## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics as well as the availability of micro data tapes and other services should be directed to:

Income and Housing Surveys Section,  
Household Surveys Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9775) or to the Statistics Canada reference centre in:

|            |            |                |            |

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements su sujet de cette publication, des bandes de microdonnées disponibles et des services connexes offerts doivent être adressées à:

Section des enquêtes sur le revenu et le logement,  
Division des enquêtes-ménages,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9775) ou au centre de consultation de Statistique Canada à:

|            |            |                |            |

**NOTE TO USERS**

The 1986 Census of Canada also collected information on 1985 incomes. These income data will be released in a series of census publications. Income size distributions of census families similar to those in this report will be published for Canada and the provinces in the census publication, *Family Income: Census Families*, Catalogue No. 93-117. Data on census family income in 1985 will also be released in a profile series for smaller geographic areas including Census Divisions and Subdivisions, Federal Electoral Districts, Census Metropolitan Areas and Census Agglomerations.

**NOTE AUX UTILISATEURS**

Le recensement du Canada de 1986 a aussi servi à recueillir des renseignements sur les revenus de 1985. Cette information paraîtra dans une série de publications consacrées au recensement. Une ventilation des revenus des familles de recensement selon la taille du revenu, analogue à celle publiée dans le présent rapport, sera fournie pour le Canada et les provinces dans la publication du recensement intitulée *Revenu des familles: familles de recensement*, n° 93-117 au catalogue. Les données sur le revenu des familles de recensement en 1985 seront aussi publiées dans une série de profils pour les régions géographiques plus petites, y compris les divisions et les subdivisions de recensement, les circonscriptions électorales fédérales, les régions métropolitaines de recensement et les agglomérations de recensement.

## COMMENTARY

This report is one of six which present 1985 income statistics from the annual Survey of Consumer Finances. Information on 1985 income for economic families and for households was contained in three earlier reports (Catalogue Numbers 13-206, 13-207 and 13-218). This report presents the data according to the census family concept.

As with the earlier reports released on 1985 income, the census family data for 1985 show a significant reversal in the trend of declining average census family income since 1980. After inflation adjustment, 1985 average income increased by an estimated 2.4%. However, overall real (inflation adjusted) family income levels remained 3.0% lower than in 1980. Real average per capita income in census families rose to a new peak in 1985, surpassing the previous high point reached in 1980.

## Highlights

### Census Families

- In 1985, average income of census families (estimated at \$37,368), increased 2.4% from 1984 on an inflation adjusted basis after four years of a downward trend. However, real average census family income was still 3.0% lower than in 1980.
- Average family income in the provinces ranged from a low of \$27,746 for Newfoundland to a high of \$40,949 for Ontario.
- The proportion of families receiving less than \$20,000 was 25.3% while 23.5% of all families received \$50,000 or more. Median family income was \$33,384.

### Persons Not in Families

- At \$15,762, average 1985 income for persons not in families increased by 2.8% in constant dollars from 1984. (Year-to-year change for persons not in families is subject to higher sampling error than the change for families.)
- Provincial average income ranged from \$10,648 in Prince Edward Island to \$17,644 in Alberta for non-family persons.
- Male and female average incomes were \$18,132 and \$13,876 respectively.

## COMMENTAIRES

Le présent document est l'un des six rapports statistiques sur le revenu de 1985 publiés à partir de l'enquête annuelle sur les finances des consommateurs. L'information sur le revenu de 1985 des familles économiques et des ménages a fait l'objet de trois rapports antérieurs (nos 13-206, 13-207 et 13-218 au catalogue). La présente publication expose des données équivalentes selon le concept de la famille de recensement.

Comme dans les rapports antérieurs sur le revenu de 1985, les données visant la famille de recensement en 1985 indiquent un net revirement de la situation si l'on considère que le revenu moyen de la famille de recensement baissait constamment depuis 1980. On a estimé à 2.4% la hausse du revenu moyen de 1985 corrigé de l'inflation. Toutefois, le niveau global du revenu réel (corrigé de l'inflation) de la famille est demeuré inférieur de 3.0% à celui enregistré en 1980. Le revenu moyen réel par habitant dans les familles de recensement a atteint un nouveau sommet en 1985, dépassant celui de 1980.

## Faits saillants

### Familles de recensement

- En 1985, le revenu moyen corrigé de l'inflation des familles de recensement (estimé à \$37,368) s'est accru de 2.4% par rapport à 1984, alors qu'il avait accusé une baisse les quatre années précédentes. Toutefois, le revenu moyen réel des familles de recensement est demeuré inférieur de 3.0% à celui enregistré en 1980.
- Le revenu moyen des familles dans les provinces variait entre un minimum de \$27,746 à Terre-Neuve et un maximum de \$40,949 en Ontario.
- La proportion de familles touchant moins de \$20,000 était de 25.3%, tandis que 23.5% des familles touchaient \$50,000 ou plus. Le revenu médian des familles s'élevait à \$33,384.

### Personnes hors famille

- Le revenu moyen des personnes hors famille s'établissait à \$15,762 en 1985, ce qui représente une hausse en dollars constants de 2.8% sur 1984. (La variation annuelle concernant les personnes hors famille peut faire l'objet d'une erreur d'échantillonnage plus importante que dans le cas des familles.)
- Le revenu moyen dans les provinces variait entre un minimum de \$10,648 à l'Île-du-Prince-Édouard et un maximum de \$17,644 en Alberta en ce qui concerne les personnes hors famille.
- Les revenus moyens des hommes et des femmes étaient \$18,132 et \$13,876 respectivement.

- For males and females, the proportions in receipt of income under \$5,000 were similar at 11.9% and 12.7% respectively. However, 25.6% of all males were in receipt of an income of at least \$25,000 as compared to 12.8% of females.
- Elderly females constituted 39.5% of female persons not in families, whereas, elderly males only accounted for 15.4% of male persons not in families.

#### Historical Summary

The following text table presents a historical overview of census family incomes and changes in selected characteristics of families.

**TEXT TABLE I. Average Income in Constant (1985) Dollars and Related Characteristics of Census Families and Persons Not in Families, 1971 to 1985**

**TABLEAU EXPLICATIF I. Revenu moyen en dollars constants (1985) et certaines caractéristiques des familles de recensement et des personnes hors famille, 1971 à 1985**

| 1971                | 30,486         | 8,307                     | 3.67                         | 1.31                                       | 1.82              | 1.54           | 11,688                 |
| 1972                | 31,753         | 8,772                     | 3.62                         | 1.25                                       | 1.82              | 1.55           | 12,674                 |
| 1973                | 33,283         | 9,297                     | 3.58                         | 1.22                                       | 1.88              | 1.61           | 12,744                 |
| 1974                | 35,181         | 10,052                    | 3.50                         | 1.16                                       | 1.90              | 1.63           | 13,453                 |
| 1975                | 35,561         | 10,308                    | 3.45                         | 1.13                                       | 1.91              | 1.60           | 13,433                 |
| 1976                | 37,849         | 11,035                    | 3.43                         | 1.10                                       | 1.94              | 1.61           | 14,216                 |
| 1977                | 36,863         | 10,685                    | 3.45                         | 1.07                                       | 1.94              | 1.64           | 14,428                 |
| 1978                | 37,844         | 11,297                    | 3.35                         | 0.99                                       | 1.96              | 1.64           | 14,644                 |
| 1979                | 37,497         | 11,328                    | 3.31                         | 0.99                                       | 1.98              | 1.67           | 15,209                 |
| 1980                | 38,513         | 11,742                    | 3.28                         | 0.94                                       | 2.02              | 1.68           | 15,284                 |
| 1981                | 37,960         | 11,680                    | 3.25                         | 0.93                                       | 2.04              | 1.70           | 16,190                 |
| 1982                | 37,249         | 11,568                    | 3.22                         | 0.89                                       | 2.05              | 1.68           | 15,918                 |
| 1983                | 36,988         | 11,523                    | 3.21                         | 0.88                                       | 2.06              | 1.66           | 15,292                 |
| 1984                | 36,498         | 11,514                    | 3.17                         | 0.87                                       | 2.06              | 1.65           | 15,335                 |
| 1985                | 37,368         | 11,939                    | 3.13                         | 0.85                                       | 2.07              | 1.66           | 15,762                 |

- Between 1971 and 1985, census family incomes increased by 22.6% in real terms. However, per capita family income<sup>1</sup> increased by 43.7% in the same period. The

<sup>1</sup> Per capita family income is average family income divided by average family size.

- La proportion des hommes et des femmes hors famille touchant un revenu inférieur à \$5,000 est à peu près la même qu'en 1984, soit 11.9% et 12.7% respectivement. Par contre, 25.6% de tous les hommes ont touché un revenu d'au moins \$25,000, comparativement à 12.8% pour les femmes.

- Il convient de noter que les femmes âgées représentent 39.5% des femmes hors famille, tandis que les hommes âgés ne comptent que pour 15.4% seulement des hommes hors famille.

#### Sommaire historique

Le tableau explicatif ci-après présente une vue d'ensemble rétrospective des revenus des familles de recensement et les changements dans certaines caractéristiques des familles.

- Entre 1971 et 1985, les revenus des familles de recensement ont augmenté de 22.6% en termes réels. Cependant, le revenu familial par habitant<sup>1</sup> s'est accru de 43.7% au cours de la même

<sup>1</sup> Le revenu familial par habitant est le revenu familial moyen divisé par la taille moyenne de la famille.

difference is due to decreasing family size (14.7% from 1971 to 1985), largely because of declining average number of children per family.

- For the 1971 to 1985 period, average family income peaked in 1980 at \$38,513, while on a per capita basis, 1985 was the high point at \$11,939. It is notable that the average per capita income reached the new peak in 1985 following four years of a downward trend.
- Real average income on both a per capita and a family basis increased from 1984 to 1985. However, on a per capita basis, it was 1.7% higher than the previous peak of 1980 while family income was still 3.0% lower than the 1980 high point. Both family and per capita incomes trended upward between 1971 and 1980 then declined until 1984.
- During the period of increasing real average family income, there was a significant increase in the number of earners per family, from 1.54 in 1971 to 1.70 in 1981. After 1981, it declined to 1.65 in 1984 following in line with the declining income trend and then showed a slight increase to 1.66 in 1985.

période. Cette différence s'explique par le fait que la taille de la famille a baissé de 14.7% entre 1971 et 1985 surtout en raison d'une diminution du nombre moyen d'enfants par famille.

- Entre les années 1971 et 1985, le revenu moyen de la famille atteignait un sommet en 1980 pour s'établir à \$38,513 tandis que le revenu moyen par habitant atteignait son plus haut point, à \$11,939, en 1985. Il est à noter que le revenu moyen par habitant atteignait un nouveau sommet en 1985 après quatre années de régression soutenue.
- Le revenu moyen réel par habitant et le revenu moyen réel de la famille se sont accrus entre 1984 et 1985. Par contre, le revenu moyen réel par habitant était supérieur de 1.7% au sommet atteint en 1980, tandis que le revenu moyen réel de la famille était demeuré inférieur de 3.0% à ce sommet. Les revenus réels de ces deux entités ont progressé entre 1971 et 1980 et régressé ensuite jusqu'en 1984.
- Pendant la période de croissance du revenu familial moyen réel, il y a eu une augmentation appréciable du nombre de personnes gagnant un revenu par famille, qui est passé de 1.54 en 1971 à 1.70 en 1981. Après 1981, ce nombre est tombé à 1.65 en 1984, suivant ainsi la tendance à la baisse du revenu familial moyen réel, puis a affiché une légère hausse en 1985, s'établissant à 1.66.

## NOTES AND DEFINITIONS

This report is produced annually in order to provide income distributions on a census family basis, rather than the economic family concept used in other reports issued from the Survey of Consumer Finances (SCF). The major difference between census and economic families relates to the population not in families. Unattached Individuals under the economic family definition are also known as Persons Not in Families according to the census family concept. Persons that are part of an economic family but not in a husband/wife/never married child relationship may also be Persons Not in Families by the census family definition (e.g. elderly widowed parents). As a result, there are significantly more Persons Not in Families (census family definition) than Unattached Individuals (economic family definition). For a more detailed explanation of the differences between the two family concepts, see the section entitled "Comparison of Census and Economic Families".

The current survey was conducted in April 1986 as a supplement to the monthly Labour Force Survey using two thirds of the regular sample (34,883 households). The sample represents virtually all private households in Canada except for residents of the Yukon and Northwest Territories, households located on Indian reserves and inmates of institutions. Since the estimates in this report are based on a sample household survey, they are subject to sampling variability. They are also subject to response errors (by respondents, interviewers and during processing) as well as errors due to non-response.

The definition of family used in this publication is consistent with the family concept commonly used by Canadian Censuses. It should be noted, however, that the data produced by the Census and the survey are not completely comparable due to coverage and other minor differences.

A detailed description of the Survey of Consumer Finances and methods used in data collection, processing and estimation can be found in **Income Distributions by Size in Canada, 1985**, Catalogue No. 13-207. The key definition, that of income, is repeated in this section where the census family concept is also explained.

## NOTES ET DÉFINITIONS

Ce bulletin est publié chaque année et présente une répartition des revenus selon le concept de la famille de recensement plutôt que d'après le concept de la famille économique utilisé dans d'autres bulletins préparés à partir de l'enquête sur les finances des consommateurs (EFC). La principale différence entre la famille de recensement et la famille économique se rapporte aux personnes hors famille. Les personnes seules, telles qu'elles sont définies aux fins de la famille économique, correspondent aux personnes hors famille définies suivant le concept de la famille de recensement. Les personnes qui font partie d'une famille économique mais qui n'ont pas de liens conjugaux (époux-épouse) ou de liens de filiation (enfants jamais mariés) peuvent aussi être déclarées comme des personnes hors famille selon la définition de la famille de recensement (p. ex. parent âgé dont le conjoint est décédé). Ainsi, on compte un nombre beaucoup plus grand de personnes hors famille (définition de la famille de recensement) que de personnes seules (définition de la famille économique). Pour une explication plus détaillée des différences existant entre les deux concepts de la famille, se reporter à la section intitulée "Comparaison des familles de recensement et des familles économiques".

L'enquête sur les finances des consommateurs a été menée en avril 1986 en tant que supplément de l'enquête mensuelle sur la population active utilisant deux tiers de l'échantillon régulier (34,883 ménages). L'échantillon représente pratiquement tous les ménages privés du Canada, à l'exception des habitants du Yukon et des Territoires du Nord-Ouest, des ménages situés dans des réserves indiennes et des pensionnaires d'institutions. Étant donné que les estimations ici sont basées sur une enquête-échantillon de ménages, elles sont sujettes à une variabilité d'échantillonnage. Il faut également tenir compte des erreurs dans les réponses (commises par les répondants, les interviewers ou au cours du traitement) ainsi que des erreurs attribuables à la non-réponse.

La définition de la famille utilisée dans cette publication est celle qui est couramment employée lors des recensements du Canada. Il convient toutefois de noter que les données produites par le recensement et par l'enquête ne sont pas entièrement comparables à cause de caractéristiques différentes, notamment le champ d'enquête.

On trouvera une description détaillée de l'enquête sur les finances des consommateurs, des méthodes de collecte, de traitement et d'estimation des données dans **Répartition du revenu au Canada selon la taille du revenu, 1985**, no 13-207 au catalogue. La définition principale, soit celle du revenu, est répétée dans la présente section. On y explique également le concept de la famille de recensement.

## Family

A census family, sometimes also referred to as an "immediate family" or "nuclear family", consists of either a husband and wife (with or without children who have never married) or a parent with one or more children who have never married, living together in the same dwelling. Unmarried children, regardless of their age, living with their parent(s) are considered a part of the family, i.e. a census family includes adult children as long as they are not married, separated, divorced or widowed. For purposes of the Survey of Consumer Finances, adopted children, step-children and guardianship children under 21 are counted as own children although this is not necessarily the case in the Census.

## Persons Not in Families

A person not in family is an individual who is living alone or living with unrelated individuals (as a lodger, employee or partner) or living with relatives but not in a husband-wife or parent-unmarried child (including guardianship child) relationship.

## Individuals With Income or Income Recipients

An individual with income or an income recipient is any person 15 years or over who received some money income in 1985.

## Earner

An earner is a person who received wages and salaries and/or net income from self-employment in 1985.

## Head of Family

For the purposes of this report, the head of a family is determined as follows: (i) in families consisting of married couples with or without children, the husband is considered the head, (ii) in lone-parent families with unmarried children, the parent is the head.

## Age and Sex

The age and sex variables for census family tables are determined as follows: husband-wife families use the age of the husband and lone-parent families use the age and sex of the parent.

## Famille

Une famille de recensement, quelquefois appelée "famille immédiate" ou "famille nucléaire", se compose d'un époux et d'une épouse (avec ou sans enfants célibataires) ou de l'un ou l'autre des parents avec un ou plusieurs enfants célibataires, vivant dans le même logement. Les enfants célibataires, quel que soit leur âge, font partie de la famille s'ils vivent avec leurs parents, c.-à-d. qu'une famille de recensement comprend les enfants adultes tant qu'ils ne sont pas mariés, séparés, divorcés ou veufs. Aux fins de l'enquête sur les finances des consommateurs, les enfants adoptés, les enfants d'un autre lit et les enfants en tutelle, de moins de 21 ans, ont le même statut que les enfants issus du mariage, bien que ce ne soit pas nécessairement le cas dans le recensement.

## Personnes hors famille

Une personne hors famille est une personne vivant seule ou avec des personnes non apparentées (par exemple, comme chambreur, employé ou associé) ou avec des personnes apparentées auxquelles elle n'est pas liée par des liens conjugaux ou des liens de filiation (ou de tutelle) si elle n'est pas mariée.

## Particuliers ayant un revenu ou bénéficiaires d'un revenu

Un particulier ayant un revenu ou un bénéficiaire d'un revenu est une personne de 15 ans ou plus qui, en 1985, a reçu un revenu monétaire quelconque.

## Personne gagnant un revenu

La personne gagnant un revenu est celle qui a reçu, en 1985, un salaire et traitement et/ou un revenu net provenant d'un emploi autonome.

## Chef de famille

Aux fins de ce bulletin, le chef de famille est défini comme suit: (i) dans les familles se composant d'un couple marié avec ou sans enfants, le chef de famille est l'époux, (ii) dans les familles monoparentales avec des enfants célibataires, le chef de famille est le père ou la mère.

## Âge et sexe

Dans les tableaux de la famille de recensement, les variables "âge" et "sexe" sont définies comme suit: dans les familles époux-épouse, l'âge de l'époux est utilisé tandis que dans les familles monoparentales, ce sont l'âge et le sexe du parent.

## **Family Characteristics**

The classification "family characteristics" is based on the relationship and marital status of the family members. The sub-categories of families are husband-wife families and lone-parent families.

## **Family Life Cycle**

The classification "family life cycle" is similar to "family characteristics" in that it also groups families in two major categories: husband-wife families and lone-parent families. However, in this classification, husband-wife families are further broken down by the age of the husband (under 45 years; 45 years and over) and the presence or absence of children under 16 years.

## **Family Size**

Family size refers to the total number of persons in the family as constituted at the time of the survey, including both adults and children of any age.

## **Number of Children**

The variable "number of children" used in the tabulations is a count of the number of children under 6 years of age, under 16 years of age and under 18 years of age present in a family. Table headings specify which age group is being tabulated.

## **Size of Area of Residence**

The size of area classification is based on 1981 Census geographic boundaries and 1981 Census population counts in urban and rural areas as designated by the Labour Force Survey. Five size of area of residence groups are identified: four classes for urban areas (population 500,000 and over, 100,000 to 499,999, 30,000 to 99,999, and under 30,000) and one group for rural areas.

## **Tenure**

The classification "tenure" contains two categories: owners and renters. The "owners" category is further classified by "with mortgage" and "without mortgage". "Renters" also includes roomers, lodgers, and family units and individuals who received free lodging or who resided with employers.

## **Caractéristiques des familles**

La variable "caractéristiques des familles" est basée sur les liens de parenté et l'état matrimonial des membres de la famille. Les sous-catégories de familles sont les familles époux-épouse et les familles monoparentales.

## **Cycle de vie de la famille**

La variable "cycle de vie de la famille" s'apparente aux "caractéristiques des familles", en ce sens qu'elle divise les familles en deux groupes principaux: les familles époux-épouse et les familles monoparentales. Dans la présente classification, toutefois les familles époux-épouse sont ensuite décomposées selon l'âge de l'époux (moins de 45 ans, 45 ans et plus) et selon qu'il y a ou non des enfants de moins de 16 ans.

## **Taille de la famille**

La taille de la famille représente le nombre total de personnes (adultes et enfants de tous âges) faisant partie de la famille au moment de l'enquête.

## **Nombre d'enfants**

La variable "nombre d'enfants" utilisée dans les totalisations désigne le nombre d'enfants de moins de 6 ans, de moins de 16 ans et de moins de 18 ans présents dans une famille. Dans tous les cas, les titres des tableaux précisent les groupes d'âge utilisés dans les totalisations.

## **Taille de la région de résidence**

La classification selon la "taille de la région de résidence" est basée sur les frontières géographiques du recensement de 1981 et sur la population du recensement de 1981 dans les régions urbaines et rurales, désignées par l'enquête sur la population active. Cinq groupes de taille de région de résidence comprennent quatre catégories pour les régions urbaines (500,000 habitants et plus, 100,000 à 499,999 habitants, 30,000 à 99,999 habitants, et moins de 30,000 habitants) et une catégorie pour les régions rurales.

## **Mode d'occupation**

La variable "mode d'occupation" se divise en deux catégories: propriétaires et locataires. La catégorie des propriétaires est ventilée en "avec emprunt hypothécaire" et "sans emprunt hypothécaire". Les "locataires" comprennent également les chambreurs, les pensionnaires ainsi que les unités familiales et les particuliers qui reçoivent le gîte gratuitement ou qui demeurent avec leur employeur.

## Income and its Components

### Total Income

Total income consists of all money income receipts from the following sources: wages and salaries (before deductions for taxes, pensions, etc.), net income from self-employment (including net income from farming, independent professional practice and roomers and boarders), investment income (i.e. interest, dividends, rental income), government transfer payments (such as Family Allowances, Old Age Security, refundable provincial tax credits, child tax credit), pensions (such as retirement pensions, annuities and superannuation), and miscellaneous income (e.g. scholarships, alimony, etc.).<sup>2</sup>

### Receipts Not Counted as Income

Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump sum settlements of insurance policies, and rebates of property taxes and other taxes were excluded as well as all income in kind such as free meals, living accommodation, or food and fuel produced on own farm.<sup>2</sup>

### Family Income

Family income is defined to consist of incomes received by all individuals 15 years of age and over who at the time of the survey formed one census family. Income data were collected from each member and considered to be part of the family's income even if certain family members belonged to another family unit for the whole or part of the preceding calendar year. Also, no recall or adjustment was made to account for income of persons who were members of the family for part of the year and who left because of marriage, death or other reasons.

### Number of Records

The term "number of records" refers to the number of income respondents plus the number of records with imputed income

<sup>2</sup> For further details, see "Notes and Definitions", in *Income Distributions by Size in Canada, 1985*, Catalogue No. 13-207.

## Revenu et composantes du revenu

### Revenu total

Le revenu total comprend toutes les recettes en espèces provenant des sources suivantes: salaires et traitements (avant déduction des impôts, des pensions, etc.), revenu net provenant d'un emploi autonome (y compris le revenu net agricole ou provenant de l'exercice d'une profession et le revenu net provenant de l'hébergement de chambreurs et de pensionnaires), revenus de placements (tels que revenu d'intérêts, de dividendes et de loyers), transferts (tels que les allocations familiales, les pensions de vieillesse, les crédits d'impôt provinciaux remboursables, le crédit d'impôt pour enfants), pensions (telles que les pensions de retraite et rentes), et revenus divers (bourses d'études, pensions alimentaires, etc.).<sup>2</sup>

### Gains non comptés comme revenus

Sont exclus du revenu: les gains et pertes au jeu, les sommes globales héritées au cours de l'année, les gains ou les pertes de capital, le produit de la vente de propriétés ou de biens personnels, les remboursements d'impôt sur le revenu, les prêts reçus, les prêts remboursés à un particulier agissant comme prêteur, les règlements forfaitaires en matière d'assurance, les remboursements de l'impôt foncier ou d'autres impôts ainsi que les avantages en nature comme les repas gratuits et le gîte, ou encore la nourriture et le combustible produits sur sa propre ferme.<sup>2</sup>

### Revenu de la famille

Le revenu de la famille se compose de tous les revenus reçus par tous les particuliers âgés de 15 ans et plus qui, au moment de l'enquête, constituaient une famille de recensement. Les données sur le revenu ont été recueillies auprès de chaque membre et considérées comme portant sur le revenu de la famille, même si certains membres de la famille avaient appartenu à une autre unité familiale pendant une partie ou la totalité de l'année civile précédente. En outre, on n'a effectué aucun retrait ou ajustement pour tenir compte du revenu des personnes qui avaient été membres de la famille pendant une partie de l'année et qui ont cessé d'en faire partie pour cause de mariage, de décès ou toute autre raison.

### Nombre de dossiers

Le terme "nombre de dossiers" comprend les dossiers des répondants ainsi que ceux des non répondants à qui l'on a imputé des données sur

<sup>2</sup> Pour plus de détails, voir "Notes et définitions" dans *Répartition du revenu au Canada selon la taille du revenu, 1985*, n° 13-207 au catalogue.

details. This terminology is used to show the inclusion of imputed records in contrast to the term "sample size" used in pre-1977 reports to indicate income respondents only. For a detailed explanation of the estimation methodology, see "Sources, Methods and Estimation Procedures" in Catalogue No. 13-207, 1985.

#### COMPARISON OF CENSUS AND ECONOMIC FAMILIES

The main series of income reports based on Surveys of Consumer Finances, the latest of which is **Income Distributions by Size in Canada, 1985**, Catalogue No. 13-207, employs a broader family definition (economic family) than the census family. The definition of economic family includes all relatives living in the same dwelling and also classifies persons living by themselves or in a household where they are not related to other household members as unattached individuals.

The series on income distributions of census families and persons not in families was started with the publication of the report **Family Incomes (Census Families), 1967**, Catalogue No. 13-538, in recognition of the fact that, for different purposes, groupings of individuals into units other than the economic family might be more appropriate.

In the majority of cases, grouping the population according to census family rather than economic family definition does not result in family composition changes within households, since most households contain only an immediate family which by either definition is one unit.<sup>3</sup>

In those situations where a composition change does occur, an economic family can be divided into:

- (i) two or more census families;
- (ii) one or more census families with one or more persons not in families present;
- (iii) a group of persons not in families.

For example, parents living with their married son and his wife would be considered as part of the economic family, whereas in census terms, both couples are counted as separate families; one economic family of

le revenu. On utilise ce terme afin d'indiquer que les dossiers des personnes auxquelles on a imputé des données sont compris, alors que le terme "taille de l'échantillon", employé dans les bulletins antérieurs à 1977, ne désigne que le nombre de répondants. On trouvera une explication détaillée de la méthode d'estimation à la section "Sources, méthodes et procédures d'estimation" de la publication n° 13-207 au catalogue, 1985.

#### COMPARAISON DES FAMILLES DE RECENSEMENT ET DES FAMILLES ÉCONOMIQUES

La principale série des publications sur le revenu fondées sur les enquêtes sur les finances des consommateurs, dont la plus récente est **Répartition du revenu au Canada selon la taille du revenu, 1985**, n° 13-207 au catalogue, utilise une définition plus large de la famille (famille économique) que la famille de recensement. La définition de la famille économique comprend toutes les personnes apparentées habitant le même logement; elle classe aussi comme personnes seules les personnes habitant seules ou dans un ménage où elles ne sont pas apparentées aux autres membres du ménage.

La série sur la répartition du revenu des familles de recensement et des personnes hors famille commençait avec la publication de **Family Incomes (Census Families), 1967**, n° 13-538 au catalogue. On avait reconnu le fait que, à diverses fins, le regroupement des personnes en unités autres que la famille économique pourrait s'avérer plus approprié.

Dans la plupart des cas, le classement de la population selon les familles de recensement plutôt que selon les familles économiques ne fait pas changer la composition des familles au sein des ménages, car la plupart des ménages se composent d'une seule famille qui, selon les deux définitions, représente une unité<sup>3</sup>.

Dans le cas où la composition de la famille change, on peut diviser une famille économique en:

- (i) deux ou plusieurs familles de recensement;
- (ii) une ou plusieurs familles de recensement avec une ou plusieurs personnes hors famille qui sont présentes;
- (iii) un groupe de personnes hors famille.

Par exemple, les parents habitant avec leur fils marié et son épouse seraient considérés comme faisant partie de la famille économique tandis que, pour le recensement, les deux couples seraient comptés comme des familles distinctes;

<sup>3</sup> For a detailed discussion of differences between the economic family and census family concepts, see **Family Incomes (Census Families), 1977**, Catalogue No. 13-208, pages 13 to 24.

<sup>3</sup> Voir un exposé détaillé sur les différences qui existent entre les familles économiques et les familles de recensement dans **Revenus des familles (Familles de recensement), 1977**, n° 13-208 au catalogue, pages 13 à 24.

size four becomes two census families of two persons each. In other cases, related individuals, like elderly widowed parents, are absorbed into the economic family, whereas according to the census definition, they are persons not in families. Finally, the census defines a household that contains two or more related individuals such as sisters or brothers as a non-family household consisting of persons not in families, whereas according to the economic family definition these individuals would form one family.

The grouping of individuals into families under the two different definitions does not make a great deal of difference to the number of families; nationally, the number of economic families is only slightly higher than the number of census families. Consequently, the income picture also changes very little. Average income of all census families at \$37,368 is somewhat lower than that of all economic families (\$38,059) as can be seen in Text Table II. This is due to the splitting-off of related families and persons not in families who in the economic family series were part of the family. The resulting census families are smaller and have less income, having lost members with income.

une famille économique de quatre personnes devient deux familles de recensement comptant chacune deux personnes. Dans d'autres cas, des personnes apparentées, comme un père ou une mère âgé et veuf, sont absorbées dans la famille économique, tandis que selon la définition du recensement, ce sont des personnes hors famille. Finalement, le recensement définit un ménage comptant deux ou plusieurs personnes apparentées, par exemple des frères ou des soeurs, comme un ménage non familial comprenant des personnes hors famille, tandis que selon la définition de la famille économique, ces personnes constituerait une famille.

Le classement des personnes selon les deux genres de familles n'influe pas beaucoup sur le nombre de familles; au niveau national, le nombre de familles économiques n'est que légèrement supérieur au nombre de familles de recensement. En conséquence, le revenu varie également très peu. Le revenu moyen de toutes les familles de recensement, soit \$37,368 est quelque peu inférieur à celui de l'ensemble des familles économiques (\$38,059), comme le montre le tableau explicatif II. Cela est dû au fait que des familles apparentées et des personnes hors famille qui faisaient partie de la famille économique ont été écartées. Les familles de recensement qui en résultent sont plus petites et ont moins de revenu, car elles ont perdu des membres recevant un revenu.

TABLE II. Percentage Distribution of Economic Families, of Census Families, of Unattached Individuals and Persons not in Families, by Income Groups, 1985

TABLEAU EXPLICATIF II. Répartition en pourcentage des familles économiques, des familles de recensement, des personnes seules et des personnes hors famille, selon la tranche de revenu, 1985

| Income group   | Economic families    | Census families         | Income group   | Unattached individuals | Persons not in families |
|--|----------------------|-------------------------|--|------------------------|-------------------------|
| Tranche de revenu  | Familles économiques | Familles de recensement | Tranche de revenu  | Personnes seules       | Personnes hors famille  |
| per cent - pourcentage   |                      |                         |  |                        |                         |
| Under \$5,000 - Moins de \$5,000                               | 1.3                  | 1.6                     | Under \$2,000 - Moins de \$2,000                               | 3.3                    | 4.6                     |

The definitional differences between census and economic families have the greatest impact in changing the size of the population not in families. From Text Table II, it can be seen that there were approximately 778,000 individuals in 1985 who were classified as persons not in families based on census family definition although they had been part of an economic family, i.e. they were living in households where they were related to at least one other household member. The income of these persons not in families has in past studies always been found to be considerably lower than that of unattached individuals. Consequently in 1985, average income of all persons not in families at \$15,762 is also lower than that of all unattached individuals at \$16,729.

La différence de définition entre la famille de recensement et la famille économique contribue surtout à modifier la taille de la population hors famille. Selon le tableau explicatif I environ 778,000 personnes étaient classées comme personnes hors famille en 1985, d'après la définition de la famille de recensement, même si elles faisaient partie d'une famille économique, c'est-à-dire même si elles habitaient dans des ménages où elles étaient apparentées à au moins un autre membre du ménage. Il est ressorti d'études antérieures que le revenu des personnes hors famille a toujours été de beaucoup inférieur à celui des personnes seules. Par conséquent, le revenu moyen des personnes hors famille (\$15,762) en 1985 est également moindre que celui des personnes seules (\$16,729).
