## INTRODUCTION

Review of the lear 1935
The year 1955 witnessed a sharp recovery from the mild contraction in economic activity which had characterized the period mid-1953 to mid-1954. Output of goods and services, which was beginning to rise in the latter part of 1954, expanded rapidly throughout 1955 , and for the year as a whole was approximately 10 per cent higher than in the full year 1954. The upswing lifted the Gross National Product to $\$ 26.8$ billion in 1955, compared with $\$ 24.3$ billion in the previous year. With final product prices up only slightly, this increase reflected for the most part an expansion in the volume of production, which showed the largest gain of any single post-war year. It may be recalled that in 1954 the volume of output declined by more than 2 per cent while some increases in the labour force and productive capacity were taking place. These developments made possible the very sharp increase in the volume of output in 1955. The increase over the year 1953, which was the previous peak year in terms of volume of production, is estimated to be of the order of 6 per cent.
several mportach zepansionsy factars ues tributed to the $\$ 2.5$ billion growth in output over the course of the year 1955. Of primary importance was the rise in personal expenditure on consumer goods and services, which led the advance in final purchases with a gain of $\$ 1.1$ billion. All segments of consumer outlays showed increases, with a major advance recorded in the durable goods group. It is interesting to note that per capita personal consumption in volume terms was about 12 per cent above the 1949 level in 1955, and that one-third of this increase occurred between 1954 and 1955. Per capita consumption of durable goods was almost 40 per cent above the year 1949. Accompanying this advance in the consumer sector, residential construction outlays showed a sharp rise in 1955, with a gain of $\$ 0.3$ billion or about 25 per cent. This increase reflected both the sharp rise in personal incomes as well as the ready availability of mortgage funds. Consumer outlays and housing expenditures together accounted for more than one-half of the increase in Gross National Expenditure in 1955.

Exports of goods and services, which declined in 1954 , recovered strongly in 1955 , rising by $\$ 0.6$ billion or by 12 per cent. This strength in foreign demand for Canadian goods and services was associated with the marked recovery of business activity in the United States and the rising level of activity in overseas countries. The bulk of the gain in exports was concentrated in wood and wood products, iron and its products, and non-ferrous metals, with declines occurring in the agricultural products groups.

Turning to the investment sector, business outlays for plant, machinery, and equipment absorbed $\$ 0.3$ billion of the $\$ 2.5$ billion increase in total output in 1955. It may be recalled that business investment outlays for new construction and machinery and equipment declined late in 1953 and early in 1954, after which time they remained relatively stable. During 1955, in response to a sharp rise in profits and the growing pressure of demand on existing capital facilities, business investment outlays began to rise and were moving upward
strongly at year end. Imports of machinery and equipment items were especially heavy in the last half of the year. The outlook for 1956 is for a very pronounced increase in all types of investment in durable assets.

Additional expansionary factors in 1955 were government expenditures for goods and services, which rose by $\$ 0.3$ billion, with gains occurring at all three levels; the larger grain crop, which contributed about $\$ 0.3$ billion to the gain in total Gross National Product; and the swing in business inventories from liquidation in 1954 to net accumulation in 1955 , amounting to $\$ 0.5$ billion. Under these various stimuli, Canadian production rose at an uninterrupted pace throughout 1955, although a considerable part of both final and inventory demand was channelled into imports which rose by more than $\$ 0.9$ billion over the year 1954.

These changes in the pattern of final expenditures between 1954 and 1955 are shown in the table below.

|  | 1954 | 1955 | $\begin{gathered} \text { Change } 1954 \\ \text { to } 1955 \end{gathered}$ |

Note: Figures will not add by +.1 or -.1 due to rounding.

During the course of the downturn from mid1953 to mid-1954, all components of demand were declining with the exception of consumer expenditure which continued to rise in response to the small but steady growth of personal income. In the last half of 1954 most of the major segments of demand which had previously been declining had either stabilized or were moving upward again, and during 1955 all of these major demand categories rose at sharply accelerated rates. During the first half of 1955, the increase in final purchases was closely paralleled by the rise in Canadian production, with imports showing only a moderate increase. In the last half of the year, however, imports rose very sharply and a substantial portion of the gain in final purchases as well as the stepped-
up inventory demand were met from foreign sources of supply. Thus, the rise in Canadian production in the last half of 1955 was somewhat smaller than that which occurred earlier in the year. This development reflects the fact that in the latter part of 1955 the Canadian economy was approaching capacity production in some lines and the quarter-toquarter increases in output were accordingly less substantial. Revised quarterly data covering these developments may be found in the report "National Accounts, Income and Expenditure, First Quarter $1956^{\prime \prime}$.

The strength in end-product demand in 1955 was reflected in the expansion of the various industrial sectors, where production increases over 1954
were widely dispersed and substantial in size ${ }^{1}$. Manufacturing production showed an increase of about 7 per cent, with durable goods production up by about 9 per cent and non-durable goods production up by about 6 per cent. Substantial increases occurred in almost all of the manufacturing groups which had been affected by the earlier contraction in activity, including iron and steel products (up 14 per cent), electrical apparatus and supplies (up 12 per cent) and textiles (up 15 per cent). Sharp gains were also recorded in wood products, nonferrous metal products, and non-metallic mineral products. The only major group to show a decline over the year was transportation equipment which was down about 1 per cent in spite of a 29 per cent increase in motor vehicle output. It may be noted that, despite these large gains in the manufacturing sub-groups, certain industries remained below the level of output which they achieved in 1953. Among these groups were clothing and textiles, transportation equipment, and iron and steel products.

THE VOLUME OF PRODUCTION MAJOR INDUSTRIAL GROUPS

Related indicators suggest that in the construction industry, a gain of about 12 per cent occured, reflecting the record year in housing and the recovery of non-residential construction. In the services group taken as a whole, the advance amounted to about 7 per cent in 1955, marking a continuation of a general upward trend in these areas of economic activity. In the primary industries group, a large gain occurred in agriculture, while forestry, public utilities, and mining showed increases ranging from 7 to 16 per cent. Output of

1. The following analysis is based on available indicators of real output (volume of production). The general pattern of these changes is also shown in Table 20, National Incorne Originating by Industry, where the figures given are in value terms.
electric power showed an advance of 10 per cent, while within the mining group, metals, non-metals, and fuels advanced by 11,15 and 28 per cent respectively; these latter gains were partly related to strong foreign demand and the coming into production of new sources of supply.

Accompanying these developments on the production side in 1955, both personal and business incomes continued to expand, reflecting for the most part advances in wages and salaries and in investment income including corporation profits. The successive quarter-to-quarter gains in these two important income categories accounted for the greater part of the enlarged flow of income during the course of the year. Thus, wages and salaries were approximately 7 per cent above the level of the year 1954, while investment income was about 19 per cent higher, with corporation profits rising by about 23 per cent. At the same time, account must be taken of the important increase in net income of farm operators resulting from the substantially higher level of crop production in 1955. National Income as a whole was approximately 10 per cent above the previous year.

The rising tempo of economic activity in 1955 was accompanied by a substantial increase in employment, and a decline in unemployment. At yearend the number of persons with jobs was about 4 per cent higher than in the same period of 1954 , while the number of persons without jobs and seeking work in Canada was almost 20 per cent below the level of December 1954, or 3.6 per cent of the total labour force. The number of persons with jobs in the non-agricultural sector rose by 7 per cent during the period. Average hours worked per week in manufacturing increased during the year by about 1 per cent.

Prices on average were relatively stable during the course of 1955. However, prices of non-agricultural primary materials began to edge upward, more noticeably after mid-year, while agricultural prices continued to decline. In particular, prices of nongrain export products (especially non-ferrous metals) showed increases, and the export price index of goods rose by 2 per cent. As the price of imported goods showed a smaller advance, a slight improvement in Canada's terms of trade took place in 1955. Construction material prices also increased somewhat in 1955, especially in the latter half of the year. The continued decline in agricultural prices in 1955 reflected the large stocks of grains and ample supplies of other agricultural products in Canada and abroad. The wholesale price index rose by 3 per cent during the year, while the consumer price index showed little change.

## COMPONENTS OF GROSS NATIONAL PRODUCT

## Wages, Salaries and Supplementary Labour Income

Labour income rose to nearly $\$ 12.8$ billion in 1955, a gain of about 7 per cent from the level of the preceding year. This increase compares with
a gain of only 2 per cent between 1953 and 1954. The rise in labour income in 1955 was associated with a gain in the number of paid workers amounting to about 5 per cent, and an advance in average weekly earnings in the major non-agricultural industries of about 3 per cent. The gain of 3 per cent in average weekly earnings reflects both an increase in average hours worked per week and in average rates of pay. With average consumer prices remaining relatively unchanged in 1955, the increase in labour income from the previous year represented a further advance in "real" earnings.

The changes in production previously noted were paralleled to a large extent by changes in the industrial components of labour income in 1955. Wages and salaries in construction experienced the largest relative gain, rising by 14 per cent from the 1954 level. The increase in the finance and service industries amounted to approximately 7 per cent, and in manufacturing and the distributive trades, to 6 per cent. The primary industry group showed contrasting movements, with substantial increases occurring in the mining and forestry industries, offset in part by some fall-off of wages and salaries in agriculture and fishing. These variations in rates of advance in 1955 had no appreciable effect on the distribution of income earned by the main industrial groups.

The quarter-to-quarter movement of labour income was continuously upward in 1955, although the rate of growth slowed somewhat after mid-year.

## Investment Income

Investment income amounted to $\$ 4.4$ billion in 1955, an increase of 19 per cent over 1954. Almost three-fourths of the gain in investment income is attributable to a sharp advance in corporation profits, which are estimated to have risen by about 23 per cent over 1954. This is the first increase in corporation profits since 1951, when they rose rapidly in response to the upswing in industrial activity which followed the outbreak of hostilities in Korea. After the 1951 peak, when compration profits amounted to $\$ 2.8$ billion, profits declined on a year-to-year basis. In 1955, profits reached a new peak of $\$ 3.0$ billion. It may be noted that in 1951 .
inventory valuation gains attributable to rising prices accounted for a substantial part of total profits, whereas in 1955 inventory gains of this nature were much more moderate.

Corporation profits in almost all industrial groups contributed to the rise in investment income in 1955. Gains ranged from 10 per cent to 56 per cent with one-half of the industrial groups showing increases of more than 20 per cent; this latter group included mining, up 56 per cent; manufacturing, 27 per cent; transportation, communication and storage, 35 per cent, and wholesale and retail trade, 25 per cent and 26 per cent respectively.

All other elements of investment income showed gains in 1955. Interest and net rental receipts of persons rose by about 10 per cent, reflecting increases in average rents, the growth in the number of housing units, and higher deposit interest paid by banks. Government investment income also showed an increase of 10 per cent, associated in large part with higher profits of government business enterprises. It may be noted that dividends received by individuals rose much less shamly than corporation profits in 1955, so that retained earnings of corporations were correspondingly higher.

## Net Income of Unincomporated Business

Accrued net income of farm operators from farm production in 1955 amounted to $\$ 1.4$ billion, compared with $\$ 1.1$ billion in the previous year. This increase is entirely attributable to the higher value of crop production. It may be noted, however, that a large proportion of the total grain crop went into inventory accumulation in 1955 and much of the increase in production is represented by net additions to farm stocks of grain. Farm cask income declined slightly in 1955, with increased returns from wheat, flax, potatoes, and cattle being more than offset by lower returns from oats, barley, rye and hogs.

The following table shows the consolidated operating account for farm operators for the years 1954 and 1955.

|  | 1954 | 1955 | Change <br> over 1954 |
| :--- | ---: | ---: | ---: | ---: | ---: |

Net income of other unincorporated business acvanced by about 8 per cent in 1955, to a level of $\$ 1.8$ billion. This rise was concentrated in construction and retail trade, with the former reflecting a higher volume of residential housing construction.

## Indirect Taxes Less Subsidies

Indirect taxes less subsidies amounted to $\$ 3.2$ billion in 1955, an increase of 9 per cent over 1954. At the federal level, the increase in indirect taxes amounted to 8 per cent, reflecting for the most part gains in customs import duties and in federal excise taxes and excise duties. The largest single increase occurred in customs import duties which rose by 17 per cent, responding to the sharp rise in merchandise imports of 16 per cent. Excise taxes and excise duties increased by 6 and 8 per cent respectively, reflecting a marked increase over the previous year in shipments of goods subject to these two types of taxes.

Provincial indirect taxes were higher by 12 per cent in 1955. Increased expenditures by consumers were mirrored in higher collections of general retail sales and gasoline sales taxes at the provincial level, while higher activity in the extractive industries such as mining and forestry contributed to an increase in public domain revenues. The increase of approximately 7 per cent in municipal indirect taxes in 1955 can be ascribed mainly
to higher real estate and personal property taxes, which continued to move upward as investment in residential and non-residential construction increased.

## Depreciation Allowances and Similar Business Costs

Depreciation allowances and similar business costs increased by 7 per cent in 1955 to reach a total of $\$ 2.9$ billion. Almost all of the increase was due to higher corporation capital cost allowances, mining development write-offs and depreciation charges for residential and non-residential real estate. It may be noted that corporate depreciatir estimates for the years 1954 and 1955 have been revised upward in the light of recent information on the effect of changes in income tax regulations with respect to capital cost allowances introduced in 1954.

## COMPONENTS OF GROSS NATIONAL EXPENDITURE

## Personal Expenditure on Consumer Goods and Services

As in 1954, the major expansionary force in the economy in 1955 was personal expenditure on consumer goods and services, which rose by almost 7 per cent over the previous year, to $\$ 16.9$

billion. The increase was associated with a sharp rise in the level of personal income, which showed the largest per capita gain in real terms of the postwar period. The rise in durable goods purchases in 1955 was especially marked, with a gain of about 12 per cent, while non-durable goods purchases and outlays for services showed gains of 5 and 7 per cent respectively. Non-durable goods purchases accounted for about one-half of the total gain in consumer outlays, although in percentage terms the increase was less than half as great as that for durable goods purchases. While there were marked shifts in the composition of consumer prices in 1955, on average they showed little change, so that the volume increase in total consumer expenditure paralleled the value increase of 7 per cent.

In the durable goods group, some of the more striking increases in 1955 occurred in the following items: new passenger cars, unit sales of which were up by 25 per cent over last year (the gain from the first to second quarter was particularly noteworthy); refrigerators, shipments of which were up by 14 per cent; washing machines, shipments of which were up by 25 per cent; and television sets, shipments of which were up by 22 per cent. Sales of furniture and appliance stores showed major gains in 1955. Prices of durable goods in 1955 were about 5 per cent below the average for the year 1954, so that the volume gain in durable goods purchases
amounted to about 18 per cent, compared with the value gain of 12 per cent. The advance in total durable goods sales over a year ago was accompanied by an increase in instalment credit outstanding; the most recent figures for December 1955 indicate a rise of 20 per cent over December 1954. In the same period, personal disposable income had risen by about 8 per cent. Total consumer credit outstanding (including cash personal loans) was up 19 per cent in the year-end comparison.

The major gain in non-durable goods purchases in 1955 was in the food component, which rose by 5 per cent. In contrast to 1954, when purchases of clothing declined, there was a modest gain in this item in 1955. Gains in other sub-components of the non-durable goods group were widespread in 1955. With prices of non-durable goods relatively stable, the volume gain in non-durable expenditure in 1955 was approximately the same as the value increase of 6 per cent.

Consumer outlays for services continued to move upward in 1955. The advance was accompanied by a price increase, so that the volume of consumer services in 1955 was somewhat less than the value increase. This gain reflects to a substantial degree the increase in outlays for residential rents.

## Value and Volume Percentage Changes in Gross National Expenditure Components,

 from 1954 to 1955|  | Value | Volume |
| :---: | :---: | :---: |
|  | $\%$ | $\%$ |
| Personal Expenditure on Consumer Goods and Services | + 7 | + 7 |
| Non Durable Goods. | + 5 | + 6 |
| Durable Goods.. | +12 | +18 |
| Services ............................................................................................................. | + 7 | + 5 |
| Government Expenditure on Goods and Services .................................................... | + 7 | + 4 |
| New Residential Construction | +27 | +23 |
| New Non-Residential Construction | + 7 | + 4 |
| Machinery and Equipment ......................................................................................... | +10 | + 7 |
| Exports of Goods and Services | +12 | + 7 |
| Imports of Goods and Services | +15 | $+13$ |
| Grose National Expenditure | +10 | + |

## Government Expenditure on Goods and Services

Purchases of goods and services by all levels of government (federal, provincial and municipal) amounted to $\$ 4.7$ billion in 1955. 7 per cent above the 1954 level. The increase over 1954 reflected gains in federal and provincial capital investment outlays, the expansion of municipal facilities associated with the high level of house building activity, higher outlays for salaries and wages, and slightly higher defence expenditures. Defence outlays did not constitute a major expansionary influence in 1955, but continued to provide an important sustaining element.

## Gross Domestic Investment (excluding Change in Inventories)

Gross domestic investment in fixed durable assets reached an all time peak of $\$ 5.3$ billion in

1955, increasing by 13 per cent over 1954. This gain provided an important stimulus to final demand in 1955, in contrast to 1954 when declines occurred in non-residential construction and investment in machinery and equipment. The year-end level of gross domestic investment was at a seasonally adjusted annual rate approximately 9 per cent above the 1955 yearly average. The year-to-year increase over 1954 was spread among the three major groups - housing, non-residential construction, and new machinery and equipment. Of these groups, the advance in housing contributed about one-half of the total gain; new investment in machinery and equipment accounted for less than one-third, and non-residential construction provided the remainder of the increase.

The rise in construction activity was matched by increased employment in the construction industry as measured by the labour force survey. For

1955 as a whole, total construction employment was 10 per cent above the 1954 average, while in the fourth quarter of 1955 , the gain was 13 per cent over the corresponding period of the previous year. Slightly higher prices for construction materials and an increase in wage rates accompanied these developments in 1955.

Towards the end of 1955 the supply of certain building materials, such as cement and steel was becoming rather tight, though the shortage did not appear to have held back the investment programme to any appreciable extent.

A variety of influences was responsible for the increase in investment in 1955. In the field of housing construction, the larger supply of mortgage funds made available by the banking system, along with a rising level of personal disposable income, made possible a striking gain in the number of housing units built. For the year 1955, 138,000 units were started, and 128,000 units were completed, representing gains of 22 per cent and 25 per cent, respectively, over the preceding year. At year end, there were approximately 80,000 housing units still under construction. The value of housing construction in 1955 was estimated at $\$ 1,476$ million, up 27 per cent from 1954.

The influences affecting investment in nonresidential construction and machinery and equipment were somewhat different from those affecting

housing. The downturn in late 1953 and early 1954 made available excess capacity in some portions of the economy, and this slack was gradually utilized as the recovery gained ground. As 1955 progressed, the expansion began to press upon existing capacity, and plant and equipment investment programmes were shamly increased to meet present and anticipated demand.

This additional investment was concentrated in those industries which responded to external as well as domestic demands. Large increases in exports of industrial minerals and wood products wero accompanied by increased investment in those industries. As well, some further expansion took place in fuel and power industries, to meet growing demands for energy. At the same time, the substantial increase in profits in 1955 likely added both a stimulus to increased investment, and aided in the financing of this investment.

New non-residential construction was valued at $\$ 1,775$ million in 1955 , up 7 per cent from the preceding year. However, the pickup did not appear strongly until the last half of the year.

Investment in new machinery and equipment amounted to $\$ 2,017$ million in 1955 , up 10 per cent from 1954, although still slightly below the 1953 peak year.

Most of the increase in machinery and equipment investment in 1955 was met through larger imports, which rose sharply over the previous year. Major gains were recorded in imports of non-farm machinery (up 17 per cent), farm implements and machinery (up 25 per cent), aircraft and parts (up 38 per cent), and engines and boilers (up 20 per cent).

## Investment in Inventory

Total inventory investment amounted to \$508 million in 1955 , compared with a liquidation of $\$ 270$ million in the previous year. This swing in inventory investment of $\$ 778$ million made a substantial contribution to the higher level of Gross National Product in 1955. The turn-around was partly a reflection of the larger grain crop in 1955, and partly a reflection of the pronounced up-swing in final demand which appeared to require a higher level of business inventory holdings to maintain adequate working stocks at a time when stock-sales ratios were falling. It should be noted, however, that certain industrial and wholesale prices were rising in 1955 and that about one-half of the value swing in business inventories can be accounted for by these price factors. In terms of volume change, the shift in total inventories from liquidation in 1954 to accumulation in 1955 amounted to more than onethird of the real increase in Gross National Product; the shift in the volume of business inventories alone accounted for about one tenth of the overall volume increase.

The major part of the business inventory build$u p$ in 1955 occurred in manufacturing and in wholesale and retail trade. The manufacturing sector had experienced a marked liquidation of inventory in 1954, and it accounted for the largest share of the tum-around in business inventories between 1954 and 1955.

The higher level of stocks at the manufacturing and trade levels during 1955 did not, in general, appear to be excessive in the light of the rapid expansion in the volume of trade to be serviced by them. Stock-sales ratios at the manufacturing, wholesale and retail levels were somewhat lower throughout the year then during 1954. Moreover, the valuation of inventories at the end of 1955 was affected by a slight rise in their average price throughout 1955 so that the increase in physical stocks, on the whole, was less than these dollarvalue comparisons indicate.

The accumulation of business inventories in 1955, amounting to $\$ 317$ million, took place at different rates througho ut the year. In the first quarter, there was a very substantial build-up, reflecting in large part the accumulation of automobile inventories at the factory level. In the second and third quarters, final purchases of goods were increasing sharply, and additions to inventories were moderate. By the fourth quarter of the year, while final purchases continued to expand, the combined supply of goods coming from domestic production and the high rate of imports in the latter part of the year was sufficient to add substantially to business stocks, on a seasonally adjusted basis. This accumulation in the fourth quarter was spread fairly generally throughout the industrial groups, with increases occurring (after allowing for seasonal variation) in motor vehicles, parts and accessories, iron and steel products, electrical apparatus and supplies, clothing, paper products and in a wide range of other commodities. A large proportion of this increase took place at the manufacturing level, with further additions to stocks being made at the wholesale level. Retail sales in general appeared to keep pace approximately with the flow of goods entering retail channels, with the result that, in the fourth quarter, little or no net additions to stock were made at this level, after allowance for seasonal factors.

## Exports and Imports of Goods and Services ${ }^{1}$

Responding to the recovery of industrial activity in the United States, strong overseas demand for Canadian goods, a rising level of Canadian production, and higher consumer and investment outlays, exports and imports of goods and services rose to new record levels in 1955. The gain in exports amounted to 12 per cent, and in imports, to 15 per cent, bringing the annual levels to $\$ 5.8$ and

1. For a fuller discussion see "Quarterly Estimates of the Clanadian Balance of International Payments, Fourth Quarter, 1955 and Preliminary Estimates, Calendar Year 1955" (Balance of Payments Section, D.B.S.).
$\$ 6.4$ billion respectively. These advances in exports and imports of goods and services were mainly attributable to a sharp recovery in commodity trade in 1955, following the declines of the previous year. However, payments and receipts on invisible items were also up sharply in 1955.

In the export group, gains in forest products, minerals, metals and chemicals were especially noteworthy. Sharp increases occurred in exports of iron ore, chemicals, and crude petroleum made possible by new industrial capacity in Labrador and Western Canada. Gains in wood and wood products, and non-ferrous metals were of particular sigmificance in the total export increase, the latter group reflecting to a large extent higher prices. Substantial increases in domestic production in mining, forestry and manufacturing of wood products accompanied these developments. The sharp advances in the commodity exports noted above more than offset a decline in shipments of grain and in some types of manufactured products in 1955. Receipts from the sale of services to non-residents rose in 1955 with increased revenue from tourist expenditures, freight and shipping, and interest and dividends accounting for most of the gain.

Even more striking than the gain in exports in 1955 was the sharp advance in commodity imports, particularly in the latter half of the year. The major part of the increase in imports was from United States sources, and in the third and fourth quarters of 1955 imports from that country were 26 per cent and 28 per cent, respectively, above the same period of 1954. While the increase in imports was widespread, the major gains occurred in metal products including primary steel, industrial machinery and equipment, automobiles and parts, aircralt, electrical apparatus, and other kinds of hard goods. These increases were related to the recovery of investment in plant and equipment and consumer outlays for durable goods in 1955. Imports of textile materials and products also rose sharply in 1955. associated with a pick-up in clothing and textile production, and higher consumer expenditure on clothing. Payments to non-residents for services increased in 1955 with the main gains occurring in tourist and travel expenditures, freight and shipping payments (associated with the higher volume of commodity imports), and interest and dividend outlays.

With imports rising relatively more rapidiy than Canadian production, foreign sources of supply provided a somewhat larger proportion of the goods and services available to Canadians in 1955, especially in the latter half of the year.

Export prices of goods and services in 1955 were about 3 per cent higher than in 1954, while import prices rose less than 2 per cent. Thus a slight improvement occurred in Canada's terms of trade with other countries. The deficit on current account in 1955 was $\$ 677$ million (on the National Accounts basis) compared with a deficit of $\$ 427$ million in 1954. The greater part of the increase in the deficit in 1955 was attributable to transactions on commodity account.

## Personal Income, Expenditure and Saving

Personal Income amounted to $\$ 19.7$ billion in 1955, a gain of 8 per cent over the previous year. This was somewhat less than the gain in National Income, which rose by 10 per cent. The difference in these magnitudes was mainly a reflection of the fact that corporation profits, included in National Income, rose much more sharply in 1955 than dividend payments to Canadians. It may be recalled that in 1954, Personal Income showed a small advance in the face of a decline in National Income. This difference was again partly a reflection of the relatively greater stability of dividend payments. which continued to be maintained at a time when profits were declining.

All components of Personal Income were higher in 1955. Of the $\$ 1.5$ billion increase over the previous year, $\$ 0.8$ billion was due to higher wages and salaries, $\$ 0.2$ billion to higher farm income, and the balance to gains in government transfer payments, interest, dividends and net rental income, and net income of non-farm unincorporated business. "Real" personal income per capita showed the sharpest advance in 1955 of any year in the postwar period.

Turning to the expenditure side, personal expenditure on consumer goods and services rose by 7 per cent in 1955, with durable goods purchases showing a major advance of about 12 per cent;
about half of the increase in total consumer outlays occurred in non-durable goods purchases, although the percentage rise in this component was only half as sharp as in the durable group. Personal direct tax collections were about 3 per cent higher in 1955 than in 1954, reflecting for the most part a sharp increase in succession duty collections. Personal income tax collections were level with the preceding year, reflecting mainly the interaction of a higher level of personal income in 1955 and a reduction of the personal income tax rate effective from mid-year.

Personal savingl in 1955 amounted to $\$ 1.3$ billion compared with $\$ 1.0$ billion in 1954 . The rise in saving over the preceding year reflected for the most part the higher grain crop in 1955, with the shift in farm inventories accounting for $\$ 0.3$ billion. As a percentage of Personal Income, personal saving was 6.7 per cent in 1955 compared with 5.3 per cent in 1954. Excluding the change in farm inventories, the ratios were 5.6 per cent in 1955 and 5.9 per cent in 1954.

## National Saving and Investment

Gross national saving rose by 26 per cent in 1955 from approximately $\$ 4.1$ billion in 1954 to $\$ 5.1$ billion. This increase was attributable to higher levels of personal and business saving, which contributed $\$ 0.3$ billion and $\$ 0.5$ billion respectively to the total gain of $\$ 1.0$ billion, and to a shift in the consolidated government account from a deficit to a surplus position, which contributed an additional $\$ 0.2$ billion. National saving was 19 per cent of gross national product in 1955 compared with 17 per cent in 1954 and 20 per cent in 1953.

These changes in the level and the composition of the nation's total saving in 1955 require further elaboration in two respects. First, personal saving includes changes in farm stocks, and the major part of the rise in personal saving in 1955 can be traced to the shift in this item from depletions in 1954 to net additions in 1955, a reflection of the larger grain crop in the latter year. Second, the government surplus as adjusted for national accounts purposes includes the excess of corporation tax ac-

1. It should be noted that personal saving as computed in the National Accounts is a residual Item being the difference between personal disposable income and personal expenditure on consumer goods and services. A direct computation of personal saving on the National Accounts basis would involve the summation of many items, including the changes in bank deposits of individuais, personal purchases of bonds, the savings portion of life insurance premiums, repayment of debt (including residential mortgages), and that part of the net income of individual enterprisers (such as farmers, doctors, and small retallers) which takes the form of net new investmont in durable assets or additions to inventories. From the foregoing, it will be apparent that a considerable part of the personal saving figure is represented by assets which are not in liquid form.

cruals over collections, and in 1955 these amounted to more than $\$ 200$ million. Since the funds represented by these tax liabilities remained in the hands of the business sector in 1955, there was no net withdrawal of funds from the private to the

Despite the sharply increased level of the nation's saving in 1955, the amount available was nevertheless insufficient to support the expanded programme of capital investment in housing, plant, machinery and equipment, and inventories. Thus, while national saving was at a rate of $\$ 5.1$ billion. the total domestic investment programme including
government sector as a result of the current account transactions of government. In other words, the government surplus in 1955 exercised a more or less neutral effect on the flow of incomes and expenditures.

DISPOSITION OF NATIONAL SAVING

inventories amounted to $\$ 5.8$ billion. The short fall in the nation's saving was met again by drawing upon foreign resources, and the deficit on current account in 1955 amounted to $\$ 677$ million, an increase of $\$ 250$ million over the deficit sustained in 1954.

1. Since National Income excludes transfer payments and Personal Income includes them, items 2 and 3 are added back here. However, charitable contributions from corporations are not added since they are included in National Income. 2. This Item includes: undistributed corporation profits, corporation profits taxes, withholding taxes, government investment income, adjustment on grain transactions, and employer and employee contributions to social insurance and government pension funds.

## Section 1

INCOME AND EXPENDITURE ACCOUNTS
B. Analysis of Income and Expenditure Accounts by Sectors of the Canadian Economy

TABLE 6. Personal Income and Expenditure Account, 1950-1955
income

| No. |  | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | (millions of dollars) |  |  |  |  |  |
| 1 | Wages, Salaries and Supplementary Labour Income: <br> (a) From business (27a) | 7. 162 | 8,371 | 9, 327 | 10,024 | 10,120 | 10,780 |
|  | (b) From governments (19bi) | 933 | 1.093 | 1,261 | 1.377 | 1,524 | 1,665 |

| 16 | Employer and employee contributions to social insurance and government pension funds (1d) | 256 | 329 | 358 | 390 | 396 | 420 |
| 17 | Deficit (+) or Surplus ( - ) (on transactions relating to the National Accounts $)^{2}$ (50). | - 648 | -1,053 | - 288 | - 223 | 49 | - 109 |
| 18 | Total ${ }^{3}$.............................................................................. | 3,864 | 4,853 | 6,172 | 6,451 | 6,670 | 7,071 |

1. See also Table 33.
2. For a reconciliation of the federal content of this consolidated surplus (or deficit) with the conventional federal budgetary surplus (or deficit), see Table 53.
3. It will be noted that in addition to total revenue, this item includes the government deficit or surplus. Intergovernmental transfers are not included in this total, since in the consolidation of the government sector such transactions cancel out.

TABLE 9. Government Revenue and Expenditure Account, 1950-1955 ${ }^{\text {² }}$ Expenditure

1. See also Table 34.
2. See line 2, Table 2.

- Includes $\$ 65$ million pryment to farmers on account of the United Kingdom Wheat Agreement.

3. Inter-governmental transfers are not included in this total, since in the consolidation of the government sector such transactions cancel out.

TABLE 10. Business Operating Account, 1950-1955
Revenue

1. See footnote 2, Table 2.
2. See footnote 3, Table 2.
3. See footnote 2, Table 12.

TABLE 11. Business Operating Account, 1950-1955
Expenditure

1. See footnote 1 , Table 6.
2. This item includes the undistributed earnings of the Canadian Wheat Board, and an inventory valuation adjustment for grain in Wheat Board channels, on a calendar year basis. See footnote 4, Table 52.
3. For total corporation profits, see footnote 1, Table 14. See also Table 48.
4. See footnote 2 , Table 12.
*. Includes $\$ 65$ million payment to farmers on account of the United Kingdom Wheat Agreement.

TABLE 12. Non-Residents' Revenue and Expenditure Account, 1950-1955 ${ }^{1}$
Receipts from Canada
(Canadian Imports)

| 47 | Total | 4,072 | 4,542 | 4,643 | 4,675 | 4,613 | 5,361 |

1. This adjustment applies only to grain in commercial channels other than the Canadian Wheat goard. An inventory valuation adjustment for grain held by this agency is included with "adjustment on grain transactions" (see item 27 d , Table 11).
2. See footnote 2, Table 12.

TABLE 16. National Saving and Investnent Account, 1950-1955 Saving

| No. |  | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | (millions of dollars) |  |  |  |  |  |
| 48 | Personal Saving (9) | 645 | 1,390 | 1, 525 | 1,588 | 965 | 1. 312 |
| 49 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | (b) Depreciation allowances and similar business costs (28c). | 1.636 | 1,910 | 2,120 | 2,418 | 2,673 | 2,865 |
|  | (c) Net bad debt losses of corporation ${ }^{1}$ (5c) ..................... | - 23 | - 25 | - 25 | - 25 | - 26 | - 26 |
|  | (d) Adjustment on grain transactions (27d). | 101 | - 36 | - 31 | - 5 | - 4 | 22 |
|  | (e) Inventory valuation adjustment (n.e.1.) ${ }^{(45 h)} \ldots \ldots \ldots . . . . . . . .$. | - 2 | - 3 | 5 | 5 | - | - 1 |
| 50 | Government Surplus ( + ) or Deficit ( - ) (17).............................. | 648 | 1,053 | 288 | 223 | - 49 | 109 |
| 51 | Residual Error of Estimate | - 1 | - 52 | 95 | 15 | - 107 | - 43 |
| 52 | Total | 3,848 | 4,958 | 4,644 | 4,973 | 4,076 | 5,143 |

1. Since these are included in both personal saving (item 48) and depreciation allowances and similarbusiness costs (49b), they are deducted here to avoid double counting.
2. Portion not included in "adjustment on grain transactions" (see footnote 1, Table 15).

TABLE 17. National Saving and Investment Account, 1950-1955 Investment

1. See footnote 3, Table 2. For reconcliation with "private and public investment" figures published by the Department of Trade and Commerce, see Table 54.

2 See footnote 1. Table 12.
3. See footnote 2 , Table 12.

| 14 | Total ................................................................................... | 3,216 | 3,810 | 4,256 | 4,840 | 4,666 | 5,268 |

1. This table is derived from "Private and Public Investment in Canada, Outlook 1956 " and similar reports for prior years (Department of Trade and Commerce). Additional detail has been provided by the D.B.S. General Assignments Division, and adjustments have been made to bring the data into line with National Accounting concepts. See reconciliation statement, Table 54.
2. Excludes investment expenditures by the Canadian Broadcasting Corporation, which are included in "Government Expenditure on Goods and Services".
3. Includes all new residential construction, (exclusive of government other than government business enterprises). See Table 2, Line 3.
4. Excludes government departmental expenditures, provincial hospital and school, and municipal school expenditures, which are included with "Government Expenditure on Goods and Services". Investment expenditures of government business enterprises (railways, power commissions, etc.) are included under appropriate industry headings.
5. The 1955 total has been revised upward from that shown in "Private and Public Investment in Canada, Outlook $1956^{\prime \prime}$ to take account of later available information. The entire adjustment is in the non-government machinery and equipment itera.

1. Geographical distributions of the main components only of personal income are given in Tables 29 to 32 inclusive: these tables, therefore, do not add to the total of personal income.
2. Includes Yukon and North West Tertitories. In 1953 personal income of the Yukon and North West Territories was approximately $\$ 18$ million.
3. Includes receipts of income of Canadians temporarily abroad, including pay and allowances of Canadian armed forces abroad.

| 13 | Percentage Change from previous Year ..................................... | +6.3\% | + $5.9 \%$ | +6.8\% | $+3.8 \%$ | - $2.4 \%$ | +8.7\% |

1. The price indexes from 1950 to 1955 , as shown in Table 4 , were converted to a 1935-1939 base using 1949 as the year of overlap between old and new series. They were then divided into the current dollar figures of Table 2 , to give the constant (1935-1939) dollar series shown above. This procedure was followed in the case of Gross National Expenditure, line 12 , as well as the major components. It may be noted that this procedure yields year-to-year movements in the constant dollar series which are identical with those shown in Table 3. However, a small residual difference, produced by the change in the major group weighting pattern, is entered to make the components add up to the Gross National Expenditure in constant (1935-1939) dollars as determined in this way.

Section 6
RECONCILIATION STATEMENTS

TABLE 52. Accrued Net Income of Farm Operators from Farm Production, 1950-1955
Reconciliation Statement

| No. |  | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | (millions of dollars) |  |  |  |  |  |
| 1 | Net lncome of Farm Operators from Farming Operations ${ }^{1}$...... | 1,452 | 2,159 | 1,929 | 1, 701 | 1,194 | 1,458 |
| 2 | Deduct: Amounts Included in Investment Income ${ }^{2}$ | - 36 | - 41 | - 42 | - 42 | - 41 | - 43 |
| 3 | Deduct: Transfer Payments under Prairie Farm Assistance Act ${ }^{3}$ | - 14 | - 10 | - 5 | - 2 | - 2 | - 33 |
| 4 | Equals: Net lncome Received by Farm Operators From Farm Production. | 1.402 | 2,108 | 1,882 | 1,657 | 1.151 | 1,382 |
| 5 | Adjustment on grain transactions ${ }^{4}$........................................ | 101 | - 36 | - 31 | - 5 | - 4 | 22 |
| 6 | Accrued Net Income of Farm Operators fron Farm Production ${ }^{5}$ | 1.503 | 2,072 | 1,851 | 1,632 | 1.147 | 1,404 |

1. These figures are as published by the Agriculture Division, Dominion Bureau of Statistics, with the exception that provisional-estimates for Newfoundland are included.
2. This item includes corporation profits in agriculture and imputed net rent of owner-occupied houses.
3. These items are deducted since transfer payments are excluded from "Net National Income at Factor Cost".
4. Since the National Income purports to measure earnings out of current production rather than receipts of incorne, it is appropriate to include in Table 1 income accruing to farmoperators from farm production rather than income received. Accordingly, an adjustment, consisting of two parts, is made. The first part takes account of the undistributed earnings of the Canadian Wheat Board. The second part of the adjustment allows for the fact that current earnings of this agency are calculated on the basis of the change in book values of inventories, whereas the renuired valuation of inventories for the National Accounts is the value of the physical change. All the figures are on a calendar year basis.
5. D. See also Table 1.

TA3LE 53. Federal Government Surplus or Deficit, 1950-1955
Reconciliation Statement

| No. |  | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | (millions of dollars) |  |  |  |  |  |
| 1 | Surplus or deficit as per Public Accounts 1949-50. 1950-51, 1951-52, 1952-53, 1953-54, 1954-55 (fiscal years ended March 31) ${ }^{1}$ | $\begin{array}{r} -134 \\ 1122 \end{array}$ | 211 |  |  | 46 | 52 |
| 2 | Difference between fiscal and calendar year.......................... |  | 300 | 367 | 24 | 195 | 11 |
| 3 | Extra-budgetary receipts, pension and social insurance funds | 186 | 252 | 437 | 548 | 573 | 615 |
| 4 | Excess of corporation tax accruals over collections | 140 | 161 | 45 | 97 | 7 | 216 |
| 5 | Revenue items omitted | - 73 | - 67 | 49 | 92 | - 79 | 45 |
| 6 | Extra-budgetary expenditures, pension and social insurance funds | - 130 | - 108 | 464 | 520 | -618 | 653 |
| 7 | Reserves, write-offs and similar items charged to expenditure | 130 | 167 | 195 | 139 | 142 | 108 |
| 8 | Change in inventories of government commodity agencies ...... | 19 | 16 | - 72 | 24 | 4 | 5 |
| 9 | Shipment of previously produced military equipment to N.A. T.O. (less expenditures of Defence Louipment Replacement Account) | 57 | 70 | 95 | 55 | 5 | 2 |
| 10 | Other adjustments ${ }^{2}$ | 58 | 40 | 188 | 86 | 63 | 80 |
| 11 | Surplus or deficit as per National Accounts (calendar years ended December 31). | 640 | 1,042 | 256 | 143 | 68 | 173 |

1. It should be noted that the Public Accounts fiscal year figures include only three nonths of the calendar year in which the fiscal year ends. For example, fiscal year 1951-52 includes only January to pharch 1952, the balance of the fiscal year being in the calendar year 1951. An adjustment is therefore necessary to the fiscal figures to exclude the nine months which apply to the calendar year 1951, and to include the nine months of the calendar year 1952 not covered by the 1951-52 fiscal year. This adjustment is made on the basis of published statements of the Comntroller of the Treasury.
2. Includes adjustment in 1952 and subsequent years to convert interest on the public debt from an accrual to a "due date" basis, in order to retain comparability with the historical series.

## 「MBLE 54. Gross Domestic Investment (excluding Inventories), 1950-1955

Reconciliation Statement

| ivo |  | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 |

| 9 |  | 1,389 | 1,769 | 1,916 | 2,073 | 1.841 | 2,017 |

1. As presented in the publications "Private and Public Investment in Canada, Outlook, 1956" and similar reports for prior years. (Department of Trade and Commerce).
2. Excluding residential construction under Veterans' Land Act, construction of veterans' rental housing by Central Mortgage and Housing Corporation, and joint Federaj-Provincial housing (Section 46, N.H.A.).
3. Included in "Government Expenditure on Goods and Services" , line 2. Table 2.
4. See also lines 3, 4 and 5, Table 2.
5. The 1955 total has been revised upward from that shown in "Private and Public Investment in Canada, Outlook $1956^{\prime \prime}$ to take account of later available information. The entire adjustment is in the non-government machinery and equipment item.

1. Data sources are reports on the "Canadian Balance of International Payments" (Balance of Payments Section, Dominion Bureau of Statistics). Figures exclude Mutual iid to N.A.T.O. Countries.
2. Migrants' funds and inheritances.
3. See also Table 2.

## APPENDIX A

## TABLE I. Population of Canada by Provinces, 1950-1955

Estimated as of June 1 for Intercensal Years

1. In Tables 27 to 32 (Georgaphical Distribution of Personal Income), figures for the Yukon and Northwest Territories are included with British Columbia. Per capita estimates of personal income for British Columbla therefore renuire that a similar adjustment be made to the population data.

TABLE II. The Civilian Laiour Force, 1950-1955
Annual Averages ${ }^{1}$

|  | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | (in thousands) |  |  |  |  |  |
| Civilian Non-Institutional Population, 14 years of age and over.. | 9.513 | 9,726 | 9,946 | 10,144 | 10,300 | 10.529 |
| Civilian labour force: |  |  |  |  |  |  |
| Persons with jobs: |  |  |  |  |  |  |
| Non-agricultural ..................................................................... | 3.935 | 4, 171 | 4. 295 | 4,388 | 4,320 | 4.510 |
| Agricultural. | 1,007 | 940 | 891 | 858 | 873 | 818 |
| Total Persons with Jobs. | 4,942 | 5,111 | 5,186 | 5. 246 | 5,193 | 5,328 |
| Persons without Jobs and seeking work................................................ | 164 | 106 | 129 | 137 | 232 | 230 |
| Total Civillan Labour Force ${ }^{2}$.............................................................. | 5,106 | 5.217 | 5,315 | 5,383 | 5,423 | 5,558 |

1. Average of the quarterly labour force surveys in 1950,1951 and 1952 and of the monthly surveys in 1353,1954 and 1955.
2. The number of persons in the regular Ammed Forces not included in these totals is as follows: $1950,53,000$ persons; 1951, 77,000 persons; 1952,97,000 persons; 1953, 105,000 persons; 1954, 114,000 persons; 1955, 117,000 persons. The fizures are quarterly averages for the years $195 \%$ to 1952 , and monthly averages for the years 1753 to 1955.

[^0]:    1. Excludes military pay and allowances.
    2. Includes Yukon and North West Territories.
[^1]:    1. This item differs from the total of lines 4 and 5 , Table 1, in that it excludes undistrlbuted earnings (and the inventory valuation adjustment) of the Canadian Wheat Board, on a calendar year basls.
    2. Includes Yukon and North West Territories.
[^2]:    1. Includes charges for depreciation, obsolescence, anortization, capital outlay charged to current expense and that portion of business and residential property insurance.
    2. Includes bad debt charges (less recoveries) and claim portion of business theft, liability and fidelity insurance.
    3. Includes co-operatives and non-commercial institutions.
