OFFICE OF PLANNING AND DEVELOPMENT
CANADA PENSION PLAN

Published by authority of
the Honourable John Munro
Minister of National Health & Welfare

Joseph W. Willard
Deputy Minister of National Welfare

FOREWORD

Information on the operation of the Canada Pension Plan is contained in the Canada Pension Plan Statistical Bulletin. The Bulletin makes this information available quarterly to industry, welfare organizations, all levels of government and other interested persons.

Since the Plan came into operation in January 1966, contributions have been collected from employees, employers and self-employed people.

In January 1967, retirement pensions became payable. In February 1968, survivors' benefits were introduced. They comprise monthly widow's pensions, disabled widower's pensions and orphan's benefits, as well as the lump sum death benefit. In February 1970, monthly pensions will become payable to disabled contributors, together with benefits for the children of disabled contributors.

The information presented in the Canada Pension Plan Statistical Bulletin deals almost entirely with that part of Canada which lies outside the Province of Quebec. Except for members of the Armed Forces and the R.C.M.P., persons covered by the Canada Pension Plan are not employed in the Province of Quebec which has a virtually identical program, the Quebec Pension Plan. A small number of beneficiaries under the Canada Pension Plan live in the Province of Quebec.

This issue contains information on the operations of the Canada Pension Plan Account, the Canada Pension Plan Investment Fund, and the numbers, amounts, averages and sizes of the various benefits. As the program develops, future issues will carry more information on these subjects and new tables on other areas.

The Bulletin is prepared by Normand St-Onge, Chief Statistician, under the direction of C.D. Allen, Assistant Director, Planning and Development, Canada Pension Plan.

W.J. Trudeau
Director
Canada Pension Plan

INTRODUCTION

Finances

Canada Pension Plan Account - Table 1 sets out the transactions of the Canada Pension Plan Account for each of the four fiscal years 1965-66 to 1968-69. Also shown are the transactions by month for the fiscal year 1969-70.

In the early years of a social insurance program such as the Canada Pension Plan contributions normally accumulate more quickly than do expenditures on benefits. This arises as a consequence of the fact that entitlement to benefits is based upon the prior payment of contributions and the fact that the entitlement in question may not occur until a number of years after the contributions have been paid. Consequently, the excess of revenue over expenditure in the Canada Pension Plan has increased from year to year since January 1966.

Canada Pension Plan Investments - Table 2 is a summary analysis of the investments of the Canada Pension Plan Investment Fund since the inauguration of the program. Contributions for the month of January are credited to the account in February and are invested in March, and so on for each month.

Securities that have been purchased by the investment fund have a maturity period of twenty years. The interest rate depends upon the month in which the securities are purchased and is related to the average yield to maturity

on negotiable bonds of Canada maturing in 20 years or more.

Benefit Statistics

The principal factors shown are the numbers of beneficiaries, total payments, and the average monthly amount, classified by type of benefit, by fiscal year and by month, by province, by age and sex of beneficiary, and by size of monthly pension.

The Canada Pension Plan benefits are of three types: Retirement Pensions; Survivors' Benefits which comprise widow's pensions, disabled widower's pensions, orphan's benefits, and lump sum death benefits; and Disability Benefits which comprise pensions for disabled contributors, and benefits for the children of disabled contributors. With exception of the lump sum death benefit, all benefits are paid monthly.

Retirement pensions became payable in January 1967 and survivors' benefits in February 1968. Disability benefits become payable in February 1970.

Monthly benefits in pay are adjusted upwards in January if the change in the Pension Index so requires. Benefits in payment in 1967 were increased by two per cent effective January 1968; those in payment in 1968 were increased by two per cent effective January 1969.

Number of Beneficiaries - Tables 3 to 5 present the number of beneficiaries for each type of benefit.

Total Benefit Payments - Tables 6 to 8 set out

the total amount paid out in benefits. In each table the amount is shown for each type of benefit.

The reason for the relatively large amount paid out for survivors' benefits is that full retirement pensions will not be payable until 1976 whereas survivors' benefits have been paid at their full rates from February 1968 when they first became payable.

Average Benefit Payments - Tables 9 to 11 present average benefit payments by type of benefit.

Beneficiaries By Age and Sex - Tables 12 to 17 set out, by age and sex, for Canada as a whole, the number of recipients of each type of benefit, the gross amount paid in benefits, and the average monthly amount of benefit. In each table, these data are shown for benefits put into pay in the month and for all benefits paid in that month.

In the early years of the Plan, the longer a person contributes, the larger his retirement pension will be. Thus the lower amounts of average retirement pension for the beneficiaries at the older ages were to be expected.

Over the next few years the distribution of the ages of the widows can be expected to change. When the program commenced in January 1966, no contributor could be age 70 or over. Hence, most of the widows now receiving pensions are widows of contributors whose deaths

occurred while they were members of the labour force. As time goes on, however, the number of men in receipt of retirement pensions will steadily rise and their average age will rise. Consequently, their widows will have a higher average age than will the widows of present contributors who are, on the average, much younger.

The normal age groups for demographic purposes are used in Table 17, subject to certain modifications. The 15-19 age group is divided for two reasons. Orphan's benefits are payable directly to orphans age 18 or more and are payable to such orphans only if they are in full time attendance at school or university. These conditions do not apply to orphans under age 18. The age group 20 plus refers to orphans age 20 to 24 since benefits are not payable to orphans age 25 or over.

Retirement Pensions By Size - Tables 18 to 20 deal with the retirement pensions by size of monthly pension and by age of the beneficiaries.

Widow's and Disabled Widower's Pensions By Size - Tables 21 to 23 show the number of widow's pensions, disabled widower's pensions, and both combined, by size of monthly pensions and by age or age group. They also show the average monthly amount by age or age group.

It will be noted that, at present, the total number of disabled widower's pensions is so small that Tables 21 to 23 are very similar.

Maximum Benefits - The average amounts of benefits shown in the tables in this Bulletin may be compared with the maximum rates of benefit payable. The maximum retirement pension that may be put into pay rises each month. For example, for January 1967 it was \$10.42; for January 1968, \$20.97; for January 1969, \$31.88; and for October 1969, \$39.84.

For a widow under age 65 the maximum monthly rate of pension put into pay in 1968 was \$64.82, and in 1969 it is \$65.85. For a widow age 65 or more it was \$62.91 in 1968 and is \$63.75 in 1969.

Orphan's benefits were payable in 1968 at the rate of \$25.50 a month for each of the first four orphans and one half of that for each orphan in excess of four with the total amount for all orphans in a family being divided equally among them. Thus, in 1968, in a family with six orphans, each received \$21.25 a month. In 1969 the basic rate of \$25.50 became \$26.01.

The maximum death benefit payable with respect to a contributor who died in 1968 was a lump sum of \$510.00. For a contributor who died in 1969 it is \$520.00.

Sources of Data

The tables have been obtained from programs developed

in cooperation with and tabulated by the Departmental Services Officer, from the Record of Earnings which contains records of the earnings and contributions of each contributor, and from the files of the Claims Section of the Canada Pension Plan.

Concepts Used

The following concepts are described below under the number of the first table in which they appear.

Table 1

Interest on Investments:

Interest received from contributions lent to the provinces. Excluded is interest accrued but not received.

Other Revenue:

Includes (a) penalties and interest on penalties paid by employers, (b) recoveries from the Quebec Pension Plan of its share of the cost of maintaining the Central Index for Social Insurance Numbers, (c) the Quebec Pension Plan's share of benefits in respect of dual contributors, and (d) miscellaneous revenues.

Administrative Expenditures:

Administrative costs charged to the Canada Pension Plan Account by the Departments and agencies involved: National Health and Welfare; National Revenue, Taxation; Supply and Services; Public Works; and Unemployment Insurance Commission.

Table 2

Investments Made in Period:

Contributions collected in any month are normally credited to the account in the following month and are made available for the purchase of securities

in that following month. Actual purchases of securities are made in the next following month, i.e. the second month following that in which they are remitted or collected.

Investment Fund - Quebec Securities: The amounts purchased from the Province of Quebec arise out of contributions made to the Canada Pension Plan by members of the Armed Forces and R.C.M.P. in that province.

Table 3

Benefits Paid In Month:

Includes any benefit paid during the month, viz., benefits paid for the first time during that month as well as benefits which commenced in a previous month and are still being paid. In payment tables the "gross amount" is used. The "gross amount" does not take into account a reduction due to the application of the earnings test, or any adjustment made between an interim and a final award. The gross amount includes retroactive payments, if any.

Combined Pension:

Refers to a person in receipt of a retirement pension and a widow's (disabled widower's) pension, the amount paid out as such pensions, or the average monthly amount of such combined pension.

Table 5

Benefits Put Into Pay In Month:

The month a benefit or a pension is put into pay is the month in which payments are first issued, which may be later than the effective month of that benefit. All benefits being reported for the first time reflect the interim amount of the benefit.

Table 6

Benefit Payments:

Include retroactive payments.

Table 9

Average Monthly Benefit:

Does not take into account retroactive payments for earlier months.

Table 12

Gross Amount:

Does not take into account a reduction due to the application of the earnings test, or any adjustment between an interim and a final award. Includes retroactive payments, if any.

Symbol

The following symbol (-) is used throughout the Bulletin to indicate nil, or an amount less than can be shown with the number of digits used.

Rounding

Due to rounding, data may not add to totals shown in Tables 1, 2, 6, 7, 8, 12, 13, 14, 15, 16 and 17.
