Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in this document.

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.

These tables together constitute the Financial Flow Accounts. Users should refer to the *Guide to the Financial Flow and National Balance Sheet Accounts* (Catalogue no. 13-585E) for a more in-depth explanation of concepts and methods. The statistics in these tables are also available on microcomputer diskettes for \$240 for an annual subscription, or on CANSIM, Statistics Canada's on-line computer database.

To Order

To order, call 613-951-3640 and ask for the client services officer. For information on the content, call the same number and ask for the information officer.

Note

The statistical tables are organized in the form of a matrix for each quarter. Four quarters of financial flow data are presented for each of the sectors in the Financial Flow Accounts.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans ce document.

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.

Ensemble, ces tableaux constituent les comptes des flux financiers. Les utilisateurs peuvent consulter le *Guide des comptes des flux financiers et des comptes du bilan national* (n° 13-585F au catalogue) pour une explication approfondie des concepts et méthodes. Les statistiques dans ces tableaux sont aussi disponibles sur disquette pour micro-ordinateur au prix de 240\$ par an, ou dans la base de données CANSIM de Statistique Canada.

Pour commander

Pour commander, veuillez communiquer avec le responsable des services aux clients au 613-951-3640. Pour plus de renseignements sur le contenu de ce document, veuillez communiquer avec l'agent d'information au même numéro que précédemment.

Note

Les tableaux statistiques sont présentés sous forme de matrice pour chaque trimestre. Les estimations des Comptes des flux financiers sur une base sectorielle sont également incluses et couvrent une période de quatre trimestres.

Concepts, Methodology, Data Quality

The following information should be used to ensure a clear understanding of the basic concepts that define the data provided in this product, of the underlying methodology, and of aspects of data quality. This information will provide users with a better understanding of the strengths and limitations of the data, and how they can be effectively used and analysed.

Concepts and variables measured

The *Financial Flow Accounts* (FFA) are statements of investment activity in the sectors of the economy: the non-financial and financial assets acquired as well as the financial liabilities incurred. The financial account is an extension of the *Income and Expenditure Accounts* (IEA).

The IEA measure aggregate economic activity through income generated from production and through final expenditure on production. This detail plus current transfers are broken down by institutional sector in the income and outlay account (current account) and capital finance account (capital account). These sector accounts are the link to the FFA (accumulation account), which show the transactions based changes in wealth, with emphasis on the financing of economic activity (financial account).

At the core of the FFA, each sector records saving (current income less current expenditure), depreciation, non-financial capital acquisition and transactions in a number of asset-liability financial instruments. In other words, the FFA are a sources and uses of funds statement. Gross savings includes net savings plus capital consumption allowance and miscellaneous valuation adjustments. Subtracting non-financial capital acquisition from Gross savings leaves the net amount each sector borrows or lends during a period. The net amount the sector borrows or lends is equivalent to net financial transactions -- financial assets acquired less the net financial liabilities incurred (net financial investment). Financial transactions are measured on a net basis – that is increases less decreases for each financial instrument.

Sector Accounts and transactions

The FFA is part of the integrated set of quarterly national accounts, and is situated between IEA income-spending and the *National Balance Sheet Account* (NBSA). The FFA account for part of the increase in NBSA wealth, with the other part being largely accounted for by capital gains/losses.

The sector accounts comprise four major sectors of the economy: persons and unincorporated business, corporations, governments and non-residents. The non-resident sector is the detail on Canada's Balance of International Payments. The corporate sector is broken down into a number of sub-sectors with the bulk of this detail comprising the transactions of the financial institutions, reflecting the importance of the financial system in transferring funds from surplus to deficit sectors. The government sector transactions are available by level of

Concepts, méthodologie, qualité des données

Les renseignements qui suivent sont destinés à faciliter la compréhension des concepts de base qui définissent les données fournies par ce produit, de la méthodologie qui les sous-tend ainsi que des aspects liés à la qualité des données. Ils permettront aussi à leurs utilisateurs d'avoir une meilleure compréhension des limites des données ainsi que de la façon de les utiliser et de les analyser à bon escient.

Concepts et variables mesurées

Les Comptes des flux financiers (CFF) retracent l'activité d'investissement dans les secteurs de l'économie : les actifs non financiers et financiers acquis ainsi que les passifs financiers engagés. Le compte financier est un prolongement des Comptes des revenus et des dépenses (CRD).

Les CRD mesurent l'ensemble de l'activité économique d'après les revenus tirés de la production et d'après les dépenses finales au titre de la production. Ces données détaillées ainsi que les transferts courants sont ventilés selon le secteur institutionnel dans le compte des revenus et dépenses (compte courant) et le compte de financement du capital (compte de capital). Ces comptes sectoriels établissent un lien avec les CFF (compte d'accumulation) qui montrent l'évolution de la richesse d'après les opérations, l'accent étant mis sur le financement de l'activité économique (compte financier).

À la base des CFF, chaque secteur inscrit l'épargne (les revenus actuels moins les dépenses actuelles), l'amortissement, l'acquisition de capital non financier et les opérations sur un certain nombre d'instruments financiers d'actif et de passif. Autrement dit, les CFF sont un état des sources et de l'utilisation des fonds. L'épargne brute comprend l'épargne nette plus la provision pour consommation de capital et divers ajustements de valeur. La soustraction de l'acquisition de capital non financier de l'épargne brute donne le montant net de l'emprunt ou du prêt de chaque secteur durant une période donnée. Le montant net de l'emprunt ou du prêt de chaque secteur est égal aux opérations financières nettes — les actifs financiers acquis moins les passifs financiers nets engagés (investissement financier net). Les opérations financières sont mesurées sur une base nette, soit les augmentations moins les diminutions pour chaque instrument financier.

Comptes et opérations sectoriels

Les CFF font partie de la série intégrée des comptes nationaux trimestriels et se situent entre les revenus-dépenses dans les CRD et le Compte du bilan national (CBN). Les CFF représentent une partie de l'augmentation de la richesse selon le CBN, l'autre partie étant dans une large mesure représentée par les gains ou les pertes de capital.

Les comptes sectoriels sont établis pour quatre grands secteurs de l'économie, soit le secteur des particuliers et des entreprises individuelles, le secteur des sociétés, le secteur des administrations publiques et le secteur des non-résidents. La Balance des paiements internationaux du Canada est établie au niveau de détail du secteur des non-résidents. Le secteur des sociétés est ventilé en plusieurs sous-secteurs et la majorité des données détaillées portent sur les opérations des institutions financières, montrant l'importance du système financier dans le transfert de fonds des secteurs

government. In total, there are 30 unique sectors in the FFA. The sectoring of the financial accounts emphasizes intermediation by showing the transactions of a number of financial institutions.

The Financial Market Summary Table

The financial market summary table excludes most of the intermediate borrowing by ignoring funds borrowed by financial institutions to leave summary "ultimate borrowing" of final demand for funds by non-financial sectors.

Coverage

All traditional assets and liabilities are in scope.

Valuation

Data are measured in nominal dollars terms.

Data Sources and Methodology

The FFA measure financial transactions on a quarterly basis and relies heavily on a wealth of information from various areas of Statistics Canada.

Sources

A very large amount of information from various survey divisions within the bureau, along with other data, are compiled, integrated and analysed as part of the process of producing estimates of financial transactions for the Canadian economy.

Major suppliers of data within Statistics Canada include Agriculture Division, Investment and Capital Stock Division, Income Statistics Division, Balance of Payments Division, Industrial Organization and Finance Division, Public Institutions Division. There are also a number of external and administrative sources of data used.

General methodology

Transactions in assets and liabilities, by detailed categories, are compiled for the major sectors of the economy. These transactions are often calculated as changes in the balance sheet levels between periods, with adjustments related to valuations, etc. Data are analysed for time series consistency, links to current economic events, issues arising from the source data, and finally with respect to coherence. Estimates are reconciled with data in the *Income and Expenditure Accounts* and the *National Balance Sheet Accounts*.

For further details on definitions, concepts, sources and methods, please refer to *Financial Flow and National Balance Sheet Accounts – Concepts, Definitions, Sources and Methods*, catalogue no. 13-563E.

excédentaires aux secteurs déficitaires. Les opérations du secteur des administrations publiques sont disponibles selon le palier. Au total, on compte 30 secteurs uniques dans les CFF. La sectorisation des comptes financiers met l'accent sur l'intermédiation en montrant les opérations d'un certain nombre d'institutions financières.

Tableau sommaire du marché financier

Le tableau sommaire du marché financier exclut la plus grande partie de l'emprunt intermédiaire en faisant abstraction des fonds empruntés par les institutions financières de manière à obtenir l'emprunt ultime sommaire au titre de la demande finale de fonds des secteurs non financiers.

Couverture

Tous les actifs et les passifs traditionnels sont couverts.

Évaluation

Les données sont mesurées en dollars nominaux.

Sources de données et méthodologie

Les CFF mesurent les opérations financières sur une base trimestrielle et utilisent une foule de renseignements provenant de divers programmes de Statistique Canada.

Sources

La production d'estimations des opérations financières pour l'économie canadienne exige le rassemblement, l'intégration et l'analyse d'une très grande quantité d'informations provenant de diverses divisions d'enquête du Bureau, ainsi que d'autres données.

À Statistique Canada, les principaux fournisseurs de données comprennent la Division de l'agriculture, la Division de l'investissement et du stock de capital, la Division de la statistique du revenu, la Division de la balance des paiements, la Division de l'organisation et des finances de l'industrie et la Division des institutions publiques. On a également recours à un certain nombre de sources de données externes et administratives.

Méthodologie générale

Les opérations sur les actifs et les passifs, par catégories détaillées, sont établies pour les principaux secteurs de l'économie. Ces opérations sont souvent calculées sous forme de variations d'une période à l'autre dans les niveaux des bilans, et ajustées en fonction des variations de la valeur, etc. Les données sont analysées afin de vérifier l'uniformité des séries chronologiques, d'établir des liens avec les événements économiques courants, de cerner les problèmes découlant des données sources et d'assurer la cohérence. Les estimations sont rapprochées des données des Comptes des revenus et des dépenses et des Comptes du bilan national.

Pour plus de renseignements sur les définitions, les concepts, les sources et les méthodes, veuillez consulter la publication intitulée Guide des comptes des flux financiers et des comptes du bilan national – Concepts, définitions, sources, méthodes, n° 13-563F au catalogue.

Seasonal adjustment

Quarterly FFA data series are largely unadjusted for seasonal variation. However, selected quarterly aggregate data series are available on a seasonally-adjusted basis.

Revisions

Statistical revisions are carried out in order to incorporate the most recent information from quarterly and annual surveys, taxation statistics, public accounts, censuses, etc.

Estimates for each quarter are revised when those for subsequent quarters of the same year are published and when those for the first quarter of each of the next four years are published. They are not normally revised again except when historical revisions are carried out, usually once per decade.

Data quality (accuracy)

No direct measures of the margin of error in the estimates can be calculated. The quality of the estimates can be inferred from analysis of revisions and from a subjective assessment of the data sources and methodology used in the preparation of the estimates.

Comparability of data and related sources

It is not possible to produce an equivalent to the FFA, since no other data releases attempt to measure the flow of funds in the economy. The statement of change in financial position produced in IOFD as part of the Quarterly Financial Statistics of Corporations is similar in concept, but notably quite different in detail (financial instruments, gains and losses, sector coverage), to the FFA. However, certain financial instrument flows are largely comparable with the limited amount of transactions detail published by other agencies such as the Bank of Canada.

Désaisonnalisation

Les séries de données trimestrielles des CFF sont en grande partie brutes. Toutefois, certaines séries de données agrégées trimestrielles sont publiées sur une base désaisonnalisée.

Révisions

Des révisions statistiques sont apportées afin d'intégrer l'information la plus récente tirée des enquêtes trimestrielles et annuelles, des statistiques sur l'impôt, des comptes publics, des recensements, etc.

Les estimations produites pour chaque trimestre sont révisées lorsque celles des trimestres subséquents de la même année sont publiées, puis quand celles du premier trimestre des quatre années suivantes sont publiées. Normalement, elles ne sont plus révisées après cela, sauf quand une révision historique est réalisée, habituellement une fois tous les dix ans.

Qualité des données (exactitude)

Aucune mesure directe de la marge d'erreur dans les estimations ne peut être calculée. Il est toutefois possible d'inférer la qualité des estimations d'après l'analyse des révisions et d'après une évaluation subjective des sources de données et de la méthodologie utilisées pour produire les estimations.

Comparabilité des données et des sources connexes

Il est impossible de produire un équivalent des CFF, puisque aucune autre diffusion de données ne mesure le flux des fonds dans l'économie. L'état de l'évolution de la situation financière produit à la DOFI dans le cadre des statistiques financières trimestrielles des sociétés est semblable quant au concept mais très différent, notamment dans les détails (instruments financiers, gains et pertes, couverture sectorielle), des CFF. Toutefois, certains flux des instruments financiers sont largement comparables avec le nombre limité de détails sur les opérations publiés par d'autres organismes comme la Banque du Canada.
