Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in this document.

- .. figures not appropriate or not applicable.
- nil or zero.

Users can consult the *Guide to the Financial Flow and National Balance Sheet Accounts* (Catalogue No. 13-585-XPE) for a more in-depth explanation of concepts and methods. The statistics in these tables are also available on microcomputer diskettes for \$60 for an annual subscription, or on CANSIM, Statistics Canada's on-line computer database.

To Order

To order, call 613-951-3640 and ask for the client services officer. For information on the content, call the same number and ask for the information officer.

Note

The statistical tables are organized in the form of a matrix for each year. Four years of balance sheet data are presented for each of the sectors in the National Balance Sheet Accounts. Most of the series in these tables have two lines. The first of these lines is the series itself, and the second line (italicized) is the percentage change.

The analytical document shows data and charts for a large number of the main series in the National Balance Sheet Accounts. The series are expressed, most often, as (i) original data (in millions of dollars), (ii) first differences, (iii) percentage changes, and as (iv) ratios to various related series; in some instances, second differences are shown.

National wealth, referred to in the analytical document, is defined as the non-financial assets on the national balance sheet.

The data and charts for trust and mortgage loan companies, represent only trust companies prior to 1984.

In the two instances where constant dollar estimates are shown, these are derived using the GDP implicit price index as a deflator.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans ce document.

- .. n'ayant pas lieu de figurer.
- néant ou zéro.

Les utilisateurs peuvent consulter le *Guide des comptes des flux financiers et des comptes du bilan national* (N° 13-585-XPF au catalogue) pour une explication approfondie des concepts et méthodes. Les statistiques dans ces tableaux sont aussi disponibles sur disquette pour micro-ordinateur au prix de 60\$ par an, ou dans la base de données CANSIM de Statistique Canada.

Pour commander

Pour commander, veuillez communiquer avec le responsable de services aux clients au 613-951-3640. Pour plus de renseignements sur le contenu de ce document, veuillez communiquer avec l'agent d'information au même numéro que précédemment.

Note

Les tableaux statistiques sont présentés sous forme de matrice pour chacune des années. Les estimations des Comptes du bilan national sur une base sectorielle sont également incluses et couvrent une période de quatre ans. La plupart des séries figurent dans ces tableaux sous deux lignes. La première ligne représente la série elle-même alors que la deuxième ligne, en italique, se réfère à la variation en pourcentage.

Les principales composantes des Comptes du bilan national sont présentées dans le document analytique sous forme de données actuelles et de graphiques. Les séries sont généralement exprimées sous forme de (i) données actuelles (en millions de dollars), (ii) première différence, (iii) variation en pourcentage, (iv) en proportion de diverses séries connexes; dans quelques cas, la deuxième différence est présentée.

Le patrimoine national, mentionné dans le document analytique, est défini comme les actifs non-financiers dans le bilan national.

Les données et les graphiques sur les sociétés de fiducie et de prêts hypothécaires, représentent seulement les sociétés de fiducie et ce, avant 1984.

Les estimations en dollars constants, mentionnées à deux reprises dans le document, sont obtenues en utilisant l'indice implicite de prix du PIB comme dégonfleur.

Overview

This version of the National Balance Sheet Accounts provides preliminary estimates for 2001, and revised estimates for previous years, of non-financial assets, financial assets, liabilities and net worth in the sectors of the economy as well as for the economy as a whole (the National Balance Sheet).

Selected Definitions

The **national balance sheet** is an aggregate balance sheet for the economy; it is the sum of all domestic sectors' balance sheets.

National wealth is defined as the sum of non-financial assets across all domestic sectors, as shown on the national balance sheet. This is a restricted measure of the nation's wealth as it currently excludes natural resources (except for land surrounding structures and agricultural land) as well as other physical assets such as collector's items and historical monuments.

National net worth is calculated as total assets less liabilities on the national balance sheet. It is also equal to the national wealth less the net international investment position (a liability). Finally, it is the sum of the domestic sectors' net worth.

The balance sheet of the **non-resident sector** covers claims between Canadian residents and non-residents. The net financial assets, or net worth, of the non-resident sector represents the net international investment position (formerly called the net international indebtedness position) of Canada.

The **credit market summary table** is a compilation of National Balance Sheet Accounts data designed to provide an overview of credit market debt and assets in the economy. Sector balance sheet components are aggregated and non-market instruments (such as trade credit and deposits) are removed. The emphasis in this table is on credit market debt of domestic non-financial sectors - persons, corporations and governments.

The reader is advised to consult **A Guide to the Financial Flow and National Balance Sheet Accounts** (Catalogue No. 13-585-XPE) for a detailed outline of the concepts and methods underlying the estimates.

Aperçu

Cette édition des Comptes du bilan national présente les estimations préliminaires de 2001 et des estimations révisées pour les années antérieures, pour les actifs financiers et non financiers, du passif et de la valeur nette dans les secteurs de l'économie ainsi que pour l'économie totale (le bilan national).

Certaines définitions

Le **bilan national** consiste en un bilan consolidé pour l'économie, correspondant à la somme des bilans de tous les secteurs intérieurs.

Le **patrimoine national** est défini comme la somme des actifs non-financiers pour l'ensemble des secteurs intérieurs, tel qu'il figure dans le bilan national. Il s'agit d'une mesure restreinte de la richesse de la nation en ce sens qu'elle exclut présentement les ressources naturelles (si ce n'est les terrains entourant les bâtiments et les terres agricoles) et d'autres actifs tangibles comme les pièces de collection et les monuments historiques.

La **valeur nette nationale** est calculée comme le total de l'actif moins le total du passif dans le bilan national. Elle est aussi égale au patrimoine national moins le bilan net des investissements internationaux (un engagement). Enfin, elle est la somme de la valeur nette des secteurs intérieurs.

Le **bilan du secteur des non-résidents** couvre les créances entre résidents canadiens et non-résidents. Les actifs financiers nets, ou valeur nette, du secteur des non-résidents représentent le bilan net des investissements internationaux (autrefois appelé bilan net de l'endettement international) du Canada.

Le **tableau sommaire du marché du crédit** présente une compilation des données des comptes du bilan national visant à mettre en lumière la dette et les actifs sur le marché du crédit dans l'économie. Les éléments des bilans sectoriels y sont agrégés et les instruments hors marché (comme les dépôts et les effets à recevoir ou à payer) en sont soustraits. L'accent porte dans ce tableau sur la dette des secteurs non financiers intérieurs (particuliers, sociétés et administrations) auprès du marché du crédit.

Le lecteur est prié de consulter le **Guide des comptes des flux financiers et des comptes du bilan national** (Nº 13-585-XPF au catalogue) pour une description détaillée des concepts et méthodes employées dans le calcul des estimations.
