

Inventory of Federal Greenhouse Gas Emissions

Fiscal Year 2016 to 2017

The Government of Canada is committed to reducing greenhouse gas emissions from our own operations. Here are the emissions we currently track. In the future, we will share even more information on our emissions.

tonnes of carbon dioxide equivalent

Fiscal year 2016 to 2017 greenhouse gas emissions reported

986,000 tonnes of carbon dioxide equivalent

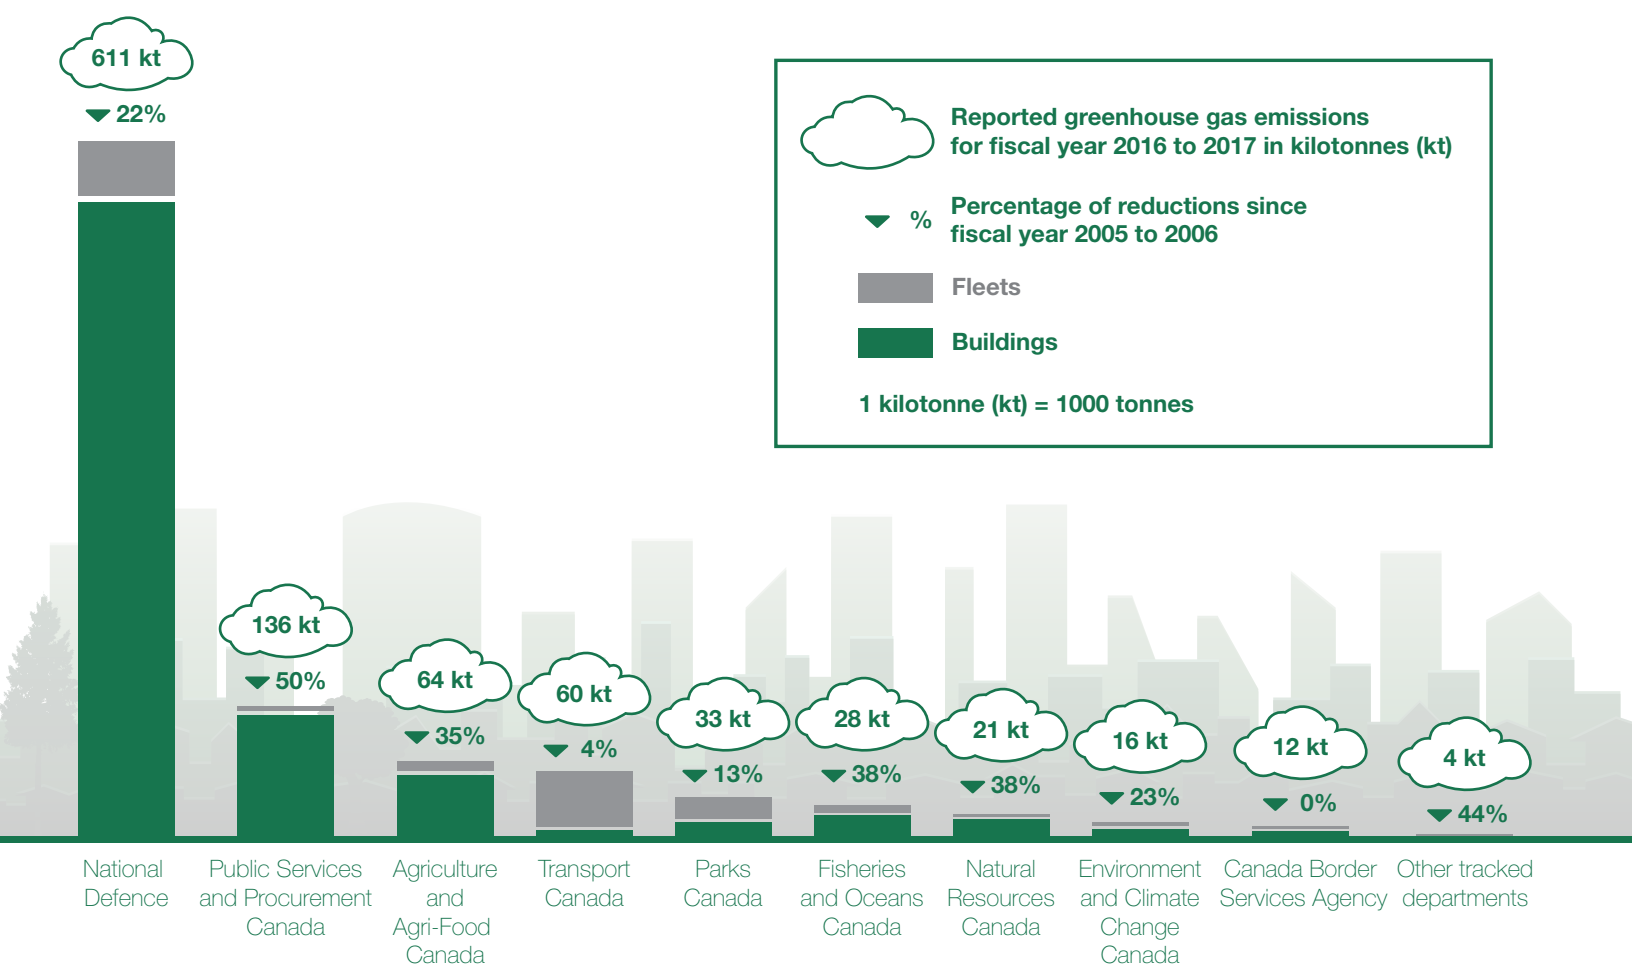

Progress since fiscal year 2005 to 2006

▼ 28%

Buildings generated 88% of federal greenhouse gas emissions reported in the 2016 to 2017 fiscal year

Fleets	Buildings
12%	88%

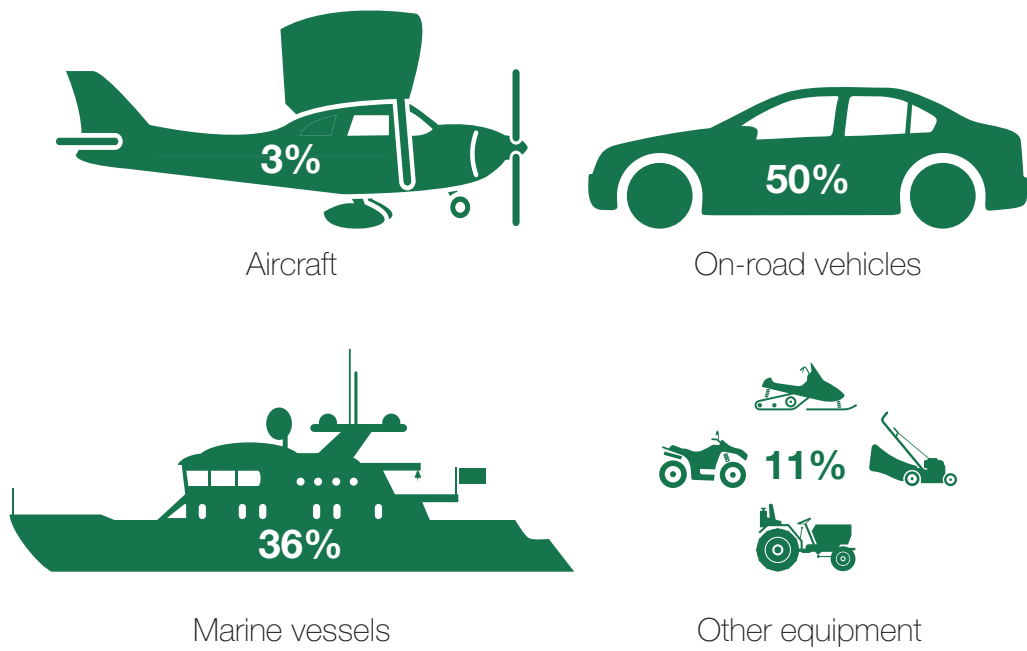

Reported federal greenhouse gas emissions in fiscal year 2016 to 2017 and reductions since 2005

Sources of greenhouse gas emissions reported in the 2016 to 2017 fiscal year

NATURAL GAS 40%
ELECTRICITY 31%
FUEL OIL 15%
DISTRICT ENERGY 6%
GASOLINE 3%
OTHER FUELS 4%

Sources of greenhouse gas emissions from federal fleets reported in the 2016 to 2017 fiscal year

Fiscal year 2016 to 2017 greenhouse gas emissions from purchased electricity by province/territory
