FOREWORD

Information on the operation of the Canada Pension Plan is contained in the Canada Pension Plan Statistical Bulletin. The Bulletin makes this information available quarterly to industry, welfare organizations, all levels of government and other interested persons.

Since the Plan came into operation in January 1966, contributions have been collected from employees, employers and self-employed people.

In January 1967, retirement pensions became payable. In February 1968, survivors' benefits were introduced. They comprise monthly widow's pensions, disabled widower's pensions and orphan's benefits, as well as the lump sum death benefit. In February 1970, monthly pensions will become payable to disabled contributors, together with benefits for the children of disabled contributors.

The information presented in the Canada Pension Plan Statistical Bulletin deals almost entirely with that part of Canada which lies outside the Province of Quebec. Except for members of the Armed Forces and the R.C.M.P., persons covered by the Canada Pension Plan are not employed in the Province of Quebec which has a virtually identical program, the Quebec Pension Plan. A small number of beneficiaries under the Canada Pension Plan live in the Province of Quebec.

This issue contains information on the operations of the Canada Pension Plan Account, the Canada Pension Plan Investment Fund, and the numbers, amounts, averages and sizes of the various benefits. As the program develops, future issues will carry more information on these subjects and new tables on other areas.

The Bulletin is prepared by Normand St-Onge, Chief Statistician, under the direction of C.D. Allen, Assistant Director, Planning and Development, Canada Pension Plan.

CHAPTER I

INTRODUCTION

In this Chapter are set out descriptions of the concepts used in the various tables. Chapter II deals with the principal items of revenue and expenditure of the Canada Pension Plan Account and the investments of the Canada Pension Plan Investment Fund.

Chapter III presents data on benefit statistics. The principal factors shown are the numbers of beneficiaries, total payments, and the average monthly amount, classified by type of benefit, by fiscal year and by month, by province, by age and sex of beneficiary, and by size of monthly pension.

The tables have been obtained from programs developed in cooperation with and tabulated by the Departmental Services Officer for the Canada Pension Plan; the basic data have come from the accounting records of the Departmental Services Officer, from the Record of Earnings which contains records of the earnings and contributions of each contributor, and from the files of the Claims Section of the Canada Pension Plan.

The following concepts are described below under the number of the first table in which they appear.

Table 1

Interest on Investments:

Interest received from contributions lent to the provinces. Excluded is interest accrued but not received.

Other Revenue:

Includes (a) penalties and interest on penalties paid by employers, (b) recoveries from the Quebec Pension Plan of its share of the cost of maintaining the Central Index for Social Insurance Numbers, (c) the Quebec Pension Plan's share of benefits in respect of dual contributors, and (d) miscellaneous revenues.

Administrative Expenditures: Administrative costs charged to the Canada Pension Plan Account by the Departments and agencies involved: National Health and Welfare; National Revenue, Taxation; Supply and Services; Public Works; and Unemployment Insurance Commission.

Table 2

Investments Made in Period: Contributions collected in any month are normally credited to the account in the following month and are made available for the purchase of securities in that following month. Actual purchases of securities are made in the next following month, i.e. the second month following that in which they are remitted or collected.

Investment Fund - Quebec Securities: The amounts purchased from the Province of Quebec arise out of contributions made to the Canada Pension Plan by members of the Armed Forces and R.C.M.P. in that province.

Table 3

Benefits Paid In Month: Includes any benefit paid during the month, viz., benefits paid for the first time during that month as well as benefits which commenced in a previous month and are still being paid. In payment tables the "gross amount" is used. The "gross amount" does not take into account a reduction

due to the application of the earnings test, or any adjustment made between an interim and a final award. The gross amount includes retroactive payments, if any.

Combined Pension:

Refers to a person in receipt of a retirement pension and a widow's (disabled widower's) pension, the amount paid out as such pensions, or the average monthly amount of such combined pension.

Table 5

Benefits Put Into Pay In Month: The month a benefit or a pension is put into pay is the month in which payments are first issued, which may be later than the effective month of that benefit. All benefits being reported for the first time reflect the interim amount of the benefit.

Table 6

Benefit Payments:

Include retroactive payments.

Table 9

Average Monthly Benefit:

Does not take into account retroactive payments for earlier months.

Table 12

Gross Amount:

Does not take into account a reduction due to the application of the earnings test, or any adjustment between an interim and a final award. Includes retroactive payments, if any.

Symbol

The following symbol (-) is used throughout the Bulletin to indicate nil, or an amount less than can be shown with the number of digits used.

Rounding

Due to rounding, data may not add to totals shown in Tables 1, 2, 6, 7, 8, 12, 13, 14, 15, 16 and 17.

CHAPTER II

FINANCES

Transactions of the Canada Pension Plan Account:

Table 1 sets out the transactions of the Canada Pension Plan Account for each of the four fiscal years, 1965-66 to 1968-69. Also shown are the transactions for April to July 1969, the first four months in the fiscal year 1969-70.

As the collection of contributions began in January 1966, the contributions for the fiscal year 1965-66 apply to only a part of a year. For the fiscal years 1966-67, 1967-68 and 1968-69, contributions were respectively \$587.2, \$640.2 and \$697.6 million. Over these three years, contributions increased at an average annual rate of about 9 per cent. The interest actually received on investments increased rapidly over the last three years as the balance in the investment fund increased rapidly. The interest figures shown do not include interest accrued but not received.

For the fiscal years 1965-66 and 1966-67, expenditures were devoted almost entirely to administrative costs. However, as retirement benefits commenced to be paid in January 1967, and survivors' benefits in February 1968, outlays on benefits rose rapidly subsequently and will continue to do so. It will be noted that in 1968-69 benefit expenditures exceeded administrative expenditures for the first time since the beginning of the program and that in the first four months of the fiscal year 1969-70, benefits outlays were three times administrative expenditures.

In the early years of a social insurance program such as the Canada Pension Plan it is normal practice for contributions to accumulate more quickly than do expenditures on benefits. This arises as a consequence of the fact that entitlement to benefits is based upon the prior payment of contributions and of the fact that the entitlement in question may not occur until a number of years after the contributions have been paid. Consequently, the excess of revenue over expenditure in the Canada Pension Plan has increased from year to year for each of the four fiscal years and by March 1969 the balance in the account was just over \$2.1 billion. For the first four months of the fiscal year 1969-70, the excess of revenue over expenditure is \$321.3 million resulting in a balance of \$2.4 billion in the account at the end of July 1969.

Canada Pension Plan Investments:

Table 2 is a summary analysis of the investments of the Canada Pension Plan Investment Fund since the inauguration of the program. In the fiscal year 1965-66 about \$35 million was invested in provincial and federal securities. This amount arose from contributions made with respect to the month of January 1966, the month in which the program came into operation. For example, contributions for the month of January are credited to the account in February and are invested in March. For the year 1966-67 investments totalled about \$580 million. This amount increased in each of the next two fiscal years so that by the end of March 1969 over \$2 billion had been invested in

securities of, or guaranteed by, the provinces or Canada. From April to July 1969, investments totalled \$306.1 million with the total in Fund at the end of July 1969 standing at \$2,329 million.

Securities purchased by the investment fund have a maturity period of twenty years and bear interest at various rates depending upon the month in which they are purchased. For the fiscal year 1968-69 the interest rate ranged from 6.40 per cent for securities purchased in October 1968 to 7.17 per cent for those purchased in February 1969. For the first four months of the fiscal year 1969-70, the interest rate ranged from 7.16 per cent for securities purchased in April to 7.45 per cent for those purchased in July.

CHAPTER III

BENEFIT STATISTICS

Canada Pension Plan benefits are of three types: Retirement Pensions; Survivors' Benefits which comprise widow's pensions, disabled widower's pensions, orphan's benefits, and lump sum death benefits; and Disability Benefits which comprise pensions for disabled contributors, and benefits for the children of disabled contributors. With exception of the lump sum death benefit, all benefits are paid monthly.

Retirement pensions became payable in January 1967 and survivors' benefits in February 1968. Disability benefits will become payable in February 1970.

Monthly benefits in pay are adjusted upwards in January if the change in the Pension Index so requires. Benefits in payment in 1967 were increased by two per cent effective January 1968; those in payment in 1968 were increased by two per cent effective January 1969.

Numbers of Beneficiaries

Tables 3 to 5 deal with the numbers of beneficiaries for each type of benefit. Table 3 shows the growth in the number of each type of benefit over the 13 month period from July 1968 to July 1969. As would be expected in a new program, the number of beneficiaries rose very rapidly. Retirement pensions almost tripled, from 27,053 to 73,911 for a monthly average increase of approximately 4,000 retirement pensions. Widow's pensions and orphan's benefits, which became payable first in February 1968, rose from about 4,000 in July 1968 to

26,206 in July 1969.

The distribution by province of the 101,749 benefits paid in July 1969 is shown in Table 4. Those payable in the Province of Quebec are either ones payable to persons who contributed only to the Canada Pension Plan or ones who contributed to both the Canada Pension Plan and the Quebec Pension Plan and whose benefits are payable by the Canada Pension Plan with partial reimbursement by the Quebec Pension Plan.

A total of 8,789 benefits were first put into pay in July 1969. Their distribution by province is shown in Table 5. The figures in this table are, of course, included in those shown in Table 4. It will be noted that the number of lump sum death benefits is the same in Tables 4 and 5, as one would expect of a benefit made in a single payment.

Total Benefit Payments

Tables 6 to 8 deal with the total amounts paid out in benefits and in each table the amounts are shown for each type of benefit. Table 6 presents the benefit payments, by benefit, for each of the first three fiscal years for which benefits were payable. In 1966-67, retirement pensions were payable for three months. In 1967-68, \$1.3 million was paid of which \$1.1 million was for retirement pensions. In 1968-69 the amount paid for all benefits rose to \$15.4 million of which one third, or \$5.4 million, was for retirement pensions, and \$10.1 million for survivors' benefits. The reason for the relatively large amount paid out for survivors' benefits is that full retirement pensions will not be payable until 1976

whereas survivors' benefits have been paid at their full rates right from February 1968 when they first became payable.

The distribution, by province and by benefit, of the \$3.6 million paid in benefits in July 1969 is shown in Table 7. A little under half of that amount, \$1.6 million, was first paid in that month as is shown in Table 8.

Average Benefit Payments

Tables 9 to 11 deal with average benefit payments. The average monthly amount of each benefit paid for each month from July 1968 to July 1969 is shown in Table 9.

The steady rise in the average monthly amount of the retirement pension from \$9.24 a month in July 1968 to \$14.08 in July 1969 contrasts with the relatively level rates for each of the survivors' benefits. As explained earlier, this is due to the fact that retirement pensions become payable, before 1976, at less than their full rates while survivors' benefits have been payable at their full rates since their commencement.

Tables 10 and 11 show, by province and by type of benefit, the average monthly amount of benefit. Table 10 deals with the average of all benefits paid in July 1969 while Table 11 deals only with those of them that went into pay in that month. It will be observed that the average retirement pension put into pay in July was almost 40 per cent greater than the average for all retirement pensions paid in that month. On the other hand, the average amount of each type of survivors' benefit put into pay in July, except the

disabled widower's pensions, was only slightly lower than that for all benefits of that type paid in that month.

Analysis By Age and Sex

Tables 12 to 17 set out, by age and sex, for Canada as a whole, the number of recipients of each type of benefit, the gross amount paid in benefits, and the average monthly amount of benefit. In each table, these data are shown for benefits put into pay in July 1969 and for all benefits paid in that month.

In July 1969, as shown in Table 12, males represented 79 per cent of the 73,911 retirement pensioners and received 83 per cent of the gross amount of \$1,242,453 paid. Consequently, the males had a higher average pension than females. For benefits put into pay in that month, the percentage of males was even higher. For both males and females, somewhat less than 26 per cent of all those paid in the month were 70 years of age or over.

It will be noted that for both males and females the average of all retirement pensions paid declined almost steadily with age. This arises in part from the fact that the minimum age at which retirement pensions are payable has decreased from age 68 in 1967 to age 67 in 1968 and to age 66 in 1969. At the same time, in general, the longer a person contributes the larger his retirement pension will be. Thus the decline with age in the average retirement pension was to be expected. On the other hand, those retirement pensions which were first put into pay in July 1969 cannot be said to be lower for the higher ages, except for those age 71-74.

For widow's pensions, disabled widower's pensions and for both together, the number of beneficiaries, the gross amount paid, and the average monthly amount of pension are shown in Tables 14, 15 and 16, respectively, by age group, for Canada as a whole. At present, the number of recipients of disabled widower's pensions is so small that Tables 14 and 16 have the same characteristics. About 69 per cent of the recipients of widow's pensions are aged 45 to 65 years.

Over the next few years the distribution of the ages of the widows can be expected to change. When the program commenced in January 1966, no contributor could be age 70 or over. Hence most of the widows now receiving pensions are widows of contributors whose deaths occurred while members of the labour force. As time goes on, however, the number of men in receipt of retirement pensions will steadily rise and their average age can be expected to rise. Consequently, their widows will have a higher average age than will the widows of present contributors who are on the average, much younger.

Table 17 sets out information on orphan's benefits by sex, and by the ages of orphans at the end of July 1969. Males represent 51 per cent of the total number of beneficiaries for all benefits paid in July 1969 and 52 per cent of the total benefits put into pay in that month. The normal age groups for demographic purposes are used in Table 17, subject to certain modifications. The 15-19 age group is divided for two reasons. Orphan's benefits are payable directly to orphans age 18 or more and are payable to such orphans only if they

are in full time attendance at school or university. These conditions do not apply to orphans under age 18. The age group 20 plus refers to orphans age 20 to 24 since the benefits are not payable to an orphan age 25 or over.

Tables 18 to 20 deal with the retirement pensions by size of monthly pensions and by age of the beneficiaries. They deal with all the benefits paid in July 1969 and show the average monthly amount by age or age group.

Tables 21 to 23 show the number of widow's pensions, disabled widower's pensions, and both combined, by size of monthly pensions and by age or age group. They also show the average monthly amount by age or age group.

It will be noted, that, at present, the total number of disabled widower's pensions is so small that Tables 21 and 23 are very similar.

From Table 21, it has been calculated that the median value of pensions for widows under age 65 was \$63.89. Consequently, 50 per cent of those widows had a monthly pension between \$63.89 and the maximum pension of \$65.85.

Maximum Benefits

The average amounts of benefit shown in the tables in this Bulletin may be compared with the maximum benefits payable. The maximum retirement pension that may be put into pay rises each month. For example, for January 1967 it was \$10.42; for January 1968, \$20.97; for January 1969, \$31.88; and for July 1969, \$37.19.

For a widow under age 65 the maximum monthly rate of pension put into pay in 1968 was \$64.82, and in 1969 it is

\$65.85. For a widow age 65 or more it was \$62.91 in 1968 and is \$63.75 in 1969.

Orphan's benefits were payable in 1968 at the rate of \$25.50 a month for each of the first four orphans and one half of that for each orphan in excess of four with the total amount for all the orphans in a family being divided equally among them. Thus, in 1968, in a family with six orphans, each received \$21.25 a month. In 1969 the basic rate of \$25.50 became \$26.01.

The maximum death benefit payable with respect to a contributor who died in 1968 was a lump sum of \$510.00. For a contributor who dies in 1969 it is \$520.00.
