Deputy Minister of National Welfare

## FOREWORD

The Canada Pension Plan Statistical Bulletin is being published on a quarterly basis to make available to officials at all levels of government, to industry, to welfare organizations and to other interested persons, information on the actual operation of the Canada Pension Plan.

Since the Canada Pension Plan came into operation in January 1966, contributions have been collected from employees, employers and self-employed persons. In January 1967, retirement pensions first became payable. In February 1968, survivors' benefits became payable. These comprise the lump sum death benefit, as well as those which are paid on a monthly basis, namely, widow's pensions, disabled widower's pensions and orphan's benefits. In February 1970, pensions will first become payable to disabled contributors, together with benefits for the children of disabled contributors.

Except for members of the Armed Forces and the R.C.M.P., the Canada Pension Plan does not cover persons employed in the Province of Quebec, which has a virtually identical program, viz., the Quebec Pension Plan. Also, a small number of beneficiaries live in Quebec. Consequently, the information presented in the Canada Pension Plan Statistical Bulletin deals almost entirely with that part of Canada which lies outside the Province of Quebec.

This first issue contains information on the operations of the Canada Pension Plan Account and the Canada Pension Plan Investment Fund, and information on the numbers and amounts of various benefits. In future issues, additional tables will appear with respect to these subjects. It is anticipated that certain additional material of a different nature will be included from time to time as the program develops.

This bulletin is prepared by Mr. Normand St-Onge, Chief Statistician, under the direction of Mr. C.D. Allen, Assistant Director, Planning and Development, and under the general direction of Mr. W.J. Trudeau, Director of the Canada Pension Plan.

John Munro  
Minister  
National Health and Welfare

## CHAPTER I

### INTRODUCTION

Chapter I deals with the transactions of the Canada Pension Plan Account, namely, the principal items of revenue and expenditure. Also dealt with are the investments of the Canada Pension Plan Investment Fund.

Chapter II presents data on benefit statistics. The principal factors shown are the numbers of beneficiaries, total payments for each benefit and the average monthly amount of each benefit.

The tables have been obtained from programs developed in cooperation with and tabulated by the Departmental Services Officer for the Canada Pension Plan; the basic data have come from the accounting records of the Departmental Services Officer, from the Record of Earnings which contains records of the earnings and contributions of each contributor, and from the files of the Claims Section of the Canada Pension Plan.

The following concepts are described below under the number of the first table in which they appear.

#### Table 1

##### Interest on Investments:

Interest received from contributions lent to the provinces. Excluded is interest accrued but not received.

##### Other Revenue:

Includes (a) penalties and interest on penalties paid by employers, (b) recoveries from the Quebec Pension Plan of its share of the cost of maintaining the Central Index for Social Insurance Numbers, (c) the Quebec Pension Plan's share of benefits in respect of dual contributors, and (d) miscellaneous revenues.

##### Administrative Expenditures:

Administrative costs charged to the Canada Pension Plan Account by the Departments and agencies involved: National Health and Welfare; National Revenue, Taxation; Supply and Services; Public Works; and Unemployment Insurance Commission.

Table 2

Investments Made in Period: Contributions collected in any month are normally credited to the account in the following month and are made available for the purchase of securities in that following month. Actual purchases of securities are made in the next following month, i.e. the second month following that in which they are remitted or collected.

Investment Fund - Quebec Securities: The amounts purchased from the Province of Quebec arise out of contributions made to the Canada Pension Plan by members of the Armed Forces and R.C.M.P. in that province.

Table 3

Benefits Paid In Month: Includes any benefit paid during the month, viz., benefits paid for the first time during that month as well as benefits which commenced in a previous month and are still being paid. In payment tables the "gross amount" is used. The "gross amount" does not take into account a reduction due to the application of the earnings test, or any adjustment made between an interim and a final award. The gross amount includes retroactive payments, if any.

Combined pension: Refers to a person in receipt of a retirement pension and a widow's (disabled widower's) pension, the amount paid out as such pensions, or the average monthly amount of such combined pension.

Table 5

Benefits Put Into Pay In Month: The month a benefit or a pension is put into pay is the month in which payments are first issued, which may be later than the effective month of that benefit. All benefits being reported for the first time reflect the interim amount of the benefit.

Table 6

Benefit Payments:

Include retroactive payments.

Table 9

Average monthly benefit:

Does not take into account retroactive payments for earlier months.

Symbol

The following symbol (-) is used throughout the Bulletin to indicate nil, or an amount less than can be shown with the number of digits used.

Rounding

Due to rounding, data may not add to totals shown in Tables 1, 2, 6, 7 and 8.

## CHAPTER II

### FINANCES

#### Transactions of the Canada Pension Plan Account:

Table 1 sets out the transactions of the Canada Pension Plan Account for each of the four fiscal years 1965-66 to 1968-69. Also shown are the transactions for April 1969, the first month in the fiscal year 1969-70.

As the collection of contributions began in January 1966, the contributions for the fiscal year 1965-66 apply to only a part of a year. For the fiscal years 1966-67, 1967-68 and 1968-69, contributions were respectively \$587.2, \$640.2 and \$697.6 million. Over these three years, contributions increased at an average annual rate of about 9 per cent. The interest actually received on investments increased rapidly over the last three years as the balance in the investment fund increased rapidly. The interest figures shown do not include interest accrued but not received.

For the fiscal years 1965-66 and 1966-67, expenditures were devoted almost entirely to administrative costs. However, as retirement benefits commenced to be paid in January 1967, and survivors' benefits in February 1968, outlays on benefits rose rapidly subsequently and will continue to do so. It will be noted that in 1968-69 benefit expenditures exceeded administrative expenditures for the first time since the beginning of the program.

In the early years of a social insurance program such as the Canada Pension Plan it is normal practice for contributions to accumulate more quickly than do expenditures on benefits. This arises as a consequence of the fact that entitlement to benefits is based upon the prior payment of contributions and of the fact that the entitlement in question may not occur until a number of years after the contributions have been paid. Consequently, the excess of revenue over expenditure in the Canada Pension Plan has increased from year to year for each of the four fiscal years and by

March 1969 the balance in the account was just over \$2.1 billion.

Canada Pension Plan Investments:

Table 2 is devoted to a summary analysis of the investments of the Canada Pension Plan Investment Fund since the inauguration of the program. In the fiscal year 1965-66 about \$35 million was invested in provincial and federal securities. This amount arose from contributions made with respect to the month of January 1966, the month in which the program came into operation. For example, contributions for the month of January are credited to the account in February and are invested in March. For the year 1966-67 investments totalled about \$580 million. This amount increased in each of the next two fiscal years so that by the end of March 1969 over \$2 billion had been invested in securities of, or guaranteed by, the provinces or Canada.

Securities purchased by the investment fund have a maturity period of twenty years and bear interest at various rates depending upon the month in which they are purchased. For the fiscal year 1968-69 the interest rate ranged from 6.40 per cent for securities purchased in October 1968 to 7.17 per cent for those purchased in February 1969.

## CHAPTER III

### BENEFIT STATISTICS

Canada Pension Plan benefits are of three types: Retirement Pensions; Survivors' Benefits which comprise widow's pensions, disabled widower's pensions, orphan's benefits, and lump sum death benefits; and Disability Benefits which comprise pensions for disabled contributors, and benefits for the children of disabled contributors. With exception of the lump sum death benefit, all benefits are paid monthly.

Retirement pensions became payable in January 1967 and survivors' benefits in February 1968. Disability benefits will become payable in February 1970.

Monthly benefits in pay are adjusted upwards in January if the change in the Pension Index so requires. Benefits in payment in 1967 were increased by two per cent effective January 1968; those in payment in 1968 were increased by two per cent effective January 1969.

#### Numbers of Beneficiaries

Tables 3 to 5 deal with the numbers of beneficiaries for each type of benefit. Table 3 shows the growth in the number of each type of benefit over the 13 month period from April 1968 to April 1969. As would be expected in a new program, the number of beneficiaries rose very rapidly. Retirement pensions almost tripled, from 22,000 to 62,000. Widow's pensions and orphan's benefits, which became payable first in February 1968, rose from about 800 in April 1968 to almost 18,000 in April 1969.

The distribution by province of the 82,072 benefits paid in April 1969 is shown in Table 4. Those payable in the Province of Quebec are either ones payable to persons who contributed only to the Canada Pension Plan or ones who contributed to both the Canada Pension Plan and the Quebec Pension Plan and whose benefits are payable by the Canada Pension Plan with partial reimbursement by the Quebec Pension Plan.

Over 9,300 benefits were first put into pay in April 1969. Their distribution by province is shown in Table 5. The figures in this table are, of course, included in those shown in Table 4. It will be noted that the number of lump sum death benefits is the same in Tables 4 and 5, as one would expect of a benefit made in a single payment.

#### Total Benefit Payments

Tables 6 to 8 deal with the total amounts paid out in benefits and in each case the amounts are shown for each type of benefit. Table 6 presents the benefit payments, by benefit, for each of the first three fiscal years for which benefits were payable. In 1966-67, retirement pensions were payable for three months. In 1967-68, \$1.3 million was paid of which \$1.1 million was for retirement pensions. In 1968-69 the amount paid for all benefits rose to \$15.4 million of which one third, or \$5.4 million, was for retirement pensions, and \$10.1 million for survivors' benefits. The reason for the relatively large amount paid out for survivors' benefits is that full retirement pensions will not be payable until 1976 whereas survivors' benefits have been paid at their full rates right from February 1968 when they first became payable.

The distribution, by province and by benefit, of the \$2.9 million paid in benefits in April 1969 is shown in Table 7. A little over half of that amount, \$1.6 million, was first paid in that month as is shown in Table 8.

#### Average Benefit Payments

Tables 9 to 11 deal with the distribution of average benefit payments. The average monthly amount of each benefit paid for each month from April 1968 to April 1969 is shown in Table 9. The steady rise in the average monthly amount of the retirement pension from \$8.71 a month in April 1968 to \$13.08 in April 1969 contrasts with the relatively level rates for each of the survivors' benefits. As explained earlier, this is due to the fact that retirement pensions become payable, before 1976, at less than their full rates while survivors' benefits have been payable at their full rates since their commencement.

Tables 10 and 11 show, by province and by type of benefit, the average monthly amount of benefit. Table 10 deals with the average of all benefits paid in April 1969 while Table 11 deals only with those of them that went into pay in that month. It will be observed that the average retirement pension put into pay in April was almost one third greater than the average for all retirement pensions paid in that month. On the other hand, the average of each survivors' benefit put into pay in April was only slightly higher than all of those paid in that month.

The average amounts of benefit may be compared with the maximum benefits payable. The maximum retirement pension that may be put into pay has been and still is rising each month. For example, for January 1967 it was \$10.42; for January 1968, \$20.97; for January 1969, \$31.88; and for April 1969, \$34.53.

For a widow who was under age 65 when her pension became payable, the maximum monthly rate in 1968 was \$64.82, and in 1969 it is \$65.85. For a widow age 65 or more it was \$62.91 in 1968 and is \$63.75 in 1969.

Orphan's benefits were payable at the rate of \$25.50 a month for each of the first four orphans in 1968 and one half of that for each orphan in excess of four. The total amount for all the orphans in a family is divided equally among them. Thus, in 1968, in a family with six orphans, each received \$21.25 a month. In 1969 the basic rate of \$25.50 became \$26.01.

The maximum death benefit payable with respect to a contributor who died in 1968 was a lump sum of \$510.00. For a contributor who dies in 1969 it is \$520.00.
