# ANNUAL REPORT OF MR. G. O. BUCHANAN, SUPERVISOR OF LEAD BOUNTY CLAIMS.

KASLO, B.C., January 9, 1915.

F. C. T. O'HARA, Esq.,  
Deputy Minister,  
The Department of Trade and Commerce,  
Ottawa.

SIR,—I beg to present herewith my report of the operation of the Lead Bounty Act, for the calendar year 1914.

Except for one day in April, and five days in November, the standard price of pig lead as quoted upon the Metal Exchange in London, has been above the limit of £17 17s. 9d., which is the highest quotation at which any fraction of the bounty is payable. At the beginning of the war the London Metal Exchange was closed, and it remained closed from July 31 until November 9. The quotation on July 30 was £18 15s. 0d., and on November 9, £18 2s. 6d.

For the intermediate period there were no quotations having legal validity, but a committee of members of the Metal Exchange made public a figure for each month, which in their opinion represented fairly the average price of pig lead.

These prices are as below:—

The figures are given in pounds sterling, per ton of 2,240 pounds.			
	£	s.	d.
August.....	20	9	9
September.....	18	16	3
October.....	17	9	10 64/100.
November.....	18	5	0

These estimates, if adopted by the department, will carry a bounty payment of about ten cents per 100 pounds of lead for all of the lead received at the smelter for the month of October.

For the fiscal year ending March 31, 1914, I certified to claims for bounty amounting to \$8,158.08.

As the amount was so small I incurred no expense for travelling or for assistance, and succeeded in getting practically all claims adjusted and forwarded to the department before April 10.

The receipts of lead in ore, at the smelter of the Consolidated Mining and Smelting Company at Trail, for 11 months of the year to November 30, have been..... 48,197,262 pounds

I estimate that the receipts for December have  
been..... 3,302,738 “

Making a total for the year of..... 51,500,000 “

The figures for 1913, were:—

Receipts at Trail smelter..... 54,241,325 “  
“ Kingston smelter..... 1,474,318 “

A total of..... 55,715,643 “

For the first nine months of the year, the receipts at Trail were 41,977,380 pounds. Had this ratio continued, the total receipts for 1914 would have exceeded slightly the total for 1913. Following, however, the beginning of hostilities in Europe, the Consolidated Company for some weeks declined to accept silver-lead ores, and this forced suspension of operations upon many properties.

The company also closed down a number of its own mines.

Later the company resumed the purchase of ores, but upon a changed basis. For lead the New York price, less 1 cent per pound, and for silver 40 cents per ounce, with 10 per cent of the net values retained, pending a final settlement to be based upon the average price of the third month after receipt, and further deduction of 4 per cent upon net values, to cover the cost of carrying the metals.

The tendency noted last year toward a range of prices relatively higher in London than in the United States, has developed more fully this year. Thus for 1913, the average price per 100 pounds of lead in St. Louis was \$4.238. For 1914, it has been \$3.734.

The average price per long ton in London, was, for 1913, £18.743; for 1914 it has been £19.044.

The equivalent of the St. Louis average price, \$3.734 per 100 pounds, would be about £17 3s. 6d. per long ton.

The New York prices which have been adopted by the smelter as the basis for settlement are usually from 10 to 17 cents per 100 pounds higher than the St. Louis prices.

It does not appear that lead from the United States has as yet invaded the English market, but it enters the Canadian and Oriental markets in which our producers must sell, and hence regulates the price which a Canadian shipper can get.

Thus the condition has arisen that the lead shippers are at times precluded by London quotations of above £17 18s. 9d. from claiming bounty, while at the same time, they are not getting in their settlements at the smelter, a price equal to £17 18s. 9d.

What is of more practical importance to the majority of British Columbia silver-lead mine owners is the price of silver.

The average price of silver for the last twenty years has been about 56 cents per ounce. It is now quoted at 48 cents, and as in the case of the other "industrial metals" the support of the market is frail, and those who have silver on hand are afraid to offer it.

Increased attention has throughout the year been given to the collection of zinc concentrates. The shipments of these to the United States has probably been in excess of the quantity shipped in any previous year. Active work has again begun upon the "Lucky Jim," the zinc mine par excellence of the province.

The principal shippers of lead ores for the year have been: Sullivan, Standard, Bluebell, Highland, Rambler-Cariboo, Slocan Star, Emerald, St. Eugene, Maestro, Van-Roi, Surprise, Ruth, Hudson Bay, Hewitt, Zincton, Richmond-Eureka, Molly Gibson, Utica, No. 1, Retalleck & Co. Others in alphabetical order are American Boy (No. 2), Ajax, Buck Fraction, Black Prince, Bonanza (Wash.), Blue Bird, California, Colonial, Cinderella, Caledonia, Caaba, Charleston, Dynamo, Enterprise, Eastmount, Elkhorn, Extension, Evening, Early Bird, Gold Reef, Hartney, Hope, Hargrave, Jewel, Iron Creek (Wash.), Iron Cap, Lucky Thought, Lone Bachelor, Le Roi, Monte Christo, Mother Lode, Neepawa, Pittsburg, Silver Hoard, Silver Cup, Sally, Silver Union, Standard (Beaverdell), Silver Cup (Hazelton), Simpson Bros., Tamarac, Topay, Widdowson, Yankee Girl.

## SESSIONAL PAPER No. 10c

In connection with the preparation of this report, I have lately travelled through the lead producing camps. I find the great majority of the mines enumerated above now closed down, or working only upon development or for the production of experimental shipments.

The closing down of such mines as the Standard, the Bluebell, the St. Eugene, those in the Ainsworth Camp, and others, inflict upon those deprived of employment, and upon those dependent upon them, great hardship. The communities surrounding these mines are sharply reminded that we are living through a period of stress such as the world has never before known, but the burdens and privations imposed by the war are bravely borne, and many miners have enlisted for service abroad against the enemies of the Empire.

Upon the resumption of quotations by the London Metal Exchange, in November, the newspapers for several days reported quotations of lead at £15 2s. 6d. After a few days I ascertained that these quotations were erroneous, but in the meantime, under the impression that almost full bounty was accruing, I had gone to some trouble, and incurred a small expense in taking stock of the lead ore on hand at the smelter, this being necessary in order that final 40 per cent claims could be accurately adjusted.

I have the honour to be, sir,

Your obedient servant,

G. O. BUCHANAN,

*Supervisor of Lead Bounty Claims.*

ANNUAL REPORT OF MR. J. C. WADDELL, INSPECTOR OF  
BINDER TWINE AND CORDAGE BOUNTY CLAIMS.

PETROLEA, ONT., January 1, 1915.

F. C. T. O'HARA, Esq.,  
Deputy Minister,  
The Department of Trade and Commerce,  
Ottawa.

SIR,—As Inspector of Binder Twine I beg to hand you herewith my annual report for the calendar year 1914.

Very few, if any, changes have occurred in the binder twine market during the season. The year has been a good one both for the consumer and manufacturer. The consumer of binder twine receives a good article of twine,—full length, free from knots, required strength, and uniform in size, doing good work on all kinds of machines. A farmer receiving a twine of this class has no cause for delays or annoyances, and much satisfaction is derived when twine is up to this standard.

The manufacturers have been operating their factories to full capacity and for some time past have been opening up a good foreign trade for twine as well as taking care of the home market. The firms manufacturing binder twine are the same as in 1913—as follows:—

Consumers Cordage Co., Montreal and Halifax.

Plymouth Cordage Co., Welland, Ont.

Brantford Cordage Co., Brantford, Ont.

The output for the season was 11,775 tons.

All of which is most respectfully submitted.

I have the honour to be, sir,

Your obedient servant,

J. C. WADDELL,  
*Inspector of Binder Twine, &c.*

SESSIONAL PAPER No. 10c

ANNUAL REPORT OF MR. J. C. WADDELL, SUPERVISOR OF CRUDE  
PETROLEUM BOUNTY CLAIMS.

PETROLEA, ONT., January 8, 1915.

F. C. T. O'HARA, Esq.,  
Deputy Minister,  
The Department of Trade and Commerce,  
Ottawa.

SIR—I beg to hand you herewith the annual Crude Petroleum Report for the calendar year 1914.

The oil market throughout Ontario has not shown much activity during the past year and no new fields have been opened up, the whole trade being very quiet. Very little drilling has been done, outside of the drilling for gas wells in Oil Springs and Dawn Township.

This is accounted for particularly by the large storage of oil in the United States which has resulted in the lowering of the price of crude oil in Canada which has a tendency to discourage the prospecting of new fields. With a rise in the price of crude oil new life will be resumed in the oil districts and good results may be expected.

The gas field in Oil Springs has been a boom to the southern part of Ennis-killen and a wonderful surprise in that locality. The immense pressure in some of the wells has been enormous and has exceeded all expectations. The gas is of excellent quality, free from odour and the whole population of the County of Lambton is being supplied with it for fuel and light.

Appended herewith I give the annual production of crude petroleum for the year, showing a decrease of about fifteen thousand barrels for the year 1914.

All of which is respectfully submitted.

I have the honour to be, sir,

Your obedient servant,

J. C. WADDELL,  
*Supervisor of Crude Petroleum Bounty Claims.*

## GOLD AND SILVER MARKING ACT, ADMINISTRATION OF.

### ANNUAL REPORT OF MR. W. J. RYAN, INSPECTOR UNDER GOLD AND SILVER MARKING ACT.

TORONTO, January 1, 1915.

F. C. T. O'HARA, Esq.,  
Deputy Minister,  
Department of Trade and Commerce,  
Ottawa.

SIR,—As inspector under the Gold and Silver Marking Act of Canada, I beg to report the operations of said Act for the year ending December 31, 1914.

Though good work was done under the Act of 1908, it was not until the Act of 1913 which came into force on January 1st of that year, that the trade appreciated the fact that the object Parliament had in amending the Act was: to make it as nearly perfect as possible, so that it could be enforced with less difficulty, and made applicable to every case intending to deceive or defraud the public, and also that it would be applied in its entirety and without discrimination, so that no manufacturer or dealer, home or foreign, could escape its requirements and provisions.

As a result, the contraventions for the year 1914 have been considerably less, and in no case has it been necessary to bring those who offended once under the Act, into court the second time. This is some assurance that the first conviction had the desired effect.

The convictions during the year were as follows:—

Under Section 11: Three cases of improperly marked flatware (knives, forks and spoons).

Under Section 14: Four cases of jewellery, watch cases and spectacle frames, gold-filled and guaranteed.

Under Section 8: Nine cases, eight of wedding rings, and one of spectacle frames, where the fineness of gold was less than the carat mark stamped upon them.

It is pleasing to note that all the large catalogue houses in Canada are taking greater precaution in their annual and semi-annual issues in representing their wares truly and correctly.

Greater interest is also taken by manufacturers outside of Canada, and their respect for the Act is noticeable by the great number of applications made during the year by them to the Department of Agriculture for the registration of Trade Marks.

As an instance of respect held for our Act in England, the Master of the Assay Office in Sheffield, assured your inspector when in England, last July, that, should any manufacturer in Great Britain attempt to export goods into Canada that violated either the Gold and Silver Marking Act of Canada or the Hall-Mark laws of Great Britain, that on receipt of information, the guilty parties would be convicted in Great Britain.

This offer of co-operation will be of great help to your inspector, as an erroneous impression prevailed with some manufacturers in England, especially in Birmingham, that goods made by them for export purposes were exempt from the laws of Great Britain, and consequently shipped goods into Canada inferior to that permitted to be sold in their own country.

Another great assistance has been granted to this Department, by the Department of Customs, in issuing a memorandum to the Customs Collectors, prohibiting from importation under tariff item 1209, gold and silver articles bearing false trade descriptions.

SESSIONAL PAPER No. 10c

Any depression there may be in trade, the manufacturing jeweller and silversmith is the first to feel its effects, and your Inspector cannot be too exact in enforcing the Gold and Silver Marking Act to compel fair competition, and to protect the public from being imposed upon by unscrupulous dealers who, when business is quiet, resort to fraudulent practices.

I have the honour to be, sir,

Your obedient servant,

W. J. RYAN,

*Inspector under the Gold and Silver Marking Act.*

INSPECTION OF CERTAIN STAPLE ARTICLES OF CANADIAN  
COMMERCE INSPECTED UNDER PROVISIONS OF CHAP. 85  
REVISED STATUTES OF CANADA AND AMENDMENTS  
THERE TO.

Before proceeding to tabulate the inspection of the different commodities dealt with in this Act, it is deemed advisable to make reference to an important amendment to same, known as chapter 36 of the statutes of 1914.

It provides for certain markings on barrels, bags and packages of flour, cereals and feed, and the weights per bushel and bag for vegetables, and its provisions apply to all Canada.

The principal sections concerning flour, cereals and feed are as follows:—

**"164.** Every barrel or half-barrel of flour, meal, rolled oats or rolled wheat, packed for sale, shall, by painting or branding on one end thereof, be plainly marked:—

**"(a)** with the initials of the Christian name and the surname at full length of the packer or the person for whom such barrel or half-barrel is packed, and with the place of business of such packer or person; or, where such barrel or half-barrel is packed by or for a copartnership or incorporated company, with the firm name of such copartnership or the corporate name of such company and with the place of business of such copartnership or company; and,

**"(b)** with the brand and weight of the flour or meal therein contained; and,

**"(c)** with the tare of the barrel or half-barrel."

**"164A.** Every bag, sack or similar package of flour, meal, rolled oats, rolled wheat, or feed shall be plainly marked,—

**"(a)** with the initials of the Christian names and the surname at full length of the packer or person for whom such bag or package is packed, and with the place of business of such packer or person; or, where such bag, sack or other package is packed by or for a copartnership or incorporated company with the firm name of such copartnership or the corporate name of such company and with the place of business of such copartnership or company; and,

**"(b)** with the brand and the weight of the contents of the bag, sack or package;

**"(c)** the provisions of paragraph (b) as to brand shall not apply to feed, but the composition of the feed in each container shall be stated."

**"164B.** The provisions of sections 164 and 164A of this Act shall not apply,—

**"(a)** when flour, meal, rolled oats, rolled wheat or feed is, in the presence of the purchaser, and for his own use, weighed and put into the barrel, half-barrel, bag, sack, or other package; nor,—

**"(b)** when any of those articles is sold for export out of Canada, if the purchaser requests that the marks, or any mark, required by the said sections be not put upon the barrel, half-barrel, bag, sack or other package."

**"175A.** Every person who sells, offers for sale, or has in his possession for sale, any bag, sack or similar package of flour, meal, rolled oats, rolled wheat or feed, which is not marked in accordance with the requirements of section 164A of this Act, shall be liable, on summary conviction, to a penalty of one dollar for every bag, sack or package not so marked; without prejudice to the civil remedy of any person aggrieved for any damage sustained by him."

FEES CHARGEABLE UNDER THE INSPECTION AND SALE ACT CHAP. 85.

FLOUR AND MEAL.

For such inspection and branding and marking the person who required the inspection thereof shall pay to the inspector for each and every barrel and half barrel of flour or meal so inspected and branded or marked the sum of 2 cents exclusive of the charge for cooperage, before such flour or meal is removed; and when any less quantity than one hundred barrels of flour or meal is offered for inspection at one time, the inspector shall be entitled to receive the full fees that would accrue to him on one hundred barrels.

As soon as any flour or meal is inspected, a bill of inspection shall be furnished by the inspector or deputy inspector without fee or reward, specifying neatly and legibly the quantity and quality ascertained by inspection, the gross weight of 5 per cent thereof, and the tare of 1 per cent thereof and the charges therefor, and the name of the mill at which the flour or meal was manufactured.

When the inspector in his judgment deems it necessary to strip or empty out the flour to find out if there is the proper weight of flour in any cask he shall be entitled to two cents for each barrel so stripped or emptied if it proves to be short weight in addition to the 2 cents per barrel for inspecting and branding.

## REPORT OF THE WESTERN BOARD OF EXAMINERS.

WINNIPEG, MAN., April 7, 1914.

C. BIRKETT, Esq.,  
Secretary, Board of Grain Commissioners,  
Fort William, Ont.

DEAR SIR,—I beg to inform you that according to your instructions the Board of Grain Examiners held examinations at Winnipeg and Fort William of 66 applicants for certificates of qualification to act as inspectors and deputy inspectors of grain. The examinations and reading of papers occupying a period from March 16 to April 3.

Messrs. S. Spink, W. L. Parrish, and N. Bawlf conducted the examination at Winnipeg, and Messrs. W. L. Parrish and Geo. Serls, Chief Grain Inspector, conducted the examination at Fort William.

The examination was based on 100 samples of various grades and descriptions of grain, one mark being allowed for each correct answer to these questions, so that the maximum marks obtainable were 100, of which the Board of Examiners decided 75 per cent must be obtained by the candidate to secure a certificate as deputy inspector, and 85 per cent must be secured for an inspector's certificate.

The examination of candidates was held in Winnipeg on March 16 to 20, and at Fort William from March 24 to 27. Forty-three candidates presented themselves for examination at Winnipeg, of which 8 qualified to receive an inspector's certificate and 22 qualified to receive a deputy inspector's certificate. At Fort William 23 candidates presented themselves, 10 of whom qualified to receive a deputy inspector's certificate. I give you below the following names of the candidates who successfully passed the examinations, 8 of whom you will notice as inspectors:—

*Inspectors—*

William James Beck, Winnipeg.

## REPORT OF THE WESTERN STANDARDS BOARD FOR 1913.

SECRETARY'S OFFICE,

WINNIPEG, MAN., November 10, 1913.

The Board of Grain Commissioners,  
 Fort William, Ont.

DEAR SIRS,—While Messrs. J. P. Jones and W. D. Staples were present at the meetings of the Western Grain Standards Board on the 28th and 29th October, I now beg formally to inform your commission that at such meetings of the Standards Board standard samples for the commercial grades of Nos. 4, 5, and 6 wheat were selected and confirmed; also, by resolution, the inspector was authorized to grade, in his discretion, wheat as "feed wheat" which was not good enough to grade as No. 6. Also, a resolution was passed that "feed barley" shall include all damaged barley weighing less than 42 pounds to the bushel, in the discretion of the inspector.

The following members of the Standards Board were present and took part in the proceedings:—

Messrs. G. R. Crowe (chairman), W. A. Matheson, K. Campbell, Hon. F. Young, A. R. Hargraft, D. Horn, William Carson, C. B. Watts, Peter Ferguson, T. A. Crearer, William Lothian, C. Johnson, James Riddell, M. McLaughlin, W. F. Sirrett, D. W.

## SESSIONAL PAPER No. 10d

McCuaig, C. N. Bell, secretary. There were also present Grain Commissioners J. P. Jones and W. D. Staples, with George Serls, Acting Chief Grain Inspector, and Fred. Symes, Grain Inspector, Fort William.

In connection with the correspondence between the Liverpool and London Corn Exchanges, the Minister of Trade and Commerce, Ottawa, your Board of Grain Commissioners, and the Winnipeg Grain Exchange regarding the standardization of commercial grades of grain, the Standards Board gave very serious consideration to the question, finally passing by unanimous vote the following resolution:—

“Whereas commercial standards were made for the express purpose of enabling the producer who may have been unfortunate enough to raise grain which could not be graded under the regular grades, to market his crop;

“And whereas the commercial standards, as fixed in the past, have enabled that portion of the crop which suffered from unfavourable climatic conditions to be sold more nearly at its milling value than it otherwise would have been;

“And whereas the Standards Board has for many years made standards which enabled the crop to be handled rapidly to the satisfaction of both the producer and the handler;

“And whereas, owing to the varying climatic conditions under which the grain crop of Western Canada is grown and harvested, no advance printed description of the commercial grades is possible;

“Therefore be it resolved, that in the opinion of this Standards Board it is in the best interests of Western Canada to continue the method of making the standards for the commercial grades which worked so satisfactorily in the past.”

I beg to report that standard samples of all the grades of grain have, as usual, been forwarded by express, charges prepaid, to the inspectors in Canada and the grain exchanges of the United Kingdom.

Yours truly,

C. N. BELL,  
*Secretary.*

## WESTERN STANDARDS BOARD FOR 1914.

The meeting of the Western Grain Standards Board, called by the chairman at the request of the chief grain inspector, was on September 29, 1914, in the council room, Grain Exchange Building, Winnipeg, Man.

Present during different sessions of the board: G. R. Crowe (chairman), K. Campbell, C. B. Watts, J. W. Scallion, Wm. Lothian, Christian Johnson, Hon. W. R. Motherwell, R. J. Phin, W. H. Fairfield, T. A. Crane, Hon. F. M. Young, F. W. Sirrett, D. W. McCuaig, S. Spink, D. Horn, W. A. Matheson, T. A. Crerar, C. N. Bell, Secretary; Geo. Serls, Chief Grain Inspector; Fred. Symes, Grain Inspector, Fort William, and Messrs. W. D. Staples, Grain Commissioner, and C. Birkett, Secretary, Board of Grain Commissioners.

During the course of the morning and afternoon, standard samples for the commercial grades Nos. 4, 5, and 6 wheat were selected and adopted.

The following resolutions were carried by unanimous vote, viz.:—

“That all wheat not fit to be graded as No. 6 be graded ‘feed’ in the discretion of the inspector.

“That ‘feed barley’ shall include all damaged barley weighing less than 42 pounds to the bushel, in the discretion of the inspector.

“That a committee be appointed and is hereby appointed under the provisions of section 88 of the Canada Grain Act, to meet and select other commercial grades of grain should climatic or other conditions make such further selection necessary, the said committee to consist of Messrs. G. R. Crowe (chairman), S. Spink, W. A. Mathe-

son, A. R. Hargraft, K. Campbell, D. W. McCuaig, James Riddell, T. A. Crerar, Hon. W. R. Motherwell, W. H. Fairfield, and Geo. Serls, Chief Grain Inspector."

The chairman brought before the meeting a communication from the Board of Grain Commissioners dated September 2, 1914, in which the commission brought to the attention of the Standards Board the following suggested definitions of Nos. 3 and 4 wheat, viz.:—

"No. 3 Manitoba Northern wheat shall be reasonably clean, of good milling quality, fit for warehousing, containing not less than 60 per cent of sound wheat of hard variety, and shall weigh not less than 56 pounds to the bushel.

"Any wheat not good enough to be graded No. 3 Manitoba Northern shall be graded No. 4 in the discretion of the inspector, provided that No. 4 shall contain not less than 40 per cent of sound grain."

The above correspondence and attached schedule were discussed at considerable length, when it was moved by Messrs. Motherwell and Sirrett—

"That this Western Grain Standards Board, having fully considered the letter from the Board of Grain Commissioners dated September 2, 1914, with attached suggested definitions of Nos. 3 and 4 wheat, find that in their opinion no good reason exists to make any such change as suggested in the correspondence, and this board recommends that the schedule of grades now contained in the Grain Act be not changed at this time."—Carried.

Mr. W. D. Staples brought before the board a matter upon which varying opinions exist, namely, whether or not the standard samples of commercial grades as selected by this board are to be taken as the minimum or an average of any particular grade, and also the point as to whether the samples sent out by the board or the chief grain inspector of any particular grade should be the minimum or average sample of such grade.

After full consideration had been given to the above matter and considerable discussion taken place thereon, it was moved by Messrs. Watts and Young—

"That in the opinion of this Western Grain Standards Board official samples of grain standards set by this board or standard samples of grain selected by the chief grain inspector which are now sent abroad must be considered as the minimum samples of their respective grades, and further that the distribution of such standard samples by this board or the chief grain inspector should be continued in the same manner as has prevailed in past years."

#### MONTREAL GRAIN STANDARDS BOARD.

The Grain Standards Board for the Montreal Division has not had occasion to establish any commercial grades of grain during the year ended August 31, 1914.

#### TORONTO GRAIN STANDARDS BOARD.

The Toronto Grain Standards Board held no sessions during the year ended August 31, 1914.

## RULES AND REGULATIONS FOR THE CALGARY SURVEY BOARD.

1. Five (5) members shall constitute a quorum for any board meeting.
2. A chairman shall be elected by a majority vote at any meeting called for the purpose, and any person so elected as chairman shall hold office during the pleasure of the board. In the absence of the chairman from a meeting, any member may be chosen to preside at that meeting.
3. A secretary shall be elected by the board, subject to confirmation by the Minister of Trade and Commerce, but in case of emergency (owing to the absence or disability of the secretary) the chairman may appoint an acting secretary, who will *pro tem* perform all the duties of the secretary.
4. Meetings of the Survey Board shall be held at the call of the chairman or the written request of at least three members filed with the secretary. The secretary shall send a notice of every meeting to be held to each member of the board, such notice to be mailed or delivered in person at least twenty-four hours previous to such meeting.
5. It shall not be necessary for the full board to be called together on each occasion when a survey is demanded, but the secretary shall directly call on any three members in such order as the board may determine from time to time, and the survey shall be made by any three members so chosen, provided that no member shall be asked to survey grain in which he himself, or the company of which he is an employee, is interested.
6. The fee for each member acting on any survey, shall be one dollar (\$1) for each car or cargo as the case may be the grading of which is in dispute.
7. The salary of the secretary shall be \$25 per month.
8. In the case of any survey being held, the Survey Board may require the inspector or the deputy inspector, in charge of the inspection office at Calgary, to secure for use any samples of the grain in dispute drawn from the car or cargo, require the presence of the inspector or the deputy inspector, provided the attendance of such persons shall not interfere with the public service.
9. An application for a survey must be filed with the secretary, and such an application must state particulars as to the number of the car or name of the vessel containing the grain, the grading of which is in dispute, but the identity of the car shall not be revealed by the secretary of the Survey Board. The secretary shall obtain information as to the different parties interested in the grain under dispute.
10. Grain going through Winnipeg shall be inspected and surveyed at Winnipeg, and over such grain the Calgary Survey Board shall have no jurisdiction. The Calgary Survey Board shall have jurisdiction over grain—
  - (a) Going west of Calgary;
  - (b) Being consumed in Calgary;
  - (c) Going from Calgary to eastern points within Calgary Division.
11. The secretary of the Survey Board shall send a monthly report to the Board of Grain Commissioners at Fort William, showing the number of surveys held and the attendance at each meeting, and the results of each survey and all other details.
12. The members of the Survey Board and the secretary shall before acting as such take and subscribe an oath of office before a superior or a county court judge in the form, which oath shall be filed with the Board of Grain Commissioners.
13. These rules and regulations may be altered at any meeting called for the purpose by a majority of those present, but such alterations shall not take effect till approved by the Board of Grain Commissioners for Canada.

## MONTREAL SURVEY BOARD.

The Montreal Grain Survey Board for the year ended August 31, 1914, officially performed the following work:—

First, the board has selected standards for United States No. 2 Red Western wheat and for United States No. 2 Hard Winter wheat.

Second, the board authorized the grading of a parcel of oats as No. 2 United States White Clipped oats.

The grading of the inspector has apparently never been called in question during the year as the board has not once been called on to hold a survey.

I.—REPORT OF THE CHIEF INSPECTOR.

OFFICE OF THE CHIEF INSPECTOR,  
WINNIPEG, MAN., November 4, 1914.

C. BIRKETT, Esq.,  
Board of Grain Commissioners,  
Fort William, Ont.

GENTLEMEN,—I beg to submit to you a report on the work performed by the Inspection Department for the crop year of 1913-14.

WESTERN DIVISION.

This is the largest crop ever handled by the Inspection Department, reaching the large total of 137,403 cars of wheat, 34,460 cars of oats, 11,675 cars of barley, 12,812 cars of flax, 83 cars of rye, 1 car of speltz, and 298 cars of screenings, making a grand total of 196,732 cars of grain.

Of the above total the following cars were inspected at Winnipeg:—

Wheat.. . . .	132,396
Oats.. . . .	31,665
Barley.. . . .	10,258
Flax.. . . .	12,259
Rye.. . . .	14
Screenings.. . . .	296
Speltz.. . . .	1

At Calgary:—

Wheat.. . . .	2,862
Oats.. . . .	2,418
Barley.. . . .	1,131
Flax.. . . .	31
Rye.. . . .	69
Screenings.. . . .	2

At Superior:—

Wheat.. . . .	2,145
Oats.. . . .	377
Barley.. . . .	286
Flax.. . . .	522

## SESSIONAL PAPER No. 10d

The size of the crop and the despatch given by the railroads on grain, necessitate the engaging of a large temporary staff, who were retained until just after the close of navigation and then released.

The crop was an easy one to handle owing to the high percentage of contract grades and the very small percentage of tough and off grades.

The percentage of contract grades being nearly 90 per cent, and tough grain being less than 1 per cent of the total crop.

During the year the Canadian Pacific Railway opened up their new yards at North Transcona. This necessitated the keeping of a larger staff of men to sample cars than in former years, as cars of grain were placed for inspection in both the old and the new yards.

It also meant having a yard office built at North Transcona for the use of the men employed there. This office is now completed and being used.

Under your instructions I have placed two deputy inspectors at outside points during the year, one at Moosejaw to inspect and weigh grain for the Robin Hood Milling Company, and one at Medicine Hat to inspect and weigh for the Ogilvie Milling Company.

On account of these men having been taken away from the Winnipeg staff, and owing to the large crop, I had to set up four more deputy inspectors at Winnipeg.

At the commencement of the season we moved into our new inspection room and offices, which are much larger than we formerly occupied. This facilitated the work greatly.

## FORT WILLIAM.

The work of handling the crop at Fort William and Port Arthur, under Inspector Fred. Symes, has been very successfully performed.

The same conditions existed there as at Winnipeg. Owing to the large crop handled it required an extra large staff to do the work, and the placing of inspectors on the vessels to take samples as well as in the elevators has proved a success, as practically no complaints were received on cargoes after being loaded.

## EASTERN DIVISION.

The inspection of grain in the Eastern Division has been well looked after by Inspector A. A. Bowen. Besides his usual duties he has also sampled some 300 lots of western grain as it was being loaded to ocean vessels at Montreal. These samples were forwarded to Winnipeg, and on comparing them with samples of cargoes loaded at Fort William and Port Arthur I found that the identity of the grades had been preserved while in transit.

(Sgd.) GEO. SERLS,  
*Chief Inspector.*

II.—THE FOLLOWING RULES AND REGULATIONS GOVERNING THE DUTIES OF GRAIN INSPECTORS AT FORT WILLIAM AND PORT ARTHUR HAVE BEEN APPROVED OF BY THE BOARD OF GRAIN COMMISSIONERS.

RULE 1.—HOURS TO BE ON DUTY.

Deputy inspectors and their helpers must be at their posts, ready for business, from 7 a.m. to 6 p.m. of each day unless otherwise ordered by the inspector in charge at Fort William and Port Arthur.

RULE 2.—SUPERVISION OF ELEVATOR PITS, GARNERS AND SCALES.

Inspectors must see that the elevator pits to be used are empty, and ascertain from the weighmen upstairs that the garners to be used are also empty and ready to receive grain before allowing any separate lot of grain to be released from bin, car or cars. The above instruction with reference to pits and garners must be adhered to before commencing to inspect grain for loading or to be loaded into vessel or cars. In addition to this they must also see that the scales to be used are empty, and that the vessel into which the grain is about to be loaded is made clean and in proper condition to receive same. Pay particular attention to see that it is free from coal dust, lime, oil, etc.

RULE 3.—RUNNING GRAIN FOR VESSELS.

When inspecting grain in the running stream to vessels, grain direct from the cleaners must not be permitted to go in with the running stream without close supervision and special permission from the inspector.

RULE 4.—BINNING SUPERVISION.

Inspectors must see that all bins are empty and cleaned out before allowing such bins to be used for a different grade of grain to what was previously stored therein, and must see that bins are not overloaded or flooded without special supervision and permission from the inspector in charge. (See section 94, Canada Grain Act.)

Immediately after the opening of navigation, all auxiliary bins underneath the shipping bins should be emptied and left empty, if possible, with valves open, until the close of navigation.

RULE 5.—SAMPLING FOR VESSELS.

Samples must be taken from the running stream to the lofters or legs as often as possible to make sure that a thorough average sample is secured therefrom. There must also be a sampler stationed on the vessel always during the time of loading, taking samples of the grain from each and every stream as it runs from the shipping spout to the hold of the vessel, as often as possible. If the sampler in the house or on the vessel notices anything going to the shipping bin or the hold of the vessel which, in his opinion, would affect the proper grade of the grain in question, he must have the bin or bins shut off immediately, notifying the deputy inspector in charge, who shall forthwith investigate the matter and examine the grain in the shipping bins and in the hold of the vessel. No more grain must be discharged from the shipping bins thus shut off until the inspector is thoroughly satisfied that the grain in the hold of the vessel and the grain in the shipping bins is of the proper grade. True samples of the grain secured from the stream leading to lofters or legs, also a true sample secured of the grain as it runs from the shipping spouts, shall be kept strictly intact and forwarded to the office of the inspector.

## SESSIONAL PAPER No. 10d

## RULE 6.—INSPECTING TO VESSELS IN WET WEATHER OR IMPROPER LIGHT.

No inspector is authorized to inspect grain out of store if the light is improper or in wet weather. Section 35 of the Canada Grain Act states:—

“No inspecting officer shall inspect grain being laden or about to be laden on vessels or cars after dark or in wet weather except on receipt, personally, or through the office of the chief inspector, of an application from the owner or possessor of the grain or his authorized agent, written upon one of the printed forms furnished by the board and signed by such owner or his authorized agent, relieving him, the inspecting officer, from responsibility for damage which may be caused by such wet weather, or darkness, or for loss arising from errors liable to occur in an inspection under such circumstances.

“In every such case of such inspection the inspecting officer shall be personally present when the grain is actually delivered on board.

“In such case no certificate shall be issued until the inspector's sample of such lot is examined under proper conditions.”

## RULE 7.—INSPECTING GRAIN FROM CARS.

Besides inspecting the grain contained in the car, inspectors must note and report all irregularities such as bad order cars, leakages, spills, etc., and see that the track hoppers are tight and free from any leaks, and that the valves work freely and remain closed. Work in conjunction with the weighmen, and advise them of anything that might affect the true weight of the grain in question.

## RULE 8.—INSPECTING AND OUTWARD LOADING OF GRAIN TO CARS.

Inspectors must see that the car shipping spouts are kept in good state of repair, tight and free from leaks, and that the car into which the grain is about to be loaded is made clean, well coopered and in good order to receive the grain. Pay particular attention to cars which have been used for the transportation of stock, coal, lime, oil, etc. On no account suffer grain to be loaded into such cars if there is any danger of the grain becoming damaged by reason thereof. If grain is loaded into a car which in the opinion of the inspector is not in good order from any cause, the condition of the car must be noted on the grade certificate.

## RULE 9.—DEMEANOUR OF INSPECTORS.

Inspectors and their helpers must keep their own counsel and avoid talking as much as possible with elevator operators or employees, vessel officers or employees, and endeavour to work in harmony and without friction.

## RULE 10.—MISCONDUCT.

The habitual use of malt or spirituous liquor by any employee under the jurisdiction of the Board of Grain Commissioners is strictly prohibited. The penalty for intoxication for the first offence is thirty days lay off without pay; for the second offence, dismissal from the service. Negligence, carelessness or disregard of rules shall be dealt with as above.

## RULE 11.—GENERAL.

Inspectors' duties are more than to merely define the grade of grain. His jurisdiction and duty extend, to a certain extent, over everything pertaining to the proper handling, transportation and grading of grain. It is his duty to take note and have full cognizance of every branch, and to report to the Board of Grain Commissioners, through the proper officers, any irregularity in any department of the service. The

5 GEORGE V., A. 1915

successful carrying out of the Grain Act, and the work intended for the Board of Grain Commissioners will depend largely on the integrity and co-operation of the inspectors. Therefore it behooves, and in fact it is necessary for inspectors to be thoroughly conversant with the Grain Act, so as to know the full extent of their powers. It is also necessary for inspectors to familiarize themselves with the outlying plans, style of construction, machinery, bin diagram and number of bins in each section of the elevator that he is in charge of, so that he will know and be familiar with all necessary details in connection with proper supervision.

(Sgd.) F. SYMES,  
*Inspector in charge at Fort William and Port Arthur.*

Approved of by the Board of Grain Commissioners, May 4, 1914.

(Sgd.) C. BIRKETT,  
*Secretary.*

### III.—REPORT OF THE REGISTRAR.

The work performed by the registration offices was greatly in excess of that of the previous year, the total bushels registered during the year being:

Wheat.....	133,737,208
Oats.....	41,455,146
Barley.....	10,666,315
Flax.....	12,425,549
Rye.....	13,004

and the total bushels cancelled:

Wheat.....	133,771,531
Oats.....	43,506,083
Barley.....	10,858,309
Flax.....	12,045,731
Rye.....	10,381

The Winnipeg office taking care of the registering for all elevators, with the exception of the Dominion Government and the Canadian Pacific Railway, these two registering at the Fort William office.

The cancellations being about evenly divided between the two offices.

The usual annual statements were prepared, showing outstanding warehouse receipts.

The system being better understood, worked very much more smoothly than during the previous year.

The work performed by these officers has been carried out in a very satisfactory manner.

(Sgd.) GEO. SERLS,  
*Registrar.*

### IV.—RULES AND REGULATIONS GOVERNING THE REGISTRATION OF TERMINAL ELEVATOR WAREHOUSE RECEIPTS.

1. Every terminal warehouseman shall as soon as possible after the 31st day of August in each year prepare and deliver to the deputy registrar a statement in triplicate (on the forms prescribed by the board) of all outstanding warehouse receipts at that date; and shall also at the same time submit a separate statement showing any car lots or parcels of grain in store for which no receipts have been issued.

## SESSIONAL PAPER No. 10d

2. The warehouseman shall issue to the person entitled to receive it a warehouse storage receipt for each individual carload lot or parcel of grain subject to his order, which shall state—

(a) The date of the receipt of the grain in store and also the quantity and inspected grade of the grain.

(b) That the grain mentioned in it has been received into store to be stored with grain of the same grade by inspection.

(c) That the grain is deliverable upon return of the receipt properly endorsed by the person to whose order it was issued and upon payment of proper charges for storage and transportation, if any, due to the owner of the elevator. (See section 127, Canada Grain Act.)

3. Every warehouse receipt before being delivered to the party entitled to receive same shall be tendered by the warehouseman to the deputy registrar for registration, and shall be accompanied by a list in triplicate setting forth the number of each receipt and the date thereof, the ex-car number, the kind and grade of grain, the gross weight, dockage and net weight, also the name of the elevator issuing such receipt.

4. No grain shall be shipped from any terminal elevator by the warehouseman and no grain shall be delivered by the warehouseman from his elevator to the shipper unless the covering warehouse storage receipts shall have first been surrendered by the shipper to the operator thereof.

5. When any grain is delivered or shipped from any terminal elevator the operator thereof shall tender to the deputy registrar for "registration for cancellation" registered warehouse storage receipts covering the same both as to quantity and grade. All such receipts tendered to the deputy registrar as aforesaid shall be accompanied by a list in triplicate, giving the number of the receipt, date out of store, the amount, grade and kind of grain represented by such receipt. Such receipt shall be presented to the deputy registrar for cancellation as soon as possible after shipment of the grain, in no case except through unavoidable delay exceeding three days after such grain has been delivered from the elevator.

6. The owner, lessee or manager of every terminal elevator shall furnish the warehouse deputy registrar weekly with the correct statement in duplicate of the amount of each kind and grade of grain received in store in his elevator during the week; also the amount of each kind and grade of grain delivered or shipped from his elevator during the week, the amount of each kind and grade of grain in store brought forward from the previous report, and each kind and grade of grain in store at the close of business, and the date at which the report is compiled.

7. Only the forms prescribed by the board for registration purposes shall be used by terminal elevators in their reports.

8. Every terminal elevator operator shall furnish the deputy registrar in duplicate a sample copy of terminal elevator warehouse storage receipt which he proposes to issue. The said sample copy shall contain the signature of each officer of such elevator who is authorized to sign and countersign such receipt. The aforesaid receipt shall be marked "sample copy only."

9. Each terminal elevator shall pay to the Board of Grain Commissioners a registration fee of 4 cents per 1,000 bushels for inwards registration and 4 cents per 1,000 bushels for registration for cancellation.

At the end of each month the Board of Grain Commissioners shall render each terminal elevator an account of such fees, and such account shall forthwith become due and payable and shall be paid by the warehouseman to the deputy registrar before the 10th of the following month.

## CHAPTER 3.

### CHIEF WEIGHMASTER'S REPORT.

To the Board of Grain Commissioners.

GENTLEMEN,—Herewith is submitted my report for the year ending August 31, 1914.

#### SCALES.

There are 128 Hopper scales ranging from 30,000 pounds to 120,000 pounds capacity installed and at present in use for the purpose of weighing grain in the 16 terminal elevators operating in Port Arthur and Fort William, to which may be added 17 scales varying in capacity from 12,000 to 120,000 pounds in the 11 hospital elevators, making a total of 145 scales under my supervision at the head of the lakes.

The scales are of the trussed lever pattern and are the highest type of manufacture both with regard to material and workmanship. They are designed for strength so as to provide for a safety factor of at least 20 per cent above their capacity, and are equipped with type registering attachments, by which the exact amount of a draft weighed may be recorded upon a ticket specially prepared for the purpose. The weights, having been standardized to a certain thickness, may be changed from one scale to another without altering the accuracy of the record obtained.

#### INSTALLATION.

In the older houses the scales are installed on timber foundations, and are provided with adjustable corner hangers, so that the level of the machine may be maintained. In the modern concrete houses the installation is all steel, with concrete foundations. Both systems are first-class of their kind, and are calculated to carry a load much greater than the full capacity of the scales without deflection. These have all been examined and found satisfactory.

#### SCALE INSPECTION.

A thorough inspection of all scales in the elevators under my jurisdiction as chief weighmaster is made twice in each year: One before the opening of navigation, and one before the movement of the new crop. In addition to this, frequent tests of the scales are made in any elevator where it is deemed necessary, in order to clear up a question of shortage, or overage, in the receiving or shipping of grain.

These inspections at the bay ports, and as far east as Halifax, have been made by Mr. A. A. Bowen, inspector and weighmaster, with headquarters at Montreal, and a monthly report of scales so inspected was received and filed in the chief weighmaster's office.

Acting as special inspector of scales in the terminal elevators, I have, under the authority of the Department of Inland Revenue, made an annual inspection of all scales in the elevators in Port Arthur and Fort William, verifying, and issuing certificates for same, upon which the regular fees were collected and remitted to the district inspector of weights and measures at Winnipeg.

In addition to the annual inspection, I have also made an intermediate inspection, for which no charge was made nor certificate issued. This latter inspection is not called for by the Weights and Measures Act, but is made in the interest of the weighing department, and both these inspections have been most rigid. Whereas the

## SESSIONAL PAPER No. 10d

Weights and Measures Act allows a certain toleration of error in the verifying of scales, my inspection does not recognize any toleration of error, but aims to have the scales as nearly perfect as possible, both with regard to accuracy and sensitiveness, and for this purpose the services of a scale mechanic is provided, who makes the necessary changes or adjustment under my personal direction. I have kept a separate record for each scale, showing the condition at inspection, the result of corner tests with weights, the error (if any) and the changes or adjustments made. The corner test under load, and the test with load and weights added; also a test for sensitiveness and turning with load, thus making a complete record of each scale. There are 8,000 pounds of test weights in each of the terminal elevators available for immediate tests, which are at once made when the accuracy of the weight is questioned, so that every precaution has been taken to keep the scales in the highest state of efficiency.

Each inspection required from 5 to 6 weeks' time of practically 10 hours a day to complete, and involved the testing and stamping of over 1,500 hand weights.

I also visited the Dominion Government interior elevator at Moose Jaw and Saskatoon, and made a thorough test of the six new 120,000-pound Hopper scales installed in each elevator, and had the necessary alterations and adjustments made, and I also made a careful examination of the installation of these scales, and found the work of a most substantial character, and in every way satisfactory.

My authority as inspector not covering these places, the scales were verified and certificates of inspection issued by special officer Fyfe, of the Inland Revenue Department. H. B. Parkhill was appointed as weighman at Moosejaw, and B. Fenwick as weighman at Saskatoon.

## WEIGHING.

*Receiving.*—When cars are placed at an elevator for unloading, the seal records and load lines, and notation of leaks (if any) are taken by an employee of the weighing staff and entered upon the track-sheet, from which orders or "shunt slips" are made out, giving the car number, the kind and grade of grain, the depth of load, and leaks (if any). These orders are sent up to the weighmen, who enter the particulars of each car upon their respective weigh-sheets.

Before beginning to weigh, the Government deputy must see that all scales are balanced and all scale valves closed. When all the grain from a car has been elevated to the scales, the weighmen are notified by the electric light signal. The company's weighman then weighs the grain under the supervision of the deputy, both read the weight separately and enter the amount on their weigh-sheets. A ticket, previously referred to, is placed in the type recorder and punched, showing the exact amount of the draft, in addition to which it shows the date, car number, kind and grade of grain, and number of the scale upon which it was weighed. This ticket is then initialled by the deputy, and the operation provides three distinct records of each draft weighed. After the draft has been recorded and the grain released from the scale, the hand weights are removed, and the scale must come to a balance before receiving another draft.

*Shipping.*—In weighing grain to vessels the same system of handling the scales is carried out, but instead of a "shunt slip" orders are sent up from the elevator foreman to the weighman, showing the quantity, kind and grade, and the number of storage bin from which it is to be delivered to the scales. The weigh-sheets show the name of the vessel, the grain and grade, the weight of each draft, the number of the scale upon which it was weighed, and the number of the shipping bin into which it was dropped after the weight had been recorded. When the weighing is finished, the drafts are added up, and computed into bushels, which must agree with the orders received. The time of commencing and finishing weighing, and the name of the elevator are entered upon the sheet and the sheet is signed by the Government deputy.

5 GEORGE V., A. 1915

A ticket is also punched for each draft, showing weight, date, name of vessel and number of scale. These tickets are numbered consecutively so as to correspond with the number of the draft on the weigh-sheet, and are initialled by the deputy. Strict instructions have been issued to all deputies to examine and sound all shipping bins to see that they are empty, and that all spouts from the scales are properly set on the bins used before commencing to weigh; and after the weighing is completed, they must again sound all shipping bins to assure themselves that the grain has all been delivered to the boat before it leaves the dock.

#### DUTIES OF WEIGHMEN.

The duties of a government weighman do not consist of merely recording the sight of each draft of grain weighed. He must be familiar with the mechanism and working of the scales so as to detect immediately any defect or interference that would cause a variation in the weight. Their duties in detail are set forth in printed rules and regulations, issued for their guidance and instruction, and their work is supervised by Mr. Hollinshead, my assistant, who spends all his time in the elevators, instructing them in their work, inspecting the spouting and other equipment to see that it is kept in good order and free from leaks, and assisting in the investigation of complaints of shortages.

#### RECORDS.

The records of grain shipped by boat include the weigh-sheets, scale tickets and dual reports, the latter being a dual report, one part being made by the Government weighman showing the elevator, the name of the vessel loading, the time of commencing to weigh, and the time of finishing, the kind, grade, and quantity of grain in bushels weighed, and the numbers of the shipping bins used. The other part is made out by the inspector and shows the name of the vessel, time of commencing to load, the time of finishing loading, also the kind and grade of grain, the number of storage bins from which it was taken, and the hold of the vessel into which it was loaded, the condition of the holds before loading, and the name of the official who pulled the spouts before and after loading. The term "pulling the spouts" means opening the valves in the bottom of the shipping bins to make certain that all the grain weighed has been run out to the boat. This, in addition to the sounding of the shipping bins by the weighman, furnishes two separate records showing that their duties have been performed. It also contains the names of the company's weighmen, the inspector's assistant, the elevator foreman and the head trimmer, and is signed by the Government weighman and inspector, and together with the weigh-sheets and scale tickets, constitutes a complete record of the weighing and loading of a cargo, from which certificates of grade and weight are issued.

#### RECORDS—RECEIVING FROM CARS.

The records of receiving and weighing grain from the cars are load line records, seal records, defective car reports, leak reports, weigh-sheets and scale tickets, which cover the handling of cars from their arrival at the elevator until the grain has been weighed.

The load line, or depth of grain in the car, is the weak record, owing to the very careless manner in which many of the cars are loaded it is at best only an approximate, and has caused some dissatisfaction and criticism from shippers. The stencilling of the cars in inches would make this record more nearly perfect, and would be equally valuable as a protection to the railway companies as it would be to the shippers.

## SESSIONAL PAPER No. 10d

## SHORTAGES—VESSELS.

Shortages reported from November 15, 1913, until the close of navigation were dealt with in my report covering that period.

Shortly after the opening of navigation in 1914, a number of reports of shortages were received from the vessels that had been carrying winter storage cargoes. Upon investigation it was found that a number of these shortages could be accounted for by damaged grain. In the others, a most careful investigation failed to discover any evidence showing the loading houses as being responsible.

Throughout the summer frequent complaints of shortages were received, and in the investigation of these not only have all the records been carefully examined and checked, but every circumstance that could in any way affect the weighing and loading at the elevators has been rigidly inquired into both by assistant and myself, and, with the exception of one or two cases, the investigation showed that the vessels had received grain to the amount of their orders.

When shortages on the outturn of a cargo are reported from an unloading port, the vessel owners and agents at once throw the onus of responsibility for this shortage on the weighing department at the loading ports, thus questioning the integrity of the weighing staff. This being a matter of grave concern, I placed extra men in two of the large elevators to assist the weighmen, giving them strict instructions to see all scales balanced between each draft, but more particularly to go with the weighman and see every shipping bin sounded, and report to me daily, and the fact that these two houses figure in the shortages along with other houses justifies me in the belief that the weighing staff are observing the rules and performing their duties faithfully.

Most of these complaints were also investigated by Mr. Bowen at the unloading houses, with the result that in some cases the reported shortages were found on reweighing the grain that had been binned separately. Other cases showed the system of handling and weighing could not fail to create shortages.

The whole matter of these shortages is under investigation and will be covered by a special report.

## SHORTAGES—CARS.

There has been a large number of complaints of shortage in the outturns of cars from shippers in the west, some of which were traced to the unloading elevators, and adjustments secured. Others were the result of leaks or other loss of grain in transit, and our investigations have assisted shippers in their claims against the carriers. The greater number of these complaints of shortage have been based upon guesses or estimates (without weighing) of the amount the shipper claimed the car should contain. Investigation has shown (except where leaks or broken seals were found) that the outturns were correct, and no grounds existed for the claim. The wide variation in the actual weight per bushel no doubt being responsible for many of the complaints, as 58 pounds of wheat loaded to an average depth in a car would weigh from 8,000 to 10,000 pounds less than 63 or 64 pounds wheat loaded to the same depth.

In our investigation of car shortages, we cannot base our computations on average weight, but must get from Winnipeg a record of the actual weight per bushel of the grain in the car in question, and also their notation of the depth in relation to the load line in the car. Answering the requests of shippers, some hundreds of condition reports have been sent out containing the following information: The number of the car, the date and elevator where unloaded, the grade and weight of the grain, the depth of load, the condition of car, and the seal records, thus covering complete information as to condition and outturns.

*Re* ORGANIZATION.

It would not appear that there could be much improvement made in the fundamentals of the organization and methods as at present constituted, for the accurate

5 GEORGE V., A. 1915

weighing of grain or the safe delivery of it to the boats, further than the perfecting of a more thorough system of records and checks with a view to following up and counterchecking every operation.

These matters are under consideration, and when satisfactorily worked out will be put into force.

All of which is respectfully submitted.

I have the honour to be, sirs,

Your obedient servant,

J. G. WHITE,

*Chief Weighmaster.*

## RULES AND REGULATIONS FOR WEIGHING OF GRAIN.

### SCALES AND SPOUTS.

#### *Receiving Pits.*

1. See that the pits are in good order and that the cut-off valves are free from any obstruction and perfectly tight when closed.

#### *Elevator Legs or Lofters.*

2. Examine them and see that no grain is leaking to the floors, either top or bottom, and that the floors around them are intact.

#### *Garners.*

3. See that they are in good order, free from dirt and dust as much as possible, and that the slides and valves work easily, open fully and close tightly, and see that the canvas between garner and scale is kept free.

#### *Scale Hoppers.*

4. See that they are in good working order, and that the frames are free from outside contact, or rubbing on anything, that the lever rods and slides work freely, and stay open or shut.

#### *Scales.*

5. Be sure that the scale and hoppers are free from dirt or grain before commencing weighing, close slides and balance scales every morning, see that the scales are kept on balance while in use.

See that the lead plugs are in place in the cover of weight hanger and that the nut is screwed tight on bottom of stem; see that no weights are missed and leads untouched.

See that the check rods lift off freely, and not bind, both when scale is empty and loaded.

Do not overload scale above capacity marked on it.

See that the hand weights are removed after each draft weighed.

### WEIGHING FROM CARS.

6. The weighman must insist on getting from the track inspector the load line of each car before weighing off the car. If the weight of the car shows it is to be above or below the average weight according to the load line given, hold the grain in the scale until you make inquiries, and a satisfactory reason given. State your reason on your weigh-sheet, also any leaks that have been reported by the track inspector.

## SESSIONAL PAPER No. 10d

If it happens that the contents of two or more cars get mixed, report the combined weight, enter the "catch" weight of each car upon your sheet, with a brief statement of particulars.

## WEIGHING TO CARS.

7. See that spouts leading to car shipping spouts are tight and free from leaks, and before weighing off a draft to car, see that spout leading from scale to shipping spout is properly set.

## WEIGHING TO VESSELS.

8. Before commencing weighing for vessels, the weighman must see that all shipping bins are sounded and empty, and that all spouts leading to shipping bins from scale or scales in use are properly placed, and slides opened.

See that the spouts are in good order, and free from leaks of any kind.

After the cargo has finished weighing, he must see the scale slides closed, and that all grain is out by sounding the shipping bins, also examine spouts and floors to see if any leak has occurred.

Keep a record of the time when he commenced weighing, and when he finished.

Note any leaks or any other irregularities in all cases on weigh-sheet.

## WEIGHING REPORT.

9. See that your reports are delivered promptly at the office.

Make your weigh-sheets commence and end with same cars as the elevator weighman does.

Take the weights from the scale beam yourself without calling, and check afterwards with the elevator weighman.

Be sure the initials of the cars, as well as the car numbers, and the name of the vessels are correctly entered on the weigh-sheet, enter each draft, show the number of the scale, also the bin number.

## GENERAL.

10. A weighman's duties are not confined to recording the weights of the grain alone, but he is expected to see that everything about the scale and spouts leading to and from them are in perfect condition.

Whenever anything is discovered to be out of order it must be at once reported in writing to the office.

If any scale is interfered with, or repaired in any way, except in the presence of a Government scale inspector, he will at once discontinue the use of such scale until reinspected by the regular Government inspector.

Mistakes are liable to occur; when you discover one, be sure to report it fully at once, more particularly if it is your own error.

Accuracy is necessary in your work to insure justice to the owner of the grain and the elevator.

Be careful with your additions on your weigh-sheet; see that they are correct.

A weighman who cannot correctly add up a few columns of figures without mistakes, leaves himself open to the charge of not being accurate in other branches of his work.

Your daily work commences at 7 a.m. unless otherwise instructed, and you are expected to be at your post early and avoid delay.

If from sickness or any other cause it is impossible for you to report for duty, notify the office immediately.

5 GEORGE V., A. 1915

No leave of absence must be taken without permission. The use of intoxicating liquors is forbidden. Avoid unnecessary talking. Work in harmony as much as possible with the employees with whom you come in contact. Do nothing to bring censure on yourself or the weighing department.

The failure to at once report any irregularities or breakages about the scales or spouts will be considered good cause for instant dismissal without notice.

### STATISTICS.

#### REPORT OF STATISTICIAN, H. E. GORDON.

To the Board of Grain Commissioners.

SIRS,—I beg to transmit to you the statistics for the crop year 1913-14, as prepared by this office (see appendix "B"). The figures pertain to terminal elevators, hospital elevators, public elevators, and country elevators.

This office, for the first time, has given considerable time to the matter of prices, and the result is also embodied in the report laid before you.

The figures *re* rates, by rail and by water, are not extensive this year, but the office hopes to go into the matter of rates next year in much the same way as prices have been handled this year.

This bureau was only established in March of 1914, with a staff of five members. The staff remains as at the time of organization, with the exception that Lieut. Muirhead, who volunteered for active service at the first call, is now at Salisbury Plains awaiting orders to go to the front.

By degrees, the statistical work is being centralized. Next crop year will see nearly, if not all, statistics given out from this bureau.

Since its establishment, this office has from time to time furnished quite extensive statistics to any parties requesting the same. These requests come from newspapers, magazines, banks, railroads, farmers, dealers, boards of trade, etc., etc.

All of which is respectfully submitted.

(Signed) H. E. GORDON,  
*Statistician.*

\*Space licenses are issued as a rule to independent dealers, who have leased special bin space in either farmer's elevators or independent elevators. Their operations for the most part, are confined to purchasing wagon-load lots of grain offered for sale on street.

The following statement shows the revenue received from license fees during the last six years:—

Season Sept. 1 to Aug. 31 following.	No. Applications Received.	Fees.
1908-09.....	1,808	\$3,616 00
1909-10.....	2,146	4,292 00

1912-13.....	2,579	5,158 00
1913-14.....	2,854	15,200 00

The subsequent increase in the revenue for season 1913-14, is accounted for by reason of an increase in the fees sanctioned by Parliament on June 6, 1912. Subsequent to that date the fee was \$2 in all cases.

The schedule of fees now in force is as follows:—

6. TARIFFS—EASTERN PUBLIC ELEVATORS.

#### I.—COUNTRY ELEVATORS.

TARIFF OF LICENSED COUNTRY ELEVATOR CHARGES FOR THE YEAR ENDING AUGUST 31, 1915.  
EFFECTIVE SEPTEMBER 1, 1914.

Subject to the capacity of the elevator and the nature of the construction, all grain tendered must be taken into store upon the following terms and conditions, and under the provisions of the Canada Grain Act, 1912.

##### *Maximum Rates.*

Receiving, elevating, spouting, insurance against fire, storing for the first fifteen days and putting into cars on track. No elevator shall charge more than one and three-quarters of a cent per bushel. Storage not otherwise provided, including insurance against fire for each succeeding day after the first fifteen days shall not exceed one-thirtieth of one cent per bushel.

##### *Shrinkage for Stored Grain.*

No elevator shall take more than one-half of one per cent to take care of shrinkage and waste in handling, storing and transmitting the grain to a terminal.

No elevator shall take more than one per cent shrinkage on tough, damp and wet grain.

##### *Shrinkage on Cash Grain.*

On street grain no elevator shall take a greater dockage than that shown by a proper test over a number ten sieve, except where grain contains foreign grain or seeds which cannot be taken out by a number ten sieve.

##### *Dockage.*

No elevator shall take a greater dockage than that shown by a proper test over a number ten sieve, except where grain contains foreign grain or seeds which cannot be taken out by a number ten sieve.

Every elevator must be equipped with the necessary sieves and scales for making proper tests, and the elevator operator must make the tests in the presence of the owner of the grain when requested.

*General.*

When tough, damp or wet grain is taken into store it shall be at the owner's risk, and the elevator operator shall have the right to ship it immediately to a terminal elevator for treatment.

The owner shall have the right to name the terminal elevator to which it shall be shipped.

## RULES AND REGULATIONS FOR COUNTRY ELEVATORS.

1. In shipping or delivering any grain stored in a country elevator, the net weight on the ticket or tickets shall be final; unless an investigation by the Board of Grain Commissioners shows reason for the contrary. The shipper to be paid in case of short shipment up to the amount of his or her ticket or tickets for the full billing capacity of the car at the same price as the car was disposed of.

2. All shipping bills for grain shipped through an elevator shall be made out by the elevator agent, and he shall advise such parties as the owner may instruct.

3. The elevator owner shall, on all grain shipped through the elevator, have the right to retain and hold the shipping bill until he receives a guarantee from the owner of the grain, another elevator owner, a licensed commission firm or individual, or any one else that the car may be sold to, that they will make proper adjustment as to the weight and grade. Upon receipt of storage tickets and lawful charges, the elevator owner shall deliver either the shipping bill to the party presenting the ticket or tickets, or a terminal warehouse receipt for the full amount of the grain called for in the ticket or tickets presented, up to the full carload.

4. The owner of grain in an elevator wishing such grain shipped to any point other than a terminal point, or where Government weights cannot be obtained, the owner of the grain must then accept the elevator weights at the shipping point as final, unless the owner of the grain proves the shipping weights are not correct. Provided, however, that the owner of the grain can always demand an affidavit as to the actual grain shipped and delivered from the elevator operator and receiver of said grain respectively.

## RULES AND REGULATIONS FOR STORING BY GRADE AND DOCKAGE IN COUNTRY ELEVATORS.

Elevators that have a limited storage capacity and not a sufficient number of bins to do special binning, so as to utilize to the fullest possible extent their storage space, shall receive and store grain under the following conditions:—

1. The owner of the grain can only demand the quantity that the storage ticket or tickets call for.

2. In case there is a dispute as to the weighing accuracy of the receiving scales, it shall be incumbent upon the owner of the elevator to prove that the scales are weighing accurately.

3. A proper sample must be drawn from each wagon load by the elevator operator at the time of delivery, in the presence of the party delivering same, and such sample must be drawn satisfactorily to both the deliverer and the operator.

4. Such sample must be placed in a receptacle satisfactory to the owner of the grain.

5. After the grain is delivered the sample drawn must be properly mixed in the receptacle in which it has been placed. The owner and the elevator operator shall then take out of the quantity mixed at least three pounds, and place it in a receptacle which must be numbered and sealed, and so made that it can be securely locked. The receptacle shall be supplied by the elevator owner, and secured by a padlock. The lock shall be provided by the owner of the grain, and he shall retain possession of the key. The receptacle and key shall thereupon be immediately forwarded to the Chief Inspector of Grain, Winnipeg, Man., all charges prepaid. After receiving the inspector's certificate, showing grade and dockage, the operating agent shall issue a storage ticket, showing grade and dockage, as given by the chief inspector, for the full

## SESSIONAL PAPER No. 10d

amount of grain taken into store, and shall deliver to the owner at his request, in not less than carload lots, on track or at a terminal point, the grade and quantity the storage tickets call for, after the owner has surrendered the storage receipts and paid or tendered all lawful charges against said grain.

6. The owner of the elevator shall, in all cases where grain is taken into store under the foregoing conditions, guarantee the grade and weight as specified in the storage ticket or tickets.

7. At the time of delivery of any grain where a ticket of this kind is being used, and it is agreed upon by the owner of the grain and the elevator operator that the grain is tough, damp or wet, and the elevator operator marks such ticket or tickets, "Out of condition, tough, damp or wet," then whatever grade such sample may receive from the chief inspector it will still grade "tough, damp or wet."

8. If the elevator operator fails at any time to draw and preserve such samples in the manner stated, in the case of dispute the onus will be on the elevator operator to prove the proper grade, and not on the owner of the grain.

Approved by the Board of Grain Commissioners for Canada.

C. BIRKETT,  
*Secretary.*

## II.—TARIFF OF INTERIOR TERMINAL ELEVATOR CHARGES FOR THE DOMINION GOVERNMENT ELEVATORS AT MOOSEJAW AND SASKATOON, FOR THE YEAR ENDING AUGUST 31, 1915.

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions and under the provisions of the Canada Grain Act.

### RATES.

1. *Elevation*, not otherwise specified, receiving, elevating, cleaning, spouting, insurance against fire, and storage for the first fifteen (15) days—One-half of one cent ( $\frac{1}{2}$ c.) per bushel.
2. *Storage*, not otherwise specified, including insurance against fire for each succeeding day or part thereof, after the first fifteen (15) days—One-thirtieth of one cent ( $\frac{1}{30}$ c.) per bushel per day, or one-half of one cent ( $\frac{1}{2}$ c.) per bushel for thirty (30) days.
3. *On grain* carrying a return of other grain of commercial value, for first separation, computed on gross weight of car, an additional charge of—One-half of one cent ( $\frac{1}{2}$ c.) per bushel.  
For each subsequent separation, computed on balance for separation, a further charge of—One-half of one cent ( $\frac{1}{2}$ c.) per bushel.  
Special rates will be given for cleaning and sacking seed grain.
4. *On mixed grains* handled as mixtures; receiving, elevating, spouting, insurance against fire and storage for the first fifteen days—One-half of one cent per bushel.
5. *On mixed grains* handled as mixtures; storage, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days—One-thirtieth of one cent ( $\frac{1}{30}$ c.) per bushel per day, or one-half of one cent ( $\frac{1}{2}$ c.) per bushel for thirty days.
6. *On wheat* carrying a return of screenings, an additional cleaning charge of—One-half of one cent ( $\frac{1}{2}$ c.) per bushel.

7. *On tough grain*, drying—One and one-half cents ( $1\frac{1}{2}$ c.) per bushel
8. *On damp or wet grain*, drying—Two and one-half cents ( $2\frac{1}{2}$ c.) per bushel.
9. *On screenings*: Elevating, spouting, insurance against fire, and storage for the first fifteen (15) days—Two cents (2c.) per hundred (100) pounds.
10. *On screenings*: Storage, including insurance against fire, for each succeeding day or part thereof, after the first fifteen (15) days—One-tenth of one cent ( $\frac{1}{10}$ c.) per hundred (100) pounds.
11. *On bulkheads*, for their removal and other additional expense in handling and unloading car—Two dollars (\$2) for each bulkhead.
12. *For preparing cars* for flax shipment when paper is required—One dollar (\$1) for each car.
13. *All charges* for cleaning, drying or other treatment will be computed on gross weights; for elevation and storage, on net weights; all charges accruing after issue of initial completed outturn and expense bill will follow the grain. All charges whatsoever must be paid before shipment.

## WHEAT SCREENINGS.

14. *On wheat* carrying a dockage of five per cent (5%) or more, after deducting one per cent (1%) of the gross weight for waste, a return will be made for the balance of the screenings, by paying one-half cent ( $\frac{1}{2}$ c.) per bushel for cleaning. No other return for screenings will be made.
15. *If disposition* of screenings covered by outstanding returns is not received within thirty (30) days from date of unload, they may be disposed of for account of whom it may concern.

## NO GRADE AND CONDEMNED GRAIN.

16. *All tough, damp, wet, condemned, heating, heated or fire burnt grain* will be received for treatment. If not treated it will always be at owner's risk of deterioration.

## GENERAL.

Grain shipped from any of the Dominion Government interior terminal elevators will be transferred through the Dominion Government elevator, Port Arthur, to steamers for one-half of one cent ( $\frac{1}{2}$ c.) per bushel, including ten days' free storage.

Approved by Board of Grain Commissioners for Canada, Fort William, Ontario, September 19, 1914.

## III.—FORT WILLIAM AND PORT ARTHUR TERMINALS.

TARIFF OF PUBLIC TERMINAL ELEVATOR CHARGES FOR THE YEAR ENDING SEPTEMBER 1, 1914.

(Effective September 1, 1913.)

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions and under the provisions of the Canada Grain Act, 1912:—

## RATES

*Elevation*, not otherwise specified; receiving, elevating, cleaning, spouting, insurance against fire and storage for the first fifteen days—Three-quarters of one cent ( $\frac{3}{4}$ c.) per bushel.

## SESSIONAL PAPER No. 10d

- Storage*, not otherwise specified, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days—One-thirtieth of one cent ( $\frac{1}{30}c$ ) per bushel.
- On Grain* condemned for or rejected because mixed with heated, heating, or fire burnt; receiving, elevating, spouting, insurance against fire and storage for the first fifteen days—One and one-half cents ( $1\frac{1}{2}c$ ) per bushel.
- On Grain* carrying a return of other grain of commercial value, for first separation, computed on gross weight of car, an additional charge of—One cent (1c) per bushel.  
For each subsequent separation, computed on balance for separation, a further charge of—One cent (1c) per bushel.
- On Mixed Grains* handled as mixtures; receiving, elevating, spouting, insurance against fire and storage for the first fifteen days—One and one-half cents ( $1\frac{1}{2}c$ ) per hundred pounds.
- On Mixed Grains* handled as mixtures; storage, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days—two-thirtieths of one cent ( $2/30c$ ) per hundred pounds.
- On Wheat* carrying a return of screenings, an additional cleaning charge of—One-half of one cent ( $\frac{1}{2}c$ ) per bushel.
- On Tough Grain*, drying—One and one-half cents ( $1\frac{1}{2}c$ ) per bushel.
- On Damp or Wet Grain*, drying—Four cents (4c) per bushel.
- On Screenings*: elevating, spouting, insurance against fire, and storage for the first fifteen days—Two cents (2c) per hundred pounds.
- On Screenings*: storage, including insurance against fire, for each succeeding day or part thereof after the first fifteen days—One-tenth of one cent ( $\frac{1}{10}c$ ) per hundred pounds.
- On Bulkheads*, for their removal and other additional expense in handling and unloading car—Three dollars (\$3) for each bulkhead.
- For Preparing Cars for Flax Shipments*—Two dollars (\$2) for each car.
- Unspecified Grain* will only be received, stored and treated subject to special charges to be agreed upon at the time, subject to the approval of the Board of Grain Commissioners.
- All Charges* for cleaning, drying, or other treatment will be computed on gross weights; for elevation and storage, on net weights. All charges accruing after issue of initial completed outturn and expense bill will follow the grain. All charges whatsoever must be paid before shipment.

## WHEAT SCREENINGS.

- On Wheat* carrying a dockage of 5 per cent or more, after deducting  $1\frac{1}{2}$  per cent of the gross weight for waste, a return will be made for the balance of the screenings. No other returns for screenings will be made.
- If Disposition of Screenings* covered by outstanding returns is not received within 30 days from date of unload they may be disposed of for account of whom it may concern.

## NO GRADE AND CONDEMNED GRAIN.

- All Tough, Damp, Wet, Condemned, Heating, Heated or Fire Burnt Grain* may always be refused. If received and stored it will be only under special contract and will always be at the owner's risk of deterioration. Except for immediate drying tough grain will only be received subject to 1 per cent shrinkage for moisture.

## IV.—FORT WILLIAM AND PORT ARTHUR TERMINALS.

## TARIFF OF PUBLIC TERMINAL ELEVATOR CHARGES FOR THE YEAR ENDING SEPTEMBER 1, 1915.

*(Effective September 1, 1914.)*

## RATES

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions and under the provisions of the Canada Grain Act, 1912:—

*Elevation*, not otherwise specified; receiving, elevating, cleaning, spouting, insurance against fire and storage for the first fifteen days—Three-quarters of one cent ( $\frac{3}{4}$ c) per bushel.

*Storage*, not otherwise specified, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days—One-thirtieth of one cent ( $\frac{1}{30}$ c.) per bushel.

*On Grain* carrying a return of other grain of commercial value, for first separation, computed on gross weight of car, an additional charge of—One cent (1c) per bushel.

For each subsequent separation, computed on balance for separation, a further charge of—One cent (1c) per bushel.

*On Mixed Grains* handled as mixtures; receiving, elevating, spouting, insurance against fire and storage for the first fifteen days—One and one-half cents ( $1\frac{1}{2}$ c) per hundred pounds.

## ALLOWANCE FOR INVISIBLE LOSS AND SHRINKAGE.

On all Grain received deduction from the gross weight to cover invisible loss and shrinkage in handling will be made as follows:—

On Wheat. . . . .	30 lbs. per car
On Flax. . . . .	28 " " "
On Oats. . . . .	50 " " "
On Barley. . . . .	50 " " "

## V.—RULES AND REGULATIONS APPLICABLE TO ELEVATORS OPERATING UNDER THE CANADA GRAIN ACT AS "HOSPITAL ELEVATORS."

1. "Terminal elevator" includes every elevator or warehouse which receives or ships grain, and is located at any point declared by the Governor-in-Council to be a terminal.

2. (a) There may be such number of hospital elevators as are determined by the board, which shall be governed by such regulations and restrictions as are imposed by the board.

(b) Any such elevator shall be required to take out a license and furnish a bond in such amount as the board determines.

(c) Notwithstanding anything in the Canada Grain Act, but subject nevertheless to the provisions of section 99 and sub-section 5 of section 115 of the Canada Grain Act, grain which is being shipped out from an hospital elevator shall, at the request of the owner or possessor thereof or his authorized agent, be inspected and graded and the grade so arrived at shall be the grade thereof.

3. (a) When grain shipped from any elevator is being systematically reduced in quality below the general average quality of the grain of similar grades in the bins of the terminal elevators, the chief inspector shall instruct inspection officers that no such grain shall be allowed to pass inspection except on a lower grade.

(b) The inspectors shall at all times keep careful watch on grain received into terminal elevators, and, if they find any such grain as aforesaid being received shall at once notify the chief inspector, who shall make an investigation forthwith and take action accordingly.

4. No grain that has been subject to scouring or treatment by use of lime or sulphur shall be graded higher than No. 3.

5. Every public elevator operator who allows the grain in a car which has been ordered out of his elevator, for which a bill of lading has been signed and from which a sample of grain has been drawn for inspection as provided in sub-section 3 of section 91 of the Canada Grain Act, to be returned, without the permission of the chief inspector, to the elevator from which it was loaded, shall, for each offence, be liable to a penalty not exceeding fifty dollars.

6. In the case of grain which is being shipped east from any public elevator in the division, the sample for inspection shall not be drawn from any car until the car has been billed for shipment, by the railway company.

7. Hospital elevators are prohibited from taking into their elevators, No. 1 Hard, No. 1 Northern and 2 Northern wheat.

8. Hospital elevators will have official weighing in and weighing out.

9. Under section 124, sub-section 3, grading out is permitted but same must conform to statutory requirements.

## VI.—TARIFF OF PUBLIC ELEVATORS IN THE EASTERN DIVISION.

There are nearly 3,000 country elevators in the western division with a capacity of 87,000,000 bushels. There are 4 interior terminal elevators in the western division with a capacity of 10,500,000 bushels, and there are 13 lake terminal elevators in the western division with a capacity of 41,100,000 bushels.

The Board of Grain Commissioners regulates the tariffs of all these elevators. The procedure of the board is as follows:

The tariffs are filed in the month of September. They are made known to interested parties, and if there are any objections to the tariffs or any changes desired, the Board hold sessions, hears evidence for and against, and gives its decision as quickly as is possible.

In regulating the tariffs the Board holds certain principles in view.

1st. That the tariffs should be shown to be reasonable.

2nd. That as far as possible tariffs should be uniform, that is to say, elevators similarly circumstanced, performing similar service, should operate under a uniform tariff.

3rd. That the published statement of the tariff in form should be simple, intelligible and unambiguous.

There are, accordingly, three tariffs in the west: one for country elevators, one for the Government interior terminals and one for the lake terminals; and the board consider that the form of each of the tariffs of the western elevators is simple, intelligible and unambiguous, and that there is a large body of evidence to show that upon the whole the tariffs are reasonable.

In the eastern division there are 21 public elevators with a total capacity of 28,550,000 bushels. Neither in number, nor in capacity, nor in the volume of business done are the elevators of the eastern division equal to those of the western division. It would seem, therefore, to be not impossible to have the tariffs of the eastern elevators in as satisfactory a shape as those of the western elevators, but as a matter of fact, the tariffs of the eastern elevators are not on a satisfactory basis.

The eastern elevators are located at different points. Their tariffs are regulated by different authorities and each elevator publishes its own tariff. Any one taking the whole of these tariffs will experience considerable difficulty in comparing the one with the other, and considerable difficulty in interpreting some of the items.

In order to make the matter plain the board has analyzed the tariffs of the eastern elevators, and set them forth in the following tables.

It will be noticed that these tariffs do not appear to have considered uniformity at all. For example, the lake port elevators have one tariff for winter and another for summer, but the elevators vary much in regard to dividing the year into the two parts. Five of the elevators, viz., Tiffin, Collingwood, Depot Harbour, Midland, and Port McNicoll, divide the year into two periods, one period beginning December 16 and ending August 31. The elevator at Goderich divides the year into two periods, one period beginning April 1 and ending September 1. Port Colborne divides it into two periods, one period begins May 1 and ends November 15. Prescott and Kingston take as their dividing dates, May 1 and November 30.

Again, in regard to the insurance, the Government elevators at Port Colborne, Halifax, and St. John appear to provide for insurance. The Harbour Commissioners at Montreal appear to provide for insurance after the expiration of the free storage

## SESSIONAL PAPER No. 10d

period, and the other elevators do not provide for it. Again, the free storage period varies in these elevators. Thus, taking the season from May 1 to August 31, some of the elevators give thirty days free storage on domestic grain, others give twenty days and others fifteen days. In the season from September 1 to November 30 on domestic grain some give fifteen days and some ten days. During the season from November 16 to December 15 on domestic grain some give no free storage, some give ten days and others fifteen days. During the period from December 16 to April 30 some give no free storage period on domestic grain, some give thirty days and some give twenty days. There is a corresponding lack of uniformity in the free storage period for export grain.

The free storage period is, of course, a real part of the tariff. There are, however, other variations in the tariff itself. Further, there is a tendency in the lake port elevators to treat domestic grain differently from export, a tendency which requires very careful study.

The tariffs, therefore, of the eastern elevators taken as a group are lacking as regards uniformity, and shippers of grain have some reason to complain of the fact. It may be difficult to secure uniformity in all the tariffs, or even in a considerable number of them, but an attempt should certainly be made.

Some of the clauses in some of these tariffs are difficult to interpret, and cases have arisen where the difficulties in interpretation have been acute.

An Order in Council was recently passed giving the Board of Grain Commissioners authority to regulate the tariffs of some of the elevators hitherto not within their jurisdiction. The legality of this Order in Council has been challenged and the matter has not been decided. For this and other reasons the Order in Council is a dead letter. It is a simple fact that at the present moment no one body has the authority to regulate all these tariffs, and the variations, ambiguities and confusions are likely to remain.

CHAPTER 8.

DOMINION GOVERNMENT ELEVATOR.

- 1. AUDITOR'S REPORT FOR YEAR 1913-14.
- 2. AMOUNT OF GRAIN HANDLED FROM SEPTEMBER 1 TO NOVEMBER 30, 1914.

I.

The Board of Grain Commissioners,  
Fort William, Ont.

DEAR SIRS,—In accordance with instructions conveyed to us through your secretary, Mr. C. Birkett, we have audited the books and accounts of the Dominion Government elevator, Port Arthur, Ont., from the date of commencement of operations, viz: October 16, 1913, to August 31, 1914. We now submit our report thereon, together with the statements enumerated in the appended index.

OPERATIONS.

The operations of the elevator for the period from October 16, 1913, to August 31, 1914, resulted in a net profit of \$149,530.31, subject to depreciation on elevator buildings and equipment and to charges for services rendered by the various departments at Ottawa, and interest on capital invested. A detailed statement of the income and profit and loss account is given in Exhibit "A," of which the following is a summary, together with the percentages, based on the gross earnings:

	Amount.	Percentage.
Gross earnings.. . . .	\$216,795 55	100.00
Direct expenses.. . . .	59,304 86	27.36
Gross profit.. . . .	\$157,490 69	72.64
Indirect expenses.. . . .	8,806 49	4.06
Net profit.. . . .	\$148,684 20	68.58
Additions to income.. . . .	846 11	.39
Net income.. . . .	\$149,530 31	68.97

While the storage capacity of the elevator is 3,250,000 bushels, during the period under review 10,257,883 bushels were handled, as detailed in schedule "1." Under-  
noted we set forth the gross earnings, expenses, etc., on a per bushel basis:

	Amount.	Earnings, etc. Per Bushel. Cents.
Gross earnings.. . . .	\$216,795 55	2.113
Less direct expenses.. . . .	59,304 86	0.578
Gross profit.. . . .	\$157,490 69	1.535
Less indirect expenses.. . . .	8,806 49	0.086
Net profit.. . . .	\$148,684 20	1.449
Additions to income.. . . .	846 11	0.008
Net income.. . . .	\$149,530 31	1.457

## SESSIONAL PAPER No. 10d

*Gross earnings, \$216,795.55.*—The source and composition of this amount are as follows:

Storage...	\$156,700 79
Screenings...	39,710 62
Cleaning...	17,957 37
Bulkheads...	1,276 50
Drying...	1,150 27
Total...	<u>\$216,795 55</u>

*Direct expenses, \$59,304.86.*—These embrace the direct expenses of operating the elevator and include charges for labour, power, fuel, insurance repairs, etc. These expenses represent a percentage of 27.36 on the gross earnings.

*Indirect expenses, \$8,806.49.*—Further details of the items aggregating this amount are enumerated in the income and profit and loss account, Exhibit "A." It will be observed that the expenses include the cost of a typewriter, telephone booth, and flag pole, also provision for depreciation of office furniture and fixtures. We were unable to ascertain from the records at Fort William whether any fidelity bond insurance is carried.

*Addition to income, \$846.11.*—This amount, which represents .39 per cent of the gross earnings, may be detailed as follows:—

Interest on freight...	\$810 21
Revenue from wire out-turns...	35 90
Total...	<u>\$846 11</u>

## FINANCIAL POSITION.

In Exhibit "B" we present a balance sheet showing the financial position of the elevator, as disclosed by the books and accounts at Fort William, as at August 31, 1914, of which the following is a summary:—

<b>Assets—</b>	
Current assets...	\$ 33,156 31
Office furniture and fixtures...	312 30
Accrued income...	5,498 95
Deferred charges...	390 45
Receiver general, Ottawa...	119,946 85
Total...	<u>\$159,304 86</u>
<b>Liabilities—</b>	
Current liabilities...	\$ 9,416 71
Freight suspense account...	357 84
Surplus...	149,530 31
Total...	<u>\$159,304 86</u>

Subject to the qualifications in this report, we hereby certify that, in our opinion, the balance sheet, Exhibit "B," is properly drawn up so as to correctly reflect the financial position of the Dominion Government elevator at Port Arthur, as at August 31, 1914, and as shown by the books maintained at Fort William.

On the constituent items contained in the foregoing balance sheet we submit the following comments:—

It will be observed that no amount has been included in respect of cost of construction of the elevator or capital invested, the books at Fort William containing no record of same. We are informed the construction was carried out under an approved contract, the payments in connection therewith being made through the Department of Trade and Commerce at Ottawa. A statement recording the cost of construction

5 GEORGE V., A. 1915

as \$1,379,409.43 was submitted to us, which we were unable to verify to our satisfaction. A summary of the statement referred to may be shown as follows:—

Contract price including extras.. . . .	\$1,216,171 46
Supervising engineers and architects.. . . .	13,146 42
Cost of site.. . . .	90,000 00
Dredging.. . . .	37,049 93
Electrical apparatus.. . . .	19,775 00
Connecting spur.. . . .	589 51
Advertising, legal expense, inspector's salary, etc.. . . .	2,677 11
Total.. . . .	<u>\$1,379,409 43</u>

We were unable to ascertain from the records at Fort William the extent of insurances effected on the property, and no title deeds were produced for our inspection.

No charge has been made for interest on capital invested or for services rendered by the various departments at Ottawa, and no provision has been made for depreciation of elevator buildings and equipment during the period.

*Current assets, \$33,156.31.*—These comprise the following:—

Cash in banks.. . . .	\$23,055 14
Accounts receivable.. . . .	8,805 25
Freight receivable.. . . .	1,295 92
Total.. . . .	<u>\$33,156 31</u>

Cash in banks, \$23,055.14. This consists of the following:—

Bank of Hamilton, Fort William.. . . .	\$ 7,636 91
Bank of Montreal, Fort William.. . . .	15,418 23
Total.. . . .	<u>\$23,055 14</u>

Bank of Hamilton, Fort William, \$7,636.91. This account is further described as the contingent account, and represents a fund of \$10,000 for expenses, etc., in the operation of the elevator, cheques being drawn as required against the fund, which is reimbursed monthly by the Receiver General. The following is a reconciliation of the account as at August 31, 1914:—

Balance in bank as above.. . . .	\$ 7,636 91
Add cheque drawn against account during August not yet refunded.. . . .	\$2,363 19
Less cheque paid November 25, 1913, as \$5 35, refunded as \$5.45.. . . .	10
	<u>2,363 09</u>
Total amount of contingent account.. . . .	<u>\$10,000 00</u>

We have examined the account in detail, and a certificate has been received from the bankers in verification of the balance in bank.

Bank of Montreal, Fort William, \$15,418.23. This account is operated by depositing all collections at Fort William. From time to time transfers are made to the credit of the Receiver General's account in Ottawa. We have verified this account in detail, and have obtained a certificate from the bankers in support of the above balance.

Bank of Ottawa, Winnipeg.—Nil. The collections of freight and charges at Winnipeg are deposited in this account, and transfers made periodically to the credit of the Receiver General in Ottawa. We have verified the details of this account.

Accounts receivable, \$8,805.25. These accounts are shown in schedule "3." We are informed that they are considered good and collectible.

Freight receivable, \$1,295.92. This represents amounts collectible from shippers of grain to the elevator, and has been verified by us.

## SESSIONAL PAPER No. 10d

Office furniture and fixtures, \$312.30. This account may be shown as follows:—  
Furnishings—

At general office.. . . .	\$142 75
At elevator office.. . . .	179 25
Electrical fittings.. . . .	68 37
	<hr/>
	\$390 37
Deduct depreciation at 20 per cent.. . . .	78 07
	<hr/>
Balance as above.. . . .	\$312 30

*Accrued income, \$5,498.95.*—The accrued charges for storage and handling on warehouse receipts outstanding, as detailed below, were verified, and we are satisfied as to their accuracy:—

Storage.. . . .	\$5,445 87
Inspection and weighing out.. . . .	35 20
Drying.. . . .	12 95
Bulkheads.. . . .	3 00
Interest.. . . .	1 90
	<hr/>
Total.. . . .	\$5,498 95

We made a comprehensive test of the grain received in the elevator and shipped, and satisfied ourselves as to the correctness of the records kept in this connection.

In Schedule "2" we submit a statement showing the surplus and shortage on the various grains handled, based on the comparison of the warehouse receipts outstanding and the official weighup as at July 31, 1914. No cognizance of these differences has been taken in the accounts as at August 31, 1914.

*Deferred charges.—Insurance unexpired, \$390.45.*—This amount represents the unexpired proportion of insurance premiums as follows:—

On grain.. . . .	\$346 05
On employers' liability.. . . .	44 40
	<hr/>
Total.. . . .	\$390 45

*Receiver General, Ottawa, \$119,946.85.*—This amount represents the balance at debit of the Receiver General's account as at August 31, 1914, after charging amounts remitted to, and crediting amounts received from Ottawa, and may be summarized as follows:—

Transfers from Bank of Ottawa, Winnipeg, on account of freight charges collected.. . . .	\$1,127,844 10
Transfers from Bank of Montreal, Fort William on account of collections at Fort William.. . . .	181,715 29
	<hr/>
	\$1,309,559 39
Deduct—	
Freight charges drawn on letter of credit account of Bank of Montreal, Ottawa ..	\$1,115,048 60
Remittance received from Ottawa on account contingent account.. . . .	74,563 94
	<hr/>
	1,189,612 54
	<hr/>
	\$119,946 85

The transfers mentioned above have been vouched through the respective bank accounts.

With regard to the credits allowed in the Receiver General's account for freight charges, these are paid by cheque drawn on letter of credit account, Bank of Montreal, Ottawa. Appropriations are made from time to time by the Receiver General to the

5 GEORGE V., A. 1915

credit of this account, but as details of these appropriations are not recorded in the books at Fort William no separate mention of the account is made in the balance sheet, Exhibit "B."

*Current liabilities, \$9,416.71.*—These consist of the following:—

Accounts payable...	\$2,706 78
Wages payable...	2,776 40
Freight payable...	3,933 53
Total..	<u>\$9,416 71</u>

Details of the accounts payable are shown in Schedule "4."

*Wages payable, \$2,776.40.*—This represents the wages of the superintendent and employees at the elevator for the month of August, 1914, which were paid on September 1, 1914.

*Freight payable, \$3,933.53.*—This consists of freight payable to the following companies as at August 31, 1914:—

Canadian Northern Railway...	\$3,033 85
Canadian Pacific Railway...	899 68
Total..	<u>\$3,933 53</u>

*Freight suspense account, \$357.84.*—This represents the differences during the period under review between sums charged to shippers and the amounts paid or payable to the railway companies, which is subject to adjustment.

*Surplus, \$149,530.31.*—This account comprises the net income for the period from October 16, 1913, to August 31, 1914, as shown by the income and profit and loss account.

We have pleasure in reporting that the books and accounts are carefully maintained, and have to express our appreciation of the courtesies extended to us during the course of our examination.

Yours truly,

Sgd.) MARWICK, MITCHELL, PEAT & Co.,  
Chartered Accountants.

### INTERIOR TERMINAL ELEVATORS.

1. REPORT OF CONSTRUCTION BY CHIEF ENGINEER HOWE.
2. APPROXIMATE AMOUNT OF GRAIN HANDLED AT MOOSEJAW AND SASKATOON, FROM OPENING TO NOVEMBER 30, 1914.

#### I.—REPORT OF TERMINAL ELEVATOR CONSTRUCTION, BY CHIEF ENGINEER HOWE.

A contract for the construction of two interior terminal elevators, one at Moosejaw, Saskatchewan, and the other at Saskatoon, Saskatchewan, was let on September 10, 1913, to the Barnett-McQueen Company, Limited, of Fort William, Ont. The elevator at Moose Jaw was opened to receive grain October 14, 1914, and the elevator at Saskatoon on October 12, 1914.

The two elevators are duplicate plants, having been constructed from the same set of plans and specifications, except for minor alterations made necessary by local conditions at each building site. The total cost of the Moose Jaw plant is approximately \$1,200,000, and that of the Saskatoon elevator about \$1,100,000. The greater cost of the Moose Jaw plant results from the installation of a power plant in connection with that elevator.

Each elevator has a capacity of 3,500,000 bushels of grain. The working house portion has a capacity of 500,000 bushels of grain, and is furnished with ten No. 9 Monitor receiving separators, two Monitor flax separators, one Richardson wheat and oats separator and one Monitor screenings separator. The storage house has a capacity of 3,000,000 bushels of grain. A drying plant having a capacity of 24,000 bushels of damp grain per day is installed in a separate building adjacent to the elevator. Steam for drying purposes is furnished by two internally fired boilers of 100 horse-power capacity each. The receiving capacity of each elevator is about fifteen cars of grain per hour, and the shipping capacity about twenty-four cars per hour.

Each elevator is of reinforced concrete construction throughout. Each elevator covers a ground area of about 175 feet by 460 feet. The roof of the working house is about 190 feet above the ground level. To form a suitable foundation on the prairie soil, the use of about 9,000 piles was made necessary for each elevator. The working house contains 112 separate bins, and the storage house 150 separate bins.

All machinery in these elevators is electrically driven, a separate motor being provided for each machine. Power for the Saskatoon elevator is purchased from the city of Saskatoon, power at 10,000 volts being brought to the site by an underground cable and transformed to the required voltage in the elevator sub-station. Power for the Moose Jaw elevator is furnished by a Diesel oil engine plant, operated in connection with the elevator. This plant contains four Diesel units, three of 250 horse-power each, and one unit of 125 horse-power, the installation being housed in a reinforced concrete building adjacent to the elevator. Storage tanks for fuel oil with a capacity of 10,000 gallons of oil are installed in the power-house basement.

Each elevator is built on a site containing approximately 50 acres of land, and is served with three receiving tracks and two shipping tracks. At Saskatoon three additional storage tracks are provided at the elevator site, and the elevator trackage is connected by direct spurs with the Canadian Pacific, Canadian Northern, and Grand

5 GEORGE V., A. 1915

Trunk Pacific railways. At Moose Jaw one additional storage track is provided at the site, and the elevator trackage is served by a spur from the Canadian Pacific railway. Provisions are made for a future direct spur from the Grand Trunk Pacific railway to this site.

An interior terminal elevator at Calgary, Alberta, is now under construction. The contract for this elevator was awarded on June 5, 1914, to Janse Bros., Boomer, Hughes and Crain of Calgary. This elevator plant will be completed about September 1, 1915, and will cost about \$850,000.

The Calgary elevator will have a total capacity of 2,500,000 bushels of grain. The design and equipment will be similar to that of the Saskatoon and Moose Jaw elevators, except that the storage house will have a capacity of 2,000,000 bushels of grain, instead of 3,000,000 bushels as for the Moose Jaw and Saskatoon elevators. Piling was found to be unnecessary for the foundation of this elevator.

The elevator site at Calgary contains about 35 acres of land. The elevator trackage will be served by direct spurs from the Canadian Pacific and Canadian Northern railways. The Grand Trunk Pacific railway will have access to the site by a transfer over the Canadian Northern railway. Electric power for the elevator will be purchased from the city of Calgary.

Tenders have been called for a reinforced concrete terminal elevator to be built at Vancouver, B.C. The contract for this elevator was let on December 1, and the elevator will be completed about November, 1915. This elevator will have a total capacity of about 1,250,000 bushels of grain, and will be used mainly for transferring grain in bulk from cars to boat.

### MATTERS AFFECTING GRAIN SHIPMENTS AT INITIAL POINTS.

1. LOADING PLATFORMS.
2. TEMPORARY AGENTS.
3. COLLAPSED COUNTRY ELEVATORS.
4. SEED GRAIN, SHIPMENT OF.
5. WET GRAIN, SHIPMENT OF.
6. SHORTAGE OF CARS.

#### I.—LOADING PLATFORMS.

Sections 189 to 193 (both inclusive) of the Canada Grain Act provide that on written application being filed with the board between the 15th of April and the 15th of October by at least ten farmers resident within 20 miles of a shipping point, and on the approval of the application, the railway company shall, within 30 days, erect and maintain at such point a loading platform suitable for the purpose of loading grain from vehicles direct into cars. Aforesaid provisions of law are also applicable to petitions for the enlargement of loading platforms.

The dimensions of a standard two-car grain loading platform are as follows: Length of deck, 56 feet, (exclusive of approach), by 18 feet wide.

Approach, 1 foot rise in 10 feet.

Decline, 1 foot fall in 6 feet.

Side of platform nearest rail to be 6 feet from the centre of the track.

Deck of platform to be 4 feet above top of rail and to be surrounded on the side nearest the rail with an 8-inch by 10-inch curb firmly bolted to the deck of the platform. The whole platform, including deck and approaches on the side farthest from the rail, to be surmounted with a guard rail not less than 3 feet high.

Since the board took office in April, 1912, petitions for loading platforms have been received, and the railway companies were ordered to construct standard grain loading platforms at the following points:—

## SESSIONAL PAPER No. 10d

On April 29, 1914, a petition for a loading platform from farmers at Roe Siding, on the Canadian Northern railway in Saskatchewan, was refused, as the shipments from that district did not justify the establishment of such a facility, only one car of grain having been shipped during the season of 1913.

## ENLARGEMENTS ORDERED.

Petitions for the enlargement of grain loading platforms have been received from a large number of places, and after a thorough investigation in each separate case enlargements of existing platforms were ordered at the following points:—

Ardath, Anglia, Bridgeford, Baldur, Birdview, Blackie, Brant, Blueher, Bulyea, Bounty, Bradwell, Cheviot, Dufresne, Delisle, Diana, Earl Grey, Ewart, Expanse, Findlater, Fielding, Fairmount, Froude, Griswold, Hilton, Humboldt, Hawarden, Homewood, Herbert, Hawood, Imperial, Kinley Khedive, Kronan, Kamsack, Kendal, Leslie, Langham, Lanigan, Loreburn, Ladysmith, Lena, Leighton, Moosomin, Montmartre, Monarch, Netherhill, Neville, Odessa, Ogema, Pearce, Prince, Provost, Pilot Mound, Poplar Point, Perdue, Rhodes, Reston, Roseisle, Rosser, Ralph, Swan Lake, Strassburg, Swallow, Stephenfield, Staveley, St. Jean Baptiste, Sheho, Togo, Thelherne, Towuline Sgd., Vibank, Vaseoy, Vonda, Venn, Vulcan, Varcoe, Vermilion, Wilcox, Webb, Whitewood, Waldeck.

## EXTENSIONS REFUSED.

A large number of petitions for extensions of loading platforms were refused as, in the opinion of the board, the amount of grain shipped did not justify any enlargement of the then existing loading platform. The following are the points from which said petitions were received:—

Asquith, Armilla, Angusville, Argyle, Blueher, Berton, Brada, Blackfoot, Burrows, Beaver, Bechard, Brewer, Beverley, Bowell, Beadle, Bawlf, Cardale, Coblenz, Cluny, Cutarm, Cadogan, Congrieve, Clearwater, Cana, Cando, Donolda, Duro, Elva, Fiske, Golden Stream, Glenora, Glenavon, Granum, Hazelcliffe, Hamlin, Hitchcock, Harte, Harmsworth, Ingelow, Innisfree, Jansen, Kelwood, Kylemore, Kipling, Keoma, Landers, Lewvan, Lowe Farm, Limerick, Menthmore, Marchwell, Minto, Melville, Ogilvie, Otterburne, Pine Creek, Pleasant Point, Pangman, Ryerson, Red Jacket, Red Willow, Radisson, St. Gregor, Swallow, Semans, Sovereign, Sutherland, Scott, Strathlow, Stecum, Tugaskie, Trainor, Tenby, Vista, Vera, Wakopa, Watrous, Zelma.

## DEFECTS REMEDIED.

Complaints regarding defects in loading platforms and the approaches thereto, are continually being received by the board. Immediately on receipt of information that a platform is in need of repairs the railway company is notified, with the result that the defect complained of is remedied. The platforms at the following points have received such attention:—

Aberfeldy, Brooks, Birmingham, Big Valley, Brada, Birtle, Cutarm, Cordova, Dundurn, Ewart, Ensign, Fiske, Hummerston, Hamiota, Ingelow, Keoma, Lashburn, Langham, Minto, Moosomin, Mervin, Nokomis, Noble, Newton, Nottingham, Oakville, Prat, Vera, Vonda, Windygates, Winter, Wilcox, Wakopa, Willow Range.

## II.—TEMPORARY AGENTS AT FLAG STATIONS.

According to section 195, clause 3 of the Canada Grain Act, the board is empowered to order the railway companies to provide at flag stations or shipping points a suitable person whose duties shall be:—

- (a) To keep for the use of shippers at all times during the day, a car order book, in which orders for cars may be entered, in accordance with the provisions set forth in the Canada Grain Act;
- (b) When loading of car is completed, to seal such car;
- (c) To provide shippers with the regular form of shipping bill; and
- (d) When such grain shipping bill is properly filled out by the shipper, to hand it to the conductor of the train that picks up such car or place it where such conductor may get it.

The board has received many requests for the appointment of such agents, resulting in the railway companies being ordered to engage temporary agents during season 1912-13 at the following number of points until such time as the bulk of the marketable crop has been shipped: Saskatchewan, 73; Manitoba, 42; Alberta, 8.

During the season 1913-14: Bryant, Saskatchewan, C.N.R.; DeWinton, Alberta, C.P.R.; Gorlitz, Saskatchewan, G.T.P.; Lavinia, Manitoba, C.N.R.; Mossbank, Saskatchewan, C.N.R.; Mazeppa, Alberta, C.P.R.; Shanawan, Manitoba, C.P.R.; Tilney, Alberta, C.N.R.; Wiseton, Saskatchewan, C.N.R.

The falling off in the number of requests for the appointment of temporary agents is no doubt accounted for by reason of the plentiful supply of empty cars, supplied by the railway companies at country points, resulting in the freer movement of grain, and doing away with congestion, which in past years has been very apparent.

## IV.—SHIPMENT OF SEED GRAIN.

In consequence of the acute car shortage in the West during the season 1912-13, the board received numerous requests from farmers, asking that they be given cars out of turn for the shipment of seed grain.

In accordance with section 207 (c) of the Canada Grain Act, after considering each case on its merits, the board ordered the railway companies to supply cars (out of turn) for the above mentioned purpose to applicants as noted in the following statement:—

V.—SHIPMENT OF WET GRAIN.

Owing to the adverse climatic conditions prevailing in the West during the fall of 1912 and the spring of 1913, a large proportion of the 1912 crop was in danger of becoming unmarketable, being tough, damp, wet, and mixed with snow and ice.

In order to save as much as possible of this grain, by having it rushed to the terminal elevators for treatment, the board authorized the individuals and companies, as per the following list, to load their grain out of turn.

Authority for such action is set forth in section 207, clauses "B" and "D" of the Canada Grain Act.

It will be noted that during the following season very few requests for relief were received. The crop that year was of an unusually high standard, the weather conditions for harvesting and marketing being favourable.

Pursuant, therefore, to the powers vested in the board, cars were ordered supplied by the board to the number of applicants as shown in the following statement.

Oct. 6.....	Royal Elev. Co. vs. Western Elev. Co.....	Claim of \$190, being loss to Royal Elevator Co. caused by the Western Terminal Elev. Co., not advising them of the out turn at their terminal elevator of car No. 47580, <i>ex Tugaske</i> , containing Flax.	The Board ruled that the Western Ter. Elev. Co. must pay claimant the difference in price of flax, between that which prevailed on the day expense bill was received by defendants from C.P.R. and the day out-turns were received by the Royal Elev. Co.
Oct. 7.....	Spencer Grain Co. vs. C.P.R..	<i>Re</i> C.P. car No. 121088, claim \$73.20 for part of a car of barley. Car was bulk-headed, part to go to Brackman & Kerr, and part to the Canada Malting Co. The former company got their portion, and claim to have billed the car to the Canada Malting Co., which company affirms that they did not receive it. The C.P.R. refuses to accept responsibility.	The Board arranged a meeting at Calgary to investigate this case, but were later advised that the parties in this dispute had come to satisfactory arrangements.

Oct. 25.....	Thos. Matcham vs. MacLennan Bros...	Delay in selling car No. 20639 containing 1511 bushels of grain, which was consigned to the defendants for sale on commission.	The Board fully investigated this claim and found that MacLennan Bros. were not at fault.
Oct. 25.....	Ben Foster Somerset, Man. vs. Blackburn & Mills.	This company purchased a carload of barley from Mr. Foster, for future delivery. Exception was taken to the use in this case of the track buyer's purchase contract form, set forth in Schedule "G" of the Canada Grain Act, as this form of contract did not suit the conditions of the transaction. Amendment to the Grain Act, respecting this form has been suggested by Messrs. Blackburn & Mills.

Oct. 31.....	Murdock Kerr vs. Standard Elev. Co.	Shortage on shipment of stored grain.	Case dismissed.
Oct. 28.....	Geo. West vs. N. M. Paterson & Co.	Delay in settling for car No. 1 Nor. Wheat consigned to Paterson & Co.	As receipt of 1 <sup>o</sup> wheat at any hospital elevator such as Paterson Co.'s elevator is contrary to law, the grain had to be diverted to another elevator. Hence the delay.

## SESSIONAL PAPER No. 10d

November 3, 1913.—Ames, Brooks Co., Duluth, Minn. (Complainants)—

The steamer *Philip Minch* was loaded with 490,402 bushels of 2 C.W. oats, at the Grain Growers' Grain Company's terminal elevator at Fort William, and at the Port Arthur elevator at Port Arthur, on the 12th and 13th days of October, 1913. The cargo was unloaded at Buffalo, and complainants affirm that the oats were found to be out of condition and heating at the unloading.

The board held a special session at Fort William on November 11, 1913, to hear this case, and after due consideration rendered the following decision:—

"The Board of Grain Commissioners consider that the inspector should have reported to the office that he had caught some warm grain going into the cargo. This would have given the inspector in the office an opportunity of making an investigation before issuing the certificate. The negligence of the inspector in not doing this does not involve the department in any liability.

The board is of the opinion that the elevator owners did accidentally, or otherwise, ship some warm grain into the cargo, and the elevator should be held responsible for any loss caused thereby.

The board has no means of ascertaining how much warm grain was run into the cargo, and has no means of ascertaining what amount of damage it may have done. The board regrets that the complainants did not give notice to the board at the time of unloading, so as to give an opportunity of having official samples taken and an inspection made before the identity was lost.

Upon a review of the conditions of the case, the Board of Grain Commissioners consider that the Canada Grain Act gives it no way of assessing the damages, if any. The complainants, if they have any evidence that will enable them to get damages from the law courts, have that recourse open."

Oct. 31....	D. Watson vs. J. Richardson & Sons.	Sale of car No. 72852 on commission.	No cause for complaint.
Nov. 6....	T. McHale vs. North Star Grain Co.	Settlement price on track purchase.	On investigation Board found complaint to be unfounded.

November 5, 1913.—Affidavits were received from several farmers and shippers of Revenue, Sask., to the effect that train conductors on the Wilkie-Kerrobert branch of the Canadian Pacific Railway were refusing to supply farmers with cars for the shipment of their grain until paid \$5 for each car; in fact this sum was paid in several instances.

As such actions on the part of the conductors are contrary to law, the board supplied the general manager of the Canadian Pacific Railway with full particulars resulting in conductor G. M. Riddock and brakemen R. S. Correll and R. C. Laird being arrested, and tried at Wilkie, Sask., on December 3, 1913, before James Rodney, J.P., of Scott.

These men were convicted on charges of corruptly obtaining bribes for supplying cars to farmers at Revenue. Riddock was fined \$100 and costs, or in default of payment six months' imprisonment, while Correll and Laird were each fined \$25 and costs, or two months in jail.

Nov. 18...	Wm. T. Baker <i>vs.</i> Alta. Pac. Grain Co.	Elevator Co.'s agent at Blackie refused to bill stored grain according to owner's instructions.	Complaint withdrawn, matter having been satisfactorily adjusted.
Dec. 2...	A. G. Robertson <i>vs.</i> C.P.R.	Mr. Robertson shipped six carloads of grain to Fort William, and every car out-turned short.	Chief Weighmaster Mr. J. G. White thoroughly investigated the handling of these shipments and could find nothing amiss.
Dec. 3...	Woodward & Co. <i>vs.</i> Dominion Elev. Co.	Refusal of country elevator agent at Langenburg, Sask., to handle grain through elevator unless consigned to his own company.	Allegations denied by elevator company. They state, however, that owing to the limited capacity of their elevator grain was refused.
Dec. 5...		A communication was received from Mr. Robert E. Serr of Krupp, Sask., advising that he had 3,500 bushels of blue stem variety of wheat, and was unable to sell same.	As there is no sale for such wheat in Eastern Canada, Mr. Serr was advised to get in touch with the Secretary of the Calgary Grain Exchange.
Dec. 5...	A. S. Frederickson, Dundurn, Sask.	Illegal operation of the ear order book at Dundurn, Sask.	File sent to country elevator inspector Brown who duly investigated condition complained of.
Dec. 8...	J. H. Walker <i>vs.</i> Western Elev. Co.	Has country elevator operator with elevator on C.N.R. right to refuse grain for shipment to Duluth?	Such elevator operator cannot be compelled to do so.
Dec. 9...	T. J. Adair <i>vs.</i> Grain Growers' Grain Co. and C.N.R.	Delay in handling of ear of wheat.	File handed to inspector Snow at Winnipeg, who arranged settlement. The C.N.R. paid \$150 and the Grain Growers' Grain Co. paid the balance of claim.
Dec. 10...	Albert Lawrence.....	Complaint laid against Mr. Wisheart for loading a car of grain out of turn at Brada Siding.	Country elevator inspector S. Brown was sent to investigate, and found that complaint was well founded, and if Mr. Lawrence desires to prosecute he has a good case under Section 120 of the Canada Grain Act.
Dec. 10...	C. A. Gillis <i>vs.</i> State Elevator Co.	The complainant stored 1,033 bushels of flax in this company's elevator at Pambrum. The grain was shipped in an 80,000 lb. car resulting in Mr. Gillis having to pay \$30.80 excess freight. The car also out-turned short, \$60.67 was claimed in this connection making total claim \$91.47.	The Board held a special session at Swift Current to consider this case, and after proper hearing gave judgment in favour of the claimant for the amount claimed.
Dec. 22...	Walter Young <i>vs.</i> Western Elev. Co.	Refusal of their country elevator agent to consign storage grain as requested by owner.	Shipper has the right to designate which terminal his grain is to be shipped to, but country elevator company has the right to custody of the grain until unloaded at the terminal.

Feb. 17.	Square Deal Gr. Co. vs. C.P.R.	Claim <i>re</i> shortage on car No. 106776 ex Osage, Oct. 9, unloaded at Fort William. Amount short 2,605 lb.—\$30.35.	The Board investigated and advised both parties that they considered the railway company liable for this shortage.
Feb. 20.	W. Farmer vs. Reliance Gr. Co.	Claimant stored grain in special bin in the Blucher Elevator of the Reliance Gr. Co., and as said grain on being shipped showed an overage he claims surplus as his.	Mr. Farmer received settlement based on what his storage tickets called for.
Feb. 20.	R. Finlay vs. Sask. Co-Op. Elevator Co.	Complainant stored grain in this company's elevator at Perdue (special bin) and on grain being shipped to terminal there was an overage which Mr. Finlay claimed.	The Board held a special session at Saskatoon to consider this claim and as a result made the following ruling: "Generally the weight shown on the storage tickets should govern unless an investigation by the Board reveals some reason for the contrary. In this case the investigation shows some other person's had been mixed with Mr. Finlay's. Mr. Finlay, therefore, is not entitled to the surplus.
Feb. 20.	Robin Hood Mills Ltd. vs. Mrs. H. Thompson.	The complainants special binned 3,755 bush. of oats for the defendant at their elevator at High River. On grain being shipped the out-turns showed an overage of 400 bushels, which plaintiffs assert belongs to them.	The Board held a session at Calgary to hear this case, but Mrs. Thompson was not represented. In the opinion of the Board this case is a matter for the courts.
Mar. 2.	P. Rintoul, Son & Co., Glasgow, Scotland.	Complain that two shipments of 3 C.W. Barley shipped on Oct., 1913, ex bonded elevators at Duluth contained barley of 1912 crop.	The Board instituted a thorough investigation and found that there were in the two elevators at which these cargoes were loaded about 8,000 bushels of 1912 crop barley. This amount no doubt was shipped as part of said cargoes.
Mar. 7.	J. H. Hannah vs. Reliance Grain Co.	Mr. Hannah instructed this company to ship his two carloads of barley to Duluth and sell same on the United States market, in the event of prices being higher than the Canadian market. The grain was sold on the Canadian market, and Mr. Hannah not being satisfied with the price obtained, asked the Board to investigate and compare prices on the Canadian and United States markets.	After due investigation, the Board found that the price realized for this grain was greater than could have been obtained on the United States market. Proof was forwarded to Mr. Hannah, who replied that he was entirely satisfied.
Mar. 11.	W. J. Johnson vs. National Elevator Co.	Complainant stored 1,387.40 bushels of wheat in the National Elevator at Barnwell. The grain was shipped to the Ellison Milling Co. at Lethbridge, and outturned 46 bushels short. Claim for shortage, \$32.70.	The Board investigated, and arranged settlement. The Ellison Milling Co. and the National Elevator Co. each paid half the claim.

Mar. 17..	A. A. Trenholme vs. Strong and Dowler and Taylor Milling and Elevator Co.	In connection with contract entered into by A. A. Tienholme to deliver to Strong & Dowler, of Calgary, 4,400 bushels of oats. The grain was stored in the Brant elevator of the Taylor Milling and Elevator Company.	The Board heard this case in Calgary, and all parties agreed to have the matter adjusted by an accountant.
Mar. 24..	L. M. More vs. Mr. Greenwood and Ogilvie F. M. Co.	Dispute between Mr. More and his farm tenant, Mr. Greenwood, regarding ownership of certain grain stored by Greenwood in Ogilvie elevator at Arcola, Sask.	Case outside of the jurisdiction of the Board and should be settled in courts.
Mar. 24..	A. G. Hopkins vs. Buyer of International Elevator Co., of Bratton, Sask.	Plaintiff claimed that he delivered to the International elevator at Bratton 60 bush. of 1 Northern wheat, but as there was no room for 1 Northern he had to accept 2 Northern for same and was paid on this basis. He further claimed that the buyer did not put his grain in the elevator, but sent same to his own farm for seed.	The Board advised parties in dispute to meet them at Saskatoon, to inquire into the matter, but Mr. Hopkins did not attend, as requested. On written evidence submitted to the Board, the case was dismissed.
Mar. 26..	Melady & Co.....	Complaint <i>re</i> excessive shortages in cargoes unloaded at Liverpool and Avonmouth, England, <i>ex</i> the Intercolonial elevator at Halifax and the Harbour Commissioners' elevator at Montreal respectively.	The Board had Mr. J. G. White, Chief Weighmaster for Canada, investigate the loading of these cargoes, but the matter was later held in abeyance, owing to the jurisdiction of the Board over the Montreal elevator being questioned.
Mar. 26..	Jas. Miner vs. Baird & Botterell.....	Mr. Miner claims \$177.45 due on spreads and overcharge of consul fees. Baird & Botterell dispute the claim.	The Board heard this case at Calgary on July 17, and, after duly considering the evidence submitted, dismissed the case.
Mar. 27..	Alameda Frs. Elevator and Trading Co. vs. Jas. Richardson and Sons.	The complainants complained to the Board with regard to delay in disposing of car No. 206636, which was consigned to J. Richardson & Sons for sale on commission.	On investigation it transpired that the fault lay more or less with the complainants; they lost the original bill of lading for the shipment.
Mar. 28..	Robt. Graves vs. West. Co-op. Grain Co.	The defendants in this case brought the matter to the attention of the Board, as they had been unable to satisfy the shipper, Mr. Graves, as to final adjustment on a car of wheat which they had bought from him on track.	This shipment was adjusted on the basis of a 9c. spread, but later the grain company offered to reduce it by 2c., which offer the shipper refused. The Board investigated this claim, and found that Mr. Graves had been treated fairly, and he accordingly was advised to accept final settlement on a 7c. basis.
April 6..	John B. Heintztuman vs. A. J. Ries.	The complainant was operating a farm under lease, and sold part of his crop to A. J. Ries. In adjusting the deal, Mr. Ries paid part of the proceeds to the owner of the farm operated by Mr. Heintztuman, who disputed his authority for so doing.	The Board investigated, and concluded that the case did not come under their jurisdiction, involving, as it did, the matter of farm leases, adjustments, etc.

April 14..	W. J. Gallon, of Regina.....	A general complaint was received from Mr. Gallon to the effect that many farmers in Saskatchewan are being subjected to very unfair treatment at the hands of the country elevator operators. For instance, they are often met with the statement that while their grain is of No. 1 Northern grade, the No. 1 Northern bins in the elevator are full to capacity, and the grain will have to go in a No. 2 Northern or No. 3 Northern bin, as the case may be, resulting in the farmer only receiving payment for the lower grade.	Under directions from the Board, Secretary sent all the country elevator inspectors a copy of this complaint, advising them to be on the lookout for any trouble of of this nature.
April 22..	A. J. Adams vs. State Elevator Co.	This elevator company failed to advise owner's agent that his grain had been unloaded at a terminal elevator at Port Arthur, resulting in two months' storage accruing against same. Claim was made on the State Elevator Co. for refund of said storage money.	The State Elevator Co. settled this claim in full.
May 11..	W. E. Cummings.....	Grading of car No. 56562 3 Northern wheat.	This car was unloaded at terminal elevator before receipt of complaint. Accordingly, grain could not be reinspected.
May 11 ..	G. D. Fitzgerald vs. Grenfell Farmers' Elevator Co.	Complainant stored 4,080 bushels of oats, which on being shipped outturned 36 bushels short. Mr. Fitzgerald therefore makes a claim for \$44.92 to cover this discrepancy.	After due investigation, the Board instructed the elevator company to pay this claim, which they immediately did.
Sept. 16..	Canadian Elevator Co. vs. C.P.R.	The elevator company claims that the C.P.R. should remunerate them for loss incurred by reason of car 96410 not being forwarded to destination with due despatch, resulting in the grain contained therein going out of condition.	The Board decided that this case did not come within its jurisdiction.

All of the above claims were admitted by Mr. Ennis as being correct, and the surety company after due investigation agreed to pay their obligation under the bond, namely \$5,000. This amount was paid to the board along with \$1,959.82 which the bonding company's solicitors, Messrs. Sharpe, Staepoole, Elliott & Montague, had collected from Mr. Ennis.

With this money the board paid claims Nos. 1 to 7 (both inclusive), while the balance of the claims were settled in full by Mr. Ennis.

## II.—GOOSE LAKE ROLLER MILLS, HARRIS, SASK.

## DEFAULT, SEASON 1910-1911.

This company carried on a country warehousing as well as a milling business during the season 1910-1911 (Sept. 1, 1910, to August 31, 1911), and were licensed under the Manitoba Grain Act, 1908, as such, by the warehouse commissioner in whose hands the administration of the Grain Act was then vested.

They were bonded in the sum of six thousand six hundred dollars (\$6,600.00) by the Employers' Liability Assurance Corporation, Ltd., of London, England.

According to the warehouse commissioner's records, the first notification received by him that the above company was in difficulties was on July 25, 1911. The surety company was advised of the default, as soon as the first claim was received, viz., Sept. 1, 1911. After an examination of the company's books by the surety company extending over a considerable period, they finally advised that they would pay the amount of their obligations under the bond, viz., six thousand six hundred dollars (\$6,600).

It was not long after this that the Board of Grain Commissioners was appointed, namely in April, 1912, and as this default had not been settled, they assumed all responsibility in connection with settling of the various claims. The matter was immediately taken in hand, and each and every claim was examined, receipts and releases were made out for claimants to sign, many of whom were very dilatory in returning these documents but all were received by the 12th day of May, 1913. Cheques were then forwarded to each creditor as per the following list.

It will be noted that the total claims amounted to \$17,135.69, and as the amount payable under the bond was \$6,600 the creditors only received from this source 38.57 cents on the dollar.

## III.—GOOSE LAKE ROLLER MILLS, LIMITED, HARRIS, SASK.

## DEFAULT.

This company was licensed and bonded in the sum of \$6,600 to operate a country elevator at Harris during the season 1912-13.

The London and Lancashire Guarantee and Accident Co., Ltd., of Toronto, Ont., was the surety, and were notified by the board on September 19, 1913, that default had occurred.

On January 8, 1914 the surety company advised that they desired the board to make a thorough investigation of all claims filed in this default in view of the peculiar methods of trading engaged in by Mr. C. H. Cawthorpe, who in addition to acting as manager for the Goose Lake Roller Mills, Ltd., was also agent for the Matheson-Lindsay Grain Company.

Such investigation took place at a special sitting of the board at Saskatoon, Sask., on April 2, 1914, and as a result all claims were settled as per the following statement:

The bonding company was found liable for claims 1, 2, and 3, while the Matheson-Lindsay Grain Co. were found liable for the balance of the claims with the exception of claims Nos. 11 and 12.

*Claim No 11.*—Mr. Campbell did not appear at the investigation, and as evidence at hand was incomplete, the board decided that nothing could be done with this claim until further evidence had been submitted.

*Claim No. 12.*—Mr. Fordham was not present at the investigation, and from his affidavit it would appear that his claim is against the mill, and not against the elevator. The board therefore considered that the claim did not come within the province of the board.

## IV.—ORVILLE GLENN, WINNIPEG, COMMISSION MERCHANT.

## DEFAULT (SEASON 1910-11).

Amount of bond, \$5,000. Surety company, the Employers' Liability Assurance Corporation, Limited, of London, England.

This default occurred during the regime of the late administration, but was settled by the Board of Grain Commissioners shortly after their assuming office. Up to that time the claims had been disputed by the surety company.

5 GEORGE V., A. 1915

The late Orville Glen was licensed and bonded in the sum of \$5,000 as a grain commission merchant for the season 1910-11 (from September 1, 1910, to August 31, 1911). About the end of April, 1911, he died, and shortly afterwards his estate was placed in the hands of the Commercial Loan and Trust Company for administration.

At the time of his death it was thought there would be a surplus of assets over liabilities, but in consequence of a disputed partnership account, matters were greatly delayed. Subsequently the trust company made an offer of settlement with the creditors of about 69 cents on the dollar.

Accordingly and in order to protect the creditors, the warehouse commissioner notified the bond company that there was a liability of a default in this case. A copy of each creditor's statement of claim was sent to the bonding company, and after due investigation had been made by the bonding company, they admitted liability, and all claims were paid in full.

The board held special sessions in Winnipeg on the 7th, 8th, and 9th days of April, 1914, to investigate this default, and on the 14th day of May, 1914, rendered the following decision:—

The Gibbs Commission Company of Winnipeg was licensed both as trackbuyers and commission merchants under the Canada Grain Act, and in both respects was bonded by the Railway Passengers' Assurance Company, of London, England. The

## SESSIONAL PAPER No. 10d

company handled cars of grain for the claimants and defaulted. The claimants' case, therefore, is that the Railway Passengers' Assurance Company is liable to them under the bond for the amounts.

A commission merchant according to the Canada Grain Act means any person who sells grain on commission, and the commission merchant's bond is defined in sections 211-216. The transaction contemplated in these sections is not a sale and purchase for either present or future delivery, but the entrusting of the grain to the merchant for selling.

A track-buyer according to the Canada Grain Act means any person, firm or company who buys grain in car lots on track. The track-buyer's bond is provided for in sections 218-219, and the transaction contemplated in these sections of the Canada Grain Act is an actual purchase of grain on track.

The question before the Board of Grain Commissioners is whether the original transactions between the claimants and the Gibbs Commission Company were covered by the bonds.

In its investigation the board received no assistance whatever from Mr. Gibbs or his counsel. Mr. Gibbs did not appear, and neither he nor his counsel gave any information in regard to the books or records of the company except a reference to Mr. Kerr, who had been the company's book-keeper. Mr. Kerr had only two books to put before the board, and these books were of little or no assistance. The Gibbs Company did nothing whatever to assist either the claimants or the Board of Grain Commissioners.

A mass of books and papers was found, and the board gave time to permit counsel to search for evidence bearing upon the claims. Whether all the relevant documents were found or not the board cannot state.

The counsel for the claimants rest their cases largely upon the account sales, furnished by the company to each claimant, which shows that the Gibbs Company charged each claimant one cent per bushel commission. The argument is not altogether conclusive, because such an account is rendered, and a cent per bushel charged, in cases where the transaction is not such as is contemplated in sections 211-217 of the Canada Grain Act.

Mr. Kerr, book-keeper for the Gibbs Company, swore that the transactions were all commission transactions, but his evidence on this point was of a general nature, and what he stated might be true while at the same time the particular transactions under investigation might not have been consignments of grain within the meaning of the bond.

The board sought for evidence that would show the precise nature of the original transaction between each claimant and the Gibbs Company.

1. The claims of Richard D. Harris, J. L. Dake, John Schlosser, Park Brothers.

The board considers that there is sufficient evidence to show that the original transactions between all these four claimants and the Gibbs Company were consignments within the meaning of the Act. This evidence consists of letters between the claimants and the Gibbs Company, and these letters taken along with the account sales, are ample proof that the cars were consigned on commission.

2. the claim of August Ek.

In this case the grain was secured by C. W. Johnson, who was agent for the Gibbs Company and registered as such by the Winnipeg Grain Exchange. Letters bearing on the case between C. W. Johnson and the Gibbs Company were found. In this case the only question is whether the claim is covered by the track-buyer's bond rather than by the commission merchant's bond. The Canada Grain Act defines a track-buyer as any person, firm or company who buys grain in car lots on track, and sections 218-219 dealing with track-buyers, contemplate the actual purchase of grain on track in car lots. On the other hand the by-law of the Winnipeg Grain Exchange provides for the consignment as well as the purchase of track grain. John-

5 GEORGE V., A. 1915

son, as the registered agent for the Gibbs Company, could either buy or consign track grain under the by-law of the exchange. The Board of Grain Commissioners considers that the track-buyer's bond should be made to cover this practice, though the board recognizes that the Canada Grain Act seems only to provide for purchase of track grain.

### 3. Claim of A. Tarasoff.

Mr. Tarasoff was the only claimant to appear in person before the board. His evidence was clear and definite, and was not controverted, and was to the effect that he had entrusted his grain to the Gibbs Commission Company to sell for him.

### 4. Claims of P. D. Pitman, J. B. Ellert.

The evidence in these cases is not as strong as in the preceding ones. P. D. Pitman shipped a car of flax on the 5th of July, 1913. One letter was found addressed to him from the Gibbs Company dated July 9, which contained the words "We thank you for this shipment and will carry out your instructions." This is consistent with Pitman's claim that it was a consignment on commission, but nothing else was found.

In Ellert's case there is a letter from the Gibbs Commission Company under date of July 5, 1913, which is consistent with the claim that Ellert's car was consigned on commission.

### 5. The claims of John Martin, John Park.

In these cases there is nothing in the hands of the board but the affidavits of the claimants, the evidence of Mr. Kerr and the account sales.

It is the judgment of the board that the account sales showing that one cent per bushel commission was charged in each case, taken along with the evidence of Mr. Kerr to the effect that the business done was a commission business, the affidavits of the claimants, the evidence of Mr. Tarasoff in his own case, and the letters referred to, form a sufficient body of proof that the cars of grain were consigned within the meaning of the Canada Grain Act, and that therefore the Railway Passengers Assurance Company is liable for the amounts, to the extent of the bond given the Gibbs Company as commission merchants.

In accordance with the board's decision the surety company immediately filed with their solicitors a cheque for \$5,000 with instructions to pay the creditors as soon as receipts and releases were signed releasing the surety company from further liability.

## VI.—ROYAL GRAIN COMPANY OF WINNIPEG.

### DEFAULT.

The Royal Grain Co., Ltd., was licensed and bonded as a grain commission firm. in the sum of \$27,000, during the season 1912-13.

*Sureties*—The London Guarantee and Accident Company, Limited, of London, England.

The first intimation that the Royal Grain Co., Ltd., had defaulted was received on October 18, 1912, at which time Mr. D. W. Coulter, of Taber, Alta., advised the board that he had been unable to collect balances due, in connection with cars handled for him by the said Royal Grain Company, Ltd.

The board immediately demanded an explanation from the company, but was informed that it had gone out of business, the liquidation proceedings being in the hands of Messrs. Andrews, Andrews, Burbidge & Bastedo, barristers, etc., Winnipeg, Man.

## SESSIONAL PAPER No. 10d

In due course other claims were received. A complete summary of the claims is as follows:—

No.	Complainant.	Amount of Claim.
		\$ cts.
1.....	D. W. Coulter, Taber, Alta.....	3,866 51
2.....	Hitchcock & McCulloch, Moosejaw.....	1,037 26
3.....	Taylor Milling and Elevator Co., Lethbridge.....	2,405 69
4.....	G. B. McKay, Brant, Alta.....	646 77
	Total.....	7,956 23

The claim of Hitchcock & McCulloch was paid in full by the surety company, but in view of certain legal points involved they advised the board that they intended repudiating all the other claims. Accordingly, and at the request of the creditors whose claims had been turned down, the board held a session at Winnipeg on the 3rd and 4th days of Sept., 1913, to consider their claims.

The surety company took the stand that the dealings between these creditors and the Royal Grain Co., Ltd., were not commission deals, and accordingly were not covered by the commission merchants' bond given by the said Royal Grain Co., Ltd. Therefore, the principal point at issue was, whether the original transactions were consignments of grain for sale on commission in the sense of sections 211, 212 and

216 of the Canada Grain Act.

After duly considering the evidence submitted, the board gave the following rulings respecting each case:

*Claim No. 1.—D. W. Coulter.*

Mr. Coulter failed to produce evidence sufficient to show that any of the original transactions concerned were consignments of grain for sale on commission, within the terms of the Canada Grain Act.

*Claim No. 3.—Taylor Milling & Elevator Co., Ltd.*

The Board of Grain Commissioners conclude that the transactions on which the claim of the Taylor Milling & Elevator Company, Ltd., is based, were not consignments of grain for sale on commission in terms of the Canada Grain Act governing Commission Merchants' Bond.

*Claim No. 4.—G. B. McKay.*

Mr. McKay did not appear at the investigation, and did not instruct counsel to appear in his behalf. He gave a power of attorney to Mr. John Taylor. The counsel for Messrs. Taylor and Coulter asked that Mr. McKay's case be held in abeyance. The claim is for a small amount, the balances due on three cars. A purchase note was produced by counsel for the London Guarantee & Accident Co., Ltd., which referred to a transaction on one of the three cars involved. However, on the invoice of the transaction referred to, a commission of 1c. per bushel is shown. The board agreed to let this case stand over.

## VII.—WALBRIDGE GRAIN COMPANY, CALGARY, ALTA.

## DEFAULT.

This company was licensed and bonded during the season 1913-14 as

Track-buyers of grain, in sum of.. . . . .	\$6,600 00
Commission merchants, in sum of.. . . . .	7,500 00
Country warehousemen (at Crowfoot) in sum of.. . . . .	6,600 00

The London & Lancashire Guarantee & Accident Company of Canada being the sureties.

On March 21, 1914, the surety company was notified that a default had occurred, and on July 14, 1914, the board held a session at Calgary, Alta., in order to investigate the various claims filed against this grain company.

As a result of the investigation the board approved of the following claims, and the surety gave the board a cheque for \$9,916.19 in order to pay all claims in full. This money was paid out as soon as receipts and releases were received from each creditor.

**I.—DOCKAGES ON OUTWARD SHIPMENTS OF GRAIN.**

A session of the board was held at Winnipeg on February 11, 1914, *re* dockages on outward shipments of grain ex Fort William and Port Arthur.

Applicants—McLennan Brothers, Limited.

Section 115, subsection 3, section 126, subsection 9, and section 128, subsection 3 are the only sections of the Canada Grain Act that have any direct bearing upon the question at issue.

Section 115, subsection 3, reads as follows:—

“All grain that is unsound, musty, dirty, smutty, or sprouted or that contains a large admixture of other kinds of grain, seeds, or wild oats, or from any other cause is unfit to be classed under any of the recognized grades, shall be classed as ‘rejected,’ with the inspector’s notation as to the quality and condition.”

This is very clear, and it defines smutty wheat as rejected.

Section 126, subsection 9, which reads as follows:—

“Every terminal warehouseman in the Western inspection division shall clean all grain received by him on which the inspector has set dockage for cleaning, except all rejected grades and ‘no grades,’ which shall be cleaned only on the request of the owner.”

Is also very clear.

It is quite clear that as the Grain Act now stands rejected grain can be cleaned only on the request of the owners.

The cleaning of smutty grain is injurious to the grain itself, and has a tendency to reduce the grade. Jas. A. Richardson’s experience as an exporter goes to show that from an exporter’s point of view they are at all times prepared to pay any excess freight there may be on the dockage rather than have the grain cleaned. This statement is confirmed by the other witnesses, with the exception of that of McLennan Brothers, Limited.

Further, the evidence proves that with the exception of a very few cases smutty wheat is handled on sample and not on grade. Hence the less smutty grain is handled the better the sample, which is to the advantage of the producer and seller alike.

5 GEORGE V., A. 1915

Apparently McLennan Brothers, Limited, handle smutty wheat in a different way from the other witnesses. They state that they handle it on grade and that they are subject to a back charge of excess freight on account of dockage. It appears that if McLennan Brothers, Limited, had foreseen the possible back charge on dockage they would have made their contract so that they would have suffered no loss whatever. The general belief is that the dockage is worth more than the freight. McLennan Brothers, Limited, state: "As exporters we feel that possibly 3 per cent is a little too big, but rather than nothing we will accept 3 per cent if it is fixed at that." The view of the terminal elevator representatives was that they would be prepared to pay dead freight on any dockage over 3 per cent.

It is, therefore, the ruling of the board that when smutty wheat ex terminal elevators at Fort William and Port Arthur carries a dockage above 3 per cent, the terminal elevators be held responsible for the excess freight.

## II.—STORAGE CHARGES IN HOSPITAL ELEVATORS.

### THE SPENCER GRAIN CO. VS. PATTERSON & CO.

The two parties agree in stating that the Spencer Co. sold Patterson & Co. ten cars of oats; that the transaction was verbal; that the basis of the sale was the Fort William price plus a premium on a future date to be named by the Spencer Grain Co.; and that nothing was said at the time about the storage of the grain during the period between the date of sale and the date on which the price was fixed. Patterson & Co. charged \$204 for storage, and the Spencer Co. declined to pay it.

Patterson & Co. became the owners of the grain immediately. That being so they were not in this case doing a public storage business.

How long Patterson & Co. kept the grain in their hospital elevator is not stated.

The Spencer Grain Co. secured the right to fix the date on which they would accept the Fort William price, and also secured a premium above that price; they could hold off as long as they pleased.

The Spencer Co. claims that they never before paid storage in transactions of this nature, that in this case there was no mention of storage, and that therefore they made the sale assuming there would be no storage charges, and that hospital elevators cannot do a public storage business.

Patterson & Co. claim that they always did charge storage in such cases; that it is the trade custom; and that it is not a case of public storage, as they owned the grain.

The seller of the grain desired to wait a favourable turn of the market before putting a price on the grain. He could have gained this object by storing the grain in a public terminal elevator. By so doing he would have had to pay storage. He also desired to secure a premium above the market price, and he could not have secured a premium had he put the grain into a public terminal elevator. What he gained by the transaction therefore was the premium plus the chance of a more favourable price. The Board cannot see on what ground he should expect the grain to be held free of carrying charges as long as he chose to wait. If in this transaction the Spencer Grain Co. secured a premium plus the Fort William price on a future date to be selected by them, plus exemption from carrying charges on the grain, they

## SESSIONAL PAPER No. 10d

certainly did a good stroke of business. And if Patterson & Co. bought this grain on these terms, they certainly gave most generous terms. They ran the risk of a rise in price, and they contracted to give a premium above that rise, and to make no deduction for carrying the grain.

On the other hand there is no definite evidence to show that Patterson & Co. did not offer these generous terms.

It appears to the board that the question at issue is an interpretation of a verbal contract of sale; that it is one of the terms of the sale, the price offered; and that the evidence is not sufficient to warrant a definite conclusion by the board.

## III.—WEIGHT OF SPECIAL BINNED GRAIN.

## COMPLAINT OF R. FINLAY VS. THE SASKATCHEWAN CO-OPERATIVE ELEVATOR CO., LTD.

Mr. Robert Finlay stored grain in a special bin of the elevator of the Saskatchewan Co-operative Elevator Company's at Perdue, and he received therefore special bin tickets showing a weight after cleaning of 1,017 bushels. When the grain was received at the terminal elevator, the weight given was 1178.20 bushels, showing a surplus of 161.20 bushels over the Co-operative Elevator weight. Mr. Finlay claimed this surplus. His ground was that he had hired the bin and that the operator of the elevator had told him that all the grain in the bin was his.

The Saskatchewan Co-operative Elevator Company refused to credit Mr. Finlay with the surplus.

Mr. Dunning, the manager of the Co-operative Elevator Co., claimed that the elevator weights as shown on the tickets were correct, that the shipper could see his grain weighed, that mistakes in binning were easily possible, that had the terminal weight shown a shortage instead of a surplus, the Sask. Co-operative Co. would have had to pay Mr. Finlay for the full weight shown on his tickets, and that if the company were made to pay shippers for both shortages and surpluses, it could not continue to special bin grain, but would be forced to follow the practice of other companies. Mr. Finlay stated the number of loads stored by him and his estimate of the total weight, an estimate based on experience. The total amount thus estimated was less than the total amount given by the terminal elevator. Mr. Finlay therefore stated that all of the surplus could not be his, and that grain belonging to some other person must have been mixed with his. Mr. Finlay stated further that he was not entitled to the whole of the surplus, but that he was entitled to part of it.

The special binning of grain in accordance with the Canada Grain Act is a method of handling grain which it is desirable to maintain rather than to discourage. To make the elevator pay for both shortages and surpluses would tend to abolish special binning in term of the Canada Grain Act altogether, and thus tend to militate against the producers of grain on the whole.

It is therefore the ruling of the Board that in general the weight shown on the storage tickets should govern, unless an investigation by the board reveals some reason for the contrary. In this case the investigation showed that some other person's grain had been mixed with Mr. Finlay's. Mr. Finlay, therefore, is not entitled to the surplus.

## IV.—DELIVERY OF CARS.

*Re* complaint of Royal Elevator Company against Canadian Pacific railway for not delivering cars Nos.:

Car	1912. Unloaded

to the Grand Trunk Pacific Elevator Co. to be treated.

The Board of Grain Commissioners has considered the evidence taken at a session held in the board's room, Grain Exchange, Winnipeg, on December 30, and find:

1. That there was no embargo placed by the Grand Trunk Pacific against cars going to their elevator from other lines of railway to be treated on dates that the above cars were ordered to the Grand Trunk Pacific elevator.

2. The cars were ordered to the Grand Trunk Pacific elevator to be dried.

3. The Grand Trunk Pacific Elevator Co limited the number of cars they could dry of the other railroads to seven (7) cars per day, and they reserved the right to select the seven (7) cars.

4. The Canadian Pacific Railway delivered the cars selected.

5. The Royal Elevator Co. has not established that any of the cars referred to were selected.

6. If the Royal Elevator Co. had proven that any or all of the cars above referred to had been selected by the Grand Trunk Pacific Elevator Co., and not delivered by the Canadian Pacific Railway, the claim would hold good.

7. Therefore, the Royal Elevator Co., having been unable to establish that any of these cars were selected by the Grand Trunk Pacific Elevator Co., the board decides that the Royal Grain Co. has no claim.

## V.—STORAGE AFTER GRAIN HAS BEEN ORDERED OUT OF ELEVATOR.

## CLAIM OF E. R. WAYLAND VS. CANADIAN PACIFIC RAILWAY COMPANY.

This is a claim for \$2,067. The claimant had tough grain in store in the Canadian Pacific elevators. At various times from March till August, he ordered this grain to be loaded out and shipped to the elevator of Messrs. David Horn & Company to be dried. The Canadian Pacific Railway Company declined to furnish the cars for the purpose, on the ground that the elevator of Messrs. David Horn & Company could not take the grain in for treatment. Eventually the Canadian Pacific Railway Company had the grain dried by the Armour Companies floating drier.

The claim is consequently:—

1. For storage accrued after the grain was ordered out.

## SESSIONAL PAPER No. 10d

2. For interest.

3. For the difference in the rates for drying charged by the Armour Company, and the drier of Messrs. David Horn & Co.

The Canadian Pacific Railway Company owns the elevator of Messrs. David Horn & Co., and also the elevator in which the claimant's grain was in store. The company claim, that they could easily have loaded out the grain in question into cars, as there was no shortage in their car supply, but that had they done so, Messrs. David Horn & Company could not have treated the grain. It would have had to lie in the yards, would have tied up a certain amount of their plant, and at the same time the grain would have been in danger of being totally lost. The grain was tough. While in the elevator it was under care and could be protected, but had it been loaded into cars and left in the yards in the heat of the summer months, it would have speedily gone out of condition.

The question is not one of car supply. It is whether the Canadian Pacific Railway Company showed anything like discrimination in regard to the grain that should be taken into the elevator of Messrs. David Horn & Company.

Mr. Wayland claims that many cars of grain were received into the elevator of Messrs. David Horn & Company subsequent to the time at which he ordered his grain to be sent from the Canadian Pacific terminal elevator to Messrs. David Horn & Company's elevator, and therefore, the elevator of Messrs. David Horn & Company could have treated his grain.

Upon an examination of the facts, it appears to the Board of Grain Commissioners that whether Messrs. David Horn & Company received flax or not has no bearing upon the question at issue. The capacity for drying grain is a different capacity from that required for cleaning flax, and very many of the cars, which according to Mr. Wayland were taken in by Messrs. David Horn & Company after the dates on which he surrendered his receipts to the Canadian Pacific Railway Company's terminal elevator, were cars containing flax. Messrs. David Horn & Company might very well have capacity for cleaning flax, and not have capacity for drying all the tough, wet and damp grain offered.

It appears also to the board that the amount of tough grain handled by Messrs. David Horn & Company during the month specified was very small, and that these cars were cars that had come from the west, and were not cars that were loaded at any of the terminal elevators. Mr. Wayland's case therefore is this, that a few cars of tough grain from the west were dried by Messrs. David Horn & Co., at a time when the Canadian Pacific Railway Company refused to send his grain from their terminal elevator to the elevator of Messrs. David Horn & Company to be dried.

Most of the grain dried by Messrs. David Horn & Company was not tough, but damp or wet. It is well known that conditions existed at the terminal point at that time, that fortunately are rare in the history of Canada. The drying plants at the head of the lakes were totally inadequate to the work of drying the tough, damp and wet grain, and the drying capacity was increased by the bringing in of the Armour Company's floating drier. The conditions were abnormal. A large amount of damaged grain was in the yards and on track and likely to become a total loss if it could not be quickly treated, and a large number of such cars came in from the west every day for a period of some three or four months.

It appears to the Board of Grain Commissioners that the elevator of Messrs. David Horn & Company was entirely incapable of doing all the work offered, and that drying the grain in the yards first rather than that in the elevators, and also in drying the damp and wet grain first rather than the tough grain, Messrs. David Horn & Company were best serving the general interest.

It appears to the board that the Canadian Pacific Railway Company, if responsible for the course followed by Messrs. David Horn & Company's elevator thus described, were doing the proper thing for the general interest. No doubt Mr. Wayland wanted

his grain dried, and no doubt he would have preferred to have it dried at the cheapest plant. But equally no doubt thousands of other shippers of grain had the same needs and wishes. It was impossible for the Canadian plants to dry all the grain offered them, and some shippers therefore had to pay the higher rates for drying charged by the Armour Company. It was impossible for all the grain to be dried immediately, and some shippers had to wait. Preference was certainly given to the damaged grain in the yards and on track; grain which though tough yet was keeping safe in the elevators had to wait. The extra storage on the owners of this grain in store was less than was actually incurred by many shippers who paid less storage and paid less for drying, simply because the damage was, in the later case, greater.

The Canadian Pacific Railway Company could have supplied the cars to Mr. Wayland; they could have loaded his grain out and could have had it switched to the elevator of Messrs. David Horn & Company. Messrs. David Horn & Company could have treated this grain in its turn, but before such treatment Mr. Wayland's grain would certainly have heated. But in any case the situation in the yards would certainly have been made worse rather than better, and the taking of tough grain out of the elevators for treatment, when there was so much damp and wet grain lying in the yards going wrong, would have been a preference in favour of Mr. Wayland, but a gross injustice to many other shippers.

While there may be features of this case in the last analysis that come within the province of the Board of Railway Commissioners, so far as those features of the case which come within the proper province of the Board of Grain Commissioners are concerned, the case is dismissed.

## VI.—GRAIN GOING OUT OF CONDITION AFTER IT HAS LEFT THE TERMINAL ELEVATORS. THE CASE OF THE SS. *PHILIP MINCH*.

### STATEMENT OF CLAIM.

(a) Copies of letters attached herewith as Exhibit "A" were received by the board in connection with the complaint.

(b) Statement of claims as filed by Mr. Barnes, of the Ames-Brooks Company, Duluth, at the investigation, attached as Exhibit "B."

### INVESTIGATION.

Investigation was held in the Board of Grain Commissioners' offices, Fort William, on Tuesday, November 11, at 3 o'clock in the afternoon. The following witnesses were sworn in the order they are shown here:—

Mr. Barnes, of Ames-Brooks Company, Duluth.

Guy McDougall, deputy inspector, Port Arthur Terminal Elevator Company.

C. W. Swingler, sampler on the steamer.

Percy McCallum, foreman of the Port Arthur elevator.

Mr. Morrison, floorman of the Port Arthur Terminal Elevator Company.

H. Dickson, trimmer on steamer.

H. Sellers, superintendent of the Port Arthur Terminal Elevator Company.

F. Symes, inspector, Fort William and Port Arthur.

T. A. C. Elliott, deputy inspector, Port Arthur.

## SESSIONAL PAPER No. 10d

## LOADING OF THE STEAMER.

The steamer *Philip Minch* commenced loading her cargo at the Grain Growers' Grain Company's terminal elevator, at 16.05 o'clock on the 12th October and finished at noon on the 13th October. She loaded 184,384 bushels of 2 C. W. oats at this elevator. She then went to the Port Arthur Terminal Elevator Company's elevator and commenced loading at 2 p.m. on the 13th October, and finished that night at 24.40 o'clock. She took on 306,018 bushels of 2 C. W. oats at this elevator, making her total cargo 490,402 bushels of 2 C. W. oats.

On account of the steamer loading at night at the Port Arthur Terminal Elevator Company's terminals, a release was given the inspection department, in accordance with section 35 of the Canada Grain Act. Copy of the release attached as exhibit "C."

## EVIDENCE SUBMITTED.

(a) Copies of affidavits made by A. E. Rankin, first officer of the steamer *Philip Minch*, and Captain L. B. Cummings, of the steamer *Philip Minch*, are attached as exhibit "D."

(b) Samples were also filed with the board, taken at the time of the unloading of this steamer at Buffalo by the Buffalo Grain Exchange Inspector.

## INSPECTION OF SAMPLES.

(a) The samples taken by the Buffalo Grain Exchange Inspector were inspected during the investigation by Chief Inspector Serls. The chief inspector stated that in his opinion the oats, as per the samples submitted, were in good condition and he would pass them as 2 C. W. oats.

The chief inspector stated, however, that on account of the samples only being small and being forwarded in small bags, they would have ample opportunity of cooling, and therefore, in his opinion, the samples might not represent the cargo as it reached Buffalo.

(b) The samples as submitted were taken by the Buffalo Grain Exchange Inspector, and, therefore, according to the Canada Grain Act, are not official samples. If notice had been sent to the board as to the condition of the cargo on arrival at Buffalo, the board would have sent an inspector to take official samples. This was not done, however, and the samples were not official.

## AFFIDAVITS.

Copies of affidavits filed with the board, signed by the captain and first officer of the steamer *Philip Minch*, were contradicted by the superintendent of the elevator and by the inspector in charge at the elevator at the time this steamer was being loaded.

The superintendent and inspector state that they had no conversation with either the captain or the first officer. The board thought that the captain and first officer had taken some other persons for the superintendent and inspector, and therefore asked Foreman McCallum, Inspector Elliott and Sampler Swingler as to whether or not the captain or first officer had spoken to them during the loading of the cargo. Every one of them, without exception, swore that they had never been spoken to by the captain or first officer in connection with the loading of this steamer.

5 GEORGE V., A. 1915

INSPECTOR'S EVIDENCE *re* LOADING OF GRAIN.

The inspector in charge stated under oath that he had caught some warm grain going into the cargo and immediately closed the bin from which this grain was coming. The grain was apparently coming from the drier, and was not sufficiently cooled. The inspector did not report it to the office, as he considered the amount that had gone into the cargo so small that it would not damage the rest of the cargo. The inspector established the fact that some warm grain went into the steamer, but that the quantity was small, and investigation reveals no method by which the quantity actually run could be established.

## VIEW OF THE BOARD.

The Board of Grain Commissioners consider that the inspector should have reported to the office that he had caught some warm grain going into the cargo. This would have given the inspector in the office an opportunity of making an investigation before issuing the certificate. The negligence of the inspector in not doing this does not involve the department in any liability.

The board is of the opinion that the elevator owners did accidentally, or otherwise, ship some warm grain into the cargo, and the elevator should be held responsible for any loss caused thereby.

The board has no means of ascertaining how much warm grain was run into the cargo, and has no means of ascertaining what amount of damage it may have done. The board regrets that the complainants did not give notice to the board at the time of unloading, so as to give an opportunity of having official samples taken and an inspection made before the identity was lost.

Upon a review of the conditions of the case, the Board of Grain Commissioners consider that the Canada Grain Act gives it no way of assessing the damages, if any. The complainants, if they have any evidence that will enable them to get damages from the law courts, have that recourse open.

Captain L. B. Cummings, being duly sworn, says: I am captain of the steamer *Philip Minch*. We began loading a cargo of oats at Fort William and then at Port Arthur. Did not notice anything in regard to hot oats at Fort William. At Port Arthur we went to Canadian Northern elevator on the south side. Went to loading at 12.45 p.m. and finished loading all but 10,000 bushels. I went into the elevator about 9.30 p.m. and saw inspector with sample of grain in basin. I heard him talk to the superintendent of the elevator that the grain was too warm and they must stop loading. I felt of the grain in the pan and found it was warm. I asked him if it was too warm to do any damage and he said no, they would cool off. The cargo is now in the same condition that it was when it left Port Arthur. Did not have any rain or

**CHAPTER 16.****REVENUE AND EXPENDITURES.**

The following statements show the receipts and expenditures for the crop year ended August 31, 1914, for all the offices in the eastern and western divisions.

It will be noticed that each of the four offices in the eastern division show deficits. With respect to the small revenue at Kingston office it should be mentioned that the inspector at that point was transferred to Montreal, West St. John and other places on special work. During the year 1914-15 it is anticipated that he will work entirely outside Kingston.

In so far as the western division is concerned, it will be noticed that there are deficits in the Winnipeg and Calgary offices. The surpluses in the Duluth and Fort William and Port Arthur offices more than counteract these deficits.

The statement showing the total expenses for the administration of the Canada Grain Act gives the net deficit for the year as \$9,541.81, in comparison to \$14,218.39 for the previous year, a gain in the right direction of \$4,676.58.

Speaking generally, it may be stated that the marine rates, apart from the war rates, are practically the same as in 1913 for regular line steamers.

Since the outbreak of the war, however, the marine rates have been increased by the addition of the war risk premium which, in the first weeks of the war, was 10 per cent, coming down gradually to 25 cents (or one quarter) per cent.

## REPORT OF GRAIN CHEMIST, WINNIPEG.

### ESTABLISHMENT OF LABORATORY.

In the fall of 1913 it was definitely decided to establish at Winnipeg a laboratory for conducting systematic milling, baking, and chemical tests on grain, and for the carrying out of certain research work connected therewith. Much valuable work of this character had already been accomplished by the laboratories of the Chemist and Cerealist of the Department of Agriculture, at Ottawa; but, as the problems connected with the chemistry of grain were becoming increasingly important, it was felt that it was advisable to establish a laboratory devoted exclusively to the systematic examination of cereals and to the study of certain problems of great importance connected with the grain trade.

### JOINT INSTALLATION.

The chemist in charge was appointed early in December, 1913, and the selection of a suitable location for the laboratory was the first matter to receive attention. As the Department of The Inland Revenue had also decided to locate a new laboratory at Winnipeg, it appeared mutually advantageous that the two laboratories should be located in the same building, if possible, thus avoiding the duplication of costly apparatus and equipment which would be necessary for the carrying out of the work of both laboratories. Ample quarters for both were found on the first floor, Postal Station B, corner of Magnus Avenue and Main Street, Winnipeg. Plans and specifications were drawn up and the work of installing the equipment handed over to the Department of Public Works. By the month of June the experimental mill and the baking outfit were installed and the work of the examination of the samples of the various grades of wheat, as received from the office of the Chief Grain Inspector at Winnipeg, was commenced. In July, owing to the resignation of the Cereal Technologist, this part of the work had to be temporarily suspended. It was renewed again in September, and in November, Mr. A. W. Alcock was appointed Assistant Chemist.

With the exception of a few minor details, the laboratory was now practically equipped for work, and the chemical examination of the samples of the wheat and the flour was begun, in addition to the milling and baking tests. An account of this investigation, together with that relating to the crop of 1914, will form the subject of a separate report to be submitted in due source.

### MOISTURE CONTENT.

In addition to the problems relating to the grading of grain, the question of the moisture content has received considerable attention. A large number of moisture tests on wheat, barley, oats, and flax were made at the offices of the Inspection Department at Winnipeg, Fort William, and Montreal, the general supervision of the work being undertaken by the laboratory. In all cases it was endeavoured to preserve the identity of the grain, in so far as this

## SESSIONAL PAPER No. 10d

was possible, in order to detect any changes which might take place during transit. The accuracy of the results obtained at the different offices was made the subject of a particular investigation. Identical samples of grain were sent to the grain inspectors' offices at the various points, and the percentage of moisture determined in each case. The results showed that the apparatus as employed at these offices, while doubtless supplying information of great value for the proper grading of grain, does not, however, furnish results of sufficient accuracy to detect the comparatively slight changes in the moisture content which would be likely to take place during transit from the head of the Lakes to Montreal, and for the purpose of accurate scientific investigation this method is, in the opinion of the chemist, quite useless. For any purpose, however, where a high degree of accuracy is not necessary, the figures obtained will, doubtless, furnish fairly reliable information, and it is hoped that the data obtained from these investigations will prove of value to the Board of Grain Commissioners, to whom the results have been forwarded.

## VALUE OF MOISTURE TEST.

The great advantage of a thoroughly reliable and also rapid method for the determination of moisture in cereals is obvious, and now that the laboratory is equipped for accurate scientific research, this problem is being thoroughly investigated. The method employed by the inspection offices possesses the advantage that it can be carried out by any careful operator and the results obtained in about thirty minutes, or less, while the more accurate method requires a trained assistant, a very considerable length of time, and the use of expensive and delicate apparatus; so that it is obviously quite impracticable to use this latter method in the actual grading of grain. It is thus highly desirable that some rapid, but also reliable, means be found for determining the amount of moisture in cereals, and the attention of the laboratory is being devoted to this problem at the present time. The results obtained so far, appear to indicate that a slight modification of the method at present employed at the inspection offices will yield percentages very much more in accordance with those obtained in the laboratory, while the time employed should not be appreciably greater. This work is still in progress, and a detailed statement of the results of the investigation will follow in due course.

## EXTENSION OF STUDY OF EFFECT OF MOISTURE ON GRAIN.

As soon as the work in hand is completed, it is proposed, as opportunity occurs, to make a more extended study of the effect of moisture on grain, and the problems relating thereto. Comparatively little is known regarding this subject and the chemical changes which take place are very obscure and very complicated. It is hoped, however, that careful study and research will lead to information which will prove of distinct value in the solution of the various difficulties arising from excess of moisture in grain.

A large amount of data is being collected in connection with both the investigations above outlined, but the work is not yet sufficiently advanced to warrant the publication of any report of the results at the present time.

## EQUIPMENT OF THE LABORATORY.

The laboratory has been equipped with a complete outfit for carrying on milling and baking tests for the chemical examination of wheat, flour, and other mill products.

The experimental mill consists of two sets of rolls, a double automatic sifter and boxes for collecting the mill products. One set of rolls is corrugated, and the rolls are used for breaking up the grain; the other pair, which are used for the reduction of the middlings, are quite smooth. The two sets of rolls are fixed on one stand and driven by the same belt, but otherwise they are as distinct as two small mills, each set being provided with a separate lever for adjustment. This arrangement makes the installation very neat and compact, so that the mill can be set up in quite a small space. The grain and tailings are fed very evenly on to the rolls, at any desired rate, by means of a vibrating feed arrangement set above each pair of rolls.

#### ROTATING SIFTER AND SIEVES.

Underneath the rolls is the rotating sifter, which is divided into two parts by a vertical partition down the middle. The half directly beneath the corrugated rolls contains six sieves of various sizes for separating the bran, coarse middlings, fine middlings, and break flour. There are also six sieves in the other half of the sifter, which divide the product obtained from the reductions on the smooth rolls into shorts, feed flour, and flour. These various products are collected in separate boxes underneath the sifter.

When using this mill it was found that comparatively large quantities of the mill products were held up in the sifter, and in consequence of this it was necessary to stop the machinery and brush the sieves and trays a number of times during each milling. This resulted in great loss of time, besides making the separation of the products, with any degree of certainty, a matter of much difficulty.

#### REMODELLING OF SIFTER.

Since the question of comparative yields was of great importance in work of this character, it was necessary to have certain alterations made by an expert millwright. After remodelling the interior of the sifter, it was found that the objectionable features above described were almost completely eliminated, so that it was now possible to obtain comparative results regarding the yield of flour from any sample of wheat. At the same time some minor improvements were made in the equipment, all of which have increased the efficiency and effectiveness of the mill.

It is, of course, impossible, under ordinary working conditions, to obtain flour from such a small mill as this absolutely free from bran particles and dust. In the same way the yield of flour obtained from a sample of wheat is different from that obtained from the same wheat in a large mill. But although the colour of the flour is not so good and the yield is not absolute, yet, since all the samples are milled in the same way, the results obtained are quite comparative.

#### BAKING APPARATUS.

The baking outfit comprises a fermentation chest, electrically heated, lined with asbestos, and so arranged that the temperature can be maintained fairly constant at 32° centigrade. The electric oven, manufactured by The Despatch Manufacturing Company, of Minneapolis, Minn., is particularly designed for experimental baking, and a uniform temperature up to 450° Fahrenheit may be readily maintained in this oven.

## SESSIONAL PAPER No. 10d

The laboratory is also equipped with the ordinary apparatus necessary for general analytical work, such as is to be found in every chemical laboratory. This includes a special hood, fitted with electric fan for nitrogen determinations, an electric still for obtaining distilled water, a vacuum pump, an electric muffle furnace for ash determinations, etc. Gas, electric current, hot and cold water are all available throughout the laboratory.

It is also proposed to equip the laboratory with certain special apparatus for the detailed study of the effects of moisture and temperature on grain, whereby the nature and extent of the changes which take place in grain containing various amounts of moisture can be carefully followed, and the effects of temperature and other factors studied.
