 CONTENTS OF VOLUME 28—*Continued.*

45. Return to an Order of the House of the 20th April, 1914, for a copy of all letters, papers, tenders and other documents in regard to the purchase of any cars for the Intercolonial Railway during the years 1912 and 1913. Presented 9th February, 1915.—*Mr. Macdonald*. . . . . *Not printed.*
- 45<sup>a</sup>. Return to an Order of the House of the 15th February, 1915, for a copy of all letters, telegrams, contracts, and other documents relating to the purchase of cars by the Intercolonial Railway since 1st July, 1914. Presented 9th April, 1915.—*Mr. Macdonald*.  
*Not printed.*
46. Return to an Order of the House of the 26th February, 1914, for a return showing:—1. The average cost per mile of construction of the Canadian Pacific Railway from its inception to date. 2. The average cost per mile in the last ten years. 3. The average rental per mile of lines leased by the Canadian Pacific Railway Company, and the names of such leased lines. 4. The rental paid by the Canadian Pacific Railway for the Toronto, Grey and Bruce Railway from Toronto to Owen Sound. Presented 9th February, 1915.—*Mr. Middlebro*. . . . . *Not printed.*
47. Return to an Order of the House of the 1st June, 1914, for a return showing the revenue derived from freight received at and forwarded from the following stations on the Intercolonial Railway during the fiscal years 1913 and 1914, giving separately the amount for each of said stations, viz.: Drummondville, Rimouski, Ste. Flavie, Mata-pedia, Campbellton and Bathurst. Presented 9th February, 1915.—*Mr. Boulay*.  
*Not printed.*
48. Return to an Order of the House of the 1st June, 1914, for a return showing the names of the staff employed in the several departments of the general offices of the Intercolonial Railway at Moncton, together with their salaries respectively as of 1st April, 1914. Presented 9th February, 1915.—*Mr. Emmerson*. . . . . *Not printed.*
49. Return to an Order of the House of the 18th May, 1914, for a return showing the names of the men who have been appointed to positions in the Prince Edward Railway Service from the 1st January, 1912, to the 1st May, 1914; the positions held by such appointees and the salary or wages attached to each position. Presented 9th February, 1915.—*Mr. Hughes (Kings, P.E.I.)*. . . . . *Not printed.*
- 49<sup>a</sup>. Return to an Order of the House of the 1st March, 1915, for a return giving the names and post office addresses of all persons appointed to positions on the Prince Edward Island Railway from the 1st of October, 1911, to the present time; with a description of the position to which each person was so appointed. Presented 22nd March, 1915.—*Mr. Hughes (Kings, P.E.I.)*. . . . . *Not printed.*
50. Return to an Order of the House of the 11th February, 1914, for a return showing the names, tonnage, port of registry and destination of all foreign vessels engaged in fishing, both sail and steam, that entered and cleared from the port of North Sydney during the year ending 31st December, 1913. Presented 9th February, 1915.—*Mr. Sinclair*. . . . . *Not printed.*
51. Return to an Order of the House of the 1st June, 1914, for a copy of all correspondence between the Department of Justice and the Attorney General of Quebec, with regard to the appointment of judges, since the 1st of February, 1913. Presented 9th February, 1915.—*Sir Wilfrid Laurier*. . . . . *Not printed.*
52. Return to an Order of the House of the 30th March, 1914, for a return showing:—1. Particulars of the inventories and value of the estate of the late George A. Montgomery, Registrar at Regina, whose estate escheated to the Crown. 2. The amount realized at Regina or elsewhere, on the conversion of said estate into money. 3. The costs paid or allowed with names and amounts paid or allowed before the residue was paid over to the Crown. 4. The amount paid over and actually received by the Crown. 5. The disposition of the fund and the names of the persons to whom any sum has been paid, and the respective amounts thereof so paid over or allowed since the Crown received the same. 6. A statement showing the difference between the reports of the present and the late Minister of Justice as to disposition of the fund, and a copy of such correspondence and representations as led up to any change. 7. The actual balance now on hand and the intended disposition thereof. Presented 9th February, 1915.—*Mr. Graham*. . . . . *Not printed.*
53. Return to an Order of the House of the 16th March, 1914, for a return showing all persons, male or female, who have been capitally convicted in Canada, and each province, for each year, from the 1st of July, 1867, to the 2nd of February, 1914, specifying the offences and whether and how the sentences were carried into effect by execution, or otherwise, with the name of convicts; dates of conviction; crime of which committed; sentences passed; judges by whom sentenced; and how dealt with. 2. For a return showing all convicts, male and female, who have been reprieved from the execution of capital sentences passed upon them during the above mentioned period, with the names

---

---

 CONTENTS OF VOLUME 28—*Continued.*

- of convicts; dates of conviction; crime of which convicted; sentences passed; by whom sentenced; sentences commuted, and if so, to what. 3. For a return showing all persons in Canada, and each province, convicted during the above mentioned period of murder whose sentences have been mitigated, or who have received a free pardon, together with a statement of the offences of which they were severally convicted, with the name of convicts; dates of conviction; nature of offence; sentences; and extent of mitigation of sentences and dates. 4. For a return of instances, during the above mentioned period, in which appeal has been made on behalf of the persons convicted of capital offences to His Excellency, the Governor in Council, for the exercise of the Royal Prerogative of pardon, or mitigation of sentences, with the name of convicts; dates of conviction and place; crime of which convicted; sentences; dates of appeal; and the result. Presented 9th February, 1915.—*Mr. Wilson (Laval)*... *Not printed.*
54. General Rules and Orders of the Exchequer Court of Canada made, respectively, on the 23rd September, 1914, and the 18th June, 1914. Presented by Hon. Mr. Coderre, 9th February, 1915... *Not printed.*
- 54a. General Rules and Orders of the Exchequer Court of Canada made on the 15th February, 1915. Presented by Hon. Mr. Coderre, 16th March, 1915... *Not printed.*
55. Ordinances of the Yukon Territory passed by the Yukon Council in the year 1914. Presented by Hon. Mr. Coderre, 9th February, 1915... *Not printed.*
56. Return to an Order of the House of the 18th May, 1914, for a return showing the details of moneys paid to J. F. Farrington, \$248.25; B. H. Smith, \$469.50, and H. C. Dash, \$182.40, as set forth in *Hansard* of this session, page 3071. Presented 9th February, 1915.—*Mr. McLean (Halifax)*... *Not printed.*
57. Return to an Order of the House of the 16th March, 1914, for a copy of instruction sent to Mr. Wm. Flynn, advocate, to hold investigations into charges made against employees of the Department of Marine and Fisheries in Bonaventure County, and reports made by him in such investigations. Presented 9th February, 1915.—*Mr. Marcil (Bonaventure)*... *Not printed.*
58. Return to an Order of the House of the 27th April, 1914, for a copy of all documents bearing upon the application made to the Department of Marine and Fisheries for the dismissal of Ulric Dion, lightkeeper at St. Charles de Caplan, Quebec, and the appointment of Omer Arsenaault in his place, and on the action taken by the Department in that connection. Presented 9th February, 1915.—*Mr. Marcil (Bonaventure)*.  
*Not printed.*
59. Return to an Order of the House of the 9th February, 1914, for a copy of all agreements made and entered into between the Department of Marine and Fisheries or the Government and Railway and Express Companies, including the Intercolonial Railway, relating to the transportation of fresh fish by fast freight or express, since the year 1906; also a copy of all guarantees given to railway and express companies by the Government or any Department thereof, relating to such transportation, together with a statement of all disbursements made by the Department of Marine and Fisheries each year under the terms of such agreements or guarantees, distinguishing between disbursements made on account of fast freight and disbursements made on account of express shipments; also the number of refrigerator cars, subject to guarantee, by Department of Marine and Fisheries, forwarded by fast freight from Mulgrave or Halifax to Montreal, each calendar year since 1906, and the number of tons of freight carried by such cars each year. Also the number of refrigerator express cars forwarded from said points, Mulgrave and Halifax to Montreal, up to December 31, 1913, under the terms of an agreement made since 1911, between the Department of Marine and Fisheries and the railway or express companies or both. Also the number of tons of fresh fish carried by express companies, prior to December 31, 1913, under the last mentioned agreement; and the amount paid up to December 31, 1913, by the Department of Marine and Fisheries, under the last mentioned agreement. Also the number of tons of fresh fish carried by express companies from Mulgrave and Halifax to points west since 1906, on which the Government paid one-third, but not under the terms of the said agreement made as aforesaid, since 1911. Presented 9th February, 1915.—*Mr. Sinclair*... *Not printed.*
60. Return to an Order of the House of the 20th April, 1911, for a return showing all the post offices in the several counties in the province of Nova Scotia for which a rent allowance, or a fuel fund, and light allowance is made, specifying the amount of such allowance in each case. Presented 9th February, 1914.—*Mr. Chisholm (Antigonish)*.  
*Not printed.*
61. Return to an Order of the House of the 16th March, 1914, for a copy of all correspondence, letters, telegrams, etc., in the year 1913, relating to the carrying of the mails between Grand River Falls and Grand River, county of Richmond, and the awarding of the contract to Malcolm McCuspie. Presented 9th February, 1915.—*Mr. Kyte*.  
... *Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

62. Return to an Order of the House of the 11th May, 1914, for a copy of all letters, telegrams, correspondence and memorials since the 1st day of November, 1911, relating to the post office at Johnstown, Richmond County, N.S., and to complaints against the present postmaster and recommendations for his dismissal. Presented 9th February, 1915.—*Mr. Kyte* . . . . . *Not printed.*
63. Return to an Order of the House of the 20th April, 1914, for a copy of all papers, petitions, letters and telegrams concerning the change of site of the post office at St. Lazare Village, county of Bellechasse, Quebec. Presented 9th February, 1915.—*Mr. Lemieux*. . . . . *Not printed.*
64. Statement of Governor General's Warrants issued since the last Session of Parliament on account of 1914-15. Presented by Hon. Mr. White, 9th February, 1915. . . . . *Not printed.*
65. Statement of expenditure on account of "Miscellaneous Unforeseen Expenses," from the 18th August, 1914, to the 4th February, 1915, in accordance with the Appropriation Act of 1914. Presented by Hon. Mr. White, 9th February, 1915. . . . . *Not printed.*
66. Statement of Superannuation and Retiring Allowances in the Civil Service during the year ending 31st December, 1914, showing name, rank, salary, service, allowance and cause of retirement of each person superannuated or retired, also whether vacancy is filled by promotion or by appointment, and salary of any new appointee. Presented by Hon. Mr. White, 9th February, 1915. . . . . *Not printed.*
67. Statement of receipts and expenditures of the Ottawa Improvement Commission to 31st March, 1914. Presented by Hon. Mr. White, 9th February, 1915. . . . . *Not printed.*
68. Statement of the affairs of the Royal Society of Canada, for the year ended 30th April, 1914. Presented by Hon. Mr. White, 9th February, 1915. . . . . *Not printed.*
69. Account of the average number of men employed on the Dominion Police Force during each month of the year 1914, and of their pay and travelling expenses, pursuant to Chapter 92, Section 6, Subsection 2, of the Revised Statutes of Canada. Presented by Hon. Mr. Doherty, 10th February, 1915. . . . . *Not printed.*
70. Return to an Order of the Senate, dated the 16th January, 1913, calling for copy of the plans, reports, soundings, and other germane information respecting the ports of Churchill and Fort Nelson, so far as the Department of Railways and Canals is concerned.—(*Senate*) . . . . . *Not printed.*
71. Return to an Order of the Senate, dated the 29th April, 1914, showing:—1. Titles of all books, pamphlets and other printed papers issued by the King's Printer during the year ending on the 31st of March, 1914. 2. The number of each of such books, pamphlets and papers printed during such year, and the number distributed, with the dates of distribution. 3. The number of pages in each. 4. The cost of each. 5. The authority for the printing and issuing of each of such books, pamphlets and papers.—(*Senate*) . . . . . *Not printed.*
72. Return to an Order of the Senate dated the 30th April, 1914, for the production of all proposals submitted to the Government for the construction of the Montreal, Ottawa and Georgian Bay Canal and all the correspondence relating thereto.—(*Senate*). . . . . *Not printed.*
- 72a. Return to an Order of the House of the 11th February, 1915, for a copy of all petitions and memoranda from commercial bodies or other parties in relation to the immediate construction of the Georgian Bay Canal, and of all correspondence in connection with the same since 21st September, 1911. Presented 4th March, 1915.—*Sir Wilfrid Laurier*. . . . . *Not printed.*
73. Copies of general orders promulgated to the militia for the period between 25th November, 1913, and 24th December, 1914.—(*Senate*) . . . . . *Not printed.*
74. Copy of correspondence respecting the control of the exportation of nickel. Presented by Sir Robert Borden, 11th February, 1915. . . . . *Not printed.*
75. Memorandum respecting work of the Department of Militia and Defence—European War, 1914-15. Presented by Hon. Mr. Hughes, 11th February, 1915. . . . . *Not printed.*
76. Return to an Order of the House of the 6th April, 1914, for a copy of all correspondence, letters, telegrams, complaints and documents of all kinds received by the Department of Trade and Commerce during the years 1913-14, with respect to the Pictou-Mulgrave-Cheticamp steamship route. Presented 11th February, 1915.—*Mr. Chisholm (Inverness)* . . . . . *Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

77. Return to an Order of the House of the 8th June, 1914, for a copy of all documents bearing on an application or applications made to the Superintendent General of Indian Affairs or the Department, on an amendment to the Indian Act to facilitate the sale of the Indian Reserve of Restigouche, Que., or on the acquiring otherwise of any portion or the whole of the said reserve for industrial or other purposes, and any answers given thereto. Presented 11th February, 1915.—*Mr. Marcil (Bonaccature).*  
*Not printed.*
78. Return to an Order of the House of the 2nd February, 1914, for a return showing the names of the sailors who have been employed on the *Eureka* during the years 1910, 1911, 1912 and 1913. Presented 12th February, 1915.—*Mr. Boday.* . . . .*Not printed.*
79. Return to an Order of the House of the 15th April, 1914, for a return showing the total bond issue of the Canadian Northern Railway Company and its affiliated companies; and the total cost to date of the construction of the lines of railways comprising the Canadian Northern Railway system, including terminals, sidings, etc. Presented 12th February, 1915.—*Mr. Murphy.* . . . .*Not printed.*
80. Return to an Order of the House of the 18th May, 1914, for a copy of all papers, documents, reports and evidence relative to the dismissal or proposed dismissal of W. A. Case of the Government Quarantine Service at Halifax, N.S. Presented 12th February, 1915.—*Mr. McLean (Halifax)* . . . .*Not printed.*
81. Return to an Order of the House of the 26th February, 1914, for a return showing:—1. The freight rates charged during the years 1912 and 1913, on wheat from Canadian ports to ports in the United Kingdom by the Canadian Pacific Railway Company's Steamship Lines, the Allan Steamship Line and the Canadian Northern Railway Company's Steamship Lines. 2. The profits made by the freight boats of the said several lines which carried wheat alone or with other freight. Presented 12th February, 1915.—*Sir James Aikins.* . . . .*Not printed.*
82. Return to an Order of the House of the 16th February, 1914, for a copy of all reports, requests, petitions, memorials, letters, telegrams and other correspondence and documents relating to the removal, suspension or dismissal, by the management of the Intercolonial Railway, of Warren Carter and Frederick Avard, employees in the freight department of the Intercolonial Railway at Sackville, N.B.; and of all letters, telegrams and other correspondence in the Department of Railways and Canals, or in the railway offices at Moncton, or in any Department of Government, addressed to the Minister of Railways and Canals, or to any other member of the Government, or to any official of the Department of Railways and Canals, or of the Intercolonial Railway, by any person or persons in the county of Westmorland, N.B., in any manner relating to said employees and to the dispensing with their services, particularly of any letters sent to F. P. Brady, General Superintendent of the Intercolonial, by any party or parties in Sackville, N.B., or elsewhere, and of all replies to any such letters, correspondence or documents. Presented 12th February, 1915.—*Mr. Emmerson.*  
*Not printed.*
83. Return to an Order of the House of the 23rd March, 1914, for a return showing:—1. What investigations and other work have been entrusted by the Government, or any Department thereof, to G. Howard Ferguson, member for the electoral division of the county of Grenville in the Legislative Assembly of the province of Ontario. 2. How much the said G. Howard Ferguson has been paid by the Government, or any Department thereof, for fees and disbursements since the 21st of September, 1911, and how much is still due and owing to him. 3. How much has been paid to the said G. Howard Ferguson by the Government or any Department thereof, since the 21st September, 1911, in connection with any other matter whatever. Presented 12th February, 1915.—*Mr. Proulx.* . . . .*Not printed.*
84. Further Supplementary Return to an Order of the House of the 28th April, 1913, for a return showing a list of all the newspapers in Canada in which advertisements have been inserted by the Government, or any minister, officer or department thereof, between 10th October, 1911, and the present date, together with a statement of the gross amount paid therefor between the above dates to each of said newspapers or to the proprietors of the same. Presented 12th February, 1915.—*Mr. Sinclair.* . . . .*Not printed.*
- 84a. Further Supplementary Return to an Order of the House of the 30th April, 1913, for a return showing a list of all the newspapers in Canada in which advertisements have been inserted by the Government, or any minister, officer or department thereof, between the 10th day of October, 1906, and 10th October, 1907, and between said dates in each of the years following up to the 10th October, 1911, together with a statement of the gross amount paid therefor for the years mentioned, to each of the said newspapers or the proprietors of the same. Presented 12th February, 1915.—*Mr. Thornton.*  
*Not printed.*

 CONTENTS OF VOLUME 28—*Continued.*

103. Return to an Order of the House of the 9th February, 1914, for a copy of all petitions, memorials, letters, telegrams, papers, and documents received by any department of the Government of Canada, or any Minister of the Crown from any company, corporation, person or persons, requesting the removal of any customs duties upon wheat or wheat products entering Canada, or protesting against any diminution or removal of such custom's duties, and any replies thereto. Presented 18th February, 1915.—*Mr. Maclean (Halifax)* . . . . .Not printed.
104. Return to an Order of the House of the 20th April, 1914, for a copy of all correspondence, letters, documents or other papers relating to the cancellation of the entry of R. Bannatyne for the northwest  $\frac{1}{4}$  of section 24, township 35, range 18, west of the 2nd meridian. Presented 19th February, 1915.—*Mr. Neely* . . . . .Not printed.
105. Return to an Order of the House of the 16th February, 1914, for a return showing the name of the postmaster of the Parish of St. Romuald, county of Lévis, who, it is said, was dismissed from office since September, 1911, the reasons for such dismissal, the nature of the complaints made against him, the names of the parties who made those complaints, together with a copy of all correspondence and telegrams relating thereto, the name of the inquiring commissioner, and report of investigation, if any, and of all evidence taken at the investigation, the names of those who recommended the successor, names of the parties by whom the Government was represented at such investigation, with a detailed statement of all the accounts paid or to be paid by any department in connection with the aforesaid dismissal and investigation, the names of the parties who received any money or filed their accounts in connection with said investigation, and the amount awarded to or claimed by each of them. Presented 19th February, 1915.—*Mr. Bourassa* . . . . .Not printed.
106. Return showing lands sold by the Canadian Pacific Railway Company during the year which ended on the 30th September, 1914. Presented by Hon. Mr. Roche, 19th February, 1915. . . . .Not printed.
107. Return to an Order of the House of the 10th June, 1914, for a return showing:—1. The amount of money sent through the post offices in the past five years outside Canada from the following Cape Breton post offices: Glace Bay, Caledonia Mines, Dominion No. 4, New Aberdeen, Bridgeford, Old Bridgeford, Reserve Mines, Sydney, Whitney Pier, Ashby, North Sydney, Sydney Mines, Florence, Dominion No. 6, and Port Marrien. 2. What countries was such money transmitted to. Presented 22nd February, 1915.—*Mr. Carroll* . . . . .Not printed.
108. Return to an Order of the House of the 15th February, 1915, for a copy of all correspondence, telegrams and other documents in connection with the removal from the customs service at Lethbridge, Alberta, of Brown Pipes and A. R. Gibbons. Presented 23rd February, 1915.—*Mr. Buchanan* . . . . .Not printed.
109. Return to an Order of the House of the 15th February, 1915, for a return giving the names of all the transports hired since 1st August, 1914, for the conveyance of troops, horses, stores and material to England, the name of each vessel owner, broker or other person through whom the vessel was chartered, the tonnage of each vessel, speed, rate paid per ton per week or month, minimum time for which engaged, date of agreement, date at which pay commenced, date at which pay ceased, and the total sum paid by the Government for hire and other charges. Presented 23rd February, 1915.—*Mr. Murphy* . . . . .Not printed.
110. Return to an Order of the House of the 15th February, 1915, for a return showing:—1. How many transport wagons were purchased for the Second and Third Contingents? 2. From whom they were purchased, and the name of each person or firm? 3. How many were purchased from each? 4. What was the price paid per wagon? 5. If any tenders were asked? 6. If any tenders were received that were not accepted? 7. If so, what was the price tendered at? Presented 23rd February, 1915.—*Mr. Nesbitt*.  
Not printed.
111. Return to an Order of the House of the 11th February, 1915, for a return showing:—1. How many persons have been made prisoners of war since the declaration of war between the Allies, Germany and Austria? 2. Where they have been kept captive? 3. What is the name of each place of detention, and the name of the officer in charge of such place of detention? Presented 23rd February, 1915.—*Mr. Wilson (Laval)*.  
Not printed.
- 111a. Return to an Order of the House of the 19th February, 1915, for a statement in detail of: The number of prisoners of war in this country; the number under parole; the number held in detention camps; the number of detention camps, where situated, how accessible, and the number of prisoners in each. The amount of cost to Canada in each of these camps, respectively, for subsistence, pay, clothing, transportation and supervision; the nature of work done by prisoners, and the total value of same to date. Presented 1st April, 1915.—*Mr. Clark (Red Deer)* . . . . .Not printed.

---

 CONTENTS OF VOLUME 28—*Continued.*

112. Return to an Order of the House of the 15th February, 1915, for a copy of all letters, telegrams, minutes of investigation and other documents relating to the dismissal of James Brennan, fireman Intercolonial Railway at Stellarton. Presented 25th February, 1915.—*Mr. Macdonald*. . . . .*Not printed.*
113. Return to an Order of the House of the 11th February, 1915, for return showing if any official statement was given on behalf of the management of the Intercolonial Railway to the effect that wages would be paid in their absence to the employees of the railway who volunteered for active service. If so, when and by whom? If any order has been made by the Railway Department providing for such payment, and if so, when the said order was made. Presented 23rd February, 1915.—*Mr. Macdonald*. . . . .*Not printed.*
114. Return to an order of the House of the 9th February, 1915, for a copy of all papers, petitions, letters and telegrams exchanged between the Quebec Board of Trade and the Department of Railways and Canals concerning the circulation of trains on that section of the National Transcontinental Railway between Cochrane and Quebec City. Presented 23rd February, 1915.—*Mr. Lemieux*. . . . .*Not printed.*
115. Return (in so far as the Department of the Interior is concerned) of copies of all Orders in Council, plans, papers and correspondence relating to the Canadian Pacific Railway, which are required to be presented to the House of Commons, under a resolution passed on 20th February, 1882, since the date of the last return, under such resolution. Presented by Hon. Mr. Roche, 24th February, 1915. . . . .*Not printed.*
116. Return showing:—1. Who the Remount Commissioners are for Western and Eastern Canada respectively? 2. When and by whom they were appointed, and what their general instructions were? 3. Why were the mobilization orders 1913, which provide for the purchase of remounts, ignored and civilians put in charge of the purchase of remounts? 4. The names of the purchasers and inspecting veterinary officers appointed by the Remount Commissioner for Eastern Canada, in the various remount divisions? 5. If any of the purchasers and inspecting veterinary officers have been stopped buying. If so, what their names are, and the reasons given by the Remount Commissioner for his action? 6. How many horses have been purchased between 1st December and 31st January, in each remount division in Eastern Canada, and the average price paid per horse? 7. What the average cost per horse is in each remount division to cover the expenses, including pay or allowances and all travelling and other expenses, between the said dates. Presented 24th February, 1915.—*Mr. Lemieux*. . . . .*Not printed.*
117. Return showing:—1. From how many firms the Government have ordered ankle boots for the various contingents now being equipped for service? 2. The names of these firms? 3. How many ankle boots have been ordered from each firm? 4. How many ankle boots each firm have delivered up to date? 5. How many ankle boots each firm have yet to deliver? 6. The price that each firm is receiving for these ankle boots. Presented 24th February, 1915.—*Mr. Lemieux*. . . . .*Not printed.*
118. Return to an Order of the House of the 22nd February, 1915, for a copy of all correspondence, recommendations, tenders and other papers on file in the office of the Department of Railways and Canals relating to supplying ice for the Intercolonial Railway at Mulgrave for the year 1915. Presented 25th February, 1915.—*Mr. Sinclair*. . . . .*Not printed.*
119. Return to an Order of the House of the 18th February, 1915, for a return showing:—1. How many motor trucks were sent with the first contingent to England? 2. From whom they were purchased, and by whom they were manufactured? 3. What their capacity was? 4. What price was paid for them? 5. If any expert was employed by the Government in connection with their purchase. If so, who? 6. If any commission was paid by the Government to any one in connection with their purchase? 7. If the trucks have given satisfaction in service. If not, what defects were exhibited? 8. If a committee was appointed by the Militia Department or the Government in regard to the purchase of motor trucks for the second and further contingents. If so, who comprised it, and what were their special qualifications? 9. If one, Mr. McQuarrie, was a member of this committee. If so, is it true he was, and is still, an employee of the Russell Motor Car Company of Toronto? 10. If one, Owens Thomas, was employed as expert on the said Committee? If so, what he was paid, or what he is to be paid for his services, and how long his services were utilized? 11. If Mr. Thomas received any commission in connection with the purchases of motor trucks either from the Government or the manufacturers? 12. What recommendations were made by the said committee to the Militia Department or the Government in connection with purchases of motor trucks? 13. If the trucks have been purchased. If so, how many, from whom, and at what price? 14. If it is true that these trucks were purchased from the Kelly Company, Springfield, Ohio. If so, could not efficient and suitable trucks have been procured from Canadian manufacturers? 15. If it is true that the Government has decided to go into the motor truck business by placing orders with Canadian manufacturers for parts, and supplying such parts to assemblers in Canada. If so, is it true that orders have been, or are being placed with the Russell Motor Car Company, to manufacture engines? 16. Who recommended Mr. Thomas to the Minister of the Militia or the Government? Presented 25th February, 1915.—*Mr. Copp*. . . . .*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

How many applications for seed grain have been received from residents of the three prairie provinces since June, 1914? 2. How many bushels of grain were included in the applications? 3. How many acres of land were to be seeded by the grain applied for? 4. How many bushels of wheat, oats and barley, respectively, the Government has on hand with which to meet the applications? 5. If arrangements have been made under which the several Provincial Governments will assist in meeting the needs of the settlers for seed grain? Presented 8th March, 1915.—*Mr. McCrancy* . . . . .*Not printed.*
- 148.** Return to an Order of the House, of the 2nd February, 1914, for a return showing the number of ships chartered by the Government or any department thereof since October, 1911, to go to Hudson's Bay or James Bay: the name of each and the tonnage; the name and residence of each commanding officer; what cargo each carried, and what portion was landed, and where, what was lost and where, and what returned; with the values in each case. Presented 5th March, 1915.—*Mr. Graham* . . . . .*Not printed.*
- 148a.** Return to an Order of the House of the 3rd March, 1915, for a return showing the number of ships employed by the Railway Department, the number of men hired on vessels and on shore, and the amount expended for supplies, men and transportation from 31st March, 1914, to 31st December, 1914, in connection with the Hudson Bay Railway expenditures. Presented 22nd March, 1915.—*Mr. Macdonald* . . . . .*Not printed.*
- 149.** Return to an Address to His Royal Highness the Governor General, of the 9th February, 1914, for a copy of all correspondence since the 1st January last with regard to the calling of an Imperial Conference on the subject of naval defence. Presented 8th March, 1915.—*Sir Wilfrid Laurier* . . . . .*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

150. Return to an Order of the House, of the 11th February, 1915, for a return showing the names and addresses of all persons in Antigonish County to whom the bounty under the Fenian Raid Volunteer Bounty Act has been paid; the names and addresses of all persons from said county whose applications have been rejected, and a list giving names and addresses of all applications from said county whose applications have not yet been disposed of. Presented 8th March, 1915.—*Mr. Chisholm (Antigonish).*  
*Not printed.*
151. Return to an Order of the House, of the 3rd March, 1915, for a return showing:—1. Who were the different officers commissioned to the 17th Nova Scotia Regiment at Valcartier before they sailed for England? 2. Who are now the commissioned officers of said regiment. Presented 8th March, 1915.—*Mr. Macdonald.* . . . . .*Not printed.*
152. Return to an Order of the House, of the 9th February, 1915, for a copy of all accounts of the transfer of the storm signal at Shippigan, N.B., from its former position on land to the public wharf, showing the total cost of said transfer during the months of October and November in 1911. Presented 8th March, 1915.—*Mr. Turgeon.*  
*Not printed.*
153. Return to an Order of the House, of the 4th May, 1914, for a copy of all correspondence, telegrams, petitions, including the signatures of such petitions, and all other documents and papers in the possession of the Department of Trade and Commerce, or the minister of said department, or in the possession of the Prime Minister, relating to any application made between 1st November, 1913, and date hereof by parties in Nova Scotia asking for Government assistance towards the transportation of fresh fish between ports in Nova Scotia and the United States. Presented 9th March, 1915.—*Mr. Simola.*  
*Not printed.*
154. Statement of Mr. H. C. Crowell, staff correspondent of the *Halifax Chronicle*, and correspondence in connection with statements appearing in the press referring to alleged ill-treatment of the 17th Regiment of Nova Scotia, at Salisbury Plains. Presented by Sir Robert Borden, 9th March, 1915. . . . .*Not printed.*
155. Return to an Order of the House, of the 3rd March, 1915, for a return showing:—1. The estimated cost of fitting up the works of the Canadian Car and Foundry Company, Limited, at Amherst, N.S., for military purposes. 2. The rent or other remuneration being paid, or will be paid, this company for the use of its buildings. 3. Who are to supply the military provisions, including food for men, coal for heating and cooking, and food and other supplies for horses quartered on these premises, and at what prices. 4. Whether it is true that forms for tendering for such military supplies could only be obtained from the office of the sitting member for Cumberland County, and in several cases forms of tender were refused to applicants. 5. Whether the Government is aware that in the case of the supplying of hay, as alleged, not only Liberals were not allowed to tender for same, but supporters of the Government were informed they would not secure any part of the contract, if any of the hay to be supplied was to be purchased from a Liberal. Presented 11th March, 1915.—*Mr. Copp.* . . . . .*Not printed.*
156. Return to an Address to His Royal Highness the Governor General, of the 1st March, 1915, for a copy of all correspondence of the Imperial authorities on the subject of loans from the Imperial Treasury to the Canadian Government. Presented 11th March, 1915.—*Mr. Maclean (Halifax).* . . . . .*Not printed.*

From how many firms or private individuals the Government, or any department of the Government, has ordered motor cycles since the 1st of July, 1914? 2. The names of these firms? 3. How many motor cycles have been ordered from each firm? 4. How many each firm has delivered up to date? 5. How many each firm has yet to deliver? 6. The price each firm is receiving for these motor cycles? Presented 1st April, 1915.—*Mr. Chisholm (Antigonish)*. . . . . *Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

228. Return to an Address to His Royal Highness the Governor General of the 19th February, 1915, for a copy of all Orders in Council, letters and telegrams exchanged between the Dominion Government and the several provinces, concerning the proposed transfer of fisheries in tidal waters from the Provincial to the Federal control. Presented 1st April, 1915.—*Mr. Lemieux* . . . . . *Not printed.*
229. Return to an Order of the House of the 4th March, 1915, for a copy of all correspondence exchanged between the Government of Canada, or any minister or official thereof, in regard to the control of fisheries in Quebec province, as well as of all documents bearing on that question, together with a list of licenses granted by either Governments for the present year. Presented 1st April, 1915.—*Mr. Marcell* . . . . . *Not printed.*
230. Return to an Order of the House of the 24th February, 1915, for a copy of all correspondence, letters, telegrams and petitions relating to the appointment of Alfred Bishop as farm foreman, or in any other capacity at the experimental station at Kentville, Nova Scotia. Presented 1st April, 1915.—*Mr. Kytic* . . . . . *Not printed.*
231. Return to an Address of the 10th March, 1915, showing copies of all correspondence, telegrams and documents exchanged between the Department of Marine and Fisheries and the Minister of the Naval Service and the Department of Colonization, Mines and Fisheries of the province of Quebec, relating to the rescinding of the prohibition of net fishing in the waters of the Lakes of Two Mountains, St. Francis and St. Louis, as per Order in Council (197) passed in Ottawa, Thursday, 28th day of January, 1915.—(*Senate*) . . . . . *Not printed.*
232. Return to an Order of the House of the 1st March, 1915, for a copy of all papers, letters, petitions and other documents relating to the establishment of a rural mail route from River John to Hedgeville, county of Pictou. Presented 3rd April, 1915.—*Mr. Macdonald*.  
*Not printed.*
233. A communication from the Consul General of Belgium in Canada, respecting the protest of the Belgium Government against the contention of the German Chancery that as far back as in 1906, Belgium had broken her own neutrality by the conclusion of an agreement with Great Britain. Presented by Sir Robert Borden, 5th April, 1915.  
*Printed for sessional papers.*
234. Return to an Address of the Senate dated 11th March, 1915, showing:—1. How much wheat, oats and barley has the Dominion Government purchased in 1914 for seed to be distributed in the West, giving the amount of each kind? 2. Where is said grain stored, and what rate of storage is the Government paying on same? 3. How much did the Government pay per bushel for oats, barley and wheat, purchased for said provinces, and when was said grain purchased? 4. Have they given a contract for cleaning said grain, and to whom, and at what price?—(*Senate*) . . . . . *Not printed.*
235. Return to an Order of the Senate dated the 18th March, 1915, that an Order of the Senate do issue for:—1. A return showing the results per grade of all grain in each of the terminal elevators at Fort William and Port Arthur at the annual weigh-up for each of the years 1912, 1913 and 1914. 2. A return showing the balances whether overages or shortages in each grade in each elevator for each of the said years. 3. A return showing the net result of the three years operations of each of said elevators in overages or shortages in each grade.—(*Senate*) . . . . . *Not printed.*
236. Return to an Order of the House of the 5th March, 1915, for a return showing:—1. The quantity of spirituous liquors, proof gallons, including ale, wines and beers, taken out of bond between 6th August and 21st August, 1914, at each port of the Dominion. 2. The quantity of cigars, cigarettes and tobacco taken out of bond between the above mentioned dates at each port of the Dominion. Presented 7th April, 1915.—*Mr. Hughes (Kings, P.E.I.)* . . . . . *Not printed.*
237. Return to an Order of the House of the 5th March, 1915, for a return showing:—1. From how many firms or private individuals the Government, or any department of the Government, has ordered forage caps since the 1st of July, 1914? 2. The names of these firms? 3. How many forage caps have been ordered from each firm? 4. How many each firm has delivered to date? 5. How many each firm has yet to deliver? 6. The price each firm is receiving for these forage caps? Presented 7th April, 1915.—*Mr. Murphy* . . . . . *Not printed.*
238. Return to an Order of the House of the 11th March, 1915, for a copy of the report of Dr. Wm. Wakeham, on the extent of the losses sustained in the Baie des Chaleurs and Gulf of St. Lawrence in the storm of 5th June, 1914, together with a statement showing the number of claims received and those entertained, with names of claimants and their residence, and the amounts paid to each, together with a copy of other documents bearing on this question. Presented 7th April, 1915.—*Mr. Marcell* . . . . . *Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

239. Return to an Address to His Royal Highness the Governor General, of the 23rd February, 1915, for a copy of all letters, telegrams, reports, recommendations, Orders in Council and all other documents and papers in connection with rewards to the officers and crews of steamers *John L. Cann* and *Westport III*, for their heroic efforts in saving the passengers and crews of ss. *Cobequid*, wrecked on Trinity Lodge, 13th January, 1914. Presented 7th April, 1915.—*Mr. Law* . . . . . *Not printed.*
240. Return to an Order of the House of the 29th March, 1915, for a copy of all documents, letters, telegrams, reports, etc., relating to the dismissal of Alexandre Blais, of the city of Lévis, from the position of customs officer at Bradore Bay, and the appointment of his successor or successors. Presented 7th April, 1915.—*Mr. Bourassa* . . . . . *Not printed.*
241. A Return to an Address of the Senate dated 18th March, 1915, for:—1. A return showing all appointments to the Civil Service, Department of the Interior, in that area contained in the present constituencies of Medicine Hat and Macleod, giving names, date of appointment, how appointed, and salaries from the year 1896 to the present date. 2. Also, all vacancies by death, resignation or dismissal, giving name, date, length of service and cause of dismissal in the same area and during the same period.—(*Senate*).  
*Not printed.*
242. Return to an Order of the House of the 1st March, 1915, for a copy of charges made against J. Herbert Sweetman, customs officer at Port Daniel Centre, Quebec, which brought about his dismissal; and also of charges against Nelson Horie, lighthouse keeper at Port Daniel West, Quebec, which brought about his dismissal. Presented 5th April, 1915.—*Mr. Marcil (Bonaventure)* . . . . . *Not printed.*
243. Return to an Order of the House of the 22nd February, 1915, for a copy of all correspondence, recommendations, petitions, contracts, tenders and other papers and documents in any way connected with the letting of the contract for carrying the mails between Guysborough and Erinville, N.S. Presented 8th April, 1915.—*Mr. Sinclair*.  
*Not printed.*
244. Return to an Order of the House of the 10th March, 1915, for a copy of all reports, petitions, letters, telegrams and other documents in connection with the dismissal of W. M. Thomson from the postmastership at Fort Qu'Appelle, and of any petition or petitions for his reinstatement, and of all correspondence in connection therewith. Presented 5th April, 1915.—*Mr. Thomson (Qu'Appelle)* . . . . . *Not printed.*
245. Return to an Order of the House of the 22nd March, 1915, for a copy of all letters, telegrams, correspondence and petitions received in the Post Office Department, in any way referring to the calling of tenders for the Antigonish-Sherbrooke mail service, which tenders were opened or due at the Post Office Department on the 11th December last; and of all representations or requests, recommending or suggesting that new tenders should be invited as was done early in February last. Presented 8th April, 1915.—*Mr. Chisholm (Inverness)* . . . . . *Not printed.*
246. Return to an Order of the House of the 3rd March, 1915, for a copy of all letters, telegrams, papers and other documents in regard to a proposed rural mail delivery service between Pictou and Saltsprings, Pictou county, and as to the arrangements for the existing service between those points. Presented 8th April, 1915.—*Mr. Macdonald*.  
*Not printed.*
247. Return to an Address of His Royal Highness the Governor General, of the 1st March, 1915, for a copy of all letters, telegrams, reports, recommendations, Orders in Council, and all other documents and papers whatsoever relating to or in any wise connected with the establishment of rural mail routes and deliveries from Bridgetown to Granville Ferry, county of Annapolis, and especially of all letters, telegrams, reports, recommendations and documents relating to the closing of the post offices at Belleisle, Upper Granville, and the establishment of the post office at Granville Centre, all in the county of Annapolis. Presented 8th April, 1915.—*Mr. Macdonald* . . . . . *Not printed.*
248. Return to an Order of the House of the 22nd February, 1915, for a copy of all telegrams, letters, reports, petitions and all other documents in any way referring to the proposed line of railway from Orangedale to Cheticamp. Presented 9th April, 1915.—*Mr. Chisholm (Inverness)* . . . . . *Not printed.*
249. Return to an Order of the House of the 11th March, 1915, for a copy of all documents, investigations, reports, correspondence, etc., relating to the burning of certain buildings belonging to the Trois Pistoles Pulp and Lumber Company and to André Leblond, near Tobin station, on the Intercolonial Railway. Presented 9th April, 1915.—*Mr. Lapointe (Kamouraska)* . . . . . *Not printed.*
250. Return to an Order of the House of the 18th March, 1915, for a return showing the names of all officials; assistants and clerks, employed in the railway offices at Moncton, N.B., and the salary paid to each; also the names of officials formerly employed in said offices who have been retired on superannuation allowance, and the amount of retiring allowance being paid to each. Presented 9th April, 1915.—*Mr. Copp* . . . . . *Not printed.*

## CONTENTS OF VOLUME 28—Continued.

251. Return to an Order of the House of the 24th March, 1915, for a return showing the names of all persons from whom lands have been purchased, the quantity of land so acquired, and the amount paid therefor, in connection with the Dartmouth and Dean's Post Office Branch of the Intercolonial Railway since the date of return numbered 128 made to Parliament at the last regular session thereof. Presented 9th April, 1915.—*Mr. Maclean (Halifax)* . . . . .Not printed.
252. Return to an Address to His Royal Highness the Governor General of the 17th March, 1915, for a copy of all correspondence, letters, Orders in Council, agreements, etc., in reference to the leasing or transfer of the Windsor Branch of the Intercolonial Railway to the Canadian Pacific Railway. Presented 9th April, 1915.—*Mr. Maclean (Halifax)*.  
Not printed.

 CONTENTS OF VOLUME 28—*Continued.*

267. Return to an Order of the House of the 17th March, 1915, for a copy of all petitions, letters, documents, etc., between persons in the province of Nova Scotia and the Department of Trade and Commerce since 1st August last, with regard to Atlantic ocean freight rates on subsidized steamers or otherwise. Presented 10th April, 1915.—*Mr. Maclean (Halifax)* . . . . .*Not printed.*
268. Return to an Order of the House of the 22nd February, 1915, for a copy of the report of investigation held about 1st June, 1914, by T. R. Ferguson, as special commissioner, into the allotment of homesteads on the area cut out of the Riding Mountain Forest Reserve in the year 1908 or about that time. Presented 10th April, 1915.—*Mr. Cruise*.  
*Not printed.*
269. Copy of Order in Council dated 6th April, 1915.—Regulations in respect to steam trawlers clearing from ports on the Atlantic seaboard of Canada. Presented by Hon. Mr. Hazen, 10th April, 1915. . . . .*Not printed.*
270. Return to an Order of the House of the 15th February, 1915, for a copy of all tenders in connection with the supply of lumber to the Department of Militia for the training camps at Medicine Hat and Calgary, and of the invoices for the material supplied. Presented 12th April, 1915.—*Mr. Buchanan*. . . . .*Not printed.*
271. Return to an Order of the House of the 17th March, 1915, for a copy of all correspondence and reports relating to the purchase of 25,000 shovels of special pattern, mentioned in Order in Council P.C. 2302, dated 4th September, 1914, on page 38 of memorandum respecting work of the Department of Militia and Defence, and also relating to any further purchases of such shovels. Presented 12th April, 1915.—*Mr. Hughes (Kings, P.E.I.)*. . . . .*Not printed.*
272. Return to an Order of the House of the 15th March, 1915, for a return showing the names of the persons who bought the horses which were sold by auction at Valcartier camp, giving the price paid for each horse. Presented 12th April, 1915.—*Mr. Kay*.  
*Not printed.*
273. Return to an Order of the House of the 24th February, 1915, for a return showing:—1. If the Government ever leased any land at or near Shelburne, Nova Scotia, known as the Barracks property, to the town of Shelburne? 2. If so, at what rental, and for how long? 3. If said lease is now in force? 4. If the Government has sold any of the standing timber on this property? 5. If so, when, to whom, and at what price? 6. How long the purchaser has to remove it? 7. What is the minimum size at the stump sold? 8. If the Government has ever had the property cruised by competent timber cruiser? 9. If so, by whom, and when? 10. If the timber on said property was advertised for sale, and if tenders were asked for, or any opportunity afforded to other prospective buyers to bid for this timber? 11. If any other offers were received? 12. If the town of Shelburne was notified before the sale took place. If so, on what date? 13. How much timber the Government estimates to be on this property? 14. What steps the Government intends to take to compute the quantity of timber cut from this property? 15. If the Government is aware that timber is now being cut from this property by a person or firm who are cutting timber from private property adjoining said Barracks property? 16. What steps are being taken by the Government to be sure that in this case the logs are kept separate from those coming from the adjoining lot, for the purpose of having accurate count and scale? 17. If the Government will bring down a copy of all correspondence, cruisers reports and contracts in relation to the sale of this timber? Presented 12th April, 1915.—*Mr. Law*. . . . .*Not printed.*
274. Return to an Address to His Royal Highness the Governor General, of the 11th February, 1915, for a copy of all correspondence, telegrams, Orders in Council, petitions and any other documents in connection with the removal of Edward N. Higinbotham from the position of postmaster at Lethbridge, Alberta. Presented 13th April, 1915.—*Mr. Buchanan*. . . . .*Not printed.*
275. Return to an Order of the House of the 10th March, 1915, for a copy of all petitions, correspondence and other documents in connection with the dismissal of Emile Cyr, postmaster at St. Hermas, county of Two Mountains. Presented 13th April, 1915.—*Mr. Ethier*. . . . .*Not printed.*
276. Return to an Order of the House of the 7th April, 1915, for a return showing:—1. Who the mail carriers are for the rural mail in the counties of Chicoutimi and Saguenay? 2. The salary of each such mail carrier, and the trip that each has to make? 3. Who the mail carriers are for the rural mails in the parishes of St. Prime and St. Louis de Metabetchouan, and their respective salaries? Presented 13th April, 1915.—*Mr. Lapointe (Kamowaska)*. . . . .*Not printed.*
277. Return to an Order of the House of the 29th March, 1915, for a copy of all documents, letters, telegrams, testimonials, reports, etc., relating to the claim of Téléphore Paradis, of the city of Lévis, arising from the burning of his wharf and mills which were set on fire by a locomotive of the Intercolonial Railway. Presented 13th April, 1915.—*Mr. Bourassa*. . . . .*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

278. Return to an Order of the House of the 8th April, 1915, for a return showing:—1. The number of employees connected with the administration of the Three Rivers post office on the 21st September, 1911, and the annual amount paid in salaries at that date for such service. 2. The number of employees connected with the administration of the Three Rivers post office at the present date, and the amount of the annual salaries paid for such service. 3. The number of employees in the Customs Department for Three Rivers on the 21st September, 1911, and the amount of the annual salaries paid for such service. 4. The number of employees in the Customs Department for Three Rivers at the present date, and the annual amount of the salaries paid for such service. 5. The number of employees in the Inland Revenue Department for the district of Three Rivers on the 21st September, 1911, and the annual amount of salaries paid for such service. 6. The number of employees at the present date in the Inland Revenue Department for the district of Three Rivers, and the amount of the annual salaries paid for such service. 7. The number of employees, and the amount paid in salaries for the works on the St. Maurice, in the county of Champlain, during the year 1911-12. 8. The number of employees, and the amount of salaries paid per year for the works on the St. Maurice, in the county of Champlain, since 1911-12. 9. If the employees whose names follow, were dismissed on the 26th and 27th November, 1914, and the 4th and 5th January, 1915: Wildé Lavalée, Pierre Thicierge, Joseph Paquin, sr., Joseph Paquin, jr., Athanase Gélinas, clerks. 10. If so, at whose request, and for what reasons. 11. If those days were taken off the salaries of such employees. Presented 13th April, 1915.—*Mr. Bureau* . . . . .*Not printed.*
279. Return to an Order of the House of the 4th March, 1915, for a copy of all documents bearing on the removal of the salmon retaining pond from Flat Lands to New Mills, N.B., and of all reports on the operations thereof, with a detailed statement of outlay and cost of removal, installation and operation. Presented 13th April, 1915.—*Mr. Marcil* . . . . .*Not printed.*
280. Return to an Address to His Royal Highness the Governor General of the 3rd February, 1913, for a copy of all Orders in Council, letters, telegrams, reports, petitions and other papers and documents in the possession of the Department of Marine and Fisheries, or any department of the Government, relating to the granting of licenses to pack lobsters, and bearing date between 1st January, 1912, and 25th January, 1913. Presented 13th April, 1915.—*Mr. Sinclair* . . . . .*Not printed.*
281. Report of Thomas R. Ferguson, K.C., commissioner appointed to investigate into all matters relating to, or connected with, the application for (although such application may not have been granted, or may still be pending) the sale, lease, grant, exchange, or other disposition by any means whatsoever, since the first day of July, 1896, of:— (a) Dominion Lands; (b) Timber and mineral lands and mining rights and privileges, including coal, petroleum, and gas lands and rights and irrigation tracts or lands, and the cutting of timber upon Government lands; (c) Water-power and rights; (d) Indian Lands and Indian Reserves: under authority or purporting to be under the authority of the Dominion Lands Acts, and Irrigation Act, or other statutes of the Parliament of Canada, and the acts or proceedings of any person or corporation in relation to the matters foresaid. Presented by Hon. Mr. Coderre, 13th April, 1915. *Not printed.*
282. Report and evidence upon the matter known as: "Timber Berths 550½ and 528, Howard Douglas, R. E. A. Leech, D. J. McDonald, and others." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*
283. Report and evidence upon the matter known as: "The Kananaskis Coal Company, Limited, Howard Douglas, George E. Hunter, Walter Garrett, and others." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*
284. Report and evidence upon the matter known as: "Blood Indian Reserve and Frank Pedley." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*
285. Report and evidence upon the matter known as: "Southern Alberta Land Company, Limited, and Grand Forks Cattle Company, J. D. McGregor, Arthur Hitchcock, and others." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*
286. Report and evidence upon the matter known as: "The Bullfinch Company, Limited, the Honourable Frank Oliver, and the Grand Trunk Pacific Railway Company." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*
287. Report and evidence upon the matter known as: "Aylwin Irrigation Tract, E. A. Robert and J. D. McGregor." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*
288. Report and evidence upon the matter known as: "Timber Berths 1107 and 1108, W. H. Nolan, A. W. Fraser, and J. G. Turiff." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . .*Not printed.*

---

 CONTENTS OF VOLUME 28—*Continued.*

289. Report and evidence upon the matter known as: "Grazing Ranch No. 2422, J. G. Turriff, A. J. Adamson, and J. D. McGregor." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . . *Not printed.*
290. Report and evidence upon the matter known as: "Craven Dam, Walter Scott, Lieutenant-Governor Brown, and J. G. Turriff." Presented by Hon. Mr. Coderre, 13th April, 1915. . . . . *Not printed.*
291. Certified copies of Reports of the Committee of the Privy Council No. P.C. 1109 and No. P.C. 1589, approved by His Excellency the Administrator on the 10th May, 1913, and 27th June, 1913, respectively, in respect to the appointment of Thomas R. Ferguson, K.C., as commissioner to investigate and report upon all matters connected with the disposition by any means whatsoever, since the first day of July, 1896, of:—(a) Dominion Lands; (b) Timber and mineral lands and mining rights and privileges, including coal, petroleum, and gas lands and rights and irrigation tracts or lands, and the cutting of timber upon Government lands; (c) Water-power and rights. (d) Indian Lands and Indian Reserves. Presented by Sir Robert Borden, 13th April, 1915. . . . . *Not printed.*
292. Return to an Order of the House of the 11th March, 1915, for a copy of all charges, correspondence, letters, telegrams and other documents relative to the dismissal of Joseph Day, at Little Bras D'Or, in the riding of North Cape Breton and Victoria, and of the evidence taken and reports of the investigation held by H. B. Duchemin, in regard to same, with a detailed statement of expenses of such investigation. Presented 14th April, 1915.—*Mr. McKenzie*. . . . . *Not printed.*
293. A Return to an Order of the Senate, dated 30th March, 1915, for a return giving the names of the trust companies up to the present date who have complied with the requirements of Clause 69 of the Trust Companies Act, 1914, and any correspondence connected therewith.—(*Senate*) . . . . . *Not printed.*
294. Report of R. A. Pringle, K.C., commissioner appointed to investigate into charges of corruption and fraud in relation to contracts for the building of certain drill halls in the province of Ontario, together with the evidence taken at the said inquiry. Presented by Sir Robert Borden, 14th April, 1915. . . . . *Not printed.*
295. Return to an Order of the House of the 1st March, 1915:—1. For a full statement and description of all lands taken possession of by the Government for the camp at Valcartier. 2. For copies of all titles of the Government to the same, whether by expropriation, purchase or otherwise. 3. For a specified statement of all amounts claimed and still unpaid whether for land or damages. 4. For a specified account of all amounts paid up to date either for land or damages. Presented 15th April, 1915.—*Sir Wilfrid Laurier*. . . . . *Not printed.*
296. A return to an Address to His Royal Highness the Governor General:—1. A return showing all appointments to the customs in that area contained in the present constituencies of Medicine Hat and Macleod, giving names, date of appointment, how appointed and salaries, from the year 1896 to the present date. 2. Also, all vacancies by death, resignation or dismissal, giving name, date, length of service and cause of dismissal in the same area and during the same period.—(*Senate*) . . . . . *Not printed.*
297. Return to an Address to His Royal Highness the Governor General; praying that His Royal Highness will cause to be laid before the Senate copies of all letters between the Minister of Marine and Fisheries or his department and the fishery overseer at Baker Lake, in the province of New Brunswick; and also copies of all claims made by the said fishery overseer and the payments made thereon.—(*Senate*) . . . . . *Not printed.*

## INTRODUCTION.

FOREWORD.....	PAGE. v
<b>Farm Lands—</b>	
Total land areas occupied and estimated areas possible of occupation as farm lands, in Canada, at date of the Census, June, 1911.....	vii
Total land area and land in farms by provinces 1911 and 1901.....	viii
Population, farms, farm lands and farm property of Canada, 1911 and 1901.....	ix
Farm holdings, 1891-1911.....	x
Per cent distribution of farm holdings, 1891-1911.....	xi
Tenure of farm lands, 1891-1911.....	xii
Comparative areas of farm lands by provinces in 1911 and 1901, together with increases made in ten years.....	xiv
Per cent distribution of farm lands by provinces, 1911 and 1901.....	xv
Average size of farms and average acreage of improved land per farm 1911 and 1901.....	xvi
<b>Farm Property—</b>	
Value of farm property, by provinces, 1911 and 1901.....	xviii
Average value of farm property per farm holding by provinces, 1911 and 1901.....	xix
Per cent proportion of the value of farm property belonging to each province, 1911 and 1901.....	xx
Per cent distribution of the value of farm property according to classes by provinces, 1911 and 1901.....	xxi
<b>Orchards and Gardens—</b>	
Orchard and Garden areas for all Canada, 1891-1911.....	xxi
Land in orchards, small fruits and vegetables compared by provinces, 1891-1911.....	xxii
Fruit trees bearing and non-bearing together with average number per farm and per 100 acres of improved land, 1911 and 1901.....	xxiii
Fruit production for all Canada together with the average production per farm and per 100 acres of improved land, 1890-1910.....	xxiv
Orchard trees in 1901 and 1911 and fruit in 1890, 1900 and 1910 compared by provinces.....	xxv
Value of fruits and vegetables separately in 1910 and compared by totals in 1910 and 1900, together with the per cent of increase in ten years.....	xxvi
Per cent proportion which the value of orchard fruits, of small fruits and of vegetables forms of the aggregate value of fruit and vegetables, by provinces in 1910.....	xxvii
Quantity and value of fruit exported for the years ended June 30, 1891, 1901 and 1911.....	xxviii
Quantity and value of fruit imported for the years ended June 30, 1891, 1901 and 1911.....	xxviii
<b>Field crops—</b>	
Comparative area of field crops, by provinces 1890, 1900, 1910 and 1911.....	xxix
Vacant farms in eastern Canada, Census 1911.....	xxx
Per cent distribution of acreage under field crops by provinces 1890, 1900 and 1910.....	xxx
Comparative statement showing increases or decreases in the acreage of field crops for all Canada from 1890 to 1900 and from 1900 to 1910.....	xxxi
Comparative statistics of areas of field crops by provinces, 1890, 1900, 1910 and 1911.....	xxxiv-xxxvii
Average acres of specified field crops per farm holding in 1910 and 1900.....	xxxix
Average acres of specified field crops per 100 acres improved land by provinces, 1911 and 1901.....	xl
Percentage which the area under specified crops forms of the total area of improved land and also the percentage of the total acreage under field crops possessed by each crop, by decades.....	xli xliii
Comparative statement of yields of grain crops, 1889-1910.....	xlv
Comparative statement of yields of hay, potatoes, root and other crops, 1880-1910.....	xlvi
Area and production of field crops for all Canada, 1890, 1900 and 1910.....	xlix
Average production of field crops per acre under such crops for all Canada, 1890-1910.....	l
Comparative statistics of yields per acre of grain crops, by provinces, 1890-1910.....	l
Average production per farm of principal crops, by provinces, 1910 and 1900.....	li
Total value of field crops together with their average value per farm, by provinces, in 1910 and 1900.....	lii
Value of field crops by specified kinds, 1910.....	liii
Per cent proportion of the total value of all field crops represented by specified crop groups, 1910.....	liv
Unit value of field crops by provinces in 1910.....	lv
Per cent distribution of the value of field crops, together with their average value per acre of land under such crops, 1910 and 1900.....	lv
Principal crops classified according to value of production, by provinces, 1910.....	lvi
Quantity and value of field crops exported in 1891, 1901 and 1911 being the production of the census years 1890, 1900 and 1910.....	lvii
<b>Rent and Labour—</b>	
Rent of agricultural lands by provinces in 1911 and 1901.....	lviii
Farm labour and wages by provinces, 1911 and 1901.....	lv
<b>Live Stock on farms—</b>	
Summary of the number and value of live stock in Canada as a whole, 1911 and 1901.....	lxi
Number of horses, all ages, by provinces, 1911 and 1901.....	lxii
Per cent distribution of horses, by provinces and average number per 100 acres improved land, 1911 and 1901.....	lxii
Value of horses by provinces, 1911 and 1901.....	lxiii
Average value per head of horses together with the average number per farm by provinces, 1911 and 1901.....	lxiii
Number of milch cows by provinces, 1911 and 1901.....	lxiii
Value of milch cows by provinces, 1911 and 1901.....	lxiv
Average value per head of milch cows, together with the average number per farm by provinces in 1911 and 1901.....	lxv
Per cent distribution of milch cows and average number per 100 acres of improved land, by provinces, 1911 and 1901.....	lxvi
Number of horned cattle, other than milch cows, by provinces, 1911 and 1901.....	lxvi
Value of horned cattle, other than milch cows, by provinces, 1911 and 1901.....	lxviii
Average value per head of horned cattle, other than milch cows, together with the average number per farm, 1911 and 1901.....	lxviii
Per cent distribution of horned cattle, other than milch cows, and the average number per 100 acres of improved land, by provinces, 1911 and 1901.....	lxix
Number of sheep by provinces, 1911 and 1901.....	lxx
Value of sheep by provinces, 1911 and 1901.....	lxx
Average value of sheep, together with the average number per farm by provinces, 1911 and 1901.....	lxxi

	PAGE.
Per cent distribution of sheep and the average number per 100 acres of improved land, by provinces, in 1911 and 1901.....	lxxi
Number of swine in Canada, by provinces, 1911 and 1901.....	lxxii
Value of swine by provinces, 1911 and 1901.....	lxxii
Average value per head of swine, together with the average number per farm, by provinces, 1911 and 1901.....	lxxiii
Per cent distribution of swine and the average number per 100 acres of improved land, by provinces, 1911 and 1901.....	lxxiv
Number of poultry by provinces, 1911 and 1901.....	lxxiv
Poultry according to kinds by provinces, 1911 and 1901.....	lxxv
Per cent distribution of poultry and the average number per 100 acres of improved land, by provinces, 1911 and 1901.....	lxxvi
Value of poultry by provinces, 1911 and 1901.....	lxxvi
Average value per head of poultry, together with the average number per farm, by provinces, 1911 and 1901.....	lxxvii
Exports of domestic animals by decades 1881-1910, and separately for the years 1909 and 1910.....	lxxviii
Pure-bred animals on farms by provinces, 1911 and 1901.....	lxxix
Average value per head of animals on farms, June 1911, and of animals sold in 1910 compared.....	lxxx
<b>Live stock sold—</b>	
Horses sold in 1910. Proportion which they form of horses on farms, together with the per cent distribution of sales by provinces.....	lxxxi
Cattle, all kinds, sold in 1910. Proportion which they form of cattle on farms, together with the per cent distribution of sales by provinces.....	lxxxii
Milch cows sold in 1910. Proportion which they form of milch cows on farm, together with the per cent distribution of sales, by provinces.....	lxxxiii
Sheep sold in 1910. Proportion which they form of sheep on farms, together with the per cent distribution of sales by provinces.....	lxxxiii
Swine sold in 1910. Proportion which they form of all swine on farms, together with the per cent distribution of sales, by provinces.....	lxxxiv
Revenue from poultry, by provinces in 1910.....	lxxxv
Comparative statement of the aggregate value of all domestic animals, sold or slaughtered, 1910 and 1900.....	lxxxv
<b>Exports and Imports of Animal products—</b>	
Production, exports, imports and consumption of Eggs, 1910 and 1900.....	lxxxvi
Quantity and value of animal products exported, 1891, 1901 and 1911.....	lxxxvii
<b>Dairying—</b>	
Comparative statistics of the Dairy Industry showing production, exports, imports and consumption, for all Canada, in the census years 1911 and 1901.....	lxxxviii
Comparative statement of Butter and Cheese production in Canada, 1910 and 1900.....	lxxxix
Dairy production, by provinces, in 1910.....	xc
Value of Dairy products by provinces together with the average value of product per cow, 1910 and 1900.....	xci
<b>General summary—</b>	
Comparative statement of the total value of all farm property, of land products, of animals sold or slaughtered and of animal products in 1910 and 1900 together with the increase made in the decade	xcii-xciii
Non-productive areas in the Northwest provinces in the harvest year 1910.....	xcvi
Per cent return on investment in farm property which the gross value of land products, animals sold and animal products represent by provinces, 1910 and 1900.....	xcv
DIAGRAMS ILLUSTRATING THE PRODUCTION OF GRAINS BY DECADES.....	facing xliiv

## GENERAL TABLES.

Table I. Farm Holdings.....	2-45
Table II. Land occupied according to Tenure and Condition.....	46-133
Table III. Grain crops, 1910.....	134-221
Table IV. Hay, Potatoes, Roots, etc., 1910.....	222-309
Table V. Fruit trees and fruit.....	310-327
Table VI. Field crops, Harvest Year 1911.....	328-337
Table VII. Live Stock on farms, 1911.....	338-347
Table VIII. Live Stock sold and Animal products, 1910.....	348-357
Table IX. Values of Lands, Buildings, Implements and Grain crops.....	358-367
Table X. Values of fruit, fodders, hoed crops and labour on farms, 1910.....	368-377
Table XI. Values of Dairy products, wool and eggs, 1910.....	378-381
Table XII. Values of Live Stock in 1911 and of Animals sold or slaughtered in 1910.....	382-389
Table XIII. Summary of Land occupied according to Tenure and Condition.....	390-391
Table XIV. Summary of Grain Crops, 1910.....	390-391
Table XV. Summary of Hay, Potatoes, Roots, etc., 1910.....	392-393
Table XVI. Summary of Fruit trees and Fruit.....	392-395
Table XVII. Summary of Field Crops, Harvest Year, 1911.....	394-395
Table XVIII. Summary of Live Stock on Farms, 1911.....	396-397
Table XIX. Summary of Live Stock sold and Animal products, 1910.....	396-397
Table XX. Summary of values of Lands, Buildings, Implements and Grain Crops.....	398-399
Table XXI. Summary of values of Fruit, Fodders, Hoed Crops and Labour on farms, 1910.....	398-399
Table XXII. Summary of values of Live Stock in 1911 and Animals sold or slaughtered in 1910.....	400-401
Table XXIII. Summary of values of Dairy Products, Wool and Eggs, 1910.....	400-401
Table XXIV. Summary of Farm Holdings.....	401
Table XXV. Field Crops by Areas, Products and Averages, 1910, 1900.....	402-407
Table XXVI. Comparative Statement of Areas in principal Field Crops, 1890-1910.....	408
Table XXVII. Comparative Statement of yields of principal Grain Crops, 1880-1910.....	409
Table XXVIII. Number of Farm Animals, 1891-1911.....	410
Table XXIX. Average number of Farm Animals per farm holding, 1891-1911.....	411
Table XXX. Number of Live Stock per 100 acres improved land 1911, 1901.....	412

# FIFTH CENSUS OF CANADA 1911.

## INTRODUCTION.

### VOLUME IV.

This volume of the Fifth Census of Canada deals with the statistics of the agricultural industries of the Dominion. These statistics relate to areas of farms, production of field crops, fruits, animals and animal products, labour and wages. Separate bulletins were issued, as soon as the results were tabulated, giving the agricultural statistics of each province. These bulletins contained all the principal information relative to the agricultural industry in each province and afforded sufficient data to mark the progress made in farming during the ten years, 1901 to 1911.

The records of area and production of field crops for Ontario, Quebec, New Brunswick and Prince Edward Island are given by townships and parishes. For the other provinces they are, for various reasons, given only by electoral districts. In Nova Scotia, excepting in a few instances, the whole county forms one municipality, there being no townships or parishes legally so defined. In Manitoba, Saskatchewan and Alberta, the geographical township containing, usually 23,040 acres, is too small a unit for which to publish, in detail, the various tables of statistics of agriculture.

Statistics of farm property, farm holdings, land owned, land leased or rented, land improved and unimproved refer to the date of the Census, June 1, 1911. Those pertaining to yield of crops and animal production refer to the year 1910. According to the Manual of Instructions (see appendix pages 419-428) the enumerators were to take account only of such lands as were used for the production of crops and the feeding of animals. "Improved land" was defined as "land which has been brought under cultivation and has been cropped and is fitted for producing crops." In previous censuses no clear definition was given of the term "improved land" and the result was, that under this heading were included non-tillable areas used as pasture. In this census the acreages of arable lands only were enumerated as improved land. Owing to this restriction in definition the records of this census, for the older provinces particularly, are not strictly comparable with those of previous censuses.

The Census of 1911 was taken as of the date of June 1 whereas previous censuses were taken as of the date March 31. This change of date enabled the Census Office to collect statistics of areas, under the various field crops for the harvest year 1911, at a time when the results of recently finished farming operations were fresh in the minds of the farmers. It is therefore believed

that the statistics relating to the number of farms, tenure, condition, area of improved and unimproved land, the acres planted in the spring of 1911 and all other statistics which pertain to the status of the agricultural industry at the date of the census, June 1, 1911, are as nearly accurate, as it is possible to procure such data. The same accuracy cannot be claimed for the statistics of agriculture for the year 1910 which were collected in June of 1911, as can be for the statistics which pertain to the date of the census, because the longer the time intervening between the performance of the act and the making of a record thereof, the more liable are mental lapses to play a part.

The statistics of area and production of the principal crops in 1910 are no doubt reasonably accurate, as the preparation of the data for 1911, which were for recent operations, would aid the farmer in giving a very close figure of the acreage and production of the crops of the previous year.

The statistics relating to most of the minor crops, such as fruits, vegetables and seeds, and of animal products, such as meats and dairy products are doubtless much lower than the actual figures would show. Farmers, generally speaking, do not keep books and have no definite system of accounts and as a consequence are apt either to ignore altogether or greatly underestimate the quantities of vegetables, fruit, milk, cream, butter, cheese, eggs and honey consumed on the farm during the seasons when these are produced in greatest abundance.

As regards the census of live stock, it is believed a truer report on the standing of this industry, has been procured by making the enumeration in the month of June, when animals were at their maximum, as regards condition and numbers, than at the end of March when such is not the case. However, in comparing the numbers and values of live stock for the census years 1911 and 1901, it should be borne in mind that a greater number of young animals are included in the returns of the last census than there were in the previous one, and that consequently the average price per head in 1911 is thereby lowered.

While the hindrances in the way of procuring absolutely accurate records of agriculture, which have been referred to in the previous paragraphs, can be to a great extent overcome and the inaccuracies which would result from a lack of appreciation of these factors prevented, yet there remains to be overcome the evident lack of appreciation on the part, not only of some of the persons from whom the information is to be obtained, but too often on the part of some of the enumerators themselves, of the importance of an accurate census. They fail to realize that the figures of the census are the only means of accurately determining the relative and comparative importance of any industry and its economic value in the national fabric.

In the text discussion and Tables of the Introduction, wherever possible, the statistics of the Census of 1911 are presented in comparison with those of former censuses. In this way, it is hoped to convey a clearer idea (1) of the increases in farm land areas, crops, animals and animal products from one decade to another, (2) to forecast the trend and momentum of future agricultural operations and (3) to properly comprehend the westward movement in agricultural production from census year to census year. For example Table 25 shows how the per cent proportion of the distribution of crop areas has steadily

decreased in eastern Canada and increased correspondingly in the western provinces. Similar westward movement in the proportion of the number of farm animals and animal products is exhibited by Tables VII and VIII. It is not intended that the text should be an exhaustive analysis of the various agricultural industries.

The total land area of the Dominion is placed at 2,306,502,153 acres, of which, at the date of the census, the nine provinces occupied 977,585,513 acres. The remaining area (1911) consists of the Yukon (132,113,360 acres) and the Northwest territories (1,196,803,280 acres). The areas of the Yukon and the Northwest territories are not taken into account in the calculations of the tables in this volume, because no appreciable extent of land in them is likely to be devoted to agriculture; before all the land within the provinces has been occupied.

According to calculations made by the Census and Statistics Office in 1909 and revised recently, the following table shows, for 1911, the areas occupied and an estimate of areas possible of occupation as farm lands in the Dominion. The estimates of land capable of future occupation are based partly upon the amount of farm land occupied at the date of the census, 1911, and partly upon a percentage of the total area, fixed arbitrarily, but having reference to the more or less definitely ascertained facts, as to the character of the lands in each province and the increases both in land occupied as farms and of the area of improved land.

TABLE 1. TOTAL LAND AREAS OCCUPIED, AND ESTIMATED AREAS POSSIBLE OF OCCUPATION, AS FARM LANDS, IN CANADA AT THE DATE OF THE CENSUS, JUNE, 1911.

Provinces	Total land	Occupied as farm land		Estimate of possible farm land	
	acres	acres	per cent of total	acres	per cent of total
British Columbia.....	226,186,370	2,540,011	1.12	22,618,000	10
Alberta.....	161,872,000	17,751,899	10.97	97,123,000	60
Saskatchewan.....	155,764,100	28,642,985	18.39	93,458,000	60
Manitoba.....	41,169,098	12,238,233	29.70	24,700,000	60
Ontario.....	141,125,330	22,171,785	15.71	56,450,000	40
Quebec.....	218,723,687	15,613,267	7.14	43,745,000	20
New Brunswick.....	17,863,266	4,537,999	25.40	10,718,000	60
Nova Scotia.....	13,483,671	5,260,455	39.01	8,092,000	60
Prince Edward Island.....	1,397,991	1,202,354	86.01	1,258,190	90
<b>Totals.....</b>	<b>977,585,513</b>	<b>109,948,988</b>	<b>11.25</b>	<b>358,162,190</b>	<b>36</b>

According to the figures of the foregoing table, the total land area of the nine provinces was 977,585,513 acres of which 109,948,988 acres or 11.25 per cent was occupied as farm lands. The estimate of possible farm land within the provinces, as constituted at the date of the census, was 358,162,190 acres or 36 per cent of the total land area, contained within provincial boundaries.

The land area of the nine provinces of the Dominion was increased from 977,585,513 acres to 1,401,316,413 acres as a result of the Extension of Boundaries Acts, 1912, which detached from the Northwest territories 423,730,900 acres, of which 223,429,600 acres were added to Quebec, 93,037,700 acres to Ontario and 107,263,600 acres to Manitoba.

Of the total land area of the nine provinces 63,422,338 acres or 6.49 per cent were occupied as farm lands in 1901, as against 109,948,988 acres or 11.25 per cent in 1911; this is an increase for the Dominion of 73.36 per cent or 46,526,650 acres in ten years. From 1901 to 1911, Saskatchewan increased its area of occupied farm land by 24,809,551 acres or 647.18 per cent, Alberta by 15,016,269 acres or 548.91 per cent, British Columbia by 1,042,592 acres or 69.63 per cent, Manitoba by 3,384,886 acres or 38.28 per cent. Of the Eastern provinces Quebec made the greatest gain, having increased its occupied farm land area by 1,169,092 acres, or 8.09 per cent, Ontario showed an increase of 822,261 acres or 3.85 per cent, Nova Scotia of 179,554 acres or 3.53 per cent, New Brunswick of 94,599 acres or 2.13 per cent and Prince Edward Island of 7,846 acres or about three-fifths of 1 per cent.

TABLE 2. TOTAL LAND AREA AND LAND IN FARMS, BY PROVINCES 1911 AND 1901.

Provinces	Total land area	LAND IN FARMS		INCREASE, IN 10 YEARS, OF FARM LANDS	
		1911	1901	Amount	Per cent
	acres	acres	acres	acres	p.c.

Yukon.....	132,113,360	-	-	-	-
Northwest Territories.....	1,196,803,280	-	-	-	-
<b>Total, Canada.....</b>	<b>2,306,592,153</b>	<b>109,948,988</b>	<b>63,422,338</b>	<b>46,526,650</b>	<b>73.36</b>

Table 3 summarizes for the Dominion the principal facts with regard to urban and rural population, farms, farm lands and farm property for the years 1901 (March 31) and 1911 (June 1).

From 1901 to 1911 the rural population increased by 17.20 per cent and the urban by 62.29 per cent, making a net increase for the Dominion of 34.17 per cent during the decade. In 1901, 62 persons in every 100 of the total population lived on the land, as against 54 persons in every 100 in 1911. It is a significant fact, that the per cent increase in the number of farms from 1901 to 1911 very nearly kept pace with the ratio of increase in population during the same period, falling only 2.97 per cent behind. While the increase per cent in the number of farms did not quite equal that of population, yet the increase per cent in area of farm lands and in the acreage under all crops are greater than the proportion of increase in the total population. The growth in the acreage of farm lands was 73.36 per cent and of land under all crops 78.41 per cent. In 1911 there was an average of 6.76 acres of improved land for every person in Canada, as against 5.61 acres in 1901. The average number of acres per person, of land under all crops, rose from 3.68 acres in 1901 to

4.89 acres in 1911. In other words, it means that the increase in acreage devoted to the production of crops in 1911 over 1901, enhanced the purchasing power of the whole community by nearly 33 per cent.

The farm holdings of the Dominion in 1911 numbered 714,646 and contained 109,948,988 acres, of which 48,733,823 acres were improved and of the remaining 61,215,165 acres, 17,477,526 acres were in natural forest, 4,174,270 acres in marsh and waste land and the balance in unbroken prairie or land cut over and being prepared for the plough.

Live stock on farms.....\$	12.95	9.12	3.83	42.00

The total value of all farm property (land owned, buildings, implements and live stock) reached the enormous figure of \$4,231,840,636 in 1911. Of this vast total, the value of land represented \$2,519,777,901 or 59.55 per cent, of buildings \$823,951,767 or 19.47 per cent, of farm implements \$257,007,548 or 6.07 per cent and of live stock \$631,103,420 or 14.91 per cent. In 1901 the total value of all farm property was \$1,787,102,630, of which the value of land was 56.36 per cent, of buildings 22.15 per cent, of implements 6.08 per cent and of live stock 15.41 per cent.

The value of all classes of farm property more than doubled from 1901 to 1911. The ratio of increase in the value of land during the decade was 150.12 per cent, of buildings 108.17 per cent, of implements 136.51 per cent, and of

live stock 129.35 per cent, with an aggregate for all farm property of 136.79 per cent. Of the total increase of \$2,444,738,006 during the decade, in the value of farm property, land contributed 61.86 per cent, buildings 17.51 per cent, implements 6.07 per cent and live stock 14.56 per cent.

The average value per holding of farm property increased from 1901 to 1911 by 80.48 per cent. The gain in the value of land was 90.63 per cent, of buildings 58.66 per cent, of implements 80.27 per cent and of live stock 74.81 per cent. The average value per acre of improved land in 1911 was \$16.90 for buildings, \$5.27 for implements and \$12.95 for live stock, as compared with \$13.12 for buildings, \$3.60 for implements and \$9.12 for live stock in 1901. These gains in the value of farm property, while no doubt in some measure due to greater cost of production and of materials, have been fairly well justified by the increase in the average size per farm from 116.44 acres in 1901 to 153.85 acres in 1911. For details by provinces see Table 10, page xviii.

In Table 4 the number of occupiers of farm holdings in 1891, 1901 and 1911 are classified according to the number of acres in each farm, that is to

TABLE 4. FARM HOLDINGS, 1891-1911.

say farm holdings of certain sizes are grouped together and considered under a general head. For example, all farms having 5, 6, 7, 8, 9, or 10 acres are classified as "5 to 10 acres" and similarly for the other groups. In the Census of 1891 all holdings of 10 acres and under were grouped together.

From 1901 to 1911, in the eastern provinces, there was a total decrease of 6,423 in the number of lots of less than one acre and in the western provinces a total increase of 2,949, with a net decrease for Canada as a whole of 3,474 in the number of farm holdings of less than one acre. Generally speaking fewer small areas were recorded in 1911 than in 1901, as in the last census enumerators were only paid for the enumeration of a small area when it produced a crop worth at least \$50. The growth of urban centres and the consequent absorption of suburban communities within city or town limits have also contributed to the falling off in the number of farm holdings of this size in eastern Canada. The increase in the number of small holdings in the western provinces has no particular significance as the cities and towns of the West were in many instances not staked in 1901.

Table 5 gives for all Canada and for each of the provinces the per cent

distribution of farm holdings by classes. The table gives the per cent number of farms in each size group in 1891, 1901 and 1911. As previously noted, the records for holdings of 10 acres and under were not presented separately in 1891, therefore no comparisons can be made in the group "5 to 10 acres" between the records of 1891 and those of subsequent censuses. For all Canada, in the two groups of farms "101 to 200 acres" and "201 acres and over," there has been a steady increase in the relative standing. In 1891 about 85 farms in every 1,000 had an acreage of over 200 acres, as compared with 119 in 1901 and 186 in 1911. In the Maritime provinces, Quebec and Ontario the relative proportion of the size of farm holdings as between each census period presents no great changes. In 1911, 44.80 per cent of all farm holdings in Manitoba, 47.27 per cent in Saskatchewan and 39.06 per cent in Alberta contained more than 200 acres each. Farms of from 101 to 200 acres predominate in the western provinces while those of from 51 to 100 acres hold first place in Ontario, Quebec and the Maritime provinces.

Table 6 gives comparative statistics concerning the tenure under which

farms are occupied, that is to say, whether the occupier is owner, tenant, or whether he owns part and rents part of the land occupied by him.

The increase in the total number of occupiers in the ten years was 169,958. Of this large increase, the new provinces of Alberta and Saskatchewan contributed 134,770 or more than 79 per cent and if the figures for Manitoba and British Columbia be included, it will be seen that 94 per cent of the total increase is accounted for west of the Great Lakes. Of the eastern provinces, Nova Scotia is the only one which shows a decrease in the total number of occupiers and has occurred mainly in the case of owners. In 1891 the total number of occupiers reported for Nova Scotia was 64,643, in 1901 the number had fallen to 56,033 and in 1911 to 53,634. The statistics of the number of vacant farms in Table 24 page xxx explain to some extent the decrease in the number of farm holdings in Nova Scotia and the small increases in the other eastern provinces.

For all Canada, owners constituted 84.58 per cent of all occupiers in 1891, 87.10 per cent in 1901 and 88.60 per cent in 1911. In Prince Edward Island and Nova Scotia more than 95 per cent of all farms were operated by owners, 94.55 per cent in New Brunswick, 92.28 per cent in Quebec, 92.05 per cent in Alberta, 90.74 per cent in Saskatchewan, 85.81 per cent in British Columbia and less than 85 per cent in Ontario and Manitoba were occupied by owners in the last census. The increase in the number of the class of occupiers designated as "owners and tenants," in the Northwest provinces, is indicative of a growth in the class of annual tenants or croppers, or as they are sometimes termed "share farmers."

Table 7 gives the total acreage of farm land occupied for agricultural purposes in the Dominion, as a whole, and in each of the provinces in 1901 and 1911 and the quantity of it owned, leased or rented, improved or unimproved, in forest, marsh or waste land, together with the increase made in the decade in each class. For all Canada, the acreage of "improved land" has not kept pace with the increase in the quantity of land alienated for agricultural purposes. The increase made from 1901 to 1911 in the area of farm lands, was  $2\frac{1}{2}$  times greater than that made in the acreage of improved land. In 1911, 44.32 per cent of all land occupied was improved as compared with 47.56 per cent in 1901.

Of the total of 46,526,650 acres added to the area of "occupied farm land," during the decade, the western provinces contributed 44,253,298 acres or more than 95 per cent of the total, Saskatchewan, alone, accounted for over 53 per cent of the increase or with its sister province of Alberta 39,825,820 acres or  $85\frac{1}{2}$  per cent. In Saskatchewan and Alberta the average annual increase in the area of occupied farm land was 3,982,582 acres, this means, that if each occupier was allowed only a quarter section of land (160 acres) and the yearly additions level, that the average annual increase of occupiers would have been 24,981 or a total for the ten years of 248,912; whereas in fact, the total increase in the number of occupiers in the two provinces from 1901 to 1911 aggregated only 134,770, and the average size per holding of lands, alienated whether by homesteading or purchase, was 293 acres. A reference to Table 4, page x, will show that holdings of over 200 acres were twelve times as numerous in Alberta and nine times in Saskatchewan in 1911 as they were in 1901. The number of farms of over 200 acres increased, in the Dominion, from 1901 to

1911 by 68,276, of which all but 1,240 were in the Prairie provinces. The tendency, in the west, to occupy large areas is due, no doubt, principally to the almost exclusive devotion of the land to grain-growing and the demand for large returns to meet the necessarily, heavy initial expenses.

TABLE 7. COMPARATIVE AREAS OF FARM LANDS BY PROVINCES IN 1911 AND 1901 TOGETHER WITH INCREASES MADE IN TEN YEARS.

Increase per cent.	.65	—0.9	26.85	5.90	—7.47	—12.49	—

NOTE.—The minus sign (—) denotes a decrease.

From 1901 to 1911 the percentage of increase in the acreage of lands rented was much greater than the increase in the acreage of lands owned. In British Columbia, there was a ten year gain in the former of 60.80 per cent and in the latter of 123.96 per cent, in Saskatchewan of 609.02 per cent and 1,570.44 per cent and in Manitoba of 27.99 per cent for the former and 146.12 per cent for the latter. In Ontario, Quebec and New Brunswick the acreage of land operated by tenants was less in 1911 than in 1901. Nova Scotia and Prince Edward Island show increases in areas of rented farms.

The wood lots on farms in Ontario, Quebec, New Brunswick and Prince Edward Island are given a smaller area in 1911 than in 1901. The increases shown for Manitoba, Saskatchewan and Alberta are in the northern sections.

Table 8 gives a comparative statement of the per cent distribution of farm lands by provinces in 1901 and 1911. In 1901, of the total land area of the nine provinces, 6.49 per cent was occupied as farm land, as compared with 11.25 per cent of the same aggregate area in 1911. The proportion per cent of improved land, for reasons already given on page v, has fallen from 47.56 per cent of the total area in 1901 to 44.32 per cent in 1911.

In Prince Edward Island 86.01 per cent of its total land area was occupied as farms, in Nova Scotia 39.01 per cent, in Manitoba 29.70 per cent, in New Brunswick 25.40 per cent, in Saskatchewan 18.39 per cent, in Ontario 15.71

per cent, in Alberta 10·97 per cent, in Quebec 7·14 per cent and in British Columbia 1·12 per cent of the total land area was occupied for agricultural purposes.

The per cent proportion of natural forest on farms is less in 1911, than it was in 1901 for all provinces except Manitoba and British Columbia, but as the areas of marsh and waste land were not enumerated separately in 1901, it may account for the decrease in the proportion per cent of the extent of the farm wood-lot.

The average size of farms and the average acreage of improved land per farm in 1911 and 1901 are given in Table 9. For all Canada, the average size per farm rose during the decade from 116·44 acres to 153·85 acres, being an

NOTE—The minus sign (-) denotes a decrease.

increase of 37·41 acres in the ten years. The average size of farms is smaller in eastern Canada than in the western provinces. The high averages for the Prairie provinces are due to the fact that most of the farms were acquired under the homestead laws, which permitted to each adult male settler 160 acres at least; in this way, often several quarter-sections were held in the same family. Of the eastern provinces, New Brunswick has the largest average sized farms (118·76 acres). The smallest farms are in Prince Edward Island, where they average 83·68 acres. While the average size of farms in the country as a whole increased by 37·41 acres or 32·13 per cent between 1901 and 1911, the provinces of Prince Edward Island, Manitoba and British Columbia show decreases. In Prince Edward Island the average size of farms fell from 85·24 acres to 83·68 acres; in Manitoba from 272·14 acres to 268·13 acres; in British Columbia from 222·20 acres to 137·54 acres during the decade. The explanation for this heavy decrease in British Columbia, may be found in the increase in the number of small holdings from 1901 to 1911, and in the development of the fruit industry and market gardening. In 1911 nearly 60 per cent of all

farm holdings in British Columbia contained less than 51 acres—38.72 per cent of all farms being of 10 acres or less. In 1901 only 31 per cent of all holdings contained less than 51 acres—20 per cent of all farms having 10 acres or less.

The average acreage of improved land per farm, furnishes a better basis for comparisons of the true size of a farm than the average acreage of occupied land. As to the acreage of improved land the Prairie provinces again lead, Manitoba coming first with 147.92 acres, followed by Saskatchewan with 123.19 acres and Alberta with 70.76 acres brought under cultivation. The smallest average acreages of improved land were in Nova Scotia (23.44 acres) and New Brunswick (37.81 acres). The largest absolute and per cent increase in the decade was made in Saskatchewan with 40.72 acres per farm or 49.38 per cent, British Columbia shows a decrease of 44.42 acres per farm or 63.20 per cent. For Canada as a whole the average acreage of improved land per farm increased from 55.38 acres in 1901 to 68.19 acres in 1911.

Table 10 gives the value of all farm property, by provinces, in 1911 and 1901, together with the total and per cent increase in the ten years. The greatest advance, in the value of all farm property during the decade, was made by the province of Saskatchewan with a gain for the ten years of 1,773.14 per cent, followed by Alberta with a gain of 1,319.71 per cent, British Columbia with 463.23 per cent and Manitoba with 206.06 per cent. In the eastern provinces, the ratio of increase ranged from 31 per cent in Ontario to 81 per cent in Quebec. Saskatchewan also shows the greatest proportion of increase from 1901 to 1911 in the value of buildings, implements and live stock, and in the value of land is surpassed only by Alberta. Quebec, of the older provinces, shows the greatest percentage of increase in the value of all classes of farm property during the decade.

The abnormal increase in the value of all classes of farm property from 1901 to 1911, in the western provinces as compared with the eastern, is due in a large measure to the increase of 159,609 new homesteads. Every new homestead established, means extensive initial outlay for buildings, implements and animals, and as regards the increase in the value of land occupied for agricultural purposes, some of it, no doubt, is the result of improvement and development, but by far the greater proportion represents the value of lands procured free of cost from the state. In other words the value only became active and tabulatable when the land was assigned in plots to particular persons. The rapidity with which the alienation of land has proceeded in the western provinces is shown by the fact, that in the Census of 1901 Alberta had 640 occupied townships and Saskatchewan 855 as against 2,056 for the former and 2,874 for the latter in 1911. Table 7 shows that over 95 per cent of the increase in the acreage of farm lands from 1901 to 1911 occurred in the West.

The improvement shown in the value of all classes of farm property in Ontario, Quebec and the Maritime provinces is but slightly affected by newly occupied farm lands or by first outlays for buildings, farm implements or live stock. It is therefore safe to assume, that for eastern Canada, these increases are due principally to higher prices of building materials, implements and farm animals and do not represent as largely as they do for the West, correspondingly great additions to physical property.

Increase per cent.	37.74	27.86	47.39	36.17	53.63

The value of all farm property per holding, according to Table 11, rose from \$3,280.97 to \$5,921.57 from 1901 to 1911, being a gain per farm of over 80 per cent. The average value per farm of each class of farm property made marked increases during the decade. The value of land increased from \$1,849.61 per farm in 1901 to \$3,525.91 in 1911, of buildings from \$726.68 per farm to \$1,152.95, of implements from \$199.50 to \$359.63 and of live stock from \$505.19 per farm to \$883.10.

The increase per cent in the value of land and buildings per farm from 1901 to 1911, for reasons which have been already referred to, was greater in the western provinces than in the eastern. British Columbia, Ontario, Manitoba

and Quebec, in the order named, have the greatest average value per farm of buildings in 1911. In the value of farm implements in the last census, the first place is captured by Manitoba with an average value per farm of \$612.99,

Note—The minus sign (−) denotes a decrease.

followed by Saskatchewan with an average of \$597.04 per farm. Nova Scotia and New Brunswick give the lowest values, per farm, of implements being \$85.37 for the former and \$159.82 for the latter. Alberta and British Columbia show

decreases in the average value per farm of live stock; in both provinces the numbers of animals are greater and the price per animal higher in 1911 than in 1901, therefore what has occurred is, that the numbers of holdings (see Table 4 page x) have grown faster than the increase in live stock. The passing of the ranch also has had a deterrent influence on stock raising.

Table 12 needs little explanation. The figures in each column are to be read vertically. The total value, for all Canada, of each class of farm property is represented by 100. The proportion of the total, which each province gave, is indicated by the percentages, the totals of which add up to 100. For example, of the total value of land in 1911, British Columbia provided 5.61 per cent, Alberta 13.68 per cent, Saskatchewan 23.15 per cent, Manitoba 12.30 per cent, Ontario 24.28 per cent, Quebec 16.83 per cent, New Brunswick 1.31 per cent, Nova Scotia 2.07 per cent and Prince Edward Island .77 per cent of the total value of farm land. The figures for the other items are to be similarly read.

The increase in the per cent proportion of the value of all farm property in the western provinces has been one of the most striking features in the material development of the country during the decade, the per cent ratio of all farm property having increased from 14.77 per cent to 46.73 per cent. The proportion of land values advanced from 15.92 per cent to 54.74 per cent; of buildings from 8.54 per cent to 25.33 per cent; of implements from 17.87 per cent to 43.98 per cent; of live stock from 21.95 per cent to 43.72 per cent of the total value.

The statistics in Table 13, which give for 1911 and 1901 a comparative statement of the per cent distribution of the value of farm property, by provinces, according to classes, are to be read horizontally, the sums of them constituting the share per cent of each province in the total value of all farm property in Canada. Table 12 gives the share per cent of the total value of farm property which each province contributed, while Table 13 gives in detail the ratio which the separate values of land, buildings, implements or live stock bear to the total. For example, British Columbia's share per cent in the total value of all farm property in 1911 (Table 12, 4.46 per cent) was divided among the

different classes of farm property, as follows, land 3.34 per cent, buildings .70 per cent, implements .08 per cent and live stock .34 per cent. Similarly for the other provinces, the totals of the different classes of farm property, constitute the share per cent of each province in the total value.

## ORCHARDS AND GARDENS

Table 14 presents comparative statistics, for all Canada, of areas devoted to the production of fruits and vegetables in 1891, 1901 and 1911. From 1891 to 1901 there was a decrease of 25,265 acres in the area of orchards and nurseries, whereas during the next decade there was an increase of 47,490 acres. Vineyards had an area of 9,836 acres in 1911 as against 5,600 acres in 1901, being an

(1) Included with vegetables.

increase of 4,236 acres in the ten years. The combined area of small fruits and vegetables in 1901 was 116,517 acres as compared with an acreage in 1911 of 223,506 acres, of which 17,495 acres were in fruit and 206,011 acres under vegetables. The total area under orchards and gardens increased by a little less than three per cent in the ten years 1891-1901, while the increase from 1901 to 1911 was better than 33 per cent.

The land under orchards in 1891 comprised 82·10 per cent of the total area in orchards and gardens, as compared with 74·45 per cent in 1901 and 63·37 per cent in 1911. The acreage in vegetables is more than three times as much as it was in 1891. The land in vegetables alone is 89,434 acres greater than the total acreage in small fruits and vegetables in 1901.

In 1891 the census records showed that 1·34 acres of every 100 acres of improved land were under orchards as compared with 1·18 acres in 1901 and ·83 acres in 1911. The ratio per 100 acres of the combined areas of orchards and gardens was 1·63 acres in 1891, 1·58 acres in 1901 and 1·31 acres in 1911.

Table 15 gives the comparative statistics of the area of orchards and nurseries, vineyards, small fruits and vegetables in 1891, 1901 and 1911. In 1901 Ontario possessed 5,440 acres or 97 per cent of the total area as compared with 8,542 acres in 1911 or 87 per cent. In every province there has been a marked increase

<sup>1</sup> Small fruits included with vegetables.

<sup>2</sup> Includes totals for Alberta and Saskatchewan.

from 1901 to 1911 in the acreage devoted to grape production. From 1901 to 1911 the acreage in orchards and nurseries in British Columbia increased from 7,502 acres to 33,618 acres, being an increase of 26,116 acres or 348 per cent in the decade. Encouraging increases have been made in the planting of orchards in all the prairie provinces during the decade—the acreage in all fruits having increased from 791 acres to 3,641 acres. Quebec shows a steady decline in the acreage under orchards, but increases in other fruits and vegetables. In the setting out of new orchards, British Columbia takes first place, with Ontario in second position and Nova Scotia a good third.

Table 16 gives for the Dominion, as a whole, the comparative number of trees bearing and non-bearing, according to classes, together with the average number of trees per farm and per 100 acres of improved land in 1901 and 1911. With the exception of peaches there have been decreases in the numbers of all fruit-bearing trees during the decade. On the other hand there are large increases in the numbers of all kinds of young trees, except plums. The number of apple trees per farm dropped from 27.64 to 22.70 and the total number of all orchard trees per farm from 38.92 to 31.23.

The production of apples in the Dominion decreased from 1900 to 1910 by 8,007,520 bushels. The correctness of the census figures are fairly well established by the Trade and Navigation Returns which show that in 1901 Canada exported of the apple crop of the previous year 2,035,953 bushels as against an exportation of 1,570,974 bushels in 1911 of the 1910 crop, a falling off in exports of 464,979 bushels. In 1900-1901 we imported 78,189 bushels of apples as against 452,783 bushels in the fiscal year 1910-1911, which corresponds closely to the census year, being an increase of 374,594 bushels over

the previous decennial year. The decrease in exports and the increase in imports both indicate a shortage in the home production and incidentally corroborate the statistics of the census.

The records of the production of small fruits, other than grapes, for 1891 are not available and for 1901 are grouped together and given in quarts. In the last census, there being a legal standard box adopted, the quantities are given in boxes and quarts in order to conform to common usage. Reducing the boxes to quarts for the sake of comparability there was an increase in the production of small fruits (grapes excepted) of over  $2\frac{3}{4}$  million quarts. The production of grapes increased by 8,595,804 lb. during the decade. Table 17 gives the fruit production for all Canada, together with the average production per farm and per 100 acres of improved land in 1890, 1900 and 1910.

<sup>1</sup> Quantity of fruit produced in 1890 included with totals for Canada.

Table 19 gives the values of orchard fruits, small fruits and vegetables separately for the year 1910, the aggregate value for 1900 and 1910, together with the percentage of increase during the decade. For all Canada, in 1910, orchard fruits gave a value of \$9,728,533, small fruits of \$3,052,592, and vegetables of \$18,806,544, making an aggregate for fruits and vegetables of \$31,587,669, as compared with \$12,994,900 in 1900, being a gain of \$18,592,769 or 143·08 per cent, in ten years. The average worth per farm of fruits and vegetables was \$44 in 1910 as compared with \$24 in the previous census. As the value of fruits, all kinds, and vegetables were combined in the census of 1901, it is therefore not possible to determine the proportion of the increase in value during the decade which belongs to each class but it is safe to assume, that the value of vegetables was an even greater proportion of the total value in 1900 than it was in 1910. From 1900 to 1910 every province shows an increase, in the value of fruits and vegetables, ranging from 64·38 per cent in Prince Edward Island to 3,443·73 per cent in Alberta.

TABLE 19. VALUE OF FRUITS AND VEGETABLES SEPARATELY IN 1910 AND COMPARED BY TOTALS FOR 1910 AND 1900, TOGETHER WITH THE PER CENT OF INCREASE IN TEN YEARS.

In the last census year Ontario obtained 57·20 per cent of the total value of all orchard fruits raised in Canada, Nova Scotia 15·90 per cent, Quebec 12·20 per cent, British Columbia 10·51 per cent, New Brunswick 2·75 per cent, Prince Edward Island 1·35 per cent and the Prairie provinces ·09 per cent; of small fruits, Ontario obtained 73·86 per cent of the total value, British Columbia 10·24 per cent, Quebec 9·32 per cent, Nova Scotia 2·85 per cent, New Brunswick 2·05 per cent, Prince Edward Island ·84 per cent and the Prairie provinces ·84 per cent.

Table 20 gives the per cent distribution of the value of orchard fruits, small fruits and vegetables in 1910. For all Canada the aggregate value of fruits and vegetables was \$31,587,669 of which the value of orchard fruits (\$9,728,533) was 30·80 per cent, of small fruits (\$3,052,592) 9·66 per cent and of vegetables (\$18,806,544) 59·54 per cent. The table is to be similarly interpreted for the provinces. In 1910 vegetables obtained 99·39 per cent of the total value of fruits and vegetables in Alberta, 99·60 per cent in Saskatchewan, 98·49 per cent in Manitoba, 79·76 per cent in Quebec, 72·54 per cent in New Brunswick, 46 per cent in Nova Scotia and less than 45 per cent in the remaining provinces.

The total value of fruits of all kinds exported and imported by decades, ended June 30, since 1891 were as follows—in 1891 exports \$1,487,336, imports \$261,382; in 1901 exports \$1,633,604, imports \$337,674; in 1911 exports \$1,975,982, imports \$1,531,077.

From 1891 to 1901 the value of exports increased by 9·83 per cent and of imports by 29·18 per cent, while from 1901 to 1911 exports increased by 20·95 per cent and imports by 353·42 per cent. Of the total value of all fruits exported, apples obtained 93·43 per cent in 1891, 90·77 per cent in 1901 and 88·91 per cent in 1911. The value of apples imported in 1891 represented 21·08 per cent of the total value of all fruits imported as compared with 21·97 per cent in 1901 and 31·84 per cent in 1911. Table 21 gives the quantity and value of fruit exported for the years ended June 30, 1891, 1901 and 1911, and Table 22 the quantity and value of fruit imports for the same years.

TABLE 21. QUANTITY AND VALUE OF FRUIT EXPORTED FOR THE YEARS ENDED JUNE 30, 1891, 1901 AND 1911.

<b>Total value.....</b>	-	<b>261,382</b>	-	<b>337,674</b>	-	<b>1,531,077</b>

The average production of apples per head, of the population two years of age and over, in 1891 was 1.68 bushels as compared with 3.73 bushels in 1901, and 1.59 bushels in 1911. If to the quantity retained for home consumption in each decade be added the quantity of apples imported, we find that the average consumption for the population two years of age and over at each census period was 1.39, 3.34 and 1.42 bushels respectively.

## FIELD CROPS.

The statistics of the area, production and value of field crops are given in detail in Tables I to IV, VI, IX and X, and by summaries for provinces in Tables XIV to XVII, and by comparative statements in Tables XXV to XXVII. In Tables I to IV the statistics are given by townships or parishes wherever municipal arrangements lent themselves to the project.

## ACREAGE.

In Table 23, which follows, the total acreage in field crops is given by provinces for the years 1890, 1900, 1910 and 1911. The statistics for the year 1911, not being for a census year, cannot be compared with the figures of the previous censuses, but are given to illustrate the steadily forward movement in agriculture. Table 27 (pp. xxxiv-xxxviii) gives the statistics for these years by individual crops and will afford an opportunity to study the fluctuations in the acreage devoted to each crop by census periods.

TABLE 23. COMPARATIVE AREA OF FIELD CROPS, BY PROVINCES, 1890, 1900, 1910 AND 1911.

Prince Edward Island.....	409,940	447,737	477,529	484,274	9.2	6.7	1.4

NOTE—The minus sign (-) shows a decrease.

The total area, for all Canada, in field crops in 1890 was 15,662,811 acres, in 1900 it was 19,763,740 acres, in 1910 it was 30,556,168 acres and in 1911 it reached 35,261,338 acres. From 1890 to 1900 the increase per cent was 26.2, from 1900 to 1910, 54.6 per cent and for the year 1911 over the preceding year it was 15.4 per cent. Of the Prairie provinces, Manitoba alone shows a lesser increase in the second decade than in the first. All the eastern provinces show smaller increases in the acreage of field crops in the decade ending 1910 than they did for the decade ending 1900. From 1900 to 1910 the area under field crops in Nova Scotia shows a decrease of 2.6 per cent. It is the only province in which an increase was not made in the acreage in field crops during the decade.

The relatively small gain per cent shown in crop acreage from 1900 to 1910 in Ontario, Quebec and the Maritime provinces is due to the scarcity of efficient farm help and to migration to the western provinces. The last census showed

that of the total population west of the Great Lakes 352,735 were born in Ontario, Quebec and the Maritime provinces. Table 24, which gives the number of vacant farms in the eastern provinces, June 1, 1911, also speaks of movement of population and incidentally supplies a reason for the small gains made in crop area during the decade.

TABLE 24. VACANT FARMS IN EASTERN CANADA, CENSUS 1911.

Provinces	NUMBER OF VACANT FARMS HAVING—					Total number of vacant farms	Total number of acres in vacant farms
	5 to 10 acres	11 to 50 acres	51 to 100 acres	101 to 200 acres	201 acres and over		
	No.	No.	No.	No.	No.	No.	acres
Ontario.....	522	1,903	1,554	581	199	4,759	398,637

New Brunswick.....	146	279	234	66	14	739	48,754
Nova Scotia.....	219	413	218	104	32	991	63,967
Prince Edward Island.....	5	73	47	10	2	137	9,002
<b>Total.....</b>	<b>976</b>	<b>2,909</b>	<b>2,268</b>	<b>854</b>	<b>284</b>	<b>7,291</b>	<b>576,702</b>

The percentages in Table 25 are computed from the figures given in Table 23. Of the total area in field crops in 1890, Ontario contributed 52.14 per cent as compared with 46.61 per cent in 1900 and 30.50 per cent in 1910. Quebec gave 25.95 per cent of the total area in 1890 as against 23.80 in 1900 and 17.24 per cent in 1910. The Maritime provinces possessed 12.11 per cent of the crop acreage in 1890, as against 10.50 per cent in 1900 and 7.02 per cent in 1910. The share per cent of the total crop acreage given by the Prairie provinces in 1890 was 9.06 per cent, in 1900 it had increased to 18.22 per cent while in 1910 it made nearly 45 per cent of the total acreage of the Dominion under crops.

TABLE 25. PER CENT DISTRIBUTION OF ACREAGE UNDER FIELD CROPS BY PROVINCES 1890, 1900 AND 1910.

Table 26 shows in parallel columns for all Canada the increases or decreases made in acreage devoted to the various specified crops (1) for 1900 over 1890 and (2) for 1910 over 1900. The areas of fall and spring wheat were not enumerated separately in the Census of 1891. In the Census of 1911 for the first time separate areas for turnips, mangolds and sugar beets find a place.

The Census of 1901 showed increases during the decade for wheat of 1,523,329 acres or 56.39 per cent, for oats of 1,406,299 acres or 35.50 per cent, for corn for husking of 165,657 acres or 84.90 per cent, buckwheat and peas showed decreases of 31,581 acres or 12.06 per cent for the former and 255,055 acres or 27.56 per cent for the latter; but for all grains, the net increase in acreage for 1900 over 1890 was 3,143,589 acres or 34.5 per cent. Potatoes and hops also showed decreased areas. The census records of 1910 gave ten years increases for wheat of 4,639,972 acres or 109.83 per cent; for oats of 3,288,524 acres or 61.26 per cent; for barley of 411,294 acres or 47.17 per cent; for buckwheat of 95,787 acres or 36.59 per cent; for flax of 559,099 acres or 2,421.80 per cent. Practically the whole of this large increase in flax production took place in Saskatchewan and Alberta. In mixed grains the increase was 153,467 acres or 56.11 per cent. Hay, clover and alfalfa show a ten year increase of 1,800,788 acres or 27.5 per cent. Forage crops increased by 275,835 acres or nearly 100 per cent. Decreases are shown for roots and hops, but in grains alone there was an increase of 8,460,286 acres or 73.3 per cent in the decade. The combined area in forage crops (hay, clover, alfalfa, etc.) was 5,931,548 acres in 1890 as compared with 6,819,773 acres in 1900 and 8,896,396 acres in 1910, being an increase at the end of the first decade of 15 per cent and of 30.45 percent at the end of the second.

TABLE 26. COMPARATIVE STATEMENT SHOWING INCREASES OR DECREASES IN THE ACREAGE OF FIELD CROPS FOR ALL CANADA FROM 1890 TO 1900 AND FROM 1900 TO 1910.

(1) Not reported in the Census of 1891.

Table 27 gives the area of all field crops for the Dominion, as a whole, and for each of the provinces together with the percentage of variation from one decade to another. The areas sown to the various crops in the spring of 1911 (not a census year) are given to show the continuous and rapid advancement being made in agriculture in Canada in recent years. In discussing agricultural conditions in British Columbia in 1901, the following statement appears in the "Introduction to Volume II, Census 1901": "British Columbia is not primarily an agricultural province. The minerals of the mountains have hitherto been the chief attraction for men of adventure and capital; but no doubt in time, with the development of mining, agriculture will become an established industry." The statistics of the last census indicate that the fertile valleys of British Columbia are being devoted to fruit and vegetable culture rather than to the production of grain. The area under grain in British Columbia increased from 1891 to 1901 by 12,199 acres, while from 1901 to 1911 there was a decrease of 9,562 acres or 16.78 per cent. On the other hand during the last decade the acreage under hay and clover increased from 102,752 acres to 132,668 acres, under forage crops from 1,208 to 15,519 acres, and alfalfa, not enumerated in 1900, is given an acreage of 3,741 acres in 1910, potatoes increased by 2,666 acres or 32.48 per cent. The net increase in the acreage of all field crops in British Columbia, during the last decade, was 41,990 acres or 24.49 per cent. As previously stated, the development of orchard and market gardens has been the notable agricultural feature of the Pacific province in recent years. From 1900 to 1910 orchard and market gardens have increased from 10,360 acres to 34,485 acres being an increase of 24,125 acres or 233 per cent in the decade.

The number of farm holdings in Alberta in 1901 was 9,486 of which 9,429 were holdings of five acres and over as compared with 60,353 holdings of five acres and over in 1911 and 1,143 of less than five acres. The area in wheat, oats and barley grew from 171,862 acres in 1900 to 1,784,265 acres in 1910, being an increase of 1,612,403 acres or 938 per cent. The minor grains increased from 1,254 acres to 8,954 acres in the ten years. Flax, of which there was only 100 acres in 1900 increased to 30,885 acres in 1910. Hay, clover and alfalfa, which were not recorded in the Census of 1901, had an area of 152,424 acres in 1910. The potato acreage grew from 3,792 acres to 20,086 acres.

In 1900, on 13,384 holdings of five acres and over Saskatchewan had an acreage under wheat, barley and oats of 640,861 acres as against 6,246,202 acres on 95,809 holdings in 1910, being an increase of 5,605,341 acres in ten years. Of this increase, wheat obtained 3,741,010 acres, barley 117,779 acres and oats 1,746,552 acres. Flax, which had an area of only 227 acres in 1900 grew to 506,425 acres in 1910. The area in potatoes and roots rose from 6,756 acres to 25,085 acres in the ten years.

In 1900, on 31,812 farm holdings of five acres and over, Manitoba grew 1,965,200 acres wheat, 139,672 acres barley and 573,858 acres oats as compared with 2,759,445 acres wheat, 416,015 acres barley and 1,209,173 acres oats on 42,567 holdings of similar sizes in 1910. Forage crops grew from 43,667 acres in 1900 to 216,618 acres in 1910 being an increase of 172,951 acres or 396 per cent in the decade.

The total area of all field crops in Manitoba, Saskatchewan and Alberta increased from 3,600,119 acres in 1900 to 13,607,697 acres in 1910 being an

increase of 10,007,578 acres or 278 per cent in the decade (of this increase the province of Saskatchewan provided more than 60 per cent). The area of wheat, alone, increased from 2,495,474 acres to 7,867,423 acres, being a gain of 5,371,949 acres or 215.25 per cent in the ten years, and the area under the three principal crops grew from 3,491,453 acres in 1900 to 12,415,100 acres in 1910, being an increase of 8,923,647 acres or 255.6 per cent.

The importance of grain growing to the Prairie provinces is strikingly illustrated by the fact, that in 1900, 96.98 per cent of their whole area under field crops was devoted to the growing of wheat, oats and barley and 91.24 per cent in 1910. The decrease in proportion of these crops, in the decade, is due to the more general attention which has been given in recent years to the growing of vegetables, grasses and forage crops; the area in potatoes having increased from 25,967 acres to 70,342 acres, in roots from 2,183 acres to 5,550 acres and in forage crops from 60,505 acres in 1900 to 530,016 acres in 1910.

In the five older provinces, the area of all field crops in the harvest year 1900 was 15,992,174 acres and in the season of 1910 it was 16,735,034 acres, being an increase of 742,860 acres or 4.65 per cent, as against an increase of 1,863,946 acres or 13.2 per cent during the previous decade. From 1900 to 1910, the area of field crops increased in Ontario by 109,455 acres or 1.18 per cent, in Quebec by 561,342 acres or 11.93 per cent, in New Brunswick by 61,451 acres or 6.85 per cent, in Prince Edward Island by 29,792 acres or 6.65 per cent, in Nova Scotia during the same period, there was a decrease of 19,180 acres or 2.62 per cent. In the Census of 1901 Ontario showed an increase of 12.8 per cent in field crops, Quebec 15.7 per cent, New Brunswick 17.6 per cent, Prince Edward Island 9.2 per cent and Nova Scotia about one per cent.

The area in grain crops, in 1910, of Ontario, Quebec and the Maritime provinces was 7,921,229 acres as compared with 8,699,923 acres in the harvest year 1900, being a decrease of 778,694 acres or 22.45 per cent. Each of the provinces contributed to the decrease excepting Prince Edward Island, where the area in grain increased by 2,835 acres or 1.28 per cent in the decade; in Ontario the decrease amounted to 617,875 acres or 79.33 per cent of the total, in Quebec to 142,127 acres or 18.25 per cent, in New Brunswick to 19,032 acres or 2.44 per cent and in Nova Scotia to 2,195 acres or three-tenths of one per cent of the total decrease in the five provinces from 1900 to 1910.

The area of wheat, in eastern Canada, fell from 1,713,101 acres in 1900 to 987,599 acres in 1910, being a drop of 725,502 acres or 42.35 per cent during the decade; in Ontario the decrease amounted to 617,279 acres or 41.49 per cent, in Quebec to 76,941 acres or 55.03 per cent, in New Brunswick to 13,566 acres or 50.26 per cent, in Nova Scotia to 4,136 acres or 25.32 per cent and in Prince Edward Island to 13,577 acres or 32.08 per cent. In contrast, with the decreases shown in grain growing, the area in fodder production shows marked increases in all the eastern provinces, except Nova Scotia. The net increase amounted to 1,559,144 acres or 23.4 per cent over the figures of the previous census. The area in fodders, in Ontario, increased from 2,772,866 acres to 3,533,288 acres being an increase of 760,422 acres or 27.4 per cent, in Quebec from 2,588,190 acres to 3,288,835 acres, being an increase of 700,645 acres or 27.1 per cent over the figure of 1900. A smaller acreage in potatoes is noticeable

in all the eastern provinces except New Brunswick where practically the same acreage obtained in 1910 as in 1900.

Rye crop acreage is diminishing in all the eastern provinces; in Ontario the decrease amounted to 59,185 acres, being 86.42 per cent of the total decrease of 68,485 acres in the five provinces.

The area in husking corn was reduced from 1900 to 1910 in Ontario by 56,795 acres or 17.12 per cent, in Quebec by 9,981 acres or 35.01 per cent; in the Maritime provinces the production of this crop, never of serious dimensions, is fast approaching the vanishing point. There have been increases in the area in each of the Northwest provinces, but here also the acreage devoted to it is relatively small. In 1900 the acreage for all Canada totalled 360,758 acres as compared with 293,951 acres in 1910, being a falling off in the ten years of 66,827 acres or 18.52 per cent.

NOTE:—The minus sign (–) denotes a decrease.

Buckwheat has more than doubled its area in Ontario, having increased from 73,038 acres in 1900 to 167,315 acres in 1910. There was an increase of 16,793 acres in Quebec, and also a small increase in Nova Scotia. But New Brunswick, which showed an increase of 13,483 acres in 1900, gives for this census a decrease of 15,123 acres. For the five older provinces there was a net increase of 95,562 acres or 36·5 per cent in the decade and for all Canada of 95,787 acres or 36·6 per cent. The acreage devoted to it in the western provinces, although increasing, is too small to affect general results.

The cultivation of peas in eastern Canada has fallen off from 666,850 acres in 1900 to 352,869 acres in 1910, which is a decrease of 313,981 acres or 88·91 per cent in ten years; in Ontario, the area is less by 264,861 acres, in Quebec, by 47,687 acres and in New Brunswick, by 1,273 acres. In Nova Scotia and Prince Edward Island there are no large areas devoted to the growing of peas, the total acreage and production reported at each census being made up of small plots, therefore the variation between the figures of the various census years is of small moment. The total area in beans, in the five provinces, in 1900 was 46,538 acres as compared with 45,841 acres in 1910. There were decreases in all the provinces, except Quebec where the area increased from 2,886 acres to 4,235 acres. In Ontario, where beans are principally grown, the area fell from 42,086 acres in 1900 to 40,585 acres in 1910.

The area under flax, for the Dominion as a whole, in 1910, was 582,185 acres, of which Saskatchewan possessed 506,425 acres, Manitoba 34,684 acres, Alberta 30,885 acres—a total for the three provinces of 571,994 acres or 98·2 per cent of the total acreage. In 1900 the total acreage sown was 23,086 acres of which Manitoba had 14,404 acres and Ontario 6,388 acres. The increase, for all Canada, during the decade was 559,099 acres or 2,421·8 per cent. This crop receives but little attention in the Maritime provinces and is grown to a limited extent only in Ontario and Quebec.

In all Canada, there were 18,928 acres of tobacco grown in 1910 as compared with 11,906 acres in the harvest year 1900, being an increase of 7,022 acres or 58·98 per cent. Nearly all the tobacco is grown in the provinces of Ontario and Quebec. The acreage in these two provinces constituted 99 per cent of the total area under tobacco in the Dominion in 1900 and 99½ per cent in 1910. In Ontario the crop increased from 3,144 acres in 1900 to 7,017 acres in 1910, and in Quebec from 8,661 acres in 1900 to 11,818 acres in 1910. British Columbia had 61 acres in 1900 and 81 acres in 1910. In all the other provinces the area is so small as to render the crop of little importance.

The sowing of mixtures of various grains such as oats and peas, barley, oats and peas, or barley and oats seems to be growing in favour in Ontario, where the area grew from 117,020 acres in 1900 to 323,409 acres in 1910, an increase of 206,389 acres or 176·37 per cent in the decade. There was a decrease in Quebec of 53,325 acres or 37·10 per cent, in New Brunswick of 502 acres or 40·81 per cent, in Nova Scotia of 480 acres or 16·55 per cent, in Prince Edward Island of 220 acres or 3·24 per cent in the ten years.

Table 28 gives for the years 1910 and 1900 the average acreage per farm, of the principal field crops, for Canada and for each of the provinces.

For all Canada, there are increases in the acreages per farm, of wheat, oats, barley, buckwheat, mixed grains and forage crops (comprising fodder corn and grains sown for green feeding) and decreases in average acreages per farm of corn for husking, peas and beans, potatoes, roots and hay.

For almost all kinds of field crops British Columbia shows a reduced average acreage per farm, attributable to the increase in the number of small holdings, which are given over almost exclusively to horticulture.

According to the census records, Ontario possessed 53 per cent of the total wheat acreage in 1890 as compared with 35 per cent in 1900 and less than

(<sup>1</sup>) Less than one-hundredth of one acre.

10 per cent in 1910. On the other hand the area under wheat in the prairie provinces which was 37 per cent of the total in 1890 increased to 59 per cent in 1900 and to more than 88 per cent of the total in 1910.

In Table 29 the average acreage of each crop, specified in the table, is given in relationship to every 100 acres of improved farm land. From 1900 to 1910, for Canada as a whole, the area under wheat per 100 acres of improved land increased from 14 acres to 22.77 acres, oats from 17.79 acres to 19.78 acres, barley from 2.89 acres to 3.12 acres, mixed grains and forage crops have also

to a small extent advanced their position; hay shows a decrease from 21.69 acres to 17.83 acres, potatoes from 1.49 acres to .99 acres per 100 acres of improved land.

(1) Less than one-hundredth of one per cent.

Table 30 shows for all Canada and for each of the provinces, (1) the proportion which the acreage devoted to each crop specified forms of the total area of improved land in 1901 and 1911, and (2) the per cent proportion which the acreage occupied by each crop forms of the total acreage of field crops harvested in 1890, 1900 and 1910.

In 1911, for all Canada, field crops occupied 72.35 per cent of the total acreage of improved land as compared with 65.52 per cent in 1901. The areas of flax, peas, beans, rye, corn for husking and mixed grains being relatively small and unimportant are grouped as "various" and classified under "cereals." The records of the census show, for the Dominion, that 51.94 per cent of improved land was devoted to grain growing in 1911, as compared with 40.70 per cent in 1901. The combined area in grains, seeds and fodders occupy more than seven-tenths of all land brought under cultivation.

Of the crops harvested in 1890, wheat constituted 17.25 per cent, barley 5.54 per cent, oats 25.29 per cent and hay 37.87 per cent. In the harvest of the year 1900, wheat occupied 21.38 per cent, barley 4.41 per cent, oats 27.16 per cent and hay 33.11 per cent. In 1910 the ratio of wheat and oats increased

to 29.01 per cent and 28.33 per cent respectively, while the proportion of barley decreased to 4.20 per cent and of hay to 27.13 per cent of the total area harvested in that year. Fodder crops, other than hay which were not reported in the census of 1890, show a considerable increase for 1910 over 1900. In the last census, of every 100 acres under field crops nearly two acres were devoted to fodder production as compared with 1.4 acres in the previous census.

## PRODUCTION.

Table 31 gives the yields of the principal grain crops by totals for Canada and each of the provinces in 1880, 1890, 1900 and 1910 and Table 32, a companion table, presents similar statistics of the quantities of hay, potatoes, roots, hops, tobacco, grass and clover seed and maple sugar produced in same years.

**Wheat.** The production of wheat, which stood at 32,350,269 bushels in 1880, increased to 132,077,547 bushels in 1910, being an increase of 99,727,278 bushels in 30 years or more than 308 per cent. In 1890, the farms of Canada produced 42,223,372 bushels, in 1900 55,572,368 bushels. The increase, from 1880 to 1890 was 9,873,103 bushels or 30·5 per cent, from 1890 to 1900 13,348,996 bushels or 31·6 per cent and from 1900 to 1910 the increase was 76,505,179 bushels or 137·7 per cent. The total production of wheat, in all Canada in 1910, was nearly two million bushels more than the aggregate production of the three previous census periods, 1880, 1890 and 1900. This large increase, in wheat production, is altogether attributable to the western provinces. In 1880 Manitoba, Saskatchewan and Alberta produced 1,153,328 bushels, in 1890 17,884,629 bushels, in 1900 the quantity reported was 23,456,985 bushels as against a production of 110,166,704 bushels in 1910. In previous censuses, the quantity of wheat reported for Alberta and Saskatchewan was comparatively small, amounting to a little more than five million bushels in 1900, whereas Saskatchewan alone, in 1910, produced nearly 11½ million bushels more wheat, than was produced in all Canada in 1900.

In each of the harvest years 1880, 1890 and 1900 the province of Ontario raised more than one-half of all the wheat produced in the Dominion in those years. In 1910 this position was captured by Saskatchewan which raised nearly 67 millions of the 132 million bushels produced in that year. Quebec, New Brunswick and Nova Scotia produced more wheat in the year 1880 than they have in any subsequent census year. In 1880 they raised 3,070,211 bushels as compared with 1,360,114 bushels in 1910 being a decrease of 55·70 per cent in thirty years. Prince Edward Island showed a steady increase in the production of wheat from 1880 to 1900—the quantity raised in 1880 was 546,986 bushels as compared with 613,364 bushels in 1890 and 738,679 bushels in 1900, in 1910 the production fell to 501,553 bushels, a decrease of 237,146 bushels from the preceding census and 45,453 bushels less than in 1880.

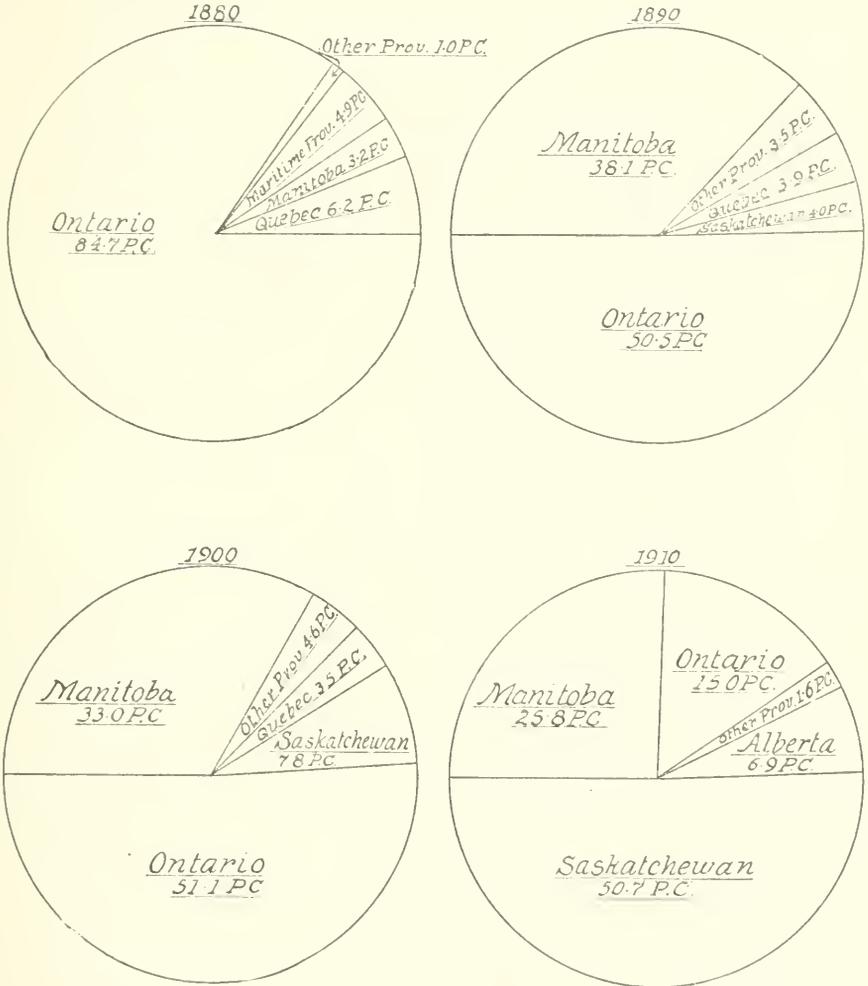

From September 1910 to August 1911, Canada exported 52,098,694 bushels of wheat. The remaining 79,978,853 bushels, of the production of the harvest year 1910, comprised stock in stores and quantity used for home consumption, seed, etc. In Table 43 the statistics of exports are given for the years ended June 30, 1891, 1901 and 1911.

**Barley.** In 1910, Canada produced 28,848,310 bushels of barley, as compared with 22,224,366 bushels in 1900, 17,222,795 bushels in 1890 and 16,844,863 bushels in 1880. Of the total production in 1880, Ontario provided 85 per cent, in 1890 her share was 77 per cent, in 1900 it was 72 per cent and in 1910 it fell to 48 per cent of the total yield of the Dominion. The yield of barley in the Prairie provinces was 12,057,806 bushels in 1910 as compared with 3,141,357 bushels in 1900, being a gain of 8,916,449 bushels or 283·8 per cent in the decade.

CENSUS OF CANADA 1911

PER CENT PROPORTION OF WHEAT PRODUCTION OF CANADA WHICH WAS GROWN IN THE SEVERAL PROVINCES IN 1880, 1890, 1900 AND 1910.

CENSUS AND STATISTICS

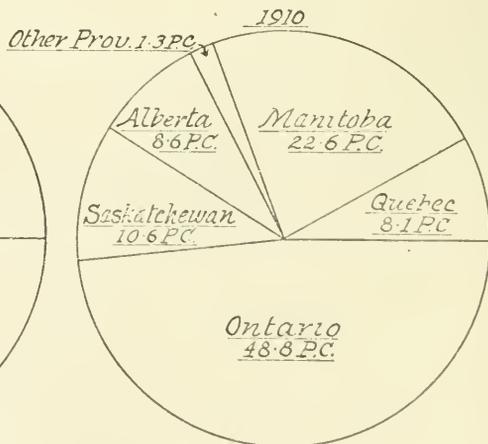

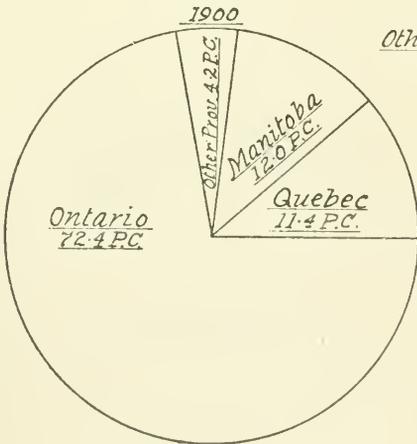

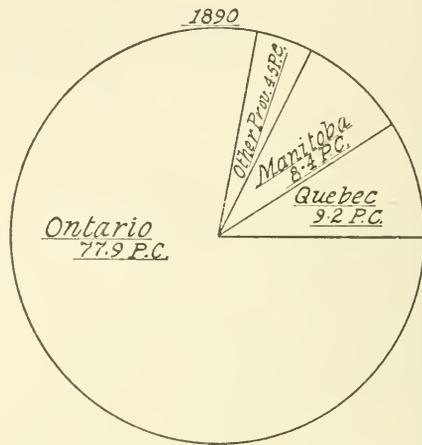

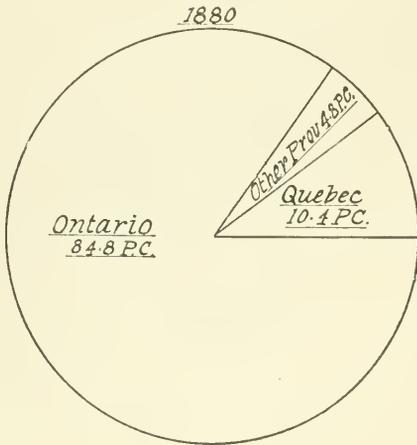

In order to show the relative standing of the provinces to the total production of wheat in each Census, the areas of the circles are similar.

CENSUS OF CANADA 1911

PER CENT PROPORTION OF BARLEY PRODUCTION, OF CANADA, WHICH WAS GROWN IN THE SEVERAL PROVINCES IN 1880, 1890, 1900 AND 1910.

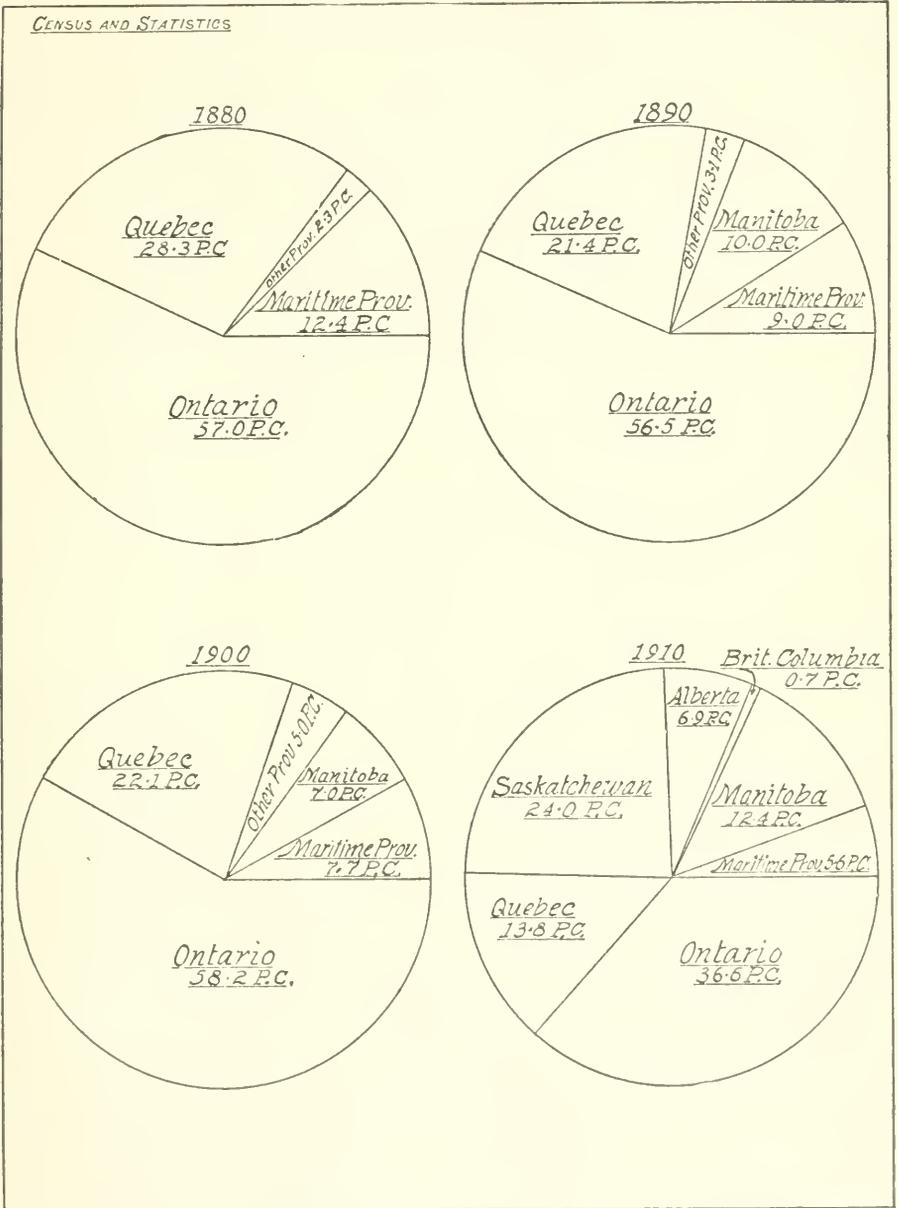

CENSUS AND STATISTICS

In order to show the relative standing of the provinces to the total production of barley in each Census, the areas of the circles are similar.

CENSUS OF CANADA 1911

PER CENT PROPORTION OF OATS PRODUCTION, OF CANADA, WHICH WAS GROWN IN THE SEVERAL PROVINCES IN 1880, 1890, 1900 AND 1910.

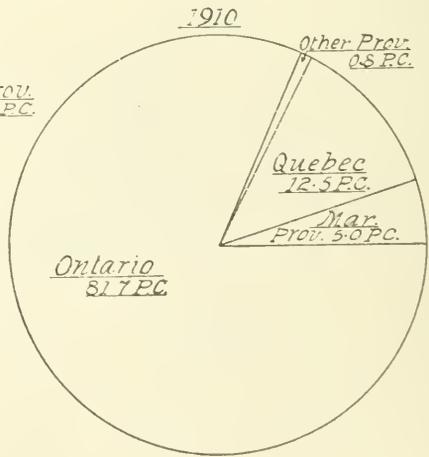

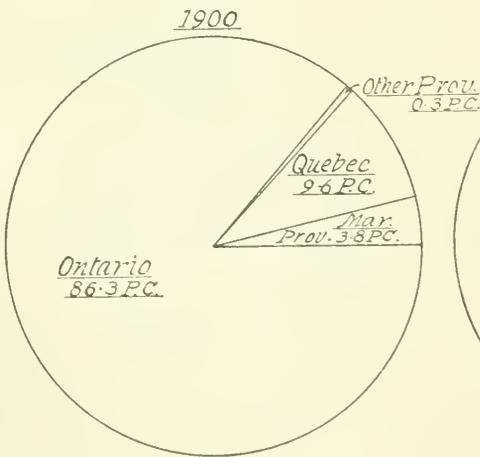

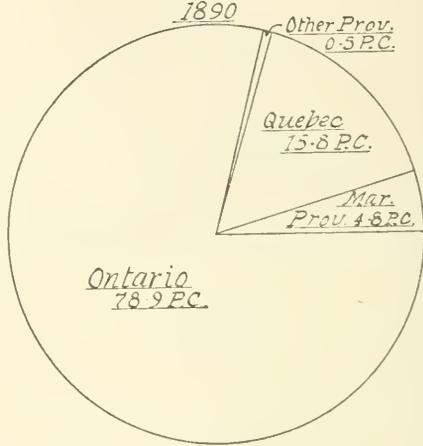

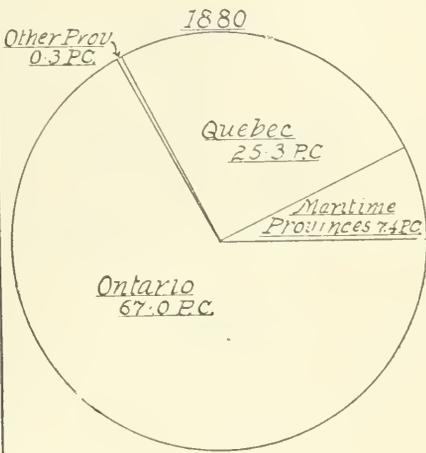

In order to show the relative standing of the provinces to the total production of oats in each Census, the areas of the circles are similar.

CENSUS OF CANADA 1911

PER CENT PROPORTION OF MINOR GRAINS PRODUCTION OF CANADA, WHICH WAS GROWN IN THE SEVERAL PROVINCES IN 1880, 1890, 1900 AND 1910.

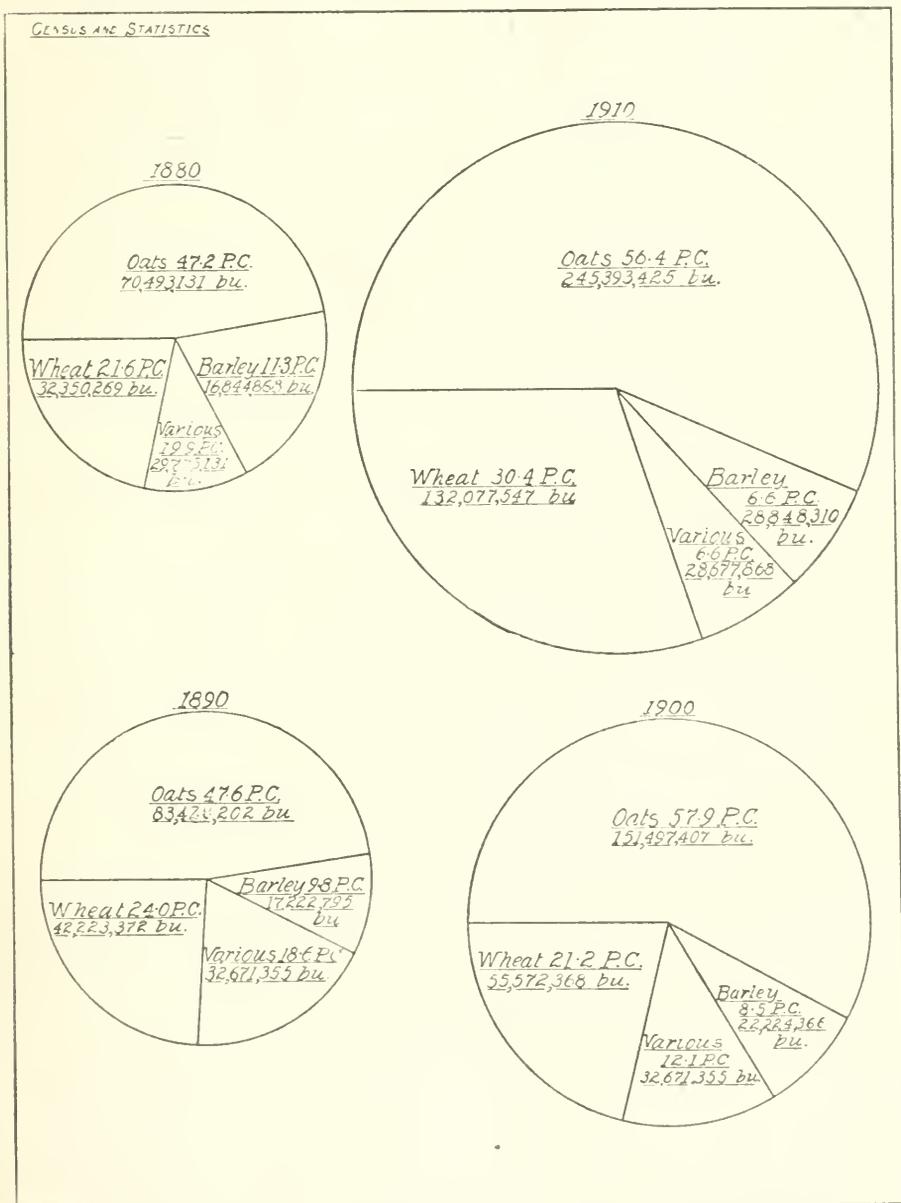

CENSUS AND STATISTICS

In order to show the relative standing of the provinces to the total production of minor grains in each Census, the areas of the circles are similar.

CENSUS OF CANADA 1911

PRODUCTION OF PRINCIPAL GRAINS AND THE PER CENT PROPORTION WHICH THE QUANTITY OF EACH KIND FORMS OF THE TOTAL, IN THE YEARS 1880, 1890, 1900 AND 1910.

The area of each circle represents the total production of grain in each Census year.

**Oats.** This cereal holds the premier place in grain production in the Dominion. It ranks first in British Columbia, Alberta, Ontario, Quebec and the Maritime provinces, but is exceeded by wheat in Manitoba and Saskatchewan. The total yield for all Canada, in 1910, was 245,393,425 bushels as against 151,497,407 bushels in 1900, being an increase of 93,896,018 bushels

(<sup>1</sup>) Included with peas. (<sup>2</sup>) Not reported.

or nearly 62 per cent. The eastern provinces, in 1910, yielded 137,465,382 bushels or 57 per cent of the total, the balance 107,928,043 bushels or 43 per cent being produced west of the Great Lakes.

**Corn for Husking.** Owing to climatic conditions, corn for husking is grown successfully only in Ontario. Of a total production of 25,875,919 bushels in 1900, Ontario produced 24,463,694 bushels or 94 per cent, and in 1910 obtained 13,830,703 bushels or 96 per cent out of a total of 14,417,599 bushels.

**Other Cereals.** Of the minor cereals, buckwheat alone shows an increase in production, during the decade. In 1910, it yielded 7,102,853 bushels as compared with 4,547,159 bushels in 1900, being an increase of 2,555,694 bushels, for which Ontario and Quebec are almost wholly responsible. Peas fell off from 12,348,943 bushels in 1900 to 4,788,916 bushels in 1910. This decrease in pea production was general, every province, excepting Alberta and Saskatchewan where the quantity produced is negligible, contributed to a result which was the product of many causes, the principal of which were insect pests. Beans in 1910 yielded 826,281 bushels as compared with 861,327 bushels in 1900 and 800,015 bushels in 1890. In 1880, beans and peas were grouped together and gave a total production of 13,749,662 bushels. In Ontario, which in the last census produced nearly 88 per cent of the whole Canadian bean crop, the yield dropped from 767,255 bushels in 1900 to 726,925 bushels in 1910; in Quebec the yield was greater in 1910 than in 1900 by 14,774 bushels; in the Maritime provinces the production was less for every province in the last census than in the previous one. The production of rye, which totalled 2,097,180 bushels in 1880, declined in 1890 to 1,341,325 bushels; in 1900 it rose again, reaching 2,316,793 bushels to again drop back in 1910 to 1,542,219 bushels. Quebec and the Maritime provinces show a constant decrease from decade to decade. In 1880 Ontario produced 76.2 per cent of all the rye grain raised in the Dominion, 79.3 per cent in 1890, 87.7 per cent in 1900 and 79.9 per cent in 1910.

**Hay.** In the year 1880 Canada grew 5,053,008 tons of hay made from timothy and clover, in 1890 the production was 7,693,733 tons as compared with 7,852,731 tons in 1900 and 10,406,367 tons in 1910. The prairie provinces show a decrease of 614,054 tons in the yield of hay in 1910 as compared with 1900. This decrease is more apparent than real, as in 1900 and in previous censuses the hay reported was cut on the unbroken prairie, while the product of cultivated meadows only was enumerated in the records of the Fifth Census. From 1900 to 1910 the production of hay increased in Ontario by 1,574,971 tons, in Quebec by 1,244,698 tons, in New Brunswick by 156,015 tons, in Nova Scotia by 65,962 tons, in Prince Edward Island by 87,672 tons and in British Columbia by 38,372 tons. In addition, to the products of timothy grass and clovers in 1910, there was also obtained from alfalfa or lucerne 115,189 tons of fodder, from corn 2,705,103 tons for summer feeding or for ensilage and 343,228 tons from grain cut green and made into hay for winter use.

**Potatoes.** The total production of potatoes for all Canada, amounted in 1910 to 55,461,473 bushels as against 55,362,635 bushels in 1900, being a net gain of only 98,838 bushels or less than one-fifth of one per cent. The provinces which gave increases for 1910 over 1900 were British Columbia, Alberta,

Saskatchewan, Manitoba and New Brunswick, while those showing decreases were Ontario, Quebec, Nova Scotia and Prince Edward Island. The yield in the western provinces rose from 4,154,533 bushels in 1900 to 9,756,290 bushels in 1910, being a gain of 5,601,757 bushels or 134·8 per cent, and in New Brunswick from 4,649,059 bushels to 5,219,025 bushels, being a gain of 569,966 bushels or 12·25 per cent. The drop in Ontario amounted to 2,741,467 bushels or 13·67 per cent, in Quebec to 1,684,200 bushels or 9·83 per cent and in Nova Scotia and Prince Edward Island to 1,647,218 bushels or 17·55 per cent.

**Turnips and Other Roots.** The total quantity (86,659,034 bushels) in all Canada, reported under this head in 1910, comprised 47,371,434 bushels turnips, 30,353,132 bushels mangolds, 6,498,101 bushels sugar beets and 2,436,367 bushels various kinds (carrots, table beets, parsnips, etc.). The details by provinces will be found in Table XXV. Of the total production, in 1910, Ontario contributed 70,418,599 bushels, Quebec 4,869,699 bushels and the Maritime provinces 9,224,299 bushels, the Prairie provinces 1,147,356 bushels, and British Columbia 999,081 bushels. From 1900 to 1910 the production increased in Ontario by 7,050,136 bushels, in Nova Scotia by 1,466,005 bushels, in Quebec by 1,343,512 bushels, in New Brunswick by 615,619 bushels, in British Columbia by 363,093 bushels, in Manitoba by 290,531 bushels, in Alberta by 257,314 bushels, in Saskatchewan by 132,390 bushels and a decrease of 935,208 bushels in Prince Edward Island, with a net increase for the Dominion of 10,583,392 bushels during the decade.

**Hops.** There were 1,208,450 pounds of hops raised in 1910 as compared with 1,004,216 pounds in 1900. Of the total production in 1910, British Columbia produced 1,013,400 pounds. It is the only province which has made a success of hop growing. Each succeeding census since 1880 shows a decreasing production in the other provinces.

**Tobacco.** Tobacco is grown principally in the provinces of Ontario and Quebec. Of the total production, in 1910 (17,632,342 lb.) Ontario possessed 7,498,506 lb. and Quebec 10,115,016 lb., as compared with a total production in 1900 of 11,266,732 lb. of which Ontario supplied 3,503,739 lb. and Quebec 7,655,975 lb. The total quantity produced in all the other provinces fell from 107,018 lb. in 1900 to 19,820 lb. in 1910.

**Flax.** In 1900 there were 172,222 bushels of flax raised in the Dominion; but with the opening up of the Prairie provinces where flax has been sown to good advantage on new breaking, the production in 1910 reached 4,244,935 bushels. Of this amount, Saskatchewan produced 3,893,160 bushels or 91·71 per cent. Ontario, Manitoba and Alberta also showed increases during the decade.

**Grass and Clover Seed.** In 1910 Canada had a yield of 26,960,765 lb. grass and clover seed. In 1900 the production was 15,499,140 lb. Ontario produced 23,883,223 lb. in 1910 as against 11,880,912 lb. in 1900. From 1890 to 1900 Ontario showed only an increase of 39,962 lb.

Table 34 gives for Canada the average production of field crops per acre in 1890, 1900 and 1910 for every crop for which acreage and yield were given on the census schedules. The average yields per acre of wheat, oats, rye, buckwheat and mixed grains were greater in 1910 than in 1900; the average yield of barley was smaller in the last census year than in the previous one. The average production per acre of all field roots increased from 335.35 bushels per acre in 1890 to 370.81 bushels in 1900 and to 477.61 bushels in 1910. As previously stated neither the acreage sown nor the quantity produced of the various kinds of field roots were separately enumerated previous to the last census. The fact that alfalfa produced on the average nearly twice as much fodder as did timothy grass and clover seems to indicate the desirability of its cultivation in districts where conditions are favourable. It is well to bear in mind, that the average production per acre obtained at decennial censuses is often, as has been the case in this country in 1890, 1900 and 1910, for years when, owing to adverse seasonal conditions, the crops in many sections were comparatively a failure.

few crops, production, but not area, was recorded. In the Census of 1910 Ontario obtained the highest average yield per acre for wheat, (25.00 bushels), barley, (27.99 bushels), beans, (17.91 bushels) and corn for husking (50.32 bushels); British Columbia for oats (53.10 bushels) and buckwheat (55 bushels); Alberta for rye (16.33 bushels) and Manitoba for peas (18.49 bushels). As only comparatively small areas are devoted to oats and buckwheat in British Columbia, to rye in Alberta, and to peas in Manitoba, the average yields recorded have not the same significance as have average yields obtained on large areas, extending over a wide region. The same remark applies to the yield per acre of wheat, oats and barley in Ontario, Quebec and the Maritime provinces as compared with that possessed by the prairie provinces.

Table 36 gives for 1910 and 1900 the average production per farm holding of the principal grains, potatoes, roots and forage crops. There have been, during the decade, increases in the production, per farm, of wheat, oats and forage crops and decreases in the average quantities of barley, potatoes and roots. In 1910, Manitoba ranked first in the production per farm of wheat

(748.31 bushels), barley (142.89 bushels) and oats (665.41 bushels), Prince Edward Island in potatoes (292.47 bushels), Ontario in turnips and other roots (310.49 bushels) and Quebec in hay and forage crops (26.54 tons). The production of wheat, per farm, increased from 1900 to 1910 in Alberta, Saskatchewan and Manitoba; of barley in Alberta, Saskatchewan, Manitoba and Prince Edward Island; of oats in Saskatchewan, Manitoba, Ontario and the

Maritime provinces; of potatoes in Manitoba and New Brunswick; of roots in Manitoba, Ontario, Quebec, New Brunswick and Nova Scotia; of hay and forage in the eastern provinces generally.

The quantity of wheat produced in the eastern provinces, per farm, has greatly decreased in the ten years; the production per farm in 1910 and 1900 in Ontario was 87.49 bushels, and 126.80 bushels, in Quebec 5.84 bushels and 13.07 bushels, in New Brunswick 5.34 bushels and 10.16 bushels, in Nova Scotia 4.17 bushels and 4.43 bushels, in Prince Edward Island 34.90 bushels and 52.71 bushels respectively. In the production of oats, Quebec, Alberta and British Columbia had a greater production per farm in 1910 than in 1900, the other provinces a lesser yield.

VALUES OF CROPS.

Table 37 gives the total value of field crops for Canada and the provinces in 1910 and 1900 as well as the average value per farm of such crops. Their value increased in the ten years by \$189,560,375 or 97.23 per cent. Every province shows enormous aggregate increases for the last census over the previous one. The average value per farm, for all Canada, was \$538.06 in 1910 as compared with \$357.92 in 1900. British Columbia shows a decrease in the average value per farm of field crops in 1910 as compared with 1900. The increase in the number of holdings of 5 acres and under in the western provinces has had a tendency to reduce the average value per farm holding.

TABLE 37. TOTAL VALUE OF FIELD CROPS TOGETHER WITH THEIR AVERAGE VALUE PER FARM, BY PROVINCES, 1910 AND 1900.

Table 38 gives the value of field crops by specified kinds, in 1910, for Canada and the provinces. In the previous census the total value only was enumerated, consequently it is not possible to determine how much of the gross increase in the value of field crops during the decade was due to a larger acreage or how much, if any, to a higher valuation per unit of yield. In this connection it is well to bear in mind the important part which adequate means of transportation have upon the question of net profits to the farmer from his year's operations. At present, there are no reliable statistics which give the

loss to the farmer from having to deliver his goods to the nearest market, over poor trackage. Nevertheless the fact must not be lost sight of, that the enormous railway extension from 1901 to 1911 has carried markets to many places which were without such facilities ten years ago and that the consequence of such improved conditions has been to stimulate variety in production and to procure higher net returns for the products of the soil.

The per cent proportion which the value of certain specified groups of

crops, formed of the total value of all crops, in 1910, is given in Table 39. For all Canada, the value of wheat, oats and barley formed 53·64 per cent of the value of all field crops, other grains 8·20 per cent, making a total for grains of 61·84 per cent; potatoes and roots obtained 9·91 per cent; hay and forage 26·73 per cent and various minor crops 1·52 per cent. In Manitoba, wheat, oats and barley obtained 90·99 per cent of the gross value of the field crops of the province, in Saskatchewan 86·47 per cent, in Alberta 79·34 per cent, in Ontario 39·87 per cent, in Prince Edward Island 38·05 per cent, and less than 30 per

TABLE 39. PER CENT PROPORTION OF THE TOTAL VALUE OF ALL FIELD CROPS REPRESENTED BY SPECIFIED CROP GROUPS, 1910.

cent in Quebec, British Columbia and Nova Scotia. Hay and forage crops gave more than one-half the total value in Nova Scotia, British Columbia and Quebec being 59·88 per cent, 58·71 per cent and 50·82 per cent respectively. Potatoes and roots show the smallest proportion of value in Saskatchewan and Manitoba and highest in Prince Edward Island and New Brunswick. Ontario and Quebec present the best distribution of the aggregate value of crops as between the different groups.

In Table 40, the average price per bushel, per ton or per pound, as the case may be, of field crops for the harvest year 1910, is given. In 1910, wheat was priced at over one dollar per bushel in British Columbia, Quebec and the Maritime provinces. The lowest and highest values respectively were obtained in Alberta with 74 cents per bushel and in Quebec with \$1.15 per bushel. The average price per bushel on the farm for all Canada was 79 cents. In British Columbia, Quebec and the Maritime provinces, the prices of grain generally obtained a higher range, than in Ontario and the prairie provinces. Peas, beans, flax and potatoes maintain a fairly level price in all the provinces, except Ontario where they are considerably lower. But in comparing the prices per unit obtained for farm products, as between provinces, the quantity produced must always be considered. Where only small quantities, insufficient even for local needs, of any farm product are produced, the unit value is generally higher, the cost of the imported article having been taken as the basis of valuation. For example, the price of wheat, barley and oats is higher in Quebec

and the Maritime provinces than in Ontario and the Northwest provinces. Peas, beans and roots are produced in larger quantities in Ontario than elsewhere in Canada and also obtain a smaller price per bushel.

Table 41 shows the per cent proportion of the total value of all field crops possessed by each province in 1900 and 1910, and also the average value per acre, of producing land, of such crops.

Ontario contributed 36.61 per cent of the total value of the crop production of Canada in 1910, as compared with 52.39 per cent in 1900. In the provinces west of the Great Lakes the ratio of value increased from 13.84 per cent of the total in 1900, to 38.95 per cent in 1910, while in the Maritime provinces it dropped from 10.76 per cent to 7.44 per cent. The average value per acre of crop producing land was for the census years 1900 and 1910 highest in British Columbia. The lowest value per acre in 1900 was obtained by Manitoba (\$6.05) and in 1910 by Alberta (\$8.22).

TABLE 41. PER CENT DISTRIBUTION OF THE VALUE OF FIELD CROPS, TOGETHER WITH THEIR AVERAGE VALUE PER ACRE OF LAND UNDER SUCH CROP, 1910 AND 1900.

Table 42 gives percentages indicating the relative importance of the principal crops in 1910 according to the values assigned to them by the producers themselves. For all Canada wheat ranks first with 25·19 per cent, with hay and forage second and oats third. Wheat also leads in the Prairie provinces, giving more than 60 per cent of the total value of all field crops in Manitoba and Saskatchewan and nearly 37 per cent in Alberta; hay and forage crops rank first in British Columbia and the eastern provinces; oats holds second place in all provinces, excepting British Columbia and Nova Scotia where fruits and vegetables are in second place. Potatoes come third in British Columbia, Saskatchewan, Quebec and the Maritime provinces. Wheat takes third position in Ontario, barley in Manitoba, and hay and forage crops in Alberta. The table also shows, *inter alia*, the adherence to well defined crop groups in the several

TABLE 42. PRINCIPAL CROPS CLASSIFIED ACCORDING TO VALUE OF PRODUCTION, BY PROVINCES, 1910.

Provinces	CROP RANKING FIRST IN VALUE AND PER CENTAGE, WHICH IT FORMS OF VALUE OF ALL FIELD CROPS		CROP RANKING SECOND IN VALUE AND PER CENTAGE WHICH IT FORMS OF VALUE OF ALL FIELD CROPS		CROP RANKING THIRD IN VALUE AND PER CENTAGE WHICH IT FORMS OF VALUE OF ALL FIELD CROPS

provinces. For example, of the gross cash returns to the farmers from the land, the three principal crops constituted 88·19 per cent in Manitoba, 85·82 per cent in Saskatchewan, 80·94 per cent in Nova Scotia, 80·82 per cent in British Columbia, 79·25 per cent. in Prince Edward Island, 79·24 per cent. in New Brunswick, 79·22 per cent in Alberta, 77·15 per cent in Quebec, and 62·88 per cent in Ontario; for the Dominion as a whole the value of wheat, forage crops, including hay and oats, obtained 70·76 per cent of the total cash value represented by the harvest of the year 1910. Wheat and oats obtained 83·73 per cent of the value of all field crops in Saskatchewan and 81·97 per cent in Manitoba. The greater the proportion possessed by any three principal crops in a province the smaller must be the extent of the other crops produced.

Table 43 shows the quantity and value of field crops exported for the years ended June 30, 1891, 1901 and 1911.

For the year ended June 30, 1891, Canada exported 10,760,110 bushels of cereals and flax, valued at \$7,435,285; in 1901 the exports totalled 25,579,071 bushels, valued at \$14,235,132; in 1911 the total exports of cereals and flax reached 58,919,147 bushels valued at \$56,542,862. In 1891, barley, peas and wheat ranked first in quantity exported. In 1901, the first three positions were taken by wheat, peas and oats while in 1911 wheat, oats and flax led in the order named. The exports of wheat, which totalled 2,108,216 bushels in 1891, were 9,739,758 bushels in 1901, and 48,523,222 bushels in 1911. The exports of

oats were reduced by 2,210,633 bushels from 1901 to 1911. In the census years 1891 and 1901 the quantity of flax exported was so small as not to merit attention but in 1911 it ranks third with an export of 2,197,072 bushels, valued at \$5,158,610. The value of the hay exported in 1901 was \$2,097,882, as compared with \$3,576,250 in 1911, being a gain of \$1,478,368 or 70.4 per cent. Canada, in 1901 exported 887,409 bushels of potatoes with a total value of \$364,387, and an average value of 41 cents per bushel, as compared with a total export of 690,212 bushels with a total value of \$468,405, and an average value of 67 cents per bushel in 1911.

In addition to the quantities of field crops exported in natural form, the Dominion, in 1911, exported flour to the value of \$13,854,790, oatmeal, bran and other cereal products to the value of \$4,212,573, as against \$4,015,226 worth of flour, and \$742,821 worth of oatmeal, bran and other cereal products in 1901. The values of the exports of grain products for the years ended June 30, 1891, 1901 and 1911 are given on the next page.

Kinds	VALUE OF EXPORTS OF GRAIN PRODUCE, FOR YEAR ENDED JUNE 30		
	1891	1901	1911
	\$	\$	\$
Flour of wheat.....	1,388,578	4,015,226	13,854,790

Total.....	1,610,040	4,758,047	18,067,363

The total value of the exports of all field products raw and manufactured, increased from \$21,649,284 in 1901 to \$79,139,413 in 1911.

### RENT AND WAGES.

**Rent.** Table 44 gives by provinces the number of farms rented together with area of rented farms, the value of rent and the average value of rent per acre.

The census of leased or rented lands was furnished by the tenants themselves. In the whole Dominion, there were 57,129 rented farms in 1911, as

TABLE 44. RENT OF AGRICULTURAL LANDS BY PROVINCES, 1911 AND 1901.

compared with 47,744 in 1901, and the area increased from 5,899,897 acres in 1901 to 11,082,921 acres in 1911. The rent paid in 1901 was \$7,355,323, being at the rate of \$1.25 per acre as compared with \$1.22 per acre and a total of \$13,595,351 in 1911. The large increases in the area of rented farm land in Manitoba, Saskatchewan and Alberta, at a low rate per acre, has had the effect of reducing the general average rent per acre for all Canada in the last census. In the Fifth Census, the highest rent per acre was obtained in Quebec with \$2.11 per acre, and in the previous census in Ontario with \$1.64 per acre. In Nova Scotia the rate per acre increased from 75 cents to \$1.54, in New Brunswick from 50 cents per acre to \$1.09, in Quebec from \$1.05 to \$2.11 per acre, and in Ontario from \$1.64 to \$1.92 per acre. In the prairie provinces the rent value per acre of farm lands in 1910 ranged from 57 cents in Alberta to 97 cents in Manitoba; in 1900 it ranged from 15 cents per acre in Alberta to 74 cents per acre in Saskatchewan.

A recent inquiry conducted by the Census and Statistics Office into the question of the cost of grain production in Canada in 1911 estimated the profit per acre of land under each crop to be, Manitoba, spring wheat \$5.20, oats \$4.78, barley \$5.98; Saskatchewan, spring wheat, \$1.42, oats \$1.23, barley \$3.08; Alberta, spring wheat \$1.47, oats \$2.58, barley \$3.76. Table 41 page iv also shows the gross value of the yield per acre of land under such crops in 1910 to have been for Manitoba \$9.75, for Saskatchewan \$11.64, and for Alberta \$8.22.

**Labour and Wages.** The statistics of Farm Labour and Wages given in Table 45 show for the census years 1900 and 1910 the number of weeks of hired labour on the farm, total wages paid, average wages paid per week, per farm and per 100 acres of improved land. The table also shows the ratio of wages to total investment as represented by value of farm property, and to the total value of return on investment as represented by the value of farm products.

In all the western provinces there were increases in the total wages paid, while in all the eastern provinces there were decreases. The average wage per week on farms, including board, for all Canada, was \$8.33 in 1911 as against \$5.42 in 1901, being an increase of 53.69 per cent. The highest wages, in 1911, were paid in British Columbia, with an average of \$12.35 per week for time employed, in Alberta the average was \$10.79 per week, in Saskatchewan \$10.47 per week, in Manitoba \$9.01 per week. In eastern Canada, the highest wages were paid in New Brunswick and the lowest in Prince Edward Island. For all Canada the average wage per farm in 1911 was \$48.62 as compared with \$44.48 in 1901. Computed on the area of improved land the tax for labour was less per 100 acres in 1911 than in 1901 by 6.96 per cent. The ratio of the value of wages to the value of all farm property and to the value of farm products decreased for all Canada and for each of the provinces from 1911 to 1901. In 1911 wages were .82 per cent of the total value of all property as compared with 1.35 per cent in 1901. The records of the census show it required 4.81 per cent of the total production to pay the cost of wages in 1911, as compared with 6.67 per cent in 1901. Every province shows a reduction in the ratio of wages to value of production. This result is no doubt due to the more general introduction of improved labour saving appliances which permit of more extensive agricultural operations without a corresponding increase in the number of hired helpers.

TABLE 45. FARM LABOUR AND WAGES, BY PROVINCES, 1911 AND 1901.

<sup>1</sup>The average wages per farm are computed on the total number of farms and not on the number of farms employing labor.

<sup>2</sup>The minus sign (-) denotes a decrease.

### LIVE STOCK ON FARMS.

In comparing the statistics of the number and value of domestic animals as reported in the censuses of 1911 and 1901, due consideration must be given to the fact that the census of 1911 was taken as of the date June 1, whilst that of 1901 was taken as of the date March 31. Had the census of 1911 been taken as of March 31 the number of animals of all kinds, but especially of cattle, sheep and swine would have been materially smaller, both as regards total number and average number per farm, for the reason that from April 1 to June 1 a very great number of all domestic animals are born. As the value of young animals, added from April 1 to June 1, would be relatively low, the total increase in value would not be affected to nearly the same degree as

would the total numbers of each kind; in other words, the average value per head would have been lower for figures based on an enumeration of June 1 than they would be on statistics collected as for April 1. A summary of the number and value of live stock for the Dominion as a whole is given in Table 46.

TABLE 46. SUMMARY OF THE NUMBER AND VALUE OF LIVE STOCK IN CANADA AS A WHOLE, 1911 AND 1901

Average value per head—						
1911.....\$	146.95	42.22	21.95	4.92	7.42	.46
1901.....\$	74.98	28.75	17.11	4.18	6.99	.32
Increase, total.....\$	71.97	13.47	4.84	.74	.43	.14
Increase per cent. p. e.	95.98	46.85	28.29	17.70	6.15	43.75

The foregoing table, notwithstanding the inclusion of young animals of relatively low value per head, shows for the Dominion as a whole that from 1901 to 1911 the average value per head of horses had increased by 95.98 per cent, of milch cows by 46.85 per cent, of other horned cattle by 28.29 per cent, of sheep by 17.70 per cent, of swine by 6.15 per cent and of poultry by 43.75 per cent. The total value of domestic animals, poultry and bees, in 1911, was \$631,103,420 as compared with \$275,167,627 in 1901 being an increase of 129.35 per cent in the decade. Of the total value of all farm animals, in 1911, horses contributed 60.51 per cent, cattle 31.03 per cent, sheep 1.69 per cent, swine 4.28 per cent and poultry 2.32 per cent; in 1901 the proportion was, horses 42.98 per cent, cattle 44.75 per cent, sheep 3.81 per cent, swine 5.97 per cent and poultry 2.08 per cent. For both census years, the ratio of the value of bees to the total value was less than one-half of one per cent.

#### HORSES.

In 1901, there were 1,577,493 horses in the Dominion, as against 2,598,958 in 1911, being a gain of 1,021,465 or 64.75 per cent in the decade. Every province, excepting Nova Scotia where there was a decrease of 1,088 animals or less than two per cent, participated in this increase. In 1911 of the total number of horses in Canada 48.19 per cent were west of the Great Lakes, 31.25 per cent in Ontario, 14.30 per cent in Quebec and 6.26 per cent in the Maritime provinces. For the ratio which the number in each province bears to the total, see Table 48. It is to be noted, that of the total net gain of 1,021,465 in the number of horses during the decade, the provinces of Manitoba, Saskatchewan and Alberta provided 854,666 or 83.67 per cent, in Saskatchewan

they increased by 423,667 or 505.56 per cent, in Alberta by 314,492 or 339.40 per cent, in Manitoba by 116,507 or 71.10 per cent. As was previously stated, owing to the change in the date of the taking of the census, the figures for 1911 as compared with those of 1901, have the advantage of the inclusion of young animals, born between April 1 and June 1. The number of horses by provinces is given in the following table.

TABLE 47. NUMBER OF HORSES, ALL AGES, BY PROVINCES, 1911 AND 1901.

Prince Edward Island.....	35,935	33,731	+ 2,204	+ 6.53

Table 48 gives the percentage which the number of horses in each province forms of the total number of horses in Canada at the date of March 31, 1901, and June 1, 1911, and also the average number of horses per 100 acres of improved land. The decrease in the average number of horses per 100 acres of improved land in Alberta and Saskatchewan is not due to a decrease in the actual number of animals (as a matter of fact horses increased by over 300 per cent from 1901 to 1911 in each of the provinces) but is due (1) to the passing of the ranch, (2) to the fact that the yearly increase in land under crops was brought about without necessitating a corresponding increase in horses to work it and (3) the employment of traction engines for extensive operations.

TABLE 48. PER CENT DISTRIBUTION OF HORSES, BY PROVINCES, AND AVERAGE NUMBER PER 100 ACRES IMPROVED LAND, 1911 AND 1901.

The total value of all horses in 1911 was \$381,915,505, as compared with \$118,279,419 in 1901 being a gain of \$263,636,086, or 222.89 per cent. Although Nova Scotia had over 1,000 fewer horses in 1911 than she had in 1901, yet she shows an increase in value of \$3,256,564, or 84.49 per cent. In Ontario and Quebec, the value of horses more than doubled in 10 years. Table 49 gives for all Canada, and by provinces, the value of horses in 1911 and 1901 and the increase made in the decade.

Table 50 gives the average value per head of horses (all ages), together with the average number kept per farm in 1911 and 1901. In spite of the evident enumeration of more foals in the census of 1911 than in the previous census, the value per head of horses shows increases ranging from 74 per cent

TABLE 50. AVERAGE VALUE PER HEAD OF HORSES, TOGETHER WITH THE AVERAGE NUMBER PER FARM, BY PROVINCES, 1911 AND 1901.

in Quebec to 178.69 per cent in Alberta, or an average increase for all Canada of 95.98 per cent. For all Canada, the average value per head of horses, all ages, in 1911, was \$146.95, as against \$74.98 in 1901, being an increase of \$71.97. In British Columbia, Alberta and Saskatchewan the average value has more than doubled during the decade. In 1901, the highest average value (\$96.20) was given by Manitoba and the lowest average value (\$49.74) by Alberta. In 1911 the highest average value (\$174.91) was provided by Saskatchewan and the lowest (\$115.78) by Nova Scotia.

The average number of horses per farm increased from 2.9 in 1901 to 3.6 in 1911. In other words, in the last census, every 100 farms possessed 360 horses as compared with 290 horses in the previous one. British Columbia, Alberta and Saskatchewan show decreases during the decade, in the average number of horses kept per farm. Nova Scotia is the only province in which the average number per farm remains level for the two censuses.

#### CATTLE.

The statistics of farm cattle are presented under two main heads (1) milch cows and (2) other horned cattle—the former, as the name implies, includes milk producers only, while the latter includes bulls, oxen and young cattle generally. The total number of cattle was 6,526,083 in 1911, 5,576,451 in 1901, and 4,120,586 in 1891.

**Milch Cows.** In the census of 1891, milch cows were 45.06 per cent of the total number of all cattle, 43.19 per cent in 1901 and 39.76 per cent in 1911. In Ontario, milch cows were 45.15 per cent of all cattle in 1891, 42.84 per cent in 1901 and 41.29 per cent in 1911. In Quebec, for the censuses of 1891, 1901 and 1911, milch cows were more than one-half of all cattle, being 56.69 per cent, 56.22 per cent and 51.89 per cent respectively. In the Maritime provinces, the falling off in the ratio of milch cows has been smaller than elsewhere in Canada, being less than one per cent in each decade; in 1891 they were 47.37 per cent of all cattle, 46.68 per cent in 1901 and 46.52 per cent in 1911. In the western provinces the proportion has been on the increase, milch cows were 23.27 per cent in 1891 of all cattle, 25.19 per cent in 1901, and 26.59 per cent in 1911. The number of milch cows in the Dominion by provinces in 1901 and 1911 is given in Table 51, together with the increases and decreases made in the decade. Further statistics will be found in Tables 52, 53, and 54.

TABLE 51. NUMBER OF MILCH COWS, BY PROVINCES, 1911 AND 1901.

Provinces	MILCH COWS		INCREASE (+) OR DECREASE (-)	
	1911	1901	Amount	Per cent
<b>Canada</b> .....	No. <b>2,595,255</b>	No. <b>2,408,677</b>	No. <b>+186,578</b>	p. c. <b>+ 7.75</b>
British Columbia.....	33,954	24,535	+ 9,419	+ 38.39
Alberta.....	147,649	46,101	+101,548	+220.27
Saskatchewan.....	181,168	56,634	+124,534	+219.89
Manitoba.....	155,328	141,481	+ 13,847	+ 9.78
Ontario.....	1,032,996	1,065,763	- 32,767	- 3.07
Quebec.....	754,220	767,825	- 13,605	- 1.77
New Brunswick.....	108,557	111,084	- 2,527	- 2.27
Nova Scotia.....	129,274	133,817	- 4,543	- 6.87
Prince Edward Island.....	52,109	56,437	- 4,328	- 7.66

From the foregoing table it will be seen that there was a gain of 249,348 in the number of milch cows from 1901 to 1911 in the western provinces and a decrease of 62,770 in Ontario, Quebec and the Maritime provinces, with a net increase for the whole Dominion of 186,578 or 7.75 per cent. The largest absolute increase, in the decade, was made by Saskatchewan with 124,534 followed by Alberta with 101,548. For each of these provinces the ratio of increase in 1911 over 1901 was about 220 per cent. Milch cows in Ontario decreased by 32,767 or 3.07 per cent during the decade. The decrease in Ontario constituted more than 52 per cent of the total falling off in the eastern provinces during the decade. Quebec decreased its milch cows by 13,605 or 1.77 per cent, New Brunswick by 2,527 or 2.27 per cent, Nova Scotia by 9,543 or 6.87 per cent and Prince Edward Island by 4,328 or 7.66 per cent during the last decade.

The value of milch cows is presented for Canada as a whole and for each of the provinces in Table 52. In 1911 the value was \$109,575,526 as compared with \$69,237,970 in 1901, being an increase of \$40,337,556 or 58.26 per cent. Notwithstanding a shortage of 63,170 in the number of milch cows in Ontario, Quebec and the Maritime provinces during the decade, the gross value showed a betterment of \$27,275,759. In the western provinces gains in numbers contributed to the increase in value shown, for 1911 over 1901.

Table 53 gives the average value per head of milch cows in 1901 and 1911. In order to show the average wealth of each farm, based on the number of cows kept, the average number per farm is also given. In 1911, for all Canada, the average value per cow was \$42.22 as compared with \$28.75 in 1901, being a gain of \$13.47 per animal or 46.85 per cent. In Ontario there was a gain in average value per head of 54.49 per cent, in Nova Scotia of 50.76 per cent, in New Brunswick of 45.39 per cent and in Quebec of 44.09 per cent. The province of Alberta has the smallest percentage of increase with 14.61 per cent, followed by Manitoba with 19.66 per cent. The highest priced milch cows, in the last

census, were reported for British Columbia (\$58.98) and the lowest priced in Prince Edward Island (\$29.62). Every province shows a decrease in the number of milch cows possessed by each farm holding. This decrease per farm, in eastern Canada, is due to a decrease in numbers of animals, whereas in the western provinces it is due to the fact that homesteading, whether by purchase or otherwise, had progressed so rapidly, during the decade, as to preclude the possibility of providing an adequate number of animals per farm.

possessed 44.25 per cent of all milch cows in Canada. In 1911, although her ratio had declined to 39.80 per cent, she still retained first place; for both census years Quebec occupied second place with a ratio of 31.88 per cent in 1901 and 29.06 per cent in 1911. In 1901, only 6.16 per cent of the milch cows of the Dominion were west of the Great Lakes, in 1911 the proportion had increased to 19.97 per cent.

The number of milch cows per 100 acres of improved land in Canada had fallen from 7.98 in 1901 to 5.33 in 1911. In the eastern provinces this decline has been due to the decrease in the actual number of milch cows, while in the west it is due, not to a decrease in numbers, but to other factors, which have been already stated.

**Oxen, Young Cattle, etc.** In the text to Tables 55, 56, 57, 58 and elsewhere the term "other horned cattle" will signify all cattle, except milch cows.

The number of "other horned cattle" in Canada in 1911 was 3,930,828, as compared with 3,167,774 in 1901, being an increase of 763,054, or 24.09 per cent. All the provinces, excepting Nova Scotia and New Brunswick, contributed to this betterment. Nova Scotia showed a decrease of 19,139 or 10.79 per cent and New Brunswick 2,441 or 2.10 per cent in ten years. In eastern Canada the greatest increase was registered for Quebec, and in the western provinces, for Alberta. Table 55 gives the numbers at each census period by provinces together, with the amount and ratio of variation.

Prince Edward Island.....	61,334	56,312	+ 4,992	+ 8.86

The total value of "other horned cattle" in 1911 and 1901 is shown in Table 56. For Canada, as a whole, the value of this class of cattle increased from \$54,197,341 in 1901 to \$86,278,490 in 1911, which is an increase in the decade of \$32,081,149 or 59.19 per cent. The greatest absolute increase as well as the greatest percentage of increase in value is credited to the province of Saskatchewan, Ontario comes second in the amount of increase and Alberta third. The advance in the price of "other horned cattle" during the decade, cannot perhaps be better illustrated than by a reference to the figures of their numbers

and values in New Brunswick and Nova Scotia, where in spite of an actual decrease in numbers, there were large increases in aggregate values for 1901 over 1911.

TABLE 56. VALUE OF HORNED CATTLE, OTHER THAN MILCH COWS, BY PROVINCES, 1911 AND 1901.

Prince Edward Island.....	728,059	598,903	+ 129,153	+ 21.56

The average value per head of all cattle, exclusive of milch cows, for Canada as a whole, was \$21.95 in 1911, as compared with \$17.11 in 1901, being a gain per head of \$4.84 or 28.29 per cent. In comparing the average values per head and average numbers per farm, either with one another or with current market prices obtaining at March 31, 1901, and June 1, 1911, consideration must be given to the fact that a greater number of calves are included in the last census than there were in the previous and that therefore a strict comparison is not possible. Notwithstanding this evident inclusion of young animals, every province, except Alberta, shows a marked increase in the price per head quoted on the farm. For causes already stated, the western provinces show decreases in the number of "other horned cattle" per farm. Ontario, Quebec and Prince Edward Island show increases. In Nova Scotia and New Brunswick, although both the aggregate number and the average number per farm are smaller in 1911 than in 1901, yet the total value is greater in the last census than in the previous one. Table 57 gives the average value per head of horned cattle, other than milch cows, together with the average number per farm in 1911 and 1901.

Table 58 gives the per cent proportion which the number of "other horned cattle" in each province constituted of the total for all Canada. From 1901 to 1911 the proportion of the total number in the Dominion, possessed by Ontario fell from 44.89 per cent to 37.36 per cent, by Quebec from 18.88 per cent to 17.78 per cent, by the Maritime provinces from 11.05 per cent to 8.48 per cent, by British Columbia from 3.17 per cent to 2.68 per cent; during the same period the proportion possessed by the prairie provinces increased from 21.97 per cent to 33.70 per cent. The number of animals per 100 acres of improved land, for Canada as a whole, fell from 10.50 in 1901 to 8.07 in 1911. Ontario, Quebec, Prince Edward Island and British Columbia reported an increase in the number kept per 100 acres of improved land during the decade and the other provinces a lesser number.

#### SHEEP.

According to Table 59 there were increases in the number of sheep from 1901 to 1911 in all the western provinces and decreases in all the eastern provinces. The increases aggregated 108,436 and the decreases 444,375 with a net decrease for Canada of 335,939 or 13.38 per cent. In Ontario alone, there was an actual decrease of 304,268, which was more than 90 per cent of the net decrease or 68.5 per cent of the gross decrease. The falling off in the Maritime provinces amounted to 122,692. The smallest proportion of decrease (2.66 per cent) was given by Quebec and the largest by Ontario (29.08 per cent). The biggest gain was recorded for Saskatchewan (72.93 per cent) followed by Alberta (53.37 per cent), Manitoba (26.67 per cent), and British Columbia (17.76 per cent). It is probable, owing to the fact that almost the whole increment in flocks, from young lambs, was at its maximum in June, that the falling off in the number of sheep is more serious than the figures of the table show. This heavy decrease was not because of lack of demand for mutton and lamb, as in recent years the imports of this commodity have exceeded five million pounds annually.

Table 60 gives the total value of sheep by provinces in 1901 and 1911 and Table 61 the average value per head together with the average number per farm in the two census years. It will be seen, notwithstanding the heavy decrease in numbers, that the value of the animals on foot was greater for the last census than for the previous one. Had there been no decrease in numbers, the increase in value computed on prices obtained in the census year would have been nearly ten times the figure given in the table. The decrease in sheep caused a shrinkage of agricultural capital in Ontario of \$1,090,838, in Prince Edward Island of \$16,754 and in New Brunswick, of \$5,524.

TABLE 60. VALUE OF SHEEP, BY PROVINCES, 1911 AND 1901.

Prince Edward Island.....	368,036	384,790	- 16,754	- 4.35

The average value per head of sheep, lambs included, for the Dominion, June 1, 1911, was \$4.92 as compared with \$4.18 March 31, 1901, when very few lambs could have been included. For both censuses, the lowest prices were recorded for Quebec and the Maritime provinces. In 1901 the highest average price per head (\$5.27) and the lowest (\$2.65) were obtained in Ontario and Nova Scotia. In 1911 British Columbia gave the highest average value (\$6.70) and Nova Scotia the lowest (\$3.37). In the western provinces, the increase in

the valuation of sheep on the farm, during the decade, ranged from \$1.12 in Manitoba to \$1.85 in Alberta. In eastern Canada the increase ranged from 42 cents in New Brunswick to 97 cents in Prince Edward Island.

The average number of sheep per farm in 1911, is in every province less than in 1901. The diminution in the western provinces of the number per farm is not due to decrease in animals, but to the extraordinary expansion in agriculture between 1901 and 1911, the new farms confining themselves almost wholly to grain growing as yielding the largest quick return on investment—a matter of vital importance to new farmers of limited capital.

TABLE 61. AVERAGE VALUE PER HEAD OF SHEEP, TOGETHER WITH THE AVERAGE NUMBER PER FARM, BY PROVINCES, 1911 AND 1901.

The proportion of the total number of sheep in Canada possessed by each province in 1901 and 1911 is given in Table 62. In both census years Ontario obtained the highest proportion with 41.69 per cent in the former and 34.13 per cent in the latter. Quebec possessed 29.30 per cent of all sheep in the country in 1911, the Maritime provinces 21.65 per cent, leaving less than 15 per cent for the western provinces. Although the capacity of Canada to produce more sheep in 1911 than in 1901 had greatly increased, yet the number of sheep kept on every 100 acres of improved land had fallen from 8.32 to 4.46.

SWINE.

The popularity of the hog is evidenced by the general increase recorded during the decade in numbers for every province, excepting British Columbia where there was a decrease of 7,815 or 18.87 per cent. The greatest numerical increases for 1911 over 1901 were shown by Quebec with 390,188 and by Ontario with 324,755, while the highest percentages of increase were given by Saskatchewan with 928.10 per cent followed by Alberta with 415.55 per cent. The following table gives the number of swine in Canada by provinces in 1911 and 1901.

TABLE 63. NUMBER OF SWINE IN CANADA, BY PROVINCES, 1911 AND 1901.

The total value of swine, in Canada, increased from \$16,445,702 in 1901 to \$26,986,621 in 1911, being a gain of \$10,540,919 or 64.09 per cent in the decade. In Ontario, the gain was \$3,002,071 or 28.39 per cent, in Quebec \$2,256,608 or 71.80 per cent, in Saskatchewan \$2,328,733 or 1,266.94 per cent, in Alberta \$1,739,869 or 680.83 per cent. Prince Edward Island gave a decrease in aggregate value of \$13,838 or 3.89 per cent during the decade. In Table 64 the total value of swine on farms by provinces in 1911 and 1901 is given.

According to Table 65, the average value per head of swine and the average number per farm for all Canada, have but slightly increased from 1901 to 1911, but as previously stated the changing of the date of taking the census from March 31, to June 1, has, to a certain extent detracted from the comparability of the statistics of live stock for the two censuses.

According to the Trade and Navigation Returns, the export price per head of live hogs in 1901 was \$8.79 and in 1911 it was \$14.84, being an increase of \$6.05 or 68.8 per cent over the figures of the previous census year. These trade figures, apparently, show two things, (1) that the values recorded by the enumerators are rather under, than over the actual prices and (2) that the percentage of increase in value per head was more than ten times greater than that recorded in the census tables. It is therefore safe to assume that the decreases shown in average prices from 1901 to 1911 in Quebec and the Maritime provinces are due to the smaller number of mature hogs kept over from one season to another and to the enumeration of spring litters in the last census. The same causes have tended to keep down the average price per head, in the other provinces.

TABLE 65. AVERAGE VALUE PER HEAD OF SWINE, TOGETHER WITH THE AVERAGE NUMBER PER FARM, BY PROVINCES, 1911 AND 1901.

In 1901 Ontario took first rank among the provinces in the matter of hog raising, having produced 66.39 per cent of all hogs in Canada. In 1911 it still retained its lead but with a ratio fallen to 51.93 per cent of the total production. Quebec and New Brunswick alone of the eastern provinces improved their per cent ratios from 1901 to 1911, and Alberta and Saskatchewan of the western provinces. Table 66 gives the per cent distribution of swine and the average number per 100 acres of improved land for the Fourth and Fifth Censuses of Canada.

TABLE 66. PER CENT DISTRIBUTION OF SWINE AND THE AVERAGE NUMBER PER 100 ACRES OF IMPROVED LAND, BY PROVINCES, 1911 AND 1901.

## POULTRY.

The statistics of poultry are given in Tables 67, 68, 69, 70 and 71 by provinces for 1901 and 1911, together with total and per cent increases.

Table 67 gives the total number of poultry by provinces in 1911 and 1901. In 1901, Ontario possessed 58.38 per cent of all poultry in the Dominion as against 44.19 per cent in 1911. The greatest numerical gains were made by Ontario (4,024,429), Saskatchewan (3,096,059), Alberta (2,201,318) and Quebec (1,878,151), while the greatest percentage of increase is given by Saskatchewan (1,041.24 per cent), Alberta (874.24 per cent), British Columbia (178.56 per cent), Manitoba (121.42 per cent), Quebec (57.20 per cent); in each of the other provinces the increase made in the decade was less than 40 per cent.

The number of all poultry rose from 17,922,658 with a total value of \$5,723,890 to 31,793,261 with a total value of \$14,653,773. There was, therefore, a gain from 1901 to 1911 in numbers of 13,870,603 or 77.39 per cent and in value of \$8,929,883 or 156 per cent. Attention is again called to the fact that the change in the date of taking the census has, to some extent, militated against the comparability of the figures of 1901 and 1911.

Ontario.....	14,488,980	10,461,551	+ 4,024,429	+ 38.46
Quebec.....	5,161,791	3,283,643	+ 1,878,151	+ 57.20
New Brunswick.....	982,251	714,131	+ 268,523	+ 37.60
Nova Scotia.....	951,251	798,145	+ 156,106	+ 19.56
Prince Edward Island.....	760,939	581,790	+ 179,149	+ 30.79

The census records of March 31, 1901, show that the totals of poultry for that census comprised 584,569 turkeys, 395,997 geese, 290,755 ducks and 16,651,337 hens and chickens. In the Census of June 1, 1911, turkeys numbered 863,182, geese 629,524, ducks 527,098, hens and chickens 29,773,457. Although the increases in numbers shown for 1911 are, no doubt to an appreciable extent, affected by spring hatchings, yet, that there has been a steady advancement made in poultry raising is shown by the fact that the quantity of eggs produced has increased from 84,132,802 dozens in 1901 to 123,071,034 dozens in 1911, being an increase of 38,938,232 dozens or 46 per cent in ten years.

In Table 68 the number of poultry, according to specified kinds, is given by provinces for 1901 and 1911. Turkeys show a decrease in all the Maritime provinces, geese in Nova Scotia, and ducks in Nova Scotia and Prince Edward Island. The increase in the numbers of hens and chickens extends to all provinces.

In 1901 Ontario possessed 58.39 per cent of all poultry in Canada as compared with 45.57 per cent in 1911. The per cent ratio of Ontario, Quebec and the Maritime provinces has decreased from 1901 to 1911, while that of the western provinces has increased. The number of fowl kept per 100 acres of improved land, for all Canada, rose from 59.41 in 1901 to 65.24 in 1911. In the last census for every 100 acres of improved land British Columbia possessed 212 fowl of various kinds, Ontario 106, Prince Edward Island 99, Nova Scotia 76, New Brunswick 68, Quebec 63, Alberta 56, Manitoba 38 and Saskatchewan

29. The greatest numerical increases during the decade were made in British Columbia (135.23) and Ontario (27.24). Table 69 gives the proportion which the number of poultry in each province forms of the total number in the Dominion and also the average number per 100 acres of improved land for Canada as a whole and for each of the provinces.

TABLE 69. PER CENT DISTRIBUTION OF POULTRY AND THE AVERAGE NUMBER PER 100 ACRES OF IMPROVED LAND, BY PROVINCES, 1911 AND 1901.

Table 70 gives the value of all poultry by provinces in 1911 and 1901 together with the amount and proportion of increase made during the decade. From 1901 to 1911 the average value, per family, of poultry on hand increased for all Canada from \$5.34 to \$9.84; for Ontario from \$6.86 to \$11.25, for Quebec from \$3.79 to \$6.53, for the Maritime provinces from \$3.32 to \$5.16, for the Prairie provinces from \$7.44 to \$14.51, and for British Columbia from \$5.46 per family in 1901 to \$8.59 per family in 1911.

For Canada as a whole the average value of all poultry rose from 32 cents each in 1901 to 46 cents in 1911 and the average number per farm from 32.9 to 44.5. For both census years Ontario had the largest average number of poultry of all kinds per farm being 46.7 in 1901 as compared with 63.9 in 1911 and Nova Scotia the smallest, being 14.2 in 1901 and 17.8 in 1911. Table 71 gives the average value per bird, together with the average number per farm in 1911 and 1901.

## EXPORTS OF DOMESTIC ANIMALS.

**Horses.** The figures of Table 72, extracted from Trade and Navigation Returns, give the exports of domestic animals for the decades 1881-1890, 1891-1900, 1901-1910 and for the single years 1909 and 1910.

During the first ten years, the number of horses exported to all countries was 33,474 more than in the second; and while the United States took 106,353 horses less in the latter than in the former period the United Kingdom took 67,376 more. The exportation of horses in the third decade was 94,852 less than in the second decade and 128,326 less than in the first. In the ten years 1901-1910 the exportation of horses to the United Kingdom dropped to less than  $\frac{1}{6}$  of what it was in the previous decade; to the United States to less than  $\frac{1}{3}$ , while to other countries there was an increase of more than 50 per cent. The yearly average exportation from 1881-1890 was 16,952, from 1891-1900 it fell to 13,605, from 1901-1910 it made a further decline to 4,120. The annual export for the last two years of the decade was 2,028 for 1909 and 2,762 for 1910.

A study of the previous tables will show that the falling off in the export of horses during the decade has been due, not to decreased production or smallness of prices obtainable, but to an improved home market consequent upon material progress everywhere in Canada, and more particularly because of the heavy demand for work horses created by the extension of settlement in the western provinces.

**Cattle.** The increase in the exports of horned cattle to the United Kingdom for the ten years, 1901-1910 over 1891-1900 was 39.49 per cent. To the United States for the same period there was a decrease of 48.26 per cent. The total exports of cattle in 1910 were generally less than in the preceding year.

**Sheep.** During the year 1910 our total export of sheep and lambs was 111,107 of which 104,349 or 93.91 per cent were shipped to the United States. In 1909 our export of sheep and lambs to the United Kingdom was 19,793 as compared with 1,828 in 1910.

**Swine.** The export trade in live hogs is insignificant showing only a total of 390 in 1910 and 366 in the previous year.

### PURE-BRED ANIMALS.

The records of the number of pure-bred animals by totals for Canada and each of the provinces are given in Table 73. The details of the various breeds which constitute each class of pure-bred animals are given in Table XXXV.

For all Canada, pure-bred horses show an increase from 1901 to 1911 of 22,393 or 208.19 per cent, cattle of 47,398 or 61.95 per cent, sheep of 8,299 or 18.31 per cent, swine of 15,628 or 38.27 per cent. The ratios of pure-bred animals to the total number of each class on farms were, in 1901, horses .68 per cent, cattle 1.37 per cent, sheep 1.85 per cent, swine 1.72 per cent; in 1911 pure-bred horses were 1.27 per cent, cattle 1.89 per cent, sheep 2.46 per cent and swine 1.55 per cent, respectively of the total number of each kind on farms at the date of the census.

Among pure-bred horses, Clydesdales lead with 19,911 out of a total of 33,149. In cattle, Shorthorns come first with 56,614 of which 36,307 are in Ontario, next come Holsteins with 23,292 of which 17,119 are in Ontario, Ayrshires aggregate 17,257 of which 8,695 are in Quebec. Among sheep the Shropshires lead with 17,678 followed by Oxford-downs with 9,127, Leicesters with 8,919 and Cotswolds with 8,539. The Yorkshires among swine come first with 27,730, followed by the Berkshires with 13,889.

NOTE—The minus sign (—) denotes a decrease.

ANIMALS SOLD.

In Tables 74 to 81 the records of animals sold in 1910 are given. In a study of these figures, it should not be overlooked that all sales, reported by the census, were not necessarily of animals for export and that the same animals may have been sold more than once during the year; for example, cattle, swine and poultry, especially, are bought for feeding purposes and later on, sold for home consumption or exportation. These phases of the subject will be further referred to, when the statistics of the various kinds of domestic animals sold are being dealt with.

The statistics of the sales of cattle, sheep, swine and poultry for the two censuses are not comparable. In the Census of 1901 the enumerator was required to obtain the number of these animals *killed or sold for slaughter or export*, whereas in the Census of 1911 the enumerator was instructed to make record of the number and value of horses, cattle, sheep, swine and poultry *sold* in the calendar year, and of the value only of animals slaughtered on the farm in 1910. In calling attention to and in explanation of the evident discrepancy in the figures relating to animals killed or sold in 1901, it is stated in the introduction to Volume II Agriculture, Fourth Census, page XXIX that "the question referring to the number of animals *killed or sold for slaughter or export* was not clearly understood by enumerators, and that in many cases the animals killed at home were left out of the count."

Table 74 presents a comparative statement of the average valuation per head of each kind of domestic animals on farms in the last census and the average price per head obtained for animals sold. The figures show that, generally, the provinces which gave high values for any class of animals on the farm, also gave high values for animals sold, in 1910. The statistics would therefore seem to indicate that the farmer based his estimates of the value of stock on the farm, at the date of the census, on figures obtained in sales made during the year, and should therefore be a fairly reliable indication of the wealth of Canada in all classes of animals, as well as being an accurate indication of the importance of the animal industry to the country.

**Horses.** In the Census of 1901, the number of horses sold in the census year were not recorded and the values were included with the values of other domestic animals sold in the year under the general term "Live stock sold in the year". It is therefore not possible to make comparisons either as to numbers or values of horses sold for both census years. In 1911 the number of horses sold, in all Canada, totalled 319,042 with a value of \$46,810,659 and an average value of \$146.72. For the Dominion, the average value of horses sold and of horses on hand bear a striking relationship, the former being \$146.72 and the latter \$146.95. Three provinces—Saskatchewan, Quebec and New Brunswick—record smaller average prices for horses sold, than for horses on the farm. The price per head obtained for horses sold was greater than the farmers' valuation in British Columbia, Alberta, Manitoba, Ontario, Nova Scotia and Prince Edward Island. (Table 74.)

Table 75 gives a summary of the number and value of horses sold in 1910, the ratio they form of horses on farms and the per cent distribution of sales by provinces. The proportion of horses sold to the number reported on farms at the date of the census was, for all Canada, 12.28 per cent. Ontario and Prince Edward Island made the heaviest demand on their permanent resources, the sales in the former representing 15.23 per cent and in the latter 14.66 per cent of the total number on hand. The lowest proportion of sales was made in Saskatchewan, where they represented only 8.36 per cent of the stock on hand. In the other provinces the sales made represented a figure close to the average for the Dominion. As previously stated, only a small percentage of the sales of horses reported, in the census, were for export—the census gives 319,042 as the number of horses which changed hands in 1910, while the Trade Returns show that of this number only 2,764 or less than one per cent were sent out of the country. Of the total number of sales made Ontario obtained 38.74 per cent, Quebec 14.43 per cent, the Maritime provinces 5.82 per cent, the Prairie provinces 38.80 per cent and British Columbia 2.21 per cent.

**Cattle all Kinds.** Table 76 which combines the statistics of all kinds of farm cattle—milch cows, bulls, oxen, heifers and calves—gives the number and value of all such animals sold in 1910. A very considerable number of cattle sold during the year 1910 were animals that had been purchased by the farmers previously in the year. The practice of buying animals, for fattening, is common in all parts of the Dominion, consequently the gross sales of cattle include some duplication.

The total number of cattle sold in all Canada, in 1910 was 1,752,792 with a total value of \$60,438,593 and an average value of \$34.48. The average price per head was highest in Ontario with \$38.57 and lowest in New Brunswick, with \$24.39. The ratio of number of sales to the number of cattle on farms, was highest in Alberta with 34.72 per cent, followed by Ontario with 32.14 per cent, Manitoba with 30.43 per cent, British Columbia with 28.90 per cent and Quebec with 21.33 per cent. In all the other provinces, the sales represented less than 20 per cent of all cattle on farms at June 1, 1911. Of the total sales reported in the census, Ontario obtained 45.87 per cent, Quebec 16.26 per cent, Alberta 14.65 per cent, Manitoba 7.56 per cent, Saskatchewan 6.89 per cent, the Maritime provinces 6.47 per cent and British Columbia 2.30 per cent.

**Milch Cows.** Table 77 gives the statistics of milch cows sold in 1910, the figures of which are included in the previous table. The sales of milch cows represented 21 per cent of the number of all cattle sold and 23.45 per cent of the total value obtained. The average value for all Canada was \$38.51. The price paid per head in British Columbia was \$52.29, in Ontario \$42.32, in Saskatchewan \$41.43, in Alberta \$39.14, in Manitoba \$37.75. In Quebec and the Maritime provinces the average price ranged from \$24.49 in Prince Edward Island to \$34.17 in Quebec. The sales of milch cows in Ontario, Quebec and Saskatchewan represented less than 14 per cent of the total number on farms, in the Maritime provinces, it was about 11 per cent, in Manitoba it was 18.43 per cent, in Alberta 19.78 per cent and in British Columbia 20.11 per cent.

TABLE 77. MILCH COWS SOLD IN 1910. PROPORTION WHICH THEY FORM OF MILCH COWS ON FARMS, TOGETHER WITH THE PER CENT DISTRIBUTION OF SALES, BY PROVINCES.

Prince Edward Island	6,157	150,780	24.49	11.82	1.67

**Sheep.** The number of sheep sold in 1910 was 949,039 with a total value of \$4,720,014 and an average value of \$4.97. The value of the sheep slaughtered on the farm in the same year was \$735,343 and applying the average price obtained for sheep sold, it would give a total of 1,096,996 sheep sold or slaughtered in 1910 as compared with a total of 1,342,288 in the census year ended March 31, 1901. The sales of sheep do not contain the same amount of duplication as do that of cattle or swine, therefore the record is a fair representation of the trade in sheep for that year. Of the total number of sheep sold, Ontario contributed 41.79 per cent, Quebec 28.95 per cent, the Maritime provinces 19.48 per cent and the western provinces 9.78 per cent. For Canada as a whole, the number sold formed 43.65 per cent of the total number on hand, in Ontario it represented 53.43 per cent of the number on farms, in Quebec 43.12 per cent, in Prince Edward Island 43.04 per cent, in British Columbia 41.10 per cent, in Nova Scotia, New Brunswick and Manitoba from 38.17 to 38.94 per cent, in Alberta and Saskatchewan less than 30 per cent.

TABLE 78. SHEEP SOLD IN 1910. PROPORTION WHICH THEY FORM OF SHEEP ON FARMS, TOGETHER WITH THE PER CENT DISTRIBUTION OF SALES, BY PROVINCES.

Provinces	SHEEP SOLD			Per cent which sheep sold forms of sheep on farms	Per cent distribution of sheep sold

Prince Edward Island	39,266	158,258	4.03	43.04	4.14

**Swine.** The gross returns to the farmers of Canada, in the year 1910, from the hog industry were \$51,344,366. This large amount was obtained from swine sold, (\$33,229,063) and from swine slaughtered on the farm (\$18,115,303).

If we apply the average price obtained for hogs sold to the value of hogs slaughtered on the farms, it gives a total number of 4,282,623 swine sold or slaughtered in the year 1910, as compared with 2,555,413 in the previous decade, being a gain of 1,727,210 or 67·59 per cent from 1901 to 1911. The ratio of swine sold or slaughtered to swine on farms in 1901 was 108·56 per cent as compared with 116·82 per cent in 1911. In other words for 1,000 living hogs in 1901 there was disposed of, either by sale or slaughter 1,085, in 1911 the number sold or slaughtered represented 1,178 hogs for every 1,000 live hogs. But as the figures of the last census, taken as of June 1, include young litters the ratio of hogs sold or slaughtered to living hogs for the Census of 1911 is thereby adversely affected. The number of hogs slaughtered on the farm not having been recorded on the schedules, the statistics in Table 79 have reference only to swine sold.

**Poultry.** In the year 1910 the returns from poultry to the farmers of Canada aggregated \$31,262,414, of which poultry sold, supplied \$4,819,423, poultry slaughtered on the farm \$3,172,228 and eggs \$23,270,763. It will thus be seen that if the value of live poultry on the farm at the date of the census be accepted as the capital invested in this branch of animal industry, that the total receipts gave a gross return on investment of 213·34 per cent. Table 80 gives the revenue derived from the poultry industry according to classes and by provinces.

**Summary of Value of Animals Sold or Slaughtered.** Table 81 gives a comparative statement of the value of all domestic animals sold or slaughtered in the last census period and in the preceding one. The figures for the Census of 1911 are for the calendar year 1910, whilst those of the Census of 1901 are for the census year ended March 31, 1901. Excepting for this difference, the statistics of values for each census were taken on a similar basis. In 1901 the values were given as totals (1) for animals sold and (2) for animals slaughtered on the farm. In 1911 the values of each kind of animal sold or slaughtered were given in detail. The total value of all animals sold or slaughtered in 1911 was \$177,635,587 as compared with \$75,706,902 in 1901, being a gain of \$101,928,685 or 134.64 per cent. Ontario shows the greatest amount of increase during the decade, with \$40,892,663. The highest percentages of increase are shown by the western provinces, Alberta 750 per cent, Saskatchewan 669.15 per cent, Manitoba 205.40 per cent, British Columbia 144.99 per cent. The lowest proportion of increase occurred in Nova Scotia (65.02 per cent).

## WOOL AND EGGS.

**Wool.** The wool clip of 1911 amounted to 6,933,955 lb. valued at \$1,602,044 being an average price per lb. of 23.1 cents. The clip of 1900 aggregated 10,657,597 lb. with a total value of \$1,887,064 and an average value per lb. of 17.7 cents.

**Eggs.** In 1910, Canada produced 123,071,034 dozen eggs with a total value of \$23,270,763 and an average value per dozen on the farm of 18.9 cents, as compared with a production of 84,132,802 dozen in 1900 with a total value of \$10,286,828 and an average value per dozen of 12.2 cents.

For the year ended June 30, 1901, Canada exported 11,363,064 dozen eggs worth \$1,691,640 and imported 951,745 dozen valued at \$194,188 as compared with an export in the year ended June 30, 1911, of 87,420 dozen valued at \$23,752 and an importation of 2,926,856 dozen valued at \$531,864. The price per dozen received for eggs exported in 1901 was 14.9 cents as against 27.2 cents in 1911. Imported eggs brought 18.2 cents per dozen in 1911 and 20.4 cents in 1901.

The following table gives in tabulated form the statistics relative to production, exports, imports and consumption of eggs in 1911 and 1901. It illustrates the possibilities for profitable extension of the industry, for had there been neither exportation nor importation of eggs in 1910, the home product would have fallen short by 2,839,436 dozen of supplying the local demand.

**TABLE 82. PRODUCTION, EXPORTS, IMPORTS AND CONSUMPTION OF EGGS, 1910 AND 1900.**

Note. Exports and imports are for the twelve months ended June 30, 1901 and 1911.

## EXPORTS OF ANIMAL PRODUCTS.

The quantity and value of animal products exported in the years ended June 30, 1891, 1901 and 1911 are given in Table 83. From 1891 to 1901 the exports of meats of all kinds show very heavy increases, whereas from 1901 to 1911 the exports of beef and hams only have advanced. These decreases in the exports of animal products in the last decade have occurred, in spite of the fact that in 1901 the average export value per pound of bacon was 11.2 cents, of beef 8.4 cents, of canned meats 11.3 cents, of hams 11.3 cents, of mutton 7.4 cents, of pork 6.9 cents, as compared with an export unit value in 1911 of bacon 13.7 cents, of beef 9.3 cents, of canned meats 13.4 cents, of hams 13.3 cents, of mutton 8.8 cents, of pork 11.2 cents. Previous tables having shown that there has been an increase in the number of flesh producing animals in 1911 as compared with 1901, therefore the decreased exportation during the decade, must be attributed to increased home consumption, due partly to increased population and partly to greater purchasing power of the people as a whole, and a consequent higher standard of living.

TABLE 83. QUANTITY AND VALUE OF ANIMAL PRODUCTS EXPORTED,  
1891, 1901 AND 1911.

## DAIRY PRODUCTS.

In the Census of 1901 the statistics of the Dairy industry on farms were comprised under two heads, total value of dairy product and quantity of home-made butter produced in the census year. In the last census the quantity and value of home-made butter were recorded separately. The total quantity and value of milk produced on farms were also enumerated and this value was taken as representing the total value of dairy products to the farmer, that is to say, the value of milk production with the least possible enhancement from labour.

The following table, in which the exports, imports and consumption of butter, cheese, cream, ice-cream, condensed milk, etc., have all been converted

to their milk equivalents, gives an interesting comparison of the status of the dairy industry in Canada in 1911 and 1901.

TABLE 84. COMPARATIVE STATISTICS OF THE DAIRY INDUSTRY, SHOWING PRODUCTION, EXPORTS, IMPORTS AND CONSUMPTION FOR ALL CANADA, IN THE CENSUS YEARS 1911 AND 1901.

Schedule	1911	1901	INCREASE (+) OR DECREASE (-)

Pounds of milk per cow..... lb.	3,779	2,850	+ 929	+ 32·59

NOTE—The figures giving exports and imports of dairy produce, in terms of milk, are taken from "Dairy Production in Canada," by Mr. J. A. Ruddick, Dairy Commissioner.

According to the foregoing table, the total production of milk increased by nearly three billion pounds or 42·81 per cent from 1901 to 1911. For the same period our exports of dairy products, expressed in terms of milk, decreased by 11·05 per cent and our imports similarly expressed, increased by 14·28 per cent. The consumption of dairy products, as milk for all Canada gives an aggregate increase of 3,222,825,489 lb. or 73·38 per cent and the per capita consumption gives an increase of 239·20 lb. or 29·28 per cent. The actual average production of milk per cow for all Canada, in 1911 was 3,779 lb. as against an estimated average of 2,850 lb. in 1901. The highest yield per cow, in the last census was recorded in British Columbia with 4,372 lb. followed by Ontario with 4,158 lb. and Quebec with 3,582 lb. The Maritime provinces all show low average production—Nova Scotia 3,296 lb., New Brunswick 3,177 lb. and Prince Edward Island 3,010 lb. The production in the Prairie provinces was strikingly level, being 3,565 lb. in Alberta, 3,501 lb. in Manitoba and 3,654 lb. per cow in Saskatchewan.

In Table 85 is given a comparative statement of the quantity of butter, home and factory made, produced in Canada in 1900 and 1910, together with the average production per farm in the last census year. The total quantity of butter produced in Canada in 1910 was 201,599,598 lb. of which 137,110,200 lb. was home-made and 64,489,398 lb. factory-made, as compared with an aggregate production in 1900 of 141,409,815 lb. of which 105,343,076 lb. was home-made and 36,066,739 lb. factory-made. The increase in butter, home-made, was 31,767,124 lb. or 30·15 per cent, in factory-made 28,422,559 lb. or 78·80 per cent, being an aggregate increase of 60,189,783 lb. or 42·56 per cent

in the ten years. The average production per farm of home-made butter which in 1900 was 193.4 lb. fell in 1910 to 191.8 lb. The average quantity of factory-made butter per farm increased from 66.2 lb. in 1900 to 90.2 lb. in 1910.

In 1901, as previously stated, no record was made of home-made cheese and it is probable that the quantity, then made on farms, was not appreciable. In 1911, notwithstanding that factory cheese shows a decrease in the decade of nearly 21 million pounds, home-made cheese does not amount to more than 7-10 of one per cent of the total cheese production.

TABLE 85. COMPARATIVE STATEMENT OF BUTTER AND CHEESE PRODUCTION IN CANADA, 1910 AND 1900.

Schedule	1910	1900	INCREASE <sup>2</sup>		PRODUCTION PER FARM	
			Total	Per cent	1910	1900

Total.....	201,599,598	141,409,815	60,189,783	42.56	282.0	259.6
Cheese—						
Home-made.....	1,371,092	(1)	—	—	1.9	—
Factory-made.....	199,904,205	220,833,269	-20,929,064	-42.56	279.7	405.4
Total.....	201,275,297	220,833,269	—	—	281.6	—

(1) Not reported. <sup>2</sup>The minus sign (—) shows a decrease.

Of the total production of butter in 1910 (201,599,598 lb.) there was exported 3,673,702 lb. leaving 197,925,896 lb. for home use, which with the imports of 746,102 lb. gives an aggregate of 198,671,998 pounds of butter consumed in Canada in 1910, which is at the rate of 27.56 lb. per head of population.

The exports of cheese amounted to 186,665,789 lb. or 92.6 per cent of the total production. The product of 1910 not exported (14,609,508 lb.) together with 862,862 lb. imported, provided a per capita consumption of 2.14 lb.

Table 86 gives by provinces a summary of the dairy production in 1910 and shows that Quebec produced 64.79 per cent of all factory butter made in Canada in 1910 and 30.44 per cent of all butter. It is the only province in which the home-made product did not exceed the factory-made. British Columbia produced no factory cheese and but a small quantity of cheese of any kind. The Prairie provinces have given greater attention to the production of butter than of cheese, the three provinces produced 36,428,801 lb. butter in 1910 and only 1,411,781 lb. cheese. Ontario leads in cheese making, having produced more than 68 per cent of the total Canadian product, Quebec comes second with about 29 per cent and Prince Edward Island third with 1.6 per cent of the total production.

Table 87 furnishes a comparative statement of the value of dairy products in 1900 and 1910. For all Canada, the value of dairy produce aggregated \$103,381,854 in 1910 as against \$66,470,953 in 1900, being a gain of \$36,910,901 or 55.53 per cent in the decade. In Manitoba, Saskatchewan and Alberta, the value of dairy products increased from \$4,068,656 in 1900 to \$21,861,450 in 1910 or 437.30 per cent in the ten years. Ontario gave an increase of \$8,524,714 or 24.51 per cent, Quebec \$5,570,283 or 27.56 per cent, the Maritime provinces \$3,562,144 or 56.92 per cent. The value of product per milch cow worked out at \$39.83 in the last census as compared with \$27.60 in the previous one, an increase of \$12.23 or 44.31 per cent per animal. Much of this increase is no doubt due to higher market values but the figures of Table 84 show that an appreciable portion of it is due to increased milk production, per animal, in 1910 over 1900. For both censuses the highest value per cow was in British Columbia—\$47.28 in 1901 and \$77.19 in 1911. In the last census the cash return per cow is less than the average in Quebec and the Maritime provinces and over the average in Ontario and the West.

Table 88 gives a general summary of the total amount of investment in farm property (comprising land, buildings, implements and living animals) and the gross returns on this investment, as represented by the values of field crops, fruits and vegetables, animals sold, animals slaughtered on the farm, dairy products, wool, eggs and butter in the Fourth and Fifth Censuses.

The value of all farm property increased by \$2,444,738,006 or 136.79 per cent during the decade, and the gross value of all agricultural products by \$360,057,079 or 99.28 per cent. From 1900 to 1910 the per cent ratio of the value of "Land products" and of "Animals and animal products" show but little variation. In the last census, land products gave a gross return on agricultural investment of 57.57 per cent as compared with 57.34 per cent in the previous one. Of land products, fruits and vegetables show a greater increase in the ten years than do field crops, the former, having increased by 143.08 per cent and the latter by 97.24 per cent. Animals sold and animal products gave a total increase in the decade of \$151,894,935 or 98.18 per cent. The largest increase in this class was made by "Animals sold" with \$97,262,377 or 184.36 per cent; dairy products increased by \$36,910,901 or 55.53 per cent, and wool, eggs and honey combined gave a total increase of \$13,055,349 or 104.19 per cent.

TABLE 88. COMPARATIVE STATEMENT OF THE TOTAL VALUE OF ALL FARM PROPERTY, OF LAND PRODUCTS, OF ANIMALS SOLD OR SLAUGHTERED, AND OF ANIMAL PRODUCTS IN 1910 AND 1900, TOGETHER WITH THE INCREASE MADE IN THE DECADE.

In the foregoing table and elsewhere in this volume, the statistics of the value of farm property, viz. value of land, buildings, implements and live stock on farms are for June 1, 1911, while the records of land products, animals sold and animal products are for the year 1910. The Census of 1901 being taken as for March 31, the records refer almost entirely to the operations of the year 1900.

The values of land products, in the western provinces, were adversely affected by the unfavourable seasonal conditions prevailing during the summer and autumn of 1910. In Alberta 265,699 acres, or 12.85 per cent, in Saskatchewan 159,456 acres or 2.32 per cent, in Manitoba 77,546 acres or 1.66 per cent of the area planted for the harvest year 1910 did not produce a crop. It is probable that, because the enumerators were not specifically required to obtain the record of non-productive areas, the acreage which failed to produce a harvest is not fully accounted for in Table 89.

TABLE 89. NON-PRODUCTIVE AREAS IN THE PRAIRIE PROVINCES IN THE HARVEST YEAR 1910.

Crops	NON-PRODUCTIVE AREAS, HARVEST YEAR 1910		
	Alberta	Saskatchewan	Manitoba
	acres	acres	acres
Wheat.....	133,842	64,387	12,918
Barley.....	9,843	2,948	17,948
Oats.....	109,961	58,981	44,247
Flax.....	8,945	32,310	1,448

Potatoes and roots.....	1,401	287	379
<b>Total non-productive acreage.....</b>	<b>265,699</b>	<b>159,456</b>	<b>77,546</b>

The success of all agricultural operations are inter-dependent. Whether the returns from the farm are small or great depends primarily upon (1) the suitability of the "land occupied" for farming, (2) the number and character of the live stock kept, (3) the effectiveness of the implements employed and (4) the means taken to insure proper housing of the fruits of the field, of live stock and of implements and machinery. The earnings on investment of the various agricultural products are therefore presented in Table 90 as percentages of the value of all farm property, that is to say, the value of field crops, of animals sold, and of animal products are not given as percentages of the investment in land or animals, as the case may be, but as percentages of the aggregate value of all farm property at the date of the census. For example, in the figures for 1910, for all Canada, the aggregate value of field crops, fruits and vegetables represented a per cent return of 9.83 per cent, not on the value of lands only, but on the total value of all farm property (land, buildings, implements and live stock on farms).

1910.....	20.82	12.09	9.48	2.61	8.73	2.66	1.14	3.97	0.46
1900.....	22.44	13.77	11.83	1.94	8.67	1.97	1.72	3.98	1.00
Prince Edward Island—									
1910.....	27.38	16.21	15.67	0.54	11.17	3.75	2.03	3.89	1.50
1900.....	24.37	15.61	15.16	0.45	8.77	2.21	1.84	3.63	1.09

By provinces the best percentage of return in 1910 is shown by Prince Edward Island, with 27.38 per cent for all products, being 16.21 per cent for land products, 11.17 per cent for animals sold and animal products, Ontario comes next with a total gross return on investment of 24.16 per cent, 12.64 per cent being for field crops and 11.52 per cent for animals sold and animal products. These are the only provinces which show increased gross earnings on agricultural investment in 1910 as compared with 1900. In the western provinces, owing to rapid development and the consequent heavy outlay in recent years for buildings, implements and live stock, the gross return on investment is less in 1910 than it was in 1900.

# CINQUIÈME RECENSEMENT DU CANADA.

## INTRODUCTION.

### VOLUME IV.

Ce volume du cinquième recensement du Canada traite de la statistique des industries agricoles du Dominion. Cette statistique se rapporte aux superficies des terres, à la production des récoltes des champs, aux fruits, aux animaux et leurs produits, au travail et aux gages. Des bulletins séparés furent publiés aussitôt que les résultats de la compilation furent connus donnant les statistiques agricoles de chaque province. Ces bulletins contenaient les principaux renseignements touchant l'industrie agricole dans chaque province, avec des données indiquant le progrès fait dans cette industrie durant les dix années, 1901 à 1911.

Les chiffres de la superficie et de la production des récoltes des champs pour Ontario, Québec, le Nouveau-Brunswick et l'Île du Prince-Édouard sont donnés par cantons et paroisses. Dans les autres provinces, pour différentes raisons, les chiffres sont donnés par districts électoraux. Dans la Nouvelle-Ecosse, où ni le canton ou la paroisse ne sont régulièrement établis, le comté entier dans presque tous les cas forme une municipalité. Dans les provinces du Manitoba, de la Saskatchewan et de l'Alberta, le canton géographique, contenant ordinairement 23,040 acres, est une unité trop petite pour permettre de donner dans les différents tableaux de la statistique agricole les détails pour chacun de ces cantons.

Les statistiques des propriétés agricoles, des terres occupées en propriété ou louées, des terres améliorées et non améliorées, se rapportent à la date du premier juin 1911. Les statistiques concernant le rendement des récoltes et la production des animaux se rapportent à l'année 1910.

D'après le manuel d'instructions, voir appendice pages 419-428, les recenseurs devaient inscrire seulement les terres consacrées à la production des récoltes et à la nourriture des animaux. Le terme «terre améliorée» était défini comme «terre qui a été mise en culture et qui a produit une récolte et qui peut produire des récoltes». Dans les recensements précédents, aucune définition précise n'ayant été donnée du terme «terre améliorée», le résultat a été que sous cet en-tête on a compris les superficies des terrains impropres à la culture mais employés comme pâturages; dans le présent recensement les superficies des terres arables seulement ont été comptées comme terres améliorées. Vu cette restriction dans la définition, les superficies de terres améliorées, telles que données dans le présent recensement, ne peuvent être strictement comparées avec celles des recensements précédents.

La date fixée pour la prise du recensement de 1911 était le premier juin, tandis que pour les recensements précédents la date était le 31 mars. Ce changement de date a permis au bureau du recensement de recueillir la statistique des superficies ensemencées, ou en autre état, pour l'année 1911, au moment

où les résultats des opérations agricoles étaient encore fraîches à la mémoire des cultivateurs. On peut donc croire que les statistiques se rapportant aux terres, à la tenure, à la condition, à la superficie améliorée et non améliorée, à la superficie ensemencée au printemps de 1911, ainsi que les autres statistiques touchant l'industrie agricole à la date du premier juin 1911, sont aussi exactes qu'il soit possible de les obtenir. On ne peut pas garantir le même montant d'exactitude quant aux statistiques agricoles pour l'année 1910 qui ont été recueillies en juin 1911, qu'on peut le faire pour les statistiques plus proches de la date du recensement, vu que la mémoire peut faire défaut lorsqu'il s'est écoulé un espace de temps assez considérable entre la date des faits à recueillir et la date du recueillement de ces faits.

Les statistiques de l'étendue et de la production des principales récoltes des champs en 1910 sont sans doute aussi exactes que possible, en vue du fait que la préparation des données pour 1911, représentant des opérations plus récentes, a dû aider le cultivateur à fournir avec plus d'exactitude les chiffres se rapportant à l'étendue et à la production des récoltes de l'année précédente.

Les chiffres ayant rapport aux récoltes secondaires, telles que les fruits, les légumes et aux produits des animaux, tels que les viandes et les produits laitiers, sont sans doute beaucoup moins élevés qu'ils ne devraient l'être. Les cultivateurs en général ne tiennent pas de livres et n'ont aucun système défini de comptabilité, et sont conséquemment portés à ignorer ou à rester en deçà dans leurs estimations des quantités pour les légumes, les fruits, le lait, la crème, le beurre, le fromage, les œufs et le miel consommés sur la ferme durant les saisons au cours desquelles ces produits sont en plus grande abondance.

Quant au recensement du bétail il est raisonnable de croire qu'un rapport plus juste de cette industrie a été obtenu en fixant l'inscription pour le mois de juin, alors que les animaux par la condition et le nombre sont à leur maximum, que si l'inscription eut été fixée pour la fin de mars. On devra se rappeler, cependant, en comparant le nombre et la valeur du bétail d'après les recensements de 1911 et 1901, qu'un plus grand nombre de jeunes animaux se trouvent compris dans le recensement de 1911 que dans celui de 1901, et que le prix moyen par tête en 1911 se trouve ainsi réduit.

Tandis qu'il est possible de surmonter les obstacles rencontrés dans le recueillement des statistiques agricoles dont il est question dans le paragraphe précédent, il n'en reste pas moins vrai qu'un autre obstacle réside dans le manque d'appréciation d'un tel travail, non seulement chez les personnes appelées à fournir les renseignements, mais souvent aussi chez les recenseurs eux-mêmes qui ne comprennent pas bien toute l'importance d'un recensement bien fait. Ils ne réalisent pas que les chiffres d'un recensement sont le seul moyen de comparer au point de vue économique le progrès accompli par un pays dans ses différentes industries.

Dans le texte et les tableaux de l'introduction, là où la chose est possible, les statistiques du recensement de 1911 sont présentées sous forme de comparaisons avec les recensements précédents. De cette manière une idée plus claire est donnée (1) des augmentations dans les superficies, les récoltes, les animaux et leurs produits, d'une décade à l'autre, (2) de prévoir le progrès des futures opérations agricoles et (3) de bien comprendre le mouvement qu

se fait vers l'Ouest dans la production agricole d'un recensement à l'autre. Par exemple le tableau 25 indique comment la proportion des superficies distribuées en récoltes a graduellement diminué dans les provinces de l'Est, tandis qu'elle a augmenté d'une manière correspondante dans celles de l'Ouest. De même pour la proportion des animaux et leurs produits dans les tableaux vii et viii. Il n'entre pas dans le plan de cette introduction de faire une longue analyse des différentes industries agricoles.

La superficie totale du Canada est donnée comme étant de 2,306,502,153 acres, dont les neuf provinces occupaient 977,585,513 acres à la date du recensement, juin 1911. Le reste de la superficie totale appartient au Yukon (132,113,360 acres) et aux Territoires du Nord-Ouest (1,196,803,280 acres). On a tenu aucun compte des superficies du Yukon et des Territoires du Nord-Ouest dans les calculs des tableaux de ce volume, vu qu'il n'est pas probable qu'une étendue appréciable de leur territoire soit consacrée à l'agriculture avant que les terres dans les autres provinces aient été occupées.

D'après les calculs faits au bureau du recensement en 1909 et révisés récemment, le tableau qui suit indique, pour 1911, les superficies occupées, avec estimations des superficies possibles en terres occupées comme fermes en exploitations agricoles dans le Dominion. Les estimations des terres capables d'être occupées sont basées en partie sur les chiffres des terres à culture occupées à la date du recensement de 1911, et en partie sur les chiffres proportionnels de la superficie totale fixée approximativement, mais se rapportant aux faits plus ou moins déterminés, quant au caractère des terres dans chaque province et aux augmentations dans les superficies des terres occupées et améliorées.

**TABEAU 1. SUPERFICIE TOTALE DES TERRES OCCUPÉES ET SUPERFICIES CONSIDÉRÉES SUSCEPTIBLES DE CULTURE AU CANADA À LA DATE DU RECENSEMENT, JUIN 1911.**

Provinces	Total des terres	Occupées comme terres en culture		Estimées comme terres susceptibles de culture	
	acres	acres	pour-cent du total	acres	pour-cent du total
Colombie-Britannique.....	226,186,370	2,540,011	1-12	22,618,000	10
Alberta.....	161,872,000	17,751,899	10-97	97,123,000	60
Saskatchewan.....	155,764,100	28,642,985	18-39	93,458,000	60
Manitoba.....	41,169,098	12,228,233	29-70	24,700,000	60
Ontario.....	141,125,330	22,171,785	15-71	56,450,000	40
Québec.....	218,723,687	15,613,267	7-14	43,745,000	20
Nouveau-Brunswick.....	17,863,266	4,537,999	25-40	10,718,000	60
Nouvelle-Ecosse.....	13,433,671	5,260,455	39-01	8,092,000	60
Ile du Prince-Edouard.....	1,397,991	1,202,354	86-01	1,258,190	90
<b>Totaux.....</b>	<b>977,585,513</b>	<b>109,948,988</b>	<b>11-25</b>	<b>358,162,199</b>	<b>36</b>

D'après les chiffres du tableau précédent la superficie totale des terres des neuf provinces était de 977,585,513 acres, dont 109,948,988 acres ou 11-25 pour cent étaient occupés comme terres à culture. L'estimation des terres susceptibles de culture, situées dans les provinces telles que constituées à la date du recensement, était de 358,162,190 acres ou 36 pour cent de la superficie totale contenue dans les limites provinciales. La superficie des terres des

neuf provinces du Canada a augmenté de 977,585,513 acres à 1,401,316,413 acres par l'application de la loi d'Extension de 1912 qui détachait des Territoires du Nord-Ouest 423,730,900 acres, dont 223,429,600 acres ont été ajoutés à Québec, 93,037,700 acres à Ontario et 107,263,600 acres au Manitoba.

De l'étendue totale des terres des neuf provinces, 63,422,338 acres ou 6.48 pour cent étaient occupées comme terres à culture en 1901, comparativement à 109,948,988 acres ou 11.25 pour cent en 1911, formant une augmentation, pour le Canada, de 73.36 pour cent ou 46,526,650 acres en dix ans. De 1901 à 1911 la Saskatchewan a accru son étendue en terres à culture occupées de 24,809,551 acres ou 647.18 pour cent; l'Alberta, de 15,016,269 acres ou 548.91 pour cent; la Colombie-Britannique de 1,042,592 acres ou 69.63 pour cent; le Manitoba de 3,384,886 acres ou 38.28 pour cent. Parmi les provinces de l'Est, Québec est celle qui montre le gain le plus élevé, ayant augmenté son étendue en terres à culture occupées de 1,169,092 acres ou 8.09 pour cent; Ontario indique une augmentation de 822,261 acres ou 3.85 pour cent; la Nouvelle-Ecosse, de 179,554 acres ou 3.53 pour cent; le Nouveau-Brunswick, de 94,599 acres ou 2.13 pour cent, et l'Île du Prince-Edouard, de 7,846 acres ou environ trois cinquièmes de un pour cent.

TABLEAU 2. SUPERFICIE TOTALE DES TERRES ET TERRE À CULTURE, PAR PROVINCES, 1911 ET 1901.

Provinces	Superficie totale des terres	TERRES À CULTURE		AUGMENTATION DES TERRES À CULTURE EN DIX ANS	
		1911	1901	numérique.	pour cent
		acres	acres	acres	p.c.
Colombie-Britannique.....	226,186,370	2,540,011	1,497,419	1,042,592	69.63
Alberta.....	161,872,000	17,751,899	2,735,630	15,016,269	548.91
Saskatchewan.....	155,764,100	28,642,985	3,833,434	24,809,551	647.18

Territoires du Nord-Ouest.....	1,196,803,280	-	-	-	-
<b>Total, Canada.....</b>	<b>2,306,502,153</b>	<b>109,948,988</b>	<b>63,422,338</b>	<b>46,526,650</b>	<b>73.36</b>

Le tableau 3 donne sous forme de sommaire les principaux faits se rapportant à la population urbaine et rurale du Dominion, aux fermes, aux terres à culture et propriétés agricoles pour les années 1901 (1er mars) et 1911 (1er juin).

De 1901 à 1911 la population rurale a augmenté de 17.20 pour cent et la population urbaine de 62.29 pour cent, formant une augmentation générale pour le Canada de 34.17 pour cent durant la décade. En 1901, 62 personnes sur chaque 100 de la population totale vivaient sur des terres contre 54 sur chaque 100 en 1911. Un fait assez remarquable c'est que l'augmentation

pour cent du nombre de fermes, de 1901 à 1911, a été dans la même proportion d'augmentation que celle de la population durant la même période, tombant seulement de 2.97 pour cent. Tandis que l'augmentation pour cent dans le nombre de fermes n'a pas égalé celui de la population totale, l'augmentation pour cent dans l'étendue en terres à culture et en terres en récoltes a été plus grande que l'augmentation proportionnelle de la population. L'accroissement dans l'étendue des terres à culture était de 73.36 pour cent, et de 78.41 pour cent dans l'étendue des terres en récoltes de toutes sortes. En 1911 il y avait une moyenne de 6.76 acres de terres améliorées pour chaque personne au Canada, contre 5.61 acres en 1901. Le nombre moyen d'acres en récoltes par personne s'est élevé de 3.68 acres en 1901 à 4.89 acres en 1911. En d'autres termes, cela veut dire que l'augmentation en terres consacrées à la production des récoltes en 1911 sur 1901, a fait monter la capacité d'acheter de 33 pour cent à peu près.

Les terres occupées dans le Canada en 1911 étaient au nombre de 714,646 et contenaient 109,948,988 acres, dont 48,733,823 acres étaient améliorées; des 61,215,165 acres restant non améliorées, 17,477,526 acres étaient en forêt naturelle, 4,174,270 acres en terrains marécageux, et la balance en prairie vierge et abattis en voie de préparation pour la charrue.

La valeur totale des propriétés agricoles, (terres en propriété, bâtiments, instruments aratoires et bétail) s'est élevée au chiffre énorme de \$4,231,840,636 en 1911. De ce vaste total la valeur des terres représentait \$2,519,777,901 ou 59·55 pour cent, la valeur des bâtiments \$823,951,767 ou 19·47 pour cent, celle des instruments aratoires \$257,007,548 ou 6·07 pour cent, et celle du bétail \$631,103,420 ou 14·91 pour cent. En 1901 la valeur des propriétés agricoles était de \$1,787,102,630, dont la valeur des terres représentait 56·36 pour cent, des bâtiments 22·15 pour cent, des instruments aratoires 6·08 pour cent et du bétail 15·41 pour cent. La valeur de toutes les classes de propriété agricole a plus que doublée de 1901 à 1911. L'augmentation proportionnelle dans la valeur des terres durant la décade était de 150·12 pour cent, des bâtiments de 108·17 pour cent, des instruments aratoires de 136·51 pour cent et du bétail de 129·35 pour cent, formant un total de 136·79 pour cent pour les différentes classes réunies. De l'augmentation totale de \$2,444,738,006 durant la décade, dans la valeur des propriétés agricoles, les terres ont contribué 61·86 pour cent, les bâtiments 17·51 pour cent, les instruments aratoires 6·07 pour cent et le bétail 14·56 pour cent.

La valeur moyenne de la propriété agricole a augmenté de 80·48 pour cent par ferme de 1901 à 1911, le gain dans la valeur des terres était de 90·63 pour cent, des bâtiments de 58·66 pour cent, des instruments aratoires de 80·27 pour cent et du bétail de 74·81 pour cent. La valeur moyenne par acre de terre améliorée en 1911 était de \$16·90 pour les bâtiments, de \$5·27 pour les instruments aratoires, et de \$12·95 pour le bétail, comparativement à \$13·12 pour les bâtiments, à \$3·60 pour les instruments aratoires et à \$9·12 pour le bétail en 1901. Ces gains dans la valeur de la propriété agricole, bien qu'ils peuvent être attribués dans une certaine mesure au coût élevé de la production et des matériaux, s'expliquent assez justement par l'augmentation dans l'étendue moyenne par ferme de 116·44 acres en 1901 à 153·85 acres en 1911. Voir les détails par provinces au tableau 10, page xviii.

Dans le tableau 4 les occupants de terres en 1891, 1901 et 1911 sont classifiés selon le nombre d'acres par ferme, c'est-à-dire que les fermes d'une certaine étendue sont groupées ensemble et mises sous un même en-tête. Par exemple, les fermes ayant 5,6,7,8, 9 ou 10 acres sont classifiées comme "5 à 10 acres" et ainsi de suite pour les autres groupes. Dans le recensement de 1891 toutes les fermes de 10 acres et au-dessous étaient groupées ensemble.

De 1901 à 1911 il y a eu dans les provinces de l'Est une diminution de 6,423 dans le nombre de lots ou lopins de terre de moins d'un acre en étendue, et dans les provinces de l'Ouest une augmentation totale de 2,949, avec une augmentation dans l'ensemble pour le Canada, de 3,474. En général il y a eu moins de petites étendues inscrites en 1911 qu'en 1901, vu qu'au dernier recensement les recenseurs, selon le tarif de rémunération, n'étaient payés que pour les entrées de terrains ayant produit une récolte évaluée à pas moins de \$50. L'accroissement des centres urbains et l'absorption des faubourgs par les villes ont aussi contribué à réduire le nombre de lots à culture de cette étendue dans l'Est du Canada. L'augmentation dans le nombre des lopins de terre dans les provinces de l'Ouest n'a aucune signification particulière, vu que les cités et villes de ces provinces, dans bien des cas, n'étaient pas encore fondées en 1901.

Le tableau 5 indique, pour le Canada et chacune des provinces, la distribution pour cent des fermes par classes, donnant la proportion pour cent des fermes dans chaque groupe en 1891, 1901 et 1911. Tel que déjà mentionné le chiffre des fermes de 10 acres et moins n'a pas été donné séparément en 1891, et par conséquent aucune comparaison du groupe de "5 à 10 acres" ne peut être faite avec les chiffres des recensements précédents. Dans les deux groupes de fermes de 101 à 200 acres et de 200 acres et plus, pour tout le Canada, il y a eu une augmentation constante dans les chiffres respectifs. En 1891, environ 85 fermes sur 1,000 avaient une étendue de 200 acres comparative-ment à 119 en 1901 et à 186 en 1911.

Dans les Provinces maritimes, dans Québec et dans Ontario la proportion relative de l'étendue des terres entre chaque recensement n'offre aucun changement important. En 1911, il y avait 44.80 pour cent de toutes les terres du Manitoba, 47.27 pour cent de celles de la Saskatchewan et 39.06 pour cent de celles de l'Alberta qui contenaient au-dessus de 200 acres chacune. Les

fermes de 101 à 200 acres prédominant dans les provinces de l'Ouest, et celles de 51 à 100 acres dans Ontario, Québec et les Provinces Maritimes.

Le tableau 6 donne les chiffres comparatifs concernant la tenure des terres occupées, c'est-à-dire si l'occupant est propriétaire ou locataire, ou dans certains cas s'il est propriétaire et locataire à la fois de la terre exploitée par lui.

L'augmentation dans le nombre total d'occupants de terres durant les dix années est de 169,958. Les nouvelles provinces de la Saskatchewan et de l'Alberta ont contribué 134,770, ou plus de 79 pour cent de cette augmentation, et si on ajoute aux chiffres de ces deux provinces ceux du Manitoba et de la Colombie-Britannique, on trouve que 94 pour cent de l'augmentation totale appartient au territoire situé à l'ouest des Grands lacs. Des provinces de l'est, la Nouvelle-Ecosse est la seule qui montre une diminution dans le nombre d'occupants de terres, et ceci en grande partie dans le cas des propriétaires. En 1891 le nombre d'occupants de terres rapportés pour la Nouvelle-Ecosse était de 64,643 en 1901, ce chiffre était tombé à 56,033 et en 1911 à 53,634.

Les statistiques du nombre de fermes vacantes, au tableau 24, page xxxiii, expliquent jusqu'à un certain point la diminution dans le nombre de terres occupées dans la Nouvelle-Ecosse et les faibles augmentations dans les autres provinces de l'est.

1891.....	15,137	14,295	842	—	94,44

Pour tout le Canada, les propriétaires constituaient 84,58 pour cent de la totalité des occupants de terres en 1891, 87,10 pour cent en 1901 et 88,60 pour cent en 1911. Dans l'Ile du Prince-Edouard et la Nouvelle-Ecosse, au delà de 95 pour cent de toutes les fermes étaient exploitées par des propriétaires, 94,55 pour cent dans le Nouveau-Brunswick, 92,28 pour cent dans Québec, 92,05 pour cent dans l'Alberta, 90,74 pour cent dans la Saskatchewan, 85,81 pour cent dans la Colombie-Britannique, et moins de 85 pour cent des fermes dans Ontario et Manitoba étaient occupées par des propriétaires au dernier recensement.

L'augmentation dans la classe des occupants désignés comme «propriétaires et locataires», dans les provinces de l'ouest, correspond à l'accroissement de cette classe de locataires annuels «croppers», ou comme ils sont souvent désignés «share farmers.»

Le tableau 7 donne l'étendue totale des terres occupées pour des fins agricoles, pour le Canada et les provinces en 1901 et 1911, et la quantité de ces terres en propriété ou en location, améliorées ou non améliorées, en forêts ou marécages, ainsi que l'augmentation dans chaque classe durant la décade. Pour tout le Canada, l'étendue en terres améliorées n'a pas augmenté dans les mêmes proportions que l'étendue totale des terres consacrées aux fins agricoles. L'augmentation faite depuis 1901 à 1911 dans l'étendue des terres à culture, est une proportion de 2½ fois plus grande que celle faite dans l'étendue des terres améliorées. En 1911, 44·32 pour cent de toutes les terres occupées était donnée comme «améliorées», comparativement à 47·56 pour cent en 1901.

Des 46,526,650 acres ajoutés à l'étendue des terres occupées durant la décade, les provinces de l'ouest ont contribué 44,253,298 acres, ou plus de 95 pour cent du total, la Saskatchewan seule comptant au-delà de 53 pour cent et l'Alberta 39,825,820 acres ou 85½ pour cent. Dans la Saskatchewan et l'Alberta, l'augmentation annuelle moyenne dans l'étendue des terres occupées s'élevait à 3,982,582 acres, ce qui veut dire que si chaque occupant de terre recevait seulement un quart de section de terre (160 acres) et les additions annuelles, l'augmentation annuelle moyenne des occupants de terres s'élèverait à 24,981, ou un total de 248,912 pour les dix années, tandis que, de fait, l'augmentation totale dans le nombre d'occupants de terres dans les deux provinces ne s'est élevée qu'à 134,770 de 1901 à 1911, et l'étendue moyenne des terres occupées, en vertu soit d'un achat ou d'une préemption, était de 293 acres. On voit par le tableau 4, page xiii que les fermes de plus de 200 acres étaient douze fois plus nombreuses dans l'Alberta et neuf fois dans la Saskatchewan en 1911 qu'en 1901. Le nombre de fermes de plus de 200 acres pour tout le Dominion a augmenté de 68,276 de 1901 à 1911, et de ce chiffre, seulement 1,240 étaient en dehors des provinces des prairies.

La tendance à occuper de grandes étendues de terres dans l'Ouest est due sans doute au fait que la terre est consacrée presque exclusivement à la récolte du grain, avec des rendements nécessairement proportionnés aux frais d'exploitation.

De 1901 à 1911 la proportion pour cent de l'étendue des terres en location était plus élevée que celle des terres en propriété. Dans la Colombie-Britannique durant la décade il y a eu un gain de 60·80 pour cent dans les terres en location et de 123·96 pour cent dans les terres en propriété; dans la Saskatchewan, un gain de 609·02 et 1,570·44 pour cent, et dans la Manitoba un gain de 27·99 et 146·12 pour cent. Dans Ontario, Québec et le Nouveau-Brunswick l'étendue des terres en location était moindre en 1911 qu'en 1901, tandis que dans la Nouvelle-Ecosse et l'Île du Prince Édouard il y a eu une faible augmentation dans le nombre de fermes louées. L'étendue en terres à bois dans Ontario, Québec et le Nouveau-Brunswick est moindre en 1911 qu'en 1901, et les augmentations indiquées pour le Manitoba, la Saskatchewan et l'Alberta se trouvent dans le nord de ces provinces.

TABLEAU 7.—ÉTAT COMPARATIF DE LA SUPERFICIE DES TERRES EN CULTURE PAR PROVINCES EN 1911 ET 1901, AINSI QUE L'AUGMENTATION FAITE EN DIX ANS.

NOTA:—Le signe (—) indique une diminution.

Le tableau 8 donne un état comparatif de la distribution des terres à culture par provinces en 1901 et 1911. En 1901, sur la superficie totale des terres des neuf provinces, 6.49 pour cent était occupée comme terres à culture, comparativement à 11.25 pour cent en 1911. La proportion des terres améliorées, pour les raisons déjà données à la page vii, est tombée de 47.56 pour cent de la superficie totale en 1901 à 44.32 pour cent en 1911.

Dans l'île du Prince-Edouard les fermes ou exploitations agricoles représentaient 86.01 pour cent de la superficie totale de la province, dans la Nouvelle-Ecosse 39.01 pour cent, dans le Manitoba 29.70 pour cent, dans le Nouveau-Brunswick 25.40 pour cent, dans la Saskatchewan 18.39 pour cent, dans l'Ontario 15.71 pour cent, dans l'Alberta 10.97 pour cent, dans Québec 7.14 pour cent et dans la Colombie-Britannique 1.12 pour cent.

La proportion en forêt naturelle sur les fermes est moindre en 1911 qu'en 1901 pour toutes les provinces excepté le Manitoba et la Colombie-Britannique, mais comme les étendues en terrains marécageux et incultes n'ont pas été prises en 1901 ceci explique la diminution dans la proportion des terres à bois sur les fermes.

L'étendue moyenne des fermes et le nombre d'acres améliorés par ferme sont donnés au tableau 9 pour 1911 et 1901. Pour tout le Canada l'étendue moyenne des fermes durant la décade s'est élevée de 116.44 acres à 153.85 acres, soit une augmentation de 37.41 acres. L'étendue moyenne des fermes est moindre dans les provinces de l'est que dans celles de l'ouest. La moyenne élevée pour les provinces des prairies est due au fait que la plupart des fermes ont été acquises en vertu de la loi des «homestead» qui permettait à chaque adulte

<sup>1</sup>Le signe (-) indique une diminution.

mâle de devenir acquéreur de 160 acres au moins; de cette manière dans bien des cas plusieurs quarts de sections furent retenus dans la même famille. Pour les provinces de l'est, la moyenne des fermes de plus grande étendue appartient au Nouveau-Brunswick (118·76 acres). Les plus petites fermes sont dans l'île du Prince-Edouard où la moyenne est de 83·68 acres. Tandis que les fermes dans tout le pays ont augmenté, en étendue, de 37·41 acres à 32·13 pour cent entre 1901 et 1911, les provinces de l'île du Prince-Edouard, du Manitoba et de la Colombie-Britannique indiquent des diminutions. Dans l'île du Prince-Edouard la moyenne est tombée de 85·24 à 83·68 acres; dans le Manitoba, de 272·14 à 268·13 acres; dans la Colombie-Britannique, de 222·20 à 137·54 acres durant la décade. Cette énorme différence dans les chiffres de la Colombie-Britannique s'explique par l'augmentation dans le nombre de petites fermes durant la décade et dans le développement de l'industrie fruitière et des jardins maraîchers. Environ 60 pour cent de la totalité des fermes de la Colombie-Britannique, en 1911, contenaient moins de 51 acres—38·72 pour cent de toutes les fermes étant de 10 acres ou moins. Seulement 31 pour cent des fermes en 1901 contenaient moins de 51 acres—20 pour cent de la totalité des fermes ayant 10 acres et moins chacune.

L'étendue moyenne des terres améliorées par ferme offre une meilleure base pour des fins de comparaison, quant à l'étendue moyenne d'une ferme, que ne le fait le chiffre des terres occupées. Quant à l'étendue des terres améliorées, les provinces des prairies occupent encore le premier rang, Manitoba venant la première avec la moyenne de 147·92 acres, suivie de la Saskatchewan avec 123·19 acres et de l'Alberta avec 70·76 acres propres à la culture. Les plus petites moyennes en terres améliorées se trouvent dans la Nouvelle-Ecosse (23·44 acres) et dans le Nouveau-Brunswick (37·81 acres). Les augmentations absolues et proportionnelles les plus élevées durant la décade, sont dans la Saskatchewan avec 40·72 acres par ferme ou 49·38 pour cent. La

Colombie-Britannique indique une diminution de 44·42 acres par ferme ou 63·20 pour cent. Pour l'ensemble du Canada la moyenne des terres améliorées par ferme a augmenté de 55·38 acres en 1901 à 68·19 acres en 1911.

Le tableau 10 donne la valeur de toute propriété agricole par provinces en 1911 et 1901. Le plus grand progrès dans la valeur de la propriété agricole durant la décade a été fait par la province de la Saskatchewan, qui montre un gain de 1,773·14 pour cent, suivie de l'Alberta avec un gain de 1,319·71 pour cent, de la Colombie-Britannique avec 463·23 pour cent et du Manitoba avec 206·06 pour cent. Dans les provinces de l'est l'augmentation proportion-

nelle a varié de 31 pour cent dans l'Ontario à 81 pour cent dans Québec. La Saskatchewan montre aussi la plus forte augmentation proportionnelle, de 1901 à 1911, dans la valeur des bâtiments, des instruments aratoires et du bétail, n'étant surpassée dans la valeur des terres que par l'Alberta. Des anciennes provinces, Québec offre la plus forte augmentation proportionnelle dans la valeur de toutes les classes de propriété agricole durant la décade. L'augmentation extraordinaire dans la valeur de toutes les classes de propriété agricole dans les provinces de l'ouest de 1901 à 1911, comparativement aux provinces de l'est, est due en grande partie à l'augmentation de 159,609 nouveaux homestead. L'établissement de chaque homestead nouveau représente un montant considérable pour les bâtiments, les instruments aratoires et le bétail, et quant à l'augmentation dans la valeur des terres occupées pour des fins agricoles, elle résulte en partie des améliorations et du développement qu'elles ont reçues, mais de beaucoup la plus forte proportion représente la valeur des terres obtenues gratis de l'Etat. En d'autres termes la valeur n'est devenue active et susceptible d'être comptée qu'après l'aliénation des terres de la couronne aux individus. La rapidité avec laquelle l'aliénation des terres s'est faite dans les provinces de l'ouest est indiquée par le fait que dans le recensement de 1901 l'Alberta comptait 640 cantons occupés et la Saskatchewan 855, contre 2,056 et 2,874 respectivement en 1911. Le tableau 7 indique qu'une augmentation d'au-delà de 95 pour cent dans l'étendue des terres à culture, de 1901 à 1911, a eu lieu dans l'ouest.

Le progrès représenté dans la valeur de toutes les classes de propriété agricole dans Ontario, Québec et les provinces maritimes n'est que légèrement affecté par les terres à culture nouvellement occupées, ou par les fonds déboursés pour bâtiments, instruments aratoires ou bétail. On peut donc assumer que, pour les provinces de l'est, ces augmentations sont dues principalement au coût élevé des matériaux de construction, des instruments et des animaux de la ferme, et ne représentent pas à un aussi haut degré que pour l'ouest les fortes additions correspondantes à la propriété physique.

La valeur totale de la propriété agricole par ferme, selon le tableau 11, s'est accrue de \$3,280.97 à \$5,921.57, de 1901 à 1911, soit un gain par ferme de plus de 80 pour cent. La valeur moyenne de chaque classe de propriété agricole, par ferme, a augmenté considérablement durant la décade. La valeur des terres a augmenté de \$1,849.61 par ferme en 1901 à \$3,525.91 en 1911; celle des bâtiments, de \$726.68 par ferme à \$1,152.95; celle des instruments aratoires, de \$199.50 à \$359.63 et celle du bétail, de \$505.19 à \$883.10 par ferme.

La proportion d'augmentation dans la valeur des terres et des bâtiments par ferme, de 1901 à 1911, pour des raisons déjà données, est plus élevée dans les provinces de l'ouest que dans celles de l'est. Les plus hautes valeurs moyennes des bâtiments par ferme, en 1911, se trouvent dans la Colombie-Britannique, Ontario, Manitoba et Québec, dans l'ordre nommé. Pour les instruments aratoires la plus haute valeur moyenne revient à la province de Manitoba avec \$612.99 par ferme, suivie de la Saskatchewan avec une moyenne de \$597.04 par ferme; les plus basses moyennes pour les instruments aratoires se trouvent dans la Nouvelle-Ecosse et le Nouveau-Brunswick avec \$85.37 dans la première et \$159.82 dans la dernière de ces provinces. L'Alberta et la Colombie-Britannique indiquent des diminutions dans la valeur moyenne du bétail par ferme; dans ces deux provinces le nombre d'animaux est plus grand et le prix par animal plus

NOTA.— Le signe (-) indique une diminution.

élevé en 1911 qu'en 1901, mais la diminution s'explique par le fait que le nombre des fermes a augmenté en plus grande proportion que celui du bétail (voir tableau 4, page xiii). La disparition du ranch a aussi affecté considérablement l'élevage.

Le tableau 12 demande peu d'explication. La valeur totale de chaque classe de propriété agricole pour tout le Canada est représentée par le chiffre 100. La proportion que donne chaque province, par rapport au total, est

indiquée par les chiffres pour cent dont l'addition pour les différentes provinces forme 100. Par exemple, de la valeur totale des terres en 1911, la Colombie-Britannique a fourni 5.61 pour cent, l'Alberta 13.68 pour cent, la Saskatchewan 23.15 pour cent, le Manitoba 12.30 pour cent, Ontario 24.28 pour cent, Québec 16.83 pour cent, le Nouveau-Brunswick 1.31 pour cent, la Nouvelle-Écosse 2.07 pour cent et l'Île du Prince-Édouard .77 pour cent de la valeur totale des terres à culture. Les chiffres, quant aux autres classes, se lisent de la même manière.

L'augmentation dans la valeur des différentes classes de propriété agricole dans les provinces de l'Ouest est une des choses les plus remarquables que nous offre le développement matériel du pays durant la décade, le chiffre proportionnel de toutes les propriétés agricoles y ayant augmenté de 14.77 à 46.73 pour cent; la valeur des terres a avancé de 15.92 à 54.74 pour cent, la valeur des bâtiments, de 8.54 à 25.33 pour cent; la valeur des instruments aratoires, de 17.87 à 43.98 pour cent, et la valeur du bétail, de 21.95 à 43.72 pour cent de la valeur totale.

Les chiffres du tableau 13 donnant pour 1911 et 1901 un état comparatif de la distribution proportionnelle des valeurs agricoles par provinces, selon les classes, devront se lire horizontalement; ces chiffres représentent la proportion pour cent de chaque province dans la valeur totale des propriétés agricoles du Canada.

Le tableau 12 donne la part pour cent de la valeur totale contribué par chaque province, tandis que le tableau 13 donne en détail la proportion des valeurs séparées des terres, des bâtiments, des instruments aratoires et du bétail, par rapport au total. Par exemple, la part pour cent de la Colombie-Britannique dans la valeur totale des propriétés agricoles en 1911 (Tableau 12- 4.46 pour cent) était divisée entre les différentes classes de propriété agricole de la manière suivante: terres 3.31 pour cent, bâtiments .70 pour cent, instruments aratoires .08 pour cent, et bétail 0.34 pour cent. Et ainsi pour

les autres provinces, les totaux des différentes classes de propriété agricole constituent la part pour cent de chaque province dans la valeur totale.

### VERGERS ET JARDINS.

Le tableau 14 donne, pour tout le Canada, les chiffres comparatifs des superficies consacrées à la production des fruits et des légumes en 1891, 1901 et 1911. De 1891 à 1901 il y a eu une diminution de 25,265 acres, dans l'étendue des terres en vergers et pépinières, tandis que durant la décade suivante il y a

TABLEAU 14. SUPERFICIES DES TERRES EN VERGERS ET EN JARDINS POUR LE CANADA, 1891-1911.

Classes	1891	1901	1911	POUR-CENT DU TOTAL		
				1891	1901	1911
	acres	acres	acres	p.c.	p.c.	p.c.
<b>Total.....</b>	<b>451,462</b>	<b>478,223</b>	<b>636,933</b>	<b>100.00</b>	<b>100.00</b>	<b>100.00</b>

(1) Compris avec les légumes.

eu une augmentation de 47,490 acres. Les vignobles avaient une étendue de 9,836 acres en 1911, contre 5,600 acres en 1901, soit une augmentation de 4,236 acres dans les dix ans. Les superficies en fruits et en légumes réunies en 1901 s'élevaient à 116,517 acres, comparativement à 223,506 acres en 1911, dont 17,495 acres étaient en fruits et 206,011 acres en légumes. La super-

ficie totale en vergers et jardins a augmenté d'un peu moins de 3 pour cent dans les dix années 1891-1901, tandis que, de 1901 à 1911, elle a augmenté de plus de 33 pour cent. En 1891 les terres en vergers représentaient 82·10 pour cent de la superficie totale en vergers et jardins, comparativement à 74·45 pour cent en 1901 et à 63·37 pour cent en 1911. L'étendue de terre en légumes est au-delà de trois fois plus élevée qu'elle ne l'était en 1891. Les terres en légumes seules comptent 89,434 acres de plus que les superficies en petits fruits et légumes en 1901.

D'après le recensement de 1891 il y avait 1·34 acre en verger pour chaque 100 acres de terre améliorée, comparativement à 1·18 acre en 1901 et à .83 acre en 1911. La proportion par 100 acres des superficies en vergers et jardins réunies, était de 1·63 acre en 1891, de 1·58 acre en 1901 et de 1·31 acre en 1911.

Le tableau 15 donne les chiffres comparatifs des étendues de terre en vergers et pépinières, en vignobles, en petits fruits et en légumes pour les années

1 Les petits fruits ont été compris avec les légumes.

1 Comprend Alberta et Saskatchewan.

1891, 1901 et 1911. En 1901 Ontario comptait 5,440 acres ou 97 pour cent de l'étendue totale, comparativement à 8,542 acres en 1911 ou 87 pour cent. Il y a eu une augmentation considérable dans chaque province, de 1901 à 1911 dans l'étendue de terre consacrée à la production du raisin. De 1901 à 1911 l'étendue en vergers et pépinières, dans la Colombie-Britannique, a augmenté de 7,502 à 33,618 acres, soit une augmentation de 26,116 acres ou 348 pour cent dans la décade. Des progrès encourageants ont été faits dans la plantation des vergers dans toutes les provinces des prairies durant la décade, l'étendue en fruits de toutes sortes y ayant augmenté de 791 à 3,641 acres. Québec indique une diminution constante dans l'étendue de terre en vergers, mais une augmentation dans les terres en autres fruits et en légumes. La Colombie-Britannique détient la première place dans l'établissement de nouveaux vergers, Ontario venant ensuite avec la Nouvelle-Ecosse bonne troisième.

Le tableau 16 donne, pour tout le Dominion, le nombre comparatif des arbres en rapport et non en rapport selon les classes, ainsi que la moyenne des arbres par ferme et par 100 acres de terre améliorée en 1901 et 1911. En exceptant les pêches il y a eu des diminutions dans le nombre d'arbres fruitiers en rapport durant la décade. D'un autre côté il y a de fortes augmentations dans le nombre de jeunes arbres fruitiers de toutes sortes, excepté les prunes. Le nombre de pommiers par ferme est tombé de 27.64 à 22.70, et le nombre total des arbres de verger par ferme, de 38.92 à 31.23.

La production des pommes dans le Dominion, de 1900 à 1910, a diminué de 8,007,520 boisseaux. L'exactitude des chiffres du recensement se trouve appuyée par le « Rapport du Commerce » qui indique qu'en 1901 le Canada a exporté 2,035,953 boisseaux de pommes récoltées l'année précédente, contre une exportation de 1,570,974 boisseaux en 1911, de la récolte de 1910, ou une différence de 464,979 boisseaux en moins. En 1900-1901 il a été importé au Canada 78,189 boisseaux de pommes, contre 452,783 boisseaux dans l'année fiscale 1910-1911, qui correspond presque avec l'année de recensement, soit une augmentation de 374,594 boisseaux sur l'année décennale précédente. La

diminution dans la quantité exportée et l'augmentation dans la quantité importée indiquent ensemble la lacune dans la production domestique et corroborent incidemment l'exactitude des chiffres du recensement.

Les chiffres concernant la production des petits fruits, autres que le raisin, ne sont pas donnés pour l'année 1891, et pour 1901 ils sont groupés ensemble et donnés en pintes. Dans le dernier recensement une boîte étalon ayant été adoptée, les quantités sont données en boîtes ou en pintes conformément à l'usage commun. En réduisant les boîtes en pintes pour les rendre comparables, il y a eu une augmentation de plus de 2 $\frac{3}{4}$  millions de pintes dans la production des petits fruits (le raisin excepté). La production du raisin a augmenté de 8,595,804 livres durant la décade.

Le tableau 17 donne la production fruitière pour tout le Canada, ainsi que la production moyenne par ferme et par 100 acres de terre améliorée en 1890, 1900 et 1910.

<sup>1</sup>La production des fruits en 1890 est comprise dans les totaux pour le Canada.

Le tableau 19 donne les valeurs des fruits de vergers, des petits fruits et des légumes séparément pour l'année 1910, la valeur totale pour 1900 et 1910, ainsi que l'augmentation proportionnelle durant la décade. Les fruits de vergers pour tout le Canada, en 1910, représentent une valeur de \$9,728,533; les petits fruits, une valeur de \$3,052,592, et les légumes, une valeur de \$18,806,544, formant un total, pour les fruits et les légumes, de \$31,587,669, comparativement à \$12,994,900 en 1900, soit un gain de \$18,592,769, ou 143.08 pour cent dans les dix années. La valeur moyenne des fruits et des légumes par ferme était de \$44 en 1910, comparativement à \$24 dans le recensement précédent. Comme la valeur des fruits de toutes espèces et celle des légumes étaient comptées ensemble dans le recensement de 1901, il n'est pas possible de déterminer la proportion de l'augmentation dans la valeur durant la décade pour chaque classe, mais on peut justement supposer que la valeur des légumes formait une plus forte proportion du total en 1910 qu'en 1900. De 1900 à 1910 toutes les provinces indiquent une augmentation dans la valeur des fruits et des légumes, variant de 64.38 pour cent dans l'île du Prince-Edouard à 3,443.73 pour cent dans l'Alberta.

TABLEAU 19. VALEUR DES FRUITS ET DES LÉGUMES EN 1910 ET TOTAUX COMPARATIFS POUR 1910 ET 1900, AINSI QUE L'AUMENTATION POUR CENT EN DIX ANS.

Île du Prince-Edouard.....	132,233	25,564	70,692	228,459	139,004	64.38

D'après le dernier recensement la province d'Ontario comptait 57.20 pour cent de la valeur totale de tous les fruits de vergers récoltés au Canada, la Nouvelle-Ecosse 15.90 pour cent, Québec 12.20 pour cent, la Colombie-Britannique 10.51 pour cent, le Nouveau-Brunswick 2.75 pour cent, l'île du Prince-Edouard 1.35 pour cent et les provinces des prairies .09 pour cent; pour les petits fruits, Ontario comptait 73.86 pour cent de la valeur totale, la Colombie-Britannique 10.24 pour cent, Québec 9.32 pour cent, la Nouvelle-Ecosse 2.85 pour cent, le Nouveau-Brunswick 2.05 pour cent, l'île du Prince-Edouard .84 pour cent et les provinces des prairies .84 pour cent.

Le tableau 20 donne la distribution pour cent de la valeur des fruits de vergers, des petits fruits et des légumes en 1910. La valeur totale des fruits et des légumes pour tout le Canada était de \$31,587,669, dont la valeur des fruits

de vergers (\$9,728,533) était de 30·80 pour cent, celle des petits fruits (\$3,052,592) de 9·66 pour cent et celle des légumes (\$18,806,544) de 59·54 pour cent. Le tableau doit être interprété de la même manière pour chacune des provinces. En 1910, les légumes représentaient 99·39 pour cent de la valeur totale des fruits et des légumes dans l'Alberta, 99·60 pour cent dans la Saskatchewan, 98·49 pour cent dans le Manitoba, 79·76 pour cent dans Québec, 72·54 pour cent dans le Nouveau-Brunswick, 46 pour cent dans la Nouvelle-Ecosse, et moins de 45 pour cent dans le reste des autres provinces.

TABLEAU 20. PROPORTION POUR CENT DE LA VALEUR TOTALE DES FRUITS DE VERGERS, DES PETITS FRUITS ET DES LÉGUMES PAR PROVINCES, EN 1910.

La valeur totale des fruits de toutes sortes exportés ou importés, pour les décades expirées le 30 juin depuis 1891, est représentée dans les chiffres qui suivent: en 1891, exportations \$1,487,336, importations \$261,382; en 1901, exportations \$1,633,604, importations \$337,674; en 1911, exportations \$1,975,982, importations \$1,531,077.

De 1891 à 1901, la valeur des exportations a augmenté de 9·83 pour cent et celle des importations de 29·18 pour cent, tandis que de 1901 à 1911 les exportations ont augmenté de 20·95 pour cent et les importations de 353·42 pour cent. De la valeur totale de tous les fruits exportés, les pommes comptaient 93·43 pour cent en 1891, 90·77 pour cent en 1901 et 88·91 pour cent en 1911. La valeur des pommes importées en 1891 représentait 21·08 pour cent de la valeur totale de tous les fruits importés, comparativement à 21·97 pour cent en 1901 et à 31·84 pour cent en 1911. Le tableau 21 donne la quantité et la valeur des fruits exportés pour les dix années se terminant le 30 juin 1891, 1901 et 1911, et le tableau 22 donne la quantité et la valeur des fruits importés pour les mêmes années.

TABEAU 21. QUANTITÉ ET VALEUR DES FRUITS EXPORTÉS POUR LES ANNÉES SE TERMINANT LE 30 JUIN 1891, 1901 ET 1911.

La quantité moyenne de pommes récoltées par tête de la population au-dessus de deux ans, était de 1.68 boisseau en 1891, comparativement à 3.73 boisseaux en 1901 et à 1.59 boisseau en 1911. Si, à la quantité retenue pour consommation domestique dans chaque décade, on ajoute la quantité de pommes importée, on trouve que la consommation moyenne pour la population au-dessus de deux ans, à chaque période de recensement, était de 1.39, 3.34 et 1.42 boisseaux respectivement.

## RECOLTES DES CHAMPS

La statistique concernant la superficie, la production et la valeur des récoltes des champs est donnée en détail dans les tableaux I à VI, IX et X, par sommaires pour les provinces dans les tableaux XIV à XVII, et par états comparatifs des tableaux XXV à XXVII. Dans les tableaux I à IV la statistique est donnée par cantons et par paroisses où la chose est praticable.

## SUPERFICIE.

Dans le tableau 23, qui suit, la superficie totale en récolte des champs est donnée par provinces pour les années 1890, 1900, 1910 et 1911. Les chiffres pour l'année 1911 n'étant pas pour une année de recensement, ne peuvent être comparés avec ceux des recensements précédents, mais ils sont donnés pour illustrer le mouvement progressif constant en agriculture.

Le tableau 27 (p.p. xxxviii-xlii) donne les statistiques pour ces années par récoltes individuelles, et permettra d'étudier les fluctuations dans les étendues de terre consacrées à chaque récolte par périodes de recensement.

TABLEAU 23. ETAT COMPARATIF DE LA SUPERFICIE EN RÉCOLTES DES CHAMPS, PAR PROVINCES, 1890, 1900, 1910 ET 1911

Provinces	RÉCOLTES EN				AUGMENTATION POUR CENT

NOTA:—Le signe (—) indique une diminution.

La superficie totale en récoltes des champs pour tout le Canada était de 15,662,811 acres en 1890, de 19,763,740 acres en 1900, de 30,556,168 acres en 1910 et de 35,261,338 acres en 1911. De 1890 à 1900 l'augmentation pour cent était de 26.2; de 1900 à 1910 de 54.6, et pour l'année 1911 sur l'année précédente, de 15.4.

Des provinces des prairies, le Manitoba seul indique une plus faible augmentation dans la seconde décade que dans la première. Toutes les provinces de l'est indiquent de plus faibles augmentations dans l'étendue de terre en récoltes des champs durant la décade se terminant en 1910 que durant la décade précédente. De 1900 à 1910 l'étendue de terre en récoltes des champs dans la Nouvelle-Ecosse accuse une diminution de 2.6 pour cent; c'est la seule

province qui montre une diminution dans le nombre d'acres en récoltes des champs durant la décade.

Les gains relativement faibles en acres en culture de 1900 à 1910 dans Ontario, Québec et les Provinces Maritimes ont pour cause la rareté des bras agricoles et la migration vers les Provinces de l'Ouest. Le dernier recensement a démontré que sur le chiffre de la population totale située à l'ouest des Grands Lacs, 352,735 étaient natifs d'Ontario, de Québec et des Provinces Maritimes. Le tableau 24 qui donne le nombre de fermes vacantes dans les provinces de l'est, le 1er juin 1911, indique le mouvement de la population et explique les faibles gains faits dans les superficies en récoltes durant la décade.

TABLEAU 24. TERRES VACANTES DANS L'EST DU CANADA, RECENSEMENT DE 1911

Provinces	NOMBRE DES TERRES VACANTES AYANT—					Total des terres vacantes	Total d'acres des terres vacantes
	5 à 10 acres	11 à 50 acres	51 à 100 acres	101 à 200 acres	201 acres et au-dessus		
	NO.	NO.	NO.	NO.	NO.	NO.	acres

Total.....	976	2,909	2,268	854	284	7,291	576,702

Les proportions pour cent dans le tableau 25 sont basées sur les chiffres donnés au tableau 23. De la superficie totale en récoltes des champs en 1890, Ontario comptait 52·14 pour cent, comparativement à 46·61 pour cent en 1900 et à 30·50 pour cent en 1910; Québec comptait 25·95 pour cent de la superficie totale en 1890, contre 23·80 pour cent en 1900 et 17·24 pour cent en 1910; les provinces maritimes comptaient 12·11 pour cent en 1890, contre 10·50 pour cent en 1900 et 7·02 pour cent en 1910. La part de la superficie totale en récoltes, donnée pour les provinces des prairies, était de 9·06 pour cent en 1890, et de 18·22 pour cent en 1900, tandis qu'elle est montée à près de 45 pour cent en 1910.

TABLEAU 25. DISTRIBUTION POUR CENT DES ACRES EN RECOLTES PAR PROVINCES, 1890, 1900 ET 1910

Le tableau 26 donne en colonnes parallèles pour tout le Canada l'augmentation ou la diminution faite en acres consacrés aux différentes récoltes (1) pour 1900 sur 1890 et (2) pour 1910 sur 1900.

Les superficies en blé de printemps et en blé d'automne n'ont pas été prises séparément dans le recensement de 1891. Dans le recensement de 1911, pour la première fois, les superficies ont été prises pour les navets, les betteraves fourragères et les betteraves à sucre.

Le recensement de 1901 indique des augmentations, durant la décade, de 1,523,329 acres pour le blé, ou 56·39 pour cent; pour l'avoine, de 1,406,299 acres ou 35·50 pour cent; pour le blé d'Inde à grain, de 165,657 acres, ou 84·90 pour cent; le sarrasin et les pois indiquent une diminution de 31,581 acres ou 12·06 pour cent dans les premiers et de 255,055 acres ou 27·56 pour cent dans les derniers; mais, pour tous les grains, l'augmentation totale de 1900 sur 1890 est de 3,143,589 acres ou 34·5 pour cent. Les pommes de terre et le houblon indiquent aussi des diminutions. Le recensement de 1910 donne les augmentations décennales suivantes: blé 4,639,972 acres ou 109·83 pour cent; avoine 3,288,524 acres ou 61·26 pour cent; orge 411,294 acres ou 47·17 pour cent; sarrasin 95,787 acres ou 36·59 pour cent; lin 559,099 acres ou 2,421,80 pour cent. La presque totalité de cette augmentation dans la superficie en lin, se trouve dans la Saskatchewan et l'Alberta. En grains mélangés l'augmentation était de 153,467 acres ou 56·11 pour cent. Le foin, le trèfle et l'alfalfa ou luzerne indiquent une augmentation de 1,800,788 acres ou 27·5 pour cent.

TABLEAU 26. ÉTAT COMPARATIF MONTRANT L'AUGMENTATION OU LA DIMINUTION DE L'ÉTENDUE EN RÉCOLTES DES CHAMPS, DE 1890 à 1900 ET DE 1900 à 1910, POUR LE CANADA

(1) Non mentionné dans le recensement de 1891.

L'étendue en récoltes fourragères a augmenté de 275,835 acres ou près de 100 pour cent. Il y a des diminutions dans les racines et le houblon, mais dans les grains seuls il y a une augmentation de 8,460,286 acres ou 73·3 pour cent durant la décade. Les superficies réunies en récoltes fourragères (foin, trèfle,

alfalfa, etc.) formaient un total de 5,931,548 acres en 1890, comparativement à 6,819,773 acres en 1900 et à 8,896,396 acres en 1910, soit une augmentation de 15 pour cent à la fin de la première décade, et de 30.45 pour cent à la fin de la seconde.

Le tableau 27 donne les superficies de toutes les récoltes pour le Dominion et pour chacune des provinces, ainsi que le pour-cent de variation d'une décade à l'autre. L'étendue ensemencée en différentes récoltes au printemps de 1911 (qui n'est pas une année de recensement) est donnée afin de montrer l'avancement rapide et continu fait en agriculture au Canada en ces dernières années. Relativement aux conditions agricoles de la Colombie-Britannique, le passage suivant se trouve dans l'introduction au rapport du volume II, recensement de 1901: « La Colombie-Britannique n'a pas comme ressource principale l'agriculture. Les minéraux des montagnes y ont été jusqu'à ce jour la principale attraction des hommes qui aiment l'aventure et la fortune; cependant si l'industrie minière devient à augmenter, l'industrie agricole augmentera certainement et deviendra aussi une industrie nécessaire ». Les statistiques du dernier recensement indiquent que les vallées fertiles de la Colombie-Britannique s'ouvrent plutôt à la culture des fruits et des légumes qu'à la production des grains. L'étendue en grains dans la Colombie-Britannique a augmenté de 12,199 acres entre 1891 et 1901, tandis que de 1901 à 1911 il y a eu une diminution de 9,562 acres ou 16.78 pour cent. D'un autre côté le nombre d'acres en foin et en trèfle y a augmenté de 102,752 à 132,668 acres durant la décade; le nombre d'acres en récoltes fourragères, de 1,208 à 15,519 acres, et l'alfalfa, non donnée en 1900, compte 3,741 acres en 1910, les pommes de terre ont augmenté de 2,666 acres ou 32.48 pour cent. La superficie totale en toutes récoltes dans la Colombie-Britannique pour la dernière décade était de 41,990 acres ou 24.49 pour cent. Comme on l'a dit déjà, l'établissement de vergers et de jardins maraîchers dans la province du Pacifique est un des faits les plus remarquables dans le développement agricole de cette province. De 1900 à 1910 les vergers et les jardins maraîchers ont augmenté en étendue de 10,360 à 34,485 acres, soit une augmentation de 24,125 acres ou 233 pour cent dans la décade.

Le nombre de fermes dans l'Alberta en 1901 était de 9,486, dont 9,429 ayant une étendue de cinq acres et au-dessus, comparativement à 60,353 fermes de cinq acres et au-dessus en 1911 et à 1,143 de moins de cinq acres. La superficie en blé, en avoine et en orge s'est accrue de 171,862 acres en 1900 à 1,784,265 acres en 1910, soit une augmentation de 1,612,403 acres ou 938 pour cent. Les autres grains ont augmenté de 1,254 à 8,954 acres dans les dix années. Le lin dont il n'y avait que 100 acres en 1900 a augmenté à 30,885 acres en 1910. Le foin, le trèfle et l'alfalfa qui n'ont pas été donnés dans le recensement de 1901, avaient une étendue de 152,424 acres en 1910. L'étendue en pommes de terre s'est accrue de 3,792 à 20,086 acres.

Sur 13,384 fermes de cinq acres et au-dessus en 1900, la Saskatchewan avait une superficie en blé, en orge et en avoine de 640,861 acres, contre 6,246,202 acres sur 95,809 fermes en 1901, soit une augmentation de 5,605,341 acres dans les dix années. De cette augmentation le blé a obtenu 3,741,010 acres, l'orge 117,779 acres et l'avoine 1,746,552 acres. Le lin qui avait une étendue de 227 acres seulement en 1900 s'est accru à 506,425 acres en 1910. L'étendue en pommes

de terre et en racines s'est élevée de 6,756 à 25,085 acres dans les dix années. Sur 31,812 fermes de cinq acres et au-dessus en 1900, le Manitoba avait 1,965,200 acres en blé, 139,672 acres en orge et 573,858 acres en avoine, comparativement à 2,759,445 acres en blé, 416,015 acres en orge et 1,209,173 acres en avoine sur 42,567 fermes de même étendue en 1910. Les récoltes fourragères se sont accrues de 43,667 acres en 1900 à 216,618 acres en 1910, soit une augmentation de 172,951 acres ou 396 pour cent dans la décade.

La superficie totale en toutes récoltes des champs dans le Manitoba, la Saskatchewan et l'Alberta a augmenté de 3,600,119 acres en 1900 à 13,607,697 acres en 1910, soit une augmentation de 10,007,578 acres ou 278 pour cent dans la décade. De cette augmentation, au delà de 60 pour cent revenait à la Saskatchewan. La superficie en blé seulement a augmenté de 2,495,474 acres à 7,867,423 acres, soit un gain de 5,371,949 acres ou 215.25 pour cent dans les dix ans, et la superficie sous les trois principales récoltes s'est accrue de 3,491,453 acres en 1900 à 12,415,100 acres en 1910, soit une augmentation de 8,923,647 acres ou 255.6 pour cent.

L'importance donnée à la récolte des grains dans les provinces des prairies est illustrée d'une manière frappante par le fait que 96.98 pour cent de la superficie totale en récoltes des champs était en blé, en avoine et en orge en 1900, et 91.24 pour cent en 1910. La diminution proportionnelle de ces grains dans la décade est due à ce que plus d'attention a été donnée dans ces dernières années aux récoltes des légumes et aux récoltes fourragères; la superficie en pommes de terre ayant augmenté de 25,967 à 70,342 acres, en racines de 2,183 à 5,550 acres et en récoltes fourragères de 60,505 acres en 1900 à 530,016 acres en 1910. Dans les cinq plus vieilles provinces, la superficie en toutes récoltes des champs, pour la moisson de 1900, était de 15,992,174 acres et pour la moisson de 1910 de 16,735,034 acres, soit une augmentation de 742,860 acres ou 4.65 pour cent, contre une augmentation de 1,863,946 acres ou 13.2 pour cent durant la décade précédente.

De 1900 à 1910 la superficie en récoltes a augmenté de 109,455 acres ou 1.18 pour cent dans Ontario, de 561,342 acres ou 11.93 pour cent dans Québec, de 61,451 acres ou 6.85 pour cent dans le Nouveau-Brunswick, de 29,792 acres ou 6.65 pour cent dans l'Île du Prince-Edouard. Dans la Nouvelle-Écosse, durant la même période, il y a eu une diminution de 19,180 acres ou 2.62 pour cent. Dans le recensement de 1901, Ontario indiquait une augmentation de 12.8 pour cent dans les récoltes; Québec, 15.7 pour cent; le Nouveau-Brunswick, 17.6 pour cent, l'Île du Prince-Edouard 9.2 pour cent et la Nouvelle-Écosse environ 1 pour cent. La superficie en récoltes de grains dans Ontario, Québec et les Provinces Maritimes, en 1910, était de 7,921,229 acres, contre 8,699,923 acres en 1900, soit une diminution de 778,694 acres ou 22.45 pour cent. Chacune des provinces a contribué dans la diminution, excepté l'Île du Prince-Edouard où la superficie en grains a augmenté de 2,835 acres ou 1.28 pour cent dans la décade. Dans Ontario la diminution s'élève à 617,875 acres ou 79.33 pour cent du total; dans Québec à 142,127 acres ou 18.25 pour cent; dans le Nouveau-Brunswick à 19,032 acres ou 2.44 pour cent, et dans la Nouvelle-Écosse à 2,495 acres ou trois dixièmes de 1 pour cent de la diminution totale dans les cinq provinces de 1900 à 1910.

La superficie en blé, dans les provinces de l'Est, est tombée de 1,713,101 acres en 1900 à 987,599 acres en 1910, soit une diminution de 725,502 acres ou 42·35 pour cent durant la décade. Dans Ontario la diminution s'élevait à 617,279 acres ou 41·49 pour cent; dans Québec à 76,944 acres ou 55·03 pour cent; dans le Nouveau-Brunswick à 13,566 acres ou 50·26 pour cent; dans la Nouvelle-Écosse à 4,136 acres ou 25·32 pour cent et dans l'Île du Prince-Édouard à 13,577 acres ou 32·08 pour cent. En contraste avec les diminutions dans les récoltes de grains, la superficie en production fourragère indique une augmentation remarquable dans toutes les provinces de l'Est, excepté la Nouvelle-Écosse. L'augmentation totale s'élevait à 1,559,144 acres ou 23·4 pour cent sur les chiffres du recensement précédent. La superficie en récoltes fourragères dans Ontario a augmenté de 2,772,866 à 3,533,288 acres, soit une augmentation de 760,422 acres ou 27·4 pour cent; dans Québec de 2,588,190 à 3,288,835 acres, soit une augmentation de 700,645 acres ou 27·1 pour cent sur les chiffres de 1900. Une plus petite superficie en pommes de terre se rencontre dans toutes les provinces de l'Est, excepté le Nouveau-Brunswick où les chiffres sont à peu près les mêmes en 1910 qu'en 1900.

La superficie en seigle diminue dans toutes les provinces de l'Est: dans Ontario la diminution se monte à 59,185 acres, soit 86·42 pour cent de la diminution totale de 68,485 acres dans les cinq provinces.

La superficie en blé d'Inde à grain dans Ontario, de 1900 à 1910, a été réduite de 56,795 acres ou 17·12 pour cent, dans Québec de 9,981 acres ou 35·01 pour cent, et dans les Provinces Maritimes, où la production de ce grain n'a jamais été forte, elle est en voie de disparaître tout à fait. Il y a eu des augmentations dans les superficies de cette récolte pour chacune des provinces du Nord-Ouest, mais ici encore l'étendue consacrée à ce grain est relativement petite. En 1900 la superficie pour tout le Canada était de 360,758 acres, comparativement à 293,951 acres en 1910, soit une réduction de 66,827 acres ou 18·52 pour cent dans la décade.

La superficie en sarrasin a plus que doublé dans Ontario, ayant augmenté de 73,038 acres en 1900 à 167,315 acres en 1910. Il y a eu une augmentation de 16,793 acres dans Québec, et aussi une faible augmentation dans la Nouvelle-Écosse, mais le Nouveau-Brunswick qui indiquait une augmentation de 13,483 acres en 1900 donne pour ce recensement une diminution de 15,123 acres. Pour les cinq vieilles provinces il y a eu une augmentation de 95,562 acres ou 36·5 pour cent dans la décade, et pour tout le Canada une augmentation de 95,787 acres ou 36·6 pour cent. La superficie consacrée au sarrasin dans les provinces de l'Ouest, bien qu'elle aille en augmentant, est trop petite pour affecter les résultats généraux.

La culture des pois, dans les provinces de l'Est, est tombée de 666,850 acres en 1900 à 352,869 acres en 1910, soit une diminution de 313,981 acres ou 88·91 pour cent dans les dix ans; dans Ontario la superficie en pois est moindre de 264,867 acres; dans Québec de 47,687 acres et dans le Nouveau-Brunswick, de 1,273 acres; dans la Nouvelle-Écosse et l'Île du Prince-Édouard, où cette culture se fait sur une petite échelle, la superficie totale et la production pour chaque recensement, ne représentant que de faibles étendues, la variation entre les chiffres des différents recensements ne sont que de peu

d'importance. La superficie totale en fèves dans les cinq provinces, en 1900, était de 46,538 acres, comparativement à 45,841 acres en 1910. Il y a eu des diminutions dans toutes les provinces, excepté dans Québec où la superficie en fèves a augmenté de 2,886 à 4,235 acres, et dans Ontario, où elles sont produites en plus grande quantité, la superficie en est tombée de 42,086 acres en 1900 à 40,585 acres en 1910.

NOTE.—Le signe (-) indique une diminution.

La superficie en lin, pour tout le Canada, était de 582,185 acres en 1910 dont 506,425 acres pour la Saskatchewan, 34,684 acres pour le Manitoba et 30,885 acres pour l'Alberta, soit un total, pour les trois provinces, de 571,994 acres ou 98.2 pour cent de la superficie totale en lin. En 1900 l'étendue totale ensemencée était de 23,086 acres dont 14,404 au Manitoba et 6,388 à Ontario. L'augmentation pour tout le Canada, durant la décade, est de 559,099 acres ou 2,421.8 pour cent. La culture du lin n'est pas beaucoup connue dans les Provinces Maritimes et n'est pratiquée jusqu'à un point assez limité dans les provinces de l'Est, que dans Ontario et Québec.

Il y avait 18,928 acres en tabac dans tout le Canada en 1910, comparative-ment à 11,906 acres en 1900, soit une augmentation de 7,022 acres ou 58.98 pour cent. Le tabac est récolté presque entièrement dans Ontario et Québec. Le nombre d'acres sous culture dans ces deux provinces représente 99 pour cent de la superficie totale du Canada en 1900, et 99½ pour cent en 1910. Dans Ontario le nombre d'acres en tabac a augmenté de 3,144 en 1900 à 7,017 acres en 1910, et dans Québec, de 8,661 acres en 1900 à 11,818 acres en 1910. Dans la Colombie-Britannique il y avait 61 acres en tabac en 1900 et 81 acres en 1910, et dans toutes les autres provinces l'étendue en est si minime que la récolte n'a aucune importance.

Les semences de mélanges de différents grains, tels que avoine et pois; orge, avoine et pois, ou orge et avoine, semblent favorables dans Ontario où l'étendue ensemencée s'est accrue de 117,020 acres en 1900 à 323,409 acres en 1910, une augmentation de 206,389 acres ou 176.37 pour cent dans la décade. Il y a eu une diminution de 53,325 acres dans Québec, ou 37.10 pour cent; dans le Nouveau-Brunswick, de 502 acres ou 40.81 pour cent; dans la Nouvelle-Écosse, de 480 acres ou 16.55 pour cent; dans l'Ile du Prince-Edouard, de 220 acres ou 3.24 pour cent dans les dix ans.

Le tableau 28 donne la superficie moyenne des principales récoltes par ferme, pour le Canada et chacune des provinces.

Il y a eu des augmentations, pour tout le Canada, dans le nombre d'acres par ferme, pour le blé, l'avoine, l'orge, le sarrasin, les grains mélangés et les récoltes fourragères (comprenant le bié d'Inde et autres grains fourragers coupés verts), et des diminutions pour le blé d'Inde à grain, les pois et les fèves, les pommes de terre, les racines et le foin.

Pour presque toutes les différentes espèces de récoltes, la Colombie-Britannique indique une réduction dans la moyenne d'acres par ferme, réduction attribuée à l'accroissement du nombre de petites fermes consacrées presque exclusivement à l'horticulture. D'après les rapports des différents recensements, Ontario comptait 53 pour cent de la superficie totale en blé, en 1890, comparativement à 35 pour cent en 1900 et à moins de 10 pour cent en 1910. D'un autre côté la superficie en blé dans les provinces des prairies, qui était de 37 pour cent du total en 1890, avait atteint 59 pour cent en 1900 et au-delà de 88 pour cent du total en 1910.

(1) Moins d'un centième d'acre.

La superficie moyenne de chaque récolte spécifiée est donnée dans le tableau 29, en rapport avec chaque cent acres de terre améliorée. De 1900 à 1910, pour tout le Canada, la superficie en blé par cent acres de terre améliorée a augmenté 15506—J

de 14 à 22.77 acres; en avoine, de 17.79 à 19.78 acres; en orge de 2.89 à 3.12 acres. Les grains mélangés et les récoltes fourragères ont aussi fait quelque progrès; le foin indique une diminution de 21.69 à 17.83 acres; les pommes de terre de 1.49 à .99 acre par cent acres de terre améliorée.

(<sup>1</sup>) Moins d'un centième de un pour cent.

Le tableau 30 indique, pour tout le Canada et pour chacune des provinces, (1) la proportion que porte le nombre d'acres consacrés à chaque récolte spécifiée, à la superficie totale des terres améliorées en 1901 et 1911 (2) la proportion que porte le nombre d'acres en chaque récolte, au nombre total d'acres en récoltes des champs en 1890, 1900 et 1910.

En 1911, pour tout le Canada, les récoltes des champs occupaient 72.35 pour cent de la superficie totale en terres améliorées, comparativement à 65.52 pour cent en 1901. Les superficies en lin, en pois, en fèves, en seigle, en blé d'Inde à grain et en grains mélangés, étant relativement basses et de peu d'importance, ont été groupées comme "diverses" et classifiées sous l'en-tête de "céréales". Les rapports du recensement indiquent que 51.94 pour cent des terres améliorées était consacré à la culture du grain en 1911, comparativement à 40.70 pour cent en 1901. Le nombre d'acres en grains de toutes espèces et en récoltes fourragères occupe plus des sept-dixièmes de toutes les terres propres à la culture.

Des récoltes moissonnées en 1890, le blé représentait 17·25 pour cent, l'orge 5·54 pour cent, l'avoine 25·29 pour cent et le foin 37·87 pour cent, et en 1900 le blé représentait 21·38 pour cent, l'orge 4·41 pour cent, l'avoine 27·16 pour cent et le foin 33·11 pour cent. En 1910 la proportion du blé et de l'avoine a augmenté à 29·01 et 28·33 pour cent respectivement, tandis que la proportion de l'orge a diminué à 4·20 pour cent et celle du foin à 27·13 pour cent de la superficie totale moissonnée dans cette année. Les récoltes fourragères, autres que le foin, non rapportées dans le recensement de 1890, montrent une augmentation considérable de 1900 à 1910. Dans le dernier recensement, sur chaque cent acres de terre en culture, près de deux acres étaient consacrés aux récoltes fourragères, contre 1·4 acre dans le recensement précédent.

## PRODUCTION.

Le tableau 31 donne le rendement des principales récoltes de grains par totaux pour le Canada et les provinces, en 1880, 1890, 1900 et 1910, et le tableau 32 faisant pendant au tableau précédent donne aussi les statistiques concernant la production du foin, des pommes de terre, des racines, du houblon, du tabac, de la graine d'herbe et de trèfle, ainsi que du sucre d'érable produit durant ces années.

**Blé.** La production du blé qui était de 32,350,269 boisseaux en 1880, a augmenté à 132,077,547 boisseaux en 1910, soit une augmentation de 99,727,278 boisseaux en trente ans ou plus que 308 pour cent. En 1890 les terres du Canada ont produit 42,223,372 boisseaux, et en 1900, 55,572,368 boisseaux. L'augmentation de 1880 à 1890 était de 9,873,103 boisseaux ou 30·5 pour cent; de 1890 à 1900 elle était de 13,348,996 boisseaux ou 31·6 pour cent, et de 1900 à 1910 l'augmentation était de 76,505,179 boisseaux ou 137·7 pour cent. La production totale du blé dans tout le Canada en 1910 était près de deux millions de boisseaux plus élevée que la production totale des trois périodes de recensement 1880, 1890 et 1900. Cette grande augmentation dans la production du blé est due entièrement aux provinces de l'Ouest. En 1880 le Manitoba, la Saskatchewan et l'Alberta produisaient 1,153,328 boisseaux de blé; en 1890, 17,884,629 boisseaux; en 1900 la quantité s'élevait à 23,456,985 boisseaux, contre une production de 110,166,704 boisseaux en 1910. La quantité de blé dont il est fait rapport dans les recensements précédents, pour l'Alberta et la Saskatchewan, était relativement faible, s'élevant à un peu plus de cinq millions de boisseaux en 1900, tandis qu'en 1910 la Saskatchewan seule a produit près de 11½ millions de boisseaux de plus qu'il n'a été produit dans tout le Canada en 1890.

Dans chacune des moissons de 1880, 1890 et 1900 la province d'Ontario a récolté plus que la moitié de tout le blé produit dans le Dominion en ces années. En 1910 cette position a été conquise par la Saskatchewan qui a récolté près de 67 millions des 132 millions de boisseaux produits dans cette année. Québec, le Nouveau-Brunswick et la Nouvelle-Ecosse ont produit plus de blé dans l'année 1880 que dans aucune année de recensement subséquente. En 1880 ces provinces ont récolté 3,070,211 boisseaux, comparativement à 1,360,114 boisseaux en 1910, soit une diminution de 55·70 pour cent en trente ans. L'Île du Prince-Edouard indique une augmentation constante dans la production du blé de 1880 à 1900. La quantité récoltée en 1880 était de 546,986 boisseaux, contre 613,364 boisseaux en 1890 et 738,679 boisseaux en 1900; en 1910 la production est tombée de 501,553 boisseaux, soit une diminution de 237,146 boisseaux sur le recensement précédent et de 45,453 boisseaux de moins qu'en 1880.

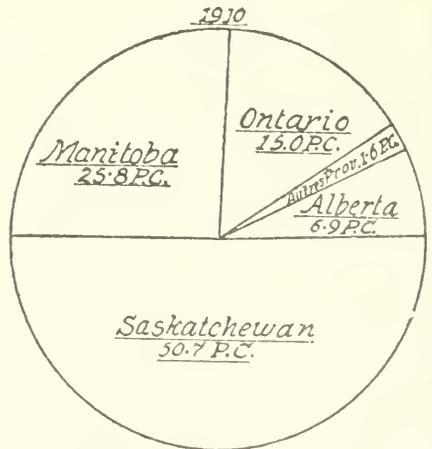

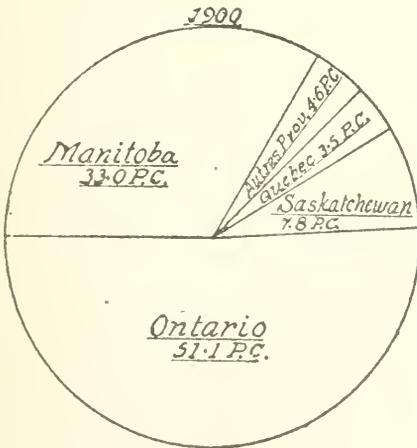

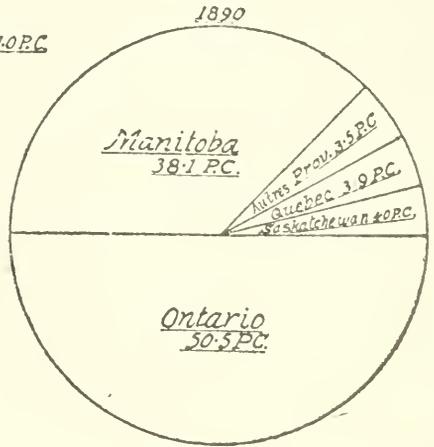

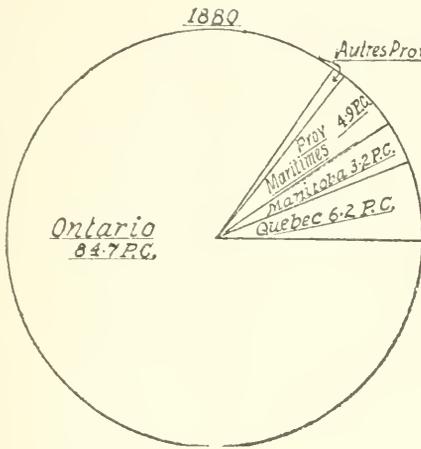

De septembre 1910 à août 1911 le Canada a exporté 52,098,694 boisseaux de blé. La balance de la production de l'année 1910, 79,978,853 boisseaux, comprend la quantité emmagasinée et la quantité destinée à la consommation domestique, aux semences, etc. Les statistiques des exportations sont données au tableau 43, pour les années se terminant le 30 juin 1891, 1901 et 1911.

**Orge.** En 1910 le Canada a produit 28,848,310 boisseaux d'orge, comparativement à 22,224,366 boisseaux en 1900, à 17,222,795 boisseaux en 1890

RECENSEMENT DU CANADA 1911

PROPORTION POUR CENT DE LA PRODUCTION DU BLÉ RÉCOLTÉ DANS LES DIVERSES PROVINCES DU CANADA EN 1880, 1890, 1900 ET 1910.

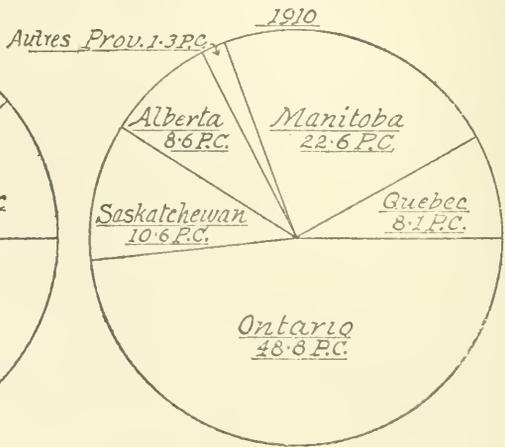

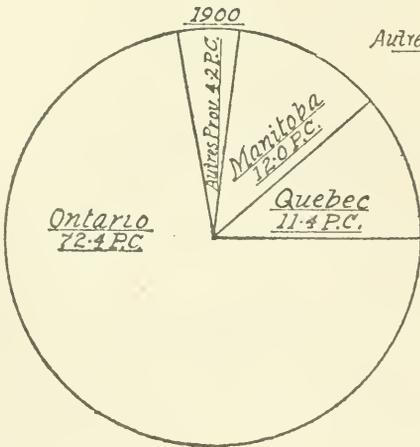

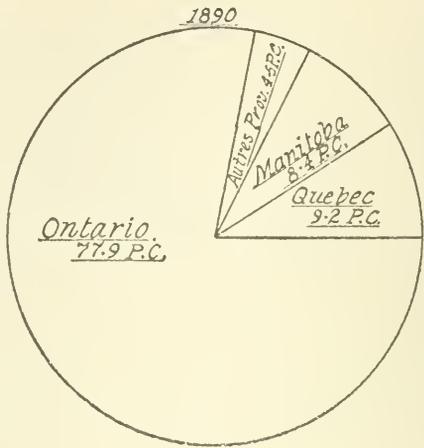

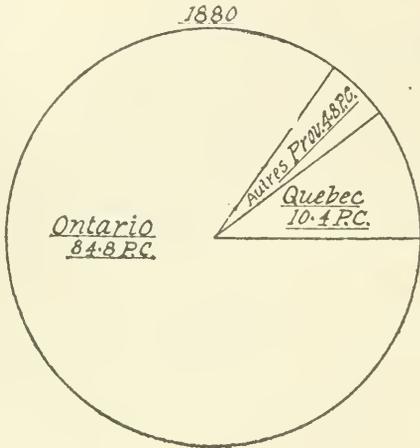

RECENSEMENT ET STATISTIQUES

Afin de démontrer la position relative des provinces par rapport à la production totale du blé, dans chaque année de recensement, l'étendue des cercles est la même dans chaque cas.

PROPORTION POUR CENT DE LA PRODUCTION DE L'ORGE RÉCOLTÉE DANS  
LES DIVERSES PROVINCES DU CANADA EN 1880, 1890, 1900 ET 1910.

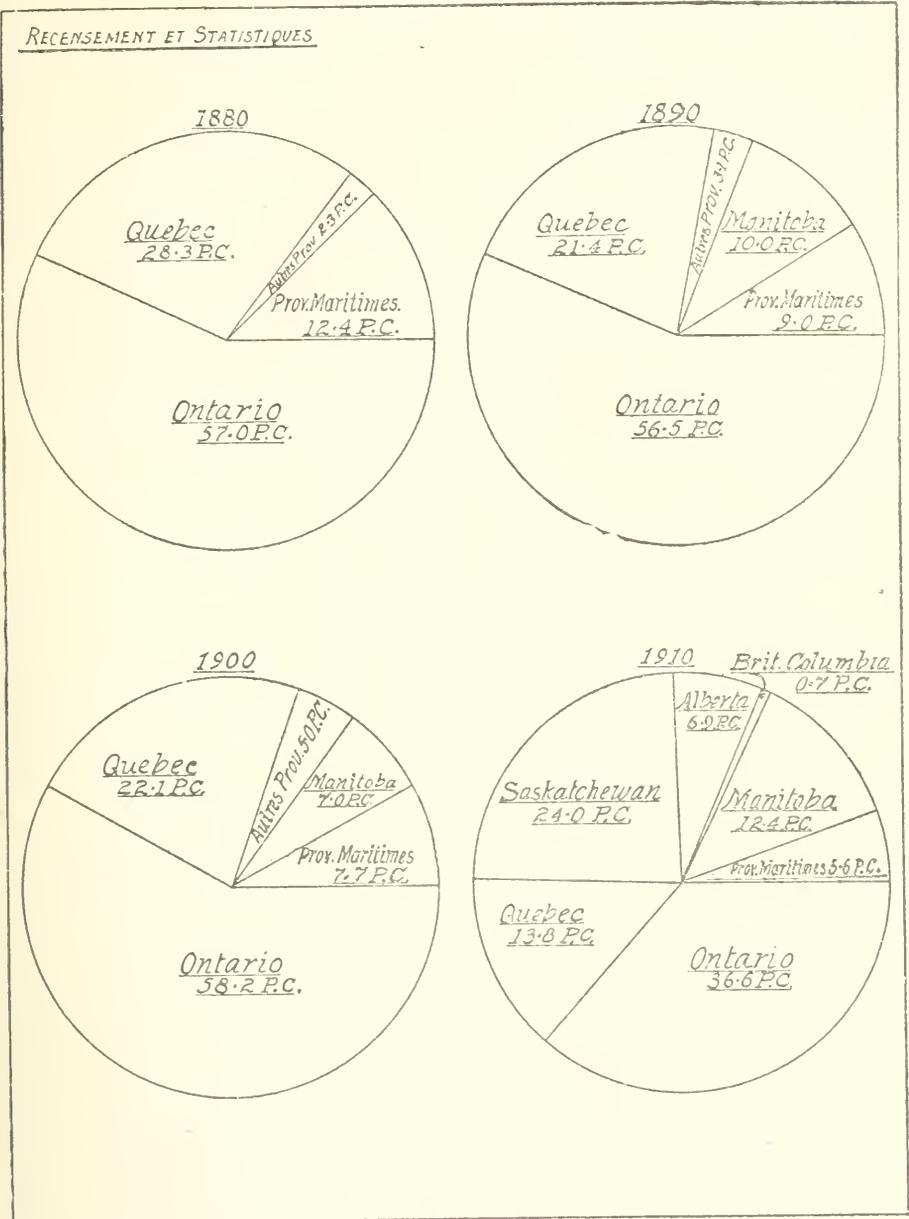

RECENSEMENT ET STATISTIQUES

Afin de démontrer la position relative des provinces par rapport à la production totale de l'orge dans  
chaque année de recensement, l'étendue des cercles est la même dans chaque cas.

RECENSEMENT DU CANADA 1911

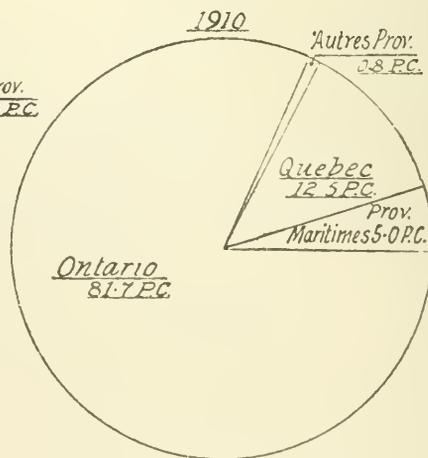

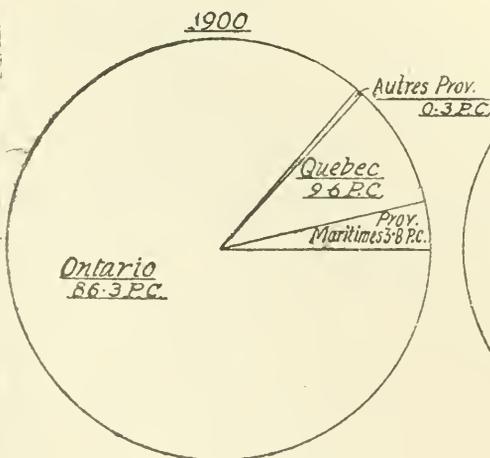

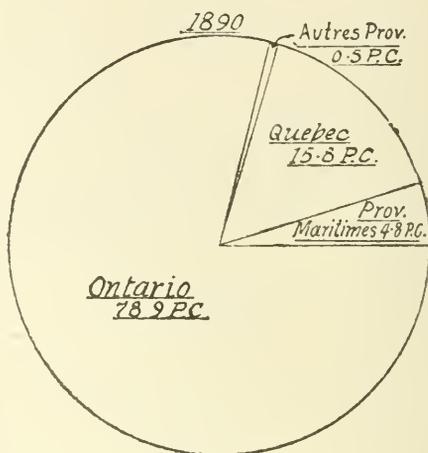

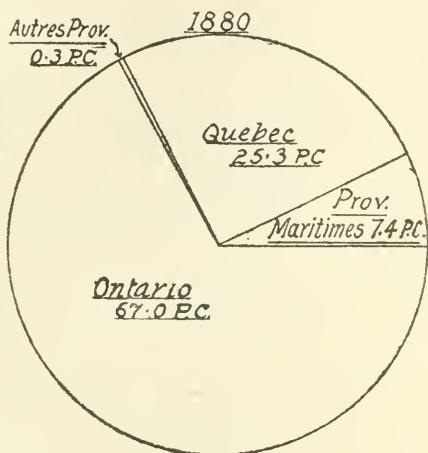

PROPORTION POUR CENT DE LA PRODUCTION DE L'AVOINE RÉCOLTÉE DANS LES DIVERSES PROVINCES DU CANADA EN 1880, 1890, 1900, ET 1910.

Afin de démontrer la position relative des provinces par rapport à la production totale de l'avoine dans chaque année de recensement, l'étendue des cercles est la même dans chaque cas.

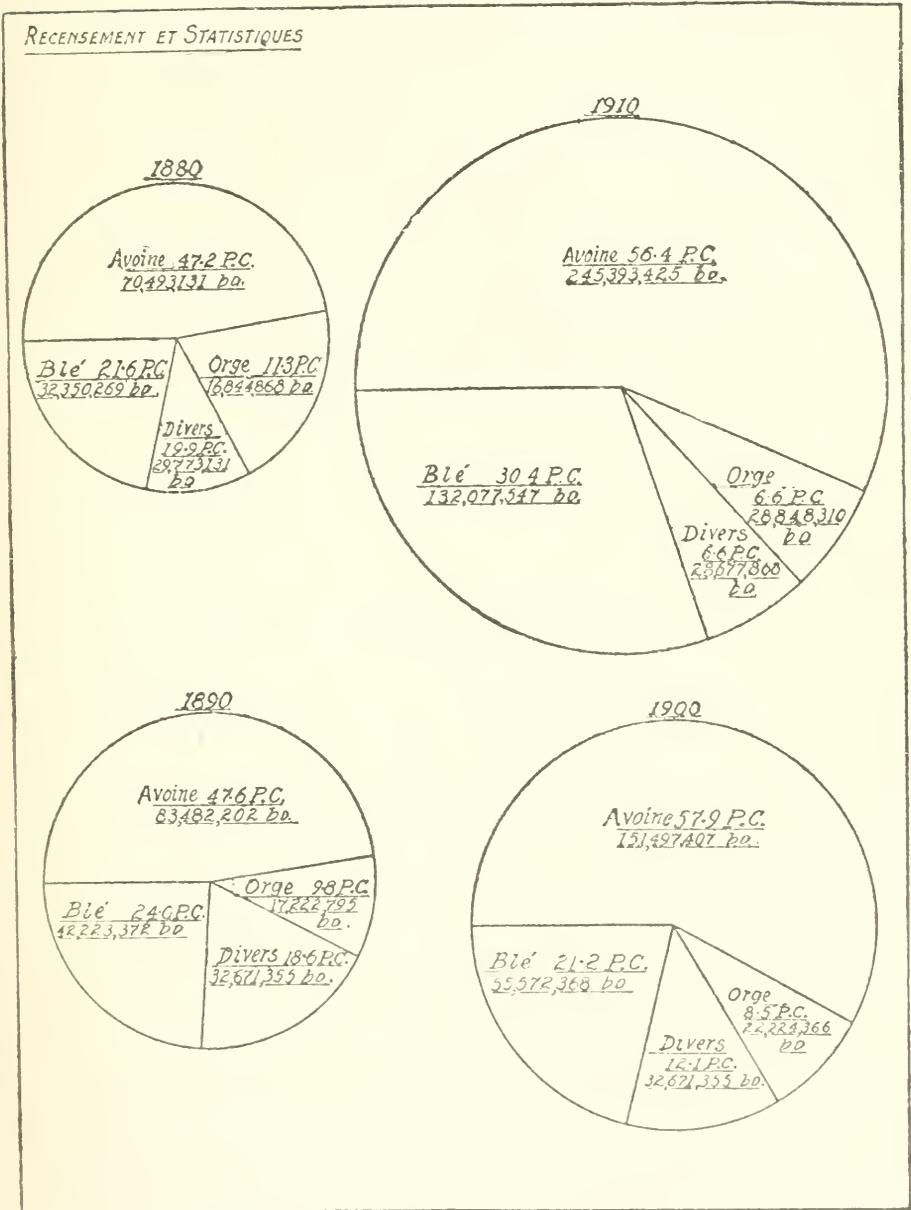

PROPORTION POUR CENT DE LA PRODUCTION DES GRAINS SECONDAIRES  
RÉCOLTÉS DANS LES DIVERSES PROVINCES DU CANADA  
EN 1880, 1890, 1900 ET 1910.

RECENSEMENT ET STATISTIQUES.

Afin de démontrer la position relative des provinces par rapport à la production totale des grains secondaires dans chaque recensement, l'étendue des cercles est la même dans chaque cas.

PRODUCTION DES PRINCIPAUX GRAINS ET PROPORTION POUR CENT DE CHACUN PAR RAPPORT AU TOTAL POUR LES ANNÉES 1880, 1890, 1900 ET 1910.

L'étendue de chaque cercle représente la production totale du grain pour chaque année de recensement.

et à 16,844,868 boisseaux en 1880. De la production totale en 1880, Ontario a fourni 85 pour cent; sa part en 1890 était de 77 pour cent, en 1900 de 72 pour cent et en 1910 de 48 pour cent de la production totale du Dominion. Le rendement de l'orge dans les provinces des prairies était de 12,057,806 boisseaux en 1910, comparativement à 3,141,357 boisseaux en 1900, soit un gain de 8,916,449 boisseaux ou 283.8 pour cent dans la décade.

(1) Compris avec les pois.

(2) Non donné.

**Avoine.** L'avoine occupe la première place dans la production du grain au Canada. Elle est au premier rang dans la Colombie-Britannique, l'Alberta, Ontario, Québec et les Provinces maritimes, mais elle cède la place au blé dans le Manitoba et la Saskatchewan. Le rendement total, pour le Canada, en 1910, était de 245,393,425 boisseaux, contre 151,497,407 boisseaux en 1900, soit une augmentation de 93,896,018 boisseaux ou près de 62 pour cent. Les provinces de l'est en 1910 donnaient un rendement de 137,465,382 boisseaux ou 57 pour cent du total; la balance, 107,928,043 boisseaux, ou 43 pour cent ayant été récoltée à l'ouest des Grands Lacs.

**Blé d'Inde à grain.** Vu les conditions de climat le blé d'Inde à grain ne peut être cultivé avec succès que dans Ontario. Sur une production totale de 25,875,919 boisseaux en 1900, Ontario en a produit 24,463,694 boisseaux ou 94 pour cent, et en 1910 la même province a produit 13,830,703 boisseaux ou 96 pour cent d'un total de 14,417,599 boisseaux.

**Autres céréales** Des autres grains de moindre importance, le sarrasin seul indique une augmentation de production durant la décade. En 1910 le rendement de ce grain était de 7,102,853 boisseaux, comparativement à 4,547,159 boisseaux en 1900, soit une augmentation de 2,555,694 boisseaux revenant presque entièrement à Ontario et Québec. La production des pois est tombée de 12,348,943 boisseaux en 1900 à 4,788,916 boisseaux en 1910. Ce décroissement dans la production des pois a été général, ayant eu lieu pour différentes causes, dont la principale provient des insectes dans toutes les provinces, excepté la Saskatchewan et l'Alberta.

Les fèves en 1910 ont obtenu un rendement de 826,281 boisseaux, comparativement à 861,327 boisseaux en 1900 et à 800,015 en 1890. Les pois et les fèves groupés ensemble en 1880, ont donné une production totale de 13,749,662 boisseaux. Dans Ontario où la production des fèves au dernier recensement était près de 88 pour cent de la production totale du Canada, le rendement est tombé de 767,255 boisseaux en 1900 à 726,925 boisseaux en 1910; dans Québec le rendement était de 14,774 boisseaux plus élevé en 1910 qu'en 1900; dans les Provinces maritimes la production était moindre pour chaque province au dernier recensement qu'à aucun recensement précédent. La production du seigle qui s'élevait à 2,097,180 boisseaux en 1880, a décliné en 1890 à 1,341,325 boisseaux; en 1890 elle s'est accrue encore, atteignant 2,316,793 boisseaux pour tomber encore en 1910 à 1,542,219 boisseaux. Québec et les Provinces maritimes indiquent un décroissement constant de décade en décade. En 1880 Ontario a produit 76.2 pour cent de la production totale du seigle récolté dans tout le Canada, 79.3 pour cent en 1890, 87.7 pour cent en 1900 et 79.9 pour cent en 1910.

**Foin.** En 1880 le Canada a récolté 5,053,008 tonnes de foin provenant du mil et du trèfle, en 1890 la production était de 7,693,733 tonnes, comparativement à 7,852,731 en 1900 et à 10,406,367 tonnes en 1910. Les provinces des prairies indiquent une diminution de 614,054 tonnes dans le rendement du foin en 1910, comparativement à 1900, mais cette diminution est plus apparente que réelle, vu qu'en 1900 et dans les recensements précédents le foin dont il est fait rapport avait été coupé sur la prairie vierge, tandis qu'il n'a été fait rapport que du foin cultivé au dernier recensement. De 1900 à 1910 la produc-

tion du foin dans Ontario a augmenté de 1,574,971 tonnes; dans Québec, de 1,244,698 tonnes; dans le Nouveau-Brunswick, de 156,015 tonnes; dans la Nouvelle-Écosse, de 65,962 tonnes; dans l'Île du Prince-Édouard, de 87,672 tonnes et dans la Colombie-Britannique, de 38,372 tonnes. En plus des produits du mil et du trèfle en 1910, il y a eu aussi 115,189 tonnes de récoltes fourragères provenant de l'alfalfa ou luzerne et 2,705,103 tonnes de blé d'Inde fourrager pour nourriture d'été ou pour "ensilage", et 343,228 tonnes de grain coupé vert et converti en fourrage pour l'hiver.

**Pommes de terre.** La production totale des pommes de terre pour tout le Canada s'élevait à 55,461,473 boisseaux en 1910, contre 55,362,635 boisseaux en 1900 soit un gain de 98,838 boisseaux seulement ou moins de  $\frac{1}{3}$  de un pour cent. Les provinces montrant des augmentations, pour 1910 sur 1900, sont la Colombie-Britannique, l'Alberta, la Saskatchewan, le Manitoba et le Nouveau-Brunswick, tandis que celles qui indiquent des diminutions sont Ontario, Québec, la Nouvelle-Écosse et l'Île du Prince-Édouard. Le rendement dans les provinces de l'Ouest s'est accru de 4,154,533 boisseaux en 1900 à 9,756,290 boisseaux en 1910, soit un gain de 5,601,757 boisseaux ou 134.8 pour cent; dans le Nouveau-Brunswick de 4,649,059 boisseaux à 5,219,025 boisseaux, soit un gain de 569,966 boisseaux ou 12.25 pour cent. La diminution dans Ontario est de 2,741,467 boisseaux ou 13.67 pour cent; dans Québec de 1,684,200 boisseaux ou 9.83 pour cent et dans la Nouvelle-Écosse et l'Île du Prince-Édouard de 1,647,218 boisseaux ou 17.55 pour cent.

**Navets et autres racines.** La quantité totale rapportée sous cet en-tête (86,659,034 boisseaux) pour tout le Canada, comprenait 47,371,434 boisseaux de navets, 30,353,132 boisseaux de betteraves fourragères, 6,498,101 boisseaux de betteraves à sucre et 2,436,367 boisseaux de diverses espèces (carottes, betteraves à table, panais, etc.), dont les détails par provinces se trouvent au tableau XXV. De la production totale en 1910, Ontario comptait 70,418,599 boisseaux, Québec 4,869,699 boisseaux, les Provinces maritimes 9,224,299 boisseaux, les provinces des prairies 1,147,356 boisseaux et la Colombie-Britannique 999,081 boisseaux. De 1900 à 1910 la production a augmenté dans Ontario de 7,050,136 boisseaux; dans la Nouvelle-Écosse, de 1,466,005 boisseaux; dans Québec, de 1,343,512 boisseaux; dans le Nouveau-Brunswick, de 615,619 boisseaux; dans la Colombie-Britannique, de 363,093 boisseaux; dans le Manitoba, de 290,531 boisseaux; dans l'Alberta, de 257,314 boisseaux; dans la Saskatchewan, de 132,390 boisseaux, tandis qu'il y a une diminution de 935,208 boisseaux dans l'Île du Prince Édouard, formant une augmentation totale pour le Dominion de 10,583,392 boisseaux durant la décade.

**Houblon.** Il y a eu 1,208,450 livres de houblon récolté en 1910, comparativement à 1,004,216 livres en 1900. De la production totale en 1910, la Colombie-Britannique en compte 1,013,400 livres, et c'est la seule province qui ait fait un succès de la culture du houblon. Les autres provinces indiquent des décroissements dans cette culture dans chacun des recensements depuis 1880.

**Tabac.** La culture du tabac se fait principalement dans les provinces d'Ontario et Québec. De la production totale en 1910 (17,632,342 livres), Ontario en possédait 7,498,506 et Québec 10,115,016 livres, comparativement à une production totale de 11,266,732 livres en 1900, dont Ontario comptait

3,503,739, et Québec 7,655,975 livres. La production du tabac dans les autres provinces est tombée de 107,018 livres en 1900 à 19,820 livres en 1910.

TABLEAU 32. ÉTAT COMPARATIF DU RENDEMENT DU FOIN, DES PLANTES-RACINES ET DES AUTRES RÉCOLTES, 1880-1910.

<sup>1</sup>Le foin de prairie non compris.

**Lin.** En 1900 il a été récolté 172,222 boisseaux de lin dans tout le Dominion; mais depuis l'établissement des provinces des prairies où le lin est avantageusement cultivé sur les terres nouvellement remuées, la production de 1910 s'est élevée à 4,244,935 boisseaux. De ce chiffre la Saskatchewan a produit 3,893,160

boisseaux ou 91.71 pour cent. Ontario, le Manitoba et l'Alberta ont aussi fourni des augmentations durant la décade.

**Graine d'herbe et trèfle rouge.** Le rendement de ce produit en 1910 était de 26,960,765 livres, comparativement à 15,499,140 livres en 1900. De ces chiffres Ontario comptait 23,883,223 livres en 1910 contre 11,880,912 livres en 1900. De 1890 à 1900 Ontario indique une augmentation de 39,962 livres seulement.

Le tableau 33 donne la superficie et la production de chaque espèce de récolte pour tout le Canada, en 1890, 1900 et 1910.

Le tableau 34 donne, pour tout le Canada, la production moyenne des récoltes par acre en 1890, 1900 et 1910, pour chaque récolte dont la superficie et le rendement ont été donnés dans les listes de recensement. Les rendements moyens du blé, de l'avoine, du seigle, du sarrasin et des grains mélangés par acre, étaient plus élevés en 1910 qu'en 1900; le rendement moyen de l'orge était moins élevé au dernier qu'au précédent recensement. La production moyenne des racines par acre a augmenté de 335.35 boisseaux en 1890 à 370.81 boisseaux en 1900 et à 477.61 boisseaux en 1910. Comme on l'a déjà dit, ni la superficie ni la production des différentes récoltes de racines n'avaient été prises séparément avant le dernier recensement. Le fait que l'alfalfa rapporte en moyenne environ deux fois plus de fourrage que le mil et le trèfle, semble enou-

rager cette culture dans les districts où les conditions sont favorables. Il est bon de se rappeler que la production moyenne par acre, déterminée par les recensements décennaux, représente souvent, comme il est arrivé dans ce pays en 1890, 1900 et 1910, des années où, à cause des mauvaises saisons, les récoltes ont manqué dans bien des endroits.

Le tableau 35 donne le rendement moyen par acre des principales récoltes de grain par provinces en 1890, 1900 et 1910. Dans le recensement de 1880, certaines récoltes exceptées, la production est donnée mais non la superficie. Dans le recensement de 1910 Ontario avait la plus haute moyenne de rendement par acre pour le blé, 25-09 boisseaux; pour l'orge, 27-99 boisseaux; pour les fèves, 17-91 boisseaux et pour le blé d'Inde à grain, 50-32 boisseaux. La Colombie-Britannique avait la plus haute moyenne pour l'avoine, 53-10 boisseaux, et pour les arrasin, 55 boisseaux. L'Alberta avait la plus haute moyenne pour le seigle, 16-33 boisseaux, et le Manitoba pour les pois, 18-49 boisseaux. Comme les superficies en avoine et en sarrasin sont relativement peu élevées dans la Colombie-Britannique, ainsi que pour le seigle dans l'Alberta et les pois dans le Manitoba, les rendements moyens n'ont pas la même signification dans ces provinces que dans celles où les superficies en ces produits sont d'une plus grande étendue. Ceci s'applique au rendement par acre du blé, de l'avoine et de l'orge dans Ontario, Québec et les Provinces Maritimes, comparé au rendement dans les provinces des prairies.

Le tableau 36 donne, pour les années 1910 et 1900, la production moyenne par ferme des principaux grains, des pommes de terre, des racines et des récoltes fourragères. Il y a eu durant la décade des augmentations dans la production, par ferme, du blé, de l'avoine et des récoltes fourragères, et des diminutions dans la production moyenne de l'orge, des pommes de terre et des racines. En 1910 le Manitoba était en tête des provinces pour la production du blé par ferme, 748-31 boisseaux; de l'orge, 142-89 boisseaux, et de l'avoine, 665-41 boisseaux; l'Ile du Prince-Edouard en tête pour les pommes de terre, 292-47 boisseaux; Ontario pour les navets et les racines, 310-49 boisseaux; Québec pour le foin et les récoltes fourragères, 26-54 tonnes. La production du blé par ferme a augmenté durant la décade dans l'Alberta, la Saskatchewan et le Manitoba; de l'orge, dans l'Alberta, la Saskatchewan, le Manitoba et l'Ile du Prince-Edouard; de l'avoine, dans la Saskatchewan, le Manitoba, Ontario et les Provinces Maritimes; des pommes de terre, dans le Manitoba et le Nouveau-Brunswick; des racines, dans le Manitoba, Ontario, Québec, le Nouveau-Brunswick et la Nouvelle-Ecosse; du foin et des récoltes fourragères, dans les provinces de l'Est en général.

La production du blé a beaucoup décré dans les provinces de l'Est durant la décade. La quantité par ferme en 1910 et 1900 dans Ontario, était de 87·49 et 126·80 boisseaux respectivement; dans Québec, de 5·84 et 13·07 boisseaux; dans le Nouveau-Brunswick, de 5·34 et 10·16 boisseaux; dans la Nouvelle-Ecosse, de 4·17 et 4·43 boisseaux, et dans l'Île du Prince-Edouard, de 34·90 et 52·71 boisseaux, respectivement. Dans la production de l'avoine, Québec, l'Alberta et la Colombie-Britannique avaient une plus grande quantité par ferme en 1910 qu'en 1900, et les autres provinces un rendement moindre.

Le tableau 37 donne la valeur totale des récoltes, pour le Canada et les provinces, en 1910 et 1900, ainsi que la valeur moyenne par ferme de ces récoltes. Leur valeur a augmenté de \$189,560,375 ou 97·23 pour cent dans les dix ans. Il y a eu d'énormes augmentations dans chaque province au dernier recensement comparé avec le recensement précédent. La valeur moyenne par ferme, pour tout le Canada, était de \$538·06 en 1910, comparativement à \$357·92 en 1900. La Colombie-Britannique indique une diminution dans la valeur moyenne des récoltes par ferme, comparée avec 1900. L'augmentation du nombre de fermes ayant 5 acres et moins, dans les provinces de l'Ouest, a eu pour effet de réduire la valeur moyenne par ferme.

**TABLEAU 37. VALEUR TOTALE DES RÉCOLTES DES CHAMPS AINSI QUE LEUR VALEUR MOYENNE PAR FERME, POUR CHAQUE PROVINCE EN 1910 ET 1900.**

Le tableau 38 donne la valeur des récoltes spécifiées en 1910 pour le Canada et les provinces. Dans le recensement précédent la valeur totale ayant été donnée en bloc, il n'est pas possible par conséquent de déterminer quelle fraction de l'augmentation totale dans la valeur des récoltes, durant la décade, est due à un accroissement de superficie cultivée, et quelle fraction à la valeur élevée des différents rendements. A cet effet il est bon de se rappeler que les moyens de transport déterminent jusqu'à un certain point, le plus ou le moins de profits que peut faire le cultivateur dans ses opérations de l'année. Il n'y a pas de donnée sur laquelle on puisse s'appuyer, indiquant au cultivateur les pertes provenant pour lui d'avoir à transporter ses produits au marché

et plus rapproché par de mauvais chemins. Néanmoins on ne doit pas oublier que les développements apportés dans l'extension des chemins de fer, de 1901 à 1911, a fait naître en bien des endroits des marchés là où il n'en existait pas il y a dix ans passés, et que conséquemment ces conditions meilleures ont eu pour effet d'introduire la variété dans la production agricole et de procurer ainsi des prix plus élevés pour les produits du sol.

Le tableau 39 indique la proportion pour cent de la valeur totale des récoltes des champs représentée par groupes de récoltes en 1910. La valeur du blé, de l'avoine et de l'orge, pour tout le Canada, représentait 53.64 pour cent de la valeur de toutes les récoltes, les autres grains 8.20 pour cent, formant un total pour tous les grains, de 61.84 pour cent; les pommes de terre représentaient 9.91 pour cent; le foin et les récoltes fourragères, 26.73 pour cent, et les récoltes diverses, 1.52 pour cent. Dans le Manitoba, le blé, l'avoine et l'orge représentaient 90.99 pour cent de toutes les récoltes de la province; dans la Saskatchewan, 86.47 pour cent; dans l'Alberta 79.34 pour cent; dans Ontario, 39.87 pour cent; dans l'Ile du Prince-Edouard, 38.05 pour cent, et moins de 30 pour cent dans Québec, la Colombie-Britannique, la Nouvelle-Ecosse et le Nouveau-Brunswick. Le foin et les récoltes fourragères représentent plus de la moitié de la valeur totale de toutes les récoltes dans la Nouvelle-Ecosse, la Colombie-Britannique et Québec, soit 59.80, 58.71 et 50.82 pour cent respectivement. Les pommes de terre et les racines offrent la plus petite proportion de valeur dans la Saskatchewan et le Manitoba et la plus haute dans l'Ile du Prince-Edouard et le Nouveau-Brunswick. Ontario et Québec offrent la meilleure distribution de valeur entre les différents groupes.

Le prix moyen par boisseau, par tonne ou par livre, selon le cas, est donné dans le tableau 40 pour les récoltes de l'année 1910. Le blé en 1910 était évalué à au delà d'un dollar par boisseau dans la Colombie-Britannique, dans Québec et dans les Provinces Maritimes. Les plus basses et les plus hautes valeurs ont été obtenues dans l'Alberta avec 74 cents par boisseau, et dans Québec avec \$1.15 par boisseau. Le prix moyen par boisseau sur la ferme, pour tout le Canada, était de 79 cents. Le prix des grains est généralement plus élevé dans la Colombie-Britannique, Québec et les Provinces Maritimes que dans les provinces des prairies. Les pois, les fèves, le lin et les pommes de terre se

maintiennent à un prix régulier dans toutes les provinces, excepté Ontario où le prix est de beaucoup moins élevé. Mais en comparant les prix obtenus pour chaque produit entre les différentes provinces, on ne doit pas oublier de considérer la quantité produite par chacune. Là où les quantités sont petites et même insuffisantes pour les besoins locaux, les produits de la ferme obtiennent une valeur plus élevée, le coût de l'article importé ayant été pris comme base d'évaluation. Par exemple, le prix du blé, de l'orge et de l'avoine est plus élevé dans Québec et les Provinces Maritimes que dans Ontario et les provinces du Nord-Ouest. Les pois, les fèves et les racines sont produits en plus grandes quantités dans Ontario que partout ailleurs au Canada, et obtiennent aussi un prix moins élevé par boisseau.

Le tableau 41 indique la proportion pour cent de la valeur totale de toutes les récoltes appartenant à chaque province en 1900 et 1910, et aussi la valeur moyenne par acre de terre produisant ces récoltes.

Ontario a fourni 36·61 pour cent de la valeur totale des récoltes du Canada en 1910, comparativement à 52·39 pour cent en 1900. Dans les provinces situées à l'ouest des Grands Lacs, la proportion de valeur s'est accrue de 13·84 pour cent du total en 1900, à 38·95 pour cent en 1910, tandis que la proportion dans les Provinces Maritimes est tombée de 10·76 à 7·44 pour cent. La valeur moyenne par acre de terre productive était plus élevée qu'ailleurs dans la Colombie-Britannique aux recensements de 1900 et 1910. La plus basse valeur par acre donnée en 1900 revenait au Manitoba (\$6.05), en et 1910 à l'Alberta (\$8 22).

Le tableau 42 donne les chiffres proportionnels indiquant l'importance relative des principales récoltes en 1910, selon les valeurs qui leur sont assignées par les producteurs eux-mêmes. Pour tout le Canada la blé occupe la première place avec 25·19 pour cent; le foin et autres récoltes fourragères la seconde, et l'avoine la troisième place. Le blé est aussi au premier rang dans les provinces

des prairies, donnant plus que 60 pour cent de la valeur totale des récoltes dans le Manitoba et la Saskatchewan, et près de 37 pour cent dans l'Alberta; le foin et autres récoltes fourragères occupent la première place dans la Colombie-Britannique et les provinces de l'est; l'avoine tient la seconde place dans toutes les provinces, excepté la Colombie-Britannique et la Nouvelle-Ecosse où les fruits et les légumes occupent cette place. Les pommes de terre viennent en troisième place dans la Colombie-Britannique, la Saskatchewan, Québec et les Provinces Maritimes. Le blé est au troisième rang dans Ontario, l'orge au même rang dans le Manitoba et de même pour le foin et autres récoltes fourragères dans l'Alberta. Le tableau indique aussi une certaine cohésion entre les groupes des récoltes bien définis dans les différentes provinces. Par exemple,

du montant total rapporté par la terre au cultivateur, les trois principales récoltes représentaient 88.19 pour cent dans le Manitoba, 85.82 pour cent dans la Saskatchewan, 80.94 pour cent dans la Nouvelle-Ecosse, 80.82 pour cent dans la Colombie-Britannique, 79.25 pour cent dans l'île du Prince Edouard, 79.24 pour cent dans le Nouveau-Brunswick, 79.22 pour cent dans l'Alberta, 77.15 pour cent dans Québec et 62.88 pour cent dans Ontario; pour tout le Canada, la valeur du blé, des récoltes fourragères (y compris le foin) et de l'avoine

constitue 70·76 pour cent de la valeur monétaire totale représentée par la récolte de l'année 1910. Le blé et l'avoine constituent 83·73 pour cent de la valeur totale de toutes les récoltes dans la Saskatchewan, et 81·97 pour cent dans le Manitoba. Plus la protection attribuée aux trois principales récoltes d'une province est élevée, plus la proportion des autres récoltes se trouvent réduite.

Le tableau 43 indique la quantité et la valeur des récoltes exportées, pour les années se terminant le 30 juin 1891, 1901 et 1911.

Pour l'année expirée le 30 juin 1891, le Canada a exporté 10,760,110 boisseaux de céréales et de lin évalués à \$7,435,285; en 1901 les exportations se montaient à 25,579,071 boisseaux évalués à \$14,235,132, et en 1911 les exportations de céréales et de lin avaient atteint 58,919,147 boisseaux d'une valeur de \$56,542,862. En 1891 l'orge, les pois et le blé étaient au premier rang quant aux quantités exportées. En 1901 les trois premières positions étaient prises par le blé, les pois et l'avoine, tandis qu'en 1911 le blé, l'avoine et le lin étaient en tête dans l'ordre nommé. Les exportations du blé qui s'élevaient à 2,108,216 boisseaux en 1891 étaient de 9,739,758 boisseaux en 1901 et de 48,523,222 boisseaux en 1911. Les exportations de l'avoine ont décréu de 2,210,633 boisseaux entre

TABLEAU 43. QUANTITÉ ET VALEUR DES RÉCOLTES DES CHAMPS EXPORTÉES EN 1891, 1901 ET 1911 POUR LES ANNÉES DE RECENSEMENT DE 1890, 1900 ET 1910.

1901 et 1911. La quantité de lin exportée dans les années décennales 1891 et 1901 fut si petite qu'elle ne mérite aucune attention, mais en 1911 elle vient en troisième avec une exportation de 2,197,072 boisseaux d'une valeur de \$5,158,610. La valeur du foin exporté en 1901 était de \$2,097,882, comparée à \$3,576,250 en 1911, soit un gain de \$1,478,368 ou 70·4 pour cent. Le Canada en 1901 a exporté 887,409 boisseaux de pommes de terre d'une valeur totale de \$364,387 et d'une valeur moyenne de 41 cents par boisseau, comparative-ment à une exportation totale de 690,212 boisseaux d'une valeur totale de \$468,405 et d'une valeur moyenne de 67 cents par boisseau en 1911.

En plus des quantités de récoltes exportées à l'état naturel en 1911, le Canada a exporté de la farine de blé pour une valeur de \$13,854,790, de la farine d'avoine, du son et d'autres grains moulus pour une valeur de \$4,212,573,

contre une valeur de \$4,015,226 pour la farine de blé et de \$742,821 pour la farine d'avoine, le son et autres grains moulus en 1901. La valeur des exportations pour les produits du grain est donnée dans le tableau qui suit, pour les années se terminant le 30 juin 1891, 1901 et 1911;

Espèces	VALEUR DES EXPORTATIONS DES PRODUITS DU GRAIN POUR LES ANNÉES SE TERMINANT LE 30 JUIN		
	1891	1901	1911
	\$	\$	\$
Farine de blé.....	1,388,578	4,015,226	13,851,790
Farine d'avoine.....	45,195	467,807	518,032
Son.....	162,324	242,245	1,850,219
Autres.....	13,943	32,769	1,844,322
Exportations totales.....	1,610,040	4,758,047	18,067,363

La valeur totale des exportations de tous les produits des champs, bruts et manufacturés, a augmenté de \$21,649,284 en 1901 à \$79,139,413 en 1911.

LOYER ET GAGES.

**Loyer.** Le tableau 44 donne le nombre de fermes en location ou à loyer, ainsi que la superficie des fermes louées, la valeur totale du loyer et la valeur moyenne du loyer par acre. Les faits se rapportant au recensement des terres en location ou à loyer ont été fournis par les locataires eux-mêmes. Il y avait 57,129 fermes louées dans tout le Canada en 1911, comparativement à 47,744 en 1901, dont la superficie a augmenté de 5,899,897 acres en 1901 à 11,082-, 921 acres en 1911. Le loyer payé en 1901 était de \$7,355,363, soit au taux de \$1.25 par acre, comparativement à \$1.22 par acre et à un total de \$13,595,351 en 1911. Les fortes augmentations dans la superficie des terres louées dans le Manitoba, la Saskatchewan et l'Alberta, à un taux minime par acre, a eu pour effet de réduire la moyenne générale du loyer par acre pour tout le Canada au dernier recensement. En 1911 le loyer le plus élevé par acre a été obtenu dans Québec avec \$2.11 et en 1901 dans Ontario avec \$1.64. Dans la Nouvelle-Ecosse le taux par acre a augmenté de 75 cents à \$1.54; dans le Nouveau-Brunswick, de 50 cents à \$1.09; dans Québec, de \$1.05 à \$2.11, et dans Ontario, de \$1.64 à \$1.92 par acre. Dans les provinces des prairies en 1910 la valeur des loyers par acre de terre à culture, variait de 57 cents en Alberta à 97 cents au Manitoba; en 1900 la valeur variait de 15 cents par acre en Alberta à 74 cents en Saskatchewan.

Une enquête récemment instituée par le Bureau du recensement et des statistiques, touchant la question du coût de la production du grain au Canada en 1911, a estimé le profit par acre de terre sous chaque récolte comme étant:— Manitoba, blé de printemps \$5.20, avoine \$4.78, orge \$5.98; Saskatchewan, blé de printemps \$1.42, avoine \$1.23, orge \$3.08; Alberta, blé de printemps, \$1.47, avoine \$2.58, orge \$3.76. Le tableau 41 page lx indique aussi que la valeur totale du rendement par acre de terre sous récolte, en 1910, était de \$9.75 pour le Manitoba, de \$11.64 pour la Saskatchewan et de \$8.22 pour l'Alberta.

**Travail et gages.** Les statistiques du travail et des gages sur la ferme, données au tableau 45, indiquent, pour les années de recensement 1901 et 1911, le nombre de semaines de travail à gages sur la ferme, le montant total des gages payés, la moyenne des gages par semaine, par ferme et par 100 acres de terre améliorée. Le tableau indique aussi la proportion des gages par rapport à la valeur totale de la propriété agricole, et la proportion par rapport à la valeur des produits de la ferme.

Il y a eu des augmentations pour toutes les provinces de l'ouest dans le montant total des gages payés, tandis que les provinces de l'est indiquent des diminutions. La moyenne des gages sur la ferme par semaine, y compris la pension, était de \$8.33 pour tout le Canada en 1911, contre \$5.42 en 1901, soit une augmentation de 53.69 pour cent. Les gages les plus élevés en 1911 ont été payés dans la Colombie-Britannique, avec une moyenne de \$12.35 par semaine pour le temps donné; dans l'Alberta la moyenne était de \$10.79 par semaine; dans la Saskatchewan de \$10.47 par semaine; dans le Manitoba, de \$9.01 par semaine. Dans l'est du Canada, les gages les plus élevés ont été payés au Nouveau-Brunswick, et les moins élevés dans l'Ile du Prince-Edouard. Pour tout le Canada la moyenne des gages par ferme était de \$48.62 par mois en 1911, contre \$44.48 en 1901. Calculé sur la superficie des terres améliorées, le coût du travail était moindre de 6.96 pour cent par 100 acres en 1911 qu'en 1901.

La proportion de la valeur des gages par rapport à la valeur de toute la propriété agricole et à la valeur des produits de la ferme, a diminué dans toutes les provinces de 1901 à 1911. En 1911 les gages étaient 1.82 pour cent de la valeur totale de la propriété, comparativement à 1.35 pour cent en 1901. Les rapports du recensement indiquent qu'il fallait 4.81 pour cent de la production totale pour payer le coût des gages en 1911, comparativement à 6.67 pour cent en 1901. Chaque province indique une réduction dans la proportion des gages relativement à la valeur de la production. Ce résultat est dû sans doute à l'introduction générale du travail mécanique qui permet d'augmenter les opérations agricoles sans augmentations correspondantes dans le nombre d'aides à gages.

NOTA—1 La moyenne des gages par ferme est tirée du total des fermes et non du nombre de fermes employant la main-d'œuvre.

NOTA—2 Le signe (-) indique une diminution.

## ANIMAUX DE LA FERME.

En comparant le nombre et la valeur des animaux de la ferme tels que rapportés dans les recensements de 1911 et 1901, il est absolument nécessaire de considérer que le recensement de 1911 a été pris comme se rapportant à la date du premier juin, tandis que le recensement de 1901 s'est fait comme à la date du 31 mars. Si le recensement de 1911 avait été pris comme se rapportant au 31 mars, le nombre d'animaux de toutes sortes, mais particulièrement le bétail, les moutons et les porcs eût été considérablement plus bas dans les totaux comme dans les moyennes par ferme, pour la bonne raison qu'un très grand nombre d'animaux naissent sur chaque ferme entre le premier avril et le premier juin. Comme la valeur des jeunes animaux ajoutés du 1er avril au 1er juin, serait relativement basse, l'augmentation totale dans la valeur ne serait pas affectée au même point que ne le serait le nombre de chaque sorte. En d'autres termes la valeur moyenne par tête aurait été plus basse pour les chiffres basés sur le recensement pris le 1er juin que sur les chiffres se rapportant au 1er avril. Un sommaire du nombre et de la valeur du bétail au Canada est donné au tableau 46.

TABLEAU 46. SOMMAIRE DU NOMBRE ET DE LA VALEUR DU BÉTAIL AU CANADA, 1911 ET 1901.

Pour cent p.c.	95.98	46.85	28.29	17.70	6.15	43.75

Le tableau précédent, malgré l'addition des jeunes animaux d'une valeur relativement basse par tête, indique pour tout le Canada, que la valeur moyenne des chevaux par tête, de 1901 à 1911, a augmenté de 95.98 pour cent; des vaches-laitières, de 46.85 pour cent; des autres bêtes à cornes, de 28.29 pour cent; des moutons, de 17.70 pour cent; des porcs, de 6.15 pour cent, et des volailles, de 43.75 pour cent. La valeur totale des animaux de la ferme, des volailles et des abeilles, en 1911, était de \$631,103,420, comparativement à \$275,167,627 en 1901, soit une augmentation de 129.35 pour cent dans la décade. De la valeur totale de tous les animaux de la ferme en 1911, les chevaux comptaient 60.51 pour cent, le bétail 31.03 pour cent, les moutons 1.69 pour cent, les porcs 4.28 pour cent et les volailles 2.32 pour cent; en 1901 la proportion des chevaux était de 42.98 pour cent, du bétail 44.75 pour cent, des

moutons 3·81 pour cent, des pores 5·97 pour cent et des volailles 2·08 pour cent. Dans les deux recensements la proportion de la valeur des abeilles par rapport à la valeur totale était moins de la moitié de un pour cent.

CHEVAUX

En 1901 le nombre de chevaux pour tout le Canada, était de 1,577,493, contre 2,598,958 en 1911, soit un gain de 1,021,465 ou 64·75 pour cent dans la décade. Chaque province, excepté la Nouvelle-Ecosse qui indique une diminution de 1,088, a contribué à cette augmentation. En 1911 du nombre total de chevaux au Canada, 48·19 pour cent étaient à l'ouest des Grands Lacs, 31·25 pour cent dans Ontario, 14·30 pour cent dans Québec et 6·25 pour cent dans les Provinces Maritimes. Pour les proportions de chaque province par rapport au total, voir le tableau 48. On remarquera que sur l'augmentation de 1,021,465 dans le nombre de chevaux durant la décade, les provinces du Manitoba, de la Saskatchewan et de l'Alberta ont fourni 854,666 ou 83·67 pour cent; dans la Saskatchewan ils ont agumenté de 423,667 ou 505·56 pour cent; dans l'Alberta de 314,492 ou 339·40 pour cent; dans le Manitoba de 116,507 ou 71·10 pour cent. Comme on l'a déjà dit, vu le changement de date dans la prise du recensement, les chiffres pour 1911, comparés à ceux de 1901, ont l'avantage du nombre d'animaux qui sont nés entre le 1er avril et le 1er juin. Le nombre de chevaux par provinces est donné dans le tableau suivant.

TABLEAU 47. NOMBRE DE CHEVAUX DE TOUT AGE PAR PROVINCES, 1911 ET 1901.

Provinces	CHEVAUX, TOUTS ÂGES		AUGMENTATION (+) OU DIMINUTION (-)	
	1911	1901	numérique	proportionnelle
	NO.	NO.	NO.	p.c.

Ile du Prince-Edouard.....	35,935	33,731	+ 2,204	+ 6·53

Le tableau 48 donne le pour-cent que forme le nombre de chevaux dans chaque province, par rapport au total du nombre de chevaux dans tout le Canada, à la date du 31 mars 1901 et du 1er juin 1911, ainsi que le nombre moyen des chevaux par 100 acres de terre améliorée. La diminution dans le nombre moyen de chevaux par 100 acres de terre améliorée dans l'Alberta et la Saskatchewan, n'est pas due à une diminution dans le nombre réel des animaux (puisque les chevaux ont augmenté de plus de 300 pour cent de 1901 à 1911 dans chacune de ces provinces) mais (1) à la disparition du ranch, (2) au fait que l'augmentation annuelle dans les terres sous culture a eu lieu sans une augmentation correspondante du nombre de chevaux pour les cultiver et (3) à l'emploi des machines à traction pour les exploitations d'une vaste étendue.

TABLEAU 48. POUR-CENT DE LA DISTRIBUTION DES CHEVAUX PAR PROVINCES ET NOMBRE MOYEN PAR 100 ACRES DE TERRE AMELIOREE, 1911 ET 1901.

La valeur totale de tous les chevaux était de \$381,915,505 en 1911, comparativement à \$118,279,419 en 1901, soit un gain de \$263,636,086 ou 222.89 pour cent. Bien que la Nouvelle-Ecosse en 1911 ait au delà de 1,000 chevaux en moins qu'en 1901, elle indique cependant une augmentation de \$3,256,564 ou 84.49 pour cent dans la valeur. Dans Ontario et Québec la valeur des chevaux a plus que doublé en dix ans. Le tableau 49 donne, pour tout le Canada et par provinces, la valeur des chevaux en 1911 et 1901 et l'augmentation faite dans la décade.

TABLEAU 49. VALEUR DES CHEVAUX PAR PROVINCES, 1911 ET 1901.

Le tableau 50 donne la valeur moyenne par tête des chevaux de tout âge, ainsi que le nombre moyen par ferme en 1911 et 1901. Malgré qu'un plus grand nombre de poulains aient été comptés en 1911 qu'en 1901, la valeur des chevaux par tête, indique des augmentations proportionnelles

variant de 74 pour cent dans Québec à 178.69 pour cent dans l'Alberta, ou une moyenne d'augmentation pour tout le Canada de 95.98 pour cent. La valeur moyenne des chevaux par tête, pour tout le Canada, en 1911, était de \$146.95, contre \$74.98 en 1901, soit une augmentation de \$71.97 par cheval. Dans la Colombie-Britannique, l'Alberta et la Saskatchewan la valeur moyenne a plus que doublé durant la décade. En 1901 la plus haute valeur moyenne (\$96.20) revenait au Manitoba, et la plus basse (\$49.74) à l'Alberta. En 1911 la plus haute valeur moyenne (\$174.91) a été fournie par la Saskatchewan et la plus basse (\$115.78) par la Nouvelle-Ecosse.

Le nombre moyen de chevaux par ferme a augmenté de 2.9 en 1901 à 3.6 en 1911. En d'autres termes, au dernier recensement chaque cent fermes possédaient 360 chevaux, contre 290 au recensement précédent. La Colombie-Britannique, l'Alberta et la Saskatchewan indiquent des diminutions dans le nombre de chevaux par ferme durant la décade. La Nouvelle-Ecosse est la seule province dans laquelle le nombre moyen par ferme demeure le même pour les deux recensements.

BÉTAIL.

Les statistiques concernant le bétail sur la ferme sont présentées sous deux en-têtes principaux (1) vaches laitières et (2) autres bêtes à cornes, ce dernier comprenant les taureaux, les bœufs et le jeune bétail en général. Le nombre total de bétail était de 6,526,083 en 1911, de 5,576,451 en 1901 et de 4,120,586 en 1891.

**Vaches laitières.** Dans le recensement de 1891 les vaches laitières formaient 45.06 pour cent du chiffre total de tout le bétail, comparativement à 43.19 pour cent en 1901 et à 39.76 pour cent en 1911. Dans l'Ontario les vaches laitières formaient 45.15 pour cent de tout le bétail en 1891, 42.84

pour cent en 1901 et 41·29 pour cent en 1911. Dans Québec pour les recensements de 1891, 1901 et 1911, les vaches laitières représentaient plus que la moitié de tout le bétail, soit 56·69 pour cent, 56·22 pour cent et 51·89 pour cent respectivement. Dans les provinces maritimes le décroissement dans la proportion des vaches laitières a été plus faible que partout ailleurs au Canada, soit moins de un pour cent dans chaque décade; en 1891 elles représentaient 47·37 pour cent de tout le bétail, 46·68 pour cent en 1901 et 46·52 pour cent en 1911. Dans les provinces de l'ouest où la proportion est allée en augmentant, les vaches laitières comptaient 23·37 pour cent de tout le bétail en 1891, 25·19 pour cent en 1901 et 26·59 pour cent en 1911. Le nombre de vaches laitières dans tout le Canada, par provinces, en 1901, est donné dans le tableau 51, ainsi que les augmentations et diminutions de chaque décade. D'autres statistiques concernant les vaches laitières se trouvent dans les tableaux 52, 53 et 54.

TABLEAU 51. NOMBRE DE VACHES LAITIÈRES PAR PROVINCES, 1911 ET 1901.

Québec.....	754,220	767,825	- 13,605	- 1·77
Nouveau-Brunswick.....	108,557	111,084	- 2,527	- 2·27
Nouvelle-Ecosse.....	129,274	138,817	- 9,543	- 6·87
Ile du Prince-Edouard.....	52,109	56,437	- 4,328	- 7·66

On voit par le tableau précédent qu'il y a eu un gain de 249,348 dans le nombre de vaches laitières entre 1901 et 1911 dans les provinces de l'ouest, et une diminution de 62,770 dans Ontario, Québec et les provinces maritimes, avec une augmentation nette, pour tout le Canada, de 186,578 ou 7·75 pour cent. La plus haute augmentation numérique dans la décade revient à la Saskatchewan avec 124,534, suivie de l'Alberta avec 101,548; pour chacune de ces deux provinces la proportion d'augmentation en 1911 sur 1901 était de 220 pour cent. Le nombre de vaches laitières dans Ontario a diminué de 32,767 ou 3·07 pour cent durant la décade, et cette diminution a constitué plus de 52 pour cent du décroissement total dans les provinces de l'est; dans Québec le nombre a décré de 13,605 ou 1·77 pour cent; dans le Nouveau-Brunswick, de 2,527 ou 2·27 pour cent; dans la Nouvelle-Ecosse, de 9,543 ou 6·87 pour cent, et dans l'Ile du Prince-Edouard, de 4,328 ou 7·66 pour cent durant la décade.

La valeur des vaches laitières est donnée, pour tout le Canada et pour chaque province, dans le tableau 52. En 1911 la valeur était de \$109,575,526, comparativement à \$69,237,970 en 1901, soit une augmentation de \$40,337,556

ou 58.26 pour cent. Malgré le décroissement de 63,170 dans le nombre de vaches laitières dans Ontario, Québec et les provinces maritimes, durant la décade, la valeur totale indique une augmentation de \$27,275,759. Les gains numériques dans les provinces de l'ouest ont contribué à l'augmentation dans la valeur indiquée pour 1911 et 1901.

Le tableau 53 donne la valeur moyenne par tête de vaches laitières en 1901 et 1911. Afin de montrer la richesse moyenne de chaque ferme, basée sur le nombre de vaches laitières tenues, le chiffre moyen par ferme est aussi donné. En 1911, pour tout le Canada, la valeur moyenne par vache était de \$42.22, comparativement à \$28.75 en 1901, soit un gain de \$13.47 par vache ou 46.85 pour cent. Dans Ontario il y a eu un gain de 54.49 pour cent dans la

Ile du Prince-Edouard.....	29.62	22.05	+ 7.57	+34.33	3.6	4.1	- 0.5

valeur moyenne par tête; dans la Nouvelle-Ecosse, de 50.76 pour cent; dans le Nouveau-Brunswick, de 45.39 pour cent, et dans Québec, de 44.09 pour cent. La province de l'Alberta a la plus faible proportion d'augmentation avec 14.61 pour cent, suivie du Manitoba avec 19.66 pour cent. Les vaches laitières de plus hauts prix au dernier recensement étaient dans la Colombie-Britannique (\$58.98) et celles de plus bas prix dans l'Île du Prince-Edouard (\$29.62). Chacune des provinces indique une diminution dans le nombre de vaches laitières en possession de chaque ferme. Cette diminution par ferme dans les provinces de l'est est due au décroissement du nombre d'animaux, tandis que dans les provinces de l'ouest elle est due au fait que la prise de possession des terres comme homestead, ou autrement aliénées, a fait des progrès si rapides durant la décade qu'il a été impossible d'augmenter dans une même proportion le nombre d'animaux.

La distribution proportionnelle des vaches laitières et le nombre moyen par 100 acres de terre améliorée, sont donnés dans le tableau 54 pour les années 1901 et 1911. En 1901 Ontario possédait 44.25 pour cent de toutes les vaches laitières du Canada, et en 1911, bien que sa proportion soit tombée à 39.80 pour cent, elle occupait encore la première place; Québec occupait la seconde place pour les deux recensements avec une proportion de 31.88 pour cent en 1901 et de 29.06 pour cent en 1911. En 1901, seulement 6.16 pour cent des vaches laitières du Canada étaient à l'ouest des Grands Lacs, et en 1911 la proportion avait atteint 19.97 pour cent.

TABLEAU 54. POUR-CENT DE LA DISTRIBUTION DES VACHES LAITIÈRES ET NOMBRE MOYEN PAR 100 ACRES DE TERRE AMÉLIORÉE, PAR PROVINCES, 1911 ET 1901.

Provinces	POUR-CENT DU TOTAL DES VACHES LAITIÈRES DANS CHAQUE PROVINCE			NOMBRE DE VACHES LAITIÈRES PAR 100 ACRES DE TERRE AMÉLIORÉE

Saskatchewan.....	6.98	2.35	+ 4.63	1.53	5.04	- 3.51
Manitoba.....	5.99	5.87	+ .12	2.30	3.54	- 1.24
Ontario.....	39.80	44.25	- 4.45	7.52	8.03	- .51
Québec.....	29.06	31.88	- 2.82	9.24	10.32	- 1.08
Nouveau-Brunswick.....	4.18	4.61	- .43	7.51	7.88	- .37
Nouvelle-Écosse.....	4.98	5.76	- .78	10.28	11.04	- .76
Île du Prince-Edouard.....	2.01	2.34	- .33	6.77	7.77	- 1.00

Le nombre de vaches laitières par 100 acres de terre améliorée au Canada est tombé de 7.98 en 1901 à 5.33 en 1911. Dans les provinces de l'est la diminution proportionnelle est due au décroissement du nombre de vaches, tandis que dans l'ouest elle est due, non pas au décroissement du nombre mais aux causes déjà données plus haut.

**BOEUFS, JEUNE BETAÏL, ETC.** Dans le texte précédant les tableaux 55, 56, 57, 58 et ailleurs, le terme "autres bêtes à cornes" signifie tout le bétail, excepté les vaches laitières.

Le nombre d'autres bêtes à cornes, pour tout le Canada, était de 3,930,828 en 1911, comparativement à 3,167,774 en 1901, soit une augmentation de 763.054 ou 24.09 pour cent. Toutes les provinces, excepté la Nouvelle-Ecosse et le Nouveau-Brunswick, ont contribué à cette augmentation. La Nouvelle-Ecosse indique une diminution de 19,139 ou 10.79 pour cent, et le Nouveau-Brunswick de 2,441 ou 2.10 pour cent dans les dix ans. La plus haute augmentation dans les provinces de l'Est revient à Québec, et dans les provinces de l'Ouest, à l'Alberta. Le tableau 55 donne les chiffres pour chaque période de recensement par provinces, ainsi que le montant et la proportion de variation.

numérique et proportionnelle dans la valeur se trouvent dans la province de la Saskatchewan, Ontario venant en deuxième place et l'Alberta en troisième. Le haussement du prix des "autres bêtes à cornes", durant la décade, ne peut être mieux illustré qu'il ne l'est par les chiffres du Nouveau-Brunswick et de la Nouvelle-Ecosse où, en dépit d'une diminution dans le nombre de têtes, une forte augmentation dans la valeur totale est indiquée pour 1911 sur 1901.

La valeur moyenne par tête de tout bétail, les vaches laitières exceptées, était de \$21.95 en 1911, pour tout le Canada, comparativement à \$17.11 en 1901, soit un gain par tête de \$4.84 ou 28.29 pour cent. En comparant les valeurs moyennes par tête et le nombre de têtes par ferme, soit l'une avec l'autre ou avec les prix courants le 31 mars 1901 et le 1er juin 1911, il ne faut pas oublier qu'un plus grand nombre de veaux est inclus dans les chiffres de 1911 que dans ceux de 1901, et que par conséquent les comparaisons ne sont pas possibles. Malgré que les jeunes animaux soient compris dans les chiffres de 1911, toutes les provinces, excepté l'Alberta, indiquent une augmentation remarquable dans le prix par tête coté sur la ferme. Pour les raisons déjà données, les provinces de l'Ouest indiquent une diminution dans le nombre d'"autres bêtes à cornes" par ferme. Ontario, Québec et l'Île du Prince-Édouard montrent des augmentations. Dans la Nouvelle-Ecosse et le Nouveau-Brunswick, où encore le nombre par ferme est moins élevé en 1911 qu'en 1901, la valeur totale est plus grande au dernier qu'au précédent recensement. Le tableau 57 donne la valeur moyenne par tête de bêtes à cornes, autres que les vaches laitières, ainsi que le nombre moyen par ferme en 1911 et 1901.

TABLEAU 57. VALEUR MOYENNE DES BÊTES À CORNES, AUTRES QUE LES VACHES LAITIÈRES, PAR TÊTE, AINSI QUE LE NOMBRE MOYEN, PAR FERME, 1911 ET 1901.

MOUTONS

Comme l'indique le tableau 59, il y a eu des augmentations dans le nombre de moutons, de 1901 à 1911, dans toutes les provinces de l'Ouest, et des diminutions dans toutes les provinces de l'Est. Les augmentations s'élèvent à 108,436 et les diminutions à 444,375, soit une diminution nette de 335,939 ou 13.38 pour cent. Dans Ontario seulement il y a une diminution de 304,268, soit plus de 90 pour cent de la diminution nette ou 68.5 pour cent de la diminution totale. Le décroissement dans les Provinces maritimes se montait à 122,692. La plus faible proportion de diminution (2.66 pour cent) revient à Québec, et la plus forte à Ontario (29.08 pour cent). Le plus gros gain revient à la Saskatchewan (72.93 pour cent) suivie par l'Alberta (53.37 pour cent), le Manitoba (26.67 pour cent) et la Colombie-Britannique (17.76 pour cent). Les troupeaux étant à leur plus haut degré de développement, pour le nombre de jeunes agneaux, en juin, il est probable que la cause de ce décroissement est plus sérieuse que ne l'indiquent les chiffres de ce tableau. Cette forte diminution n'est pas due au manque de demande pour les viandes de mouton ou d'agneau, puisqu'en ces dernières années les importations de ces viandes ont dépassé cinq millions de livres par année.

Le tableau 60 donne la valeur totale des moutons par provinces en 1901 et 1911, et le tableau 61 la valeur moyenne par tête, ainsi que le nombre moyen par ferme dans les deux années de recensement. On remarquera, malgré la forte diminution numérique, que la valeur des animaux sur pied était plus élevée au dernier recensement qu'au recensement précédent. S'il n'y avait pas eu de diminution dans le nombre, l'augmentation dans la valeur, calculée d'après les prix obtenus dans l'année de recensement, eût été dix fois à peu près plus élevée que ne l'indiquent les chiffres du tableau. Le décroissement des moutons a fait baisser le capital agricole dans Ontario de \$1,090,838, dans l'Ile du Prince-Edouard de \$16,754 et dans le Nouveau-Brunswick de \$5,524.

TABLEAU 60. VALEUR DES MOUTONS, PAR PROVINCES, 1911 ET 1901.

Saskatchewan.....	621, 409	273, 063	+ 348, 346	+127.57
Manitoba.....	224, 214	144, 018	+ 80, 196	+ 55.68
Ontario.....	4, 427, 565	5, 518, 403	-1, 090, 838	- 19.77
Québec.....	2, 710, 285	2, 376, 471	+ 333, 814	+ 14.05
Nouveau-Brunswick.....	533, 158	538, 682	- 5, 524	- 1.03
Nouvelle-Écosse.....	795, 773	757, 278	+ 38, 495	+ 5.08
Ile du Prince-Édouard.....	368, 036	384, 790	- 16, 754	- 4.35

La valeur moyenne des moutons par tête, pour tout le Canada, à la date du 1er juin 1911, était de \$4.92, les agneaux compris, comparativement à \$4.18 le 31 mars 1901, quand peu d'agneaux pouvaient alors être comptés. Pour les deux recensements, Québec et les Provinces Maritimes indiquent les prix les plus bas. En 1901, le plus haut prix moyen par tête (\$5.27) et le plus bas (\$2.65) ont été obtenus par Ontario et la Nouvelle-Écosse respectivement. En 1911, la Colombie-Britannique a donné la plus haute valeur moyenne (\$6.70), et la Nouvelle-

Ecosse la plus basse \$(3.37). Dans les provinces de l'Ouest l'augmentation dans l'évaluation des moutons sur la ferme, durant la décade, a varié de \$1.12 au Manitoba à \$1.85 en Alberta. Dans les provinces de l'est l'augmentation a varié de 42 cents au Nouveau-Brunswick à 97 cents dans l'île du Prince-Edouard.

Le nombre de moutons par ferme, dans toutes les provinces, était moindre en 1911 qu'en 1901. La diminution du nombre par ferme dans les provinces de l'Ouest n'est pas due au décroissement des animaux, mais au développement extraordinaire des terres agricoles entre 1901 et 1911, les nouvelles fermes étant presque toutes consacrées à la culture du blé, en vue de meilleurs rendements.

Île du Prince-Edouard.....	4.20	5.00	- .80	11.86	17.29	- 5.43

les deux recensements, Ontario a obtenu la plus haute proportion avec 41.69 pour cent en 1901 et 34.13 pour cent en 1911. Québec comptait 29.30 pour cent de tous les moutons des différentes provinces en 1911, les provinces maritimes 21.65 pour cent, laissant moins de 15 pour cent aux provinces de l'Ouest. Bien que la capacité de produire plus de moutons au Canada fût plus grande en 1911 qu'en 1901, le nombre donné pour chaque 100 acres de terre améliorée est tombé de 8.32 à 4.46.

### PORCS.

L'activité dans l'élevage des porcs s'est manifestée dans toutes les provinces excepté dans la Colombie-Britannique où il y a eu une diminution de 7,815 ou 18.87 pour cent durant la décade. La plus forte augmentation numérique pour 1911 sur 1901 se trouve dans Québec avec 390,188 et dans Ontario avec 324,755, tandis que les plus fortes augmentations proportionnelles se trouvent dans la Saskatchewan avec 928.10 pour cent, et dans l'Alberta avec 415.55 pour cent. Le tableau suivant donne le nombre de porcs au Canada par provinces en 1911 et 1901.

TABLEAU 63. NOMBRE DE PORCS AU CANADA PAR PROVINCES, 1911 ET 1901.

Ile du Prince-Edouard.....	341,535	355,373	- 13,838	- 3.89

Comme l'indique le tableau 65, pour tout le Canada, la valeur moyenne par porc et le nombre moyen par ferme ont faiblement augmenté de 1901 à 1911, mais le changement de date, du 31 mars au 1er juin, affecte jusqu'à un certain point les statistiques comparatives du bétail pour les deux recensements.

D'après les rapports du Commerce le prix d'exportation par porc, en 1901, était de \$8.79 et en 1911 de \$14.84, soit une augmentation de \$6.05 ou 68.8 pour cent sur les chiffres de l'année de recensement précédente. Ces chiffres du Commerce démontrent deux choses (1) que les valeurs inscrites par les recenseurs étaient plutôt au-dessous qu'au-dessus du prix réel et (2) que la proportion d'augmentation dans la valeur par porc, était au delà de dix fois plus élevée que celle fournie par les recenseurs. De là on peut conclure que les augmentations

indiquées dans les prix moyens de 1901 à 1911, pour Québec et les provinces maritimes, sont dues au petit nombre de porcs de grosseur ordinaire gardés d'une saison à l'autre, ainsi qu'au nombre de jeunes porcs comptés dans le dernier recensement. Les mêmes causes ont contribué à réduire le prix moyen par tête dans les autres provinces.

En 1901 la province d'Ontario occupait le premier rang dans l'élevage des porcs, avec une production de 66·39 pour cent des porcs de tout le Canada. En 1911 elle tenait encore le même rang mais avec une proportion réduite à 51·93 pour cent de la production totale du Canada. Québec et le Nouveau-Brunswick seules des provinces de l'Est, indiquent une augmentation proportionnelle de 1901 à 1911, ainsi que l'Alberta et la Saskatchewan dans l'ouest. Le tableau 66 donne la proportion que forme le nombre de porcs dans chaque province par rapport au chiffre total pour le Canada, ainsi que le nombre moyen de porcs sur chaque 100 acres de terre améliorée en 1911 et 1901.

#### VOLAILLES

La statistique des volailles est donnée dans les tableaux 67, 68, 69, 70 et 71 par provinces, pour 1901 et 1911, en chiffres numériques et proportionnels.

Le tableau 67 donne le nombre de volailles par provinces en 1911 et 1901. En cette dernière année Ontario possédait 58·38 pour cent de la totalité des volailles du Dominion, contre 44·19 pour cent en 1901. Les gains numériques les plus élevés se trouvent dans Ontario avec 4,024,429, dans la Saskatchewan avec 3,096,059, dans l'Alberta avec 2,201,318 et dans Québec avec 1,878,151, tandis que les augmentations proportionnelles les plus élevées se trouvent dans la Saskatchewan avec 1,041·24 pour cent; dans l'Alberta avec 874·24 pour cent; dans la Colombie-Britannique avec 178·56 pour cent; dans le Manitoba avec 121·42 pour cent et dans Québec avec 57·20 pour cent. Dans chacune des autres provinces l'augmentation proportionnelle durant la décade était au-dessous de 40 pour cent.

Le nombre de toutes les volailles est monté de 17,922,658 avec une valeur de \$5,723,890 en 1901, à 31,793,261 avec une valeur de \$14,653,773 en 1911, soit un gain en nombre de 13,870,603 ou 77.39 pour cent, et en valeur de \$8,929,883 ou 156 pour cent. On devra se rappeler encore que le changement de date du dernier recensement rend les comparaisons quelque peu difficiles entre les chiffres pour 1901 et 1911.

Ile du Prince-Edouard.....	760,939	581,790	+ 179,149	+ 30.79

D'après le recensement de 1901, se rapportant à la date du 31 mars, il y avait, pour tout le Canada, 584,569 dindons, 395,997 oies, 290,775 canards et 16,651,337 poules et poulets; d'après le recensement de 1911, se rapportant à la date du 1er juin, les dindons étaient au nombre de 863,182, les oies de 629,524, les canards de 527,098, les poules et poulets de 29,773,457. Bien que les chiffres indiqués pour 1911 aient été considérablement affectés pour les éclosions entre le 31 mars et le 1er juin, le progrès constant fait dans l'élevage des volailles est confirmé par le fait que la quantité d'oeufs a augmenté de 84,132,802 douzaines en 1901 à 123,071,034 douzaines en 1911, soit une augmentation de 38,938,232 douzaines ou 46 pour cent en dix ans.

Le tableau 68 donne le nombre de volailles selon les différentes espèces, par provinces pour 1901 et 1911. Les dindons indiquent des diminutions dans toutes les provinces maritimes, les oies ont diminué dans la Nouvelle-Ecosse, et les canards dans le Nouvelle-Ecosse et l'Ile du Prince-Edouard. L'augmentation quant au nombre de poules et poulets s'étend à toutes les provinces.

En 1901 Ontario possédait 58.39 pour cent de toutes les volailles du Canada, comparativement à 45.57 pour cent en 1911. Les chiffres proportionnels d'Ontario, de Québec et des provinces maritimes ont diminué de 1901 à 1911, tandis que ceux des provinces de l'ouest ont augmenté. Le nombre de volailles par 100 acres de terre améliorée, pour tout le Canada, a monté de 59.41 en 1901 à 65.24 en 1911. Pour chaque 100 acres de terre améliorée, au dernier recensement, la Colombie-Britannique possédait 212 volailles de différentes espèces, Ontario 106, l'Ile du Prince-Edouard 99, la Nouvelle-

La valeur moyenne de chaque volaille, pour tout le Canada, a monté de 32 cents en 1901 à 46 cents en 1911, et le nombre moyen par ferme de 32.9 à 44.5. Dans les deux recensements, Ontario avait la plus haute moyenne de volailles de toutes espèces par ferme, soit 46.7 en 1901 et 63.9 en 1911, et la Nouvelle-Ecosse la plus basse, soit 14.2 en 1901 et 17.8 en 1911. Le tableau 71 donne la valeur moyenne par volaille, ainsi que le nombre moyen par ferme en 1911 et 1901.

## EXPORTATIONS D'ANIMAUX DE FERME.

**Chevaux.** Les chiffres du tableau 72, tirés des rapports du Commerce, donnent les exportations des animaux de ferme pour les décades 1881-1890, 1891-1900, 1901-1910, et pour les années 1909 et 1910 séparément.

Pour les dix premières années, le nombre de chevaux exportés à tous les pays était de 33,474 plus élevé que durant la deuxième décade; et quoique les Etats-Unis aient pris 106,353 chevaux de moins dans la dernière décade que dans la première, le Royaume-Uni en a pris 67,376 de plus. Les exportations de chevaux dans la troisième décade étaient de 94,852 de moins que dans la seconde et 128,326 de moins que dans la première. Dans les dix années 1901-1910 les exportations de chevaux au Royaume-Uni sont tombées à moins de  $\frac{1}{6}$  de ce qu'elles étaient dans la décade précédente et aux Etats-Unis à moins de  $\frac{1}{3}$ , tandis qu'elles ont augmenté au delà de 50 pour cent aux autres pays. L'exportation moyenne par année, de 1881-1890, était de 16,952, de 1891-1900 elle est tombée à 13,605, et de 1901-1910 elle a encore déchu jusqu'à 4,120. Le rapport annuel pour les deux dernières années de la décade était de 2,028 pour 1906, et de 2,762 pour 1910.

Une étude des tableaux précédents démontre que le décroissement dans l'exportation des chevaux durant la décade est dû non pas à une diminution dans la production ou à l'infériorité des prix obtenus, mais à des conditions meilleures sur le marché domestique occasionnées par le progrès général du pays, et plus particulièrement encore à cause de la grande demande pour les chevaux de travail créée par les nombreux établissements agricoles dans les provinces de l'ouest.

TABLEAU 72. EXPORTATIONS D'ANIMAUX DE FERME PAR DÉCADES, 1881-1910. LES ANNÉES 1909 ET 1910 SONT DONNÉES SÉPARÉMENT.

1910.....	390	—	205	185

**Bétail.** L'accroissement dans les exportations du bétail au Royaume-Uni, pour les dix années 1901-1910 sur la période de 1891-1900, est de 39.49 pour

cent; dans les exportations aux Etats-Unis durant la même période il y a eu une diminution de 48·26 pour cent. Les exportations totales du bétail en 1910 sont moindres qu'en 1900.

**Moutons.** Les exportations totales de moutons et d'agneaux, durant l'année 1900, étaient de 111,107 dont 104,349 ou 93·91 pour cent aux Etats-Unis. En 1909 les exportations de moutons et d'agneaux au Royaume-Uni étaient de 19,793, contre 1,828 en 1910.

**Porcs.** Le commerce d'exportation dans les pores vivants est presque nul, seulement 390 en 1910 et 366 l'année précédente.

ANIMAUX DE RACE.

Le nombre d'animaux de race, pour tout le Canada et pour chacune des provinces, est donné dans le tableau 73, ainsi que les détails des différentes races dont se compose chaque classe.

NOTE—Le signe (—) indique une diminution.

Pour tout le Canada, de 1901 à 1911, les chevaux de race indiquent une augmentation de 22,393 ou 208.19 pour cent; le bétail de 47,398 ou 61.95 pour cent; les moutons, de 8,299 ou 18.31 pour cent; les pores, de 15,628 ou 38.27 pour cent. La proportion des animaux de race par rapport au chiffre total de chaque classe sur la ferme en 1901, était de .68 pour cent pour les chevaux; de 1.37 pour cent pour le bétail; de 1.85 pour cent pour les moutons, et de 1.72 pour cent pour les pores. En 1911 la proportion des chevaux était de 1.27 pour cent; du bétail de 1.89 pour cent; des moutons, de 2.46 pour cent et des pores de 1.55 pour cent.

Les Clydesdales sont en tête des chevaux de race avec 19,911 sur un total de 33,149. Pour le bétail la race des Shorthorn vient en premier rang avec 56,614 dont 36,307 dans Ontario, suivi de la race des Holstein avec 23,292 dont 17,119 dans Ontario. La race des Ayrshire compte 17,257 dont 8,695 dans Québec. Pour les moutons les Shropshire viennent les premiers avec 17,678, suivis des Oxforddowns avec 9,127, des Leicesters avec 8,919 et des Cotswolds avec 8,539. Pour les pores les Yorkshire sont en tête avec 27,730, suivis des Berkshire avec 13,889.

### ANIMAUX VENDUS.

Les tableaux 74 à 81 contiennent les statistiques des animaux vendus sur la ferme en 1910. On ne devra pas oublier, dans l'étude de ces chiffres, que toutes les ventes d'animaux inscrites sur les listes du recensement ne sont pas nécessairement que pour l'exportation, et que les mêmes animaux peuvent avoir été vendus plus d'une fois durant l'année; par exemple, le bétail, les pores et les volailles, particulièrement, sont achetés pour être engraisés et vendus ensuite pour la consommation domestique ou l'exportation. On reviendra plus tard sur ce sujet lorsque les statistiques des différentes espèces d'animaux vendus seront considérées.

Les chiffres des ventes de bétail, de moutons, de pores et de volailles, tels que donnés dans les deux recensements, ne sont pas comparables. Dans le recensement de 1901 les recenseurs devaient obtenir le nombre d'animaux tués ou vendus pour l'abattoir ou l'exportation, tandis qu'en 1911 ils devaient inscrire le nombre et la valeur des chevaux, du bétail, des moutons, des pores et des volailles vendus durant l'année de calendrier, et la valeur seulement des animaux tués sur la ferme en 1910. Afin d'expliquer la différence apparente des chiffres concernant les animaux tués ou vendus en 1900, il est dit dans l'introduction du volume II du recensement de 1901, page XXX, «que la question relative au nombre des animaux tués ou vendus pour la boucherie ou l'exportation n'ait pas été clairement comprise par les énumérateurs et que dans bien des cas les animaux tués sur la ferme n'aient pas été comptés.»

Le tableau 74 est un état comparatif des évaluations par tête de chaque espèce d'animaux sur la ferme dans le dernier recensement, et le prix moyen par tête obtenu pour les animaux vendus. Les chiffres démontrent que, généralement, les provinces qui donnent des valeurs élevées pour une classe quelconque d'animaux sur la ferme, donnent aussi des valeurs élevées pour les animaux vendus en 1910. Les statistiques semblent indiquer par là que les cultivateurs ont basé leurs estimations de la valeur des animaux sur la ferme, à la date du

recensement, sur les chiffres obtenus des ventes faites durant l'année, et sont en même temps une indication de la richesse du Canada dans toutes les classes d'animaux, ainsi qu'une preuve de l'importance de l'industrie animale au pays.

**Chevaux.** Dans le recensement de 1901 le nombre de chevaux vendus durant l'année n'a pas été inscrit, et les valeurs en ont été comprises avec celles des autres animaux vendus durant l'année sous l'en-tête général "Animaux vendus durant l'année". Il n'est donc pas possible de faire, entre les deux recensements, des comparaisons quant au nombre ou à la valeur des chevaux vendus. En 1911 le nombre de chevaux vendus, pour tout le Canada, s'élevait à 319,042 avec une valeur de \$46,810,659 et une valeur moyenne de \$146.72 par tête. La valeur moyenne des chevaux vendus et celle des chevaux gardés sur la ferme sont presque semblables, la première étant de \$146.72 et la dernière de \$146.95. Les trois provinces de la Saskatchewan, de Québec et du Nouveau-Brunswick indiquent des plus petites moyennes quant aux prix des chevaux vendus que pour ceux des chevaux gardés sur la ferme. Le prix par tête obtenu pour les chevaux vendus était plus élevé que celui des chevaux gardés sur la ferme dans la Colombie-Britannique, l'Alberta, le Manitoba, Ontario, la Nouvelle-Ecosse et l'Ile du Prince-Edouard, tableau 74.

Le tableau 75 donne un sommaire du nombre et de la valeur des chevaux vendus en 1910, la proportion qu'ils forment par rapport aux chevaux sur la ferme et la distribution proportionnelle des ventes par provinces. La proportion des chevaux vendus par rapport au nombre gardé sur la ferme à la date du recensement était, pour tout le Canada, de 12.28 pour cent. Ontario et l'Ile du Prince-Edouard offrent les chiffres les plus élevés, les ventes dans la première représentant 15.23 pour cent et dans la dernière 14.66 pour cent du chiffre total sur la ferme. La plus basse proportion des ventes se trouve dans la Saskatchewan où elle représente seulement 8.36 pour cent du total sur la

ferme. Dans les autres provinces les chiffres se rapprochent de la moyenne générale pour le Dominion. Comme on l'a déjà mentionné, une petite proportion seulement des ventes de chevaux inscrites dans le recensement était pour l'exportation. Les chiffres du recensement indiquent que 319,032 chevaux ont changé de mains en 1910, tandis que les rapports du Commerce montrent que sur ce nombre 2,764, ou moins de un pour cent, ont été expédiés en dehors du pays. Du nombre de ventes faites, Ontario a obtenu 38.74 pour cent, Québec 14.43 pour cent, les provinces maritimes 5.82 pour cent, les provinces des prairies 38.80 pour cent et la Colombie-Britannique 2.21 pour cent.

TABLEAU 75. CHEVAUX VENDUS EN 1910, PROPORTION QU'ILS FORMENT DES CHEVAUX SUR LES FERMES, AINSI QUE LA DISTRIBUTION POUR CENT DES VENTES, PAR PROVINCES.

**Bétail de toute espèce.** Le tableau 76 contient la statistique des différentes espèces de bétail—vaches laitières, taureaux, boeufs, taures et veaux—et donne le nombre et la valeur de tous ces animaux vendus en 1910. Un très grand nombre de bestiaux vendus durant l'année étaient des animaux qui avaient déjà été achetés par les cultivateurs durant la même année. La coutume d'acheter des animaux pour les mettre à l'engrais est commune à toutes les parties du pays, et conséquemment les ventes collectives du bétail comprennent nécessairement quelques cas de duplication. Le nombre total du bétail vendu pour tout le Canada, en 1910, était de 1,752,792 têtes, avec une valeur totale de \$60,438,593 et une valeur moyenne de \$34.48 par tête.

Le prix moyen le plus élevé par tête revenait à Ontario avec \$38.57, et le moins élevé au Nouveau-Brunswick avec \$24.39.

La proportion du nombre de ventes par rapport au nombre de bestiaux sur la ferme était plus élevée dans l'Alberta avec 34.72 pour cent, suivie d'Ontario avec 32.14 pour cent, du Manitoba avec 30.43 pour cent, de la Colombie-Britannique avec 28.90 pour cent, et de Québec avec 21.33 pour cent. Dans toutes les autres provinces les ventes représentaient au-dessous de 20 pour cent de tous les bestiaux sur la ferme le 1er juin 1911. De toutes les ventes ins-

crites dans les listes du recensement, Ontario comptait 45·87 pour cent, Québec 16·26 pour cent, l'Alberta 14·65 pour cent, le Manitoba 7·56 pour cent, la Saskatchewan 6·89 pour cent, les provinces maritimes 6·47 pour cent, et la Colombie-Britannique 2·30 pour cent.

**Vaches laitières.** Le tableau 77 donne la statistique des vaches laitières vendues en 1910, et dont les chiffres sont aussi compris dans le tableau précédent. Les ventes de vaches laitières représentaient 21 pour cent du nombre total de bêtes à cornes vendues et 23·45 pour cent de la valeur totale obtenue. La valeur moyenne pour tout le Canada était de \$38·51 par tête. Le prix payé par tête était de \$52·29 dans la Colombie-Britannique, de \$42·32

**TABEAU 77. VACHES LAITIÈRES VENDUES EN 1910, PROPORTION QU'ELLES FORMENT DU TOTAL SUR LES FERMES, AINSI QUE LE POUR-CENT DE LA DISTRIBUTION DES VENTES, PAR PROVINCES.**

Ontario	143,790	6,085,102	42.32	13.92	39.06
Québec	103,180	3,526,036	34.17	13.68	28.03
Nouveau-Brunswick	11,767	345,356	29.34	10.84	3.20
Nouvelle-Ecosse	13,775	461,050	33.47	10.66	3.74
Ile du Prince-Edouard	6,157	150,780	24.49	11.82	1.67

dans l'Ontario, de \$41.43 dans la Saskatchewan, de \$39.14 dans l'Alberta, et de \$37.75 dans le Manitoba. Dans Québec et les provinces maritimes le prix moyen variait de \$24.49 dans l'Île du Prince-Edouard à \$34.17 dans Québec. Les ventes de vaches laitières dans l'Ontario, Québec et la Saskatchewan représentaient moins de 14 pour cent du total sur les fermes; dans les provinces maritimes la proportion était environ de 11 pour cent; dans le Manitoba, de 18.43 pour cent; dans l'Alberta, de 19.78 pour cent, et dans la Colombie-Britannique, de 20.11 pour cent.

**Moutons.** Le nombre de moutons vendus en 1910 était de 949,039 avec une valeur totale de \$4,720,014 et une valeur moyenne de \$4.97 par tête. La valeur des moutons tués sur la ferme dans la même année était de \$735,343, et en appliquant le prix moyen obtenu pour les moutons vendus cela donnerait un total de 1,096,996 moutons vendus ou tués en 1910, comparativement à un total de 1,342,288 dans l'année de recensement se terminant le 31 mars 1901. Comme les ventes de moutons ne comptent pas autant de cas de duplication que celles du bétail ou des porcs, les chiffres représentent passablement bien le commerce dans les moutons pour cette année-là. Du chiffre total de moutons vendus, l'Ontario comptait 41.79 pour cent, Québec 28.95 pour cent, les provinces maritimes 19.48 pour cent et les provinces de l'ouest 9.78 pour cent.

Le nombre des moutons vendus, pour tout le Canada, formait 43.65 pour cent du nombre total sur les fermes, par provinces dans l'ordre suivant: l'Ontario 53.43 pour cent, Québec 43.12 pour cent, l'Île du Prince-Edouard 43.04 pour cent, la Colombie-Britannique 41.10 pour cent, la Nouvelle-Écosse, le Nouveau-Brunswick et le Manitoba de 38.17 à 38.94 pour cent, et l'Alberta et la Saskatchewan, moins de 30 pour cent

TABLEAU 78. MOUTONS VENDUS EN 1910, PROPORTION QU'ILS FORMENT DU TOTAL SUR LES FERMES, AINSI QUE LE POUR-CENT DE LA DISTRIBUTION DES VENTES, PAR PROVINCES.

Île du Prince-Edouard.....	39,266	158,258	4.03	43.04	4.14

**Porcs.** Le montant total qui revient aux cultivateurs du Canada en 1910 de la vente des porcs, est de \$51,344,366. Ce montant considérable a été obtenu (1) des porcs vendus \$33,229,063 et (2) des porcs tués sur la ferme \$18,115,303.

Si l'on applique le prix moyen obtenu pour les porcs vendus à la valeur des porcs tués sur la ferme, cela donne un total de 4,282,623 porcs vendus ou tués dans l'année 1910, comparativement à 2,555,413 dans la décade précédente, soit un gain de 1,727,210 ou 67·59 pour cent de 1901 à 1911.

La proportion des porcs vendus ou tués par rapport aux porcs gardés sur la ferme en 1901, était de 108·56 pour cent, contre 116·82 pour cent en 1911. En d'autres termes pour chaque 1,000 porcs vivants en 1900 on en avait vendu ou tué 1,085, et en 1911 le nombre de porcs vendus ou tués était de 1,178 pour chaque 1,000 porcs vivants. Mais comme les chiffres du dernier recensement, pris le 1er juin, comprennent les jeunes porcs, la proportion des porcs vendus ou tués par rapport au total des porcs vivants en 1911 se trouve ainsi contrairement affectée. Le nombre de porcs tués sur la ferme n'ayant pas été entré sur les listes, la statistique du tableau 79 ne se rapporte qu'aux porcs vendus.

TABLEAU 79. PORCS VENDUS EN 1910, PROPORTION QU'ILS FORMENT DU TOTAL SUR LES FERMES, AINSI QUE LE POUR-CENT DE LA DISTRIBUTION DES VENTES PAR PROVINCES.

Provinces	PORCS VENDUS			Proportion, des porcs vendus du total sur les fermes	Pour-cent de la distribution des porcs vendus

**Volailles.** En 1910 le montant qui revenait aux cultivateurs du produit des volailles, pour tout le Canada, s'élevait à \$31,262,414 dont \$4,819,423 pour volailles vendues, \$3,172,228 pour volailles tuées et \$23,270,763 pour les œufs. On voit par là que si la valeur des volailles vivantes sur la ferme à la date du recensement, peut être acceptée comme constituant le capital placé dans cette branche de l'industrie animale, les revenus provenant de cette source se montent à 213·34 pour cent.

Le tableau 80 donne les chiffres du revenu provenant de l'industrie de la volaille, par classes et par provinces.

TABLEAU 80. REVENU DES VOLAILLES PAR PROVINCES EN 1910.

Le tableau 81 constitue un état comparatif de la valeur des animaux de ferme vendus ou tués au dernier recensement et au recensement précédent. Les chiffres pour le recensement de 1911 se rapportent à l'année de calendrier 1910, tandis que ceux du recensement précédent sont pour l'année se terminant le 31 mars 1901. Cette différence de date exceptée, les statistiques des valeurs dans chaque recensement reposent sur les mêmes bases. En 1901 les valeurs étaient données totalement (1) pour les animaux vendus et (2) pour les animaux tués sur la ferme. En 1911 les valeurs de chaque espèce d'animaux vendus ou tués ont été données en détail. La valeur totale de tous les animaux vendus ou tués, en 1911, était de \$177,635,587, contre \$75,706,902 en 1901, soit un gain de \$101,928,685 ou 134.64 pour cent. Le plus haut montant d'augmentation durant la décade se trouve dans Ontario avec \$40,892,663, et les plus fortes proportions dans les provinces de l'ouest, à savoir: l'Alberta 750 pour cent, la Saskatchewan 669.15 pour cent, le Manitoba 205.40 pour cent et la Colombie-Britannique 144.99 pour cent. La plus faible proportion est dans la Nouvelle-Ecosse (65.02 pour cent).

TABLEAU 81. VALEUR TOTALE DE TOUS LES ANIMAUX DE FERME VENDUS OU TUÉS EN 1910 ET 1900.

Ile du Prince-Edouard.....	2,441,252	1,240,908	1,200,344	96.73	1.37	1.64

**Laine.** La tonte de 1911 était de 6,933,955 livres évaluée à \$1,602,044, soit une valeur moyenne de 23·1 cents la livre. La tonte de 1901 s'élevait à 10,657,597 livres valant \$1,887,064 ou une valeur moyenne de 17·7 cents la livre.

**Oeufs.** En 1910 le Canada a produit 123,071,034 douzaines d'œufs ayant une valeur totale de \$23,270,763 et une valeur moyenne de 18·9 cents la douzaine sur la ferme, comparativement à une production de 84,132,802 douzaines en 1900 ayant une valeur totale de \$10,286,828 et une valeur moyenne de 12·2 cents la douzaine.

Durant l'année se terminant le 30 juin 1901 le Canada a exporté 11,363,064 douzaines d'œufs valant \$1,691,640, et importé 951,745 douzaines valant \$194,188, contre une exportation durant l'année se terminant à la même date en 1911, de 87,420 douzaines valant \$23,752 et une importation de 2,926,856 douzaines valant \$531,864. Le prix par douzaine reçu pour les œufs exportés en 1901 était de 14·9 cents contre 27·2 cents en 1911. Les œufs importés ont rapporté 18·2 cents par douzaine en 1911 et 20·4 cents en 1901.

Le tableau suivant contient les statistiques de la production, des exportations, des importations et de la consommation des œufs en 1911 et 1901. Les chiffres de ce tableau démontrent qu'il est possible d'agrandir avantageusement la sphère de cette industrie, car s'il n'y avait eu ni exportation ni importation d'œufs en 1910, la production domestique serait restée en deçà de 2,839,436 douzaines de la demande du marché canadien.

NOTE:—Les chiffres de l'exportation et de l'importation sont pour les douze mois expirant le 30 juin 1901 et 1911.

EXPORTATIONS DES PRODUITS ANIMAUX.

La quantité et la valeur des produits animaux exportés durant les années se terminant le 30 juin 1891, 1901 et 1911 sont données dans le tableau 83. De 1891 à 1901 les exportations de viandes de toutes sortes indiquent de fortes

augmentations, tandis que de 1901 à 1911 les exportations du bœuf et du jambon seulement ont avancé. Ces diminutions dans les exportations des produits animaux durant la dernière décade se sont produites en dépit du fait qu'en 1901 la valeur moyenne par livre des exportations du bacon était de 11·2 cents; du bœuf de 8·4 cents; des viandes en boîtes de 11·3 cents; des jambons de 11·3 cents; du mouton de 7·4 cents; du porc de 6·9 cents, comparativement aux chiffres suivants pour 1911: bacon, 13·7 cents, bœuf, 9·3 cents, viandes en boîtes, 13·4 cents, jambons, 13·3 cents, mouton, 8·8 cents, porc, 11·2 cents. Les tableaux précédents ayant démontré qu'il y a eu une augmentation dans le nombre d'animaux en 1911, comparativement à 1901, la diminution dans les exportations durant la décade doit être attribuée à une plus grande consommation domestique, due en partie à l'augmentation de la population et aussi à une population plus en moyen d'acheter conformément à un ton de vie plus élevé.

### PRODUITS LAITIERS.

Dans le recensement de 1901 la statistique de l'industrie laitière sur la ferme était représentée sous deux en-têtes (1) la valeur totale des produits laitiers et (2) la quantité de beurre fait durant l'année. Dans le dernier recensement la quantité et la valeur du beurre de ménage ont été inscrites séparément. La quantité totale et la valeur du lait produit sur la ferme ont aussi été inscrites et cette valeur a été prise comme représentant la valeur totale des produits laitiers revenant au cultivateur, c'est-à-dire la valeur du lait sans le renchérissement du travail.

Le tableau suivant, —dans lequel les exportations, les importations et la consommation du beurre, du fromage, de la crème, du lait condensé, etc., ont été convertis à leurs équivalents en lait—donne une comparaison intéressante de la condition de l'industrie laitière au Canada en 1901 et 1911.

TABLEAU 81. STATISTIQUES COMPARATIVES DE L'INDUSTRIE LAITIÈRE MONTRANT LA PRODUCTION, L'EXPORTATION, L'IMPORTATION, ET LA CONSOMMATION, POUR TOUT LE CANADA, POUR LES ANNÉES DE RECENSEMENT 1911 ET 1901.

NOTA.—Les chiffres donnant l'exportation et l'importation des produits de la laiterie, sous le terme "lait" sont tirés du livre intitulé "Production laitière au Canada" par M. J. A. Ruddick, commissaire de l'Industrie laitière.

On voit par le tableau précédent que la production totale du lait a augmenté de près de trois billions de livres ou 42·81 pour cent de 1901 à 1911. Durant cette même période nos exportations de produits laitiers convertis à leurs équivalents en lait, ont augmenté de 11·05 pour cent et nos importations converties de la même manière ont augmenté de 14·28 pour cent. La consommation de produits laitiers, en lait, pour tout le Canada donne une augmentation totale de 3,222,825,489 livres ou 73·38 pour cent, et la consommation par tête de la population donne une augmentation de 239·20 livres ou 29·28 pour cent. La production moyenne de lait par vache, pour tout le Canada, était de 3,779 livres en 1911, contre 2,850 livres en 1901. Le plus haut rendement par vache au dernier recensement se trouve dans la Colombie-Britannique avec 4,372 livres, suivie d'Ontario avec 4,158 et de Québec avec 3,582 livres. Les Provinces Maritimes indiquent toutes une faible moyenne de production, la Nouvelle-Ecosse 3,296 livres, le Nouveau-Brunswick 3,177 livres et l'Île du Prince-Edouard 3,010 livres. La production laitière dans les provinces des prairies est remarquablement égale, soit de 3,565 livres dans l'Alberta, de 3,501 livres dans le Manitoba et de 3,654 livres dans la Saskatchewan.

Dans le tableau 85 se trouve un état comparatif de la quantité de beurre, de ménage et de fabrique, produite au Canada en 1900 et 1910, ainsi que la production moyenne par ferme dans chaque année. La quantité totale de beurre produite au Canada en 1910 était de 201,599,598 livres, dont 137,110,200 livres de ménage et 64,489,398 livres de beurre de fabrique, contre une production totale de 141,409,815 livres en 1900, dont 105,343,076 livres de beurre de ménage et 36,066,739 livres de beurre de fabrique. L'augmentation dans le beurre de ménage était de 31,767,124 livres ou 30·15 pour cent, et dans le beurre de fabrique, de 28,422,559 livres ou 78·80 pour cent, formant une augmentation totale de 60,189,783 livres ou 42·56 pour cent. La production

moyenne du beurre de ménage par ferme qui était de 193·4 livres en 1900 est tombée à 191·8 livres en 1910, et la quantité moyenne de beurre de fabrique par ferme a augmenté de 66·2 livres en 1900 à 90·2 livres en 1910.

En 1901, comme il est déjà mentionné, on n'a pas tenu compte du fromage de ménage, et il est probable que le quantité alors était de peu d'importance; en 1911, bien que le fromage de fabrique indique une diminution de près de 21 millions de livres, le fromage de ménage ne s'élève pas à plus des  $\frac{7}{10}$  de un pour cent de la production totale du fromage.

TABLEAU 85. ÉTAT COMPARATIF DE LA PRODUCTION DU BEURRE ET DU FROMAGE AU CANADA, 1910 ET 1900.

(1) Non mentionné. (2) Le signe (-) indique une diminution.

Sur la production totale du beurre en 1910 (201,599,598 livres) 3,673,702 livres ont été exportées, laissant 197,925,896 livres pour la consommation domestique, qui, avec les 746,102 livres importées, donnent un total de 198,671,998 livres de beurre consommées au Canada en 1910, soit une moyenne de 27·56 livres par tête de la population.

Les exportations du fromage se montaient à 186,665,789 livres ou 92·6 pour cent de la production totale. Le produit de 1910 non exporté (14,609,508 livres) avec les 862,862 livres importées forment une consommation moyenne de 2·14 livres par tête de la population.

Le tableau 86 donne un sommaire de la production laitière en 1910 par provinces. La province de Québec a produit 64·79 pour cent de tout le beurre de fabrique fait au Canada en 1910, et 30·44 pour cent de tout le beurre. C'est la seule province où la production domestique n'a pas dépassé la production des fabriques. La Colombie-Britannique n'a pas produit de fromage de fabrique et seulement une petite quantité de fromage d'aucune sorte. Les provinces des prairies ont donné plus d'attention à la production du beurre qu'à celle du fromage; les trois provinces ont produit 36,428,801 livres de beurre en 1910 et seulement 1,411,781 livres de fromage. La province d'Ontario occupe la première place dans la fabrication du fromage, ayant produit plus de 68 pour cent de la production totale du Canada, Québec vient ensuite avec environ 29 pour cent et l'Île du Prince-Edouard en troisième avec 1·6 pour cent.

Le tableau 87 fournit un état comparatif de la valeur des produits laitiers en 1900 et 1910. Pour tout le Canada, la valeur des produits laitiers s'élevait à \$103,381,854 en 1910; contre \$66,470,953 en 1900, soit un gain de \$36,910,901, ou 55.53 pour cent dans la décade. Dans le Manitoba, la Saskatchewan et l'Alberta la valeur des produits laitiers a augmenté de \$4,068,656 en 1900 à \$21,861,450 en 1910, ou 437.30 pour cent dans la décade. Ontario a donné une augmentation de \$8,524,714 ou 24.51 pour cent; Québec une augmentation de \$5,570,283, ou 27.56 pour cent, et les Provinces Maritimes une augmentation de \$3,562,144, ou 56.92 pour cent. La valeur de la production par vache à lait au dernier recensement était de \$39.83, comparativement à \$27.60 au recensement précédent, soit une augmentation de \$12.23 ou 44.31 pour

cent par vache. Une grande partie de cette augmentation est sans doute due aux cotes plus élevées du marché, mais les chiffres du tableau 85 démontrent qu'une bonne partie en est due à l'augmentation de la production de lait par vache en 1910 sur 1900. Pour les deux recensements la plus grande valeur par vache revenait à la Colombie-Britannique, \$47.28 en 1901 et \$77.19 en 1911.

sentés par les valeurs des récoltes des champs, des fruits et légumes, des animaux vendus, des animaux tués sur la ferme, des produits laitiers, de la laine, des oeufs et du beurre dans les quatrième et cinquième recensements.

La valeur de toutes les propriétés agricoles a augmenté de \$2,444,738,006 ou 136·79 pour cent durant la décade, et la valeur collective des produits agricoles de \$360,057,097 ou 99·28 pour cent. De 1900 à 1910 la proportion pour cent de la valeur des "produits de la terre" et "des animaux et leurs produits", n'indique qu'une faible variation. Dans le dernier recensement les produits de la terre ont donné un revenu collectif sur les placements agricoles de 57·57 pour cent, comparativement à 57·34 pour cent dans le recensement précédent. Des produits de la terre, les fruits et légumes indiquent une plus forte augmentation dans les dix ans que les récoltes des champs, les premiers ayant augmenté de 143·08 pour cent et les dernières de 97·24 pour cent. Les animaux vendus et les produits animaux ont donné une augmentation totale de \$151,894,935 ou 98·18 pour cent dans la décade. La plus forte augmentation dans cette classe a été faite par les animaux vendus, avec \$97,262,377 ou 184·36 pour cent; les produits laitiers ont augmenté de \$36,910,901, ou 55·53 pour cent, et la laine, les oeufs et le miel réunis ont donné une augmentation totale de \$13,055,349 ou 104·19 pour cent.

Dans le tableau précédent, et ailleurs dans ce volume, les statistiques de la valeur des propriétés agricoles, à savoir: la valeur des terres, des bâtiments, des instruments aratoires et du bétail sur la ferme, se rapporte à la date du 1er juin 1911, tandis que les chiffres relatifs aux produits de la terre, aux animaux vendus et aux produits animaux sont pour l'année 1910. Le recensement de 1901 se rapportant à la date du 31 mars, les chiffres se rapportent de même presque entièrement aux opérations de l'année 1900. Les valeurs des produits de la terre dans les provinces de l'ouest ont été désavantageusement affectées par les conditions défavorables qui ont prévalu durant l'été et l'automne de 1910. Dans l'Alberta 265,699 acres ou 12·85 pour cent, dans la Saskatchewan 159,456 acres ou 2·32 pour cent, dans le Manitoba 77,546 acres ou 1·66 pour cent des superficiesensemencées pour la récolte de 1910, n'ont rapporté aucune récolte. Vu que les recenseurs n'étaient pas tenus de faire des entrées pour les superficies non productives, le tableau 89 ne tient pas compte des étendues de terreensemencées qui n'ont produit aucune récolte.

TABLEAU 89. SUPERFICIE IMPRODUCTIVE DANS LES PROVINCES DES PRAIRIES DURANT L'ANNÉE 1910.

Récoltes	SUPERFICIES IMPRODUCTIVES, ANNÉE 1910		
	Alberta	Saskatchewan	Manitoba
	acres	acres	acres
Blé.....	133,842	64,387	12,918

Total de la superficie improductive.	265,699	159,456	77,546

Le succès des opérations agricoles dépend de ce qu'elles sont liées les unes aux autres. Les revenus de la terre, faibles ou élevés, reposent principalement: (1) sur la condition de la "terre occupée" pour fins agricoles, (2) sur le nombre et la sorte de bétail gardé, (3) sur l'efficacité des instruments aratoires, et (4) sur les moyens pris pour assurer l'engrangement convenable des récoltes des champs et l'abris nécessaire au bétail et aux instruments. Les revenus sur les placements des différents produits agricoles sont donnés dans le tableau 90 comme proportions de la valeur de toutes les propriétés agricoles, c'est-à-dire que les valeurs des récoltes des champs, des animaux vendus et des produits animaux ne sont pas données comme proportions du placement en terres ou en animaux, selon le cas, mais comme proportions de la valeur totale de toutes les propriétés agricoles à la date du recensement. Par exemple, dans les chiffres de 1910, pour tout le Canada, la valeur totale des récoltes des champs, des fruits et légumes donne un revenu de 9.83 pour-cent, non pas sur la valeur des terres seulement, mais sur la valeur totale de toutes les propriétés agricoles (terres, bâtiments, instruments et bétail sur la ferme).

TABLEAU 90. PROPORTION POUR CENT DES PLACEMENTS EN PROPRIÉTÉ AGRICOLE QUE CONSTITUE LA VALEUR BRUTE DES PRODUITS DES CHAMPS, DES ANIMAUX VENDUS ET DES PRODUITS DES ANIMAUX, PAR PROVINCES, 1910 ET 1900.

1910.....	20.82	12.09	9.48	2.61	8.73	2.66	1.14	3.97	.96
1900.....	22.44	13.77	11.83	1.94	8.67	1.97	1.72	3.98	1.00
Ile du Prince-Edouard—									
1910.....	27.38	16.21	15.67	.54	11.17	3.75	2.03	3.89	1.50
1900.....	24.37	15.61	15.16	.45	8.77	2.21	1.84	3.63	1.09

Les plus fortes proportions de revenus par provinces en 1910 se trouvent premièrement dans l'Île du Prince-Edouard, avec 27·38 pour-cent pour tous les produits, soit 16·21 pour-cent pour les produits de la terre et 11·17 pour-cent pour les animaux vendus et les produits animaux, et ensuite dans Ontario avec 24·16 pour-cent pour tous les produits ou 12·64 pour-cent pour les produits de la terre et 11·52 pour cent pour les animaux vendus et les produits animaux. Seules ces deux provinces indiquent une augmentation de revenus collectifs sur les placements agricoles en 1910 comparativement à 1900. Dans les provinces de l'Ouest, où le développement rapide de nouvelles terres ainsi que l'achat d'instruments et de bétail a entraîné des sommes considérables, les revenus collectifs sur les placements sont moindres en 1910 qu'en 1900.

## APPENDIX.

### GENERAL PROVISIONS FOR ENUMERATION, AGRICULTURAL STATISTICS.

*(Approved by Order-in-Council 31st March, 1911.)*

**Districts and subdistricts.**—Census districts are required to conform as nearly as may be with the districts for the representation of the people in the House of Commons at Ottawa, and Census subdistricts to the cities, towns, incorporated villages, townships and parishes which constitute an electoral district. Where towns, villages, townships, etc., are of small extent, or their population few, two or more may be assigned to one enumerator.

**Records to be kept separate for township, parish, etc.**—In a township, parish, or other country district, where the houses are scattered, it is advisable to start on a road or highway at the border line of the subdivision and visit in succession every house or place until the other side of the area is reached, when the next road may be taken in the same way, and so on until the whole area assigned to the enumerator is covered, taking care to finish the Census of one farm or lot before proceeding to the next.

**Census of crops and live stock in cities, towns and villages.**—Where grain, fruit and root crops are grown, and domestic animals are kept, and fruit trees, vines, small fruits, etc., are planted, in Cities, Towns and Villages, the statistics of them (including values) should be taken as carefully as the statistics of crops and animals on farms; as also the area of land occupied and the number of barns and other buildings in use by the head of each family or household, or by any member of it.

**Census of produce, live stock, manufactures, etc., to be taken separately for any member of a family besides the head who is on his own account an owner or producer.**—If any member of family or household besides the head thereof is on his own behalf an owner, occupier or tenant of lands or buildings, or an owner of live stock, or a producer of crops, fruits, manufactures, minerals or other articles separate from the head of the family or house hold, a Census of all such articles shall be enumerated under his own name on all schedules except Schedules No. 1 and No. 2.

**Secrecy of Census information.**—Every officer or other person employed in any capacity on Census work is required to keep inviolate the secrecy of the information gathered by the enumerators and entered on the schedules or forms. An enumerator is not permitted to show his schedules to any other person nor to make or keep a copy of them nor to answer any question respecting their contents, directly or indirectly; and the same obligation of secrecy is imposed upon commissioners and other officers or employees of the outside service, as well as upon every officer, clerk or other employee of the Census Office at Ottawa. The facts and statistics of the Census may not be used except for statistical compilations, and positive assurance should be given on this point if a fear is entertained by any person that they may be used for taxation or any other object.

**Census year.**—Unless otherwise specified in the detailed instructions, or in the schedules, the Census year shall be the year beginning June 1, 1910, and ending May 31, 1911, for all questions and subjects under Schedules 1, 2, 3, 4, 5, 6 and 7, and the year beginning January 1 and ending December 31, 1910, for all questions and subjects under Schedules 8, 9, 10 and 11.

**Allowance for farms recorded.**—For every farm of five acres and over in the agricultural and forestry schedules (No. 3 to No. 8 inclusive) he will be entitled to an allowance of twenty-five cents: and for lesser areas, **providing a record is made of products with a value of not less than \$50**, in the Census year he will be entitled to an allowance of fifteen cents for a lot of one to less than five acres, and of ten cents for a lot of less than one acre.

## INSTRUCTIONS RELATING TO EACH SCHEDULE.

### SCHEDULES OF BUILDINGS AND AGRICULTURE.

Schedules 3 to 8 inclusive relate to dwelling houses and buildings of every class in cities, towns, villages and country places, and the general subjects of agriculture, and the records and statistics are for the years 1910 and 1911 as denoted by the headings of the columns.

#### Houses, Buildings and Fruit, Schedule No. 3.

Schedule No. 3 will contain the information relative to owners and occupiers of lands, dwellings and other buildings, acres of occupied lands, number and kinds of fruit trees and their products, maple sugar, maple syrup and ice stored.

**References.** In columns 1 and 2 shall be entered the numbers of the page and line respectively in which the individual is recorded in Schedule No. 1 for the purpose of his identification.

**Occupant.** The entry in column 3 shall be the name of the head of the family, or occupant of the house or land, whether he be owner, tenant, manager or other employee as the case may be.

**Post Office Address.** Column 4 shall contain the Post Office address of the person entered in column 3 as called for by the heading, and will enable the Census Office to communicate with him for any further information that may be required, if for any cause the enumerator has failed to take a full or correct record.

**Class of holding.** The entry in column 5 shall be the class of holding, whether the occupier of the land enumerated is the owner of it, or whether he occupies it as a tenant, or manager for the owner, or working it on shares. The entries in this column will be: "owner," "tenant," "occupant," "manager," "on shares," or as the case may be.

**Occupied land.** The information asked for in columns 13 to 25 has reference only to the occupied land situated within the confines of the Census enumeration district assigned to the enumerator on June 1 1911, except where specified in the heading. **It does not refer to land held or occupied outside of the enumerator's district. The area of such land will be recorded in column 51 of this schedule and its value in column 39 of Schedule No. 7, and its agricultural statistics will be taken by the enumerator within whose district it lies.**

**Total acres occupied.** Column 13 shall contain the number of acres of land actually occupied for agricultural purposes. If the information is given in "**arpents**" the enumerator will note that fact by writing the word "**arpent**" above the figures denoting the area; and whether the **acre** or the **arpent** is used in this column the entry in the other agricultural schedules which relate to this person must be made in the same measure which is here used.

**Acres owned.** The entry in column 14 will show what part, if any, of the land occupied is **owned**.

**Acres leased or rented.** The entry in column 15 will show what part, if any, of the occupied land is leased or rented, or otherwise held. **The record of all agricultural lands not operated by the owner is to be entered in this column. The total of columns 14 and 15 should equal the area entered in column 13.**

**Acres improved.** In column 16 "improved land" for Census purposes shall mean land—whether the bush or forest lands of Eastern Canada or the prairie lands of the Northwest provinces—which has been brought under cultivation and has been cropped and is fitted for producing crops.

**Acres unimproved.** Column 17 shall contain the number of acres of occupied land not included in column 16, and the total of columns 16 and 17 should equal the area entered in column 13.

**Natural forest or unbroken prairie.** Enter in column 18 the number of acres of natural forest or woodland; also the number of acres of unbroken prairie, whether used as pasture or otherwise. Signify the difference between forest and prairie lands thus: "f50" will indicate 50 acres of forest land; "p60" will mean 60 acres of prairie.

**Marsh or waste land.** In column 19 enter the number of acres of all wild, waste and marsh land, whether pastured or not. This entry shall include all land not wood land, that is incapable of being tilled by reason of its surface conditions, such as hills, streams, ponds, swamps, rocks, etc.

**Improved pasture land.** Column 20 shall contain the number of acres of **improved land** which is in pasture on June 1, 1911; that is to say, land which under a proper system of rotation has produced a crop, is now under pasture, and may again produce a crop.

**Summer fallow.** The entry in column 21 will be the number of acres of land summer fallowed in 1910. Summer fallowed land may be described generally as land which was ploughed and harrowed or otherwise tilled in the spring or early summer and left unseeded to become mellow or to rest. It is generally followed where fall wheat is a staple crop.

**Orchard and nursery.** The entry in column 22 will be the number of acres of orchard and nursery.

**Acres of vegetables.** The entry in column 23 will be the number of acres of all kinds of vegetables whether grown in the garden for household use or grown in the fields for market which are not provided for in columns 3 to 23 and 44 to 51 of Schedule No. 5.

**Acres of vineyards.** The entry in column 24 shall contain the number of acres in vineyards.

**Acres in small fruits.** The entry in column 25 shall contain the number of acres in small fruits.

**Fruit trees and their products.** The entries in columns 26 to 43 inclusive refer to **cultivated fruit trees only, and must not include the records of wild fruit trees either by number or production.** The number of trees of the two classes—bearing and non-bearing—are to be given for 1911, and the production in bushels for the year 1910.

**Grapes and small fruits.** The entries in columns 44 to 47 inclusive will give the production of grapes in pounds, of strawberries in boxes, of currants and gooseberries in quarts, and of other cultivated small fruits, such as raspberries, thimble berries, etc., in boxes. **Quantities of wild fruit gathered must not be taken.**

**Maple sugar.** The entry in column 48 will be the number of pounds of maple sugar made in the spring of 1911.

**Maple syrup.** The entry in column 49 will be the number of gallons, imperial measure, of maple syrup made in the spring of 1911. An imperial gallon of standard syrup weighs 11 pounds.

**Natural ice harvested.** In column 50 the entry will be the number of tons of natural ice cut and stored during the winter of 1910-11.

**Land owned outside the enumerator's district.** The entry in column 51 will show the total number of acres of land owned by the person outside of the enumerator's district.

#### Field Crops, Schedule No. 4.

The enumerator will enter in Schedule No. 4 the information relative to field crops harvested in the year 1910. A simple statement of the area, production, and value of each crop as indicated by the headings of the columns is all that is required.

**References.** The entry in columns 1 and 2 will be the page and line on which the name of the owner, tenant or occupant is entered in Schedule No. 3. **The reference is not to columns 1 and 2 of Schedule No. 1.**

**Acres.** The enumerator will carefully mark the entries in which the information is given in arpents thus  $\frac{\text{arp.}}{4}$  or as the case may be.

**Bushels.** The production in every case must be given in bushels or tons of legal or standard weights. The weight in pounds of a standard bushel of wheat is 60, barley 48, oats 34, rye 56, corn shelled 56 and in cob 70, buckwheat 48, beans and peas 60, flax 56, mixed grains 45, potatoes and turnips 60 lb. The ton weighs 2,000 pounds.

**Forage crops.** Under the heading of "Other Forage Crops" the entry will be made for any **sown crop** which is cut green and fed during summer, or cured and housed for winter feeding. Second growth of clover or other grasses which may be cut and fed or grazed are not to be considered as a forage crop.

#### Field Crops, Schedule No. 5.

This schedule up to and including column 29 is a continuation of Schedule No. 4. Make the same entries in columns No. 1 and 2 as were made in the same columns in the previous schedule, that is, to refer to Schedule No. 3.

**Acres of field crops for the harvest 1911.** In columns 30 to 51 of this schedule enter the number of acres of grain and other field crops for the harvest year 1911. Areas only are required.

#### Animals and Animal Products, Schedule No. 6.

This schedule shall contain the information relative to animals and animal products. In columns 1 and 2 repeat the entries made in the same columns in Schedules 4 and 5.

**Live stock in 1911.** The entries in columns 3 to 13 inclusive shall be the number of animals, including pure bred animals, and hives of bees (as indicated by the headings) which are on the farm on June 1, 1911.

**Live stock sold in 1910.** Columns 14 to 19 inclusive shall contain the number of animals sold during the calendar year 1910.

**Animal products in 1910.** Columns 20 to 27 inclusive shall contain a record of animal products for the calendar year 1910 as indicated by the headings of the columns. The total milk produced on the farm will be entered in pounds. **An imperial gallon of milk weighs 10 pounds.** Home-made butter and cheese has reference only to that produced on the farm, and must not include the product of factories.

**Pure bred animals.** The record in columns 28 to 35 inclusive shall be the name of the breed and the number of purebred animals, as asked for in the headings. The entry in each case shall include the animals by name of breed and number which are registered or are eligible for registration on June 1, 1911. **The number of pure bred animals must be counted in the totals of live stock entered in columns 3 to 8 of the schedule.**

#### Farm and Urban Values, Schedule No. 7.

This schedule shall contain the values of farm lands owned, buildings, rent of land, farm implements, fruits, vegetables and live stock in 1910 and 1911 as asked for in the headings. Should anyone hesitate to give answers, the enumerator will strongly insist on the fact that the information desired is in nowise connected with any system of taxation, as some might think, and that the facts and statistics may not be used for any purpose except for statistical compilation by totals.

**References.** In columns 1 and 2 repeat the entries made in the same columns in Schedules No. 4, No. 5 and No. 6.

**Land owned in 1911.** The enumerator will enter in column 3 the value of all the land owned and occupied within his enumeration district by this person at the date of the Census. **The value of land not situated in the enumerator's district must not be entered in this column, but in column 39.**

**Buildings in 1911.** Enter in column 4 the value of all buildings occupied by this person in the district.

**Rent of land and buildings in 1911.** The entry will be the amount of rent paid or agreed to be paid by the occupant for land or buildings leased or rented for the season of 1911.

**Farm implements and machinery in 1911.** The entry in column 6 will show the value of all implements and machinery on the farm on June 1, 1911.

**Fruits.** The value of orchard fruits, as apples, pears, plums, etc., will be entered in column 7, and the value of small fruits, as gooseberries, currants, strawberries, etc., in column 8, and will be for the year 1910. **The value of the quantities of wild fruits must not be included in this column.** See Instruction No. 186.

**Vegetables.** In column 9 the value of all vegetables, which are the product of areas entered in column 23 of Schedule No. 3, will be entered. **The entry must not include the value of any vegetables provided for in Schedule No. 5.**

**Live stock in 1911.** The value of all live stock (including the pure bred) on the farm on June 1, 1911 will be entered in columns 10 to 16 for each kind or class, as indicated by the headings.

**Live stock and nursery stock sold in 1910.** In columns 17 to 24 enter as required by the headings the total values of live stock and nursery stock sold in 1910.

**Dairy products of 1910.** The entry in column 25 will be the **total value of all the milk produced on the farm in 1910.** The entries in columns 26, 27 and 28 will be in accordance with the headings.

**Animals slaughtered on the farm in 1910.** Enter the value of all animals, as per headings, which were slaughtered on the farm, whether for home consumption or for sale.

**Other products of the farm.** In column 33 of this section enter the value of the **woolclip of 1910,** not 1911 as in the heading. In columns 34 and 35 enter the value of the total production of **eggs, honey and wax** respectively. In column 36 enter the value of the **maple sugar and syrup** made in the spring of 1911.

**Hired labour.** The entry in column 37 shall be the aggregate number of weeks of hired labour employed on the farm during the year 1910. That is to say, if two men were employed for a period of six weeks the entry would be "12." It is not intended that female help employed as household servants shall be noted in either column 37 or 38. They are provided for in columns 23 to 27 of Schedule No. 1.

**Cost of hired labour.** In column 38 enter the total amount of wages paid for hired labour during the year 1910. In making this entry the value of the board provided for the employed help must be taken into consideration and added to the amount paid in wages.

**Real estate owned outside the enumeration district.** In column 39 enter the value of all lands and buildings owned by this person in Canada situated outside of the enumeration district in the year 1911. This entry shall not include manufacturing establishments or mines.

**FOREST PRODUCTS, SCHEDULE No. 8.**

As in the case of Agricultural Products, the enumerator will bear in mind that the Forest Products only of occupied **farm lands** which are situated within the enumerator's district are to be recorded in this schedule. In wooded districts he will ask the persons enumerated how much timber or wood was cut on their land during **the year ended 31st December 1910**, no matter whether such wood was cut for the market or for home consumption. **The enumerator has absolutely nothing to do with timber cut outside of his own Census sub-district.**

**References.** The entries in columns 1 and 2 will be the same as in schedules 4, 5, 6 and 7.

**Values.** As regards values of products, the enumerator will be **guided by the local market prices.** Should he meet with difficulties in securing the exact quantities and values, he will obtain the best estimates possible. The schedule as regards square, waney or flat timber, and as regards logs for lumber, has followed the form of the Government Trade Tables, and forest products throughout have been made to conform in the headings to those Tables **in order that comparison of total production may be readily made with the records of yearly exports from the country.**

**Square or waney timber.** The cubic content of square timber is calculated by multiplying the square of the side in inches by the length in feet and dividing the product by 144. The result will be the content of the stick in cubic feet. For waney and flat timber, divide the girth in inches by 4, square the quotient, multiply by the length in feet and divide by 144 for cubic feet; and the entries will be made for each kind of timber in columns 3 to 16 as required by the headings. Where the timber is not hewn as square, but with four sides which are equal, two and two, as in a stick of 12 by 16 inches, multiply the two sides and the product by the length in feet, and divide as before by 144. The result will be the content of the stick in cubic feet.

**Logs for lumber.** The schedule calls for the measurement of logs for lumber on a basis of M. or 1,000 feet board measure, and a simple rule for calculation is: "From one-fourth of the diameter of the log in inches subtract 1, and multiply the square of the remainder by the length of the log in feet. The product will be the length of the log in feet, board measure." Thus, if the log is 20 inches diameter and 16 feet long, the reckoning will be:  $20 \div 4 = 5 - 1 = 4 \times 4 = 16 \times 16 = 256$  feet board measure. The following table gives the board measure contents of logs from 8 to 40 inches diameter and 16 feet long:

SAW LOGS—16 FEET LONG.

Diameter in inches.	Contents in feet.	Diameter in inches.	Contents in feet.	Diameter in inches.	Contents in feet.
	B.M.		B.M.		B.M.
8	16	19	225	30	676
9	24	20	256	31	729
10	36	21	289	32	784
11	49	22	324	33	841
12	64	23	359	34	900
13	81	24	400	35	961
14	100	25	441	36	1,024
15	121	26	484	37	1,089
16	144	27	530	38	1,156
17	169	28	576	39	1,225
18	196	29	625	40	1,296

For every foot longer than 16 feet add one-sixteenth to the contents for a log of the same diameter, and for every foot shorter deduct one-sixteenth. In a pile of logs of the same diameter, multiply the contents of one as given in the foregoing table by the number of logs. Of course it is only in the case of a large number of logs that measurement will be made by the unit of thousands. Thus, if there are 3,000 logs 16 feet long and 25 inches diameter, the total contents in M. feet would be 1,323, which is 1,323,000 feet in board measure; whereas, if there were only three logs, it would be 1.323. The entries will be made for each kind of logs for lumber in columns 17 to 30 as required by the headings.

**Miscellaneous products.** In columns 31 to 50 these will be given by cubic measure or by number and value, as designated by the headings.

**Furs and skins of forest animals.** Under this heading the kinds of animals will be given in column 51, as fox, mink, muskrat, etc., and the number taken in column 52, and the value of skins in column 53.

## APPENDICE.

### PLAN GÉNÉRAL DU RECENSEMENT, STATISTIQUES AGRICOLES.

( *Approuvé par arrêté en Conseil du 31 mars 1911.* )

**Districts et sous-districts.**—Les districts de recensement doivent coïncider autant que possible avec les districts électoraux de la Chambre des Communes, à Ottawa, et les sous-districts de recensement avec les cités, villes, villages, paroisses et cantons constitués en municipalités, et qui forment un district électoral. Quand les villes, villages, cantons, etc., sont de peu d'étendue ou ont une faible population, deux ou plus pourront être assignés à un seul recenseur.

Dans un canton, une paroisse ou tout autre district rural ou les maisons sont éparses, on fera bien de commencer le recensement sur un chemin à la limite de la subdivision et de visiter successivement chaque maison ou chaque endroit jusqu'à ce qu'on soit arrivé à l'autre limite, puis on prendra le chemin suivant de la même manière, et ainsi de suite jusqu'à ce que tout le district assigné au recenseur ait été couvert. Il faudra avoir soin de compléter le recensement d'une ferme ou d'un lot avant de passer à l'autre.

**Recensement des récoltes et du bétail dans les cités, villes et villages.**—Dans les cités, villes et villages, où l'on cultive du grain, des récoltes de fruits et de racines, où l'on garde des animaux domestiques et où il existe des plantations d'arbres fruitiers, de vignes, de petits fruits, etc., la statistique (valeurs comprises) doit être enregistrée aussi soigneusement que celles des récoltes et des animaux sur les fermes, de même que la superficie de terrain occupée et le nombre de granges et d'autres bâtiments utilisés par le chef de chaque famille ou de chaque ménage, ou d'un membre quelconque de cette famille ou de ce ménage.

**Recensement séparé des produits agricoles et du bétail, des manufactures, etc. pour chaque membre d'une famille, qui est propriétaire ou producteur à son compte, en dehors du chef de famille.**—Si un membre quelconque de la famille ou du ménage, en dehors du chef de cette famille ou de ce ménage est propriétaire, occupant ou locataire pour lui-même, à son propre compte, de terres ou d'immeubles, ou propriétaire de bétail, ou producteur des récoltes, de fruits, d'articles manufacturés, de minéraux ou d'autres articles pour lui-même, le recensement de tous ces articles se fera au nom de ce membre de la famille dans tous les tableaux sauf les Nos. 1 et 2.

**Obligation au secret.**—Tout fonctionnaire ou toute personne employée au recensement est tenu au secret absolu sur les renseignements recueillis par les recenseurs et inscrits sur les tableaux ou feuilles. Il est défendu au recenseur de montrer ces tableaux à qui que ce soit, ou d'en faire ou d'en garder une copie, ou de répondre à des questions sur leur contenu, soit directement soit indirectement; la même obligation du secret est imposée aux commissaires et autres fonctionnaires ou employés du service extérieur, de même qu'à tout fonctionnaire, commis ou autre employé du bureau du recensement à Ottawa. Les faits et statistiques du recensement ne doivent servir qu'aux compilations statistiques, et on devra donner l'assurance positive de ce fait à toute personne qui craint que ces renseignements ne puissent servir de guide pour l'imposition de taxes ou pour toute autre fin.

**Année du recensement.**—À moins d'indication contraire dans les instructions détaillées ou dans les tableaux, l'année du recensement sera l'année commencée le 1er juin 1910 et qui se termine le 31 mai 1911 pour toutes les questions et tous les sujets dans les tableaux 1, 2, 3, 4, 5, 6 et 7, et l'année commençant le 1er janvier et se terminant le 31 décembre 1910 pour toutes les questions et tous les sujets dans les tableaux 8, 9, 10 et 11.

**Allocation pour les fermes enregistrées.**—Pour chaque ferme de cinq acres et plus inscrite dans les tableaux de l'agriculture et de la sylviculture (N° 3 à N° 8 inclusivement) le recenseur aura droit à une allocation de vingt-cinq cents; et pour les superficies de moindre étendue, pourvu que la valeur enregistrée des produits ne soit pas inférieure à \$50 dans l'année du recensement, le recenseur aura droit à une allocation de quinze cents par superficie d'un acre à moins de cinq acres, et de dix cents par superficie de moins d'un acre.

## INSTRUCTIONS SE RAPPORTANT À CHAQUE TABLEAU.

Les tableaux 3 à 8 inclus se rapportent aux détails généraux de l'agriculture et les relevés couvrent les années 1910 et 1911, ainsi que l'indiquent les en-têtes de ces colonnes.

## MAISONS, BÂTIMENTS ET FRUITS, TABLEAU N° 3.

Le tableau n° 3 doit contenir les renseignements demandés sur les propriétaires ou les occupants de terre, les demeures et autres bâtiments, le nombre d'acres de terre occupés, le nombre et la sorte d'arbres fruitiers et leurs produits, le sucre d'érable, le sirop d'érable et la glace emmagasinée.

**Renvois.** Entrer dans les colonnes 1 et 2 les numéros de la page et de la ligne où l'individu est inscrit dans le tableau n° 1 afin qu'on puisse l'identifier.

**Occupant.** On donnera dans la colonne 3 le nom du chef de la famille ou de l'occupant de la maison ou de la terre, qu'il soit propriétaire, tenancier ou gérant, ou employé sous un autre titre.

**Adresse postale.** On donnera dans la colonne 4 l'adresse postale (bureau de poste) de la personne inscrite dans la colonne 3 comme le demande l'en-tête, ce qui permettra au bureau du recensement de communiquer avec cette personne pour en obtenir les autres renseignements que l'on pourra désirer si, pour une raison ou pour une autre, le recenseur n'a pas fait un relevé entier ou exact.

**Mode d'occupation de la terre.** L'entrée dans la colonne 5 désignera le mode d'occupation, par exemple si l'occupant de la terre est propriétaire ou s'il occupe à titre de tenancier ou de gérant pour le propriétaire ou s'il travaille comme associé. Les entrées dans cette colonne seront donc 'propriétaire', 'locataire', 'employé', 'gérant', 'associé', suivant le cas.

**Terre occupée.** A moins d'indications contraires dans l'en-tête, les renseignements demandés dans les colonnes de 13 à 25 ne se rapportent qu'aux terres occupées le 1er juin 1911 et situées dans les limites du district assigné au recenseur, et non à la terre tenue ou occupée en dehors de ce district. On entrera dans la colonne 51 de ce tableau la superficie de cette terre et sa valeur dans la colonne 39 du tableau n° 7 et la statistique agricole de cette terre sera faite par le recenseur dans le district duquel elle se trouve.

**Nombre total d'acres occupés.** La colonne 13 doit indiquer le nombre d'acres de terre occupés pour fins agricoles. Si le renseignement est donné en 'arpents' le recenseur écrira le mot 'arpent' au-dessus du chiffre qui indique la superficie; et les entrées dans les autres tableaux agricoles qui se rapportent à cette personne devront être basées sur la même mesure que celle qui a été employée dans ce tableau, soit acre ou arpent. Voir instruction n° 193.

**Acres en propriété.** On indiquera dans la colonne 14, s'il y a lieu, quelle partie de la terre occupée est tenue en propriété.

**Acres loués ou affermés.** L'entrée dans la colonne 15 doit indiquer, s'il y a lieu, quelle partie de la terre occupée est louée ou affermée. On inscrira également dans cette colonne le relevé de toutes les terres agricoles qui ne sont pas exploitées par le propriétaire. Le total des colonnes 14 et 15 devrait être égal à la superficie inscrite dans la colonne 13.

**Acres améliorés.** L'expression 'terre améliorée', dans la colonne 16, se rapporte à la terre qui a été mise en culture et qui a produit une récolte et qui peut produire des récoltes—que ce soit la terre boisée de l'est du Canada ou la terre en prairie des provinces du Nord-Ouest.

**Acres non améliorés.** On entrera dans la colonne 17 le nombre d'acres de terre occupés non compris dans la colonne 16, et le total des colonnes 16 et 17 devra être égal à la superficie inscrite dans la colonne 13.

**Forêt naturelle ou prairie vierge.** Dans la colonne 18 on entrera le nombre d'acres de forêt naturelle ou de terre boisée, et également le nombre d'acres de prairie vierge (non cassée) que cette prairie soit employé comme pâturage ou autrement. On indiquera la différence entre la forêt et la prairie de la manière suivante: 'f50' indiquera qu'il y a 50 acres de forêt, 'p60' 60 acres de prairies.

**Marécages ou terres incultes.** On entrera dans la colonne 19 le nombre d'acres en terrain inculte, en friche ou marécageux, que ce terrain soit employé ou non comme pâturage. Cette entrée devra comprendre tous les terrains qui ne sont pas boisés, et qu'il est impossible de mettre en culture à cause de l'état de la surface, les collines, les cours d'eau, les étangs, les marais, les rochers, etc.

**Pâturages améliorés.** La colonne 20 devra indiquer le nombre d'acres de terre améliorée qui est en pâturage le 1er juin 1911: c'est-à-dire la terre qui, soumise à une bonne rotation, a produit une récolte, mais est maintenant en pâturage, et qui peut donner une autre récolte.

**Jachère d'été.** On entrera dans la colonne 21 le nombre total d'acres de terre soumis à une jachère d'été en 1910. De façon générale la terre en jachère d'été est une terre qui a reçu diverses façons culturales, labour, hersages, etc., au printemps ou au commencement de l'été, et qu'on laisse non ensemencée pour l'ameublir ou pour la reposer. La jachère est généralement pratiquée partout ou le blé d'automne est la culture principale.

**Verger et pépinière.** On entrera dans la colonne 22 le nombre d'acres en verger et en pépinière.

**Superficie en légumes.** On indiquera dans la colonne 23 le nombre d'acres de toutes sortes de légumes, que ces légumes soient cultivés dans le jardin pour le ménage ou dans les champs pour le marché, sauf pour les légumes stipulés dans les colonnes 2 à 23 et 44 à 51 du tableau n° 5.

**Superficie en vignobles.** La colonne 24 doit contenir le nombre d'acres en vignobles.

**Superficie en petits fruits.** On indiquera dans la colonne 25 le nombre d'acres en petits fruits.

**Arbres fruitiers et leurs produits.** Les entrées dans les colonnes 26 à 43 inclusivement se rapportent seulement aux arbres fruitiers cultivés et non pas aux arbres fruitiers sauvages. On ne devra pas s'occuper de ces derniers. Le nombre d'arbres des deux catégories—en rapport et non en rapport—doit être donné pour 1911 et la production de ces arbres en boisseaux pour l'année 1910.

**Raisins et petits fruits.** Indiquer dans les colonnes 44 à 47 la production des raisins en livres, des fraises en boîtes, des gadelles et des groselles en pintes, et des autres petits fruits cultivés comme les framboises, les mures, etc. en boîtes. On ne tiendra aucun compte des quantités de fruits sauvages cueillis.

**Sucre d'érable.** Entrer dans la colonne 48 le nombre de livres de sucre d'érable fait au printemps de 1911.

**Sirop d'érable.** Entrer dans la colonne 49 le nombre de gallons, mesure impériale, de sirop d'érable fait au printemps de 1911. Un gallon impérial de sirop conforme à l'étalon pèse 11 livres.

**Récolte de glace naturelle.** Indiquer dans la colonne 50 le nombre de tonnes de glace naturelle taillée et emmagasinée pendant l'hiver de 1910-11.

**Terre tenue en propriété en dehors du district du recenseur.** Entrer dans la colonne 51 le nombre total d'acres de terre tenus en propriété par la personne en dehors du district du recenseur.

#### RECOLTE DES CHAMPS, TABLEAU N° 4.

Le recenseur entrera dans le tableau n° 4 les renseignements qui se rapportent aux cultures des champs, (récoltes de grande culture), récoltées en l'année 1910. Il suffira de donner la superficie, la production et la valeur de chaque récolte comme l'indiquent les en-têtes des colonnes.

**Renvois.** L'entrée dans les colonnes 1 et 2 doit indiquer la page et la ligne sur lesquelles le nom du propriétaire, du locataire ou de l'employé est inscrit dans le tableau n° 3. Le renvoi ne se rapporte pas aux colonnes 1 et 2 du tableau n° 3.

**Acres ou arpents.** Le recenseur inscrira soigneusement les chiffres donnés en arpents de la manière suivante  $\frac{\text{arp.}}{4}$  suivant le cas. Voir également instruction n° 172.

**Boisseaux.** La production doit toujours être donnée en boisseaux ou en tonnes de poids légal ou étalon. Voici le poids légal du boisseau étalon pour les différentes sortes de grain et autres produits: blé 60 livres, orge 48, avoine 34, seigle 56, blé d'Inde égréné 56, blé d'Inde sur épi 70, sarrasin 48, fèves et poids 60, lin 56, grains mélangés 45, pommes de terre et navets 60 livres. La tonne pèse 2,900 livres.

**Fourrages verts.** Sous l'en-tête 'Autres récoltes fourragères' on inscrira toute récolte semée qui doit être coupée en vert et donnée pendant l'état ou fanée et engrangée pour l'alimentation en hiver. Le regain de trèfle ou d'autres herbes que l'on peut couper et faire paître par les animaux ne doit pas être considéré comme fourrage vert.

#### RECOLTES DE GRANDE CULTURE DANS LE TABLEAU N° 5.

Ce tableau jusqu'à et y compris la colonne 29 est une continuation du tableau n° 4. On fera les mêmes entrées dans les colonnes n° 1 et n° 2 que l'on a faites dans les mêmes colonnes du tableau précédent, c'est-à-dire on renverra au tableau n° 3.

**Superficie en récoltes de grande culture pour la récolte de 1911.** Entrer dans les colonnes 30 à 51 de ce tableau le nombre d'acres en grain ou en autres plantes de grande culture pour l'année de récolte 1911. N'indiquer que la superficie.

#### ANIMAUX ET PRODUITS ANIMAUX, TABLEAU N° 6.

Ce tableau doit contenir les renseignements qui se rapportent aux animaux et aux produits animaux. On répétera dans les colonnes 1 et 2 les entrées déjà faites dans les mêmes colonnes des tableaux 4 et 5.

**Bétail en 1911.** Les entrées dans les colonnes 3 à 13 inclusivement doivent représenter le nombre d'animaux, y compris les animaux de race pure, et les ruches d'abeilles (comme l'indiquent les en-têtes) qui se trouvent sur la ferme au premier juin 1911.

**Bétail vendu en 1910.** Les colonnes 14 à 19 doivent indiquer le nombre d'animaux vendus pendant l'année civile 1910.

**Produits animaux en 1910.** On entrera dans les colonnes 20 à 27 le relevé des produits animaux pendant l'année civile 1910, ainsi que l'indiquent les en-têtes des colonnes. Le lait total produit sur la ferme sera entré en livres. **Un gallon impérial de lait pèse 10 livres.** Le beurre et le fromage de fabrication domestique ne comprennent que ceux qui sont produits sur la ferme, et non pas le produit des fabriques (beurreries ou fromageries).

**Animaux de race pure.** On entrera dans les colonnes 28 à 35 le nom de la race et le nombre des animaux de race pure, ainsi que le demandent les en-têtes. Chaque entrée devra comprendre le nom de la race et le nombre des animaux qui sont enregistrés, ou qui peuvent être admis à l'enregistrement le premier juin 1911. **Le nombre d'animaux de race pure doit être compris dans le total des animaux inscrits dans la colonne 3 du tableau.**

#### VALEUR DES FERMES, TABLEAU 7.

Ce tableau doit contenir la valeur des propriétés agricoles, des bâtiments, du loyer de la terre, des instruments agricoles, des fruits, des légumes et du bétail en 1910 et 1911, ainsi que le demandent les en-têtes. Si la personne questionnée hésitait à répondre à ces questions le recenseur devra fortement appuyer sur ce fait que ces renseignements ne sont pas demandés en vue de l'imposition de taxes, comme certaines personnes pourraient croire, et que les faits et les statistiques donnés ne seront employés que dans la compilation de statistiques, sous forme de totaux.

**Renvois.** Dans les colonnes 1 et 2, répéter les entrées faites dans les mêmes colonnes des tableaux 4, 5 et 6.

**Terre tenue en propriété en 1911.** Le recenseur indiquera dans la colonne 3 la valeur de toute la terre tenue en propriété et occupée dans son district de recensement par la personne à la date du recensement. **La valeur de la terre qui n'est pas située dans le district du recenseur ne doit pas être entrée dans cette colonne, mais dans la colonne 39.** Voir instruction n° 218.

**Bâtiments en 1911.** Entrer dans la colonne 4 la valeur de tous les bâtiments occupés par cette personne dans le district.

**Loyer de la terre et des bâtiments en 1911.** Indiquer le montant de loyer payé par l'occupant de la terre et des bâtiments loués pour la saison de 1911, ou le montant qu'il a convenu de payer.

**Outils et machines agricoles en 1911.** Entrer dans la colonne 6 la valeur de tous les outils, instruments et machines agricoles sur la ferme au 1er juin 1911.

**Fruits.** Entrer dans la colonne 7 la valeur des fruits de verger, pommes, pêches, prunes, etc., et dans la colonne 8 la valeur des petits fruits, groseilles, gadelles, fraises, etc., pour la récolte de 1910. **On ne doit pas inscrire dans cette colonne la valeur des quantités de fruits sauvages.** Voir instruction n° 186.

**Légumes.** Entrer dans la colonne 9 la valeur de tous les légumes qui sont le produit des superficies inscrites dans la colonne 23 du tableau n° 3. **Cette entrée ne doit comprendre la valeur d'aucun des légumes mentionnés dans le tableau n° 5.**

**Bétail en 1911.** Entrer dans les colonnes 10 à 16 la valeur de tous les animaux de la ferme (y compris les animaux de race pure) qui se trouvent sur la ferme le premier juin 1911, de la manière indiquée par les en-têtes.

**Bétail et marchandises de pépiniéristes vendus en 1910.** Entrer dans les colonnes 17 à 24, suivant les en-têtes, les valeurs totales des bestiaux et des marchandises de pépiniéristes vendus en 1910.

**Produits laitiers en 1910.** Entrer dans la colonne 25 la valeur totale de tout le lait produit sur la ferme en 1910. Pour les entrées dans les colonnes 26, 27 et 28, se régler sur les en-têtes.

**Animaux abattus sur la ferme en 1910.** Entrer la valeur de tous les animaux qui ont été abattus sur la ferme, soit pour la consommation domestique, soit pour la vente, suivant les en-têtes.

**Autres produits de la ferme.** Entrer dans la colonne 33 de cet article la valeur de la coupe de laine en 1910 et non pas celle de 1911. Dans les colonnes 34 et 35, entrer la valeur de la production totale des œufs, du miel et de la cire respectivement. Dans la colonne 36 indiquer la valeur du sucre d'érable et du sirop d'érable fabriqués pendant le printemps de 1911.

**Main-d'oeuvre engagée.** Inscrire dans la colonne 37 le nombre total de semaines de main-d'oeuvre employée sur la ferme pendant l'année 1911. Par exemple, si deux hommes ont été employés pendant une période de six semaines, on entrera le chiffre 12. Les femmes employées au service domestique ne doivent pas être inscrites dans l'une ou l'autre des colonnes 37 ou 38.

**Coût de la main-d'oeuvre engagée.** Entrer dans la colonne 38 le montant total des salaires payés pour la main-d'oeuvre pendant l'année 1910. En faisant cette entrée il faudra prendre en considération la valeur de la pension donnée à la main-d'oeuvre et ajouter cette valeur au montant de salaires payés.

**Immeubles tenus en propriété en dehors du district du recenseur.** Entrer dans la colonne 39 la valeur de tous les terrains et de tous les bâtiments possédés par cette personne au Canada et qui sont situés en dehors du district du recensement en l'année 1911. Cette entrée ne devra comprendre ni les établissements manufacturiers, ni les mines.

### PRODUITS FORESTIERS, TABLEAU N° 8.

De même que pour les produits agricoles, le recenseur ne devra pas oublier qu'il ne doit enregistrer dans ce tableau que les produits forestiers des fermes occupées qui sont situées dans son district. Dans les districts boisés il demandera aux personnes dont il fait le recensement combien de bois a été coupé sur leur terre pendant l'année terminée le 31 décembre 1910, que ce bois ait été coupé pour le marché ou pour les besoins de la maison. Le recenseur ne doit s'occuper en aucune façon du bois coupé en dehors de son sous-district de recensement.

**Renvois.** Les entrées dans les colonnes 1 et 2 sont les mêmes que dans les tableaux 4, 5, 6 et 7.

**Valeurs.** Pour les valeurs des produits, le recenseur devra se guider sur les prix du marché local. S'il éprouvait des difficultés à se procurer les quantités et leur valeur exacte il devra faire des évaluations aussi précises que possible. Pour les bois équarris, flacheux ou méplats, et pour les billots de bois de construction le tableau a été disposé de la même façon que les tableaux de commerce du gouvernement, et les produits forestiers ont été disposés conformément aux en-têtes de ces tableaux, de façon à ce que l'on puisse rapidement faire la comparaison entre la production totale et la statistique des exportations annuelles du pays.

**Bois équarri ou flacheux.** Pour obtenir la contenance cubique des bois équarris, multiplier le carré du côté en pouces par la longueur en pieds et diviser le produit par 144. Le résultat sera le contenu de la pièce en pieds cubes. Pour les bois flacheux et méplats, diviser la circonférence en pouces par 4, faire le carré du quotient, multiplier par la longueur en pieds et diviser par 144 pour obtenir des pieds cubes; on fera des entrées pour chaque catégorie de bois dans les colonnes 3 à 16 suivant les en-têtes. Quand la pièce de bois n'est pas carrée, mais quand deux des côtés sont égaux, comme dans une pièce de 12 par 16 pouces, multiplier la largeur par l'épaisseur et le produit par la longueur en pieds et diviser par 144 comme ci-dessus. Le résultat sera le contenu de la pièce en pieds cubes.

**Billots pour bois de construction.** Ce tableau demande la mesure des billots pour bois de construction sur une base de M., c'est-à-dire mille pieds de planches. Voici une règle de calcul qui est très simple: "Prendre le quart du diamètre du billot en pouces, soustraire 1 de ce chiffre, et multiplier le carré du restant par la longueur du billot en pieds. Le produit sera la longueur du billot en pieds mesure de planches. Ainsi si le billot a 20 pouces de diamètre et 16 pieds de long on fera l'opération suivante:  $20 \div 4 = 5 - 1 = 4 \times 4 = 16 \times 16 = 256$  pieds, mesure de planches. Le tableau suivant donne le contenu en mesure de planches de billots de 8 à 40 pouces de diamètre et 16 pieds de long.

BILLOTS—16 PIEDS DE LONG.

Diamètre en pouces.	Contenu en pieds.	Diamètre en pouces.	Contenu en pieds.	Diamètre en pouces.	Contenu en pieds.
	M. P.		M. P.		M. P.
8	16	19	225	30	676
9	24	20	256	31	729
10	36	21	289	32	784
11	49	22	324	33	841
12	64	23	359	34	900
13	81	24	400	35	961
14	100	25	441	36	1,024
15	121	26	484	37	1,089
16	144	27	530	38	1,156
17	169	28	576	39	1,225
18	196	29	625	40	1,296

Pour chaque pied en plus de 16 pieds, ajouter un seizième au contenu d'un billot du même diamètre, et pour chaque pied en moins de 16 pieds, déduire un seizième. Dans une pile de billots du même diamètre, multiplier le contenu de l'un deux, donné dans le tableau précédent, par le nombre de billots. Bien entendu, on ne prendra le chiffre mille comme unité que s'il s'agit d'un grand nombre de billots. Ainsi s'il y a 3,000 billots de 16 pieds de long et de 25 pouces de diamètre, le contenu total en M. pieds sera de 1,323, c'est-à-dire 1,323,000 pieds en mesure de planches; mais s'il n'y avait que trois billots ce ne serait que 1,323. On inscrira chaque sorte de billot pour bois de construction dans les colonnes 17 à 30, suivant les en-têtes.

**Produits divers.** Entrer dans les colonnes 31 à 50 la mesure en pieds cubes, le nombre et la valeur des billots, suivant les en-têtes.

**Fournures et peaux des animaux de la forêt.** Inscrive sous cet en-tête dans la colonne 51 la sorte d'animaux, par exemple, renard, rat musqué, martre, etc., et dans la colonne 52 le nombre de ces animaux capturés et dans la colonne 53 la valeur des peaux.
