special vocational classes. Such circumstances, however, cannot in any way be deemed a reason for paying federal grants on existing courses of a general nature.

Unless the local and provincial authorities are prepared to meet the increased expenditures which necessarily result from the organization of vocational courses and are willing to promote the work by every means in their power, they should not expect to have successful classes. In places where the work has been organized without a clearly defined objective or where the classes have been placed in the hands of inexperienced teachers, the results have been unsatisfactory and vocational education has received a set-back. It is possible that the temptation to organize vocational classes in order to receive the very liberal government grants may have blinded some municipalities to the fact that without the active support of trustees, teachers, parents, employers and employees, vocational education cannot develop to its rightful place in the community.

## CO-OPERATION BETWEEN VOCATIONAL SCHOOLS AND INDUSTRY

The expense of conducting vocational schools can be very materially lessened and, at the same time, the work be made more effective by organizing classes in close co-operation with local industries. This applies particularly to classes for employed persons, but it has a direct effect upon all classes. If a school attempts to provide complete vocational training for any skilled industrial occupation and does not co-operate with industry, it is compelled to equip expensive shops and to provide extended courses with provision for practical experience under working conditions. If, on the other hand, the school undertakes to enable pupils to select and prepare for admission to suitable occupations and then supplements the training received on the job by the training and education necessary for vocational advancement and the full development of the pupils, the equipment required will be less and the length of time spent in the school shops will be shortened. In other words, it is deemed advisable, wherever possible, to organize part-time and co-operative classes, including special apprenticeship classes. Work of this type is described in detail in the appended report of the Ontario director under "special developments" and in the Nova Scotia report under "new developments".

SESSIONAL PAPER No. 26

## PRINCE EDWARD ISLAND

## SUMMARY OF THE YEAR'S PROGRESS

*Vernon Crockett, Principal*

The courses of study carried on at the Prince Edward Island Agricultural and Technical School during the past year were as follows:—

## DAY CLASSES

- (1) A course in agriculture for all students over 15 years of age.
- (2) A five months' course in motor mechanics, woodworking, farm engineering, English and mathematics.
- (3) A series of three weeks' short courses for girls in household science.
- (4) Two weeks' short course for cheese and butter makers.

## NIGHT CLASSES

Night classes were carried on in the following subjects: English, arithmetic, show-card writing, motor mechanics, radio, woodworking, public speaking, electricity, cookery, millinery, sewing and home nursing.

## BUILDINGS AND EQUIPMENT

During the year considerable advances have been made in the matter of buildings and equipment. A poultry house, modern in every respect, was completed with capacity for 150 birds. Considerable additional equipment was purchased for the motor mechanics department. The dairy equipment was moved to more suitable quarters, and the household science department was established at the school.

## COURSES IN HOUSEHOLD SCIENCE

The outstanding feature of the year's work was the establishment of courses in household science for girls. These consisted of three weeks' short courses in home economics for students from the city and country, and courses in cookery, millinery, sewing and home nursing for night class students from the city. The success of these classes was most pronounced. Forty-five students enrolled in the day classes, and the number registered in the night classes was one hundred and twenty.

## PROGRESS

This school is now well established and well equipped. The work is meeting with an encouraging measure of approval. The course of studies is adapted to meet the most pressing needs of the province. This combination of agricultural and technical classes is approved universally in this province. Technical education has passed the experimental stage. It has been demonstrated four years in succession that this school can get the students, and keep them, and give them the kind of instruction they need. Geographical, industrial and social conditions for carrying on such work as has been outlined are ideal. Only the difficulty of financing the undertaking seems to stand in the way of complete success.

15 GEORGE V, A. 1925

NOVA SCOTIA

REPORT OF THE DIRECTOR OF TECHNICAL EDUCATION

*F. H. Sexton*

It is regrettable that a recession must be chronicled in the total number of students enrolled in secondary vocational education in the province during the past year as compared with the year 1922-23. The Correspondence Study Division showed an increase of student enrolment to a total of 876, but other branches of the work showed a falling-off toward the level of the year 1921-22. The registration in various evening schools decreased from 3,646 to 3,118 and the total enrolment in the present year was 3,773, as compared with 4,111 last year.

The reasons for this falling-off are not wholly evident and explainable. The main factor was, of course, the continued industrial depression and the consequent temporary migration of a good many young men and women to other urban centres outside the province in quest of employment. The psychological reactions of hard times usually tend to dampen ambition and to cause many to neglect educational opportunities on their thresholds. There was also a tendency manifest with some municipalities to restrict expenditures for education outside the realm of regular general graded public school instruction. These and other less tangible factors all contributed to a smaller enrolment in secondary vocational education.

## NEW DEVELOPMENTS

No new legislation was passed during the year and no new projects in the evening school work of any great importance were undertaken. The services were maintained throughout at the previous standards of efficiency. The only new development worthy of mention was in the successful organization of a new type of co-operative short-term course.

During the last year the Correspondence Study Division has been very successful in conducting courses in telephony for employees of the Maritime Telegraph and Telephone Company. The corporation has used its good offices to persuade its technical workers to pursue these courses. It has followed the records of the students closely, and has endeavoured to provide promotion and advancement for those who proved their increased power and usefulness. The limitations of correspondence instruction were reached with a number of the men, and it became evident that higher and fuller instruction should be carried out in the classroom and laboratory in personal contact with the teacher.

Consequently the officials of the company and of the Nova Scotia Technical College in conference developed a short-term course in the "Technics of Telephony" for selected employees on a co-operative basis. The company agreed to give a certain number of their workers two weeks' leave with full pay so that they might attend day classes during this period at the Technical College. The company further agreed to pay the tuition of the students and to furnish five part-time instructors and lecturers from its technical staff. The college placed its laboratories, classrooms, and the full time of an instructor in electricity at the disposal of this group of students. The course, as planned, allotted the mornings to lectures and recitations and the afternoons to laboratory work. The instructors from the company gave a series of comprehensive lectures which occupied two hours each morning on the following subjects:—

- General Principles of Telephony.
- Telephone Circuits and Testing.
- Telephone Development and Wire Study.
- Traffic Units and their Applications.
- Telephone Plant Accounting.

The college instructor took charge of the classes for the remainder of the day and dealt with the following subjects:—

- Mechanical Drawing and Sketching.
- Field Notes and Reports.
- Theory of Electricity and Magnetism.
- Installation, Operation and Testing of Electrical Machinery.
- Storage Batteries and Telephone Power Plants.

The course was given in the summer vacation when there were no other classes in session and the students attended for seven hours each day. Problems and reports were required for home work, so that the session was one of intensive study and application. The attitude and effort on the part of the students was all that could be desired and the experiment, as far as carried, was most successful. It is now planned to make this course a regular annual event and to extend its scope and application.

This type of course represents a close co-operative effort between industry and education. Other corporations which desire to train some of its technical workers for their vocation by means of instruction in applied science may get the assistance of the Technical Education Branch in just the same manner as did the Telephone Company. The chief aim of the provincial authorities is that the ambitious young men and women may be developed for greater use-

fulness in their vocations. It seems that education is the common activity in which both the employer and the worker can engage almost indefinitely with mutual advantage and profit.

A distinct improvement was made in giving correspondence instruction in plumbing in the city of Halifax. Instead of relying on teaching by mail alone, the students were brought into direct contact with the instructor and were given practical work in the shop also. One regular lesson was required to be studied each week and a class room recitation was held one night per week. The students voluntarily gave up their Saturday half-holiday and met the instructor in the shop at the Technical College, where they were given actual practice in various operations which they would hardly have the opportunity to learn in their daily work. Almost every pupil who took these courses was successful in securing his certificate from the city Board of Examiners the first time he attempted to pass. This method of combined correspondence study, periodical recitation in the class room and supervised shop work, has a wide application in training industrial workers and it is hoped to extend it widely throughout the province.

#### CONCLUSIONS

All branches of secondary vocational education were well maintained throughout the year. A lack of provincial and municipal funds prevented expansion of these services and any new projects. There will probably be no great change in the system until the next industrial expansion, with its consequent demand for more and more highly trained workers. The time is not yet ripe to promote a compulsory attendance act for adolescents. Neither can money be secured at present for the establishment of full-time day vocational schools, although the need for them is daily growing more and more apparent. It is hoped that the industrial and business cycle will move rapidly forward to its new crest or to a maintained higher level, so that these two great improvements may be consummated.

## NEW BRUNSWICK

## REPORT OF DIRECTOR OF VOCATIONAL EDUCATION

*F. Peacock*

During the school year ended June 30, 1924, five municipalities in New Brunswick conducted full-time day vocational schools or departments. These served 187 full-year students. Eight cities and towns conducted evening vocational schools which had an enrolment of 1,181. Short-term courses conducted at St. John and Edmundston were attended by 61 men. The 1923 summer school for vocational teachers had an enrolment of 31; and 254 persons were served by itinerant instructors. The total number in attendance at the various classes and courses was 1,714 and 23 teachers were employed.

Herewith are given tables showing the distribution among the various groups and subjects. While the totals in all classes (except summer school) show increases as compared with last year, these do not adequately measure the progress vocational education has lately made in this province. This is reflected in the current policies of school boards, and the increasing frequency of sympathetic reference by the press and representative citizens.

## NEW DEVELOPMENTS

The chief developments of the year have been the opening of the Edmundston Composite High School, the undertaking by Fredericton to build a modern composite school, and the adoption by the city of St. John of the policy of building a large vocational school prior to June, 1925.

In St. John and Fredericton plebiscites were held upon the question of building. It is encouraging to record that in both cases the voters decided for progress by substantial majorities. This is clear evidence of the hold vocational education already has upon the minds of the people of this province.

Other towns, such as McAdam Junction, Hartland, Chipman, etc., have new schools under way in which provision is being made for teaching vocational subjects.

## THE EDMUNDSTON COMPOSITE SCHOOL

The small town offers many difficulties in the provision of specialized types of education. Edmundston, with between four and five thousand people, seems to be successfully solving the problem for its people by means of a composite high school. In addition to the traditional high school course leading to matriculation, this school now offers a pre-vocational or junior high school course, a commercial course and a homemaking course. Later a technical high school course will be added.

The special function of each of the above divisions is indicated in each case by the name except in the pre-vocational group. This department of the school serves students thirteen years of age or over who have reached grade seven standing, but who may have fallen behind and become somewhat discouraged with the regular bookish curriculum. The object is to hold these in school by enabling them to devote one-third of their time to practical or junior vocational instruction. In this way their general education is extended, and they receive a valuable "trying out" experience in the materials and processes met in a group of common vocations. This pre-vocational course seems to appeal strongly to a large group which formerly dropped out of school entirely at about thirteen years of age.

The Edmundston school is attracting much attention throughout the province. It represents a type that seems destined to be generally adopted

## THE AUTOMOTIVE BRANCH

Instruction in the automotive field has been continued and developed. A full time man has been appointed to carry on itinerant courses during the summer and supervise short courses in various parts of the province during the winter when the slack season of this trade prevails. By means of these two agencies an all year service is being rendered to garage workers. The response and co-operation of the men from this trade is very satisfactory.

## TEACHER TRAINING

In 1923 summer courses were provided in the province only for teachers in the home economics field. Other day vocational teachers were assisted to take professional improvement courses outside the province to the extent that their travel and tuition expenses were paid by the province. No adequate policy has yet been adopted for the training of vocational teachers. A lack of properly trained teachers is now the greatest barrier to the progress of vocational education in New Brunswick. Some means must speedily be found to meet the need and supply the practical instruction which the people seem now to desire.

The present membership of the New Brunswick Vocational Education Board is as follows:—

*Appointed by the Board of Education—*

Hon. Fred Magee, Port Elgin, Chairman.  
Rev. Father Tessier, St. Joseph's College.  
Mr. George H. Maxwell, St. John.  
Mr. W. H. Miller, Campbellton.  
Mr. R. K. Tracey, M.L.A., Centreville.

*Members Ex-Officio—*

Dr. W. S. Carter, Chief Superintendent of Education, Vice-Chairman.  
Dr. H. V. B. Bridges, Principal of Normal School.  
Mr. Harvey Mitchell, Deputy Minister of Agriculture.

*Administrative Staff—*

Mr. Fletcher Peacock, Secretary and Director.  
Miss Marguerite L. Taylor, Clerk-Accountant.  
Mr. W. B. Main, Supervisor, Automotive Work.  
Miss Rheta M. Inch, Acting Supervisor, Homemaking Department.

## REPORT ON VOCATIONAL EDUCATION

*A. Frigon, Director*

The position of Provincial Director of Technical Education remained vacant until April, 1924, when Dr. A. Frigon, Principal of the Ecole Polytechnique, Montreal, assumed the additional duties of the provincial office. His appointment came too late to enable him to visit all of the schools receiving federal grants and to prepare a written report before the close of the school year. Dr. Frigon spent the summer in Europe but returned in time to submit the attached statistics covering the work of the past year.

The figures show increases in every department and the prospects for increased activities during the current year are very promising. Vocational education is well established in Quebec and the Provincial Government has given very generous support to the work.

## ONTARIO

## REPORT OF THE DIRECTOR OF TECHNICAL EDUCATION

F. P. Gavin

## SUMMARY OF PROGRESS

The vocational schools in Ontario continue to make satisfactory progress. New schools, giving full-time day instruction in one or more of the vocational departments, were opened during the school year 1923-24 in Guelph, Kitchener, Renfrew, Stamford, St. Catharines, Toronto (Riverdale Branch), and Weston.

The total number of full-time day schools operating throughout the school year is now twenty-one. In addition to these there are day schools operating during the months of January, February, and March, giving instruction in navigation and marine engineering, in Kingston, Collingwood and Midland.

The total number of evening schools in 1923-24 was sixty. Evening schools were conducted in every city in Ontario, with one exception, and in thirty-five towns or villages. New evening class centres were opened or re-established during the year in Burlington, Elmira, Haileybury, Renfrew, Smiths Falls, South Porcupine, Wallaceburg, Weston, and Vellore.

The following table shows the progress of the vocational schools:—

## SUMMARY OF ATTENDANCE—DAY VOCATIONAL SCHOOLS

## LEGISLATION AND REGULATIONS

An amendment to the Vocational Education Act was passed in 1924, whereby vocational instruction may be provided for such pupils in attendance at auxiliary training classes as may be able to meet certain requirements for admission.

No changes have been made in the regulations.

## SESSIONAL PAPER No. 26

## NEW DEVELOPMENTS AND BUILDING OPERATIONS

A notable feature of the progress in vocational education for the year 1923-24 was the completion of a number of school buildings to provide accommodation for carrying on the work. The building programme enabled several new centres to establish technical schools or departments. During the year there was a greater extension of the work, not only in new centres, but also in old centres, than in any previous year in the development of vocational education.

The fine new Windsor-Walkerville Technical School was officially opened by the Lieutenant-Governor on August 30, 1923, and was occupied by the pupils and teachers on the regular date for reopening schools in September. The excellent accommodation provided, and the carefully selected but, nevertheless, adequate equipment furnished, met with the most general approval of the people of Windsor and Walkerville. The wisdom of holding the official opening and inspection of the building just before the beginning of the term was shown by the large number of pupils who applied for admission immediately after the public opening.

The enrolment in the school for the autumn term was gratifying to the members of the board and to the staff. The day enrolment was as follows: industrial department, 68; technical department, 188; homemaking department, 8; commercial department, 403; part-time pupils, 2; making a total of 669. The evening class enrolment was approximately 2,500, nearly twice as many as in the previous year. Interesting features of the evening class programme were classes for stationary engineers held five nights a week, and a class for machine shop supervisors and advanced machinists held Saturday afternoons.

The new Riverdale Branch Technical School, Toronto, opened its doors for the first time in September, 1923. The opportunities for vocational education here offered, with adequate accommodation and equipment, received a most satisfactory response. The number of pupils enrolled during the year was 626 in the day school and 1,800 in the evening school. Any anticipation that the opening of the Riverdale Branch would reduce the total enrolment in the Central Technical School was not realized. The enrolment in the Central School remained at approximately the same figures as last year.

The total number of pupils enrolled in the three vocational schools of Toronto—the Central Technical School, the Riverdale Branch Technical School, and the High School of Commerce—for the autumn term of 1923 was 4,755 day pupils and 10,074 evening pupils.

The new Kitchener and Waterloo Vocational School was occupied early in September. The efforts made by the local school authorities in charge of the planning, equipping, and promotion of the school, and by the management in charge of the organization of the work, to make this new school function effectively in the educational life of the communities concerned, have produced gratifying results. These efforts were directed towards creating educational opportunities that would enable, not only pupils at school, but also adults at work, to fit themselves into the industrial and commercial life of Kitchener and Waterloo as efficient members of the community.

The day school enrolment was 369, distributed as follows: industrial department, 21; technical department, 160; and commercial department, 188. The evening class enrolment was 870, double the enrolment of the previous year.

An interesting feature of the evening class programme was the special effort of the Advisory Committee to provide practical instruction directly related to the needs of employed persons. This instruction included courses

in masonry, carpentry, and plan reading for the building trades groups, with an enrolment of 30, and special technical courses in rubber manufacturing for the rubber industries group, with an enrolment of 70.

The new school building at Renfrew erected to provide accommodation for all secondary school purposes, vocational as well as academic, was formally opened early in September. Accommodation is provided in this school for agricultural, homemaking, and commercial departments. The opening of the vocational side of the school was retarded for some time, owing to delays in getting the necessary equipment installed. Even under the handicap of beginning late in the term, the enrolment in the vocational departments was 68, an enrolment which may be taken as an earnest of what may be expected when the opportunities of these classes are offered prospective students at the usual opening of the school year.

The new Guilfith Collegiate-Vocational Institute was opened in September for occupancy by the classes and was formally opened on November 7, 1923. The enrolment in the vocational school was 235, made up of 65 in the industrial department and 170 in the commercial department. The enrolment in the evening classes was 929, an increase over last year of 196.

A new composite school in St. Catharines, known as the Collegiate Institute and Vocational School, was formally opened on November 5, 1923. The school had been in use by the classes from the beginning of the term in September. The enrolment in the day vocational school was 249, distributed as follows: industrial department, 69; home-making department, 18; commercial department, 162. The evening class enrolment was 921, an increase over last year of 511. This large increase of 120 per cent was due in this case, as in others, to the greatly improved facilities for giving instruction in the practical subjects.

Wiston is an example of a relatively small community that has established a vocational school, offering instruction in industrial subjects. Although the building was not ready for use in September, 1923, the local school authorities went ahead with the organization of the vocational classes, and succeeded in enrolling 178 pupils, distributed as follows: industrial department, 54; home-making department, 9; commercial department, 115. Although instruction was carried on for several weeks under adverse conditions, the staff was able to retain in the classes the pupils who had enrolled.

In August, 1923, the corner-stone of a large addition to the Galt Collegiate Institute was laid by a former student of the school, the Hon. Dr. Cody. This addition, which makes adequate provision for the needs of the types of vocational education related to the industrial and commercial life of Galt, will be ready for occupancy in September, 1924.

The Sarnia Technical School, which was opened in 1922 with a highly satisfactory enrolment in the different vocational departments, shows by an increased enrolment for this year that the school is meeting with the approval of its constituency. The total enrolment in October, 1923, was 331, distributed as follows: industrial department, 120; homemaking department, 17; commercial department, 190; and part-time pupils, 4.

A substantial addition has been made to the London Technical School to provide additional classroom accommodation and shop space.

In Ottawa an extra story is being added to the shop building to provide much-needed additional accommodation.

In Chatham the local school authorities are negotiating for the purchase of the Sanita hotel property and propose to make such changes in the building that it can be used for technical school purposes.

## SESSIONAL PAPER No. 26

In Owen Sound a large addition has been made to the Collegiate Institute for the purpose of providing accommodation for vocational classes. It is expected that the equipment will be in place, ready for the opening of classes, in September, 1924.

In Port Arthur a commercial department is to be established under the Vocational Education Act.

## EVENING CLASS PROGRAMME

In the earlier days of the establishment of evening industrial classes in Ontario, it may have been thought that they formed merely an incidental feature in the development of a programme of technical education, and would have but a temporary period of prosperity.

It was thought that the chief function of evening classes was to repair the defects in the education of those who in their youth had been deprived of the privileges of an education, or had not availed themselves of such opportunities as were afforded them. The number of such persons who would realize defects in their education and who would have the ambition and tenacity to attend evening classes to repair them would be relatively small. In a few years most of these would have taken advantage of the opportunity to attend evening classes, and the number seeking admission to the classes would begin to diminish. If during these years the day school should function more and more effectively in the life of the community, the time would come, under this view of the function of evening classes, when there would be no longer any great demand for them.

The history of evening classes in Ontario during the last decade shows that this view was an incomplete one. Instead of becoming relatively less important, the evening class programme came to occupy an increasingly important place in the system of vocational education.

The evening class programme functions in a variety of ways in the education of those who have passed the compulsory school age. It affords opportunities to the following groups:—

1. Young folks and adults who have left school too early and who find that they need more education to succeed in their occupations.
2. Persons who are ambitious for promotion in their vocations and who find it necessary to become adept in the more difficult processes of their trades, or to become acquainted with the increasingly important volume of technical knowledge related to their trades. Effort must be made to keep pace with the developments of industry. In spite of the tendency towards large volume methods of production, the place of the skilled and informed workman is still secure.

3. Persons who find that on account of the changing conditions of industry under which some occupations are disappearing and new ones coming into existence, it is desirable to fit themselves for employment in a new field.

Evening class groups, since they are attending school voluntarily and with a definite and strong motive, are very much in earnest. From this point of view they are highly selected. The difficulties in teaching evening classes are not those of discipline. In spite of a rather high mortality in attendance, a large amount of excellent work is done every season.

The enrolment in most of the places where evening classes are carried on is evidence that they are performing a useful function and meeting with the approval of the public. Statistical records of evening class activities in other countries show that an enrolment of 20 per 1,000 of population is evidence that the evening class programme is functioning properly in the community. The records for 1922-23 show that in Ontario on the average the evening class enrolment was 39 per 1,000 of population.

## TEACHER-TRAINING ACTIVITIES

The Summer School for the training of teachers of vocational subjects was carried on as usual during the summer of 1924.

The enrolment of teachers-in-training continues to increase, as shown in the following table:—

	1922	1923	1924
Men.....	30	51	70
Women.....	85	70	63
Totals.....	115	121	133

The course of study included:—

- (1) Principles of Teaching.
- (2) School and Class Management.
- (3) Special Methods of Instruction in Vocational Subjects.
- (4) Trade and Job Analyses.
- (5) Courses of Study.
- (6) Practice Teaching and Lesson Plans.
- (7) Shop Equipment.

In addition to this work the women had practical instruction in either dressmaking or in millinery.

A new feature of the work for 1923 was the study of the equipment needed for the kind of shop with which the teacher was concerned. This feature was added to the course of training to meet the needs of teachers who are called upon, often without previous experience in the selection of equipment, to give advice and leadership in the matter of shop equipment.

The present arrangement for training vocational teachers terminates in September, 1924. After this date the work will be done in the Ontario Training College for Technical Teachers, a new institution about to be established by the Department of Education in Hamilton. The new arrangement provides for a course of twenty weeks' training. Part I of the course will consist largely of lectures and theoretical work, and Part II will consist largely of observation work and practice teaching. The day and evening classes of the Hamilton Technical Institute will be used for the practice teaching.

The subjects of study will be:—

- English.
- Principles of Teaching.
- History, Principles and Problems of Vocational Education.
- School and Class Management and School Law.
- Trade Analyses and Courses of Study.
- Study of Industries.
- Methods of Teaching Industrial Subjects.
- Practice Teaching.
- Vocational Guidance.
- Shop Plans and Equipment.
- Mechanical Drawing.
- Costume Design.

## SPECIAL DEVELOPMENTS

A substantial step forward in the matter of co-operation between the school and industry in training of apprentices has been taken in Hamilton. Arrangements have been made by Principal Gill, of the Hamilton Technical Institute, with the Canadian Westinghouse Company, and certain other firms, whereby the apprentices will attend the school four hours a week during the day and two hours a week in the evening. These apprentices include machinists, electric machinists, moulders, carpenters, pattern-makers, and glassworkers. At the school the apprentices will receive instruction in English composition, drafting and design, shop mathematics, and shop practice.

The number of apprentices being trained under this co-operative scheme is now fifty-four. Arrangements are being made to offer the advantages of the scheme to other trades. This scheme shows the kind of co-operation that must be established between the technical school and industry. In such a scheme the young apprenticed worker is afforded an opportunity to obtain an insight into the science, mathematics, and related knowledge underlying his trade, which under modern conditions of industry he can no longer obtain on the job, and at the same time to continue to some extent his general education. On the one hand, he will become a more skilled workman, and, on the other, a more intelligent citizen.

It should be added that the Hamilton Technical Institute has had for some time a similar arrangement with the local branch of the International Typographical Union, whereby printing apprentices receive instruction in their art at the school during certain specified hours for which they are paid by the employers. The number of apprentices in the printing trade is twenty-eight.

In Ottawa a co-operative scheme for making use of the facilities of the Technical School for the training of plumbers and steamfitters has been arranged between the master plumbers, the local union, and the school. Under the scheme apprentices and helpers attend evening classes for such instruction as they do not receive on the job. The City Inspection Department make use of the equipment of the school shop in conducting the examinations for civic licenses.

The printing department of the Ottawa Technical School provides for the part-time training of apprentices. By agreement between the Typographical Union and the two daily newspapers of the city, all apprentices are required to attend the Technical School as follows: "Beginning with the second year each apprentice shall be required to attend at least one session each week during the school term of the Ottawa Technical School, time being allowed for the same by his employer."

Still another co-operative relation between the school and industry has been established in Ottawa. The local Machinists' Trades Union asked that the school should organize special evening classes for the instruction of apprentices and helpers in the machine tool trades. The union requires all apprentices in the trade to attend these classes, and furnishes the management of the school with a list of the names of the men who should enroll. As this list contains only the names of persons actually in the trade, it is used as a preferred list in organizing the classes. This list is so large that not all who wish to come can be accommodated, and so there is a waiting list. The existence of this waiting list has a very good effect on the attendance of those who have been admitted to a class.

## SESSIONAL PAPER No. 26

## SESSIONAL PAPER No. 26

## ONTARIO COLLEGE OF ART

The following statistical report from the Ontario College of Art indicates the extent of the work being done in that institution. The college is operated by the Provincial Government through a council of twenty-three members appointed by the Lieutenant-Governor in Council, by art societies and by other bodies including the University of Toronto, Canadian Manufacturers' Association, Toronto Typothetae and the Toronto District Labour Council. The work of the school includes all branches of fine and applied art, instruction being given in such subjects as drawing, composition of pictures, architectural design and ornamentation, commercial design, painting, sculpture and clay modelling, interior decorating, applied design for jewellery, etc.

In addition to the four-year diploma course, special courses are given for graduates, school teachers, and public school pupils who show special ability in art. Evening classes are held each evening of the week except Saturday. An "Outdoor School" is conducted at Port Hope during the summer months for the study of landscape drawing and painting.

## SUMMARIZED STATEMENTS OF ATTENDANCE AND TEACHERS IN ONTARIO COLLEGE OF ART FOR PERIOD OCTOBER, 1923, TO MAY, 1924

## MANITOBA

## REPORT OF THE DIRECTOR OF TECHNICAL EDUCATION

*R. B. Vaughan*

The year ending June 30, 1924, has shown very little change in the progress of vocational education in Manitoba. Courses in commercial work, practical arts for girls and engineering have been given in Winnipeg. A commercial course has been carried on in St. James and the home economics work has been continued in Tuelon, Stonewall, Virden, and St. Laurent.

It is to be regretted that the home economics classes so well begun in Portage la Prairie have been discontinued, due to an endeavour to reduce expenditure. The part-time classes in printing held at the Kelvin Technical High School, Winnipeg, have also been temporarily discontinued; with these exceptions the work has been much the same as during the previous year.

15 GEORGE V, A. 1925

The commercial and home economics courses continue to enjoy the most popularity in vocational work both in the day and evening classes. In the evening school the classes in electrical work have made a very favorable showing and the auto mechanics classes have maintained good attendance and enthusiasm. Other courses given include machine shop work, machine drawing, the steel square, industrial chemistry, etc. In the vocational evening classes a total enrolment of 1,539 was reached requiring the services of 43 teachers.

The following figures give a comparison of work for the year ending June, 1923, and June, 1924:—

	1923	1924
Number of day schools.....	11	11
Number of evening schools.....	3	3
Number of teachers in day schools.....	97	3 full time 98 part time
Number of teachers in evening schools.....	49	43
Total attendance, day schools.....	1,535	1,183
Total attendance, evening schools.....	1,950	1,539

The teacher-training classes had an enrolment of twenty-five and the work was carried on with enthusiasm and success. A number of those attending the previous year had already covered the work prescribed and were not required to attend the courses given during the past year.

The six weeks' course in home economics for girls was held at the Manitoba Agricultural College during July and August and was attended by sixteen girls. Provision has been made for a similar course next year during July and August, 1924, and also an advanced six weeks' course for those having completed the previous courses. Application for admission has been received for both these classes for the 1924 session.

During the year the Daniel McIntyre Collegiate Institute has been equipped to accommodate vocational classes for practical arts courses for girls and for commercial courses. In the home economics work one kitchen has been equipped with gas and the other with electricity. Very expensive and efficient equipment has been installed for millinery, dressmaking and laundering. No equipment has yet been installed for industrial classes and this seems somewhat indicative of the tendency in vocational education. The work in home economics and commercial work seems to be the most popular among students and also receives more general support from the public.

No legislation respecting vocational education has been passed during the year.

## SASKATCHEWAN

### REPORT ON VOCATIONAL EDUCATION

*J. H. McKechnie, Chief Inspector*

The cities of Moose Jaw, Regina, and Saskatoon continued their efforts in the field of vocational education along lines similar to those undertaken during the previous year. There was some slight expansion. In Saskatoon, vocational courses in day classes were undertaken in industrial work and in homemaking in both the Nutana and the Bedford Road Collegiates, with reasonable success. In Regina, short winter courses were given in motor mechanics and gas traction.

In Yorkton, all the girls in the Collegiate Institute spent from one and a half to three hours a week on general home economics (cooking, sewing, etc.), while in the third year, fifteen girls selected the household science option for their examinations for second class diplomas. The board was of the opinion that this work might not meet the requirements for grants under The Vocational Education Act and no request was therefore made.

Evening class work was not marked by any new developments. In Saskatoon, the work in motor mechanics and machine shop was temporarily suspended. The facilities provided at the University by joint arrangement with the city were not available during the year just closed.

Many in attendance at evening classes have no definite industrial pursuits in mind. Every centre of instruction throughout Canada reports a similar type of student. There seems to be a general tendency to tighten up the regulations in respect to those taking so-called "hobby" courses or who attend a winter term merely to make a hat or a dress. In Saskatchewan, those in charge of evening class work are being continually urged to meet the needs of the industrial worker or homemaker with definite and progressive courses of instruction. Up to the present, however, there seems to be no demand for any type of instruction not already provided.

## ALBERTA

## REPORT OF THE DIRECTOR OF TECHNICAL EDUCATION

W. G. Carpenter

The year 1923-24 has not been one of very marked progress in technical education in Alberta. Outside the cities there has been a falling off in the teaching of practical subjects both in the day and evening classes. Even in the cities there has been a tendency to reduce. Manual training and household science have been brought to the irreducible minimum. The only two centres in which these subjects are being taught are Calgary and Edmonton. These two

cities, with Lethbridge, are the only centres attempting anything in the line of commercial education. Again, they are the only two places in which any attempt is being made to give technical training in day classes. Drumheller, Nordegg, Camrose, and Hillcrest Mines may be added to the three centres named above giving any evening instruction during the year. This has been a falling-off which is regrettable. Notwithstanding the drop in the number of centres actually giving instruction, the total number of persons reached in these classes, both in the day and in the evening, has been increased.

In Edmonton, the Technical School has maintained itself very well, an additional teacher having been added to the staff during the year. In Calgary, amidst all the clamour for curtailment, no outcry was made against the Pre-vocational School. Attendance has been well maintained in the commercial classes both in Edmonton and in Calgary, and commercial graduates in good standing have had little difficulty in getting appointments. The Provincial School of Technology and Art has had a good year. An increasing interest has been evidenced towards the work being done there, and one of the classes has been so popular that attendance had to be refused quite a large number of applicants. This particularly applied to the course in industrial electricity.

Probably the reason for the falling-off in evening schools has been the attitude of the ratepayer towards taxation and the necessity for curtailment on the part of tax-levying bodies. The building industries have been stagnant for several years and there has been little or no demand for instruction in the various phases of these activities. In fact, because of the difficulty in getting employment at home, many workmen have migrated, leaving, in many cases, the families in the province while they went where steady occupation was to be found. This condition does not make it encouraging for the young people to prepare for a vocation that is so precarious. The situation in the mines during the past year has been unsatisfactory. The market for Alberta coal is causing operators and miners much concern. Wage disputes finally resulted in closing down the majority of the mines in the province and, as a result, both the attitude of the operators and the miners themselves is not very favourable towards educational work. With the fall and winter drawing near, there is no settlement of difficulties, and the prospect for improvement in mental attitude is none too bright. Since mining is the largest industrial pursuit and since the mining centres were the chief centres for evening instruction outside the cities in Alberta, this condition has seriously affected educational work in its technical aspect.

No changes were made in the regulations or in legislation affecting technical or vocational education. Provincial grants have not been paid to support those classes carried on in the evening that might be known as hobby classes. Such classes were basketry, woodworking, as a hobby or distinguished from a vocation, music, fine art, etc. With the knowledge that there would be no grant paid, some of these classes continued, those getting the service being willing to pay increased tuition fees to make up for the loss of grant.

There have been no new developments or building operations begun during the year. It has not been a year of expansion. It has rather been one of holding ground.

During the year a new Provincial Director of Technical Education was appointed in the person of W. G. Carpenter, of Edmonton. This official entered his dual position as Principal of the Provincial Institute of Technology and Art in Calgary and as Director of Technical Education for the Province, on January 1. During the balance of the year he has been studying the situation in the province with the view to making technical education effective and helpful to the citizens of Alberta. The office of the director has been moved from Edmonton to Calgary from which place the provincial organization will function in the future.

## SESSIONAL PAPER No. 26

For a period during the year, a wave of depression passed over the province which was not characteristic of Alberta or of Albertans. With the improvement in crop conditions and with a good price in prospect for grain, there has been a revival in spirits and the prospect for the future appears fairly bright. There are many inquiries for courses in the Technical Institute from all points in the province, and, while nothing startling is anticipated, it is expected that probably there will be a revival of interest in evening classes, and that next year Alberta will be able to give a better account of herself.

The attached tables give the details of attendance and expenditure for salaries for the two past years, both in day classes and in evening.

## BRITISH COLUMBIA

## REPORT OF THE PROVINCIAL ORGANIZER OF TECHNICAL EDUCATION

*John Kyle*

I have the honour to submit a brief report for the year from July 1, 1923, to June 30, 1924, on the work of technical education in the province of British Columbia.

## TECHNICAL OR DAY VOCATIONAL SCHOOLS

Technical schools are organized in the cities of New Westminster, Trail, Vancouver, and Victoria.

The three-year courses of study in these schools embrace the following subjects:—

*Technical Course for Boys*

English, citizenship and economics, history, French or Latin, mathematics, applied mechanics, physics, chemistry, drawing and design, shopwork in wood, metal, and electricity, physical culture.

*Household Science Course for Girls*

English, citizenship and economics, history, French or Latin, mathematics, chemistry, physics, physiology, dietetics and cookery, needlework (dress-making and millinery), drawing, design and household art, vocal music, physical culture.

## COMMERCIAL COURSE

(a) Secretarial.

(b) Accounting.

English, business correspondence and filing, arithmetic, book-keeping and accounting, commercial geography, shorthand, typewriting.

At the conclusion of the courses, examinations are held for the Technical Leaving Certificate, the Matriculation Certificate to the University, and the Commercial Certificate, all issued by the Department of Education.

The following table gives the number of students attending these technical courses:—

New Westminster.....	170 (Technical, Commercial, Home Economics)
Trail.....	24 (Technical only)
Vancouver.....	987 (Technical, Commercial, Home Economics)
Victoria.....	242 (Technical, Commercial)

*Commercial Courses only*

Kamloops.....	23
North Vancouver.....	67
Point Grey.....	42
Revelstoke.....	18
South Vancouver.....	80

Making a total of 1,653 students in day vocational classes.

#### NIGHT SCHOOLS OR EVENING VOCATIONAL SCHOOLS

Night schools are conducted in thirty-six cities and rural municipalities in the province and 5,044 students are attending. Two hundred and five individual teachers are engaged in the work of instruction.

#### TEACHER-TRAINING CLASSES IN TECHNICAL AND COMMERCIAL SUBJECTS

In order that efficient teaching may be conducted in day and evening vocational schools, training classes are organized with an attendance of eighty student-teachers and a staff of seven instructors. These classes meet either at night schools or on Saturdays, and at summer schools.

The standard of skill has been increased perceptibly through attendance at these classes and the various technical problems connected with classes for both boys and girls are usually thoroughly discussed.

#### CORRESPONDENCE CLASSES

Opportunities for study are given to coal-mine workers who wish to prepare for promotion. There is in this section a membership of one hundred and fifty-two students and a staff of two teachers.

The province is still handicapped by the financial situation, but the eyes of the school trustees are undoubtedly fixed on the work of technical education. The educational value of the studies is being better understood and freely recognized, so that the prospects of future growth is becoming well assured.

## IX. DOMINION GOVERNMENT ANNUITIES

During the early years of the 20th century, there took place throughout the civilized world a distinct movement in favour of ameliorating the living conditions of the less well-off members of society. One form which this movement took in the United Kingdom was that of old age pensions granted by the State as a free gift to its poorer citizens, whose earnings were very generally insufficient to permit of a margin of saving. In Canada, where wages were higher and a margin of saving consequently existed, the movement took the form of providing, through the establishment of Government annuities, an absolutely safe investment for such savings, which had only too often been lost through the inexperience of their owners, leaving the latter a burden upon the charity of relatives or of the public.

Under the Government Annuities Act, 1908 (7-8 Edw. VII, c. 5), as amended by the Act of 1920, His Majesty the King, represented by the minister (at present the Minister of Labour), may sell to persons over the age of five years, domiciled or resident in Canada, immediate or deferred annuities of not less than \$50 nor more than \$5,000 (1) for the life of the annuitant; (2) for a term of years certain, not exceeding twenty years, or for the life of the annuitant, whichever period shall be the longer; and (3) an immediate or deferred annuity to any two persons domiciled in Canada during their joint lives, and with or without continuation to the survivor. The property and interest of any annuitant in any contract for an annuity is neither transferable nor attachable. The purchaser may contract that, in the event of the death of the annuitant before the date fixed for the annuity to begin, all money paid shall be refunded to the purchaser or his legal representatives with interest at the rate of 4 per cent compounded yearly.

## FINANCIAL STATEMENT

From September 1, 1908, the date of the inception of the Annuities Branch, up to and inclusive of March 31, 1924, the total number of annuity contracts issued was 6,056. Of the purchasers of these contracts 591 have been removed by death, leaving in force on March 31, 1924, 5,465 contracts. The total amount of purchase money received during the same period was \$8,147,634.39. The following statement gives the details:—

15 GEORGE V, A. 1925

During the fiscal year ending March 31, 1924, 217 immediate annuities and 192 deferred annuities, a total of 409, were purchased, amounting in the aggregate to \$174,574.35.

The amount of purchase money received during the same period was \$1,458,975.92.

The number of annuities in force on March 31, 1924, were as follows: Immediate, 1,588; deferred, 3,877, or a total of 5,465, and the amount of such annuities was \$1,545,401.07. The amount received on account of the purchase of annuities from September 1, 1908, to March 31, 1924, exclusive of amounts returned to purchasers, was \$8,147,634.39.

## X. LEAGUE OF NATIONS INTERNATIONAL LABOUR CONFERENCE

Mention has been made in previous annual reports of the Department of Labour of the establishment of the International Labour Organization of the League of Nations under the authority of the Treaties of Peace and of its objects, plan of organization, etc.; also of the matters which received attention at the first, second, third and fourth sessions of the conference held in Washington, D.C., October-November, 1919; Genoa, Italy, June-July, 1920; Geneva, Switzerland, October-November, 1921; and Geneva, October, 1922, respectively.

Following is a list of Draft Conventions and Recommendations which have been adopted at the successive annual sessions of the International Labour Conference, 1919-1924.

The Draft Conventions and Recommendations adopted at the first session (1919) are as follows:—

Draft Conventions (1) limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week; (2) concerning unemployment; (3) concerning the employment of women before and after childbirth; (4) concerning employment of women during the night; (5) fixing the minimum age for admission of children to industrial employment; (6) concerning the night work of young persons employed in industry.

Recommendations concerning (1) unemployment; (2) reciprocity of treatment of foreign workers; (3) the prevention of anthrax; (4) the protection of women and children against lead poisoning; (5) the establishment of government health services; (6) the application of the Berne Convention of 1906, on the prohibition of the use of white phosphorus in the manufacture of matches.

The agenda of the second session (1920) related exclusively to matters affecting seamen and the Draft Conventions and Recommendations adopted are as follows:—

Draft Conventions (a) fixing the minimum age for admission of children to employment at sea; (b) concerning unemployment indemnity in case of loss or foundering of the ship; (c) for establishing facilities for finding employment for seamen.

Recommendations concerning (a) the limitation of hours of work in the fishing industry; (b) the limitation of hours of work in inland navigation; (c) the establishment of national seamen's codes; (d) unemployment insurance for seamen.

The third session (1921) resulted in the adoption of the following Draft Conventions and Recommendations:—

Draft Conventions concerning (1) the age for admission of children to employment in agriculture; (2) the rights of association and combination of agricultural workers; (3) workmen's compensation in agriculture; (4) the use of white lead in painting; (5) the application of the weekly rest in industrial undertakings; (6) fixing the minimum age for the admission of young persons to employment as trimmers and stokers; (7) concerning the compulsory medical examination of children and young persons employed at sea.

Recommendations concerning (a) the prevention of unemployment in agriculture; (b) the protection, before and after childbirth, of women wage-earners in agriculture; (c) night work of women in agriculture; (d) night work of children and young persons in agriculture; (e) the development of technical agricultural education; (f) living-in conditions of agricultural workers; (g) social insurance in agriculture; (h) the application of the weekly rest in commercial establishments.

The fourth session (1922) resulted in the adoption of a Recommendation regarding the communication to the International Labour Office of statistical or other information regarding emigration, immigration and the repatriation and transit of emigrants. A proposed amendment to the Peace Treaties was also adopted by the conference providing for an increase in the membership of the Governing Body of the International Labour Office from 24 persons to 32. Of the 32 persons, 16 will be Government representatives, whilst the employers'

and workers' groups in the International Labour Conference will each be represented by 8 persons, chosen by the respective groups. Both the original article and the proposed amendment set forth that, of the persons representing governments, eight shall be chosen by the member states of chief industrial importance; other persons representing governments, numbering four under the original article and eight under the proposed amendment, shall be appointed by the members selected for that purpose by the Government delegates to the conference, excluding the delegates of the eight principal states mentioned above. The amendment further requires that, of the 16 Government representatives, 6 shall be drawn from non-European States. The question as to which are the members of chief industrial importance was left to the Council of the League of Nations, which, having adopted a classification placing Canada amongst the first eight member states of chief industrial importance, assures the Dominion Government of representation on the Governing Body similar to that which it has had since the inception of the International Labour Organization. Under the terms of article 422 of the Treaty of Peace, the proposed amendment of article 393, before going into force, will require to be ratified by the states represented on the Council of the League of Nations and by three-fourths of the members of the League of Nations.

The agenda of the fifth session (1923) comprised only one subject, namely, general principles for the organization of factory inspection. A Recommendation on this subject was adopted by the conference "Concerning the General Principles for the Organization of Systems of Inspection to Secure the Enforcement of the Laws and Regulations for the Protection of the Workers."

The sixth session (1924) resulted in the adoption of a Recommendation concerning the development of facilities for the utilization of workers' spare time. The conference approved also of the adoption of the following additional measures, which will, however, come up for final adoption at the 1925 session:—

Proposed Draft Convention concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents.

Proposed Recommendation concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents.

Proposed Draft Convention concerning the weekly suspension of work for twenty-four hours in glass-manufacturing processes where tank furnaces are used.

Proposed Draft Convention on night work in bakeries.

#### CANADIAN DELEGATION, 1923

The Canadian delegation in attendance at the 1923 conference was as follows:—

*Government Delegates.*—Mr. Philippe Roy, Commissioner General for Canada in France; Miss Caroline Carmichael, President, National Council of Women of Canada.

*Advisers.*—Mrs. James Carruthers (Violet Markham) London, England; Mr. William C. Noxon, Agent-General for the Province of Ontario in London; Mr. Edward McGrath, Secretary of the Labour Office of the Province of Manitoba.

*Employers' Delegate.*—Mr. J. H. Sherrard, Chairman of the Board of Directors of Simmons, Limited, Montreal.

*Workers' Delegate.*—Mr. Tom Moore, President of the Trades and Labour Congress of Canada.

Of the 122 delegates to the conference, drawn from 42 countries, 74 were appointed on behalf of Governments, 24 on behalf of employers and 24 on behalf of workers. There were, besides, 70 technical advisers in attendance, of whom 38 were appointed on behalf of the Governments, 14 on behalf of the employers and 18 on behalf of the workers.

## SESSIONAL PAPER No. 26

The conference elected as President, His Excellency Dr. Mineichiro Adatchi, Japanese Government delegate on the Governing Body of the International Labour Office. Messrs. H. Pfister (delegate of the Swiss Government), G. Olivetti (Italy, delegate of the employers), Leon Jouhaux (France, delegate of the workers), were elected Vice-Presidents. Monsieur Albert Thomas, Director of the International Labour Office, acted as Secretary-General of the conference.

## CANADIAN DELEGATION, 1924

The Canadian delegation in attendance at the 1924 conference was as follows:—

*Delegates representing the Government of Canada.*—Mr. F. A. Acland, of Ottawa, King's Printer for Canada; Mrs. Charles H. Thorburn, of Ottawa, Vice-President of the National Council of Women.

*Technical Advisers to the Government Delegates.*—The Hon. R. W. Craig, K.C., of Winnipeg, Attorney General for Manitoba; Mr. W. C. Noxon, Agent General for the Province of Ontario in London, England; Mr. Pierre Beaulé, of Quebec, President of the Confederation of Catholic Workers of Canada.

*Delegate representing the Employers of Canada.*—Mr. Melville P. White, of the Canadian General Electric Company, Limited, Toronto, Ontario.

*Technical Adviser to the Employers' Delegate.*—Mr. H. W. Macdonnell, of the Canadian Manufacturers' Association, Toronto, Ontario.

*Delegate representing the Workpeople of Canada.*—Mr. Tom Moore, of Ottawa, President of the Trades and Labour Congress of Canada.

*Technical Adviser to the Workpeople's Delegate.*—Mr. W. L. Best, of Ottawa, Legislative Representative of the Brotherhood of Locomotive Firemen and Enginemen.

The conference consisted of 127 delegates with 155 advisers, making a total in attendance of 282. Sixty-nine of these were delegates appointed on behalf of Governments, 30 on behalf of employers and 28 on behalf of workers. There were besides 53 Government advisers, 44 employers' advisers and 5 substitute advisers and 53 workers' advisers.

The conference elected as President Mr. Hjalmar Branting, former Prime Minister of Sweden. Messrs. Aguero y Bethancourt (delegate of the Cuban Government), Robert Pinot (France, delegate of the employers), and Corneille Mertens (Belgium, delegate of the workers), were elected Vice-Presidents. Mr. Albert Thomas, Director of the International Labour Office, acted as Secretary-General of the conference.

The proposals emanating from the successive International Labour Conferences were received in due course by the Canadian Government and have been brought to the attention of the competent legislative authorities, as required by the treaty terms. It should be noted that certain of the proposals were regarded by the federal law officers as coming within Dominion jurisdiction, whilst others were deemed to be within provincial authority and were accordingly referred to the several Provincial Governments for attention.

Under the terms of the Treaties of Peace, each state adhering thereto is entitled to four delegates in the International Labour Conference, two of whom shall be Government delegates, and the two others shall be delegates representing respectively the employers and workpeople of the country, chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople, as the case may be, in the respective countries. Each delegate may be accompanied by advisers not exceeding two in number for each item on the agenda. It is also provided in the Treaties of Peace that the decisions of the conference may take the form of (a) a recom-

15 GEORGE V. A. 1925

mentation to be submitted to the member states for consideration with a view to effect being given to it by national legislation or otherwise, or (b) a draft international convention for ratification by the member states. A two-thirds majority of the votes cast by the delegates is required for adoption of any recommendation or draft convention by the conference. The recommendations and draft conventions are afterwards transmitted through the Secretariat of the League of Nations to the different countries represented on the International Labour Organization for acceptance or otherwise. Each country is obliged under the treaties, within a period of one year at most from the closing of the conference, or, if it is impossible owing to exceptional circumstances to do so within one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the conference, to bring the respective recommendations or draft conventions "before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action."

#### FEDERAL-PROVINCIAL CONFERENCE RELATIVE TO OBLIGATIONS OF CANADA UNDER LABOUR SECTIONS OF PEACE TREATIES

A conference of representatives of the Dominion Government and of the Provincial Governments was held in the Parliament Buildings, Ottawa, on September 24-26, 1923, for the consideration of the obligations of Canada arising out of the labour sections of the Treaties of Peace.

The meeting grew out of a resolution which was adopted at a Federal-Provincial conference which was held in September, 1922, and was called by the Prime Minister of Canada in conformity with the expressed wishes of the Provincial Governments. The object in view was to secure an exchange of views regarding the principles enunciated in the Treaties of Peace for the avoidance of labour unrest and also for consultation relative to various proposals for legislative action which have been adopted by the International Labour Conference (League of Nations) in the form of Draft Conventions and Recommendations and which have been deemed by the law officers of the Crown in Canada to deal with subjects within provincial legislative control. The Dominion Government was represented by Hon. James Murdock, Minister of Labour, who acted as chairman, and Hon. Ernest Lapointe, Minister of Marine and Fisheries. The following representatives were in attendance on behalf of the Provincial Governments:—

*Nova Scotia.*—Hon. E. H. Armstrong, Premier; Hon. D. A. Cameron, Provincial Secretary; Hon. James C. Tory, Minister without portfolio; Mr. W. B. MacCoy, K.C., Secretary, Industries and Immigration, Halifax.

*New Brunswick.*—Hon. C. W. Robinson, Minister of Lands and Mines; Mr. J. S. Martin, M.L.A., Chatham.

*Quebec.*—Mr. Louis Guyon, Deputy Minister of Labour.

*Ontario.*—Mr. J. H. H. Ballantyne, Deputy Minister of Labour.

*Manitoba.*—Mr. Edward McGrath, Secretary of the Bureau of Labour.

*Saskatchewan.*—Hon. J. G. Gardiner, Minister in charge of the Bureau of Labour and Industries.

*Alberta.*—Hon. Alex. Ross, Minister of Public Works and Labour; Mr. Walter Smitten, Commissioner of Labour.

The Governments of Prince Edward Island and British Columbia were not represented.

Since recognition is given in the Labour Sections of the Peace Treaties to the most representative organizations of employers and workpeople in the different countries represented in the International Labour Organization, it

## SESSIONAL PAPER No. 26

was agreed that an invitation should be extended to the Canadian Manufacturers' Association and to the Trades and Labour Congress of Canada, which have been recognized as the most representative organizations of employers and workpeople in Canada, to be represented in the present conference without power. Mr. Tom Moore, President of the Trades and Labour Congress, Mr. E. Blake Robertson, Ottawa, representative of the Canadian Manufacturers' Association, and Mr. H. W. Macdonnell, Secretary of the Industrial Relations Department of the Canadian Manufacturers' Association, Toronto, availed themselves of this invitation and participated in the discussion of the conference. An opportunity was also given, on request, to Mr. J. Clark Reilly, Secretary of the Association of Canadian Building and Construction Industries, to present, for the information of the conference, a plan which has been proposed by this association for the training of apprentices in the building trades.

Mr. Gerald H. Brown, Assistant Deputy Minister of Labour, attended the conference for the purpose of explaining the labour provisions of the Peace Treaties, and the proposals which have emanated from the International Labour Conference.

A memorandum of information was submitted showing the existing legislation of the provinces on these respective subjects, also indicating the action taken on these matters to date in other countries. A separate memorandum was also submitted to the conference dealing with the present position of the eight-hour day movement in Canada and other countries.

The conference opened with a discussion of the labour features of the Peace Treaties and of the respective jurisdiction of the Federal Parliament and of the provincial legislatures in relation to these matters. The formal agenda comprised twenty-one items in all. Unanimous resolutions were adopted on most of the items of the agenda, which were transmitted to the respective Provincial Governments for their attention.

## CONFERENCE AGENDA AND RESOLUTIONS ADOPTED

Following is the agenda of the conference, together with the resolutions adopted on the respective items:—

## PROPOSALS EMANATING FROM THE FIRST INTERNATIONAL LABOUR CONFERENCE

1. *Draft Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week.*

The object of this Draft Convention is to secure the adoption of a maximum working day of eight hours and week of forty-eight hours for persons employed in public or private industrial undertakings.

No resolution was adopted on the subject, but it was agreed that the federal Department of Labour should proceed as promptly as possible to bring about an up-to-date survey, in order to ascertain the present position of the eight-hour day movement in industrial undertakings in Canada, the information obtained by the inquiry to be submitted to all the Provincial Governments for their consideration.

2. *Recommendation concerning unemployment.*

This Recommendation contains provisions prohibiting the operation of private employment offices, permitting the recruiting of bodies of workers in foreign countries by mutual agreement, providing for the introduction of a system of unemployment insurance and for the co-ordination of public works with a view to the avoidance of unemployment.

The following resolution was adopted on this subject:—

Resolved, that this conference concur in Article 1 of the Draft Recommendation concerning unemployment and notify the proper authorities accordingly, it appearing that all the Provincial Governments have adopted legislation to give effect to this Recommendation, except New Brunswick, which province has given assurance that, in view of the premises, similar legislation by that province will be considered at the next session of the legislature.

Article 2. Resolved that this conference is of the opinion that consistent recognition should be given to the intent of this Recommendation.

Article 3. No action taken.

Article 4. The conference concurs in this Recommendation.

3. *Draft Convention concerning the employment of women before and after childbirth.*

This Draft Convention makes special provision for the protection of women employed in industrial or commercial undertakings before and after childbirth.

The following resolution was adopted on this subject:—

Resolved, that in the opinion of this conference this matter is not a live question in Canada, and appears to be satisfactorily taken care of by local regulations.

4. *Draft Convention concerning the employment of women during the night.*

This Draft Convention forbids the employment of women at night in industrial undertakings. The term night signifies in this case a period of at least eleven consecutive hours, including the interval between 10 p.m. and 5 a.m.

The following resolution was adopted on this subject:—

Resolved, that in the opinion of this conference the provisions of the Draft Convention concerning the employment of women during the night be accepted as a basis for securing uniform legislation within each province.

5. *Recommendation concerning the protection of women and children against lead poisoning.*

This Recommendation proposes the exclusion of women and young persons under eighteen from employment from certain industrial processes.

The following resolution was adopted on this subject:—

Resolved, that we approve of the principle of the Draft Convention concerning the protection of women and children against lead poisoning, and suggest that the law officers of the Crown embody the same in the federal laws regarding white phosphorus; but if in their opinion this is not competent to the federal authority, the various provinces be requested to enact the necessary legislation.

6. *Draft Convention fixing the age for admission of children to industrial employment.*

This Draft Convention forbids the employment of children under fourteen in industrial undertakings.

The following resolution was adopted on this subject:—

Resolved, that the conference express concurrence in the subject matter of this Draft Convention, Hon. Mr. Robinson intimating on behalf of the Government of New Brunswick that the matter will be brought to their attention.

7. *Draft Convention concerning night work of young persons employed in industry.*

This Draft Convention forbids the employment of young persons under eighteen years of age at night in industrial undertakings. The term night signifies in this case a period of at least eleven consecutive hours, including the interval between 10 p.m. and 5 a.m.

The following resolution was adopted on this subject:—

Resolved, that a general survey be made by each of the provinces in co-operation with the federal Department of Labour regarding the scope of this Convention, and particularly the effect of Article 4 thereof, and that the result of this survey be submitted to a further conference and to the various provinces.

## SESSIONAL PAPER No. 26

## PROPOSAL EMANATING FROM THE SECOND INTERNATIONAL LABOUR CONFERENCE

8. *Recommendation concerning the limitation of hours of work in the fishing industry.*

This Recommendation favours the adoption of legislation limiting the hours of work in the fishing industry in the direction of the eight-hour day and forty-eight hour week.

The following resolution was adopted on this subject:—

Resolved, that consideration of the Recommendation for limiting the hours of work in the fishing industry be deferred by this conference pending action that may be taken in regard to the eight-hour day in industry and commerce.

## PROPOSALS EMANATING FROM THE THIRD INTERNATIONAL LABOUR CONFERENCE

9. *Recommendation concerning the prevention of unemployment in agriculture.*

This Recommendation recommends the consideration of various measures for the prevention of unemployment amongst agricultural workers.

The following resolution was adopted on this subject:—

Resolved, that the conference adopt this Recommendation and take such steps as may be necessary to secure a proper survey of the conditions existing in the several provinces in relation to these various specified items for the purpose of preparing a periodical report to the International Labour Office, showing the steps that have been taken in the various provinces to give effect to this Recommendation.

10. *Recommendation concerning the protection before and after childbirth of women wage-earners in agriculture.*

This Recommendation contains various proposals for the protection of women wage-earners employed in agricultural undertakings before and after childbirth.

The following resolution was adopted on this subject:—

Resolved, that this Recommendation is not one which has application to conditions in Canada.

11. *Recommendation concerning night work of women in agriculture.*

This Recommendation favours the adoption of measures to secure to women wage-earners employed in agriculture not less than nine consecutive hours' night rest.

The following resolution was adopted on this subject:—

Resolved, that the motion with respect to Recommendation No. 10 applies also to this Recommendation.

12. *Draft Convention concerning the age for admission of children to employment in agriculture.*

This Draft Convention forbids the employment of children under fourteen in agriculture, excepting outside school hours.

The following resolution was adopted on this subject:—

Resolved, that in the opinion of this conference this Draft Convention has but slight application to Canada as there is relatively little employment of children in agriculture, and the subject-matter of this Convention in so far as it is competent for the provincial legislatures to deal with it is covered by provincial laws in most of the provinces.

13. *Recommendation concerning night work of children and young persons in agriculture.*

This Recommendation advises the adoption of measures to secure to children under fourteen employed in agriculture not less than ten consecutive hours' night rest, and to young persons between the ages of fourteen and eighteen years not less than nine consecutive hours' night rest.

The following resolution was adopted on this subject:—

Resolved, that this Recommendation is not one which has application to conditions in Canada.

14. *Recommendation concerning the development of technical agricultural education.*

This Recommendation advises the development of vocational agricultural education.

The following resolution was adopted on this subject:—

Resolved, that the conference is of opinion that the requirements of this Recommendation, as to the first article, are met by the existing legislation in Canada and that the provinces on their part express their willingness to furnish reports for transmission to Geneva in accordance with the suggestion contained in the second article of the Recommendation.

15. *Recommendation concerning living-in conditions of agricultural workers.*

This Recommendation advises the adoption of measures to secure proper housing and accommodation for agricultural workers.

The following resolution was adopted on this subject:—

Resolved, that this conference place itself on record as approving of the principle of this Recommendation and agrees to bring to the attention of the respective governments any appropriate legislation to give effect to the same where practicable and possible.

16. *Draft Convention concerning the rights of association and combination of agricultural workers.*

This Draft Convention proposes that the same rights of association and combination should be granted to agricultural workers as to industrial workers.

The following resolution was adopted on this subject:—

Resolved, that the Draft Convention concerning the rights of association and combination of agricultural workers is met in Canada since no statute in this country forbids their association and combination for lawful purposes.

17. *Draft Convention concerning workmen's compensation in agriculture.*

This Draft Convention proposes that workmen's compensation laws should be made applicable to those employed in agriculture.

The following resolution was adopted on this subject:—

Resolved, that this Draft Convention be referred to the Federal Government to the different provinces for further consideration and a survey, with the understanding that the Federal Government will transmit to the several provinces the results of the survey.

18. *Recommendation concerning social insurance in agriculture.*

This Recommendation advises that agricultural workers should enjoy the same benefits as workers in industry and commerce under any laws which are passed providing for insurance against sickness, invalidity, old age and other similar social risks.

The following resolution was adopted on this subject:—

Resolved, that in the opinion of the conference action on this Recommendation be deferred until such time as the conditions referred to are made applicable to workers in industry and commerce.

19. *Draft Convention concerning the use of white lead in painting.*

This Draft Convention contemplates the prohibition of the use of white lead in the external painting of buildings, subject to certain enumerated exceptions.

The following resolution was adopted on this subject:—

Resolved, that the provinces take steps to make a survey concerning the use of white lead in painting.

## SESSIONAL PAPER No. 26

## MINIMUM WAGE LAWS

Certain proposals relative to the desirability of uniformity and co-ordination among the several provincial minimum wage laws had been included in the conference agenda, at the request of the Minimum Wage Board of Ontario. A resolution was adopted on this subject in the terms following:—

That this conference commends to the earnest and early consideration of the various provinces the matter of the adoption of uniform minimum wage laws for female workers.

## WEEKLY REST IN INDUSTRY AND COMMERCE

The conference also considered the proposals contained in a Draft Convention of the International Labour Conference (1921) providing for a weekly rest in industry and a Recommendation to the same effect applicable to work in commercial establishments. It was explained that both these proposals related to matters which were regarded as within Dominion jurisdiction.

Following a discussion of these subjects a resolution was adopted by the conference in the terms following:—

Resolved, that this conference approves of the principle of the Draft Convention and suggests that the Federal Government take such steps as may be necessary to ensure ratification after consultation with the attorneys general of the various provinces.

## GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE

Four meetings of the Governing Body of the International Labour Office were held during the past fiscal year as follows: April 10-13, 1923; June 12-13, 1923; October 15-18, 1923; and January 29-31, 1924. These meetings were held in Geneva, Switzerland. The Governing Body is charged with the general oversight of the International Labour Conference and also prepares the agenda of the annual conference. The Governing Body is composed of twenty-four members, of whom twelve are Government representatives, six employers' representatives, and six workers' representatives. Of the twelve Government seats, one is held by the Government of Canada. Hon. James Murdock, Minister of Labour, who is the Canadian Government representative on the Governing Body, was unable to attend any of the meetings which were held during the past year, but Mrs. James Carruthers (Violet Markham) acted as substitute at the meetings in April, June, and October, and Mr. Philippe Roy substituted at the meeting in January. Mr. Tom Moore, President of the Trades and Labour Congress of Canada, is one of the six labour representatives on the Governing Body. These six representatives were chosen from among the labour group in attendance at the International Labour Conference in 1922.

The Department of Labour is entrusted with the duties arising out of the relations of Canada with the International Labour Organization. These have entailed much correspondence, not only with the International Labour Office, but also with other departments of the Dominion Government, with the provinces and with employers' and workers' organizations. Replies have also been prepared in the Department of Labour to various questionnaires which were circulated on behalf of the International Labour Office. The performance of these duties has necessarily entailed a close study on the part of officers of the department of the various technical questions which have figured on the various conference agenda and meetings of the Governing Body and of questionnaires received from the International Labour Office.

A bulletin entitled "Canada and the International Labour Conference" was issued by the Department of Labour in February, 1922, for the purpose of furnishing information in reference to the International Labour Organization and the subjects which have received attention at the hands of this body.

## ACTION TAKEN IN VARIOUS COUNTRIES

The following figures summarize the results attained in the execution of the Draft Conventions and Recommendations adopted by the International Labour Conference:—

*I. Ratifications*

Number of ratifications communicated .....	136
Number of cases in which ratification has been authorized by the competent authority but has not yet been communicated.....	23
Number of cases in which ratification has been recommended to the competent authority .....	135

*II. Application*

Legislative measures adopted, introduced or prepared with a view to the application of Conventions or Recommendations.....	181
--	-----

*III. Legislative Activity*

General total of measures for ratification and application.....	475
---	-----
