 CONTENTS OF VOLUME 9—*Continued.*

- 153.** Return to an Order of the House of the 19th April, 1922, for a copy of Timber License issued to the Union Bank of Canada or any other parties to cut timber on Indian Lands in the Township of Laird, District of Algoma, together with a copy of all correspondence, letters, memoranda, telegrams and other documents, passing between the Indian Agent at Sault St. Marie, the Licensees or any other parties, and the Department of Indian Affairs, in connection therewith. Also a statement of all dues paid the Department in respect to said License. Presented May 11, 1922. Mr. Simpson.
Not printed.
- 154.** Return to an Order of the House of the 1st May, 1922, for a return showing: 1. Whether it is the intention of the Government to operate the greater production farms on the Blackfoot Indian Reserve at Gleichen, Alberta, this year. 2. If not, how does the Government intend disposing of them. 3. Whether proper precautions will be taken to prevent the country being seeded with weeds from these neglected farms. 4. Number of acres broken by the Government on these farms. 5. The cost per acre. 6. From whom, at what place, and at what price the seed wheat for these farms was purchased. 7. From whom, at what point, and at what price the feed oats were purchased during the first and second years of operation. 8. Average yield each year of operation. 9. Net price received per bushel for wheat grown. 10. To whom this wheat was sold. 11. Net profit per acre each year. Presented May 11, 1922. Mr. Garland (Bow River) *Not printed.*
- 155.** Return to an Order of the House of the 8th May, 1922, for a Return showing:— 1. Whether it is a fact that appeals made by many Civil Servants who are dissatisfied with their classification never reach the Board of Hearing. 2. Whether it is true that such appeals are from the decisions of heads or chiefs of branches who declined to recommend the classifications claimed to be in accord with the character of the work done by such Civil Servants. 3. Whether it is true such appeals fail to reach the Board of Hearing because they are so prevented by the heads or chiefs against whose decisions such appeals are made. 4. If so, whether the Government intends taking any steps to see justice done such Civil Servants, by having their appeals reach the Board of Hearing notwithstanding the opposition of such heads or chiefs against whose decisions such appeals are made. 5. If not, why not. Presented May 11, 1922. Mr. Lanctot.....*Not printed.*
- 156.** Return to an Order of the House of the 11th May, 1922, for a return showing:— 1. In what countries Canada is represented by trade agents. 2. Names of said agents, and salary each receives. Presented May 11, 1922. Mr. Prevost...*Not printed.*
- 157.** Return to an Address to His Excellency the Governor General of the 3rd April, 1922, for a copy of all correspondence, telegrams, reports and other documents exchanged between the Department of the Interior or any of its officers or employees, and the Gold Commissioner of Yukon Territory, or any other person or official, concerning the application to Yukon Territory of the Order in Council which provides that the Mining Recorders shall not receive for record, transfers of interests in mineral claims, when such interests are less than one quarter interest. Also a copy of the said Order in Council. Presented May 15, 1922. Mr. Black (Yukon).....*Not printed.*
- 158.** Return to an Order of the House of the 1st May, 1922, for a return showing a list of the names of the permanent employees of the Montreal Harbour Commission, the salary of each, date of appointment and salary on appointment, age, occupation, and the respective previous occupations of said employees. Presented May 15, 1922. Mr. Archambault*Not printed.*
- 159.** Return to an Order of the House of the 26th April, 1922, for a copy of all correspondence, telegrams, letters, agreements, contracts, claims, memoranda and other documents between the Caraguet and Gulf Shore Railway Company and the Government of Canada, relating to the purchase of the said railway. Presented May 15, 1922. Mr. Hanson. *Not printed.*
- 159a.** Supplementary Return to an Order of the House of the 26th April, 1922, for a copy of all correspondence, telegrams, letters, agreements, contracts, claims, memoranda and other documents between the Caraguet and Gulf Shore Railway Company and the Government of Canada, relating to the purchase of the said railway. Presented May 19, 1922. Mr. Hanson*Not printed.*
- 160.** Return to an Address to His Excellency the Governor General of the 3rd April, 1922, for a copy of all correspondence, telegrams, reports, and other documents exchanged between the Department of the Interior, or any of its officers or employees, and the Gold Commissioner of the Yukon Territory, or any other person, during the years 1919, 1920 and 1921, concerning the imposition of a Royalty tax or Government charge upon the output of minerals, other than gold, for the Yukon Territory. Also a copy of the Order in Council in this connection. Presented May 16, 1922. Mr. Black (Yukon)*Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

161. Return to an Order of the Senate of the 16th May, 1922, for a Return showing:—
1. The total cost of construction and repairs of each canal in Canada. 2. Between what points is each canal situated and the mileage of each. 3. The total expenditure for upkeep and operation of each canal during each of the years since 1910. 4. What income has been received from each of the canals each year since 1910. Presented May 16, 1922. Hon. Mr. McDonald.....*Not printed.*
162. Return to an order of the Senate, dated March 29, 1922, for a Return showing:—
1. A list of all licenses issued by the Government, now in force, for timber berths and the right to cut timber on Crown Lands in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia. 2. The names and residence of the holders of such licenses and the area contained in each berth. 3. On what terms and conditions were such licenses granted. 4. What is the area and location of timber berths in said provinces still unlicensed and the estimated quantity and description of timber in each berth. Presented May 16, 1922. Hon. Mr. Proudfoot.....*Not printed.*
163. Return to an Order of the House of the 10th April, 1922, for a Return showing: 1. Amount of bonds (a) of the Canadian Northern, (b) of the Grand Trunk Pacific guaranteed by any of the provinces, and which province in each case. 2. Whether the guaranteeing provinces have been relieved of liability by the Federal Government taking over these railway systems. 3. Bonds or other securities in connection with railways in (a) New Brunswick; (b) Nova Scotia; (c) Prince Edward Island guaranteed or assumed by the Federal Government. 4. Terms under which the Department of Railways operates the Valley Railway, so called, in New Brunswick. 5. Whether this railway is operated as part of the Intercolonial or under what jurisdiction it has been placed. 6. Whether its operation entails any loss to the Federal Government. If so, to what amount and of what it consists. 7. Whether the Government is considering the taking over of the Valley Railway, so called. Presented May 17, 1922. Hon. Mr. Baxter.*Not printed.*
164. Return to an Order of the House of the 17th May, 1922, for a Return showing:—
1. The consumption of binder twine and rope, in the various provinces of Canada, during the year 1921. 2. How much of this was manufactured in Canada. Presented May 17, 1922. Mr. Gordon.....*Not printed.*

- 175a-b-c Supplementary Returns to an Order of the House of the 5th April, 1922, for a Return showing in detail the amount of money paid by the Government of Canada or any department thereof, to barristers and solicitors of the Supreme Court of Nova Scotia, between the 1st day of October, 1911, and the 30th day of January, 1922, both inclusive, for professional or other services. Also a copy of all bills of costs, expenses and charges of every kind rendered by said barristers and solicitors to the Government, showing the amount or amounts paid in each instance. Also showing the names of barristers and solicitors employed during the aforesaid period, the work performed and the amount paid for every item of said work to each of said barristers and solicitors. Presented June 5, 15, 19, 1922. Mr. Martell....*Not printed.*
176. Return to an Order of the House of the 6th April, 1922, for a Return showing:—
1. The total area in acres in the provinces of Alberta and Saskatchewan sold to settlers as Pre-emptions, as provided by Dominion Lands Act, 1908. 2. What area of said Pre-emptions has been patented. 3. The total revenue received from: (a) Pre-emptions for which patent has been issued, (b) Pre-emptions which have not been patented. 4. The amount remaining unpaid on all pre-empted lands in said area. 5. The revenue received from pre-empted lands in said area in the years 1920 and 1921. 6. How much land in said area was sold as purchased homesteads since 1908, and the revenue received therefrom. 7. The amount remaining unpaid on said purchased homesteads. 8. How much land was pre-empted south of Weyburn-Lethbridge railway since 1908. 9. How much revenue was received therefrom. 10. How much was received in the years 1920 and 1921. Presented May 29, 1922. Mr. McTaggart *Not printed.*
177. Return to an Order of the House of the 15th May, 1922, for a Return showing:—
1. Names of the postmasters, and the location of their offices, in the county of l'Assomption and Montcalm who were dismissed from the service from the twenty-first of September, 1911, to January first, 1922, and the names of persons replacing them. 2. Who recommended the dismissals and appointments. Presented June 1, 1922. Mr. Seguin*Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

178. Return to an Order of the House of the 8th May, 1922, for a Return showing:—
1. Number of postmasters who have been appointed in the constituency of Richmond and Wolfe, from the 21st September, 1911, to the 1st of January, 1922. 2. Names of said postmasters, the location of post offices and the names of the persons who recommended the appointment in each case. Presented June 1, 1922. Mr. Tobin. *Not printed.*
179. Return to an Order of the House of the 8th May, 1922, for a Return showing:—
1. Number of postmasters dismissed from office, in the constituency of Richmond and Wolfe, from the 21st day of September, 1911, to the 1st day of January, 1922. 2. Number of postmasters who resigned their offices in the constituency of Richmond and Wolfe during the same period. 3. Number of postmasters who died in the said constituency during the same period. 4. What were, in each case, the names of the postmasters and the names of the post offices. 5. Cause of dismissal in each case where the postmaster was dismissed, during the said period. Presented June 1, 1922. Mr. Tobin. *Not printed.*
180. Return to an Order of the House of the 31st May, 1922, for a Return showing:—
1. Cost for operation and maintenance of the Fisheries of British Columbia annually, for the years 1917-1918, 1919-1920 and 1921, in the nature of office staff, buildings, upkeep and rentals, patrol, boats and upkeep, field work, hatcheries, and any other such items that may be charged against this department. 2. Amount of revenue collected from the Fisheries of British Columbia by the Dominion Fisheries Department, annually, for the years 1917-1918, 1919-1920 and 1921, in the form of license fees, royalties on canned salmon, prosecutions and fines, sale of confiscated boats and gear, and any such revenue as may be collected by the department. Presented June 5, 1922. Mr. Neill. *Not printed.*
- 180a. Return to an Address to His Excellency the Governor General of the 22nd May, 1922, for a copy of all letters, telegrams, correspondence, reports, and other documents, exchanged between the Government of Canada or any Minister thereof, and the Government of British Columbia or any minister thereof, or received from any person, relative to the advisability of transferring the control or administration of the Canadian fisheries of the Pacific coast, to the province of British Columbia. Presented June 20, 1922. Mr. McQuarrie. *Not printed.*
181. Protocols embodying Amendments to Articles 4, 6, 12, 13, 15, 16, and 26 of the Covenant of the League of Nations, as adopted by the Second Assembly of the League at Geneva on the 3rd, 4th and 5th October, 1921; together with letter dated the 24th November, 1921, from the Secretary General of the League to the Prime Minister of Canada, transmitting certified copies of the Protocols. Presented June 7, 1922. *Printed for Sessional Papers and distribution to Senators and Members.*
- 181a. Return to an Order of the Senate of the 8th June, 1922, for a Return showing:—
1. Whether the Government has received any report from the representatives of Canada as to the Second Assembly of the League of Nations held in Geneva in September and October, 1921, and if so, whether this report will be laid on the table for the information of members. 2. Whether the Government has received the printed reports of the Council of the League of Nations made to the first and second Assembly, and if so, whether copies of these reports will be laid on the table for the information of members. 3. Whether the Government has received the printed monthly summary and supplementary reports of the League of Nations and whether copies of these reports will be brought down. Presented June 8, 1922. Rt. Hon. Sir Geo. E. Foster. *Not printed.*
- 181b. Copy of Draft Conventions and Recommendations adopted by the International Labour Conference at its Third Session, held at Geneva, 25th October-19th November, 1921. Presented June 24, 1922. *Not printed.*
182. Return to an Order of the House of the 15th May, 1922, for a copy of all correspondence, telegrams, letters, tenders and other documents, exchanged between the Government and Hector Chevrier, regarding the contract for carrying the mails between Rigaud and St. Redempteur, Quebec. Presented June 8, 1922. Mr. Ouimet. *Not printed.*

Return to an Address to His Excellency the Governor General of the 10th April, 1922, for a copy of all letters telegrams, memoranda, reports to Council, Orders in Council, accounts and other documents, relating to the Indian Agency at Bear River, Digby County, Nova Scotia, including a list of all supplies of every description supplied for the use of Indians under the control of said agency. Also a statement showing a list of the supplies, consisting of clothing, food, seed and other materials, to whom supplied and what quantity in each case, during the period from the first October, 1911, to and including the first of January, 1922. Presented June 8, 1922. Mr. Lovett. *Not printed.*
184. Return to an Order of the House of the 15th May, 1922, for a copy of all correspondence, letters, telegrams, memoranda and other documents, regarding the establishment of a Tobacco Experimental Station at l'Assomption, Quebec, and the purchasing of the college farm for this purpose. Presented June 9, 1922. Mr. Seguin. *Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

185. Return to an Order of the House of the 1st May, 1922, for a copy of all letters, telegrams, correspondence and other documents exchanged between the Post Office Department at Ottawa, and the officers of the said department at Montreal, and the Civil Service Commission, regarding the appointment of Mr. Taylor as Assistant Superintendent at Montreal Post Office. Presented June 12, 1922. Mr. Parent. *Not printed.*
186. Return to an Order of the House of the 24th April, 1922, for a copy of all correspondence, letters, telegrams and other documents regarding the appointment of one or more appraisers for Paris and London, made by the Civil Service Commission. Presented June 12, 1922. Mr. Parent. *Not printed.*
187. Return to an Order of the House of the 19th April, 1922, for a Return showing:—1. Total amount of bonus paid to civil servants up to April 1, 1921. 2. Total amount paid to civil servants on account of annual statutory increase for the fiscal years 1918, 1919, 1920 and 1921. Presented June 12, 1922. Mr. Lanctot. *Not printed.*
188. Return to an Order of the House of the 20th April, 1922, for a Return showing:—1. The total Customs collections received by the Port of Parry Sound, Ontario, during each year, from 1911 to 1921, inclusive. 2. What towns or cities in Canada, having equal or less average Customs collections, have public buildings used for Customs purposes. Presented June 12, 1922. Mr. Arthurs. *Not printed.*
189. Return to an Order of the House of the 17th May, 1922, for a Return showing:—1. Cost, in each Military District, of transportation, in connection with the Army Service Corps. 2. Number of horses, automobiles, motor trucks and other vehicles in the Army Service Corps. 3. Number of officers and men in this section of the Militia. 4. Total value of all equipment of the Army Service Corps, and amount spent on upkeep and repairs to equipment, including forage, sickness, etc., during the year ending March 31, 1922. 5. Whether this service would cost less to the country if the forage, supplies, and transportation were given by contract each year to an individual, according to lowest tender, or done by day work. Presented June 13, 1922. Mr. Lanctot. *Not printed.*
190. Return to an Order of the House of the 31st May, 1922, for a Return showing:—1. What buildings were occupied, as offices, at Ottawa, by the Department of Militia and Defence, for the year ending March 31, 1911, and for the year ending March 31, 1922, (a) for the General Headquarters, and (b) for each service of this department. 2. What buildings were occupied, as offices, in each Military District, (a) for the District Staff; (b) for the Army Pay Corps; (c) for the Veterinary Corps; (d) for the Medical Corps; (e) for the Engineers Corps; (f) for the Ordnance Corps; and (g) for the Army Service Corps. 3. Strength of the Permanent Force in each Military District for the year ending March 31, 1911, and for the year ending March 31, 1922. 4. During the above years, the number of officers of the Army Pay Corps, the respective rank and salary of each, and the number of clerks employed in this service, in each district. 5. Whether the department in future intends to keep more than one officer of the Army Pay Corps in each district, and to continue the Auditor Branch which was organized in each Military District during the war. Presented June 13, 1922. Mr. Lanctot. *Not printed.*
191. Return to an Order of the Senate, dated May 18, 1922, for:—A Copy of the different letters, telegrams and other documents exchanged between the Government and the Northern Explosive Company, concerning the erection and operation of the Rigaud plant belonging to this company. Presented June 13, 1922. Hon. Mr. Boyer. *Not printed.*
192. Return to an Order of the Senate, dated June 6, 1922, for:—Copies of all correspondence exchanged between the Minister of Agriculture of the Dominion of Canada, and the Minister of Agriculture of the province of Ontario, on the subject of extending to Cold Storage Warehouses, owned by co-operative companies of fruit growers, the system of subsidies to public Cold Storage Warehouses now provided for by the Cold Storage Act, 1907, chapter six. Presented June 13, 1922. Hon. Mr. Laird. *Not printed.*
193. Return to an Order of the House of the 15th May, 1922, for a Return showing:—1. Number of Generals on active service in the Canadian Militia. 2. How many in Ottawa. 3. Respective salaries, including allowances, of each General stationed at Ottawa. 4. Number of Colonels, Lieutenant-Colonels, Majors, Captains and Lieutenants at Headquarters, Ottawa. 5. Number of non-commissioned officers and privates employed as clerks or messengers at Headquarters, Ottawa. 6. Total amount paid in salaries to the above-mentioned officers and men. Presented June 15, 1922. Mr. Lanctot. *Not printed.*

Where they were located, and the rank of the Commanding Officer of each district. 3. Their respective ranks on March 31, 1914. 4. Number of officers on the General Staff of each of the said districts during the year ending March 31, 1922. 5. The

CONTENTS OF VOLUME 9—*Continued.*

rank, and the respective duties of each of the said officers, including the Commanding Officer. 6. Number of non-commissioned officers and privates employed as clerks in the offices of the General Staff of each of the said districts. 7. Number of officers, non-commissioned officers and men employed in each of the said districts, during the year ending March 31, 1922, in connection with the Medical Corps, Engineering Corps, Pay Corps, Army Service Corps, Veterinary Corps and Military Stores, and rank of these officers. 9. On what date the new schedule for salaries and allowances came into force. 9. Who is authorized to fix the schedule for salaries and allowances of the Militia. 10. Maximum salary, including allowances, for Colonels, Lieutenant-Colonels, Majors, Captains, Lieutenants, non-commissioned officers and privates, of the Permanent Militia, according to both the new and old schedules. 11. Salaries, including allowances, of Generals who are stationed at Headquarters, Ottawa, according to the new and old schedules. 12. Number of privates in the Permanent Militia on March 31, 1922. 13. Number of Generals, Colonels, Lieutenant-Colonels, Majors, Captains and Lieutenants, on active service in the Canadian Militia on March 31, 1922. 14. Strength of a company and regiment of the Militia in peace time. Presented June 15, 1922. Mr. Lanctot.....*Not printed.*

195. Return to an Order of the House of the 22nd May, 1922, for a Return showing the origin of all goods purchased by the Purchasing Commission, distinguishing such as are of Canadian manufacture from those of foreign origin, from the first of April, 1921, to date. Presented June 16, 1922. Mr. Raymond.....*Not printed.*
196. Return to an Order of the House of the 8th May, 1922, for a Return showing:—1. Whether the Government is aware that there are instances of officials in the public service subordinate to Deputy Ministers who are in receipt of salaries more than those paid to such Deputy Ministers. 2. If so, whether it is the policy of the Government to continue this custom. 3. Deputy Ministers or other officials in the public service receiving more than six thousand dollars per annum from any Government source. Presented June 16, 1922. Mr. Chisholm.....*Not printed.*
197. Return to an Address to His Excellency the Governor General of the 31st May, 1922, for a copy of all letters, telegrams, memoranda, reports to Council, Orders in Council, and other documents passing between the Government and any other parties relating to the internment, deportation, return, and claims for compensation of Robert DeBeaux. Presented June 16, 1922. Mr. Neill.....*Not printed.*
198. Return to an Order of the Senate, dated May 17, 1922, for a Return showing:—(a) The aggregate number of acres of land located within the present territorial limits of the province of Saskatchewan granted by way of subsidy or bonus for the construction of railways beyond the boundaries of the said province. (b) The names of the persons and companies receiving such grant and the amount in each case, and date. (c) The dates or approximate dates of selections of land by the persons and companies receiving the bonus or grant. (d) The locations of the land so selected or finally selected by the grantees. Presented June 16, 1922. Hon. Mr. Willoughby.
Not printed.
199. Annual Report of the Canadian National Railways for the year ended 31st December, 1921. Presented June 19, 1922.....*Not printed.*
200. Third Annual Report of the Board of Directors of Canadian Government Merchant Marine, Limited, for the year ended 31st December, 1921. Presented June 19, 1922.
Not printed.

REPORT
OF THE
DEPARTMENT OF HEALTH
FOR THE
FISCAL YEAR ENDED MARCH 31, 1921

PRINTED BY ORDER OF PARLIAMENT

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1922

*To His Excellency the Duke of Devonshire, K.G., P.C., G.C.M.G., G.C.V.O., etc., etc.,
Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit herewith for the information of Your Excellency and the Parliament of Canada, the Annual Report of the Department of Health, being for the year ended March 31, 1921.

I have the honour to be, sir,

Your Excellency's most obedient servant,

J. A. CALDER,

Minister of Health.

REPORT OF THE DEPARTMENT OF HEALTH

FOR THE FISCAL YEAR ENDED MARCH 31, 1921

OTTAWA, July 1, 1921.

Honourable J. A. CALDER,
Minister of Health,
Ottawa, Ont.

SIR,—I have the honour to report on the Department of Health for the year ended March 31, 1921, under the following headings:—

1. Quarantine Service.
2. Immigration Medical Service.
3. Food and Drug Laboratories.
4. Opium and Narcotic Drugs.
5. Proprietary or Patent Medicines.
6. Marine Hospitals Service.
7. Venereal Disease Control.
8. Publicity.
9. Child Welfare.
10. Housing.
11. Public Works Health Act.
12. Financial Statement.

(1) QUARANTINE SERVICE

During the year 1920-21 the following stations were kept in operation:—

Charlottetown, P.E.I., (Keppoch Station).
Chatham, N.B., (Middle Island Station).
Halifax, N.S., (Lawlor's Island Station).
Louisburg, N.S.
North Sydney, N.S., (Point Edward Station).
Quebec, P.Q., (Grosse Isle Station).
St. John, N.B., (Partridge Island Station).
Victoria, B.C., (William Head Station).

The total number of vessels which reported at the various stations was 1,481 and the number of persons examined 387,070, classified as follows:—

Passengers	{ 1st class..	25,470	
	{ 2nd class..	62,336	
	{ Steerage	169,608	
			257,414
Stowaways..			296
Cattlemen..			56
Crews..			129,364
Total..			387,070

12 GEORGE V, A. 1922

The following is a tabular statement of vessels and persons inspected at each station:—

Station	Vessels	Persons (Passengers, Crews, etc.)
Charlottetown, P.E.I.	Nil	Nil
Chatham, N.B.	19	281
Halifax, N.S.	318	68,522
Louisburg, N.S.	58	2,136
North Sydney, N.S.	194	9,579
Quebec, P.Q.	451	174,412
St. John, N.B.	223	62,412
Victoria, B.C.	218	69,728
Total.	1,481	387,070

The number of admissions to the quarantine hospitals during the year was 609, with the following distribution:—

Charlottetown, P.E.I.	Nil
Chatham, N.B.	Nil
Halifax, N.S.	63
Louisburg, N.S.	Nil
North Sydney, N.S.	Nil
Quebec, P.Q.	404
St. John, N.B.	117
Victoria, B.C.	25
Total.	609

Of these 609 hospital admissions, 283 were patients; the remaining 326 were contacts, observations, or persons accompanying the sick.

The total number of days in hospital was 7,650, viz., 3,722 for the sick and 3,928 for the contacts, etc.

Of the graver quarantinable diseases, smallpox was the only one met with during the year, there being four cases and nine contacts. One secondary case developed among the contacts. All five cases recovered and there was no spread of the disease to other persons.

Of the minor infectious diseases, there were 279 cases admitted to hospital, with 317 contacts and persons accompanying. Ten secondary cases developed among the contacts, viz., measles, 6; diphtheria, 3; chickenpox, 1.

Four deaths occurred during the year—three at Grosse Isle (1 diphtheria, 1 scarlet fever, and 1 pneumonia), and one at St. John of encephalitis lethargica.

The following table shows the distribution by stations:—

Station	No. of Sick	No. of days in Hospital	No. of Contacts, Observations, accompanying sick, etc.	No. of days in Hospital	Total No. of Sick and Contacts, etc.	Total days in Hospital
Halifax.	32	323	31	322	63	645
Quebec.	180	1,988	224	2,446	404	4,434
St. John.	59	1,219	58	1,053	117	2,272
Victoria.	12	192	13	107	25	299
Totals.	283	3,722	326	3,928	609	7,650

SESSIONAL PAPER No. 12

The following table shows the classification by diseases:—

Totals.....	283	326	3,722	3,928	7,650

LEPER STATIONS

At the D'Arcy Island Station, British Columbia, which is under the superintendency of the medical officer in charge of the William Head Quarantine Station, five patients, all Chinese, were treated. One new case was admitted December 23, 1920, the other four remaining from the previous year. The total number of hospital days was 1,559.

At the Tracadie Lazaretto, New Brunswick, fourteen lepers were treated, seven females and seven males. One death occurred and one new patient was admitted. Dr. J. A. Langis, Medical Superintendent, reports conditions satisfactory. The total number of hospital days was 4,596.

(2) IMMIGRATION MEDICAL SERVICE

During the fiscal year ended March 31, 1921, there were examined by officers of the Immigration Medical Service at the Atlantic and Pacific ports, 109,529 immigrant passengers, for the purpose of detecting disease or physical or mental defects, in accordance with the provisions of the Immigration Act.

The total number of immigrant passengers detained for medical treatment or for secondary examination, etc., was 696. Of this number, 316 were subsequently released as either cured or negative. Detailed statements follow, showing detentions by ports, also reasons for detention.

The total number of immigrants "certified" under the respective subsections of section 3 of the Immigration Act is made up as follows:—

Subsection (a)—Mental defects.....	33
Subsection (b)—Tubercular, loathsome or contagious diseases.....	81
Subsection (c)—Physically defective.....	713
Subsections (d), (k), (l) and (m).....	18
Total "certified".....	845

12 GEORGE V, A. 1922

These figures include both the immigrants "certified" at time of arrival and those who were "certified" following detention for secondary examination.

Where immigrants are found to be suffering from minor defects not sufficient to justify their certification under section 3 of the Immigration Act, their condition and destination is noted on a record card which is kept on file for future reference. During the fiscal year 1,047 persons were so recorded. A statement follows showing the numbers by ports.

(3) FOOD AND DRUG LABORATORIES

The most outstanding feature for the year is the repeal of the Adulteration Act, (chapter 133, Revised Statutes of 1906), by the enactment of the Food and Drugs Act, 1920, assented to on June 16, 1920.

It may be well to indicate the principal points of difference between the Acts above named. References where given have regard to the Food and Drugs Act, 1920.

(1) Inspection of fertilizers and cattle feeds, being covered by special legislation, is no longer included in the Act.

(2) The Examining Board is done away with, its functions being transferred by the Civil Service Act to the Civil Service Commission.

(3) Distinction is made between adulteration and misbranding. (Sections 3, 4 and 5).

(4) Current revisions of the pharmacopœias are recognized as drug standards.

(5) Unless another authority is explicitly stated, the definition of the British Pharmacopœia governs drug quality.

(6) The title "Dominion Analyst" is recognized. (Section 2 (b).)

(7) Government assumes no responsibility in the appointment of analysts by municipalities.

(8) The inspectoral service is organized.

(9) Definitions and standards which were included in the Adulteration Act are now covered by regulations. (Sections 14 and 15).

(10) Regulations affecting labels may be established. (Section 14, 1 (b).)

(11) Fuller protection is given to the vendor by section 17.

(12) Inspectors are salaried and may not claim a moiety of penalties as formerly.

(13) Conditions are defined under which private initiation of actions may be instituted. (Section 10).

(14) The Governor in Council is given extended powers to make regulations. (Sections 14 and 15).

(15) Schedules under the Adulteration Act are discontinued and their place taken by regulations.

(16) Inspectors are given increased power to prevent importation of fraudulent material. (Section 7 (3).)

The Commercial Feeding Stuffs Act of 1909 was repealed by the Feeding Stuffs Act, chapter 47, 10-11 George V, and the administration of this Act is placed in the hands of the Minister of Agriculture. This Act came into effect by proclamation on January 1, 1921.

Administration of the Fertilizers Act passes into the hands of the Department of Agriculture on the first day of April, 1921. (P.C. 1297).

Standards for foods, originally established under section 26 of the Adulteration Act, were revised and consolidated under authority of the Food and Drugs Act and have been published as Order in Council of December 13, 1920. Standard for ginger was legalized by Order in Council, March 4, 1921.

Comprehensive work has been done in connection with the under-mentioned commodities:—

Baking powder.. . . .	Samples	353
Black and white pepper.. . . .	"	753

Progress has been made in the establishment and equipping of a fourth sub-laboratory at Montreal; and it is expected that this sub-laboratory will be put into commission in the course of a few months.

(4) OPIUM AND NARCOTIC DRUGS

During the early part of the year 1920 a system was inaugurated in the branch for controlling the imports, exports, manufacture, sale and distribution of opium, morphine, heroin, and cocaine, etc., through the regular channels, viz., the wholesale and manufacturing druggists, retail druggists, dentists, veterinary surgeons and physicians.

12 GEORGE V, A. 1922

All licenses for narcotics granted to importers are dealt with on their merits, and the quantity allowed to be imported depends altogether on the size and nature of the applicant's business, and the demand he can show he has for narcotics for legitimate purposes. All wholesale druggists and importers are required to furnish to the Department at the end of each calendar month, a statement of their sales of these drugs to the various retail druggists, dentists, veterinary surgeons and physicians, and the department has therefore at all times a very accurate record of the quantity of these drugs received by all retail druggists, physicians, veterinary surgeons and dentists in Canada. All retail druggists are also required to furnish to the department a statement of their sales of narcotics on prescription, etc.

The following table shows the imports of narcotics for the twelve months ended March 31, for the years 1919, 1920 and 1921:—

Cocaine—	
1919.....	12,333 ozs.
1920.....	6,968 "
1921.....	3,310 "
Morphine—	
1919.....	30,087 "
1920.....	28,198 "
1921.....	12,124 "
Gum opium—	
1919.....	34,263 lbs.
1920.....	13,626 "
1921.....	3,953 "

Since the amendment to the Opium and Narcotic Drug Act, 10-11 George V, Chapter 31, assented to June 16, 1920, became effective, the following licenses have been issued up to the end of the fiscal year ended March 31, 1921:—

Export licenses.....	8
Import licenses.....	92
Retail druggists' licenses to manufacture.....	125
Wholesale druggists' and manufacturers' licenses.....	209

The total amount of fees collected from all licenses issued up to March 31, 1921, was \$1,765.

Prosecutions conducted by the Royal Canadian Mounted Police on behalf of the Department of Health, against persons found guilty of offences against the Opium and Narcotic Drug Act during the year ended March 31, 1921, are as follows:—

Number of persons convicted.....	299
Doctors.....	21
Veterinary surgeons.....	1
Druggists.....	17
Illicit dealers (Chinamen).....	209
Illicit dealers (other than Chinamen).....	51

In connection with the amount of fines imposed for infractions of the Act, it may be explained that in a great many cases persons convicted were unable to pay the fine imposed, and were, therefore, sentenced to serve a term of imprisonment.

It should be mentioned that many persons found guilty of infractions against the Act were sentenced to terms of imprisonment without the option of a fine.

In connection with the enforcement of the Opium and Narcotic Drug Act, it might be further stated that in addition to the large reduction in the amount of narcotics imported through the regular channels, the department has succeeded, in co-operation with the Department of Customs, and the officers of the Royal Canadian Mounted Police, in intercepting very large quantities of these drugs which were being imported into Canada by the underground channels.

Order in Council P.C. 3235 of the 8th of June, 1921, was passed, extending the time limit for the disposal of drug packages and labels (which had not printed thereon the warning as provided under subsection 4-a of section 5-a of the Act) which were

SESSIONAL PAPER No. 12

in the possession of the manufacturers or had been contracted for prior to September 20, 1920, on which date the amendments to the Act, which were assented to on the 16th of June, 1920, were proclaimed in the *Canada Gazette* and became effective.

Through the amendments to the Act referred to, the department has succeeded in having removed from the market a number of preparations such as soothing syrups, etc., which contain large quantities of opium and morphine, and were being manufactured and sold unrestricted, which preparations were designed ostensibly for administration to very young children.

(5) PROPRIETARY OR PATENT MEDICINES

The activities of the Proprietary or Patent Medicines Branch during the fiscal year ended March 31, 1921, covered registering, licensing and relicensing preparations, comprising all classes of medicines for the internal and external use of man, save those designed for venereal diseases, or those which appeared to be capable of being used for illicit purposes. During the period referred to, 2,602 preparations were registered and licensed, and, approximately, 1,900 relicensed.

When the Proprietary or Patent Medicine Act of 1919 came into force many thousands of packages of preparations were then on the market ready for delivery to the consumer, and in order to avoid the loss of these goods, it was necessary to pass an Order in Council in September, 1920, legalizing the sale until January 1, 1924, of medicines for the internal use of man, bearing a registration number granted under the Act of 1908, and preparations for external use which were not registered under the new law, until the same date, provided that in the latter case a stamp was affixed to each such package. Over 4,000,000 stamps were used for such medicines.

The schedule to the Act was also revised in September, 1920, by Order in Council No. 2039, deleting certain drugs and adding a number of others.

During the year numerous complaints were received from our inspectors and others interested respecting irregularities in the sale and labelling of medicines. Consequent to these complaints, warnings were issued to the offenders which resulted in immediate correction or the cessation of these irregularities. Several firms were prosecuted for selling alcoholic preparations insufficiently medicated, and our inspectors are constantly seizing medicines which are subject to this law and not registered and licensed as required thereby.

It may be well here to explain that not all medicines for which extravagant claims and statements are made in advertisements, are subject to the provisions of The Proprietary or Patent Medicine Act, inasmuch as most of these advertisers have a statement of composition printed upon the labels and wrappers of their preparations, and are thus not registerable under this Act.

(6) MARINE HOSPITALS SERVICE

Under the provisions of Part V, Canada Shipping Act (Sick and Distressed Mariners), dues of two cents per ton, registered tonnage, are levied on every vessel entering any port in the provinces of Quebec, New Brunswick, Nova Scotia, Prince Edward Island and British Columbia. These dues are collectible three times during each calendar year.

The officers and seamen of fishing vessels not registered in Canada do not pay sick mariners' dues, nor participate in the benefits accruing therefrom, but such vessels registered in Canada may pay dues and participate in the benefits.

The Act does not apply to Ontario; therefore, no dues are collected from that province.

12 GEORGE V, A. 1922

In consideration of the payment of these dues, sick and distressed mariners belonging to vessels on which said duty has been paid are entitled to gratuitous treatment, and the expenditure incurred for such treatment is defrayed out of the appropriation voted by Parliament for that purpose.

During the year 1920-21, sick and distressed mariners have been treated at the following hospitals:—

Province of Quebec—

Montreal—

Montreal General Hospital.
Notre Dame Hospital.
Royal Victoria Hospital.
Hôtel Dieu and St. Paul Hospital (Contagious Diseases).
Alexandra Hospital.

Quebec—

Jeffrey Hale Hospital.
Hôtel Dieu Hospital.
Three Rivers—St. Joseph's Hospital.
Chicoutimi—Hôtel Dieu.
Sorel—Sorel General Hospital.
St. John's—St. John Hospital.
Murray Bay—St. Joseph's Hospital.

Province of Nova Scotia—

Marine hospitals were maintained at Louisburg, Lunenburg, and Sydney. The Louisburg hospital was closed on October 1, 1920.

Halifax—

Victoria General Hospital.
City Health Board Hospital (Contagious Diseases).
Pictou—Pictou Cottage Hospital.
North Sydney—Hamilton Memorial Hospital.
New Glasgow—Aberdeen Hospital.
Antigonish—St. Martha's Hospital.
Windsor—Payzant Memorial Hospital.
Amherst—Highland View Hospital.
Yarmouth—Yarmouth Hospital.
Springhill—Springhill Cottage Hospital.
Kentville—Kentville Sanatorium (Tubercular cases).

Province of New Brunswick—

A marine hospital is maintained at Douglastown.

St. John—

General Public Hospital.
City Health Board Hospital (Contagious Diseases).
Moncton—Moncton Hospital.
Campbellton—Hôtel Dieu Hospital.
Bathurst—James Dunn Hospital.
St. Stephens—Chipman Memorial Hospital.
Fredericton—General Hospital.

SESSIONAL PAPER No. 12

Province of Prince Edward Island—

Charlottetown—

Charlottetown Hospital.

P.E.I. Hospital.

City Hospital.

Summerside—Prince County Hospital.

Province of British Columbia—

Victoria—

St. Joseph's Hospital.

Isolation Hospital.

Vancouver—St. Paul's Hospital.

Prince Rupert—Prince Rupert General Hospital.

New Westminster—

St. Mary's Hospital.

Royal Columbian Hospital.

Nanaimo—Nanaimo Hospital.

Ladysmith—Ladysmith Hospital.

Chemanius—Chemanius Hospital.

Union Bay—Cumberland Hospital.

Anyox—General Hospital.

Ocean Falls—Ocean Falls Hospital.

Where there is no marine or designated hospital, the collector of customs makes provision for the treatment of sick mariners at private residences or public boarding houses.

(7)) VENEREAL DISEASE CONTROL

The following provinces have taken part in the Dominion campaign against venereal disease, during the twelve months ended March 31, 1921: British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Quebec, Nova Scotia.

SESSIONAL PAPER No. 12

The sum of \$200,000 was voted by the Dominion Government for the work of venereal disease control and expended as follows:—

Grants to—	
British Columbia.. . . .	\$ 14,628 19

In accordance with the agreement entered into between the Dominion Government and the provinces accepting these grants, free clinics for the treatment of venereal diseases, conducted by specialists and with adequate facilities, have been in operation during the year in all the provinces taking part in the campaign.

Laboratories working in conjunction with the clinics have been established in all these provinces, and free treatment in institutions and free hospital accommodation have also been provided. Follow-up work is being done.

The chief of the division inspected all clinics and laboratories, and reported that he found them modern in every respect, and efficiently conducted.

The monthly reports received from the clinics, institutions and laboratories, and tabulated by this department, indicate that very good and useful work is being done.

Work of prevention, consisting of lectures, films and educational literature, has been conducted by this department, the provincial authorities and voluntary organizations.

In conjunction with the Division of Publicity, the Division of Venereal Disease Control has prepared in English and French, eight booklets on venereal disease, five for the medical profession, scientists, teachers, etc., and three for issue to the general public (see report of Division of Publicity).

A special pamphlet for seamen is now being prepared.

During the twelve months under review, this department has taken an active part in the control of venereal diseases, and has aided the provinces in every possible way, for the prosecution of the work of prevention and cure of these diseases.

(S) DIVISION OF PUBLICITY

During the year under review ten publications were prepared and issued in English and French. These were:—

The Canadian Mother's Book.

What You Should Know About Tuberculosis.

For the medical profession, scientists, teachers, etc.—

To-day's World Problem in Disease Prevention, by Dr. Stokes.

General Circular of Information Concerning Venereal Diseases.

The Wassermann Test.

Microscopic Examination.

Treatment and Diagnosis.

For the general public:—

Information for Men.

Information for Young Women.

Information for Parents.

12 GEORGE V, A. 1922

In the case of "The Canadian Mother's Book" the demand has been so great that it became necessary to print second and third editions. This book is intended for mothers and prospective mothers.

Through arrangements made with the provinces and other bodies, we have been able to place at the disposal of those interested, sets of lantern slides with accompanying descriptions, covering health matters. Lists of other available slides are supplied upon request.

Moving-picture films on health subjects have been exhibited for private view and when found to be of educational value, the source of supply is given to those inquiring for this method of publicity. It has been possible, in this way, to assist associations without the necessary expense of having our own films made.

A request was received from the Colonial Office for medical men for service in African Possessions and the West Indies. Information regarding these possessions was circulated through the newspapers and magazines, resulting in the appointment of three Canadian doctors to positions under the Colonial Office.

(9) DIVISION OF CHILD WELFARE

The activities of this division commenced in May, 1920.

The first work undertaken was the securing of information and publications on maternity and child welfare from all the provinces of Canada, from other parts of the British Empire and from all other civilized countries, in order that a general knowledge of the best modern standards, methods and achievements in maternal and child welfare might be acquired and that the series of these might be placed on file in the department. The approximate number of communications and publications received and studied in this way was 3,690.

It was next considered wise to prepare for our own guidance and for the assistance of others a brief statement of our plan of work, general policy, general aims and methods, so that a clear statement of the meaning of maternal and child welfare and the chief aims and objects in connection with such welfare and how these may best be attained, might be available.

As co-operation with provincial health authorities in all the provinces of the Dominion of Canada is one of the main parts of the work of this department and as invitations had been received from the above-mentioned authorities and others, visits were accordingly arranged to all the capital cities of the nine provinces and to seven other cities. Excellent co-operation was received in every case and further knowledge of the work of Child Welfare throughout Canada was acquired and disseminated.

For some considerable time many voluntary associations and private individuals interested in child welfare had determined that the most feasible plan of advancing the general interests of child welfare throughout the Dominion of Canada would be by the holding of a conference at which would be represented the greatest possible number of those interested in the work from all parts of Canada. At the request of these representatives this department consented to preside at such a conference and assisted in the organization of a Canadian voluntary child welfare body. About 200 representatives attended the meeting held in October, 1920, the outcome being the formation of The National Council of Child Welfare.

At the request of the members of the various provincial executives the department also assisted in the necessary details and further organization of this body.

It has been found that this organization has materially assisted in the co-ordinating of the work of voluntary associations and enabling the workers to become acquainted and to learn the aims and methods of child welfare in the different parts of the Dominion.

SESSIONAL PAPER No. 12

Original Canadian publications on subjects connected with maternal and child welfare have been constantly asked for from the day that this division was organized and the preparations of a book for mothers and a series of pamphlets on maternal and child welfare undertaken immediately.

"The Canadian Mother's Book" was written in August, 1920; revised in September, 1920, published March 3, 1921, and 12,000 copies have been distributed up to March 31, 1921.

The preparation of fourteen pamphlets to be known as "The Little Blue Books—Home Series" was commenced in December, 1920, and submitted for publication in March, 1921. This series will be published in English and French under the following titles:—

1. Good Wishes for you from Canada.
2. How to Build the Canadian House.
3. How to make our Canadian Home.
4. How to make Outpost Homes in Canada.
5. Canadians Need Milk.
6. How we Cook in Canada.
7. How to Manage Housework in Canada.
8. How to take care of Mother.
9. How to take care of the Family.
10. How to take care of the Baby.
11. How to take care of the Children.
12. Household Cost Accounting in Canada.
13. How to take care of Household Waste.
14. How to Avoid Accidents and Give First Aid.

(10) HOUSING BRANCH

Under the provisions of Order in Council, P.C. 2997, dated December 3, 1918, the sum of \$25,000,000 was allotted for housing loans to the provinces.

The unexpended amount available, as of date March 31, 1921, was \$10,455,000.

Acts providing for the acceptance of the loan and the erection of dwelling houses have been enacted by eight of the Provincial Governments, and are as follows:—

NOVA SCOTIA HOUSING ACT. CHAPTER 4, 1919.

Prince Edward Island.—An Act to provide for the erection of dwelling houses. Chapter 12, 1919.

New Brunswick.—An Act to provide for better housing. Chapter 56, 1919.

Quebec.—An Act to provide for the construction of workmen's dwellings and for advances to municipalities. Chapter 10, 1919; and amended Act approved by Order in Council 1090, May 19, 1920.

Ontario.—An Act to provide for the erection of dwelling houses, 1919; and amended Act passed in 1920 and referred to in report of Director of Housing of Ontario, p. 1.

The Municipal Housing Act, 1920, giving authority to Councils to issue their own debentures for housing purposes.

Manitoba.—An Act respecting housing in urban municipalities, 1919. Amended Ch. 55, 1920 and Ch. 33, 1921.

12 GEORGE V, A. 1922

Saskatchewan.—An Act respecting housing in urban municipalities. Chapter 45, 1919.

British Columbia.—An Act to provide for better housing. Chapter 8, 1919.

The Provincial Government of Alberta has not passed an Act.

Schemes were prepared by the following provinces and approved by Order in Council following the passing of the above legislation: Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan and British Columbia.

Legislation in Prince Edward Island has remained inoperative because no scheme has been prepared. Thus the position is that eight out of the nine provinces have passed Acts and seven out of these eight have prepared schemes.

Over two years have passed since the federal loan was granted and the progress made in the different provinces may be said to correspond with the activities shown in administering the Act with regard paid to the local conditions.

The amount of the federal loan actually borrowed by the provinces, as of date March 31, 1921, was \$14,545,000, and the total number of houses erected under the scheme, 3,691.

The building programme of the different provinces showed that an additional 1,496 houses were expected to be built during the following building season.

The provinces advanced to the municipalities a total sum of \$12,517,435, out of the federal loan, while the total sum allotted to the municipalities was \$19,916,503.

The applications made by the municipalities to the Provincial Governments for loans amounted to \$34,522,897.

Official reports received from the provincial housing authorities advised as follows:—

Province	No. of municipalities that have taken action	No. of houses built	Amount of advance made
Ontario	72	2,344	\$ 8,750,000
Manitoba	18	525	1,580,000
British Columbia	27	359	1,361,500
Quebec	34	263	1,033,500
Nova Scotia	6	93	600,000
New Brunswick	14	107	1,220,000
Total	171	3,691	\$14,545,000

(11) PUBLIC WORKS HEALTH ACT

For the purpose of carrying out the intent of the above Act, which is administered by the Department of Health, the Dominion of Canada is divided into two sections—East and West. The Eastern section comprises the territory east of Winnipeg to the Atlantic coast. The medical inspector is Mr. C. A. L. Fisher, with headquarters at Montreal. The Western division extends from Winnipeg to the Pacific coast. The medical inspector is Dr. A. E. Clendenan, with headquarters at Edmonton, Alberta.

EASTERN DIVISION

Mr. Fisher's report for the year is quite satisfactory. Among the various plants visited were the Welland ship canal works, the Trent canal, the Canadian Pacific Railway works in the vicinity of Sudbury, Ont., the Canadian Pacific Railway and Canadian Northern Railway construction camps in northern Ontario, etc. The Welland canal works have their own hospital, but the employees injured or taken ill at the other camps are usually removed to the nearest local hospital. The health of the men and their board and housing are considered very good in all instances.

SESSIONAL PAPER No. 12

WESTERN DIVISION

Dr. Clendenan, Inspector for the Western Division, reports a diminished volume of work compared with other years. Instead of line doctors and temporary hospitals, local resident physicians and municipal hospitals are now used. The change has brought an improvement in the nursing service and in the treatment of cases.

With the exception of the smaller contracts, the work was all inspected at least twice during the year. Amongst other construction works inspected were the Canadian Northern Railway camp for the Munson-Wayne of the Saskatoon-Calgary line, the Hanns-Medicine Hat, the Oliver-St. Paul and the Onoway-Whitecourt in Alberta, the Humboldt-Melfort in Saskatchewan and Victoria-West Coast line, the Canadian Pacific Railway camp for the Acme-Drumheller in Alberta, Rostown South for Southern Saskatchewan and for the Alberni, Great Lakes line, etc.

PREFATORY NOTE

The Thirteenth Parliament was dissolved on October 4, 1921, and writs for a general election were, by Order in Council dated October 7th, directed to be issued on the following day and to be returnable on January 15, 1922. Urban registration began on October 31st and continued until November 6th, except in the Province of Quebec, where no sittings were held on November 1st (All Saints Day), and the registration was therefore not concluded until November 7th. Nomination day was November 22nd and, no candidate having been elected by acclamation, a poll was held in every electoral district on December 6th. The first returns were gazetted on December 23rd, and the last return (for the electoral district of Yukon) was gazetted on February 18, 1922.

O. M. BIGGAR,

Chief Electoral Officer.

OTTAWA, 3rd April, 1922.

REMARQUE PRÉLIMINAIRE

Le Treizième Parlement a été dissous le 4 octobre 1921, et un arrêté en conseil du 7 octobre a ordonné que les brefs d'une élection générale fussent émis le lendemain, et rapportables le 15 janvier 1922. L'inscription urbaine a été commencée le 31 octobre et s'est poursuivie jusqu'au 6 novembre, sauf dans la province de Québec où il n'a pas été tenu de séances le 1er novembre (jour de la Toussaint) et où l'inscription n'a pas, en conséquence, été close que le 7 novembre. La présentation a eu lieu le 22 novembre et, comme aucun candidat n'a été élu par acclamation, un scrutin a été tenu dans chaque district électoral le 6 décembre. Les premiers rapports ont été publiés dans la *Gazette du Canada* le 23 décembre et le dernier rapport (du district électoral du Yukon) y a été publié le 18 février 1922.

O. M. BIGGAR,

Directeur général des élections.

OTTAWA, 3 avril 1922.

TABLE 2—TABLEAU 2

NUMBER of voters to each polling station and proportion of total vote polled by provinces.

NOMBRE des votants par bureau de scrutin et moyenne des votes donnés par provinces.

Province.	Average number per polling station of Moyenne du nombre par bureau de scrutin des		Percentage of voters on the list who voted. — Pourcentage des électeurs sur la liste qui ont voté.
	Voters on list. — Electeurs sur la liste.	Voters who voted. — Electeurs qui ont voté.	
Ontario.....	200	126	63
Quebec.....	198	150	75
Nova Scotia—Nouvelle-Ecosse.....	239	168	69
New-Brunswick—Nouveau-Brunswick.....	232	159	64
Manitoba.....	193	131	65
British Columbia—Colombie-Britannique.....	166	112	67
Prince Edward Island—Ile du Prince-Edouard.....	209	162	79
Saskatchewan.....	131	88	67
Alberta.....	116	74	63
Yukon.....	50	42	83
Average for Canada—Moyenne pour le Canada.....	185	120	67

For the purpose of this table the number of voters who voted in electoral districts returning two members has been assumed to be one-half of the number of votes counted.

Pour les fins de ce tableau le nombre des électeurs qui ont voté dans les districts électoraux élisant deux députés a été considéré comme étant la moitié du nombre des votes comptés.

REPORT OF THE WORK
OF THE
DEPARTMENT OF
SOLDIERS'
CIVIL RE-ESTABLISHMENT
CANADA

DECEMBER, 1921

PRINTED BY ORDER OF PARLIAMENT

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1922

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B.,
G.C.M.G., M.V.O., Governor General and Commander in Chief of the Dominion
of Canada.*

MAY IT PLEASE YOUR EXCELLENCY,—

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Soldiers' Civil Re-establishment for the calendar year ended December 31, 1921.

I have the honour to be,

Your Excellency's most obedient servant,

HENRI S. BELAND,

Minister of Soldiers' Civil Re-establishment.

February 1, 1922.

Introductory Letter

TO REPORT OF THE

Department of Soldiers' Civil Re-establishment

The Honourable H. S. BELAND, M.D., M.P.,
Minister of Soldiers' Civil Re-establishment,
Ottawa.

SIR,—In accordance with your instructions I have the honour to submit a report on the work of the Department of Soldiers' Civil Re-establishment for the calendar year 1921. There are several features which deserve special mention apart from the detailed sectional information covering the various branches of departmental activity during the year.

As indicated in the report for 1920 certain features of the work were, at the end of that year in process of demobilization. This condition has continued, particularly in regard to what may be termed temporary activities.

The Vocational Branch on the 31st December, 1920, had 4,714 students on its roll. On the 31st December, 1921, the number had been reduced to 631. It is gratifying to note that in spite of the prevailing sub-normal employment conditions, only 4,993 out of a total of 41,912, Vocational graduates, are registered with the Department as being out of employment. This is a very practical illustration of the results attained from vocational training.

As indicated in last year's report the Treatment Branch can practically be considered as having reached a permanent basis. No great changes can be expected in the number of men on strength during the next five years. On the 31st December, 1920, and the 31st December, 1921, the patient strength was as follows:—

	Dec. 31, 1920	Dec. 31, 1921
On strength.	6,431	5,930
Clinical treatments per week.	7,078	3,776

On the other hand the policy of utilizing centralized departmental hospitals of large bed capacity and making use of outside and civilian hospitals for overflow, has been continued. As a result it has been possible to close seven hospitals during the year with a bed capacity of 996.

The reorganization carried out during 1920 has resulted very favourably. The cost of administration has been reduced from 5.58 per cent of gross expenditure for the fiscal year, 1920-21 to 6.65 per cent at the end of 1921. Very little additional change has been made during the year beyond the disappearance as a separate branch of the Vocational work which has been amalgamated with the Administration Branch.

The amalgamation of the administrative work of the Board of Pension Commissioners for Canada, involving a staff of 268 in the units, with a salary expenditure of \$330,368, and of 491 at Head Office involving a salary expenditure of \$583,140, plus the combination of 208,836 files in Central Registry at Head Office and at least that number in the various unit offices, has been accomplished with no delay in the carrying on of payment of pension.

SESSIONAL PAPER No. 14

During the year a steady decline has been maintained in the number of the staff both at Head Office and in the units. Notwithstanding an increase through the amalgamation of the staff of the Board of Pension Commissioners with the department of 897 there has been a total reduction from 5,779 to 4,887 or 1,789 in all.

Recently, as indicated, provision has been made for the department to take over the work of the Officer Paying Imperial Pensions. This will involve another amalgamation affecting a staff of 103 and files to the number of 38,250 which will in turn be combined with the files of the same ex-soldiers held in the Department.

The result of the changes above noted has also been most beneficial to every disabled former member of the forces as it has been the means of providing increased facilities for dealing with his affairs. All governmental activities affecting his post discharge status, excepting land settlement, are now handled through one channel. He deals with only the one office whether he is concerned with treatment, training, artificial limbs, pensions, insurances, assistance in obtaining employment or unemployment relief or any other matter.

During 1921 a Parliamentary Committee on Pensions, Insurance, and Re-establishment sat and brought in certain recommendations. The two most important features of that sitting were a consideration of the so-called problem cases, also in connection therewith the after-care of the tuberculous, and the question of federal responsibility for the compensation of pensioners disabled while engaged in industrial pursuits. With regard to the former, negotiations have been in progress throughout the year with the Canadian Red Cross. It is the general consensus of opinion of all who have examined closely into the question of so called problem cases that any scheme which may be put into operation should not be under governmental control but under that of a voluntary organization. It is hoped that an arrangement can be concluded with the Red Cross whereby the oversight and management of this work will be assumed by that body.

The provision of compensation for pensioners of 20 per cent and upwards who may become disabled in industry is a new departure. Although the matter has been under consideration for a long time the Order in Council was not passed until the 29th December, 1921 (see appendix IV), so that it is not possible to forecast what the effect of this will be.

It has been necessary for the department to carry on certain relief measures to pensioners and vocational students who are out of employment. The extent of this relief, which has been and is in kind only, is shown in the report.

During the fiscal year there was a material decrease in expenditure as is shown in the reports of the Accounts and Audit Branch. A steady further decrease will be manifest during 1922.

The sections of the report dealing with separate branches have been prepared by the heads of those branches as follows:—

Medical Services—W. C. Arnold, M.D., Director of Medical Services.

Dental Services—R. B. O'Sullivan, B.A., D.D.S., L.D.S., O.B.E., Director of Dental Services.

Orthopædic and Surgical Appliances—R. W. Coulthard, Director of Orthopædic and Surgical Appliances Branch.

Administration and Training—E. Flexman, D.S.O., Director of Administration.

Accounts and Audit—J. F. Waddington, Supervisor of Expenditures.

Soldiers' Comforts—Mrs. Arthur Van Koughnet, Honorary Superintendent of that work.

I have the honour to be, sir,

Your obedient servant,

N. F. PARKINSON,

OTTAWA, January 31, 1922.

Deputy Minister

THE DEPARTMENT OF SOLDIERS' CIVIL RE-ESTABLISHMENT

Head Office—

TREATMENT BRANCH

MEDICAL SERVICES

An analysis of the work done by the Medical Services of the Treatment Branch during the calendar year, 1921, fully confirms the inference to be drawn from the report of the preceding year; namely, that the function of the Medical Services has tended to broaden and increase rather than diminish in scope. A comparison of the types of cases for which hospitalization and treatment are being provided indicates that no types have been eliminated during the year, and that there have been some additions.

The arrangements for the care of ex-members of the Allied forces have been elaborated, and during the year reciprocal arrangements have been made with Newfoundland, Australia, and New Zealand. An agreement has been drawn up between the department and the Government of France, and this is under consideration at the present time.

The existing agreements with the British Ministry of Pensions and the United States Veterans' Bureau have been revised and extended. The work performed by the Foreign Relations Section (of which a detailed report is appended) has been enormously increased, to such an extent as to offset very largely the normal decrease in the post-war care of ex-members of the Canadian Expeditionary Force. It would seem clear that, so long as the department is charged with the treatment of recurrent war disabilities, and the re-examination for pension purposes of ex-members of the British forces resident in Canada and in the United States, immigration to these countries will be responsible for a very large increase in the duties of this section.

The difficulties attendant upon the administration of the Foreign Relations Section are multiplied many times by the fact that the department acts, so far as ex-members of the Imperial forces resident in the United States are concerned, merely in a liaison capacity, and, while it administers treatment and pensions in a foreign country, it must account to the British Ministry in England for such administration.

RESPONSIBILITIES AND DUTIES, MEDICAL SERVICES

The Medical Services of the Treatment Branch are responsible for the provision of hospitalization and treatment for the following types of cases:—

- (1) All ex-members of the Canadian forces, wherever resident, for treatment of disabilities caused or aggravated by military service in the great war, or recurrence of such disabilities.
- (2) Ex-members of the Canadian forces or of all Imperial forces resident in Canada, for any disability, with certain exceptions, for which treatment is requested within one year after discharge from the service, or from the department in cases where treatment has been continuous since discharge from the service. (The number of cases eligible for treatment under this provision has largely decreased during the past year.)

12 GEORGE V, A. 1922

- (3) Ex-members of the Canadian or Imperial forces resident in Canada or the United States who are suffering from insanity. Custodial care is provided for these cases.
- (4) Cases of long duration and other cases for whom special institutions are maintained.
- (5) Ex-members of the Imperial Australian and New Zealand forces resident in Canada or the United States who require treatment for disabilities caused or aggravated by military service in the great war.
- (6) Ex-members of the United States forces resident in Canada, for disabilities caused or aggravated by military service.
- (7) Ex-members, resident in Canada, of the forces of the Allies with whom reciprocal arrangements have been made by the department, or are under consideration.
- (8) Members of the Canadian Permanent Force, who are treated at the request of the Department of Militia and Defence.
- (9) Vocational students for any disabilities arising while they are under training.

The Medical Services also assume responsibility for the following:—

- (1) The re-examination for purposes of pension of all ex-members of the Canadian, Imperial, and other allied forces who are eligible for treatment by the department for service disabilities as outlined above. This includes the provisions of specialists' examinations, X-ray reports, and laboratory work.
- (2) The supervision from a medical and surgical standpoint of the supply of major and minor orthopaedic appliances.
- (3) The decision as to eligibility for dental treatment of ex-members of the Canadian or Imperial forces resident in Canada or the United States.
- (4) The organization and direction of a Nursing Social Service for the follow-up and after-care of ex-members of the Canadian and Imperial forces who have been discharged from the treatment strength of the department.
- (5) Ward aides, who are in charge of ward and bedside occupations in the hospitals.

The general plan of administration of the organization of the medical services of the department underwent no change during the year. Certain minor changes were effected.

The territory included in the different administrative units has been changed in three of the former eleven units. Certain counties previously on the eastern boundary of "C" Unit, with head office at Ottawa, have been added to "D" Unit, with head office at Toronto, which appeared to be the logical administrative centre for the territory included in these counties.

The policy of the department to close some hospitals and sanatoria, where possible, and to concentrate on larger institutions in cities, which might properly be considered to be treatment centres, has been continued during the year, and the following institutions have been closed:—

Fredericton Hospital, Fredericton, N.B., 125 beds.

Sir Sandford Fleming Hospital, Ottawa, 74 beds.

Davisville Hospital, Toronto, 450 beds.

SESSIONAL PAPER No. 14

The Hut Hospital, Hamilton, 20 beds.
 Earl Grey Hospital, Regina, Sask., 81 beds.
 Craig Darroch Hospital, Victoria, B.C., 110 beds.
 Esquimalt Hospital, Victoria, B.C., 136 beds.

While it did not appear to be possible to close any other institution, the decrease in number of patients receiving treatment enabled the department to reduce the bed establishment, with a consequent reduction in operating staff.

The type of case under the care of the department, has undergone, as was expected, a gradual change until at the present time a fair percentage of those cases now in active treatment hospitals are either of a chronic or recurrent nature.

At the present time, the department has in only two provinces, Ontario and Alberta, more than one hospital, and while it has been recognized that the change in the type of case being treated would probably necessitate the provision of institutional care of a less elaborate nature, it will only be necessary to change the establishment in existing hospitals to care for these cases adequately, and at the same time at a lowered cost than in active treatment hospitals.

While the necessity for a fair percentage of active treatment hospitalization has continued to exist, the department considered it wiser to provide for chronic cases in active treatment hospitals when there were empty beds which could be utilized.

It will be noted in the appended list of duties and responsibilities, appertaining to the Medical Services of the department that all medical work in connection with the re-examination of pensioners is performed by the Medical Services of the department.

The complete amalgamation of the Board of Pension Commissioners for Canada with the department has meant during the calendar year not only a great increase in the responsibility of the Medical Services but has entailed the solution of many difficulties in administration and routine.

The department continues to operate 18 hospitals and sanatoria, with a total bed capacity of 4,136.

On December 31, 1921, there were on the strength of the department in Canada 5,340 treatment cases, of whom 5,053 were in institutions. The number of out-patients totally incapacitated was 287.

These patients were classified as follows:—

General (medical and surgical)	3,299
Tuberculous (sanatorium cases)	1,195
*Mental	846
Total	5,340

The general and special clinics maintained by the department for the treatment of war disabilities not requiring active hospitalization have continued to fill an important place in the work of the division, to an extent that, in several centres, special clinics have been established, and, in others, additional facilities have been provided in equipment and personnel.

These clinics are classified as follows:—

General—(Medical and surgical).
 Special sense—(Eye, ear, nose and throat).
 Genito-urinary—(All diseases of the G.-U. tract.).
 Chest—(All chest diseases).
 Neurological—(Nervous diseases).

During the period covered by this report, the calendar year 1921, the treatments at these clinics numbered 300,895.

* There is a difference of 193 between this figure and the figure shown in the table on page 12 (1039). The reason is that the figure quoted above (846) represents those who have been certified mental cases within the meaning of, and are undergoing treatment under, the provisions of Order in Council P.C. 1993, while the larger figure represents the clinical classification.

12 GEORGE V, A. 1922

The following figures give the approximate number of admissions to Hospital by the Military Hospitals Commission and the department to December 31, 1921:—

July 1, 1915, to December 31, 1916—by Military Hospitals Commission, approximately.....	22,742
January 1, 1917, to March 31, 1918—by Military Hospitals Commission.....	28,258
*April 1, 1918, to December 31, 1919—by Department of Soldiers' Civil Re-establishment.....	36,625
January 1, 1920, to December 31, 1920—by Department of Soldiers' Civil Re-establishment.....	23,591
January 1, 1921, to December 31, 1921—by Department of Soldiers' Civil Re-establishment.....	13,890

FOREIGN RELATIONS SECTION

Reciprocal arrangements have been entered into by the department with the Governments of Great Britain (for the British Isles, South Africa and the Crown Colonies), Newfoundland, Australia, New Zealand, and the United States, whereby ex-members of the Canadian forces resident in these countries, and ex-members of the forces of these countries resident in Canada, may be given treatment for war disabilities.

The Foreign Relations Section is administered at the head office of the Department, and includes the keeping of records, the authorization of pay and allowances to

* NOTE.—It is to be noted that in previous reports the number of patients who were admitted to Hospital between April 1, 1918, and December 31, 1919, read 34,554. This has been amended to read 36,625.

SESSIONAL PAPER No. 14

patients, the approval of accounts for maintenance and treatment, etc. It deals with the following types of cases:—

- (1) Ex-members of the Canadian forces resident outside of Canada.
- (2) Ex-members of the Imperial, Australian, and New Zealand forces resident in the United States.
- (3) Ex-members of the Newfoundland, Australian, New Zealand, United States, French, Belgian and South African forces resident in Canada.

In the United States treatment is provided by the United States Veterans' Bureau, which has succeeded the United States Department of Public Health as the agency for carrying out the reciprocal arrangements entered into by the department with the Government of the United States. All dealings with the United States Veterans' Bureau are conducted through its head office at Washington, D.C.

The treatment given to ex-members of the Canadian and Imperial forces in the United States has been very satisfactory and the department has had splendid co-operation with the officials of the United States Veterans' Bureau in this regard.

The American Red Cross has also been of splendid service in dealing with cases requiring special investigation or assistance. In needy cases, advances of money have been made, and domestic difficulties have been adjusted. Through the Social Service Organization of the Red Cross, the department has been able to keep in touch with domestic and industrial conditions, and has, therefore, been able to arrange for treatment in cases which ordinarily might have been permitted to remain at their homes. All the chapters of the Red Cross are familiar with the arrangements made with the United States Veterans' Bureau, and refer ex-members of the forces requiring treatment to the proper authorities.

The treatment of ex-members of the Canadian forces resident in Great Britain, is supervised by the overseas medical representative of the department, 103 Oxford street, London, W. 1, England, under the direction of the Foreign Relations Section at head office. Treatment is given in Government or contract hospitals through the agency of the local War Pensions Committees of the Ministry of Pensions.

RE-EXAMINATION OF PENSIONERS

The Foreign Relations Section is also responsible for the re-examination, for pension purposes, of all the classes enumerated above. This work was formerly arranged for by the Board of Pension Commissioners for Canada, mainly through local physicians, and a considerable saving has been effected as a result of the use of the organizations through which treatment is given to ex-members of the forces. The responsibility for examination is now assumed entirely by the department.

The examinations are carried out through the following agencies:—

- (1) In Canada through the various units of the department.
- (2) In the United States by the United States Veterans' Bureau.
- (3) In British Possessions by the British Governors.
- (4) In Europe and the British Isles by the Imperial Ministry of Pensions.
- (5) In Australia by the Department of Repatriation.
- (6) In New Zealand by the Commissioner of Pensions.
- (7) In Newfoundland by the Board of Pension Commissioners for Newfoundland.
- (8) In other countries by the British Consuls-General.

STATISTICS

From January 1, 1921, to December 31, 1921, the number of requests for re-examinations forwarded through the section was as follows:—

Canadians in the United States.. . . .	1,709
Canadians in Europe and Great Britain.. . . .	1,321
Canadians in other countries.. . . .	54
Ex-Imperials in the United States.. . . .	3,340
	<hr/>
	6,424

Detailed records are maintained by the section at head office, indicating when Canadian pensioners outside of Canada are due for re-examination, and when an examination has been requested, a follow-up system ensures that the reports are received with as little delay as possible, and passed to the Medical Advisors of the Board of Pension Commissioners for Canada, for re-assessment. The records of ex-members of the Imperial forces resident in Canada or the United States are maintained by the Imperial section of the Board of Pension Commissioners for Canada.

When the Canadian pensioner moves from Canada to the United States, the file at the unit office of the department is forwarded to head office, where it is kept up to date by the addition of any later reports received. Should pensioner return to Canada, this file is transmitted to the unit under whose jurisdiction he will reside. The same procedure is carried out when Canadian pensioners, resident in the United States return to Canada for treatment.

NEUROPSYCHIATRIC SECTION

The number monthly of neuropsychiatric cases on the treatment strength of the department from its inception in April 1918, to December 31, 1921, is exhibited in chart N. 4. The starting point of the curve there shown represents 245 cases diagnosed as "mental" which passed under the control of the S.C.R. when, through

12 GEORGE V, A. 1922

the reorganization of the medical services of the C.A.M.C., the general treatment hospitals and special neurological centres were taken over by the Department of Militia and Defence.

The great majority of these 245 mental patients were under treatment in the departmental hospital at Newmarket, Ont., a small number being maintained by the department in each of the several provincial hospitals for the insane.

During the remainder of 1918 and 1919 the number of cases classified as mental, transferred from the C.A.M.C. as in need of further care and treatment, steadily rose; so that by the end of 1919 there remained under treatment somewhat more than 800 patients with mental disability.

The lower curve in the chart beginning with 1920 represents the cases classified as "neurological" which were transferred to the department when the Department of Militia and Defence relinquished control of the active treatment hospitals for disabled ex-service men.

From January, 1920, onward, the total monthly neuropsychiatric strength of the department is indicated by the upper curve in the chart. It will be noticed that this total continued to increase until May, 1921, when the high point was reached, there being at the close of that month 1,917 neuropsychiatric cases under treatment. During the summer the number fell off somewhat, rising again during the autumn, although not reaching the level of the previous peak.

This steady increase, during three years following the armistice in the number of ex-service men with neuropsychiatric disabilities requiring treatment was expected. It is accounted for by (a) the recurrence of war disabilities; (b) the insidious post-service development of disabilities, possibly present during service or at the time of discharge but overlooked, and in which only after the lapse of time has hospitalization been found to be indicated. In these patients, as might be anticipated, the service factor is of minor etiologic significance as compared with the hereditary-constitutional moment; (c) the eventual necessity for hospitalization in men discharged with disabilities which did not prevent them from carrying on for a time in civil life, and for which, in cases of service attributability, pension was awarded; (d) the appearance of neuropsychiatric conditions requiring treatment among men undergoing vocational training; (e) the incidence during the first twelve months following discharge from the army, or following the completion of treatment or training directly consecutive thereto of nervous or mental disabilities not due to service, but for which, under the regulations, responsibility may be assumed; (f) the factor of accumulation, which will be readily understood when it is remembered that the most common neuropsychiatric disabilities in the service are dementia præcox and primary mental defect, conditions which do not of themselves shorten the lives of the individuals they afflict.

Post-service Disabilities.—Cases are daily coming forward in which neuropsychiatric conditions had been first reported after varying intervals, sometimes two or three years following discharge from the army. In these cases the most careful investigation is necessary to determine service attributability, or the basis of eligibility for treatment under the department. As compared with physical diseases and defects, the assessment of the service factor in later developing neuropsychiatric disorders presents peculiar difficulties, which are naturally enhanced with the increasing distance from the service period. The problem is especially complicated in these cases by the almost universal finding that a constitutional predisposition is present, often that mental abnormality or subnormality was recognized before the period of military service, or that the condition present is characteristically of insidious development over a period of years, or of remittent or intermittent nature. Moreover, it has to be remembered that in conditions presenting the features just suggested, the casual accidents of civil life regularly serve to bring on fresh mental disturbances or aggravate those already existing. Foremost among such casual circumstances come

SESSIONAL PAPER No. 14

domestic and economic difficulties which, rather than the fact of previous military service, often constitute the main exciting factor in the oncoming nervous or mental disorder. While decisions must obviously be based in each case upon all the evidence which it is possible to secure, including a careful review not only of the service period, but of the pre- and post-service life of the individual, due allowance has also to be made for the inevitable incompleteness of information notwithstanding the best effort to obtain it, and for points of doubt.

It will naturally follow that from year to year neuropsychiatric troubles will make their appearance among ex-service men just as among other members of the community; and from year to year service attributability will be recognizable and admissible in a steadily diminishing number.

Late Neuroses.—Comment should perhaps be made upon the circumstance that, while the number of cases classified as mental has tended to decrease during the past six months, the so-called neurological group made up largely of conditions described as functional has not shown the same tendency, but rather reached a high point at the close of the year, in spite of the fact that the criteria of eligibility were maintained with the same care. Indeed it might appear to be a matter of surprise that three years after the close of the war the number of "nervous" cases under treatment should be found at this high level, in particular as these conditions had been looked upon as the service neuropsychiatric disabilities par-excellence, in the sense that they have so commonly been found directly reactive to the conditions of service or intimately associated with the motives inherent therein; and more especially still in view of the assured curability of these conditions.

It must be borne in mind, however, that the activating service factors and motives have been succeeded by hardly less potent reconstruction factors and motives which are likewise operative in determining the incidence, recurrence or perpetuation of neurotic disabilities.

In this connection must be mentioned the fact referred to in previous reports, viz., that in these neuroses of long standing or chronically recurrent, the surface neurotic symptoms by no means constitute the whole story. It is usual to find that the constitutional mental make-up of the individual presents evidences of deficiency or deviation from the average normal level, which are in the main responsible for the persistence of the pathologic reactions. The habit factor, which occupies so conspicuous a place in all normal conduct, plays in these cases an enormously disproportionate part.

Departmental Hospitals.—The special neuropsychiatric centres, Westminster Hospital, at London, Ont., and Ste. Anne's Hospital, near Montreal, Que., opened as such by the department early in 1920, have continued in operation, with gradually increasing population. The policy and general features of the work at these centres, as outlined in the annual report for 1920, have undergone no essential changes. As far as possible departmental patients, with neuropsychiatric disabilities, especially those requiring prolonged periods of treatment, have been brought together in these hospitals. It was not intended, however, to concentrate at these centres all such cases throughout the Dominion. In a number of the provincial hospitals departmental patients are still maintained; and in the treatment and disposal of these cases the department has received the fullest and most cordial co-operation of the provincial authorities.

Clinics for temporary observation or the treatment of milder cases have been maintained as follows:—

Maritime Provinces—Camp Hill Hospital, Halifax.

Quebec—Ste. Anne's Hospital, Ste. Anne de Bellevue.

Ontario—Kingston, Sydenham Hospital; Toronto, Christie Street Hospital; Burlington, Brant Hospital; London, Westminster Hospital and O.P. Clinic.

Winnipeg, Man.—Military Hospital and Deer Lodge Hospital.

Alberta—Calgary, Col. Belcher Hospital; Edmonton, Strathcona Hospital.

British Columbia—Shaughnessy Hospital, Vancouver.

The main concentration centres outside of Montreal and London are at Toronto, Winnipeg, and Vancouver.

The operations of the special centres at Ste. Anne's and London are set forth in charts N 1-3. This work is particularly exemplified in the returns from Westminster Hospital, which are graphically shown in charts N 1-2 in which certain data for 1920 and 1921 are made comparable. Four special points are here emphasized: (1) the factor of service attributability of the conditions under treatment; (2) the status of the patients, whether voluntarily accepting treatment or committed according to statutory regulations; (3) classification of the major clinical groups; (4) results of treatment.

Particular attention is drawn to the admissions during 1920 and 1921. At the opening of Westminster Hospital all patients at both Newmarket and Cobourg Hospitals not fit for discharge were transferred directly, thus accounting for the relatively larger number of admissions during 1920. It is gratifying to note that while 32 per cent of the 1920 admissions presented disabilities not attributable to service, this proportion was reduced in 1921 to 25 per cent.

Of special significance are the figures showing the ratio of voluntary to commitment cases. Of the total admissions for 1920, 37 per cent were voluntary and 63 commitment cases. These figures show a correction of those presented in the 1920 report, which were based partially on estimates before it was possible completely to carry out the classification.

During 1921, 70 per cent of the total admissions were on the voluntary basis. This fact is especially pleasing to record, as it is considered that in an institution of this kind where nervous and mental disabilities of all types, severe as well as mild, are under treatment, the proportion of patients who can be received and retained on the voluntary basis is a direct index to the efficiency of the service.

Provincial Legislation.—During the year the province of Quebec passed special legislation along lines similar to that put into effect in the province of Ontario during 1920, which legalizes the operation of the departmental hospital at Ste. Anne's and guarantees all necessary authority for the reception and control of patients.

Special provision was made for the admission of voluntary patients, on the basis of their willing acceptance of treatment regardless of the nature of their disabilities. As indicated in chart N 3, of 333 cases under treatment in the neuropsychiatric service at Ste. Anne's Hospital on December 31, 1921, 172, or 51.6 per cent, were voluntary admissions.

Obviously the milder or more hopeful conditions will predominate among the voluntary patients, while the larger number of severe and chronic types will be found among the commitment cases. This is clearly shown in tables, page 13, indicating the results of treatment. Moreover, the majority of cases struck off strength to pass under their own control will naturally come from the voluntary group, the chronic commitment cases making up a large proportion of the cumulative residual population. Nevertheless, of 741 neuropsychiatric cases remaining under treatment December 31, 1921, in the two institutions, 340, or approximately 46 per cent, were voluntary.

Results of Treatment.—The condition of patients discharged from Westminster and Ste. Anne's Hospitals are shown in the charts, pp. 16-18. It will be noted that cases designated as "recovered" and "improved" have been grouped together. The criteria by which to establish recovery in neuropsychiatric cases are somewhat uncertain, as they must always be based upon an approximate determination of the patient's indi-

SESSIONAL PAPER No. 14

vidual mental form; and furthermore inasmuch as the more or less complete subsidence of conspicuous mental symptoms does not necessarily imply recovery. Opinions may readily differ, therefore, as to whether a given patient has actually recovered, or is only greatly improved. Conditions in which, although active symptoms have disappeared, the patients cannot be said definitely to have attained a 100 per cent normal status, are sometimes spoken of as "social" or "economic" recoveries. A high proportion of the cases shown in the recovered-improved group represents such approximate recoveries.

At Westminster Hospital 60 per cent of the discharges during 1921 belong to the recovered-improved group; whereas 91.6 per cent of the discharges during the year at Ste. Anne's Hospital are so classified. This apparent discrepancy may be accounted for by the higher percentage of neurological cases at the latter institution. Forty-nine per cent of the discharges at Ste. Anne's came from the neurosis group, while at Westminster Hospital only 24 per cent of the discharges came from this group.

The combined discharges for 1921 from the two hospitals were 464. Of these, 366, or approximately 79 per cent, belong to the improved-recovered group.

12 GEORGE V, A. 1922

CHART N-1

All admissions since the opening of the Hospital to December 31, 1921, are here represented, grouped in three ways according to the legends.

It is interesting to note that although there have always been a considerable number of cases under treatment whose disability was not due to Service, but who were nevertheless entitled to treatment under the Regulations, the proportion of such cases decreased during 1921 from thirty-two to twenty-five per cent.

Especial importance is attached to the voluntary-commitment ratio. Consistent effort has been made to maintain the largest possible number of cases on the voluntary admission basis. The percentage of voluntary cases during 1921 reached seventy per cent, nearly double that of 1920.

In the third group of bars, the admissions are shown classified according to the four major clinical divisions. Where more than one disabling nervous or mental condition is present the case has been classified according to the underlying or major condition. For example, congenital defectives with acquired neurotic reactions and often referred to as neurasthenia or shell shock have in many instances been properly classified in the defective group. Under neuroses are included the so-called functional neurological conditions where this was the major or determining feature of the disability. Under psychoses are included severer conditions and mental disease proper. In these, the tendency to chronicity or incurability is more conspicuous. P.M.D. stands for primary mental defect, and under this heading are grouped all cases in which subnormal mental development, constitutional or hereditary in character, is the major disabling condition. Under epilepsy, the effort has been made to include only cases in which the diagnosis is reasonably well established. Functional epileptiform conditions are classed with the neuroses.

CHART N-2.

This Chart represents all discharges from in-patient treatment since the opening of the Hospital to December 31, 1921. The arrangement according to attributability or non-attributability to Service, voluntary-commitment basis of admission to treatment, and clinical classification is the same as in Chart N-1, with the results of treatment indicated in all groups. The reasons for showing cases recovered or improved in one category are indicated in the text.

CHART N° 2

CHART N-3.

The operations of Ste. Annes Hospital for 1921 are here shown, with the status as of December 31, 1920, for comparison. During 1921, the Provincial Act was passed legalizing the operation of the Hospital, and the classification of patients on the voluntary or commitment basis was thereupon completed. These figures show that on December 31, 1921, of a total of 333 on the treatment strength at Ste. Annes Hospital, 172 were voluntary cases and 161 regularly committed according to law.

REPRODUCED FROM

CHART N-4.

Monthly Neuropsychiatric treatment strength since inception of the Department of Soldiers' Civil Re-establishment in April, 1918, to December 31, 1921. During the first two years the Department was charged only with the treatment of cases classified as mental or insane. At the beginning of 1920, when hospitalization for ex-Service men was turned over to the Department by the Department of Militia and Defence, there were included a considerable number of so-called neurological cases, which are shown in the lower curve through the years 1920 and 1921.

12 GEORGE V, A. 1922

AFTER-CARE AND SHELTERED EMPLOYMENT

The summary of the series of reports prepared by the Board of Tuberculosis Consultants, which was published in last year's Departmental Report included several paragraphs dealing with post sanatorium problems. In March the full report of the board on "The Care and Employment of the Tuberculous Ex-Service Man After Discharge From the Sanatorium" was completed and copies were made available to all the members of the Parliamentary Committee on Pensions and Re-establishment. Later on an opportunity was afforded by the committee for the detailed presentation of this report by the members of the Board of Consultants, when it received a most attentive and sympathetic hearing. The chairman of the committee in his statement before the House of Commons after referring to this report as "a most comprehensive document, which deals exhaustively with the problems indicated by its title," added that it served the committee "as a basis upon which consideration was given to the subject in hand."

This report has recently been published in full by the department and is available for distribution to those interested. The following "Summary of Conclusions" included in it, as paragraph 124, is based on the discussion of the various phases of the subject in the preceding paragraphs and briefly epitomizes the whole report:—

SUMMARY OF CONCLUSIONS

GENERAL

(1) Sanatorium treatment alone and unaided cannot produce the best and most permanent results.

(2) Results produced are frequently dissipated by conditions and environment after discharge.

(3) All tuberculosis workers agree that a system of after-care is essential to consolidate the results of sanatorium treatment. They are not so unanimous regarding the best methods. No system guarantees against relapse.

FINANCIAL COMPENSATION, PENSION

(4) A lean purse is one of the main causes of relapse.

(5) A specially liberal award to the tuberculous pensioner is demanded by his special needs and limitations.

(6) For certain classes of the definitely tuberculous a minimum pension rate is desirable and justified.

(7) The "pensionable disability" of all cases of tuberculosis including so-called "aggravation cases" should not be less than the patient's actual disability.

(8) The stage and extent of the lesion as well as the "classification on discharge" should be fully considered in fixing the percentage of disability.

MEDICAL SUPERVISION

(9) Careful medical supervision is an essential of after-care.

(10) All sanatorium patients appreciate the need of specially skilled advice.

(11) Ex-service tuberculous pensioners desire to avoid Board of Pension Commissioners examiners unless themselves convinced of retrogression.

(12) The sanatorium superintendent's opinion is universally preferred.

(13) Sanatorium and post-sanatorium medical supervision should be most intimately correlated.

SESSIONAL PAPER No. 14

- (14) Existing clinics should be more used and other facilities developed.
- (15) A "shortage of tuberculosis specialists" exists.
- (16) Efforts to afford medical graduates and undergraduates special training at sanatoria deserve Government aid.
- (17) Efficiency of "follow-up" depends on visiting nursing service. Its work should, if possible, begin while the patient is still in the sanatorium.
- (18) The department's tuberculosis visiting nursing service should be developed to meet increased demands. Its record forms should be standardized.

HOUSING

- (19) Good housing is of importance to the tuberculous.
- (20) The cost of removal from a poor house to a better, and a difference in rent, are justifiable expenditures.
- (21) Hostels for single men under certain conditions should be provided.

EMPLOYMENT

- (22) Suitable employment is desirable on therapeutic, economic and moral grounds. It is an individual problem.
- (23) Occupations cannot be listed as good or bad, but certain principles determine their suitability. These principles involve the work, the environment, and the individual's condition.
- (24) The consumptive's opportunities for suitable work are extremely rare. Phthisiophobia, however unwarranted, is a factor in this.

SHELTERED EMPLOYMENT

- (25) Philanthropists occasionally employ the few; for the majority sheltered employment should be created.
- (26) Tuberculosis labour seldom pays and must be subsidized. Such subsidy is justified.
- (27) After-care implies sheltered employment.
- (28) The state should early initiate the establishment of sheltered employment for the tuberculous ex-service man.
- (29) The active co-operation of other agencies, with extension of employment privileges to civilians, should be encouraged.
- (30) The ex-service men's attitude is important. Their opinions, though conflicting, are, on the whole, not unfavourable.
- (31) The various schemes of sheltered employment should be carefully considered.

INDIVIDUAL ASSISTANCE

- (32) Assistance of the individual to find a suitable opening is occasionally all that is necessary.

GOVERNMENT APPOINTMENTS

- (33) The reservation of suitable government appointments for tuberculous ex-service men is not practicable.

SUBSTANDARD WORKSHOPS

- (34) A substandard workshop for the tuberculous has been successfully operated. It demands most capable management.
- (35) For city dwellers this type of sheltered employment has certain advantages over others. A survey of tuberculous ex-service men residing in all the large Canadian cities should be made.

12 GEORGE V, A. 1922

(36) The substandard shop to train and employ tuberculous ex-service men should be cautiously introduced into Canada at strategic points on an experimental basis.

(37) Pay should be proportionate to skill and work accomplished, since incentive is necessary. Pension also should be maintained.

AGRICULTURAL COLONY

(38) A purely agricultural colony for the tuberculous has narrow limits of usefulness.

INDUSTRIAL COLONY

(39) The industrial colony combines the advantages of training and suitable employment with residence in rural surroundings.

COMBINED COLONY

(40) The judicious combination of industrial and farm colony offers the greatest hope of success.

(41) The colony should be closely linked up with the sanatorium.

(42) A State subsidy is essential for success.

(43) The family of the patient should also be accommodated, as it forms the "unit of care."

(44) The colony scheme for the tuberculous ex-service men warrants trial in Canada in a carefully selected location.

PERMANENT COMMUNITY SETTLEMENTS

(45) The Permanent Community or Village Settlement is the logical complement of the training colony and may develop from it.

FRUIT-FARMING

(46) Fruit-farming, like other farming, is no sinecure for the tuberculous. Co-operation amongst a few exceptional men on small holdings might be possible, but will always be difficult. Certainly no general scheme is widely applicable.

RELAPSES

(47) Over 1,000 patients have required retreatment since their first treatment at Government expense. These are 11.2 per cent of the total admissions to sanatoria.*

(48) Sixty-five per cent of relapses are attributed to "insufficient treatment originally" and "intereurrent disease."

(49) Eighteen per cent of relapses are attributed to "insufficient monetary compensation from the Government" and "overwork."

(50) Relapses emphasize the need of after-care.

NON-TUBERCULOUS PULMONARY PATIENTS

(51) Non-tuberculous pulmonary patients amongst ex-service men treated in sanatoria were too small a proportion of the total non-tuberculous chest cases to justify discussion of the whole group.

(52) Lack of suitable data regarding occupational ability necessitated special classification of patients treated in sanatoria. Though reliability of the results is not absolute, no better are available.

SESSIONAL PAPER No. 14

READJUSTMENT PERIOD GROUPS

(53) Less than 6,000, or 69 per cent, of those treated were considered fit for any employment at discharge.* Less than 4,000, or 48 per cent, of those treated would likely take advantage of sheltered employment, and possibly only 3,000 or less.

(54) The responsibility for providing suitable employment for even 2,000 or 3,000 distributed throughout Canada cannot be ignored.

As a result of all the evidence placed before it, the Parliamentary Committee on Pensions and Re-establishment, in its Third and Final Report to the House on May 26, 1921, brought forward the following recommendations regarding the after-care of the tuberculous:—

“It is recognized by your committee that sanatorium treatment alone and unaided cannot produce the best and most permanent results and that consequently a system of after-care is essential if the results that sanatorium treatment does achieve are to be consolidated.

“Numerous individual suggestions from various sources were placed before your committee with regard to what should be provided for the after-care of the tuberculous. Certain of these had reference to the provision of an increased pension scale, and a supplementary allowance for the benefit of the tuberculous. Your committee feels that neither of these can be endorsed, in view of the recommendation of other suggestions which make them unnecessary.

“It is felt that an adequate minimum pension either for a period of years or permanently is desirable in the case of the tuberculous. This recommendation is limited in its application to ex-service men with a definite diagnosis of tuberculosis based on approved standards.

“It has been demonstrated to the satisfaction of your committee that the majority of tuberculous ex-service men will require skilled medical advice and supervision for as long as they live. This supervision should be available for tuberculous pensioners as well as out-patients of the Department of Soldiers' Civil Re-establishment, which will necessitate an extension of the present facilities in the way of clinics and personnel designed for this purpose.

“It has been impressed upon your committee that on therapeutic, economic and moral grounds, every ex-sanatorium patient who is even partially fit should be suitably employed. Opportunities for suitable employment available to the average type of ex-sanatorium patient are extremely rare in the ordinary labour and industrial markets. Philanthropists occasionally employ a few, but for the majority opportunities for sheltered employment are only available if artificially created. Accordingly there is a real justification for the inclusion of sheltered employment in any well-balanced system of post-sanatorium care of the tuberculous.

“It has been urged, and your committee agrees, that the provision of sheltered employment for the tuberculous should be in the hands of some approved non-governmental agency. The State should, however, recognize its responsibility to the ex-service tuberculous patient by initiating sheltered employment and by offering the financial assistance required for the establishment of industries and for the medical supervision of the patients. Your committee recommends that the department be authorized to conduct a survey of the tuberculous ex-service men residing in all the large Canadian cities, and to take the necessary steps to establish a standard shop to train and employ tuberculous ex-service men in any city, where the result of the survey appears to warrant it, and where an approved non-governmental agency is available for its administration.

* These figures only include patients granted treatment up to 30-4-20.

12 GEORGE V, A. 1922

"It would appear that a purely agricultural colony for the tuberculous has such narrow limits of usefulness in this country as not to warrant its establishment. Your committee agrees, however, that an industrial colony on an experimental basis warrants trial in Canada in a carefully selected location. The proposal submitted from patients at the Mountain Sanatorium, Hamilton, in this connection is worthy of most careful investigation and consideration, with a view to the provision of the necessary financial assistance, to establish industries and provide competent medical supervision under the Department of Soldiers' Civil Re-establishment. As a permanent community or village settlement for the tuberculous is the logical complement to the training colony it may ultimately develop from it."

The Parliamentary Committee also carefully considered the difficulties encountered in providing suitable employment under favourable conditions for ex-service men disabled from causes other than tuberculosis. In its report to the House the experimental handling by the department of the problem of furnishing sheltered employment for the handicapped under provisions of Order in Council P.C. 2328, was briefly reviewed. (Elsewhere in this departmental annual report will be found details regarding these activities throughout the current year). The committee concluded this part of its report to the House as follows:—

"The recommendations of your committee, therefore, are as follows:—

"1. (a) That the Department of Soldiers Civil Re-establishment continue negotiations with the Red Cross or other organizations, to provide for the establishment under the administrative control of the association or organization, such undertaking as may, in the opinion of the department, be considered to be advisable.

"(b) That until an organization of a definite nature is established, the department continue to care for these cases as at present.

"2. As respects financial assistance by the Government additional to pension payments to individuals, it is felt that any decision can only be made after further negotiations with the Red Cross or other organization undertaking the work. It is, therefore, recommended that such negotiations continue, and so soon as a definite basis of assistance is reached the proposal be placed before the Government for final approval."

As a result of this recommendation negotiations with the Dominion Executive of the Canadian Red Cross were continued, officials of the department and society holding several meetings both in Toronto and Ottawa. The executive of the Red Cross finally determined to send a representative, Dr. Wace, to England, to make an independent investigation of what was there being done to meet the problem of the employment of the disabled, and on his return a conference was held in Ottawa on December 13 and 14, at which were present officers of the society, the secretary of the Canadian Association for the Prevention of Tuberculosis and officials of the department. On this occasion the report of Dr. Wace was presented covering the results of his recent investigations in England on behalf of the Red Cross. Following this the whole situation in Canada was again thoroughly reviewed and several alternative methods of attempting the solution of the problem were fully discussed. The officials of the department urged strongly that the Canadian Red Cross Society should definitely assume the administrative control of the establishment and operation of workshops in the various centres throughout the country wherever the need for such provision could be demonstrated, with the assurance that substantial financial assistance from the Government might be anticipated.

Amongst the reasons which were urged in support of this recommendation, the following may be cited:—

SESSIONAL PAPER No. 14

(1) The psychology of the ex-service man is such that he is inclined to resent apparent perpetuation of army discipline as seems to him to be implied in any form of government control. Judging by the expressed attitude of disabled ex-service men as well as from what practical experience has actually taught, it is evident that there would undoubtedly be a more ready and also a more efficient response to an opportunity for employment extended to the disabled by some such organization as the Red Cross Society rather than by a government department.

(2) The excellent reputation of the Red Cross Society with the general public and the high regard in which it is held by ex-service men render it particularly suitable for the conduct of this work.

(3) In spite of what has already been done the undertaking is and will long remain essentially experimental in character. As such it must be very flexible and direct governmental control cannot be elastic enough or responsive enough to new conditions constantly arising. Non-governmental agencies are unhampered by the limitations of statutory authority or by lack of it and are unencumbered by official regulations as to spending money which are essential in government undertakings. The conduct of such an experiment at various points throughout the country by different branches of one organization, such as the Red Cross, would most readily ensure each individual enterprise receiving the maximum benefit to be gained from the experience of the others.

(4) In such an undertaking local interest is a factor of great importance in ensuring the most successful results economically by assisting both in the determination of the product best fitted to meet local requirements and in its disposal to the greatest advantage. In no way can this local interest be stimulated so well as by securing from the people of the community financial contributions towards the establishment and maintenance of the project. Uniformity of policy and co-ordination of local effort would be best achieved through concentration of control in a well-established organization of good repute such as the Red Cross.

(5) The determination of the best method of remuneration for work done under conditions of sheltered employment is a matter of supreme importance. On it is dependent much of the success both therapeutic and economic of such an enterprise. Experience has already amply demonstrated that direct government control renders it peculiarly difficult, if not quite impossible, to institute a method of remuneration which provides the proper incentive essential to the best results. Difficulties which in this regard are inherent in the case of government control of sheltered employment would not be encountered if it were recognized that it was being conducted as a business enterprise by an organization entirely apart from the government.

(6) Objection on the part of manufacturers to unfair competition through the sale of articles made by the disabled in government-controlled workshops would not be tenable if their production were in the hands of a voluntary organization, particularly if conducted on as sound a business basis as possible.

(7) The provision of sheltered employment may not unreasonably be held to be outside of any government responsibility which, it can fairly be claimed, has been adequately discharged by the provision of free treatment with pay and allowances, followed by pension for all actual service disability. It would seem on the other hand to fall naturally within the scope of the activities of an organization such as the Red Cross.

(8) No other association of a similar character has such a nation-wide organization or so comprehensive an experience in meeting conditions arising out of the war.

(9) There would appear to be a real wish on the part of the public to participate in work of this kind. In more than one locality branches of the Red Cross Society have already actually instituted workshops for the handicapped. Such sporadic efforts would appear to be an evidence that amongst the members of the society it is felt that in this direction lies an opportunity for the Red Cross to continue its special war-time effort in times of peace.

12 GEORGE V, A. 1922

(10) Such sheltered employment, as would be supported by the department, would have to be restricted to ex-service men, with certain limiting qualifications as regards the existence and degree of disability definitely due to service. It is conceivable, however, that through successfully dealing with war disabilities in this manner, the value of sheltered employment may be made apparent as relating to industrial cripples, in which event a non-governmental agency, such as the Red Cross, would be in a position on account of its local character to demonstrate to and influence in a proper manner the provincial and municipal governments concerned.

In November, officials of the department accepted an invitation to present their views regarding sheltered employment before a meeting of all the members of the Dominion Executive of the Canadian Red Cross Society. A very favourable reception was accorded, and it is now felt that following the December conference above referred to, action will shortly be taken by the society to carry out the recommendations of the department, which will result, in the near future, in the establishment of workshops in every province for all disabled ex-service men who require opportunities for sheltered employment.

The Imperial Order of the Daughters of the Empire having expressed a desire to assist in the after-care of handicapped ex-service men, an official of the department addressed the annual meeting of the National Chapter of the Order in Toronto in June, outlining the present situation in Canada and the methods that appear to be best calculated to meet it. The president of the Order then intimated that she was ready at any time to appoint a committee to take up with the department the best means by which co-operation might be achieved in the after-care of the handicapped. The offer of assistance from this great Order is much appreciated, as the magnitude and success of its war-time effort on behalf of the soldier can be taken as a criterion of the benefit that may be anticipated from its interest in the problem of the ex-service man.

In order to obviate duplication of effort further action in connection with this offer is held in abeyance pending final decision as regards the form and scope of the work to be undertaken by the Canadian Red Cross.

Reference was made in the Final Report of the Parliamentary Committee to the proposal emanating from the patients of the Mountain Sanatorium, Hamilton, for the establishment of an Industrial Colony for the Tuberculous. During the autumn a committee of representative Hamilton philanthropists was formed, which has purchased a 200-acre farm as a site for such a colony. Tentative plans have been drawn up and an estimate made of expenditure necessary for their being put into effect. It has been suggested that the cost might be divided amongst the Provincial Government, the Ontario Red Cross Society, and the Federal Government. It is expected that definite proposals as to the contribution to be requested from the Dominion Government will shortly be forthcoming.

TUBERCULOSIS

TABLE IV.—COMPUTED NUMBER OF EX-SERVICE MEN TAKEN ON STRENGTH OF DEPARTMENT S.C.R. FOR TREATMENT FOR TUBERCULOSIS PREVIOUS TO DECEMBER 31, 1921, AND STILL ALIVE ON THAT DATE.

Patients taken on strength, D.S.C.R. for treatment for tuberculosis to 31-12-21.....	9,755
Tuberculosis patients struck off strength, D.S.C.R. by death to 31-12-21.....	1,279
Tuberculosis patients who died as pensioners not on strength, D.S.C.R. to 31-12-21.....	184
Total patients taken on strength, D.S.C.R. for treatment for tuberculosis who died as pensioners or as D.S.C.R. patients to 31-12-21.....	1,463
Total patients taken on strength, D.S.C.R. for treatment for tuberculosis and who were still alive on 31-12-21.....	8,292

NOTE.—The number of ex-service men computed to have been T.O.S. for Treatment for Tuberculosis previous to December 31, 1921, who were still alive on that date can only be considered as approximately correct, but it is not thought to be excessive. Amongst the factors affecting its accuracy it may be noted that a number which cannot be determined may have died from various causes after having been S.O.S., and after having ceased to draw pension. However, those who have had departmental treatment for tuberculosis and who have already ceased to draw pension are comparatively few and of these still fewer will likely have died as yet. Consequently any diminution attributable to this source may be considered negligible.

On the other hand, if any of those who died as pensioners had not previously undergone treatment by the department they should not be deducted from those so treated in an attempt to determine the number of these still living.

Furthermore, those who were never departmental patients but are still alive and drawing pension for tuberculosis should for all practical purposes obviously not be excluded from enumeration amongst tuberculous ex-service men still living. Consequently the estimate furnished of the number of ex-service men who have been treated for tuberculosis and are still alive is probably below the mark.

DIETETICS SECTION

The department has continued the policy of employing a dietitian in each hospital, who is responsible for the efficiency of the food service in that hospital. Each dietitian submits a monthly report to Head Office, analyzed as to amounts, prices, and finally as to the total cost of each classification of food used in the institution. Included with these reports are the daily menus of each institution, giving also the details of special diets ordered in each hospital. These reports are reviewed at Head Office and a monthly criticism in detail is returned to each institution. This system has enabled the department not only to supply foodstuffs containing the proper amount of calories, vitamins, etc., required to build up the constitutions of convalescents, and at the same time a menu varied, attractive and appetizing, but has enabled the department to exercise an effective control over food costs, which has resulted in considerable reduction of expense.

MEDICAL STORES SECTION

Up to June, 1920, the department procured the major portion of its consumable medical and surgical supplies from the Medical Stores of the Canadian Army Medical Service. When these were closed, the department decided to operate its own Medical Supply Depots, and Medical Stores under the control of the Director Medical Services were therefore established at Montreal, Toronto and Winnipeg. The Militia Department had formerly operated stores in each Military District in Canada, and it was considered by the department that the work could be satisfactorily carried out with much less decentralization. This proved to be correct, as the department found it possible to close the Montreal Stores in February, 1921, and the Winnipeg Stores will be closed in February, 1922.

The Medical Stores Section at head office, under the control of the Director Medical Services, arranges for the centralized purchase and distribution of supplies and equipment, and their manufacture in stores, resulting in economical service. The purchase of medical supplies is carried out in co-operation with the Purchasing Division, which submits all tenders for such supplies to the Director Medical Services for selection. A complete record of goods received in and issued from Medical Stores, and the consumption of supplies at institutions and clinics, is maintained at head office, and the renewal and maintenance of stock in stores is based on actual consumption, thus obviating the possibility of overstocking.

The following is a summarized statement of the operation of Medical Stores for the calendar year, 1921:—

Total value of stock on hand as at December 31, 1920.. . . .	\$ 98,193 65
Total value of goods received in stores for period.. . . .	182,673 37
Total value of issues from stores for period.. . . .	211,100 09
Total value of stock on hand in stores as at December 31, 1921..	69,766 93
Value of monthly average receipts.. . . .	15,222 78
Value of monthly average issues.. . . .	17,591 67

DENTAL SERVICES

PERSONNEL

The personnel of the Dental Services consists of the Director Dental Services, unit dental officers, dental surgeons on full and part time salaries, dental mechanics, assistants, orderlies, clerical staffs, and civilian representatives.

The Director is located at the Head Office, Ottawa, and is responsible to the deputy minister. The unit dental officers administrate the executive work of the units

12 GEORGE V, A. 1922

and also operate. They are responsible to the Director Dental Services. Dental surgeons are located chiefly in clinics in the institutions of the department, and are responsible to the unit dental officer. Civilian representatives render necessary dental services, according to a scale of fees, in localities not supplied by salaried operators. They are responsible to the unit dental officer.

ELIGIBILITY

(a) *Department of Soldiers' Civil Re-establishment.*—The Dental Services of the department were established, not for the purpose of administering dental services to every ex-member of the forces, but to serve, when necessary, as an adjunct in the restoration of such ex-members of the forces to normal health and strength.

The conditions under which patients of the Soldiers' Civil Re-establishment and pensioners become eligible to receive dental services were detailed in the Annual Report of 1920.

(b) *Department of Militia and Defence.*—All members of the Canadian forces were eligible and entitled to dental services at the time of their discharge and were provided with cards at the time the final dental examination was made. These cards duplicated the report entered by the Canadian Army Dental Corps operator in their Military History Sheets.

Orders were issued for the demobilization of the Canadian Army Dental Corps on March 31, 1921, but shortly before that date it was found necessary to make arrangements to complete post-discharge work which could not be finished by the Department of Militia and Defence. The Department of Soldiers' Civil Re-establishment was approached by representatives of the Department of Militia and Defence, and resulting negotiations culminated in Order in Council P.C. 963, dated March 23, 1921.*

This Order in Council assigned to the Department of Soldiers' Civil Re-establishment the responsibility of providing requisite facilities for rendering to ex-members of the forces the post-discharge dental services to which they were entitled at the time of demobilization, and which had not yet been obtained from the Department of Militia and Defence.

Based on Order in Council P.C. 603, dated March 23, 1920, and Order in Council P.C. 963, dated March 23, 1921, rules and regulations, after receiving the endorsement of the Adjutant General and the Auditor General, were put in force by the Department of Soldiers' Civil Re-establishment.

Instructions were issued at the same time to unit dental officers defining the duties devolving upon them in connection with the uncompleted work of the Canadian Army Dental Corps.

The Department of Soldiers' Civil Re-establishment has not the privilege of making changes in the record, if any, of a man's Dental History Sheet, and should his military documents not contain the necessary authority for granting dental services, such services cannot be authorized.

The work of dealing with militia patients was assigned to civilian dentists, preference being given to dental surgeons who had served with the colours during the late war; the fees paid are in accordance with the schedule adopted by the Department of Militia and Defence.

PENSIONERS

A large number of disabilities, for which pensions were granted, have proved amenable to treatment, and as a result, the wage-earning capacity and potential energy of the pensioner have been increased and the amount of public moneys paid

* Appendix 2, page 120.

SESSIONAL PAPER No. 14

in pensions decreased, with corresponding financial benefits to the citizens of the nation, individually and collectively.

The dental services have proved an essential factor in determining and removing certain forms of disability, and in some cases have been the sole means of restoration. Improvement in health and added ability to earn a living mean everything to those who have suffered through the war, but also mean a good deal, economically, in the life of a nation, and it is the duty of those responsible for the care of pensioners to adopt every means possible to restore, to the fullest extent, the economic value of individuals under their charge, converting them from the "debit" to the "asset" column in the country's financial records.

The value of dental treatment in cases of incipient tuberculosis is shown in the reports of the medical superintendents of tubercular institutions on page 34.

The Chief of the Tuberculosis Section of the United States Veterans' Bureau, under date November 10, 1921, issued the following to the Chief of the Dental Section of the Bureau:—

"It is the opinion of the office that dental services should be rendered claimants suffering from active pulmonary tuberculosis for the reason that proper condition of the teeth is beneficial, and essential for the patient to derive the most from his treatment in order that he may arrest his disease."

The following is an abstract from instructions issued by the Director Medical Services, Department of Soldiers' Civil Re-establishment, to medical officers:—

"In order to keep tuberculous cases up to the highest point of resistance, absorption from defective teeth should be eliminated. The regulations of the Department provide for the dental examination and necessary treatment of patients on their admission to an institution for medical treatment. It is suggested to medical examiners that a subsequent detailed report on dental conditions be obtained from the dentist in all cases where it is considered possible that dental infection may have a bearing on the man's pensionable disability, with a view of eliminating such infection as the underlying factor and thereby decreasing his pensionable disability."

FACIAL WAR INJURIES

Facial war injuries are the most difficult of all the various phases of restorative work in which the Department is engaged, and this fact is readily realized as soon as attention is directed to the formation and functions of the oral cavity.

There are approximately two thousand of these facial cases and a large number will, from time to time, require new appliances due to change of tissues. Some of these cases have lost part of the mandible, some all of this bone. Others have lost all or part of the superior maxillae, with consequent loss of speech. The process of restoration in these instances must, of necessity, take a long time, as cheeks have to be grown, shattered jaws mended, and even portions of the face, which have been burned away by explosions, replaced.

The public is accustomed to the sight of individuals wearing artificial limbs, but until the war, very few had looked at a face literally "shot to pieces" and it is not such on which to gaze at length. The sufferers from facial injuries call for sympathy, not only for the purpose of repairing as much as possible the disability, but also that deeper sympathy which will appeal to the disabled themselves as completely removing any feeling of repulsion caused by their harrowing disfigurements.

12 GEORGE V, A. 1922

TUBERCULAR AND MENTAL CASES

Dentists, in charge of services for tubercular and mental patients, need to be possessed of special characteristics, and the department is fortunate in having on its staff operators who are enthusiastic about such work and are cordially liked in the institutions. Patience, tact, ability to be a "good mixer," are requisites for success in getting work performed, as these patients are nervous and cannot be given long sittings at any one time. The amount of work accomplished can never be regarded as a criterion of the time consumed by the operator, as the keeping and length of engagements are very problematical, being dependent on the physical condition of the patient at any special hour.

Space allowed for this report will not permit of an enumeration of the many cases concerning which reports have been received at Head Office. The following from the medical superintendents will indicate the important results shown in a few instances:—

The Queen Alexandra Sanatorium

Ex-Pte.....No.....

Dental examinations 23-6-21, showed extensive pyorrhœa in lower centrals with considerable pus. Teeth extracted 27-6-21. Dentures inserted 16-8-21.

Medical Report.—Moderately advanced case of pulmonary tuberculosis. R. unilateral bronchitis and recent spontaneous pneumothorax—patient's condition already showing considerable constitutional improvement (due to decrease toxæmia) of which dental toxæmia was undoubtedly part.

Ex-Pte.....No.....

Dental examination 23-7-21 shows numerous cavities and considerable pyorrhœa infection. Cavities were all filled. X-Ray showed caries and pyorrhœa, cleared rapidly under treatment.

Medical Report.—A latent clinical type of pulmonary tuberculosis with low grade activity. R. Apex. Dental attention in such a case was probably of prime importance and will be essential to complete restoration of case. Patient has already in two months shown marked improvement in general condition.

The Sir Oliver Mowat Sanatorium

I beg to state that all our cases are treated routinely in the dental parlour.

We find that a great deal of work is necessary, as I consider it particularly important that all patients suffering from tuberculosis should have their mouths and teeth in good condition. Not unfrequently, abscessed teeth are located, which of course, would be a contributing factor to the man's illness.

St. John County Hospital

The dental work under the Department of Soldiers' Civil Re-establishment has been very satisfactory to us during the past year. We have not had as many striking results as the previous year but the general dental care of the patients has been most essential and has been carried out well, it has helped us much in our work.

I am trying to get my board to establish dental care for our civilian cases as dental care given to the soldiers has demonstrated its great need. Following is a list of a few interesting cases in the past year:—

SESSIONAL PAPER No. 14

Ex-Pte.....No.....

He looked ill and very toxic, we had all the diagnosis made from tuberculosis of the lung, throat and peritoneum which were one after another excluded. The dentist found with the X-ray a bad tooth and extracted this. At the time of the extraction he called me into the room to demonstrate the foul odor which was present. This man improved greatly and the toxic symptoms disappeared.

Ex-Pte.....No.....

Nothing very definite in his chest, teeth were in bad condition, it was only by proper dental treatment of his teeth and elimination of the teeth as the cause of the symptoms that the diagnosis of incipient tuberculosis was made.

RADIOGRAPHS

The use of X-rays in determining focal infection, though not dentally infallible has proved of inestimable value.

The regulations of the department provide that X-ray shall be obtained by a dental operator only when he is still in doubt as to the condition of the teeth after he has exhausted all means provided by his professional training and experience for forming a conclusion. This limitation was not in force under the United States Veterans' Bureau, which provided that all cases of putrescent teeth about to be treated and teeth considered for extraction, should first be radiographed. The rules of the bureau were changed recently and the limitation in force by the department practically adopted by the United States Government.

EQUIPMENT AND SUPPLIES

Central Dental Stores are located at Christie Street Hospital, Toronto, having been moved from 185 Spadina avenue on April 15, 1921. Prior to the change, stock was considerably reduced, a large amount being transferred to sister departments.

CORRESPONDENCE

Eight thousand two hundred and eight official letters have passed out from the Dental Services in the past year. Of these 2,644 were written to the United States Veteran's Bureau, as follows: Canadian, 1,286; Imperial, 1,317; American, 15; Australians and New Zealanders, 4; General 22.

The responsibility of completing dental services for the Department of Militia and Defence increased the correspondence to a very great extent. In addition to the executive work, which occasionally extends beyond the limits of the North American Continent, the detail work for Military Districts 2 and 3 was centralized at the Ottawa Head Office. Also, all doubtful applications are submitted to Ottawa and these involve correspondence with the applicants.

ACCOUNTS

Dental services rendered by civilian representatives of the Department of Soldiers' Civil Re-establishment are authorized by the unit dental officers in accordance with regulations, and reports of the work performed are forwarded to Ottawa. Civilian work in two Units "C" and "F," is authorized from Head Office. After this work is completed, the accounts are sent to the Director Dental Services for approval and subsequent recommendation for payment. This entails a considerable amount of checking.

Former members of the Canadian, Imperial and New Zealand Forces, when resident in the United States, receive dental services to which they are entitled through the United States Veterans' Bureau, after applications and estimates have been

12 GEORGE V. A. 1922

approved at the Dental Head Office, Ottawa. Before the accounts for these services can be approved the files of the individuals must be drawn and the accounts checked with the authorization already granted and the scale of fees under which the work is performed. The accounts, having been found correct, receive the recommendation for payment from the Director Dental Services and are passed to the Accounts Branch. This class of work is particularly heavy as all accounts for dental services outside of Canada are under the direct supervision of the Director Dental Services and he alone authorizes such work.

REPORTS

Reports of all phases of dental services, are received from the clinics and are classified under daily, weekly, monthly and quarterly.

SUMMARY

DENTAL SERVICES RENDERED IN ALL DEPARTMENTAL CLINICS FROM JANUARY 1, 1921, TO DECEMBER 31, 1921

Amalgam filling..	11,510
Temporary fillings (a) G.P., (b) cement..	6,604

ORTHOPÆDIC AND SURGICAL APPLIANCES BRANCH

The function of the Orthopædic and Surgical Appliances Branch, namely, to manufacture or otherwise provide orthopædic and surgical appliances required by the department for disabled ex-service men, underwent no change during the past year. The branch continued to supply in addition such appliances as were required by other departments of the Government, especially the Department of Militia and Defence, Department of Indian Affairs, Royal Canadian Mounted Police, Canadian National Railways, and the various Provincial Workmen's Compensation Boards, as authorized by Order in Council P.C. 2311 of September 25, 1920. Necessary appliances have also been provided by the Branch for all British and allied disabled ex-service men resident in Canada; and, in accordance with existing reciprocal arrangements, it has dealt with the cases of Canadians resident in other countries who required appliances.

PRODUCTION

The number of appliances required during 1921 shows a slight falling off in certain lines from that of the previous year. During the early part of 1920 it became apparent that the large demand for appliances of all kinds which arose at the end of the war had been met, and during the summer months of that year there was a decided decline until the month of October. This decline then became less marked, and gradually during the remainder of the year 1920, and throughout the year under review, production became more constant, but on a lower level. In other words, the period of "first" and "duplicate" issue was passed, and that of repairs, and occasional renewals, had arrived. For the first time in the experience of the factory at Toronto the demand for appliances has been unsteady; instead of the even flow of production of previous years, busy spells and slack spells have been encountered. Orthopædic boots, however, form an exception to the appliances being produced on a lower scale, as also some classes of the less durable minor orthopædic appliances purchased, such as artificial eyes, rubber and elastic goods, as all patients in permanent need of these articles require to have frequent and regular renewal.

DECREASE OF STAFF

As the necessity for production diminished it was necessary to reduce the operative staff, and at the end of January a number of men were laid off from all divisions, and, in addition, the working day for men paid by the hour was reduced to seven hours.

12 GEORGE V, A. 1922

The adoption of the seven-hour day in place of one of eight hours was a measure taken to keep as many men as possible in employment during a time when work elsewhere was difficult to find. In reducing the staff consideration was given to a man's disability, as well as to his proficiency, and in consequence the machine shop staff is 50 per cent and the woodworking shop 60 per cent amputation cases. The lay-off in the operative staff during the year amounted to thirteen men from the woodworking shop and fourteen men from the machine shop, but only one from the shoe shop.

In May the eight-hour working day was again resorted to in order to keep up with an increase of orders that set in, but on November 1 the seven-hour day was returned to as being sufficient to fulfil the orders in the factory, which again began to fall off.

REORGANIZATION OF PLANT

Previously the main factory engaged in the manufacture of stock parts was situated at 185 Spadina avenue, Toronto; the fitting depot engaged in the manufacture of individual appliances, the fitting and issuing of them to patients, was situated at Christie Street Hospital. In January the factory accommodation at 185 Spadina avenue was vacated and the entire manufacturing plant concentrated at the Christie street building. Certain structural changes were necessary at the Christie street building in order to provide suitable accommodation there. By the end of May the rearrangement was complete and the factory at Christie street in working order. The removal involved dismantling, moving, reassembling, and installation of seventy machines, some weighing over a ton and a half; thirteen electric motors and all shafting. The removal was so arranged that there was very little interference with the regular work, and the issuing of appliances to patients was not delayed. The Head Office of the branch remains at 185 Spadina avenue, Toronto.

BRANCH DEPOTS

The situation in the Orthopædic and Surgical Appliances Branch depots in the units throughout the Dominion remains practically unchanged from last year. Their function is to keep in repair, and renew when necessary, the appliances which the men now in their districts originally were provided with before discharge from the Orthopædic Hospital in Toronto, and this they have continued to do. The only noticeable change is a reduced call for new artificial limbs. This is everywhere the experience of the branch. It demonstrates that amputation cases are becoming more and more hardened to the use of artificial limbs, and that "stump" and other concomitant troubles, inevitable in the initial stages, are to a large extent disappearing, so eliminating the necessity for refittings and adjustments at frequent intervals.

STANDARD OF APPLIANCES

In the appliances manufactured during the year no radical changes in the standards previously adopted have been made, although an endeavour is being made by the Experimental Branch to reconstruct the Canada arm. Much attention has been devoted to improvement in details, especially with a view to lessening the weight of appliances in any way consistent with safety and efficiency, and special care has also been given to finish and general workmanship. There has been a marked improvement in artificial legs built for the use of hip-disarticulation cases. Previously, this type of case was problematical and the limb formerly supplied was unsatisfactory, being, as a rule, and with reason, made little use of by the patient. Special attention was given to these cases, and all have now been fitted with the new model, which has proved highly satisfactory and is constantly used by those patients for whom it was designed.

SESSIONAL PAPER No. 14

In order to maintain an up-to-date standard in its production and to take advantage of all developments and improvements in artificial appliances the branch has kept in close touch with the work being done by the British Ministry of Pensions and with the civilian trade, especially by examination of their models and the study of the patent and trade journals. During the year no improved devices or accessories were obtained from these sources. In the spring a number of specimen artificial limbs were forwarded to the branch by the Ministry of Pensions, London, England.

This shipment comprised all the types that are in most favour in Great Britain. All the models were of great interest and, though each was most carefully studied, there was nothing found that should replace the department's own models. Most were seen to be more or less alike in design, and in this respect there was no fundamental difference between them and the models produced here, but it was noticeable that as a rule the appliances manufactured by the Orthopædic and Surgical Appliances Branch are lighter without loss of efficiency. It is evident that definite progress has been accomplished by the branch in its products, and in gaining more and more the confidence of its patients, from this fact alone, that the proportion of "complaint" cases has greatly decreased. From the first all criticism and complaints have been thoroughly investigated, and nothing was allowed to pass until every possible remedy had been tried. In this way from many cases ideas of value were gained which resulted in advances being made in rendering an appliance more comfortable and competent to serve its wearer; also many suggestions for the improvement of details in standard appliances were derived from this source.

ORTHOPÆDIC BOOTS

The activity of the orthopædic boot shop has remained unchanged from previous years. A new system was, however, introduced in the manufacture of boots which it is expected will greatly increase the efficiency of the shops. Hitherto, when a production order was received for boots the lasts were built up, or otherwise adjusted to suit the case, and after the job was complete they were stripped and restored to their normal condition for use again. In this way renewals might be found to have slight differences from the original pair, and as the labour cost of adjusting a pair of lasts twice was equal to the cost of a new pair, it was decided that a pair of lasts should be kept for each patient, and once built up and a good fit turned out, the lasts would be kept in that state and filed away for future use in making boots for the one patient only. A man can then have assurance that once well fitted future deliveries will correspond.

DESIGNS AND RESEARCH DIVISION

This year the outstanding feature of the work of this division is the effort being made to utilize hardened rawhide in place of willow wood for the basic material of artificial arms and legs. It has now been demonstrated that this material can be successfully adapted for the making of an artificial arm, and it can be reasonably hoped that it will take the place of willow wood when the manufacturing details are complete. Results equally satisfactory have not as yet been obtained in the attempt to build up an artificial leg, and it is still a matter of doubt as to whether or not hardened rawhide is alone sufficient to form the principal material for the purpose. The same may be said of endeavours to use it for "Symes" and "Chopart" appliances. After the work on the arms is completed the question of the legs will again be considered, there being a sufficient promise of success as justification. This rawhide material has many advantages over willow wood if it can be successfully adapted, chief among which are its lightness but, at the same time, much greater strength and durability, and the smaller cost of production.

As mentioned early in this report, the Canada arm is receiving the attention of the Research Division with a view to turning out a model which will be lighter and less costly to produce, as well as overcoming a present objection which renders it hard on the clothing. The new model will be made to retain the feature of the present design, whereby it serves both as a work and a dress arm. In line with the general plan of the Research Department to reduce, where possible, the weight of appliances, a new ankle joint has been devised, and has proven successful. It is now in general use. This joint also, though lighter, has greater durability. The same may be said of a new ball-bearing knee joint, and although it has not yet reached the stage of being produced in the factory, its appearance will shortly follow. A new elbow joint for rawhide arms, a universal ankle joint, a rotary wrist movement for artificial arm (for double amputation cases), are among the new devices produced during the year. In addition, many individual articles to suit unusual cases have been turned out, each being specially devised; special splints and modifications of work appliances for artificial arms are common in this group. The Research Division has also continued throughout the year to provide and take charge of all drawings, blue prints, etc. required for production, and has scrutinized all indents for material from the Purchasing Branch, to ensure that only the most suitable material is ordered.

OPHTHALMIC DIVISION

The work of the Ophthalmic Division has been carried on along exactly the same lines as described in last year's report. The full time of an expert optical mechanic has been required to cope with the work.

Special mention may be made of facial masks, which show improvement even over the excellent results of last year, the framework being neater, and the skilful use of tinted lenses having added considerably to the efficiency of these masks, in the disguising of facial disfigurements. In many cases, owing to severe injuries to the socket, an artificial eye gives a far from normal aspect when fitted, and in several of such cases improved appearance has been effected by the fitting of special spectacles. As an example: an artificial eye is sometimes unavoidably deviated from its proper setting by displacement of bone substance, giving poor results from an aesthetic point of view. Such a deviation has been successfully corrected in some cases by the use of a special prismatic tinted lens, with magnification properties. The prism is set in spectacle frame so as to have the effect of bringing the object observed through the prism into line with the other eye. Thus, although there is no physical adjustment, to the observer, there is a proper alignment of both eyes when the spectacles are worn. In cases where the aperture is smaller than that of the remaining eye, a magnifying lens is used, which has the effect of increasing the size of the aperture and the artificial eye to correspond with the other. The tints when used are employed to camouflage small scars, and to minimize the artificial appearance of the eye. This method of employing lenses objectively to improve the appearance of an artificial eye when abnormalities exist is, as far as known, unique. Only a few cases of this kind have been dealt with,—not more than a dozen, and some of those who constantly wore an eye shield to cover a disfigurement have been enabled to discard the shield altogether.

ACCOUNTING COSTS

The average cost for 1921 of all types of each appliance manufactured by the Orthopaedic and Surgical Appliances Branch is as follows:—

Artificial legs.	\$81 73
Artificial arms.	97 53
Peg-legs.	27 55
Orthopaedic boots.	20 48
Minor orthopaedic appliances.	13 39

SESSIONAL PAPER No. 14

The cost in manufacture this year shows in:—

Artificial legs a decrease of	1.66%
Artificial arms an increase of	19.19%
Peg-legs an increase of	14.50%
Orthopædic boots a decrease of	5.18%
Minor orthopædic appliances an increase of	11.77%

These figures represent the average cost of all types of each appliance. Artificial legs having a range from \$50 to \$250, and artificial arms from \$40 to \$150.

The average cost of legs has remained practically stationary.

The increase in the average cost of arms is due principally to the smaller output, but also to an improved type of hand which was supplied with dress arms, and which entailed increased cost of 20 per cent to this type.

Peg legs as supplied at the present time are mostly of a more permanent nature than those previously issued. In the past peg-legs were supplied as a temporary appliance to enable a patient to become used to walking during the period of stump shrinkage, but cases of this nature are now uncommon. The peg-leg as made up to-day is as a rule for the use of farmers, many of whom prefer such appliance for working in the open; or for other out-of-door men. Such, of course, are on stronger construction and fitted with as much exactitude as possible. This increase, therefore, is considered small in view of the inclusion of the better type, and also of lesser demands.

Minor Orthopædic Appliances comprise a very large variety, practically every surgical appliance in common use. Taken as a group, such appliances show an increase in cost of 11.77 per cent which, in view of the variety supplied, is not considered a change of note, as the average cost of this group depends entirely on the prescriptions received and fulfilled. There is also little change in the cost of orthopædic boots and the decrease (of 5 per cent), owing to a greater demand, increased efficiency, and drop in cost of leather, would have been greater but for the new system of lasting detailed above. In the course of another year it is expected that every patient will have his own lasts, and the process of building and stripping same will no longer be required, and an economy in the manufacture of orthopædic boots should then become evident.

Ophthalmic Division.—The costs of this division are very satisfactory. Not only has a great saving in the cost of its appliances been effected, but the service given to patients is immeasurably better, indeed, much of the work done not being procurable outside. The cost of an eye to the department before the installation of the Ophthalmic Division was anywhere from \$5 to \$15, the average being \$7.50. On the other hand, the average cost of an artificial eye to the department this year has been \$4.30, which includes all manner of cases. The cost of ordinary spectacles and eye-glasses averages \$4.59, and for special, such as supplied to disfigurement cases, the average cost reads \$8.63.

All the costs mentioned above include labour, material and overhead charges.

During the year the work of costing department at Head Office has been greatly increased owing to the supplying of appliances to other Government departments, to foreign governments, and to Workmen's Compensation Board, as the cost of all appliances supplied have to be singled out and billed to the source from which the authority to supply the appliance was received.

STATISTICS

Number of appliances issued during 1921 and since inception of work:—

† Of this total 92,693 items have been manufactured by the Department and 34,647 have been purchased.

SESSIONAL PAPER No. 14

ADMINISTRATION BRANCH*(Including Vocational Training)*

The Administration Branch of the department was created in June, 1920, to control the following services: Purchasing, Sales, Equipment, Stores, General Transportation, Mechanical Transport, Accommodation, Industries, Laundries, Farms, Unit Central Registries, Pay and Records.

During the year 1921, the following additional responsibilities were placed on this branch:—

AMALGAMATION BOARD OF PENSION COMMISSIONERS AND DEPARTMENT

1. On the amalgamation of the Board of Pension Commissioners with the department, the administration work of that board was transferred to the Administration Branch. In the units the amalgamation presented no difficulties, inasmuch as the two organizations were of a similar character. The medical examiners and medical clerical staff of the board were transferred to the Unit Medical Director of the department and the remainder of the staff of the board to the Unit Director of Administration.

The heaviest work in connection with the amalgamation occurred in combining the files of the two organizations.

The regrouping of the personnel of the department and the board under the same roof, and the fusion of central registries, has resulted in a marked curtailment of expense. Inter-office correspondence has been greatly reduced and the amount of necessary documentation diminished about fifty per cent. Apart from the economies resulting from the amalgamation, the placement of the various services under one direction has effected a co-ordination of effort, which has largely increased the efficiency of the service.

VOCATIONAL TRAINING

2. The work of the Training Branch of the department decreased considerably during the year and it was decided to make this branch a division of the Administration Branch. The granting of vocational loans, the distribution of unemployment relief, and maintaining employment facilities for disabled men, were also transferred to the Training Division.

RETURNED SOLDIERS' INSURANCE

3. With the transfer of the administrative work of the Board of Pensions Commissioners, the Returned Soldiers' Insurance Division became a part of this branch.

RECORDS

4. The staff engaged on the records of vocational training activities was used as the nucleus of the Records Division, to which has been transferred all the record work of the other divisions.

CENTRAL REGISTRY

5. On taking over the Central Registry of the Board of Pension Commissioners the combined registry was passed from the immediate control of the Assistant Deputy Minister to the Administration Branch.

12 GEORGE V, A. 1922

PRESENT ORGANIZATION

The Administration Branch as at present constituted consists of eight divisions, as follows:—

- (1) Training.
- (2) Insurance.
- (3) Pay and Personal Services.
- (4) Records.
- (5) Stores and Equipment.
- (6) Purchasing and Sales.
- (7) Engineering.
- (8) Central Registry.

These divisions naturally resolve themselves into two groups; the first four dealing mainly with personal services to ex-members of the forces, the other four with the general services of the department. The director has two assistants, each of whom is responsible for one of these groups.

UNIT ORGANIZATION

The Dominion is divided into districts as follows:—

	With H.Q.	Sub-office
"A" Unit—Province of Quebec.....	Montreal	Quebec.
"B" Unit—Maritime Provinces.....	Halifax.. . . .	St. John.
"C" Unit—Eastern Ontario.....	Ottawa.. . . .	Kingston.
"D" Unit—Central Ontario.....	Toronto.. . . .	Hamilton.
		Peterborough.
"F" Unit—Western Ontario.....	London.. . . .	Windsor.
"G" Unit—Manitoba (including Fort William and Pt. Arthur)..	Winnipeg.. . . .	Brandon.
		Port Arthur.
"H" Unit—Saskatchewan	Regina.. . . .	Saskatoon.
"I" Unit—Alberta	Calgary.. . . .	Edmonton.
"J" Unit—British Columbia.....	Vancouver.. . . .	Victoria.

The administrative accounting and orthopaedic work of the department is controlled in each district by the Unit Director of Administration, the medical services by the Unit Medical Director.

In order to obtain proper direction of the many activities of the branch it was necessary in the early stages of its organization, to centralize the control at Head Office. Every effort has been directed towards placing the administration on a proper business-like basis and to engender in all officers a strong sense of individual responsibility. This policy is producing the results hoped for and the responsibility for the work in the districts will in future be thrown to the fullest extent on the Unit Directors. The inauguration of an efficient audit system in each unit by the Supervisor of Expenditures has helped to a very great extent to make this possible, and the value of the services of the auditor to the Unit Director cannot be over estimated.

The unit organization is modelled on that of Head Office, with heads of divisions responsible to the Unit Director, the only difference being that in the smaller units there are fewer divisions.

SESSIONAL PAPER No. 14

TRAINING DIVISION

During the past year the Training Division has continued the work of demobilization which commenced during 1920. It was necessary to proceed with great care so that the work which still remained would be properly looked after.

The character of the work in connection with the vocational training of ex-members of the forces has also changed considerably during the past year, as men to whom training is now given by the department require more individual attention than formerly. Those eligible for training are drawn from two sources: (1) men who are only just now being discharged from hospital, (2) those who have had a recurrence of their disability unfitting them any longer to continue in their previous occupation. The men who are now being discharged from hospital are difficult to place on account of the long period of hospitalization and the severe character of their disabilities. Present economic conditions add to the difficulties in both cases as it is now extremely hard to find a place or method of training which will give assurance of permanent employment on completion.

It is probable that the number of men applying for training will remain fairly constant for some time, especially if employment conditions do not improve.

The Training Division is divided into three sections:—

- (1) Training and Inspection.
- (2) Employment.
- (3) Vocational Loans.

TRAINING AND INSPECTION SECTION

GENERAL POLICY

There have been no great changes in the general policy as described in previous annual reports, but during the year the schools and training centres operated by the department have, with the exception of three, been discontinued, owing to the students having completed their training, and to the fact that there was not a sufficient number of new students to warrant the expense of operating training classes.

The courses granted during the year have, to a greater extent than ever, been confined to training in industrial establishments.

The number of training cases during the year, dropped off very rapidly, although from the following figures it will be seen that considerable work has been done:—

FOR PERIOD JANUARY 1, 1921, TO DECEMBER 31, 1921

Recommendations.. . . .	1,901
Not eligible.. . . .	901
Approved.. . . .	1,062
Granted not accepted.. . . .	57
Commenced.. . . .	1,187
Discontinued.. . . .	181
Completed.. . . .	5,086
Extended.. . . .	2,586
Changed.. . . .	263
Cases closed.. . . .	16,255

The following figures will show the decrease in departmental training classes and instructors over previous years:—

	No. of Schools	No. of Students	No. of Instructors
December 31, 1919	51	6,773	556
December 31, 1920	16	673	92
December 31, 1921	3	14	3

The time limit for accepting applications for training was set at January 31, 1920, for all men discharged prior to November 1, 1919, or three months from the date of

SESSIONAL PAPER No. 14

PAY AND ALLOWANCES

The rate of pay and allowances during training, as laid down by Order in Council P.C. 2139, which went into effect from September 1, 1920, has been continued during the year.

In some cases where an employer was willing to pay a student a small wage after training for a few months, the department has taken advantage of the provision whereby the wages paid could be supplemented by allowances from the department up to the rates outlined above, thereby extending the course over a longer period than would otherwise be possible. Various causes, however, prevent a general use being made of this provision as in some cases the men do not desire this to be done, in others the employer contends that any money paid by him to the student is a matter between him and the student, and should have no bearing on the allowances from the department.

MINORS

The operation of P.C. No. 2131 with regard to the date of application for training has been enforced more rigidly with regard to minors, than has been the case with disabled men. The reasons being that training for minors was for the purpose of completing an education or apprenticeship interrupted by war service. It was, therefore, felt that any minor who really desired to do so would take advantage of the opportunity at the earliest possible moment after discharge from the Canadian Expeditionary Force.

In the few cases where training was granted to minors during the year, it was only after a very thorough investigation had established a satisfactory reason for the delay.

Number of minors granted training up to December 31, 1921.. . . .	11,587
Number of minors granted training from January 1, 1921, to December 31, 1921.. . . .	13
Number of minors in training on December 31, 1920.. . . .	620
Number of minors in training on December 31, 1921.. . . .	29

TRAINING OF EX-IMPERIALS

Under the reciprocal arrangements entered into with the Imperial Government by which training can be granted in Canada to ex-Imperials who were resident in Canada at the outbreak of the war, at the expense of the Imperial Government, a total of 1,095 were granted training during the year.

STATEMENT SHOWING NUMBER OF IMPERIALS GRANTED TRAINING UP TO
DECEMBER 31, 1921

Ex-Imperials—Residents of Canada on Outbreak of War

Unit	Commenced	Current	Suspended	Discontinued	Completed
A.. . . .	104	2	0	20	82
B.. . . .	27	1	1	2	23
C.. . . .	77	4	1	8	64
D.. . . .	464	8	0	50	406
F.. . . .	49	2	1	11	35
G.. . . .	86	1	1	13	71
H.. . . .	17	0	0	2	15
I.. . . .	73	1	0	10	62
J.. . . .	182	7	2	21	152
K.. . . .	16	1	0	2	13
Total.. . . .	1,095	27	6	139	923

During the year the Imperial Government set a time limit for receiving applications, viz. September 30, 1921, after which date no further applications can be accepted, except under special circumstances, such as a recurrence of a war disability requiring further hospital treatment.

12 GEORGE V, A. 1922

The Imperial Government allow the department discretionary powers in deciding eligibility, but doubtful cases are referred to the British Ministry of Labour for a decision through the overseas representative of the department.

No applications were approved during the year from former members of the Imperial forces, who were not resident in Canada at the outbreak of war, as, after the matter had been taken up with the British Government, it was decided by them that they would not be responsible for the expenses of training such men.

RETRAINING OF EX-MEMBERS OF THE CANADIAN EXPEDITIONARY FORCE IN ENGLAND

The arrangements made for the training of these men in 1920 were continued during the year, under the supervision of the overseas representative of the department, London, England.

The total number of courses commenced to Dec. 31, 1921, is 158 while 115 have completed courses, and 39 are still receiving training, two being suspended and four discontinued.

TRAINING IN GOVERNMENT DEPARTMENTS

Early in the year arrangements were entered into with the Civil Service Commission whereby the department could place disabled men for training for vacancies in Federal Government departments.

All the departments were circularized regarding this arrangement by the Civil Service Commission with a view to finding out a list of positions in which vocational students could be trained to advantage and also any openings available.

The results achieved have not come up to expectations, due principally to the very few vacancies occurring for which men could be trained to advantage.

The following shows the departments in which men were placed and the results obtained:—

Trade and Commerce Department—

Number of men placed for training.. . . .	13
" " " who completed.. . . .	8
" " " withdrawn.. . . .	4
" " " still training.. . . .	1
" " " absorbed on completion.. . . .	8

Of the four men shown above as having been withdrawn, two were unsatisfactory. The remaining two could not be assured of permanent absorption.

Public Works Department—

Number of men placed for training.. . . .	1
" " " who completed.. . . .	1

Owing to the necessary reduction in staff, the man placed with the Public Works Department was not absorbed.

Air Board—

Number of men placed for training.. . . .	6
" " " who completed.. . . .	2
" " " withdrawn.. . . .	4
" " " still training.. . . .	0
" " " absorbed on completion.. . . .	2

Men withdrawn as absorption was not assured.

Health Department—

Number of men placed for training.. . . .	4
" " " who completed.. . . .	2
" " " withdrawn.. . . .	2
" " " still training.. . . .	0
" " " absorbed on completion.. . . .	2

Men withdrawn as permanent absorption was not assured.

SESSIONAL PAPER No. 14

Agricultural Department—

Number of men placed for training.. . . .	2
“ “ “ who completed.. . . .	1
“ “ “ withdrawn.. . . .	1
“ “ “ still training.. . . .	0
“ “ “ absorbed.. . . .	1

Man shown as withdrawn discontinued his training for personal reasons.

Customs and Excise Department—

Number of men placed for training.. . . .	1
“ “ “ who completed.. . . .	0
“ “ “ withdrawn.. . . .	0
“ “ “ still training.. . . .	1
“ “ “ absorbed.. . . .	0

Post Office Department—

	Toronto	Montreal	Hamilton	Vancouver
Number of men placed for training.. . .	12	12	5	6
“ “ “ who completed.. . . .	9	7	4	0
“ “ “ withdrawn.. . . .	3	5	1	3
“ “ “ still training.. . . .	0	0	0	3
“ “ “ absorbed.. . . .	7	7	3	0

Toronto.—Of the nine men shown as completing, two accepted other employment.

Hamilton.—Of the four men shown as completing, one accepted other employment.

Montreal.—Five men shown as withdrawn were unsatisfactory.

Vancouver.—Three men withdrawn were unsatisfactory.

Totals—

Number of men placed for training.. . . .	62
Number of men who completed.. . . .	34
Number of men withdrawn.. . . .	23
Number of men still training.. . . .	5
Number of men absorbed.. . . .	30

GENERAL STATISTICS

The enrolments during 1921 were as follows:—

Month	New Students	Total in Training
January.. . . .	164	4,027
February.. . . .	131	3,489
March.. . . .	180	2,990
April.. . . .	129	2,597
May.. . . .	69	2,156
June.. . . .	55	1,804
July.. . . .	52	1,516
August.. . . .	53	1,240
September.. . . .	86	988
October.. . . .	55	814
November.. . . .	63	714
December.. . . .	49	634

DISTRIBUTION OF MEN IN TRAINING

December 31, 1921—634 men—Department schools	14 or 2.20%
Outside schools.. . . .	166 or 26.18%
Industries.. . . .	454 or 71.62%

A comparison with previous years shows that the use of outside schools has remained fairly constant, but that the training in industries has replaced training in department schools:—

December 31, 1919—22,437 men—Department schools	6,733 or 30.10%
Outside schools	5,553 or 24.75%
Industries.. . . .	10,151 or 45.24%
December 31, 1920— 4,714 men—Department schools	673 or 14.28%
Outside schools	1,208 or 25.62%
Industries.. . . .	2,833 or 60.10%

Average length of course 1919.. . . .	6.78 months
Average length of course 1920.. . . .	7.92 months
Average length of course 1921.. . . .	9.00 months

12 GEORGE V. A. 1922

	Number of graduates for year ending December 31, 1921.	Grand total to date.
Inside schools	264	12,552 — 30·0%

12 GEORGE V, A. 1922

TRAINING AND CARE OF THE BLIND

The department's policy for the training and after-care of those ex-members of the Canadian Expeditionary Force who suffered blindness, or defective vision, was set forth fully in the report for the year 1920. This policy is still being followed.

It will be noted from the figures given at the end of this statement that there are only ten men in training at the present time, with one pending training. It is anticipated, according to present estimates, that by the early summer of 1922, unless other cases present themselves, training will have practically come to an end.

During the past year the superintendent of Pearson Hall, Toronto, visited each man who had been trained and settled down in various parts of the country. This was for the purpose of ascertaining how the men were progressing and whether they had any complaints or difficulties that could be adjusted. It was found that, with very few exceptions, the men were all doing well and it was possible to straighten out matters which were causing them anxiety.

A great deal of initiative had been shown in many of the cases visited. One man, employed as a stenographer in the Government, drawing the same salary as would a sighted person in that position, was, during his spare time, working at joinery and turning out first-class articles. Another man, who was farming with his brother and getting satisfactory crops, was doing all the chores on the farm—he had been investing his savings in cattle.

Practically all those men who have been set up in business for themselves through this department have achieved a degree of success highly gratifying. This is in spite of the bad business conditions prevailing. As a matter of fact of the sixteen cases on record, only four have failed to make good, one of whom had to discontinue on account of bad health. It is hoped that he may be able to make a fresh start in the spring. These businesses are for the most part newspaper and tobacco stores. One man is running a barber's shop in conjunction therewith, employing a returned soldier as barber. One man is carrying on a very successful trade in eggs and prize birds.

As regards the twenty-one men trained as masseurs: One has decided to remain in England, where he is making a distinct success. Twenty are in Canada, fifteen of whom are employed under the Soldiers' Civil Re-establishment in its various hospitals, and have in addition private patients. One is employed as massage instructor by the Canadian National Institute for the Blind, and has a very large private clientele. Three men have private practices and work in institutions and hospitals not under the jurisdiction of this department. One man after working at his profession for a short time decided to discontinue and took up fruit farming. He is very contented with his venture and having a fair success.

Regarding the twenty men who live at their homes and carry on at the various forms of basketry and reed and rattan work at which they have been trained—they are all contented and making a fair wage. It should be stated that they are receiving assistance through the After-Care Department of the Canadian National Institution, at the expense of this department, inasmuch as they can obtain raw material at cost price through the Canadian National Institution for the Blind. Their manufactured products are sold for them by the institute at a fair profit, the overhead cost of such sales being borne by the institute.

Twenty-eight of the men trained were found to be not working—that is, though many of them were working round their homes, the occupations in which they were engaged did not improve them financially. These men were in receipt of pension. Some of them were unemployed on account of labour conditions, others by reason of bad health, either temporary, or otherwise. One who had purchased a small farm had rented it, and was living elsewhere.

A number of the men had bought their own homes, or had built them, and some were making plans for the future in this regard. One in particular had had his home built for him by a group of vocational students. He had made for himself an

SESSIONAL PAPER No. 14

excellent chicken-house, and kept about seventy chickens. He intends to go in extensively for poultry. It should be mentioned here that when a man is trained in poultry farming, he is also taught rough carpentry, sufficient to enable him to erect for himself colony houses, trap-nests, etc.

Through the instrumentality of Captain E. A. Baker, M.C., adviser in matters pertaining to the blind of this department, an association was formed for the protection of masseurs throughout Canada, to which association the blinded soldier masseurs belong. This association was incorporated by federal charter in March, 1920, under the name of the "Canadian Association of Massage and Remedial Gymnastics." This was done with a view to bettering the status of masseurs, and of bringing them into closer touch with the medical profession. The members of this association pledge themselves to accept patients only on a doctor's prescription, thus placing their work on a professional basis.

The files dealing with those Canadians who are reported to be suffering from blindness, or defective vision, discharged from the Canadian army and awarded pension on account of such disability are, at the present time, being reviewed. One hundred and ninety-seven have come before the department for training from a blind standpoint. Of these 160 have been fully trained, and one is pending such training, while ten are in the process of being trained. The remaining twenty-six cases have been investigated and it has been found that ten are either physically or mentally unable to take training, while sixteen are unwilling, or will make no definite decision in the matter.

Of the cases which have been trained, are now under training, or have been investigated, classification is made as follows:—

Loss of both eyes.. . . .	52
Loss of right eye.. . . .	39
Loss of left eye.. . . .	29
Other visual disorders.. . . .	77
Total.. . . .	197

Of this number 135 are totally blind, or possess at most a perception of light only.

Of the twenty-six cases either unable or unwilling to take training, seven have lost the sight of both eyes, one that of the right, two of the left, while sixteen are suffering from other visual disorders. Thirteen of the total number are either totally blind, or possess at most a perception of light.

There is only one man pending training. He is 100 per cent disabled on account of a visual disorder.

Of the ten men who are in training at the present time, one is at St. Dustan's, and nine are in Canada; classification is made as follows:—

Loss of both eyes.. . . .	1
Loss of right eye.. . . .	1
Loss of left eye.. . . .	1
Other visual disorders.. . . .	7
Total.. . . .	10

Of these six are totally blind.

The above-mentioned are undergoing training as follows:—

Massage.. . . .	3
Rattan and reed work.. . . .	1
Green house work.. . . .	1
Preliminary training for blind.. . . .	5
Total.. . . .	10

12 GEORGE V, A. 1922

One hundred and fifteen men who are totally blind or possess at most a perception of light only have been trained and settled down as follows:—

Boot repairing and matmaking.. . . .	3
Broommaking.. . . .	1
Book agent.. . . .	1
Business for themselves.. . . .	9
Employed business firms.. . . .	3
Employed with C.N.I.B.. . . .	5
Farming.. . . .	8
General secretary.. . . .	1
Joinery.. . . .	2
Massage.. . . .	17
Matmaking and netting.. . . .	1
Piano tuning.. . . .	1
Poultry farming, netting, etc.. . . .	15
Reed articles, rattan work, netting, etc.. . . .	14
Returned to former occupation.. . . .	5
Stenographer with business firms.. . . .	1
Stenographer with Government.. . . .	4
Translating and teaching French.. . . .	1
Unable, unwilling or waiting for work.. . . .	18
Deceased.. . . .	5
Total.. . . .	<u>115</u>

Forty-five men who are partially blind have been trained and settled down as follows:—

Boot repairing and matmaking.. . . .	1
Broommaking.. . . .	1
Business for themselves.. . . .	4
Commercial salesman.. . . .	1
Employed business firms.. . . .	6
Farming.. . . .	2
Insurance.. . . .	1
Instructor with C.N.I.B.. . . .	1
Massage.. . . .	3
Matmaking and netting.. . . .	1
Piano tuning.. . . .	3
Poultry farming, netting, etc.. . . .	3
Reed articles, rattan work, netting, etc.. . . .	6
Stenographer with business firms.. . . .	1
Unable, unwilling or waiting for work.. . . .	10
Deceased.. . . .	1
Total.. . . .	<u>45</u>

Of the above 160 cases, twenty-eight have settled in England and are being looked after by the St. Dustan's After-Care Department. Three have gone to live in the United States, and one has returned to Belgium (where he has opened a small store), leaving 128 resident in Canada.

SESSIONAL PAPER No. 14

VOCATIONAL LOANS SECTION

1. *Organization.*—Owing to the decrease in the number of applications received, it was possible to effect a considerable reduction in the organization built up during 1920.

The loans officers of the various units carried on in the same manner, being responsible through the Unit Director of Administration to the Chief of the Training Division, Head Office, for the investigation and submission to Head Office for approval of new applications, the inspection of men granted loans, and the collection of promissory notes as they become due.

2. *General Policy.*—No changes were made in the general policy outlined in the annual report for 1920, but trade conditions rendered it more necessary than ever to thoroughly investigate each application to see that where a man intended using the tools and equipment for the purpose of operating a small one-man business that he had the necessary means to tide his business over the initial organization period.

3. *Applications received and dealt with during the year 1921, at Head Office—*

	1920	1921	Total
Applications received	1,940	429	2,369
Applications approved	1,504	297	1,801
Applications not approved	354	143	497
Applications deferred	2	0	0
Applications cancelled	55	8	63
Applications under investigation	25	8	8
Amount approved	\$545,004 76	\$ 95,390 73	\$640,395 49
Amount outstanding	480,668 61	391,011 26	391,011 26

A large number of applications were dealt with and not recommended by the unit loan officers, owing to the applications for the loans not being within the limits of the provisions of the Order in Council or because the possibilities for success appeared very doubtful.

4. *Service Inspection and Follow Up.*—The policy of having men who received loans visited at more or less regular intervals by inspectors from the department was continued, and as it was found necessary in a great many cases to put the repayments on a monthly basis, the inspector was able in such cases to make a small collection on account of a promissory note due.

The value of having an inspector in close touch with the progress of the man's business was demonstrated on many occasions, as in cases where an extension of time was requested on due notes, the inspector was able to inform the department whether the man's claim for an extension on account of business conditions was genuine.

The inspectors were also able to render valuable assistance to the loanees by giving them advice on the conduct of their business and to assist them in keeping their accounts and in some cases to obtain business for them.

After each inspection, a report is submitted to Head Office, outlining the general condition of the man's business, the condition and approximate value of the mortgaged equipment, the amount of insurance carried, and the approximate monthly earnings and expenditures. These reports are carefully checked in Head Office.

5. *Legal Matters.*—The policy of obtaining promissory notes, chattel mortgages, mortgages, or agreements according to the various provincial statutes has been continued.

In Ontario an amendment was obtained to the provincial statute, whereby the necessity for the renewal of chattel mortgages is obviated when the Crown is the mortgagee.

6. *Discontinued Loans.*—The prevailing adverse business conditions have caused a rather large number of failures during the year, which necessitated the department repossessing the mortgaged equipment for disposal purposes.

It is not considered, however, that the proportion of failures was any greater amongst men who received loans from the department than the proportion of failures amongst small businesses generally, as Dun's and Bradstreet's figures show the monthly failures during 1921 to be two and sometimes three times as heavy as compared with previous years.

The following statement shows an analysis of the reasons for the failures:—

ANALYSIS OF THE REASONS FOR FAILURES OF DISCONTINUED LOANS FOR YEAR ENDING DECEMBER 31, 1921	
1. Business depression.....	128
2. Physical unfitness (recurrence of disability).....	44
3. Inattention to business.....	44

"G".....	8,499 77	6,436 72	76	2,063 05	24
"H".....	5,466 08	3,857 05	76	1,609 03	24
"I".....	11,830 75	8,411 82	71	3,418 93	29
"J".....	18,571 93	13,710 25	75	4,861 68	25
"K".....	3,790 37	2,742 16	72	1,048 21	28
Total of all units.....	107,039 11	84,560 77	79	22,478 34	21

Adverse business conditions necessitated the renewal and extension of a considerable number of due notes. It was felt, however, that, provided a man was making a genuine effort to run his business successfully and was making a living for himself and his family, there was nothing to be gained by enforcing payment of the due note, as it would only result in the man joining the ranks of the unemployed.

In the majority of such cases repayment was arranged on a small monthly basis, but in a few cases of badly disabled men who were very much handicapped, even this was not possible, as the income from the business was only sufficient to provide the necessities of life.

A generous policy was followed in such cases in the hope that improved business conditions would enable such loanees to commence repayments.

SESSIONAL PAPER No. 14

S. Loans Fully Repaid.—The following table shows by units the total number and amount of loans which have been fully repaid:—

Unit.	Repaid up to and including Dec. 31, 1920		Repaid from Jan. 1, 1921 to Dec. 31, 1921.		Total repaid to Dec. 31, 1921.

12 GEORGE V, A. 1922

EMPLOYMENT SECTION

The Employment Section of the Training Division is carrying on the work of the After-Care and Employment Division of the Vocational Branch, and the Handicap Section of the Information and Service Branch.

This work has been carried on under great difficulties owing to lack of openings, and as it was impossible to find employment for all the disabled men who applied to the department to help them, a measure of relief has been carried on during the entire year.

In each unit there is an experienced employment officer with a staff of employment scouts and placement officers who are in close touch with all employers of labour in their own districts and they are constantly on the lookout for openings suitable for disabled and retrained men.

A close record has been kept of the work done in each unit. The cumulative figures for the year by the various units are as follows:—

EMPLOYMENT STATISTICS TO DECEMBER 31, 1921.

CUMULATIVE TOTALS.

GENERAL POLICY

It will be readily realized that disabled men are much more difficult to place in suitable employment than perfectly fit men, and the necessity of carrying on the work by means of a special section will be appreciated when it is stated that over 40,000 applications have been dealt with, about 60 per cent of which were from disabled retrained men and 40 per cent from handicapped men not retrained.

SESSIONAL PAPER No. 14

While the employment officers of the department have co-operated closely with the officials of the various Employment Offices operated by the Provincial Governments, it was impossible to avoid a certain amount of duplication. For this reason an effort was made to place the whole question of employment under the jurisdiction of the Employment Service of Canada and correspondence to this end took place between the Director of Administration and the Department of Labour.

The matter was fully discussed at the Third Annual Meeting of the Employment Service of Canada held in Ottawa from August 31 to September 2, 1921, the following resolution being adopted:—

"That your committee recommend that the Employment Service of Canada assume the responsibility of placement work of handicapped ex-service men now being carried on by the Department of Soldiers' Civil Re-establishment as per letter of August 15 from the Department of Soldiers' Civil Re-establishment, provided details in connection with this matter are satisfactorily arranged between the Director of Employment Service, the Department of Soldiers' Civil Re-establishment, and the representatives of the Employment Service in the various provinces, and that pending the establishment of adequate facilities the Department of Soldiers' Civil Re-establishment shall continue their present placement work for handicapped ex-service men."

The department is, therefore, continuing the placement work of disabled men until such time as the work can be transferred to the Provincial Bureaus of the Employment Service of Canada.

EMPLOYMENT OF DISABLED MEN IN THE FEDERAL CIVIL SERVICE

Special attention has been paid to the placing of disabled men in the Civil Service of Canada. The Civil Service Commission has co-operated with the department by giving to disabled men preference in positions which they are qualified to fill, and it is the intention of the department to continue to push to the fullest extent the claims of the disabled ex-service men for preference in all appointments.

As disabled men by law are granted preference in the filling of vacancies in the Federal Civil Service, the head of the Employment Section, Head Office, acts as a liaison officer with the Civil Service Commission in the matter of placement of disabled men in the Civil Service.

By this means many men who, on account of very severe disabilities, were unable to find any vocations in the general labour market have been placed in suitable positions in the Civil Service.

The head of the Employment Section is also in a position, through having access to the files of the department, to furnish information quickly to the officials of the Civil Service Commission regarding the percentage of disability of the various applicants for positions, so that disability preference can be given. He also keeps in close touch with the heads of branches and chiefs of divisions of the various Government departments in Ottawa, so that no opportunities for the placement of severely disabled men in the Civil Service will be overlooked. The Civil Service Commission also advise him of cases where local selection is granted and a telegram is immediately despatched to the unit employment officer, so that where possible a disabled man will be selected.

During the past year the following placements of returned soldiers in the Federal Civil Service have been made:—

Permanent Positions—

Amputation cases..	68
Disabled men..	902
Active service men (not disabled)..	1,218
	<hr/>
	2,188

12 GEORGE V, A. 1922

Temporary Placements—

Disabled men.....	758
Opportunities for positions secured through Civil Service Commission granting local selection.....	318
Special cases taken up with Civil Service Commission and Government departments.....	1,949

UNEMPLOYMENT RELIEF TO PENSIONERS AND VOCATIONAL STUDENTS

By Order in Council P.C. 43, dated January 10, 1921, the department was authorized to give assistance to necessitous cases among former members of the forces who had been pensioned or granted vocational training for a war disability. The relief given did not take the form of cash grants, but was given in the form of orders for fuel, food and rent.

As the Training Division of the branch was closely in touch with the unemployed disabled men, the carrying out of the provisions of this Order in Council was placed with this division.

From the beginning of January to May 28, 1921, relief in the various units was granted as follows:—

Unit	Number of Men Receiving Relief	Amount of Relief
"A".....	1,742	\$ 173,059 77
"B".....	485	43,732 19
"C".....	790	68,687 46
"D".....	4,031	429,007 42
"E".....	596	38,291 27
"F".....	727	71,215 46
"G".....	344	31,097 44
"H".....	858	82,175 49
"I".....	1,712	184,085 97
"J".....	605	53,081 51
"K".....		
Total.....	11,890	\$1,184,433 98

Relief has been carried on in a modified form throughout the year, the amount granted from May 29 to December 31 throughout the units being as follows:—

Unit	Number of Men Receiving Relief	Amount of Relief
"A".....	646	\$ 52,802 76
"B".....	15	1,514 69
"C".....	253	11,784 15
"D".....	1,732	179,540 90
"E".....	122	4,254 14
"F".....	392	16,804 08
"G".....	162	6,601 90
"H".....	455	18,105 77
"I".....	486	33,840 20
"J".....	13	481 39
"K".....		
Total.....	4,281	\$325,729 98

The number of men who received relief were divided as follows:—

	Period Jan. to May 28, 1921.		Period May 29 to Dec. 31, 1921.		Total.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

SESSIONAL PAPER No. 14

RETURNED SOLDIERS' INSURANCE DIVISION

In June, 1921, the business administration of the Returned Soldiers' Insurance Act, with the administration of the Head Office of the Board of Pension Commissioners, passed under the control of the Department of Soldiers' Civil Re-establishment and became a division of the Administration Branch. The policy to be carried out in the administration of the Act is laid down by the Board of Pension Commissioners under the direction of the Minister of Finance.

Prior to the amalgamation of the Board of Pension Commissioners with the department, the Returned Soldiers' Insurance Act was administered exclusively from Ottawa. By the amalgamation it became possible to utilize the offices of the various units of the department throughout the Dominion to distribute information and to accept applications and premiums.

The Insurance Division is responsible for the issue of policies, collection of premiums, payment of claims and distribution of information in connection with the Act, and for the control, through Unit Directors of Administration, of insurance sections in local offices of the department throughout the country. It has brought another important feature of the Dominion's re-establishment programme under the control of the department, life insurance without medical examination being unique among measures for the rehabilitation of those who served. The volume of new business of the class provided under the Act being issued through the division is exceeded only by that of the largest insurance companies in Canada.

PUBLICITY

As the time during which applications may be made has been limited, no applications being accepted after September 1, 1922, one of the most important functions of the division is to ensure that all persons eligible shall have had a reasonable opportunity to take advantage of the insurance offered before that date. Efforts have been made therefore, in the direction of giving the largest possible publicity to the benefits provided and in making information and application forms as readily available to those interested as possible. Steps in this direction include the following:—

1. (a) Half-sheet posters have been displayed and explanatory booklets have been placed throughout Canada in 5,000 banks, all post offices, 911 customs houses and ports of entry.

(b) All Soldier Settlement Board offices.

(c) All local offices of the department and departmental hospitals.

(d) In the working quarters of 7,000 plants, shops, etc., employing more than 10 men in each case in Canada.

(e) All public libraries throughout Canada.

(f) All Veterans' Club houses.

(g) Each drill hall and armoury.

2. Individual circulars have been forwarded to:—

(a) Thirteen thousand Imperial veterans who drew war service gratuity from the Canadian Government.

(b) To 20,000 soldier settlers farming under the Soldier Settlement Board.

(c) On two occasions to 50,000 pensioners.

(d) To between 80,000 and 100,000 men receiving service medals. (Balance as medals are issued.)

(e) To each nursing sister who served in the Canadian Expeditionary Force.

(f) To approximately 1,200 officers now on the reserve strength of the Canadian Air Force.

12 GEORGE V, A. 1922

3. General circulars and booklets have been forwarded to:—

(a) Every branch of all soldiers' organizations in Canada, including Great War Veterans' Association, Grand Army of United Veterans, Imperial Veterans in Canada, Navy League of Canada, various branches of the Amputations Association, various branches of the Invalided Tubercular Soldiers' Welfare League, and numerous other organizations.

Similar action has been taken in the United States in the case of the British Great War Veterans of America, the American Legion, and numerous smaller organizations.

(b) Direct inquiries have been received and answered from approximately 39,000 soldiers. In addition direct letters have been written to nearly 15,000 men whose names have been sent to the department on returned post cards enclosed with replies sent out to direct inquiries.

(c) Reading articles have been sent to each country newspaper in Canada. Numerous readers have been inserted in various city papers in Canada on at least fifteen different occasions through the medium of the Canadian Press Distribution system. Readers have been displayed in several hundred American papers through press agencies in Chicago and New York.

(d) Articles have been inserted in the press of many countries by trade commissioners and commercial agents of the Department of Trade and Commerce and by immigration agents of the Department of Immigration and Colonization in all parts of the world.

(e) Paid advertisements have been inserted in several veterans' newspapers and similar publications.

(f) Meetings of veterans have been and continue to be addressed from time to time by representatives of the department from coast to coast.

(g) An average of 2,200 individuals are personally interviewed each month by representatives of the department.

UNIT INSURANCE SECTIONS

During the first six months of its operation the Act was administered on the "mail order" plan entirely from Head Office in Ottawa, individuals being required to make application and pay their premiums directly to Ottawa. It became apparent, however, that if the purpose of the Act was to be accomplished closer touch between the department and the applicant must be established, with the result that in March, 1921, it was decided to organize an Insurance Section in each local office of the department throughout the country for the convenience of persons desiring personal information. No additional staff was appointed for this purpose, the decrease in the activities of other branches of the department making possible the use of employees already on strength. These Insurance Sections were authorized to accept applications for insurance, together with premiums, both initial and renewal, and became centres for the distribution of printed matter and general information. The insurance representatives work in close co-operation with the various ex-service men's organizations and in this manner have made insurance information widely available.

Ex-members of the forces have appreciated the opportunity of being able to discuss insurance personally with local officials rather than by correspondence. In the larger centres the offices of the department have been kept open at night to accommodate the men who could not call during regular office hours.

In August, 1921, the scope of the local insurance sections was widened upon recommendation of the Special Committee of the House, to which certain representations had been made to the effect that still further need existed for increasing the

SESSIONAL PAPER No. 14

facilities provided to returned men for taking advantage of this scheme. All employees of the department whose duties bring them into contact with the general public, such as industrial surveyors, employment scouts, social service visitors, loan investigators, etc., were instructed to distribute insurance information and to assist applicants for insurance in completing their application forms. These officials are now personally bringing insurance to the attention of over 2,000 ex-service men every month.

DEDUCTION OF PREMIUMS FROM PENSION

Another change in the administration of the Act which is proving of the greatest convenience to policy-holders, is the deduction of insurance premiums from pension. Most policy-holders pay their premiums monthly, and by having a deduction made from pension, not only avoid the possibility of lapse through an oversight, but also avoid the inconvenience of making a direct remittance or calling at a local office.

Since the work of the Insurance Division is not closely related in any way to that of other branches it is organized as a separate unit, maintaining its own accounting system, filing system and records.

STATEMENT OF OPERATIONS

Following is a statement of the operations of the division up to December 31, 1921:—

			\$269,500

PAY AND PERSONAL SERVICES DIVISION

As the result of the amalgamation of the Claims and Review Sections of the Board of Pension Commissioners with the Pay and Personal Services Division, several economies have been effected and a higher standard of efficiency attained.

On the 31st of December, a saving in salaries at the rate of \$15,000 per annum had been effected, notwithstanding the fact that a new section was created to deal with questions relating to treatment of ex-Imperials—formerly done in the Imperial Section of the Board of Pension Commissioners, and the necessity of creating a sub-registry, due to the extra work involved in the division.

The division, as its name implies, deals with all questions of a purely personal character and in addition it is responsible for dealing with all matters relating to:—

- (a) The authorization of treatment and vocational pay and allowances of all ex-members of the Canadian Expeditionary Forces in Canada, and ex-Canadians and ex-Imperials receiving treatment in the United States of America.
- (b) Payment of war service gratuity for men on the strength of the Department of Soldiers' Civil Re-establishment.
- (c) Proper notification to the next of kin in the case of death of patient.
- (d) Burial of deceased patients.
- (e) Chaplain services.
- (f) Investigation of claims for pension.
- (g) Drawing of all proceedings after award of pension has been made by the medical officers.
- (h) Records of service and medical histories compiled from official documents of ex-members of the forces taken on the strength of the department.
- (i) Insane and problem cases.

CLOTHING

Clothing still in stores is available to patients on the strength of the department on the repayment plan as long as the present supplies last. Free clothing is issued to all insane patients. Class A and B patients, that is those whose insanity is attributable to service, who recover, have the cost of clothing deducted from their accumulated pay and allowances on discharge.

SESSIONAL PAPER No. 14

In the cases of class C patients, that is those whose insanity is not attributable to service, the value of the clothing supplied is written off on the authority of the Director of Administration.

WAR SERVICE GRATUITY

During the year 119 applications for the payment of war service gratuity in a lump sum were approved and paid. During this period War Service Gratuity accounts other than the above were completed to the number of 240.

War Service gratuity.. . . .	\$ 98,226 07
Interest on closed accounts.. . . .	8,181 77
Total paid.. . . .	<u>\$106,407 84</u>

PAY AND ALLOWANCES

No change was made during the year with regard to the amount of pay and allowances issuable, except in the case of the wife or a dependent widowed mother of an insane man, residing in the British Isles or the United States. The allowance for these was increased by \$12 per month as from September 1, 1921.

During the past year arrangements were completed whereby former members of the forces of Australia, New Zealand and South Africa, when taken on the strength may receive pay and allowances from the Department, at the expense of their respective Governments.

Regulations have also been drawn up under which advances of pay and allowances may be made to former members of the Imperial Forces and their dependents who were not residing in Canada or the United States of America on 4-8-14, thus doing away with any delay which existed in the past.

DEATHS, FUNERALS, PERSONAL EFFECTS

In the case of the death of a patient on the strength of the Department notification is telegraphed by the Unit Director of Administration to the next of kin, if in Canada, or by the Chief. Pay and Personal Services Division, if in the British Isles. In the matter of funerals the department conforms as far as possible to the wishes of relatives. Letters of condolence go forward to the next of kin in all cases. The personal effects of deceased patients are taken care of by the Unit Director of Administration, until advised by the Director of Records, Department of Militia and Defence, as to their disposal.

In order to standardize the cost of funerals, tenders were called for and contracts made for funeral services in each Unit throughout Canada.

CHAPLAIN SERVICES

Provision for carrying on religious work in hospitals, visitation of the sick in their homes, was maintained, but at a reduced cost as the department now employs only two full-time chaplains, and twenty-two part-time chaplains. Part of the work formerly looked after by them viz., the entertainment and recreation of patients in hospital is being carried on by the Canadian Red Cross Societies and the Y.M.C.A.

ASSISTANCE FOR RETURN TO RELATIVES IN SPECIAL CASES

In accordance with the recommendations of the Parliamentary Committee on Pensions and Soldiers' Re-establishment, the cases of four ex-service men, who were patients of the department and who had asked to be supplied with transportation for

12 GEORGE V, A. 1922

their wives and families, were reported to the Governor General in Council, and the following Orders in Council were passed:—

P.C. 112 of January 21, 1921, authorizing transportation of No. 2368352, Ex-Pte. F. F. Saich, from Canada to England.

P.C. 164 of January 31, 1921, authorizing transportation of No. 180395, Pte. H. B. Capell, from Canada to England.

P.C. 1164 of April 7, 1921, authorizing transportation of No. 500653, Ex-Spr. H. N. Harper, from Canada to Durban, Natal, South Africa.

P.C. 3538 of September 23, 1921, authorizing transportation of No. 116144, Ex-Pte. Fred Bignell, from Canada to England.

In every case each of the above named furnished the department with an acknowledgment that the Government of Canada is released from any further obligation, except as to the pension to which he may be entitled, or as to such further medical treatment for which he may prove eligibility.

PRECIS FROM MEDICAL DOCUMENTS

During the year ending December 31, 1921, *Precis of Medical History* and records of service have been compiled from 9,423 official documents.

In addition 5,132 *Precis of Medical Documents* were received from the Board of Pension Commissioners during the period 1-1-21 to 17-6-21.

During the period of demobilization, medical documents relating to the military service of a very large number of ex-members of the Canadian Expeditionary Force were passed to the Board of Pension Commissioners and the department. These are now being removed from individual files, and during the months of October, November and December, 900, 1,199, and 849 sets of documents, respectively were returned to the Department of Militia and Defence.

UNITED STATES OF AMERICA CASES

During the year 1921 there was a decided increase in the number of ex-members of the Canadian and Imperial Forces applying for treatment in the United States of America. This increase is particularly marked in the case of ex-members of the Imperial Forces, a large percentage of whom is found to have been residing in the United States of America prior to the outbreak of war in August, 1914.

The total treatment allowances issued to men in United States of America hospitals during the past year amounts to \$253,914.53. In addition payments have been made on behalf of the Imperial Government at British rates, totalling £1,925 8s. 2d.

PENSIONS-CLAIMS

The Pensions-Claims Section of the Pay and Personal Services Division is one result of the taking over of certain work by the division formerly carried out by the Board of Pension Commissioners.

During the period June 1, 1921, to December 31, 1921, the Claims Section has dealt with the following:—

Number of files dealt with.. . . .	60,602
British, French and Italian supplementary pensions.. . . .	270
D.C.M. and V.C. Awards.. . . .	26
Number of proceedings drawn on C.E.F. Awards.. . . .	42,155
Number of pensions refused.. . . .	1,460
Total amount of payments authorized (new awards, adjustments, continuances and final payments) approximately.. . . .	\$17,500,000

SESSIONAL PAPER No. 14

HEAD OFFICE DISABLEMENT BOARD IN CONTROL OF FUNCTIONALLY, NEUROLOGICALLY AND
MENTALLY SUB-NORMAL CASES UNDER PROVISIONS OF P.C. 2328

Under Order in Council P.C. 2328, 1919, authority was given to the Department of Soldiers' Civil Re-establishment to assist problem cases, i.e. functionally, neurologically, and mentally sub-normal men, by providing suitable places where light occupation combined with medical care could be given such cases and where they could be kept under careful observation and proper working conditions for the purpose of ascertaining whether such cases could be dealt with as follows:—

- (a) Restored to normal health.
- (b) Made fit to resume their places in industrial life.
- (c) To ascertain that if neither of the foregoing were possible to what extent they would be capable of useful work.

Various occupations, including basketry, toy-making, reed furniture making, light metalwork, woodwork, etc., were provided.

Number of men on strength to December 31, 1920.. . . .	144
Number of men taken on strength during the year 1921.. . . .	347
Total.. . . .	491
Number of men discharged during the year.. . . .	278
Total number of men on strength to December 31, 1921.. . . .	213

NUMBER OF MEETINGS HELD BY THE HEAD OFFICE DISABLEMENT BOARD
DURING THE YEAR 1921 TO DECEMBER

January.. . . .	6	Cases dealt with.. . . .	104
February.. . . .	5	" " " " " " " " " " " "	122
March.. . . .	8	" " " " " " " " " " " "	129
April.. . . .	9	" " " " " " " " " " " "	132
May.. . . .	7	" " " " " " " " " " " "	135
June.. . . .	8	" " " " " " " " " " " "	142
July.. . . .	5	" " " " " " " " " " " "	86
August.. . . .	6	" " " " " " " " " " " "	89
September.. . . .	7	" " " " " " " " " " " "	104
October.. . . .	8	" " " " " " " " " " " "	121
November.. . . .	8	" " " " " " " " " " " "	113
December.. . . .	4	" " " " " " " " " " " "	52
Total.. . . .	81		1,329

The results show that 180 men have gone out to useful occupations so that their earnings plus their pension are sufficient for their needs. In 58 cases it is presumed that they are employed; 52 cases are unemployed. In 120 cases further medical care was necessary, and these cases were transferred to the treatment strength. In 14 cases it was discovered that the men were fit for training; 5 men are shown as sick and 16 deceased. The total number of men admitted during the year was 347. There were 144 on the strength at the beginning of 1921, making a total of 491, for the year 1921; 278 have been struck from strength and 213 remain on strength at the present time. Eighty-three cases had been readmitted under P.C. 2328. The total number of cases, not counting readmissions, since the inception of P.C. 2328 is 658.

12 GEORGE V, A. 1922

RECORDS DIVISION

Much time and labour was expended in compiling and tabulating records of the work of the department during the past few years. Until the beginning of the present fiscal year each branch and division compiled and maintained its own records. It was realized that by bringing all these records together they would be much more valuable, and in addition would effect a great reduction in the expense attached to the work. The keeping of departmental records has, therefore, been centralized in the one office and is rapidly being put into such shape as will make them readily available for all time at very little cost.

1. *Daily Orders.*—The Records Division has the supervision and checking of daily orders issued by the Unit Directors of Administration. Daily orders which originate in the units contain a record of all hospitalization, treatment, P.C. 2328 cases, training, transportation given to ex-service men by the D.S.O.R. The Records Division checks the accuracy of entries in daily orders, particularly pay and allowances, by cross-checking each entry with the Head Office files.

Previous to the formation of the Records Division daily orders were only used as a record of hospitalization and P.C. 2328 cases. However, their use has been extended to include a record of (1) all transportation, (2) training, and (3) rates of pay and allowances during treatment.

The need was felt of cross-checking the information contained in daily orders with documents on Head Office file. Accordingly, arrangements have been made to have this carried out. This cross-checking has been most helpful in checking up the accuracy of information submitted to Head Office. It serves three purposes: (1) verifies the accuracy of the information contained in daily orders, thereby making the records and statistics more reliable; (2) checks the Head Office authorization of pay and allowances against the rates computed in the units as shown in daily orders; (3) is a means of knowing that all necessary documents have been submitted to Head Office.

2. *Training.*—In January and February special attention was paid by this division to completing the punching of the Hollerith cards covering all vocational graduates. This work has been brought up to date and the cards are now punched as soon as the notification of completion is received.

A thorough review of all reports which have been compiled by the Training Branch has been made. These were sorted, indexed, catalogued and filed away for future reference.

12 GEORGE V, A. 1922

WORKMEN'S COMPENSATION CASES

A record has been kept of the men granted compensation under the Workmen's Compensation Act in respect of accidents while undergoing training. To date awards have been made as follows:—

SUMMARY OF MEN WHO HAVE BEEN GRANTED COMPENSATION

- 23 men granted total sum of \$5,409.57, being settlement in full.
 - 1 man granted total of \$150 plus \$12.50 per month for life.
 - 1 man granted \$9.90 per month for life.
 - 1 man granted total of \$150 plus \$22.50 per month for life.
 - 1 man granted \$31.97 to be paid at rate of \$10 per week until amount is paid.
 - 1 man granted \$54.45 from 5-1-20 to 4-6-20, being settlement in full.
 - 1 man granted \$61.34 (time not known).
 - 1 man granted total of \$75, plus \$8.50 per month for life.
 - 1 widow granted \$40 per month for life.
 - 2 children granted total of \$20 per month for life.
 - 1 man granted total of \$100 plus \$9 per month for life.
 - 1 man granted \$18.72 from 16-9-20 to 29-9-20.
 - 1 man granted \$203.11 (time not known).
 - 1 man granted total of \$200 plus \$10.72 per week (time not stated).
 - 1 man granted total of \$150 plus \$20 per month (time not stated).
 - 1 widow (and son) granted \$50 per month for life.
 - 1 man granted total of \$1,200 to be paid at rate of \$20 per month until whole is paid.
 - 1 man granted \$33.84 (time not known).
 - 1 man granted Class 17 Pension, 20 per cent disability.
 - 1 man granted \$535 (time not known).
 - 1 man (not yet decided).
 - 1 man granted \$83.16 (time not known).
-
- 43 total.

INDEX RECORD

When the treatment records were transferred from the Pay and Personal Services Division, they contained a separate index system. This index system and the training one were amalgamated.

It is proposed to further extend the index to include a cross reference to all pension cases in order that a ready reference to all cases dealt with by the department may be available. At the present time all treatment and training records are filed alphabetically, and all pension records are filed by the pension number. No one system has a cross reference to the other. A general index would therefore prove of great service.

REVIEW OF RECORDS

Regular and periodical reviews of the records were carried out for the following reasons: (1) to verify the statistics and the various classifications under which the records are filed, (2) for the purpose of knowing that the records maintained at head office reflect the actual conditions in the unit, (3) to check up the units in their failure to carry out regulations.

SESSIONAL PAPER No. 14

For example, (1) A monthly review of current training cases is made to see that men are not being carried on strength after the date they are due to complete and that notification of completion of training is received in this office within two weeks.

(2) A monthly review of all vocational courses which have been suspended is made and should no notice of resumption of training be received or should the suspended cases be retained on pay and allowances, the same are brought to the attention of the Training Division for action.

(3) If a treatment case is shown absent without leave for more than a month, attention is drawn to the unit to have him struck off.

(4) During the year a complete review of cases shown on strength at head office was checked against the nominal rolls received from the units. A comparison of the vocational training cases shown as suspended for treatment was checked against the treatment record of trainees.

(5) A number of other special reviews were also carried out, such as pensioners suspended for vocational training, classification of insane cases, and the verification of the correct number of T.b. cases.

USE OF RECORDS

The Records Division serves a further very important purpose in answering very many requests regarding individual men and other general requests regarding the work. Practically all divisions in the department use the Records Division for general reference. This is of course only natural, but indicates a very valuable feature in the maintenance of complete and accurate information.

WORK OF THE STAFF

It may be interesting to compare the work and number of staff of seventy-one (71) on December 31, 1920, with the present. At that time this staff was entirely engaged in recording training and employment records. At the present time, the staff of seventy-three (73) are not only doing this work, which naturally has dropped off very considerably, but also recording all treatment, transportation and relief. In addition, thirty (30) of the seventy-three are engaged in bringing the pensions history cards up to date.

While the reorganization and the method of recording has undoubtedly reduced the number required, it has placed more responsibility on the individual clerk. In order to keep the records which are classified under many headings and to insure that the details are noted, it is absolutely necessary for clerks doing the work to be familiar with the regulations governing the work in hand.

PENSIONS RECORDS AND STATISTICS

The Pensions Section of the Records Division is engaged largely in examining B.P.C. documents for the purpose of recording a general history card for each pensioner.

The history card contains an historical record of the pension from the date of the award, and will show all the changes that have taken place in the pension up to the date of the last "proceedings" authorizing a change.

In addition to the pension record, it records events of a nature that will be of great value in compiling the vital statistics of pensioners, as the dates of birth, marriage and death of all pensioners are noted, together with that of those to whom allowances are being paid. The nature of the disability, as well as the percentage of disability due to service, is also recorded.

Under the administration of the B.P.C. this section was known as the Indemnity Branch, its original object being to obtain data of a vital nature for the use of

12 GEORGE V, A. 1922

the Imperial Government. When that object was attained, which involved the making up of approximately 122,000 cards, it was decided that the record of changes which the card was also designed to care for, should be completed and this work has been under way since.

The number of disability cases completed since April 1 is approximately 80,000; of this number additional information has been added to about 31,000 cards.

The staff at present employed on the work numbers thirty clerks. The cards when completed will provide a readily accessible source from which a mass of information may be obtained, as Hollerith cards can be punched from them, and tabulations made bearing on many cases of a statistical nature. They may also be used to determine the annual liability due on pensions account as well as the capitalized value.

Medical statistics of the disabilities for which pensions were awarded are being compiled by this section. A list of neuropsychiatric and neurological cases is under preparation, which will give the percentage of disability and nature of the disability under which the soldiers were awarded pensions.

In addition to the above work, the staff has been engaged for varying periods in the performance of other duties, namely: The sorting by provinces of transcripts of all active plates for use of the addressograph section, which were sent to the units to be checked against their files and records; the examination of approximately 3,000 suspended transcripts with the head office files; the checking of B.P.C. Forms 335, authorizing increase to pensioners residing outside of Canada; securing information for the Director of Records, Militia and Defence, as to deaths being due to service or not, and the verifying of the statements regarding pensioners who make application for positions in the Civil Service. The number of such applicants dealt with is about sixty (60) per day.

STORES DIVISION

The Stores Division encountered trouble early in the year owing to the difficulty of reconciling inventories with ledger records. This was due to the lack of men experienced in the taking of inventories and because there was not a standard method of describing articles. A remedy was found by adopting the system of room inventories, with an inventory card always available in each room, and by standardizing as far as possible the nomenclature used.

The closing of a large number of institutions during the year necessitated the transfer and disposal of a great deal of equipment. Adjustments have been made between the Department and institutions, in which the department was bound by agreement to supply equipment, and the department's responsibilities and commitments in this connection accurately defined and placed on a satisfactory basis. By carefully foreseeing present and future requirements and effectively using elsewhere equipment and supplies as they become surplus in various institutions, fresh outlays of moneys have been considerably curtailed. The whole system of supply has been placed on a sound basis so that the possibility of leakage and waste is reduced to a minimum.

1. The equipment section maintains ledgers on which are recorded the movements of all equipment in the department. These ledgers are subdivided under Standing Order Numbers, the entries showing cost price and a description of the equipment. On account of the varied and technical nature of certain equipment, it has been necessary to educate a number of ledger-keepers to handle the records of the technical branches. The ledgers are posted from audited returns received each month, on which are stated issues and receipts of equipment in the various hospitals, garages

SESSIONAL PAPER No. 14

offices, etc. When a requisition is received for equipment, it is checked with the equipment ledgers to ascertain the quantity on hand, and it is then checked with the Standard Table of Equipment. On the Standard Table of Equipment is shown the quantity of each article of equipment that should be necessary for a hospital of a definite patient strength.

Each month a Condemnation Board is required for each hospital that is administered by the department. On these boards is shown the quantity of equipment that has become unfit for further use. A comparison of the cost price of the equipment listed and the patient strength of the hospital, shows the equipment cost per patient month for each institution.

Complete inventories of all departmental equipment were taken on the 31st of March, 1921. These inventories included equipment in hospitals, garages, farms, laundries, vocational classes, vetercraft shops, administration offices, etc. The inventories were checked with the equipment records and lists of any deficiencies were forwarded to the unit and accounted for on Boards of Inquiry.

The records kept by the Equipment Section consist of statements of periodical issues; monthly statements of equipment movements during the interval; cost per patient month statements for all hospitals, and cost per car month statements for all garages.

Due to the closing of hospitals, vocational schools, etc., and the amalgamation of administration offices, considerable equipment became surplus to requirements. The surplus equipment from the hospitals included hospital furnishings such as beds, furniture, medical and dental instruments. X-ray equipment, electric massage and hydrotherapy equipment, sterilizing equipment, kitchen and engineering equipment such as steam tables, potato peelers, dish washers, urns, refrigerators, cooking ranges, ovens, incinerators, etc. The surplus equipment from the vocational classes was such as is usually required in trade schools and was of a technical nature including such equipment as: milling machines, shapers, planers, grinders, drilling machines, lathes, mortisers, band saws, shafting and belting, motors, transformers, recording instruments, surveying instruments, barkers' equipment, vulcanizing equipment, jewellers' equipment, tailoring equipment, sheet metal working machines, shoe-making machinery, farm machinery such as tractors, etc., telegraphy equipment, musical instruments, printing multigraph and mimeograph equipment, motor vehicles, and a large quantity of small tools, etc. This equipment was passed upon by appraisal boards consisting of three members, at least one of whom was in a position to supply detailed technical knowledge on the article being appraised, and the current market value was determined. Sales requisitions, covering this equipment, were passed to the Purchasing and Sales Division for disposal. When equipment that has been donated becomes surplus, it is returned to the donors. About \$30,000 worth has been turned back during the past year.

2. *Stores Section.*—Inventories of stores were taken quarterly throughout the year. Monthly returns are also submitted from each institution showing the food supplies on hand by which, together with monthly returns on stores received and issued, it is possible to maintain the supply of food stuffs in the units at a minimum. This has considerably reduced any wastage previously experienced. Formerly the supply of canned goods was purchased during the canning season. A further economy has been effected by placing a blanket order on vendors for a supply not to exceed a stated quantity each month. This has eliminated the storage of canned fruit which is always delivered fresh to the institutions when required.

12 GEORGE V, A. 1922

The amount of equipment on hand as on December 31, 1921, is as follows:—

General equipment.. . . .	\$1,956,944 46
Medeal equipment.. . . .	249,639 56
Dental equipment.. . . .	35,332 67

PURCHASING AND SALES DIVISION

PURCHASING SECTION

The purchasing of supplies and equipment, awarding of contracts for food supplies, laundry, funerals, etc., for all branches of the department, is done by the Chief Purchasing Agent, or under his direction by the unit purchasing agents. The duties of the purchasing agents also include the securing and checking of invoices covering purchases made and the passing of them to the accounts for payment.

The method adopted of calling for tenders, which is approved by the Purchasing Commission of Canada, provides for tender forms, including specifications of goods required, being forwarded to all manufacturers and wholesalers. Sealed tenders received by the department are opened in the office of the Chief Purchasing Agent in the presence of a representative of the Purchasing Commission of Canada, when the tenders are stamped, initialled, and prices scheduled for comparison. The prices, and samples (if necessary), are then examined by the Chief Purchasing Agent and contracts awarded.

Requirements of the department in the units are purchased by the unit purchasing agents on requisitions approved by the Unit Director of Administration, provided any one purchase (other than purchase of food supplies) does not exceed the sum of \$50, and copies of all such orders are mailed as issued to the Chief Purchasing Agent, Ottawa, for scrutiny. Regulations provide for requisitions exceeding this value to be submitted to the Chief Purchasing Agent, Ottawa, who either makes the purchase himself or authorizes the unit purchasing agent to do so, as the circumstances may warrant.

By this system, not only can quick and efficient service be given to all branches of the department, but all purchases exceeding the sum of \$50 are specially dealt with under the personal supervision of the Chief Purchasing Agent and the Purchasing Commission of Canada, and the Chief Purchasing Agent is kept continually informed of all purchases for smaller sums than this made for the department throughout the Dominion. This control of purchases by the Chief Purchasing Agent enables the

SESSIONAL PAPER No. 14

department to secure a uniformity of supplies throughout the country and it has made possible the standardization of a great part of the equipment and has enabled the department to purchase in larger quantities, thereby securing the goods at the lowest possible cost.

Special efforts have been made during the year to increase the volume of cash discounts, which have resulted in a saving being effected of over \$13,000. This has only been made possible through the efficient accounting and checking system of the department which enables accounts to be handled and paid promptly.

Not only has it been the aim of the department to purchase whenever possible goods of Canadian manufacture, but efforts have been made to import goods manufactured in Great Britain, in place of those articles not manufactured in Canada, which, on account of unsettled conditions in Europe, had previously been purchased in the United States. While these efforts have already met with considerable success, it is anticipated that the list of articles so purchased will be greatly augmented in the near future.

The total purchases for the year, which include equipment, stores, fuel and food supplies, amount to \$1,946,615.

SALES SECTION

The disposal of surplus equipment and supplies by sale or by transfer under P.C. 3017 to other departments of the Government is handled by sales officers under the direction of the Chief Purchasing Agent, Ottawa.

Order in Council, P.C. 3017, dated December 13, 1920, which made possible the transfer of surplus equipment and stores from the department to other Government departments without payment, enabled the department to dispose of its surplus quickly and economically.

During the year equipment and stores to the value of \$1,589,483 were disposed of, of which \$1,147,321.27 worth, or 72 per cent was transferred to other departments. The amount of cash realized on the sale of the balance was \$184,980, or 42 per cent of its cost value. The total recovery from disposal was \$1,332,301, or 84 per cent of the cost price.

Special efforts were made to arrange the transfer of such equipment to departments who were in immediate need of the particular goods or articles, and who would otherwise have had to purchase similar goods outside. Transfers so made to other Government departments since the passing of the Order in Council (P.C. 3017) are as follows:—

Public Works	\$ 53,067 10
Public Printing and Stationery	112,733 80
The Canadian Air Board	153,975 12
Interior	70,776 99
Royal Canadian Mounted Police	11,035 03
Justice	204,166 44
Indian Affairs	187,110 48
Mines	98,971 98
Militia and Defence	154,747 15

Railways and Canals	25,077 02
Customs and Inland Revenue	715 00
Labour	700 00
Other boards and departments	235 02

\$1,147,321 27

12 GEORGE V, A. 1922

ENGINEERING DIVISION

The Engineering Division, prior to March 31, 1921, functioned as a branch of the department with an organization consisting of head office administration and three district offices, each in charge of a superintendent. A resident superintendent in each unit was directly responsible to the district superintendent, who in turn was responsible to Head Office.

With the co-ordinating of the work of the various service branches of the department under the Director of Administration, the Engineering Division became responsible to that directorate, and a corresponding change was made in the units, the district offices being eliminated. The unit engineer formerly known as resident superintendent, is in charge of the engineering activities and is responsible to the Unit Director of Administration, who in turn is responsible to the Director of Administration through the General Superintendent at head office as far as work relating to the Engineering Division is concerned.

The Engineering Division is responsible for all accommodation in use by the department, the checking of accounts for rental, maintenance and repairs to buildings and equipment, fuel supply and fire protection. In June, 1921, the work formerly carried on by the General Division in connection with farms and gardens, mechanical transport and laundries, was transferred to the Engineering Division.

MECHANICAL ENGINEERING

All power plant work in connection with institutions under the jurisdiction of the department is under the direction of the Engineering Division. This work includes construction and maintenance of plant, the selection of fuel and supplies and the control of personnel.

The inspection and supervision of all mechanical and electrical services, water supply and fire protection are also undertaken by the Engineering Division.

In the purchase of fuel a departure from previous custom has been instituted in that fuel is now being purchased on specification on the basis of heating value and ash content. The specification provides for the acceptance of competitive tenders for supplying the fuel required at all institutions. Each tenderer is required to submit with his quotation an analysis of the coal he proposes to supply, and provision is made for the payment of bonuses, or the enforcement of penalties, as the coal supplied exceeds or falls below the standard established by the tenderer in his proposal. The large number of quotations received under this specification is a tribute to its impartiality and to the confidence of the contractors in the quality of their merchandise. Since the beginning of the present fiscal year over 30,000 tons of coal have been purchased in this manner and the resulting economies have more than justified the procedure.

Mechanical engineering as described above is carried out under the direction of the mechanical engineer, who is responsible to the general superintendent.

RENTS AND LEASES

The rentals in force in January, 1921, were \$421,846.02. Upon the amalgamation of the Board of Pension Commissioners for Canada with the Department of Soldiers' Civil Re-establishment, the leases entered into by the commission were transferred to the Department of Soldiers' Civil Re-establishment under the Engineering Division. The acquiring or vacating of accommodation for the use of the Department is arranged by the Department of Public Works, but all rent accounts are certified to by the Engineering Division, and passed to the Department of Public Works for payment.

SESSIONAL PAPER No. 14

The following statement indicates the rentals according to units for the calendar year, giving the number of leases disposed of, the number in force on December 31, 1921, with the amounts of same:—

Unit.	Rent in force January 1, 1921.	Rent vacated during year 1921.	Rent in force as at 31-12-21.	No. of leases in force 1-1-21.	No. leases disposed of during year 1921.	No. leases in force as at 31-12-21.
	\$ cts.	\$ cts.	\$ cts.			
A.....	66,894 21	50,443 46	16,450 75	13	11	2

I.....	49,924 00	6,022 00	43,902 00	16	5	11
J.....	61,964 28	42,810 00	19,154 28	26	16	10
	421,846 02	226,858 09	194,987 93	133	77	56

\$226,858 09—Total rents vacated during year 1921 in 77 leases.

\$194,987 93—Total rent in force as at 31st December, 1921, in 56 leases.

INSURANCE

The department carries insurance on various properties under lease, when such an obligation is a condition of the lease. The department also carries insurance on all its cars to provide for any liability imposed by law for damage on account of injuries to persons on public highways or to property. In the four years during which such insurance has been carried, net premiums of \$28,601 have been paid, and 200 claims have been settled, amounting to \$7,000 public liability and \$8,000 property damage.

The department also carries insurance on boilers in institutions under its control. This insurance is carried under one blanket policy.

FARMS AND GARDENS

During the year all farms operated for training purposes have been closed, and, with the exception of the farm at Riverglade operated to supply Jordan Memorial Sanatorium, the farming operations are confined generally to garden plots operated in connection with hospitals, by patients under the direction of a gardener. At the Psychopathic Hospitals at Westminster and Ste. Anne's, gardening operations have been carried out on a more extensive scale, on account of the benefit afforded by this work in the treatment of certain classes of patients. All produce grown is disposed of to the institutions at current market prices and credited to gardening operations.

LAUNDRIES

The operation of the department's laundries has resulted in a very definite saving. Not only has the cost per piece been considerably lower than where done under contract, but the life of the departmental linen has been considerably lengthened, and economies effected by having the repairs to it done in the laundry before re-issue.

In order to operate at full time, laundry is shipped from other departmental institutions if within reasonable express distance.

12 GEORGE V, A. 1922

These services are not available to all departmental institutions and in these cases contracts are let to outside laundries. A comparison of the pieces of laundry done during the past year, with the cost per piece, will indicate that the operation of the departmental laundries is an economical one. For the periods November 30, 1920, to October 31, 1921, 2,066,461 pieces were laundered in departmental laundries, at an average cost of 3.2 cents per piece. During the same period 713,030 pieces were laundered by contract at an average of 5.3 cents per piece. The number of pieces laundered for the year being a total of 2,779,491.

MECHANICAL TRANSPORT

On November 1, 1920, the General Division had control of mechanical transport in all units, with a total of 173 cars on strength.

On June 22, 1921, the Engineering Division took over the 102 cars on strength at that time. This total has been further reduced, leaving 58 cars on November 1, 1921.

During the year ending November 1, 1921, 184,507 hours service have been given at an average cost per hour of \$1.15, this includes gasoline, repairs, drivers' wages and tires.

A considerable reduction has been effected in the cost of operation of mechanical transport by the adoption of a policy permitting a small allowance for gasoline in lieu of mechanical transport to certain medical officers in the units who use their own cars on departmental business. A further saving has been effected in the cost of repairs and upkeep in the different units, by making it necessary that no expenditure exceeding \$25 for repairs, etc., be made in the units, without the authority of Head Office having been obtained.

All departmental vehicles are insured under a blanket policy from year to year.

Premium paid May 31, 1921.. . . .	\$6,837 00
Premium cancelled on account of withdrawal of cars from use.	3,714 07
	<hr/>
Net premium paid.. . . .	\$3,122 93
	<hr/>
Amount of claims paid by Insurance Co. from May 31 to December 31, 1921, approximately.. . . .	\$3,500

A complete set of records is kept on each and every vehicle, and on all tires and tubes, as well as a record of maintenance and repair costs, including gasoline, oil, grease, drivers' wages, and all supplies.

GENERAL SERVICES

Prior to March 31, 1921, all maintenance and repairs to the departmental institutions were undertaken by the Engineering Branch. This arrangement was modified on April 1, 1921, in that as far as minor repairs and alterations were concerned, they were to be carried out by the Engineering Division, although all major work was referred to the Department of Public Works. This work, in practically all cases, has been let by contract with the concurrence of the Engineering Division which has exercised careful check on it during its progress.

During the year ending November 30, 1921, 1,394 work orders in the amount of \$212,841.69 were authorized and completed. Since April 1, 1921, when the new arrangement prevailed, to October 31, 1921, (7 months) 746 work orders have been authorized at an expenditure of \$42,394.45.

A number of institutions have been closed during the past year, thereby materially reducing the expenditure for maintenance and repairs. The expenditure incurred by the Department of Public Works for major repairs since April 1, 1921, is not available. That department's appropriation for the fiscal year is \$175,000, and the proportionate amount expended to date is well within the appropriation.

SESSIONAL PAPER No. 14

CENTRAL REGISTRY

The report of Central Registry for 1921 is necessarily shown in two periods, the first from January 1 till June 30, for which record of S.C.R. files is shown; and from July 1 to December 31, for which record of both S.C.R. and B.P.C. files is shown.

It will be noted that the amount of work and the number of staff decreased from January owing to the decrease in the general activities of the department. With the commencement of combining the S.C.R. and B.P.C. files in July, the work and staff naturally increased very suddenly, forty-five extra clerks being used at night on combining. As the result of combining of the files, although the volume of departmental work remains about the same, the number of files issued from Central Registry has been reduced by nearly fifty per cent. The number of staff shows a substantial decrease and in spite of the fact that the extra work of combining, making cross references, etc., is not completed, this work, as well as the routine work, is now being carried on with a number equal to the total of the two separate Central Registries staff. It is anticipated that all details of the combining of the two Central Registries will be completed by March 31, 1922, when a total staff of about one hundred and twenty-five should be sufficient to operate Central Registry effectively. This will be roughly sixty per cent of the number of people required to staff both Central Registries when operating under separate roofs.

12 GEORGE V, A. 1922

ACCOUNTS AND AUDIT BRANCH

The Accounts and Audit Branch is charged with making all authorized expenditures of the department. It is responsible for and controls all cash transactions and their proper accounting and auditing in all branches and divisions of the department.

The principal functions may therefore be outlined as follows:—

- (a) The supervision of all departmental expenditures and receipts.
- (b) The disbursement and receipt of monies.
- (c) The accounting and classification of expenditures and receipts.
- (d) The payment of and accounting for pensions, authorized by the Board of Pension Commissioners for Canada.
- (e) The issue of warrants for railway and other forms of transportation and the proper accounting thereof.
- (f) The auditing of all expenditures and receipts.
- (g) The auditing of the accounting records of provincial and public institutions in which patients of the department are treated.

These functions involve the payment of pay and allowances and of pensions to or in respect of former members of the forces, Canadian, Imperial, Allied; and of long service pensions to former members of the active militia. Financial transactions in connection with the treatment, training and re-establishment of ex-members of the forces, are dealt with and accounted for by the branch daily.

The branch is organized into five divisions and a special section as follows:—

- (a) General Accounts Division.
- (b) Audit Division.
- (c) Statistics Division.
- (d) Pension Pay Division.
- (e) Pension Accounts Division.
- (f) Transportation Section.

During the first two months of the year, the district offices of the Board of Pension Commissioners for Canada were amalgamated with and absorbed by the unit offices of the department. All local disbursements, payment of salaries, and accounting for the district offices, and the accounting of the Pension Administration Fund on behalf of the Board of Pension Commissioners, were placed in charge of the unit accountants concerned.

In May and June, the disbursement and accounting organization of the Board of Pension Commissioners charged with the payment of pensions, the payment of the operating expenses of the board and the accounting for such payments, was placed under the direction of the Supervisor of Expenditures.

Since this amalgamation, considerable re-organization of staff and operating methods has been effected, resulting in a saving of personnel and effort. The pooling of experience, mechanical and staff facilities, and the best methods and systems developed by both organizations has led to increased efficiency without in any way sacrificing service to the returned soldier or pensioner.

The billing and recovery from foreign Governments for services rendered in connection with the treatment, training, payment of pensions and general re-establishment of former foreign soldiers has become of ever-increasing importance. Far more detail is involved in keeping records for these foreign governments than is the case for ex-members of the Canadian Forces, as practically all the governments concerned require and demand the most precise and complete facts in connection with each case. A special section of the Accounts Division at Head Office deals solely with this matter.

SESSIONAL PAPER No. 14

Early in the year, the Government inaugurated a scheme of granting relief to unemployed ex-members of the forces. This scheme was put into effect by the department with little or no increase in staff. This branch dealt with tens of thousands of extra accounts during the first four months of the year.

The following statement visualizes what has been dealt with by the branch:—

Items.	Months.			
	April, 1919. (a)	March, 1920. (b)	Sept., 1920. (c)	Oct., 1921. (d)
Number of staff.....	3,891	9,035	6,629	4,836 (e)
Total salaries paid.....	\$361,036.00	\$890,767.25	\$686,171.14	\$486,812.45 (f)
Number of patients.....	5,643	6,860	4,756	4,778
Treatment P. and A.....	\$329,265.30	\$740,811.12	\$247,419.46	\$305,231.61
Number of students.....	6,096	25,673	8,290	675

(a) Figures for April, 1919, reflect the first effects of return to Canada and demobilization of Canadian Expeditionary Force.

(b) In March, 1920, the work and activities of the department were at the peak, particularly vocational training.

(c) September, 1920, shows that vocational training was dropping off rapidly and the department was approaching more stable conditions.

(d) October, 1921, shows the department running on more normal lines with a tendency to increased activities due to the increase of patients, sickness of pensioners and unemployment conditions.

(e) Includes staff of 497 taken over in June, 1921, from Board of Pension Commissioners for Canada.

(f) Salary for October, 1921, includes \$34,910.77 paid to the former staff of the B.P.C.

(g) Cheques issued in October, 1921, include 68328 on account of Canadian pensions; 9395 on account of Imperial pensions; and 27635 on account of S.C.R. payments.

(h) Statistics of pensions and amount of pensions paid in March, 1919, March, 1920, and October, 1920, cover period under the jurisdiction of the Board of Pension Commissioners for Canada.

(i) The large amount of pensions paid in October 1920, reflect the heavy final payments by agreement authorized by Parliament in session of 1920.

It may be noted that in addition to the payments made personally to staff, patients, students and pensioners and dependents of the latter three classes, detailed records are kept of some 11,000 real and personal accounts.

The accounting system of the department is a double entry one which interlocks with the financial system of the Dominion. It is co-ordinated with a detailed cost accounting system in the Orthopædic and Surgical Appliances Branch designed to show production costs, and with subsidiary systems designed to record stores transactions, sanatoria and hospital costs, and other essential operating cost information. Expenditures and receipts are analyzed into over 250 accounts called standing order numbers, applicable to some 300 offices and institutions operated by or rendering services to the department. The system provides for financial statistics as well as financial statements and reports. The accounting system is put into effect by the Accounts, Audit and Statistics Divisions, whose organization and functions are outlined hereafter.

12 GEORGE V, A. 1922

THE GENERAL ACCOUNTS DIVISION

The Accounts Division comprises a unit accounting staff under a unit accountant in each of the principal cities of the Dominion and a similar staff for the Head Office unit. The unit accountant is responsible through the Unit Director of Administration to the Chief of the Division at Head Office. The work of the accounting staff includes the following:—

(1) The examination, recording and classification of all expenditure vouchers, which have been certified or approved by a responsible officer of the department.

(2) The preparation of pay-lists supporting payments to staff, patients and students of the department.

(3) The issue of cheques on a unit letter of credit, established in the Bank of Montreal, at Ottawa, in payment of all expenditure vouchers, including pay-lists, which have been passed by the unit auditor. Every effort is directed to make prompt payment of invoices in order to obtain the discounts offered. The amount thus earned during the year was \$12,731.19.

(4) The listing and classification of all expenditures on an invoice (voucher) register.

(5) The listing of all cheques issued on the unit letter of credit on daily and monthly reports for transmission to Head Office for the information of the Finance Department and of the Auditor General.

(6) The preparation and submission to Head Office of detailed data for the collection of accounts receivable from foreign Governments and other debtors of the department.

(7) The keeping of adequate books and records of account:—

(a) Staff, Patient and Student Ledgers.

(b) Purchase (Vendors) Ledgers.

(c) Loans Ledgers (Loans under P.C. 2329 of 1919).

(d) Petty Cash Book and Ledger.

(e) Administration Fund Ledger (Dependent Pensioners).

(f) Postage Records.

(g) Stores, Equipment and Surplus Stores Ledgers.

(8) The collection, receipt and deposit to the credit of the Receiver General of all incoming moneys and funds derived from the various activities of the department.

(9) The listing and classification of all such receipts and refunds on a refund register.

(10) The journalizing of all financial transactions and adjustments, not involving the disbursement or receipt of cash, such as stores' transfers and issues, consumption of supplies, manufacturing operations, distribution of expense, and so forth.

(11) The periodical balancing of all books and records of disbursements and receipts.

(12) The operation of a stores and equipment accounting system designed to produce a perpetual inventory of stores, equipment and surplus stores; and the submission of periodical money value reports in connection therewith.

(13) The collection and compilation of financial and other data from which financial reports and statements may be prepared at Head Office.

(14) The submission of periodical and special reports on the units' operations.

(15) The collection and transmission to the Director of Insurance at Head Office of application and renewal premiums on account of the "Returned Soldiers' Insurance" scheme.

SESSIONAL PAPER No. 14

HEAD OFFICE ACCOUNTS DIVISION

At Head Office, a section of the Accounts Division performs duties exactly the same as those in a unit office. This section deals with all expenditures incurred outside of Canada and makes payment of all foreign accounts, pay and allowances in the United States of America, and expenses on account of care, treatment and maintenance of both Canadian and Imperial ex-soldiers in the United States of America, and also deals with all expenditures incurred by or in respect of the Board of Pension Commissioners for Canada since the beginning of June, 1921. It is also responsible for 647 War Service Gratuity accounts, the balance of 2,700 transferred by the Department of Militia and Defence on account of men discharged direct by that department to this department. The Voucher Section handles and files all paid vouchers and reports submitted by the units and transmits the original copies of such paid vouchers to the Auditor General. The Accounts Receivable Section receives from all unit and disbursing offices reports and vouchers for services rendered foreign Governments, Provincial and Dominion departments, outside organizations, private firms and individuals. The section maintains general accounts and keeps records in respect of more than 10,000 individuals treated, cared for and maintained. It also deals with the billing of and collection from foreign Governments for the cost of medical examinations performed in connection with the award of pensions. The Book-keeping Section receives and records all unit and Head Office documents reporting disbursements and receipts, and other financial transactions. These reports, which include invoice registers, refund registers and journal vouchers, are bound into permanent form, thus becoming the books of original entry for the department; these records are equivalent to the customary cash book, journal, sales book, purchase journal, and so forth of a private organization. This section maintains the General and Appropriation Ledgers of the department, which are balanced at the end of every month. The detailed postings for these books are obtained from the Statistics Division. This section is also responsible for maintaining constant and close relations with both the Finance Department and the Auditor General. It submits monthly returns of expenditures and receipts to both.

The volume of detail handled by the Accounts Division, both in the units and at Head Office, is illustrated by the following facts and figures:—

- (1) 236,763 vouchers were dealt with and listed on the invoice registers; copies were filed in the units and at Head Office, and the originals passed to the Auditor General; over 130,000 of these vouchers originated with "Relief" scheme transactions.
- (2) 499,973 cheques were issued by the units and Head Office in payment of the above-mentioned vouchers; 77,297 being in payment of "Relief" scheme claims.
- (3) 8,645 invoice registers were created to record the cash transactions enumerated above.
- (4) 10,245 cash refund transactions were recorded and reported in turn to Head Office, to the Finance Department, and to the Auditor General.
- (5) 19,668 journal vouchers were issued reporting over 100,000 transactions and adjustments requiring to be journalized at Head Office.

This division submits three times a month a statement of expenditures from the various appropriations operated by the department, and within three weeks after the close of the month is able to submit a complete trial balance of the general ledger covering entries made and reported by the units to the end of that month.

12 GEORGE V, A. 1922

STATISTICS DIVISION

The distinctive feature of the department's system of accounting is the mechanical method of transcribing and compiling the details and figures reported by the staffs at the units and head office engaged in making disbursements and the accounting of same.

The Statistics Division is responsible for punching, on specially designed Hollerith cards, the accounting details for every transaction reported on the various documents of original entry—invoice registers, refund registers, journal vouchers. The operation of punching a card is equivalent to making an entry in a journal, cash book or other book of original entry. Instead of posting these items to subsidiary and control ledgers, the cards are automatically sorted, in a machine called the "Sorter," according to offices and institutions and standing order numbers—real or nominal accounts—to be charged or credited. The totals chargeable and to be credited to an office or institution, and to each standing order number applicable thereto are then accumulated on another machine called the "Tabulator." Control account totals by units are posted to the General Ledger of the department. Subsidiary and sub-totals, subdivided in a variety of ways, depending upon circumstances, are posted to current financial statements and cost reports. Cards are self-balanced periodically, and once a month are balanced with the cash expenditure and the receipt totals. This latter balance is practically a trial balance of the General Ledger of the department. About 400,000 cards were created during the past year to record the accounting data. These cards were handled on an average of eight times apiece. The operations of sorting and tabulating are analogous to posting a ledger, footing the debit and credit columns, and taking off balances of the ledger accounts.

The Statistics Division also collects, analyzes and summarizes other classes of statistical records. Its mechanical equipment serves to dissect and accumulate statistics relating to staff, patients, students, unemployment relief and medical facts. Over 200,000 cards have been created and put through the machines to provide for these classes of information.

AUDIT DIVISION

Though the accounting system in vogue is adequate, complete and self-balancing, and provides for certain essential checks, experience has demonstrated that a detailed local and internal check of all transactions and records must take place immediately after the record is made, and preferably in the same place or as near as possible where the transaction has occurred and the record is kept.

To provide for closer supervision and scrutiny over expenditures and receipts and to obtain independent financial reports from officers not directly interested in the spending and accounting of departmental funds, an Audit Division under a Chief Auditor was organized late in 1919.

The Chief Auditor at Head Office is responsible to the Supervisor of Expenditures. Under his direction, a unit auditor and necessary staff is stationed at each unit. These auditors are and have the status of Head Office officials, thus making them independent of the unit administration staff.

The duties of the Audit Division, as separate from the Accounts Division, may be briefly outlined as follows:—

1. The pre-audit, before payment is made, of all expenditure vouchers and other claims upon public funds. The authority for incurring the expenditure, the approval for payment and the details of the claims are subject to careful scrutiny.

2. The verification and pre-audit of all staff salary and pay and allowance pay-lists, and of all individual ledger accounts kept for patients undergoing treatment, students in training and members of the staff.

3. The scrutiny of all cheques drawn on the letter of credit, administration and contingency accounts in payment of the above-mentioned items before their release to the payees.

SESSIONAL PAPER No. 14

4. The checking and verification of the distribution and classification of the expenditures listed on the invoice (voucher) registers.

5. The verification of all petty cash, contingency and imprest funds administered in each unit.

6. The verification and audit of all loans' ledger accounts maintained in connection with loans granted under the authority of P.C. 2329 of 1919.

7. The audit of the purchase ledger; *i.e.*, the accounts kept with creditors of the department, other than staff, students and patients.

8. The audit of the "Pension Administration Fund" ledger containing the accounts of the moneys held in trust for orphans and other dependent pensioners held incapable of managing their pension income. The fund is administered by officers of the department on behalf of the Board of Pension Commissioners for Canada.

9. The continuous daily check of Returned Soldiers' Insurance application and renewal premiums.

10. The audit of the accounting records of the Orthopædic and Surgical Appliances Branch.

11. The audit and verification of all cash receipts and refunds, with particular reference to their sources, and their classification and distribution on the refund registers.

12. Independent test inventories of stores, equipment and surplus stores on hand.

13. The checking of all journal vouchers.

14. Verification and audit of all special claims and vouchers paid at Head Office only. These vouchers relate to coal contracts, large capital expenditures, payments by foreign drafts, transportation accounts for patients, students, staff, and freight and express.

15. The making of special investigations and the submission of reports, either from the units or at outside points, under instructions from the Supervisor of Expenditures. These investigations comprise complete detailed verification and audit of the books and accounting records of outside institutions doing business with and rendering service to the department. The auditor's instructions usually call for a detailed examination of the system of ascertaining cost, and frequently for reports upon the methods of administration and so forth.

The following institutions have been investigated and reported upon in this respect:—

Nova Scotia Sanatorium, Kentville, N.S.

Queen Alexandra Sanatorium, Byron, Ont. —

Mountain Sanatorium, Hamilton, Ont.

Manitoba Sanatorium, Ninette, Man.

Saskatchewan Sanatorium, Fort Qu'Appelle, Sask.

Tranquille Sanatorium, Tranquille, B.C.

Royal Inland Hospital, Kamloops, B.C.

Based upon the reports submitted and daily patient day costs ascertained by the auditor, payments are made by the department for the care and maintenance of its patients in outside institutions. Periodical adjustments are also arrived at on a similar basis.

16. Monthly audit of all books and accounts of canteens operated in departmental institutions.

17. The systematic monthly audit of the "Disablement Fund." The unit auditor submits a certified statement as to the bank and book balances to the assistant deputy minister at Head Office.

At the request of local administrative officers, the Audit Division has been called on during the year to make an audit and survey of the standing of a business into which returned soldiers jointly or separately have put the tools and equipment purchased by the department on a loans agreement. In such cases direction and

12 GEORGE V, A. 1922

guidance has been furnished, preventing loss and possible failure, while at the same time also affording protection to public funds being disbursed as loans by the department.

Unit auditors are called upon to render to Head Office a monthly summarized report of the work of their respective units. This report deals with the details and the volume of the work handled during the month by both the Accounts and Audit staffs.

The attention of executives at Head Office is directed to such items of expenditure or procedure as the unit auditor thinks worthy of special mention. The unit auditor is also called upon to make suggestions and recommendations for the furtherance of the department's interests, protection and efficiency.

The system of local and independent administrative check of all records, reports and books of account, has afforded a maximum of protection to the public funds while at the same time it has paved the way for the prompt payment of accounts and pay and allowances.

Furthermore, immediate and accurate reports have been available for the guidance and information of the officials at Head Office and for the Government departments concerned with the fiscal operations of the department.

TRANSPORTATION SECTION

The Transportation Section, organized in April, 1919, was transferred by the Administration to the Accounts and Audit Branch in June, 1921. In May, 1921, the transportation records of the Board of Pension Commissioners for Canada were handed over to, and their duties in this respect assumed by this section.

The duties of the section may be outlined as follows:—

1. The checking of used transportation, freight and express, and half-fare warrants as to mileage, weight, tonnage, extensions, etc.; and the certification for payment of railway and transportation companies' accounts for same.
2. The compilation of monthly statements showing cost of transportation furnished ex-members of forces to be collected from foreign Governments.
3. The custody and issue of transportation warrant books to unit and individual officials.
4. Verifying authority for and correctness of all shipments covered by freight and express warrants; checking freight and express used warrants and transportation companies' accounts for same with the official tariffs.
5. Correspondence with railway and transportation companies on all relative subjects, accounts, corrections, return of unused tickets, warrants and so forth.
6. The compilation of various monthly statements and reports such as:—
 - (a) Current liability to transportation companies.
 - (b) Amounts paid to the companies for various classes of transportation.
 - (c) Distribution of transportation costs by units (*i.e.*, Provinces of the Dominion).
 - (d) Unit costs of transportation for information of the Unit Director of Administration and Unit Medical Director.

PASSENGER TRANSPORTATION

During the year, 60,150 passenger transportation warrants have been issued. The transportation companies have presented accounts supported by the original copies of the used warrants, which after checking, etc., have been paid, involving an expenditure of \$409,666.63, distributed as follows:—

Canadian National Railways.....	\$228,262 55
Canadian Pacific Railway.....	158,369 32
Sundry railways.....	23,034 76
	<hr/>
	\$409,666 63

The distribution of this expenditure by provinces and services is shown in the accompanying statement:—

12 GEORGE V, A. 1922

The undermentioned amounts have been expended for transportation of soldiers and pensioners of various Allied Governments and other Government departments. These charges have now been recovered or are being collected from the following:—

GOVERNMENT		DEPARTMENT	
Imperial	\$10,625 56	Department of Indian Affairs. . . \$	5 76
Newfoundland	1,131 06	Royal Canadian Mounted Police. . .	24 54
Australian	569 10	Provincial Governments.	52 02
American	823 77	Militia and Defence.	155 23
French	392 73	Disabled Seamen's Fund	140 00
Belgian	5 76	Disablement Fund.	76 67
Imperial Pensions	11,101 24		
Newfoundland Pensions	144 71		\$ 454 22
Australian Pensions.	25 23	Forward.	24,823 06
New Zealand Pensions.	3 90		
	<u>\$24,823 06</u>	Total.	<u>\$25,277 28</u>

The total amount collected from Allied Governments and other departments for transportation of soldiers and pensioners during the year was \$10,842.81.

Unused tickets amounting to \$4,832.14 were returned to this office. These were submitted to the railroad companies for refund, and after cheque was received, value of same credited to the unit against which they were charged.

The amount of \$1,482.19 was collected and credited to different warrants which were misused or issued on repayment.

There are still outstanding approximately 12,950 transportation warrants that were issued in the past year. Bills covering charges on these have not, as yet, been presented by the railroad companies for payment. A large percentage of these warrants are for transportation over the Canadian National Railways.

FREIGHT AND EXPRESS WARRANTS

During the year, 5,300 freight and express warrants were issued.

The total charges on freight and express warrants paid during the past year were \$88,295.77, distributed as follows:—

Canadian National Railways.	\$20,811 18
Canadian Pacific Railway.	28,672 66
Canadian Express	8,521 27
Dominion Express.	20,677 61
Canadian National Express.	8,499 61
Sundries.	1,113 44
Total.	<u>\$88,295 77</u>

Each item on these freight and express warrants was classified and the rates checked according to the official freight and express tariffs.

The expenditure of all units for freight and express during the year was distributed as follows:—

Unit	Province	Amount
"A"	Quebec.	\$31,385 23
"B"	Nova Scotia and Prince Edward Island.	3,286 48
"C"	Eastern Ontario.	999 49
"D"	Central Ontario.	1,478 44
"E"	Western Ontario.	7,563 57
"G"	Manitoba.	3,657 56
"H"	Saskatchewan.	2,938 47
"I"	Alberta.	7,804 09
"J"	British Columbia.	6,779 19
"K"	New Brunswick.	4,676 72
"L"	Yukon.	17 80
"U"	United States.	14 90
H.O.	Ottawa (whole Department).	7,693 83
Total.		<u>\$88,295 77</u>

SESSIONAL PAPER No. 14

HALF-FARE CERTIFICATES—FORM 163

Half-fare certificates were obtained by the units direct from the Canadian Passenger Association, Montreal, during the year. The duplicate copies of these were forwarded to Head Office on an appropriate return at the end of each month.

The total cost of transportation to date is reflected in the following:—

Cost of transportation from April, 1919, to December, 1920..	\$ 732,344 30
Cost of transportation from December, 1920, to December, 1921..	409,666 63
Cost of freight and express from April, 1919, to December, 1920..	122,995 05
Cost of freight and express from December, 1920, to December, 1921..	88,295 77
Total..	<u>\$1,353,301 75</u>

PENSIONS PAY DIVISION

The functions of the Pensions Pay Division include the payment and individual accounting of Canadian, Militia Long Service and New Zealand pensions, and British, French and Italian supplementary pensions. At the time of preparation of this report there are a total of 66,817 pensions in force, with an estimated annual liability of \$30,480,351.35, chargeable to the European War. In addition, 663 pensions are in force payable on account of Fenian Raid, Rebellion of 1885, and Militia Long Service.

Canadian pensioners resident in Canada and the United States of America..	58,117
Canadian pensioners resident in British Isles and other foreign countries..	8,617
New Zealand pensioners resident in Canada..	31
Italian pensioners resident in Canada whose pensions are being supplemented to Canadian rates in accordance with the Pension Act, on the pre-war residence clause..	2
French and Belgian supplementary pensioners..	50
	<u>66,817</u>
1885, Militia Long Service and Fenian Raid..	663

The work of the division is carried on by three sections respectively, the Ledger, Addressograph and Mechanical, and Abstract and Mailing Sections. The payment and accounting of a pension follows directly upon the official decision and award of the Board of Pension Commissioners for Canada. In the Ledger Section the essential details of the Board's decisions are posted to ledger cards which provide for complete records of the pension payments. In the Addressograph and Mechanical Section, the decisions of the Board are given effect to by cutting stencils in a "Graphotype" machine, showing the pensioners' names, numbers, addresses and monthly amounts of pension. In both sections, changes, adjustments, increases, decreases in the amounts of pension, and changes of address are reflected both on the ledger card and in the stencil in a similar manner.

The Ledger Section is responsible for computing and checking the amounts of adjustments and back pensions, as well as the monthly amount payable. This section is also responsible for the temporary suspension and resumption of pension payments to pensioners undergoing vocational training, for suspensions due to failure of pensioner to report for medical re-examination, for failure to locate pensioner, for improper conduct, and for other authorized reasons. This section carries on a voluminous correspondence with pensioners and their dependents on every conceivable phase of pension payments. Over 3,500 pensioners' files are dealt with by the section in the course of a week.

12 GEORGE V, A. 1922

About the twentieth of each month the ledger card entry of the month's pension is checked to the corresponding stencil; that is, the current month's payment is authorized. The stencils are then placed in an "Addressograph" machine, which automatically prints the essential details of the payee, the amount and the consecutive number on the pension cheque.

The printed pension cheque and the corresponding ledger card are then passed to another machine called an "Audit machine." Here the operator checks the amount of pension with the amount authorized on the ledger card. The same machine stamps one signature on the cheque while at the same time printing the consecutive number of the cheque on the ledger card opposite the month and the amount of payment authorized. Another operator checks the number posted on the card with the number on the cheque. Other essential group operation checks have been developed and are employed in the routine handling of all stencils, cheques and ledger cards.

The Abstract and Mailing Section prepares and issues cheques for the amounts of adjustments and back pensions which cannot be taken care of by the mechanical system of the division. This section lists all cheques issued on "Abstracts," totalling same for the posting of the Appropriation Ledgers, and for transmission to the Finance Department and the Auditor General. It is responsible for the addressing, if necessary, and the mailing of all pension cheques. The tracing through the post office of misdirected or lost cheques is one of its most important duties.

During the year 6,930 cheques were returned by the post office due to wrong addresses, missing pensioners, failure to locate pensioners, and so forth; the majority of these returned cheques were eventually re-mailed to their proper destinations.

During the past year 916,216 pension cheques were issued and transmitted to Canadians and other pensioners, made up as follows:—

Canadian pensioners resident in American Continent	735,789
Canadian pensioners resident in England and other countries . .	113,391
Adjustments	67,036

The Addressograph and Mechanical Section cuts stencils and prints cheques for the payment of Imperial pensions in Canada and the United States of America on behalf of the Imperial Pension Office. During the year 145,712 cheques were printed in this respect. This section also prints renewal premium and receipt notices for the Director of Insurance. The Mechanical Section has charge of 22 electrically-driven machines, which, in addition to providing for the cutting of stencils, the numbering and signing of pension cheques, the checking and posting of ledger cards, binds cheque copies, franks and seals envelopes and performs other mechanical operations.

In September of the current year, an amendment to the Pension Act, providing for the awarding and payment of 50 per cent bonus to pensioners residing outside of Canada, instead of 20 per cent which was the figure prior to that date, was put into effect by this Division resulting in over 4,200 adjustments and increases.

In accordance with another amendment to the Pension Act, providing for the payment, at the option of the pensioner of a final lump sum to pensioners enjoying a pension based on 14 per cent disability or less, in lieu of periodical monthly or semi-annual payments; up to the 31st December, 1921, 22,351 final payments by agreement were made involving the sum of \$9,210,312.96.

PENSIONS ACCOUNTS DIVISION

The Pensions Accounts Division, formerly the Accounts Branch of the Board of Pension Commissioners for Canada, transferred its duties with respect to the payment and accounting for District Office expenditures to the unit staffs of the General Accounts Division during the months of January and February of this year; and with respect to Head Office payment of salaries and operating expenses of the Board, to the Head Office Accounts Division in June and July.

SESSIONAL PAPER No. 14

The division is now responsible for:—

1. The classification and accounting of total pension expenditures under the various appropriations voted by Parliament.
2. The preparation and submission to both the Finance Department and the Auditor General of appropriate pension expenditure returns.
3. The receipt and accounting of refunds and recoveries of pension expenditures.
4. The auditing, on behalf of the Board of Pension Commissioners for Canada, of the Pensions Administration Fund operated by the Unit Accounting staffs of the department.
5. The compilation of financial statistics respecting pensions and pensioners.
6. The preparation of estimates of pension expenditure for submission to Parliament.

EXPENDITURE DETAILS

The pension expenditures chargeable to the "European War Pensions," appropriations during the year ending December 31, 1921, were grouped as follows:—

European War Pensions—

"A"—Pensions and gratuities.. . . .	\$31,533,422 98
"B"—Final payment by agreement.. . . .	3,287,011 28
"C"—Supplementary Imperial.. . . .	74,218 13
"D"—Supplementary French and Belgian.. . . .	32,424 19
"E"—Supplementary Italian	2,295 89
"F"—Miscellaneous.. . . .	8,396 02
"G"—Burial grants.. . . .	9,997 74
"H"—Decoration awards.. . . .	14,322 33
	<hr/>
	\$34,962,088 56

"A"—Pensions and gratuities expenditure represents the total amount paid in monthly pensions; also cash gratuities paid to pensioners with a disability of less than 5 per cent.

"B"—Final payment by agreement—On the 1st of September, 1920, Parliament authorized an additional paragraph as a foot note to schedule "A" of the Pension Act, 1919, giving pensioners in receipt of disability pension between five and nine per cent (5 and 9%) the privilege of accepting a lump sum as final payment, but such sum was not to exceed \$300; in cases of disability between ten and fourteen per cent (10 and 14%) the sum was not to exceed \$600. In both cases the amount awarded must be determined in accordance with the extent of the disability and its probable duration. If a married pensioner desires to accept final payment, the consent of his wife, also must be secured.

"C"—Supplementary Imperial expenditure is the provision for the supplementing of pensions, to equal Canadian rates, to warrant officers and higher ranks of the Imperial Forces who were pre-war residents in Canada; and to the dependents of such officers, during the continuance of their residence in Canada. Imperial pensions to such pre-war resident ex-officers are not as large as the corresponding Canadian pensions.

"D," "E" and "F"—Supplementary French, Belgian and Italian expenditures cover the supplementing of pensions paid to dependents of all ranks of the forces of His Majesty's Allies, to equal Canadian rates. These payments are made out of Canadian funds, provided such pensioners were pre-war residents of Canada; and during their continuance of residence in Canada.

"F"—Miscellaneous—This represents expenditure on account of New Zealand pensioners, who are resident in Canada. Such expenditure is recoverable from the New Zealand Government.

12 GEORGE V, A. 1922

"G"—Burial Grant—When a pensioner, on account of his disability, has died, and his estate is not sufficient to pay the expenses of his last sickness and burial, the department may pay such expenses, or a portion thereof, but the payment in any such case shall not exceed one hundred dollars (\$100). From January 1, 1921, to December 31, 1921, assistance was given in one hundred and nine (109) cases.

"H"—Decoration Awards Expenditure—represents payments made to Canadian soldiers who have been awarded the Victoria Cross, Distinguished Conduct Medal or Military Cross for gallantry on the field, and is purely an Imperial award; the amount expended on account of same is recoverable from the Imperial Government.

1901 Pension Act—Expenditure—January 1, 1921, to December 31, 1921—\$432,997.42.

The above pensions numbering 553 are awarded by the Pensions and Claims Board, Department of Militia and Defence, and are paid in accordance with Militia Pensions Act of 1901, to members of the Permanent Force, as a Long Service pension.

North West Rebellion, 1885 and General—Expenditure—January 1, 1921, to December 31, 1921—\$31,145.33.

The above pensions numbering 109 are payable on account of disabilities incurred in the Northwest Rebellion of 1885; and to the dependents of those killed.

Fenian Raid—Expenditure—January 1, 1921, to December 31, 1921—\$753.75.

One pension only is being paid for a disability incurred in the Fenian Raid of 1866.

The following comparative table shows pension expenditure for the past fiscal periods:—

Fiscal Year Ending March 31	European War Pensions	1901 Pensions Act	1885 and General	Fenian Raid
1917.. . . .	\$ 1,791,566 50	\$ 46,347 87	\$19,613 21	\$1,467 80
1918.. . . .	7,402,253 53	80,463 19	17,551 60	1,170 25
1919.. . . .	16,752,235 48	127,186 74	18,682 55	1,280 25
1920.. . . .	24,045,030 36	219,590 32	17,996 58	720 91
1921.. . . .	36,820,534 18	388,264 16	23,391 85	514 25
	<u>\$86,811,620 05</u>	<u>\$861,852 28</u>	<u>\$97,235 79</u>	<u>\$5,153 46</u>

Pension expenditures since the 1st of April, 1921, are detailed in Statement No. 4 at the end of this report.

All cheques in payment of pensions are issued monthly in arrears, from Head Office, Ottawa, in Canadian currency, no matter in which country the pensioner may reside:

Pensioners, as may be seen from the undernoted list, are scattered all over the Globe:—

In the United States.. . . .	4,200 (approximately)
In the British Isles.. . . .	8,000 "
In other countries (as under).. . . .	700 "

Argentina,	Australia,	Belgium,
Brazil,	British Guiana,	British East Africa,
British West Indies,	Bahama Islands,	Bulgaria,
Ceylon,	Channel Islands,	China,
Cuba,	Denmark,	Egypt,
Finland,	France,	Greece,
Hawaiian Islands,	Holland,	Iceland,
India,	Italy,	Japan,
Malta,	Mauritius,	Roumania,
Canary Islands,	Latvia,	Netherlands,
Central America,	Norway,	Montenegro,
Newfoundland,	New Zealand,	Poland,
Russia,	Serbia,	Sicily,
Straits Settlements,	Spain,	Switzerland,
South Africa,	Sweden,	Turkey.

SESSIONAL PAPER No. 14

PENSIONS ADMINISTRATION FUND

It might be interesting to note that unit directors of administration and unit accountants are being utilized as a medium for the administration of pensions on behalf of orphans and children whose parents are for any reason whatsoever unable to properly maintain and care for them. There are three hundred and forty-five (345) such accounts, and the annual amount under administration is \$216,960.

Soldiers' Aid Commission.—Besides such accounts as are administreed as above, the Soldiers' Aid Commission of Ontario, acting under Bill No. 224 passed by the Provincial Government, is authorized to act as guardian or administrator on behalf of orphan children, and is at present looking after the interests of two hundred and fifty-one (251) children receiving pensions, except in those cases where satisfactory legal guardians have already been appointed.

Post Office Savings Bank Accounts.—Another interesting feature in regard to the fund is the handling of pensions for orphan children. The Board of Pension Commissioners are acting as trustees for such children whose pensions or part of same are deposited in the Post Office Savings Bank. There are at present one hundred and forty-seven (147) such accounts. The aggregate amount standing to the credit of these children totalled \$58,615 at December 31, 1921.

The preceding expenditure and arrangement is in connection with pensioners of European War origin.

FINANCIAL STATISTICS OF PENSIONS AND PENSIONERS

The following statistics show the present status of the pension liability and the various classes of changes and facts which bear on or may alter the total pension expenditure:—

Classification of Pensions

The general classification shows distribution of pensions by class, and the liability thereof, as at December 31, 1921.

Pensions Awarded (from January 1, 1921, to December 31, 1921—

		Annual Liability
Dependents..	942	\$ 423,468 00
Disabilities..	2,501	913,769 00
	<hr/> 3,443	<hr/> \$1,342,237 00

Gratuities Awarded—

		Amount Awarded
In lieu of pensions..	341	\$ 29,123 00
On discontinuation of pensions..	2,225	116,244 00
On final payment by agreement..	7,774	3,287,011 28
Annual liability reduced on account of pensioners accepting final payment by agreement..		\$ 816,355 50

Refusals of Pension—

Dependents of deceased soldiers..	3	
Disabled soldiers..	1,680	
	<hr/>	<hr/> 1,683

Result of Medical Re-Examinations—

Increases..		4,509
Decreases..		7,782
Cancellations..		3,474
Re-instatements..		676

Deaths (Pensions Discontinued)—

Dependents..		321
Disabilities..		676

Number of Pensions in Force December 31, 1921—

		Annual Liability
Dependents of deceased soldiers	19,490	\$13,057,086 43
Disabilities..	47,327	17,423,264 92
	<hr/> 66,817	<hr/> \$30,480,351 35

12 GEORGE V. A. 1922

Pension Liabilities (to December 31, 1921—

DEPENDENTS OF DECEASED SOLDIERS		
Classification	Number	Yearly Liability
Widows.. . . .	9,595	\$7,005,057 03
Mothers.. . . .	6,449	2,528,577 00
Fathers.. . . .	2,010	567,829 40
Grand-parents.. . . .	46	18,023 00
Children.. . . .	16,953	2,592,389 00
Orphans.. . . .	1,003	312,941 00

Br.-Generals.. . . .	8	3	3	8,328 00
	<u>47,327</u>	<u>24,895</u>	<u>34,814</u>	<u>10</u>	<u>162</u>	<u>11</u>	<u>\$17,294,637 30</u>

Special allowance—372.. . . .	\$ 128,627 62
	<u>\$17,423,264 92</u>

Special allowances are paid to disability pensioners who are totally disabled, helpless and in need of attendance. This allowance may be not less than \$250 per annum and not more than \$750 per annum in addition to pension. This amount is payable to pensioners ranking to and including lieutenants.

Allowances to officers of higher rank are graded as follows:—

Captains, not to exceed \$650 per annum.

Majors, not to exceed \$390 per annum.

Lieutenant-Colonels, not to exceed \$90 per annum.

Total annual liability in respect of pensions to dependents of deceased soldiers.. . . .	\$13,057,086 43
Total annual liability in respect of disabled soldiers.. . . .	17,423,264 92
Total annual liability.. . . .	<u>\$30,480,351 35</u>

GENERAL

The principal results that stand out in connection with the work of the branch during the past year are:—

1. The expeditious handling of the expenditures and accounts for the "Unemployment Relief" scheme.

2. The amalgamation of the Board of Pension Commissioners for Canada with this department and the consequent increase in duties and of responsibility for the branch.

3. The complete pre-audit before payment of all claims, invoices, vouchers, pay-lists and so forth.

4. The simplification of details, forms and methods of reporting.

5. The development and improvement of the accounting, auditing and statistical systems.

6. The more prompt completion and transmission to the officers concerned of periodical returns and statements.

7. The general increase in efficiency and esprit-de-corps of the staff.

SESSIONAL PAPER No. 14

The increased efficiency of the staff has been reflected in its relations with the public, who in the case of vendors secure prompt payment of their accounts, and in the case of patients and students rapid adjustment and payment of the authorized pay and allowances.

The appended statements are made up from the books and records of the branch:—

1. The balance sheet of the department as at December 31, 1921.
2. A statement of the operating expenses of the department to December 31, 1921.
3. A distribution of expenditures in the various provinces of the Dominion.
4. Appropriation expenditures and receipts for the nine months of the fiscal year 1921-22, ending December 31, 1921.
5. The consolidated operation statement of the Orthopædic and Surgical Appliances Branch.

SOLDIERS' COMFORT BRANCH

Since 1915 the work of this branch has materially increased and during the last year, owing to the constant and varied needs, it has broadened and expanded.

The endeavour has been to give an equal proportion of comfort to ex-soldier patients, whether they are in hospitals under the jurisdiction of the department, or D.S.C.R. patients in institutions civil or provincial, throughout the Dominion. In addition to this, out-patients also have been given generous donations and consideration.

The closing of several hospitals during the year has resulted in a centralization of the work of the branch rather than a decrease in the number of comforts required for the men.

Owing to the greater amount of work and the ensuing detail, it has been found necessary to increase the staff in both offices, as well as the employees in the work-shop.

The policy laid down, that no comfort shall ever be sold, has been of vital importance. Everything suitable has been placed in the hospitals, and furniture, unsuitable, passed on for the use of ill and disabled men where most needed.

Comforts for Men in the Hospitals.—Generally these are comprised of articles other than of departmental issue, though, if emergency arises, they are supplementary to it; for example: electric bed-pads; electric bed-lights; hot-water bottles and covers; air cushions; air mattresses; sleeping-suits; dressing gowns; sweaters, sleeveless and with sleeves; helpless case shirts; socks; bed socks, long and short; sleeping caps:

12 GEORGE V, A. 1922

mitts; woollen gloves; bed jackets; pneumonia and operation jackets; scarves; underwear; pads; bandages of all kinds; personal property bags; pyjamas; arm slings; tooth brushes; tooth paste; shaving soap; safety razors; brushes and combs; talcum powder; electric fans; ice-water jars; roof parasols; sun glasses; bathing suits, etc., etc., are given.

Lounge and Rest Room Furniture.—In furnishing the lounge and rest rooms, the choice of furniture at the outset was based upon comfort, combined with usefulness. In connection with this, the rugs, curtains, easy chairs, couches, tables, writing desks, bookcases, etc., were purchased with judgment and care, and although some of them have been placed in order during the last twelve months, the majority have stood the wear and tear of institutional life very well.

Musical Instruments and Supplies.—Each institution has its quota of pianos. They are available for the men to play themselves, or to be used for concert and entertainment purposes. Gramophones have been distributed generally. Sheet music and gramophone needles and records go out regularly with the supplies. Instruments for orchestras have been given, as well as other instruments, to make a complete number where an orchestra is partly arranged for. Portable organs have been supplied for the use of the chaplains, with a large quantity of mandolins, zithers, bones, etc., for minstrel shows.

Billiard Tables and Equipment.—The number of tables in each hospital varies according to its size and the number of men there. As hospitals have closed the tables have been repaired and sent proportionally to others. In the past year many more tables have been placed than in previous years. The equipment has also been forwarded in greater quantities than ever before.

Athletic Supplies.—These have become a matter not alone of recreation, but of health and happiness as well. This has been specially noticed in the mental cases; therefore, as far as possible, no requisition for the following articles has been refused: hockey sticks, skates, pucks, curling stones, footballs, baseball sets, gymnasium equipment, medicine balls, punching bags, tennis and croquet sets, running shoes, etc., but have been sent out regularly, according to the season, and all athletic supplies are kept in repair.

Invalid Chairs.—The donation chairs that remain with Soldiers' Comforts are regularly distributed, and when necessary repairs are made.

Amusements.—Weekly motor drives, treats, picnics, tickets for theatres, concerts, and various entertainments have been given; fruits, cakes, sweets, cigarettes, tobacco, and pipes regularly donated.

Books Circulated.—Libraries have been placed in the hospitals wherever possible, and the giving out of books two and three times a week, by volunteer workers connected with Soldiers' Comforts, has been a most successful undertaking.

Comforts and Donations for Out-patients, Discharged Men, and their Families.—This branch has co-operated with the Medical Services of the department in giving comforts and supplies where necessary wherever possible to the out-patients and their families. The distribution has included regular supplies of milk and eggs, fruit, blankets, sleeping-caps, quilts, comforters, sheets, pillow-cases, pyjamas, towels, camp-beds, cots, bed socks, awning tents, boots, slippers, bandages, layettes, warm clothing, etc., etc.

Hospital Supplies, Cut, Made, and Repaired.—The material purchased from departmental funds is turned into required hospital supplies. Garments are rapidly cut and sewn by members of the staff, who are frequently assisted by voluntary

SESSIONAL PAPER No. 14

workers, many of whom have given regular days each week to the Comforts' work. Special mention should be made of the continued efforts so generously put forward by them for the men. Articles such as pyjamas, bed-jackets, dressing gowns, and many others for hospital use, have been carefully mended, emergency calls quickly responded to; and each requisition has been filled.

Workshop, 287 Queen Street West, Toronto.—The workshop has served its purpose of repairing furniture for hospitals and institutions, and has been the means of giving employment to ex-service men. The upholstering has been accomplished efficiently and well. Where new furniture has been required, it has been made in the workshop instead of being purchased as in the past. Included with this has been the crating of all the articles shipped, and nothing that could be repaired or refinished, either by upholstery, carpentry, paint or enamel, has been done outside of this section.

Sale of Soldiers' Work.—Day after day the interest in the sale of soldiers' work has increased, and it would appear that the practical use of each article justifies its existence, and that each is bought, not from the sentimental viewpoint, but from the fact that the work of the men has come to stay because of its practical use or beauty. Although little or no advertising has been done, the work itself has proved its best advertisement, as the amounts received by the men have been more than doubled in 1921, as against the receipts of last year.

Exhibit Soldiers' Work.—The exhibit of work and competitive entries at the Canadian National Exhibition showed a marked improvement over other years. The conclusion of the judges was that the average of the entries was fully 60 per cent higher in every class than in 1920, the men doing much credit to the vocational courses taken. The entries were comprised of woodworking, toys, metal work, textiles, clay, leather, drawing, basketry, bead work, needlework, and carving.

Christmas Cheer.—Again this year complete details were received from every hospital as to the requirements from the Soldiers' Comforts Branch for the patients of the department. Owing to the fact that there were fewer patriotic societies presenting gifts this year than in 1920, it was necessary for the Soldiers' Comforts Branch to supply a greater number of Christmas remembrances. Approximately four thousand individual Christmas gift boxes were packed, containing socks, cigarettes, fruit cake, candy, nuts, handkerchief, book or writing pad and pencil, with a Christmas card of good wishes. For the bed-patients, tray gifts were sent in as well, consisting of funny toys, puzzles, games or favours. Where necessary, Christmas dinners provided by the hospitals were supplemented. Suitable decorations were supplied for each hospital and entertainments of various kinds arranged.

Donations.—Large quantities of materials for the making of garments, hospital supplies, furnishing, etc., have been received during the past year, such as flannel, flannellette, canton flannel, gauze, cheesecloth, yarn, tapestry, repp, denim, chintz, scrim, etc., and in money \$2,779.92.

To members of societies and individuals who gave service and gifts heartfelt thanks are due for their co-operation with the Soldiers' Comforts Branch in remembering the soldiers in hospitals who served their country with devotion and sacrifice.

SUMMARY STATEMENT OF THE WORK OF SOLDIERS' COMFORTS BRANCH FOR
TWELVE MONTHS, JANUARY 1 TO DECEMBER 31, 1921

Comforts for men in hospitals—	
Personal comforts.. . . .	76,062

DISABLEMENT FUND

The Disablement Fund, which was established in 1915, has continued to serve a useful purpose. The total advances outstanding at December 31, 1920, amounted to \$10,626.18. Loans made during 1921 amounted to \$39,172.07, making a total of \$49,798.25.

During the year, at the instance of the principal contributor to the fund, \$35,000 was transferred to the Canadian National Institute for the Blind. Further donations were made amounting to \$1,562.43. The total repayments of loans during the year amounted to \$16,574.55.

The following statement of account from its inception to December 31, 1921, shows the standing of the fund:—

Dr.		Cr.	
Cost of \$100,000 War Loan.. . . .	\$ 96,190 16	Subscriptions to fund.. . . .	\$128,628 17
Total of unit funds.. . . .	10,350 00	Interest account, including interest received on War Bonds interest, on Head Office bank account and interest on various unit accounts.. . . .	34,395 79
Sundry advances from Head Office.. . . .	11,513 60		
Advances considered unrecoverable.. . . .	2,763 02		
Donation to Canadian National Institute for the Blind.. . . .	35,000 00		
Sundry donations.. . . .	4,618 76		
Balance in Bank of Montreal.. . . .	3,088 42		
	<u>\$163,523 96</u>		<u>\$163,523 96</u>

STAFF

1. The number of staff at the Head Office and units, including hospital staff, at December 31, 1920, was 5,779, which shows a reduction of 2,342 during 1920.

2. On January 1, 1921, in pursuance of Order in Council P.C. 2936, dated December 3, 1920, the unit staff of the Board of Pension Commissioners for Canada, numbering 255, was taken over by the department.

3. On July 1, 1921, in pursuance of Order in Council P.C. 1187, dated April 12, 1921, the staff of the Head Office of the Board of Pension Commissioners for Canada was taken over by the department, thus adding a further 497.

4. On December 1, 1921, in pursuance of Order in Council P.C. 4500, the staff of the Imperial Section of the Board of Pension Commissioners for Canada was transferred to the department, making a further addition of 102.

5. On December 31, 1921, the total staff was 4,886, being a reduction for the year of 1,747, or 26.52 per cent; to this should be added a reduction of 27 made by the Board of Pension Commissioners between January 1, 1921, and the date of transfer to the department. Thus the total reduction effected during the year, by the joint organizations, was 1,774, or 26.77 per cent.

6. The staff of the department as at January 1, 1921, together with the transfers during the year from the Board of Pension Commissioners, was therefore as follows:—

Departmental staff, January 1, 1921..	5,779
B.P.C. District and Overseas staff..	255
B.P.C. Head Office staff..	497
B.P.C. Imperial Pension Office (Canada)..	102
	<hr/>
	6,633

7. The staff at December 31, 1920, and at December 31, 1921, was distributed as follows:—

	1920	1921
Head Office, Ottawa..	586	1,078
"B" Unit—Nova Scotia, New Brunswick and Prince Edward Island..	569	395

12 GEORGE V, A. 1922

APPENDIX I

Order in Council, P.C. 847, dated the 14th March, 1921, respecting reciprocal arrangements with the United States of America for treatment of former members of the United States Forces in Canada and the Canadian Forces in the United States.

The Committee of the Privy Council have had before them a report, dated 12th March, 1921, from the Acting Minister of Soldiers' Civil Re-establishment, submitting as follows:—

In pursuance of authority granted by Your Excellency in Council, negotiations have been entered into by the Department of Soldiers' Civil Re-establishment with the Bureau of War Risk Insurance, Treasury Department, United States of America, for the care and treatment in the United States of former members of the Canadian and British Forces when resident in the United States of America, and the care and treatment of former members of the military and naval forces of the United States of America when resident in Canada.

The authority referred to is contained in the following Orders in Council, P.C. 387, dated the 24th February, 1919, re-enacted by P.C. 2324, dated the 21st November, 1919, clauses 3 and 4:

"The department may, from time to time, and in its discretion, make arrangements for the treatment and training of all persons who have served in the Canadian Naval and Military Forces of His Majesty during the present war, and who have been retired or discharged therefrom and who may now or hereafter be stationed or resident outside of Canada, and may pay the cost of such treatment or training and may, subject to such arrangements and to the provisions of clause 1 during the period of such treatment or training, pay such persons and their dependents the allowances hereinafter set out."

"The department, with the approval of the Governor in Council, may from time to time, and in its discretion, make arrangements with the Governments of His Majesty's Allies for the treatment and training of all persons who have served in the Naval or Military Forces of His Majesty's Allies during the present war, and who have been retired or discharged therefrom and who may now or hereafter be resident in Canada, whether bona fide resident in Canada at the outbreak of the present war or not, and may render accounts for the cost of such treatment or training and may, subject to such arrangements and to the provisions of clause 1, during the period of such treatment or training pay such persons and their dependents the allowances hereinafter set out."

Order in Council P.C. 2025, dated the 30th September, 1919, re-enacted by Order in Council, P.C. 2324, dated the 21st November, 1919:—

"That the Department of Soldiers' Civil Re-establishment be authorized to conclude and put into effect arrangements with the Ministries of Pensions and Labour regarding the treatment and training of ex-members of the Imperial Forces in Canada and the United States and the treatment and training of Canadian Forces in the United Kingdom, and that the Board of Pension Commissioners for Canada be authorized to conclude and put into effect through the Minister of Soldiers' Civil Re-establishment, arrangements with the Ministry of Pensions regarding payment of pensions to ex-members of

SESSIONAL PAPER No. 14

the Imperial Forces and their dependents in Canada and the United States, in accordance with the decision of the War Cabinet, dated the 16th July, 1919, and with the understanding reached by the Assistant Deputy Minister of the Department of Soldiers' Civil Re-establishment with the two Ministries referred to."

Order in Council P.C. 424, dated the 3rd March, 1919, re-enacted by Order in Council P.C. 2324, dated the 21st November, 1919:—

"The Committee therefore recommend that Your Excellency may be pleased to inform His Majesty's Ambassador at Washington in the sense of this minute, and to request him to inquire if the United States Government would approve in principle of such an arrangement between the two Governments for the reciprocal treatment of members of the forces of each resident in the country of the other as has been above described, and in that case would sanction conferences between their representatives and those of the Canadian Department of Soldiers' Civil Re-establishment with the object of deciding what measures may be necessary for giving effect to the policy either by administrative action, or, if necessary, by legislation."

In pursuance of the foregoing, negotiations have been entered into with the Bureau of War Risk Insurance, Treasury Department, Washington, and a working arrangement has been reached. The following memorandum, setting forth this arrangement, has been signed, subject to the approval of Your Excellency in Council:

"The following understanding has been reached by the Bureau of War Risk Insurance, Treasury Department, United States of America, represented by R. G. Cholmeley-Jones, the director thereof, and the Department of Soldiers' Civil Re-establishment, Canada, represented by Ernest Henry Scammell, the Assistant Deputy Minister thereof:—

"Under section 11 of an Act approved December 24, 1919, 41 statute 373-4, which amends the War Risk Insurance Act, as amended, the following provisions have been made:—

"(6) In addition to the compensation above provided, the injured person shall be furnished by the United States such reasonable governmental medical, surgical, and hospital services and with such supplies, including wheeled chairs, artificial limbs, trusses, and similar appliances, as the director may determine to be useful and reasonably necessary, which wheeled chairs, artificial limbs, trusses and similar appliances may be procured by the Bureau of War Risk Insurance in such manner, either by purchase or manufacture, as the director may determine to be advantageous and reasonably necessary: Provided, that nothing in this Act shall be construed to affect the necessary military control over any member of the military or naval establishments before he shall have been discharged from the military or naval service."

"(9) That the Bureau of War Risk Insurance is hereby authorized to furnish transportation, also the medical, surgical and hospital services and the supplies and appliances provided by subdivision (6) hereof, to discharged members of the military or naval forces of those Governments which have been associated in war with the United States since April 6, 1917, and come within the provisions of laws of such Government similar to the War Risk Insurance Act, at such rates and under such regulations as the Director of the Bureau of War Risk Insurance may prescribe; and the Bureau of War Risk Insurance is hereby authorized to utilize the similar services, supplies and appliances provided for the discharged members of the military and naval forces of those Governments which have been associated in war with the United States since April 6, 1917, by the laws of such Governments similar to the War Risk Insurance Act, in furnishing the discharged members of the military and naval forces of the United States who live within the territorial limits of such

12 GEORGE V, A. 1922

Governments and come within the provisions of subdivision (6) hereof, with the services, supplies and appliances provided for in such subdivision; and any appropriations that have been or may hereafter be made for the purpose of furnishing the services, supplies and appliances provided for by subdivision (6) hereof are hereby made available for the payment to such Governments or their agencies for the services, supplies and appliances so furnished at such rates and under such regulations as the Director of the Bureau of War Risk Insurance may prescribe."

"Under authority granted by Order in Council passed by the Government of Canada, dated the 24th February, 1919, P.C. 357, the following provision appears:—

"The department, with the approval of the Governor in Council, may, from time to time, and in its discretion, make arrangements with the Government of His Majesty's Allies for the treatment and training of all persons who have served in the Naval or Military Forces of His Majesty's Allies during the present war, and who have been retired or discharged therefrom and who may now or hereafter be resident in Canada, whether bona fide resident in Canada at the outbreak of the present war or not, and may render accounts for the cost of such treatment or training."

"1. The Bureau of War Risk Insurance will furnish medical, surgical, and hospital services, appliances and transportation to former members of the Naval or Military Forces of Canada and the United Kingdom of Great Britain and Ireland, when such former members of the forces are resident in the United States of America and require the same, for a disability due to, or aggravated by, service in the World War, at the expense of the Government of Canada, subject to such regulations in respect thereof as may be mutually agreed upon from time to time between the said Bureau and the Department of Soldiers' Civil Re-establishment.

"2. The Department of Soldiers' Civil Re-establishment will furnish medical, surgical, and hospital services, appliances and transportation to former members of the United States forces resident in the Dominion of Canada who may require the same, for a disability due to, or aggravated by, service in the world war, at the expense of the Government of the United States of America, subject to such regulations as may be mutually agreed upon from time to time between the Department of Soldiers' Civil Re-establishment and the Bureau of War Risk Insurance.

"3. The regulations referred to in the paragraphs numbered 1 and 2 shall not be inconsistent with the provisions of the War Risk Insurance Act, as amended, nor with the provisions of the Department of Soldiers' Civil Re-establishment Act, as amended."

The Bureau of War Risk Insurance has entered into negotiations with the British Government for the treatment of former members of the Military and Naval Forces of the United States of America when resident in the United Kingdom. Pending the completion of a formal agreement, for which British legislation is necessary, it is suggested by the Ministry of Pensions that former members of the Military and Naval Forces of United States of America should be dealt with through the London office of the Department of Soldiers' Civil Re-establishment.

The minister, therefore, recommends that the memorandum between the Bureau of War Risk Insurance, Treasury Department, Washington, D.C., and the Department of Soldiers' Civil Re-establishment, set forth herein, be approved, and also that the Department of Soldiers' Civil Re-establishment be authorized to place the facilities of its London office at the disposal of the Ministry of Pensions in respect of the treatment of former members of the Military and Naval Forces of the United States of America, pending completion of formal arrangements between the Governments of Great Britain and the United States of America.

The Committee concur in the foregoing recommendation and submit the same for approval.

(Sgd.) G. G. KEZAR,
Assistant Clerk of the Privy Council.

APPENDIX II

Order in Council, P.C. 963, dated the 23rd March, 1921

Authority under which the Department of Soldiers' Civil Re-establishment may give dental treatment on behalf of the Department of Militia and Defence to former members of the forces who are entitled to the same at the expense of that department.

The Committee of the Privy Council have had before them a Joint Report, dated 16th March, 1921, from the Minister of Militia and Defence and the Acting Minister of Soldiers' Civil Re-establishment, submitting that members of the Canadian Expeditionary Force were entitled to receive necessary dental treatment during their service in that force, and, on discharge therefrom, such dental treatment as was necessary to render them as fit dentally as on enlistment. During the progress of the war, all such dental work was performed by officers of the Canadian Army Dental Corps, but, during demobilization, the rapidity with which men were discharged made it impossible to provide dental treatment in all cases, and arrangements were, therefore, made to provide such after discharge.

The ministers state that a considerable proportion of the Canadian Army Dental Corps was, therefore, retained on the Active List of the C.E.F. to complete this work, but, in the early part of 1920, sufficient progress had been made to enable the demobilization of the Canadian Army Dental Corps to be carried out, with the exception of a Director and Quartermaster at Militia Headquarters, a District Dental Officer in each Military District, and a small number of other ranks and civil employees for clerical work, and as assistance to operators, which personnel performed the necessary administrative work in connection with the remaining dental services, the actual operations being done by civilian dentists at rates authorized by P.C. 603, dated 23rd March, 1920.

On the 31st January, 1921, there were about 2,500 dental cases remaining to be dealt with, but as these are being completed at the rate of approximately 700 per month, there will remain, on the 31st March, 1921, about 1,000 cases to be completed, of which number some 500 to 600 are cases of men who have been authorized to proceed to a dentist for examination, but who have so far neglected to do so. In addition, there will be a number of cases of men who have been out of reach of the press, and, therefore, unaware of the regulation which required all persons entitled to dental treatment to submit their applications by the 1st September, 1920, which cases will require to be investigated as they arise, but it is estimated that the total number of cases to be dealt with after the 31st March, 1921, will be considerably less than 1,000.

The ministers further state that it is not considered in the interests of economy to maintain a military dental staff in each of the Military Districts of Canada to complete this work, and, as the Department of Soldiers' Civil Re-establishment maintains a dental organization for the treatment of patients under its jurisdiction, the ministers recommend that the responsibilities of the Department of Militia and Defence in respect of the remaining dental cases reported above be transferred to the Department of Soldiers' Civil Re-establishment from the 31st March, 1921, the detailed arrangements in connection with such transfer to be effected by the responsible officials of the departments concerned, and the Dental Staff, now employed by the Department of Militia and Defence, to be demobilized as soon as the transfer has been effected.

12 GEORGE V, A. 1922

The ministers further recommend that, as the expense to be incurred in completing the dental treatment of ex-members of the C.E.F. still entitled to such treatment under the regulations of the Department of Militia and Defence is properly chargeable to Demobilization Appropriation, such funds as are necessary should be transferred from the above-mentioned appropriation to the Department of Soldiers' Civil Re-establishment.

The ministers observe that, after disposing of as much surplus dental equipment and stores as possible to date, the Department of Militia and Defence still has in its possession at Ottawa, Toronto, and Halifax equipment and stores to the value of approximately \$34,000, a proportion of which is, for various reasons, not saleable, and has been recommended for disposal as gifts to charitable institutions.

The ministers, therefore, recommend that, in the event of the Department of Soldiers' Civil Re-establishment being authorized to take over the dental treatment of the remaining cases still entitled to such treatment from the Department of Militia and Defence, all surplus dental equipment and stores, now in the custody of the latter department, should be transferred to the former department for disposal, provided that department is able and willing to undertake this duty. If not, the responsibility for the disposal of these surplus dental stores will remain with the Department of Militia and Defence.

The Committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,

Clerk of the Privy Council.

SESSIONAL PAPER No. 14

APPENDIX III

Orders in Council P.C. 1187, dated the 12th April, 1921, P.C. 2722, dated the 17th August, 1921, and P.C. 4500, dated the 1st December, 1921

Authority under which the Head Office of the Board of Pension Commissioners for Canada has been amalgamated with the Head Office of the Department of Soldiers' Civil Re-establishment.

P.C. 1187

The Committee of the Privy Council have had before them a report, dated 8th April, 1921, from the Acting Minister of Soldiers' Civil Re-establishment, submitting that by Order in Council, dated the 3rd December, 1920 (P.C. 2936), authority was granted that,—

“The District or Unit organization of the Board of Pension Commissioners for Canada be absorbed by the Unit organization of the Department of Soldiers' Civil Re-establishment.”

The foregoing action has now been accomplished and numerous economies have been and are being effected, while the work of dealing with former members of the forces who have been pensioned and who require further medical treatment has been simplified.

The minister states that this authority referred only to the district or unit organization of the Board of Pension Commissioners; not to its head office. It has been found that since the outside amalgamation was effected that closer co-ordination of the head office activities of the Department of Soldiers' Civil Re-establishment and the Board of Pension Commissioners is necessary and that not only would one administration eliminate duplication of activities, but new economies in staff reduction, and consequently administrative expenditure, would result, provided that the offices are combined under one roof. Section 6 of the Pension Act, Chapter 43 of the Statutes of Canada, 1919, provides as follows:—

“The Commission shall be attached to the Department of Soldiers' Civil Re-establishment or such other department as the Governor in Council may from time to time determine.”

Subsection 3 of Section 5 of an Act to amend the Department of Soldiers' Civil Re-establishment Act, Chapter 29 of the Statutes of Canada, 1919, provides as follows:—

“Nothing in this Act shall be deemed in any way to affect the powers or duties of the Board of Pension Commissioners for Canada or the Soldier Settlement Board.”

The Board of Pension Commissioners was formed by Order in Council (P.C. 1334) of 3rd June, 1916, after a Parliamentary Committee had taken evidence on the subject and had brought in a recommendation to Parliament. This Order in Council, with certain amendments, was incorporated in the Pension Act, 1919.

The appointment of the Board of Pension Commissioners as a separate entity from any Government department was intended as a safeguard against the introduc-

12 GEORGE V, A. 1922

tion of outside pressure, political or otherwise, in the granting, renewal and control of pensions. For the sake of general administration, the commission was empowered to employ the necessary staff throughout Canada.

If the entire administration of the offices and staff of the Board of Pension Commissioners were taken over by the Department of Soldiers' Civil Re-establishment, this could not be deemed in any way to affect the powers or duties of the board as these would remain the same as at present. Further, the members of the Board would have more time to devote to the specific duties with which, under the Act, they are charged.

With reference to the staff of the Board of Pension Commissioners, it is suggested that those who have been classified by the Civil Service Commission as permanent civil servants should remain under such classification and be subject to the provisions of the Civil Service regulations, while those who are employed as temporary civil servants should be controlled by the Department of Soldiers' Civil Re-establishment in accordance with the Order in Council (P.C. 2491) of 20th December, 1919.

The Returned Soldiers' Insurance Act, 1920, is now being administered by the Board of Pension Commissioners for Canada at its head office, while the branch office activities are being conducted by the Department of Soldiers' Civil Re-establishment. It would appear desirable that the whole of the administration now conducted by the Board of Pension Commissioners for Canada should be absorbed by the Department of Soldiers' Civil Re-establishment.

The minister therefore recommends:—

1. That the administration of the Head Office of the Board of Pension Commissioners for Canada be, as from the 1st April, 1921, transferred to the Department of Soldiers' Civil Re-establishment and absorbed by the head office organization of that department, provided that the Pension Commissioners shall continue to exercise full power and authority in dealing with the granting and renewal of and adjudication upon pensions;

2. That the present staff of the Board of Pension Commissioners be transferred to the Department of Soldiers' Civil Re-establishment subject to the condition that those who have been classified by the Civil Service Commission as permanent civil servants shall remain under such classification and be subject to the provisions of the Civil Service Regulations, while those who are employed as temporary civil servants shall be considered as employed under the authority granted to the Department of Soldiers' Civil Re-establishment by the Order in Council (P.C. 2491) of 20th December, 1919.

The Committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,

Clerk of the Privy Council.

P.C. 2722

Dated the 17th August, 1921

The Committee of the Privy Council have had before them a Report, dated 27th July, 1921, from the Acting Minister of Soldiers' Civil Re-establishment, submitting that, for the reasons therein stated, it was provided by Order in Council, P.C. 1187, of the 12th April, 1921, as follows:—

- “1. That the administration of the Head Office of the Board of Pension Commissioners for Canada be, as from the 1st April, 1921, transferred to the Department of Soldiers' Civil Re-establishment and absorbed by the head office

SESSIONAL PAPER No. 14

organization of that department, provided that the Pension Commissioners shall continue to exercise full power and authority in dealing with the granting and renewal of and adjudication upon pensions;

"2. That the present staff of the Board of Pension Commissioners be transferred to the Department of Soldiers' Civil Re-establishment, subject to the condition that those who have been classified by the Civil Service Commission as permanent civil servants shall remain under such classification and be subject to the provisions of the Civil Service Regulations, while those who are employed as temporary civil servants shall be considered as employed under the authority granted to the Department of Soldiers' Civil Re-establishment by Order in Council (P.C. 2491) of 20th December, 1919."

As it is considered desirable, more clearly to define the responsibilities and authority of the Board of Pension Commissioners and of the department, the Minister recommends that the above-mentioned clauses, 1 and 2 of (P.C. 1187), be rescinded and that the following be substituted therefor:—

1. That the staff and administration of the Head Office of the Board of Pension Commissioners for Canada (excepting such personal staff as may be retained by the Commissioners for the proper carrying out of their clerical and secretarial duties, and excepting such doctors as may be required in Head Office for the purpose of reviewing the recommendations of medical examiners and advising the Commissioners in connection therewith), be transferred to the Department of Soldiers' Civil Re-establishment and amalgamated with the Head Office organization of that department, provided that the Board of Pension Commissioners shall, through the department, lay down the policy to be followed in the administration of the provisions of the Pension Act and the Returned Soldiers' Insurance Act.

2. That the present staff of the Board of Pension Commissioners be transferred to the Department of Soldiers' Civil Re-establishment subject to the condition that those who have been classified by the Civil Service Commission as permanent civil servants shall remain under such classification, be subject to the provisions of the Civil Service Regulations, and on reduction of staff (provided they are deemed efficient), be given priority in retention of service, while those who are employed but have not become permanent shall be considered as employed under the authority granted to the Department of Soldiers' Civil Re-establishment by Order in Council P.C. 2491 of 20th December, 1919.

The Committee concur in the foregoing recommendation and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,
Clerk of the Privy Council.

P. C. 4500

Dated the 1st December, 1921

The Committee of the Privy Council have had before them a Report, dated 26th November, 1921, from the Acting Minister of Soldiers' Re-establishment, submitting as follows:—

That by Order in Council P.C. 876, dated the 5th day of May, 1905, on the joint recommendation of the Minister of Militia and Defence and the Postmaster General, authority was granted to a committee named therein, to "take over the work of paying Imperial Army pensions and reservists resident in Canada, in order that the War Office might close the Army Pay Office at Halifax."

12 GEORGE V, A. 1922

That it was specifically provided in the said Order in Council.—

“That, as all expenditure in connection with this work is borne by British funds, the accounts be kept separate and distinct from the Canadian public accounts and all statements of accounts, vouchers, etc., be transmitted to the British Government, through the Canadian Post Office Department.”

That by Order in Council P.C. 133, dated the 19th day of January, 1920, “the administration of Imperial pensions in Canada, under authority of Order in Council (P.C. 876), dated 5th May, 1908, or any subsequent agreement or arrangement,” was placed under the administration of the Board of Pension Commissioners for Canada, and “all documents, furnishings, equipment, files, papers or other matters pertaining to the administration of Imperial pensions in Canada” were transferred to the same Board, together with the Officer Paying Imperial Pensions, and his staff;

That the said Order in Council P.C. 133, dated the 19th day of January, 1920, superseded the said Order in Council P.C. 876, dated the 5th day of May, 1908, only in respect of the administration of the work outlined and did not vary any other conditions contained therein;

That by agreement with the British Ministry of Pensions the pensions of ex-members of the Imperial Forces resident in the United States are, in so far as the late war is concerned, paid to such pensioners by the Board of Pension Commissioners for Canada, in the same way as to Imperial pensioners resident in Canada, and by request of the proper authorities in England, the pensions of certain ex-members of the Imperial Forces resident in Newfoundland are also paid by the Board of Pension Commissioners for Canada;

That the medical care and treatment of Imperial pensioners in Canada and the United States, and of other ex-members of the Imperial Forces, has, by agreement with the British Ministry of Pensions, been taken over and is now carried on by the Department of Soldiers' Civil Re-establishment;

That the medical examination of Imperial pensioners in Canada and the United States and the assessment of pensionability is at present carried out by the Department of Soldiers' Civil Re-establishment for which services the department is only partly reimbursed;

That the agreement between the Government of Canada and the British Government provides for a commission payable by the British Government of three per cent on the amount of pension paid to Imperial pensioners in Canada, the United States and Newfoundland, which commission is not applied against the costs of medical examination and assessment of pension incurred by the Department of Soldiers' Civil Re-establishment but only against the cost of the necessary accounting staff, etc., incurred by the Board of Pension Commissioners for Canada, the balance being held in trust by the said Board;

That by Order in Council P.C. 2936, dated the 3rd day of December, 1920, and P.C. 1187, dated the 12th day of April, 1921, as amended by P.C. 2722, dated the 17th day of August, 1921, the staff and administration of the head and district offices of the Board of Pension Commissioners for Canada (except such personal staff as was required to be retained by the Commissioners for the proper carrying out of their clerical and secretarial duties, and excepting such doctors as were required in Head Office, for the purpose of reviewing the recommendations of medical examiners and advising the Commissioners in connection therewith) were transferred to the Department of Soldiers' Civil Re-establishment;

That it was not deemed advisable until the fusion of that portion of the staff of the Board of Pension Commissioners for Canada dealing with the Canadian pensioners and the staff of the Department of Soldiers' Civil Re-establishment had been accomplished and the respective Central Registries had been amalgamated, to transfer the portion of the staff of the Board dealing with Imperial pensioners to the jurisdiction of the department;

SESSIONAL PAPER No. 14

That inasmuch as the commission of three per cent payable by the Ministry of Pensions does not fully defray the costs incurred by the Government of Canada in the carrying out of the examination of Imperial pensioners, the assessment of their pensions and the payment of the same as hereinbefore set forth, it is desirable, in order to achieve the most economical and efficient management of all matters connected with the administration of Imperial pensioners in accordance with the agreements entered into between the Government of Canada and the British Government, that the administration of both Canadian and Imperial pensions should be unified and placed under one control, so that further economies may be effected and the methods of payment together with the systems of accounting and auditing now operative in connection with Canadian pensions may be applied to Imperial pensions;

The minister, therefore, recommends as follows:—

(1) That as from the first day of December, 1921, the staff and personnel of the Board of Pension Commissioners for Canada, at present dealing with the payment of Imperial pensioners in Canada, the United States and Newfoundland, together with all documents, furnishings, equipment, files, papers or other matters pertaining to the administration of Imperial pensions in those countries, be transferred to the Department of Soldiers' Civil Re-establishment.

(2) That the bank accounts in Canada and England operated by the Board of Pension Commissioners for Canada against which cheques are drawn in payment of pensions for Imperial pensioners in Canada, the United States and Newfoundland, and in payment of treatment and funeral allowances, be transferred to the Department of Soldiers' Civil Re-establishment.

(3) That all moneys received from the British Ministry of Pensions or from any other source, including accrued interest, now on deposit in a savings account at the Royal Bank of Canada, together with the credit balance in a current account at the Royal Bank of Canada, be handed over to the Receiver General for Canada and credited against the respective votes from which disbursements in respect of Imperial pensioners have been made.

(4) That all amounts received in future by way of commission or for services rendered in respect of pensioners in Canada, the United States of America or Newfoundland, from the British Ministry of Pensions or any other Department of the British Government, be credited against the expenditure of the Department of Soldiers' Civil Re-establishment and deposited to the credit of the Receiver General for Canada.

(5) That all authorities granted under Orders in Council P.C. 876, dated the 5th day of May, 1908, and P.C. 133, dated the 19th day of January, 1920, be transferred to the Department of Soldiers' Civil Re-establishment, which department shall have power and authority to vary the procedure outlined in the said Orders in Council if, in the opinion of the minister such variation is necessary or desirable in the interests of economy and efficiency.

The Committee concur in the foregoing recommendation and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,

Clerk of the Privy Council

APPENDIX IV

Order in Council P.C. 4432, dated the 29th December, 1921

Authority under which the Department of Soldiers' Civil Re-establishment may assume the cost of compensation in respect of pensioners of 20 per cent and upwards who are engaged in industry.

The Committee of the Privy Council have had before them a report, dated 19th November, 1921, from the Acting Minister Soldiers' Civil Re-establishment, submitting that in order to render less difficult the provision of employment for disabled and handicapped men, the special committee appointed by the House of Commons to consider questions relating to pensions, insurance and re-establishment of returned soldiers at the last session of Parliament recommended (Part 3, Section 11, Third and Final Report to Parliament) that, for a period of three years from September 1, 1921, the Government of Canada should assume the liability imposed upon employers of disabled former members of the Forces to whom a pension of 20 per cent or over is payable by the Government of Canada in respect of disabilities received in or attributable to the Great War when such former members of the Forces meet with industrial accidents, subject to the following regulations:—

- (a) That on an accident occurring to any such pensioner in Canada and compensation or damages being assessed by any Workmen's Compensation Board of any province in Canada or by any court or other authority against the employer of such pensioner in respect of such accident, the Minister of Finance shall pay out of any unappropriated moneys in the Consolidated Revenue Fund of Canada the total amount of compensation or damages awarded.
- (b) That the administration of these regulations shall be in the hands of the Department of Soldiers' Civil Re-establishment, by whom all awards under this authority shall be approved before any payment is made.
- (c) That the Minister of Soldiers' Civil Re-establishment be authorized to issue regulations covering procedure and any other matters not contrary to the foregoing general authority.

It was recognized that in order to meet the requirements of the various Provincial Acts it might be necessary to vary slightly the suggested regulations. The following legislation was therefore passed under Vote 522, Schedule "D" of the Appropriation Act No. 2 (Chapter 54, Statutes of Canada, 1921):—

"To provide for expenditures arising out of the recommendations of the Third and Final Report of the Special Committee on Pensions, Insurance and Re-establishment, and to hereby authorize the putting into effect of the recommendations contained in Part 3, Section 11 hereof, subject to such regulations and limitations as the Governor General in Council may prescribe—\$623,000."

Of the foregoing amount the sum of one hundred thousand dollars (\$100,000) represents the anticipated expenditure for the purpose herein indicated for the current fiscal year.

SESSIONAL PAPER No. 14

The minister, in pursuance of the foregoing, recommends that the Government of Canada assume the liability imposed upon employers of disabled former members of the Forces to whom a pension of 20 per cent or over is payable by the Government of Canada in respect of disabilities received in or attributable to the Great War when such former members of the Forces meet with industrial accidents, subject to the following regulations:—

1. (a) In these regulations "pensioner" shall mean a former member of the Forces who is at the time of an accident in respect of which compensation is or damages are claimed, in receipt of a pension payable by the Board of Pension Commissioners for Canada of not less than twenty per cent in respect of disabilities received in or attributable to the Great War.

(b) "Department" shall mean the Department of Soldiers' Civil Re-establishment.

(c) "Compensation" shall mean and include all amounts to which a pensioner is, or, in the case of his death, his dependents are, entitled under or by virtue of any Workmen's Compensation Act in force in any province of Canada.

(d) "Full Cost of Compensation" shall include compensation, burial expenses, the cost of furnishing medical aid, and all other amounts payable under or by virtue of a Workmen's Compensation Act in force in any province of Canada by reason of a pensioner's meeting with an accident or by his contracting an industrial disease, compensable under any of said Acts, and shall include the capitalized sum or present value of the amount required, as determined by the Workmen's Compensation Board, having jurisdiction with respect thereto, to provide for future payments of compensation to the pensioner or his dependents.

(e) "Accident" shall include an industrial disease compensable under a Workmen's Compensation Act in force in the province where such disease is contracted.

2. (a) The department shall pay to each employer of a pensioner the amount of assessment, if any, paid by such employer to a Workmen's Compensation Board with respect to the wages or other allowances paid or made to such pensioner, provided that said employer shall furnish to the department a statement giving the following information in respect of such pensioner:—

- (i) Name, address, ex-regimental number or pension number.
- (ii) Date employment commenced.
- (iii) Date employment ceased if pensioner is not employed at the time of making the statement.
- (iv) Total amount of wages paid or other allowances made during the period for which reimbursement is claimed.
- (v) Rate of assessment levied by the Workmen's Compensation Board upon the wages paid and other allowances made to such pensioner.

(b) The department shall also pay to the Workmen's Compensation Board the full cost of compensation with respect to all accidents to pensioners in the province for the period covered by the board's certificate hereinafter referred to less all amounts paid or payable to all employers under subsection (a) hereof for such period; such payment or payments to be made upon receiving a certificate from the Workmen's Compensation Board of the full cost of compensation, which certificate may be accepted by the department without other proof.

3. Where the employer of a pensioner entitled to compensation is individually liable for the payment thereof under a Workmen's Compensation Act, or under what is known in the Ontario Act as Schedule 2, the department shall refund to the employer the full cost of compensation upon the employer submitting to the department a certificate of the Workmen's Compensation Board, showing the amount thereof.

12 GEORGE V, A. 1922

4. In the event of a claim for damages being made against the employer by a pensioner who is injured, or by the dependents of a pensioner who dies, by reason of an accident to such pensioner while employed in an industry not within the jurisdiction of a Workmen's Compensation Board, and in the event of liability therefor and the amount of the damages sustained by the pensioner thereby being admitted by the employer with the consent and approval of the department, or if damages be awarded against such employer by any court, or authority other than a Workmen's Compensation Board, the department shall submit all the evidence available and a statement of the facts as found by the court or other authority, if the damages shall have been adjudged by any such court or authority, to the Workmen's Compensation Board for the province in which the accident occurred, or if the accident did not occur in a province in which there is a Workmen's Compensation Board, the same shall be submitted to the Workmen's Compensation Board of any adjoining province, or if there be no adjoining province having a board, or if the accident happens outside of a province, the same shall, in the discretion of the department, be submitted to any Workmen's Compensation Board for the purpose of ascertaining what amount or amounts such board would allow if the accident were one for which compensation would be payable under the Workmen's Compensation Act of the province for which such board was appointed, if the industry were within the jurisdiction of the board, and the department shall pay to the employer the amount as agreed upon as aforesaid or awarded by the court or other authority, as the case may be, against the employer if the same be less than the amount as determined by such board, and if it be greater the department shall pay to the employer the amount as determined by such board.

5. Where the accident happens outside of a province the employer shall not be entitled to any benefits under these provisions unless the pensioner's employment with such employer commenced in the province and his employment was continuous to the time of the accident, and the accident happens within six months from the last time the pensioner was in the province.

The Committee concur in the foregoing recommendation and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,

Clerk of the Privy Council.

APPENDIX V

Orders in Council, P.C. 75, dated the 16th January, 1922, and P.C. 182, dated the 25th January, 1922

Authority under which the Department of Soldiers' Civil Re-establishment may grant relief to former members of the Forces who are pensioners or who have been vocationally trained on account of a disability, during the months of January, February and March, 1922, and may grant, through the High Commissioner for Canada, relief to former members of the Forces who are in necessitous circumstances in the United Kingdom.

P.C. 75

The Committee of the Privy Council have had before them a Report, dated 4th January, 1922, from the Minister of Soldiers' Civil Re-establishment, submitting as follows:—

That representations have been made that there are a number of former members of the forces who have been pensioned for disabilities due to war service or who have received vocational training from the Department of Soldiers' Civil Re-establishment who are out of employment and who are in need of assistance to provide for themselves and their families;

That during the winter of 1920 the provision of assistance for these men was undertaken by the Department of Soldiers' Civil Re-establishment, such assistance being given in the form of certain necessities of life and not in cash;

That the general lack of employment throughout Canada bears more heavily upon the disabled men than upon the man who is fit, and without admitting that the Federal Government is responsible for the provision of employment to former members of the forces who have returned to civil life, it is suggested that relief along the lines granted during last winter be extended to this winter;

That during the summer it has been necessary to continue a measure of relief to married men falling in one or other of the classes mentioned, expenditures in regard thereto having been made out of the appropriation voted at the last session of Parliament (Vote No. 521).

That there are a large number of former members of the Canadian forces at present resident in the United Kingdom who are out of employment and destitute, and provision has been made hitherto for relief to be granted through the High Commissioner's office out of funds provided through the Department of Immigration and Colonization and from other sources, the funds provided through the department named being utilized mainly for purposes of repatriation; it is considered that a sum of approximately three thousand pounds (£3,000) will be required to meet the situation during the coming winter.

The minister, therefore, recommends as follows:—

1. That the Department of Soldiers' Civil Re-establishment be authorized to grant assistance to former members of the forces who are out of employment or who are only able to secure inadequate employment, for the maintenance of themselves and their dependents during the months of December, 1921, January, February and March, 1922, subject to the following regulations and limitations:—

(a) Those entitled to assistance shall be (a) necessitous cases among former members of the forces who have been pensioned for a disability due to or aggravated by service in the great war or former members of the forces who

12 GEORGE V, A. 1922

have received vocational training under the Department of Soldiers' Civil Re-establishment for a war disability which prevented the trainee from following his pre-war occupation; and (b) former members of His Majesty's Imperial forces and former members of the forces of His Majesty's Allies who have been pensioned for a service disability due to or aggravated by service in the great war and have been residents of Canada for three months prior to making application.

(b) In order to determine what is a necessitous case, officers of the department shall investigate the home conditions of the applicant for assistance and shall take into consideration income from the earnings of the members of the family. When a pensioner or a former vocational student is unable to secure such employment as will yield sufficient remuneration to provide for himself and his dependents, or for whom such employment cannot be secured by reason of there being no employment available, as certified by an official of the Employment Bureau, assistance may be granted.

(c) The assistance granted shall not be in cash, but shall be limited to expenditure by the department on behalf of the pensioner or former vocational student of such amounts as may enable him and his dependents to carry on for the period indicated.

(d) The following shall be the maximum amounts per month which may be expended on behalf of any case:—

Man and wife.. . . .	\$60
First child under 16 (girl 17).. . . .	12
Second child under 16 (girl 17).. . . .	10
Maximum payable.. . . .	85
Single man without dependents (maximum allowance)..	45

Single man with dependents, same as married man; provided that no expenditure covering a period of more than one week in advance shall be incurred.

(e) There shall be deducted from any allowances authorized by the department, all income received by the family by way of earnings, investments or pension, so that the maximum allowances referred to in paragraph (d) shall be inclusive of all income.

(f) The department shall be authorized to make such regulations as may be necessary in respect of this authority.

2. That any expenditure made since the 28th May, 1921, out of Vote No. 521 for relief purposes be approved.

3. That the Department of Soldiers' Civil Re-establishment be authorized to expend the sum of fifteen thousand dollars (\$15,000) for the relief of former members of the Canadian forces who are in necessitous circumstances in the United Kingdom, such expenditure to be made through the office of the High Commissioner for Canada, the control thereof to be in the hands of the High Commissioner.

The Minister further recommends that a Governor General's warrant for the sum of one million five hundred thousand dollars (\$1,500,000) be issued for the purposes above set forth, this expenditure being urgently and immediately required for the public good and the Minister of Finance and Receiver General having reported that there is no parliamentary provision for the same.

The committee concur in the foregoing recommendations and submit the same for Your Excellency's approval.

(Sgd.) RODOLPHE BOUDREAU,
Clerk of the Privy Council.

SESSIONAL PAPER No. 14

P.C. 182

The Committee of the Privy Council have had before them a report, dated 23rd January, 1922, from the Minister of Soldiers' Civil Re-establishment, submitting that by Order in Council dated the 16th day of January, 1922 (P.C. 75), provision is made for the granting of relief by the Department of Soldiers' Civil Re-establishment to certain cases among former members of the forces and it is specifically provided that:—

- (a) "Those entitled to assistance shall be necessitous cases among former members of the forces who have been pensioned for a disability due to or aggravated by service in the Great War or former members of the forces who have received Vocational Training under the Department of Soldiers' Civil Re-establishment for a war disability which prevented the trainee from following his pre-war occupation; and
- (b) former members of His Majesty's Imperial Forces and former members of the Forces of His Majesty's Allies who have been pensioned for a service disability due to or aggravated by service in the Great War and have been residents of Canada for three months prior to making application."

In view of the fact that there is some doubt as to the correct interpretation of the terms "former members of the Forces who have been pensioned for a disability due to or aggravated by service in the Great War" and "former members of His Majesty's Imperial Forces and former members of the Forces of His Majesty's Allies who have been pensioned for a service disability due to or aggravated by service in the Great War," it is desirable to set forth explicitly the meaning and intention of the said terms.

The Minister, therefore, recommends that the following interpretation of the terms above quoted, which is in accordance with the original intention in this regard, shall be as follows:—

- (a) Men who are at present in receipt of a pension payable by or through the Board of Pension Commissioners for Canada or the Department of Soldiers' Civil Re-establishment for a disability due to or aggravated by service.
- (b) Men who have been paid a lump sum by agreement in settlement of pension under the provisions of the footnote to Schedule A of the Pension Act as amended by Chapter 62 of the Statutes of Canada, 1920 or, in the case of the former members of His Majesty's Imperial Forces or of the Forces of His Majesty's Allies, men who have received a similar settlement under the provisions of any Acts or Regulations of the Imperial or Allied Governments.

The terms shall not include

- (a) men who have been granted a gratuity at the instance of the Board of Pension Commissioners for Canada in lieu of pension, or, in the case of former members of His Majesty's Imperial Forces and former members of the Forces of His Majesty's Allies who have similarly been granted a gratuity in lieu of pension,
- (b) men whose pension has been discontinued owing to the fact that their service disability has disappeared.

The Committee concur in the foregoing recommendation and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,

Clerk of the Privy Council.

REPORT

OF THE

MINISTER OF AGRICULTURE

1920-1921

*To His Excellency the Duke of Devonshire, K.G., P.C., G.C.M.G., G.C.V.O., etc.,
etc., Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit to Your Excellency a report of the Department of Agriculture for the fiscal year ended March 31, 1921.

The work of the department was carried out in a most efficient and satisfactory way and there will be found included herein a summary of the operations of the different branches of the department, all of which is laid before Your Excellency under their respective headings.

The legislation affecting the department during the period consisted of:—

Chapter 3, 10-11 George V., intituled “An Act to amend the Animal Contagious Diseases Act.” (Assented to 11th May, 1920.)

Chapter 30, 10-11 George V., intituled “An Act to amend the Oleomargarine Act, 1919.” (Assented to 16th June, 1920.)

Chapter 47, 10-11 George V., intituled “An Act to regulate the Sale and Inspection of Commercial Feeding Stuffs, Beans, Shorts, Middlings and Chop Feeds.” (Assented to 1st July, 1920.)

Chapter 53, 10-11 George V., intituled “An Act to amend the Inspection and Sale Act.” (Assented to 1st July, 1920.)

Section 6 of An Act to Amend the Criminal Code, chapter 43 of the Statutes of 1920, 10-11 George V., provides for the supervision of betting on race tracks in Canada. The administration of this section is placed under the control of the Department of Agriculture, but as the racing season was almost over when the Act in question was passed, no steps were taken this year to put the section into effect.

A Proclamation under date of the 27th November, 1920, declaring that chapter 47, 10-11 George V., intituled “An Act to regulate the Sale and Inspection of Commercial Feeding Stuffs, Bran, Shorts, Middlings and Chop Feeds,” shall come into force upon, from and after the 1st day of January, 1921. (*Vide Canada Gazette*, vol. LIV, p. 2165.)

By Order in Council approved under date the 14th April, 1920, the General Regulations under “The Destructive Insect and Pest Act,” approved under date the 17th July, 1917, and amendments thereto, were further amended. (*Vide Canada Gazette*, vol. LIII, p. 3625.)

12 GEORGE V, A. 1922

By Order in Council approved under date the 30th April, 1920, the Special Cattle Mange Order for the provinces of Alberta and Saskatchewan and the Regulations respecting Mange in Cattle in the provinces of Alberta and Saskatchewan established by Order in Council approved under date the 8th June, 1911, and amendments thereto were rescinded, and amended special Cattle Mange Order and Regulations were substituted therefor. (*Vide Canada Gazette*, vol. LIII, p. 3809.)

By Order in Council approved under date the 1st May, 1920, section 26 of the Regulations established by Order in Council approved under date the 29th April, 1919, in virtue of the provisions of chapter 32, 7-8 George V, intituled "The Live Stock and Live Stock Products Act," 1917, was rescinded, and the following regulation substituted therefor:—

"26. The proprietor shall not permit the disposition in the yard of deads, downers, cripples, immature calves or calves under three weeks of age except, under the authority of the minister or inspector."

By Order in Council approved under date the 15th May, 1920, the Regulations respecting the Inspection of Meat and Canned Goods, established by Order in Council under date the 1st August, 1910, and amendments thereto, were rescinded and amended Regulations were substituted therefor. (*Vide Canada Gazette*, vol. LIII, Supplement to May 29, 1920.)

By Order in Council approved under date the 24th May, 1920, the Regulations under "The Destructive Insect and Pest Act" approved under date the 17th July, 1917, and amendments thereto were further amended. (*Vide Canada Gazette*, vol. LIII, p. 4121.)

By Order in Council approved under date the 31st May, 1920, the Special Cattle Mange Order for the provinces of Alberta and Saskatchewan and the Regulations annexed thereto, approved under date the 30th April, 1920, as published in the *Canada Gazette* of 8th May, 1920, were amended. (*Vide Canada Gazette*, vol. LIII, p. 4337.)

By Order in Council approved under date the 9th August, 1920, regulations were established in virtue of the provisions of "The Animal Contagious Diseases Act," chapter 75, R.S.C., 1906, governing the importation of hides, skins, etc., with a view to the prevention of the introduction of diseases into Canada. (*Vide Canada Gazette*, vol. LIV, p. 953.)

By Order in Council approved under date the 12th August, 1920, a Ministerial Order establishing Regulations in virtue of the provisions of "The Animal Contagious Diseases Act," chapter 75, R.S.C., 1906, governing the importation of wool and hair with a view to the prevention of the introduction of disease into Canada, was authorized. (*Vide Canada Gazette*, vol. LIV, p. 956.)

By Order in Council approved under date the 12th August, 1920, the Regulations prescribed under section 9 of "The Live Stock and Live Stock Products Act," approved under date the 29th April, 1919, were amended.

By Order in Council approved under date the 12th August, 1920, in virtue of the provisions of "The Animal Contagious Diseases Act," chapter 75, R.S.C., 1896, the Order in Council of April 30, 1920, and amendments, in connection with mange, and all Regulations made thereunder, were rescinded. (*Vide Canada Gazette*, vol. LIV, p. 1854.)

By Order in Council approved under date the 21st August, 1920, the Regulations under "The Animal Contagious Diseases Act," approved under date the 30th November, 1909, and amendments thereto, were further amended by adding—

"Section 88½.—No person shall deface, cancel or take out, wholly or in part, any permanent mark which under direction of the Veterinary Director General has been applied to cattle reacting to the tuberculin test." (*Vide Canada Gazette*, vol. LIV, p. 1855.)

SESSIONAL PAPER No. 15

By Order in Council approved under date the 21st August, 1920, the Order in Council approved under date the 28th November, 1919, amending certain Regulations under "The Destructive Insect and Pest Act," was rescinded and a Ministerial Order issued.

By Order in Council approved under date the 27th August, 1920, the Regulations governing the inspection of preserved fruits, vegetables and milk as approved under date the 15th June, 1918, were rescinded and new Regulations established in lieu thereof. (*Vide Canada Gazette*, vol. LIV, Supplement of September 4, 1920.)

By Order in Council approved under date the 30th August, 1920, the Regulations relative to the importation, manufacture and sale of oleomargarine in Canada, approved by Order in Council of the 5th February, 1920, were rescinded and new Regulations in lieu thereof established. (*Vide Canada Gazette*, vol. LIV, p. 952.)

By Order in Council approved under date the 6th October, 1920, the Order in Council approved under date the 20th May, 1920, permitting the importation of neat cattle from the United States of America into Canada free of duty by bona fide farmers and ranchers, was amended, to include sheep. (*Vide Canada Gazette*, vol. LIV, p. 1440.)

By Order in Council approved under date the 26th January, 1921, the Regulations under "The Animal Contagious Diseases Act," approved under date the 30th November, 1909, and amendments thereto, were further amended by revising section 39 thereof. (*Vide Canada Gazette*, vol. LIV, p. 3182.)

By Order in Council approved under date the 26th January, 1921, the Regulations under "The Animal Contagious Diseases Act," chapter 75, R.S.C., 1906, approved under date the 30th November, 1909, and amendments thereto, were further amended by adding:—

"Section 28½.—The agent of any railway or common carrier receiving cattle or other live stock for shipment shall attach to the way-bill accompanying such shipment the district health certificate relating to such cattle or other live stock whenever the owner or shipper possessing such certificate requests him to do so." (*Vide Canada Gazette*, vol. LIV, p. 3192.)

By Order in Council approved under date the 25th February, 1921, section 3 of the General Regulations under "The Destructive Insect and Pest Act," established by Order in Council as of date the 17th July, 1917, was amended by rescinding that part of it which read as follows:—

"Truro, N.S., and Digby, N.S., for nursery stock, destined to points in the province of Nova Scotia only, from March 15 to May 15, and from October 7 to December 7." (*Vide Canada Gazette*, vol. LIV, p. 3746.)

By Order in Council approved under date the 21st February, 1921, the Regulations established by Order in Council approved under date the 19th August, 1911, and amendments thereto, of date the 4th December, 1913, regarding the movement of horses in the provinces of Alberta and Saskatchewan, in virtue of the provisions of "The Animal Contagious Diseases Act," chapter 75, R.S.C., 1906, were rescinded. (*Vide Canada Gazette*, vol. LIV, p. 3533.)

By Order in Council approved under date the 21st February, 1921, the forms approved by Order in Council of date the 12th August, 1920, in connection with Regulations established in virtue of the provisions of "The Animal Contagious Diseases Act," chapter 75, R.S.C., 1906, governing the importation of wool and hair into Canada, were rescinded and new forms established in lieu thereof. (*Vide Canada Gazette*, vol. LIV, p. 3536.)

By Order in Council approved under date the 24th March, 1921, Regulations were established in virtue of the provisions of chapter 53, 10-11 George V, intituled "An Act to amend the Inspection and Sale Act." (To come into force on the date of their publication in the *Canada Gazette*.)

12 GEORGE V, A. 1922

Prior to the opening of the meetings of the General Assembly of the International Institute of Agriculture held in Rome in the month of November, this year, an International Conference was held at the Palace of the International Institute of Agriculture for the Organization of the Control of Grasshoppers.

A summary of the proceedings of this conference will be found as an appendix hereto. (See appendix No. 1.)

DOMINION EXPERIMENTAL FARMS AND STATIONS

The experimental work of the Experimental Farms Branch during the fiscal year closing March 31, 1921, has made considerable strides towards approaching normal conditions. It has not been found possible to take up, as yet, a great many lines of new experimental work, owing to several unfavourable factors, such as lack of adequate staff, difficulty in obtaining the specially trained men required, lack of land at several of the Farms and Stations, limited appropriations and the great difficulty experienced in getting approved our plans for building operations. During the year, at the Central Farm the new dairy building completed and also the poultry administration building, both supplying very much needed room and facilities for carrying on wider experimental work. On the branch Farms and Stations the building work was of a minor nature.

During the year the following publications were sent to press and at the year's close a number of manuscripts have been sent in and will be available to the public early in the coming year:—

In the regular series of bulletins—

No. 95. French-Canadian Horse.

No. 96. Farm Business in Quebec.

No. 97. Wheat, Flour and Bread.

In the second series—

No. 43. Wintering Bees in Canada.

No. 44. Investigation of Potato Diseases.

No. 45. White Burley Tobacco in Canada.

In pamphlets—

No. 29. Grande Prairie Capabilities.

In exhibition circulars—

No. 99. Mushroom Culture.

No. 100. The All-year Hog Cabin.

No. 101. Potato Growing in the Maritime Provinces.

In circulars—

No. 18. Alfalfa Growing in the Vancouver Island Districts.

A fairly complete, though much condensed, account of the work of each division and each Branch Farm during the year will be found in the sections following.

NOTES ON THE SEASON

The winter of 1919-20 was especially severe but there was, after all, very little winter-killing of fall wheat or clover, due principally to the depth of snow and to the late opening of spring. The seeding season was very late, but favourable weather caused very rapid growth. Growing conditions in the east were favourable throughout the season but, in some districts in the west, dry weather lessened crop yields materially. The average yield of wheat per acre for all Canada was 14½ bushels, as

SESSIONAL PAPER No. 15

compared with 10 bushels in the previous year. At average prices, the value of all field crops in Canada was \$1,455,244,050, as compared with \$1,452,437,500 in 1919. This increase in value was due chiefly to better harvesting conditions as average prices were lower, excepting in the case of hay, clover and alfalfa, the prices for which were the highest on record.

The following table gives some data as to the yield and value of the principal field crops in 1920. In the second table the members of the various classes of live-stock in Canada during the period 1915-20 are given:—

AREAS AND ESTIMATES OF YIELD AND VALUE OF FIELD CROPS, 1920.

Crop.	Area.	Yield per acre.	Total Yield.	Weight per measured bushel.	Average price per bushel.	Total Value.
	Acres.	Bush.	Bush.	Lbs.	\$	\$
Fall wheat.....	814,133	24-00	19,469,200	60-14	1-88	36,550,500

Swine.....	3,474,840	3,619,382	4,289,682	4,040,070	3,516,678

Experimental work, principally in the testing of varieties of cereals, forage plants, vegetables, and the hardier fruits, were carried on as usual at the Sub-stations at Swede Creek, near Dawson, Y.T., Salmon Arm, B.C., Fort Vermilion, Beaverlodge, Grouard, in Alberta, and at Forts Smith, Resolution, and Providence, in the North-west Territories.

The work at Fort Vermilion and Beaverlodge is quite extensive and some very valuable results are being obtained each year. A mass of data has been accumulated which will serve as an excellent guide, as to the possibilities of the districts served by these Sub-stations, to incoming settlers. At the other points mentioned above, the experimental work is much more limited in character. It is carried on under many special difficulties, such as poor transportation facilities, lack of adequate trained help, etc., etc., as well as the failures incident to severity of climate. However, gradually information is being collected as to the agricultural limitations of the districts in which these Sub-stations are located.

THE ANIMAL HUSBANDRY DIVISION

Another successful year may be reported by the Animal Husbandry Division. While no distinctly new lines of work have been inaugurated, the year has been a busy one and although handicapped at present by lack of trained assistants, readjustments within the division have facilitated the handling of ever-increasing routine, correspondence, and work at Ottawa and in similar lines on Branch Farms.

HORSES

The excellence of the working force of horses has been well maintained and the increasing amount of horse labour handled economically and expeditiously.

The stock of registered Clydesdale mares now assumes fair proportions, there being six high-class aged females. Breeding operations were successful in 1920, and the prospects for several foals in 1921, by well-known sires, look better than ever before. Conditions for the winter care and management of in-foal mares have been improved and the mares are in ideal condition for foaling. During the year another good stallion was shipped to one of the Maritime Branch Farms.

In the show-ring, exhibits have been made at Ottawa, Toronto, Guelph, and Chicago, with highly encouraging results. While this feature of the work is possibly only of temporary or intermittent value, the results have been, nevertheless, far-reaching from the advertising standpoint.

One highly encouraging feature of the work with horses has been the clearly proven fact that, by correct methods of treatment, joint-ill, once the bug-bear of colt rearing on this Farm, has been overcome. In fact, at present, it would seem that only the services of a really high-class stallion are required to establish a stud of the quality that should represent the great Scottish breed on the Central Farm.

BEEF CATTLE

By the acquisition of grazing rights on the Connaught Rifle Ranges, it has been possible to start beef cattle feeding on range. During the early summer, three carloads of high-class steers were purchased. These made excellent gains during the summer and it was intended that they should be used in feeding tests during the winter. However, they were of necessity brought on accredited herd premises, and on the application of the test some twenty head reacted and had to be sacrificed in an unfinished state and on a glutted market. The balance of the steers were fed in open sheds and are now ready for sale. Unsettled conditions in the beef market and consequent low prices will preclude any chance of profit, a condition unfortunately affecting practically every feeder of beef cattle in Canada. The necessity of application of the tuberculin test to steers which cannot be bought subject to test makes this project a precarious and doubtful one on this Farm.

DAIRY CATTLE

Four dairy breeds are still maintained, Holsteins, Ayrshires, Jerseys, and French Canadians. Fairly heavy purchases have been made. In the early part of the year, an importation from Scotland of Ayrshires of exceptional quality was made on the purchase of one of the staff. These consisted of twelve cows and a bull. Further Ayrshire purchases of over a dozen head have been made in Ontario and Quebec. Some eighteen head of high-class Holsteins have been purchased in Ontario; an addition of seven females and a junior bull has been made to the Jersey herd; while in French Canadians an aged bull was purchased, he being bred and sold some years ago by this farm, and out of the champion cow of the breed.

SESSIONAL PAPER No. 15

Unfortunately, during the year, further fairly heavy depletions were made by the tuberculin test as applied under the triple and combination methods. At present writing, however, it would appear from recent tests that the herd is nearer freedom from disease than has been the case during the past eight or ten years. Besides the regular herd, another, under the Bang System, is being operated, from which an excellent lot of calves have been taken.

Experimental feeding work has been considerably interfered with, as in the previous year, by reactions in the herd. Milking machine test work has been continued, two new machines having been added and changes made in others; tests of silages and rations are under way; several new feeds have been tested and numerous projects continued from the previous year.

Further study has been made of abortion, in the use of vaccines, treatment of infected cows, sterile cases, etc. It is gratifying to note that in this herd, once seriously infected with contagious abortion, the disease is apparently now in a controlled state. With two or three exceptions, the few abortions in the herd have been in cases left untreated, for experimental or check purposes.

Exceptional success has been met in the show-ring with cattle. Outstanding in the premiums were those of grand champion Ayrshire at Toronto and Ottawa, and the winning of sweepstakes at the Ottawa winter fair dairy test with a Holstein cow. Exhibits were made at Toronto and the Ottawa fall and winter fairs.

Many well-bred bull calves, from tested dams and proven sires, and tuberculin tested, have been disposed of to farmers and breeding associations. Every female in the herd, eligible and of age, is entered in Canadian Record of Performance. Practically all will qualify and some excellent records have been made. A number of good record of merit tests were made under more or less commercial conditions—one of over thirty pounds butter in seven days and several close to that mark.

THE DAIRY

During the early part of the year an excellent dairy building was built and was ready for occupation in the fall. This building is modern, commodious, convenient and excellently equipped from the commercial farm and experimental standpoints. While the supply of milk has been too limited to prevent such experimental work other than that of a routine or test nature, arrangements are now complete for the manufacture of several new lines of soft cheese and for other lines of dairy work connected with the farmer's problem of marketing his milk. Research and experimental work is seriously handicapped due to present inability to carry on bacteriological study. Proper quarters for such work have been provided in the new building.

SHEEP

The range facilities already referred to have greatly bettered the conditions of the two flocks, Leicesters and Shropshires. The effect of practically unlimited range and good pasture has been particularly noticeable in the quality and size of the lambs in the fall. Close selection, coupled with better facilities, has resulted in two really high-class flocks at present. Purchases during the year consisted of several imported Leicester ewes which came from Scotland with the Ayrshire cattle. The demand for pure-bred males was not so keen as during former years.

SWINE

Following several years extra effort in swine production, it was considered advisable to reduce the herd of Yorkshires and Berkshires with the idea of strict adherence to quality and type. This has been done.

12 GEORGE V, A. 1922

Limited purchases were made, consisting of a boar of each breed and two Berkshire sows. Several Yorkshire sows were bred to an imported son of Lord Rosebery's famous boar, Jellicoe, with resultant litters which have surpassed in quality those of the past several years.

Sales of pure-bred pigs have fallen off as compared with past years. Over four carloads of hogs have been marketed in Montreal and in the show-ring hogs from this farm have shown up well in strong competition at the Ottawa winter fair, notably winning sweepstakes in the dressed carcass competition.

Considerable experimental work has been carried on briefly as follows:—

1. *Experiments with Weaning Pigs.*

1. Basal Rations.
2. Basal rations plus animal and mineral supplements.
3. Home mixed versus commercial feeds.
4. Methods of weaning.

2. *Experiments with Growing and Fattening Hogs.*

1. Studies of feeds consumed per pound gain throughout the life of the market hog.
2. Indoor versus outdoor (dry-lot) summer feeding.
3. Mineral requirements of the indoor fed hog.
4. Green feed as a meal substitute where used as a soiling crop.
5. Commercial meals versus home-mixed.

Some excellent data have been collected—the testing of commercial meals, assuming considerable proportions and affording peculiarly timely information, which has already been disseminated through the press.

FEEDS

The feed market has been closely studied both with the idea of economical purchase and the opportunity of testing new feeds and by-products.

HEALTH OF STOCK

The following lines of work have received careful attention in so far as application and practical test are concerned:—

1. Contagious abortion. Tests of vaccines, treatment of infected and healthy cows, sterile cases and kindred ills.
2. The prevention and treatment of navel-ill in foals.
3. Studies of tuberculosis,—the various tests, the comparative results; the practical application of the Bang System; postmortem studies; building up a clean herd. Much of the foregoing study and observation has been made possible through the Health of Animals Branch.
4. Testing sheep dips, fly repellents, lice destroyers, etc., etc.
5. Treatment of parasitic infestation in swine and sheep.

EXTENSION WORK, CORRESPONDENCE, ETC.

Correspondence, necessitating reply of a detailed and specific nature, has been heavy. The call for information concerning buildings has increased and through the medium of a number of stock plans, much useful and specific information has been distributed.

SESSIONAL PAPER No. 15

A survey commenced last year in the province of Quebec and the results of which are already published, has been continued in a more far-reaching way. The complete report of this later survey (Farm Business in Quebec) is now in the hands of the printers.

BRANCH FARMS

As usual, the work on the Branch Farms has been closely followed. Assistance has been given in the purchase of feeds and stock; outlining and suggesting experimental work; collection and co-ordination of records, results of experimental and test work, etc. Building work has been practically at a standstill.

GENERAL

While routine test and experimental work has of necessity claimed much of the time of the staff, opportunities have been taken to do considerable judging at fairs and exhibitions, attend demonstrations, farmers' meetings, lectures, conventions, live-stock sales and meetings in general in Eastern Canada. During the year the Dominion Animal Husbandman has visited all Farms and Stations in Canada where live stock work is carried on.

DIVISION OF FIELD HUSBANDRY

Heavy yields of farm crops were secured in 1920 at the Central Experimental Farm. Oats yielded 76 bushels per acre, hay 3.2 tons per acre, and ensilage corn 17 tons per acre on the main farm crop. The average yield per acre on this Farm for nine years in comparison with the average yield in the province of Ontario is given below:—

	Central Experimental Farm	Average of Province of Ontario
Oats	61 bushels	36.5 bushels
Hay	3.1 tons	1.5 tons
Corn	15.2 tons	9.5 tons

While undoubtedly the cost per acre of producing crops at the Central Experimental Farm was much higher than was the average throughout Ontario, nevertheless the profit per acre was also much higher. These yields demonstrate how suitable varieties of crops and proper tillage of the soil give good returns, especially when it is considered that the soil on this Farm was, when originally acquired, of a poor quality.

COST OF PRODUCING CROPS

Studies on the cost of producing crops are being carried on at the Central Experimental Farm and at all the Branch Experimental Farms. In view of the present marked decline in the price of farm commodities, while the cost of operations to the farmers have dropped only slightly, and, indeed, in some lines have increased, the usefulness of cost of production studies is very significant.

Tractors are used at sixteen Branch Experimental Farms and at the Central Experimental Farm to supplement the work horses in the general farm work. As accurate records are kept of the cost of operation, useful knowledge is gained regarding the utility of this power for farm work.

EXPERIMENTS WITH ROTATIONS, CULTURAL METHODS AND DRAINAGE

On the prairie Farms the comprehensive experiments on rotations and cultural methods which were commenced many years ago are now affording invaluable information on the control of soil drifting, which has, in recent years, and especially in 1920, become so menacing a problem to many farmers. These experiments have also given much information on rotations suitable for different types of farming and on cultural methods adapted to different districts and soils.

12 GEORGE V, A. 1922

Owing to the one-crop system of prairie farming, methods once widely used and very satisfactory have now become absolutely useless; these experiments have supplied knowledge which will enable farmers to change at once to a new system, without incurring financial loss.

On the eastern Farms, rotation experiments are being commenced. Drainage work has shown the cost of installing drains and the benefit derived. Experiments appear to indicate that tile in most soils may be laid somewhat shallower than three feet from the surface of the ground with better results than at three feet—the usual depth at which tile are laid.

A chief of the Division of Field Husbandry was appointed in August, 1920.

THE HORTICULTURAL DIVISION

Horticultural work is conducted on practically all the Experimental Farms and Stations, although on some more attention is paid to horticulture than on others, it being the aim to specialize in this work at a few places representing, to a great extent, large sections of Canada. In the Maritime Provinces the Experimental Station at Kentville, N.S., has large orchards and other horticultural plantations where many experiments of interest to the horticulturist are carried on. The Central Farm at Ottawa serves a large part of the province of Quebec and much of Ontario. At the Experimental Station, Morden, Man., a large area has been planted to fruit trees as it is hoped to make this Station the centre of horticultural work for the prairies. In British Columbia the Experimental Station at Summerland, in the Okanagan valley, is the one where the largest area is devoted to horticulture, but much attention is paid to it at the Station at Sidney, on Vancouver island, also, as the climate is so unlike that in the upper country.

At the Experimental Station at Kentville, N.S., one of the most interesting experiments in 1920 was that with English varieties of apples. There is a large collection of these there and many varieties fruited. Such a large proportion of the Nova Scotia crop goes overseas that it is important to grow varieties that suit the British consumer, and a few of the best apples grown in Nova Scotia are of British and European origin, such, for instance, as the Blenheim, Ribston, and Gravenstein, with which the British consumer is very familiar. Out of the large collection at Kentville it is hoped there will be found a few more which are well adapted to the Maritime Provinces. A collection of these sorts aroused much interest at a meeting of the American Pomological Society at Columbus, Ohio, where they were shown last autumn. The test with fertilizers for orchards at Kentville is of much interest to the fruit growers. One outstanding feature of the work in 1920 was that nitrate of soda should be used with care as there is danger of having trees grow too late, and be injured by winter in some seasons, as was the case last year in some experiments where nitrate of soda was used.

The orchards at all the Stations in the Maritime Provinces, and at Cap Rouge, Ste. Anne de la Pocatière, and Lennoxville, in Quebec, are now bearing fruit, and much valuable information was obtained in 1920 as to the merits of many new varieties that are being tested.

At Ottawa the breeding work received much attention in 1920, as it has in previous years. It is felt that making better varieties available to the fruit-grower will help him financially as there is room for great improvement in many sorts that are generally grown. As new varieties of merit originated at Ottawa had been thoroughly tested and found superior to others, it was decided this year to offer these for sale as rapidly as a stock could be worked up, as it is believed that in this way it will be possible to have them grown generally in a comparatively short time. When nurserymen have these special varieties in large enough numbers to supply the demand, the propagation of them for sale will be discontinued. Since this policy was announced there have been many applications for these new varieties.

SESSIONAL PAPER No. 15

Some of those which are being propagated for sale are:—

Apples.—Melba, Joyce, Patricia, Lobo, and Pedro.

Plums.—Rideau, and Ottawa.

Grapes.—Craig.

Raspberries.—Brighton and Count.

Black Currants.—Kerry, Climax, Magnus, and Saunders.

Gooseberries.—Mabel and Charles.

Strawberries.—Portia, Hermia, Cassandra, and Mariana.

Many other new and promising sorts are under test, but, as the number of varieties offered for sale are already too numerous, it is not desired to introduce a variety unless it has distinct advantages for some part of Canada.

The native plum of Eastern Canada has many points of merit, being very hardy and productive, and bearing fruit having a thinner skin than most of the other wild plums. It ripens early, and where fruit-growers have put it under cultivation it has proved very profitable. There is great room for improvement in the fruit, however, as larger varieties are desired and with somewhat improved quality. The Rideau and Ottawa are two of these. Earliness, however, is a very desirable quality as these plums can be put on the market when there is little else in the plum line except those shipped from California. It is hoped to introduce shortly some improved types of this plum, and from the hybrids between this plum and the Japanese, which have been originated, other desirable sorts will come. There is such a very large area in Canada where the best plums cannot be grown that there is great room for hardier and better sorts. There was a good crop of plums in 1920.

The McIntosh apple is, perhaps, the most popular variety in Canada to-day, although the Northern Spy is a close rival. Special attention has been paid in the Horticultural Division to originating new sorts having the McIntosh characteristics yet being of a different season to McIntosh, and in the varieties being propagated for sale, which have been already mentioned, are some which will surely take a prominent place in Canadian horticulture in the future. Exhibits of fruit of these promising sorts were made in 1920 so that they they could be seen by a large number of people.

Cultural experiments with vegetables and ornamental plants were continued in the Horticultural Division at Ottawa in 1920 as usual. The new varieties of vegetables originated there have given a good account of themselves with many experimenters. Further confirmation of the value of home grown seed of good strains of the standard varieties of vegetables was also obtained in 1920.

In the greenhouses, experiments were continued with the principal greenhouse crops such as tomatoes, cucumbers, melons, and lettuce, and valuable data obtained.

At the Experimental Station, Morden, Man., quite a number of the apple trees began to fruit in 1920. Southern Manitoba has proven much more favourable for the growing of this fruit than other parts of the prairies, and there is no good reason why large quantities should not be grown if the trees are protected from rabbits, which seem at present to be the greatest drawback to the successful cultivation of hardy apples there, as they did much damage during the winter of 1920-21.

Much attention was paid to the potato in 1920 as there is a great demand for good seed potatoes on and from the prairies, and varieties and methods of culture are being studied.

The Mennonites in Southern Manitoba have paid much attention to melon growing for many years, having succeeded in growing both watermelons and muskmelons of good quality near Morden, and the Experimental Station there is following this up by careful experimental work.

The Experimental Station at Summerland, B.C., has proved a very popular one among fruit growers, as it has given them an available bureau for reliable infor-

12 GEORGE V. A. 1922

mation. The experiments in different methods of irrigation, cultivation, and cover-cropping are beginning to give interesting results, which will be most valuable both to the experienced growers and to newcomers. Experiments with vegetables are conducted on a fairly extensive scale at this station as early vegetables have proved very profitable in this district, and it is desired to have reliable information for those who want it.

The climate of Vancouver Island is the mildest in Canada, and many economic plants may be cultivated there that cannot be grown successfully in the open in other parts of the Dominion, and, while the commercial planting of some of these would not be profitable, it is interesting that the plants thrive here, and shows the mildness of the climate. Among those which were growing at the Experimental Station, Sidney, in 1920, to which attention may be drawn, are the olive, almond, fig, persimmon, and tea plant. Here also the English filbert and English walnut succeed better than anywhere else in Canada so far as tests have been carried out. Experimenting with bulbs was continued successfully at the Sidney Station in 1920, the tulip, narcissus, and hyacinth multiplying well. Conditions are favourable for bulb growing owing to the long growing season which favours reproduction and the dry summers which make conditions good for curing the bulbs.

THE CEREAL DIVISION

THE SEASON

Cereal crops during the year 1920 were better than those reaped the previous year in a great many districts, but they fell far short of a maximum yield, except in certain highly favoured localities. The main difficulty was drought, though plant diseases and destructive insects were serious in some cases.

At Ottawa, conditions were fairly favourable and good crops were harvested in spite of the discouraging drought which occurred in the early part of the season. May was a very dry month, with scarcely any rain at all. The result was that the grain in some cases, not having been sown deep enough to come into contact with the soil moisture, lay imbedded in dry earth for weeks before sufficient rain fell to start germination. However, June proved to be a good month, favourable for cereals. July was exceptionally cool with an abundance of rain and some storms which caused part of the grain to lodge rather badly. Very hot weather occurred early in August which brought the crops on rapidly to maturity.

In the provinces lying east of Ontario, cereal crops were generally very good, while in the great central and western provinces drought, rust and insects caused damage. A larger crop than that of the previous year was obtained, but it was smaller than had been looked for.

TESTS OF VARIETIES

The total number of varieties under test at Ottawa is being steadily reduced because it was found impracticable to carry on such a large number of tests as was called for by the long list of sorts formerly under trial. About 700 varieties were tested last season. The number tried at the Branch Farms and Stations was considerably smaller than this.

NEW VARIETIES ORIGINATED AT OTTAWA

The new wheat, Ruby Ottawa 623, has attracted a good deal of attention and has received much favourable comment since the last report was issued. It is particularly adapted to the northern parts of the settled areas in all the provinces from Quebec to Alberta. This variety won some important prizes at the seed fairs—particularly at Saskatoon, Sask.—which naturally brought it into special prominence.

SESSIONAL PAPER No. 15

The Liberty, Ottawa 480 oat—a variety which loses its hull in the threshing machine—is arousing much interest. Farmers are beginning to realize how valuable this oat will be in the raising of chickens and pigs. Last season we were obliged to refuse many requests for samples of this variety; but this season we had enough seed to supply all those who applied within the time-limits set (September 1 to February 1). About 2,500 samples have been sent out.

The new, very productive field pea, Mackay Ottawa 25, was distributed this year for the first time. Many new cross-bred varieties of cereals and peas are now nearing the end of their preliminary tests. It is expected that some of the most valuable of these will be named and introduced to the public very soon.

DISTRIBUTION OF GRAIN SAMPLES

The usual distribution of free samples of grain was carried on. The number of applications received was not quite so large as in some previous years, but, by the close of the season, which has now almost come, considerably more than 8,000 of these samples will have been sent out. The varieties chiefly in demand are Liberty (hulless) oats, Banner oats, Marquis wheat and Ruby wheat. There are always very many requests received for peas also. Arthur and the new sort, Mackay, are the two sorts distributed this year. There is also a good demand for samples of beans and flax, two sorts of crops of which the seed was distributed last season for the first time.

The reports which come in each year from the farmers to whom samples were sent, the previous winter, have steadily improved in quality during the past ten years. While doubtless some seed is wasted in a general distribution of this kind, many of the reports indicate the keen interest taken by the farmers in the excellent samples which they receive from Ottawa and show that they are able and willing to take proper care of them, and use them as a basis from which to obtain a new stock of improved seed for their farms.

MILLING AND BAKING TESTS

These tests were continued this season chiefly with a view to completing some studies on the effects of prolonged storage on flour and also in order to ascertain the baking qualities of a number of new, early-ripening, cross-bred wheats which are now on hand at Ottawa. The number of test loaves made in these experiments was 292, and the number of varieties studied was 86.

PUBLICATIONS

No new bulletin was issued in this division this year, but the manuscript was submitted and is now in the printer's hands for a rather large bulletin in which will be included the results of many investigations carried on in the Cereal Division during several years. This bulletin, which will be entitled "Wheat, Flour and Bread," will be of interest not only to scientific investigators, but also to farmers, millers, bakers, physicians and the public generally.

DIVISION OF FORAGE PLANTS

VARIETY TESTS

The usual variety tests with Indian corn and field roots were carried on at the Central Experimental Farm and on the branch Farms and Stations.

Concerning variety tests with field roots, a change in policy has been found advisable on account of the general falling-off in quality of root seed in general during the last few years. Instead of supplying the branch Farms and Stations

12 GEORGE V, A. 1922

with seed for variety tests from Ottawa, as has been the rule in the past, the superintendents have been requested to furnish the seed themselves, taking care that as many as possible of the varieties sold in the districts which the various Farms and Stations are serving are being secured. It is not the intention to publish the results of the tests with the names of the various seedsmen given. Any seed dealer, varieties from whom have been tested and who so desires will, however, be supplied with information appertaining to the results of the tests with his own varieties.

SUNFLOWERS

Owing to the deep interest recently taken in the growing of sunflowers for ensilage, quite extensive experiments were carried out, particularly in the western provinces. The results obtained so far are, however, somewhat conflicting and, on the whole, insufficient to allow safe conclusions to be drawn. More experiments are needed before anything definite can be said, either for or against introducing sunflowers as an ensilage crop.

ROOT SEED GROWING

During the last few years considerable information has been accumulated on root seed growing. Particular attention has been paid to questions relative to seed growing as a business undertaking and several experiments have been conducted with a view of ascertaining what principal factors are influencing the seed yields. Thus, early planting, comparatively close spacing of the seed-producing roots in the rows, and a high state of fertility of the soil have been found to be essential for large yields.

The importance of growing the seed on rich land was particularly well demonstrated this year. Half an acre planted to Yellow Intermediate mangel on very rich land gave 1,020 pounds of first-class marketable seed, i.e., over 2,000 pounds to the acre, and this in spite of the fact that a considerable quantity of seed was lost on account of shattering due to a hailstorm when the crop was in stocks. Half an acre of carrots planted alongside the mangels yielded 575 pounds of seed, or at a rate of 1,150 pounds per acre. The above yields are record yields for the Ottawa district.

BREEDING WORK

When the world war broke out, the Division of Forage Plants had a considerable amount of breeding work well under way, particularly with field roots, red clover, alfalfa, timothy, western rye grass and sundry other grasses. Owing, however, to the necessity of devoting much time and labour to the production of emergency seed crops of field roots, the division was forced to curtail the breeding work to a large extent. For the same reason it was found impossible to take up new lines of work.

Although, under the circumstances, comparatively small progress was made in so far as the actual development of new varieties of a superior type is concerned, yet considerable work was done preparatory to a resumption of breeding work on an extensive scale as soon as the abnormal conditions arising out of the war should begin to disappear. Thus, many observations on the relative merits of various breeding systems were made which have resulted in much improved practical methods, making it possible to proceed with breeding of grasses, alfalfa, and clovers at a higher rate of speed and at the same time with a greater assurance of reliability in the results aimed at than it was possible to achieve with the breeding methods formerly employed. Much material of the principal grasses and clovers suitable as foundation stock for the development of new varieties, was also collected during the war years and kept ready for use as soon as conditions would allow breeding work to be resumed.

SESSIONAL PAPER No. 15

In the spring of 1920 the division was therefore ready to resume breeding with quite a number of forage plants, including timothy, meadow fescue, orchard grass, Kentucky blue grass, red top, Tall Oat grass, alfalfa, alsike clover, white sweet clover, in addition to breeding of field roots, red clover, and western rye grass, which latter crops were worked with during the war.

Not less than 140,000 individual plants were potted and transplanted in the field for breeding purposes during 1920.

SOME RESULTS OF BREEDING WORK

Field Roots.—Quite conspicuous results have been achieved, through breeding, with mangels and carrots. Of the former has been developed, from a very uneven and variable sample of commercial Yellow Intermediate, a uniform variety of high dry-matter content, and of the latter has been developed a uniform variety from Danish Champion, which in all respects is more satisfactory than the original type.

Red Clover.—As a result of breeding a red clover has been developed which, judging from experience so far, is not only hardier than ordinary red clover but also more durable because it contains an unusually high percentage of perennial types. A block of the new clover is now being propagated for comparative tests throughout the Dominion.

Western Rye Grass.—About one hundred and forty uniform and constant varieties are this year growing at the Central Experimental Farm. Of this number thirteen were sufficiently advanced to be tested for comparative hay and seed productiveness. Such a test has revealed that extraordinarily great differences exist in the yielding power of different varieties. Out of the thirteen varieties referred to one was found to yield nine times as much hay as the poorest one and three over seven times as much as the poorest one. The highest yielding variety produced over twice as much hay as the average of the remaining twelve.

As the ordinary western rye is a mixture of poor and good types, the isolation of the latter and their development into uniform varieties is evidently of great importance.

A number of the best varieties will be sent for comparative tests at the branch Farms and Stations throughout the West next year.

THE POULTRY DIVISION

The work of the Poultry Division for the past year has continued to develop fairly satisfactorily. A number of the plants at the seventeen branch Farms have been extended in order better to conduct investigations and to secure more experimental data.

The general lowering of feed prices has stimulated the poultry industry throughout the whole country. This stimulation has been helped by the fact that prices received for poultry products have not decreased in comparison with the feed, but as a rule, have held their own, practically throughout the entire year. The one exception has been the price received for eggs during the spring months, it having decreased earlier this year than usual, owing largely to the extremely mild winter throughout America.

The application for general information has kept up to normal, if not increased, and during the spring months the inquiries for information on incubation and brooding have been higher than usual. The demand for eggs and chicks also indicates an increased interest throughout Canada and it looks as though 1921 would be a fairly good year for production, the low prices for eggs will increase consumption and the favourable weather this spring will help in the rearing of the young stock.

12 GEORGE V, A. 1922

A very brief summary of the work of the year follows:—

BREEDING

The pedigree breeding work conducted at the Central Farm and at a number of the Branch Farms is producing results. Each year brings a larger number of high producers, which in turn are able to transmit their producing qualities to the offspring. More than ever, attention is drawn to the fact that high production can be secured in Canada, and a few instances of production on the Experimental Farms may be noted:—

The twelve breeding pens at the Experimental Station, Kentville, N.S., are full of birds that in their pullet year laid an average of 197 eggs. It was at this Station that one Barred Rock pullet laid 104 eggs in 104 days. The Experimental Farm at Indian Head, Sask., last year with 105 pullets gave an average of 183.7 eggs, the highest being a pullet with 292 eggs. This pullet is a daughter of Prairie Queen that last year gave 259 eggs. At Lethbridge, Alta., a selected pen of 55 pullets hatched in March and April gave an average of 203 eggs in one year from the time the first egg was received from the flock. The highest individual production was 265 eggs. The Brandon, Man., Farm had a Contest pen record last year of 2,041 eggs for 10 birds, an average of 204 eggs. On the Vancouver Island Station, Sidney, B.C., a White Wyandotte flock of 200 pullets gave an average of 195.97, 29 of which were above 175 eggs, 82 above 200, and there a production of 300 eggs a year has been reached. At this Station the standard has been raised so that now no bird is kept for breeding if she does not lay 200 eggs the first year and no cockerel retained if his mother laid less than 250 eggs in her pullet year. These records show the value of selection through pedigree breeding and they also show that all sections of Canada are suitable for egg production.

FEEDING

Experimental work on feeding has been conducted at both the Central Farm and a number of the Branch Farms, and though the experiments are by no means complete the chief lines of experiment being the use of different meshes for egg production, a comparison of semi-solid and fresh buttermilk as poultry feed, and the use of taukage versus beef scrap.

BEST AGE FOR PRODUCTION

Each year, the month the pullets are hatched on the Farm system is noted, and the yearly production computed. Each year indicates that April is the best month to hatch layers.

COST OF PRODUCTION

Figures on cost of production have been secured at several of the plants as well as at Ottawa and the contests form good media for obtaining cost figures and are included. It will be noted that the figures given below are for cost of feed only. No estimate is given for buildings, depreciation or labour. It might be of interest, however, to note that, for an average flock, one hour per day should be more than sufficient labour for 100 hens. This hour a day should cover all the general work in connection with the plant and the incubation and brooding as well. Where trap-nests are used and records kept, it costs about \$2 per hen per year more to attend to them. This cost of course, varies with the number of birds and the convenience, but it may be taken as a fair average.

Cost of Producing Eggs in the Canadian Contest Last Year

For the first 16 weeks, November 1 to February 22, the Barred Rocks laid an average of 25.8 eggs at a cost of feed of 97.8 cents, the Leghorns 21.4 eggs at a cost

SESSIONAL PAPER No. 15

of feed of 80.4 cents. The cost per dozen for these months was Rocks 45.1 and Leghorns .45. For the whole period of 52 weeks, the Rocks averaged 147 eggs at a cost for feed of \$3.10, or cost per dozen of 25.3 cents. The Leghorns laid 154 eggs each and feed cost 2.63, each dozen costing in feed 20.4 cents.

INCUBATION

At the present time there is in operation on the Experimental Farms system a variety of incubators, including locally manufactured lamp and electric machines, lamp machines found on sale in the various provinces, and a considerable number of mammoth machines with capacity of from 1,200 to 2,400 eggs, and one large mammoth machine, 10,400 egg capacity, at Ottawa.

As a rule, where more than 100 chicks are to be hatched, an incubator is advisable. Where several hundred chicks are to be hatched a small type of mammoth machine cut down the cost of operation and gives space for custom hatching and the sale of day-old chicks.

The 10,400 egg machine which has been used at Ottawa for the past two years was not a decided success, but this spring, with the new incubator cellar, the manufacturing company installed a more up-to-date machine of the same type, and at the present time the results are quite satisfactory. Good, strong chicks and a fairly high hatch are being recorded.

BROODING

Practically all of the Farms on the system have adopted the colony stove system of brooding, a small coal-burning heater which will accommodate from 200 to 500 chicks. These brooders are placed in colony houses or other suitable shelters, and have proven quite satisfactory.

At Ottawa and several of the other Branch Farms where earlier hatching is desired, the pipe brooders have been installed and for hatching during the later winter and early spring, the pipe system is satisfactory, but for general brooding the colony stove is to be recommended.

Plans of brooder houses and brooder equipment may be had from the Poultry Division, Central Experimental Farm, Ottawa, Ont.

DISEASE WORK

Dr. Wickware has been in charge of poultry disease work throughout the year and has conducted some valuable investigations in roup, canker, chicken-pox, parasites, etc.

EXTENSION

Under this section come matters that do not primarily belong to investigational work, but are conducted in order to present results of investigations to the public and to gain from actual conditions information of considerable value to the division. These include exhibits, farm egg and poultry accounts, egg-laying contest, bulletins, etc.

12 GEORGE V, A. 1922

Exhibitions.—The demand for the very instructive exhibit which is sent out increases each year and to such an extent that the division is not able to comply with all requests. All these exhibits are conducted through the Extension and Publicity Division of the Experimental Farm.

Farm Egg and Poultry Accounts.—This is another phase of extension work which is proving very valuable, judging from the interest taken by the public and the mass of valuable data received by this Division.

Inspection.—The inspection carried on consists of supervision of the Egg-Laying Contests throughout Quebec and the Maritime Provinces.

Egg-laying Contests.—On the 29th of October, 1920, the first series of egg-laying contests conducted by the Experimental Farms closed, and on November 1, 1920, the second series started. The interest evidenced by the number of entries and the demand for reports and information have grown considerably. At present there is a contest in each province and the Canadian contest at Ottawa. Applications are already coming in for next year's contest.

Bulletins.—Bulletins No. 87, No. 88 and No. 89 being exhausted, have been rewritten during the year, and also a number of the exhibition circulars. The correspondence, the demand for blue-prints, circulars, bulletins and other information have increased materially during the year as has also the number of visitors at the Central plant and the Branch Farm plants throughout the system. In fact the poultry plants have been one of the connecting links between the public and the Farm. Everybody is more or less interested in poultry and the good price received for the product has made people anxious to get the best returns possible.

DIVISION OF CHEMISTRY

The larger part of the work of this division falls into one or other of the following classes: investigation, chemical service, and control. The investigational or research work upon the solution of agricultural problems is of prime importance and naturally receives first attention, for such must be recognized as the special object and function of a scientific institution established to promote and aid the welfare and development of agriculture. It is generally admitted that no material progress can be made in the industry unless science shows the way and lays the foundation. Chemical service is that phase of the division's activities which puts the division in touch with the man on the land, rendering him direct assistance of an educational, advisory and analytical nature which will help him to obtain better and larger crop yields and to feed his stock more profitably. This work is carried on chiefly through correspondence, and by the examination of samples of an agricultural nature—soils, feeds, well waters, etc., sent in by farmers. This direct service to farmers has wonderfully increased of late years; it is more and more appreciated and used. We must believe that it is taking a valuable and important part in the general improvement of agriculture throughout the Dominion. This important phase of work now occupies a larger share of the time of the staff, but the results fully justify the expenditure; its influence is wide and must affect for good the agricultural practice of the country. The control work undertaken has been chiefly that required by the Health of Animals Branch, Meat and Canned Foods Division, comprising the examination of samples from the packing-houses and canneries of the Dominion and of those submitted in the administration of the Oleomargarine Act. The Chemical Division has also done a considerable amount of investigatory and analytical work for several branches of the Government service, e.g., Post Office Department, Department of the Interior, Department of Naval Service, etc., and the several commissions and boards in connection with the soldiers' re-establishments and settlements.

The register of the division shows that during the fiscal year ending March 31, 1921, the total number of samples received and reported on was 3,734. Of these,

SESSIONAL PAPER No. 15

1,896 were of a purely agricultural nature and for the most part submitted by farmers, 1,065 were packing-house and cannery products analyzed for the Meat and Canned Foods Division, Health of Animals Branch, and 773 were of flour examined for the Wheat Export Company and the Canada Wheat Board.

A number of the more important investigations in course during the year may be cited as follows:—

The influence of seasonal and soil conditions on the composition of wheat.—This comprises the analysis of wheat grown on the several Farms and Stations of the system throughout the Dominion and the correlation of the analytical results with data from meteorological and field observations. The importance of such an inquiry to Canadian agriculture is obvious.

The composition and nutritive value of sunflower silage.—Since the sunflower crop promises to be a more or less satisfactory substitute for corn in districts in which the latter crop cannot, by reason of seasonal conditions, be grown profitably, the results of this work will be of considerable interest. The series analyzed contained samples of the silage from the larger number of the western Experimental Farms and Stations. It is evident that if the silage is to be palatable and nutritious the crop must be cut before there are any appreciable signs of ripening.

Sugar beets.—The investigation to ascertain the suitability of soil and climatic conditions in the several provinces to the growth of sugar beets for factory purposes has been continued. The work includes the analysis as to richness and purity of certain varieties of recognized merit, grown on the several Farms and Stations of the system. The data are of value in indicating districts in which the beet sugar industry, in so far as the quality of the beet is concerned, might be successfully prosecuted.

The Composition of farm roots.—A large number of varieties of mangels, turnips and carrots has been analyzed. The results show that very large differences in dry matter and sugar content may exist between varieties in the same class of root. It is evident therefrom that yield and keeping qualities are not the only factors to be considered when selecting the varieties to grow.

Commercial feeding stuffs and mill feeds.—A large number of these, collected throughout the Dominion has been analyzed. The series includes all the principal feeds on the market. The results furnish information of the most practical nature and will greatly assist the farmer and stock raiser in his choice of purchased concentrates.

Nitrogen compounds in rain and snow.—The work in connection with this determination has been continued. The data indicate that there is furnished from this source between 6 and 7 pounds of nitrogen, per acre, annually, in forms readily available in plant food.

Soils in southern Alberta.—Very considerable progress has been made in the reclassification of lands in irrigable areas in this province. The work involves the chemical and physical examination of typical soils, and the determination of "alkali" in suspected samples, allowing the final classification into irrigable and non-irrigable parcels. Soils from areas under consideration for reclamation by drainage in Alberta and Saskatchewan have also been examined and reported on as to suitability for cultivation. This work is undertaken at the instance of the Reclamation Service, Department of the Interior.

INVESTIGATIONAL WORK WITH FERTILIZERS

This work is being carried on at ten of the Farms and Stations of the system and has furnished data of considerable value and interest.

12 GEORGE V, A. 1922

In Experiment No. 4, which has completed its eighth year, at Kentville, N.S., the fertilizers (without barnyard manure) are applied twice in the three-year rotation. The results from the eight-year period show the most profitable mixture to have been one composed of 185 pounds nitrate of soda, 415 pounds of superphosphate and 185 pounds muriate of potash per acre. Next in order of profit was a mixture of 150 pounds nitrate of soda with 500 pounds of basic slag (without potash) which proved distinctly most effective on the grain and hay crops of the second and third years of the experiment.

In Experiment No. 5 (fertilizers with and without ground limestone) the potato crop of 1920, the seventh since the commencement of the experiment, showed decreased yields for the plots in the limed area—a result in striking contrast to those from former years. The explanation may be that the crop on the limed plots having matured earlier, derived less benefit from late rains which caused a resumption of growth on the unlimed plots.

Experiments to discover the influence of phosphoric acid in promoting the maturity of corn and cereals were commenced in 1919 and continued in 1920. In all eight tests were made—three with corn and five with wheat. In no single instance was there any noticeable difference in the degree of maturity between treated and untreated plots at harvest time, nor was any appreciable increase in yield recorded.

In Experiment E, concluded, at Agassiz, B.C., the most significant feature was the remarkable response to nitrate of soda by the grain crop of the second year. In the unfavourable season the average yield of oats from the plots (fertilized the previous year) was only 20.3 bushels, whereas with applications of from 133 to 266 pounds nitrate of soda per acre to the oats, the yields were from 45 to 73 bushels per acre.

WOOL EXAMINATION

Wool samples to the number of about 200, from the several provinces of the Dominion, have been examined and their loss on scouring determined. This work was undertaken for the Sheep and Goat Division, Live Stock Branch, the results to be used in the valuation and grading of native wools. This is the first work of the character undertaken in Canada.

The work for the Meat and Canned Food Division, Health of Animals Branch, has included the critical examination of 1,269 samples. These comprised lards, tallow, oils, preserved meats, sausages, mince meats, preservatives, denaturing oils, colourings and dyestuffs, pickling solutions, spices and condiments, evaporated apples, butters, oleomargarines, condensed and evaporated milks and other products of the packing houses, canneries, etc., under the supervision of the Government.

DIVISION OF BOTANY

PLANT PATHOLOGY

A systematic survey of the plant diseases prevalent in the Dominion during the past year did not reveal any unusual losses—such as occurred, for instance, during the grain rust epidemic in 1916. However, the general loss from all kinds of diseases is considerable each year, and the officers of the division find themselves fully occupied in investigatory and extension work.

It has been the policy of the division mainly to attend to the important problems—such as those of more or less national character. Thus the potato disease control aimed at by a system of seed inspection and certification becomes wider and wider in scope. The white pine blister rust work clears the situation year after year, and the grain rust investigations carried on in the west make satisfactory progress. Yet many phases of work await attention. It is hoped soon to commence systematic work in British Columbia on the problem of the control of fire blight, which has been doing considerable damage in the pear and apple orchards of that province.

SESSIONAL PAPER No. 15

The experimental activity of the division extends throughout the Dominion, and during the year the results of some five years' work on certain constitutional diseases of the potato were carefully compiled and will appear in the shape of a special bulletin. Other experimental data are being published more fully in the report of the Experimental Farms. The routine work, including preparation and free distribution of nitro cultures, as well as advisory work in plant pathological matters, has been continued with very satisfactory results. The members of the staff have rendered most satisfactory services.

ECONOMIC AND SYSTEMATIC BOTANY

Many requests of the usual kind in reference to weeds, poisonous and medicinal plants, and other plants of economic importance were received. Altogether 550 specimens were received for identification.

The Annual Exchange List of Seeds, containing 511 species, was sent out to the leading botanical gardens in foreign countries. During the year 642 packets of seeds and two species of rooted plants were received from other countries, and 677 packets of seeds and ten species of rooted plants and cuttings were sent out.

Plots were again devoted to climatic tests on the culture of broom corn, sunflower, soy bean, castor-oil plant, and hemp, with satisfactory results.

Experiments carried out on the eradication of various weeds by the use of "Atlas A" Weed Killer showed its value for this purpose.

A press article on "Oil-bearing Seeds" was published during the year.

THE TOBACCO DIVISION

The season of 1920 was not very favourable to tobacco growing, yet the 1920 harvest was the largest ever obtained in Canada. According to statistics gathered by this division, the production of tobacco in Ontario amounted to about twelve million pounds, and that of Quebec has been roughly estimated at from ten million to twelve million pounds.

In the tobacco-growing centres of northern Quebec the tobacco crop suffered considerably from seasonal conditions up to the beginning of August. From that date, however, the crop grew rapidly and although the tobacco leaf in general was shorter than usual, the harvest was an abundant one. In the Yamaska Valley district of southern Quebec the crop suffered less in the beginning of the season and gave a yield much better than the average, and also a greater proportion of leaves of sufficient length to be classed as cigar wrappers.

Prices, which had arisen considerably during 1918 and 1919, fell very low during the autumn of 1920. This brought on a serious crisis and the greater part of the tobacco crop was sold by the growers at less than cost price. The cause of this crisis was doubtless over-production in 1919 and 1920, coupled with decreased demand. It will be necessary to reduce considerably the area planted in tobacco in 1921 if still more serious loss is to be avoided.

The experimental work on the Harrow Tobacco Station was continued and, speaking generally, confirms the results obtained in previous years.

In Ontario the growing of tobacco continued to spread more and more towards the east along the north shore of lake Erie. A new area in the neighbourhood of Simcoe seems to have a real future before it in the growing of White Burley tobacco, and also of yellow, flue-cured tobacco of the Virginia type. In the county of Norfolk there are found wide areas of light land which would seem to be specially suited to the production of these yellow tobaccos. It is yet to be seen whether the season is long enough to permit of the maturing of such varieties in that district, but, although

12 GEORGE V, A. 1922

the season of 1920 was not very favourable, it was found possible to obtain in Norfolk some crops of yellow tobacco, comparable as to quality with those of the tobacco-growing districts of Essex and Kent, which seems to furnish very fair evidence that Norfolk is suitable for growing such tobaccos.

The crop obtained at Farnham was certainly the best ever produced on that Station.

The experiments with commercial fertilizers begun in 1919 were continued and, judging by the crops harvested, it may be said, in a general way, that by the use of such fertilizers it is possible to increase considerably the average yield of the district. Although from this experiment it has not yet been possible to deduce a formula for the most economical fertilizer, it has been shown that a more liberal and more judicious application of manure and fertilizer gives an improvement both in the quality and quantity of the crop. The cost of production of a pound of tobacco on the Farnham Station rose in 1920 to 15 cents. Possibly this figure may be considerably lowered where the grower is not obliged to hire all his labour, but it indicates the precarious nature of this industry which, while paying 15 cents per pound to produce its crop, could only get from 10 cents to 12 cents per pound for it.

The work in plant pathology carried on by the division was continued on the experimental area at Ottawa and on experimental plots established in Ontario in co-operation with a certain number of growers. The most noteworthy result achieved was the establishment of a variety of tobacco for snuff which proved resistant to the tobacco root rot (*Thielavia Basicola*). The same resistant quality appeared to be possessed by the selection of White Burley, series J.R.B. 16. In view of the great importance of the characters to be fixed, however, the selections made must be given a more thorough test before being guaranteed as immune to the tobacco root rot mentioned.

Among the hybrids studied at the Central Farm at Ottawa, two Maryland hybrids seem particularly interesting on account of their heavy yield. These tobaccos are a little too thin in leaf to be used in the same way as are the Burleys, but it is possible that the Canadian tobacco industry may find a means of using them. On the other hand, a cross of White Burley and Gold Leaf tried on the Harrow Station seemed of real promise on account of the form of its leaf of an excellent "broad leaf" type, and also on account of its very good yield.

At the opening of spring in 1921, the chief of the Tobacco Division was sent to England in order to form an opinion as to the future of Canadian tobaccos on the English market. At the time there was a real demand for cigar wrappers and binders as produced in Quebec, and it seemed that possibly an equally good market might be found for the yellow tobaccos of Ontario, but as was feared, the result of the enquiry was much less encouraging with regard to the latter, as there seemed to be no demand for the yellow tobaccos. In communicating this information to the tobacco growers interested, the Federal Department of Agriculture did everything it could to induce them to decrease the areas planted to White Burley in Canada, and thus avoid the over-production, which was foreseen early in the autumn of 1920.

DIVISION OF ECONOMIC FIBRE PRODUCTION

This brief report must be prefaced with the information that owing to an extremely destructive fire, which completely gutted the flax building late in the fall of 1920, a number of valuable—some, indeed, invaluable—records were lost. Had it not been for the fact that a great number of our records were duplicated, it would have been almost impossible to furnish reliable data of the operations for the past fiscal year. Fortunately, however, owing to the system of record keeping followed, much of the information was available, in a slightly different form, elsewhere.

SESSIONAL PAPER No. 15

VARIETY TESTS

A very important branch of the division's work for the fiscal year under consideration has been a continuance of the 1919 variety tests.

Many additional experiments were also carried out, with a view to making thorough and exhaustive tests as to the suitability of different varieties of seed for fibre production in Canada. As before, experimental plots were one-tenth of an acre in extent, and the rate of seeding adopted, after mature consideration, was 84 pounds per acre. Six varieties of seed sown over eleven acres were tested at the Central Experimental Farm during the season.

The following table gives the average results:—

Scutching Tests.	Levonian Long Stem	Indian Head Long Stem	Japanese No. 1.	Japanese Siberian.	Irish Pure Line No. 5.	Commercial Imported Dutch.
Rate of seeding per acre....	84	84	84	84	84	84
Retted straw.....	2,500	2,682	2,366	2,501	2,842	2,720
Temperature of retting....	72° F.	72° F.	72° F.	72° F.	72° F.	72° F.
Average yield of fibre.....	397	392	317	327	407	391
Average value per pound....	75	75	75	50	75	75

COMMERCIAL TESTS

A series of commercial experiments was carried on in various districts in the Dominion, the test plots utilized ranging in size from one-tenth to one-half of an acres, twenty-nine acres in all being seeded. (Ninety per cent of the crop was produced on the Experimental Farms System).

Below is a table showing the average yield per acre of scutched fibre grown on the Experimental Farms in the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario and British Columbia:—

Variety of Seed.	Rate of Seeding.	Retted Straw.	Method of Scutching.	Yield of Scutched fibre per acre.	Grade.	Value per pound.
						cts.
Imported English.....	84	2,780	Belgian	379	3	0.50
Long Stem.....	84	2,500	"	397	1	0.75
Indian Head Long Stem....	84	2,682	"	392	1	0.75
Japanese No. 1.....	84	2,366	"	317	1	0.75
Japanese Siberian.....	84	2,501	"	327	3	0.50
Irish Pure Line No. 5.....	84	2,842	"	407	1	0.75
Imported Dutch.....	84	2,720	"	391	1	0.75

The flax grown in each plot was separately valued, the above figures representing the average valuations.

BINDER TWINE EXPERIMENTS

In order to test the value of binder twine from the linseed flax straw grown in the Prairie Provinces especially numerous practical experiments were conducted with the twine manufactured at Kitchener, Ontario, in 1919. This twine was tested at fourteen Experimental Stations, and while the results were not very encouraging, they were at least definite. A number of the stations reported adversely on the quality, as compared with that of Manila or Sisal hemp binder twine so that it may be stated that until a more efficient method of manufacturing is evolved the value of flax fibre as a raw material for the manufacture of binder twine may be regarded as

12 GEORGE V, A. 1922

negligible. It should be mentioned however, that the inferiority of flax twine is *only* noticeable with regard to the binding of wheat. It has been found quite satisfactory for use in the garden, for tying tomatoes, beans, etc.; and it certainly makes an excellent sewing twine for bags. Several of the superintendents who tried this initial consignment of twine are anxious to make further tests at a later date.

RETTING OPERATIONS

A very large quantity of flax was retted in a commercial way in concrete tanks between April and October. It was found that a temperature of 72°F. to 80°F. gives the quickest results, and that it is also better for the fibre when the flax is retted in tanks. The percentage of No. 1 fibre from tank-retted flax is greater than that from dew retted.

FIBRE GRADING

The system of grading inaugurated in 1919 in several of the mills in south-western Ontario has been continued during the past fiscal year by special grading experts who have been secured to conduct the work. Proper grading of the different qualities of fibre is of great importance, since it will enable distant purchasers to buy by number or sign, without the necessity of actually inspecting the fibre. The now existing grades, three in number, are as follows:—

Dew retted qualities:—

D.P.A.—Superior dew retted warp;

D.P.B.—Medium dew retted warp;

D.P.C.—Medium dew retted weft.

The grading has worked in a highly satisfactory manner, despite that the difficulty of introducing the system has been great, and the prejudice against it marked. One of the chief obstacles to a universal introduction of the system has been that many of the so-called scutchers were not, and are not, able to decide on the technically desirable qualities of flax. While many men have been educated out of this condition, it will certainly require two or three more seasons to school them in the making of consistent, uniform grades, having in mind strength, weight, colour, oiliness, fineness, length and cleanness.

MACHINERY

The important question of an efficient pulling machine has been still further investigated. A number of newly invented machines have been given a thorough test. The one that has stood triumphantly under all trials that have so far been made is the Vessot machine, which is now being manufactured commercially and used by at least ten flax growers. The one in use on the Central Experimental Farm has proved eminently satisfactory, and has developed no serious, or fundamental defects.

A de-seeding machine recently invented has also been subjected to thorough tests and has proved satisfactory. The same applies to a scutching machine recently imported by the department from Ireland, which was inspected, while it was working there, by the chief of the Economic Fibre Division on his last official visit.

FIBRE SEED

The department has continued its arrangements for the inspection and grading of fibre flax seed grown in the province of Ontario for export. Certificates were issued by the department for such seed as (1) shows a germination of at least 90 per cent before shipment; (2) is well cleaned, and does not contain more than one noxious weed seed per ounce; and (3) is packed in sacks securely sewn and sealed, and containing a net weight of 150 pounds of seed. The department also requires that

SESSIONAL PAPER No. 15

an affidavit of pedigree shall be produced showing that the seed is of a true fibre variety. Each of the sacks containing seed conforming to the prescribed conditions is branded in red letters, showing that it has been inspected, and it also bears the certificate number, or stock number, of the department. It is not obligatory on Canadian exporters to have their seed inspected, but it is a pleasure to report that all the Canadian seed shipped to Ireland this year *was* so inspected. The fact that a bag is branded and sealed, as above indicated, thus displaying evidence that the seed has been examined and passed by the department, should be a valuable safeguard to Irish buyers both as regards the quality and weight of the seed.

STATISTICS

The area of flax in Canada in 1920 was almost double the acreage of 1919. The crops in 1920 were harvested under dry weather conditions, and it is reported that the yield and general quality of the seed are superior to last year's, the seed being larger and plumper in the pickle. Preliminary germination tests made by the department gave good results, and several representative bulk samples taken from shipments which have been forwarded to Ireland, and which were tested by the Irish department, showed rates of germination varying from 92 per cent to 97 per cent.

THE BEE DIVISION

The work of the Bee Division has continued to expand. Apiaries have been maintained on seventeen of the Experimental Farms. Bee breeding experiments have been continued and a number of Italian queens and drones of non-swarming parentage have been successfully mated under isolated conditions at Duck island, in the eastern part of lake Ontario.

Experiments at Ottawa in the control of swarming were continued. Easy methods of discovering colonies that are preparing to swarm and treating them effectively were investigated. The conditions for bee-keeping in the north were further studied at Kapuskasing and investigations into the value of bees in pollinating apple bloom at Kentville were continued. The collection of information about Canadian honey-producing plants was continued.

Bulletin No. 43, Second Series, "Wintering Bees in Canada," by F. W. L. Sladen, was published during the year.

DIVISION OF ILLUSTRATION STATIONS

ALBERTA AND SASKATCHEWAN

In 1920 sixteen Illustration Stations were operated in Alberta and fifteen in Saskatchewan. The rotations were continued as in the previous year; cultural methods however were outlined with a view to overcome the menace of soil drift which, over portions of these provinces, has become a serious problem.

Weather conditions in the south and south-east of Alberta, and in the central and southern part of Saskatchewan were again dry with damaging winds and high temperature. The yield of grain in each province was nevertheless considerably higher than in the season of 1919. Sales for seed purpose from the Station Farms have been made of potatoes, wheat, oats, western rye grass, and alfalfa seed. This means a spreading of forage crops and a raised standard of the quality of grain produced in the Station districts.

Rain gauges were supplied to twenty-one Stations, that accurate records may be made of the amount of precipitation received, moisture being a deciding factor of crop growth in these areas.

12 GEORGE V, A. 1922

Field meetings were held at certain Stations in Alberta and Saskatchewan, and much interest was taken, by the farmers of the district, in the work being carried on.

QUEBEC

In 1920 twenty-two Illustration Stations were in operation during the year. Twelve locations for new Stations were selected, work to commence in 1921.

Marked progress was made in the districts where illustration work was carried on, and a beneficial interest was sustained by the operator and neighbours, throughout the summer and winter. By a little assistance and some suggestions the scope of the work in the province has widened on the individual stations and adjoining farms.

Rotation of crops, cultural methods, gardening, poultry and general conditions in all lines show improvements.

Field meetings were held while crops were growing, and during the winter months, meetings were held at twelve points at which addresses were given by representatives of the division. The interest and attendance at these gatherings were considerably above what had been anticipated.

NOVA SCOTIA AND NEW BRUNSWICK

Eleven Stations were established and operated in the Maritime Provinces in 1920. During the season, ten more locations were selected for the work to start in 1921.

The first year's work consisted of preparation of the regular rotations. In this preparatory work, the value of thoroughness in cultural operations, and the advantage of liberal seeding to secure best results in the growing of clover and timothy were clearly demonstrated.

Fifteen public meetings were held during the winter months. The supervisor for the province assisted in short courses at Truro and Moncton. From the interest taken in the work much improvement is expected.

THE DIVISION OF EXTENSION AND PUBLICITY

The object of the Division of Extension and Publicity during the year under review, has been to interest and familiarize the people of Canada with the Dominion Experimental Farms and through a campaign of publicity to make generally known the work being done, experimental and otherwise, by the Central Experimental Farm and the Branch Farms and Stations.

This publicity has taken the form of (a) the display of exhibits at Canadian exhibitions and fairs; (b) the distribution of large quantities of literature through all parts of Canada; (c) the preparation of circulars for distribution at exhibitions and fairs, and for general distribution; (d) the editing of articles for the press on all subjects in connection with agriculture; (e) the addition of a large number of names to the mailing list for agricultural publications.

EXHIBITS

The exhibits sent out to the various exhibitions and fairs were practical and educative. The lessons they endeavoured to express were common sense, economy, progress, and they were arranged to appeal to those interested in any and all phases of agriculture. That these exhibits were successful was proved by the great interest taken by visitors and by the numerous questions asked the officers in charge of them. By this means the officers were able to furnish a great deal of valuable information on the results of experimental work carried on by the Experimental Farms.

SESSIONAL PAPER No. 15

By increasing the number of fairs and exhibitions visited and also the number of exhibits, it is believed that thousands, particularly among the agricultural classes, have been brought into touch with the work of the Experimental Farms, who could have been reached in no other way. Eleven complete exhibits were prepared and forwarded from the Central Experimental Farm this year. Three were sent to branch farms and seven were displayed at thirty-six different winter, summer and fall exhibitions and fairs in Ontario.

General Exhibits, Ontario.—Four exhibits of a general nature representing the work of the various divisions of the Experimental Farms, were prepared at Ottawa and displayed at many important fall exhibitions and fairs in Ontario, including London, Kingston, Picton, Cornwall, Collingwood, Stratford, Galt and Renfrew, besides many other smaller country fairs. A general exhibit was also sent to Kapuskasing, this being the first time the station there had received one.

Special Exhibits, Ontario.—A combined seed, tobacco and poultry exhibit was shown at Chatham Corn Show, in January, 1921.

A flax exhibit, showing the processes in the manufacture of linen from flax straw and containing many samples of flax products and by-products was shown at a number of fairs in the sections of Ontario where the production of flax is or could be made a paying crop.

A circuit of Ontario winter poultry shows was arranged and a display containing instructive poultry transparencies and legends, poultry feeds and models of poultry houses and poultry house fittings, was exhibited at a number of these shows.

The Experimental Farm exhibit at the Central Canada Exhibition, at Ottawa, although of a very general nature, is also a very special display. The whole exhibit covered a space of sixty feet by eighty feet and, although it contained twelve separate and distinct displays, the general scheme of arrangement was so designed that the exhibit was attractive, uniform and compact. A definite amount of space was allotted to the officers of each of the twelve divisions, and they provided instructive material to illustrate their work and to draw questions from the many visitors.

Special, Prairie Provinces.—A large exhibit was sent to the five large exhibitions in the Prairie Provinces, viz., Calgary, Edmonton, Saskatoon, Brandon, and Regina. The main structure of this display prepared at Ottawa, was supplemented by material from the Branch Farms and Stations nearest the centres where the exhibitions were held.

Exhibits at Branch Farms.—In addition to the exhibits sent out from the Central Experimental Farm, all the Branch Farms had exhibits of their own and the superintendents made the necessary arrangements with the local fairs in their territory as to the erection of displays. At the larger exhibitions the exhibits from the Branch Farms and Stations are frequently enlarged and improved by the addition of material from Ottawa.

Exhibits, General.—Small general exhibits were sent to Indian Head, Saskatchewan, and Cap Rouge, Quebec. A poultry exhibit was sent to Amherst winter fair and the same exhibit was also shown at Sherbrooke and Quebec city.

GENERAL DISTRIBUTION OF LITERATURE

A number of exhibition circulars have been revised during the last year, and where necessary have had information added to them. Thousands of these circulars have been distributed at exhibitions and fairs in all parts of Canada. These circulars are also sent out in large numbers from the Division of Extension and Publicity and are very much in demand.

MAILING LIST

Many applications have been received during the year for literature to be sent regularly on specified subjects, but the booklet that appears to have the largest demand is "Seasonable Hints."

EXPERIMENTAL STATION, CHARLOTTETOWN, P.E.I.

THE SEASON

The weather in 1920 was unusually severe, setting in early and continuing with steady cold weather until the latter part of March. Crops germinated quickly in the spring of 1920 and made extraordinary growth for a time, but the exceptionally hot weather during the first two weeks of autumn caused cereals to ripen very rapidly with a resulting tendency to yield grain light in weight per measured bushel. The autumn continued fine well into the month of November, giving ample opportunity to complete field work.

BUILDINGS

In addition to repairs and improvements, a new wagon shed was constructed and five additional contest houses for the laying contest work.
The underdrainage systems have worked satisfactorily and good crops were harvested on what was previously waste land.

HORSES

The horses at the Station comprised three pure-bred Clydesdale mares, one gelding, one two-year-old filly and one grade mare, as well as one express horse and one driving mare. These horses remained in good health and condition throughout the year.

DAIRY CATTLE

There were six purebred Ayrshire cows in the dairy herd during the year. They are all in excellent condition and at the provincial exhibition a number of prizes were won.

An experiment in feeding steers was carried on during the winter, from which were obtained some valuable experimental data, although high prices of feeds prevented a profit being made. At the fat stock show at Charlottetown three of these steers won first for pen, and first, third and fourth as individuals. Experimental work with swine was conducted during the year.

The poultry plant was enlarged to give greater accommodation and a large number of entries for the egg-laying contest were received. This contest closed at the end of October and the 1920-21 contest is now under way. Twenty-five pens of ten birds each are entered therein.

The field crops on the rotations gave the following average yields per acre:—

Crop	Area Acres	Average Bush.	Yield Lbs.
Wheat	6.57	26	52
Oats, Banner	11.00	58	
Barley, Charlottetown, No. 80	5.	41	20
Potatoes	3.57	209	58
Turnips4	443	45
Mangels	1.	534	5
		Tons	Lbs.
Clover hay	6.47	2	609
Timothy hay	2.77	2	1618
Alfalfa	1.5		1966

SESSIONAL PAPER No. 15

Much valuable data were obtained from the 309 cultural plots on which experimental work was carried on. Variety testing was conducted with cereals, Indian corn, field roots, clover and alfalfa, and in horticulture with tree and bush fruits, vegetables, and ornamentals.

A number of farmers' and breeders' associations held picnics at the Farm during the year. The superintendent conducted the course in field husbandry at the Agricultural Short Course held at the Technical and Agricultural School, and gave a series of lectures at the Home Economics Short Course, besides giving addresses at a number of Farmers' and Dairymen's Association meetings.

Exhibits were prepared and shown at several points in the province and a number of entries of Clydesdale horses and Ayrshire cattle and fat steers were made.

EXPERIMENTAL STATION, KENTVILLE, N.S.

The spring of 1920 was dry and seeding operations continued without interruption until completed. The very dry May hindered grass development, but this was partially regained by favourable weather in June with seasonable showers, and the hay crop was fair. There were no late spring frosts and the temperature during the summer was slightly above normal resulting in a fine corn crop. The season on the whole favoured the apple, and an average yield of fruit, good in quality, and reasonably free from scab was secured. There were no unusual weather disturbances during the season and the fall was ideal for gathering all crops. The weather throughout the season was such that more work was possible with less extra labour than for many years. The first fall frosts, two degrees in each case, were on October 16 and 21. Early ploughing was difficult because of the ground being too dry, but rains and an open November made it possible to plough almost to the first of December. The winter has been mild with little snow. The total precipitation for the year April 1, 1920, to April 1, 1921, has been 34.74 inches.

Seventeen acres of upland hay yielded at the rate of 2.2 tons per acre, eight acres of dyked marsh averaged 2.57 tons and eleven acres, not so well drained, 1.85 tons per acre. The oat crop was good. The yield from thirty-one acres at this Station averaged 56 bushels. The wheat averaged 21 bushels and barley 29 bushels per acre. The corn averaged 14 tons per acre and was well matured for silage. An area in sunflowers yielded 16 tons per acre. The mangel crop averaged 874 bushels. Because of May being so dry there were places where the seed did not start resulting in an uneven stand. The turnip crop was poor, largely because of the club-root disease.

The Shorthorn herd of 52 head is made up of 18 cows, 3 two-year-old heifers, 13 yearling heifers, 14 heifer calves and one herd bull. Eight bulls were sold for service during the year and six females were sent to the Experimental Farm, Nappan, for breeding purposes. Hedgyn Susan produced 10,864 pounds of milk in 384 days, and an average of 28.29 pounds per day. Hillview Victoria gave 6,188 pounds of milk in 322 days, an average of 19.21 pounds per day; Meadow Flower 24th, 6,623 pounds in 328 days, an average of 20.19 pounds per day; Kentville Jessamine, 6,008 pounds in 320 days, an average of 18.75 pounds a day.

Twenty head of steers were bought in the fall and fed during the winter. Because of a falling market there was no spread between cost and selling price, so that at finish they did not bring sufficient to pay for all the feed consumed. The weight at start was 18,497 pounds, the weight after 140 days' feeding was 23,474 pounds, a gain of 248.5 pounds per steer.

Yorkshire swine are kept and consist of one sow three years old and two young sows and a boar. Two breeding sows were sold during the year and ten registered young pigs.

12 GEORGE V, A. 1922

The poultry consisting of Barred Plymouth Rocks and White Wyandottes have made good records and breeding pens have been established with hens of the following average production in their pullet year: Pens 1 to 4, White Wyandottes, with 4, 5, 7 and 7 birds respectively, averaging 254, 209, 187 and 161 eggs each. Pens 5 to 12, Barred Plymouth Rocks, with 4, 6, 7, 8, 5, 6, 5 and 6 birds respectively, averaging 252, 222½, 200, 174, 239, 267½, 192 and 170 eggs each.

The thirty-six colonies of bees wintered in 1919-20 were in good condition in the spring except four colonies which were weak. The number of colonies was increased to fifty-six in 1920. The season was not a good one for honey, 1,168 pounds having been secured, an average of 36.5 pounds per colony spring count.

Tests were continued with different mixtures of commercial fertilizers on orchard and field crops. Agricultural grasses and forage crops and clovers including alfalfa and sweet clover are under test.

The yield of fruit on the 65 acres of young orchard at this Station was light. The crop was of good quality. The varieties of English apples under test fruited exceptionally well, but few of them gave promise of being of great commercial value.

A new horse barn, a poultry breeding house and four brooder houses were constructed during the year.

EXPERIMENTAL FARM, NAPPAN, N.S.

The winter of 1919-20 was very cold. There were over thirty-one days of zero weather recorded. The thaws were light. April was a normal spring month. May and June were fine and warm but lacked precipitation for good germination. Good growing weather prevailed through July, August and September. Rainfall was recorded on eleven days in August and thirteen in September, this wet period caused much damage to the early cut grain, particularly the wheat, which sprouted in stook. Good harvest weather prevailed through October and the first half of November. After the 13th of November heavy frosts were recorded and snow fell on the 23rd, this remained until the end of the month. The autumn ploughing period was short, consequently, not more than two-thirds of the average amount of ploughing was accomplished.

Taken throughout, the season was a very favourable one.

The following acreage was under cultivation at the Farm last season; seventy-four acres of grain, six acres of oats, peas and vetches, one-half acre of sunflowers, six acres of ensilage corn, ten acres of roots, two acres of vegetables, five and three-quarter acres of potatoes, eighty-two acres of upland hay, ninety acres of marsh hay, four and one-half acres of grain and clover plots, one-half acre of turnip seed, two acres of small fruits, one acre of stecklings and twenty-five acres of orchard.

The average yield per acre of farm crops was as follows: wheat, 24 bushels, 45 pounds; oats, 44 bushels 25 pounds; mixed grain, 20 bushels; barley, 20 bushels 42 pounds; corn, 15 tons, 1,615 pounds; oats, peas and vetches, 4 tons 1,707 pounds; turnips, 729 bushels 21 pounds; upland hay, 1 ton 949 pounds; twenty-six acres of upland hay averaged 2 tons 923 pounds; marsh hay, 1 ton 267 pounds.

The ground limestone sown four years ago continues to show beneficial effects in the clover crop. This test goes to prove that much of the eastern soil could easily be made more productive by the application of two tons of ground limestone to the acre.

The past season was an average one when considered from the horticulturists' point of view. Apples were a light crop, but of good quality. Dry weather effected the yield of the strawberry crop, the average yield for all varieties being 4,195.2 pounds per acre. Bush fruits were a medium crop, but of good quality. The average yield for the different varieties was: black currants, 5,907.5 pounds per acre; red currants, 7,624.3 pounds per acre; white currants, 7,966.6 pounds per acre.

SESSIONAL PAPER No. 15

Cultural tests were made with different varieties of garden vegetables and good results were obtained.

Potatoes were a good crop, the average yield for field lots was 219 bushels of marketable potatoes. One of the plot varieties yielded an average per acre of 735 bushels.

The work in poultry was most satisfactory during the past season. The egg-laying contest had twenty pens entered. Out of the 200 birds entered, 52 qualified for Record of Performance. The total number of eggs laid was 24,226 or 121.13 per bird, at a cost per dozen of 35 $\frac{3}{4}$ cents. The plant stock did much better, the average per bird for Barred Rock pullets was 131.40 eggs, at a cost of 30 cents per dozen. The average for Leghorn pullets was 122.3 eggs, at a cost per dozen of 31 cents.

The livestock work was expanded at this farm. A herd of Guernseys was established, consisting of eight mature cows and three young females and one male. The cows entered in Record of Performance have made good records. Kings Blanche of Hillside gave 12,238 pounds of milk, testing an average of 6.5 per cent; Princess Daisy of Hillside's record was 8,025.9 pounds of milk, testing 6 per cent; Princess Dairymaid 2nd, 7,569.6 pounds of milk, testing 6.2 per cent; Cabbage Rose of Hillside, 7,337.0 pounds of milk, testing 5.7 per cent.

A herd of beef type Shorthorns was also established at this Farm, consisting of seven mature cows, three young females and one male.

The "Grading-up experiment" was continued and satisfactory results obtained.

Twenty-six steers (beef) were fattened during the winter months.

Two herds of swine are kept at this Farm, namely, Yorkshires and Berkshires, and two flocks of sheep, pure-bred Shropshires and a grade Shropshire flock and good progress is being made along all lines.

The necessary repairs to all Farm buildings were carried out in addition to moving and remodelling the old creamery into an implement shed and storage cellar, and remodelling and adding to the farm-house on the new Clinton Roach property recently purchased by the department. This house is being used as a boarding house.

Five new colony houses, 10 by 12 feet, were built. Some 3,600 feet of new wire fence and 700 feet of new pole fence was erected during the season. All roads on the Farm were repaired during the year and some work put on the public highway adjacent to the Farm.

Agricultural meetings and exhibitions were attended by the superintendent and assistant to the superintendent and many excursions visited the Farm during the year.

EXPERIMENTAL STATION, FREDERICTON, N.B.

The winter of 1919-20 was unusually cold and stormy followed by a bright, cool, dry spring with much winter-killing of fall grains and clovers. Seeding began on the 7th of May and was completed earlier than usual. The summer was dry and cool until some heat in August, followed by a deluge in early September, seriously damaging a large proportion of the grain crop and encouraging the occurrence and spread of late blight and rot in potatoes. Crop yields generally were below the average. Pastures kept up well and with an abundance of silage, carried over, maintained a good milk flow. One Shorthorn cow made a record of 14,682 pounds milk and 677 pounds of butter in 395 days, while three cows of this breed averaged over 12,000 pounds of milk in the season. All classes of live stock did well. An Ayrshire in the two-year-old class made a Record of Performance record of 13,280 pounds of milk and 621 pounds of fat. Provision was made for a New Brunswick egg-laying contest; ten two-pen houses were built which were not sufficient to accommodate

12 GEORGE V, A. 1922

all applicants. From the opening of the contest on November 1 till March 31, the Frederieton pens stood third in the Dominion in number of eggs laid per bird. An implement shed and feed storage building was erected over a cellar previously constructed and some additional land brought under cultivation.

EXPERIMENTAL STATION, STE. ANNE DE LA POCATIÈRE, QUE.

The winter of 1919-20 was the most severe for many years. There was a fair amount of snowfall at the beginning of the winter, but soon after rains and a few days of high temperature melted most of it so that the land was left exposed to severe cold, causing the frost to penetrate very deeply. Late in the winter snowfall was abundant. The first seeding was done in 1920 about the 9th of May, where the land had been drained, but not until the 15th on undrained land. Rainy weather during this period delayed seeding operations. Drought followed, lasting until July 10, there being less than two inches of rainfall during that period. This reduced both the yields and quality of cereals, but the cultivated crops did not suffer so much owing to frequent cultivations conserving the moisture. Fruit crops were fairly good as a whole. Apples, plums and cherries gave a good crop. Small fruits also did well. The weather of 1920-21 has been very mild with good snowfalls, which has prevented winter-killing and kept the frosts from penetrating deeply.

During the summer there were 23 horses kept at the station, nine of these being grades. In the fall four of the more aged of these, unsuited for breeding work, were sold. The remainder have been kept over winter and include 14 very valuable registered Pereherons, made up of a three-year-old stallion, eight mares, a two and a half year old filly and four spring colts. Breeding work is carried on with these and also feeding experiments.

With the dairy herd, owing to the use of excellent sires and the careful elimination of poor stock, the value of the herd is constantly increasing and its standard becoming more uniform. The herd is now made up of 67 head, 42 being registered Ayrshires and the remainder crosses.

The number of swine at the station is at present 46, but owing to the extremely high cost of feed and the difficulty of securing some necessary feeds, a great deal of experimental work could not be done during the year. Careful figures on the cost of production, however, have been kept. The total number of sheep at the station is now 99, and during the year 41 were sold. The production of wool amounted to 474 pounds.

With poultry the Barred Rocks and White Wyandottes are kept, and arrangements have been made for wider and more careful experimental work. Very little work was done with bees during the year, owing to the impossibility of getting a properly trained bee-keeper. One has now been secured, however, and arrangements have been made to increase the number of colonies and make bee-keeping a feature of the work at this station.

In field husbandry, a number of rotations are being carried on suitable for different styles of farming and for different characters of soil. Owing to the late seeding and unfavourable weather conditions, cereal crops did not yield as highly as in some other years. As in previous years, Huron wheat showed itself the best suited to this district, as did Manchurian barley and Banner oats, although the Daubney oat showed itself to be earlier than Banner and very productive. The new Liberty oat has so far shown itself as likely to prove very useful for special purposes in this district. Arthur peas yielded at the rate of 30 bushels per acre.

During the year an office building was put up, a great deal of stone removed from the fields and considerable drainage work done. The number of visitors to the station was very large. During a period of three days 3,000 farmers visited the station. A

SESSIONAL PAPER No. 15

number of demonstrations and talks were given to these visitors, touching upon the agricultural needs of the district. As in past years, the station exhibited at many fairs and for the first time showed at the Quebec exhibition with Percherons, which carried off a number of first prizes for different classes.

EXPERIMENTAL STATION, CAP ROUGE, QUE.

Season.—The six months during which plants grow in central Quebec were warmer, drier, brighter than the average of the last nine years; the frost-free period lasted 138 days, about the usual length, from May 6 to September 21.

Crops.—Spring wheat, oats, field peas, potatoes, hay, celery, pumpkins were very good; silage corn, mangels, pastures, table corn, garden beets, cucumbers, squash, plums, grapes, annual and perennial flowering plants were good; field carrots, swede turnips, garden carrots, cabbage, cauliflower, tomatoes, apples were medium; egg plants and melons were practically a failure.

LIVE STOCK

Horses.—There were 69 head, 63 of them pure-bred French Canadians, at the end of the fiscal year; 55 at the horse farm and 14 at Cap Rouge. These animals are used for work for experimental breeding and housing.

Dairy cattle.—The herd numbered 67 head, 60 of them pure-bred French Canadians, on March 31, 1921. They are kept for milk production, experimental breeding, feeding, housing and management. There are more animals qualified for Record of Performance at Cap Rouge than in any other herd of the breed.

Sheep.—The flock of pure-bred Leicesters numbered 105 head at the beginning of April, 1921. They are used for experimental breeding, feeding and housing.

POULTRY

Laying contest.—The Quebec Laying Contest was continued at this station: 200 Barred Rocks and Rhode Island Reds are in the pens including those entered by the station for registration purposes.

Farm flock.—An average of 187 Barred Rock layers was kept during the year and the egg yield jumped from 86 in 1919 to 133 in 1920. The birds are kept for experimental breeding, feeding and housing; a comparison was also made of egg preservatives.

FIELD HUSBANDRY

Crop management.—The projects on hand include cost of production of field crops, rotation work, rates of sowing oats, also timothy and clover, yield of hay after different kinds of nurse crops and after different rates of sowing oats.

Soil management.—This is an investigation into the relative merits of spring and autumn ploughing for silage corn.

GRAINS

Variety tests.—These comprise spring wheat, barley, oats, peas, beans, and flax. Huron, Manchurian, Banner, Arthur, Norwegian, Novelty are the ones which have done the best to date.

Selection.—This is going on with Huron wheat, Manchurian barley, Banner oats, Arthur peas; very encouraging results have already been obtained with the two former.

12 GEORGE V, A. 1922

FORAGE CROPS

Variety tests.—These take in sugar beets, mangels, swede turnips, carrots, corn, red clover, Giant Half Sugar White mangel, Good Luck Swede turnip, Mammoth White Intermediate carrots, Longfellow corn have done well at the station.

Selection.—Selection experiments are under way with Good Luck Swedes, Quebec Yellow corn, and Grimm alfalfa.

Cultural work.—Different methods are compared of producing red clover seed, also mixtures of grasses and clovers for hay and pasture.

HORTICULTURE

Fruits.—Besides the variety tests of apples, cherries, pears, plums, grapes, black, red, white currants, gooseberries, raspberries, strawberries, there is breeding work going on with most of these; also such investigations as relative merits of different cover crops, cost of establishing a Wealthy-McIntosh orchard, and comparison of methods of planting strawberries.

Vegetables.—Fifty-three projects receive attention, for vegetables alone. Most of these refer to variety and strain tests, selection, and cultural experiments with asparagus, beans, beets, cabbage, carrots, cauliflower, celery, corn, cucumbers, muskmelons, onions, parsnips, peas, potatoes, pumpkins, rhubarb, squash, tomatoes, turnips, watermelons.

Ornamental plants.—Notes were taken during the year on over seven hundred varieties and strains of annuals, perennials, bulbs, shrubs and trees.

EXTENSION AND PUBLICITY

Exhibitions.—Instead of having extensive and costly displays at the provincial exhibitions, entries were made in competition, in the ordinary classes. One hundred and thirty-nine prizes were won on horses, poultry, grain, forage plants, fruits, vegetables and flowers.

Publicity.—Besides articles for the press, over five thousand circulars and bulletins were distributed during the year.

EXPERIMENTAL STATION, LENNOXVILLE, QUE.

The spring of 1920 was quite backward, the first seeding being done on May 13. There was an excessive amount of rain during July, followed by one of the mildest winters on record in this district. The ice broke up in the St. Francis river on March 10, causing considerable damage to fences on the Farm.

The foundation has been laid for a Shorthorn herd in conjunction with an Ayrshire herd already at the Farm; all of our stock in these two herds are under the Accredited Herd system.

The swine at this Station comprises the Yorkshire breed, with which breeding and feeding experiments are being carried on.

Sheep experiments are being conducted to show the improvement in the grade of wool that can be brought about in selection work.

In poultry, lines of work such as trap-nest selection for improved production, and early vs. later hatched pullets are being conducted.

Work in horticulture consists of testing out different varieties in orchard, small fruits, vegetables, perennial and annual flowers; testing of spray preparations for the control of blight and insects on potatoes and other crops.

SESSIONAL PAPER No. 15

There was built this year an implement shed 125 by 35 feet, and there was added to our Station in the course of the year 160 acres which was formerly occupied by the Soldier Settlement Board as a training centre.

A considerable amount of improvement work was done at this Station such as fencing, clearing land and road work.

EXPERIMENTAL STATION, LA FERME, QUE.

The spring preparation of the land commenced early but operations were prolonged on account of wet weather until the 15th of May. After that date, seeding could be done without any difficulty. Up to the month of July, all grains and especially hay, roots, and garden crops, suffered much from drought, precipitation being 1.17 inches for May and 0.81 inches for June. From the 13th of May to the 19th of September, the thermometer fell to freezing point on one occasion, the first of July, but very little damage was done. It has been noted that temperatures are gradually becoming more moderate in this district. In 1918, the thermometer fell below freezing in every month of the year except July, but in 1920, there were practically four months without frost. The fall was especially fine, and all crops were got in without trouble or damage.

In spite of the drought which kept back the growth of the hay, an average crop was harvested, about one ton to the acre. On the Experimental Station, there were grown thirty acres of oats, one acre spring wheat, three acres of barley, one acre of peas, which gave yields respectively of 20, 12, 15, and 7 bushels per acre. Twenty acres were sown in oats and peas for ensilage, also four acres of carrots, turnips, and forage beets. The carrots and forage beets were a total failure, but the turnips gave very satisfactory yields. The experiment with sunflowers gave a yield of 7½ tons per acre. This plant seems to give good promise of replacing satisfactorily Indian corn for ensilage, as the latter cannot be grown here.

All the garden crops did well, except tomatoes and beans, which were damaged by the light frost of July 1. Yields were above the average.

On March 31, 1921, the herds comprise: four milch cows and five heifers, all cross-bred, and one pure-bred Ayrshire bull; twenty-seven ewes, cross-bred, and 1 pure-bred Cheviot ram; sixteen Yorkshire swine; nine work horses, and two drivers.

A one-hundred-hen poultry house and four colony houses were built during the year. One hundred pullets, an incubator and two brooders were bought during the winter of 1921. Hatching operations will be carried on in the spring and also some experimental work.

About five acres were cleared and four acres tile drained.

Besides the construction of the poultry house and the colony houses, the superintendent's house was repaired; the houses formerly composing the internment camp were torn down and the lumber therein saved for future building; one old house was made into a piggery, and four were repaired to make dwellings for certain Farm employees.

Some of the Station products were shown at the district fair at Amos, and attracted considerable attention.

EXPERIMENTAL STATION, KAPUSKASING, ONT.

Following a very severe winter the spring of 1920 opened very early, seeding operations commencing May 10, the earliest date for seeding since the inception of this Station. All spring grain matured well and gave good yields.

A herd of sixty cattle are maintained at this Station, made up of Ayrshire and Shorthorn Durhams, two pure-bred bulls being used in the grading up of this herd, from which very satisfactory results are being obtained.

12 GEORGE V, A. 1922

The sheep flock maintained at this Station has given very satisfactory returns, the lamb crop for the past year being exceptionally good.

Nine registered Yorkshire sows are kept at this Station, the progeny being used for experimental purposes, and for sale to the settlers in this district.

Three colonies of bees were kept during the past year from which very gratifying results were obtained; both the quantity and quality of product shows that northern Ontario has great possibilities as a honey producer.

Experimental work was carried on during the past year both with calf feeding and pig feeding for beef and pork production.

Seventy acres of land was stumped and burned over; owing to a shortage of labour in this district during the fall of 1920 this land was not broken.

One hundred acres of stump land was sown for pasture purposes, a very fine stand of clover being obtained.

A Buckeye traction ditcher was used in connection with land drainage during the past year with very satisfactory results.

Building operations during the past year consisted of remodelling of bungalow for double cottage, remodelling of piggery, construction of a new apiary and bee yard, as well as a small oil-house.

During the months of September and October an exhibit was shown by this Station at the following places:—

Fort William, Sault Ste. Marie, Thessalon, New Liskeard and Cochrane, Ont. Great interest being taken both in the models of farm building shown, as well as in the grasses, grains and clovers exhibited by this Station, special mention being made at all the fairs regarding the exhibit of red clover.

EXPERIMENTAL STATION, MORDEN, MAN

The winter of 1919-20 was most severe. It set in early, leaving large areas of roots and potatoes unharvested and until late spring there was no break in extreme cold accompanied by frequent storms. Spring, however, opened favourably, but later the heat was intense with practically no precipitation. This caused many partial or total failures of crops. There was no frost before September 30 and no damaging frost before October 19, while the entire fall was dry and fine, permitting of a great deal of fall work being done. The winter of 1920-21 has been extremely mild for Manitoba, permitting of the carrying on of many operations which, in the ordinary winter, would have been impossible.

LIVE STOCK

No experimental work with horses has yet been undertaken at this Station, the present force, eight in all, being kept solely for the farm work. The foundation for a herd of Ayrshires has been purchased and have done well during the year, the cows being entered in the Record of Performance and have demonstrated that they will qualify.

An experiment in steer feeding with thirty steers was carried on in the fall of 1919-20.

With sheep, the grading-up experiment has been continued and great improvement is already noticed in the offspring of the grade ewes with which the work was started. They are becoming Hampshires to all appearances, both in character of wool, blocky type of lambs and the characteristic Hampshire markings.

A beginning was made with poultry in the spring of 1920. A number of colony houses were built, together with two permanent hen houses. The work will be confined to the two breeds, Rhode Island Reds and Barred Rocks.

No work has yet been commenced with swine or with bees, but a start with the latter is to be made this spring.

SESSIONAL PAPER No. 15

FIELD HUSBANDRY

In field husbandry, although the yields of hay and grains were light, the former was sufficient for the live stock on the Station and the quality of the grains was excellent. A large number of varieties of corn were planted and all these matured seed, due to the very hot summer. Sunflowers were again grown for ensilage and seemed to be relished by the cattle more than in the previous year.

HORTICULTURE

Horticulture is the leading line of work at the Morden Experimental Station. Some 90 acres were under cultivated horticultural crops, comprising 40 acres of orchard, 20 acres of potatoes, 10 each of peas and beans, with the remaining area taken up by the nursery small fruits and vegetables. The area under orchard was not extended during the season, but a great deal of replanting was done where trees had died. This replacing must be continued from year to year in the endeavour to eliminate too tender varieties and replace them with hardy stock. The problem of protection of the prairie orchard is being studied from every angle and data are gradually being accumulated. One of the great difficulties in orchard work in this district has been damage from rabbits. These appear to be very difficult to control but a number of ways, such as trapping, poisoning and shooting are being tried.

The endeavour to secure varieties of small fruits suitable for the middle west is being continued. Raspberries appear to be the most promising small fruit for a steady crop yielder. Black currants and gooseberries have not done well in this district and strawberries are uncertain, owing to the difficulty of supplying sufficient moisture at fruiting time.

With vegetables, the character of the season is the controlling factor. During a dry season they tend to mature too early and the gardener is obliged to depend wholly upon natural rainfall as the well water in this district is so alkaline that it will kill plants outright.

A special feature of the work at the station has been potato growing, as there seems a great future for this crop in this district. Over twenty acres were in potatoes last year at the Station but even this did not supply the present demands. It is believed that experiments will show that only early sorts can be recommended for a reliable crop each year.

With flowers, it is felt that the perennial is the most suited to the prairie garden in that they persist year by year and the problem of transplanting during the heat is overcome. Practically all bulbs do well. Many varieties of roses have been tried and with some success, although they require very special protection during the winter.

FARM IMPROVEMENTS

During the year the house for the superintendent was completed, two permanent hen houses built and a number of colony houses; also a root house to accommodate about 2,000 bushels of potatoes. The old barn was remodelled to a certain extent to accommodate the dairy herd. A great deal of road making has been done since the McLain property was required, connecting the farm with the village of Morden and permitting the extension of the street from the village to the farm. A considerable amount of fencing was also done in this connection.

An exhibit was made at the Morden fair and at a number of other points in southern Manitoba and the superintendent was able to assist with agricultural meetings of boys' and girls' clubs, garden competitions, etc., etc. The number of visitors to the Station showed a marked increase over the previous year.

12 GEORGE V, A. 1922

EXPERIMENTAL FARM, BRANDON, MAN

THE SEASON

The spring of 1920 was backward, and there was no work on the land until the last days of April. However up to June 10, crops had made an exceptionally good growth, but a very serious drought ensued, lasting until July 22. This burned up the grain crops badly, causing them to head up and ripen too quickly, so that a good crop was impossible. Rainy weather in the fall made threshing operations very difficult, but these rains were very helpful to corn, roots and sunflowers, which gave excellent crops. Favourable weather in the fall gave an opportunity for fall ploughing and the completion of threshing.

LIVE STOCK

Breeding work with dual-purpose Shorthorns was continued along the same lines as in previous years.

Tests were undertaken early in 1921 to determine the feeding value of sunflower silage. These tests are not completed at the end of the fiscal year but they tend to show that the sunflowers made a very satisfactory quality of silage, nearly equaling that made by good corn in palatability and feeding value.

An experiment was conducted in the winter feeding of steers to determine the feeding value of recleaned elevator screenings. The gains made on screenings and bran cost \$3.51 less per one hundredweight than those made on the oat chop. While these results do not necessarily prove that screenings are better feed than oats, they at least show the former to be a very valuable feed, comparing favourably with our standard grains in that regard.

The Yorkshire breed of swine is kept at Brandon. Crossbreeding tests for pork production have been undertaken and in the fall of 1920 sows were bred to Duroc-Jersey and Berkshire boars.

The feeding of recleaned elevator screenings to pigs was continued and tends to confirm previous findings that this feed is equal to barley for feeding swine.

The flock of sheep includes a few pure-bred Oxford Downs but is composed chiefly of grades. Grading up experiments are being conducted with these.

With horses, breeding operations are conducted with the Clydesdale, the Farm co-operating with neighbouring farmers in the formation of a horse breeders' club.

POULTRY

The Barred Plymouth Rock and White Wyandotte breeds are kept. The object of the breeding operations are to develop good utility strains of these breeds that shall excel in egg-laying propensities. Pedigree breeding is carried on with the best layers in order to permit of the breeding from these. The first Manitoba egg-laying contest was completed on October 29, 1920, and the second contest commenced on November 1, 1920, is still going on at the close of the year.

FIELD HUSBANDRY

In field husbandry a number of rotations suitable for different types of sod are being carried on, as well as a very elaborate series of cultural experiments. Variety tests with cereals, forage crops, vegetables, fruits and flowers were continued and much additional data gathered.

BUILDINGS

Building operations were of a minor character, consisting only of painting and repairing.

SESSIONAL PAPER No. 15

EXHIBITS, VISITORS, PUBLIC MEETINGS

Exhibits of Clydesdale horses and milking Shorthorn cattle were made at the Manitoba provincial exhibition, as well as horticultural exhibits at the above exhibition and at the Brandon show. The superintendent attended a large number of agricultural conventions and farmers' meetings and gave addresses on agricultural topics, and also acted on numerous occasions as judge of live stock and farm products. He also served as director on the boards of the Manitoba Provincial Exhibition and the Manitoba Winter Fair and as president of the Manitoba Swine Breeders' Association.

EXPERIMENTAL FARM, INDIAN HEAD, SASK.

The crop year of 1920 was not a favourable one in this district. Seeding did not commence until the last week in April and was not general until the first week in May. The late seeding, followed by high winds and hot dry weather during the months of June and July, made the yield of all crops the lightest for some years. A frost on August 20 stopped the growth of the corn and cut the yield of this crop at least a third. Root crops were well up to average and late fall rains made a large amount of pasture available in the stubble during the fall and winter.

HORSES

There are thirty-four horses on the Farm and of these seventeen are pure-bred Clydesdale mares and fillies, one is a promising yearling Clydesdale stallion of our own breeding and the remainder are work horses and grade colts. Five good foals were raised during the year.

CATTLE

The herd consists of sixty-eight pure-bred Shorthorns. Three herd bulls are kept and six young bull calves are on hand, the remainder of the herd being good type females. All surplus stock finds a ready sale at good prices to farmers who are desirous of improving their live stock.

The experiment in feeding sunflower silage was carried on again this year and the results completely corroborated last year's findings, namely, that as regards palatability and feeding value it is practically equal to corn silage but has a stimulating effect on the kidneys.

SHEEP

The flock of sheep numbers one hundred and eleven mature sheep and a number of early lambs. Of these ninety-six are breeding ewes. Thirty-one of these are pure-bred Shropshires, twenty-nine are grade Shropshires and thirty-five grade Oxfords. Five pure-bred yearling ewes, four Shropshire rams and one Oxford ram complete the total of mature sheep.

An experiment in finishing lambs for market was carried on during the year. One lot of lambs was finished for the Christmas market and another for the Easter market. Both lots were well finished and sold at a premium of one and one-half cents a pound over the market, showing a substantial profit over the cost of feed.

SWINE

The breeding herd consists of one Yorkshire and nine sows and two Berkshire boars and twelve sows. In addition to these there are sixty-seven feeders.

The results of experimental work in the housing of fall pigs indicate that a good straw shelter is in some respects preferable to an expensive piggery. This is borne out by the result of previous experiments with breeding sows.

12 GEORGE V, A. 1922

POULTRY

The White Wyandotte is the breed kept, and some excellent egg records were obtained. The laying contest started in the fall of 1919 was successfully completed and a new one started.

FIELD HUSBANDRY

In field husbandry, work was continued with rotations and also with the cultural experiments. The usual variety test work with cereals, forage crops, fruits, vegetables and ornamentals was continued.

BUILDINGS

A two-hundred hen house was constructed as an addition to the poultry plant. During the year it was found desirable to move the plant pathological laboratory to a new and more suitable site nearer to the office.

EXHIBITIONS AND VISITORS

An exhibit of Shropshire sheep was sent to three of the leading western shows where they attracted very favourable attention and won a number of prizes.

During the summer, with the efficient assistance of the Saskatchewan Department of Agriculture, a number of excursions were arranged to the farm and a large number of farmers took advantage of these definite days to visit the farm although it was not possible to secure excursion rates on the railroad.

DOMINION EXPERIMENTAL STATION, ROSTHERN, SASK.

The season of 1920 was very favourable for horticultural work due to there being no frost recorded from May 5 to September 15, which allowed the ripening of tomatoes, pumpkins, squash, cucumbers, melons and plums. The yield of strawberries, raspberries and currants was above the average. Small fruits have yielded well every year since the first plants began to bear in 1914. There is no good reason why sufficient small fruits should not be raised in Northern Saskatchewan to supply at least the home demand.

In 1914 two Holstein dairy heifers were purchased and they with their increase now number thirteen cows and heifers.

The flock of sheep now number fifty ewes and two rams. They are developed from a flock of one hundred range bred ewes and four Leicester rams purchased in December, 1915, and show a marked uniformity in type of high quality and showing strong Leicester characteristics.

The season of 1920 was the third successive dry season for the Rosthern district but the soil drifting at the Experimental Station was not so bad as in the two previous seasons. In 1920 the fall ploughing of the previous year was cultivated with a broad tooth cultivator and seeded without any further treatment. This did not form an ideal seed bed for the surface was left lumpy but it did not drift. The spring ploughing was packed with a sub-surface packer and seeded and did not drift. The difference in treatment of the soil from previous years was the absence of the use of the harrows either before or after seeding and the absence of the surface packer after seeding.

The experiment in rotation of crops showed the greatest profit from the six year rotation involving summer-fallow, wheat, wheat, oats seeded down, hay and pasture.

In all rotations the seeding for hay and pasture has been a failure for the past three years when the seeding was done with a nurse crop but not when seeded alone in a good seed bed.

Sunflowers were given a trial on a larger scale in 1920 than previously. Five acres were sown on summer-fallow on May 25 and cut on August 28, and yielded at

SESSIONAL PAPER No. 15

the rate of 6 tons 658 pounds of green eusilage per acre and two acres sown on spring ploughed stubble on May 10, and harvested on September 15, yielded at the rate of 8 tons 795 pounds per acre. Those on the stubble land had 32 days longer growth. Some sunflowers left standing were unaffected by frost till a temperature below $26\frac{1}{2}^{\circ}\text{F}$. was reached.

The comparison of varieties of grains in small plots on summer-fallow was unsatisfactory because of the dry weather. The different plots were differently affected by the drouth but in half acre plots on very even stubble land the yield of three varieties of wheat were Ruby, 15 bushels 34 pounds; Preston, 13 bushels 16 pounds and Marquis, 7 bushels 52 pounds.

EXPERIMENTAL STATION, SCOTT, SASK.

Spring opened late. Seeding commenced the last day of April; favourable weather permitted rapid progress, but shortage of help, and an increase in the acreage for green feed made the completion of seeding late. Warm, dry weather in July decreased crop yields. Rains in late July and late August improved the condition of late maturing crops. Frost did less damage than usual. Insect pests were more numerous. The sugar beet webworm destroyed a field of peas and damaged sunflowers and field roots. The larvæ of the diamond back moth also injured the tops on the turnips and mangels.

Four Percheron mares were bought and this number has since been increased by one filly foal. Six young Yorkshire sows were received from the Lacombe Station and a boar of the same breed from the University at Saskatoon. Future work with swine will be mainly along the line of determining the value of cross-breeding for producing market hogs. Steer fattening experiments have been conducted and dehorning steers has again shown a loss. Sunflower silage fed to steers has not shown up to the same advantage this year as in the previous year. Lambs fed on silage made cheaper gains than where fed turnips or where no succulent food was supplied.

White Wyandottes have been included in the poultry experiments. In addition to the regular experiments with poultry, pedigree work was started. Good records were secured from some of the best pens of Barred Rocks.

Records show that out of the twenty-seven fields seeded down to grass in the past nine years only on three fields has the grass been a failure. These were all on one rotation and the failure was no doubt due to an unsuitable arrangement of crops and the presence of weeds. Seeding down with a nurse crop has proven the most profitable system. With a view to making them more complete modifications have been made in some of the cultural investigational experiments.

Yields of cereals were fair, the later maturing varieties giving the best returns due possibly to having been more benefited by the late summer rains. A field of peas yielded $22\frac{1}{2}$ bushels per acre. On the plots, spring rye yielded 56 bushels; Banner oats, 58; Kitchener wheat, 36; two-rowed barley again outyielded the six-rowed.

Good crops of grass and grass seed were obtained, one field yielding at the rate of 879 pounds of western rye grass seed per acre. After fanning this seed was sold at 12 cents per pound. Sweet clover produced two good cuttings of hay. Oats, and oats and peas again outyielded millet and Sudan grass. Sunflowers yielded as high as 19 tons per acre green weight. Field root crops were injured by the webworms and, consequently, yields were decreased.

Absence of the usual severe spring frosts permitted the small fruit to set. The Eclipse variety of black currant yields averaged over nine pounds of fruit per bush.

Native Manitoba plum trees thrived well and gave a medium crop. In the vegetable garden, tomatoes, potatoes, and celery yielded much above the average. Trees and shrubs in the garden made a fair growth and flowers bloomed freely.

12 GEORGE V, A. 1922

During the year a threshing barn was erected and two dwelling-houses were moved over from the town.

With the co-operation of the Provincial Department of Agriculture four excursions were arranged to the Station in early July. A large number of farmers visited the Station during these days.

An exhibit from the Station was sent to the summer fairs in the northern parts of the province.

EXPERIMENTAL STATION, LETHBRIDGE, ALTA.

THE SEASON

The crop season of 1920, although by no means as disappointing as 1919, was not a satisfying one. It started out with great promise. The precipitation for the last four months of 1919, September to December, which would influence the amount of moisture carried over winter in the soil, was good. It amounted to 5.63 inches, as compared to a normal precipitation of only 3.64 inches for the same period. During the winter the land was covered with snow almost continuously, something unusual for the district, which prevented the soil from drying out. April, which is ordinarily a dry month with us, was unusually wet, 4.37 inches of moisture falling. No work on the land was possible that month. General field operations on the land did not start until the 4th of May, a month later than usual.

The crop season, therefore, started out well with plenty of moisture in the soil.

Seeding in southern Alberta, although getting a late start, was pushed with vigour and was completed only about two weeks later than usual. Owing to lack of time the tendency of farmers generally was doubtless to do less work in the preparation of the seed bed than was desirable. From the 1st of May on, the rainfall was so scanty, except in a few favoured localities, that the promising outlook for grain crops generally did not materialize. The early moisture produced good grass on the ranges and livestock picked up rapidly after the severe winter and were in excellent condition in the fall.

There were no severe spring frosts. The latest one was on June 3, when three degrees of frost was recorded. Fortunately, there was a warm late fall. No frost was recorded until the 19th of September and the first killing frost did not occur until October 17. In consequence of this, late sown crops on irrigated land had ample time to mature. Owing to the generous supply of moisture received early in the spring, grain made rapid and promising progress until continued dry weather in June interfered. On the 8th of June an unusually heavy wind caused material loss by soil drifting over a rather large area west and north of Lethbridge. Rains in July which were local in character were sufficient in some localities to produce excellent crops, but in the greater portion of the southern part of the province they were so light that crops generally failed to fill properly, the consequence being that the returns at threshing time were disappointments in nearly all cases.

One of the outstanding points about the season that affected the livestock interest seriously was the fact that April was so unusually stormy. It was necessary to feed until May. On account of the scarcity of feed and the unprecedented high prices that had to be paid for it, stock men of all kinds were badly hit.

LIVE STOCK

Horses.—At the present time there are twenty-three head of horses on the Station, made up of fourteen work horses and drivers and nine young horses, the latter ranging in age from one to three years. As in the past, all of the horses were wintered in a corral with an open shed except the drivers and two draught teams. This method of

SESSIONAL PAPER No. 15

wintering has proved to be entirely satisfactory. All of the horses improved in condition during the winter and were in excellent shape to begin the spring's work. The saving in labour required in feeding and caring for horses wintered in this way as compared to stabling is considerable.

Cattle.—A feeding test with forty head of steers was begun on January 24 to test the comparative value of cut oat straw and alfalfa as roughage, compared with uncut alfalfa hay as roughage. The oat straw used was of good quality and the mixture consisted of equal parts by weight of straw and alfalfa. Our results confirmed the returns obtained in previous similar experiments. The lot fed on the cut mixture did slightly better, making an average daily gain from January 24 to March 31 of 2.5 pounds, while the lot fed on straight alfalfa hay as roughage made an average daily gain of 1.94 pounds. Four milch cows are kept to supply milk to employees on the Station.

Sheep.—The first year's work in the experiment of wintering sheep on irrigation farms and pasturing them during the summer on the forest reserve was completed in October, 1920. Owing to the hard winter and extremely high prices for hay, the financial returns were disappointing. This conforms to the experience for the year of all sheep men in this part of the province. If the feed was charged at normal prices the returns would have been satisfactory. The sheep gave an average return of 9 pounds of wool per head. The increase from lambs was 102 per cent. The sheep were moved by rail to Coleman in the Crowsnest forest reserve June 23 and were returned October 6, 1920. During the summer they made marked gains, especially the lambs. These averaged nearly 10 pounds per head heavier in the fall than lambs of similar breeding pastured on the prairie ranges. Two-thirds of the best wether lambs were shipped to market in August and averaged 73 pounds off cars in Calgary. The losses during the summer were almost negligible until the week the sheep were shipped out, when in a snowstorm piling took place and unfortunately sixty head of ewes and lambs were smothered. The lower cost of feed for the winter 1920-21 has reduced materially the expense for the second year of the experiment. During the lambing season that is now in progress the ewes are being fed sunflower ensilage and this noticeably increases their milk flow. This feed will be continued until they are turned out on grass. The results of this experiment are being followed closely by many farmers on irrigated land who are anxious to go into the sheep industry but are deterred from so doing on account of the lack of summer pasture.

POULTRY

The results of experiments with poultry for the past year have been satisfactory. The barred Plymouth Rock breed is the only one kept. All pullets are carefully trap-nested. Of the pullets that finished their first laying year 27 per cent have records of 200 eggs or over and 40 per cent have records of between 150 to 200 eggs for the year. The demand from farmers for cockerels is greater than we can supply, as is also the demand for hatching eggs. Good progress is being made in the pedigree work. The provincial laying contest is being conducted at the Station. Twenty-one pens of 10 birds each are entered for the current year. They have all averaged well but there have been no outstanding records made.

BEES

The work carried on with bees is attracting more and more interest each season, especially by residents in the irrigated areas where alfalfa is extensively grown. In the beginning of the season our apiary consisted of nine colonies. Swarming was successfully prevented during the summer. With the exception of one colony made by division and later disposed of, no increases were made. The nine colonies produced 891 pounds of extracted honey. The most produced by a single colony during the

12 GEORGE V, A. 1922

season was 214 pounds, a distinct decrease from the previous year, indicating that the season was not quite so favourable. Two 2-pound packages were purchased in May to test the possibility of importing bees in this manner from long distances. Both did well and produced some surplus honey. Wintering experiments were continued. Examination the last of March revealed the fact that the colonies wintered outside in "wintering cases" came through better than those wintered in a "dug out" cellar.

FIELD HUSBANDRY

On the dry land the yield of grain was only fair. Damage to a limited extent was caused by soil drifting. Returns from the fields of hay and pasture were light. On the irrigated land alfalfa gave the usual satisfactory returns. A five-acre field of sunflowers raised for ensilage planted on spring ploughed stubble land yielded slightly over 17 tons to the acre. The yield of this crop was reduced materially due to the fact that it was impossible to get a satisfactory seed bed prepared owing to the unusual moisture of April followed by excessively hot dry winds in May.

As usual most of the field experiments were conducted in duplicate on the irrigated and non-irrigated parts of the Station. The comparative tests with the various rotations continue to furnish valuable information and data on the cost of production of field crops as well as to show the best arrangement of the crops.

CEREALS

All cereals in the variety test plots on the non-irrigated land suffered from soil drifting on account of their location on the farm. In consequence of this fact the comparative yields from the different plots are unreliable. Some plots received more injury from wind than others and the difference in yields was influenced more by this fact than by difference in variety. The yields on irrigated land were satisfactory so far as wheat, oats and barley were concerned. The different varieties of field peas were again affected by mildew which reduced the yields in a very material manner, the highest yielding variety, Prussian Blue, only produced at the rate of 17½ bushels per acre.

FORAGE CROPS

All classes of forage crops did well on the irrigated part of the farm. Those grown on dry land, although doing better than the previous season, produced very light crops.

Indian corn.—Of the 13 varieties tested "Comptons Early" gave the highest yield on non-irrigated land with slightly over 6 tons per acre. On the irrigated land "Longfellow" led with 17 tons of green feed per acre.

Roots.—All roots tested on the dry land gave very light yields. Of the 19 varieties of turnips tested Fredericton Good Luck gave the highest yield, with 28½ tons per acre on the irrigated land. The stand obtained of mangels, sugar beets, and carrots was poor and the yields were correspondingly light.

Sunflowers.—But one variety of sunflowers was experimented with, the Giant Russian. A test was made in thinning plants to 6, 9, 12 and 18 inches apart in the row with the rows 3 feet apart. The highest yield was from the plants left 6 inches apart which produced at the rate of 26 tons, 1,760 pounds per acre, while the lowest yield was from the rows thinned to 18 inches apart which produced 18 tons, 1,128 pounds per acre, indicating that heavy seeding is advisable.

Alfalfa.—On irrigated land field lots of alfalfa made their usual yield of from 4 to 5 tons per acre for the season. On dry land only that grown in rows produced hay. The seed crop was very light, only a few of the blooms set seed.

Pasture mixtures.—The tests with different mixtures of grasses on irrigated land were continued.

SESSIONAL PAPER No. 15

HORTICULTURE

The vegetable crop on the dry land was fair; on the irrigated land good. Owing to the wet weather during April it was late before seed could be planted. The first put in was on May 10 on the dry land and May 20 on the irrigated land. Although getting a late start they made rapid growth and the warm September with no heavy frosts made it possible to mature a larger crop of such tender sorts as tomatoes, etc., than is usually the case.

The experiments on dry land demonstrated the importance of planting vegetables only on summer fallow land if satisfactory results are to be expected in a dry season. The value of a shelter belt of trees for the garden was well illustrated during the period in June when the heavy damaging winds occurred.

A light crop of apples was produced on the Saunders' cross-bred varieties. The Manitoba seedling plums bore well. The yield of fruit from currants, raspberries and strawberries was very satisfactory. All trees and bushes wintered well. The flowers both perennials and annuals made an attractive showing.

IRRIGATION

Interest in the development of irrigation in Southern Alberta continues to attract a great deal of attention. With the advancement of the new projects increased attention is being paid by farmers to the results of the experiment carried on on the irrigated part of the farm.

EXPERIMENTAL STATION, LACOMBE, ALTA.

In September, 1920, a superintendent was appointed at this Station to replace Mr. G. H. Hutton, who had resigned over a year before. The fact that the Station had been without a superintendent for so long, coupled with the fact that the assistant to the superintendent and several of the skilled men in charge of special lines of work were also changed at the same time, affected adversely the number of experiments carried on during the past year but plans have been made to counteract this during the coming season.

THE SEASON

The year 1920 was the driest in the history of the Experimental Station, the total precipitation being 12.415 inches, which is 5.541 inches below that of the average of the twelve preceding years which was 17.956 inches. Considering this, the yields of grain on the Station were very satisfactory, being 75.4 bushels per acre for oats and 37.86 bushels for barley. Hay crops and peas and oats for silage were more seriously affected by the drought.

LIVESTOCK

The horses at the Station were 22 in number, made up of 5 pure-bred Clydesdale mares, 2 pure-bred Hackney mares, 8 grade Clydesdale mares, 3 grade Clydesdale geldings, 2 grade Hackney geldings and 2 foals of 1920.

The beef herd consists of 57 pure-bred and 9 grade Aberdeen Angus cattle. Five animals from this herd shown at the Calgary Summer Fair, 1921, won seven prizes and Eliminator of Gwenmawr, was reserve champion.

The dairy herd consists of 36 pure-bred and 20 grade Holstein-Friesian cattle, among the former being outstanding individuals which have produced some most promising heifers. A number of extra good young bulls have been sold during the year to head dairy herds. Owing to the extremely dry summer, good pasture was never available and from the middle of August it was necessary to feed dry prairie hay. Under these conditions it was impossible to produce high milk records. Six cows are now entered in the Record of Performance test.

12 GEORGE V, A. 1922

Three breeds of swine are kept at this Station, namely, Berkshire, Yorkshire, and Duroc-Jerseys. Extensive breeding work and feeding experiments are carried on.

At the close of the year there were 838 sheep on hand and extensive experimental work is being carried on in the management of sheep under range conditions and in grading up experiments, etc. In the grading up work, rams of the following breeds are used: Hampshire, Leicester, Oxford, Corriedale, Cheviot, Shropshire.

POULTRY

The work with poultry was hampered during the year by frequent changes in poultrymen, but late in the season a permanent man was secured. Of 271 chicks hatched in April, 206 were raised. Experimental work in breeding is carried on; likewise comparison of various breeds as to laying and egg-producing qualities, together with a wide range of feeding experiments.

Two cottages were erected by day labour under the supervision of the superintendent.

EXPERIMENTAL STATION, SUMMERLAND, B.C.

The seasonal records of this Station show 1.4 inches more moisture than during 1919. This moisture, however, came in the fall, September, 1.51, and October, 1.66, as compared with 1.0 inch in September and 0.61 in October, 1919, the total rainfall being 9.97 compared to 8.56 for 1919, and the amount during the four growing months of May to August, 1919, 1.97; 1920, 2.06. These rains came in small showers and only washed the foliage on the trees and did the land no good. Water was not plentiful during the season and crops suffered.

The spring of 1920 opened up cold and kept cold into June and a cold spell in July, from 19th to 25th, retarded ripening of such crops as tomatoes, peppers, melons, etc. Harvest season was fine, but cool, and corn did not ripen as well as previous years. The apple harvest, being a small crop, was taken off the trees before frosts came.

AGROSTOLOGY

Small amounts of stock seed of Giant White Feeding mangels were grown, also White Intermediate carrots. Stecklings were grown for the season of 1921. The different varieties of mangels, corn and carrots were tested and for bench land the Intermediate in both cases led again in yield and quality. In corn for silage, North-west Dent and Longfellow proved best for this district. Grasses have given good yields, and again orchard grass and tall oats show their superiority over timothy in clover and grass mixtures. Preparations have been made for next year to carry on very definite work in seed production of alfalfa, regarding proper amounts and time of application of irrigation water. The inoculation of legumes is being carried on.

ANIMAL HUSBANDRY

The breeding work in swine progresses well. The Berkshire sows gave good litters and new blood has been introduced into the herd by a sow and boar from Lacombe, both unrelated. In the feeding of hogs, barley gave the biggest gains, screenings gave the most economical gains.

The flock of Cheviots and the ewes that are being graded up with them are not giving very good results. There is no range land on the Station and this breed will not stand being confined to crowded quarters. Goitre was well controlled last lambing season by the use of Potassium Iodide.

Steer feeding work was again carried on, corn v. sunflower silage v. roots. Good gains were made and steers were a very uniform lot.

SESSIONAL PAPER No. 15

BEES

Of the five colonies of bees packed away in the fall of 1919, only three came out alive and one of these was so weak that it had to be united. The season was very poor and beyond the amount of honey necessary to carry these colonies through the winter, very little surplus was taken. A building in which to store equipment is now available and it is planned to expand in this division next year.

CEREAL DIVISION

This work it is hoped to carry on under various amounts of water per acre next year. Owing to dry year yields were low, this rotation will begin its second course next year, and yields should prove interesting. Clover and grasses are being used in this rotation as the hay crop.

FIELD HUSBANDRY

This division is being carried under a seven-year rotation with alfalfa as the hay crop. The most successful varieties from the Cereal and Agrostology Divisions will be tested out under field conditions in this rotation. When more land is available this division should be greatly increased. Amounts of water are being kept on the alfalfa fields and grain and hoed crops.

HORTICULTURE

Owing to the very dry fall and spring of 1919 and 1920, there was winter injury in the orchards and in some very dry places winter-killing. Orchards did not make as much growth as former years and show signs of fruiting this year. The orchards under various cultural methods continue to give object lessons in the necessity of nitrogen and humus in Okanagan soils.

Vegetable variety work is carried on in all lines suitable to this district under a distinct vegetable rotation. Progress is being made in beautifying the grounds of the Farm and plans for next year are made to improve the grounds round the boarding-house and the cottages. Some small lawns were established round the office and meteorological station. Flower seeds were again taken, but the cold season was against the ripening of the later varieties. The stone fruit orchards are in good condition and show signs of a good fruit crop. One of these will be put into permanent alfalfa this spring, the other brought on under hairy vetch.

POULTRY

The laying stock consists of 350 White Wyandottes. Birds have all been trap-nested during their pullet year and any undesirable birds, or birds which fail to lay a minimum of 150 eggs during their pullet year, are culled out. There are several pens of pedigree birds from which it is hoped to build up a strain of heavy layers, the health and vigour of the bird never being lost sight of. During the spring a total of 1,018 chicks were hatched out, tests being made with three makes of incubators and natural incubation.

FALL FAIRS

The exhibit from this Station was taken to Kelowna, Armstrong, Penticton, Naramata and Peachland. The superintendent attended conventions and meetings at Nelson, Lethbridge, Hullebar, Victoria, and a lecture tour of the Valley and Vernon Convention of Western American Horticulturists.

12 GEORGE V, A. 1922

EXPERIMENTAL STATION, INVERMERE, B.C.

The year just past has been very mild, no extreme temperatures being recorded, and the average mean temperature being above the average. The precipitation during the year was the lowest on record, being 9.32 inches, as compared with 12.45 inches, the average of the past seven years. The spring was backward, but the ground worked up very well, and when the warm weather came towards the end of June the crops went ahead rapidly. All crops were harvested under ideal weather conditions.

No experimental feeding with horses and cattle has been undertaken. The cost of wintering sows from the time they were bred until the young pigs were six weeks old was \$16.63 per sow.

On the irrigated rotations good results were obtained with oats, wheat, clover and potatoes. Cutworms were troublesome on the root plots. With forage crops clover and grasses have out-yielded alfalfa and grasses on the three years average. Dry land crops were a failure.

The variety tests with cereals and peas showed up well this past season. Huron wheat, Banner oats, and Guymalaye barley heading the cereals. Farmers would be well advised to grow more field peas, which give such excellent results in the district.

Some excellent results were obtained in horticultural work during the past season. Record yields of potatoes and tomatoes were produced. Variety tests with garden seeds were continued, and several selections and strains are being developed. Tree fruits will never be a commercial proposition in this district. Varieties such as Wealthy, Yellow Transparent, Rupert, Dudley, Okakena, Charlamoff and Pinto can be grown for home use. Fair yields were obtained from bush fruits. Many perennial and annual flowers were tested, and showed bloom from June to October.

Barred Rocks, White Wyandottes, Bronze turkeys, Toulouse and African geese, and Muscovy and Pekin ducks are kept on the poultry plant. Pedigree trap-nesting is being continued and interesting returns are being made from the flock.

The apiary numbered nine colonies in the spring. These yielded an average of 90 pounds of honey per hive, valued at \$42.30. The net return per colony after deducting loss and cost of sugar fed was \$34.61. The Kootenay case is giving every satisfaction, and apiarists should give it a trial as it has many fine features.

The Station exhibit was shown at six local fairs, and a great deal of interest was manifested in this branch of extension work. An increasing number of visitors go over the farm every year. This past season the first farmers' picnic was held, and it is planned to make this an annual event.

EXPERIMENTAL FARM, AGASSIZ, B.C.

The month of April, 1920, was cool, cloudy and very wet. The rainfall of 9.95 inches was a record for the month. May was not so wet but was cool. These weather conditions caused a late, backward spring. June was also the wettest for twenty years and during this month crops and weeds made rank, rapid growth; the latter were very difficult to control owing to the continuous rainfall. July, August, and the first week of September were dry and hot. This weather afforded better conditions for weed control, allowed the harvesting of an average crop of hay in excellent condition, ripened the cereals somewhat too rapidly for heavy yields, but made harvesting a rapid process and allowed some of the early grain to be threshed. On September 8 the rains commenced and continued almost without ceasing to the end of October. About fifty per cent of the grain in the Fraser Valley was destroyed in the stook, many potatoes rotted in the ground while harvesting of corn and roots was a difficult task. The fore part of November was dry thus affording good conditions for completing the root harvesting. The winter was mild, cloudy and wet. The closing days of March gave every indication of an early spring. The heavy rainfall in June followed by the

SESSIONAL PAPER No. 15

heat of July caused the Fraser river to flood. These floods, coupled with the heavy rains of September and October, were the direct cause of the loss of several thousand dollars worth of crops. The total precipitation for the year was 87.67 inches, a record for all years in the history of the farm.

A nice group of Clydesdale females is now on the farm. It consists of four mature mares, three two-year-olds, one yearling filly and one horse colt. There are also three grade geldings, a grade mare and a driver.

The pure bred herd of dairy cattle is about the same size as last year, i.e., 48 head. The grade herd, however, has been reduced to 15 head, making a total of 63 animals. Six very good Record of Performance records were completed, two of these being made by two-year-old heifers. The four mature cows averaged 18,131 pounds of milk and 770 pounds of butter, the heifers 13,543 pounds of milk and 650 pounds of butter. In experimental feeding corn silage gave better returns than sunflower silage. wet brewers' grains helped to decrease the cost of milk production when substituted for half the dry grain ration as fed at that time, and mangels produced cheaper milk than potatoes when valued at the same price. The dairy work followed much the same course as previously. Stilton, Cream and Wansleydale cheeses were manufactured. Many samples of milk sent in by dairymen were tested for butterfat content.

A show flock of Dorset Horn sheep was exhibited at the Portland International Stock Show held during November. The sheep won seven first prizes out of a possible eight as well as both grand champions. At the close of the year the flock numbered 90 head. Twenty lambs, the oldest one born January 6, were sold for the Easter market at \$14.60 each. There appeared to be only a limited demand for Easter lamb this season. The 1920 wool clip, amounting to 632 pounds, was handled by the Canadian Wool Growers.

At the end of the year the Yorkshire swine herd is composed of 2 boars, 13 breeding sows, 36 young pigs and 19 feeders. In experimental hog feeding work, the self-feeder method produced greater gains than the ordinary trough method, but the latter produced the cheaper pork where labour was not a consideration. In comparing varying quantities of skim-milk for young pigs, eight pounds per pig per day produced the greatest gains, while half that amount gave the most profitable returns.

The chief source of interest in the poultry department centered around the egg-laying contest. This first contest, with 260 birds, contains many pullets well on the way to making good records. Not only are there many good individuals but the average at the end of the fifth month is far above that held by any other Canadian contest. The breeding and selection work with poultry is giving good results. This year there are thirty-nine 200-egg Barred Rock hens. Twelve of these laid over 230 eggs, the best individual record being 282 eggs. The White Leghorns did not do quite so well, but of the twenty-three 200 egg-hens, ten laid over 230 eggs, the best hen giving a record of 262 eggs.

For the first time an attempt was made to grow sunflowers under field conditions for ensilage purposes. The sunflowers yielded at the rate of 14 tons 300 pounds per acre as compared to 15 tons 1,807 pounds per acre of corn. Work in the cereal section consisted of testing 2 varieties of wheat, 11 of oats, 12 of barley, 2 of mixed grains, 6 of peas and 4 of beans. In forage crop work, 40 varieties of mangels, 13 of carrots, 3 of sugar beets and 13 of ensilage corn were tested.

In the orchard the apples and pears showed a marked improvement over previous years, the crop being the best as to quality and quantity so far. Plums and cherries bore well, but the plums and late cherries were almost completely ruined by the heavy rains. The small fruits yielded large crops. Roses, perennials and annuals were very good, flowering shrubs and trees were excellent. The tulips and other spring bulbs made a particularly good showing.

No fencing except that of a temporary nature was done. No land clearing was attempted other than what was accomplished in connection with getting out fuel. A new modern poultry house, 140 feet long, was erected to house the contest birds. That

12 GEORGE V, A. 1922

portion of the main barn formerly known as the horse stable was remodelled and equipped with modern steel fittings. It now makes a convenient addition to the calf pens and loose cow stalls. A litter carrier was also installed in the cow barn. A complete electric lighting system was installed which lights all the farm buildings. The power is secured from a plant in town.

EXPERIMENTAL STATION FOR VANCOUVER ISLAND

THE SEASON

The climatic conditions experienced during the year gave crop yields that compared favourably with any year in the experience of this station. The spring season opened very early, followed by cool, backward weather in late April and May. More rainfall was experienced than usual during the growing period April to October. Rains in September interfered greatly with late harvesting and threshing operations. Continued wet weather made soil conditions such that autumn seeding could not be undertaken in a general way, but was confined to high, sandy areas. The winter period was characterized by continued wet weather, lack of sunshine and absence of low temperatures. Conditions for outdoor work were not very favourable and costs per unit of work done were relatively high.

LIVE STOCK

No experimental work with horses has yet been commenced at this station, the horses on hand being used simply for farm labour.

A small herd of Jerseys is being gradually built up. This herd is now on the accredited system. A flock of six registered Southdowns were imported from Ontario as a foundation for a new flock. With swine the Berkshire is the breed kept. These are housed in colony houses, which are used in conjunction with portable fences or hurdles and have proved very desirable swine rearing equipment for island conditions, inasmuch as the capital cost is very low and a high degree of efficiency is obtained.

Extensive work in poultry keeping was carried on during the year, covering experiments in breeding, collection of cost of production data, data of maintenance, incubation, brooding and rearing. Electric brooders were found to be very satisfactory for use during the first few days of the chicks' lives. A considerable number of birds were transferred to other experimental stations and a large number of breeding birds sold within the province. The poultry plant was enlarged by the addition of two permanent laying houses.

The work with bees was very successful, a surplus of 50 pounds of honey per colony being obtained. Wintering experiments were carried on and considerable data gathered as to the source of nectar at various seasons, effect of temperature changes, availability of nectar, swarm prevention, etc.

In field husbandry one object of the work being carried on is to find a rotation satisfactory under conditions prevailing at the station, namely, wet winters, dry summers, high prices, stony land and high cost of getting work done. The results so far indicate the advisability of using grass and hay crops more extensively. Rotations with two years' hay or pasture, in either a three or four years' cycle, are most profitable.

With cereals, tests of varieties was carried on and also comparison as to the relative yields of autumn and spring-sown grain crops. Variety tests were also conducted with Indian corn, roots, alfalfa, grasses and sugar beets.

In the orchards, cultural and variety tests were conducted with tree fruits. The nut plantation was extended and work carried on in the study of foreign economic plants. Tests of varieties of small fruits were made. Special attention was given to the production of vegetable seed and to the tests of suitable varieties of vegetables.

During the year an office building was erected; also a laying house and a workshop.

SESSIONAL PAPER No. 15

Repairs were made to some of the other buildings. Improvements were made to the fields by the removing of rocks and roots and graveling and grading were done on the farm roads.

An exhibit was shown at a number of points in British Columbia and the superintendent attended a number of meetings where he gave addresses and acted as judge at numerous rural fairs.

DAIRY AND COLD STORAGE BRANCH

THE PROGRESS OF DAIRYING

Good progress was made in the dairying industry during the year under review, notwithstanding the uncertainty as to the probable tendency of prices and the irritation produced by the continuance of Government control of the butter trade in the United Kingdom.

The only branch of the industry which was seriously affected by post-war conditions was that dealing with condensed milk and milk powder. Late in the season of 1920 the condensed milk market became so demoralized and the holdings of the manufactured article increased to such an extent that in both the United States and Canada many of the condensaries were closed, and others operated with greatly reduced outputs. The milk powder factories in Ontario were closed for some time, and have not yet resumed full operation. A considerable quantity of milk and cream was, in consequence, diverted to cheese factories and creameries.

Full returns of the production of cheese and creamery butter are not yet complete, but it is expected that the total quantity of creamery butter for the season of 1920 will exceed that of the previous year by several million pounds. The total production of creamery butter in 1919 was 103,890,707 pounds. The production of creamery butter is increasing in all the provinces. The production of cheese, which increased during the first two years of the war, has since shown some decrease. The expansion of the condensed milk industry was almost wholly the result of the diversion of milk from the cheese factories. The increasing demands of the towns and cities for milk, cream, and ice-cream make further annual inroads on the cheese industry. Cheese making has been carried on only in those districts where a large quantity of milk is produced, and it is to these districts that the city milk distributors naturally turn for supplies.

The figures of the total dairy production for the season of 1920 are not yet available. To indicate the extent of the industry and the proportion of the milk which is used for different purposes the figures for 1919 are given.

TOTAL PRODUCTION, QUANTITIES, AND PERCENTAGES OF MILK USED IN CANADA DURING 1919 FOR DIFFERENT PRODUCTS.

Product.		Quantities.	Values.	Milk Used.	Per Cent.
			\$	lb.	
Cheese.....	Lb.	167,734,982	44,805,794	1,845,084,802	18.18

Total.....			251,526,301	10,151,715,051	100.00

12 GEORGE V, A. 1922

The calculations for the quantities of milk in the above table are based on 11 pounds of milk for 1 pound of cheese; and 3.5 per cent of fat in the milk with a 20 per cent overrun for butter; and 7 pounds of ice-cream per gallon with 10 per cent of fat and 18 per cent of fat in the cream.

In the above table it will be observed that under the heading "Milk used" no quantities are given opposite "whey butter," "milk powder," "condensed skim milk," "casein," or "whey cream," for the reason that these are all by-products.

THE MARKET SITUATION

The market situation at the present moment is very uncertain. Butter was decontrolled in the United Kingdom on March 31, but the ministry have on hand or to arrive to complete contracts, a large quantity of butter which will now be sold on the open market. Large quantities of cheese have come forward from New Zealand owing to the accumulation on hand from previous years. Supplies from Denmark and Holland, although not yet back to the pre-war level, are increasing. The difficulties of exchange complicate the situation. The only thing that seems at all certain is that the prices of dairy produce will remain relatively higher than most other lines of farm produce. The market can hardly be expected to reach a state of equilibrium until the rates of exchange become more normal. Large quantities of Danish butter have been shipped to the United States, where it is not needed and where it has helped to increase the surplus. In the sale of this butter to the United States an anomalous position exists, as the Danes have been able to secure a better return than they could by shipping to England, where the price is higher than it is in the United States. This all arises out of the exchange situation.

There appears to have been a considerable increase in the consumption of butter in Canada during the last six months. At the time of writing the price of butter is higher in Canada than it is for the same grade in the United States.

DAIRY ORGANIZATION

The conditions arising out of the war have stimulated dairy organization. The most notable move in this direction is the widespread organization among producers. The activities of the National Dairy Council, which was organized in November, 1918, at the suggestion of the department, have been effective in securing reasonable consideration for the legitimate claims of the industry. If the council continues to follow the sound lines of policy already adopted this organization is bound to exert a wholesome influence in the business of dairying throughout Canada. Strong provincial associations of dairymen are now organized in all the provinces. The functions of these associations vary somewhat according to circumstances, but if they do nothing more than bring the various interests together in annual conventions, to give expression in united voice on the various questions and problems that arise, a very useful work will be accomplished. All the provinces have well organized dairy branches in the several Departments of Agriculture.

STATISTICS OF DAIRYING

The Dominion Bureau of Statistics published a report on dairy factories for the year 1919, following the plan adopted in 1917. These reports contain much useful information regarding the operation of cheese factories, creameries, condensed milk plants, etc.

FINCH DAIRY STATION

The business of the Finch Dairy Station continues to grow. In 1920 the total quantity of milk received was 5,570,545 pounds as against 2,069,281 pounds in 1912 which was the first year of operation. During the year 1920 both butter and cheese

SESSIONAL PAPER No. 15

were manufactured, and a large quantity of both milk and cream was sold to milk distributors and condensaries. The average net return to the patrons was \$2.49 per hundred pounds, after deducting the prevailing rates for the manufacture of butter and cheese and the handling of milk and cream.

The operation of the Finch Dairy Station has demonstrated the advantage of a factory having more than one outlet for the milk received. By being in a position to sell milk or cream on demand, or to manufacture butter or cheese, as the case may be, full advantage is taken of the highest market which is offered at the time. The operation of the station along these lines has attracted considerable attention, especially since the patrons of the condensaries in western Ontario found themselves in an awkward position when some of these factories reduced their output in the fall of the year 1919.

Finch Dairy Station shows a profit on the year's operations.

THE LACK OF CAPABLE MANAGERS

The dairy industry is suffering from the lack of capable managers for cheese factories and creameries. The seasonal nature of the employment in many of the factories and the comparatively low scale of salaries has tended to discourage competent men from taking up this line of work.

There never was a time in the history of the industry when there were better or more numerous openings for thoroughly qualified men than there is at the present time.

COW TESTING

The interest in cow testing continues to grow and a large number of requests for assistance are being received this spring than ever before. The active co-operation of the Departments of Agriculture in Quebec and Ontario have had a stimulating effect. At the conference of deputy ministers held in Ottawa on March 17 to 19, 1920, it was agreed that whenever any of the provinces were prepared to take over the cow testing work this department would be ready to make the transfer. The provinces of Saskatchewan and Manitoba have already accepted the responsibility. It is believed that the provincial organizations with their numerous field agents are in a better position to carry on this work than the Dominion Department is without the employment of a very large staff. In the interest of general economy it seems desirable for the work to be transferred whenever practicable to the provincial authorities.

DOMINION EDUCATIONAL BUTTER SCORING CONTEST

The Dominion Educational Butter Scoring Contest inaugurated in 1919 was continued in 1920. It is acknowledged that this service has promoted uniformity in the methods and practices followed in the creameries in different parts of Canada. It has demonstrated that equally good butter can be made in all the provinces, and that there is now, as a matter of fact, a remarkable uniformity in the character and quality of the butter being manufactured in the different sections.

Samples of butter selected from the contest have been taken to the different provincial conventions and discussed fully with the buttermakers in attendance.

The educational value of this contest appears to be so important that it has been decided to continue it, with modifications, for another year.

GRADING OF DAIRY PRODUCE

A new line of work was undertaken by the Dairy Branch in 1920 in the grading of cheese for sale by auction at Montreal. The whole question of grading, both for domestic and export purposes, has been widely discussed during the year and there

12 GEORGE V, A. 1922

is now a general demand for the grading of all dairy produce intended for export, a demand which the department is prepared to meet. At a conference of Deputy Ministers of Agriculture held during the year it was agreed that the grading of dairy produce for domestic use might be left to the provinces, while grading for export was conceded to be a Dominion function.

CARGO INSPECTION

With the resumption of regular shipping on the opening of the St. Lawrence season of 1920 the cargo inspection service was again placed on a pre-war footing. Labour conditions at the ports, and to some extent the lack of suitable steamers for perishable products, called for careful oversight in order to secure the handling of this class of cargo in the best possible manner.

The placing of thermographs in all chambers carrying refrigerated products was continued. Reports from the Cargo Inspectors in the United Kingdom regarding goods being landed in damaged condition were passed on promptly to the shippers. Market information of value to Canadian producers was transmitted through the same channel.

REFRIGERATOR CAR SERVICES FOR BUTTER AND CHEESE

The usual special refrigerator car service for the carriage of butter in less than carload lots was in operation, by arrangement with the railway companies, from May to October. The iced-cheese-car service, by which shippers are enabled to secure iced cars for the shipment of cheese in car lots, was also in operation during the hot weather.

MARKET INTELLIGENCE

The Extension of Markets Division of this branch issued a Dairy Produce Market Report throughout the Dairy manufacturing season. A weekly letter is despatched every Monday, giving the latest information from the Montreal and Toronto markets up to noon of that day. Paid lettergrams are sent on Monday and Friday evenings to certain specified officials in the different districts, who are then in a position to give the information by telephone, or otherwise, to salesmen in their immediate vicinity. Similar collect lettergrams are sent to any person who requests to have his name put on the list.

A DAIRY NEWS LETTER

The Monthly Dairy News Letter published by this branch, the first issue of which was dated October 4, 1919, appears to be popular judging by the requests received from all over the dairy world for names to be put on the mailing list. This letter is intended to give items of information relating to the international situation, as well as to the industry in Canada, which would not otherwise receive publicity.

ADMINISTERING OF THE DAIRY AND OLEOMARGARINE LAWS

The Dairy Branch is charged with the administration of the Dairy Industry Act, 1914, and regulations thereunder; and the Oleomargarine Act, 1919, as amended, and regulations. A staff of nine inspectors under one senior inspector is employed, who cover the whole country by districts. Some of these inspectors give only part time, being employed at seasonal work in other lines. The Department has the co-operation of the Royal Canadian Mounted Police in administering these laws.

GRIMSBY COLD STORAGE

The Grimsby Cold Storage was again operated on commercial lines. The refrigerated space is used by fruit growers and shippers (a) for the precooling of

SESSIONAL PAPER No. 15

tender fruits intended for distant markets; (b) for short term storage over week-ends, or while car lots are being accumulated; (c) for carrying fruit over periods of glutted markets; (d) for the storage of fruit intended for canning but which are coming in faster than the canneries are able to handle them. The space is also used for the winter storage of apples.

The advantage of having cooling and storage facilities in a fruit district which depends largely on distant markets has now been fully demonstrated. Much fruit is saved from deterioration or even total loss; by making more distant shipments possible the market is enlarged; prices are stabilized and production is encouraged, thus benefitting both the fruit grower and the consumer. It is expected that after the season of 1921 the Grimsby Cold Storage will be purchased by a new organization of fruit growers in the district.

THE COLD STORAGE ACT

There were no contracts entered into during the year for the payment of subsidies under the Cold Storage Act. A contract was offered to a firm at North Sidney, but up to the present it has not been signed by the applicants. This is a revival of an old contract entered into before the war, in connection with which the erection of the warehouse was delayed on account of war conditions.

CREAMERY COLD STORAGE BONUS

There were seventeen applications received for creamery cold storage bonuses during the year. Of this number fifteen received the full bonus of \$100, one was refused, and one deferred for further action.

SMALL COLD STORAGES

The Dairy Branch continues to receive many inquiries for plans and specifications for small refrigerators, suitable for the use of farmers, country stores, summer homes, and other places where ice is stored for domestic purposes.

NEW PUBLIC COLD STORAGE WAREHOUSE AT MONTREAL

Good progress has been made by the Harbour Commissioners of Montreal in the erection of a public cold storage warehouse on the harbour front. This warehouse when completed will be one of the best equipped on the continent, and should be of great advantage to the export trade in perishable products.

PUBLICATIONS

The following publications in the Dairy and Cold Storage Series were issued during the year:—

- Bulletins: 55. "The Finch Dairy Station, Report of Progress."
56. "Report of the Dominion Educational Butter Scoring Contest, 1919."
57. "Simple methods for the Storage of Ice."
58. "The Progress of Cow Testing."
- Circulars: 27. "Yield and Relative Value of Some Dairy Products."
28. "Dairy Industry Act, 1914, and Regulations."
29. The Oleomargarine Act, 1919, as Amended, and Regulations."
30. "Notes on the Cold Storage of Eggs."

HEALTH OF ANIMALS BRANCH

The officers of this branch, under the direction of the Veterinary Director General, have been engaged in controlling and eradicating contagious diseases of animals and in the inspection and testing of import and export stock, in accordance with the provisions of the regulations passed under the Animal Contagious Diseases Act, as well as the inspection of export and import meats, meat food products, canned fruits and vegetables, under the Meat and Canned Foods Act. The statistics given in the annual report of the Veterinary Director General for the year ending March 31, 1921, indicate that the work of this branch is of a very important nature, and that it has been carried out very satisfactorily.

Unfortunately this branch has been working under difficulty, owing to the scarcity of suitably trained veterinarians. The field of veterinary science in recent years has broadened out very materially, so much so that educational authorities have within the past year raised the standard of veterinary education. It is now necessary for the young man to take his junior matriculation before he can enter any accredited veterinary college on this continent. He has then to attend a four-years' course, the college year extending over eight months. While it is realized that this change is very necessary, it is feared that it will for some years at least seriously reduce the number of men entering the profession. The remuneration of the veterinarian has not been at all commensurate with the value of the services rendered by him. The well trained modern veterinarian is of inestimable value to our live stock interests, and when it is considered that many of these men have not the essential qualifications of character, such as tact, diplomacy, good judgment, and firmness for our work, the difficulty of maintaining an adequate, efficient force for the protection of our live stock interests and foreign markets is very apparent. If Canada is to maintain its record of freedom from disease, the Health of Animals Branch must be maintained at the highest possible degree of efficiency. It may, therefore, be necessary in the near future to take suitable measures to encourage men of the proper type to enter our veterinary colleges, as the continued scarcity of properly trained veterinarians will interfere very seriously with our efforts to maintain our herds and flocks free from serious diseases. Although with its present staff this branch has been able to control diseases of live stock, there is a great deal of valuable work it was unable to undertake, owing to the limited number of properly trained veterinarians on its staff.

GLANDERS

A few small outbreaks of this disease have been dealt with in Manitoba, Alberta, Ontario, and Quebec, necessitating the slaughter of fifty-nine (59) animals. The majority of these cases were found in the outlying districts in the province of Alberta and the outbreaks were promptly eradicated. It is interesting to note that no cases were found in the province of Saskatchewan and only two in Manitoba. These two provinces were badly infected some years ago, necessitating the slaughter of many thousands of horses. The strict enforcement of our policy of slaughtering all animals reacting to mallein has had the desired effect and indicates most clearly that it is a sound and wise policy. It has been possible under this policy to practically exterminate this dangerous disease in Canada. Owing, however, to the fact that immigrants and others are constantly bringing in horses, and although the greatest care may be taken to detect infected animals at the boundary, there is always the possibility of incubative cases passing the most rigid test and eventually developing the disease at destination. We may, therefore, expect to find cases from time to time, but so long as there is a wide-awake, efficient veterinary force serious outbreaks are not likely to occur.

SESSIONAL PAPER No. 15

DOURINE

In my last report attention was drawn to the fact that only two horses were destroyed for this disease during the period covered by that report. It was also pointed out that these cases did not show any evidence of this malady, but as they did not give a satisfactory negative reaction to the laboratory blood test, it was considered wise to destroy them.

The closest attention has been given by officers in the areas in which this disease existed to such an alarming extent many years ago. Many animals have been inspected and laboratory blood tests made, and all tests gave satisfactory negative results. This disease has, therefore, after many years of persistent work been eradicated from this country.

HOG CHOLERA

This disease has been dealt with in each province except New Brunswick and Nova Scotia and the Yukon Territory. It has been more troublesome in Ontario than in the rest of Canada, as more than half of the total number of hogs slaughtered for this disease were in that province. No extensive outbreaks have however, occurred, and while it has been necessary to slaughter approximately twenty-three hundred (2,300) more hogs during this period than in the previous year, the compensation has been the same. The lower cost has been largely due to the policy followed in withholding compensation in cases where outbreaks have occurred in garbage-fed hogs.

As has already been explained in previous reports, the department found it necessary some years ago to control garbage feeders, owing to the fact that the majority of our outbreaks occurred in garbage fed hogs. An order was, therefore, passed prohibiting the feeding of this material unless the license for so doing was obtained from the Veterinary Director General. Owners are definitely warned before a license is given them that they must strictly observe certain definite conditions, one of them being that the garbage must be thoroughly cooked before being fed.

Our officers have endeavoured to visit premises on which garbage is fed as frequently as possible, but the owners have many opportunities to be negligent in cooking the garbage, with the result that sooner or later an outbreak occurs. If the owner is unable to prove conclusively that the infection was brought on to his premises by some other means than the garbage, no compensation is paid.

The department has been very strict with regard to enforcing this requirement, as any negligence in the cooking of garbage results in an increased expenditure for hogs slaughtered for hog cholera, which could have been avoided if the garbage feeder had paid proper attention to cooking. It is not, therefore, considered wise to relax the regulations in this connection.

The outbreaks which have occurred during the past fiscal year have all originated on premises where garbage has been fed. Some of these outbreaks have been traced to other outbreaks in the district, and in such cases the owners have been given the benefit of the doubt and compensation paid.

Garbage feeding has for the past few years been the chief cause of our hog cholera outbreaks and it is therefore, necessary to supervise these feeders just as carefully as possible. There are, however, so many of them distributed throughout this country that, in order to give this work the attention it requires, it will be necessary to employ a very large number of men for this purpose. In the meantime the staff of inspectors for this work is being gradually increased and the results watched carefully.

MANGE IN HORSES AND CATTLE

Horse mange has not at any time been prevalent in this country. A few cases have been dealt with in the provinces of Saskatchewan, Alberta and British Columbia

12 GEORGE V, A. 1922

during the period covered by this report, and a much larger outbreak occurred in Manitoba, which has, however, been kept under control and will soon be eradicated. A thorough investigation of the source of infection of this outbreak indicated that the disease was introduced by Indian ponies. The common Indian custom of visiting reserves on either side of the international boundary and the likelihood of their crossing the boundary at points other than authorized ports, is a source of danger. This practice has on more than one occasion resulted in outbreaks of contagious disease. The matter has, however been brought to the attention of the proper authorities who will take measures to keep in closer touch with the movements of the Indians.

Cattle mange has always given the department considerable concern, especially in Alberta and Saskatchewan. In the last annual report it was mentioned that a conference had been held between officials of this department and the live stock owners at Calgary, and that as a result of this conference it had been decided to enforce a compulsory dipping order in the period between June 24 to July 5. An educational campaign had been conducted during the winter months by our officers and the stock men realized the importance of giving the department their full support in its endeavour to eradicate this disease.

The regulations which had been in force for very many years over a large area caused a great deal of inconvenience and annoyance to shippers of live stock and they were, therefore, prepared to assist the department if there was any prospect of the removal of the blanket quarantine. Having obtained their assurance of co-operation it was felt that the department was justified in assisting in every possible way. It was, therefore, arranged to give a grant of \$400 towards the erection of vats when built in accordance with our approved plans, in districts where vats were not available, and over one hundred vats were erected under these conditions.

The area covered by the dipping order was carefully divided into districts and committees of stockmen chosen to look after the districts to see that sufficient vats were available and that they were in good working order. Each committee man had allotted to him certain specified duties for which he was held responsible. Every possible means was taken to overcome any difficulties and to have the work organized as completely as possible.

Dipping commenced promptly on June 24. The first dipping was completed on July 4 and the second about the 15th of that month, there having been approximately 200,000 cattle treated twice.

It was very fortunate that the weather conditions were most favourable for effective work, and that with very few exceptions the live stock men assisted in every possible way to make the dipping a success. It was, it is believed, the first time on record that the department was able to obtain the united co-operation of practically all the live stock owners in the area.

As soon as full detailed reports had been received from my officers with regard to the dipping, the question of removing the restrictions which had been in existence for so long was very carefully considered. The conclusion was reached that it would be reasonably safe to have them removed and an Order in Council was passed on August 12 for this purpose.

In releasing these restrictions it was fully realized that a territory of such large proportions and varying conditions, which had been so long infected, could not be entirely freed from mange by the enforcement of a compulsory dipping order, however thoroughly the treatment may have been carried out. However, in view of the full co-operation of the live stock men and the special efforts made by my department to dip every animal twice, it was felt that it was reasonably safe to remove the quarantine, provided a very close supervision was maintained over this area for some time. The inspectors have, therefore, systematically inspected the cattle in this area and have quarantined herds in which any suspicion of the disease existed. These herds are

SESSIONAL PAPER No. 15

being dealt with individually and this action has in a very large measure removed inconvenience and annoyance to a large number of stockmen, who under former conditions were obliged to comply with the regulations even though their herds were clean.

The closest investigation carried on during the winter months has justified the action taken in this connection.

The disease has since been detected in a number of herds but the outbreaks have been sufficiently limited to enable the inspectors to deal with them effectively by the enforcement of individual quarantines and treatment.

In view of the great importance of protecting our export trade it was considered essential to have all export shipments from this area carefully inspected by a veterinary officer before the necessary export district health certificate is issued. If the stock men will continue to co-operate with the department in reporting promptly any suspected cases of this disease, it is almost certain that we shall not experience any great difficulty in controlling this disease in the future.

BOVINE TUBERCULOSIS

The control of bovine tuberculosis presents perhaps greater difficulty than does that of any other malady affecting domestic animals. It is so widespread that any compulsory radical measures would undoubtedly result disastrously to our live stock trade. It is, therefore, essential to follow a careful progressive policy which will meet with the hearty support of our stockmen. Many of our breeders are now commencing to realize that the day is not far distant when they will be required to produce and place on the market not only animals of approved types but in addition thereto sound healthy individuals.

The inauguration of the accredited herd plan, which was referred to in the last annual report is meeting with general approval among breeders of pure bred cattle. There are so many herds undergoing accreditation that our officers are experiencing difficulty in giving them prompt attention. The Veterinary Director General is also receiving regularly applications from owners desiring to have their herds placed under the supervision of this department for accreditation. As herds must pass at least two annual tests without a reactor, and as this plan has not been in general operation for a sufficiently long period there are no fully accredited herds at the present time. There are, however, several herds which will receive their final test in the course of a few weeks and will then be accredited if all animals in these herds pass this test. The owners of these herds will then receive an accredited herd certificate which is good for one year from the date of issue. During that period they can ship out any animals for export without a special test.

This plan has been in operation in the United States for five or six years and there are a large number of fully accredited herds in that country. There is an understanding between this Government and that of the United States that cattle from these accredited herds can be shipped to either country without special test. This is a great convenience to the shipper and is now largely the cause for the interest taken by pure bred stock owners in the plan. This manner of dealing with tuberculosis will prove of inestimable value to the live stock industry, as the cleaning up of pure-bred herds and maintaining them free from tuberculosis will prevent to a considerable extent the dissemination of this disease. We are dealing with foundation stock, which supply our farmers with animals for the improvement of their herds. It is, therefore, gratifying that this plan is not only a practical one in the control of this disease but is quite popular.

In addition to this measure for the control of tuberculosis our officers have been busily engaged testing dairy herds in municipalities under the Municipal Tuber-

12 GEORGE V, A. 1922

culosis Order. Since the last report the number of municipalities taking advantage of this order has increased. The work takes up a great deal of time, as dairymen are constantly bringing in fresh cows and these must all be tested before they can be admitted into the herds.

Our experience has shown that the largest number of cases of tuberculosis is found during the first tests, and that afterwards the percentage drops very materially. Municipalities which have been under the supervision of this branch for the longest period are having the smallest number of reactors.

In addition to these two measures our officers are testing cattle sold for export, and also cattle in herds which were placed under the supervision of this branch some years ago.

In view of the great amount of work entailed in dealing with this disease and of the interest taken by the stockmen, it has been necessary to arrange for obtaining more trained assistance. An agreement was, therefore, arrived at between the Bureau of Animal Industry at Washington and this department to employ veterinary practitioners to make tests of export cattle, whose tuberculin test charts could be endorsed by the officers of my department. An examination was, therefore, held all over Canada on March 15, and as a result of this examination there, a number of veterinarians are now available who may be called upon to conduct these export tests. As these veterinarians are not officers of the Department of Agriculture, it will be necessary for the exporter to pay them for their services.

It is hoped that the exporters will take advantage of the services of these veterinarians as much as possible. It will give them quicker service and will also enable our officers to give more of their time to tuberculosis eradication work.

SHEEP SCAB

Only five small outbreaks of this disease have been dealt with during this period. Three of these were in Manitoba and two in Saskatchewan are being dealt with in the usual manner.

ANTHRAX

While there have been several outbreaks of this disease reported, a careful investigation by our officers, and laboratory tests, have not in any case confirmed the existence of this disease.

RABIES

A small outbreak of this disease occurred in the province of Ontario, but this outbreak was quickly controlled through the assistance of the municipalities enforcing muzzling orders.

INSPECTION OF STOCK CARS AND YARDS

Special inspectors are constantly engaged in the work of supervising the disinfection of stock cars and in the inspection of the various stock yards throughout the Dominion, for the purpose of ascertaining that these are maintained in a clean and sanitary condition.

QUARANTINE STATIONS AND INSPECTION PORTS

Quarantine stations and inspection ports have been maintained on the Atlantic and Pacific coasts and along the international boundary.

It is regretted that it has been necessary to refuse to issue permits for the importation of cattle, sheep, other ruminants and swine from any part of England, owing to outbreaks of foot and mouth disease in that country, but it is hoped that conditions may soon be favourable, in order that our breeders may have the opportunity of resuming their importations from that country.

SESSIONAL PAPER No. 15

PATHOLOGICAL DIVISION

This department maintains the following laboratories and research stations:—

1. Biological Laboratory, Ottawa.
2. Research Station, Hull, Que.
3. Veterinary Research Laboratory, Lethbridge, Alta.
4. Veterinary Research Laboratory, Agassiz, B.C.
5. Fox Research Station, Charlottetown, P.E.I.

These laboratories and research stations are maintained for the purpose of carrying on specialized work required by the Contagious Diseases Division and the Meat and Canned Foods Division, and engaging in those problems of veterinary research which most intimately concern the live stock industries of Canada.

The work of this division falls mainly under the two headings,—laboratory routine and special research. It is conducted by officers who, in addition to their qualifications and experience as Veterinary Inspectors in the Contagious Diseases Division or the Meat and Canned Foods Division have received special training in laboratory technique and who devote themselves to the study and advance of veterinary science and to the practical application of the knowledge resulting from patient and laborious investigations and laboratory experiments.

This work, so essential for the efficiency of this department and for the welfare and protection of the livestock industries, increases and grows in importance from year to year correspondingly with the rapid growth and development of animal husbandry. The value of the work lies not only in the application of the most improved and modern methods of determining the presence and nature of various diseases and of their treatment and control, but also in the knowledge and means which, properly applied, prevent the occurrence of disease.

The public, that is to say stockowners, when calamity threatens or overtakes it in the form of an epizootic, is apt to clamour for miraculous interventions and to express disappointment when the animal pathologists fail to perform such miracles. When an outbreak of contagious or infectious disease actually occurs little can be done, as a rule, except to employ the most immediate and effective means of eradication which, in many cases, are necessarily drastic and entail further losses to individual owners. A great deal can be done, however, in the prevention of disease, and it is to prevention rather than to eradication that the efforts of this department are directed, and in which the work of the pathological division is of such great importance, but which passes more or less unrecognized by the public, who are rarely grateful for a calamity averted.

The routine work of these laboratories is of a highly technical nature and includes:—

(a) The manufacture of certain biological products such as tuberculin, mallein, blackleg and contagious abortion vaccines. These products are prepared, tested and standardized by the best known laboratory methods and every effort is made to perfect them as diagnostic agents or as preventive vaccines. An absolutely reliable tuberculin is of the utmost importance in connection with the diagnosis of tuberculosis and the efficiency of the Accredited Herd System. The output of this product alone has doubled again and again within the last few years, and at the present time by employing every means available within the limited facilities of the laboratory it is barely possible to meet the demand. With the further extension of the accredited herd work it will be impossible to meet the increase demand for tuberculin unless the laboratory accommodation and personnel is amplified.

The demand for blackleg vaccine has been so great that up to the present it has been difficult to meet. The preparation and disbursement of contagious abortion vac-

12 GEORGE V, A. 1922

cines is rapidly increasing. Though as yet sufficient data has not been collected to form a definite conclusion with regard to the efficiency of this method of preventing abortion, the reports received are encouraging. The commercial value of the output of biological products is considerably in excess of \$2,000 monthly.

(b) Routine examinations of specimens forwarded to the laboratories by veterinary inspectors, practitioners, farmers and stock owners, and inclusive of material obtained from abattoirs and packing establishments requiring a pathological or bacteriological report.

(c) Serum tests where a specific diagnosis is required for suspected dourine, contagious abortion and other diseases.

(b) Laboratory tests of samples of water, milk, meat and canned food products, disinfectants, etc.

(e) The preparation of exhibition specimens and collections for educational purposes.

(f) Letters of inquiry answered and advice given on questions relating to animal diseases and their prevention.

(g) The breeding, care and maintenance of experimental animals required in the routine work outlined above and for research work.

Research work has been carried on in connection with bovine tuberculosis, contagious abortion of cattle and haemorrhagic septicaemia. The latter disease frequently appears among horses, cattle, sheep and swine as sporadic outbreaks, and is often confused with or mistaken for blackleg, anthrax, forage poisoning or hog cholera.

At the Research Station, Hull, Que., the great problem of bovine tuberculosis is studied. The problem of animal parasites is also under enquiry and experiments are being carried out.

At the Research Laboratory, Lethbridge, Alta., the investigation of swamp fever of horses, which has been under way for many years, but subjected to frequent interruptions occasioned by the work involved in suppressing dourine, is making good progress.

Dourine has been entirely eradicated. A full report covering the history, research and suppression of this insidious disease (1904-20) has been made by the Chief Animal Pathologist, and published.

At the Research Laboratory, Agassiz, B.C., experiments are being conducted on contagious abortion of cattle. Certain sheep and goat diseases have been investigated. A report on Coccidiosis of British Columbia cattle has been published.

At the Fox Research Station, Charlottetown, P.E.I., diseases of foxes, particularly distemper and animal parasites, which account for most of the losses experienced, are under investigation. Methods of preventing these conditions are being devised and tried out. Several papers dealing with questions of hygiene and sanitation have been published, as well as an important contribution on anthelmintic treatment.

An investigation of nutritional diseases of foxes is carried on at the Research Station, Hull.

Poultry diseases are being studied by one of the pathologists, who is specializing in this line of work at the Central Experimental Farm, Ottawa.

MEAT AND CANNED FOODS DIVISION

MEAT INSPECTION

Not since the inauguration of this work, nor perhaps since the development of the packing-house industry, has there been as critical a period as during the past year.

SESSIONAL PAPER No. 15

During the war, owing to the excessive demand for all the meat and meat food products that could possibly be exported from Canada, packers were enabled to carry on business with a decided degree of security. Following the cessation of hostilities, however, the demand for these exportable products decreased to a marked degree.

Producers, on the other hand, still held out for the high prices of live animals. Markets were falling rapidly and labour and overhead charges were at the highest peak known in the history of the business, which conduced to the creating of a very high-priced finished product.

Our export market for frozen beef was almost immediately lost. The control of bacon in Great Britain rendered that phase of the business very uncertain, in consequence of which the packers have undoubtedly suffered a tremendous loss. This, together with the careful purchasing by residents of Canada, had the effect of so seriously interfering with this particular trade, that it has necessitated the closing of some of the larger packing houses in Canada.

The staff required to man these houses has been more than taken care of, by utilizing their services in the Diseases Division, in connection with the increase of the work made necessary by the tuberculosis eradication policy.

The slaughter of the different meat food animals for the year were as follows:—

Cattle—826,000, a decrease of 139,000 from the previous year.

Sheep—166,000, an increase of 65,000.

Swine—1,682,000, a decrease of 489,000.

The post-mortem report shows little change other than an increase in the number of animals affected with tuberculosis. It is felt, however, that beneficial results will accrue from the work of eradication at present being carried on through accredited herds, and other measures recently adopted.

In the past, the laws governing imports were such that meat and meat food products could enter Canada without any interference, and compete with the Canadian inspected product. This, it was felt, worked a grave injustice to our Canadian packers and the public, especially in view of the fact that Canadian animals slaughtered in establishments under inspection were subject to severe and searching post-mortem examination, and the products handled, during the process of manufacture, under strict sanitary regulations before being marked with the Inspection Legend.

This condition, however, was overcome by bringing into operation, during the past year, new regulations governing the control of imports.

Without dealing at length with the value of inspection to the Canadian consumer and our export trade, the latter, by the way, could not continue if it were not for our system of inspection, as our meat foods are forbidden entry into foreign markets unless marked with the Canadian Inspection Legend and covered by an official certificate, signed by one of the duly accredited officers of this division, it may be said that the reputation made for Canadian meats and meat food products during the war, as evidenced by the commendatory resolution of the Allied Purchasing Commission, was due in a great measure to the rigid technical examination for diseases and the rigid control of sanitary measures in establishments operating under the provision of the Act.

To preserve the good name of Canadian meats and to continue to hold our place in the markets of the world, our present reputation must be upheld, which can easily be done, if the producers in Canada will do their part in furnishing properly matured and finished live animals, together with the control now exercised as to inspection and sanitation.

During the year an amendment to the Oleomargarine Act was put through, and new regulations governing its manufacture and importation were passed.

The principal effect of the new Act was to extend the time in which this product might be manufactured and imported into Canada.

A great deal of information has been obtained regarding this food and it would appear that if it is to be continued, some steps should be taken along the lines of standardization in order that the quality may be safeguarded, and the consumer protected.

FRUIT, VEGETABLES, AND MILK

During the past year, new regulations governing the manufacture, import and export of these products were brought into operation.

The principal change in the regulations dealt with the certification of imports, which entailed an immense amount of work, but the results derived fully warranted an expenditure in connection therewith.

The wisdom of this department in insisting that the quality of the product be stated upon the label is quite apparent. Consumers are, at all times, willing to pay fair prices for any article of food provided they can be shown that reasonable value is obtained for their money.

The custom in the past, of simply labelling food products without declaration of the quality, provided means whereby an unscrupulous packer could mark an inferior product with a flashy label, the consumer having no means of knowing, prior to purchase, what he was buying.

These conditions have done more than anything else in creating in the minds of the public a lack of confidence with regard to canned foods, which was indeed most unfortunate, as canned foods of good quality put up under sanitary conditions in convenient packages, and at a minimum cost, are essential to the development of our country.

Climatic conditions in Canada are such that a continuous supply of fresh fruit is impossible unless imported at exorbitant prices, thus depriving the average consumer of a very necessary food.

The housewife in the past met this condition to some extent by home-canning. However, the present shortage of domestic help coupled with the general tendency to avoid this irksome and somewhat troublesome method, has been conducive to increasing the demand for factory canned products. There is no doubt an economic advantage is also to be gained which should be productive to improving the quality of the articles canned.

Most modern factories contract for their supplies the previous winter and in many instances furnish the seed of known and specific value, and to a certain degree exercise supervision over the methods employed in the cultivation, and instruct as to the time of delivery, etc., in order that the raw materials may be packed and processed as expeditiously as possible, the work at the canning plants being under the supervision of my officers, who are most exacting as to sanitary conditions. It is therefore possible for such plants to place on the market a superior product at a minimum cost.

If due care is exercised in the grading of the raw material, no difficulty will be experienced in producing a superior finished product, true to the quality named on the label, the difference in quality being one of appearance of grade, rather than that of actual food value. Certain factors govern this, namely, the degree of maturity, form, shape, evenness of size, and proper preparation.

The value and importance of quality packing will commend itself to producer, packer and consumer alike and will prevent what has hitherto been the greatest obstacle in the canned foods industry, namely, the lack of confidence in the uniformity of the product.

Special vigilance has been exercised by my officers in connection with imports. Some slight inconvenience was caused at the commencement, yet those who were anxious to comply with the law soon adjusted their business to the new requirements.

SESSIONAL PAPER No. 15

The policy of tolerance was carried out rather than one of intolerance. Improperly labelled products were either detained until satisfactorily marked or were returned to the country of origin. This course rather than that of legal action was pursued. Vast quantities were condemned as unfit for food, and several shipments were refused entry into the country.

Owing to it being an easy matter to create a false impression in the public mind, particularly where foods are concerned, my responsible officers deemed it advisable not to advertise these facts, believing at all times that a quiet, efficient, systematic control could accomplish the desired aim, better than the doubtful policy of litigation, which in most cases is accompanied by press notices of an alarming rather than of an assuring character.

The past season being ideal for the production of fruit and vegetables, large quantities were handled by the various canning establishments, prices being the highest in years. The falling off of export buying however, left the packers with immense quantities of finished products on their hands.

It is not to be presumed that business conditions generally have not had a great deal of effect on this industry. Unemployment and decrease in earning power of a great many workers have been important factors in slowing up the sale of all commodities. There are signs, however, more hopeful for the future, namely, the revival of export buying.

CONDENSED AND EVAPORATED MILK

The temporary closing of the export demand for this class of food threatened to interfere very seriously with its manufacture in Canada. At the moment however, it would appear that conditions are rapidly improving. Several large shipments are now going forward into export trade. This together with the increased home consumption during the summer months will in all probability furnish sufficient outlet for the present, and in the meantime it is hoped that trade conditions will become normal and thus preserve to Canada one of her very important industries.

The quality of the products manufactured in Canada, meet the most exacting requirements, as sanitary conditions in the establishments are of a very high order, and in keeping with the most modern ideas.

LIVE STOCK BRANCH

HORSE DIVISION

Recently the statement that horse breeding was on the decrease has been given considerable publicity. Among the reasons given for this decrease are: a falling-off in the demand for horses; that trucks are rapidly replacing horses in the cities; that tractors are being substituted for horse-power on the farms; and that in short, it will only be a matter of a very few years before the horse will have actually passed. During wartime the cost of feed was also used as an argument against the horse. Nevertheless, a careful analysis of the situation goes to show conclusively that horses have steadily increased in numbers during the war years. However, had the report stated that there had been a decrease in certain classes of horse it would have been correct.

During those years farm products brought high prices, while the work of distribution also brought great returns. The cost of production and of distribution was not given serious consideration. In city and country alike it would appear that the people interested, acquired a wrong conception of the value of horse-power and its place as an economic factor not only on the farms but also in the cities of this country. A change, however, has now taken place. Money is no longer passing as freely as heretofore. The cost of horse feed is very much lower than it was even a year ago. In

fact the cost has practically been cut in two. Farm products have fallen in many cases more than 100 per cent, while the price of other commodities must necessarily follow the downward trend. Under these changed conditions it is necessary to take stock of our assets; to seriously consider the cost, not only of producing but also of distributing the products of our country.

The question of power has been discussed with farmers, dealers, owners and managers of cartage companies, delivery companies and various firms interested in transportation in one form or another. Many of these men were using both tractors and horses or trucks and horses as the case might be. The consensus of opinion backed up by cost accounting is that horse-power taken by and large is the cheapest power for farm work while in the cities for delivery and cartage work within a radius of from five to seven miles or on a loop route or even on a long route with frequent stops horses supplied the cheapest means of transportation.

The question that seems to trouble dealers and managers of large distributing companies is supply. Some companies use hundreds of horses and they are finding increasing difficulty in securing suitable animals to keep up the supply. Old, experienced dealers claim that it is becoming increasingly hard to secure horses of the required types and weights. The owners, managers and dealers point out clearly and forcibly that something must be done immediately to correct the erroneous ideas and reports that have gone abroad throughout the country. These men further state that the day of the horse is not passed and never will be in this northern country. They claim that a horse breeding propaganda should be started to encourage farmers and breeders to breed horses of the required type, otherwise there will be a shortage inside of the next three or four years.

Two classes of horses are particularly wanted in the cities. At the present time there is a scarcity of clean, sound draughts weighing from 1,600 pounds upwards. The farmer who will breed and feed this class of horse is assured of a market at a very remunerative price. The great difficulty to-day is the scarcity of such horses. The other class for which there is a steady and growing demand, is wanted for delivery work. This work calls for a horse possessing good conformation and action, clean legs, good feet and pasterns and weighing from 1,100 to 1,400 pounds. They are required to trot at a fair gait but not go high. Horses of this type bring as much as drafters weighing upwards of 1,600 pounds. Cities are finding more or less difficulty in securing suitable fire horses. One city recently required 160 head. The first advertisement for 50 of this number at \$300 each failed to bring in any tenders.

Horses suitable for military and police work are also becoming hard to secure, while choice saddlers and hunters are only to be found occasionally even in districts that formerly were noted for breeding this type. The scarcity of this class has recently become so acute as to cause those directly interested to draw the attention of this department to the existing conditions and to ask that the matter be given immediate attention.

A careful study of the situation brings out clearly that the present is an opportune time for taking up the breeding of certain types of horses. It should be remembered, however, that there is no place and no market for the scrub and nondescript. Indiscriminate breeding methods should not be employed if success is desired. To be successful the breeder must breed a definite type of horse for which there is a market. In order to produce that type a suitable sire must be used and the dam must also be of the required type, possess sufficient size, good conformation and action and be sound, while the colt must be well fed and cared for. Breeding without care and feeding cannot be a success. Undoubtedly, the lack of feed is accountable for many of the thousands of under-sized horses in Canada to-day.

SESSIONAL PAPER No. 15

PURE-BREDS

In connection with breeding there is another point that should be given attention. Canada has been importing pure-breds for breeding purposes for many years. In 1920 in the neighbourhood of one thousand (1,000) horses were brought in, which brings the number imported between 1914 and 1920 inclusive to over six thousand (6,000). This means that millions of dollars went out of the country for horses, the majority of which could have been bred at home. The importing of a few outstanding horses yearly is beneficial. The bringing of hundreds of very common animals is not only detrimental but positively harmful to the country. What is really needed is more breeders who will mate their best to the best and feed and care for the progeny. It is high time that Canada was breeding her own pure-breds with the exception of a few outstanding sires and dams. The horsemen of Canada can raise horses away above the average of those imported and at a saving of millions of dollars if they will only take up the work seriously.

CLUBS

The club system under the Federal Assistance Policy makes it possible for any district to adopt community breeding and secure the services of good sires at very reasonable service fees. The breeders of some provinces have profited by this policy and through it are raising the standard of the horses particularly by the use of better sires. Clubs are also breeding a better class of mares. That the colts are being better looked after in many districts is evident from the fact that many clubs are holding colt shows at which good prizes are given. Trophies and prizes are also put up at country fairs and keenly competed for. Club or community breeding is also helping to centralize the raising of certain types and breeds in districts which in turn aids co-operative marketing. Districts known to produce a certain type of marketable horse are sure of buyers. Buyers go where they can most readily secure what they want with the least trouble and in the largest numbers.

In some districts under club auspices horse sales have been held which are reported to have been quite satisfactory. It is the intention to make these sales an annual event and in this way advertise widely the fact that horses of a certain kind and type may be obtained in certain numbers. These sales like the colt shows not only tend to promote better breeding but also better feeding, care and management.

CATTLE DIVISION

THE DISTRIBUTION OF PURE-BRED BULLS

The Live Stock Branch has been loaning pure-bred bulls to specially organized associations in newly-settled districts and in backward sections in the older provinces since 1913. The number of bulls so loaned up to November 1, 1920, total 2,963.

Until 1920, all bulls loaned were purchased direct from breeders, it having been considered that for the branch to invade even the larger sales with its heavy annual requirements would lead to complaint from private bidders. In 1920, however, it became apparent that the breeders entering bulls in the provincial sales in Western Canada were entitled to more support than they were likely to get from private demand in view of the unusual feed conditions which had prevailed during the preceding ten months and of the uncertainty regarding the market outlook for beef. Accordingly, the branch decided to give the fullest measure of support possible to these sales by endeavouring to supply its requirements at them. The step proved most opportune and the branch was able to secure an excellent lot of bulls at good values. The support given was highly appreciated by contributors to the sales as it was

12 GEORGE V, A. 1922

unquestionably instrumental in maintaining a good average on the better bulls offered, all of which had been grown and fitted on very expensive feed. At the seven sales in the three Prairie provinces 225 bulls were purchased by the branch at an average price of \$230.

In the following table will be found the total number of bulls now standing with associations in each province:—

TOTAL NUMBER OF BULLS IN HANDS OF ASSOCIATION.

CAR-LOT POLICY

Under the terms of this policy the Live Stock Branch pays reasonable travelling expenses of farmers residing in Canada who purchase stock at Central Stock Yards for return to country points. In Eastern Canada the assistance rendered is confined to purchases of female breeding stock—cattle, sheep, or hogs. In Western Canada the policy covers stocker and feeder cattle in addition to breeding stock. Purchasers are required to fulfil certain requirements of the department in connection with their shipments and to give satisfactory assurance that none of the stock is being purchased for speculative purposes.

This policy has proved a very valuable educational agency in that its terms have encouraged farmers from all over the country to visit the stock yards and to become acquainted with methods of doing business at these points, and has unquestionably played a very important part in encouraging a return of unfinished cattle and sheep to country points for further feeding and also in the return of young female breeding stock, particularly from yards in Western Canada.

The policy has been in effect at the stock yards of Western Canada since the fall of 1916. On the yards at Toronto and Montreal it has been in effect only since May 1, 1918. Total shipments made each year under its terms are given in the following table:—

CAR-LOT POLICY SHIPMENTS TO JANUARY 1, 1921.

Year	Steers	Heifers	Sheep
1916 (3 months)	6,208	3,113	1,407
1917	11,334	10,411	1,800
1918	20,703	18,745	7,978
1919	22,490	17,550	9,408
1920	14,009	7,957	6,317
	74,744	57,776	26,910

SESSIONAL PAPER No. 15

The policy has not been an expensive one, as is indicated by the fact that the cost to the department of all cattle shipped under its terms during a period of three years averaged only 59 cents per head. The average cost of all sheep shipped during the same period was only 18½ cents per head.

FREE FREIGHT POLICY

The Free Freight Policy, which has been in operation since the fall of 1917, was inaugurated by the Livestock Branch in co-operation with the railway companies of Canada, with a view to preventing, as far as possible, the slaughter or exportation of useful heifers, young ewes and young sows offered for sale on the open market at the Central Stock Yards. Under this policy, farmers are entitled to ship from stock yards to country points female breeding stock, of the classes mentioned, without payment of freight charges on same, provided the stock was not purchased for speculative purposes.

During the time the policy has been in operation it has been very widely taken advantage of by farmers anxious to secure breeding stock, and it has unquestionably been one of the most important factors in promoting the return to country points of a large percentage of useful females offered on the yards at Edmonton, Calgary, and Winnipeg. Since the inception of the policy, September 21, 1917, shipments under its terms from the different yards up to January 1, 1921, numbered as follows:—

Name of Yard	Heifers	Ewes	Sows
Edmonton.. . . .	24,086	8,561	155
Calgary.. . . .	21,949	32,513
Winnipeg.. . . .	20,097	9,206	203
Prince Albert.. . . .	51	160
Moose Jaw.. . . .	61
Toronto.. . . .	1,872	10,084
Montreal.. . . .	164	452	11
	<hr/> 68,280	<hr/> 60,976	<hr/> 369

SPECIAL RELIEF POLICY

Certain sections of Western Canada having again, in the season of 1919, experienced a crop failure as a result of drought, a further measure of assistance to stockmen in the dried-out areas became necessary. To meet this situation the Special Relief Policy, which is similar in effect to the one in force in 1918, was put into operation on August 2, 1919.

Under the policy of 1918 the federal department, through the Live Stock Branch, shared equally with the railways the freight on shipments under the terms of the policy. The policy of 1919 differed, however, in that the provincial departments participated, the charges on feed and haying outfits being shared equally between the federal department, the provincial departments and the railway companies. On shipments of stock to the feeding grounds the federal and provincial departments divided the freight equally, except in Saskatchewan, where the freight was paid by the shipper; on return shipments of stock the railways paid fifty per cent of the charges, the federal and provincial departments each paying twenty-five per cent. The foregoing arrangement applied on the Canadian Pacific, the Canadian National, and the Grand Trunk Pacific Railways. The freight charges on both haying outfits, feed and stock shipped over the Edmonton, Dunvegan and British Columbia, and the Algoma and Great Waterways railways were shared equally by the Federal and Alberta Governments.

The movement in Alberta in the 1919 season included some 200,000 tons of feed, 25,000 head of stock, and 340 cars of haying outfits. Shipments in Saskatchewan comprised some 110,000 tons of feed, 2,730 head of stock, and 825 cars of haying outfits. As Manitoba was not seriously affected by drought the movement in that province was comparatively slight.

Owing to the fact that complete accounts have not yet been received from the railways it is impossible at this date to quote exact figures. It is estimated, however, that the cost of the 1919 policy to the Federal Government will approximate that of the 1918 season, namely, one-half million dollars.

RECORD OF PERFORMANCE

The demand for pure-bred sires is continually increasing and as the tendency to do away with scrub sires becomes more general, there should be in the near future, a place for all pure-bred males of good breeding. The Record of Performance test furnishes an invaluable guide to purchasers of dairy sires in the selection of animals which can be depended upon to improve their herds.

Although farmers in some districts, owing to feed conditions, have been compelled to withdraw their cows, there are at present more than two thousand cows entered for the test, which is a greater number than at any previous time.

Owing to the increased number of herds to be visited it has been found necessary to engage additional inspectors.

Three of the breed associations, viz., Ayrshire, Holstein-Friesian and Shorthorn, have adopted a 305-day test in addition to the original Record of Performance test of 365 days. The 305-day test will prove of great benefit to the breeder who desires his cows to freshen regularly each year, whereas the 365-day test will give high-producing cows every opportunity to make a maximum record.

Following is a summary of the number of cows entered in the Record of Performance during the past year and the number of certificates issued for bulls and cows during the same period, also the number of cows entered for test and cows and bulls which have qualified for certificates since the inauguration of the Record of Performance.

The following is a brief summary of the work for the year:—

NUMBER OF COWS ENTERED FOR THE TEST

Ayrshire	705
French Canadian	35
Guernsey	955
Holstein-Friesian	487
Jersey	54
Shorthorn	170
	<hr/>
	2,406

NUMBER OF RECORD OF PERFORMANCE CERTIFICATES ISSUED

	Cows	Bulls
Ayrshire	289	13
French Canadian	12	1
Guernsey	9	1
Holstein-Friesian	354	18
Jersey	132	6
Shorthorn	101	1
	<hr/>	<hr/>
	897	40

Certificates are being issued for Ayrshire, Holstein-Friesian, and Shorthorn cows whose records have previously appeared in the appendix to the annual report and which have produced sufficient to qualify under the present standards.

SESSIONAL PAPER No. 15

The following is a summary of the number of cows entered and animals which have qualified for registration in the Record of Performance since the commencement of the test:—

	Cows entered	Cows qualified	Bulls qualified
Ayrshire	6,200	1,802	85
French-Canadian	380	99	2
Holstein-Friesian	6,820	2,088	93
Guernsey	274	55	1
Jersey	2,312	566	21
Shorthorn	1,045	375	9
	17,031	4,985	211

SHEEP AND SWINE DIVISION

CO-OPERATIVE SHEEP AND LAMB MARKETING

Following the co-operative marketing of sheep and lambs which had been previously started in Quebec and New Brunswick, the work extended to Prince Edward Island and Nova Scotia this year with considerable additional demonstration work in Ontario. With a larger staff it was possible to do much more effective work and accomplish much more extensive results. As a preliminary to co-operative marketing, a large amount of field work was performed during the winter, spring and summer months. This included the holding of meetings and giving of demonstrations in docking and castrating. The following table outlines the extent of the preparatory work:—

Province.	Meetings.	Attend- ance.	Demon- strations.	Attend- ance.	Lambs trimmed.	Sheep dipped.
Prince Edward Island.....	25	750	100	900	4,000	10,000
Nova Scotia.....						
New Brunswick.....						
Quebec.....	125	15,000	135	1,200	9,000	10,000
Ontario.....	71	900	109	300	600	16,000
Total	221	16,650	344	2,400	13,600	36,000

The co-operative marketing of sheep and lambs commenced the latter part of August and continued through the fall months. As a result of supplying food on long hauls the shrink was kept remarkably low. This was particularly noted in shipments from the Maritime and from the Lac St. Jean District in Quebec.

The Maritime shipments were all converged at Moncton, N.B., and forwarded from there by special freight. The volume of business already warrants a through live stock freight which is being negotiated for next year's work and when secured will reduce very considerably the time in transit. The shrinkage on Maritime lambs ran from three to twelve pounds and for the entire shipments would average eight pounds per head. The selling charges, including freight, ran from \$1.87 per cwt. up to \$3, depending on the shrinkage. The returns made to farmers in some cases were as high as four cents above local prices, while in other cases the local buyers raised their prices very close to co-operative figures. On the whole the gain to farmers would be in the neighbourhood of two cents a pound.

The selling charges on shipments from Quebec varied from 75 cents up to \$2 per cwt. depending on distances from Montreal. Shrinkages ran from 3½ to 11¼ pounds depending on distance to market and would average between seven and eight pounds for all shipments.

CO-OPERATIVE SWINE AND CATTLE MARKETING

As a result of co-operative sheep and lamb marketing, requests arose for the co-operative marketing of cattle and hogs and as there was no other avenue through which such stock could be marketed, it was decided to handle them in conjunction with the sheep and lamb shipments. The swine shipments consisted of 21½ cars from Prince Edward Island with half a car from New Brunswick. A total of 1,427 head were handled, 1,240 of which graded selectts, 63 lights, 63 heavies, and 61 sows and stags. The top price received for select hogs was 21 cents per pound. Lights brought 14 cents to 18 cents per pound and sows and stags ranged from 15½ cents down to 12 cents. The average shrinkage on hogs was 14 pounds per head and the selling charges, including freight, averaged in the neighbourhood of 2 cents per pound. Had it not been for the movement of these hogs to a regular market point the local markets in the Maritime Provinces would have been heavily loaded, resulting in serious loss to the producers, especially in view of the fact that many of the hogs were raised and finished for the most part on high priced feeds.

Cattle were marketed from New Brunswick, Nova Scotia, Prince Edward Island, and Quebec. 22½ cars or a total of 651 head were shipped from New Brunswick, 24½ cars or 784 head, from Nova Scotia, 6 cars, or 152 head, from Prince Edward Island and 15 cars from Quebec. Owing to the fact that the cattle market was dull during the fall months, farmers were encouraged to cater to the local demand and only offerings that could not find a local market were handled.

ORGANIZATION OF RAM CLUBS AND COMMUNITY BREEDING CENTRES

Following the organization of a few ram clubs in Quebec last year, the work was extended this year and twelve new clubs were organized, resulting in the collective purchase of 275 pure-bred rams and 50 pure-bred ewes. In each club only rams of one breed are introduced and in as far as possible a minimum of twenty-five rams are placed in each community. As a result of clubs organized last year, it was possible to secure some very choice car lots of uniformly bred lambs, which topped the market at three-quarters to a cent a pound above ruling prices. The community purchase of

SESSIONAL PAPER No. 15

rams of one breed permits the purchasers to exchange among themselves at the end of two years, thus allowing for full use of the rams with a minimum of expense. In addition to the purchase of rams, the clubs were encouraged to purchase a few ewes in order that foundation flocks might be established with a view to supplying a part at least of the pure-bred needs of the communities. The Premium Policy has been a big factor in making the organization of these clubs possible. When once organized, club members elect a purchasing agent who is assisted in making the selection of the rams and ewes. The following table shows the number of rams purchased by breeds:—

No. of Clubs	Breed	No. of Rams	No. of Ewes
5	Shropshire.....	125	33
5	Oxford Down	125	—
1	Hampshire	15	17
1	Leicester	10	—
<hr/> 12		<hr/> 275	<hr/> 50

GRADING OF PURE-BRED RAMS

As a result of ram grading which was performed for the first time in New Brunswick last year, the sheep breeders in Nova Scotia and Prince Edward Island requested similar assistance this year, thus extending the work to the three Maritime Provinces.

The grading of pure-bred rams as already carried out is having the effect of establishing confidence between the breeder of pure-bred sheep and the purchasers of rams for stud purposes. It is tending to standardize breed types and raise the general excellence of pure-breds, besides producing a marked improvement in the quality of market stock raised within the provinces where grading has been done.

The rams of the three grades were distinguished by tattoo marks placed in the ear of the sheep. For the first grade there were three marks, the second two marks, and the third one mark. The rams placed in the first grade were rams of high merit, considered typical of the breed to which they belonged and suitable for the heading of pure-bred flocks. Rams of the second grade were in most cases good individuals, but lacking in some respect all that would be looked for in a ram of the first grade. Rams of the third grade were animals considered to be fit only for the shambles.

During the season of 1920, a total of 325 rams were graded in the provinces of New Brunswick, Nova Scotia and Prince Edward Island. Of this number 136 were placed in the first grade, 168 in the second grade, and 21 in the third grade. A detailed statement is herewith attached.

SESSIONAL PAPER No. 15

CO-OPERATIVE MARKETING OF WOOL

The policy of grading wool for wool growers' associations in Canada was continued during 1920. A considerable change occurred this year in that a greater centralization of the wool clip was arranged, thus allowing closer supervision of the grading, and the turning out of a more uniformly graded product. All the wool from the western provinces was graded at Weston, Ont., while the eastern wools were handled at Guelph, Shawville, Lennoxville, Fredericton, Truro, Antigonish, Port Hood, and Charlottetown.

During the grading season of 1920 six qualified wool graders were employed temporarily, and these in addition to the two permanent graders on the staff, performed all the grading for all associations in Canada. From the experience gained this year under the new conditions of centralization, it has been possible to put this phase of the work of the Division on a more efficient basis. Many expressions of appreciation as to the uniformity of the grades of wool have already been reported, and it is hoped that, by continued close supervision of the grading work, greater confidence will be established in Canadian wool grades, and that, as a result of this confidence, Canadian mills will use more home grown wools, and a more extensive demand be created in other markets.

Another feature of this year's work was the filing of copies of all grading statements and the indexing of all shippers. This was done with the idea of having complete data readily available as to the amount of wool graded, how it was graded and the number and location of shippers. This data enables the division to make a complete analysis of all shipments, and will be the basis of talks and demonstrations on wool improvement.

Owing to a falling market for wool which prevailed throughout the entire season, it was necessary to exercise more strictness in keeping the grades up to a higher standard than was necessary during the war period. All shippers were advised by circular letters of the necessity of taking this step. As a result of closer grading, the grades have been acceptable to the trade, and although the market was dull sales were made from week to week, finally resulting in the disposal of the entire clip of graded wool at satisfactory prices considering the season.

12 GEORGE V., A. 1922

PREMIUM POLICY

The first premium has been paid on six hundred and nineteen applications under this policy and the introduction of this number of pure-bred rams for the first time on farms throughout the Dominion has proved to be one of the most effective means of eliminating the scrub ram and improving the quality of market lambs. The clause covering docking and castrating under this policy has also been a very effective means of bringing about the general trimming of lambs, especially in the districts that were most backward in this regard. As a result of requests and the consequent holding of many demonstrations in docking and castrating, it was possible to reach not only farmers that had received the bonus, but many others as well, thus educating them to the benefits of these operations. Inspections were made or reports received on all flocks affected by the policy and with few exceptions the conditions were complied with. New applications for this year will be in the neighbourhood of 500.

The following table gives the number of applications for premiums received from each province, indicating also the breeds of rams purchased:—

SESSIONAL PAPER No. 15

DISTRIBUTION POLICY FOR PURE-BRED RAMS AND BOARS

The distribution policy has now been in operation for eight years and as a result of the introduction of the pure-bred ram in most districts throughout the Dominion and especially in view of the fact that the premium policy has encouraged many farmers to purchase pure-bred rams it was not considered good policy to encourage the extensive loaning of rams or boars during the past year, consequently few new rams and boars were distributed. Greater discrimination was exercised in dealing with new applications and only those accepted that came from districts where returned soldiers were settling, newly settled districts or districts where improvement of sheep and swine was considered essential. A number of the rams and boars already loaned had either outlived their period of usefulness or had been two years with associations. The older animals were sold for the block and those that gave evidence of further usefulness were either sold for breeding purposes, exchanged between associations or transferred to new associations where applications had been accepted. The rams loaned have effected a decided improvement in the breeding of the flocks and quality of the market lambs in which they have been used and as a result of their use, farmers who are now in reasonably good circumstances are willing to purchase a ram in the regular way.

In view of the recent developments of interest in swine-raising, there is an increasing demand for the loan of boars in districts that are now changing from out and out grain farming to mixed farming with more live stock. Settlers in such districts are for the most part new to the raising of swine and the distribution of boars in such districts is having a particular value in improving the bacon type of hog.

INVESTIGATIONAL ACTIVITIES

During the year the application of legislation relative to grazing areas in Western Canada was investigated, also grazing areas available for sheep pasturing both in Eastern and Western Canada. As a result of these surveys there would seem to be ample opportunity for the extension of semi-range flocks in many districts, more particularly the northerly and rougher sections of Eastern Canada, as well as in the foothills of the Rockies, plateaus in British Columbia and in gullies and valleys adjacent to creeks and rivers in Alberta, Saskatchewan, and Manitoba. The application of existing legislation for the protection of sheep against dogs was also investigated. A summary of existing Acts was prepared and improvements suggested. The importation and sale of foreign mutton and lamb was followed closely and an outline of proposed regulations for controlling the importation and sale of foreign mutton and lamb has been prepared.

Feeling that more should be known about qualities of Canadian wools, a sorting test was conducted with each grade in all the provinces. This is being followed up with a scouring test. The sorting test acts as a check on the efficiency of the grading and suggests where improvement can be effected in breeding for superior wool qualities. The scouring test will aid in a more accurate determination of relative grade values for the wools of each province. It will also act as a safeguard in establishing prices for both buyers and sellers of wool, since the percentage of scoured wool is always calculated when establishing the grease value.

SHEEP AND SWINE EXHIBITS

The sheep and swine exhibits which were displayed at a number of eastern and western fairs were designed with the purpose of encouraging the greater home consumption of lamb and the production of the ideal Wiltshire bacon side for export. The exhibits displayed an ideal side of lamb showing the proper method of cutting and preparing the various cuts of the lamb carcass. The importance and value of lamb as a summer meat were also emphasized. Wool grades and values, common sheep diseases and treatments, and models of sheep equipment necessary in good sheep management were also displayed, as well as a comparison of the good and common classes of live sheep and lambs found on our markets.

A model of the ideal Wiltshire side was contrasted with overfat and lean sides of bacon, with a view to emphasizing the importance of the export trade and the value of the swine industry to the farmers of Canada.

ENCOURAGING CO-OPERATIVE WOOL MARKETING

Many demonstrations were given on the preparation of wool for market with a view to having the fleeces put up in a more attractive form for sale and to encourage grading and co-operative sale. Shearing demonstrations illustrated the proper method of shearing sheep and the rolling and tying or boxing of fleeces. Dipping demonstrations were also given at which some 36,000 sheep were dipped. The dipping demonstrations have improved wool qualities by adding strength and softness to the fibres, thus increasing the market value of the product. In addition, the thriftiness of the flocks is improved, thus reducing the cost of maintenance. Farmers are realizing more and more the importance of dipping and the practice is becoming much more general. As the shearing and dipping demonstrations were for the most part held in conjunction with docking and castrating demonstrations, they are included in the table given under "Co-operative Sheep and Lamb Marketing."

SESSIONAL PAPER No. 15

POULTRY DIVISION.

The activities of the Poultry Division embrace, in so far as possible, the National Poultry Policy as outlined by the Live Stock Branch and approved by the Canadian National Poultry Association. One of the ideas is to maintain such a high standard and uniformity of quality that once our produce has been purchased it will in and of itself create a demand for more. Furthermore such articles must be produced, conserved and handled on a basis of cost that will permit them to compete successfully with other similar products. Necessary volume of the proper quality or grade is an essential factor in cost.

In other words, the plan is to give the Canadian poultry industry business management on a national scale. While the result of these activities has been more or less apparent for some time, the real cumulative effect has been most pronounced during 1920 when, through markets intelligence, co-operation in marketing, the sale of a standardized product, competition created among buyers, and the introduction of new buyers into old markets, producers have been able to obtain a higher percentage of the ultimate selling price than ever before.

The National Poultry Policy is as follows:—

1. Standardized product—Government inspected and guaranteed.
2. Markets intelligence, giving an assurance of price.
3. Co-operative marketing.
4. Economic production—through stock improvement.
5. Increased production.
6. Quality payment.
7. Service in transportation.
8. Perfection in storage.
9. Increased consumption.
10. Advertising and salesmanship in the disposal of the product at home and abroad.

THE ADMINISTRATION AND ENFORCEMENT OF THE EGG REGULATIONS

For purposes of administration, Canada is divided into two sections viz., Eastern and Western. The Eastern section covers Ontario east of Port Arthur, Quebec and the Maritime Provinces. The Western section covers territory west of the Great Lakes, including Port Arthur. The following tables give a comparative record of inspections for the years 1919 and 1920.

	186,690 cases	210,862 cases

The Egg Inspection Service during 1920 was called upon to make 4,240 inspections, covering 429,004 cases of eggs; of these 210,862 cases were exported to Great Britain, 77,391 cases being fresh eggs, and the balance, 133,471 cases, storage eggs.

In table No. 4, a substantial increase will be noted in the requests for inspection during 1920 as compared with 1919. The significance of this increase is to be specially noted in so far as the attitude of the trade generally is concerned towards the principle of government inspection. Ninety-six inspections were made for local shipments, that is ninety-six were voluntary inspection, produce dealers and packers bought from track shippers and country dealers on a graded basis, subject to government inspection, thereby applying the principle of quality payment and recognizing that the system of government inspection creates a bond of mutual confidence, is absolutely impartial, and safe-guards the interests of buyer and seller alike. The buyer is given a guarantee of quality through the medium of the inspection certificate, and the markings placed on the case; the seller's interest is safeguarded through the work of inspection being done at the point of shipment and at the time of shipment. Inspection is by approval, the shipper being required to handle and grade the eggs according to the Canadian Standards, marking the cases with the class and grade contained therein. When ready for shipment a requisition for inspection is made to the Department and the Inspector at the nearest point is directed to attend as requested, who calls upon the manager of the business for particulars of the shipment.

The method employed in inspection is to draw at least a 5 per cent sample from various portions of the lot prepared for shipment, in order that the sample may be as fully representative as possible. Upon examination if the inspector finds the eggs up to the grade marked on the cases, the shipment is approved, certificate issued, and the cases marked with the Government mark of approval. This method of inspection is highly commended by the British importer, and it is largely due to the efficiency of the system and the ability of the Inspectors employed, that Canadian eggs are receiving a distinct premium on the British market.

In addition to actual egg inspection, Inspectors are required to note the temperature of rooms from which eggs are taken, the condition of the eggs as to defrosting and sweating, outside temperature, temperature of car, (if iced) into which eggs are loaded, manner of loading, weather conditions and any other points incidental to handling and transportation. Inspectors at seaboard are kept advised of shipments rolling to seaboard for export and are required to report on condition on arrival, particulars on handling, loading and stowing aboard ship. Further they must keep in touch with market conditions and changes and make a daily report to the Chief of the Poultry Division.

12 GEORGE V, A. 1922

Constant activity is necessary to obtain definite information that will enable the Department, in co-operation with the trade to introduce improved methods of marketing that will eliminate preventable loss. Any abuse found in the system of marketing can only be eliminated by removing or remedying the underlying cause.

From the experience gained during the past season, it is apparent there is need for a standardized filler; reports have been received on consignments arriving in Great Britain in bad condition through breakage, and invariably light weight fillers are mentioned as a contributing cause. Owing to the high price of paper, many exporters have been forwarding their shipments in fillers of light weight that were used in storage. Where eggs have been transferred into heavy fillers, their arrival in Great Britain is reported in perfect condition.

There have been two prosecutions during the current year for violation of the egg regulations, judgments in each case being given in favour of the Department. The fact that the law states that no person can ship or accept for shipment, eggs covered by the regulations, unless the requirements of the regulations are complied with, reduces to a minimum the number of infractions.

EGG AND POULTRY MARKETS REPORTING

The extension of this work has been further developed. About a year ago a tri-weekly market service with Edmonton and Winnipeg as points of distribution, was inaugurated for western Canada. This service has now been discontinued as a better way to reach a larger number of the interested public at less cost has been found. The daily market wire is now distributed through the medium of the Canadian Associated Press, and through this agency it is possible to place the report in the hands of the editors of all important newspapers from coast to coast, the only charge to the department being the cost of the collection of the markets intelligence contained in the report. Practically all important newspapers in Western Canada now publish this daily report, and many newspapers in the east are also using it. In the case of the eastern press the information is in some cases taken from our daily wire and rewritten to suit a particular paper's requirements. When this is done the department loses credit for the information supplied.

The Weekly Egg and Poultry Markets Report is still published and now has a mailing list of some 5,500. It is worthy of note that requests for this report have been received from ninety-five British egg-importing houses, and additional requests are still being received weekly from Great Britain.

The need for distribution of accurate and up to the minute egg and poultry market information is just as apparent to-day as when the work was first inaugurated. It is impossible to get unbiased reports from the trade as they are naturally anxious to buy at as low a figure as possible. The same applies to country shippers for the opposite reason. Every effort is made to make the prices quoted in our departmental market reports cover the full range of prices being paid, and it is gratifying to be able to state that during the past year not more than two or three letters of criticism have been received in this connection, those coming to hand being from members of the trade who stated that in their opinion the prices quoted were at times too high.

Every officer of the Poultry Division is a market correspondent and expected to furnish a daily report on prices, receipts etc., from the points visited. In addition special correspondents are maintained in Vancouver, Calgary, Edmonton, Regina, Montreal, and St. John. The London, Liverpool, and Glasgow markets are reported weekly by cable, and arrangements are being made to receive market information direct from Buffalo, Chicago and New York.

In connection with distribution of United States egg and poultry markets intelligence it is interesting to note, that at certain seasons Canadian buyers of live and dressed poultry have had to materially increase their prices in order to compete

SESSIONAL PAPER No. 15

with the buyers on the Buffalo and New York markets. Many car loads of poultry have been shipped to the States, at prices more remunerative than obtainable on the home market, as a direct result of the markets intelligence distributed daily and weekly by this branch. In consequence of this international competition producers have secured prices commensurate with the cost of feeding and finishing a high quality product.

CO-OPERATIVE MARKETING OF EGGS AND POULTRY

The policy for the encouragement of co-operative marketing of eggs and poultry has been vigorously carried on during the past year, for the reason that co-operative marketing of the product has proven itself one of the most effective means that has been devised to stimulate the poultry industry. It brings the comparatively small producer into direct touch with home and foreign markets in a large way, it gives him a new perspective of the magnitude of the poultry industry, and an active interest in the actual sale and disposal of his own products.

Previous to the advent of co-operative marketing the system of handling eggs in many parts of Canada was antiquated. It is still in many parts. Over a wide area, however, in every province in fact, individual producers have found that even by combining together in groups of two or three and shipping produce direct to a consuming centre, they not only obtained more for their product, but placed in the hands of the consumer a more satisfactory article.

Through departmental assistance an extension of this idea has been possible until in some instances amalgamated producers' associations are not only supplying a considerable portion of eggs for local consumption on certain markets but one single co-operative company, namely the United Farmers Co-operative Limited, of Ontario, has become one of the largest single exporters in the Dominion.

In all during 1920, something over 3,000,000 dozens, roughly 200 cars of eggs, have been marketed co-operatively throughout the Dominion. Of these Prince Edward Island supplied 813,630 dozens, valued approximately at \$374,181; Quebec, 278,700 dozens, value \$142,137; Ontario, 1,201,349 dozens, value \$616,844; Alberta, 175,606 dozens, value \$92,978; British Columbia, 438,000 dozens, value \$280,320.

In Nova Scotia the work is just gaining momentum, a number of isolated shipping units having been organized during the past year.

In New Brunswick the United Farmers' Co-operative Company is taking up the marketing of eggs and poultry as in Ontario.

In Manitoba, very few, if any, eggs are marketed co-operatively as yet, but in Saskatchewan the Saskatchewan Co-operative Creameries during the past year became one of the largest earlot shippers of eggs in the Prairie Provinces.

One of the great advantages of co-operative marketing is that it makes possible a system of "quality payment." The individual producer has a degree of confidence in the grading by his own co-operative company that he has not in the grading by a private corporation or individual produce dealer.

The extension of co-operative marketing is a phase of activity to which the District Poultry Promoters, Promoters of Egg Production, etc., devote the major portion of their time. It is proposed during the next year to extend their activities to include propaganda work among consumers with the object in view of further familiarizing the public with standard grades, and the creating of a still greater demand for a graded product.

RECORD OF PERFORMANCE FOR POULTRY—SECTION "A"

Record of Performance for poultry has completed its first year. The following extract from the Announceement of the Rules and Regulations gives briefly its objects:—

"Record of Performance for poultry is a policy planned to stimulate and facilitate the breeding of standard breeds of poultry along lines of greatly increased individual

and flock production. This has a special significance during the present period of readjustment of prices. Profitable poultry-keeping depends primarily upon the successful correlation of the cost of production and the selling price. The latter is not under the control of the producer. It is by bringing down the production costs by increased production per unit that this correlation can be obtained. Increased production, both in the individual and in the flock, has been shown to be largely a matter of breeding. Trapnest records, used as a foundation for intelligent pedigree breeding, form the basis of such work. Record of Performance has for its object the testing of pure-bred birds and flocks for the purpose of securing for poultry breeders reliable information as to sources of high producing stock."

Table 1 is a summary of the results of the first year. It will be noted that of the total entry of 4,436 birds, some 523, or 18.6 per cent took certificates. Of these, 16.7 per cent took Record of Performance certificates by laying at least 150 eggs in the prescribed 52-week period, and 1.8 per cent took Advanced Certificates by laying at least 225 eggs in the same length of time. The eggs are required to weigh at least two ounces each to qualify for these certificates.

-----------	--------------	--------------	------------	----------------	----------------	-------------	--------------

The rather small percentage of birds which qualified is due to two reasons, chiefly—efficiency of inspection and quality of birds. The latter stands as convincing proof of the need for the work. Some of the more undesirable and less scientific breeders are being weeded out. The value of culling and selection is being shown. Nearly all of the entrants are doing pedigree breeding, many of them for the first time, and as a direct result of Record Performance. Care is taken to impress upon each breeder the extreme importance of this branch of the work. Many individual birds and flocks, which showed poor quality, were withdrawn; a few breeders were dropped for various causes.

That the work has been successful and has met with the approval and support of poultrymen is shown by the fact that 7,511 birds have been entered this year as compared with 4,436 birds last year. This is an increase of 69 per cent. Table 2 gives the entries in both years, arranged according to provinces and breeds of poultry.

SESSIONAL PAPER No. 15

The response from British Columbia and Ontario is particularly encouraging. In the former province the large commercial breeders are taking up the work, and entering large flocks. In Ontario some large entries are also being received, but the bulk of the entries have come from breeders having smaller flocks, and who are consequently in a position to carry on more detailed breeding and pedigree work. Practically all the Canadian agricultural colleges have entered large flocks.

Various colleges and government institutions have tried, by supplying hatching eggs, pedigreed males, etc., to raise the average production of the farm flocks, which at present is only 80 to 90 eggs per bird per year. While good work has been done by this means, all who are so engaged admit that what they are able to do is only a drop in the bucket. What is needed is a National policy extending from coast to coast and enrolling thousands of birds.

The Record of Performance for poultry fills this need. Flocks, entered in widely scattered sections form nuclei from which can be secured stock, the record of which is known. It has been unfortunate in the past for those wishing to improve the production of their flocks, that much stock has been advertised and sold as "bred to lay" or "utility" which was absolutely unworthy of the name. Some breeders were selling stock that was as represented, but with no system of standardization or certification, it was a problem to find such breeders.

EXHIBITS

During the past year exhibits have been staged at forty-seven of the large exhibitions, and poultry shows distributed as follows: Prince Edward Island, 2; New Brunswick, 2; Nova Scotia, 7; Quebec, 1; Ontario, 13; Manitoba, 1; Saskatchewan, 9; Alberta, 7; and British Columbia, 4. Five exhibits are now in use, and on some occasions as many as three exhibits have been staged on the same dates in different parts of the country. It is difficult to arrive at any definite estimate of the number of people visiting these exhibits, but many thousands do so in the course of the year. As a direct result and proof of the interest taken in the exhibits there are the lists of names sent in requesting candling appliances and literature which run into the thousands, and also many requests by letter direct.

Special attention has been paid to illustrating graphically the "Canadian Standards for Eggs"; "The Egg Regulations under the 'Live Stock Products Act'"; "Co-operative Marketing"; "Record of Performance for Poultry"; and the "Importance of Increased Production". In connection with these practical demonstrations have been given in the candling of eggs and the culling of poultry.

At the Toronto exhibition in August last was put on probably the best egg and poultry exhibit ever staged by the department. Candling and culling demonstrations were given daily, and a moving picture was shown illustrating the "Co-operative Marketing of Eggs". Large crowds were attracted to the exhibit daily, and the success attending this particular exhibit points to the unlimited possibilities in exhibit work, particularly through the medium of motion pictures.

MARKETS INTELLIGENCE AND STOCK YARDS SERVICE DIVISION

The object of the Markets Intelligence and Stock Yards Service is to provide the producers with every facility to the intelligent marketing of live stock. This object is being accomplished through federal control of stock yards as prescribed under the Live Stock and Live Stock Products Act, 1917, whereby public stock yards in Canada are subject to supervision as regards construction, equipment and operation; through assistance given by officers of the branch to producers wishing to sell or purchase live stock on public stock yards, and through a Markets Intelligence Service which provides producers with a detailed markets and trade news service, both domestic and export.

12 GEORGE V, A. 1922

The enforcement of regulations made under the Live Stock and Live Stock Products Act of 1917 has resulted in the bonding of all commission men operating on public stock yards; the organization and reorganization of live stock exchanges; the standardization and approval of the rules and regulations under which live stock exchanges operate; standardization of all charges made on the yards by the Stock Yards Company or by commission men, and improvements in the accommodation for live stock.

In continuation of the policy of supplying the producers of live stock with an official Markets News Service, officers of the branch, located at the central stock yards, at Montreal, Toronto, Winnipeg, Calgary, Edmonton, and Prince Albert, undertook the classifying, grading, and pricing of all live stock offered for sale, obtained detailed information as to the origin and disposition of the stock and procured data on the general condition of supply and demand.

Purchasers of live stock under the Carlot and Free Freight Policies of the branch, were again given every assistance by the stock yards representatives. The activities of the agents greatly facilitated the movement back to country points.

During the year the stock yards agents addressed numerous meetings on the subject of marketing of live stock. The continual expansion of their yard duties, however, allowed of but little absence from the yards.

The Daily Markets Telegraph Service inaugurated in 1919 was continued. This consisted of analysis of the condition of supply and demand, telegraphed over the wires of the Canadian Press Limited for publication in the daily press of Canada. These wires were prepared by the officers at each of the yards, at 11 a.m. and 4 p.m. daily, and appeared the same evening and the following morning in practically every evening and morning paper in Canada. These have already been conceded an important place in commercial circles.

The Inter-Stock Yards Telegraph Service inaugurated during 1919, consisted of an exchange of market wires between stock yards, so that a knowledge of trade conditions on one market might be available on the other market as soon as the day's trading was established. These telegrams were prepared by the stock yards agents after a careful analysis of the conditions of trading and then wired each day as early as possible to other stock yards in Canada. The beneficial effect that the public postings of these wires has upon trading on the open market has already been the subject of much favourable comment. Heretofore only the larger firms which alone could afford to have a private telegraph service, were able to benefit by a knowledge of conditions at other yards.

The stock yards offices again supplied the local daily press, with daily market news letters and representative live stock sales. The need for absolute accuracy in these reports has resulted in a high quality of material being produced and these, together with the extended weekly and monthly analysis of supply and demand have practically supplanted all other sources of markets information. The effect has been the absolute standardization of market reports throughout the Dominion, where, heretofore, many contradictory and unreliable statements of market conditions were circulated.

The weekly markets news service was again prepared and mailed to the agricultural press of Canada, to district representatives of agriculture, to a selected producers' mailing list, and to the various Provincial Departments of Agriculture. This service consisted of an analysis of supply and demand during the current week; statistical tables showing the grading, numbers, average price, price range for bulk of sales, and top price of all live stock offered for sale and, as well, the disposition and comparative receipts of the same. These reports covered separately each stock yards in Canada. Monthly statistical statements and comments on supply and demand during the month, followed up the weekly report. A statement outlining the general

SESSIONAL PAPER No. 15

conditions of supply and demand on the following month of previous years, was also supplied. The object of this was to provide producers with an idea of the normal condition of markets during any one month over a period of years, so that they might liquidate their stock in as intelligent a manner as possible.

Each week, publicity was given to the live stock industry by the distribution of interesting information, on the live stock and allied industries, as regards both domestic and foreign fields. This information is distributed through the regular mailing list and over the wires of the Associated Press.

During the year numerous articles touching on the live stock industry were prepared, either voluntarily or by request, for publication in the farm press.

Statements on local and general live stock conditions were prepared during the year for producers, the packing industry, and such institutions as banks, railroad companies, etc., and memoranda on production, distribution and consumption of live stock and live stock products, both domestic and foreign were prepared for the information of officers of the department.

The division continued the building up of an extensive information service with reference to statistical condition of local production and distribution of live stock; conditions of local production; general condition of live stock production and distribution in Canada; the foreign live stock situation; world's animal food stuffs and feed stuffs situation; import and export trade in live stock and live stock products; and financial conditions in respect to agriculture.

The division continued to undertake the recording of the point of origin, class, grade and sex, of every head of stock offered for public sale at stock yards. It is estimated that the total marketings for the year will be in the neighbourhood of three million head. These records cover the sales made during the past three years and are compiled in such a way as to be of tremendous value in estimating the condition and extension of the marketable surplus either locally, provincially, or nationally, at any period of the year. It is obvious that a policy to bring about better conditions as regards production for markets and marketing will be given excellent direction through the medium of these records. No other country has such detailed information on marketings of live stock.

During the year the Markets Division prepared and distributed all literature in connection with the Canadian Bankers' Competition. Under the terms of the competition, the Department of Agriculture, in conjunction with the Canadian Bankers' Association, offered cash prizes to boys and girls who fed and exhibited pigs and calves at the local fair, under conditions laid down.

In order that the weekly agricultural newspapers and financial and trade journals might have the most up-to-date market information obtainable, a special market wire is prepared on the opening market of each week, by the stock yards representative, and sent to the farm press in time for publication in the current issue. The good opinion which the farm newspapers have of this Market Service is manifest in the fact that this special wire is paid for by the newspapers, and at their own suggestion.

Extension of stock yards service was made during March, 1920, through the appointing of a stock yard agent at the new stock yards, Prince Albert, Saskatchewan. These yards are situated close to one of the most promising feeding areas in Western Canada.

The administration of the policy whereby immature calves offered for sale on public stock yards are subject to condemnation was administered through the Live-stock Commissioner by the stock yards representatives. The enforcement of this regulation has been effective in conserving a great deal of prospective beef to the country.

During 1920 the Markets Division was successful through the co-operation of the Canadian packers, in obtaining weekly statements from the various plants

12 GEORGE V, A. 1922

throughout the Dominion, covering private or country purchases, by shipping points. As from 40 to 60 per cent of the annual marketings of hogs go through to inspected establishments, the value of the information obtained can be appreciated. This information is recorded in a similar manner as the stock yards sales.

Toward the end of the year the various companies which supply "Patent Insides" or "Boiler Plate" to the local country newspapers, have been provided with a weekly review of the livestock markets. This was undertaken in order to further circulate reliable markets intelligence at country points.

Since the latter part of the year the local branch bank managers have been supplied with a weekly news letter on matters pertaining to the marketing of livestock, the import and export trade in livestock and livestock produce, and other matters which will tend to keep the strong position which the livestock industry occupies in the industrial life of Canada before the country branch bank manager.

The Markets Division undertook the editing and distributing of a weekly analysis of the wool market situation, prepared by officers of the Sheep and Goat Division.

A report was produced covering the marketings of livestock from each shipping point in the Dominion, and distributed during the year. Copies are being mailed to Departmental officials, live stock promoters, officers of the scrub bull campaign, agricultural representatives, agricultural and daily press, agricultural colleges, general livestock organizations and actual livestock producers. A large percentage of the effective literature distributed in connection with the elimination of scrub sires, was founded on the analysis of the livestock situation provided in the report referred to above.

GRANTS TO EXHIBITION ASSOCIATIONS

Grants are made to summer exhibitions on a basis of amount paid out by them in the utility classes of live stock under very definite regulations. Fat stock shows held during the winter are also assisted. The following table shows the amount of money paid out in the various provinces to both summer and winter or fat stock shows:—

Province.	Summer Exhibitions.		Fat Stock Shows.	
	Number.	Total Amount Grants.	Number.	Total Amount Grants.
Prince Edward Island	1	2,500 00		
New Brunswick	1	3,624 50		
Nova Scotia.....	1	2,500 00	1	5,000 00
Quebec.....	5	20,930 64	1	4,292 75
Ontario.....	3	15,000 00	2	10,000 00
Manitoba.....	1	5,000 00	1	5,300 00
Alberta.....	6	21,368 13	3	11,052 41
Saskatchewan ..	4	15,158 75	2	9,151 13
British Columbia ..	3	11,990 01		
Totals	25	98,072 03	10	44,496 29

In addition to assisting by money grants the branch arranges for livestock judges at these exhibitions where grants are paid. The salaries and travelling expenses of these men are paid by the branch but the exhibition associations have to pay them at the rate of not less than \$10 a day and their expenses while actually judging. Under such a system the interchange of judges between provinces and between the East and West is facilitated.

SESSIONAL PAPER No. 15

NATIONAL LIVESTOCK RECORDS

An annual grant in addition to printing and stationery is made to the Record Association in order to assist in the registration of pure-bred animals. A staff working directly under the supervision of the branch checks all certificates issued.

THE SEED BRANCH

The work of the Seed Branch is conducted under the divisions—Seed and Feed Testing, Seed Inspection, Seed Markets, Seed Purchasing Commission, and Feed Division. Within the past year the laboratory service has been extended to test feeding stuffs both in the ground and unground state, and a Feed Division has been organized to administer the Feeding Stuff's Act, 1920.

The inspection service now includes both seed and feed inspection, and for purposes of administration Canada has been divided into six inspection districts. District inspectors are assigned headquarters at Truro, N.S., for the Maritime Provinces, Quebec city for the province of Quebec, Ottawa for eastern Ontario, Toronto for western Ontario, Winnipeg for Manitoba and Saskatchewan, and Calgary for Alberta and British Columbia. Permanent and seasonal seed and feed inspectors are assigned to subdistricts and work under the direction of the District Inspectors.

SEED AND FEED TESTING DIVISION

During the year April 1, 1920, to March 31, 1921, the number of samples tested at each of the laboratories maintained at Ottawa, Winnipeg and Calgary was as follows:—

	Ottawa	Winnipeg	Calgary
Feeding stuffs	350
Trade	13,116	4,525	7,640
Customs	3,164	1,951	1,749
Official	441	80	180
Investigation	300	104	482
Feeding stuffs	350
Total	17,371	6,660	10,051

Owing to the difficulties of filling the vacancies caused by the resignations during the past year, the efficiency of the laboratories was to some extent impaired, particularly at Winnipeg and Calgary, both of which were without any officer in charge for some months. These vacancies have, however, now been filled. Good crop conditions in the west last year resulted in the testing being somewhat lighter at the western laboratories. At the Ottawa Laboratory, however, the congestion has been unusually great during the closing months of the year.

NATURE OF TESTS

Samples received are listed as Trade, Customs, Official and Investigation, according to source and the object for which information is desired.

Trade samples are those received from merchants, farmers and institutions.

Customs samples are sent by Customs Officials in connection with the Importation Order in Council.

Official samples are those taken by seed inspectors from lots of seed suspected of being sold in violation of the Seed Control Act. Prosecutions are based on the results of the analysis of official samples.

INVESTIGATION

Each year much investigation work is done which involves thousands of tests which are not listed in our reports. The investigation of the effect of frost on the

12 GEORGE V, A. 1922

vitality of western cereals is being continued as have also the long continued experiments on the longevity of common and vegetable seeds. Experiments with standard samples supplied by the International Conference on Seed Testing have also been undertaken.

SEED EDUCATIONAL WORK

Standard collections of weed and economic seeds have been supplied to firms and educational institutions desiring same at cost price. The demand has been so great as to make it impossible to supply all requests. Bulletin S. 8 on the "Weeds and Weed Seeds of Canada" has again been revised and enlarged in order to meet the ever-unceasing demand for this useful publication.

MICRO-ANALYSIS OF FEEDING STUFFS

Including cereal products, oil meals, and medicated feeds, approximately one hundred and fifty samples of ground feeding stuffs have been examined in the Seed Branch during the past year. For the most part these were received direct from farmers and feeders accompanied by statements to the effect that feeding had resulted in serious or even fatal consequences to stock. A few analyses were made for manufacturers also, and in several cases institutions not in a position to make the requisite examination have forwarded samples from their correspondents. The cereal product feeds comprised dried brewers grains, malt sprouts, bran, shorts, gluten feeds and various chops, while the oil cakes included both linseed and cottonseed meals. Other feeds consisted of various combinations of these materials with or without one or more additional ingredients, such as packing house by-products, pea or bean meal, charcoal grit, etc. Certain tonics, relishes or condiments added to a more or less nutritive combination of ingredients formed the medicated feeds. Several samples in this diversified group were unnamed, others bore brand or trade names and others again were specifically designated to indicate the particular type of stock for which they were presumably best suited.

The weed seeds found in these feeds have been divided into three classes: poisonous, objectionable and non-injurious. To the first class belong the cockles and wild, tumbling and wormseed mustards, etc., which have been proven to possess toxic properties and are considered injurious in feeding stuffs. One or two representatives of this class occurred in sixty per cent of the feeds, not only in the ground form but also as whole seed. In one instance there were as many as 792 vital seeds per ounce of the one variety in a single feed.

The second group consists of seeds considered objectionable, for various reasons, as ingredients of feeding stuffs. Where a kind is suspected of toxicity, is unpalatable or possesses structural characteristics presenting mechanical difficulties in the way of digestion, it has been relegated to this class. Hare's ear, brown and ball mustard, stinkweed and stickseed all appear for one reason or another to have objectionable properties. Although none of these have as yet been definitely shown as poisonous every evidence thus far indicates that they are likely ultimately to be proven of a harmful nature. Incidentally it is noteworthy that in the feeds examined, a number suspected of containing substances unpalatable or even injurious to stock were found to be free from any harmful adulterant, other than seeds of this group.

These objectionable sorts appeared in fifty-four per cent of the feeds examined. A single sample might possess from one to five different kinds of seeds, including both whole and ground conditions. The maximum number of vital objectionable seeds per ounce in any one sample was 356.

To the third class of seeds belong such forms as wild buckwheat and wild oats, on the one hand, and lamb's quarters and lady's thumb on the other. The first type of seed while possessed of considerable hull is yet fairly easily capable of pulverization and possesses some nutritive value than can be made available to certain classes of

SESSIONAL PAPER No. 15

stock at least. In the second type, however, a particularly resistant seed coat makes satisfactory grinding almost impracticable and renders the seed highly indigestible and thus of negligible feeding value. The presence and relative abundance therefore of such seeds in a feeding stuff necessarily affects its worth. From one to nine different kinds of seeds of this sort per ounce sample occurred in ninety per cent of the entire collection of feeds. One feed contained as many as 2,962 vital seeds per ounce.

Considering whole seeds in general a further observation is to be made, namely that thirty-seven per cent of those which occurred in these feeds were noxious within the meaning of the Seed Control Act. Again, from the point of view of possible injury to stock consequent upon ingestion, ninety-eight per cent of these noxious forms must be considered deleterious.

In a considerable number of feeds the poisonous fungus ergot was also found.

In view of the selling price of feeding stuffs it is often surprising to learn the nature of their constituents. A "barley meal," for instance, selling at \$4.05 per cwt. contained no barley. It was composed of a mixture of finely ground corn, sorghum, bean meal, and pulverized oat hulls. In general appearance the sample was not unlike a ground barley, the mealy portion resembling the flour and the fibrous portion the hulls. Microscopical examination, however, proved the true character of this so-called "barley meal." A sample of "feed flour" priced at \$4.50 per cwt. was likewise discovered as another evidence of fraudulent practice. Superficially it resembled a poor grade feed flour containing a considerable proportion of bran. The flour, however, proved to be a mixture of ground corn, sorghum and bean meal while the bran consisted of ground rice hulls. In addition to a certain amount of shorts, a sample designated as such, contained ground rice hulls, sorghum and corn with a trace of ground oil cake and pulverized oat hulls. A "stock feed" suspected from effects of feeding to contain poisonous ingredients, was found to be composed of a mixture of ground peanut skins, corn, bran and oat hulls. This is an obviously highly indigestible and non-nutritious combination, by reason of its physical character quite capable of disturbing ordinary digestive processes and thus of causing symptoms easily to be mistaken for those of poisoning.

A few samples of screenings were also examined for injurious weed seed content. It was found that sixty-five per cent contained more than the margin of tolerance allowed by the Feeding Stuff Act and thus would have to be re-cleaned before being chopped or crushed for selling as feed.

WHEAT PRODUCTS STANDARDS

The examination of numerous samples of shorts during feeding stuffs investigations showed considerable variations in the character of that product. With the intention of ascertaining something of the nature and extent of this variation a collection of samples was made and submitted to comparative examination. Although found possible to form an intergrading series ranging from the feed flour to the bran-like type it was observed that the greater proportion of the samples, especially those from the larger mills, had come more or less to resemble fine bran. The necessity for a revision of standards in respect to wheat product feeds therefore became apparent.

FEED EDUCATIONAL WORK

The microscopical findings resulting from an investigation of some four hundred representative samples of Canadian feeding stuffs completed last summer, have been compiled for presentation in bulletin form. Physical composition has been outlined, poisonous properties of weed seeds discussed and other adulterants noted. A comparison of these observations with the chemical data determined for the same set of feeds by the Experimental Farms Branch will, it is expected, emphasize the necessity for a

12 GEORGE V, A. 1922

knowledge of feeding stuffs from the standpoint of actual physical content. It is becoming more and more apparent that although essential, it is not sufficient to ascertain chemical composition alone. The quality of protein as determined by a knowledge of constituents is gradually being recognized to have a definite bearing on feed value. Balanced rations accurately compounded on the basis of quantity without regard to quality have in many instances been found to prove unsatisfactory, while the same chemical balance compounded by use of other feeds will produce desired results. The explanation while not always dependent on the quality of protein can often be traced to no other cause. A bulletin containing the results of this work both from the botanical and chemical standpoints will shortly be ready for publication.

SEED INSPECTION DIVISION

The office work performed by this division last year comprised the grading according to the standards set forth in the Seed Control Act and issuing certificates and mailing reports for all samples received at the seed laboratories for testing purposes, including samples from the seed trade, farmers, inspectors' official samples, and samples from the collectors of customs. The samples from the Customs officials represented seven and a half million pounds of seed imported. Other activities include the inspection and grading of seed oats entered in combined field crop and cleaned seed competitions, making seed crop and seed supply surveys, judging at seed fairs and giving public addresses on the Seed Control Act and its administration.

INSPECTION OF THE SEED TRADE

The field inspectors visited 7,725 dealers throughout the various provinces and discovered 783 violations of the Act, most of which were of a minor nature. Whenever suspected violations are found the inspectors take official samples and forward them to the nearest Dominion Seed Laboratory with a report covering the case. After the sample is received and analysed the official certificate of analysis is forwarded to the party concerned together with a letter asking for an explanation as to why this seed was offered for sale contrary to the Act. Where unsatisfactory explanations are given or where inspectors find on second visits that the provisions of the Act are still being ignored then these cases are recommended for prosecution. Last year thirty-six prosecutions were successfully conducted.

ELEVATED INSPECTION

The inspection of seed grain at the Canadian Government interior terminal elevators is made available to any shippers who desire to make use of it but it has been taken advantage of principally by the Seed Purchasing Commission. Again this season seed inspectors have been maintained at the Government elevators at Calgary, Moosejaw and Saskatoon. Grain passing through these elevators was inspected and if found suitable for seed it was separately binned in seed bins and certificates issued which are attached to the warehouse receipt and forwarded to the shippers. When seed grain is ordered out of these elevators it is cleaned to the seed standards and shipped either in bulk or sacked and each shipment is covered by an Ex-elevator Seed Certificate giving the seed grade. Reduced seed grain rates are allowed by the railways to the Seed Purchasing Commission only on shipments accompanied by these certificates.

The quantities of seed grain for which outgoing inspection was made and seed certificates issued last season were as follows: seed wheat, 702,712 bushels, seed oats, 1,105,945 bushels; seed barley, 16,353 bushels.

Service was also given in the inspection and grading of timothy seed received at the Calgary elevator. Provision is made at this elevator for the cleaning and

SESSIONAL PAPER No. 15

handling of timothy seed in the same manner as for the cereal grains. The growers consign their seed to the elevator in an uncleaned state from the thresher and as it is received it is cleaned, graded and binned according to grade and each shipper receives a warehouse receipt for his seed giving the gross weight and the net weight and grade of recleaned seed. The amount of 1920 timothy seed inspected was 516,369 pounds.

FIBRE FLAXSEED INSPECTION

The inspection of fibre flaxseed for export was continued again last year with the object of maintaining the reputation of Canadian-grown fibre flaxseed in the Irish market. The Ontario and Quebec flax growers notified the Seed Branch when shipments were cleaned, bagged and ready for shipment and an inspector was then provided who made the inspection, and if up to the seed standards, labelled and sealed the bags. Certificates were issued for only No. 1 fibre flaxseed which has a high purity and germination standard. The seed certificates were issued in duplicate, one for the grower and the other to be forwarded to the purchaser. Our method of inspection and the quality of seed received in Ireland received favourable comment from the Irish Department of Agriculture. There were 48,000 bushels of No. 1 seed of fibre flax inspected last season by this Branch.

SEED MARKETS DIVISION

This division compiles and issues seed crop and markets reports, renders assistance in seed marketing, and supervises the administration of subventions paid through the Seed Branch to the Provinces to encourage field crop competitions, seed fairs and exhibitions.

SEED CROP AND MARKETS REPORTING

Seed crop reports were issued during the production season and semi-monthly market circulars were compiled and issued during the marketing season of clover and grass seeds. These were mailed only to those who indicated that they were especially interested by supplying information from time to time. The farm press also co-operated by publishing the reports promptly.

The market reports covered the more important markets of Canada, Great Britain and the United States and included current market values of seeds, both to the grower and to the wholesaler. The Canadian Government Trade Commissioner, London, England, and the Bureau of Markets, Washington, D.C., supplied the information relative to seed prices, supply and demand in Great Britain and the United States respectively. Information bearing on domestic market conditions was secured from Canadian seed dealers, farmers' organizations and farmers, while the Agricultural Branch of the Dominion Bureau of Statistics gave valuable service in this respect.

Special educational circulars, covering the availability and reliability of commercial seed supply of Canadian production were issued, and are believed to have been an important factor in the distribution of the following supplies: Certified seed potatoes of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario; swede turnip seed of the Maritime Provinces; field root and garden vegetable seeds of British Columbia; seed corn of Ontario; and registered seed of the Canadian Seed Growers' Association.

SEED MARKETS EXTENSION

Suggestions were offered and directions given to growers who desired to improve their organization for marketing. Certified seed potato growers of Quebec appointed

12 GEORGE V, A. 1922

the Central Farmers' Co-operative Association, Montreal, their marketing agents. The alsike growers of Ontario marketed their seed through the United Farmers' Co-operative Company, Toronto. The Western Ontario Corn Growers organized a Co-operative Seed Corn Marketing Association.

Standard fibre flax seed export sacks were purchased in wholesale quantity and supplied to exporters at cost; 16,700 sacks were ordered and delivered to the growers.

SEED PRODUCTION

Subventions were paid to Provincial Departments of Agriculture to promote field crop competitions, local seed fairs and provincial seed exhibitions. The total amount of moneys paid was \$36,548.37. The amounts paid to each province approximated one-half the total cost of conducting these services. They have been the means of encouraging the more general use of good seed in Canada and have indirectly created seed supplies for commerce.

FIELD CROP COMPETITIONS

Subventions were paid for field crop competitions in 1920 as follows:—

	Number	Subvention paid.
Prince Edward Island	12	\$446.04
Nova Scotia	8	332.93
New Brunswick	18	1,106.00
Quebec	143	5,950.00
Ontario	305	13,789.73
Manitoba	55	1,813.12
Saskatchewan	71	2,181.46
Alberta		
British Columbia		
Total	612	\$25,619.28

LOCAL SEED FAIRS

The subventions paid on account of local seed fairs in 1920 were as follows:—

	Number	Subvention paid
Prince Edward Island
Nova Scotia	5	\$ 265.00
New Brunswick	7	407.97
Quebec	74	3,438.99
Ontario	10	262.36
Manitoba	46	1,933.54
Saskatchewan	15	903.67
Alberta	22	873.96
British Columbia
Total	179	\$8,085.49

PROVINCIAL SEED EXHIBITIONS

The following subventions were paid on account of provincial seed exhibitions in 1920:—

	Place of Exhibition	Subvention paid.
Nova Scotia	Truro	\$332.93
New Brunswick	Fredericton	268.33
Quebec	Quebec	600.00
Ontario	Guelph	651.34
	Ottawa	348.00
Manitoba	Winnipeg	600.00
Saskatchewan	Saskatoon	343.00
		<hr/>
		\$2,843.60

Alberta did not hold a provincial seed exhibition in 1920.

SESSIONAL PAPER No. 15

By special arrangement the subvention available to British Columbia on account of field crop competitions and seed exhibitions was devoted to encouraging the production of field root and garden vegetable seeds, which, because of climatic conditions, may be grown to better advantage there than elsewhere in Canada. The expenditure for this purpose was \$2,500, an equal amount being contributed by the Provincial Department of Agriculture.

ASSISTANCE TO CANADIAN SEED GROWERS' ASSOCIATION

Financial support of the work of the Canadian Seed Growers' Association was continued during the year 1920 to the extent of \$7,500 from the Seed Branch appropriation. The last annual report of the Association shows 2,702 members and other growers engaged in the production of registered and improved seeds.

SEED PURCHASING COMMISSION

The Seed Purchasing Commission operating under this branch has rendered valuable service to the farmers of the provinces of Alberta and Saskatchewan who suffered partial crop failure because of climatic conditions. This Commission, throughout the grain shipping season, purchases supplies of seed of wheat, oats and barley that will conform to the established grades for seed under the provisions of the Seed Control Act. All of the seed grain is purchased subject to seed inspection and the delivery of seed inspection certificates, together with the warehouse receipts for the car lots of seed grain that have been received and separately binned in the Canadian Government terminal elevators at Calgary, Moosejaw and Saskatoon. The seed grain is purchased in an uncleaned condition but is thoroughly cleaned for seed purposes before it is shipped from the elevator, and the Commission is required to deliver a Seed Inspector's certificate for all of the seed grain sold.

The charges for the re-cleaned seed grain have been made just sufficient to cover the average purchasing price of the grain; the elevator charges for elevating, storing and cleaning; the net wastage in cleaning; the cost of sacks and sacking when required by the purchaser; and the cost of transportation; to which is added a small margin sufficient to meet incidental losses to cover the operating expenses of the commission, and a fair rate of interest on the moneys advanced to the commission by the Dominion Government. As all sales are made subject to cash payment, the commission has been able to make prompt returns to the Receiver General.

Last year the commission filled requisitions received from provincial and municipal bodies, farmers' organizations and individual farmers, for more than a million bushels of seed oats and lesser quantities of seed wheat and seed barley. The commission has been able to supply the demand for seed grain from any part of Canada although the need for its services has arisen mainly in the three Prairie Provinces. It is satisfactory to be able to report that this valuable service to agriculture has been continued without financial loss to the Government, even for the expenses of the trained staff employed in this work.

In consideration of the wide expanse of the agricultural country in Canada lying between the Great Lakes and the Pacific slope, its geographical position being inland and extending far to the north, it would seem to be reasonable to expect that in most years some locations within this wide area may suffer crop failure to the extent of needing well organized assistance in procuring seed supplies from other provinces or districts. Such at least has been the experience in many, if not, most years. The 1920 crop in parts of southwest Saskatchewan suffered substantially from excessive heat and drought. The wheat crop in some districts was materially reduced in yield but the oat crop, under such conditions, was almost destroyed. In consequence, and at the urgent request of the interested public, recommendations were made to Council for the continuance of the services of the Seed Purchasing Commission.

12 GEORGE V, A. 1922

Because of the area affected being not large as compared with former years, and of the fact that there is an abundant supply of good seed in the neighbouring provinces, the operations of the commission are not on so large a scale as in former years. The commission, however, is in a position this year, from the bountiful supply of superior quality seed oats in the province of Alberta, to procure and hold a reserve supply until such time as there is evidence of a plentiful supply of seed oats from the crop of 1921. The unfortunate experience of some past years would indicate the wisdom of this action on the part of the commission as a measure of insurance against possible seed shortage.

FEED DIVISION

The Feeding Stuffs Act, assented to July 1, 1920, came into operation on January 1, 1921, by proclamation issued by the Governor in Council and published in the *Canada Gazette*, December 4, 1920. This Act is designed to regulate the sale and inspection of commercial feeding stuffs, bran, shorts, middlings, and chop feeds, and was enacted as a result of an increasing demand for more efficient control of feeding stuffs, especially in reference to their content of vital and deleterious weed seeds.

As provided for under the Act, an Advisory Board, representative of the various interests concerned, has been appointed, the duty of which is to recommend such regulations as it is of opinion should be established under the Act. This Advisory Board met in conference at Ottawa on August 10, 1920, and recommended certain regulations which have been adopted. A bulletin being a reprint of the Feeding Stuffs Act and the regulations thereunder has been prepared and widely distributed.

Under the provisions of this Act every commercial feeding stuff imported into or offered for sale in Canada must be registered with the department and have assigned thereto a registration number. By May 1, 1921, 462 such products had been registered.

Former feeding stuffs regulations provided for inspection at points of distribution and sale and were based largely on the chemical contents of ground feeding stuffs. The new Feeding Stuffs Act provides also for inspection at points of manufacture and is based on both chemical and physical properties. Services in connection with chemical analyses of feeding stuffs are being provided by the Chief Analyst of the Department of Health.

STANDARD SET FOR RECLEANED SCREENINGS

Upon the recommendation of the Advisory Board under the Feeding Stuffs Act a standard of quality for re-cleaned screenings has been established and made effective by agreement as between this department and the owners of elevator screenings. Purchasers may now obtain "Standard Re-cleaned Screenings," of comparatively uniform quality and feeding value and which do not contain in excess of 3 per cent of chaff and dust and 3 per cent of any or all kinds and varieties of mustards or other small weed seeds. A grain inspector's certificate to this effect is furnished upon request, with each shipment.

REVISED STANDARDS FOR MILL PRODUCTS

A remarkable variability was observed in the quality of wheat bran, shorts and middlings as placed on the market by different manufacturers. The live stock interests represented on the Advisory Board under the Feeding Stuffs Act and representatives of the Canadian National Millers' Association were therefore brought into conference for the purpose of agreeing upon revised standards for these mill products. The practice of many manufacturers during recent years has been to mix with these products the "mill-run" of screenings, which practice, as indicated by the numerous complaints submitted to the department has proven very unsatisfactory to live stock

SESSIONAL PAPER No. 15

feeders and particularly to hog raisers. As a result of these negotiations the Canadian National Millers Association, which represents a very large percentage of the total milling capacity of Canada, has agreed to encourage its members to produce for the market pure wheat bran and pure middlings and to include the "mill-run" of screenings with their shorts only. Mr. E. S. Archibald, Director of Experimental Farms and Dr. F. T. Shutt, Dominion Chemist, have been selected by the live stock organizations to represent their interests in the matter of deciding upon standards to be adopted for each of wheat bran, shorts and middlings, and when finally decided upon these standards will be made effective by regulations under the Feeding Stuffs Act.

PROGRESS

During these first three months that the Feeding Stuffs Act has been in force, efforts have been directed largely towards educating manufacturers in respect of the requirements of the law. This propaganda has been conducted through the medium of our inspection service, through the agricultural press and by means of circular news letters issued periodically. Thus far, no prosecutions have been made, any offender having been let off with a warning. Less tolerance will be shown those in default once the provisions of the Act are thoroughly understood. It is pleasing to report that, on the whole, manufacturers have shown a disposition to comply with the provisions of the Act and many live stock feeders and organizations have approved it as timely and suitable legislation.

ENTOMOLOGICAL BRANCH

The Dominion Entomologist has estimated that the yearly loss in Canada to field, orchard and garden crops, due to destructive insects amounts to the enormous sum of \$200,000,000. To this huge devastation must be added the annual destruction caused by forest insects, stored product insects, etc. The officers of the Entomological Branch have during the year materially assisted farmers, fruit growers, gardeners, etc., in efforts to protect their crops from the ravages of injurious insects and it has been estimated that entomological investigations in Canada have in 1920 resulted in the saving of many millions of dollars worth of crops. As in the past, biological studies have been made of important farm and garden insects, stored product insects, etc. Excellent progress has also been made in studies on the natural control of insects, and new insecticides have been developed which are resulting in important savings to farmers and orchardists. In the various provinces where entomological field laboratories have been established, advice regarding the control of insects is being constantly sought by the residents. Extensive demonstrations of insect control under field conditions were made in several of the provinces.

Under the direction of the Dominion Entomologist the Regulations under the Destructive Insect and Pest Act have been administered in so far as these refer to insect pests. The following amendments to the regulations referring to insects were passed during the year:—

By Order in Council dated April 14, 1920, the importation into Canada of alfalfa (lucerne) hay, whether for feeding, packing or other purposes, originating in the states of Idaho, Utah, and also in the counties of Uintah, Sweetwater and Lincoln in the state of Wyoming and the counties of Dennison and Gunnison in the state of Colorado; four of the United States of America, is prohibited.

This amendment was passed in order to prevent the introduction of the alfalfa weevil into Canada on shipments of alfalfa hay.

By Order in Council dated May 24, 1920, the amendment dealing with the European corn borer passed on May 19, 1919, was rescinded. Under the new amend-

12 GEORGE V, A. 1922

ment the importation into Canada of corn and broom corn, including all parts of the stalk, celery, green beans in the pod, beets with tops, spinach, rhubarb, oat and rye straw, as such or when used as packing, cut flowers or entire plants of chrysanthemums, aster, cosmos, zinnia, hollyhock, gladiolus and dahlia from the areas in the United States infested by the European corn borer is prohibited, unless the same are accompanied by a certificate of inspection issued by the United States Department of Agriculture stating that the above products are free from the pest.

By Order in Council dated August 21, 1920, the amendment dealing with the apple sucker passed on November 28, 1919, was rescinded and substituted by a Ministerial Order. Under this Ministerial Order the counties of Kings, Hants, Colechester and Cumberland, in the province of Nova Scotia were quarantined on account of the apple sucker, and no nursery stock may be moved from any of the quarantined areas unless accompanied by a permit or a certificate of inspection duly signed by an authorized inspector.

By a Ministerial Order passed on September 16, 1920, the removal of corn, including all parts of the plant, from the London, Ont., fair grounds was prohibited on account of the danger of spreading the European corn borer thereby.

On September 25, 1920, a Ministerial Order was passed adding the communities of Aldersville, New Ross and Mill Road, in the county of Lunenburg, Nova Scotia, to the areas mentioned in the Quarantine passed on August 21, 1920, under which the removal of nursery stock is prohibited owing to the danger of spreading the apple sucker.

On November 25, 1920 a Ministerial Order was passed prohibiting the removal of corn fodder or cornstalks, including broom corn, whether used for packing or other purposes, green sweet corn, roasting ears, corn on the cob or corn cobs, from the areas in southern Ontario infested by the European corn borer. Five exceptions were made to this quarantine, namely:—

1. To the articles enumerated when they shall have been manufactured in such a manner as to eliminate the risk of carriage of the European corn borer.

2. To clean shelled corn and cleaned seed of broom corn.

3. To shipments of the articles enumerated, transported through the quarantined areas on a through bill of lading.

4. To shipments of the articles enumerated for experimental or scientific purposes, by the Dominion Department of Agriculture or the Ontario Department of Agriculture.

5. To shipments of dried seed corn on the cob for exhibition purposes and consigned to the secretary of a winter fair or exhibition duly recognized by the Dominion Department of Agriculture or the Ontario Department of Agriculture. Such shipments shall be inspected at point of destination by an inspector duly appointed under the Destructive Insect and Pest Act.

By Order in Council dated February 25, 1921, that part of section 3 of the Regulations under the Destructive Insect and Pest Act passed on July 17, 1917, and reading as follows, was rescinded:—

“Truro, N.S., and Digby, N.S., for nursery stock destined to points in the province of Nova Scotia only, from March 15 to May 15, and from October 7 to December 7.”

DIVISION OF FIELD CROP AND GARDEN INSECTS

During the year the European corn borer was found for the first time in Canada, in the latter part of August. In that month and in September this dreaded pest was found in fields of corn in several counties in the province of Ontario. Investigations were immediately undertaken, biological as well as control, so far as this was possible

SESSIONAL PAPER No. 15

owing to the lateness of the season. A leaflet describing the insect and its economic importance was given wide distribution, in addition to which large numbers of farmers were visited and the danger of the infestation described. Life-history and control studies were also made during the year, on such pests as cutworms of various kinds, grasshoppers, white grubs, root maggots and other field crop and garden insects. The adoption by commercial growers of the corrosive sublimate treatment for protecting cabbages and cauliflowers from the ravages of the cabbage root maggot, in 1920 in Ontario alone resulted in the saving of crops to the value of many thousands of dollars.

Throughout the various provinces officers of the branch have kept in close touch with outbreaks of injurious insects and have given prompt advice regarding control measures. This service is every year becoming more appreciated by farmers generally.

In addition to insects affecting field crops and garden crops, special investigations have been made on insects which attack greenhouse plants, preparatory to the publication of an illustrated bulletin on the subject.

DIVISION OF FOREST INSECTS

The work of this division has included bark-beetle investigations in British Columbia, spruce budworm investigations in New Brunswick, Quebec and Ontario, permanent forest sample plot studies in Eastern Canada, and shade tree insect investigations.

Bark beetle studies are necessary in order to extend and improve our methods of control. These latter are being conducted on an extensive scale in co-operation with the Dominion and Provincial Forestry Branches.

The spruce budworm investigations have included a thorough survey of the injured districts in New Brunswick and an examination of the Temiskaming district in northern Ontario, where a fresh outbreak was discovered which is spreading westward. Through the co-operation of the Air Board a successful air machine survey was made by our officers in their study of this latter infestation.

The forest sample plot studies have developed further during the year. Thirty-eight permanent plots have now been established with the trees thereon described and under observation. They are located in New Brunswick, Quebec and northern Ontario.

Investigations on shade tree borers have been conducted chiefly at the forest insect laboratory at Aylmer, Que. Satisfactory results are being obtained.

DIVISION OF FOREIGN, PESTS SUPPRESSION

This division has charge of the carrying out of the regulations of the Destructive Insect and Pest Act in so far as insect pests are concerned.

During the year the brown-tail moth suppression work was continued in the provinces of Nova Scotia and New Brunswick. During the period December 6, 1920, to March 26, 1921, the total number of nests found by our inspectors in the former province was 530. In the province of New Brunswick no nests were found.

In the early part of the summer further scouting was effected in Nova Scotia to define the existing area infested by the apple sucker recently discovered in that province. As a result the Order in Council above referred to was passed.

Two important destructive insects were discovered for the first time in Canada in 1920, namely, the European corn borer and the satin moth, also of European origin. The first-mentioned insect is one of the worst known pests of corn and immediately on its discovery in Ontario, in the latter part of the month of August, every effort was made to define the infestation and to give all possible advice to farmers in the

12 GEORGE V, A. 1922

affected districts. A leaflet was distributed widely and other methods of education adopted. The scouting work was continued until October 23. Thirteen counties in southern Ontario were inspected and seven of these were found to be infested by the corn borer.

The satin moth was discovered by officers of the branch in the vicinity of New Westminster, B.C. in July, 1920.

During the year the inspection and fumigation of nursery stock entering Canada has been continued.

DIVISION OF SYSTEMATIC ENTOMOLOGY

Important additions have been made to the National Collection of Insects during the year. The valuable collection belonging to the late F. H. Wolley-Dod, of Midnapore, Alta., which was bequeathed to the branch, was received safely and has since been incorporated in the main collection. The national collection on the whole has been materially enriched by the collections and studies made by the officer in charge of the division assisted by other officers of the branch.

Systematic revisions have been made of various important groups which have been of great assistance not only to our own officers but to students of entomology generally.

An important beginning has been made in the establishment of a permanent collection of those forms of insect life which require preservation in alcohol and other liquids.

The officer in charge of the national collection has continued to identify specimens for economic workers, teachers and others interested in insect life.

INSECTICIDE INVESTIGATIONS

These investigations have been conducted mainly in the province of Nova Scotia and with the object of further developing promising dusts for apples and potatoes. An important finding was that which demonstrated the extent to which white arsenic may be substituted for the more expensive insecticides. This will result in an enormous saving to the fruit grower and farmer. New insecticides developed by our officers are tested widely under orchard and field conditions.

NATURAL CONTROL INVESTIGATIONS

The work of the officers employed on natural control investigations has been directed chiefly to studies of the natural control of the spruce budworm, forest tent caterpillar, green apple bug and other pests. Much progress has been made in these studies during the year. A full report on the fall webworm resulting from eight years of study has been completed and it is expected will soon be published.

STORED PRODUCT INSECT INVESTIGATIONS

In view of the important losses which take place every year to stored grain and other products, an officer of the Entomological Branch has been placed in immediate charge of such investigations. During the year a number of elevators, mills and warehouses have been visited and preliminary studies made of important pests, such as the various kinds of mites, grain beetles, etc.

MOSQUITO INVESTIGATIONS

The mosquito investigations incepted in the Fraser River Valley of British Columbia in 1919 were continued during 1920 by the special assistant appointed for this work. Surveys of the chief breeding places of mosquitoes were made chiefly by motor boat and much valuable data secured regarding the life-histories of these insects.

SESSIONAL PAPER No. 15

INDIAN ORCHARD WORK

Under the direction of the Dominion Entomologist an officer of the Department of Indian Affairs has during the year visited various Indian settlements in British Columbia for the purpose of advising them in general on matters relating to crop protection etc. This work has proved of much value.

FIELD LABORATORIES

Annapolis Royal, N.S.—In addition to insecticide investigations which are carried on at this laboratory, studies have also been made of important outbreaks of insects occurring in Nova Scotia. The rather widespread outbreak of the true army worm was investigated, resulting in an opportunity of demonstrating under field conditions successful control by means of poisoned bait. Many demonstrations of insect control were conducted by the officer in charge of this laboratory, not only in Nova Scotia, but in New Brunswick as well.

Fredericton, N.B.—This laboratory, which is the headquarters for natural control studies has in addition investigated outbreaks of important pests, such as tent caterpillars, birch leaf skeletonizer, spruce budworm, fall webworm, army worm, etc. The work of recovering parasites of the brown-tail moth, introduced from Massachusetts into the Maritime Provinces was continued.

Hemmingford, Que.—Orchard demonstrations with various sprays and dusts occupied a good deal of the time of the officer in charge of this laboratory during the year. These demonstrations are being followed closely by fruit growers of the district. The following are some of the insects which were most destructive in Quebec province: Flea beetles, fruit worms, cutworms, root maggots, white grubs and budmoth.

Vineland Station, Ont.—The entomologist in charge of this laboratory continued investigations on the biology and control of the pear psylla, potato leaf-hopper, strawberry weevil, blackberry leaf-miner, etc. Orchard demonstrations in the control of a number of fruit pests were conducted in various sections of the Niagara district. Experiments with orchard dusts and new spray materials were also undertaken.

Strathroy, Ont.—The major investigations conducted at this laboratory related to the hessian fly, which has been destructive to wheat in western Ontario; white grubs which are important soil infesting insects; potato beetle, and cornborer. In the early part of the season the seed corn maggot caused serious losses in certain sections.

Treesbank, Man.—The continued outbreak of grasshoppers in Manitoba in 1920 necessitated the personal attention of the entomologist in charge of this laboratory during most of the season. In May, June, July and August meetings of farmers in infested districts were addressed, bait-mixing stations visited and advice in general given. Over 4,000 miles were covered by motor car. The western wheat-stem sawfly was again seriously destructive. Other pests such as cutworms, diamond back-moth, blister beetles, etc. were also present in destructive numbers.

Saskatoon, Sask.—The officer in charge of this laboratory, in addition to assisting in the grasshopper campaign, continued investigations on the biology of such pests as black flies, horse flies, etc. Outbreaks of cutworms were also studied, as well as infestations of the best webworm which was prevalent in the province.

Lethbridge, Alta.—Field experiments in cutworm control were conducted by the entomologist in charge of this laboratory. Studies of the parasites of these insects were also made. In Alberta, as well as the other Prairie provinces, grasshoppers were very abundant particularly in southern portions of the province. From the end

12 GEORGE V, A. 1922

of May until late in the season, the services of our resident field officer were required in the campaign of control. This work resulted in the saving of much crop from destruction.

Vernon, B.C., Agassiz, B.C., Victoria, B.C.—The officer in charge of the Vernon laboratory has had general supervision over all entomological work in British Columbia. During the year important investigations were conducted on the life-history and control of orchard and small fruit insects, such as codling moth and insects frequently mistaken therefor, strawberry-root weevil, currant fruit fly, etc., as well as on vegetable insects, particularly the cabbage root maggot and the onion maggot. Insects affecting range lands, especially grasshoppers, also required attention. The caterpillars of the satin moth, a destructive European pest were found for the first time in Canada in the province. An infestation of theessian fly was also investigated.

PUBLICATIONS

The following publications have been issued from the Entomological Branch during the year:—

Crop Protection Leaflets:

No. 13.—The European Corn Borer. By Arthur Gibson and L. S. McLaine.

No. 14.—The Control of Grasshoppers. By Norman Criddle and A. V. Mitchener.

Entomological Circulars:

No. 13.—Locust Control in the Prairie Provinces. By Norman Criddle.

No. 14.—(Technical) Boring Caterpillars affecting Corn and other Crops and which are liable to be mistaken for the European Corn Borer. By Arthur Gibson.

Entomological Bulletins:

No. 18.—Studies in North American Cleorini (Geometridæ). By J. McDunnough.

In addition to the above departmental publications the officers of the Entomological Branch have contributed articles in *The Agricultural Gazette of Canada* as well as in technical journals, such as *The Canadian Entomologist*, transactions of various societies, etc. Many articles prepared for the agricultural press have also been published.

NEW DOMINION ENTOMOLOGIST

Mr. Arthur Gibson, Senior Divisional Chief of the Entomological Branch, was promoted to the position of Dominion Entomologist, made vacant by the death of Doctor C. Gordon Hewitt.

FRUIT BRANCH

THE FRUIT SEASON

It is many years since weather conditions were more favourable to fruit growing than during the past season. There was an abundance of bloom which, with exceptionally favourable weather, resulted in a heavy set of fruit. The apple crop, although approximately a quarter of a million barrels less than that of the previous year, was considered very satisfactory in view of the heavy crops produced in British Columbia and Nova Scotia in 1919, and the great loss of trees in Ontario and Quebec resulting from the severe weather during the winter of 1917-18. In Ontario, where a great many of the orchards were neglected during the war years, the crop was double that of the previous year and the quality of the fruit was much better than average. In

SESSIONAL PAPER No. 15

British Columbia, where large acreages were planted several years ago, the later plantings came into commercial bearing last year and, with favourable growing conditions, it was expected that the tonnage would be equal to the previous year. Unfortunately weather conditions in many parts of the province were not favourable, with the result that the apple crop was not more than 55 per cent of that of 1919. With the present showing of fruit buds and the healthy condition of the trees, this province promises to produce in 1921 the biggest crop in its history. Notwithstanding the heavy crop produced in Nova Scotia in 1919, which was approximately 1,800,000 barrels, the past season's crop exceeded one million barrels of a quality above average. The trees have come through the past winter in excellent condition and there is another good showing of fruit buds. In the provinces of New Brunswick and Prince Edward Island the crop was less than the previous year. Quebec produced a crop approximately 50 per cent of normal, which was a considerable increase over the previous year.

With the removal of price control of apples in the United Kingdom and many causes for discouragement arising out of war conditions, fruit growers throughout Canada are now giving greater attention to their orchards than at any time in the history of the industry. Another very encouraging sign is the serious attention which has been given to fruit marketing and distribution especially in the Provinces of Ontario and Quebec, where the establishment of marketing facilities have been very much neglected.

As regards tender and small fruits, in some provinces these crops were not as large as was expected from the showing of blossoms, due to late frosts in some districts, and in others to unusually dry warm weather when the fruit was nearing maturity. In British Columbia, especially on Vancouver island and the lower mainland, notwithstanding the increase in acreage, the strawberry crop fell far short of the previous year. Much greater care, however, was exercised in the marketing of the berry crops, with the result that good prices were received. Berries of all kinds were shipped to the Prairie Provinces without loss. In the Niagara peninsula, notwithstanding the severe winter of 1920, fruit trees of all kinds entered the growing season in an unusually healthy and promising condition. It is doubtful if this district has in any previous season shown such a uniform and profuse bloom. The continued favourable weather during the blossom period resulted in a heavy set of all kinds of fruit. Somewhat similar conditions obtained in other parts of the province. The strawberry crop in Quebec where plants were unprotected during the winter, was almost a complete failure.

CROP AND MARKET REPORTS

The Fruit and Vegetable Crop Report was issued monthly from June to October, inclusive. It gave in concise form crop prospects and conditions in all parts of Canada, compiled from reports made by our staff of fruit inspectors and from reports supplied by growers in all parts of the country. It also included an estimate of the prospects in countries whose produce competes with Canadian-grown fruit and vegetables. In addition these reports serve a useful purpose in bringing to growers' and shippers' attention other items of general interest, such as new regulations with respect to fruit grading and packing, packages, tariff changes and other transportation matters affecting the fruit and vegetable industry.

The Telegraphic Market Report, which has been issued during the fruit marketing season since 1914, has been continued and was issued simultaneously at Middleton, N.S., Ottawa, Winnipeg and Vancouver twice weekly during the period of heavy movement and once each week thereafter. The first report was issued August 26, and the last March 29. It contains prices telegraphed by members of the Fruit Branch located in marketing centres from Halifax to Vancouver, and also during the export

12 GEORGE V, A. 1922

season the prices paid on the large markets in the United Kingdom are cabled direct by the Canadian Fruit Trade Commissioner at Liverpool. The mailing list for this report has grown, by individual request, from 1,200 in 1914 to 2,700 the past season.

SUGAR

The question of Canada's sugar requirements for the preserving season of 1920 was given earnest consideration and, as the control of imports and exports continued to be exercised by the Canadian Trade Commission, the Fruit Branch co-operated with this body in every way possible in the matter of obtaining an equitable distribution of supplies. In the early part of June it appeared that there might be a shortage and officers of the Branch made a comprehensive survey of the situation throughout Canada. It was found that in only two districts was there a real shortage, which was no doubt due to labour troubles that prevented two of the largest refiners operating for several weeks. These labour difficulties were soon overcome, and with all refiners working practically to capacity, the danger of a shortage was removed. The control of imports and exports was removed on July 1st and it was feared that this would result in an acute shortage. However, the refiners gave assurance that they would continue to give preferred attention to the Canadian requirements, especially for canning and preserving. The season passed without any shortage, but the higher price no doubt resulted in a smaller proportion of the fruit being canned.

PACKAGES

In Ontario a serious situation arose on account of the shortage of packages caused by the large fruit crop and also by the destruction by fire of one of the largest fruit basket factories in Ontario. Efforts were put forth by the Fruit Branch to obtain packages from the United States and to interest other manufacturers in the production of packages but, very early in the season, we were called upon to decide between the enforcement of the Inspection and Sale Act with regard to standard packages and the loss of fruit. The Act, therefore, in this regard was not enforced during the past season and packages of various specifications and dimensions were used, some of which proved very unsatisfactory. As soon as the danger of loss of fruit was averted the package manufacturers were advised that in future all fruit packages must conform to the requirements of the Act, and it is intended to strictly enforce the regulations during the season of 1921. The price of fruit containers in many provinces reached new high levels, especially in Ontario where apple barrels sold as high as \$2.50 each. The average price, however, was not more than \$1.50. The high price no doubt resulted in larger quantities than usual being shipped bulk in car lots, and the effect on the tender fruit shipments was to limit these in many cases to the better quality only.

APPLE CENSUS

In 1919 a census of apple production in Ontario and Quebec was taken by our fruit inspectors, and the results, compiled and issued in pamphlet form by the Dominion Bureau of Statistics, were of considerable value. Appreciating the importance of accurate information in regard to production and feeling that it was not safe to base future estimates entirely on the results of one year, particularly an abnormal season such as 1919, the inspectors were authorized to take a similar census of the 1920 apple crop. The Dominion Bureau of Statistics again co-operated with us in tabulating the returns.

EXPORT TRADE

Owing to the partial failure of the apple crop in the United Kingdom it was expected that the early varieties would meet with a ready sale at satisfactory prices. With the arrival of the first consignments these expectations were fully realized, but

SESSIONAL PAPER No. 15

very soon the high price, together with the advantageous exchange rates, resulted in large consignments being imported from the Continent, and the market declined rapidly. Efforts were renewed to have the control removed from apples, with the result that the Food Administration announced the suspension of the apple Control Order from August 1 to November 14. After the latter date the order again became effective, but the retail maximum price was increased to 10d. per pound, which was 1d. per pound in excess of the maximum retail price obtaining since December 6, 1918. A very slight increase was provided in the maximum price to be paid to primary handlers. Representation was again made to the Food Administration that the order be repealed, as it was felt that the objective of the order, which was that the price of apples as food should not be prohibitive to the masses, was assured by the big crop in Canada and the United States. There were certain varieties which always commanded a premium over others, and the removal of the control would permit our exporters receiving the increased price for these few varieties without incurring any hardship to the average consumer. In the attempt to have the control removed during the shipping season we were not successful, but it was finally repealed, effective March 31, too late to be of any advantage to Canadian shippers.

At the opening of the season there was a reduction of \$1 per barrel ocean freight on apples and pears under refrigeration, as compared with the previous season. Apples in ordinary stowage remained at \$2.50 per barrel and 70 cents per box. This was reduced on December 14 to \$2 per barrel, but with no change in the box rate, and on January 10, as the result of fruit shipping companies chartering steamers to carry full cargoes, the regular steamship lines again reduced the rate to \$1.75 per barrel and 60 cents per box.

As the result of heavy losses through handling apples in boxes, the Liner Committee, representing steamship companies operating between Canada, the United States and the United Kingdom ports, issued an order requiring all apples in boxes to be strapped or wired. During the previous season accurate data had been obtained which supported the action of the steamship companies, which received the endorsement of the Fruit Branch. Later in the season this order was modified, and permitted shippers, who would exempt steamship companies from responsibility for loss caused by handling, to ship without strapping or wiring. Unfortunately several shipments went forward without strapping or wiring and were reported to have landed in a damaged condition. The strapping or wiring is considered one of the cheapest forms of insurance, and it is to be hoped that the steamship companies will insist upon this being done hereafter. Complaints have also been received from Railway Lines operating in the United Kingdom, who distribute a great portion of the imports, that they have incurred heavy losses in handling boxes which were not wired or strapped.

A much greater interest was taken in the Canadian export apple trade by importers in the United Kingdom, as evidenced by the unusual number of representatives of large importing firms who visited Canada during the past year.

Mr. J. Forsyth Smith, Canadian Fruit Trade Commissioner in Great Britain, who for the past four or five years has devoted the greater portion of his time to promoting the interests of the fruit industry of Canada in Great Britain, visited Canada during the summer, and meetings were arranged by the Fruit Branch in all the fruit-growing provinces in order that those interested in the export markets might have an opportunity of meeting Mr. Smith and discussing with him the export market situation. These meetings were very well attended, and growers appreciated the opportunity of receiving first-hand information.

TRANSPORTATION

The relation between the fruit and vegetable producer and cheap, rapid, safe transportation is most intimate. It cannot be too much so. The manifestation of interest by the transportation companies operating in Canada in the development and

12 GEORGE V, A. 1922

success of these industries has been more pronounced during the past year than during any other period. This interest has been reflected in the work of our Transportation Division by a closer co-operation in matters of investigation, educational and experimental undertakings, the amending of tariffs and traffic regulations intended to promote the general welfare of the fruit and vegetable industries.

Many important fruit transportation matters have been dealt with during the year. Frequent conferences were held with railway, express and steamship officials with a view to effecting a wider distribution, the opening of new markets and other improvements connected with the transportation of this product.

Several traffic matters which could not be satisfactorily adjusted in conference, were filed with the Board of Railway Commissioners and sittings attended in the interest of the producers and shippers.

With a view to improving methods of distribution, car loading, and to establish the proper type of cars to be used in fruit transportation under refrigeration, a series of experimental shipments were conducted from British Columbia points. These shipments included straight carloads of fruit, mixed carloads of fruit and vegetables and straight carloads of vegetables, and comprised the brine tank, Bohn and A.B.C. system of refrigeration. Eleven carloads moved by express and nine by freight. As a result of this work the carriers are altering the interior construction of brine tank cars to conform with suggestions offered. A greater confidence has also been created among shippers, particularly in moving fruit to long-haul markets. Several further recommendations in connection with this work have been made to the carriers which would improve the service and assurance has been given that consideration will be given same.

At the urgent request of shippers, experienced men were again stationed in Nova Scotia and Prince Edward Island to advise and assist the shippers in traffic matters; to investigate complaints and to negotiate local traffic arrangements necessary to expeditiously move the apple and potato crop.

Meetings were attended and addressed by the transportation specialist at different points in British Columbia, Ontario and the Maritime Provinces.

With a view to arriving at a basis of compromise, and avoid if possible the necessity of public hearings before the Board of Railway Commissioners, conferences for the discussion of complaints between carriers and shippers were arranged and attended. In this connection it was suggested to the Board of Railway Commissioners that a Perishable Freight Division should be organized in connection with the Canadian Railway Associations for the purpose of dealing with complaints or suggestions in connection with the movement of perishable products. Advice has been received to the effect that a sub-committee has been appointed for the purpose outlined.

INSPECTION SERVICE

Very little change was made in the inspection staff which, during the season, consisted of seventeen permanent inspectors and thirty-four seasonal men employed during the period of heavy movement. Since 1915 the greater portion of the inspection work has been done in the shipping districts and this system continues to prove satisfactory, enabling our inspectors not only to examine the fruit as it is packed, but also to give instruction in the proper methods of picking, packing, grading and shipping. This work, educational in character, has been much appreciated by growers and shippers. In connection with packing, our officers have co-operated directly with the Provincial Departments of Agriculture, members of the Fruit Branch having been loaned on many occasions to conduct packing schools or to give assistance at short courses at the agricultural colleges. In addition, one officer of the branch devotes practically all his time to giving instruction in barrel and box packing.

SESSIONAL PAPER No. 15

Special attention was given to visiting basket, box and barrel factories for the purpose of ensuring a supply of packages of standard sizes and dimensions for the 1921 season.

The service rendered blueberry dealers and shippers in the province of Quebec was continued during the past season, with excellent results.

Where violations of the Act were reported, whether with respect to fruit, fruit packages or potatoes, each case was thoroughly investigated by the chief inspector for the district in which the offender lived. Owing in part to the generally good quality of the fruit produced last season and also to the cumulative effect of the work done by our inspectors since the inception of the Act, it was found necessary to prosecute in nineteen cases only. One of these convictions was for the shipping of immature fruit, an evil that has always been present to a certain extent but with which we have now authority to deal under the amendments to the Act of 1918. In another case, a shipper used old baskets with as many as four different growers' names upon them; and in two cases shippers were prosecuted for using barrels under the standard size. The publicity given these convictions will have the effect of impressing the requirements of the amendments on growers and shippers.

The following table shows the number of lots of various kinds of fruit inspected and the number of packages inspected during the past season:—

Variety.	No. of lots Inspected.	No. of pkgs in lot Inspected.	No. of pkgs. Inspected.
Apples. bbls.	7,595	812,637	51,425
Apples. boxes	3,125	951,198	36,874
Apples. bsks.	302	43,255	2,878
Pears. boxes	572	99,501	5,590
Peaches. boxes	1,060	206,025	12,089
Plums. bsks.	873	210,158	11,322
Tomatoes. bsks.	736	114,914	7,775
Small fruits. pkgs.	2,345	148,033	20,358
Grapes. bsks.	178	174,551	5,048

PUBLICATIONS BRANCH

The Publications Branch of the Department of Agriculture is charged with the distribution of departmental publications, both in English and in French, and with the issuing of *The Agricultural Gazette of Canada*.

The publications include annual reports and the bulletins and leaflets issued from time to time by the several branches. In addition to these, the branch distributes news letters and market reports, as well as special articles and reviews for the use of the newspapers and the agricultural press.

The compilation of mailing lists covering the whole of Canada and their continual revision to insure their being kept up to date is an arduous and somewhat complicated undertaking. Of these addressing lists, the general mailing list alone comprises 222,000 names, classified and subdivided. These lists may be combined in any manner desired, so that the persons whose names appear thereon receive such publications as are likely to interest them and no other, thus making for economy in distribution. The names comprising the general list are obtained in various ways, but chiefly through the distribution of return postcards, by means of which the applicant signifies his desire to be placed on the list for such classes of publications as he may specify.

It was formerly the practice to send to each person on the list all publications of the class in which he had indicated interest. For reasons of economy, however, it has been found necessary to reduce the supply of bulletins very materially, and the

12 GEORGE V, A. 1922

majority of the department's publications are now sent only on special request. The fact that a person's name is on the mailing list for a certain class of publications will not insure his being sent all publications of that class, but only those that are published in such quantities as to be available for general distribution.

This change of policy, which was determined upon by the Government Editorial Board, while working in the direction of economy, has led recently to a good deal of unavoidable misunderstanding and complaint on the part of persons who assumed that everything would be sent them as a matter of course when once their name was on the list. To meet the situation the branch now sends out with *Seasonable Hints*—a periodical that goes to everybody on the addressing list—a circular giving the titles of such publications as are available only on request.

In order to meet the requirements of the Editorial Committee as to list revision, the branch is now issuing a circular to all persons appearing on the general mailing list, requiring them to notify the branch if they desire to continue to receive the department's publications. The names of those who do not respond will be dropped. The task of revision, in order to avoid complete disorganization of the system, will require about a year to accomplish. It is anticipated that with the curtailment in the lists, which will necessarily follow revision, a greater number of publications can be sent to those whose names are retained than has been the case in the immediate past. So far as *Seasonable Hints* is concerned, the list will remain intact, and will constitute a medium for reaching, when necessary, every one of the 250,000 names appearing thereon.

Another list is known as the "Special General." It includes members of Parliament, members of the legislative assemblies, newspapers, consuls, libraries, and the principal officials of the Dominion Department and of the Provincial Departments of Agriculture. To the 3,250 names appearing on this list is sent everything issued by the department. There are also lists of agricultural college officials, agricultural representatives, secretaries of agricultural societies, United States agricultural officials, and of persons, newspapers, and institutions, both Canadian and foreign, who have expressed a desire to receive the publications of the department.

A number of branches of the department have compiled special lists of their own of persons and organizations who are interested in technical publications, regulations issued under Acts of Parliament, circulars to importers, exporters, produce dealers, and drovers; news letters, market reports and similar communications. Material of this kind is despatched by the branch as required.

The day-to-day requests for publications, in English and in French, are numerous and require to receive special and prompt attention. They often include requests that have to be referred to other departments of the Dominion Government, and sometimes to Provincial Government departments. In order to meet them satisfactorily, discrimination and experience is called for on the part of those in charge of the work.

During the past five years, the Publications Branch has distributed upwards of 13,000,000 copies of publications of various kinds, with the object of placing in the hands of those interested the results of the work carried on by the department in the interest of the agricultural industry. In the year 1920, 2,262,850 copies of publications were distributed, of which some 410,175 were sent out in response to direct request. Under the changed procedure indicated above, the number of special requests will without doubt become far more numerous than in the past.

The addressing work is done automatically by machinery from embossed name and address plates, with the exception of the special request addressing, which is necessarily done by hand. The address plates are made by the branch. The folding of circulars and the sealing of envelopes is also now being performed by machinery, but not the filling of envelopes—a work involving considerable labour where a large edition like that of *Seasonable Hints* has to be despatched in a comparatively short period of time.

SESSIONAL PAPER No. 15

The following table shows the number and character of the publications issued during the past twelve months:—

Reports..	15,719
Bulletins..	234,314
"Seasonable Hints"..	712,911
Pamphlets..	117,629
Circulars..	168,155
Leaflets..	27,058
Announcements, application, mailing list cards, posters, etc..	922,316
The <i>Agricultural Gazette</i>	64,748
Total..	2,262,850

THE AGRICULTURAL GAZETTE

The publication of the *Agricultural Gazette of Canada* was begun seven years ago in response to a demand for more widespread information in regard to the work being carried on by the Departments of Agriculture. Its pages are not limited to Dominion work alone but are equally at the disposal of provincial Departments of Agriculture, and also of education, in so far as the work of the latter relates to agriculture. It is not intended that this magazine shall cover the sphere of technical work nor, to any extent, of applied agriculture, so that in no sense does it intrude upon the field of the agricultural press. It is published both in English and in French. No payment is made for contributions.

In addition to giving a more extended publicity to governmental work on behalf of agriculture, the *Gazette* was originated with the object of keeping agricultural workers informed as to what was under way in other provinces and to acquaint them with the methods adopted elsewhere, thus enabling them to keep in touch with the progress being made in this field of endeavour. These objects are of great importance to the agricultural industry, and the response on the part of Dominion and provincial officials has in the main been very gratifying, and by degrees more are coming to realize the opportunity that this periodical places at their disposal for advertising their work before the public and for creating wider popular appreciation of the various forms of endeavour engaging their attention. The knowledge on the part of the public, and also of the farmers themselves, of the work carried on in the fields of experiment, research, investigation, and demonstration by Government institutions is for the most part very limited, and one of the leading objects of the *Gazette* was to secure greater recognition and appreciation of these endeavours, and a fuller realization of what they signify to the country's welfare. The *Gazette* is also the medium through which publicity is given to the agricultural information and statistics issued by the International Institute of Agriculture.

Beginning with the first of January, 1920, the *Gazette* was made a bi-monthly instead of a monthly publication. It is not intended for general distribution, but is sent free only to members of Parliament, Dominion and Provincial, to the newspaper and agricultural press, to agricultural officials, provincial educational officials and teachers of agriculture, to school and college and other libraries, technical agricultural workers and to persons who act as crop correspondents for the Agricultural Statistical Branch of the Department of Trade and Commerce. There is a foreign exchange list, and a small list of paid subscribers. The *Gazette* mailing list comprises, all told, some 7,650 names.

Early in 1921 the branch took up new quarters at 70 Queen street, where better facilities are offered for the efficient performance of the work.

12 GEORGE V, A. 1922

THE AGRICULTURAL INSTRUCTION ACT BRANCH

The Agricultural Instruction Act, 1913, provided for the payment to the provinces of the sum of ten million dollars in a period of ten years for the purpose of aiding and advancing the farming industry of Canada. The allotment, by provinces, for the fiscal year 1920-21 was as follows:—

Ontario.. . . .	\$336,303 26
Quebec.. . . .	271,113 76
Manitoba.. . . .	77,113 11
Saskatchewan.. . . .	81,728 48
Alberta.. . . .	66,965 62
British Columbia.. . . .	69,199 06
Nova Scotia.. . . .	81,716 69
New Brunswick.. . . .	64,110 80
Prince Edward Island.. . . .	31,749 22
Veterinary Colleges.. . . .	22,000 00
	<hr/>
	\$1,100,000 00

The grant is intended to supplement provincial appropriations and is made with a view to enabling the provinces, by means of the additional funds thus placed at their disposal, to finance and carry out instructional efforts in the interest of agriculture in a more extended and comprehensive manner than would otherwise be possible.

The Act is designed to promote a knowledge of better farming methods, to promote rural welfare, to encourage agricultural education in elementary and other schools, and to assist colleges and schools of agriculture, and schools of veterinary science.

The projects on which the grant may be expended are left to the provinces to determine in accordance with their individual needs. Great latitude is allowed by the Act as to the undertakings to receive assistance, and these are many and varied, but by means of agreements made each year between the governments of the provinces and the Dominion, the Federal Minister of Agriculture exercises a measure of control as to the nature of the work performed, and observes that it is designed to carry out the objects and purposes which the Act has in view.

INSTRUCTION AND DEMONSTRATION •

An important phase of agricultural instruction work contemplates the conveyance of up-to-date information to adults as to the best methods and practices connected with farming. All practical forms of extension and demonstration are contemplated under this head. The leading Instruction and Demonstration activities of the year included the following:—

Assistance to the Agricultural Representative System.—During the year about 100 local representatives of provincial departments of agriculture carried on extension work in farming communities;

Promotion of Co-operation and Marketing;

Horticultural Demonstrations;

Instruction in live stock, dairying, poultry and bee-keeping;

Instruction in field husbandry, including crop competitions, demonstration plots, weed control and seed production;

Demonstrations with Soils and Fertilizers, Underdrainage demonstrations;

Short Courses; Demonstration Trains.

SESSIONAL PAPER No. 15

ASSISTANCE TO WOMEN'S INSTITUTES

Women's Institutes were designed to promote a more congenial environment for rural women and to improve the conditions of home and social life in the country. They constitute a medium for conveying instruction in household science and the domestic arts—cooking, nutrition, dressmaking, home-nursing, sanitation, and community welfare in general. In all the provinces, with the exception of Ontario and Quebec, the cost of the work is met entirely from the grant.

AGRICULTURAL EDUCATION

A very important phase of the work carried on under the Act has to do with the education of country youth. It presents two aspects, the scholastic and the vocational. In order to bring the scholastic aspect more into line with country environment, elementary agricultural teaching was introduced. The concomitants of this movement are the school and home gardens, the home project, boys' and girls' club work, and the school fair. Since the Act became effective practically all the provinces have made notable progress in these undertakings, and in their development the grant has liberally assisted.

BOYS' AND GIRLS' CLUBS AND SCHOOL FAIRS

Organizations of this character are now general in most of the provinces, and probably no other form of agricultural instruction brings more satisfying results as that carried on through such mediums. During the year nearly 100,000 children attended the Ontario School Fairs. In Quebec the total number of scholars taking part in gardening was 27,350. In Manitoba 26,500 boys and girls were enrolled in the club movement.

COLLEGES AND SCHOOLS OF AGRICULTURE

The development of the vocational phase includes the increased efficiency of Colleges of Agriculture and the provision in certain provinces of vocational agricultural schools of less than college grade, which lead directly to the farm. Since 1912, almost \$2,000,000 has been expended in the form of grants to agricultural colleges and in providing and maintaining district agricultural schools. The grant has enabled the colleges to enlarge their capacity, strengthen their staff, add to their equipment, and to finance extension work. The agricultural schools of Alberta are maintained largely by the grant, while the Kemptville School in Ontario is being established and maintained entirely from this source. During the year, an agricultural school was instituted at Charlottetown, Prince Edward Island, which is being assisted from the grant. The institution of special courses and departments in recognized high schools, while not perhaps vocational in the more restricted sense, bears a relationship to the movement for the extension of adequate educational opportunities appropriate to country life to all country boys and girls. This endeavour the grant facilitates, and its achievement gives promise of permanent benefit to agriculture and to those who look to it as a means of livelihood.

THE INTERNATIONAL INSTITUTE BRANCH

The commissioner was delegated to attend the meetings of the Fifth General Assembly of the International Institute of Agriculture, held at Rome, November 3-11, 1920. One hundred and fifteen delegates, representing forty-eight out of the sixty adhering Governments, were in attendance, comprising practically all the European countries except Austria and Turkey. Great Britain and Ireland had seven representatives, including the leading officials of the Boards of Agriculture of England, Scotland and Ireland.

12 GEORGE V, A. 1922

The proceedings were opened by His Majesty, the King of Italy, who took occasion to have it announced that, in addition to his gift of \$60,000 annually, he had decided to make a donation of one and one-half million lire from the resources of his private estates, for the purpose of further extending and improving the Institute Palace.

Owing to the rise in the cost of printing and of the staff, the Assembly decided to ask the adhering Governments to make a supplementary contribution for the years 1921 and 1922, equal to one and one-half times the ordinary contribution, and payable by each country in its own money on the basis of the par value of the franc.

The chief new recommendations of the Assembly, which are referred to in fuller detail in the Canadian delegate's report (appendix No. 1), are, in addition to insistence on the fulfilment of various earlier decisions, enumerated as follows: That there be established a system of continuous correspondence between the Governments and the Institute in the form of a special bureau on the lines of the Canadian office. That tea be added to the products to be reported upon regularly. That there be conducted an inquiry into the methods adopted during and following the war for the purpose of increasing agricultural production. That agricultural attachés be appointed in countries between which there is a considerable agricultural trade. That there be appointed in each country a Permanent Committee of Agricultural Meteorology, also a Central Bureau of Agricultural Accountancy. That Professor Eriksson's plan for the creation of an International Research Institute of Plant Pathology be proceeded with. That the Governments provide scholarships to enable agricultural students to complete their studies at the Institute; that they, moreover, establish a Consultative Committee of agricultural specialists to co-operate more directly with the Institute. That greater extension be given to the translations of Institute publications, especially into English, and that there be substituted for the metric system of figures expressions of area and capacity more easily understood in that language. That the Assembly's lengthy debate on the agricultural labour problem, about to be presented to the Geneva Labour Conference, be sent to the various Governments as a protest against possible action by town delegates ignorant of agricultural conditions. That the Institute heartily co-operate with the League of Nations while retaining its own autonomy. That the various Governments declare their formal adherence to the International Conventions on Plant Pathology and for the organization of control of grasshoppers.

The statistical work of the branch was carried out as usual during the year. Reviews of the world's food supply with special reference to wheat were published in the *Agricultural Gazette* under the following titles: "The World's Wheat Prospects for 1920-21;" "The Crops of 1920—World's Wheat and Livestock Situation." The latter article included detailed figures of the numbers of livestock in the different countries before the war and on the most recent date for which official estimates were available.

Statistical information on the world's crops and live stock, trade in agricultural products, prices, etc., was also furnished to a large number of correspondents both in Canada and in foreign countries.

The Institute Statistical Bulletin has been made much more valuable to Canadian readers by the fact that the data for area and production in the English edition are now given in acres and centals, instead as formerly in hectares and quintals.

The International Year Book of Agricultural Statistics for 1917-18 was published in the fall of 1920. It is a large volume of 700 pages containing the most complete existing series of statistical data connected with agriculture for almost all countries. This is the last world year book to deal with the states according to the political frontiers of pre-war times. Future issues will deal with the countries as newly constituted.

SESSIONAL PAPER No. 15

The "International Review of the Science and Practice of Agriculture" and the "International Review of Agricultural Economics" were received and distributed as usual. The articles in these bulletins of interest to Canadian readers were published generally in summarized form in Part V of the *Agricultural Gazette*. Much of the information sought by correspondents, including material for extensive studies on agricultural co-operation and co-operative credit, was furnished from these Bulletins and by reference to the original documents, summaries of which are published in the bulletins. Nearly all the original documents are received in the library of the branch.

The ninth volume of the International Year Book of Agricultural Legislation was published. It contains information of considerable interest inasmuch as it gives an account of the measures adopted in many countries for coping with problems of the transition period from a state of war to one of peace.

There is a strong movement among the English speaking delegates to the Institute to have future issues of the Year Book translated into English. At present only the analytical index is translated. Under a new arrangement advance sheets of important laws are being printed and distributed shortly after their enactment.

The Institute, as usual, was kept informed concerning Canadian agriculture. Monographs were furnished on the extent, composition and product of the forests of Canada, book-keeping among farmers in Canada, and agricultural credit in the different Provinces.

The Library.—During the year 1,345 bound volumes were added to the library, making a total of 8,978. The total number of pamphlets received was 10,692. An average of 1,050 periodicals was received every month. These include all the periodicals covered by the "Agricultural Index". There are now over 215,000 cards in the catalogue.

As will be seen from the following table, a large number of persons availed themselves of the library to borrow books:—

	Number of Borrowers.	Number of books Borrowed.
Department of Agriculture (Ottawa)	80	752
Ottawa, except Department of Agriculture	115	1,009
Ontario, exclusive of Ottawa	67	330
Prince Edward Island	6	21
Nova Scotia	7	24
New Brunswick	9	32
Alberta	16	65
British Columbia	29	111
Saskatchewan	16	121
Manitoba	17	58
Quebec	50	222
United States	3	9
Total	415	2,754

During the course of the year bibliographies were prepared on the following subjects: agricultural credit, electro-horticulture, genus *Brassica*, mosaic diseases, potato scab, marketing of wheat, smooth awned barley, fruit growing and marketing, flax in Canada, apple disease and history, effect of freezing on immature grains, co-operation, condensed milk, history of economic plants, roses—culture and diseases, strawberries, culture and diseases, oats, culture and diseases, water requirements of crops, etc.

The whole respectfully submitted.

S. F. TOLMIE,

Minister of Agriculture.

APPENDIX No. 1

INTERNATIONAL CONFERENCE FOR THE ORGANIZATION OF THE
CONTROL OF GRASSHOPPERS, ROME, OCTOBER 28-31, 1920

This International Conference was held at the Palace of the International Institute of Agriculture shortly before the opening of the meetings of the General Assembly of the International Institute of Agriculture. Thirty-six delegates, representing twenty-five countries, were in attendance, under the Presidency of Hon. Senator Professor Battista Grassi, of Italy; Vice Presidents: Messrs. Julio J. Bolla, of Argentina, F. B. Y. Sevilla, of Spain, M. Lesage, of France, Sir Thomas H. Elliott, Bart., K.C.B., of Great Britain; Reporting Secretary: Mr. Louis Dop, of France, Vice President of the International Institute of Agriculture. The other British delegates were Mr. Gilbert Storey, of Egypt, and Mr. T. K. Doherty of Canada.

The proceedings were opened by His Excellency Dr. Micheli, the Italian Minister of Agriculture and the Italian Secretary of State for Foreign Affairs, under the provisional Presidency of the Hon. Edouardo Pantano, ex-Minister, and President of the International Institute of Agriculture.

The earlier basis for the discussions of the Conference was the well considered monograph prepared by the Institute a few years ago at the request of the Italian dependency of Erythrea, and later the initiative of the French Protectorate of Morocco in requesting the Institute to convoke an International Conference. The French and Italian Governments in full accord charged the Institute with the task of convocation. All the preliminaries of the Conference had been conducted by Mr. Louis Dop, whose detailed report and well directed activities during the Conference rendered the task of the delegates comparatively light. Inspiration was also derived from the International Conventions already in existence affecting certain groups of countries, and especially the Convention of Pretoria for the Union of South Africa, which was eminently successful, and the Conventions of Montevideo, Uruguay, for South America, which has been particularly concerned with the original sources of the invasions.

After three days' discussion the text of the Convention was agreed upon on October 31st, and signed by delegates vested with full powers, and those believing themselves vested with full power in virtue of their appointments as delegates, or in possession of a telegram conferring full powers. Declarations that they had not the authority to sign were made by the delegates for Great Britain, Canada, Spain, and Greece. The Convention was signed by the representatives of nineteen countries, namely: Argentina, Bulgaria, Cuba, France, Africa, Algeria, Indo-China, Madagascar, Morocco, Tunis, Hungary, Italy, Erythrea, Italian Somalia, Tripolitania, Cyrenaica, Mexico, Uruguay, Kingdom of the Serbo-Croato-Slovenes.

The nature of the Convention intended for universal application is quite general. It limits its activities to the theoretical side of the question. For the realization of the practical side there would be established sub-conventions for each kind of grasshopper between the different States which suffer from the pest, each of the sub-conventions having for the organization of its campaigns one or more general centres or headquarters, chosen within the limits of the territories interested. The Rome Convention provides means for the general centralization and exchange of information which would serve for all the organized groups.

SESSIONAL PAPER No. 15

The following is a free translation from the French text of the Convention of October 31, 1920.

The undersigned plenipotentiaries of the Governments hereunder enumerated, being assembled in conference at Rome at the Palace of the International Institute of Agriculture, are agreed in the following dispositions:

Art. 1. The contracting States engage to take the necessary measures for the purpose of combating the grasshoppers susceptible of injuring the crops of the neighbouring States, signatories of the present Convention.

Art. 2. They are to take all useful dispositions to protect by the most rapid means possible the neighbouring adhering States against the movements of grasshoppers contemplated in Article 1.

Art. 3. They may, in their mutual interests, conclude particular agreements with a view to the adoption of common measures for the purpose of facilitating the control of the grasshoppers.

Art. 4. They recognize from the signing of the present Convention the International Institute of Agriculture at Rome as the international official centre of documentation and vulgarization in respect to all questions having reference to the control of grasshoppers. They engage to furnish it at least once a year, and oftener if the circumstances require it, with all the information of a technical, scientific, legislative and administrative order collected on the question by competent persons. The Institute will give to this information the widest and most rapid publicity.

Art. 5. Every proposal emanating from a contracting State and having for its object the modification of the present Convention shall be communicated by that State to the Institute and presented by the latter to a meeting of the delegates of the contracting parties, which shall be convoked at Rome by the Institute on the occasion of the General Assembly of that institution. The proposals made by the delegates shall afterwards be submitted to the approval of the States which have adhered to the Convention.

Art. 6. The present Convention shall be signed and ratified as soon as possible, and the Convention shall be deposited with the Italian Government as soon as three at least of the contracting States are in a position to do so. Every ratification shall be communicated by the Italian Government to the other contracting States as well as to the International Institute of Agriculture.

Art. 7. Every State, Dominion or Colony which freely governs itself and which has not signed the present Convention, is, on its own application, admitted to adhere to it. The Colonies on the application of the States of which they are dependencies may equally be admitted to adhere to it on the same conditions as the independent States.

Art. 8. Adherence will be notified through diplomatic channels to the Italian Government and by the latter to the contracting Governments as well as to the Institute.

Art. 9. The present Convention shall enter into force for at least the first three States that shall have ratified it within a delay of three months reckoned from the date of ratification, for the other States, within a delay of six months, in accordance with the deposit with the Italian Government of their ratification and of their adherence.

12 GEORGE V, A. 1922

In faith of which the plenipotentiaries whose powers have been recognized in good and due form have signed the present Convention.

Executed at Rome, October 31, 1920, is a single copy, which shall be deposited at the Ministry of Foreign Affairs of Italy and of which properly certified copies shall be delivered to all the States adhering to the present Convention.

Immediately after the close of the formal proceedings the delegates for Egypt, Tripolitania, Tunisia, Algeria, Morocco and French Western Africa, proceeded under the Presidency of Mr. Louis Dop, in virtue of Article 3 of the Rome Convention to establish an organization for North Africa. An agreement was reached and signed, having for its general object the collection of useful information on the flights of grasshoppers in these territories for the purpose of investigating whether there exists permanent breeding zones and, in a general manner, for the purpose of securing the most precise data possible on the natural laws in accordance with which invasions occur, and of determining thereafter the measures to be adopted for an effective campaign. A definite organization to that end was effected and is contained in six short articles which may be resumed as follows: Establishment of a Central Service (Algiers). Local fixed observers and travelling observers to report on model forms flights of insects, the first flights to be telegraphed. Flight maps prepared at Central Bureau and addressed to interested regions the first and 14th of each month. Local biological studies undertaken and results communicated to the Central Bureau, then forwarded to all interested, together with the results of the Central Bureau's own work. These various dispositions to be taken promptly in compliance with Article 2 of the Rome Convention.

FINANCIAL STATEMENTS.—Statements, by Provinces, of the Expenditure of the Grant of 1920-21	27

REPORT
ON THE
AGRICULTURAL INSTRUCTION ACT
FOR THE FISCAL YEAR 1920-21

Tabled in pursuance of Section 8 of the above-named Act

ALLOCATION

The allocation of the grant made to the provinces of Canada for the fiscal year ending March 31, 1921, under the Agricultural Instruction Act was as follows:—

PRINCE EDWARD ISLAND

1. Agricultural buildings—equipment and maintenance.. . . .	\$ 1,507 00
2. Director and agricultural representatives.. . . .	3,235 00
3. Short courses.. . . .	246 00
4. Drainage, soils and crops.. . . .	7,968 00
5. Live stock and dairying.. . . .	2,056 00
6. Poultry, horticulture, bee-keeping and co-operative marketing	855 00
7. Women's institutes.. . . .	2,566 00
8. Agricultural instruction in public and high schools, training of teachers, allowances, grants, maintenance of Rural Science Department, Prince of Wales College.. . . .	12,806 00
9. Contingencies and miscellaneous.. . . .	510 22
	<hr/>
	\$31,749 22

NOVA SCOTIA

COLLEGE OF AGRICULTURE

1. Science building—Interest and Sinking Fund.. . . .	\$ 8,000 00
2. Salaries and maintenance.. . . .	23,000 00

INSTRUCTION AND DEMONSTRATION

3. Agricultural representatives.. . . .	12,000 00
4. Short courses.. . . .	1,000 00
5. Dairying.. . . .	5,500 00
6. Poultry.. . . .	1,500 00
7. Bee-keeping.. . . .	500 00
8. Drainage and soil survey.. . . .	1,800 00
9. Soils and fertilizers.. . . .	1,500 00
10. Field crops.. . . .	1,200 00
11. Fruit growing.. . . .	1,000 00
12. Women's work.. . . .	4,000 00
13. Entomological work.. . . .	7,500 00

ELEMENTARY AGRICULTURAL EDUCATION

PRINCE EDWARD ISLAND

Drainage Soils and Crops.—In an effort to arouse interest in the growing of clover seed, two hundred visits were made to farmers and, as a result, about one hundred and twenty-five men each undertook to grow half an acre of clover for this purpose. It was felt that the interest manifested justified the department in purchasing two hullers for demonstration purposes.

The drainage operations, which were started in 1917 and proceeded during succeeding years, were continued until a shortage of drainage tile halted the work of the traction ditcher. All revenue from under-drainage operations is placed to the credit of the grant.

SESSIONAL PAPER No. 15a

The work to promote the use of pulverized limestone was well received. A quarry of suitable limestone was located, a pulverizer was purchased and operated, and the product distributed among the farmers. A reduction was secured from the railways on carload lots of limestone. This is encouraging the more general use of limestone for fertilizing purposes, and will greatly assist the department's efforts.

Live Stock and Dairying.—A competition among dairymen to promote interest in the improvement of herds was carried out during the year. Inspection and instruction were continued among the twenty-six cheese factories and five creameries in operation.

A dairy short course was held in connection with the Agricultural and Technical School, Charlottetown, the first week being devoted to instruction for cheesemakers and the second week for buttermakers. Fifteen of the former and eighteen of the latter attended, and the course was well received. A dairy class-room was permanently equipped at the school for dairy instruction work and is available for the use of the general students as well as for the short courses.

Short Courses.—In addition to the dairy and domestic science short courses, a general agricultural short course of two weeks' duration was held in connection with the Agricultural and Technical School. The average attendance was forty-four students at all classes, which included such subjects as live stock, field crops, motor mechanics, poultry, dairying and bee-keeping.

Co-operative Marketing.—A co-operative organization of potato growers was established for the purpose of supplying disease-free seed. Efforts were continued to encourage the co-operative marketing of lambs, and assistance was given in the co-operative sale of wool.

Women's Institutes.—Two domestic science short courses of two weeks' duration were held. Other work includes attendance at meetings of institutes, giving demonstrations and judging at school fairs, as well as teaching regular classes at the domestic science kitchen.

Elementary Agricultural Education.—Forty-four school fairs were conducted during the month of September, and in every case gave evidence of an increased interest in the work. The formation of Boys' and Girls' Clubs in a majority of the school centres added much to the interest in agricultural work, particularly in poultry-keeping. Over three thousand day-old chicks were delivered. Twenty Pig Clubs were organized and did excellent work in promoting an interest in live stock.

The Rural Science Department, Prince of Wales College, was re-established for the purpose of instructing teachers-in-training.

Technical and Agricultural School.—The opening on December 3, 1920, at Charlottetown of the Provincial Agricultural and Technical School marked the inauguration of a new departure in the educational system of Prince Edward Island. The school was officially opened by His Honour Lieutenant-Governor McKinnon, who, in a short address, declared that a more necessary institution could not have been started in the province. Principal Vernon Crockett occupied the chair, and short addresses were given by Premier Bell, Professor L. W. Gill, Director of Technical Education for the Dominion, Hon. W. M. Lea, Commissioner of Agriculture, and Mr. R. H. Rogers, Chief Superintendent of Education.

The school occupies the building formerly known as the Rena McLean Memorial Hospital. Immediately attached is an area of twenty-five acres of land, while the Dominion Experimental Station is within a few minutes' walk of the institution.

The school is primarily for the education of farmers' sons over fourteen who intend to remain on the farm, but is suitable for farmers of any age. There are no

12 GEORGE V, A. 1922

tuition fees nor will an entrance qualification test be required. Special attention will be given to boys whose educational attainments are deficient. The course covers two winter periods of twenty weeks each and has been formulated with the following objects in view:—

1. To give the largest amount of information and training in practical farming in the shortest possible time.
2. To train the farmer how to solve his own problems and increase his net returns.
3. To unfold to him the many opportunities on the farm and the possibilities of rural life.
4. To stimulate him for the filling of a more useful place in the social and economic life of the community.

The subjects to be taken up are farm animals, crops and fertilizers, farm machinery and engineering, commercial English, dairying, farm management, civics, horticulture, poultry, commercial arithmetic, farm economics, woodworking, and black-smithing.

In addition to the regular course, special lectures are given by members of the staff of the provincial Department of Agriculture. The superintendent of the Experimental Farm and his staff will conduct demonstrations.

Although the only existing course not directly connected with farming is wireless telegraphy, it is hoped that the school will develop into a general agricultural and technical institution, and ample provision has been made for expansion.

The institution will be financed jointly by the Dominion and Provincial Governments. The province will provide one-third of the cost, while the remaining two-thirds will be met from the grants made to the province under *The Technical Education Act* and *The Agricultural Instruction Act*.

NOVA SCOTIA

The Agricultural College.—When aid to agricultural instruction was first extended to the provinces, it was agreed that a share of the grant should be devoted to salaries and maintenance at the Agricultural College, Truro. The claim of this institution was strengthened by the fact that the college was interprovincial in character. It was definitely understood at that time that the grant made by the province should not be reduced because of Dominion assistance. That this undertaking continues to be observed is evidenced by the fact that for the provincial fiscal year ending September 30, 1919, \$39,000 was granted to the college from provincial funds, whereas, for 1920, the amount was \$52,700.

It was further agreed that the cost of the Science building should be met from the grant, and each year the allotment for that purpose is charged with interest on the unpaid balance, while the remainder goes to reduce capital indebtedness. This building is essential to the institution, providing class-rooms and laboratories for the chemical and zoological departments as well as facilities for the women's short courses.

Agricultural Representatives.—The employment of regular agricultural representatives was temporarily discontinued except in two districts, Antigonish and Inverness, Richmond and Victoria. The department found difficulty in securing properly qualified men at the salary offered and therefore decided to employ seasonal men who were specialists in certain lines of work in a number of counties. Two men were placed at Cape Breton, one to promote co-operative dairying, and the other to demonstrate sheep dipping. In Yarmouth county a demonstrator in potato spraying

SESSIONAL PAPER No. 15a

and dusting was employed, who also organized a potato growing competition in which spraying was a condition of the contest. Experiments as to the relative merits of spraying and dusting for the control of potato blight were also carried on. Five men were employed in the province generally to carry on sheep propaganda, including assistance in the co-operative marketing of wool.

Short Courses.—During the first two weeks of January, a successful short course for farmers and farmers' sons was conducted at the Agricultural College, with 95 enrolled students. At the same time a short course for women was conducted with 29 students enrolled. Following the women's course, a week's course in home economics was provided for soldiers' wives, the attendance being 45. The special course for ex-service men, begun in October, 1918, was continued, although the present course is likely to be the last.

Local courses were held at four of the points where buildings have been provided for this purpose, and also to serve as community halls, namely at Lawrencetown, Yarmouth, Musquodoboit and Stewiacke. Attendance, 75 to 150. The instructors were members of the staff of the college assisted by Dominion officials. There are now in Nova Scotia seven buildings of this character, the cost of which was defrayed in part by the grant, although in each case the community made a substantial contribution. The average amount allowed from the grant was about \$1,200.

An effective feature of the short courses was the employment of motion picture films made in Nova Scotia. Films on cream grading, co-operative wool selling, poultry keeping, and the growing of oats, peas and vetches for silage were used and proved of greater educational value than those from outside sources.

Dairying.—The creation of the Dairy Division of the Nova Scotia Department of Agriculture was concurrent with the receipt of the first Agricultural Instruction grant, and with the exception of half the superintendent's salary all expenses are paid out of that grant, including the railway fares of delegates in attendance at the annual dairy convention.

Field Crop Demonstrations.—Some excellent work was done during the year in encouraging clover seed growing, in promoting registered seed oat production, and in providing a special competition in potato growing. Demonstrations with the clover-huller were continued.

Women's Institutes.—The work of this branch in organizing institutes, addressing meetings, and conducting short courses was aggressively carried on during the year. The annual convention was held at Truro in June, and in July a short course for young girls was conducted at the college. The January short courses in home economics have already been referred to. All the expenses in connection with the Women's Institute system of this province, as well as those incurred in connection with the instruction classes are met by the grant.

Entomological Work.—Special investigations for the control of insects injurious to vegetable crops are being carried on under the direction of the provincial entomologist, including the cabbage maggot, carrot rust fly, onion maggot, pea moth, and the potato beetle. The experiments with the cabbage maggot yielded most gratifying results. The value of corrosive sublimate has been confirmed, in agreement with the experiments conducted at Ottawa, Guelph, and Vernon, B.C. Experiments have resulted in the discovery of other remedies which appear to be superior to those used hitherto. Among them is a cresote dust, prepared at a merely nominal cost. The brown-tail moth appears to be well under control.

Apiary Inspection.—The districts in which foul brood was formerly found to exist were reinspected during the year without any trace of the disease being discovered. Instruction and inspection in modern methods of bee-keeping was continued.

RURAL SCIENCE WORK

The 1920 session of the Summer School of Science was in many ways the best yet held. The community or social centre idea was exemplified by the transformation of a room in the Normal College into a community hall, and the success met with tended to show that one of the needs of young people everywhere is a social centre of this kind. The enrolment was 108; of this number 19 were awarded diplomas, 46 one-year certificates.

School Fairs.—The number of school fairs held was 315, in which 240 schools took part. During the winter months the special training to teachers who are taking their course at the provincial Normal College occupies most attention. The Director of Rural Education, Mr. L. A. DeWolfe, is convinced of the necessity of still greater efforts being spent in this direction, as the success of rural science teaching depends largely on teaching qualifications. He is of the opinion that the outlook is encouraging, and that more effective work generally is being accomplished.

NEW BRUNSWICK

The funds provided under the Agricultural Instruction Act are used in connection with provincial funds for carrying on the general work of the several divisions of the provincial Department of Agriculture.

Agricultural Representative Division.—For this work the province is divided into four groups of counties with a representative for each. The details of the work vary in each district, but in each case assistance is given in carrying on the extension activities undertaken by the department, including sheep and wool demonstrations, field crop and acre profit competitions, the organization of cow-testing associations, and the formation of clubs for the purchase of pure-bred sires. Other activities included judging at seed fairs, assistance to the Farm Settlement Board, and similar undertakings.

Live Stock Division.—The work assisted included demonstrations in sheep husbandry, co-operative wool marketing, stallion inspection, and Boys' Pig Clubs. Twenty-two of these clubs were in operation. They are financed from outside sources but are supervised by the department.

Soils and Crops Division.—The work assisted by the grant in this division included (1) operating a clover-huller; (2) underdrainage surveys and traction ditcher demonstrations; (3) encouragement of the use of pulverized limestone for the liming of soils; (4) conducting experimental plots to popularize the ensiling of forage crops. These plots were established in different parts of the province on farms having silos or where same were being built. Data will be secured as to cost of constructing silos of different types, as to the suitability of different crops for ensilage, and the cost of producing same. It is hoped in this way to assist dairymen in solving the problem of high cost of milk production and to promote the introduction and use of the silo.

The clover huller was at the disposal of any agricultural society or any group of five farmers having ten acres of clover hay for threshing. The machine was operated at a fixed charge per hour. Half rates for the transportation of this machine were obtained from the railway. The output was 20,000 pounds of seed.

The traction ditcher was demonstrated, and surveys were made for 28,000 feet of tile, together with plans and estimates.

SESSIONAL PAPER No. 15a

Poultry Division.—The demand for eggs and chicks is reported to have been greatly in excess of the supply obtainable from provincial sources, and importations were necessary. In all 6,586 hen eggs and 1,090 day-old chicks were distributed.

Horticultural Division.—From the third week in January to the end of March, eighty-two visits to fruit growers were made, chiefly for the purpose of giving pruning demonstrations. During the period nine counties were covered, and 4,260 trees of various ages pruned.

Short Courses.—A short course in agriculture, of ten days' duration, was held at the Vocational School, Woodstock, in January, and was followed by similar courses at Moncton and Chatham under the direction of the agricultural representatives. The instruction work was performed chiefly by the officers of the various divisions of the department. In the French-speaking districts, instructors who spoke French were provided.

The special school or course of instruction for young men in dairying was conducted with the co-operation of Nova Scotia and Prince Edward Island, as in previous years. An apple-packing school organized at one of the fruit centres by the horticulturist was well attended. Short courses in household science were conducted both in English and in French by the Women's Institute Division.

Entomological Division.—The extension work of the division is almost entirely of an educational character and is carried on in connection with the schools of the province. It consists largely of assistance to teachers and loaning demonstration material to enable them to teach nature study and elementary agriculture. The system results in a large number of specimens being sent by teachers and schools to the division for identification. Some 700 sets of nature study notes were supplied to teachers; 152 collections were loaned to schools. The lectures to teachers, students and farmers numbered 44.

Women's Institute Division.—Spring classes in cookery, sewing or millinery, and nursing were held under institute auspices at seven centres and also at five centres in the French-speaking districts. Demonstrations in the food value and practical uses of milk were given throughout the French-speaking districts similar to those conducted in other parts of the province in the year previous. A start was made in the organization of Junior Institutes, of which several were formed.

Elementary Agricultural Education Division.—An important feature of the work of the director and his assistant consists of visits to schools in connection with the organizing and inspection of home plots, school gardens, poultry clubs, and school fairs, and in giving instruction in nature and agriculture in the schools.

Seed distribution to school children comprised 4,523 lots of seed, and 1,009 dozen eggs were sent to school poultry clubs with full instructions for hatching and rearing.

A Rural Science School and Camp for teachers is held annually.

QUEBEC

Agricultural Representatives.—The number of agricultural representatives (agronomes de district) was increased during the year from 35 to 48. Special efforts were made to develop the sheep industry and many demonstrations in sheep husbandry were given. Every effort was also made to advance the dairy industry through better breeding and cow-testing. A total of 2,470 demonstrations and lectures was held, and many visits were paid to individual farmers, particularly in connection with crop and other competitions and vegetable-growing contests.

12 GEORGE V. A. 1922

Field Husbandry.—The work carried on under this division included field crop competitions, seed competitions, demonstration fields, and the production of clover seed. The field crop competitions numbered 138, and in addition a special seed competition was conducted, involving the inspection of the standing crop and later of the grain after threshing and cleaning. Nineteen such competitions were carried on and 672 farmers participated.

The demonstration fields, from one to three acres in extent, to the number of 98, were established in all parts of the province. Their object is to demonstrate improved methods of farming, including rotation of crops, root and cereal culture, and the production of clover seed. Seed and fertilizers are supplied free, and operations are supervised by the department. Clover growing for seed is on the increase in the province, and is being assisted not only by the plots referred to but also by the demonstration of clover threshers whereby clover is threshed free of charge for farmers taking up clover-growing in parishes having no thresher and where no such demonstration had been given previously. The quantity of clover seed harvested in 1919 was close to a million pounds.

The success of the movement for the production of better seed is proving highly gratifying to the officers of the department. Seed-growing centres were organized in various districts, and particularly in the districts of Ste-Rosalie and Berthier. All the seed plots were carefully inspected by the provincial officer in charge of the work, accompanied by the secretary of the Canadian Seed Growers' Association. The Ste-Rosalie centre comprised 27 farmers, with an estimated output of 20,000 bushels of Banner oat seed.

During the summer a survey was made of the Lake St. John district by officers of the provincial department, with the assistance of the Dominion Cerealists, with a view of organizing the farmers for the growing and marketing of pure seed. The farmers of this district have always experienced great difficulty in procuring good seed of suitable varieties, and a solution of the question was urgent. As an outcome, the building of a warehouse was entrusted to the Ste-Rosalie Co-operative Association, with the understanding that the department is to assist in the work of organizing.

A station for the selection and multiplication of elite seed was established at Ste-Rosalie as a result of the efforts of the provincial department, assisted by the Dominion officials, the Macdonald College, and the Ste-Rosalie Co-operative Association of Seed Growers. The product of this station will be propagated at the various seed-growing centres already established in the province. The Ste-Rosalie Association contributes 100 acres to the undertaking, which will be in charge of the cerealists of Macdonald College. Varieties tested at the Experimental Farms and on the college plots and proved suitable will be multiplied in this way and distributed throughout the province.

Building Plans.—The Field Husbandry Branch supplies plans for farm buildings to those applying for same. Its experts give advice on the spot on ventilation, water supply, and similar subjects.

Horticulture.—The demonstration fields operated during the year were as follows: tree fruits, 31; small fruits, 53; potatoes, 42; tobacco, 10; vegetables, 11; sugar-beets, 31; total, 178. The spring distribution of fruit trees sold to association members numbered 17,425. Strawberry plants to the number of 250,000 were procured and sold to growers at low cost. It is the intention to make the demonstration fields for small fruits centres of propaganda and plant distribution in their respective districts. No new demonstration orchards were established.

The tobacco demonstration fields were established this year for the first time. The plots were of one acre each, and variety tests are being conducted, which will continue for five years.

SESSIONAL PAPER No. 15a

The potato demonstration fields were chiefly in three counties. For each of the plots seed was supplied for planting one acre, as well as chemicals, spray pumps, and fertilizers. In this connection four provincial officers were trained in potato inspection work by the Dominion Department of Agriculture.

Insects and Plant Diseases.—The Division of Entomology consists of an entomologist and three assistants. The main endeavour is to demonstrate the value of spraying and the treatment and improvement of seed, including potatoes. Instruction in spraying, chiefly of potatoes, was undertaken in forty counties, and in addition some fifty lectures and forty demonstrations of various kinds were given.

Poultry Husbandry.—Nine travelling instructors were employed in teaching artificial incubation and brooding, and in supervising the work of the fifteen poultry stations. Four stations are equipped with incubators capable of handling from 2,500 to 10,000 eggs. The division also employed five instructors, whose work included the inspection of poultry flocks and attendance at the thirteen winter poultry fairs.

Short Courses.—Short courses in agriculture were held in fifty-five localities from January 1 to April 1, and the number of lectures and demonstrations given was 926. Short courses in housekeeping and agriculture for women were held throughout the year to the number of 1,863 in 102 different localities.

Domestic Science Schools.—The Domestic Science schools numbered 61. Financial aid is given in the form of grants, and the work is regularly inspected. In the rural domestic science schools the course includes instruction in gardening, poultry-keeping, dairying and weaving. An Agricultural Domestic Science school was established at St. Damien during the year, to which only farmers' daughters who have completed their general education are admitted. The course is one for practical farm housekeeping.

Maple Sugar.—Only one sugar-making school was operated—that is at Ste. Louise—but the number of instructors employed was increased to six, and seventy-nine demonstrations were given in nineteen counties. The provincial bureau of statistics gives the 1920 production for Quebec province as follows:—

Maple sugar manufactured.	pounds	15,615,141
Value at average selling price of 20 cents per pound.		\$3,123,028
Maple syrup manufactured.	gallons	1,449,649
Value at average selling price of \$2.50 per gallon.		\$3,624,123
Total value of sugar and syrup.		\$6,747,151

School Agriculture.—Elementary agriculture is taught in all primary schools and also in the normal schools. School gardens are organized in a large number of school municipalities, although home gardens are more general; school fairs are the outcome. Agricultural education for boys is provided at the School of Agriculture at Oka, Ste. Anne de la Pocatiere, and at Macdonald College; for girls at the superior domestic science schools at Roberval and St. Pascal.

School and Home Gardens.—The spring distribution of seed to school children was 140,000 packages. The large increase in the applications for potatoes for school gardens made it impossible to supply all applicants.

Number of schools having a garden.	218
Number of children gardeners at home and school.	31,217

School Fairs.—The fairs were very successful, judged by the number of entries and the quality and uniformity of the exhibits. As many as eight school fairs were held in some districts, the average per district being four. At one fair 140 samples of potatoes of one variety were shown. The children and their parents took a great

12 GEORGE V, A. 1922

deal of interest in the school fairs, more even than in the county fairs; in fact, no better exhibits of vegetables were seen at the regular exhibitions. After judging the products, the judges give a lecture and supply useful information on the exhibits.

MACDONALD COLLEGE

A summary is presented of the work carried on by Macdonald College under the Agricultural Instruction Act during the year.

Animal Husbandry.—An animal husbandman was employed who has charge of the college sheep work, including teaching and extension work.

Biology.—An assistant in entomology and zoology was engaged, who, in addition to teaching, undertook to make studies on several insects of economic importance.

Cereal Husbandry.—The main effort of this division was toward generalizing the use of superior varieties of crops. Assistance was also given to the general campaign carried on in the province for increasing the supply of good seed, working in co-operation with the Quebec Department of Agriculture and the Quebec Co-operative Society of Seed Producers.

Horticulture.—The distribution of vegetable and flower seeds to the children of the rural schools was continued, and lecturers and judges were provided.

Household Science Extension.—This department superintends the Quebec Women's Institutes, 55 in number. Fifty-three demonstrations were given, and a two-day convention was held at the college. The staff also assisted at the short course for soldiers' wives. In addition, one hundred and six demonstrations were given to school children during the summer months.

Poultry Husbandry.—Twelve demonstration flocks were operated and served as a partial source of hatching eggs for school fair work and as centres for the distribution of pure-bred stock. The culling of flocks and the marketing of eggs and poultry received special attention. Over seven hundred sittings of hatching eggs were distributed to school children.

Extension.—Extension work in schools was confined to four counties, owing to the provincial authorities having taken over the direction of school fairs in counties where there are agricultural representatives. One hundred schools and two thousand children took part in school fairs under Macdonald auspices. Nine fairs were successfully carried through. During the summer months the children were gathered at convenient centres and instruction was given them in household science, agriculture and nature study.

Veterinary Science.—Four courses were given to agricultural students. Veterinary science is now a major subject for intending specialists in animal husbandry. Some professional, research and extension work was also undertaken.

Summer School for Rural Improvement.—A summer school for country clergymen and others interested in rural welfare was held in the month of August, with an attendance of 74.

Short Course.—A short course in animal and cereal husbandry lasting for one week was held at the beginning of March, with a registered attendance of 28.

General.—Assistance is given to the agricultural representatives in connection with the organization of farmers' clubs, egg circles demonstrations, school fairs, and various other forms of work coming under their jurisdiction. .

SESSIONAL PAPER No. 15a

ONTARIO

Ontario Agricultural College Building.—For the past few years a portion of the grant has been set aside for the construction of a boys' dormitory in connection with the college. This building was planned and approved early in the war, but actual construction was deferred until the close of the war owing to war demands on labour and materials. In the meantime costs advanced, and the contract was let for the building at about \$145,000, apart from furnishings and other extras. The building is of stone construction, simple, but attractive. It provides accommodation for one hundred and fifty boys, and will prove a very valuable addition to the equipment of the college. It supplements the old residence, which accommodates upwards of three hundred boys. It was finished in December, 1920, and occupied for the first time. It was designated as "Mills Hall" in order to perpetuate the name of Doctor James Mills, who for twenty-five years was head of the college. This is the last of a series of buildings which have been made possible through the financial assistance of the Agricultural Instruction Act, and which have added greatly to the facilities for practical agricultural education. Other buildings erected out of these moneys include the Field Husbandry building, Poultry building, Physics building, and a substantial addition to the Chemistry building.

College Salaries and Expenses.—With this appropriation additions have been made to the staff which have greatly strengthened the teaching and research work in physics, chemistry, and dairying.

Kemptville Agricultural School.—The main work of the past year has been the addition of an Engineering building and the completion of the main building for teaching and laboratory work. Equipment was purchased for both in order to be ready for the formal opening of regular course work in the autumn of 1920. As far as teaching and general farm work are concerned, very little further capital expenditure will be necessary, but the addition of a residence for students is essential for the success of the institution in view of the impossibility of securing adequate accommodation in the village.

Kemptville Agricultural School Maintenance.—In addition to the regular farm maintenance, it was necessary to appoint a teaching staff for the term. Two permanent teachers were added to the staff on the year-round basis, and the balance of the work of instruction was given by well-qualified men who were secured only for the length of the term.

With the school thus established as a going concern it is gratifying to report that a splendid start has been made. The regular two-year course, which opened in October and continued until April, was attended by twenty-five boys from eastern Ontario farms. The course was planned along practical lines and was calculated to make those who took advantage of it better farmers. A three-weeks' course was put on during the winter months, and was attended by seventy-three boys. It is hoped another year to add courses for girls in domestic science. In addition to this work, the institution had been playing a large part as an object lesson in good farming, and a centre from which good seed and good stock are distributed. The claim has been made that this institution during the past year distributed more pure seed than any other Government institution in Canada. The seed distributed includes Banner oats, O.A.C. 21 barley, Arthur peas, Huron wheat, and sweet clover. Some twenty-five or thirty pure-bred animals, male and female, have been distributed in the district. Both seed grain and pure-bred stock have been sold at current prices, and the distribution will have a beneficial influence on agriculture in eastern Ontario. Furthermore, the institution is developing as a real community centre. At the farm during the year

12 GEORGE V, A. 1922

there were held one pure-bred bull sale, one general sale of pure-bred stock, a ploughing match, and several field days for junior farmers. At the formal opening exercises in February there were over one thousand people present.

Agricultural Representatives.—Practically one-half of the agricultural representative work in the province was financed under this appropriation. There are now forty-eight local offices in this system in Ontario, and each office carries on a great many uniform lines of work as well as work specially adapted to local needs. Various features of this work have been reported upon in different forms from time to time, and it is therefore unnecessary to elaborate here.

Household Science Extension Work.—Under this appropriation a woman home demonstrator is carrying on work in Peel county. She occupies the same office as the agricultural representative, and works in co-operation with the agricultural representative except that her efforts are devoted to the interest of the women and girls. She has been very successful in conducting classes of girls in domestic science, and is carrying on educational work of a practical nature in the interests of better home-making.

Co-operation and Markets.—The grant maintains a branch of the department which is entirely devoted to encouraging co-operation and disseminating information on co-operative organization and marketing and community efforts of various kinds. During the past year there was considerable demand for work of this nature. Many farmers' clubs and other local marketing organizations applied for assistance and advice in methods of book-keeping and other points of business management. A large number of new companies were formed, and their applications for incorporation were inspected and reviewed by this branch. There was also a big demand for information on community halls which are financially assisted under provincial legislation.

Demonstrations in Vegetable Growing.—Work in the interests of the commercial vegetable-growing industry is carried on under this appropriation. A very capable vegetable specialist devotes his whole time to this work, assisted during part of the season by men who have taken up special branches. The work has been carried on along certain definite lines, namely, educational work, disease and insect control work, fertilizer experiments, and potato inspection and improvement. As to the educational work, a great many three-day short courses for vegetable growers were held during the winter at vegetable centres, and were attended by from twenty-five to forty growers. Lectures were given to all the agricultural classes, and field days were conducted during the growing season. Extensive work was carried on during the growing season in demonstrating the most effective methods of controlling cabbage maggot, onion maggot, celery blight, and pests. A number of demonstrations were also conducted in the use of commercial fertilizers. In reference to potato improvement work, the vegetable specialist co-operated with the federal officials. In all 472 acres of potatoes were inspected in northern Ontario, and 256 were placed in grade 1 and 128 in grade 2.

O.A.C. Short Courses.—Under this appropriation twenty-two farmers' sons were given a free short course of two weeks at the Ontario Agricultural College, Guelph, and fifteen boys were given a free two-weeks' short course at the Kemptville Agricultural School as the result of winning competitions in their respective counties in acre profit and live stock profit competitions. In addition considerable valuable experience in the best methods of production and in the cost of production was brought to the attention of a large number of young farmers.

Women's Institute Work.—Supplementing the regular provincial appropriation, this money was used in extending the work of instruction in home nursing, sewing,

SESSIONAL PAPER No. 15a

and domestic science carried on through the Women's Institutes of the province. Altogether 106 of these courses were held for a period of two weeks each, and 3,810 women took advantage of them for the entire course while a very large number of others were in attendance at parts of the course. Home nursing appears to be a subject on which there is the greatest demand for instruction in the rural districts at the present time.

Short Courses for Poultry Judges.—During the summer a three-days' poultry course was conducted at the Ontario Agricultural College for the men engaged in managing and judging local poultry shows. Throughout the course emphasis was placed on the importance of uniformity in methods of judging and the value of utility in poultry, and arrangements were made for show dates so that judging could be carried on with the least loss of time and the greatest amount of instruction.

Lectures on Horticulture.—In the towns and villages of the province there is a growing interest in horticulture, both as regards beautifying home surroundings and beautifying community centres. This interest was further developed by supplying speakers to give the latest information on the subject where such were asked for by horticulture societies.

Demonstrations in Growing and Handling Fruit.—The grant financed work in the Niagara district, supplementing work carried on by the Vineland Experimental Farm.

Demonstrations with Fruit and Vegetables in Northern Ontario.—Part of the farm near Fort William which was established by the Government as a prison farm has been utilized to develop hardy fruits, vegetables, and shrubs suited to the climate and soil conditions of New Ontario. This work has been financed out of the appropriation. Considerable preliminary work has been accomplished, and plans are now ready for very important developments which promise to be of much value to the district.

Horticultural Experiment Station.—Experiments in the handling and commercial use of by-products from fruits were carried on under this appropriation. War conditions interfered greatly with the original plans, and early in the year the man in charge of the work resigned to go into commercial work, and it was decided to discontinue the work in the form originally intended; consequently very little of this appropriation was used.

Demonstration Work on Soils.—This work has been interfered with considerably by death of members of the staff. The general soil survey of the province has, however, been pretty well finished and the staff is now engaged in the task of tabulating results and preparing charts and maps. In addition three demonstration plots have been established to demonstrate the treatment of different types of soil. These plots are located as follows: Wellington county, on the college farm, soil, loam; Norfolk county, near Simcoe, very light sandy soil; Welland county, near Welland, heavy clay. Some interesting and promising results have already been secured from the operation of these plots, but it is necessary to check up the results over a period of years before announcing definite conclusions.

Demonstrations in Bee-keeping.—This appropriation enabled officers of the department to extend the work of instruction in bee-keeping in various sections of the province. Instruction is particularly necessary and in demand with reference to the control of American and European foul brood as well as on the general methods of modern apiculture.

12 GEORGE V, A. 1922

Demonstrations in Corn Growing.—For the past few years some very useful work has been carried on with a view to improving and standardizing varieties and extending the use of the best varieties of corn produced in southwestern Ontario to all other parts of Ontario where corn for ensilage purposes is now grown extensively. Early in the year the corn specialist resigned, and in view of the proposal to establish a farm in southwestern Ontario in the special interest of corn, sugar-beets, beans, and tobacco, no further appointment was made. Future plans for this work will be contingent upon the final decision in regard to the farm referred to.

Drainage Work.—Shortage and high cost of labour and materials have curtailed the work of draining the farm lands of Ontario during the past year or two. Notwithstanding these factors, however, the drainage staff last year made surveys and plans for 129 farmers. In addition, courses of instruction were conducted for ditching machine operators.

Elementary Agricultural Education.—By virtue of this appropriation the Education Department has carried on a considerable portion of its programme for developing the teaching of agriculture in the public schools and high schools. Short courses for teachers, inspectors and others were, as in former years, conducted during the summer at the Ontario Agricultural College and other centres. They have all been largely attended and the work was given a genuine stimulus.

MANITOBA

In Manitoba the agriculture representatives, Women's Institutes, Boys' and Girls' Clubs, poultry extension work, and some other activities comprise what is known as the Extension Branch of the Department, and constitute the leading lines of work assisted by the Agricultural Instruction grant.

Agricultural Representatives.—On account of the war and the scarcity of qualified men, the growth of the system has been slow up to the present. Five offices were open during the year, and the representatives devoted their attention to field crop improvement, Boys' and Girls' Clubs, organization of Live Stock Clubs for the introduction of pure-bred cattle, sheep and swine, assisting agricultural societies, and judging at fairs. In some instances they acted as secretaries of rural credit societies, conducted labour bureaus and served on the boards of various local organizations. In connection with co-operative organizations, while not acting as managers, they assist in an advisory capacity. The usefulness of the representative in a case of emergency, such as the grasshopper outbreak, was clearly demonstrated. The department provides from the Dominion grant the greater part of the salary of the representative and his travelling expenses, including mileage of car when on official business; the municipality is responsible for the office and its equipment, a stenographer, and funds for carrying on the work.

Boys' and Girls' Clubs.—The importance of this work is becoming more and more evident each year. New clubs continue to be added to the already long list of those in operation. The training of demonstration teams for girls in cooking, canning and dyeing, and of cow-testing teams for boys was undertaken and the outcome was markedly successful. The employment of demonstration teams is a new means of teaching house-keeping methods. In August the teams were judged and, later, 66 girls, representing 22 communities, were given a week's trip to Winnipeg as guests of the department and of the T. Eaton Company. These teams exhibited over 600 jars of canned fruit and vegetables at the Garden Show. During the year two bulletins were issued to the clubs, and 6,000 copies of each distributed. At organiza-

SESSIONAL PAPER No. 15a

tion meetings motion-picture films are used to demonstrate interest in club work. The total number of boys and girls taking part in the movement during the year was 26,500.

The Boys' and Girls' Club Fairs held in the fall numbered 208, with an attendance of 28,000 adults and 26,000 children. Members of the Agricultural College staff and the Extension staff did the judging of the exhibits.

Women's Institutes.—Courses in dressmaking, millinery and cooking are held both in the spring and fall. The opening courses were attended by over 6,000 persons and the fall courses by over 8,000. Institute meetings are held throughout the province from November 1 to March 15, and district conventions during the summer, the department supplying speakers and demonstrators.

Poultry Work.—The work was divided into two sections: (1) Lectures and demonstrations at the Brandon Normal School, and (2) Investigating egg-marketing conditions. At the normal school the lectures dealt with the breeding, feeding and marketing of poultry, while the practical work consisted of operating an incubator, identification of breeds and candling eggs. The investigations into marketing conditions were conducted with a view to improving the prevailing system and the introduction of needed legislation dealing with the matter.

Dairying.—The work in connection with dairy instruction comprised visits to creameries and cheese factories to assist makers, the grading of butter, and addressing meetings. Many of the meetings were held in the newer districts away from the railway.

Extension Schools.—Farmers' Extension Schools, held during the winter months, dealt with the following topics: Gas-engines, live stock, field crops, dairying, and poultry keeping. Of these the gas-engine course proved the most popular, and combination courses, such as gas-engine and live stock, were not found satisfactory.

Killarney Demonstration Farm.—The object of this farm is mainly to demonstrate the possibilities of growing fruit in southwestern Manitoba, and to test the suitability of varieties for that region. An endeavour is also made to encourage the improvement of homesteads by the planting of flowers, shrubs, trees, etc. Experiments are being conducted with currants, gooseberries, strawberries, and vegetables, and also with tree fruits.

SASKATCHEWAN

The funds provided for the use of the Saskatchewan Department of Agriculture under the Agricultural Instruction Act are expended on five divisions of work in approximately equal amounts, namely: Better Farming Train, the Live Stock branch, the Field Crops branch, the Co-operative Organization branch, and the Dairy branch.

Better Farming Train.—During the year a Better Farming Train was operated under the co-operation of the College of Agriculture of the Provincial University, the Provincial Department of Education, the Canadian Pacific and Canadian National Railways. It consisted of a train of seventeen coaches, and operated over the Canadian Pacific and Canadian National lines in the northern part of the province; sixty-two points were visited, with a total attendance at the train and lectures of practically 25,000 men and women, boys and girls. The train was fully equipped as an agricultural college on wheels, with dormitory and dining hall accommodation. Four cars were devoted to live stock, one to poultry and dairy, one to agricultural engineering, one to mechanics, one to field husbandry, two lecture cars, one lantern car, one for

12 GEORGE V, A. 1922

school children, one for women's work, a nursery car, dining car, sleeping car, and accessories. The cars were equipped and staffed as far as possible from the College of Agriculture. Good specimens of utility stock were carried for demonstration purposes. One of the principal lessons taught was that of the value of the good pure-bred sire. Types of horses, cattle, sheep, swine, and poultry were selected with this purpose in mind. The field husbandry car carried samples of a great variety of crops, grain, forage, roots, and silage that can be grown successfully in Saskatchewan, and endeavoured to teach the principles that underlie successful crop production. And so with the other cars—all were equipped for teaching. Thousands of school children with their teachers and inspectors visited the train during its tour.

In July the department co-operated with the various Experimental Farms in the province to the extent of advertising and arranging for automobile and train parties to visit the farms. From four to five hundred people a day for four consecutive days visited the Scott farm from a radius around that point of from 50 to 75 miles. At the Indian Head and Rosthern farms the excursions were not quite so well patronized. In July a Better Farming Conference to discuss conditions in southwestern Saskatchewan was convened at Swift Current and attended by eminent agriculturists from the States, Western Canada, and representative farmers of that area.

Live Stock.—The portion allotted to live stock work was expended chiefly in paying entire salary and expenses of an instructor and demonstrator. This instructor is a doctor of veterinary medicine, and is well qualified to undertake educational and scientific work. A share of the expenses was also paid of two other instructors who were engaged in instructing stockmen in the production of better cattle and better sheep. Another portion was expended in defraying the expenses of a Veterinary Summer School held at the university each year.

Field Husbandry.—Under the Field Crops Branch, the salary and expenses were paid of six men in connection with inspection of standing crops of grain and potatoes eligible for registration under the regulations of the Canadian Seed Growers' Association. The plots and fields inspected, numbering 429, comprised 8,700 acres of crop. An Interprovincial Weed Special was run for two weeks in the province; two meetings a day were held and twenty-four points in the southwestern portion of the province visited. The salary and expenses were paid of three instructors on weed control who accompanied this train. A Field Crops Instruction car was operated for ten weeks in connection with the Dairy Instruction car and the salary and expenses of four instructors were paid. These men gave instructions in better farming, including best tillage methods, choice of crops, rotation, etc. Sixty points in the southwestern portion of the province were visited, covering total attendance of 12,962.

Co-operation and Marketing.—The Co-operative Organization branch continued its activities in gathering and disseminating information relative to lines of co-operative work applicable to Saskatchewan conditions. As in 1918, special attention was given to the organization of co-operative live stock marketing associations, and during 1919, 52 associations marketed 784 cars of live stock; 553,388 pounds of wool were handled, covering over 1,100 consignments. This wool was graded by representatives of the Federal Sheep and Goat Division. In the spring of 1920, the handling of Saskatchewan wool was taken over by the Canadian Co-operative Wool Growers, Limited. Co-operative horse sales were organized in 1919 and held at seven different points. An evidence of how the work is appreciated is shown in the fact that in 1920 no less than 22 sales were organized. Part salary and expenses were paid of an instructor under the Egg Marketing Act. This instructor is a specialist in this line of work.

Dairying.—The butter-grading service, under the Dairy branch, is conceded to be a very valuable educational feature among creamery men. In 1920 as in 1919,

SESSIONAL PAPER No. 15a

grading stations were operated at Saskatoon and Regina. The main result of the grading service has been a much higher and more uniform standard of good quality butter throughout the creameries, which means better marketing, and demands in turn a more satisfactory price paid to the producer. For the year 1919, 6,630 samples representing 4,234,349 pounds were scored for 38 creameries, while in 1920, 7,102 samples representing 4,749,626 pounds were scored for 44 creameries. Government grade certificates were issued covering all samples, and 21 cars were regraded for commercial use. A new feature in connection with the grading work has been the making of a moisture test, and grade certificates were refused on any churning found to contain moisture in excess of legal standard. An instructor with a knowledge of several European languages as well as English worked almost continuously among non-English settlers, holding meetings and visiting homes, giving first-hand instruction in methods of production, handling and marketing. Educational exhibits were staged at some of the large exhibitions. With the assistance of the Canadian Pacific Railway, a Dairy car in connection with our Field Crops car was operated in 1920 for ten weeks, stopping at sixty points, with an attendance altogether of practically 13,000 people. The itinerary of this train covered 840 miles of railway. A self-generating picture machine for use in public schools was purchased, together with three educational films.

COLLEGE OF AGRICULTURE

The money received by the university through the Provincial Department of Agriculture from the Federal instruction grant to agriculture during the year was expended in payment of salaries to men on the permanent staff engaged in teaching, investigation and extension in field husbandry, animal husbandry, poultry, dairy, farm implements and machines and chemistry; for men directing field and animal husbandry investigations and demonstrations; for director and assistant director of women's work and for temporary workers and expenses in connection with homemakers' conventions, short courses and other rural women's organizations. The work carried on is practically the same as that reported for previous years varied to suit conditions and circumstances. In addition to the regular teaching, investigation and administrative work at the university, all the members of the staff devote more or less time to extension activities. The members of staff now being paid from the fund are as follows: Professor A. M. Shaw, Animal Husbandry; Professor R. K. Baker, Poultry; Professor A. E. Potts, Dairy; Professor L. E. Kirk, Field Husbandry; Professor L. M. Winters, Animal Husbandry; Miss Abbie DeLury, Director of Homemakers' Clubs; Miss Esther Thompson, Assistant Director Homemakers' Clubs; Mr. Robert Stewart, Field Superintendent, and Samuel Wright, Field Superintendent. (Chemistry was dropped from this fund.)

Owing to increases in salaries and expenses, the fund is not large enough to take care of all who were originally paid from it. The work in all the departments is expanding.

The regular agricultural extension work is carried on principally through the agricultural societies, of which there are now 141 whose activities are supervised by the Director of Extension, through Grain Growers' Associations and through any other agencies with which the Director of Extension may be able to co-operate. The Better Farming Train and the exhibition associations afford excellent opportunities for reaching very large numbers of people whose interests lie chiefly in agricultural pursuits.

Farm Boys' Camps.—The farm boys' camps held under the auspices of the College of Agriculture, and organized by the Director of Agricultural Extension, proved very successful. There were 245 farm boys in attendance at the Regina camp and 175 at the camp at Saskatoon. An entirely different programme was arranged for

12 GEORGE V. A. 1922

each camp, the intention being that the boys should begin their course at Regina and complete it in the subsequent year at Saskatoon. At the latter camp the experimental plots at the university are made use of, grain crop judging and identification contests being staged.

The camp movement is being developed as a feature of the agricultural societies so as to enable these societies to render a definite service to farm boys. The local society assists boys in making financial and other arrangements in connection with the purchase of live stock necessary for the projects designed by the college for boys who have attended a camp. It is necessary that a boy must first qualify by attending one or more camps. The contests are definitely vocational and are regarded as being more advanced than Boys' and Girls' Club work, as usually carried on. Special prizes were offered at the winter stock and poultry shows to the contestants. The girls' camps are referred to under "Women's Work."

Women's Work.—There are now 160 Homemakers' Clubs distributed over the province. The work is continually expanding. Lectures are given to the clubs and to community gatherings of farm women. From July to the end of December, 52 short courses from two to five days' duration were held. These included instruction in home nursing, emergencies, household science, child welfare, dressmaking and millinery. Judges were sent to forty-five fairs. Addresses were given at some of the fairs. This work was carried on not only with the Homemakers' Clubs but also with other organizations that asked for help. Child welfare and clinics are getting to be a general feature of homemakers' work.

This year (1921) the homemakers' organization is providing a household science scholarship to train a teacher who will give at least three years of her services to non-English districts in order to acquaint new Canadians with Canadian habits of living. This way of trying to solve the problem of the new Canadian is recommended to other organizations interested in this work. Physical training of a recreational kind for rural schools is also urged. Efforts for relief work in the province are being carried on in co-operation with the Red Cross.

To encourage permanent libraries a grant is made of dollar for dollar up to ten dollars expended by a club for books, and 38 clubs have availed themselves of this offer.

The girls' camp held at the university during the week of June 7, 1920, was attended by 67 girls from the agricultural societies. Lectures and demonstrations covered the usual work of the home and included reading, music and community singing.

At the annual convention held at the university in June, there were 375 delegates in attendance.

ALBERTA

Schools of Agriculture.—The major portion of the grant to the province of Alberta is employed in connection with the Schools of Agriculture established by the provincial Department of Agriculture in different sections of the province. Six of these schools are now in operation with a total attendance of 500 students. There are from six to eight instructors at each school. The grant contributes chiefly to salaries, but is also used for the purchase of equipment and supplies for laboratories and workshops. During the summer months when the schools are closed, the teachers undertake extension work for Women's Institutes, assist school fair work, judging at fairs, and lecture and demonstrate over the country. This year a School of Agriculture exhibit was made at the Calgary and Edmonton fairs.

SESSIONAL PAPER No. 15a

Women's Institutes. The expenditure under this heading is chiefly for salaries and travelling expenses of lecturers and demonstrators and of those directing the work. During the early summer months a staff of ten instructors was employed in giving courses lasting from one to three days in the various institutes throughout the province in household science, sewing, nursing, etc., the grant providing for operating expenses, including material and supplies.

Agricultural Representatives.—Two district agents operated during the year, one at Sedgewick and one at Edmonton, but, in addition, certain of the teachers at the agricultural schools function in a similar manner during the summer, assisting with school fairs, pig, poultry and calf clubs, holding meetings and giving assistance to farmers in any way they can. The expenditure under this head represents salaries and travelling expenses, distribution of seed to school children and materials and supplies incidental to the work.

BRITISH COLUMBIA

The work of the provincial Department of Agriculture assisted by the grant during the year was of the same character as that outlined in the report of 1919-20, and related to various forms of instruction and investigation. Assistant agriculturists and horticulturists represented the department in certain districts and aided in carrying on its work.

Dry Farms and Field Crops.—The dry-farming station at Quilchena, which is operated chiefly as a demonstration sheep farm, was maintained, but the 105-mile station was discontinued. At the demonstration plot at Pitt Meadows the work was confined chiefly to crop and variety tests.

Silo Demonstrations.—There being no silos in the Nechaco valley, two were built under the supervision of the department and filled by the department's silo filler. The construction of silos at several other points was supervised, a large number being built under departmental instruction and advice, and with the aid of the department's silo forms for cement silo construction.

Horticultural Demonstrations.—Under this appropriation the six-acre strawberry plot at Gordon Head—an important strawberry growing district near Victoria, Vancouver island—continued to be operated under rotation and as a means of determining the best methods of combatting the strawberry weevil, a menace to the industry which has assumed a serious aspect. The work is under the direction of the assistant horticulturist for the island.

Fruit Packing and Pruning Schools.—The horticultural instructors conducted pruning and packing schools at many points in the East and West Kootenay and the Okanagan districts, in response to a general demand for this form of instruction, particularly in regard to pruning. The classes were well attended. The packing schools were held chiefly in sections where fruit growing is not commercially organized and where the packing is done by the grower.

Poultry.—The province's International Egg-Laying Contest is the chief form of work receiving assistance. The ninth contest concluded in October, 1920. The birds entered were eligible to qualify for the Dominion Record of Performance.

Dairying.—Assistance was given chiefly to cow-testing through the five associations in operation in the province, a contribution being made to the tester's salary. Assistance is also given in districts where there are too few cows to support an association by supplying testing outfits, training an operator and paying a small bonus.

12 GEORGE V. A. 1922

Bee-keeping.—Five apiary inspectors were employed and many thousands of colonies were inspected in the Lower Fraser valley, where European foul-brood is prevalent. Outdoor demonstrations and lantern lectures were given by the inspectors wherever audiences could be secured.

Boys' and Girls' Clubs.—With the co-operation of the British Columbia Jersey Cattle Breeders' Association, the club projects were extended to include the rearing of pure-bred heifer calves. Twelve poultry clubs were formed and one club each for pigs, potatoes and corn.

Pathological and Entomological Work.—The grant provides under this head for an assistant entomologist at Vernon. The major subjects of the season's work were a continuation of last year's study of the life-history and control of the imported onion maggot and the control of the cabbage root maggot. The local officer has charge of the preparation of insect and plant exhibits for fairs and exhibitions, acts as photographer, librarian and curator for the entomological collection at Vernon, and conducts the general work of the office, which is conveniently associated with that of the district horticulturist.

Publications.—Assistance was rendered to the publication of the *Agricultural Journal*, and in the distribution of bulletins, as in previous years.

Agricultural Education.—The total amount allotted to agricultural education by the province for the year was \$50,530. Of this sum, sixty per cent was provided from provincial funds and the balance (\$20,000) from Agricultural Instruction grant.

The policy of the Department of Education in regard to the teaching of elementary agriculture is summarized as follows:—

1. Special training for teachers in rural science by means of summer courses.
2. Special grants to teachers who successfully carry out an approved scheme of work, including school or home gardening.
3. Special grants to school boards in connection with rural science work.
4. Special grants to school boards and to teachers for organizing and maintaining supervised home gardens where school gardens are not practicable.
5. The inclusion of agriculture as an optional subject in high school, and the appointment of District Supervisors of Agricultural Instruction.
6. Extension classes in agriculture, said classes to be conducted by the district supervisor for young men of the district not in attendance at high school.
7. General supervision by the district supervisor of rural science work in the public schools of the district.

A service has been arranged between the Departments of Agriculture and Education whereby district supervisors are to act as agricultural representatives of the former department in advising farmers in regard to agricultural problems, which department on consideration of such services provides transportation facilities and office accommodation.

Teachers' summer courses were held in Victoria during July in rural science, manual training, and household economics. The total enrolment was 184. The University of British Columbia also offered summer courses for the first time, with an enrolment of 128 teachers. The Victoria Summer School was conducted, as formerly, by the Department of Education, and the transportation of teachers in attendance was paid. Six illustrated lectures on agricultural education and the rural school by Professor Kerr, of the University of California, were attended by the entire student body. The school was regarded as the most successful hitherto held.

A three-months' course in the theory and practice of agriculture, beginning early in January, was offered to ex-service men by the University of British Columbia. Seventy-eight returned men took the course, which was well received and highly successful.

University of British Columbia.—A marked effort is being made to develop a strong policy of extension teaching in connection with the Faculty of Agriculture, and at the same time to develop within the departments various independent lines of extension investigation. The grant provides for the salary and expense of assistant professors in agronomy, animal husbandry, horticulture, poultry husbandry, and dairying, together with some special part-time assistance.

During the year, eight extension schools were conducted by the Faculty of Agriculture, and the average attendance was sixty. The schools are usually of four days' duration. In no case does the college offer work that has not been requested by the local organization. The college pays the expenses but the local committee is asked to assume the general responsibility for the success of the course.

Under the Agricultural Instruction Act, the sum of \$20,000 is set aside annually for division between the recognized veterinary colleges. Two such institutions participate, the Ontario Veterinary College and the School of Veterinary Science, Montreal.

Ontario Veterinary College..	69
School of Veterinary Science, Montreal..	23

Ontario Veterinary College.—Under date of August 10, 1920, the Minister of Agriculture for the province of Ontario reported that the grants hitherto made to that province on behalf of veterinary education had been wholly expended with the exception of a balance of \$11.18, thus disposing of all grants hitherto paid. The next succeeding unpaid grant then became available, namely, that of 1916-17, amounting to the sum of \$14,285.72. The agreement entered into was identical in terms with that of previous years, and on its completion, the grant of 1916-17 was paid to the province.

12 GEORGE V, A. 1922

The summary financial statement for the year is as follows:—

Balance on hand, March 31, 1920..	\$ 3,295 54
Grant, 1916-17..	14,285 72
	<hr/>
	\$17,581 26
Expenditure, including services of lecturers, demonstrators and temporary assistants, laboratory supplies and incidentals..	\$12,771 58
Balance on hand, April 30, 1921..	4,809 68
	<hr/>
	\$17,581 26

The allotment and payments to the institution, to date, have been as follows:—

Grant	Amount	Date Paid
1913-14..	\$15,371 91	April, 1914
1914-15..	15,607 85	December, 1916
1915-16..	14,869 56	April, 1919
1916-17..	14,285 72	August, 1920
	<hr/>	
1917-18..	\$ 60,135 04	
1918-19..	12,574 85	Unpaid
1918-19..	13,333 33	"
1919-20..	14,117 65	"
1920-21..	15,000 00	"
	<hr/>	
Total..	\$115,160 87	
Less grants paid..	60,135 04	
	<hr/>	
Balance allotted but not paid..	\$ 55,025 83	

School of Veterinary Science.—Application was made under date of December 11, 1920, for the payment of the grant of 1920-21 to the School of Veterinary Science, Montreal.* The financial statement for the year ending June 30, 1920, reported that the grant of 1919-20, amounting to the sum of \$5,882.35 had been disbursed as follows:—

Salaries of teaching staff..	\$5,829 90
Incidentals..	52 45
	<hr/>
	\$5,882 35

Payment of the grant of 1920-21, amounting to the sum of \$5,000, was there-upon made.

During the year the entrance qualifications were revised so as to insure a higher standard of education preliminary to admission to the course. The recognition of the school by the Veterinary Association of the United States was also effected, and graduates will hereafter be permitted to practice in that country.

1921

CENSUS OF INDUSTRY, 1919.**PULP AND PAPER.****Preface.**

The statistics of the pulp and paper industry in this report were collected and compiled during 1920 for the calendar year 1919. Acknowledgments are tendered to the Department of Crown Lands, Nova Scotia; the Department of Lands and Mines, New Brunswick, the Department of Lands and Forests, Quebec, the Department of Lands, British Columbia, and the Canadian Pulp and Paper Association for their assistance in preparing the preliminary lists of operating concerns and in securing complete returns.

The report has been compiled and written under a co-operative arrangement between the Dominion Bureau of Statistics and the Forestry Branch of the Department of the Interior, the work in the Bureau being under the supervision of Mr. J. C. Macpherson, whilst the report was checked and edited by Mr. R. G. Lewis, B.Sc.F., of the Forestry Branch.

R. H. COATS,
Dominion Statistician.

THE PULP AND PAPER INDUSTRY, 1919.

Introduction and Summary.

Continued expansion in the pulp and paper industry of Canada is indicated by a comparison of the principal statistics for the calendar year 1919 with those of the years 1917 and 1918, as presented in this and previous reports.

The number of operating mills in 1917 was 83, with a production of \$96,340,327. In 1918 the number of mills was 94 and the value of production \$119,309,434, while in 1919 the number of mills had risen to 99 with a production value of \$139,925,001.

The consumption of pulpwood by pulp mills and the quantity cut for export are shown in the summary table below for the calendar years 1917, 1918 and 1919.

Pulpwood	1917	1918	1919
	cords	cords	cords
Used in pulp mills.....	2,104,334	2,210,744	2,428,706
Cut for export.....	1,017,834	1,349,536	1,070,275
Total consumption.....	3,122,168	3,560,280	3,498,981

Capital investment in 1919 also shows increases for each of the items included under that head when compared with previous years, as presented in the following summary table:—

Items of Capital	1917	1918	1919	Increase per cent	
				1918 over 1917	1919 over 1918
Land, buildings and fixtures	84,461,837	118,805,581	121,448,227	40.66	2.22
Machinery and tools...	59,266,596	60,627,266	75,407,708	2.29	24.38
Materials on hand, stocks, in process, etc...	27,902,466	39,652,078	46,572,806	42.11	17.45
Cash, trading and operating accounts, etc.....	15,156,506	22,259,779	32,338,623	46.86	45.28
Totals	186,787,405	241,344,704	275,767,364	29.21	14.26

Salaries and wages, which in 1917 amounted to \$20,358,019, rose in 1918 to \$26,974,225 and in 1919 to \$32,264,208, the percentage increase in 1918 over 1917 being 32.5, and in 1919 over the preceding year 19.61. The number of employees on salaries which in 1917 was 1,563 had risen to 1,929 in 1918 and to 2,405 in 1919, or an approximate increase of 30 and 25 per cent respectively. The average number of workers on wages increased from 21,402 in 1917 to 23,934 in 1918 and to 24,242 in 1919. The increase in the 1917-18 period was 11.83 per cent and in the 1918-19 period 1.28 per cent.

Arrangement of Report.—The statistics of the present report deal with the various phases of the industry arranged in the following order: production, materials used, capital investment, equipment, power employed, employees, salaries and wages, working time, miscellaneous expenses, exports and imports.

12 GEORGE V, A. 1922

For the purposes of this investigation, the various concerns engaged in the industry have been grouped under three heads: (1) mills making pulp only, (2) mills making pulp and paper, and (3) mills making paper only. Statistics are presented in the tables for each of these groups and also for the combined classes of mills.

Production.

Tables I and II of the report deal with the production of wood-pulp and paper respectively for each of the provinces and for the Dominion.

Wood-pulp.—The production of wood-pulp in Canada for the calendar year 1919 for all classes of mills was 1,716,089 tons, as compared with 1,557,193 tons in 1918 and 1,464,308 tons in 1917. Of the 1919 production, 924,162 tons were made for use in their own mills for the manufacture of paper and paper products, and 791,927 tons were made for sale or export. The amount received for the pulp made for sale was \$48,485,746, or an average price for all classes of pulp of \$61.22 per ton. The quantity and value of each kind of pulp made for sale and the average price per ton at the mill is presented in the following summary:—

Kinds of Pulp made for Sale	Quantity	Selling value mill	Average value per ton at mill
	Tons	\$	\$
Ground wood.....	390,205	9,038,035	30.16
Soda fibre.....	3,174	297,113	93.60
Sulphite fibre, bleached.....	100,132	9,425,836	91.13
Sulphite fibre, unbleached.....	263,866	19,885,590	75.36
Sulphate fibre.....	124,550	9,839,172	79.00
Total Pulp.....	791,927	48,485,746	61.22

Sulphite fibre, which in 1918 was reported as 318,882 tons, has been divided in 1919 into bleached and unbleached, making a total production of 363,898 tons of sulphite for that year.

The number of mills engaged in the manufacture of pulp in 1919, according to the classes of pulp made, was as follows: Ground wood, 46; sulphite, unbleached, 28; sulphite, bleached, 4; sulphate, 8; and soda, 2.

Paper.—Table II deals with the production of the various classes of paper by quantities and values for each class of mills and for all mills engaged in the manufacture of paper and paper products. The statistics are also shown for each of the provinces and for the Dominion.

A summary showing the tonnage, value and value per ton together with ratios of each class of paper to the totals of tonnage and value is presented below:—

Classes of Paper	Tonnage	Value	Average value per ton	Per cent of total tonnage	Per cent of total value
		\$	\$ cts.		
Newsprint.....	794,567	54,427,879	68.50	72.88	62.03
Book and writing paper.....	58,228	12,571,000	215.89	5.34	14.33
Wrapping paper.....	59,697	7,979,418	133.66	5.48	9.09
Boards.....	137,678	8,892,046	64.58	12.63	10.13
Other paper products.....	40,065	3,882,500	96.90	3.67	4.42
All other products.....	—	3,610,070	—	—	—
Totals.....	1,090,235	91,362,913	—	100.00	100.00

SESSIONAL PAPER No. 17

The average value per ton in 1919 is higher for each class of paper, except book and writing paper, than in 1918. Newsprint increased from \$62.91 per ton in 1918 to \$68.50 per ton in 1919, or 9 per cent; wrapping paper from \$119.99 per ton in 1918 to \$133.66 per ton in 1919, or 11.4 per cent; boards from \$63.26 per ton in 1918 to \$64.58 per ton in 1919, or 1.7 per cent; and other paper products from \$91.10 per ton in 1918 to \$96.90 per ton in 1919, or 6.36 per cent. Book and writing paper, which in 1918 averaged \$222.90 per ton, fell to \$215.89 in 1919, or a decrease of 3.2 per cent.

The newsprint group, which in 1918 represented 75.93 per cent of the total tonnage and 63.22 per cent of the total value of paper products, fell in 1919 to 72.88 per cent of the tonnage and 62.03 per cent of the value. Book and writing paper increased from 4.97 per cent to 5.34 per cent of the total tonnage, but shows a slight decrease in per cent of the total value from 14.68 in 1918 to 14.33 in 1919. Wrapping papers show decreases both in tonnage and value, the tonnage falling from 6.32 per cent in 1918 to 5.48 per cent in 1919 and the value from 10.04 per cent in 1918 to 9.09 per cent in 1919. Boards show increases in total tonnage and total value over 1918, the percentage being for tonnage, 9.07 in 1918 and 12.63 in 1919, and for value, 7.59 in 1918 and 10.13 in 1919. There is also a slight decrease in other paper products, the tonnage falling from 3.71 per cent in 1918 to 3.67 in 1919 and the value from 4.47 in 1918 to 4.42 in 1919.

The number of mills engaged in the manufacture of paper products by classes in 1919 was as follows: newsprint, 24; wrapping paper, 19; book and writing paper, 17; boards, 13; and other paper products, 18.

The production of paper by provinces in 1919 is summarized in the subjoined table by tonnage and value:—

Classes of Paper		British Columbia	Ontario	Quebec	Canada
Newsprint.....	(tons	125,904	352,254	316,409	794,567
	value	8,361,503	23,958,566	22,107,810	54,427,879

Materials.

Materials used in the Manufacture of Wood-pulp.—The quantity and kind of the various woods used as the principal or primary raw material in the manufacture of pulp is presented in tables III-VI. The secondary classes of materials used with wood in the manufacture of chemical pulp are treated in table VIII.

Table III deals with the consumption of pulpwood by provinces for the calendar years 1918 and 1919. Quebec leads in this respect with a total of 1,176,134 cords, or 48.42 per cent of the total wood used. Ontario is second with 840,856 cords, or 34.62 per cent. The other provinces also show increases in the quantity of wood consumed. The average price per cord of pulpwood laid down at the mill shows considerable increases over 1918, ranging from \$15.60 per cord in Ontario to \$7.40 per cord in Nova Scotia, the average for the Dominion being \$12.90 per cord. This is an advance over 1918 of \$1.64 per

cord, or approximately 14.6 per cent. The number of mills reporting the manufacture of pulp in 1919 was 66, of which 29 were in Quebec, 22 in Ontario, and 5 in each of the provinces of British Columbia, Nova Scotia and New Brunswick.

Table IV shows the consumption of pulpwood by kinds of wood. Spruce leads the other varieties with 1,787,868 cords, or 73.61 per cent of the total of all woods. Balsam fir is next with 490,327 cords, or 20.19 per cent, and hemlock, third with 118,013 cords or 4.86 per cent. The remaining varieties are not so important, each being credited with less than one per cent of the total. The number of mills reporting the use of spruce timber was 61; balsam fir, 33; hemlock, 8; poplar 4; Jack pine, 3; and other kinds, 2.

The consumption of pulpwood in 1918 and 1919 by processes is shown in table V. The sulphite process required 1,127,659 cords, or 46.43 per cent of the total; the mechanical or ground wood process, 1,010,457 cords, or 41.61 per cent; the sulphate process, 281,360 cords, or 11.58 per cent; and the soda process 9,230 cords, or 0.38 per cent. Forty-six mills made mechanical pulp, 28 mills made sulphite pulp, 8 made sulphate pulp, and 2 made soda pulp.

Table VI is a combination of tables III-V in which the relation of pulpwood by provinces, kinds of wood, and processes is presented for purposes of comparison and contrast. Table VII shows the consumption and value of pulpwood by kinds of wood and classes of mills for the Dominion and for each of the provinces, whether purchased or cut from own limits. The total consumption in 1919 amounted to 2,428,706 cords, or 217,962 cords more than in 1918. Of the 1919 total, 1,006,934 cords were purchased and 1,421,772 cords were cut on operators' own limits. Spruce leads all classes of wood used in the manufacture of pulp with 1,787,868 cords or 73.61 per cent of the total wood used. Nearly 60 per cent was cut from own limits, while 40 per cent was purchased. Balsam fir is next with 490,327 cords in 1919, as compared with 447,243 cords in 1918, an increase in cordage of approximately 9.6 per cent; hemlock with 118,013 cords, Jack pine with 15,402 cords, poplar with 7,228 cords, and other kinds with 9,868 cords (principally cedar) being the remaining woods reported on the questionnaire.

The quantity of wood used in the manufacture of mechanical or ground wood-pulp was 1,010,457 cords in 1919, as compared with 873,084 cords in 1918, an increase of 137,373 cords, or 15.73 per cent. By the chemical process 1,418,249 cords were used in 1919, as compared with 1,337,660 cords in 1918, an increase of 80,589 cords, or 6 per cent.

The value delivered at the mill of the wood used in the manufacture of wood-pulp, whether cut from own limits or purchased, together with the average price per cord, is shown in the subjoined table for the calendar years 1917, 1918 and 1919:—

Year	Purchased		Cut from own limits		Average value per cord	
	Cords	Value	Cords	Value	Own limits	Purchased
		\$			\$	\$
1917.....	539,303	5,549,335	1,565,031	13,268,148	10.29	8.48
1918.....	717,097	8,981,307	1,494,647	15,905,168	12.52	10.65
1919.....	1,006,934	13,949,853	1,421,772	17,397,833	13.85	12.25

The average value per cord of wood used in the various processes is highest in the mechanical and sulphite and lowest in the sulphate, which admits the use of woods of inferior quality. In 1919 the average value per cord by the mechanical process was \$13.14, as compared with \$11.40 in 1918. By the

SESSIONAL PAPER No. 17

sulphite process the average price in 1919 was \$13.02, as against \$11.64 in 1918, and in the sulphate process \$11.63 in 1919, as compared with \$9.41 in 1918.

The quantity of pulp produced per cord of wood by the various processes is shown in the following comparative summary for the calendar years 1917, 1918 and 1919:—

Year	Pounds of pulp per cord of wood			
	Soda Process	Sulphate Process	Sulphite Process	Mechanical Process
1917.....	930	1,105	1,063	2,043
1918.....	980	1,133	1,037	2,039
1919.....	996	1,126	997	1,961

Particulars by provinces and classes of mills of the wood used and pulp produced are shown in table IX.

Other materials used in the manufacture of wood-pulp by kinds and classes of mills are shown by quantities and values in table VIII. The value in all cases represents the cost laid down at the mill of the various items. The Province of Nova Scotia does not appear in the table, as it produces only mechanical or ground wood-pulp.

Materials used in the Manufacture of Paper.—The various materials used in the manufacture of paper are shown in table X by provinces and classes of mills. Pulp is the principal item in this table and the total tonnage used in the manufacture of paper was 1,037,231, of which 921,490 tons were produced by the mills for own use and 115,741 tons were purchased from other mills. The value of the pulp purchased amounted to \$9,148,338, or an average for all classes of pulp of approximately \$80 per ton. The quantity of ground wood purchased was 44,986 tons, valued at \$2,962,699, or an average of \$65.85 per ton; soda fibre purchased amounted to 1,822 tons, worth \$213,965, or an average of \$117.43 per ton; bleached sulphite purchased amounted to 18,432 tons, worth \$2,430,945, or an average of \$131.89 per ton; unbleached sulphite amounted to 44,237 tons, worth \$3,101,869, or an average of \$70.12 per ton; and sulphate fibre with a tonnage of 6,264 and cost value of \$438,860, or an average per ton of \$70.06. The quantity and cost value of the other materials is given by items, the total value of such materials being \$8,656,596, making a total of \$17,804,934 for purchased materials. In addition to this total, the quantity produced for own use, viz., 921,490 tons, has not been accounted for as to value, which amounted to \$24,834,532, or a grand total of \$42,639,466 for all materials used in the manufacture of paper.

Fuel Consumption.—Table XI shows the quantities and values of the different kinds of fuel used by each class of mills for the year ended December 31, 1919. The total cost of all fuel used in the industry was \$10,549,493, of which bituminous coal accounted for \$9,408,721, or approximately 90 per cent of the total cost of all fuel. The following summary table shows the quantity and value of each of the classes of fuel used in the Dominion by origin:—

Kinds of fuel	Unit of measure	Canadian		Foreign	
		Quantity	Value	Quantity	Value
Bituminous coal, slack.....	ton	20,807	\$ 156,802	458,868	\$ 3,588,425
Bituminous coal, lump.....	"	1,160	9,563	230,894	1,579,628
Bituminous coal, run-of-mine.....	"	206,225	1,665,253	284,348	2,409,050
Anthracite coal, lump.....	"	—	—	353	5,017

12 GEORGE V, A. 1922

Agencies of Production — (1) Capital — Mill Equipment — Power Employed.

The agencies of production of a fixed character as above stated are presented in tables XII to XVI, inclusive, of this report for the calendar year 1919.

Capital.—Table XII shows the distribution of capital under four main heads: (a) land, buildings and fixtures, (b), machinery and tools, (c) materials on hand, stocks in process of manufacture, finished products on hand, fuel and miscellaneous supplies, and (d) cash, trading and operating accounts and bills receivable. The statistics of these items are given in the following summary by classes of mills for the Dominion:—

Items of Capital	In paper mills	In pulp mills	In pulp and paper mills	In all classes of mills
	\$	\$	\$	\$
Land, buildings and fixtures.....	7,156,078	28,776,979	85,515,170	121,448,227
Machinery and tools.....	3,811,936	17,918,903	53,676,869	75,407,708
Materials on hand, stocks in process, etc.....	2,502,934	12,066,905	32,002,967	46,572,806
Cash, trading and operating accounts, etc.....	3,082,328	11,133,801	18,122,494	32,338,623
Totals.....	16,553,276	69,896,588	189,317,500	275,767,364

The capital investment in each class of mills is shown by provinces in the summary table below:—

Provinces	In paper mills	In pulp mills	In pulp and paper mills	In all classes of mills
	\$	\$	\$	\$
British Columbia.....		6,388,121	36,828,006	43,216,127
New Brunswick.....		11,960,778		11,960,778
Nova Scotia.....		1,208,255		1,208,255
Ontario.....	6,703,756	21,575,584	67,001,700	95,281,040
Quebec.....	9,849,520	28,763,850	85,487,794	124,101,164
Canada totals.....	16,553,276	69,896,588	189,317,500	275,767,364

The percentage of the items of capital to the total capital and the percentage by provinces for each class of mills are appended:—

(a) PERCENTAGE TO TOTAL CAPITAL.

Items of Capital	In paper mills	In pulp mills	In pulp and paper mills	In all classes of mills
	per cent	per cent	per cent	per cent
Land, buildings and fixtures.....	43.23	41.17	45.17	44.04
Machinery and tools.....	23.03	25.64	28.35	27.34
Materials on hand, stocks in process, etc.....	15.12	17.26	16.91	16.89
Cash, trading and operating accounts, etc.....	18.62	15.93	9.57	11.73
	100.00	100.00	100.00	100.00

SESSIONAL PAPER No. 17

(b) PERCENTAGE BY PROVINCES

Items of Capital.	In paper mills	In pulp mills	In pulp and paper mills	In all classes of mills
	per cent	per cent	per cent	per cent
British Columbia.....		9.14	19.45	15.67
New Brunswick.....	—	17.11	—	4.34
Nova Scotia.....	—	1.73	—	0.44
Ontario.....	40.50	30.87	35.40	34.55
Quebec.....	59.50	41.15	45.15	45.00
	100.00	100.00	100.00	100.00

From the above table it will be seen that the largest item of capital investment is in land, buildings and fixtures, being highest in the combined pulp and paper group with 45.17 per cent. The next largest item is for machinery and tools and again the combined mills show the highest percentage. Materials on hand, stocks in process, etc., comes next with the highest percentage in pulp mills with 17.26 per cent. Paper mills show the highest percentage in working capital with 18.62 per cent, followed by pulp mills with 15.93 per cent and the combined mills with 9.57 per cent.

The percentage of capital investment in all of the classes of mills is highest in the province of Quebec with 45 per cent of the whole. Ontario is second with 34.55 per cent, and British Columbia, third, with 15.67 per cent.

Mill Equipment.—The machinery in mills making ground wood-pulp consisted of 612 grinders with a capacity per twenty-four hours of 3,939 tons and a yearly capacity of 1,193,920 tons of pulp, dry weight. The province of Quebec leads with 325 grinders, with a capacity of 2,195 tons per twenty-four hours and a yearly capacity of 623,100 tons, dry weight. The actual production of ground wood-pulp in the Dominion during 1919 was 990,902 tons, or nearly 83 per cent of the total capacity, whereas in 1918 the percentage to total capacity was 76.74. In Quebec the actual output was 515,457 tons in a total capacity of 623,100 tons or 82.72 per cent of full capacity: in Ontario the actual output was 351,572 tons in a total capacity of 427,520 tons, or 82.23 per cent of full capacity: in British Columbia the actual output was 99,967 tons in a total capacity of 111,600 tons, or 89.57 per cent of full capacity: in Nova Scotia, which makes ground wood only, the actual output was 17,659 tons in a total capacity of 24,200 tons, or 72.97 per cent of full capacity; and in New Brunswick with an actual output of 6,447 tons in a total capacity of 7,500 tons, or 85.96 per cent of full capacity.

Table XIV shows the equipment of mills making pulp by the chemical processes. The total number of digesters rose from 134 in 1918 to 137 in 1919, the capacity in tons per cook from 633 tons in 1918 to 915 tons in 1919, and the yearly capacity of the mills from 810,697 tons in 1918 to 890,100 tons in 1919.

The percentage of actual output of chemical pulp to total capacity of mills for Canada and the provinces is shown in the table below:—

Provinces	Total Capacity	Total Output	Per cent total Capacity
	Tons	Tons	
British Columbia.....	104,260	94,359	90.50
New Brunswick.....	90,000	68,739	76.38
Ontario.....	308,240	246,255	79.89
Quebec.....	387,600	315,834	81.49
Canada	890,100	735,187	81.47

Paper Mill Machinery.—The equipment in the paper mills of Canada is shown in table XV. The total yearly capacity in tons is stated at 1,162,377 tons, an increase of 142,843 tons over the preceding year. The actual production of paper and paper products during 1919 was 1,090,235 tons, or nearly 93·80 per cent of full capacity. Ontario leads in the production of paper with 498,792 tons in a total capacity of 513,593 tons, or 97·11 per cent of full capacity. Quebec is second with an actual production of 456,133 tons and a capacity production of 510,784 tons, or 89·30 per cent of full capacity, and British Columbia, third, with an actual production of 135,310 tons and a capacity production of 138,000 tons, or 98·0 per cent of full capacity. From these figures it will be seen that the margin between capacity and actual production during the year was 6·20 per cent for the Dominion, 2·89 per cent in Ontario, 10·70 per cent in Quebec, and 2·0 per cent in British Columbia.

Power Employed.—The classes of power employed in the industry are shown by provinces and classes of mills in table XVI. The total units of power used was 4,584 with a rated horse-power of 623,588, of which 512,886 horse-power was actually used. Hydraulic power stands in first place with 356 units of a rated horse-power of 290,164, of which 245,022 was actually employed. Electric power is second with 3,433 units of an indicated horse-power of 198,930, of which 150,648 horse-power was actually employed. Steam engines and steam turbines with 261 units of 47,586 indicated horse-power, of which 38,133 were actually employed. Of the total power actually employed in the industry 61·29 per cent was in the combined pulp and paper mills, 32·97 per cent in pulp mills and 5·74 per cent in paper mills. The distribution of power by provinces was as follows: Quebec, 48·91 per cent; Ontario, 28·54 per cent; British Columbia, 14·66 per cent; New Brunswick, 5·76 per cent; and Nova Scotia, 2·3 per cent.

Agencies of Production — (2) Employees, Salaries, Wages and Working Time.

The statistics relating to employment are presented in tables XVII to XX by provinces and classes of mills.

Employees, Salaries and Wages.—A general review of the number of persons, male and female, by classes of employment, in each kind or class of mills, together with the amount paid to each class in salaries and wages, is given in table XVII. The following summary table gives a comparison of the numbers at employment and the amounts paid in salaries and wages for the calendar years 1918 and 1919:—

Classes of employees	Employees No.		Salaries and Wages	Increase per cent	
	Male	Female		Employees	Salaries and wages
Officers, superintendents and mnagers	1918 462	2	\$ 1,807,468	—	—
	1919 542	18	2,054,574	20·69	13·67
Clerks, stenographers and other salaried employees	1918 1,164	301	1,888,151	—	—
	1919 1,485	360	2,636,096	23·94	39·64
Wage earners, average number....	1918 23,086	848	23,278,606	—	—
	1919 23,346	896	27,573,538	1·29	18·46
Totals	1918 21,712	1,151	26,974,225	—	—
	1919 25,373	1,274	32,261,208	3·03	19·61

From the foregoing table it will be seen that the total employees connected with the industry increased during the year by 784 or 3·03 per cent. The

SESSIONAL PAPER No. 17

increase in the number of persons employed in the official and clerical classes exceeds that of 1918 by 96, or 20·69 per cent in the official class, and 380 or 25·92 per cent in the clerical class. Wage-earners while showing an increase in the total number employed of 784 have but a percentage increase of 1·29. The increase in the amounts paid in salaries and wages continues during 1918-19 although the percentages are not so large as those of the 1917-18 period, being 13·67 per cent in the class of officers, superintendents and managers, 39·64 per cent in the class of clerks, stenographers and other salaried employees, and 18·46 per cent in the wage-earning class. In the industry as a whole the increase in the total salary and wage bill amounted to \$5,289,983, or 19·61 per cent. A comparison of the average salary and wage payment according to classes of employment is shown in the following summary for the calendar years 1918 and 1919.

Classes of employment	Average earnings		Increase	
	1918	1919	Amount	P. C.
	\$	\$	\$	
Officers, superintendents, managers	3,895	3,669	—226	—5·80
Clerks, stenographers and other salaried employees	1,289	1,429	140	10·86
Wage earners.....	972	1,137	165	16·98

From the above it will be observed that there has been a considerable decrease in the average earnings of persons of the first class since last report amounting to 5·80 per cent. This may be accounted for from the fact that the 96 new employees in 1919 received but \$247,106 or less than this figure by reason of any increases made to members previously employed on the staff. This is an average for the new employees of \$2,574, as compared with \$3,895 in 1918, which would tend to lower the average for that year to the average as stated above. The second class, which comprises the clerical staff, shows an average increase of \$140 per employee, or 10·86 per cent, while in the third class, representing the workers on wages, the average increase was \$165 per employee, or 16·98 per cent.

Working Time.—The working time of employees by months for each class of mills is presented in table XVIII. In pulp mills the months of highest employment are October to December and the lowest from January to March. In pulp and paper mills the months of highest employment are July to December and the lowest from January to June. In paper mills there is not the variation that exists in the other mills, the month of highest employment being November and the lowest in May.

Classified Weekly Wages.—Table XIX presents statistics of classified weekly wages of mill workers by classes of mills and provinces, according to sex and age. The statistics are shown by gradations of one dollar from earnings of \$5 per week up to \$16 per week and by two dollar gradations from \$16 per week up to \$30 per week. Of the total of 25,177 employees reported on wages in 1919, the number receiving less than \$10 per week was 760 or approximately 3 per cent of the total employed, as compared with 1,173, or 5 per cent in 1918. The number receiving \$10 but less than \$15 per week in 1919 was 1,751, or 6·95 per cent, as against 3,062 or 13·14 per cent in 1918. Those receiving \$15 per week but under \$20 per week numbered 5,528 in 1919, or 21·96 per cent, as compared with 7,499 in 1918, or 32·2 per cent. The number of employees receiving \$20 per week and over in 1919 was 17,138, or 68·07 per cent, as compared with 11,577 in 1918, or 49·66 per cent. The accompanying summary

12 GEORGE V, A. 1922

table is a comparison of employees within specified wage groupings by age and sex for the calendar years 1918 and 1919:—

Weekly Wage Groups	1918					1919				
	Over 16 yrs.		Under 16		Total	Over 16 yrs.		Under 16		Total
	M.	F.	M.	F.		M.	F.	M.	F.	
Under \$5.....	8	20	21	20	69	—	2	—	—	2
\$5 but under \$6.....	3	5	10	16	34	17	7	8	11	43
\$6 but under \$7.....	39	65	21	8	133	18	29	28	10	85
\$7 but under \$8.....	87	87	21	29	224	63	112	9	3	187
\$8 but under \$9.....	122	210	13	16	361	56	104	21	7	188

\$15 but under \$20.....	7,420	22	55	2	7,499	5,405	98	24	1	5,528
\$20 and over.....	11,566	10	1	—	11,577	17,079	26	33	—	17,138
Totals.....	22,234	780	203	94	23,314	24,022	859	253	43	25,177

The upward trend of wages is the important feature in the above table, fewer people being employed at the lower rates of compensation in 1919 than in 1918 and a correspondingly greater number at the higher rates. The number receiving more than \$20 per week was 11,577 in 1918, as compared with 17,138 in 1919, or a variation in the year of 5,561.

Table XX shows the average working time for each class of mills by days in operation on (a) full time operation, (b) three-quarter time, (c) half time, (d) less than half time and (e) the number of days the plant was idle. Pulp and paper mills occupy first place with a total of 293 days on full time, 5 days on part time and 6 days idle. Paper mills come next with 270 days of full time operation, 10 days of part time operation and 24 days idle. Pulp mills are lowest, with 240 days of full time operation, 21 days part time operation and 43 days idle.

The number of hours per day and per shift was greatest in pulp mills, with 9·7 and 61 hours respectively. Paper mills were next with a 9-hour shift and a total working time per week of 56·5 hours. Pulp and paper mills are lowest both in working hours per shift and per week, being 8 hours per shift and 48 hours per week.

Miscellaneous Expenses of Production.

The outlay for the miscellaneous expenses or overhead charges of production is shown in table XXI by classes of mills and provinces. The items comprised under this head for the Dominion were as follows:—

Rent of offices, works and machinery.....	\$ 295,191
Rent of power.....	1,761,554
Insurance premiums.....	891,257
Taxes.....	1,441,729
Royalties, use of patents, etc.....	29,241
Advertising expenses.....	117,664
Travelling expenses.....	338,954
Ordinary repairs to buildings and machinery.....	5,163,165
All other sundry expenses.....	6,990,657
Total.....	\$ 17,029,412

All other sundry expenses constituted the principal item of miscellaneous expense, being 41·05 per cent of the total. Ordinary repairs to buildings and plant were 30·32 per cent; rent of power, 10·34 per cent; taxes, municipal, provincial and federal, 8·47 per cent; insurance, 5·23 per cent; travelling expenses, 1·99 per cent; rent of offices, etc., 1·73 per cent; advertising expenses, 0·69 per cent; and royalties, etc., 0·17 per cent.

SESSIONAL PAPER No. 17

Exports and Imports of Pulpwood, Wood-pulp and Paper, 1919.

Pulpwood.—Tables XXII and XXIII of this report deal with the exports of pulpwood by provinces for a series of years. Table XXII gives the quantity and value of pulpwood exported for the calendar years 1916, 1917, 1918 and 1919. A decrease is shown both in quantity and value in 1919, when compared with the previous year, of 279,261 cords and of \$2,406,203 in value. The average export price for all classes of wood was \$9.71 per cord in 1919. Table XXIII gives in addition to exports the quantity used in manufacture which together gives the production of pulpwood in Canada for the year. It will be observed that while the quantity used in manufacture shows increases from year to year, there is a considerable fluctuation in the quantity cut for export. The province of Quebec supplied 61.8 per cent of the total quantity of pulpwood exported; Ontario, 18.3 per cent; New Brunswick, 18.2 per cent; British Columbia, 1.5 per cent; and Nova Scotia a little more than one-tenth of one per cent. All of the pulpwood exported in 1919 went to the United States. There were no imports of pulpwood into Canada during the year 1919.

Wood-pulp.—Table XXIV is a statement of the exports of wood-pulp by countries for the calendar years 1917, 1918 and 1919. The total quantity of all classes of pulp exported during the year was 709,129 tons, of which 311,551 tons was mechanically ground and 397,578 tons chemically prepared. A change made in the classification of chemically prepared pulp in 1919 will permit the division of the items comprised under this head in future reports. Over 56 per cent of the mechanical or ground wood-pulp and 79 per cent of chemical pulp was exported to the United States. The United Kingdom took 30 per cent of the mechanical pulp and 10 per cent of the chemically prepared pulp. France and Japan are the other principal markets for this commodity.

Table XXV deals with the imports of wood-pulp by countries. In 1917 and 1918 the entire importation was from the United States, but in 1919, the first year for which quantities are available, there was also a small importation from the United Kingdom.

Paper.—The exports of paper of all kinds are given by quantity and value in table XXVI for the calendar years 1917, 1918 and 1919. The value of exports increased from \$35,621,932 in 1917 to \$42,950,759 in 1918, or by more than 20 per cent, while in 1919 the value rose to \$59,983,269, or an increase over 1918 of nearly 40 per cent. The countries to which newsprint paper was exported and the value were as follows:

1919

Country	Value	Per cent of total newsprint
	\$	
United States.....	43,603,922	87.54
United Kingdom.....	1,184,562	2.38
Australia.....	2,470,057	4.95
British South Africa.....	197,045	0.40
New Zealand.....	623,792	1.25
Other Countries.....	1,731,984	3.48
Total	49,811,362	100.00

The quantity and value of the various classes of paper imported is shown in table XXVII for the calendar years 1917, 1918 and 1919. The value of imported papers shows annual increases but in lesser volume than exports. The percentage of increase, which in 1918 was 7.6, had risen in 1919 to over 9.0 per cent, the total value in the latter year standing at \$9,246,414.

SESSIONAL PAPER No. 17

Tableau XII. Capital placé dans l'industrie de la pulpe et du papier, par provinces et genres de fabriques, 1919.

In Pulp and Paper Mills	In all classes of Mills	Répartition du capital, par provinces
Dans les pulperies et papeteries	Dans tous genres de fabriques	
Colombie Britannique		
22,055,912	24,031,919	Terrain, bâtiments et agencement.
9,342,053	12,758,523	Machinerie et outillage.
3,547,450	4,168,911	Matières en mains, produits en cours de fabrication, etc.
1,882,591	2,256,774	Caisse, comptes et billets à recevoir.
36,828,006	43,216,127	Total du capital.
Nouveau-Brunswick		
—	5,601,248	Terrain, bâtiments et agencement.
—	2,183,527	Machinerie et outillage.
—	2,615,503	Matières en mains, produits en cours de fabrication, etc.
—	1,560,500	Caisse, comptes et billets à recevoir.
—	11,960,778	Total du capital.
Nouvelle-Ecosse.		
—	550,849	Terrain, bâtiments et agencement.
—	278,000	Machinerie et outillage.
—	50,846	Matières en mains, produits en cours de fabrications, etc.
—	328,560	Caisse, comptes et billets à recevoir.
—	1,208,255	Total du capital.
Ontario		
31,436,870	38,273,329	Terrain, bâtiments et agencement.
18,892,421	28,498,211	Machinerie et outillage.
9,853,785	13,157,071	Matières en mains, produits en cours de fabrication, etc.
6,818,624	15,352,429	Caisse, comptes et billets à recevoir.
67,001,700	95,281,040	Total du capital.
Québec		
32,022,388	52,990,882	Terrain, bâtiments et agencement.
25,442,395	31,689,447	Machinerie et outillage.
18,601,732	26,580,475	Matières en mains, produits en cours de fabrication, etc.
9,421,279	12,840,360	Caisse, comptes et billets à recevoir.
85,487,794	124,102,164	Total du capital.
Canada		
85,515,170	121,448,227	Terrain, bâtiments et agencement.
53,676,869	75,407,708	Machinerie et outillage.
32,002,967	46,572,806	Matières en mains, produits en cours de fabrication, etc.
18,122,494	32,338,623	Caisse, comptes et billets à recevoir.
189,317,500	275,767,364	Total du capital.

Tableau XIII.—Agencement des fabriques de pâte de bois, par genres de fabriques et par provinces

Ontario	Quebec	Canada	Nomenclature
11	148	186	Pulperies—
65	1,037	1,289	Nombre de broyeuses.
4,250	50,250	61,425	Capacité par 24 heures.
31,900	250,800	314,400	Force en chevaux-vapeur employée pour les broyeuses.
			Capacité annuelle des pulperies, tonnes (poids sec).
193	177	426	Pulperies et papeteries—
1,152	1,138	2,650	Nombre de broyeuses.
86,726	97,200	208,320	Capacité par 24 heures.
395,620	372,300	579,520	Force en chevaux-vapeurs employée pour les broyeurs.
			Capacité annuelle des pulperies, tonnes (poids sec).
204	325	612	Toutes fabriques de pâte.
1,217	2,195	3,939	Nombre de broyeuses.
90,970	147,450	269,745	Capacité par 24 heures.
427,520	623,100	1,193,920	Force en chevaux-vapeur employée pour les broyeurs.
			Capacité annuelle des pulperies, tonnes (poids sec).

APPENDIX--APPENDICE

PULP AND PAPER MILLS IN CANADA, 1919 FABRIQUES DE PULPE ET DE PAPIER DU CANADA, 1919

The following is a list of the producing mills in operation during 1919. arranged by provinces, classes of mills and products.

Voici une liste des établissements producteurs, qui étaient en activité en 1919: ils sont classés par provinces, par genres de fabriques et produits.

PULP MILLS—PULPERIES

Name	Location	Classes of products
Nom	Endroit	Genres de produits
		Pulp
		Pulpe
Whalen Pulp and Paper Mills, Ltd.	Mill Creek	B.C. Sulphite, unbl.
Whalen Pulp and Paper Mills, Ltd.	Swanson Bay	B.C. Sulphite, unbl.
Whalen Pulp and Paper Mills, Ltd.	Port Alice	B.C. Sulphite, bl. and, unbl.
Panstock Corporation	Caledonia	N.S. Ground wood.
Nova Scotia Wood Pulp and Paper Co., Ltd. (successors to Medway Pulp and Power Co.)	Charleston	N.S. Ground wood.
Macleod Pulp and Paper Co., Ltd.	Liverpool	N.S. Ground wood.
Becker and Co. of America, Ltd.(suce. to Clyde Pulp Co.)	Port Clyde	N.S. Ground wood.
La Hlave Pulp Company, Ltd.	New Germany	N.S. Ground wood.
Bathurst Lumber Co., Ltd.	Bathurst	N.B. Sulphite unbl. and sulphate.
Dominion Pulp Co., Ltd.	Chatham	N.B. Sulphite, unbl.
Fraser Companies, Limited	Edmundston	N.B. Sulphite, unbl.
Nashwaak Pulp and Paper Co., Limited	Fairville, St. John	N.B. Sulphite, bl.
St. George Pulp and Paper Co., Ltd.	St. George	N.B. Ground wood.
Riordon Pulp and Paper Co., Ltd.	Merriton	Ont. Sulphite, bl.
Mattagami Pulp and Paper Co., Ltd.	Smooth Rock Falls	Ont. Sulphite, unbl.
Port Arthur Pulp and Paper Co., Ltd.	Port Arthur	Ont. Sulphite, bl. and unbl.
Riordon Pulp and Paper Co., Ltd.	Ilawkesbury	Ont. Sulphite, bl. and unbl.
Hydro-Electric Power Commission of Ontario	Campbellford	Ont. Ground wood.
Thorold Pulp Co., Ltd.	Thorold	Ont. Ground wood.
Foley-Rieger Pulp and Paper Co., Ltd.	Thorold	Ont. Ground wood.
Bronson Co., Ltd.	Ottawa	Ont. Ground wood.
St. Lawrence Pulp and Lumber, Corporation.	Chicoutimi	Qué. Sulphite, unbl.
Ha Ha Bay Sulphite Co., Ltd.	Port Alfred	Qué. Sulphite, unbl.
Brown Corporation.	La Tuque	Qué. Sulphate.
Compagnie de Pulpe de Chicoutimi.	Chicoutimi	Qué. Ground wood.
Compagnie de Pulpe de Chicoutimi	Val Jalbert	Qué. Ground wood.
James MacLaren Co., Ltd.	Buckingham	Qué. Ground wood.
Brompton Pulp and Paper Co., Ltd.	Bromptonville	Qué. Ground wood.
Donnacona Paper Co., Ltd.	Pont Rouge	Qué. Ground wood.
Lake Megantic Pulp Co.	Lake Megantic	Qué. Ground wood.
Nairn Falls Power and Pulp Co., Ltd.	Murray Bay	Qué. Ground wood.
F. F. Soucy	Old Lake, Road	Qué. Ground wood.
Henry Atkinson, Regd.	Pont Eteheimin	Qué. Ground wood.
J. C. Wilson, Ltd.	St. Jérôme	Qué. Ground wood.
Quebec-Saguenay Pulp Co., Ltd.	St. Amédée de Péribonka	Qué. Ground wood.

RECENSEMENT INDUSTRIEL, 1919.**PULPE ET PAPIER****Préface.**

Les statistiques de l'industrie de la pulpe et du papier réunies dans ce rapport ont été recueillies et compilées en 1920; elles se rapportent à l'année terminée le 31 décembre 1919. Nous adressons nos remerciements aux fonctionnaires du ministère des Terres Domaniales de la Nouvelle-Ecosse, du ministère des Terres et Mines du Nouveau-Brunswick, du ministère des Terres et des Forêts de Québec, du ministère des Terres de la Colombie Britannique et à l'Association Canadienne de la Pulpe et du Papier, qui nous ont aidé à préparer la liste préliminaire des industriels de cette catégorie et dont le personnel a facilité les opérations du recensement.

Ce rapport a été préparé en collaboration, par le Bureau Fédéral de la Statistique et la Division Forestière, du ministère de l'Intérieur. Le travail de compilation a été fait au Bureau Fédéral de la Statistique, sous la direction de M. J. C. Macpherson; la vérification des chiffres et la rédaction du rapport sont l'œuvre de M. R. G. Lewis, de la Division Forestière.

R. H. COATS,
Statisticien du Dominion.

L'INDUSTRIE DE LA PULPE ET DU PAPIER EN 1919.

Introduction et résumé.

La comparaison des statistiques se rapportant à l'année civile 1919, telles qu'elles résultent du présent rapport, avec celles des années 1917 et 1918, témoignent de la continuation des progrès de l'industrie de la pulpe et du papier au Canada.

En 1917, il y avait 83 fabriques de pulpe et de papier en exploitation, dont la production atteignit \$96,340,327. En 1918, le nombre des pulperies et des papeteries s'est élevé à 94 et la valeur de leur production à \$119,309,434. En 1919, on en comptait 99, dont la production atteignait, \$139,921,001.

Dans l'état sommaire qui suit, on trouvera pour les années 1917, 1918 et 1919 les chiffres de la consommation du bois à pulpe par les pulperies et les quantités de bois abattu pour l'exportation.

Bois à pulpe	1917	1918	1919
	cordes	cordes	cordes
Consommé dans les pulperies.....	2,104,334	2,210,744	2,428,706
Abattu pour exportation.....	1,017,834	1,349,536	1,070,275
Total de la consommation.....	3,122,168	3,560,280	3,498,981

Les capitaux engagés dans cette industrie en 1919 sont également plus élevés que les années précédentes, ainsi qu'on peut le constater par le tableau suivant:

Répartition des capitaux	1917	1918	1919	P. c. d'augmentation	
				1918 sur 1917	1919 sur 1918
	\$	\$	\$	p. c.	p. c.
Terrains, bâtiments et agencement.....	84,461,837	118,805,581	121,448,227	40.66	2.22
Machinerie et outillage.....	39,266,596	60,627,266	75,407,708	2.29	2.38
Matières premières et produits en stock, etc.....	27,902,466	39,652,078	46,572,806	42.11	17.45
Caisse et comptes courants.....	15,156,506	22,259,779	32,338,623	46.86	45.28
Totaux.....	186,787,405	241,344,704	275,767,364	29.21	11.26

Les appointements et salaires qui s'élevaient, en 1917, à \$20,358,019 se sont élevés en 1918 à \$26,974,225 et, en 1919, à \$32,264,208, le pourcentage d'augmentation en 1918, sur 1917, étant 32.5 et en 1919 sur 1918, 19.61. Le nombre des commis et employés qui était de 1,563 en 1917 est monté à 1,929 en 1918 et à 2,405 en 1919, soit un accroissement d'approximativement 30 et 25 pour cent respectivement. Le nombre moyen des ouvriers et des journaliers établi à 21,402 en 1917 a été porté à 23,934 en 1918 et à 24,242 en 1919. L'augmentation en 1918 sur 1917 était de 11.83 pour cent et en 1919 sur 1918, 1.28 pour cent.

Ordre adopté.—Les statistiques du présent rapport traitent successivement des différentes phases de l'industrie, c'est-à-dire la production, les matières premières, les capitaux, la machinerie, la force motrice, le personnel, les appointements et salaires, la durée des travaux, les frais généraux et les exportations et importations.

Pour l'objet que nous avons en vue, les différents établissements engagés dans cette industrie ont été classés en trois catégories, savoir: (1) ceux qui fabriquent la pulpe exclusivement, appelés pulperies, (2) ceux qui fabriquent tout à la fois la pulpe et le papier, que nous désignerons sous le nom de pulperies-papeteries, et (3) ceux qui ne fabriquent que du papier, connus sous le nom de papeteries. Dans les tableaux qui vont suivre, les statistiques sont données séparément, d'abord pour chacun de ces groupes, puis collectivement sous le vocable "toutes fabriques".

Production.

Les tableaux introductifs du rapport (tableaux I et II) sont consacrés respectivement à la production de la pulpe de bois et du papier, dans chacune des provinces et dans la Puissance.

Pulpe.—En 1919, la production de pâte de bois pour l'ensemble des fabriques canadiennes a atteint 1,716,089 tonnes, au lieu de 1,557,193 tonnes en 1918 et 1,464,308 tonnes en 1917. Tandis que 924,162 tonnes de la production de 1918 étaient transformées en papier dans les établissements producteurs eux-mêmes, 791,927 tonnes étaient destinées à la vente ou à l'exportation. La vente de cette pulpe a rapporté \$48,485,746, soit une moyenne pour toutes les espèces de pulpe de \$61.22 par tonne. La quantité et la valeur de chaque sorte de pulpe fabriquée pour la vente, ainsi que sa valeur moyenne par tonne, prise à la fabrique, sont indiquées dans les tableaux suivants:

Sortes de pulpe fabriquée pour la vente	Quantité	Prix de vente à la fabrique	Prix moyen par tonne à la fabrique
	tonnes	\$	\$
Fibre mécanique.....	300,205	9,035,035	30.16
Fibre à la soude.....	3,174	297,113	93.60
Fibre au sulfite, blanchie.....	100,132	9,425,836	94.13
Fibre au sulfite, non blanchie.....	263,866	19,885,590	75.36
Fibre au sulfate.....	124,550	9,839,172	79.00
Total, toutes pulpes.....	791,927	48,485,746	61.22

La fibre au sulfite dont la production en 1918 se montait à 318,882 tonnes a été divisée, en 1919, en fibre blanchie et fibre non blanchie, ces deux sortes représentant ensemble 363,898 tonnes de sulfite pour cette année.

Il résulte des investigations faites en 1919 que 36 fabriques se sont livrées à la fabrication de la fibre mécanique; 28, de la fibre au sulfite non blanchie; 4, de la fibre au sulfite blanchie; 8, de la fibre au sulfate et 2 de la fibre à la soude.

Papier.—Le tableau II est consacré à la production du papier de tous genres, par quantités et valeur, pour chaque catégorie de fabriques. Les chiffres sont donnés, tant pour chacune des provinces que pour la Puissance. Le résumé qui suit donne le volume, la valeur absolue et la valeur par tonne de chaque espèce de papier et aussi le pourcentage respectif de chacune de ces espèces, par rapport à la production totale.

Sortes de papier	Volume	Valeur	Prix moyen par tonne	Pourcent. du total en volume	Pourcent. du total en valeur
	tonnes	\$	\$	p. c.	p. c.
Papier de journal.....	794,567	54,427,879	68.50	72.88	62.03
Papier à écrire et à imprimer les livres.....	58,228	12,571,000	215.89	5.34	14.33
Papier d'emballage.....	59,697	7,979,418	133.66	5.48	9.09
Cartons.....	137,678	8,892,046	64.58	12.63	10.13
Autres produits du papier.....	40,065	3,882,500	96.90	3.67	4.42
Tous autres produits.....		3,610,070			
Totaux.....	9,090,235	91,362,913	~	100.00	100.00

DOC. PARLEMENTAIRE No 17

On remarque qu'en 1919, le prix moyen par tonne est plus élevé qu'en 1918 pour chaque sorte de papier, si l'on en excepte le papier à écrire et à imprimer les livres. Le papier à journal est passé de \$62.91 par tonne en 1918, à \$68.50 par tonne en 1919, soit une augmentation de 9 pour cent; le papier d'emballage, de \$119.99 par tonne en 1918, à \$133.66 par tonne en 1919, soit 11.4 pour cent; les cartons, de \$63.26 par tonne en 1918, à \$64.38 par tonne en 1919 ou 1.7 pour cent et les autres produits du papier, de \$91.90 par tonne en 1918 à \$96.90 par tonne en 1919, ou 6.36 pour cent. Le papier à écrire et à imprimer les livres, qui valait \$222.90 par tonne en 1918, est descendu à \$215.89 en 1919, soit une diminution de 3.2 pour cent.

Le papier à journal qui, en 1918, constituait 75.93 pour cent du volume total et 63.22 pour cent de la valeur totale des papiers fabriqués est tombé en 1919 à 72.88 pour cent du volume et 62.03 pour cent de la valeur. Le papier à écrire et à imprimer les livres est passé de 4.97 à 5.34 pour cent du volume, mais il est descendu de 14.68 à 14.33 de la valeur. Le papier d'emballage a décréu tant en volume qu'en valeur, son volume descendant de 6.32 pour cent en 1918 à 5.48 pour cent en 1919 et sa valeur de 10.04 en 1918 à 9.09 pour cent en 1919. Les cartons ont avancé dans les deux directions, leur volume ayant passé de 9.07 en 1918 à 12.63 en 1919 et leur valeur de 7.49 en 1918, à 10.13 en 1919. On remarque une légère décroissance dans les autres produits du papier, dont le volume est descendu de 3.71 pour cent en 1918, à 3.67 en 1919 et la valeur de 4.47 en 1918 à 4.42 en 1919.

Les différentes sortes de papier que nous venons d'énumérer absorbaient les activités de l'industrie dans les proportions suivantes: le papier à journal était fabriqué dans 24 papeteries, le papier d'emballage dans 19, le papier à écrire et à imprimer les livres dans 17, les cartons dans 13 et les autres produits du papier dans 18 établissements.

Le tableau qui suit indique l'importance respective de la fabrication du papier dans les provinces:

Sortes de papier		Colombie Britannique	Ontario	Québec	Canada
Papier de journal.	-tonnes	125,904	352,254	316,409	794,567
	-valeur	8,361,503	23,958,655	22,107,810	54,427,879
Papier à écrire et imprimer les livres..	-tonnes	-	39,023	19,205	58,228
	-valeur	-	7,437,657	5,133,343	12,571,000
Papier d'emballage.....	-tonnes	9,406	10,193	40,098	59,697
	-valeur	993,225	1,535,078	5,451,115	7,979,415
Cartons	-tonnes	-	92,355	45,323	137,678
	-valeur	-	5,287,703	3,604,343	8,892,046
Autres produits du papier....	-tonnes	-	4,967	35,098	40,065
	-valeur	-	799,881	3,082,619	3,882,500
Tous autres produits.....	-valeur seulement	475,921	911,580	2,222,560	3,610,070
Totaux: volume		13135,310	489,792	456,133	1,090,235
valeur des produits		9,830,649	39,930,474	41,601,790	91,362,913

Matières premières

Matières premières servant à la fabrication de la pulpe.—Les tableaux III à VI indiquent la quantité et l'essence des différents bois que l'on transforme en pulpe et qui forment la principale substance de ce produit et le tableau VIII s'occupe des matières premières d'ordre secondaire, employées concurremment avec le bois dans la fabrication de la pulpe chimique.

Le tableau III contient les détails de la consommation du bois à pulpe, par province, pour les années civiles 1918 et 1919. Québec tient la tête à cet égard avec un total de 1,176,134 cordes, soit 48.42 pour cent de la totalité du bois consommé. Ontario vient ensuite avec 840,856 cordes ou 34.62 pour cent. Les autres provinces présentent toutes également des augmentations de la

quantité de bois consommée par elles. Le prix moyen d'une corde de bois à pulpe, conduit à la fabrique, est considérablement plus élevé qu'en 1918; il oscille entre \$15.60 par corde dans Ontario et \$7.40 par corde en Nouvelle-Ecosse, la moyenne pour la Puissance s'établissant à \$12.90 par corde, en augmentation sur le prix de 1918 de \$1.64 par corde ou, approximativement, 14.6 pour cent. En 1919, 66 manufactures se livraient à la fabrication de la pulpe, dont 29 situées dans Québec, 22 dans Ontario, 5 dans la Colombie Britannique, 5 en Nouvelle-Ecosse, et 5 au Nouveau-Brunswick.

On trouve dans le tableau IV les différentes essences de bois servant à cette fabrication. L'épinette domine toutes les espèces, avec 1,787,868 cordes, ou 73.61 pour cent de la totalité de tous bois. Le sapin-baumier vient ensuite avec 490,327 cordes ou 20.19 pour cent et la pruche troisième, avec 118,013 cordes, ou 4.86 pour cent. Les autres essences sont loin d'être aussi importantes, aucune d'elles ne représentant 1 pour cent du total. L'épinette est broyée dans 61 manufactures, le sapin-baumier dans 33, la pruche dans 8, le peuplier dans 4, le pin gris dans 3 et les autres essences dans 2.

La consommation de bois à pulpe en 1918 et 1919, selon les différents procédés de fabrication, est relatée dans le tableau V. Le procédé au sulfite a absorbé 1,127,629 cordes ou 46.43 pour cent du total; le broyage mécanique 1,010,457 cordes ou 41.61 pour cent; le procédé au sulfate 281,360 cordes ou 11.58 pour cent, et le procédé à la soude 9,230 cordes ou 38 pour cent. La pulpe mécanique était fabriquée dans 46 manufactures, la pulpe au sulfite dans 28, la pulpe au sulfate dans 8 et la pulpe à la soude dans 2.

Le tableau VI est une combinaison des tableaux III à V, en ce qu'il présente la relation du bois à pulpe, par provinces, par essences et par procédés, établissant ainsi un parallèle et un contraste. Le tableau VII indique la consommation et la valeur du bois à pulpe, par essences et par catégories de manufactures pour la Puissance et pour chacune des provinces, en établissant une distinction entre le bois acheté et celui abattu dans les terres boisées appartenant à l'industriel. En 1919, il en a été consommé 2,428,706 cordes, soit 217,962 cordes de plus qu'en 1918; sur ce total, 1,006,934 cordes avaient été achetées et 1,421,772 cordes avaient été coupées dans les propriétés des industriels. L'épinette distince de loin toutes les autres essences servant à la fabrication de la pulpe, avec 1,787,868 cordes ou 73.61 pour cent de la totalité du bois consommé. Près de 60 pour cent de l'épinette furent coupés dans les propriétés des industriels, tandis que 40 pour cent étaient achetés. Le sapin-baumier se place au second rang avec 490,327 cordes en 1919, au lieu de 447,243 cordes en 1918, soit une augmentation de volume d'environ 9.6 pour cent. La pruche, avec 118,013 cordes, le pin gris, avec 15,402 cordes, le peuplier avec 7,228 cordes et les autres essences avec 9,868 cordes (principalement le cèdre) étant les essences secondaires figurant au questionnaire.

La fabrication de la pulpe mécanique a absorbé 1,010,457 cordes de bois en 1919, au lieu de 873,084 cordes en 1918, soit une augmentation de 137,373 cordes ou 15.73 pour cent. Les procédés chimiques ont transformé 1,418,249 cordes en 1919, au lieu de 1,337,660 cordes en 1918, soit une augmentation de 80,589 cordes ou 6 pour cent.

Nous donnons ci-dessous la valeur du bois consommé en 1917, 1918 et 1919, dans les pulperies ainsi que son prix moyen par corde, avec distinction entre le bois acheté et celui appartenant aux industriels.

Année	Acheté		Appartenant aux industriels		Prix moyen d'une corde	
	Cordes	Valeur	Cordes	Valeur	Appartenant	Acheté
		\$		\$	\$	\$
1917	539,303	5,549,335	1,665,031	13,268,148	10.25	8.48
1918	717,097	8,981,307	1,493,647	15,905,168	12.52	10.65
1919	1,006,934	13,949,853	1,421,772	17,397,833	13.85	12.24

DOC. PARLEMENTAIRE No 17

Le prix moyen de la corde de bois diffère selon les procédés de fabrication; il est plus élevé dans le procédé mécanique et le procédé au sulfite et est plus bas dans le procédé au sulfate, lequel permet l'usage de bois de qualité inférieure. En 1919, le bois transformé en pâte par le procédé mécanique valait \$13.14 la corde, contre \$11.40 en 1918. Le bois traité par le procédé au sulfite valait \$13.02 la corde en 1919, contre \$11.64 en 1918 et celui traité au sulfate valait \$11.63 en 1919, contre \$9.41 en 1918.

Le tableau comparatif qui suit, couvrant les années 1917, 1918 et 1919, nous indique la quantité de pulpe produite par une corde de bois, selon les différents procédés de fabrication.

Année	Livres de pulpe produites par corde de bois			
	Soude	Sulfate	Sulfite	Pâte de bois
	liv.	liv.	liv.	liv.
1917.....	930	1,105	1,063	2,043
1918.....	980	1,133	1,037	2,039
1919.....	996	1,126	997	1,961

On trouvera dans le tableau IX les détails pour chaque province et pour chaque catégorie de manufactures du bois consommé et de la pulpe produite.

Les autres matières premières utilisées dans la fabrication de la pulpe de bois font l'objet du tableau VIII. Dans tous les cas, la valeur indiquée est le prix coûtant à la fabrique. La province de la Nouvelle-Ecosse est exclue de ce tableau, car sa production se limite exclusivement à la pâte de bois mécanique.

Matières premières employées à la fabrication du papier.—Le tableau X est consacré aux matières premières employées à la fabrication du papier, par chaque province et par catégories de manufactures. La pulpe constitue la substance principale et nous apprenons que 1,037,231 tonnes de pâte de bois ont été transformées en papier, dont 921,490 tonnes étaient produites par les papeteries elles-mêmes et 115,741 tonnes avaient été achetées à d'autres manufactures. La valeur de la pulpe achetée atteignait \$9,148,338, soit une moyenne calculée sur toutes espèces de pulpe, d'approximativement \$80 par tonne. Il a été acheté 44,986 tonnes de pulpe mécanique valant \$2,962,699, soit en moyenne, \$65.85 par tonne; 1,822 tonnes de fibre à la soude valant \$213,965, ou \$117.43 par tonne; 18,432 tonnes de fibre au sulfite blanchie valant \$2,430,945, soit en moyenne \$131.89 par tonne; 44,237 tonnes de fibre au sulfite non blanchie valant \$3,101,869, soit en moyenne \$70.12 par tonne et enfin 6,264 tonnes de fibre au sulfate, valant \$438,860, soit une moyenne par tonne de \$70.06. Quant aux autres substances, leur volume et leur coût sont également donnés en détail; leur valeur totale s'élève à \$8,656,596, ce qui fait un grand total de \$17,804,934, représentant la valeur des matières premières achetées. .

A ce total il convient d'ajouter la pulpe produite par les papeteries elles-mêmes, soit 921,490 tonnes d'une valeur de \$24,834,532, formant un total définitif de \$42,639,466 pour toutes les matières employées à la fabrication du papier.

Consommation du combustible.—Le tableau XI consacré au combustible indique la quantité et la valeur des différentes sortes de combustible consommé dans chaque catégorie de fabriques au cours de l'année terminée le 31 décembre 1919. La totalité du coût du combustible consommé par cette industrie s'élève à \$10,549,493, dans laquelle somme la houille bitumineuse entre pour \$9,408,721, soit approximativement 90 pour cent de tout le combustible. Dans

l'état qui suit on verra les différentes sortes de combustible consommé dans la Puissance, avec indication de son origine.

Sortes de combustible		De provenance canadienne		De provenance étrangère	
		Quantité	Valeur	Quantité	Valeur
			\$		\$
Houille bitumineuse, menue	ton.	20,807	156,802	458,868	3,588,425
Houille bitumineuse, en morceaux	"	1,160	9,563	230,864	1,579,628
Houille bitumineuse, tout venant	"	206,225	1,665,253	284,348	2,409,050

Moyens de production—(1) Capital—Machinerie—Force motrice.

Les tableaux XII à XVI inclusivement sont consacrés aux moyens de production d'une nature fixe ci-dessus mentionnés.

Capital.—Dans le tableau XII on trouve le capital réparti sous quatre rubriques distinctes: (a) terrains, bâtiments, agencement, (b) machinerie et outillage, (c) matières premières en mains, stocks en voie de fabrication, produits ouvrés en magasin et approvisionnements de combustible et autres et (d) fonds de roulement, caisse et comptes courants. Les détails en sont donnés dans les relevés suivants, par catégories de fabriques et pour tout le pays.

Nomenclature	Papeteries	Pulperies	Pulperies- papeteries	Toutes fabriques
	\$	\$	\$	\$
Terrains, bâtiments, agencement	7,156,078	28,776,979	85,515,170	121,448,227
Machinerie et outillage	3,811,936	17,918,903	53,676,869	75,407,708
Matières premières en main, stocks en voie de fabrication, produits ouvrés, etc.	2,502,934	12,066,905	32,002,967	46,572,806
Caisse et comptes courants	3,082,328	11,133,801	18,122,494	32,338,623
Totaux ..	16,553,276	69,896,588	189,317,500	275,276,364

Nous donnons ci-dessous les capitaux absorbés par les différentes provinces:

Provinces	Papeteries	Pulperies	Papeteries- pulperies	Toutes fabriques
	\$	\$	\$	\$
Colombie Britannique	—	6,388,121	36,828,006	43,216,127
Ontario	—	11,960,778	—	11,960,778
Québec	—	1,208,255	—	1,208,255
Nouveau-Brunswick	6,703,756	21,575,584	67,001,700	95,281,040
Nouvelle-Ecosse	9,849,520	28,763,850	85,487,794	124,101,164
Totaux pour le Canada	16,553,276	69,896,588	189,317,500	275,276,364

DOC. PARLEMENTAIRE No 17

Le pourcentage de chacun des item par rapport à la totalité des capitaux et le pourcentage par provinces et pour chaque catégorie de fabrique s'établit ainsi qu'il suit:

(a) Pourcentage du total des capitaux.

Nomenclature	Papeteries, pourcentage	Pulperies, pourcentage	Pulperies- papeteries, pourcentage	Toutes fabriques, pourcentage
Terrains, bâtiments, agencement.....	43.23	41.17	45.17	44.04
Machinerie et outillage.....	23.03	25.64	28.35	27.34
Matières premières en main, stock en voie de fabrication, produits ouvrés.....	15.12	17.26	16.91	16.89
Caisse et comptes courants.....	18.62	15.93	9.57	11.73
Totaux.....	100.00	100.00	100.00	100.00

(b) Pourcentage de chaque province.

Provinces—				
Colombie Britannique.....	—	9.14	19.45	15.67
Nouveau-Brunswick.....	—	17.11	—	4.34
Nouvelle-Ecosse.....	—	1.73	—	.44
Ontario.....	40.50	30.87	35.40	34.55
Québec.....	59.50	41.15	45.15	45.00
	100.00	100.00	100.00	100.00

Il résulte du tableau qui précède que les terrains, bâtiments et agencement représentent la plus grosse partie des sommes placées dans cette industrie; leur proportion atteint 45.17 pour cent dans les papeteries et pulperies combinées. Viennent ensuite la machinerie et l'outillage, le pourcentage le plus élevé se trouvant encore dans les papeteries et pulperies combinées. Les matières premières, stocks en voie de fabrication, etc., suivent; leur pourcentage le plus élevé, 17.26, se trouve dans les pulperies. Les papeteries possèdent les fonds de roulement les plus importants, avec 18.63 pour cent, suivies par les pulperies avec 15.93 pour cent et les papeteries-pulperies, avec 9.57 pour cent.

Pour l'ensemble des catégories de fabriques, le pourcentage le plus élevé se trouve dans la province de Québec, avec 45 pour cent de la totalité, Ontario se place au second rang, avec 34.55 pour cent et la Colombie Britannique au troisième, avec 15.67 pour cent.

Machinerie.—Dans les pulperies fabriquant la pâte de bois mécanique, il existe 612 broyeurs, ayant une capacité de 3,939 tonnes par 24 heures et une capacité annuelle de 1,193,920 tonnes de pulpe, pesée à sec. La province de Québec possède à elle seule 325 de ces broyeurs, ayant une capacité quotidienne de 2,195 tonnes et une capacité annuelle de 623,100 tonnes, poids sec. La pulpe de bois effectivement fabriquée au Canada en 1919, forme un volume de 990,902 tonnes, soit près de 83 pour cent de la capacité potentielle; en 1918, le même pourcentage a été 76.74. Dans Québec, il a été fabriqué 515,457 tonnes de pulpe par des machines dont la potentialité atteignait 623,100 tonnes, soit 82.72 pour cent; dans Ontario, 351,572 tonnes sur un total possible de 427,520 tonnes, soit 82.23 pour cent; dans la Colombie Britannique, 99,967 tonnes, sur un total possible de 111,600 tonnes, soit 89.57 pour cent. En Nouvelle-Ecosse où l'on fabrique exclusivement la pâte de bois mécanique, 17,659 tonnes, sur un total possible de 24,200 tonnes, soit 72.97 pour cent du total possible et au Nouveau-Brunswick 6,447 tonnes sur un total possible de 7,500 tonnes, soit 85.96 pour cent.

Le tableau XIV énumère la machinerie des fabriques où l'on produit la pulpe par les procédés chimiques. Les digesteurs, qui étaient au nombre de 134 en 1918, se dénombraient par 137 en 1919, la capacité, en tonnes par cuisson, ayant passé de 633 tonnes en 1918 à 915 tonnes en 1919 et la capacité annuelle des fabriques de 810,697 tonnes en 1918 à 890,100 tonnes en 1919.

Le pourcentage de la production effective de la pulpe chimique par rapport à la capacité potentielle, tant pour le Canada dans chaque province, est indiqué dans le tableau suivant:

Provinces	Capacité potentielle	Production	Pourcen- tage de la productioa
	tonnes	toanes	p.c.
Colombie Britannique.....	104,260	94,359	90.50
Nouveau-Brunswick.....	90,000	68,739	76.38
Ontario.....	308,240	246,255	79.89
Québec.....	387,600	315,834	81.49
Canada	890,100	725,187	81.47

Machinerie des papeteries.—La machinerie constituant l'agencement des papeteries fait l'objet du tableau XV. La capacité potentielle annuelle de toutes les papeteries atteint 1,162,377 tonnes, en augmentation de 142,843 tonnes sur l'année précédente. En 1919, il a été produit 1,090,235 tonnes de papier et de produits du papier, soit près de 93.80 pour cent du total possible. Ontario tient la tête pour la production du papier, avec 498,792 tonnes, sur une capacité potentielle de 513,593 tonnes, soit 97.11 pour cent. Québec suit avec une production réelle de 456,133 tonnes et une capacité potentielle de 510,784 tonnes, soit 89.30 pour cent et la Colombie Britannique vient en troisième lieu, avec une production effective de 135,310 tonnes, sur une capacité potentielle de 138,000 tonnes, soit 98.0 pour cent. Il résulte des énonciations qui précèdent que la marge entre la production possible et la production réelle au cours de l'année, représentait 6.20 pour cent pour la Puissance, 2.89 pour cent dans Ontario, 10.70 pour cent dans Québec et 2.0 pour cent dans la Colombie Britannique.

Force motrice employée.—Les différentes sortes de force motrice employées dans l'industrie sont mentionnées dans le tableau XVI, par provinces et par catégories de fabriques. En 1919, on comptait 4,584 machines motrices susceptibles de développer 623,588 chevaux-vapeur dont 512,886 chevaux-vapeur furent effectivement utilisés. La force motrice hydraulique tient le premier rôle, avec 356 unités, d'une capacité de 290,164 chevaux-vapeur, dont 245,022 furent effectivement utilisés. L'électricité vient ensuite, avec 3,433 unités susceptibles de produire 198,930 chevaux-vapeur, dont 150,648 chevaux-vapeur ont été effectivement utilisés. Il y avait aussi 261 machines à vapeur ou turbines à vapeur, pouvant développer toutes ensemble 47,586 chevaux-vapeur dont 38,133 effectivement utilisés. Les pulperies et papeteries combinées ont consommé 61.29 pour cent de cette force motrice, les pulperies 32.97 pour cent et les papeteries 5.74 pour cent. Par province, cette consommation se répartit ainsi qu'il suit: Québec 48.91 pour cent, Ontario 28.54 pour cent, Colombie Britannique 14.66 pour cent; Nouveau-Brunswick 5.76 pour cent et Nouvelle-Ecosse 2.3 pour cent.

DOC. PARLEMENTAIRE No 17

Moyens de production—(2) Personnel, traitements, appointements, salaires et durée des opérations.

Toutes les données relatives au travail sont concentrées dans les tableaux XVII à XX, tant par provinces que par catégories de fabriques.

Personnel, traitements, appointements et salaires.—Le tableau XVII traite du personnel d'exploitation; il nous indique le nombre de personnes des deux sexes que fait travailler cette industrie, soit comme employés, soit comme main-d'œuvre et le chiffre de leur rémunération, tant en traitements et appointements qu'en salaires. Nous donnons ci-dessous un état comparatif du nombre du personnel classifié et des traitements, appointements et salaires payés durant les années 1918 et 1919.

		Hommes	Femmes	Traitements, appointements et salaires	Pourcentages d'augmentation	
					Personnel	Traitement., appointem. et salaires
		nombre	nombre	\$	p.c.	p.c.
Administrateurs, directeurs et gérants	{ 1918	462	2	1,807,468		
	{ 1919	542	18	2,054,574	20.69	13.67
Commis, sténographes et autres employés de bureau	{ 1918	1,164	301	1,888,151		
	{ 1919	1,485	360	2,636,096	25.94	39.64
Ouvriers et journaliers, nombre moyen.....	{ 1918	23,086	848	23,278,666		
	{ 1919	23,346	896	27,573,538	1.29	18.46
Totaux	{ 1918	24,712	1,151	26,974,235		
	{ 1919	25,373	1,274	32,264,208	3.03	19.61

On constate par le résumé ci-dessus que le personnel employé par cette industrie s'est augmenté durant l'année de 784 unités ou 3.03 pour cent. Dans la première catégorie, l'augmentation se traduit par 96 personnes ou 20.03 pour cent; dans la seconde catégorie, cette augmentation atteint 380 personnes ou 25.92 pour cent. Les ouvriers et journaliers ont augmenté de 784, soit de 1.29 pour cent. Les traitements, appointements et salaires payés durant 1918-19 continuent leur marche ascendante, quoique dans une proportion moindre qu'en 1917-18; les traitements ont subi une hausse de 13.67 pour cent, les appointements de 39.64 pour cent et les salaires de 18.46 pour cent. Ces augmentations forment pour l'ensemble des fabriques une somme de \$5,289,983, soit 19.61 pour cent. En jetant un coup d'œil sur l'état ci-dessous, on établira facilement un parallèle entre la moyenne des traitements, appointements et salaires en 1918 et la même moyenne en 1919.

Personnel	Moyenne des gains		Augmentation	
	1918	1919	Absolue	Pourcentage
Administrateurs, directeurs et gérants.....	\$ 3,895	\$ 3,669	\$ —226	p.c. —5.80
Commis, sténographes, etc.	1,289	1,429	140	10.86
Ouvriers et journaliers.....	972	1,137	165	16.98

On remarquera une diminution sensible dans la moyenne des traitements des administrateurs, directeurs et gérants depuis l'année dernière, laquelle représente 5.85 pour cent. Ceci s'explique par le fait que les 96 nouveaux employés entrés en 1909 n'ont reçu que \$247,106 et peut-être moins, si l'on fait entrer

12 GEORGE V, A. 1922

en ligne de compte les augmentations reçues par les autres. Ces nouveaux employés ont donc reçu en moyenne chacun \$2,574, au lieu de \$3,895 en 1918, circonstance ayant pour effet d'abaisser la moyenne générale des traitements. La seconde catégorie, celle des commis, a reçu une augmentation moyenne de \$140 par personne, soit 10.86 pour cent. Enfin, la troisième catégorie, c'est-à-dire la classe ouvrière a bénéficié d'une augmentation moyenne de \$165 par personne, soit 16.98 pour cent.

Durée des opérations.—Dans le tableau XVIII se trouve l'indication du nombre des ouvriers occupés pendant chaque mois de l'année dans les différentes fabriques. Dans les pulperies, les mois de plus grande activité se placent entre octobre et décembre et ceux de morte-saison de janvier à mars. Dans les pulperies-papeteries on a travaillé avec une grande activité de juin à décembre, la morte-saison s'étant produite entre janvier et juin. On ne trouve pas dans les papeteries les variations qui affectent les autres fabriques: on constate toutefois qu'elles ont employé le plus grand nombre d'ouvriers en novembre et le plus petit nombre en mai.

Classification des salaires hebdomadaires.—Le tableau XIX, consacré à la rémunération de la classe ouvrière, nous fait connaître la moyenne de ses gains hebdomadaires, selon son sexe et son âge, par catégorie de fabriques et par provinces. On a établi une gradation de \$1 pour les salaires allant de \$5 jusqu'à \$16 par semaine et une gradation de \$2 pour les salaires de \$16 à \$30 par semaine. Sur les 25,177 ouvriers et journaliers vivant de cette industrie, 760, soit approximativement 3 pour cent gagnaient moins de \$10 par semaine au lieu de 1,173 ou 5 pour cent en 1918; 1,751 ouvriers et journaliers, ou 6.95 pour cent, recevaient entre \$10 et \$15 par semaine, au lieu de 3,062 ou 13.14 pour cent en 1918. Ceux dont le salaire est de \$15 à \$20 par semaine se dénombreraient par 5,528 ou 21.96 pour cent, au lieu de 7,499 ou 32.2 pour cent en 1918. Enfin, 17,138 d'entre eux, ou 68.07 pour cent ont reçu plus de \$20 par semaine en 1919, au lieu de 11,577 ou 49.66 pour cent en 1918. Le relevé ci-dessus nous donne les salaires hebdomadaires de la classe ouvrière, dans chaque groupe.

	1919				Total	1918				Total
	Au-dessus de 16 ans		Au-dessous de 16 ans			Au-dessus de 16 ans		Au-dessous de 16 ans		
	Hommes	Femmes	Garçons	Filles		Hommes	Femmes	Garçons	Filles	
Au-dessous de \$5.	8	20	21	20	60	—	2	—	—	2
\$5 mais moins de \$6	3	5	10	16	34	17	7	8	11	43
\$6 mais moins de \$7	39	65	21	8	133	18	29	28	10	85
\$7 mais moins de \$8	87	87	21	29	224	63	112	9	3	187
\$8 mais moins de \$9	122	210	13	16	361	56	104	21	7	188
\$9 mais moins de \$10	216	111	22	3	352	90	132	23	10	255
\$10 mais moins de \$12	371	148	23	—	542	196	187	74	—	457
\$12 mais moins de \$15	2,402	102	16	—	2,520	1,098	162	33	1	1,294
\$15 mais moins de \$20	7,420	22	55	2	7,499	5,405	98	24	1	5,528
\$20 et plus	11,566	10	1	—	11,577	17,079	26	33	—	17,138
Totaux	22,234	780	203	41	23,311	24,022	859	253	43	25,177

L'augmentation générale des salaires hebdomadaires est le trait le plus saillant qui ressort du tableau ci-dessus; en effet, le nombre des petits salariés a décréu et celui des mieux rémunérés s'est accru. En 1918, on n'en comptait que 11,577 dans le groupe recevant plus de \$20.00 par semaine, tandis qu'en 1919 ce groupe compte 17,138 personnes, soit une augmentation dans l'année de 5,561.

Le tableau XX donne la moyenne de la durée du travail dans chaque catégorie de fabriques et nous indique pendant combien de temps elles ont

DOC. PARLEMENTAIRE No 17

fonctionné (a) en travaillant tout le jour, (b) pendant trois quarts d'une journée, (c) pendant une demi-journée, (d) pendant moins d'une demi-journée et enfin pendant combien de jours elles ont cessé leur travail. Ce sont les pulperies-papeteries qui ont fourni la plus grande somme de travail, c'est-à-dire 293 jours entiers, 5 parties de journées et 6 jours d'inactivité. Les papeteries occupent le second rang, avec 270 jours entiers, 10 parties de journées et 24 journées d'inactivité. Les pulperies ont subi le plus long chômage; elles ont travaillé pendant 240 jours entiers, 21 fractions de journées et sont restées fermées pendant 43 jours. Les ouvriers des pulperies ont travaillé en moyenne 9.7 heures par jour et 61 heures par semaines; ceux des papeteries ont travaillé 9 heures par jour et 56.5 heures par semaine. Ceux des pulperies-papeteries n'ont travaillé que 8 heures par jour et 48 heures par semaine.

Frais généraux de production

Les dépenses diverses ou frais généraux de production se trouvent dans le tableau XXI pour chaque province et pour chaque catégorie de fabriques. Sous cette rubrique, on trouve ce qui suit:

	\$
Loyers de bureaux, d'usines et de machinerie.....	295,191
Achat de force motrice.....	1,761,554
Primes d'assurance.....	891,257
Taxes.....	1,441,729
Droits régalien, usage de brevets, etc.....	29,241
Publicité.....	117,664
Voyages.....	338,954
Réparations ordinaires aux bâtiments et aux machines.....	5,163,165
Toutes autres dépenses.....	6,990,657
Total	\$ 17,029,412

Les frais généraux non classifiés constituent la dépense la plus importante, car elle représente 41.05 pour cent de la totalité; les réparations ordinaires aux bâtiments et à la machinerie absorbent 30.32 pour cent; l'achat de force motrice 10.34 pour cent; les taxes municipales, provinciales et fédérales 84.7 pour cent; l'assurance 5.23 pour cent; les voyages 1.99 pour cent, les loyers de bureaux, etc., 1.73 pour cent, la publicité 0.69 pour cent et les droits régalien, etc., 0.17 pour cent.

Exportations et importations de bois à pulpe, de pulpe de bois et de papier en 1919

Bois à pulpe.—Les tableaux numérotés XXII et XXIII de ce rapport sont consacrés aux exportations de bois à pulpe, par provinces, pendant une série d'années. Le tableau XXII donne la quantité et la valeur du bois à pulpe exporté pendant les années civiles 1916, 1917, 1918 et 1919. On constate une diminution tant en quantité qu'en valeur sur l'année dernière, cette diminution étant de 279,261 cordes et de \$2,406,203. En 1919, la moyenne du prix de toutes les essences de bois exporté s'établit à \$9.71 par corde. Le tableau XXIII indique, outre les exportations, les quantités consommées, ces deux volumes réunis formant le total de la production du bois à pulpe au Canada pendant l'année. On observera que tandis que le bois à pulpe consommé dans nos fabriques augmente d'année en année, l'exportation est sujette à des fluctuations considérables. La province de Québec a fourni 61.8 pour cent du total du bois à pulpe exporté, Ontario 18.3 pour cent, le Nouveau-Brunswick 18.2 pour cent, la Colombie Britannique 1.5 pour cent et la Nouvelle-Ecosse un peu plus de un dixième de 1 pour cent. La totalité du bois à pulpe exporté

12 GEORGE V, A. 1922

en 1919 est allée aux Etats-Unis. Le Canada n'a pas importé de bois à pulpe en 1919.

Pulpe de bois.—Le tableau XXIV nous renseigne sur les exportations de pulpe de bois, par pays de destination, pendant les années civiles 1917, 1918 et 1919. Pendant cette dernière année, le Canada a exporté 709,129 tonnes de pulpe, dont 311,551 tonnes de pulpe mécanique et 397,578 tonnes de pulpe chimique. Un changement qui s'est opéré en 1919 dans la classification de la pulpe chimique permettra d'indiquer dans les futurs rapports le détail des différentes espèces. Plus de 56 pour cent de la pulpe mécanique et 79 pour cent de la pulpe chimique ont été exportés aux Etats-Unis. Le Royaume-Uni nous a acheté 30 pour cent de la pulpe mécanique et 10 pour cent de la pulpe chimique. La France et le Japon sont, après ceux-ci, nos meilleurs clients. Les importations de pulpe de bois, par pays d'origine, font l'objet du tableau XXV. En 1917, et 1918 la totalité de nos importations venaient des Etats-Unis mais en 1919 nous en avons reçu une petite quantité du Royaume-Uni.

Papier.—Les exportations de papier de toutes sortes, par quantités et par valeur, figurent dans le tableau XXVI, qui se rapporte aux années 1917, 1918 et 1919. Les exportations ont passé de \$35,621,932 en 1917, à \$42,950,759 en 1918, ayant ainsi augmenté de 20 pour cent, mais en 1919 leur valeur s'est élevée à \$59,983,269, soit une augmentation sur 1918 de près de 40 pour cent. Nous donnons ci-dessous le nom des pays auxquels nous avons vendu du papier à journal et la valeur de nos exportation:—

1919

Pays	Valeur	Pourcentage
	\$	p.c.
Etats-Unis.....	43,603,922	87.54
Royaume-Uni.....	1,184,562	2.38
Australie.....	2,470,057	4.95
Afrique du Sud.....	197,045	0.40
Nouvelle-Zélande.....	623,792	1.25
Autres pays.....	1,731,984	1.48
Total	49,811,162	100.00

Quant au papier importé durant les années 1917, 1918 et 1919 on en trouve la valeur et le volume dans le tableau XXVII. Ces importations augmentent annuellement, mais dans une proportion moindre que les exportations. Le pourcentage d'augmentation qui était de 7.6 en 1918 s'est élevé en 1919 à plus de 9.0. Durant cette dernière année le chiffre de nos importations a atteint \$9,246,414.
