

SENIORS' HOUSING REPORT

Manitoba

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: 2018

Highlights

- The overall vacancy rate for standard spaces in retirement homes across Manitoba increased to 4.8% in 2018 from 4.0% in 2017.
- In the Winnipeg CMA, vacancy rates for standard spaces were slightly lower than the provincial average at 4.2% in 2018.
- The overall average rent for a standard retirement space in Manitoba was \$2,733 in 2018. The average rent in the Winnipeg CMA was slightly higher at \$2,750.
- Demand for seniors housing in Manitoba was strong and increased from 4,751 residents in 2017 to 5,238 in 2018.
- Supply of senior's spaces also increased with 4,822 spaces included in this year's survey compared to 4,395 last year.

Methodology

Canada Mortgage and Housing Corporation conducts the Seniors' Housing Survey in February and March. This annual survey became national in scope in 2009, covering all centres in each of the ten provinces. Both private and non-profit residences are included in the survey universe.

To be eligible for inclusion in the survey results, a residence must:

- ✓ have at least one unit that is not subsidized (in the Atlantic provinces, Quebec and Ontario);
- ✓ have been in operation for at least one year (for example, it must have started operation before January 2015 to be included in the 2016 survey);
- ✓ have at least 10 rental units (in Quebec, Ontario and the Prairies) or 5 rental units (in the Atlantic provinces and B.C.);
- ✓ offer an on-site meal plan;
- ✓ not mandate high levels of health care (defined as 1.5 hours or more of care per day) to all of its residents; nursing homes and long-term care homes are examples of residences that were not included in the survey;
- ✓ offer rental units; life lease units and owner-occupied units are excluded from this survey; and
- ✓ have at least 50 per cent of its residents who are 65 years of age or older.

The Seniors' Housing Survey is a census and not a sample survey; therefore, all seniors' residences in Canada meeting these criteria are to be part of this survey. The survey universe in Quebec may include private residences that do not meet the conditions for obtaining a certificate of compliance.

Survey data were obtained through a combination of telephone interviews and fax and e-mail responses. Information was obtained from the residence owner, manager or administrator. Survey results reflect market conditions at the time of the survey. Survey results have been weighted to adjust for non-responses, in order to ensure that they are reflective of the universe. The level of statistical reliability is noted in the data tables. For more information on the reliability of the data, please click [here](#).

All statistics published, excluding information on new market supply, include only those residences that have been in operation for at least one year.

Definitions

Space: A space is a residential area that is rented out. Examples of spaces include one half of a semi-private unit, a private or bachelor unit, a one-bedroom unit and a two-bedroom unit. In most cases, a space is the same as a unit. The exception is the case where a unit has been divided to rent to multiple residents. Semi-private and ward units are an example of this. Unless otherwise indicated, data for spaces are for all unit types.

Standard space: A space where the resident does not receive high-level care (that is, the resident receives less than 1.5 hours of care per day) or is not required to pay an extra amount to receive high-level care. Regional terms for this type of space may vary across the country.

Heavy care space: A space where the resident is paying an extra amount to receive high-level care (1.5 hours or more of care per day). Examples of conditions that could require high-level care include Alzheimer's, dementia and reduced mobility.

Respite space: A space used to provide temporary accommodation for a senior who normally lives in another place and not at the residence.

Non-market or subsidy space: A space where the rent received for the unit is less than market rent or where the resident occupying the unit is subsidized.

Rent: The actual amount a resident pays per month for his or her accommodation space and all mandatory services. For vacant spaces, the rent is the amount the owner is asking for the space.

Vacancy: A space is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Capture rate: The main age group living in seniors' residences are persons aged 75 years and older. Capture rate in a centre is the ratio of the total number of residents living in the survey universe divided by its estimated 75+ population, expressed as a percentage.

Acknowledgement

The Seniors' Housing Survey could not have been conducted without the co-operation of the residence owners and their staff. CMHC acknowledges their time and assistance in providing accurate information. As a result of their contribution, CMHC is able to provide data and analysis that benefits the entire industry.

Confidentiality

All information provided through this survey is kept strictly confidential and only used by CMHC to generate statistics and data sets that do not allow for the identification of individuals, households, businesses or buildings.

CMHC HELPS CANADIANS MEET THEIR HOUSING NEEDS.

Canada Mortgage and Housing Corporation (CMHC) has been helping Canadians meet their housing needs for more than 70 years. As Canada's authority on housing, we contribute to the stability of the housing market and financial system, provide support for Canadians in housing need, and offer unbiased housing research and advice to Canadian governments, consumers and the housing industry. Prudent risk management, strong corporate governance and transparency are cornerstones of our operations.
