

RENTAL MARKET REPORT

Brantford CMA

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: 2018

PRIMARY RENTAL MARKET (by bedroom type)			
Bachelor	One bedroom	Two bedroom	Three or more bedrooms
**%	1.2%	1.5%	1.9%
Vacancy Rate	Vacancy Rate	Vacancy Rate	Vacancy Rate
\$677 Avg. Rent	\$900 Avg. Rent	\$1,002 Avg. Rent	\$1,070 Avg. Rent

“The vacancy rate in Brantford was below 2% for the second straight year, leading to strong rent growth.”

Anthony Passarelli
Senior Analyst

*CMHC collects data on the primary and secondary rental market annually, in the fall. These data refer to the primary rental market, which only includes rental units in privately-initiated apartment structures containing at least three rental units. The secondary rental market covers rental dwellings that were not originally purpose-built for the rental market, including rental condominiums. The primary vacancy rate and rent level is based on all surveyed structures, while the rent increase is based only on structures common to the survey sample in both the current and previous year.

Key Findings

- The overall vacancy rate¹ was relatively unchanged² at just 1.5%, as rental demand and supply both mildly increased by similar amounts.
- Rental demand was supported by high levels of immigration, a greater number of student renters and greater household formation by young adults.
- Rent growth was strong as renters had few alternatives to choose from.

High Immigration

Immigration to Brantford remained supportive of rental demand. Data from Immigration, Refugees and Citizenship Canada (IRCC) show that immigration to Brantford in the first eight months of 2018 was similar to the high levels reached during the same period last year. Immigration was on pace to be above the 185 average annual immigration to Brantford during the most recent Census period 2011-2016. Immigration is a key factor affecting rental demand as censuses consistently show that the vast majority of new immigrants live in rental housing.

Greater Number of Student Renters

The number of student renters in Brantford increased this year, as data from IRCC show that the average number of non-permanent residents with study permits was up. More international students likely led to steady or higher overall enrolment for the fall 2018 semester, however Wilfrid Laurier University

Brantford Campus has yet to release that data. Greater competition for student renters came from outside the primary rental market, as new student-only rental apartments were opened this year in Brantford. As a result, the presence of more student renters made a relatively mild contribution to the increase in rental demand in the primary rental market.

Greater Number of Rental Households Formed by 15 to 24 Year Olds

The number of renter households formed by people 15-24 years of age was likely greater than last year. The population of 15-24 year olds in Brantford was relatively unchanged but a greater percentage of them had a job in the past 12 months, including more in full-time employment. Improved employment conditions for this age group allowed more of them to move out of their parents home to form their own household.

Census data show that most people in this age group rent if they move out of their parent's home.

Steady Number of Renters Transitioned into Homeownership

The average qualifying payment³ on a conventional mortgage in Brantford increased more than their average household's income. However, Brantford continued to be one of the most affordable regions in Ontario to purchase a home. As a result, a steady number of renters likely transitioned into homeownership

Figure 1

Source: CMHC, adapted from Immigration, Refugees and Citizenship Canada

¹ Based on privately initiated rental apartment structures of three or more units.

² Change was within the survey margin of error and therefore was not statistically significant.

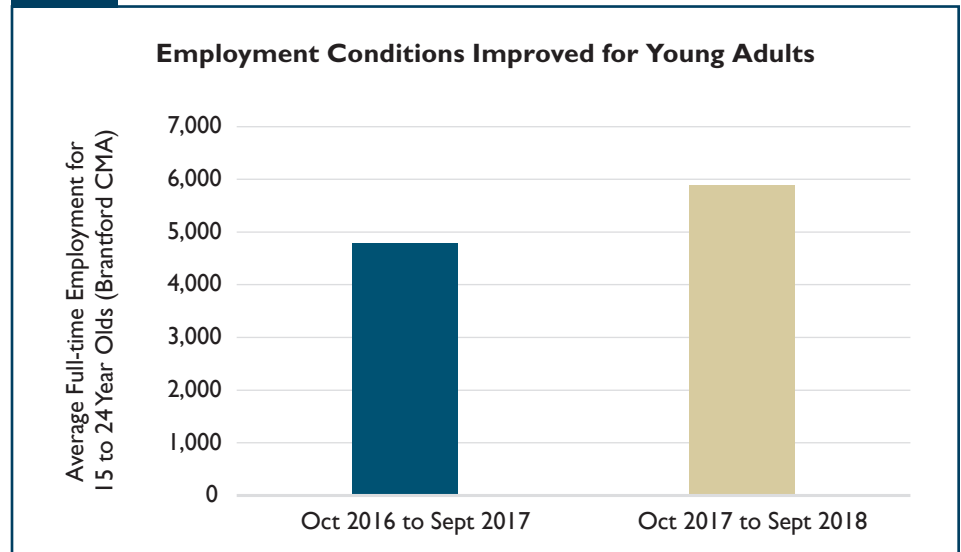

³ Conventional mortgage payment was calculated using the average MLS® price, a 20% down payment, the qualifying rate for a five-year mortgage and a 25 year amortization.

this year. Mortgage regulatory changes, rising mortgage rates and a higher average MLS®⁴ price contributed to higher qualifying payments. The group of renters most likely to transition into homeownership reside in units in the two highest rent quintiles, as their current housing expenses are the closest substitute to homeownership costs in Brantford. The number of occupied units in the two highest rent quintiles was similar to that in 2017, suggesting a steady flow of these renters into homeownership. Renter households needing more space are likely to consider purchasing a home and they tend to rent row homes. Demand for rental row homes was also relatively unchanged.

Supply Was Relatively Unchanged

The rental apartment universe increased by just 39 units since the 2017 survey, an increase of about 0.8% compared to an increase in demand of nearly 0.6%. Supply grew at a similar rate as in 2017.

Figure 2

Source: CMHC, adapted from Statistics Canada (Labour Force Survey)

Strong Rent Growth

The average rent increase in apartment structures surveyed in both 2017 and 2018 was 4.8%. Strong rent growth was due to renters having very few options. The low vacancy rate allowed landlords to increase rents well above the Ontario Guideline of 1.8% on most apartments that turned over to a new tenant and right up to

the Ontario Guideline on most apartments which had the same tenant as last year. Asking rents on vacant units were significantly higher than rents on occupied units, which led to a lower turnover rate.

3.1.5 Private Row (Townhouse) and Apartment Estimate of Percentage Change (%) of Average Rent¹ by Zone and Bedroom Type Brantford CMA

Zone	Bachelor		1 Bedroom		2 Bedroom		3 Bedroom +		Total	
	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18
	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18	Oct-16 to Oct-17	Oct-17 to Oct-18
Brantford CMA	**	3.2 d	3.5 c	4.7 c	2.4 c	4.8 b	2.6 c	4.2 c	3.2 c	4.6 b

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

3.1.6 Private Row (Townhouse) and Apartment Turnover Rates (%) by Zone and Bedroom Type Brantford CMA

Zone	Bachelor		1 Bedroom		2 Bedroom		3 Bedroom +		Total	
	Oct-17	Oct-18	Oct-17	Oct-18	Oct-17	Oct-18	Oct-17	Oct-18	Oct-17	Oct-18
Brantford CMA	10.2 d	**	**	**	19.3 d	10.8 c ↓	18.0 d	13.1 c ↓	20.3 d	12.7 c ↓

For an explanation of the letters and symbols used in the Rental Market tables, please refer to our [Methodology](#) page.

TECHNICAL NOTE:

Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent levels, availability (outside Quebec), turnover and vacancy unit data for all sampled structures.

The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of October, and the results reflect market conditions at that time.

CMHC is constantly reviewing the Universe of rental structures in the rental market Universe to ensure that it is as complete as possible. Every year, any newly completed rental structures with at least 3 rental units are added to the Universe. In addition to this, CMHC undertakes comprehensive reviews by comparing the Universe listing to other sources of data to ensure that the list of structures is as complete as possible.

CMHC's Rental Market Survey provides a snapshot of vacancy, availability (outside Quebec), and turnover rates and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of percent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports. The rent levels in new and existing structures are also published. While the percent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

METHODOLOGY FOR CONDOMINIUM APARTMENT SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the Condominium Apartment Survey (CAS) in late summer and early fall to estimate the relative strengths in the condo apartment rental market. The CAS collects the number of units being rented out and the vacancy and rent levels of these units in the following CMAs: Calgary, Edmonton, Gatineau, Halifax, Hamilton, Kelowna, Kitchener, London, Montréal, Ottawa, Québec, Regina, Saskatoon, Toronto, Vancouver, Victoria and Winnipeg. The CAS is conducted by telephone interviews and information is obtained from the property management company, condominium (strata) board, or building superintendent. If necessary, this data can be supplemented by site visits if no telephone contact is made.

CMHC publishes the number of units rented, vacancy rates and average rents from the Condominium Apartment Survey. A letter code representing the statistical reliability (i.e., the coefficient of variation (CV)) for each estimate is provided to indicate the data reliability.

RENTAL MARKET SURVEY (RMS) AND CONDOMINIUM APARTMENT SURVEY (CAS) DATA RELIABILITY

CMHC does not publish an estimate (e.g. Vacancy Rates and Average Rents) if the reliability of the estimate is too low or the confidentiality rules are violated. The ability to publish an estimate is generally determined by its statistical reliability, which is measured using the coefficient of variation (CV). CV of an estimate is defined as the ratio of the standard deviation to the estimate and CV is generally expressed a percentage. For example, let the average rent for one bedroom apartments in a given CMA be \bar{x} and its standard deviation be $\sigma_{\bar{x}}$. Then the Coefficient of Variation is given by $CV = \frac{\sigma_{\bar{x}}}{\bar{x}}$.

Reliability Codes for Proportions

CMHC uses CV, sampling fraction and universe size to determine the ability to publish proportions such as vacancy rates, availability rates and turnover rates. The following letter codes are used to indicate the level of reliability of proportions:

a — Excellent

b — Very good

c — Good

d — Fair (Use with Caution)

** — Poor — Suppressed

++ — Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

- — No units exist in the universe for this category

n/a — Not applicable

The following two tables indicate the level of reliability of proportions:

If the proportion is Zero (0) and sampling fraction is less than 100% then the following levels are assigned:

Sampling Fraction (%) range

Structures in Universe	(0,20]*	(20,40]	(40,60]	(60,80]	(80,100)
3 – 10	Poor	Poor	Poor	Poor	Poor
11 – 20	Poor	Fair	Fair	Fair	Good
21 – 40	Poor	Fair	Fair	Good	Very Good
41 – 80	Poor	Fair	Good	Good	Very Good
81+	Poor	Good	Good	Very Good	Very Good

*(0, 20] means sampling fraction is greater than 0% but less than or equal to 20%; others are similar.

Otherwise, the following table is used to determine the reliability level of proportions:

Coefficient of Variation (CV) %

Vacancy Rate	0	(0,5]	(5,10]	(10,16.5]	(16.5,33.3]	(33.3,50]	50+
(0,0.75]	Excellent	Excellent	Excellent	Excellent	Excellent	V. Good	V. Good
(0.75,1.5]	Excellent	Excellent	Excellent	Excellent	Excellent	Fair	Poor
(1.5,3]	Excellent	Excellent	Excellent	V. Good	Good	Poor	Poor
(3,6]	Excellent	Excellent	V. Good	Good	Fair	Poor	Poor
(6,10]	Excellent	Excellent	V. Good	Good	Poor	Poor	Poor
(10,15]	Excellent	Excellent	Good	Fair	Poor	Poor	Poor
(15,30]	Excellent	Excellent	Fair	Poor	Poor	Poor	Poor
(30,100]	Excellent	Excellent	Poor	Poor	Poor	Poor	Poor

Reliability Codes for Averages and Totals

CMHC uses the CV to determine the reliability level of the estimates of average rents and a CV cut-off of 10% for publication of totals and averages. It is felt that this level of reliability best balances the need for high quality data and not publishing unreliable data. CMHC assigns a level of reliability as follows (CV's are given in percentages):

- a — If the CV is greater than 0 and less than or equal to 2.5 then the level of reliability is **Excellent**.
- b — If the CV is greater than 2.5 and less than or equal to 5 then the level of reliability is **Very Good**.
- c — If the CV is greater than 5 and less than or equal to 7.5 then the level of reliability is **Good**.
- d — If the CV is greater than 7.5 and less than or equal to 10 then the level of reliability is **Fair**.
- ** — If the CV is greater than 10 then the level of reliability is **Poor**. (Do Not Publish)

Arrows indicate Statistically Significant Changes

Use caution when comparing statistics from one year to the next. Even if there is a year over year change, it is not necessarily a statistically significant change. When applicable, tables in this report include indicators to help interpret changes:

- ↑ indicates the year-over-year change is a statistically significant increase.
- ↓ indicates the year-over-year change is a statistically significant decrease.
- indicates that the effective sample does not allow one to interpret any year-over-year change as being statistically significant.
- △ indicates that the change is statistically significant

DEFINITIONS

Availability: A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

Rent: The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

Rental Apartment Structure: Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

Rental Row (Townhouse) Structure: Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

Vacancy: A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Turnover: A unit is counted as being turned over if it was occupied by a new tenant moved in during the past 12 months. A unit can be counted as being turned over more than once in a 12 month period.

Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 50,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

October 2017 and October 2018 data is based on Statistics Canada's 2016 Census area definitions.

Acknowledgement

The Rental Market Survey and the Condominium Apartment Survey could not have been conducted without the cooperation of the rental property owners, managers, building superintendents and household members throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution CMHC is able to provide information that benefits the entire housing industry.

CMHC HELPS CANADIANS MEET THEIR HOUSING NEEDS.

Canada Mortgage and Housing Corporation (CMHC) has been helping Canadians meet their housing needs for more than 70 years. As Canada's authority on housing, we contribute to the stability of the housing market and financial system, provide support for Canadians in housing need, and offer unbiased housing research and advice to Canadian governments, consumers and the housing industry. Prudent risk management, strong corporate governance and transparency are cornerstones of our operations.

For more information, visit our website at www.cmhc.ca or follow us on [Twitter](#), [LinkedIn](#), [Facebook](#), [Instagram](#) and [YouTube](#).

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.

Outside Canada call 613-748-2003 or fax to 613-748-2016.
