Special Review Decision

Pursuant to subsection 17(2) of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) initiated a special review of all registered pest control products containing diphenylamine, based on the 2012 European Commission regulatory decision to prohibit all uses of diphenylamine in European Union member countries due to human health concerns. The PMRA evaluated the aspects of concern that prompted the special review in accordance with the subsection 18(4) of the *Pest Control Products Act*. The proposed special review decision was published for consultation in the Re-evaluation Note REV2017-25, *Special Review of Diphenylamine and Its Associated End-use Products: Proposed Decision for Consultation*.

Comments supporting the PMRA's proposed special review decision and highlighting the value of diphenylamine were received during the consultation process. These comments did not result in changes to the proposed regulatory decision as described in REV2017-25. Therefore, the PMRA, under the authority of the *Pest Control Products Act*, is confirming the current registration of pest control products containing diphenylamine in Canada. No additional mitigation measures are required.

Please refer to the Regulatory Directive DIR2014-01, *Approach to Special Reviews*, for details of the PMRA's special review approach.

Other Information

Any person may file a notice of objection¹ regarding this decision on diphenylamine within 60 days from the date of publication of this special review decision. For more information regarding the basis for objecting (which must be based on scientific grounds), please refer to the Pesticides and Pest Management portion of the Canada.ca website (Request a Reconsideration of Decision) or contact the PMRA's Pest Management Information Service.

¹ As per subsection 35(1) of the *Pest Control Products Act*.
